AHCAIS304 Artificially inseminate livestock

Release: 1

AHCAIS304 Artificially inseminate livestock

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 7.0.

Application

This unit of competency describes the skills and knowledge required to prepare for and artificially inseminate livestock, complete documentation and records, and complete work.

The unit applies to individuals who artificially inseminate livestock under broad direction, and take responsibility for their own work.

All work must be carried out to comply with workplace procedures, health and safety in the workplace requirements, animal welfare legislative, regulatory and codes of practice requirements, and biosecurity practices.

Accreditation requirements apply in some jurisdictions to performing commercial artificial insemination (AI). Users are advised to check with the relevant State or Territory regulatory authority.

Pre-requisite Unit

Nil

Unit Sector

Artificial Insemination (AIS)

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for insemination of animals	1.1 Organise resources and personnel to ensure optimal timing of the insemination process 1.2 Follow workplace animal welfare and hygiene practices, and biosecurity policies

Elements	Performance Criteria
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
	1.3 Access and store semen supplies 1.4 Prepare animals to maximise success of insemination program 1.5 Identify potential hazards and risks, and implement safe working practices to address risks 1.6 Select, fit, use and maintain personal protective equipment applicable to the task
2. Inseminate animals	2.1 Select, prepare and thaw semen 2.2 Monitor and check insemination equipment to ensure it is sterile, clean and used appropriately 2.3 Identify and observe intended recipient animal and check for signs of oestrus activity 2.4 Restrain and prepare intended recipient animal humanely and appropriately for insemination 2.5 Conduct insemination using techniques appropriate to animal type and applying correct hygiene procedures
3. Complete documentation and records	3.1 Document and record data on insemination process 3.2 Supply information to relevant authorities to promote research and improvements in industry practice 3.3 Identify and record modifications to herd program to assist continuous improvement processes
4. Complete work	4.1 Dispose of waste according to workplace procedures 4.2 Clean and maintain work area and equipment according to workplace procedures 4.3 Return animals to designated areas

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description
--------------	--------------------

Skill	Description
Reading	<ul style="list-style-type: none"> Identify and interpret textual information from a range of sources to identify relevant and key information about livestock AI operations
Writing	<ul style="list-style-type: none"> Use clear language, accurate industry terminology and logical structure to prepare AI documents and records
