AHCPHT416 Manage mushroom crop development

Release: 1

AHCPHT416 Manage mushroom crop development

Modification History

Release	Comments	
	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.	

Application

This unit of competency describes the skills and knowledge required to manage mushroom crop development, including the selection, application and management of the mushroom casing and all activities up to the end of the harvesting period.

The unit applies to individuals who apply specialist skills and knowledge to manage mushroom crop development. This includes applying and communicating non-routine technical solutions to predictable and unpredictable problems.

All work is carried out to comply with workplace procedures, health and safety in the workplace requirements, legislative and regulatory requirements, and sustainability and biosecurity practices.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Production Horticulture (PHT)

Elements and Performance Criteria

Elements	Performance Criteria	
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.	
1. Manage casing	1.1 Select casing materials and recipe	
application	1.2 Assess condition and quality of spawn run before casing	
	1.3 Select product and rate of application where supplement is to be

	added to substrate at casing, and instruct appropriate personnel		
	1.4 Confirm casing mixture is checked against workplace standards for moisture, structure and depth, and confirm remedial action has been taken if required		
2. Control environment	2.1 Install crop in growing room according to workplace procedures		
during casing colonisation growth phase	2.2 Set up growing room air conditioning system and check for correct functioning		
	2.3 Measure, record and adjust temperature, relative humidity and carbon dioxide content as required		
	2.4 Assess mycelium growth and determine timing and quantity of water to be applied		
	2.5 Monitor and record pest and disease status and take remedial action as required		
3. Initiate fruit body formation and manage pinning and pre-picking growth phases	3.1 Assess growth and make changes to temperature and ventilation to initiate fruit body formation according to workplace procedures		
	3.2 Record and adjust temperature, relative humidity and carbon dioxide content		
	3.3 Identify and analyse variations from expected or required ranges of temperature, relative humidity and carbon dioxide content, and take appropriate remedial action		
	3.4 Assess mycelium development and pin development, and determine timing and quantity of water and additives to be applied to water		
	3.5 Monitor and record pest and disease status, and take remedial action as required		
4. Assess crop maturity,	4.1 Assess crop maturity to determine when and what to pick		
flush development and quality, and monitor the harvesting process	4.2 Instruct pickers on tasks to be performed		
	4.3 Monitor picking results to ensure instructions continue to be appropriate and are being carried out		
	4.4 Consult markets to ensure product meets market needs and specifications		
	4.5 Monitor crop quality, recognise disorders stimulated by environmental conditions, and implement remedial action as required		
	4.6 Monitor and record pest and disease status during this stage of

	crop development, and take remedial action as required
	4.7 Plan daily work schedule for waterers, and coordinate picking and watering schedules
	4.8 Review harvest process for compliance with quality standards, and identify, document and implement areas for improvement as appropriate
	4.9 Provide feedback to pickers on individual and team performance

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential for performance in this unit of competency but are not explicit in the performance criteria.

Skill	Description	
Reading	Identify and interpret information regarding requirements for managing mushroom crop development	
Writing	• Use clear language, accurate industry terminology and logical structure to document harvest process and areas for improvement
