**Release 1**

# AHCSS00130 Access, Extract and Monitor Water For Irrigation Skill Set

## Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 8.0.

## Description

This skill set provides the skills and knowledge required to access, extract and monitor irrigation water onto properties for agricultural use, including water attached to entitlements and/or water that is available on the temporary market.

## Pathways Information

This unit of competency provides credit towards *AHC32422 Certificate III in Irrigation Technology*.

## Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

## Skill Set Requirements

- AHCWAT303 Access, extract and monitor water for irrigation

## Target Group

This skill set is for skilled irrigators and other agricultural workers that apply knowledge and skills to access and extract water on to properties for agricultural use. Irrigators may own and operate their own infrastructure (private diverters) and/or access water via infrastructure within an irrigation network.

## Suggested words for Statement of Attainment

This competency from the *AHC Agriculture, Horticulture and Conservation and Land Management Training Package* meets the industry requirements to interpret water licences and/or accounts to access, extract and monitor water for irrigation.
