CPCPWT3027A Connect irrigation systems from drinking water supply

Modification History

Prerequisite unit changed

Minor changes throughout the unit

Not equivalent to CPCPWT3017A

Unit Descriptor

This unit of competency specifies the outcomes required to connect irrigation and watering systems from a drinking water supply. It does not include the commissioning of backflow prevention devices or arrangements.

Application of the Unit

Site location for work application may be either domestic or commercial, and may be a new work site or an existing structure being renovated, extended, restored or maintained.

Licensing/Regulatory Information

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites

CPCPCM2043A Carry out WHS requirements

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent

with the evidence guide.

Elements and Performance Criteria

- | | | |
|----------|--|--|
| 1 | Prepare for work. | <p>1.1 Plans and specifications are obtained.</p> <p>1.2 Work health and safety (WHS) and environmental requirements associated with connecting irrigation systems from a drinking water supply are adhered to throughout the work.</p> <p>1.3 Quality assurance requirements are identified and adhered to according to workplace requirements.</p> <p>1.4 Tasks are planned and sequenced in conjunction with others involved in or affected by the work and statutory and regulatory authorities' requirements.</p> <p>1.5 Tools and equipment for connecting irrigation systems, including personal protective equipment, are selected and checked for serviceability.</p> <p>1.6 Work area is prepared to support efficient connection of irrigation systems from a drinking water supply.</p> |
| 2 | Identify installation requirements. | <p>2.1 Connection size and hazard rating are determined from plans, specification, relevant Australian standards and/or site inspection using relevant information.</p> <p>2.2 Valve is sized according to plans and specification.</p> <p>2.3 Back flow prevention devices are confirmed as being according to hazard rating.</p> <p>2.4 Materials and equipment are identified, ordered and collected according to workplace procedures.</p> <p>2.5 Materials and equipment are checked for compliance with relevant Australian standards, docket and order form, and for acceptable condition.</p> <p>2.6 Sustainability principles and concepts are observed when preparing for and undertaking work process.</p> |

- 3 Connect and test system.**
- 3.1 Excavation is set out and made according to plans and specifications and undertaken with consideration given to existing structures and services.
 - 3.2 Service pipe is isolated and cut to accommodate take off branch according to authorities' requirements.
 - 3.3 Back flow prevention device is fitted according to relevant Australian standards and manufacturer specifications.
 - 3.4 System is connected and flushed to required standard.
 - 3.5 Water supply is restored and system tested according to relevant Australian standards.
 - 3.6 Ground surface is restored.
- 4 Clean up.**
- 4.1 Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice and job specification.
 - 4.2 Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and workplace procedures.
 - 4.3 Documentation is completed according to workplace requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - access information
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - identify requirements

- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication, such as hand signals
- initiative and enterprise skills to identify and accurately report to appropriate personnel any faults in tools, equipment or materials
- literacy skills to:
 - complete workplace documentation
 - read and interpret:
 - documentation from a variety of sources
 - plans and specifications
- numeracy skills to apply measurements and calculations
- planning and organising skills to:
 - plan and sequence tasks with others
 - plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technical skills to cut into a water supply and install a take-off branch and fitting valves and backflow prevention devices for an irrigation or watering system
- technology skills to:
 - access and understand site-specific instructions in a variety of media
 - use mobile communication technology

Required knowledge

- characteristics and application of different pipes and fittings, including fixing and joining techniques and methods
- drinking water supplies and protection measures
- implications of cross connections and air gaps
- job safety analysis (JSA) and safe work method statements (SWMS)
- process of connecting irrigation systems from a drinking water supply
- processes for accessing information and for calculating material requirements
- properties of water, including pressure and flow rates
- relevant statutory requirements related to connecting irrigation systems from a drinking water supply
- SI system of measurement
- Australian standards applicable to the connection
- use of test equipment and procedures
- various types of irrigation systems and types of materials used
- workplace and equipment safety requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- locating, interpreting and applying relevant information, relevant Australian standards and specifications to connect an irrigation system from a drinking water supply
- applying safety requirements throughout the work sequence, including electrical safety requirements and the use of personal protective clothing and equipment
- given the plans and specifications, connecting an irrigation system to a drinking water supply, ensuring:
 - application of sustainability principles and concepts
 - correct identification of location, design and details of proposed installations
 - correct selection and use of appropriate processes, tools and equipment
 - completing all work to specification
 - compliance with regulations, relevant Australian standards and organisational quality procedures and processes
 - communicating and working effectively and safely with others.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will

usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe working practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a

number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work health and safety is to be according to commonwealth, state and territory legislation and regulations and may include:

- handling of materials
- hazard control
- identifying and testing for electrical hazards
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including recognising and preventing hazards associated with:
 - hazardous materials and substances
 - other machines
 - surrounding structure and facilities
 - trees
 - trip hazards
 - underground services
 - uneven and unstable terrain

- use of tools and equipment
- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- use of firefighting equipment
- use of first aid equipment
- workplace environment and safety.

Environmental requirements cover water quality management and may include:

- clean-up protection
- waste management.

Quality assurance requirements may include:

- environment policy
- Environment Protection Authority (EPA)
- internal company quality assurance policy and risk management strategy
- International Standards Organisation
- site safety plan
- workplace operations and procedures.

Statutory and regulatory authorities include:

- commonwealth, state or territory, and local authorities administering applicable Acts, regulations and codes of practice.

Tools and equipment may include:

- chain blocks
- electrical bonding and bridging strap
- elevated work platforms
- forklifts
- hand and power tools
- hand excavation equipment
- hand trolleys
- hoists and jacks
- lifting and load shifting equipment
- measuring equipment
- mechanical excavation equipment
- rollers
- scaffolding
- silver solder and brazing equipment
- trench shoring equipment.

Information may include:

- charts and hand drawings
- instructions issued by authorised organisational or external personnel
- job drawings
- manufacturer specifications and instructions
- material safety data sheets (MSDS)
- memos
- organisation work specifications and requirements
- plans and sketches
- regulatory and legislative requirements, particularly those pertaining to:
 - building codes
 - WHS and environmental requirements
 - plumbing regulations
- relevant Australian standards
- safe work procedures relating to connecting irrigation systems from a drinking water supply
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

Materials may include:

- backflow prevention devices
- copper tube
- fittings and connections
- joints
- polymer pipes
- valves.

Sustainability principles and concepts:

- cover the current and future social, economic and environmental use of resources
- may include:
 - selecting appropriate material to ensure minimal environmental impact
 - efficient energy and water use
 - efficient use and recycling of material
 - disposing of waste material to ensure minimal environmental impact.

CPPFES2005A Demonstrate first attack fire fighting equipment

Modification History

Revised unit

Unit updated and equivalent to PRMPFES05B Use portable fire fighting equipment

Unit Descriptor

This unit of competency specifies the outcomes required to demonstrate the use of portable fire extinguishers, fire hose reels and fire blankets.

Application of the Unit

This unit of competency supports fire protection equipment service technicians responsible for demonstrating to customers how to interpret and follow manufacturers' instructions on various first attack firefighting equipment in emergency situations.

Licensing/Regulatory Information

Work in this area must be completed according to relevant legislative, industry, customer and organisational requirements, including occupational health and safety (OHS) policies and procedures.

Different states and territories may have regulatory mechanisms that apply to this unit. Candidates are advised to check for regulatory limitations.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Demonstrate correct use of portable fire extinguishers to extinguish simulated fires.	1.1	<i>Fire type and classification</i> are determined.
		1.2	<i>Fire extinguishers</i> are selected to attack different fires.
		1.3	Safe use of fire extinguishers is demonstrated according to manufacturers' instructions and relevant <i>OHS and workplace policies and procedures</i> .
2	Demonstrate correct use of fire hose reels.	2.1	Safe use of <i>hose reels</i> is demonstrated according to manufacturers' instructions and relevant OHS and workplace policies and procedures.
		2.2	Water is turned off in the approved sequence and hose reel is checked for leaks.
		2.3	Hose reel is rewound correctly after use.
3	Demonstrate correct use of fire blanket.	3.1	Safe use of fire blankets is demonstrated according to manufacturers' instructions and relevant OHS and workplace policies and procedures.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- decision-making skills to select correct first attack firefighting equipment for different types of fires
- effective customer service
- language, literacy and numeracy skills to:
 - communicate with others in a clear and concise manner
 - read and comply with work instructions and specifications

- interpersonal skills to relate to people from a range of social and cultural backgrounds
- skills to work safely when:
 - applying recommended manufacturers' techniques for operating equipment and fire fighting
 - using firefighting equipment

Required knowledge

- basic methods of locating a fire
- correct use of fire extinguishers and hose reels on different classes of fire and implications of incorrect use
- how fire can be spread by conduction, convection, radiation and direct burning
- how water pressure influences the discharge distance for hose reels
- key actions in a fire emergency, commonly known by the acronym RACE:
 - rescue
 - activate alarm
 - confine fire
 - evacuate or extinguish
- meaning of secondary damage
- reasons for cooking oil and fat fires requiring special attention
- theory of fire, including the triangle of combustion
- types and operation of fire protection equipment classified as first attack equipment

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	<p>This unit of competency could be assessed by practical demonstration, using simulated fire situations. Due to safety and cost factors, methods of extinguishing class D, E and F fires are confined to oral explanations and role play or simulations only.</p> <p>All practical demonstrations involving the use of simulated fires must adhere to the safety and environmental regulations relevant to each state or territory.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.</p> <p>In particular the person should demonstrate the ability to:</p> <ul style="list-style-type: none"> • select correct portable firefighting equipment for a particular type of fire

	<ul style="list-style-type: none"> • demonstrate the use of portable firefighting equipment • use portable firefighting equipment safely and correctly.
Context of and specific resources for assessment	<p>Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"> • actual or simulated work environment • portable firefighting equipment.
Method of assessment	<p>Assessment methods must:</p> <ul style="list-style-type: none"> • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	<p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.</p> <p>Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.</p> <p>This unit could be assessed on its own or in combination with other units relevant to the job function, for example:</p> <ul style="list-style-type: none"> • CPPFES2004A Identify types of installed fire safety equipment and systems • CPPFES2006A Prepare for installation and servicing operations.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Fire types may include:	<ul style="list-style-type: none"> • combustible metals • cooking oils and fats • energised electrical equipment • flammable and combustible liquids • flammable gases • ordinary combustibles.
Classifications of fires include:	<ul style="list-style-type: none"> • classes A, B, C, D, E and F.
Fire extinguishers may include:	<ul style="list-style-type: none"> • carbon dioxide • foam • powder • vaporising liquid • water • wet chemical.
OHS and workplace policies and procedures may be located in quality assurance and/or procedures manuals relating to:	<ul style="list-style-type: none"> • appropriate techniques to use in relation to emergency management of fires • assessing work site for hazards and risks prior to preparing the work site for the work procedure • displaying signs and using barriers in the work area • OHS policies, procedures and programs, including: <ul style="list-style-type: none"> • risk and hazard recognition • emergency procedures • awareness of electrical hazards • following confined spaces procedures • first aid • personnel practices and guidelines outlining work roles, responsibilities and delegations • safety procedures, including those for working safely: <ul style="list-style-type: none"> • around electrical wiring, cables and overhead powerlines • around tools and equipment • on ladders and raised platforms • using personal protective equipment, including: <ul style="list-style-type: none"> • safety glasses or goggles • safety boots or shoes • hard hats • earmuffs or plugs.
Hose reel types may be:	<ul style="list-style-type: none"> • swing-hinged • vehicle-mounted • wall-mounted.

CPPSEC4008A Prepare a detailed tender

Modification History

Not Applicable

Unit Descriptor

Unit descriptor This unit of competency specifies the outcomes required to prepare and process a tender submission. It requires the ability to interpret and assess tender specifications, estimate and cost resource requirements, and prepare and lodge the final tender submission within designated timelines.

This unit may form part of the licensing requirements for persons engaged in security-related tender activities in those states and territories where these are regulated activities.

Application of the Unit

Application of the unit This unit of competency has application in those work roles involving the management of tender documentation. Competency requires legal and operational knowledge applicable to relevant sectors of the security industry. The knowledge and skills described in this unit are to be applied within relevant legislative and organisational guidelines.

Licensing/Regulatory Information

Employability Skills Information

Employability skills This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge section and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Assess tender requirements.	<p>1.1 <i>Tender specifications</i> and other <i>relevant information</i> are obtained and assessed to determine <i>tender requirements</i>.</p> <p>1.2 Tender <i>criteria and conditions</i> are identified and reviewed.</p> <p>1.3 <i>Viability</i> to provide <i>security requirements</i> is assessed and <i>evaluated</i> in accordance with organisational procedures.</p> <p>1.4 <i>Risk assessment</i> is conducted on anticipated outcomes in accordance with <i>organisational</i> and <i>legislative requirements</i>.</p> <p>1.5 Occupational Health and Safety (OHS) and other relevant organisational and legislative requirements are identified and allowed for within the parameters of the tender requirements.</p> <p>1.6 Appropriate <i>interpersonal techniques</i> are used to facilitate an effective exchange of information with <i>relevant persons</i>.</p>
2 Develop tender content.	<p>2.1 Project timelines, stages, activities and deliverables are defined and documented to meet tender requirements.</p> <p>2.2 <i>Resource</i> and <i>capacity</i> requirements are assessed and documented.</p> <p>2.3 Organisational <i>rate schedules</i> are applied to establish costings and estimations are detailed in the required format.</p> <p>2.4 All information is thoroughly reviewed to ensure accuracy and a detailed budget is prepared.</p> <p>2.5 <i>Factors</i> which may affect fulfilling tender requirements are identified and allowances for contingencies are made.</p>

ELEMENT	PERFORMANCE CRITERIA
3 Prepare tender submission.	2.6 Assistance in addressing tender requirements is sought as required from relevant persons.
	3.1 <i>Business technology</i> is used to prepare and present <i>tender submission</i> in the required style and format.
	3.2 Tender submission addresses tender requirements and specific criteria and conditions using clear and concise language.
	3.3 Tender submission is checked for accuracy and disseminated to relevant persons for review in accordance with organisational procedures.
	3.4 Tender submission is lodged within designated timelines.
	3.5 <i>Feedback</i> is sought on outcomes of tender submission and process is reviewed to identify areas for improvement to support future tendering procedures and processes.
	3.6 Relevant <i>documentation</i> is completed and securely maintained in accordance with organisational procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge and their level required for this unit.

Required skills

- apply reasoning and logical analysis to make decisions and solve problems
- assess and determine tender requirements
- calculate time, measurements and quantities
- coaching and mentoring to provide support to colleagues
- communicate effectively in both verbal and written modes
- comply with applicable legislative and regulatory requirements
- comply with tender criteria and conditions
- conduct a risk assessment on anticipated project outcomes
- conduct qualitative and quantitative research
- develop a detailed budget
- estimate and cost resources
- evaluate tender requirements to determine project requirements
- evaluate viability to provide security goods and services to undertake the project
- facilitate feedback
- monitor and analyse submission progress and review outcomes

REQUIRED SKILLS AND KNOWLEDGE

- negotiate, mediate and resolve conflicts
- observe protocol and probity policies
- plan and schedule activities
- prepare and process tender submissions
- prepare tender submissions using clear and concise language in required formats
- prioritise tasks and schedules
- provide written reports and documentation
- read and interpret relevant information including plans, designs and specifications
- relate to persons from different social and cultural backgrounds and of varying physical and mental abilities
- use appropriate business technology to research and compile information
- work within agreed timeframes and budgetary constraints
- write reports.

Required knowledge

- access and deployment mechanisms to ensure optimal economy and efficiency in the use of human, physical and financial resources
- client privacy and confidentiality requirements
- conflict resolution techniques
- contingency planning
- cultural protocols and systems
- formal and informal meeting processes
- national competition policy
- operational budget and resource planning processes
- operational principles of security and business technology equipment and systems
- organisational pricing schedules, policies and procedures
- organisational procedures and standards and corporate goals and objectives
- principles of effective communication
- problem-solving strategies
- quality assurance systems
- security and risk assessment techniques
- security issues and classifications
- tender layout, format and presentation methods
- tendering codes of practice.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- calculating costs and estimating resource requirements for inclusion in a detailed budget
- collaborating with relevant persons to receive and incorporate feedback on tender submission
- complying with applicable legislative and regulatory requirements including codes of practice
- identifying factors through risk analysis that may affect anticipated project outcomes and making appropriate allowances for contingencies
- identifying personal limitations in assessing tender requirements and requesting appropriate assistance
- interpreting tender specifications to accurately identify resource requirements
- locating and assessing information to establish tender requirements
- planning tender activities to match timeframe and budget constraints
- using appropriate communication and interpersonal techniques to clarify and confirm tender requirements
- using appropriate technology to prepare tender documentation.

Context of and specific resources for assessment

Context of assessment includes:

- a setting in the workplace or environment that simulates the conditions of performance described in the elements, performance criteria and range statement.

Resource implications for assessment include:

- access to plain English version of relevant statutes and procedures
- access to a registered provider of assessment services
- access to a suitable venue and equipment
- assessment instruments including personal planner and assessment record book
- work schedules, organisational policies and duty statements.

Reasonable adjustments must be made to assessment processes where required for people with disabilities. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment	<p>This unit of competency could be assessed using the following methods of assessment:</p> <ul style="list-style-type: none">• observation of processes and procedures• questioning of underpinning knowledge and skills.
Guidance information for assessment	<p>Assessment processes and techniques must be culturally appropriate and suitable to the language, literacy and numeracy capacity of the candidate and the competency being assessed. In all cases where practical assessment is used, it should be combined with targeted questioning to assess the underpinning knowledge.</p> <p>Oral questioning or written assessment may be used to assess underpinning knowledge. In assessment situations where the candidate is offered a choice between oral questioning and written assessment, questions are to be identical.</p> <p>Supplementary evidence may be obtained from relevant authenticated correspondence from existing supervisors, team leaders or specialist training staff.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Tender may be:

- in-house
- negotiated
- open
- selective.

Tender specifications may detail:

- client requirements
- identification of deliverables
- insurance requirements
- legal requirements
- performance standards
- project management
- project scope
- proposed activities to be undertaken
- quality assurance

- resource requirements eg human and physical
 - specific requirements
 - stakeholder involvement
 - time and cost parameters.
- Relevant information may include:***
- client details
 - contract documentation
 - details of security goods and services to be provided
 - organisational cost schedules
 - tender details.
- Tender requirements may include:***
- compliance with tender criteria and conditions
 - format and layout
 - legal compliance
 - response to all tender clauses
 - submission date.
- Tender criteria and conditions may relate to:***
- eligibility for submission of tender which may include:
 - interview, meeting or presentation of tender
 - selection criteria and weightings
 - special requirements
 - submission date
 - tender document format.
- Viability may include consideration of:***
- available resources, equipment and supplies
 - client requirements
 - competition
 - compliance with regulations
 - cost of tender preparation and processing
 - financial considerations
 - geographic constraints
 - likely profit
 - other projects
 - prospect of winning the tender
 - skills required for the provision of services
 - time constraints.
- Security requirements may relate to the provision of:***
- security equipment and systems
 - access control systems
 - audible and visual warning devices
 - cameras and monitors
 - commercial and residential alarm systems
 - detection devices
 - electric and mechanical fire safety and fire locking systems
 - electronic locks and locking systems

- electronic readers
- electronic screen equipment
- intercoms and control panels
- security doors and door controls
- specialised access control systems eg biometrics
- security services
 - close personal protection
 - crowd control
 - escorting
 - guarding
 - patrolling
 - screening.

Evaluation may relate to:

- capability
- capacity
- previous projects
- risk
- security
- service
- verification of quality accreditation.

Risk relates to:

- the chance of something happening that will have an impact on objectives.

Risk assessment may include:

- identifying risks in isolation or as part of a broader risk management strategy and addressing risks such as
 - damage to property or equipment
 - environmental landscape
 - equipment or system failures
 - financial or economic loss or failure
 - inability to deliver or meet the timelines if selected
 - OHS
 - professional incompetency.

Organisational requirements may relate to:

- access and equity policies, principles and practices
- business and performance plans
- client service standards
- code of conduct, code of ethics
- communication and reporting procedures
- complaint and dispute resolution procedures
- emergency and evacuation procedures
- employer and employee rights and responsibilities
- insurance cover
- OHS policies, procedures and programs

- own role, responsibility and authority
- personal and professional development
- privacy and confidentiality of information
- quality assurance and continuous improvement processes and standards
- resource parameters and procedures
- risk management
- roles, functions and responsibilities of security personnel
- storage and disposal of information.
- Australian standards and quality assurance requirements
- general 'duty of care' responsibilities
- licensing or certification requirements
- privacy and confidentiality
- professional indemnity
- relevant commonwealth, state and territory legislation, codes and national standards for:
 - anti-discrimination
 - cultural and ethnic diversity
 - environmental issues
 - equal employment opportunity
 - industrial relations
 - OHS
- relevant industry codes of practice.

Legislative requirements may relate to:

Interpersonal techniques may involve:

- active listening
- being non-judgemental
- being respectful and non-discriminatory
- constructive feedback
- control of tone of voice and body language
- culturally aware and sensitive use of language and concepts
- demonstrating flexibility and willingness to negotiate
- effective verbal and non-verbal communication
- maintaining professionalism
- providing sufficient time for questions and responses
- reflection and summarising
- two-way interaction
- use of plain English
- use of positive, confident and cooperative language.

Relevant persons may include:

- clients
- colleagues
- manager

- security goods and services suppliers
 - security personnel
 - tenderer.
- Resources may include:***
- equipment
 - financial
 - human
 - physical
 - time.
- Capacity may relate to:***
- facilities
 - other priorities
 - personnel expertise
 - resource availability
 - time.
- Organisational rate schedules may relate to:***
- award and enterprise agreements
 - equipment costs
 - installation costs
 - labour rates
 - materials costs
 - monitoring costs
 - service costs
 - unit costs.
- Factors may relate to:***
- access to assistance and resources
 - budget constraints
 - competing work demands
 - compliance
 - contractual requirements
 - disputes
 - insurance
 - technology and equipment breakdowns
 - time penalties.
- Business technology may include:***
- computers:
 - database software applications
 - email, Internet, intranet
 - graphical presentation software
 - printers
 - project management software
 - word processing software.
- Tender submission may detail:***
- client brief
 - company information
 - costs
 - evaluation criteria

- implementation plan
- recommended security goods or services
- security and risk assessment
- service and maintenance information
- statutory declaration
- terms of trade
- timelines
- warranty and liability terms and conditions.
- participation in meetings and briefings
- recorded observations on progress of activities
- regular communication with relevant persons.
- client details and records
- contract documentation
- cost schedules
- details of security goods and services
- tender documentation.

Feedback may be gained through:

Relevant documentation may include:

Competency field

Competency field Security and risk management

CPPWMT5043A Develop and implement an environmental management strategy

Modification History

Revised unit

Unit updated and equivalent to PRMWM43A Develop an environmental management strategy

Unit Descriptor

This unit of competency specifies the outcomes required to develop and implement an environmental management strategy. It requires the ability to analyse practices and develop environmental management strategies by working effectively with stakeholders.

Application of the Unit

This unit of competency supports individuals with supervisory responsibilities for developing waste management strategies. It includes contributing to the development of strategies, systems and plans, as well as recognising the need for expert advice.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

1	Define scope of environmental management strategy.	1.1	Needs and expectations for development of <i>environmental management strategy</i> are identified.
		1.2	<i>Constraints</i> under which environmental strategy can be developed are identified.
		1.3	Clear and concise statement of environmental objectives is prepared and <i>feasibility of environmental management options</i> is evaluated.
2	Determine environmental management strategy development process.	2.1	<i>Process models</i> applicable to scope of environmental management strategy are identified.
		2.2	Process models are assessed and a suitable model for achieving the strategy's objectives is selected.
		2.3	Principal <i>stakeholders</i> are identified to maximise their participation in development process.
		2.4	Stakeholders are consulted regarding acceptance of proposed strategy development process.
3	Identify resources required for environmental management strategy.	3.1	Resource requirements of the strategy are determined in an accurate and comprehensive manner.
		3.2	Financial budget required for management strategy is prepared.
		3.3	<i>Human resource</i> and skill requirements for strategy are identified.
		3.4	Facility and equipment needs for strategy are identified to ensure all requirements can be met on time.
4	Identify and prioritise	4.1	Existing <i>data</i> is collated in a comprehensive manner relevant to the scope and strategy.

- | | | |
|--|-----|---|
| environmental assets, problems and opportunities. | 4.2 | Existing data is evaluated to identify need for further data collection. |
| | 4.3 | Additional data is obtained to ensure a comprehensive database for effective analysis. |
| | 4.4 | Available data is assessed against scientifically established criteria and community expectations within <i>applicable legislation and codes</i> . |
| | 4.5 | Common problems and opportunities are grouped to formulate environmental issues that can be actioned by stakeholders. |
| | 4.6 | <i>Criteria to prioritise</i> environmental issues are established. |
| 5 Prepare environmental management strategy. | 5.1 | Practical actions that enable a resolution of environmental issues in line with strategy objectives are determined. |
| | 5.2 | Clear and concise draft documentation is prepared for the strategy to obtain feedback from stakeholders. |
| | 5.3 | Feedback is evaluated and a response is formed. |
| | 5.4 | Local approval of the environmental management strategy is obtained. |
| 6 Prepare implementation plan for environmental management strategy. | 6.1 | Actions are prioritised to provide the most effective resolution of issues within available resources. |
| | 6.2 | Resources are allocated to match action priorities. |
| | 6.3 | Processes are monitored and modified as required to ensure the strategy is achieving objectives. |
| | 6.4 | Responsible parties with the capacity to carry out strategy actions are identified. |
| | 6.5 | Achievable timelines, schedules and targets that enable strategy objectives to be met within required timeframes are established. |
| | 6.6 | <i>Supervisory processes</i> and checks and measures are implemented to ensure work is completed within <i>time</i> |

available.

7	Monitor and review effectiveness of environmental management strategy.	7.1	Regular data to provide accurate measures of performance are collected and analysed.
		7.2	Outcomes of strategy objectives are compared to assess respective effectiveness.
		7.3	Changes are made to strategy as required in a timely manner to ensure outcomes are achieved.
		7.4	Information obtained during monitoring and review is used to develop new strategies based on accumulated knowledge and experience.

Required Skills and Knowledge

- This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
 - determine appropriate waste management service
 - review operations
 - conduct feasibility tests
- interpersonal skills to:
 - manage consultation processes
 - present strategy
- management skills to:
 - apply change management techniques
 - conduct budgeting
 - organise work practices safely and efficiently
 - conduct strategic problem solving
 - plan work practices
 - identify and minimise hazards and risks
 - organise work methodically
 - monitor performance
 - apply quality assurance practices
 - use information technology to complete tasks
- oral communication skills to:

- ask questions
- listen actively
- consult
- give instructions
- provide strategic information
- reading skills to interpret:
 - plans
 - complex documentation
- written communication skills to:
 - write reports
 - prepare complex strategic documentation

Required knowledge

- environmental issues relating to:
 - life cycle of products: re-new, re-use and recycle
 - environmental regulations
 - renewable energy
- features required for an environmental management strategy, including:
 - site contract requirements
 - reclamation
 - training outline
 - waste minimisation
 - waste prevention
 - work procedures
 - environmental education
 - past and future reviews and audits relating to environmental management
 - recycling requirements
 - internal and external audits
 - monitoring personnel performance following training
 - quality control checks relating to environmental management
 - review of effectiveness of new procedures and processes
 - targets, such as:
 - carbon emissions reduction
 - cleaner production
 - lean management
 - recycling rates
 - waste minimisation
- identification and strategic knowledge of:
 - waste types, streams and characteristics
 - waste non-conformances

- unanticipated waste
- waste non-conformance procedures
- waste containment
- waste disposal and recovery routes
- occupational health and safety (OHS) requirements relating to:
 - dangerous goods and hazardous substances
 - OHS hierarchy of control
- resource recovery options relating to:
 - valuable resources within materials
 - potential resources to be recovered
- waste assessment to identify:
 - resource needs
 - hazards and risks
- waste audit, including:
 - analysing waste practices
 - analysing previous audit plans and audit processes
 - outlining possible benefits and outcomes from conducting a waste assessment
 - types of client waste management surveys and their uses
 - sampling techniques
- waste management provision, including:
 - organisational requirements and structure, including workplace communication channels and procedures
 - legislation, regulations and codes of practice applicable to specific waste management functions
 - waste management options
 - nature and significance of waste minimisation hierarchy life cycle assessment
 - organisational pricing schedules
 - duty of care

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by observation of practical demonstration of the development and implementation of an environmental management strategy.
Critical aspects for	A person who demonstrates competency in this unit must be able to

<p>assessment and evidence required to demonstrate competency in this unit</p>	<p>provide evidence of the required skills and knowledge specified in this unit.</p> <p>In particular the person should demonstrate the ability to:</p> <ul style="list-style-type: none"> • identify environmental management objectives • consult stakeholders consulted in development strategy • prioritise environmental issues by level of importance and impact • amalgamate issues in order to develop environmental management strategy.
<p>Context of and specific resources for assessment</p>	<p>Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"> • work plans and approved specifications • forms and procedures manuals.
<p>Method of assessment</p>	<p>The process of developing an environmental management strategy must comply with the objectives of the client as well as with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the development of environmental management strategy.</p> <p>Assessment methods must:</p> <ul style="list-style-type: none"> • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application • reinforce the integration of employability skills with workplace tasks and job roles • confirm that competency is verified and able to be transferred to other circumstances and environments.
<p>Guidance information for assessment</p>	<p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.</p> <p>Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.</p> <p>This unit could be assessed on its own or in combination with other</p>

	<p>units of competency relevant to the job function, for example:</p> <ul style="list-style-type: none"> • CPPCMN4001B Develop workplace policies and procedures for sustainability • CPPWMT5004A Develop waste management strategies.
--	--

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Environmental management strategy</i> may include:	<ul style="list-style-type: none"> • air and water pollution • biodiversity protection and protection of natural resources • carbon emission • ecosystem management • wildlife and endangered species.
<i>Constraints</i> may include:	<ul style="list-style-type: none"> • budgets • knowledge • resources • time.
<i>Feasibility of environmental management options</i> must include:	<ul style="list-style-type: none"> • commitment to environmental management strategies • compliance with legislation • cost-benefit analysis • costs • lead time • process constraints • resource requirements, including equipment and personnel • resources available.
<i>Process models</i> may include:	<ul style="list-style-type: none"> • implementation strategies, including: <ul style="list-style-type: none"> • material safety data sheets (MSDS) • measurement and recording • OHS procedures • personal protective equipment (PPE) • legislation and codes • site contract requirements • work procedures • objectives pertaining to: <ul style="list-style-type: none"> • changes to processes and procedures

	<ul style="list-style-type: none"> • environmental issues • education and training • past and future reviews and audits • recycling requirements • reduction of waste • review strategies, including: <ul style="list-style-type: none"> • internal and external audits • monitoring statistics • monitoring personnel performance following training • undertaking quality control checks • reviewing effectiveness of new procedures and processes • formalising review strategies via re-planning • sampling • counting waste • targets, such as: <ul style="list-style-type: none"> • carbon emissions reduction • lean management • recycling rates • waste minimisation.
<p><i>Stakeholders</i> may include:</p>	<ul style="list-style-type: none"> • business • community • council • funding bodies • government • industry • interest groups • land management agencies • local authorities • statutory authorities.
<p><i>Human resource</i> may include:</p>	<ul style="list-style-type: none"> • community experts • consultants • government agencies • internal staff • project officers • volunteers.
<p><i>Data</i> may include:</p>	<ul style="list-style-type: none"> • existing reports or programs • questionnaires • references • stakeholder input • surveys.

<p><i>Applicable legislation and codes</i> may include:</p>	<ul style="list-style-type: none"> • codes, including: <ul style="list-style-type: none"> • Australian Code for the Transport of Dangerous Goods by Road and Rail • industry • commonwealth, state and territory legislation, including: <ul style="list-style-type: none"> • anti-discrimination • environmental protection • equal employment opportunity • freedom of information • industrial • OHS • trade practices • road laws.
<p><i>Criteria to prioritise</i> may include:</p>	<ul style="list-style-type: none"> • benefit • budget constraints • business objectives • community preferences • environmental issues: <ul style="list-style-type: none"> • impact • legislative provisions • resources • timeframes.
<p><i>Supervisory processes</i> may include:</p>	<ul style="list-style-type: none"> • delegating • implementing • monitoring • overseeing • planning • reviewing • targeting practices to meet deadlines.
<p><i>Time available</i> may include considering:</p>	<ul style="list-style-type: none"> • client instructions • contingencies • past experiences • skills and experience of operatives • location of project • methods to be employed • resources and equipment to be used.

CPPWMT5045A Develop site safety plans

Modification History

Revised unit

Unit updated and equivalent to PRMWM45B Develop site safety plan

Unit Descriptor

This unit of competency specifies the outcomes required to develop an on-site safety plan for a waste management environment. It requires the ability to plan activity for safe work practices.

Application of the Unit

This unit of competency supports individuals responsible for developing on-site safety plans. It includes contributing to the development of operational procedures, in addition to safety principles.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---|-----|---|
| 1 | Review site safety requirements. | 1.1 | <i>Details of site and site requirements</i> are obtained and reviewed to determine specific safety requirements. |
| | | 1.2 | <i>Organisational requirements</i> , occupational health and safety (OHS) regulations and <i>legislation and codes</i> are identified. |
| | | 1.3 | <i>Site safety requirements</i> are identified according to organisational requirements. |
| 2 | Determine site safety requirements. | 2.1 | Safety information necessary to ensure safety of personnel and general public is included in the on-site safety plan. |
| | | 2.2 | <i>Site areas</i> are identified and classified in safety plan. |
| | | 2.3 | Exact locations of <i>first aid and emergency facilities</i> are identified in on-site safety plan. |
| | | 2.4 | <i>Wastes on site</i> are clearly identified in on-site safety plan by location and type. |
| | | 2.5 | <i>Emergency and personal protective equipment (PPE)</i> requirements and <i>potential hazards and risks</i> are identified for specific site areas in on-site safety plan. |
| | | 2.6 | <i>Emergency response action or procedures</i> are identified according to on-site safety plan. |
| | | 2.7 | On-site safety plan is reviewed following feedback from stakeholders. |
| 3 | Communicate on-site safety plan to personnel. | 3.1 | On-site safety plan is communicated promptly and clearly to relevant personnel according to organisational requirements, OHS regulations and legislation and codes. |
| | | 3.2 | Personnel's understanding of all aspects of on-site safety plan is confirmed through questioning and observation. |
| | | 3.3 | Feedback from personnel is obtained and integrated into on-site safety plan. |

- 3.4 On-site safety plan is kept in an accessible place, according to organisational requirements, OHS regulations and legislation and codes.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- analytical skills to:
 - determine site safety options
 - review operations
- basic illustration skills for drawing simple site maps
- interpersonal skills to:
 - manage consultation processes
 - present safety plan
- management skills to:
 - apply change management techniques
 - conduct strategic problem solving
 - plan work practices
 - identify and minimise hazards and risks
 - organise work methodically
 - apply quality assurance practices
 - use information technology to complete tasks
 - use emergency and personal protective equipment
- reading skills to interpret:
 - work or material requirements
 - materials safety data sheets (MSDS)
- written communication skills to:
 - write reports
 - prepare complex strategic documentation
- critical thinking skills to develop on-site safety plan, identifying:
 - resource needs
 - hazards and risks
- oral communication skills to:
 - ask and answer questions
 - explain on-site safety plan to personnel

- give instructions
- seek feedback
- listen actively

Required knowledge

- environmental issues relating to:
 - life cycle of products: re-new, re-use and recycle
 - environmental regulations
- features required for on-site safety plan pertaining to:
 - site contract requirements
 - waste disposal methods
 - waste minimisation
 - waste prevention
 - waste segregation
 - work procedures
 - environmental issues
 - education and training outline
 - recycling and recovery requirements
 - monitoring personnel performance following safety training
 - quality control checks
 - review of effectiveness of new procedures and processes
- identification of safety issues pertaining to:
 - waste types, streams and characteristics and level of associated danger
 - waste non-conformances
 - unanticipated waste
 - waste non-conformance procedures
 - waste contaminants
 - hazardous waste
 - waste containment
 - waste disposal and recovery routes
- OHS requirements relating to:
 - dangerous goods and hazardous substances
 - OHS hierarchy of control
- waste audit, including:
 - analysing waste safety practices
 - analysing previous audit plans and audit processes pertaining to safety
- waste management provision, including:
 - organisational requirements in relation to safety
 - organisational structure and reporting requirements
 - legislation, regulations and codes of practice applicable to specific waste management

functions

- waste management safety options

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	This unit of competency could be assessed by demonstration of site safety plans developed.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>A person who demonstrates competency in this unit must be able to provide evidence of the required skills and knowledge specified in this unit.</p> <p>In particular the person should demonstrate the ability to:</p> <ul style="list-style-type: none"> • identify site safety requirements • specify all necessary PPE required to undertake work safely in each site area • gather necessary information to develop on-site safety plan following consultation with stakeholders • apply OHS requirements and duty of care to provide safe environment for personnel and general public.
Context of and specific resources for assessment	<p>Assessment of essential underpinning knowledge may be conducted in an off-site context. It is to comply with relevant regulatory or Australian standards' requirements.</p> <p>Resource implications for assessment include:</p> <ul style="list-style-type: none"> • work plans and approved specifications • forms and procedures manuals.
Method of assessment	<p>An on-site safety plan must be developed in line with industry expectations in the particular client environment. If the environment is narrowly defined or is not representative of industry needs, it may be necessary to refer to portfolio case studies to assess competency in the development of the plan.</p> <p>Assessment methods must:</p> <ul style="list-style-type: none"> • satisfy the endorsed Assessment Guidelines of the Property Services Training Package • include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application

	<ul style="list-style-type: none"> reinforce the integration of employability skills with workplace tasks and job roles confirm that competency is verified and able to be transferred to other circumstances and environments.
Guidance information for assessment	<p>Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.</p> <p>Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.</p> <p>This unit could be assessed on its own or in combination with other units of competency relevant to the job function, for example:</p> <ul style="list-style-type: none"> CPPCMN3001B Participate in environmentally sustainable work practices CPPCMN4007A Manage workplace safety arrangements.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<i>Details of site and site requirements</i> may include:	<ul style="list-style-type: none"> areas allowing access to general public organisational and site OHS requirements number of personnel on site potential hazards and risks, including level of risk waste incoming waste present at site.
<i>Organisational requirements</i> may include information found in:	<ul style="list-style-type: none"> briefing papers job sheets letters memos operations manuals quality assurance documents tender and contract documents verbal or written instructions work procedures.
<i>Legislation and codes</i>	<ul style="list-style-type: none"> codes, including:

<p>may include:</p>	<ul style="list-style-type: none"> • Australian Code for the Transport of Dangerous Goods by Road and Rail • industry • commonwealth, state and territory legislation, including: <ul style="list-style-type: none"> • anti-discrimination • environmental protection • equal employment opportunity • freedom of information • industrial • OHS • trade practices • road laws.
<p>Site safety requirements must include:</p>	<ul style="list-style-type: none"> • all necessary requirements to ensure the safety of: <ul style="list-style-type: none"> • environment • equipment • general public • personnel • structures.
<p>Site safety requirements may also include:</p>	<ul style="list-style-type: none"> • awareness of potential hazards and risks • communication requirements • confined space awareness • emergency procedure guides • emergency response equipment • emergency shut-down and lock-out procedures • evacuation area • first aid • induction • PPE requirements • site security • training • warning signs and barriers.
<p>Site areas may include:</p>	<ul style="list-style-type: none"> • evacuation areas • first aid bays • general public access areas • restricted areas.
<p>First aid and emergency facilities may include:</p>	<ul style="list-style-type: none"> • breathing apparatus • eye baths • fire extinguishers • first aid kits.
<p>Wastes on site may</p>	<ul style="list-style-type: none"> • solid (non-hazardous), e.g. construction and demolition

<p>include:</p>	<ul style="list-style-type: none"> • liquid (non-hazardous), e.g. chemical and aqueous • hazardous – regulated, prescribed, quarantined, medical and clinical • recoverable resources, e.g. recyclable and green waste.
<p><i>Emergency and personal protective equipment</i> must include:</p>	<ul style="list-style-type: none"> • communications equipment • eye protection, such as goggles and protective glasses • eyewash kit • fire extinguishers • first aid kit • footwear • gloves • overalls and protective clothing.
<p><i>Emergency and personal protective equipment</i> could also include:</p>	<ul style="list-style-type: none"> • breathing apparatus • emergency procedure guides • face shields or masks • hard hats • hearing protection • MSDS • spill kit.
<p><i>Personal protective equipment</i> must be:</p>	<ul style="list-style-type: none"> • cleaned and fitted according to organisational requirements, manufacturer specifications and OHS requirements • worn when required according to organisational requirements • stored according to organisational requirements.
<p><i>Potential hazards and risks</i> are those identified by the organisation that may lead to:</p>	<ul style="list-style-type: none"> • damage to plant, vehicle or property • harm to the environment • illness or injury to employees, contractors or the public • injuries resulting from manual handling and repetitive work.
<p><i>Potential hazards and risks</i> may include:</p>	<ul style="list-style-type: none"> • broken glass • broken metal • compaction equipment • contamination • dust • fire • gases and fumes • hazardous waste (e.g. sharps) • narrow driveways • other vehicles and equipment • overhanging signs • projectiles • spark-producing equipment • unguarded conveyor belts

	<ul style="list-style-type: none">• weather.
<i>Emergency response action or procedures</i> may include:	<ul style="list-style-type: none">• cleaning up• containing emergency• isolating or shutting down equipment or plant• evacuation• first aid• making site safe• notifying authorities• using PPE.

CUAACD302 Produce computer-aided drawings

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to use a range of computer-aided design and drafting (CADD) program functions to produce drawings. The focus of this unit is on the technical skills required to operate CADD, not on design skills.

It applies to individuals who use computer-aided drawing skills in various contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – art, craft and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for computer-aided drawing work	1.1 Clarify drawing requirements in concept or project information 1.2 Identify hardware, software, tools and equipment required for computer-aided design and drafting projects 1.3 Set up hardware and software according to operating instructions and organisational procedures 1.4 Identify and retrieve digitised information relevant to projects
2. Gather object parameters and/or	2.1 Establish and record critical dimensions and data for required designs

ELEMENT	PERFORMANCE CRITERIA
measurements	2.2 Identify requirements in relation to accuracy, tolerances and other key information
3. Prepare plots or drawings	3.1 Access and use <i>CADD functions and features</i> according to operating instructions 3.2 Access and use peripheral equipment required for projects 3.3 Prepare and review preliminary drawings in consultation with relevant people
4. Finalise drawings	4.1 Check designs against project objectives and specifications according to organisational procedures 4.2 Identify and make required adjustments to designs based on review and consultation with relevant people 4.3 Store data files according to operating instructions and organisational procedures 4.4 Submit final drawings within agreed time parameters

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 2.2, 3.1, 4.1	<ul style="list-style-type: none"> Interprets and evaluates detailed information, instructions and technical specifications in a range of formats to prepare for and produce computer aided drawings Reviews accuracy of drawings against specifications and project information
Writing	2.1, 2.2	<ul style="list-style-type: none"> Records key design information using correct conventions and terminology
Oral Communication	1.1, 3.3	<ul style="list-style-type: none"> Uses questioning and careful listening to elicit information and opinions from others
Numeracy	2.1, 2.2, 3.1	<ul style="list-style-type: none"> Identifies and records measurements and other numerically expressed specifications required for drawings Operates numerical functions of computer aided drawing equipment to produce drawings to accurate

		scale and measurements
Navigate the world of work	1.3, 4.1, 4.3	<ul style="list-style-type: none"> Takes responsibility for following necessary organisational procedures when planning and undertaking work
Interact with others	3.3	<ul style="list-style-type: none"> Participates in review of work progress with relevant people
Get the work done	1.1-1.4, 2.1, 2.2, 3.1-3.3, 4.1-4.4	<ul style="list-style-type: none"> Plans and organises required equipment, software and data in logical steps according to workplace and project requirements Prepares preliminary drawings for evaluation by others and makes recommended refinements Uses features of digital systems and tools to produce, edit, store and retrieve drawings Manages time to complete final drawings within established timeframes

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

CADD functions and features must include:	<ul style="list-style-type: none"> drawing tools to support methods for drawing: <ul style="list-style-type: none"> lines arcs polylines texts dimensions edit functions plotting and printing view displays working with layers.

Assessment Requirements for CUAACD302 Produce computer-aided drawings

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- select computer-aided design and drafting (CADD) hardware and software to suit project requirements
- follow operating instructions and organisational procedures
- use features and functions of a CADD program to produce drawings that meet project objectives
- use feedback from others to refine and produce final drawings within specified timelines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the relevant hardware, software, tools and equipment used for CADD
- describe the ways in which CADD is used within the specific workplace situation
- describe typical features and functions of CADD programs, including drawing tools, view displays, edit functions, working with layers, plotting and printing.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- CADD equipment and software
- project or concept information
- operating instructions and organisational procedures
- relevant people.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUAACD303 Produce technical drawings

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to apply a range of techniques to produce technical drawings that meet required standards and conventions.

It applies to individuals who use technical drawings in various contexts.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Visual communication – art, craft and design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for technical drawing work	1.1 Clarify drawing requirements by referring to project documentation and consulting with appropriate people 1.2 Identify factors that may impact on technical drawing work 1.3 Select techniques to fit the purpose of the drawings 1.4 Prepare equipment and materials according to workplace procedures and safety requirements
2. Create technical drawings	2.1 Apply appropriate conventions and standards to technical drawings 2.2 Prepare and review preliminary drawings in consultation with

ELEMENT	PERFORMANCE CRITERIA
	relevant people and confirm required amendments 2.3 Produce technical drawings that are consistent with concept and purpose of drawings 2.4 Finalise and submit technical drawings within agreed timeframes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2	<ul style="list-style-type: none"> Interprets project documentation and other relevant information to identify drawing requirements and constraints
Oral Communication	1.1, 2.2	<ul style="list-style-type: none"> Uses questioning and careful listening to elicit information and opinions from others
Numeracy	2.1, 2.3	<ul style="list-style-type: none"> Interprets numerical and spatial concepts related to drawing standards and conventions
Navigate the world of work	1.2, 1.4	<ul style="list-style-type: none"> Takes responsibility for following workplace procedures and safety requirements and recognises potential legal, ethical and contractual constraints when planning and undertaking work
Interact with others	1.1, 2.2	<ul style="list-style-type: none"> Participates in review of work progress with relevant people
Get the work done	1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 2.4	<ul style="list-style-type: none"> Plans tasks in a logical sequence and manages time to complete final drawings within established timeframes Selects techniques appropriate to the drawing purpose and concept Ensures drawings comply with correct standards and conventions Prepares preliminary drawings for evaluation by others and makes recommended adjustments

Assessment Requirements for CUAACD303 Produce technical drawings

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- produce technical drawings which:
 - show a command of selected techniques
 - adhere to technical drawing standards and conventions
 - satisfy specified drawing purposes and concepts
- follow workplace procedures and safety requirements
- use feedback from others to refine and produce final drawings
- meet deadlines.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe physical properties and capabilities of the range of materials, tools and equipment used for technical drawing work
- explain technical drawing techniques and their application to a range of contexts and subject matter
- explain current standards and conventions for technical drawing
- describe work health and safety requirements for preparation of technical drawing materials and equipment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- equipment and materials required to produce technical drawings
- documented technical drawing requirements
- workplace documentation
- relevant people.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CUAATS504 Work with Aboriginal and Torres Strait Islander cultural material

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to work with Aboriginal and Torres Strait Islander cultural material in a culturally appropriate manner. It involves the complex and interrelated elements of Aboriginal and Torres Strait Islander cultures, which are the cultural and intellectual properties of specific communities; elements that may only be interpreted by appropriate persons, for example those recognised by the local Aboriginal or Torres Strait Islander community as an Elder or custodian of local cultural knowledge.

It applies to individuals who source, handle, interpret and exhibit Aboriginal or Torres Strait Islander cultural material in accordance with specific cultural and consultative requirements. The cultural knowledge necessary to achieve competency in this unit may only be accessible to Aboriginal or Torres Strait Islander people. This unit also reflects that there is no single Aboriginal or Torres Strait Islander culture.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Cultural services - Aboriginal and Torres Strait Islander cultural heritage

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Source Aboriginal or Torres Strait Islander	1.1 Identify and locate cultural material that may be appropriate for

ELEMENT	PERFORMANCE CRITERIA
cultural material	exhibition or display 1.2 Confirm traditional ownership of material in consultation with appropriate communities 1.3 Consult with traditional custodians to determine suitable keeping place for materials not authorised for general exhibition 1.4 Negotiate permission and advice for the use of cultural material according to cultural protocols 1.5 Complete documentation including records and agreements according to cultural protocols 1.6 Research issues and protocols in relation to the return of cultural material to local Aboriginal or Torres Strait Islander communities
2. Handle Aboriginal or Torres Strait Islander cultural material	2.1 Describe, move, store and maintain cultural material according to cultural requirements 2.2 Note aspects of objects that need repair or attention and take action within scope of own job role or refer to relevant personnel as required 2.3 Communicate specific cultural requirements to colleagues
3. Prepare Aboriginal or Torres Strait Islander cultural material for exhibition	3.1 Consult with custodians to agree on culturally appropriate approaches to promote, exhibit and display material, and limitations to mode of exhibit 3.2 Develop culturally appropriate interpretive approaches 3.3 Develop exhibition support materials that take account of cultural protocols in consultation with custodians 3.4 Communicate requirements for display or exhibition of cultural material to colleagues
4. Display and return Aboriginal or Torres Strait Islander cultural material	4.1 Display material according to agreed cultural protocols and consultation outcomes 4.2 Prepare material for return in accordance with cultural requirements 4.3 Return cultural material to local Aboriginal or Torres Strait Islander communities in accordance with established cultural issues and protocols

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.6	<ul style="list-style-type: none"> Gathers, interprets and analyses information from a range of sources and identifies key information that assists in determining job and cultural requirements
Writing	1.5, 2.2, 3.3	<ul style="list-style-type: none"> Prepares specific information that conveys an understanding of outcomes and alternatives and uses accurate, specific and appropriate terminology appropriate to present to relevant personnel Completes relevant supporting documentation using clear and technically specific language terminology that reflect appropriate cultural protocols
Oral Communication	1.2, 1.3, 1.4, 2.3, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Uses culturally sensitive language to convey ideas and listens carefully to the needs of community members and custodians Uses a range of persuasive responses appropriate to audience and environment and makes comparisons that show an understanding of requirements Uses appropriate tone, pace and listening and questioning techniques to elicit others' views and confirm understanding
Navigate the world of work	1.1, 1.6, 2.1, 2.2, 3.1	<ul style="list-style-type: none"> Takes responsibility for following explicit and implicit policies, procedures and protocols relevant to own role and the cultural requirements associated with work
Interact with others	1.2, 1.3, 1.4, 2.3, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Shows respect for the values, beliefs and cultural expectations of others when communicating with colleagues and external stakeholders Collaborates with others to achieve joint outcomes playing an active role in facilitating agreement
Get the work done	1.1, 1.6, 2.1, 2.2, 3.1, 3.3, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> Takes responsibility for planning, organising and implementing tasks and systems to manage and display culturally sensitive information and materials Systematically gathers and analyses all relevant information and evaluates options in order to make informed decisions Uses problem solving techniques to identify and analyse issues

Assessment Requirements for CUAATS504 Work with Aboriginal and Torres Strait Islander cultural material

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- source Aboriginal or Torres Strait Islander cultural material for display or exhibition
- consult in a culturally sensitive and effective manner with Aboriginal or Torres Strait Islander community members and custodians about the display of cultural material
- develop agreements for the use of cultural material and record them where required
- undertake activities preparing for the display of Aboriginal or Torres Strait Islander cultural material in a logical and efficient manner, demonstrating knowledge of cultural protocols and practices
- move, store, display, maintain and return cultural material in a manner consistent with established cultural protocols.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain nature and scope of Aboriginal or Torres Strait Islander cultural material appropriate for exhibition or display
- identify appropriate keeping places for cultural material not suitable/forbidden for exhibition or display
- explain issues and protocols relating to the use and return of cultural material to Aboriginal or Torres Strait Islander communities
- identify copyright, moral rights and intellectual property issues with particular reference to Aboriginal or Torres Strait Islander cultural material
- identify sources of support for developing Aboriginal and Torres Strait Islander collections

- describe current conventions of collection management, including appropriate consultations and respect for traditional custodianship when working with Aboriginal or Torres Strait Islander cultural material, including non-western concepts of collecting
- explain cultural protocols and appropriate consultations for identifying, moving, storing, maintaining and displaying cultural material in the relevant community context
- explain current industry policy on acquiring and managing Aboriginal and Torres Strait Islander cultural material.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in Aboriginal and Torres Strait Islander cultural heritage environments. The assessment environment must include access to:

- Aboriginal or Torres Strait Islander cultural material or information on material when access is not available
- information about cultural protocols.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

Assessment must ensure involvement in the assessment process of persons approved of by Elders, appropriate persons or custodians of the relevant Aboriginal or Torres Strait Islander community.

CUACNM301 Move and store collection material

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Application

This unit describes the skills and knowledge required to handle, pack and unpack collection material when moving or storing it. It involves using techniques and materials suited to the material in accordance with established guidelines.

It applies to individuals who handle, move and store different types of collection material. Movement and storage may be within the same building of an organisation or to an external location. Storage may be short or long-term.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Cultural services - collection management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine movement and storage requirements	1.1 Assess documentation to determine scope of work required for movement and storage of collection material 1.2 Identify organisational procedures and guidelines and specific requirements and confirm with relevant personnel 1.3 Assess collections to estimate projected current and future storage requirements with relevant personnel

ELEMENT	PERFORMANCE CRITERIA
	1.4 Seek specialist advice or assistance where required
2. Pack and unpack collection material	2.1 Select appropriate packing materials, tools and equipment and use safely 2.2 Handle collection material safely and in a manner that maintains integrity of collection material 2.3 Apply conservation and sustainability principles in the use of packaging materials 2.4 Label packaging to facilitate easy identification by others during transportation and within storage facilities 2.5 Recycle and dispose of waste responsibly
3. Move collection material	3.1 Select appropriate handling and moving equipment, and use safely 3.2 Handle collection material in a manner that protects individual items and contributes to efficient loading and unloading processes 3.3 Identify hazardous items and load them in a manner that minimises health and safety risk 3.4 Inspect load prior to transportation to ensure that items are loaded and secured appropriately, and make adjustments as required 3.5 Prepare transportation documentation
4. Arrange collection material and update records	4.1 Install, position or store collection material as required and within expected timeframes 4.2 Clear and clean work areas according to organisational procedures 4.3 Refer problems to relevant personnel as required 4.4 Update existing movement and storage records and prepare new records as required 4.5 Store records according to organisational policies and procedures

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.1, 1.2, 2.3, 3.4, 4.2, 4.5	<ul style="list-style-type: none"> Reads and interprets documentation to determine requirements for moving and storing different types of collection material
Writing	2.4, 3.5, 4.4	<ul style="list-style-type: none"> Legibly completes simple documentation, recording key information in a style and format relevant to requirements
Oral Communication	1.2, 1.3, 1.4, 4.3	<ul style="list-style-type: none"> Seeks guidance and follows instructions to progress and complete work in accordance with industry and organisational processes and standards Uses appropriate tone and language when communicating with others, including when making required arrangements for movement or storage
Numeracy	1.3	<ul style="list-style-type: none"> Uses mathematical techniques to estimate time and measurement
Navigate the world of work	1.2, 1.4, 2.1, 2.3, 2.5, 3.1, 3.3, 4.2, 4.4, 4.5	<ul style="list-style-type: none"> Understands roles and responsibilities for completion of tasks, seeking assistance when necessary Takes personal responsibility for following explicit and implicit policies, procedures and legislative requirements
Interact with others	1.2, 1.3, 1.4, 4.3	<ul style="list-style-type: none"> Cooperates with others and contributes to work practices where joint outcomes are expected and deadlines are to be met
Get the work done	1.1, 1.3, 2.1, 3.1, 3.4, 4.1, 4.4	<ul style="list-style-type: none"> Plans and implements routine tasks and workload in a time-efficient manner Analyses task requirements in order to decide on appropriate equipment and practices Makes routine decisions based on implementation of standard procedures

Assessment Requirements for CUACNM301 Move and store collection material

Modification History

Release	Comments
Release 1	This version first released with CUA Creative Arts and Culture Training Package version 2.0.

Performance Evidence

Evidence of the ability to:

- identify nature and scope of movement or storage work through review of workplace documentation and consultation with relevant personnel
- determine the job-specific requirements, based on the collection material to be moved and stored, and any cultural protocols and stakeholders to be considered
- prepare identified requirements, seeking specialist advice or assistance where required
- handle, move and store collection items using appropriate tools, equipment, techniques and organisational procedures to maintain the integrity of the collection material and meet required timeframe for movement and storage
- use safe and sustainable work practices during movement and storage work to:
 - handle collection material safely
 - use transport equipment and packaging material safely
 - minimise hazards during the work.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the key organisational procedures and guidelines relating to:
 - storage and transport documentation and records
 - use of materials, tools and equipment, including labelling
 - manual handling and work health and safety (WHS) procedures and requirements
 - preventive pest management processes
 - waste recycling and disposal
- describe the packing and storage approaches and techniques for:

- culturally sensitive material
- different types of collection material
- internal and external transportation
- short and long-term storage
- explain the record-keeping procedures for collection movement and storage
- identify the security requirements and issues to be considered when moving or storing collection material.
- list sources of specialist advice for moving and storing collection material.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in creative arts industry environments. The assessment environment must include access to:

- a collection to be moved and stored
- materials, tools and equipment for packing, moving and storing collection items
- organisational procedures relating to moving and storing collection material
- sources of advice.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational educational and training legislation, frameworks and/or standards.

CULMS002B Research and evaluate Aboriginal or Torres Strait Islander cultural material

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to research the context and interpretation of Aboriginal or Torres Strait cultural material. As such, the unit focuses on the skills to analyse cultural material, including current collections and the impact of post-colonial history. These skills then form the basis for appropriate treatment and interpretation of cultural material. The unit includes a focus on appropriate consultation with the traditional custodians of cultural material.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit has particular application to Aboriginal or Torres Strait Islander peoples.

The cultural knowledge necessary to achieve competency in this unit may only be accessible to Aboriginal or Torres Strait Islander peoples. This unit also recognises that there is no single Aboriginal or Torres Strait Islander culture.

The unit deals with complex and interrelated elements of Aboriginal or Torres Strait Islander cultures, which are the cultural and intellectual properties of specific communities across the continent and islands of Australia. These may only be interpreted by appropriate persons, for example those recognised by the local Aboriginal or Torres Strait Islander community as an Elder or custodian of local cultural knowledge.

Any organisation or individual planning to train or assess this unit would be expected to work in a culturally appropriate manner with the appropriate Aboriginal or

Torres Strait Islander community, for example through the establishment of a local Aboriginal or Torres Strait Islander reference group. In particular, it is vital to ensure respectful integration of any local cultural knowledge or protocols that will inform the implementation of the unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability Skills The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary for the qualification in which this unit of competency is packaged, will assist in identifying Employability Skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Research the context 1.1 Identify *relevant sources of information* on *cultural*

ELEMENT	PERFORMANCE CRITERIA
of Aboriginal or Torres Strait Islander cultural material	<p><i>material</i> and the <i>context</i> for its interpretation</p> <p>1.2 Use <i>formal and informal research techniques</i> in a culturally appropriate manner to access <i>information</i></p> <p>1.3 Critically evaluate the validity of the range of interpretations of cultural material and the cultural relevance to its traditional custodians</p>
2 Assess post-colonial interpretation of Aboriginal or Torres Strait Islander cultural material	<p>2.1 Critically evaluate the ways in which different aspects of post-colonisation history have affected the interpretation of Aboriginal or Torres Strait Islander cultural material</p> <p>2.2 Critically evaluate collections in relation to the <i>context</i> in which materials were collected and interpreted and the respect shown for <i>cultural protocols</i> in sourcing, handling and exhibiting cultural material</p> <p>2.3 Assess ways in which interpretations by those other than traditional custodians may have impacted on communities and/or individuals</p>
3 Develop approaches to the interpretation of Aboriginal or Torres Strait Islander cultural material	<p>3.1 Identify and explore potential <i>new and appropriate approaches to the interpretation of cultural material</i> based on knowledge and understanding of consultation with traditional custodians and respect for their wishes</p> <p>3.2 Integrate the concept and practice of community consultation within interpretive approaches</p> <p>3.3 Develop substantiated positions for interpretive approaches</p> <p>3.4 Enhance interpretative approaches <i>by challenging and adapting</i> own ideas</p>
4 Communicate new approaches to stakeholders	<p>4.1 Identify <i>key stakeholders</i> in the interpretation and exhibition of cultural material, including traditional custodians</p>

ELEMENT

PERFORMANCE CRITERIA

- 4.2 Consult and negotiate ways with stakeholders in culturally appropriate ways to interpret Aboriginal or Torres Strait *Islander cultural material* in accordance with wishes of traditional custodians

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- research and critical-thinking skills to analyse, interpret and present complex and varied references for application to cultural material
- literacy skills to critically evaluate and communicate ideas and concepts surrounding cultural material.

Required knowledge

- broad range of sources of information about post-colonial history, theory and cultural practice relating to Aboriginal or Torres Strait Islander cultural material
- key aspects of post-colonial history and its impact on the collection and interpretation of Aboriginal or Torres Strait Islander cultural material
- copyright, moral rights and intellectual property issues and legislation with particular reference to Aboriginal or Torres Strait Islander cultural material
- cultural protocols and appropriate consultations for the movement, storage and maintenance of cultural material in the relevant context/type of display
- cultural protocols for the exhibition of cultural material in the relevant community context.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction

EVIDENCE GUIDE

with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- sound knowledge of information sources for Aboriginal or Torres Strait Islander cultural material
- knowledge of cultural protocols and practices as well as appropriate consultative processes in seeking information
- application of research and analytical skills to evaluate Aboriginal or Torres Strait Islander cultural material and its context.

Context of and specific resources for assessment

Assessment must ensure:

- involvement in the assessment process of persons approved of by Elders, appropriate persons or custodians of the relevant community
- access to sources of information on Aboriginal or Torres Strait Islander cultural material.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- project to research a specific collection of Aboriginal or Torres Strait Islander cultural material
- project to research and document the cultural significance of particular objects
- case studies to assess ability to research and use different types of information in the analysis of cultural material
- oral or written questioning to assess knowledge of cultural material.

Holistic assessment with other units relevant to the industry sector, workplace and job role is

EVIDENCE GUIDE

recommended, for example:

- CULMS001B Work with Aboriginal or Torres Strait Islander cultural material
- other collection and exhibition management units.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Relevant sources of information may include:

- community members (family groups, cultural educators, Elders)
- libraries
- museums
- archives
- cultural centres
- community organisations
- Indigenous units within local, state or national bodies

Cultural material may be:

- part of an existing collection (public or private)
- not yet part of a collection
- held by the local Aboriginal or Torres Strait Islander community or broader community
- held by an organisation external to the community
- held by individuals
- in the care of traditional custodians

The ***context*** of cultural material may relate to:

- pre-colonisation cultural practices
- post-colonisation collection and interpretive practices
- cultural/spiritual significance of cultural material to community
- the way material was acquired and historical view

RANGE STATEMENT

- of Indigenous collections
- treatment of collection materials
- dispersal of skeletal remains and cultural materials within and outside of Australia
- men's or women's business
- secret or non-secret business
- rarity
- locality

Formal and informal research techniques may include:

- discussion
- note taking, listing
- interviews
- questionnaires
- critical discourse
- analysis
- reflection
- comparing information
- summation
- judgement
- observation

Information may relate to:

- philosophy
- Indigenous world views
- effects of colonisation on Indigenous lives and cultures
- dreaming stories
- world histories
- cultural issues
- spiritual beliefs
- aesthetics
- politics
- gender and identity issues
- land and place - traditional custodians of Country
- signs and symbols in cultural practice
- evaluative criticism in relation to interpretations made by post-colonial interpreters
- oral histories

RANGE STATEMENT

Cultural protocols may relate to:

- acquisition of material
- transportation
- storage
- written documentation on cultural materials
- exhibition
- geographic location
- degree of consultation with traditional custodians
- respect for the wishes of traditional custodians

New and appropriate approaches to interpretation may relate to:

- local Aboriginal or Torres Strait Islander community involvement
- different perceptions of both pre and post-colonial history
- interpretation in the context of post-colonial effects and behaviours
- local history
- oral histories
- appropriate consultation with traditional custodians
- respect for the wishes of traditional custodians
- industry/sector debate

Challenging and adapting ideas may include:

- comparing
- contrasting
- reflecting
- critiquing
- judging
- considering merit
- discussing and debating

Key stakeholders may include:

- Indigenous communities, including traditional custodians
- current holders of collections (private and public)
- cultural centres
- Indigenous units within local, state and national bodies
- museum/heritage organisations

Unit Sector(s)

Competency field

Competency field Aboriginal or Torres Strait Islander Museum Practice

CULMS010B Contribute to the preservation of cultural material

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to contribute to the preservation of cultural material through a sound knowledge of conservation principles, practices and ethics and the application of basic preservation activities.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Application of the Unit

Application of the unit

This unit applies to individuals who have significant knowledge of preservation issues and may be involved in the application of basic preservation techniques with the involvement of a professional conservator.

The content of this unit relates to work that has a significant impact on Australia's cultural heritage and care must be taken to ensure appropriate implementation of the unit.

Any individual or organisation planning to undertake training and/or assessment of this unit must therefore consult with an appropriately qualified conservator or conservation organisation. The Australian Institute for the Conservation of Cultural Material is the recognised professional body in this area.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability Skills The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary for the qualification in which this unit of competency is packaged, will assist in identifying Employability Skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Develop preservation skills and knowledge

- 1.1 Seek and access *opportunities to develop, update and maintain knowledge of preservation* issues and concepts
- 1.2 Integrate knowledge into work activities within scope of individual responsibility

2 Undertake basic preservation activities

- 2.1 Undertake *basic preservation activities* within scope of responsibility as agreed with a conservator and in accordance with *organisational plans and policies*
- 2.2 Correctly apply techniques in a manner which

ELEMENT	PERFORMANCE CRITERIA
	maintains the integrity of the <i>cultural material</i>
2.3	Record data generated in the course of activities clearly and accurately in the appropriate format
2.4	Follow <i>health, safety and environmental requirements</i> at all times
2.5	Ensure that ethical and <i>cultural protocols</i> are adhered to at all times

Required Skills and Knowledge

Required Skills and knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- learning skills to undertake ongoing professional development and acquisition of knowledge around preservation issues and concepts
- literacy skills to interpret conservation plans, to research conservation information, document and to report on condition of cultural material.

Required knowledge

- distinction between preservation, conservation and restoration
- basic preservation principles and methods
- principles and methods for handling cultural material
- available sources of appropriate expert advice
- AICCM Code of Ethics and Code of Practice
- copyright, moral rights and intellectual property legislation and issues that impact on conservation
- cultural protocols that impact on conservation of cultural material, including those for Aboriginal or Torres Strait Islander material
- role of a conservator and of a person working under the guidance of a conservator, including the scope of work undertaken by each and rationale for this
- requirements for safe work and manual handling
- formats and features of conservation plans, object condition reports.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- sound general knowledge of preservation techniques relevant to the collection/industry sector
- understanding of conservation ethics and cultural protocols, including limitations on the scope of work to be undertaken
- practical demonstration of competent and safe techniques working on one or more items under the guidance of a conservator.

Context of and specific resources for assessment

Assessment must ensure:

- access to cultural material
- access to equipment, materials and tools used in basic preservation activities.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- direct questioning combined with review of portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- assessment of cultural material on which the candidate has worked
- direct observation of the candidate using techniques
- evaluation of candidate's responses to different collection scenarios to assess ability to develop approaches for different preservation needs and articulate different challenges and issues to be considered
- oral or written questioning to assess knowledge of different techniques and procedures.

EVIDENCE GUIDE

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- CULMS009B Implement preventive conservation activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Opportunities to develop, update and maintain knowledge of preservation issues and concepts may include:

- research
- attendance at seminars, workshops
- membership of professional organisations
- using conservator as a mentor
- reading current journals, newsletters and electronic discussion lists

Basic preservation activities will vary depending on the type of cultural material, but may include:

- surface cleaning
- designing/making storage enclosures and display supports
- attaching backboards to paintings
- creating hanging systems for paintings
- mounting and framing

Activities must be undertaken in accordance with advice from a specialist conservator to avoid potential damage to cultural material.

Organisational plans and policies vary in structure and

- preservation plans
- conservation plans

RANGE STATEMENT

name but may include:

- collection management policies
- disaster preparedness policies

Cultural material is defined as 'objects, collections, artworks, specimens, structures or sites' and includes:

- archaeological material
- books and manuscripts
- cultural sites/buildings
- ethnographic material
- flora and fauna
- film/audiovisual material
- furniture
- photographs
- technological/industry items
- textiles
- works on paper/canvas

Health, safety and environmental requirements may relate to:

- use of chemicals or other toxic substances
- storage of chemicals
- provision and use of safety equipment
- safe manual handling
- safe use of tools and equipment
- reporting of occupational health and safety issues, including events and near misses
- impact on other parts of the collection
- toxic and hazardous materials in a collection
- condition/stability of item (dirt, mould, dust and pesticides)

Cultural protocols may relate to:

- who can handle the cultural material
- where an item may be handled
- when an item may be handled
- consultation on potential treatments
- storage requirements
- appearance of the item
- relationship between item and other material in the collection
- methods and approaches to display

Competency field Preventive Conservation

FDFFS1001A Follow work procedures to maintain food safety

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to maintain food safety when carrying out work tasks. Basic food safety practices include personal hygiene and conduct, food handling, housekeeping and waste disposal related to work tasks and responsibilities where work involves routine manual processes and/or operation of simple automated equipment.
------------------------	---

Application of the Unit

Application of the unit	This unit is based on and equivalent to the guideline food safety unit GFSBFSPA Follow basic food safety practices. Note that this unit does not apply to the pharmaceutical industry. Refer to FDFPH1001A Follow work procedures to maintain Good Manufacturing Practice.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Handle food safely	1.1. Food handling requirements are identified 1.2. Food handling is carried out according to the food safety program 1.3. The workplace is maintained in a clean and tidy order to meet workplace standards 1.4. Work is conducted in accordance with workplace environmental guidelines
2. Identify, control and report food safety hazards	2.1. Work area, materials, equipment and product are routinely monitored to ensure compliance with food safety requirements 2.2. Processes, practices or conditions which are not consistent with the food safety program are identified and corrective action is taken within the level of responsibility
3. Comply with personal hygiene standards	3.1. Personal hygiene meets the requirements of the food safety program 3.2. Health conditions and/or illness are reported as required by the food safety program 3.3. Clothing and footwear worn is appropriate for the food handling task and meets the requirements of the food safety program 3.4. Movement around the workplace complies with the food safety program

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- locate and follow workplace information relating to food safety responsibilities
- monitor own work and implement any controls as required by the food safety program, such as visual inspection and checks
- follow workplace procedures to maintain food safety as required by the food safety program relating to own work
- identify and correct or report situations that do not meet the requirements of the food safety program and/or could result in unsafe food
- handle, clean and store equipment, utensils, packaging materials and similar items according to the requirements of the food safety program as required by work role
- maintain personal hygiene consistent with the food safety program
- take necessary precautions when moving around the workplace and/or from one task to another to maintain food safety
- wear and maintain appropriate clothing/footwear as required by work tasks and consistent with the requirements of the food safety program
- report health conditions and illness as appropriate according to the food safety program
- handle and/or dispose of out-of-specification or contaminated materials, ingredients and product, waste and recyclable material according to food safety program as required by work responsibilities
- maintain the work area in a clean and tidy state
- identify and report signs of pest infestation
- clean and sanitise equipment according to enterprise procedures
- record food safety information according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- food safety requirements related to work responsibilities, including personal hygiene, requirements and procedures to report illness and safe food handling practices for own work, as well as an awareness of the possible consequences of

REQUIRED SKILLS AND KNOWLEDGE

not following these procedures

- common types and sources of contamination that occur in the work area, such as cross contamination
- control methods and procedures used in the , such as reporting non-compliance and following instructions
- storage and handling requirements for ingredients, materials and product used related to work role
- housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where required
- purpose and importance of cleaning and sanitation procedures
- suitable standard for materials, equipment and utensils used in the work area
- waste collection, recycling and handling procedures relevant to own work responsibilities
- procedures to follow in the event of pest sighting or discovery of infestation
- clothing and footwear requirements for working in and/or moving between food handling areas
- personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- cleaning procedures where relevant
- recording requirements and responsibilities where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify food safety handling requirements in the workplace
- apply and monitor own compliance with food safety standards
- maintain required standards of personal hygiene

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • maintain clean and tidy work area • report non-compliances • apply safe work practices and identify OHS hazards and controls.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • food safety information relating to the workplace, including a food safety program outlining food safety hazards and control methods. It may also include company policies, procedures and codes of practice, such as Good Manufacturing Practice (GMP) • related work instructions and procedures • work tasks and responsibilities • cleaning and sanitation policies and procedures • appropriate clothing and related apparatus • reporting and monitoring systems.
Method of assessment	<p>This unit should be assessed together with core and other units of competency relevant to the work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment <p>Where the company operates a combined quality/food safety system, assessment of this unit should be combined with assessment of:</p> <ul style="list-style-type: none"> • FDFOP1009A Follow work procedures to maintain quality.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work

RANGE STATEMENT	
situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Food safety program	A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures
Food safety information	Food safety information may be provided in: <ul style="list-style-type: none"> • food safety program • standard operating procedures (SOPs) • specifications • log sheets • written or verbal instruction
Food handling	Food handling refers to: <ul style="list-style-type: none"> • food receipt and storage • food preparation, cooking, holding, cooling, chilling and reheating • packaging • disposal
Products/materials handled and stored	Products/materials handled and stored can include: <ul style="list-style-type: none"> • raw materials • ingredients • consumables • part-processed product • finished product • cleaning materials
Breach of food safety procedures	Examples of a breach of food safety procedures could include: <ul style="list-style-type: none"> • failure to check delivery temperatures of potentially hazardous chilled food • failure to place temperature-sensitive food in temperature controlled storage conditions

RANGE STATEMENT	
	<p>promptly</p> <ul style="list-style-type: none"> • failure to wash hands when required • use of cloths for unsuitable purposes
Responsibility for monitoring food safety	Responsibility for monitoring food safety, identifying breaches in food safety procedures and taking corrective action relates to own tasks and responsibilities and occurs in the context of the food safety program in the workplace
Food safety hazard	A food safety hazard is a biological, chemical or physical agent in, or condition of, food that has the potential to cause an adverse health effect
Personal hygiene requirements	Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory legislation/regulations
Reporting of health conditions and illness requirements	Reporting of health conditions and illness requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations
Appropriate clothing and footwear	<p>Appropriate clothing and footwear depends on work requirements. It should be designed to ensure that the body and clothing itself does not contaminate food or surfaces likely to come into contact with food. Examples of clothing designed to prevent contamination by the body include:</p> <ul style="list-style-type: none"> • purpose designed overalls or uniforms • hair-nets • beard snoods • gloves • overshoes

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Implement the food safety program	1.1. Food handling requirements are identified 1.2. Food handling is carried out according to the food safety program 1.3. Food safety hazards are controlled as required by the food safety program 1.4. Where food safety control requirements are not met, the incident is promptly reported and corrective action is taken 1.5. Food safety information is recorded to meet requirements of the food safety program 1.6. The workplace is maintained in a clean and tidy order to meet workplace standards 1.7. Work is conducted in accordance with workplace environmental guidelines
2. Participate in maintaining and improving food safety	2.1. Work area, materials, equipment and product are routinely monitored to ensure compliance with food safety requirements 2.2. Processes, practices or conditions which could result in a food safety breach are identified and reported according to workplace reporting requirements 2.3. Corrective action is taken in accordance with the food safety program 2.4. Food safety issues are raised with designated

ELEMENT	PERFORMANCE CRITERIA
	personnel
3. Comply with personal hygiene standards	3.1. Personal hygiene meets the requirements of the food safety program 3.2. Health conditions and/or illness are reported as required by the food safety program 3.3. Clothing and footwear worn is appropriate for the food handling task and meets the requirements of the food safety program 3.4. Movement around the workplace complies with the food safety program

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- locate and follow workplace information relating to food safety responsibilities
- follow workplace procedures to maintain food safety as required by the food safety program relating to own work
- monitor food safety hazards as required by the food safety program, including methods such as visual inspection, sampling and testing
- record results of monitoring, and maintain records as required by the food safety program
- identify and report situations that do not meet the requirements of the food safety program and/or could result in unsafe food
- take corrective action as required by food safety program within level of responsibility
- handle, clean and store equipment, utensils, packaging materials and similar items according to the requirements of the food safety program as required by work role
- maintain personal hygiene consistent with the food safety program
- take necessary precautions when moving around the workplace and/or from one task to another to maintain food safety
- wear and maintain appropriate clothing/footwear as required by work tasks and consistent with the requirements of the food safety program
- report health conditions and illness as appropriate according to the food safety program
- handle and dispose of out-of-specification or contaminated food, waste and

recyclable material according to food safety program as this requirement relates to own work responsibility

- maintain the work area in a clean and tidy state
- identify and report signs of pest infestation
- record food safety information in appropriate format
- clean and sanitise equipment according to enterprise procedures
- collect samples and conduct tests according to the food safety program according to enterprise procedures
- participate in investigating food safety breaches according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relating to own work
- basic concepts of HACCP-based food safety, including identification of hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- food safety management arrangements in the workplace, including awareness of food safety legislation, workplace policies and procedures to implement responsibilities, understanding the relationship between the quality system and food safety program, personnel responsible for developing and implementing the food safety program, the role of internal and external auditors as appropriate, procedures followed to investigate contamination events, and performance improvement processes
- awareness of common microbiological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods to prevent occurrence
- basic understanding of the properties, handling and storage requirements of ingredients, materials and products handled and used
- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- food safety requirements related to work responsibilities, including personal hygiene, requirements and procedures to report illness and safe food handling practices for own work
- methods used to monitor that food safety is under control, including the purpose of sampling and taking measurements, such as temperature and pH, and conducting inspections and tests
- action required in the event of non-compliance (corrective action is typically described in the food safety program and/or related workplace information)
- purpose of keeping records and the recording requirements of the food safety

program

- methods used in the workplace to isolate or quarantine food which may be unsafe
- product and ingredient traceability procedures, such as product recall where required by work responsibilities
- clothing and footwear requirements for working in and/or moving between food handling areas
- personal clothing maintenance, laundering and storage requirements
- appropriate bandages and dressings to be used when undertaking food handling
- housekeeping requirements and responsibilities relating to own work, and use and storage of housekeeping/cleaning equipment where relevant
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitation procedures
- waste collection, recycling and handling procedures relevant to own work responsibilities
- cleaning and sanitation procedures where relevant
- impact of rework handling/addition on food safety where relevant
- sampling and test methods where relevant

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Ensure others in the work area are able to meet quality and food safety requirements	<p>1.1. Hazard control and clothing and equipment appropriate to work requirements are available, functional and correctly fitted</p> <p>1.2. Information on food safety/quality responsibilities and procedures is current, accessible and communicated to others in the work area</p> <p>1.3. Information about identified hazards and the outcomes of risk assessment and risk control procedures is accessible and communicated to others in the work area</p> <p>1.4. Food safety/quality hazards and control measures used in the work area can be identified by those in the work area</p> <p>1.5. Mentoring and coaching support is available to support individuals/groups to implement quality and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>safe food handling procedures</p> <p>1.6.Training needs are identified and addressed within level of responsibility</p>
<p>2. Monitor observance of quality standards and food safety programs in the work area</p>	<p>2.1.Work procedures in the work area are clearly defined, documented and followed</p> <p>2.2.Deviation from identified procedures is identified, reported and addressed within level of responsibility</p> <p>2.3.Personal behaviour is consistent with workplace policies and procedures that support food safety and quality</p> <p>2.4.Food safety and/or quality hazards are identified and reported according to workplace procedures</p> <p>2.5.Food safety and quality information is recorded to meet workplace reporting requirements</p> <p>2.6.The work area is maintained according to housekeeping standards</p> <p>2.7.Work is conducted in accordance with workplace environmental guidelines</p>
<p>3. Take corrective action in response to quality and food safety non-compliance</p>	<p>3.1.Workplace procedures for responding to quality and food safety non-compliance are promptly implemented</p> <p>3.2.Hazardous events are investigated to identify cause</p> <p>3.3.Control measures to prevent recurrence and minimise risks of hazardous events are implemented</p>
<p>4. Maintain and improve quality and food safety in the work area</p>	<p>4.1.Processes or conditions which could result in a breach of food safety procedures or quality specifications are identified, assessed, removed or and/reported within level of responsibility and according to workplace procedure</p> <p>4.2.Risk assessments are conducted and appropriate control measures are identified and implemented in the work area</p> <p>4.3.Recommendations arising from risk assessments are implemented within level of responsibility</p> <p>4.4.Inadequacies in control measures are identified and reported according to company reporting requirements</p> <p>4.5.Matters raised relating to quality/food safety are promptly resolved and/or referred to appropriate personnel</p> <p>4.6.The work group is consulted and advised of</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>quality/food safety matters relevant to work role</p> <p>4.7. Opportunities for improving food safety and quality are identified and raised with relevant personnel</p> <p>4.8. Procedures are developed or revised to support effective control of quality and food safety hazards</p> <p>4.9. Quality/food safety records are reviewed to ensure they are complete and meet the quality system, food safety program and legal requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access, interpret and communicate information about the food safety program, quality requirements and related procedures to others in the work area
- demonstrate two-way communication, including active listening and responding constructively to feedback
- provide access to and maintain current food safety/quality documentation
- model safe food handling and quality practices and procedures to achieve required outcomes, including demonstrating:
 - work procedures that meet the requirements of quality and food safety
 - cleaning and sanitising equipment
 - sampling and testing as appropriate according to quality and food safety requirements
 - maintaining personal hygiene
 - wearing appropriate clothing and footwear as required by the work task
 - following procedures when moving within and between work areas
 - reporting health conditions and illnesses according to workplace procedures
 - handling, cleaning and storing equipment, utensils and packaging materials as appropriate
- identify control points in the work area and demonstrate monitoring techniques used (control points include critical, quality and regulatory control points)
- support others to meet quality standards and follow food safety procedures by ensuring that all personnel in the work area receive the information required and have the necessary skills and equipment to carry out their responsibilities

REQUIRED SKILLS AND KNOWLEDGE

- identify, report and/or address food safety/quality non-compliance in an appropriate and timely manner within level of responsibility
- determine when and how to make adjustments to maintain output within level of responsibility
- identify, report and/or address food safety/quality training and development needs of others in the work area
- ensure that appropriate and timely action is taken in response to non-compliance
- handle and dispose of out-of-specification or contaminated food, waste and recyclable material according to food safety program as this requirement relates to own work responsibility
- participate in investigations of non-compliance and risk assessment processes
- participate in consultation processes to improve quality and food safety outcomes in the workplace
- review practice and procedures to implement recommendations arising from risk assessments and/or improvement proposals within level of responsibility, such as collecting and analysing food safety/quality records, reviewing operating procedures and communicating changes to others in the work area
- ensure that housekeeping standards are maintained and that equipment is in operational order, such as participating in the management of equipment calibration
- monitor the recording of quality and food safety information to confirm that records accurately reflect performance and meet the requirements of the food safety and quality programs
- participate in food recall procedures as required, within level of responsibility
- facilitate consultation processes according to enterprise procedures
- lead investigations of quality and food safety incidents according to enterprise procedures
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- sources of information and expertise on procedures and responsibilities for food safety relevant to the workplace
- principles of a HACCP-based approach to managing food safety, including identifying hazards that are likely to occur, establishing appropriate methods of control and confirming that controls are met
- basic concepts of quality assurance including hazards, risk assessment and control methods
- company programs and systems in place to manage and support quality and food safety in the workplace, which may involve separate or integrated programs, including systems for maintaining and updating documents, such as operating procedures and specifications
- clothing and footwear requirements for working in and/or moving between food

REQUIRED SKILLS AND KNOWLEDGE

handling areas, including personal clothing maintenance, laundering and storage requirements

- appropriate bandages and dressings to be used when undertaking food handling
- housekeeping requirements and responsibilities relating to own work, where relevant this includes use and storage of housekeeping/cleaning equipment
- procedures to follow in the event of pest sighting or discovery of infestation
- purpose and importance of cleaning and sanitation procedures
- legal obligations for food safety and quality, including an awareness of government legislation and customer requirements
- food safety and quality responsibilities and requirements relating to the work area
- awareness of common micro biological, physical and chemical hazards related to the foods handled in the work area, including the types of hazards likely to occur, the conditions under which they occur, possible consequences and control methods to prevent occurrence
- suitable standard for materials, measuring devices, equipment and utensils used in the work area
- properties of food and ingredients used that affect food safety, including an understanding of related storage, processing and handling requirements
- current technical and process knowledge required to participate in investigations of food safety/quality hazards, risks and incidents within level of responsibility, including an understanding of common micro biological, physical and chemical hazards, related control methods and the way changes in equipment and/or processing methods can affect food safety and quality outcomes
- procedures for identifying unsafe and/or non-conforming product, including control points and evidence of out-of-specification product or materials
- sampling procedures, test methods and inspections
- options for responding to non-compliance, including legal responsibility, risk management and cost/implications of different responses and level of responsibility for decision making
- methods used in the workplace to isolate or quarantine food which may be unsafe
- waste collection, recycling, handling and disposal, including handling/disposal requirements for different types of waste, such as hazardous waste where relevant
- traceability and recall procedures within level of responsibility
- documentation system and procedures, including record keeping to meet both company and legal requirements, procedures for developing and/or reviewing workplace procedures, and document control systems used in the workplace
- auditing arrangements, roles and responsibilities as they relate to own work responsibilities, such as internal and external audit processes
- appropriate communication skills and techniques to convey information on quality and food safety requirements to others in the workplace
- cleaning and sanitation procedures where relevant
- impact of rework handling/addition on food safety where relevant
- sampling and test methods where relevant

REQUIRED SKILLS AND KNOWLEDGE

- facilitation and consultation techniques where relevant

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- describe quality and food safety program, risks and control measures of the work area
- confirm that control measures are in place and that personnel in the work area are equipped and informed to implement programs
- identify, address and follow up on non-compliances
- identify causes of non compliances
- conduct risk assessments and recommend responsive action
- provide support to others to implement the programs
- complete and maintain documentation.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- food safety program for the work area which identifies critical control points, control measures and corrective action
- quality policy, system and procedures
- work area or system in which quality and food safety practices and procedures are to be monitored
- personal protective clothing and equipment as required
- review/audit arrangements
- reporting and monitoring systems.

EVIDENCE GUIDE	
Method of assessment	<p>This unit should be assessed together with other units of competence relevant to the function or work role.</p> <p>Examples could be:</p> <ul style="list-style-type: none"> • FDFPPL3001A Participate in improvement processes • FDFPPL3004A Lead work teams and groups • BSBRES401A Analyse and present research information.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Work responsibilities	<p>Work responsibilities may include formal or informal responsibility for modelling appropriate quality/food safety policies and procedures and providing a support role to others in the work area</p>
Food safety program	<p>A food safety program is a written document that specifies how a business will control all food safety hazards that may be reasonably expected to occur in all food handling operations of the food business. The food safety program and related procedures must comply with legal requirements of the food safety standards and must be communicated to all food handlers. Where no food safety program is in place, food safety requirements may be specified in general operating procedures</p>

RANGE STATEMENT	
Quality systems	Quality systems may be externally accredited, such as an ISO system, or internally designed and managed
Workplace information	Workplace information may be provided in: <ul style="list-style-type: none"> • food safety and quality policies and programs • standard operating procedures (SOPs) • specifications • log sheets • written or verbal instruction incorporating food safety and quality requirements
Incidents	A food safety incident is: <ul style="list-style-type: none"> • a situation where the safe limits or parameters identified by the food safety program are not met A quality incident is: <ul style="list-style-type: none"> • a situation where the quality limits or parameters identified in specifications or processing instructions are not met
Monitoring	Monitoring describes the methods used to confirm that a food safety or quality hazard is in control, such as: <ul style="list-style-type: none"> • taking temperatures • collecting samples • conducting visual inspections • additional testing as required
Responsibility for identifying breaches of food safety procedures	Responsibility for identifying breaches of food safety procedures and taking corrective action occurs in the context of the food safety program and within scope of responsibility
Responsibility for identifying non-compliance against quality standards	Responsibility for identifying non-compliance against quality standards occurs within the context of defined standards or specifications and relates to work area
Personal hygiene requirements	Minimum personal hygiene requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in the Food Safety Standard 3.2.2, Division 4:14 and/or state or territory

RANGE STATEMENT	
	legislation/regulations
Reporting of health conditions and illnesses	Reporting of health conditions and illnesses requirements are specified by the food safety program. At a minimum this must meet legal requirements as set out in Food Safety Standard 3.2.2, Division 4:13 and/or state or territory legislation/regulations
Operator responsibilities	<p>The operator at this level may not have direct responsibility for overseeing the training/development of team members. At a minimum they must be able to identify development needs of others in the work area and refer this information to the relevant personnel.</p> <p>The operator at this level may not have responsibility for independently assessing risks and determining the effectiveness of control measures. However, they would be expected to observe day-to-day effectiveness and participate in assessment and review processes. Responsibilities at this level may include facilitating consultation processes within level of responsibility</p>
Record keeping	Record keeping complies with customer, legal and food safety program requirements

Co-requisite units

Co-requisite units		

FDFGPS2011A Operate a creamed honey manufacture process

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to set up, monitor, and adjust a process to produce creamed honey.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit has application in a production environment within the honey processing industry. It typically targets the production worker responsible for applying basic operating principles to the operation and monitoring of machines and equipment used to cream honey.</p> <p>When operators are required to perform batch or product changeover procedures as part of this work process, the procedures should be used to customise the application of this unit. Where more detailed changeovers are carried out, FDFOP2011A Conduct routine maintenance, should be selected.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the equipment and process for operation	<p>1.1.Liquid and seed honey is confirmed and available to meet production requirements</p> <p>1.2.Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3.Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4.Processing/operating parameters are set to meet safety and production requirements</p> <p>1.5.Equipment performance is checked and adjusted as required</p> <p>1.6.Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the creamed honey manufacture process	<p>2.1.The process is started and operated according to workplace procedures</p> <p>2.2.Equipment is monitored to identify variation in operating conditions</p> <p>2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4.The process is monitored to confirm that specifications are met</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification</p> <p>2.6. The work area is maintained according to housekeeping standards</p> <p>2.7. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.8. Workplace records are maintained according to workplace recording requirements</p>
3. Shut down the creamed honey manufacture process	<p>3.1. The appropriate shutdown procedure is identified</p> <p>3.2. The process is shut down according to workplace procedures</p> <p>3.3. Maintenance requirements are identified and reported according to workplace reporting requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services, including selecting appropriate seed honey (it may also require selection of more than one liquid honey to meet required product characteristics)
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters (temperature and agitation settings), cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- start, operate, monitor and adjust process equipment to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility

REQUIRED SKILLS AND KNOWLEDGE

- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- demonstrate batch/product changeovers according to enterprise procedures
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- basic principles of crystallisation, including an understanding of crystal structure and where appropriate, methods used to reduce crystal size, the effects of temperature and agitation on crystal formation, appropriate ratio of seed to liquid honey and factors that influence the crystallisation process including moisture content and crystal size
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available
- quality and organoleptic characteristics of different types of honey processed
- quality characteristics to be achieved by the final product and related test methods used to confirm quality
- quality requirements of seed and liquid honey used and the effect of variation on the final product
- operating requirements, parameters and corrective action required where the process is outside specified operating parameters (typical operating parameters include ambient and processing temperatures, agitation speeds and holding times and temperatures)
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor each stage of the production process, such as inspecting, measuring and testing as required
- inspection or test points (control points) in the process and the related procedures and recording requirements

REQUIRED SKILLS AND KNOWLEDGE

- contamination/food safety risks associated with the process and related control measures (this relates specifically to air inclusion and moisture content and related methods of control)
- common causes of variation and corrective action required
- factors that affect the stability and shelf-life of the finished product and options to extend shelf-life, including storage conditions for packed product
- occupational health and safety (OHS) hazards and controls, including the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- product/process changeover procedures and responsibilities where relevant
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for creaming honey
- start, operate, monitor and adjust process equipment

EVIDENCE GUIDE	
	<p>to achieve required quality outcomes</p> <ul style="list-style-type: none"> • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • production schedule/batch instructions • specifications, control points and processing parameters • process and related equipment and services • seed and liquid honey • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2003A Clean equipment in place • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where</p>

EVIDENCE GUIDE

	possible, over a number of assessment activities.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements

Legislative requirements

Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:

- the Food Standards Code, including labelling, weights and measures legislation
- legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity

Workplace information

Workplace information may include:

- standard operating procedures (SOPs)
- specifications/recipes
- production schedules and instructions
- manufacturers' advice
- standard forms and reports

Production processes

Production processes may be partly or fully automated. While processes vary, typical stages include:

- addition of seed honey
- holding
- mixing/working
- temperature control

RANGE STATEMENT	
Operation of equipment and processes	Operation of equipment and processes may require: <ul style="list-style-type: none"> the use of process control panels and systems
Equipment	Equipment may include: <ul style="list-style-type: none"> jacketed tanks/vats buffer tanks mixers/homogenisers scraped surface heat exchangers agitators and pumps
Services	Services may need to be confirmed. These depend on the nature of the process. Typical examples include: <ul style="list-style-type: none"> power water compressed and instrumentation air

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for cleaning	1.1. Chemical stocks are available to meet cleaning and sanitation requirements 1.2. Services are confirmed as available and ready for operation 1.3. Equipment shutdown is planned and equipment is taken off-line for cleaning 1.4. Equipment and related valves and pipework are configured to confirm readiness for cleaning 1.5. The plant is set for the cleaning cycle
2. Operate and monitor the cleaning process	2.1. The cleaning cycle is undertaken according to company policies and procedures 2.2. The cleaning process is monitored to confirm cleaning meets company requirements 2.3. Cleaning data is recorded according to workplace reporting requirements 2.4. Out-of-specification process and equipment performance is identified, rectified and/or reported
3. Dispose of waste and return plant to operating condition	3.1. Cleaning chemicals are flushed from plant and disposed of according to company policies and procedures

ELEMENT	PERFORMANCE CRITERIA
	3.2. Work is conducted according to environmental requirements 3.3. Plant is set up to meet operational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information, such as the cleaning schedule to identify cleaning requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services
- handle and prepare cleaning and sanitation agents safely, including following correct handling and preparation procedures and use of appropriate protective clothing and equipment as required
- schedule cleaning and/or liaise with related work areas to take equipment and area off-line with minimal disruption to production
- prepare equipment and area for cleaning, such as rendering equipment safe to clean, removing obstacles and unnecessary equipment, correctly positioning equipment (e.g. valves, pipes, vents and taps), selecting appropriate cleaning cycle, removing waste and/or dismantling equipment
- clean equipment according to cleaning process cycle and procedures, such as starting up and operating the CIP process in both automatic and manual modes
- monitor the process and equipment operation to maintain the cleaning process within the required parameters
- locate emergency stop functions on equipment
- return plant to operating order
- return area to working order
- take corrective action in response to out-of-specification results
- advise affected work areas of cleaning schedule and progress
- maintain and store chemicals and related equipment as required
- carry out relevant checks and inspections to confirm effectiveness of cleaning
- sort, collect, treat, recycle or dispose of waste
- record cleaning information
- maintain work area to meet housekeeping standards

REQUIRED SKILLS AND KNOWLEDGE

- conduct routine maintenance according to enterprise procedures
- take samples and conduct tests according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of CIP, including the use and functions of caustic and acid solutions, and cleaning sequence and stages as required in the workplace
- purpose and use of cleaning equipment and chemicals used
- terminology relating to the chemical solutions used
- safe work procedures, including appropriate signage of cleaning activities and safe handling and storage of cleaners and sanitisers used
- purpose and limitations of protective clothing and equipment
- cleaning and sanitation requirements, including different levels of cleaning requirements depending on the reason for cleaning
- characteristics of cleaning and sanitising chemicals used, including basic composition as well as compatibility of chemicals with types of equipment
- methods used to render equipment safe to clean, including the status and purpose of equipment guards, relevant lock out/tagout and isolation procedures
- equipment settings required for cleaning and for operating respectively
- basic operating principles of process control where relevant, including the relationship between control panels and systems and the physical equipment
- inspection points for cleaning and sanitation
- consequences of contamination of process flows by cleaning solutions and related safeguards
- types of waste generated by both the production and the cleaning process and related collection, treatment and disposal requirements
- environmental consequences of incorrect cleaning waste disposal procedures
- requirements to liaise/advise related work areas
- reporting and recording systems
- routine maintenance procedures where relevant
- sampling methods and test procedures where relevant

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE	
The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • shut down equipment and prepare for cleaning • prepare and use chemicals according to safe work requirements • clean equipment to meet work standards • monitor cleaning and report or address any non-compliances • flush equipment and dispose of waste according to environmental guidelines • complete required documentation • apply safe work practices and identify OHS hazards and controls • apply food safety procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • cleaning procedures and related advice on equipment operation, including advice on safe work practices and environmental requirements • personal protective clothing and equipment • equipment to be cleaned, and related CIP system • chemicals and/or automated chemical addition system • services as required • MSDS where appropriate • cleaning schedule or advice and related standard operating procedures • housekeeping standards and procedures • advice on environmental management issues relevant to work responsibilities • workplace information recording systems, requirements and procedures • sampling and testing schedules and procedures as

EVIDENCE GUIDE	
	relevant to cleaning requirements in the workplace.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	<p>Work is carried out in accordance with company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP</p>
Workplace information	<p>Workplace information may include:</p> <ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production cleaning schedules and instructions • signs and symbols • materials safety data sheets (MSDS) • manufacturers' advice • standard forms and reports

RANGE STATEMENT	
Dosing of cleaning chemicals	Dosing of cleaning chemicals may be: <ul style="list-style-type: none"> • automatically controlled or manually dosed
Services	Services may include: <ul style="list-style-type: none"> • power • water • Steam • compressed and instrumentation air
Testing	Where tests are conducted as part of operation, a typical requirement is measurement of pH
Monitoring the process	Monitoring the process is dependent on the nature of equipment. Examples of monitoring include: <ul style="list-style-type: none"> • chemical strength • cycle time • temperatures • time • storage tank levels • condensate quality
Operation and monitoring of equipment and processes	Operation and monitoring of equipment and processes typically requires the use of control panels and systems

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information, such as the cleaning schedule to identify cleaning requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary cleaning and sanitising equipment and services
- select and prepare cleaners and sanitisers as required according to workplace procedures
- prepare equipment for cleaning, such as rendering equipment safe to clean, clearing product and waste materials, covering motors and instrumentation where steam or water hoses are used, and simple dismantling of equipment parts
- advise any affected work areas/operators of cleaning progress to coordinate timely completion with minimal disruption to production
- clean and sanitise equipment as required according to workplace procedures and cleaning schedule
- return equipment to operating order (this may involve basic assembly of equipment parts)
- inspect equipment to identify equipment condition and cleanliness
- locate emergency stop functions on equipment
- report and/or correct unacceptable equipment condition
- maintain housekeeping standards
- prepare cleaners and sanitisers as required
- store cleaners, sanitisers and related equipment as required
- carry out relevant checks and inspections
- maintain work area to meet housekeeping standards
- conduct routine maintenance according to enterprise procedures
- take samples and conduct tests according to enterprise procedures
- record cleaning and sanitation information according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- the purpose of cleaning and sanitation and importance in maintaining food safety
- functions of cleaners, sanitisers and related equipment

REQUIRED SKILLS AND KNOWLEDGE

- safe work procedures, including appropriate signage of cleaning activities, safe handling and storage of cleaners and sanitisers used, safety when using cleaning methods, such as hot water and steam hoses, and status and purpose of safety guards
- purpose and limitations of protective clothing and equipment
- cleaning and sanitation requirements relating to work responsibilities, including the need for different levels of cleaning where relevant
- procedures for preparing cleaners and sanitizers as required
- cleaning method/s to be followed relating to work responsibilities
- other work areas/operators who need to be consulted/advised on timing of cleaning
- methods used to render equipment safe to clean, including understanding the status and purpose of equipment guards, relevant lock out/tagout and isolation procedures and related equipment settings for both cleaning and operating as required
- procedures for conducting cleaning and sanitising
- types of waste generated by the cleaning process and related collection, treatment and disposal requirements
- potential environmental impact of incorrect waste handling
- inspection, cleaning and storage requirements of cleaning equipment used
- inspection points and methods for confirming the effectiveness of cleaning and sanitation, including visual inspection, and where required, recording of cleaning conducted
- inspection requirements to confirm equipment condition, including acceptable equipment condition, ability to identify faulty or unacceptable equipment and take required corrective action
- recording requirements and responsibilities
- routine maintenance procedures where relevant
- sampling methods and test procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out in accordance with company procedures, licensing requirements, legislative requirements, and industrial awards and agreements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP

Workplace information

Workplace information may include:

- standard operating procedures (SOPs)
- specifications
- production and cleaning schedules
- labels and codes
- safety signs and symbols
- materials safety data sheets (MSDS)
- standard forms
- written or verbal instruction

Cleaning and sanitising chemicals

Cleaning and sanitising chemicals may be:

- pre-mixed or manually mixed

Preparing/restoring equipment to operating order

Preparing/restoring equipment to operating order may involve:

- simple dismantling and reassembling of equipment parts
- basic isolation
- covering of motors and instrumentation

Services

Services may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • power • water • steam • compressed and instrumentation air
Inspecting cleaning effectiveness	Inspecting cleaning effectiveness typically involves: <ul style="list-style-type: none"> • carrying out a visual inspection

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to transport food	<p>1.1. Food storage vehicles and containers/receptacles are appropriate for use</p> <p>1.2. Food storage vehicles and containers/receptacles are prepared for use</p> <p>1.3. Food is loaded and secured as required to meet transportation and temperature control requirements</p> <p>1.4. Hand washing and disinfecting procedures are followed to meet workplace requirements</p> <p>1.5. Work is conducted in accordance with workplace environmental guidelines</p>
2. Load, unload and transport food safely	<p>2.1. Food safety control measures are monitored to ensure that food safety is maintained during transport</p> <p>2.2. Where food safety control requirements are not met, the incident is promptly reported and corrective action is taken</p> <p>2.3. Food is unloaded as required according to transportation and temperature control requirements</p> <p>2.4. Food safety information is recorded to meet workplace requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to determine food handling and transport requirements
- select, fit and use personal protective clothing and/or equipment
- confirm that the vehicle and associated equipment are appropriate and ready for use, including confirming that vehicle type is capable of maintaining the required temperature range for product
- prepare transport containers (this will vary depending on the type of food and transport method), such as checking cleaning records, and where required, confirming product compatibility to ascertain that appropriate level of cleaning has occurred
- prepare the storage/holding environment as required, including confirming that temperature parameters for the loading and unloading areas are met
- follow procedures to load/unload food to ensure that materials/product is loaded/unloaded in correct sequence and configuration and that food cannot become contaminated by being located in proximity to other food or non-food items that can cause contamination (osmosis)
- monitor temperature parameters and related food safety control points before, during and after transporting food and record information in the required format
- take appropriate corrective action in response to failure to meet temperature parameters or other food safety requirements as required by workplace procedures
- clean and sanitise food containers according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- food safety control points in the loading/unloading and transportation of food materials and product and related methods of control
- characteristics of food transported and related transport environment requirements
- micro-biological, physical and chemical hazards that can occur when loading, transporting and unloading food, appropriate to nature and method of food transported, including the types of hazards likely to occur, the conditions under which they occur, and possible consequences
- methods and procedures used to control food safety hazards (this depends on the

REQUIRED SKILLS AND KNOWLEDGE

type of controls and equipment used), including the purpose and operation of equipment, procedures in place to maintain food safety and workplace records, such as temperature control charts and cleaning and sanitation records

- procedures used to confirm that transportation and related food safety equipment is appropriate for use and operational, such as equipment capacity to maintain a given temperature environment appropriate to the food product
- cleaning and sanitation requirements for food containers where relevant
- where contamination by osmosis is a possibility, the potential for cross-contamination resulting from location in proximity to other food or non-food items that are transported

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- ensure readiness of transport in accordance with product requirements
- identify risks associated with transporting food products
- identify and apply control measures for ensuring safety of food
- load and unload goods according to requirements
- identify and act on non-compliances
- complete workplace records as required
- apply safe work practices and identify OHS hazards and controls
- apply food safety procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- loading/unloading and transport advice/schedules

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • food safety information (this may be included in a food safety plan and/or integrated into work procedures) • work procedures relevant to loading/unloading and transportation, including advice on required temperature parameters to be maintained • workplace information, such as temperature charts and cleaning records as appropriate • food materials and product to be loaded/unloaded and transported • documentation and recording requirements and procedures .
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, licensing requirements, legislative requirements and industrial awards and agreements. When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply and reference to food safety is replaced by GMP
Workplace information	Workplace information may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • standard operating procedures (SOPs) • food safety program • product handling specifications • transport schedules and instructions • transport vehicle manufacturers' advice • standard forms and reports
Transport vehicles	Transport vehicles are appropriate for the transportation of food and capable of maintaining the required environment for the food type transported
Food safety controls	Food safety controls refer to the methods used to control food safety hazards. Control methods, requirements and record keeping are specified in workplace food safety procedures which typically form part of a workplace food safety program
Safe food transport parameters	Safe food transport parameters depend on the type of food transported. Industry guidelines and codes, such as Cold Chain guidelines should be used as a basis for setting these parameters where available
Confirming readiness for use of food transport vehicle	<p>Confirming readiness for use of food transport vehicle and containers/receptacles can include:</p> <ul style="list-style-type: none"> • confirming that the vehicle is in good operating order and that containers/receptacles used to store food meet the relevant cleaning and sanitation requirements <p>It may also include:</p> <ul style="list-style-type: none"> • bringing the food handling area and storage container/receptacle to within the required temperature range before loading/unloading and confirming that equipment required to maintain temperature is operational
Food safety incidents	A food safety incident is a situation where the safe limits or parameters identified by the food safety program are not met

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for sampling	<p>1.1.Sampling requirements are identified in accordance with the sampling plan</p> <p>1.2.Sampling equipment, containers and labels are prepared</p>
2. Collect samples	<p>2.1.Samples are collected according to sampling procedures and the requirements of the sampling plan</p> <p>2.2.Samples are handled and prepared to preserve sample and source integrity</p> <p>2.3.Defects or abnormalities in source material and/or sample are identified and reported</p> <p>2.4.Sample information is recorded according to workplace sample recording requirements</p> <p>2.5.The work area is maintained according to housekeeping standards</p> <p>2.6.Work is conducted in accordance with workplace environmental guidelines</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access and interpret sampling plan to identify sampling requirements
- select, fit and use personal protective clothing and/or equipment
- prepare for sampling to ensure required tools, containers and labels are available
- follow sampling procedures and the sampling plan to collect samples from the points, in the quantities and at the times specified
- identify atypical source materials and/or samples and take corrective action, such as reporting abnormalities, repeating sample collection and/or following intensive sampling schedules as required
- complete sample records according to workplace requirements, such as labelling samples as required
- transfer samples for testing
- maintain work area to meet housekeeping standards
- prepare samples according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- basic sampling principles, including the importance of following the sampling plan to obtain representative sampling reflecting characteristics of source material, the sample characteristics and related preservation, handling and storage requirements, and the labelling system purpose and requirements
- tests to be conducted on samples and related handling and preparation requirements and responsibilities
- characteristics of materials sampled and common contaminants and related conditions under which contamination is likely to occur
- sampling techniques relevant to samples collected, such as sterilisation methods and procedures
- the relationship between sampling, testing and production processes, including different sampling regimes that may apply in response to non-standard conditions or after corrective action is taken to adjust production outputs
- procedures and responsibility for reporting and recording sampling information, such as legislative requirements
- procedures for preparing samples where relevant

Evidence Guide

EVIDENCE GUIDE	
<p>The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
Overview of assessment	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • conduct pre-start checks on equipment used for collecting and handling samples • collect, handle and store samples according to sampling requirements and standards • take corrective action in response to typical defects and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • apply food safety procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • sampling plan • documentation, including specifications, work instruction and other advice on sampling requirements • recording and reporting system • sampling instrumentation and containers as required • product/source material to be sampled.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Example could be:</p> <ul style="list-style-type: none"> • MSL973001A Perform basic tests

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements and industrial awards and agreements

Workplace information

Workplace information may include:

- standard operating procedures (SOPs)
- specifications
- production schedules and instructions
- manufacturers' advice
- sampling plans

Sampling requirements

Sampling requirements include:

- sampling under standard conditions
- sampling after processes are adjusted in response to variation or non-conformance

Sampling

Sampling typically occurs at a number of points and using a range of techniques

Maintenance of sample integrity

Maintenance of sample integrity may be achieved by:

- use of appropriate personal protective clothing
- use of clean sampling tools and containers (sterilised tools/containers for aseptic sampling)
- temperature control
- addition of preservatives as required

RANGE STATEMENT

Sampling techniques	Sampling techniques may include: <ul style="list-style-type: none"> • sub-sampling

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Maintain food safety while working in a food handling area	<p>1.1. Food safety requirements related to work tasks are identified and followed</p> <p>1.2. Work responsibilities are carried out so that the safety of food is maintained</p> <p>1.3. Procedures or practices which are not consistent with workplace food safety program are identified and reported</p>
2. Maintain food handling area in clean and orderly state	<p>2.1. Equipment and the food handling area meet the cleaning and sanitation requirements of workplace food safety program</p> <p>2.2. Work is conducted in accordance with workplace environmental guidelines</p> <p>2.3. Waste is collected and disposed of according to workplace procedures</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access and apply workplace information on food safety policies and procedures relating to own work
- fit and use appropriate personal protective clothing and equipment as required by work tasks to meet food business requirements
- maintain personal conduct consistent with workplace requirements
- check own work area to identify food safety hazards
- carry out work responsibilities to ensure that food safety is not compromised
- take necessary precautions when moving between or around the workplace and/or from one task to another to minimise the risk of contamination
- recognise and report situations or procedures that could compromise food safety according to workplace procedure, including following procedures in own work and related work area to report to the appropriate personnel, in required detail and in a timely manner
- take corrective or preventative action within level of responsibility
- report health conditions and illness as required by workplace food safety procedures
- sort and dispose of waste as required by work responsibility according to workplace procedure
- maintain housekeeping standards in work area
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- food safety requirements related to own work as determined by the workplace
- sources of advice on food safety issues and responsibilities in the workplace
- personal hygiene practices and clothing and footwear requirements associated with working in and moving in and between food handling areas and moving between food handling and non food-handling areas
- suitable standard for materials and equipment used in the food handling area, including materials that are unsuitable for use, such as breakable or dirty equipment/materials
- methods and procedures to be followed when carrying out work responsibilities in a food handling area to ensure that food safety is not compromised (this will depend on the nature of work responsibilities and food safety requirements as

REQUIRED SKILLS AND KNOWLEDGE

- specified by the workplace)
- the types of contamination that can occur as a result of work activities, and procedures used to prevent these types of contamination from occurring
 - cleaning and sanitation requirements and responsibilities, including cleaning methods appropriate to a food handling environment and those used in the specific food handling area
 - waste collection, recycling and handling procedures
 - housekeeping standards to be maintained in the work area

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify food handling procedures and food safety issues for work
- apply food safety procedures when handling food products
- identify and act on non-conformances
- ensure cleaning standards are met
- follow environmental and waste management procedures.

Context of and specific resources for assessment

Assessment must occur in a real or simulated workplace where the assessee has access to:

- food safety policies and procedures relevant to work function
- work procedures, including procedures for entering and exiting food handling areas
- work process and related services/resources
- work area and related equipment to undertake work function

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> waste collection, treatment, recycling and/or disposal methods monitoring and reporting system.

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the equipment and process for operation	<p>1.1.Packaging components/consumables, materials and items to be packaged are confirmed and available to meet operating requirements</p> <p>1.2.Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3.Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4.Operating parameters are entered as required to meet safety and production requirements</p> <p>1.5.Materials, product and packaging components/consumables are loaded or positioned as required to meet packaging requirements</p> <p>1.6.Equipment performance is checked and adjusted as required</p>

ELEMENT	PERFORMANCE CRITERIA
	1.7.Pre-start checks are carried out as required by workplace requirements
2. Operate and monitor the process	2.1.The process is started and operated according to workplace procedures 2.2.Equipment is monitored to identify variation in operating conditions 2.3.Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements 2.4.The process is monitored to confirm that specifications are met 2.5.Out-of-specification process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6.The work area is maintained according to housekeeping standards 2.7.Work is conducted in accordance with workplace environmental guidelines 2.8.Workplace records are maintained according to workplace recording requirements
3. Shut down the process	3.1.The appropriate shutdown procedure is identified 3.2.The process is shut down according to workplace procedures 3.3.Maintenance requirements are identified and reported according to workplace reporting requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify packaging requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary packaging components/consumables, materials and services
- conduct pre-start checks, such as inspecting equipment condition to identify any

REQUIRED SKILLS AND KNOWLEDGE

signs of wear, setting coders and printers, selecting appropriate equipment settings and/or related parameters, cancelling isolation or lockouts as required, confirming that equipment is clean and correctly configured for packaging requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been completed, and confirming that all safety guards are in place and operational

- start, operate, monitor and adjust packaging equipment to achieve required outcomes., such as packaging components/consumables and/or product, and monitoring control points (e.g. weights, codes, placement, glue temperatures, alignment and appearance, configuration and seal integrity) as required to confirm process remains within specification
- monitor supply and flow of materials to and from the process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility
- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take packaging equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- demonstrate batch/process changeovers
- complete workplace records as required
- maintain work area to meet housekeeping standards
- use process control systems according to enterprise procedures
- integrity testing of packaging according to enterprise procedures
- carry out routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the packaging process, including the purpose and characteristics required of packaging materials used and the principles of the packaging process used (where methods involve vacuum or map packaging, it includes an understanding of the effect of modified atmosphere on product shelf-life)
- product and packaging coding requirements and related legal requirements, including product weight
- basic operating principles of equipment, such as main equipment components, status and purpose of guards, equipment operating capacities and applications, and the purpose and location of sensors and related feedback instrumentation
- services required and action to take if services are not available

REQUIRED SKILLS AND KNOWLEDGE

- the flow of processes supplying the packaging process and the effect of outputs on downstream processes
- quality characteristics required of the packaging process, such as seal integrity requirements
- effect of variation in inputs, such as packaging components/consumables, materials and/or services, on process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters, including restart procedures following a crash or jam up
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- methods used to monitor the packaging process, such as visual inspecting, and measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks related to stages in the packaging process and related control measures
- common causes of variation and corrective action required
- occupational health and safety (OHS) hazards and controls
- requirements of different shutdowns as appropriate to the packaging process, including emergency and routine shutdowns and procedures to follow in the event of a power outage, and conducting basic equipment referencing where required
- product/packaging changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- basic operating principles of process control, where relevant, including the relationship between control panels and systems and the physical equipment
- routine maintenance procedures where relevant
- packaging integrity testing where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • conduct pre-start checks on machinery used for packing • start, operate, monitor and adjust process equipment to achieve required quality outcomes • take corrective action in response to typical faults and inconsistencies • complete workplace records as required • apply safe work practices and identify OHS hazards and controls • safely shut down equipment • apply food safety procedures.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures, including advice on safe work practices, food safety, quality and environmental requirements • information on equipment capacity and operating parameters • specifications, control points and operating parameters • packaging and related equipment and services • materials to be packaged and packaging components/consumables as required • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be: <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standards Code, including labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity <p>When applied to the pharmaceutical industry, relevant Good Manufacturing Practice (GMP) codes apply in place of the Australian Food Standards Code and reference to food safety is replaced by GMP</p>
Workplace information	Workplace information may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • standard operating procedures (SOPs) • specifications • production schedules and instructions • manufacturers' advice • standard forms and reports
Typical equipment	<p>Typical equipment that may form a packaging sub-system includes:</p> <ul style="list-style-type: none"> • conveyor systems • filling • sealing • wrapping • thermo-form equipment • case packers • bundlers • ink jet coders • labellers • palletisers • shrink wrappers • strappers
Packaging	<p>Packaging may include:</p> <ul style="list-style-type: none"> • vacuum packing • modified atmosphere packaging (MAP) • blister packaging or over wrapping
Operation of equipment and processes	<p>Operation of equipment and processes may require:</p> <ul style="list-style-type: none"> • the use of process control panels and systems
Shutdown procedures	<p>Shutdown procedures may include:</p> <ul style="list-style-type: none"> • cleaning (in some cases cleaning may be carried out by a dedicated cleaning crew)

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare the grinding equipment and process for operation	<p>1.1. Materials are confirmed and available to meet production requirements</p> <p>1.2. Cleaning and maintenance requirements and status are identified and confirmed</p> <p>1.3. Machine components and related attachments are fitted and adjusted to meet operating requirements</p> <p>1.4. Processing/operating parameters are entered as required to meet safety and production requirements</p> <p>1.5. Equipment performance is checked and adjusted as required</p> <p>1.6. Pre-start checks are carried out as required by workplace requirements</p>
2. Operate and monitor the grinding process	<p>2.1. The process is started and operated according to workplace procedures</p> <p>2.2. Equipment is monitored to identify variation in operating conditions</p> <p>2.3. Variation in equipment operation is identified and maintenance requirements are reported according to workplace reporting requirements</p> <p>2.4. The process is monitored to confirm that specifications are met</p>

ELEMENT	PERFORMANCE CRITERIA
	2.5. Out-of-specification product/process outcomes are identified, rectified and/or reported to maintain the process within specification 2.6. The work area is maintained according to housekeeping standards 2.7. Work is conducted according to environmental standards 2.8. Workplace records are maintained according to workplace recording requirements
3. Shut down the grinding process	3.1. The appropriate shutdown procedure is identified 3.2. The process is shut down according to workplace procedures 3.3. Maintenance requirements are identified and reported

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- access workplace information to identify processing requirements
- select, fit and use personal protective clothing and/or equipment
- confirm supply of necessary materials and services to the grinding process
- conduct pre-start checks, such as inspecting equipment condition to identify any signs of wear, selecting appropriate settings and/or related parameters, cancelling isolation or lock outs as required, confirming that equipment is clean and correctly configured for processing requirements, positioning sensors and controls correctly, ensuring any scheduled maintenance has been carried out, and confirming that all safety guards are in place and operational
- operate stockfeed control panel to transfer and grind product
- monitor and adjust the grinding process and equipment operation to achieve required outcomes, including monitoring control points and conducting inspections as required to confirm process remains within specification, and running adjustments to hammer mills and roller mills
- monitor supply and flow of materials to and from the grinding process
- take corrective action in response to out-of-specification results
- respond to and/or report equipment failure within level of responsibility

REQUIRED SKILLS AND KNOWLEDGE

- locate emergency stop functions on equipment
- follow isolation and lock out/tag out procedures as required to take process and related equipment off-line in preparation for cleaning and/or maintenance within level of responsibility
- complete workplace records as required
- demonstrate batch/product changeovers
- sort, collect, treat, recycle or dispose of waste
- maintain work area to meet housekeeping standards
- collect samples and conduct tests according to enterprise procedures
- conduct routine maintenance according to enterprise procedures
- clean and sanitise equipment according to enterprise procedures
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- purpose and basic principles of the grinding process, including the characteristics of materials, which can be reduced to a suitable form for product such as stockfeed
- basic operating principles of equipment, such as main equipment components, bulk materials transfer systems and equipment, dust collection equipment, grinding equipment operating capacities and applications, and the purpose and location of magnets, sensors and related feedback instrumentation
- services required and action to take if services are not available
- basic operating principles of process control, including the relationship between control panels and systems and the physical equipment
- the flow of the grinding process and the effect of product output on downstream processes
- quality characteristics and uses of grinding process outputs
- effect of the grinding process on the end product
- effect of raw material characteristics on grinding process performance
- operating requirements and parameters and corrective action required where operation is outside specified operating parameters
- typical equipment faults and related causes, including signs and symptoms of faulty equipment and early warning signs of potential problems
- techniques used to monitor the production process, such as inspecting, measuring and testing as required by the process
- inspection or test points (control points) in the process and the related procedures and recording requirements
- contamination/food safety risks associated with the grinding process and related control measures

REQUIRED SKILLS AND KNOWLEDGE

- common causes of variation and corrective action required
- operational health and safety (OHS) hazards and controls, including the risk of dust explosion and an understanding of the limitations of protective clothing and equipment relevant to the work process
- requirements of different shutdowns as appropriate to the process and workplace production requirements, including emergency and routine shutdowns and procedures to follow in the event of a power outage
- product/process changeover procedures and responsibilities
- isolation, lock out and tag out procedures and responsibilities
- procedures and responsibility for reporting production and performance information
- environmental issues and controls relevant to the process, including waste/rework collection and handling procedures related to the process
- sampling and testing associated with process monitoring and control where relevant
- routine maintenance procedures where relevant
- cleaning and sanitation procedures where relevant

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- conduct pre-start checks on machinery used for grinding
- start, operate, monitor and adjust process equipment to achieve required quality outcomes
- take corrective action in response to typical faults and inconsistencies
- complete workplace records as required
- apply safe work practices and identify OHS hazards

EVIDENCE GUIDE	
	<p>and controls</p> <ul style="list-style-type: none"> • safely shut down equipment • apply food safety procedures to work practices.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment • work procedures including advice on safe work practices, food safety, quality and environmental requirements, stock flow systems, production schedules, batch/recipe instructions • specifications, control points and processing parameters • production schedule/batch instructions • information on equipment capacity and operating parameters • grinding and related equipment and services • stock required for the grinding process • sampling schedules and test procedures and equipment as required • documentation and recording requirements and procedures • cleaning procedures, materials and equipment as required.
Method of assessment	<p>This unit should be assessed together with core units and other units of competency relevant to the function or work role. Examples could be:</p> <ul style="list-style-type: none"> • FDFOP2004A Clean and sanitise equipment • FDFOP2011A Conduct routine maintenance • FDFOP2013A Apply sampling procedures • FDFOP2030A Operate a process control interface • MSL973001A Perform basic tests.
Guidance information for assessment	<p>To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out according to company policies and procedures, regulatory and licensing requirements, legislative requirements, and industrial awards and agreements
Legislative requirements	<p>Legislative requirements are typically reflected in procedures and specifications. Legislation relevant to this industry includes:</p> <ul style="list-style-type: none"> • the Food Standard Code, including the labelling, weights and measures legislation • legislation covering food safety, environmental management, OHS, anti-discrimination and equal opportunity

FDFTEC3001A Participate in a HACCP team

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	This unit of competency covers the skills and knowledge required to participate in the development and/or review of a HACCP-based food safety program under direction.
------------------------	--

Application of the Unit

Application of the unit	<p>This unit is appropriate where the operator requires a detailed understanding of the steps and techniques used to develop and review a HACCP-based food safety program.</p> <p>This unit can be aligned at either AQF 3 or 4. When aligned at AQF 3 the person would typically participate in the development of the food safety program as part of a group. The scope of contribution would typically be limited to their immediate work area. When this unit is applied at AQF 4 the person may take a lead role in facilitating the development of the food safety program and would apply an understanding of food safety across more diverse operations or work areas.</p> <p>This unit is based on and achieves part of the guideline food safety unit GFSDFSPA Develop food safety programs.</p>

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to develop and/or review a food safety program	<p>1.1.Roles and responsibilities for participating in, developing or reviewing a food safety program are identified</p> <p>1.2.The scope of the food safety program is identified</p>
2. Identify and/or review food safety hazards	<p>2.1.Processes to be covered by the food safety program are identified and steps within each process are described</p> <p>2.2.Food safety hazards that are reasonably expected to occur are identified for each process</p> <p>2.3.Handling methods, processing techniques and existing support programs used in the workplace are identified</p>
3. Establish and/or	3.1.Acceptable methods of control are established for

ELEMENT	PERFORMANCE CRITERIA
review methods to monitor and control food safety hazards	<p>each food safety hazard that is reasonably expected to occur</p> <p>3.2. Control methods are validated</p> <p>3.3. Procedures for taking preventative action are established</p> <p>3.4. Appropriate methods for monitoring that processes remain within control are established</p> <p>3.5. Required corrective action to respond to situations where hazards are not effectively controlled is established</p> <p>3.6. Work is conducted in accordance with workplace environmental guidelines</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Ability to:

- identify personal roles and responsibilities for participating in the development or review of a food safety program
- identify processes and steps to be covered
- identify hazards that are reasonably expected to occur and establish appropriate methods of control, such as participating in validating existing control methods and where there is no adequate control method in place, establishing an appropriate method
- establish or review procedures for implementing preventative action, such as revision of materials, processes and/or food handling procedures, and where required, the revision of workplace practices and documentation, such as specifications, operating procedures and approved supplier programs
- describe the appropriate monitoring requirements for each food safety hazard, including the method or procedure to be followed, the frequency and timing, the person responsible, and the information to be recorded (procedures to be followed would typically be specified in the form of a standard operating procedure or work instruction)
- describe corrective action requirements in the event that acceptable limits or

REQUIRED SKILLS AND KNOWLEDGE

requirements of support programs are not met

- develop or review documentation relating to the design and maintenance of the food safety program, such as flow diagrams, hazard analysis charts and tables, support program requirements, data analysis reports, corrective action reports and verification reports
- develop or review documentation to communicate food safety responsibilities, such as standard operating procedures (SOPs), processing parameters and recording devices (e.g. log sheets)
- communicate food safety responsibilities within level of responsibility using techniques and presentation styles appropriate to the audience
- use oral communication skills/language competence to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge

Knowledge of:

- the purpose and intent of food safety legislation
- purpose and responsibilities for maintaining records as required by legislation and workplace procedures
- roles and responsibilities for development and maintenance of the food safety program, including roles of internal and external auditors and of authorised officers
- techniques for applying HACCP-based principles, including techniques for identifying hazards, assessing the likelihood of occurrence, determining acceptable methods of control, monitoring and recording requirements for each control point, identifying corrective action if controls are not met, and developing system review procedures
- techniques used to map operations and analyse food safety requirements, such as preparation of flow charts, hazard analysis charts and tables, and data analysis reports
- raw materials, ingredient and finished product composition and characteristics, and related handling and storage requirements
- food processing methods used in the workplace or work area and their effect on food safety
- sources of technical expertise on food safety requirements
- the role of consultation in the development, implementation and ongoing maintenance of the food safety program
- documentation and recording requirements to support communication and monitoring of the food safety program, including procedures for maintaining and updating relevant documents, such as operating procedures
- main types of food safety hazards/contamination likely to occur given the type of

REQUIRED SKILLS AND KNOWLEDGE

- product and processing methods used
- conditions required for bacterial food poisoning to occur, such as water activity, pH, composition, time and temperature as relevant to food handled
- acceptable control methods for the hazards identified and required corrective action when control requirements are not met
- typical support programs, such as cleaning schedules, pest control, stock rotation, product traceability and personal hygiene, and how they can be used as part of a food safety program
- acceptable control methods for the hazards identified and required corrective action when control requirements are not met
- validation and verification processes and techniques and responsibilities

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of ability to:

- identify components and parameters of a food safety program
- identify food safety hazards in production processes
- establish and validate control standards and methods for each hazard
- establish procedures for unpredicted hazards
- communicate and document hazards and control procedures
- complete workplace records
- apply safe work practices and identify occupational health and safety (OHS) hazards and controls
- apply food safety procedures.

Context of and specific resources for

Assessment must occur in a real or simulated workplace

EVIDENCE GUIDE	
assessment	<p>where the assessee has access to:</p> <ul style="list-style-type: none"> • workplace food safety program documentation • advice on quality and food safety legislation • procedures for developing or modifying specifications and other advice on food safety requirements • procedures for developing or modifying documentation, such as work instructions and procedures, log sheets and other recording requirements • review/audit arrangements • consultative mechanisms • communication systems • training system • reporting/recording system.
Method of assessment	This unit should be assessed together with core units and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competency should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Food safety programs	<p>A food safety program is a written document that specifies how a business will control all food safety hazards that are reasonably expected to occur in the food business. The food safety program must provide for the systematic</p>

RANGE STATEMENT	
	<p>monitoring of the controls as well as appropriate corrective action if a hazard is found not to be under control. Records must be kept to demonstrate action in relation to, or in compliance with, the food safety program. A food safety program may be developed as a stand-alone program or may be integrated with the quality program in a workplace</p>
Methods used to control hazards	<p>Methods used to control hazards include:</p> <ul style="list-style-type: none"> • both support programs and specific hazard control limits or requirements <p>Typical examples of support programs include:</p> <ul style="list-style-type: none"> • product recall • cleaning schedules • pest control programs • personal hygiene practices • calibration procedures and related operating procedures
Food safety hazards	<p>Food safety hazards include:</p> <ul style="list-style-type: none"> • microbiological • chemical • physical hazards
Validation	<p>Validation refers to:</p> <ul style="list-style-type: none"> • the use of objective evidence in order to prove that materials, processes, procedures or equipment used are capable of delivering the intended result
Verification	<p>Verification refers to:</p> <ul style="list-style-type: none"> • reviewing all aspects of the food safety program and related records to determine compliance with and adequacy of the food safety program <p>At a minimum, food safety programs must be verified annually</p>
Scope of the HACCP based plans	<p>The scope of the HACCP-based plan depends on workplace requirements and may extend outside the direct area of responsibility of the team participants</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to bench graft vines	1.1 Materials are confirmed as available to meet grafting requirements 1.2 Cuttings are selected and prepared for grafting 1.3 Equipment is checked to confirm readiness for use 1.4 Equipment is set to meet grafting needs as required
2. Bench graft vines	2.1 Cuttings are disbudded according to workplace procedures 2.2 Cuttings are bench grafted according to workplace procedures 2.3 Graft is treated and/or taped according to workplace procedures 2.4 Grafting process and equipment are monitored to ensure results are maintained within specifications 2.5 Out-of-specification process and equipment performance are identified, rectified and/or reported
3. Complete bench grafting activities	3.1 Equipment is shut down, cleaned and maintained as required 3.2 Grafted vines are packed, labelled and stored according to instructions 3.3 Waste generated by both the process and cleaning procedures is collected, treated and disposed of according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify grafting requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas and customers
- confirm supply of necessary materials
- select appropriate vine material for grafting. This may include consideration of:
 - variety and clone
 - matching cambium
 - matching bevels and sizes
 - wood diameters
 - customer or workplace requirements
- prepare vine material for grafting. This may include:
 - removal from cold storage
 - soaking
 - heat treatment
 - disbudding
 - hydration
 - grading
- select, prepare and set equipment as required
- operate equipment
- disbud vines according to instructions
- bench graft vines to match specifications
- treat vines after grafting. This may include:
 - packing into callusing boxes
 - hormonal treatment
 - careful handling
 - following hygiene procedures
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may include monitoring:
 - tightness of graft union
 - progress (e.g. number per day)
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste as required
- maintain work area to meet housekeeping standards. This should include hygiene requirements to prevent cross-infection

- clean equipment as required
- pack, label and store grafted vines. This may include consideration of:
 - cold room layout
 - cold room temperature variations
 - customer requirements
 - storage time requirements
 - care of vine material (e.g. moisture and disease)
- identify, rectify and/or report environmental non-compliance
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose of grafting and various methods of budding and grafting
- purpose and methods of disbudding
- criteria for successful grafting
- importance of selection and use of rootstock and Vinifera
- advantages of using clonal and registered vine improvement rootstock material
- criteria for selecting parent vines for scion material
- procedures and optimum conditions for the storage of material until required for grafting
- stages of the grafting procedure and their purpose
- common problems and corrective action required
- hygiene requirements and procedures
- purpose and components of grafting equipment
- operating procedures for grafting equipment
- methods of callusing vine cuttings and the criteria for best callus development
- procedures and responsibility for reporting problems
- environmental issues and controls
- cleaning requirements and procedures for work area and equipment
- reporting and recording requirements and procedures
- routine maintenance procedures for equipment where relevant.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • select and prepare appropriate vine material for grafting including disbudding • undertake bench grafting of vines to instructions • post-grafting treatment and packing of vines is to instructions • monitor grafted vines and out of specification grafted vines identified and rectified or reported • follow personal and work area hygiene procedures • dispose of waste correctly • record and report results of grafting according to procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.

EVIDENCE GUIDE	
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules • instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Grafting methods	<p>Grafting methods may include:</p> <ul style="list-style-type: none"> • T buds • Chip • Wedge • side bark

RANGE STATEMENT

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for potting operations	1.1 Work instructions on potting operations are confirmed and understood 1.2 Materials are confirmed as available and ready to meet potting requirements 1.3 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures 1.4 Potting media is blended to according to workplace procedures 1.5 Pots and work areas are cleaned and sterilised to minimise risk of contamination 1.6 Grafted cuttings are prepared according to instructions
2. Pot on propagated material	2.1 Callused cuttings requiring potting are identified and collected according to instructions 2.2 Soil is placed in pots according to workplace procedures 2.3 Cuttings are planted according to instructions 2.4 Trays are labelled according to instructions 2.5 Safe work practices are implemented to minimise risk of hazards
3. Carry out post-potting treatments	3.1 Potted cuttings are transferred to the glasshouse according to instructions 3.2 Potted cuttings are watered according to instructions 3.3 Waste is collected and disposed of according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify potting requirements
- confirm supply of necessary materials
- liaise with other work areas and customers
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- implement safe work practices to minimise risk of hazard
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- prepare chemical treatments to required concentration and ensure a homogenous mix
- prepare cuttings as instructed. This may include:
 - grading
 - waxing
 - dipping in hormones
 - hydrating
- plant cuttings as instructed. This may include:
 - putting correct amount of media into the pots
 - placing cuttings with nodes facing upwards
- label trays as instructed
- transfer potted cuttings as instructed
- water potted cuttings as instructed
- collect and dispose of waste as instructed
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- Occupational health and safety (OHS) hazards and controls
- purpose and application of protective clothing and/or equipment
- correct operating procedures of equipment
- safe and effective handling of equipment
- safe preparation and handling of potting media
- cleaning requirements and procedures for work area and equipment
- eEnvironmental issues and controls
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies
- waste disposal requirements and procedures
- safe preparation and handling of chemicals
- commonly occurring problems with potted cuttings
- principles of nursery hygiene.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • use personal protective equipment, MSDS and follow other specified OHS procedures • correctly handle potting media and chemicals and disinfectants • select and mix chemical treatments to required concentrations • sterilise posts and work surfaces to instructions • select or blend potting media according to instructions and placed into pots • correctly carry out grading, waxing or other preparations of cuttings before potting • plant cuttings correctly and label trays

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • dispose of waste according to procedures • complete records correctly.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with and other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

RANGE STATEMENT	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules • instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • potting machines • front-end loader • forklift
Materials	<p>Materials may include:</p> <ul style="list-style-type: none"> • potting mix • pots • cuttings • trays • pallets
Waste	<p>Waste may include:</p> <ul style="list-style-type: none"> • rejected cuttings • spilled potting media • damaged pots • boxes
Hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • inhaling potting media • use of chemicals and disinfectants • moving machinery • transferring pots • exposure to sun • dust • using fungicide and hormone dips

RANGE STATEMENT	
	<ul style="list-style-type: none"> operating potting equipment
Media components	<p>Media components may include:</p> <ul style="list-style-type: none"> sand potting mix gravel gro-wool sawdust pine bark perlite vermiculite foam peat amendments nutrients ameliorants ash rice hulls sphagnum moss commercial mixes
Contamination	<p>Contamination may include:</p> <ul style="list-style-type: none"> pests diseases viruses
Problems and anomalies	<p>Problems and anomalies may include:</p> <ul style="list-style-type: none"> evidence of nematodes crown gall dehydration infection physical damage graft union failure
Treatments	<p>Common treatments may include:</p> <ul style="list-style-type: none"> waxing fungicide dips or drench watering in
Labelling	<p>Labelling may include:</p> <ul style="list-style-type: none"> variety clone

RANGE STATEMENT	
	<ul style="list-style-type: none">• batch number• date potted• number potted
Records	Records will include: <ul style="list-style-type: none">• batch number• clone variety• date potted• number potted• treatments administered

FDFWGG2003A Hand prune vines

Modification History

This unit supersedes and is equivalent to FDFWGGHPVB Hand prune vines.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to hand prune vines under regular supervision.
------------------------	--

Application of the Unit

Application of the unit	This unit covers the pruning of vines used in winemaking using a variety of hand operated or handheld equipment. Pruning methods may include spur pruning, cane pruning, rod and spur pruning. Pruning includes the ability to recognise problems and anomalies with vines and to select the best spurs, canes and buds according to instructions. The unit also covers the use of sharpening equipment and air compressors used for power pruning and sharpening equipment.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare equipment for hand pruning	1.1 Pruning equipment is checked to confirm readiness for use
2. Hand prune vines	2.1 Pruning equipment is started up and operated according to instructions as required 2.2 Equipment performance is monitored to confirm performance is maintained within specification as required 2.3 Vines are pruned in accordance with instructions 2.4 Anomalies and problems are recognised, rectified and/or reported 2.5 Equipment is maintained in good working order
3. Complete hand pruning operations	3.1 Equipment is shut down according to instructions as required 3.2 Equipment is cleaned and stored according to instructions 3.3 Vine cuttings are disposed of according to instructions 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify pruning requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- handle pruning equipment safely. This includes following the correct handling and sharpening procedures
- start up and operate automatic pruning equipment as required
- monitor and recognise performance problems with pruning equipment and correct or report them as instructed. This includes oiling moving parts and sharpening blades
- identify different parts of the grape vine. This should include identifying:
 - vine trunk and permanent framework
 - canes and/or cordons
 - tendrils and buds
- prune vines according to instructions. This may include:
 - selecting the best possible spurs and canes
 - positioning spurs or canes
 - cleanly removing sucker shoots
 - leaving the correct quantity of spurs, rods and buds
 - making cuts correctly and cleanly
 - recognising and removing unwanted growth
 - rolling and securing extension canes onto trellis wire as required
- use appropriate cleaning techniques
- recognise and report problems and anomalies
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- clean and store equipment according to instructions
- identify, rectify and/or report environmental non-compliance
- maintain work area to meet housekeeping standards
- dispose of vine cuttings according to instructions
- carry out routine preventive maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose of pruning vines
- basic components of the vine
- basic difference between cane and spur pruning

- pruning requirements
- safe handling of pruning equipment
- purpose and application of personal protective clothing and/or equipment
- correct operating procedures for pruning equipment
- shutdown sequence
- tag-out and lock-out sequence and methods
- cleaning and storage requirements of pruning equipment
- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- basic problems and anomalies
- procedures and responsibility for reporting problems and anomalies
- disposal requirements of vine cuttings
- routine preventive maintenance procedures for equipment where relevant.

Evidence Guide

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare callusing environment	1.1 Work instructions on callusing are confirmed and understood 1.2 Materials required for callusing are confirmed as available and ready to meet requirements 1.3 Equipment is selected and used according to workplace procedures 1.4 Work area, equipment and boxes are cleaned and sterilised to minimise risk of contamination 1.5 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures 1.6 Pre-mixed callusing media is prepared as instructed 1.7 Callusing environment is prepared according to workplace procedures 1.8 Callusing boxes are prepared according to workplace procedures
2. Prepare cuttings for callusing	2.1 Cuttings are prepared for callusing according to instructions 2.2 Pre-callusing treatments are applied as instructed 2.3 Cuttings are counted, bundled and labelled according to instructions 2.4 Cuttings are placed into boxes according to instructions
3. Maintain cuttings in callusing room	3.1 Cuttings are placed into callusing environment according to workplace procedures 3.2 Callusing environment is maintained within specifications 3.3 Cuttings are monitored for potential health problems according to workplace procedures 3.4 Post-callusing treatments are applied to maintain plant health according to workplace procedures
4. Carry out post-callusing operations	4.1 Callused cuttings are removed from callusing room as instructed 4.2 Waste is collected and disposed of according to workplace procedures 4.3 Facilities are cleaned and sterilised according to workplace

ELEMENT	PERFORMANCE CRITERIA
	procedures 4.4 Work is conducted in accordance with workplace environmental guidelines
5. Record information	5.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify callusing requirements
- confirm supply of necessary materials
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store the required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- prepare callusing media to specified moisture levels
- prepare callusing environment. This may include:
 - turning on heaters and fans
 - setting and monitoring temperature and relative humidity
- prepare callusing boxes. This may include:
 - filling boxes with sand or vermiculite
 - lining boxes
 - storing excess media
- prepare chemical treatments to required concentration and ensure homogenous mix
- prepare cuttings for callusing. This may include:
 - taking cuttings out of storage
 - cutting just below basal bud
- apply pre-callusing treatment. This may include:

- hydrating cuttings
- applying fungicide treatments
- applying root promoter treatment
- prepare labels in a clear and legible manner with waterproof ink
- place cuttings into boxes. This may include:
 - feeling into media
 - watering in
 - placing correct number of cuttings per box
 - placing basal end at bottom
 - dipping into hormone mixes
 - arranging cuttings according to variety, clone and source
 - labelling and mapping of beds
- maintain callusing environment. This may include consideration of:
 - temperature
 - relative humidity
 - moisture levels of growing medium
- monitor cuttings for potential health problems. This may include identifying:
 - uneven callusing
 - dehydration
 - presence of pests and diseases
- apply post-callusing treatments. This may include:
 - hydrating cuttings
 - applying fungicides
- remove callused cuttings. This may include:
 - loading cuttings onto trucks or trailers
 - potting or planting cuttings
- dispose of waste as instructed. This may include:
 - pasteurising callusing media
 - spreading waste material through the vineyard
 - placing waste in bins for removal by disposal company
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- OHS hazards and controls

- purpose of personal protective clothing and/or equipment
- correct operating procedures for equipment
- safe and effective handling of equipment
- cleaning requirements and procedures for work area and equipment
- environmental issues and controls
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies
- waste disposal requirements and procedures
- safe preparation and handling of chemicals
- purpose and benefit of pre- and post-callusing treatments
- pre-callusing treatment procedures
- post-callusing treatment procedures
- principles of nursery hygiene
- procedures for preparing pre-mixed callusing media
- factors in a controlled callusing environment that affect the vine cutting
- procedures for maintaining callusing environment
- common problems that occur during callusing and how they should be resolved (e.g. uneven callusing or evidence of dehydrated cuttings on arrival)
- quality control process in the callusing environment.

Evidence Guide

EVIDENCE GUIDE

FDFWGG2006A Obtain and process rootlings

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the processing of vine rootlings in wine grape nurseries including, where required, digging of rootlings from field nurseries.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to wine grape growing and covers the processing of rootlings. Rootlings may include those developed from cuttings in a sand bed or callusing room, or those freshly dug from a field nursery.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to process rootlings	<p>1.1 Work instructions for the processing of rootlings are confirmed and understood</p> <p>1.2 Facilities are cleaned and sterilised to minimise risk of contamination</p> <p>1.3 Materials are confirmed as available and ready to meet requirements</p> <p>1.4 Equipment is collected and checked for serviceability and sterilised as required by workplace procedures</p> <p>1.5 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures</p>
2. Obtain rootlings	<p>2.1 Requirement for rootlings from field nurseries, sand beds or callusing are checked against instructions</p> <p>2.2 Rootlings if required are dug from field nurseries using tractor mounted or trailed digging machines or hand-held tools</p> <p>2.3 Rootlings are obtained from sand beds or callusing room according to requirements</p>
3. Process rootlings	<p>3.1 Rootlings are treated and bundled according to instructions</p> <p>3.2 Bundles are labelled, packed and stored according to instructions</p> <p>3.3 Waste is collected and disposed of according to workplace procedures</p> <p>3.4 Work is conducted in accordance with workplace environmental guidelines</p> <p>3.5 Problems and anomalies are identified, rectified and/or reported according to workplace procedures</p> <p>3.6 Safe work practices are employed to minimise work hazards</p>
4. Prepare rootlings for dispatch	<p>4.1 Bundles of rootlings are assembled according to instructions</p> <p>4.2 Rootlings are prepared and packed for dispatch according to instructions</p> <p>4.3 Stock is loaded for dispatch according to instructions</p>

ELEMENT	PERFORMANCE CRITERIA
	4.4 Orders are checked against goods being dispatched according to workplace procedures
	4.5 Safe work practices are employed to minimise work hazards
5. Record information	5.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify rootling processing requirements
- confirm supply of necessary materials
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping and hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- select and use materials as required
- prepare chemical treatments to required concentration and ensure a homogenous mix
- handle rootlings correctly
- treat rootlings as instructed. This may include:
 - complete hydration of all rootlings
 - complete chemical treatment of all rootlings
 - removal of unwanted plant material
- monitor the standard of rootlings and grade them as instructed. This may include sorting for:
 - diameter of stem
 - appearance
 - length and number of shoots
 - strength of graft union
- bundle and label rootlings as instructed. This may include:
 - ensure correct numbers per bundle

- lay rootlings all the same way in bundles
- tie bundles securely
- labell legibly and accurately
- pack and store rootlings as instructed. This may include meeting instructions for:
 - cold room layout
 - cold room temperature variations
 - customer requirements
 - storage time requirements
- collect and dispose of waste as required to minimise risk of environmental damage
- check stock against orders. This may include checking order requirements for:
 - quantity of stock
 - varieties and clones
 - quality of stock is within specifications
- dispatch stock as instructed. This may include:
 - correct manual handling
 - correct use of mechanical transfer equipment
- liaise with customers. This may include:
 - taking orders
 - notifying customers about availability of stock
 - notifying customers about dispatch dates
 - identifying specific treatments of stock
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- occupational health and safety (OHS) hazards and controls
- purpose and application of personal protective clothing and/or equipment
- correct operating procedures for equipment
- safe and effective handling of equipment
- principles of nursery hygiene
- cleaning requirements and procedures for work area and equipment
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies
- waste disposal requirements and procedures
- environmental issues and controls

- equipment operation and maintenance requirements and procedures
- safe preparation and handling of chemicals
- common features of healthy vine rootlings
- common features of unhealthy vine rootlings
- factors that influence how a rootling should be graded and why
- package, storage requirements and procedures for rootlings ready for sale
- rootling preparation requirements and procedures for sales or transfers to customers.

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • use personal protective equipment, (MSDS and follow other specified OHS procedures) • handle chemicals and disinfectants correctly • select and mix chemical treatments to required concentrations • sterilise equipment and work surfaces to instructions • obtain rootlings correctly from required sources (e.g. field nursery, sand beds or callusing room) • treat, bundle, store and label rootlings correctly • identify and report problems and anomalies • treat and dispose of waste correctly • keep appropriate records.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality

EVIDENCE GUIDE	
	<p>and environmental requirements</p> <ul style="list-style-type: none"> • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules • instructions

RANGE STATEMENT	
	<ul style="list-style-type: none"> • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Wine grape nursery facilities	<p>Wine grape nursery facilities may include:</p> <ul style="list-style-type: none"> • cold storage • bins • water • fungicide treatment areas • storage bins or tanks • soakage tanks
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • secateurs • personal protective clothing and/or equipment • bins • boxes • counting machine • packing machine • forklift
Materials	<p>Materials may include:</p> <ul style="list-style-type: none"> • string • labels • chemicals • sand • wax • pallets
Waste	<p>Waste may include:</p> <ul style="list-style-type: none"> • off-cuts • dropped or rejected rootlings • packaging materials
Work hazards	<p>Work hazards may include:</p> <ul style="list-style-type: none"> • damaging fingers or eyes from use of tools and equipment • manual handling • lifting bundles

RANGE STATEMENT	
	<ul style="list-style-type: none"> • falling over in an untidy work area • using chemicals and disinfectants
Problems and anomalies	<p>Problems and anomalies may include:</p> <ul style="list-style-type: none"> • evidence of nematodes • crown gall • dehydration • infection • physical damage • damaged buds • immature wood
Rootlings	<p>Rootlings may include:</p> <ul style="list-style-type: none"> • those developed from cuttings in a sand bed or callusing room • those freshly dug from a field nursery
Grading rootlings	<p>Grading rootlings may include sorting for:</p> <ul style="list-style-type: none"> • diameter of stem • appearance • length of shoots • number of shoots • strength of graft union
Label information	<p>Label information may include:</p> <ul style="list-style-type: none"> • class of the material • variety and clone • grade of cutting • the source identification code • name of customer • date packed
Treatments	<p>Treatments may include:</p> <ul style="list-style-type: none"> • hydration • chemical treatment • trimming • grading
Customer requirements	<p>Customer requirements may include:</p> <ul style="list-style-type: none"> • quantity • level of root trimming • level of shoot trimming

RANGE STATEMENT	
Packing	Packing may include: <ul style="list-style-type: none"> • packing, venting and sealing cuttings into polythene film bags • wrapping cuttings in wet hessian • packing in woven polypropylene wool packs
Loading of rootlings	Loading of rootlings may be: <ul style="list-style-type: none"> • done manually or with the use of a forklift
Records	Records will include: <ul style="list-style-type: none"> • number of rootlings per bundle • number of bundles • treatments • date

FDFWGG2008A Train vines

Modification History

This unit supersedes and is equivalent to FDFWGGTVB Train vines.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to train growing vines by hand.
------------------------	---

Application of the Unit

Application of the unit	This unit covers the training of vines used in winemaking using a variety of handheld hand or operated equipment. The unit requires knowledge of the different parts of a grape vine, the ability to detect problems and anomalies, and to use techniques for selection and training of laterals.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for training	1.1 Equipment is confirmed as available and ready for use 1.2 Materials are confirmed as available to meet training requirements
2. Train vines	2.1 Vines are trained according to instructions 2.2 Anomalies and problems are recognised, rectified and/or reported 2.3 Equipment is maintained in good working order
3. Complete training activities	3.1 Equipment is cleaned and stored according to workplace procedures 3.2 Waste generated by both the process and cleaning procedures is collected, treated, disposed of or recycled according to workplace procedures 3.3 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify training requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- set up and operate equipment as required according to instructions

- identify different parts of the grapevine. This should include identifying:
 - vine trunk and permanent framework
 - canes and/or cordons
 - tendrils and buds
 - fruit
- recognise and rectify or report problems and anomalies
- identify, rectify and/or report environmental non-compliance
- train vines according to instructions. This may include:
 - heading height
 - selection of appropriate laterals
 - positioning of laterals
 - securing of laterals
 - removing unwanted laterals from trunk and crown
- maintain work area to meet housekeeping standards
- clean and store equipment according to instructions
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- safe and effective handling of equipment
- correct operating procedures for equipment
- basic maintenance requirements and procedures for equipment
- purpose and application of personal protective clothing and/or equipment
- Occupational health and safety (OHS) hazards and controls
- procedures and responsibility for reporting problems and anomalies
- range of vine training techniques, features and benefits
- basic components of the vine
- training requirements and procedures
- common vineyard pests and diseases and other common vine problems
- environmental issues and controls
- cleaning and storage requirements and procedures for equipment
- reporting responsibilities and procedures.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • use personal protective equipment, MSDS and follow other specified OHS procedures • identify parts of vines, including laterals, canes, cordons and buds • train vines to instructions • recognise faults and anomalies • keep records according to procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for canopy management activities	1.1 Canopy management requirements are identified and planned 1.2 Canopy management equipment is confirmed as available and ready for use 1.3 Equipment is set up to meet requirements
2. Operate canopy management equipment	2.1 Equipment is started up according to workplace procedures 2.2 Canopy management techniques are applied to vines according to their vigour, capacity and manager's instructions 2.3 Equipment performance is monitored to confirm performance is maintained within specifications 2.4 Canopy management activities are monitored to confirm performance is maintained within specifications 2.5 Out-of-specification performance is identified, rectified and/or reported
3. Shut down canopy management equipment	3.1 Canopy management equipment is shut down according to workplace procedures 3.2 Equipment is cleaned and stored according to workplace procedures 3.3 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify canopy management requirements
- select, fit and use personal protective clothing and/or equipment
- liaise with other work areas
- identify canopy management requirements. Factors to be considered include:
 - grape variety
 - vine vigour
 - end use of fruit, quality and yield requirements
 - climate
 - operating conditions
 - workplace procedures, manager's instructions
- attach equipment to tractor
- set up equipment to meet requirements
- confirm equipment status and condition
- operate equipment to meet requirements
- recognise equipment performance problems and rectify and/or report according to workplace procedures
- monitor canopy management activities. This will include monitoring:
 - width of canopy
 - speed of tractor and power take-off rpm
 - density of foliage
 - air circulation
 - light penetration or shade
 - bud numbers, spur length
 - vine damage
 - progress
 - problems and anomalies
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- clean and store equipment
- detach equipment from tractor
- use appropriate cleaning techniques
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- maintain work area to meet housekeeping standards

- carry out routine maintenance of equipment according to enterprise procedures
- use hand tools according to enterprise procedures
- use power tools according to enterprise procedures
- interpret mechanical drawings according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- key factors affecting the canopy management technique adopted. These may include:
 - climate, forecast and current weather conditions
 - vineyard aspect and terrain
 - grape variety and vigour
 - grape quality and characteristics required
 - trellis design
 - harvesting techniques
 - disease risk and occurrence
 - stage of maturity and development
- operating parameters and procedures
- recognition of correct vine growth stages at which to carry out canopy management activities
- factors influencing vine vigour, including:
 - grape variety
 - trellis design
 - vine spacing
 - fertilisers
 - irrigation
 - rootstock
- features and benefits of a range of canopy management styles and techniques and their respective affect on grape quality, cropping yield and wine production requirements. This should include techniques to manage:
 - light penetration and shading
 - air circulation and disease reduction
 - annual growth stages of vine development
 - crop quality and quantity
- significance and method of monitoring canopy management activities
- purpose and basic components of canopy management equipment
- operational procedures for equipment

- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- basic vine canopy problems or anomalies
- procedures and responsibility for reporting problems
- cleaning and storage requirements and procedures for equipment
- shutdown sequence
- routine maintenance procedures for equipment where relevant
- procedures for using hand tools where relevant
- procedures for using power tools where relevant
- interpretation of mechanical drawings where relevant.

Evidence Guide

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare to field graft vines	1.1 Materials are confirmed and available to meet grafting requirements 1.2 Vine material is selected and prepared for grafting 1.3 Equipment is checked to confirm readiness for use
2. Field graft vines	2.1 Vines are field grafted according to instructions 2.2 Vine graft is treated and taped according to instructions 2.3 Grafting process and equipment are monitored to ensure results are maintained within specifications 2.4 Out-of-specification process and equipment performance are identified, rectified and/or reported
3. Complete field grafting activities	3.1 Equipment is cleaned as required 3.2 Unused grafting material is disposed of or stored according to workplace procedures 3.3 Waste generated by both the grafting and cleaning procedures is collected, treated, disposed of or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines 3.5 Required documentation is completed

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify grafting requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas and customers
- confirm supply of necessary materials
- select appropriate vine material for grafting. This may include consideration of:
 - variety and clone
 - matching cambium
 - matching bevels and sizes
 - viable buds
 - achievement of tight unions
- prepare vine material for grafting. This may include:
 - soaking buds
 - working appropriate incisions
 - hot water treatment of cuttings
 - virus tests
 - compatibility tests
 - hydration of cuttings
 - cutting to size
- select and prepare equipment as required
- graft vines in the field according to instructions. This should include:
 - selecting appropriate bud location to graft
 - ensuring cohesion of graft union
- operate equipment safely
- treat vines after grafting. This may include:
 - applying fungicide
 - securing with tape
 - painting
 - waxing
- monitor the process and equipment operation to identify out-of-specification results or non-compliance. This may include monitoring:
 - percentage take
 - weather conditions
 - pests and diseases (e.g. weevils)
- store unused grafting material
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record corrective action as required
- sort, collect, treat, recycle or dispose of waste as required
- maintain work area to meet housekeeping standards
- Clean equipment after use

- identify, rectify and/or report environmental non-compliance
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose of grafting and various methods of budding and grafting
- criteria for successful grafting
- advantages of using clonal rootstock material
- criteria for selecting parent vines for scion material
- correct procedure and optimum conditions for the storage and handling of material until required for grafting
- advantages of using clonal and registered vine improvement material
- importance of selection and use of rootstock
- stages of the grafting procedure and their purpose
- common problems and corrective action required
- purpose, components and operation of grafting equipment
- methods of callusing vine cuttings and the criteria for best callus development
- procedures and responsibilities for reporting problems
- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- cleaning requirements for work area and equipment
- recording requirements and procedures
- routine maintenance procedures for equipment where relevant.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance

EVIDENCE GUIDE	
	with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • select and prepare appropriate vine material for grafting, including disbudding • field graft vines to instructions • conduct post-grafting treatment and packing of vines • monitor grafted vines and identify and rectify or report out-of-specification grafted vines • follow personal and work area hygiene procedures • dispose of waste correctly • record and report results of grafting according to procedures.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for harvest support activities	1.1 Work requirements are identified 1.2 Equipment is checked to confirm readiness for use 1.3 Equipment is set up to meet harvest support requirements
2. Collect grapes from harvester	2.1 Tractor towing trailer or gondola is driven alongside mechanical harvester according to instructions 2.2 Collection activities are monitored to confirm performance is maintained within specification 2.3 Out-of-specification performance is recognised, rectified and/or reported 2.4 Problems and anomalies are recognised, rectified and/or reported 2.5 Equipment is maintained in good working order
3. Transfer grapes to receival point	3.1 Chemicals are added to grapes according to instructions 3.2 Grapes are delivered to receival point according to instructions
4. Complete harvest support activities	4.1 Equipment is cleaned according to workplace procedures 4.2 Waste generated by the process or cleaning procedures is collected, sorted and disposed of or recycled, according to workplace procedures 4.3 Work is conducted in accordance with workplace environmental guidelines
5. Record information	5.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify harvest support requirements
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, attach and set up appropriate equipment
- carry out pre-operational checks of equipment according to workplace procedures
- operate equipment safely
- identify and rectify, remove and/or report potential occupational health and safety (OHS) hazards
- collect grapes from the discharge conveyer. This should include:
 - avoiding all contact with or damage to other machinery and equipment, vines, trellises or fences
 - safe handling of equipment
 - maintaining appropriate speed and distance
 - starting off and swapping over
 - changing rows
 - day-time and night-time harvesting
 - variety of harvesting conditions and varieties
- monitor grape collection activities. This may include monitoring:
 - equipment breakages or malfunction
 - vine or trellis damage
 - grape quality and quantity
 - matter other than grapes (MOG) collected
 - load weight
 - chemical application to fruit loads
 - collection accuracy of grapes
 - tipping accuracy of grapes at receival point
 - progress
 - congestion or backlog at receival point
 - performance according to specifications
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- shut down equipment in response to an emergency situation

- shut down equipment in response to routine shutdown requirements
- handle, prepare and add chemicals according to instructions
- take the necessary action to protect fruit quality where possible. This may include parking fruit carriers in a shaded area
- deliver grapes to receival point according to instructions. This may include tipping the trailer or gondola
- maintain workplace records according to workplace standards
- maintain work area to meet housekeeping standards
- use appropriate cleaning techniques
- carry out routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- key factors that will affect grape and/or wine quality. This may include:
 - temperature
 - oxidation
 - MOG collected
 - speed of processing
 - chemical addition
- features and benefits of methods to preserve grape and/or wine quality
- common problems and anomalies
- procedures and operating parameters
- significance and methods of monitoring performance
- common faults and corrective action required
- OHS hazards and controls
- environmental issues and controls
- procedures and responsibility for reporting problems
- recording requirements and procedures
- cleaning requirements associated with changeovers
- shutdown sequence of equipment
- cleaning procedures
- routine maintenance procedures for equipment where relevant.

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>

FDFWGG2016A Install and maintain vine trellis

Modification History

This unit supersedes and is equivalent to FDFWGGMVTB Install and maintain vine trellis.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to install and maintain vine trellising.
------------------------	--

Application of the Unit

Application of the unit	This unit applies to installing and maintaining trellises for vines used in winemaking. Trellises are installed and maintained according to written or verbal instructions. Equipment used is both manual and automatic.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for trellising activities	1.1 Existing trellises are checked for signs of disrepair 1.2 Equipment is prepared and checked to confirm readiness for use 1.3 Materials are selected according to instructions 1.4 Posts and supports are laid out according to instructions 1.5 Wire is run out according to instructions
2. Erect and maintain trellises	2.1 Equipment is started up and operated according to workplace procedures 2.2 Trellis ends and posts are erected and assemblies strained according to instructions 2.3 Foliage and trellis wires are attached and tensioned according to instructions 2.4 Trellis maintenance is carried out according to workplace procedures 2.5 Problems and anomalies are recognised, rectified and/or reported
3. Complete trellising activities	3.1 Equipment is shut down according to workplace procedures as required 3.2 Equipment is cleaned and stored according to workplace procedures 3.3 Materials are stored according to workplace procedures 3.4 Waste is collected and disposed of or recycled according to workplace procedures 3.5 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify trellis requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- select appropriate materials. This will include type and quantity
- check equipment and complete pre-start checks as required
- repair trellis according to workplace standards. This may include:
 - positioning and depth of posts and strainers
 - positioning and number of wires
 - tightness and grade of wire
- lay out posts and supports according to instructions. This may include:
 - spacing
 - type
 - numbers
 - positioning
 - safe handling procedures
- run out wire according to instructions. This will include:
 - securing of ends
 - safe handling procedures
 - cutting correct length
 - positioning
- operate equipment according to instructions
- erect trellis ends and assemblies according to instructions
- attach foliage and trellis wires according to instructions. This includes:
 - spacing
 - alignment
 - height
 - tension
 - fixing method
 - joining systems (e.g. wire knots)
- recognise, rectify and/or report problems and anomalies of trellis installation
- use hand tools
- collect, sort, treat, dispose of and/or recycle waste
- identify, rectify and/or report environmental non-compliance

- clean and store equipment according to instructions
- use appropriate cleaning techniques
- implement appropriate occupational health and safety (OHS) procedures
- store unused materials
- maintain work area to meet housekeeping standards
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose, features and components of the trellis system
- trellis installation process and procedures
- common maintenance requirements of vineyard trellising and how to repair them
- common faults, problems and how to solve them
- safe handling of materials and equipment
- purpose and application of personal protective clothing and/or equipment
- OHS hazards and controls
- environmental issues and controls
- procedures and responsibility for reporting problems and anomalies
- cleaning and storage requirements and procedures for equipment
- storage requirements and procedures for materials
- maintenance procedures for equipment where relevant.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

EVIDENCE GUIDE	
<p>Critical aspects for assessment and evidence required to demonstrate competency in this unit</p>	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • use personal protective clothing and equipment where required • carry out trellis repairs according to instructions • lay out posts and supports according to instructions • cut, cure, position and tension wires according to instructions • store unused materials correctly • collect and recycle or dispose of waste according to procedures.
<p>Context of and specific resources for assessment</p>	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
<p>Method of assessment</p>	<p>This unit should be assessed together with other units of competency relevant to the function or work role.</p>
<p>Guidance information for assessment</p>	<p>To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Policies and procedures

Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements

Workplace information

Workplace information can include:

- Standard Operating Procedures (SOPs)
- specifications
- production schedules
- instructions
- routine maintenance schedules
- work notes
- Material Safety Data Sheets (MSDS)
- manufacturer instructions
- verbal direction from manager, supervisor or senior operator

Equipment

Equipment may include:

- wire strainers
- pliers
- manual and mechanical post inserters
- hammers
- saws

Materials

Materials may include:

- wire
- staples
- posts

Trellis installation and maintenance

Trellis installation and maintenance includes:

- supports
- posts
- strainers
- wires

Waste

Waste may include:

RANGE STATEMENT

- wire lengths
- broken or faulty posts and supports
- faulty fastenings

Unit Sector(s)**Unit sector**

Wine operations

FDFWGG2018A Operate vineyard equipment

Modification History

This unit supersedes and is equivalent to FDFWGGVEQB Operate vineyard equipment.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the wine grape growing stream of the wine sector. It covers the skills and knowledge required to operate a range of vineyard equipment that does not require calibration. Where the operation of specialised equipment is required, alternative units should be selected.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to the operation of equipment used in wine grape growing. It includes the ability to attach, set up and detach equipment as required.
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare equipment for operation	1.1 Requirements are interpreted and confirmed 1.2 Equipment is selected and checked to confirm readiness for use 1.3 Equipment is attached and set up according to instructions as required
2. Operate equipment	2.1 Equipment is started up according to workplace procedures 2.2 Equipment is operated according to workplace procedures 2.3 Equipment performance is monitored to confirm performance is maintained within specification 2.4 Out-of-specification equipment performance is identified, rectified and/or reported 2.5 Problems and anomalies are recognised and/or reported
3. Complete operation of equipment	3.1 Equipment is shut down according to workplace procedures 3.2 Equipment is prepared for cleaning and storage 3.3 Equipment is cleaned according to workplace procedures 3.4 Waste generated by both the activities and cleaning procedure is collected, treated and disposed of, or recycled according to workplace procedures 3.5 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and

processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas
- select appropriate equipment for the task
- confirm equipment status and condition. This may include checking:
 - fuel
 - water
 - oil (e.g. engine, gearbox and hydraulics)
 - belts
 - air intake
 - tyre pressure
 - metal fatigue or wear and tear
- attach equipment to towing vehicle as required
- set up equipment as required to meet operating instructions
- start up equipment
- operate equipment to meet operating instructions. This should include:
 - driving forward and reversing
 - operating in confined spaces
 - operating amongst other vineyard activities and a variety of conditions as required
- monitor equipment performance. This may include monitoring:
 - status and condition
 - handling and stopping ability
 - operating depth of equipment
 - blockages
 - ground speed or power take-off speed
 - width and/or coverage
 - environmental operating conditions
- recognise equipment performance problems and amend and/or report as instructed
- shut down equipment in response to emergency situations
- shut down equipment in response to routine shutdown requirements
- prepare equipment for cleaning and storage
- clean equipment
- store equipment according to instructions
- maintain work area to meet housekeeping standards
- collect, treat, recycle or dispose of waste according to workplace procedures
- identify, rectify and/or report environmental non-compliance
- use appropriate cleaning techniques
- maintain workplace records

- carry out routine maintenance of equipment according to enterprise procedures.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose, features and components of equipment
- equipment pre-start checks
- equipment operating procedures
- process specifications, procedures and operating parameters
- common causes of variation or malfunction and the corrective action required
- required weather conditions for equipment operation
- Occupational health and safety (OHS) hazards and controls in all operating conditions
- significance and methods of monitoring equipment performance
- lock-out and tag-out procedures
- recording requirements and procedures
- procedures and responsibility for reporting problems
- environmental issues and controls
- cleaning requirements of equipment associated with changeovers and types of shutdown
- cleaning procedures
- storage requirements
- shutdown sequence
- routine maintenance procedures for equipment where relevant.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for hot water treatment	1.1 Work instructions on hot water treatments are confirmed and understood 1.2 Materials are confirmed as available and ready to meet requirements 1.3 Equipment is set up according to specifications 1.4 Water is prepared for cool down, hot water treatment and hydration according to specifications 1.5 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures
2. Treat cuttings	2.1 Cuttings are dipped in the hot water according to AVIA protocols 2.2 The dipping process is monitored for compliance with AVIA specifications 2.3 Safe work procedures are followed to minimise risk of hazards
3. Carry out post-treatment procedures	3.1 Cuttings are cooled down according to AVIA protocols 3.2 Treated cuttings are stored according to AVIA and workplace procedures 3.3 Waste is collected and disposed of according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Treatment information is recorded according to AVIA requirements

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information required to carry out hot water treatments
- confirm supply of necessary materials
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- set up equipment for hot water treatment. This will include:
 - placing correct volumes of water in the tanks
 - calibrating data loggers
 - calibrating temperature sensors against a certified thermometer
 - calibrating thermometers
- prepare water for cool down, hot water treatment and hydration. This will include:
 - testing and adjusting chlorination levels
 - checking and adjusting temperature levels
- prepare cuttings for treatment. This may include re-hydration
- dip cuttings, fully submersing for the specified amount of time, at the specified temperature in prepared hot water
- monitor the dipping process to ensure compliance with required specifications. This will include:
 - monitoring critical control points for compliance with specifications
 - analysing readouts from data logging devices
 - maintaining level of agitation in the tanks
 - maintaining chlorine level
 - recalibrating thermometers
- cool down cuttings in prepared cooling water immediately following hot water treatment. this is already mentioned above
- store treated cuttings. This will include:
 - separating from untreated cuttings to prevent contamination
 - covering with clean covers
 - placing cuttings in vented plastic bags to prevent dehydration
 - placing cuttings in the cold room

- dispose of waste. This may include:
 - settling the water
 - racking off clean water
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose of hot water treatment
- importance of precise treatment
- consequences of mistreatment
- AVIA and workplace specifications for hot water treatments
- reasons for using different specifications for hot water treatments
- monitoring techniques to ensure temperature and water quality are within specifications
- quality assurance process for the hot water treatment process
- Occupational health and safety (OHS) hazards and controls when undertaking hot water treatments
- purpose and application of personal protective clothing and/or equipment
- correct operating procedures for equipment
- safe and effective handling of equipment
- principles of nursery hygiene
- cleaning requirements and procedures for work area and equipment
- environmental issues and controls
- waste disposal requirements and procedures
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies.

FDFWGG2021A Operate nursery cold storage facilities

Modification History

This unit supersedes and is equivalent to FDFWGGOCSB Operate nursery cold storage facilities.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for wine grape nurseries. It covers the skills and knowledge required to operate and monitor nursery cold storage facilities.
-----------------	---

Application of the Unit

Application of the unit	Application of this unit requires cold room operation in accordance with specifications and knowledge of occupational health and safety (OHS), environmental and hygiene requirements.
-------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
----------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare cold room for storage	1.1 Work instructions are confirmed and understood 1.2 Cold room facilities are cleaned and sanitised according to workplace procedures 1.3 Cold room specifications are set according to workplace procedures 1.4 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures
2. Operate cold room	2.1 Environmental specifications are monitored according to workplace procedures 2.2 Movement of stock is monitored according to cold room plan and workplace procedures 2.3 Problems and anomalies are identified, rectified and/or reported according to workplace procedures 2.4 Safe work practices are employed to minimise work hazards
3. Shut down cold room	3.1 Cold room is shut down according to workplace procedures 3.2 Cold room is cleaned and secured according to workplace procedures 3.3 Waste is collected and disposed of according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information required to operate cold storage facilities
- liaise with other work areas
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- identify, rectify and/or report environmental non-compliance
- maintain work area and equipment to meet workplace housekeeping and hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- follow safe work procedures to minimise hazards
- collect, treat and dispose of waste according to workplace procedures
- maintain workplace records
- interpret and apply cold room plan
- confirm equipment status and condition. This may include:
 - checking all safety standards
 - conducting pre-start checks
- move material in and out of cold room. This may include:
 - transferring stock manually
 - using a mechanical transfer device
- recognise equipment performance problems and amend and/or report as instructed
- monitor the health of cuttings during storage. This may include identifying:
 - signs of dehydration
 - signs of fungal infection
- monitor cold room facilities according to workplace procedures. This may include identifying:
 - temperature variations
 - humidity variations
 - air flow
- shut down equipment in response to emergency situations
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- OHS hazards and controls when working in a cold room
- environmental issues and controls
- principles of nursery hygiene
- purpose and application of personal protective clothing and/or equipment
- procedures and responsibility for reporting problems
- lock-out and tag-out procedures
- cleaning requirements and procedures
- reporting and recording requirements and procedures
- waste disposal requirements and procedures
- principles of cold room planning
- principles of cold room operation
- purpose and use of components of a cold room
- cold room equipment operating procedures
- shutdown sequence
- principles of maintaining cold room performance
- methods of maintaining cold room performance
- methods of monitoring a cold room
- methods of packing a cold room
- common causes of variation or malfunction and the corrective action required
- effect of cold storage on cuttings
- post-storage treatment of cuttings.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • use personal protective clothing and equipment where required • observe housekeeping standards • monitor cold storage and stock conditions and make

EVIDENCE GUIDE	
	<p>required adjustments</p> <ul style="list-style-type: none"> • shut down, clean and secure cold storage facilities • recognise and act upon out-of-specification conditions • record information appropriately.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with

RANGE STATEMENT	
training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	Workplace information can include: <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal directions from manager, supervisor or senior operator
Waste	Waste may include: <ul style="list-style-type: none"> • cleaning agents • unused stock
Potential hazards	Potential hazards may include: <ul style="list-style-type: none"> • cold room door closing while working inside • working in cold conditions • slippery floors • obstacles on the floor • overhead objects • operating forklifts and other moving objects
Problems and anomalies	Problems and anomalies may include: <ul style="list-style-type: none"> • fluctuations in temperature • breakdown of data loggers • fans or temperature controls • inadequate air flows due to incorrect stacking
Cold room specifications	Cold room specifications may include: <ul style="list-style-type: none"> • temperature range • spacing pattern for airflow • humidity
Cold room plans	Cold room plans may include: <ul style="list-style-type: none"> • stacking patterns

RANGE STATEMENT	
	<ul style="list-style-type: none">• stacking heights• movement of stock
Records	Records will include: <ul style="list-style-type: none">• temperature logs• material entering or leaving cold room• batch numbers

FDFWGG2022A Take and process vine cuttings

Modification History

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for wine grape nurseries. It covers the skills and knowledge required to take and process vine cuttings under supervision.
------------------------	--

Application of the Unit

Application of the unit	This unit covers the taking of vine cuttings from vines used in wine making cuttings and processing. A variety of hand operated or handheld equipment is used. Working with vine cuttings includes the ability to recognise problems and anomalies with vines and to select the best cuttings according to instructions.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Take vine cuttings	1.1 Cutting requirements are confirmed and understood 1.2 Equipment is checked to confirm readiness for use 1.3 Vine cuttings are taken according to instructions 1.4 Vine anomalies and problems are recognised, rectified and/or reported 1.5 Equipment is maintained in good working order
2. Complete vine cutting operations	2.1 Vine cuttings are collected according to instructions 2.2 Equipment is cleaned and stored according to instructions 2.3 Waste is collected and disposed of according to instructions
3. Prepare to process cuttings	3.1 Work instructions on the processing of cuttings are confirmed and understood 3.2 Facilities are cleaned and sterilised to minimise risk of contamination 3.3 Materials are confirmed as available and ready to meet requirements 3.4 Equipment is collected and checked for serviceability and sterilised as required by workplace procedures 3.5 Potential and existing hazards are identified, rectified and/or reported according to workplace procedures 3.6 Work is conducted in accordance with workplace environmental guidelines
4. Process cuttings	4.1 Cuttings are treated and bundled according to instructions 4.2 Bundles are labelled, packed and stored according to instructions 4.3 Waste is collected and disposed of according to workplace procedures 4.4 Problems and anomalies are identified, rectified and/or reported according to workplace procedures 4.5 Safe work practices are employed to minimise work hazards

ELEMENT	PERFORMANCE CRITERIA
5. Record information	5.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify cutting processing requirements
- confirm supply of necessary materials
- liaise with other work areas and customers
- select, fit and use appropriate personal protective clothing and/or equipment
- select, operate, maintain and store required equipment according to instructions
- maintain work area and equipment to meet workplace housekeeping standards
- maintain work area and equipment to meet workplace hygiene standards
- use appropriate cleaning techniques
- recognise problems and anomalies and correct and/or report them as instructed
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- handle pruning secateurs safely. This includes following the correct handling and sharpening procedures
- recognise performance problems with secateurs and correct or report them as instructed. This includes oiling moving parts and sharpening blades
- identify different parts of the grapevine. This should include identifying:
 - vine trunk and permanent framework
 - canes and/or cordons
 - tendrils and buds
- select and take vine cuttings according to instructions. This may include:
 - correct length and diameter
 - correct number of buds on the cutting
 - degree of straightness
 - cuts made correctly and cleanly
 - top cut at 45° angle or bottom bud flat, 1-2 cm from nearest bud
 - number of buds left on the vine
- collect and store vine cuttings according to instructions. This may include:

- numbers per bundle
- all lying the same way in the bundle (basal and distal ends)
- secure tying of bundles
- labelling
- maintaining hydration of cuttings
- prepare chemical treatments to required concentration and ensure homogenous mix
- treat cuttings as instructed. This may include:
 - completing hydration of all cuttings
 - completing chemical treatment of all cuttings
 - removing unwanted plant material
- monitor the standard of cuttings and grade them as instructed
- bundle and label cuttings as instructed. This may include:
 - including correct numbers per bundle
 - cuttings all lying the same way in the bundle
 - tying bundles securely
 - labelling legibly and accurately
- pack and store cuttings as instructed. This may include:
 - cold room layout
 - cold room temperature variations
 - customer requirements
 - storage time requirements
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- occupational health and safety (OHS) hazards and controls
- purpose and application of personal protective clothing and/or equipment
- correct operating procedures for equipment
- safe and effective handling of equipment
- cleaning requirements and procedures for work area and equipment
- reporting and recording requirements and procedures
- procedures and responsibilities for reporting problems and anomalies
- waste disposal requirements and procedures
- environmental issues and controls
- principles of nursery hygiene
- basic components of the vine

- basic vine problems and anomalies
- cutting requirements and procedures
- cutting collection and storage requirements, including hydration
- specifications of vine cuttings
- factors that influence how a cutting should be graded and why
- common features of healthy vine cuttings
- common features of unhealthy vine cuttings
- safe preparation and handling of chemicals.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • use personal protective clothing and equipment where required • follow cutting equipment safety procedures • select cuttings and cut according to instructions • handle, bundle, and label cuttings according to instructions • recognise vine problems • dispose of waste according to instructions • maintain required records.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules • instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS)

RANGE STATEMENT	
	<ul style="list-style-type: none"> • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Facilities	<p>Facilities may include:</p> <ul style="list-style-type: none"> • cold storage • fungicide treatment areas • storage bins or tanks • soakage tanks
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • secateurs • personal protective clothing and/or equipment • bins • boxes • packing machine • counting machine • forklift
Materials	<p>Materials may include:</p> <ul style="list-style-type: none"> • string • labels • chemicals • sand • water • pallets
Waste	<p>Waste may include:</p> <ul style="list-style-type: none"> • off-cuts • dropped or rejected cuttings • packaging materials • chinisol • chemical containers
Work hazards	<p>Hazards may include:</p> <ul style="list-style-type: none"> • damaging fingers or eyes from use of tools and equipment • manual handling • lifting bundles • falling over in an untidy work area • using chemicals and disinfectants

RANGE STATEMENT	
Problems and anomalies	<p>Problems and anomalies may include:</p> <ul style="list-style-type: none"> • physical damage or signs of common pests and diseases, such as eutypa, phomopsis, nematodes, crown gall, diseased wood, dehydration, infection, physical damage, damaged buds, immature wood • different wood characteristics indicative of a different vine variety
Records	<p>Records will include:</p> <ul style="list-style-type: none"> • type of cuttings • quantity of cuttings • the count per bundle • number of bundles • treatments carried out • source identification code
Treatments	<p>Treatments may include:</p> <ul style="list-style-type: none"> • hydration • chemical treatment • trimming • grading
Grading	<p>Grading cuttings may include:</p> <ul style="list-style-type: none"> • sorting for length, diameter, appearance and number of viable buds
Label information	<p>Label information may include:</p> <ul style="list-style-type: none"> • class of the material • variety and clone • grade of cutting • the source identification code
Packing	<p>Packing may include:</p> <ul style="list-style-type: none"> • packing, venting and sealing cuttings into polythene film bags or packing bins • wrapping cuttings in wet hessian • packing in woven polypropylene wool packs

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for canopy management activities	1.1 Canopy management requirements are identified 1.2 Vine vigour and growth are assessed according to workplace procedures 1.3 Appropriate manual and/or automated canopy management techniques are selected 1.4 Equipment is confirmed as available and ready for use 1.5 Operators are instructed as required
2. Implement canopy management requirements	2.1 Canopy management activities are carried out according to vine vigour, growth guidelines and manager's instructions 2.2 Canopy management activities are monitored to confirm that performance is maintained within specification 2.3 Out-of-specification performance is identified, rectified and/or reported 2.4 Problems and anomalies are identified, corrected and/or reported
3. Record information	3.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify canopy management requirements
- select, fit and use appropriate personal protective clothing and/or equipment

- identify, rectify and/or report environmental non-compliance
- implement canopy management requirements. This may include consideration of:
 - equipment and materials required
 - personnel required
 - location
 - transport
 - timing
 - environmental operating conditions
 - other vineyard activities (e.g. spraying)
- select appropriate canopy management techniques. This will include consideration of:
 - vine vigour
 - trellis design
 - grape variety
 - quality requirements
 - climate, current and forecast weather conditions
 - vineyard terrain and aspect
 - phenological development
 - workplace procedures and manager's instructions
- monitor canopy management activities. This may include monitoring:
 - removal of unwanted growth
 - positioning of vine shoots
 - cutting procedure and quality
 - manipulation and securing of vine
 - vine damage
 - exposure of crop to sunlight
 - addition and positioning of foliage wires or shade cloth
 - correct disposal of waste
 - cleaning and storage of equipment
 - problems and anomalies
 - equipment performance and maintenance
 - team performance and progress
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record problems and/or corrective actions
- maintain canopy management records according to workplace standards
- facilitate and train teams and individuals
- conduct routine maintenance of equipment according to enterprise procedures
- apply information technology systems according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor

- work cooperatively within a culturally diverse workforce.

Required knowledge include:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- basic vine physiology as it applies to:
 - water intake
 - nutrient uptake
 - photosynthesis
 - respiration, transpiration
 - translocation
- parts of the root, trunk, shoot and fruit systems of the grapevine, their role in how the vine works and their contribution to fruit quality, including:
 - buds, nodes and tendrils
 - cambium, epidermis, phloem and xylem
 - leaf blade, bract and petiole
 - bunches, berries and flowers
- vine types, their characteristics and uses, including:
 - family, genus and species
 - *Vitis vinifera* and commercial varieties
 - native species and hybrids (e.g. *labrusca*)
 - rootstocks and scion stock
- industry processes for new variety development
- annual grapevine growth stages, including:
 - budburst
 - flowering
 - veraison
 - maturity
- key grape varieties and their distinguishing features. This may include factors, such as:
 - berry and bunch characteristics
 - frost and disease resistance
 - flavour and style
- effects of vine canopy reduction and grape exposure on fruit and wine quality
- features and benefits of a range of manual and/or automated canopy management styles and techniques and their respective affect on grape quality, cropping yield and wine production requirements. This should include techniques to manage:
 - light penetration and shading
 - air circulation and disease reduction
 - phenological stages of vine development

- crop quality and quantity
- factors influencing vine vigour, including:
 - grape variety
 - trellis design
 - vine spacing
 - fertilisers
 - irrigation
 - rootstock
- key factors affecting the canopy management technique adopted. These may include:
 - climate, forecast and current weather conditions
 - vineyard aspect and terrain
 - grape variety and vigour
 - grape quality and characteristics required
 - trellis design
 - harvesting techniques
 - disease risk and occurrence
 - stage of maturity and development
- recognition of correct vine growth stages at which to carry out canopy management activities
- significance and method of monitoring canopy management activities
- safe handling of equipment
- correct operating procedures for equipment
- purpose and application of personal protective clothing and/or equipment
- Occupational health and safety (OHS) hazards and controls
- identification of common problems and anomalies
- procedures and responsibility for reporting problems
- environmental issues and controls
- cleaning and storage requirements of equipment
- Reporting and recording requirements and procedures
- team facilitation and training techniques
- routine maintenance procedures for equipment where relevant
- information technology systems where relevant.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

EVIDENCE GUIDE	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • use personal protective clothing and equipment • determine requirements for canopy management according to vine vigour, growth guidelines and manager's instructions • select canopy management techniques • coordinate team activities to implement determined canopy management techniques • address problems and anomalies • complete workplace records.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules • instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Equipment	<p>Equipment may include:</p> <ul style="list-style-type: none"> • hydraulic or pneumatic pruners • a range of secateurs • knives • tractor • circular and hand saws • cutter bars • blades • drum pruners • mechanical leaf pluckers and wire lifters • bare hands • maintenance tools and team support equipment (e.g. toilet facilities, first aid box and spare equipment)
Unwanted growth	Unwanted growth may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • suckers • water shoots • congested shoots • excess bunches
Canopy management systems	<p>Canopy management systems will vary with workplace requirements, but may include:</p> <ul style="list-style-type: none"> • vertically shoot positioned (VSP) • wide T • Scott Henry • single wire
Canopy management activities	<p>Canopy management activities may include:</p> <ul style="list-style-type: none"> • leaf removal • shoot removal • applying or removing shade cloth • lifting or lowering foliage wires • positioning shoots • trimming shoots • bunch thinning
Problems and anomalies	<p>Problems and anomalies include:</p> <ul style="list-style-type: none"> • signs of common pests and diseases, such as mildew, eutypa, phomopsis, boring insects, dying arm, crown gall, and diseased wood or berries • signs of trellis and/or irrigation disrepair or problems • machinery breakdown • team performance
Information systems	<p>Information systems may be:</p> <ul style="list-style-type: none"> • screen or print based and may include information technology systems, such as recording and reporting, weather forecasting, rainfall maps and infrared canopy monitoring

FDFWGG3004A Coordinate nursery activities

Modification History

This unit supersedes and is equivalent to FDFWGGCNAB Coordinate nursery activities.

September 2012: clarified pre-requisite information.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for wine grape nurseries. It covers the skills and knowledge required to coordinate nursery personnel in a range of day-to-day activities.
------------------------	--

Application of the Unit

Application of the unit	This unit includes allocation and monitoring of individual performance targets and requirements.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Pre requisite units	
	FDFWGG2002A Carry out potting operations
	FDFWGG2006A Obtain and process rootlings
	FDFWGG3009A Monitor and maintain nursery plants* <i>FDFWGG2007A Tend containerised nursery plants</i> <i>FDFWGG2012A Identify and treat nursery plant disorders</i>

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare to coordinate nursery activities	1.1 Activity goals and performance requirements are identified and clarified 1.2 Tasks required to achieve performance requirements are identified 1.3 Personnel required are confirmed as available and having the appropriate competence 1.4 Equipment is confirmed as available and ready for use 1.5 Materials are confirmed as available and ready to meet requirements
---	--

ELEMENT	PERFORMANCE CRITERIA
2. Coordinate nursery activities	2.1 Individual work tasks and roles are allocated to ensure activity goals and performance requirements are met 2.2 Work targets and timelines are negotiated to achieve activity goals and performance requirements 2.3 Activities are monitored to ensure compliance with workplace procedures on occupational health and safety (OHS), environmental and quality issues 2.4 Activities are monitored against timelines and performance requirements 2.5 Potential barriers to achieving targets and performance requirements are identified, rectified and/or reported
3. Complete coordination of nursery activities	3.1 Activities are monitored to ensure compliance with relevant workplace procedures on completion, shutdown and waste disposal 3.2 Work is conducted in accordance with workplace environmental guidelines 3.3 Personnel are debriefed as appropriate
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify nursery activity requirements
- confirm supply of necessary resources
- select, fit and use appropriate personal protective clothing and/or equipment
- identify, rectify and/or report environmental non-compliance
- liaise with other work areas and customers
- plan nursery activities. This may include considering:
 - personnel requirements
 - equipment and materials required
 - location

- transport
- timing
- environmental conditions
- other nursery activities
- quality and quantity requirements
- instruct individuals and/or a group
- provide feedback to individuals and/or a group
- monitor nursery activities. This may include monitoring:
 - compliance with OHS, environmental and quality procedures
 - individual and/or team performance
 - achievement of targets, timelines and performance requirements
 - own and other team members' learning needs
 - compliance with completion, shutdown and waste disposal procedures
- resolve conflicts
- take corrective action in response to out-of-specification results or non-compliance
- recognise, correct and/or report problems and anomalies
- maintain workplace records
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- workplace planning processes
- workplace activity scheduling processes
- OHS hazards and controls
- environmental issues and controls
- reporting and recording requirements and procedures
- procedures and responsibility for reporting problems and anomalies
- communication principles and strategies
- procedures for monitoring and reporting on individual and team performance
- competency identification and training arrangements
- conflict resolution, negotiation and problem-solving strategies.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Evidence of ability to: <ul style="list-style-type: none"> • determine activities required of nursery and individuals in order to meet performance targets • allocate activities and monitor their implementation • provide leadership and instruction for nursery personnel • address performance issues • complete workplace records.
Context of and specific resources for assessment	Assessment must occur in a real or simulated workplace where the assessee has access to: <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over

EVIDENCE GUIDE	
	a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements, legislative requirements and industrial awards and agreements
Team practices	Team practices and work allocation occurs within the context of competency and licensing requirements and industrial agreements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules • instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Nursery activities	<p>Nursery activities may include:</p> <ul style="list-style-type: none"> • any activity undertaken within the wine grape nursery environment including preparing, conducting, monitoring and completing work in the establishment and care of wine grape vines
Goal and performance	Goal and performance requirements may be:

RANGE STATEMENT	
requirements	<ul style="list-style-type: none"> determined by organisation or departmental operational plans and customer requirements
Resources	Resources may include: <ul style="list-style-type: none"> personnel equipment materials
Records	Records will include: <ul style="list-style-type: none"> operational plans nursery activities personnel and maintenance records

FDFWGG3005A Perform field nursery activities

Modification History

This unit supersedes and is equivalent to FDFWGGFNAB Perform field nursery activities.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the wine grape growing stream of the wine sector. This unit covers the skills and knowledge required to plant, maintain and process field nursery vines.
------------------------	--

Application of the Unit

Application of the unit	This unit includes preparation for plantings, care of young vines and preparation for transfer and transportation.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the Performance criteria describe the performance needed to

essential outcomes of a unit of competency.

demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for field nursery planting	1.1 Field nursery bed is prepared according to instructions 1.2 Field nursery maintenance infrastructure is checked to confirm readiness for use as required
2. Maintain field nursery vines	2.1 Appropriate vine protection methods are applied 2.2 Field nursery activities are carried out as instructed 2.3 Young vine growth and health are monitored according to instructions 2.4 Problems and anomalies are recognised, rectified and/or reported
3. Process field nursery rootlings for removal from nursery	3.1 Vine rootlings are undercut and lifted according to instructions 3.2 Rootlings are prepared for transport according to instructions 3.3 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify nursery requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas and customers
- prepare field nursery bed for planting. This may include:
 - herbicide treatment
 - soil cultivations
 - fertiliser additions

- planning vine planting (e.g. number of vines, area size, varietal lots, row spacing for mechanical operations and row orientation)
- application of weed matting
- positioning irrigation pipes and points
- checking readiness of maintenance infrastructure
- select and apply appropriate vine protection methods. This should include consideration of:
 - climate, weather and prevailing wind
 - vineyard pests (e.g. rabbits)
 - aspect, orientation of vineyard
 - irrigation or fertilisation schedule
 - frost incidence
- maintain and care for young vines
- monitor the health and growth of young vines. This may involve monitoring:
 - soil moisture
 - signs of disease and pests
 - water stress
 - signs of nutrient deficiency
 - growth rate
- take corrective action in response to out-of-specification growth or appearance, or non-compliance
- report and/or record corrective action as required
- identify, rectify and/or report environmental non-compliance
- use appropriate cleaning techniques
- maintain work area to meet housekeeping standards
- lift rootlings from the beds whilst ensuring minimal plant damage. This may include:
 - roots undercut adequately
 - gentle handling
- prepare rootlings for transport. This may include:
 - trimming
 - counting and bundling
 - labelling
 - grading
 - packing
- plant vines according to enterprise procedures
- take samples and conduct tests according to enterprise procedures
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- purpose, requirements and procedures for nursery bed preparation
- protection and maintenance requirements of young vines
- requirements of growing vines
- common causes and signs of young vine growth disorders and corrective action required
- Occupational health and safety (OHS) hazards and controls
- correct procedures and requirements for lifting vine rootlings from the nursery bed
- preparation requirements and procedures for transporting rootlings
- storage requirements of rootlings
- procedures and responsibility for reporting problems
- environmental issues and controls
- reporting and recording requirements and procedures
- planting procedures where relevant
- sampling and testing procedures where relevant
- routine maintenance procedures for equipment where relevant.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for hand pruning activities	1.1 Pruning requirements are identified 1.2 Appropriate pruning techniques are selected 1.3 Pruning equipment is confirmed as available and ready for use 1.4 Pruning equipment is set up to meet requirements 1.5 Operators are instructed as required
2. Implement hand pruning requirements	2.1 Pruning activities are monitored to confirm performance is maintained within specification 2.2 Out-of-specification performance is identified, rectified and/or reported 2.3 Vines are pruned according to crop levels, vine vigour and workplace procedures 2.4 Anomalies and problems are identified, corrected and/or reported 2.5 Work is conducted in accordance with workplace environmental guidelines
3. Record information	3.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify pruning requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- train and/or facilitate a team of hand pruners
- implement hand pruning requirements. This may include consideration of:
 - equipment and materials required
 - personnel required
 - location
 - transport
 - timing
 - environmental conditions
 - other vineyard activities (e.g. spraying)
- select appropriate pruning techniques. This will include consideration of:
 - grape variety
 - vine vigour
 - quality and yield requirements
 - climate
 - workplace procedures and manager's instructions
- monitor pruning activities. This will include monitoring:
 - selection of best possible spurs and canes
 - positioning of spurs and canes
 - clean removal of sucker shoots
 - correct quantity of spurs, rods, canes and buds left
 - cuts made correctly and cleanly
 - recognition and removal of unwanted growth
 - rolling and securing extension canes onto trellis wire as required
 - correct disposal of pruned material
 - equipment performance
 - cleaning and storage of equipment
 - team performance and progress
- identify problems and anomalies
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- maintain work area to meet housekeeping standards
- maintain pruning records according to workplace standards
- conduct routine maintenance of equipment according to enterprise procedures
- apply information technology systems according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- basic vine physiology, as it applies to:
 - water intake
 - nutrient uptake
 - photosynthesis
 - respiration, transpiration
 - translocation
- parts of the root, trunk, shoot and fruit systems of the grapevine, their role in how the vine works and their contribution to fruit quality, including:
 - buds, nodes and tendrils
 - cambium, epidermis, phloem and xylem
 - leaf blade, bract and petiole
 - bunch, berries and flowers
- vine types, their characteristics and uses, including:
 - family, genus and species
 - *Vitis Vinifera* and commercial varieties
 - native species and hybrids (e.g. *labrusca*)
 - rootstocks and scion stock
- industry processes for new variety development
- annual vine growth stages, including:
 - budburst
 - flowering
 - veraison
 - maturity
- key grape varieties and their distinguishing features. This may include factors, such as:
 - berry and bunch characteristics
 - frost and disease resistance
 - flavour and style
- different types of pruning and their features, benefits and effects on grape quality
- relationship between bud numbers and cropping levels and the effect on wine quality
- effects of different pruning levels on wine quality
- concept of pruning to vine vigour
- safe handling of pruning equipment
- correct operating procedures for pruning equipment
- Occupational health and safety (OHS) hazards and controls
- common problems and anomalies associated with hand pruning activities

- procedures and responsibility for reporting problems
- cleaning and storage requirements of pruning equipment
- recording requirements and procedures
- team facilitation and training techniques
- environmental issues and controls
- routine maintenance procedures for equipment where relevant
- information technology systems where relevant.

essential outcomes of a unit of competency.

demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for mechanical harvesting	1.1 Harvesting requirements are identified 1.2 Equipment is checked to confirm readiness for use 1.3 Equipment is set up to meet harvesting requirements
2. Operate mechanical harvester	2.1 Equipment is started up according to workplace procedures 2.2 Equipment performance is monitored to confirm performance is maintained within specification 2.3 Out-of-specification equipment performance is identified, rectified and/or reported 2.4 Vines are machine harvested according to workplace requirements 2.5 Problems and anomalies are recognised and rectified and/or reported 2.6 Equipment is maintained in good working order
3. Complete mechanical harvesting operations	3.1 Equipment is shut down according to workplace procedures 3.2 Equipment is cleaned and stored according to workplace procedures 3.3 Waste generated by both the process and cleaning procedures is collected, treated, disposed of or recycled according to workplace procedures 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

REQUIRED SKILLS AND KNOWLEDGE

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- Access workplace information to identify harvesting requirements
- Select, fit and use appropriate personal protective clothing and/or equipment
- Liaise with other work areas
- Confirm equipment status and condition
- Set up mechanical harvester to meet harvesting requirements
- Start up the mechanical harvester
- Operate a mechanical harvester according to harvesting conditions and requirements. These may include consideration of:
 - crop level
 - grape variety
 - vine age
 - row height, width and trellis design
 - slope, angle of row
 - visibility
 - other vineyard activities
- Monitor mechanical harvester operation. This will include monitoring:
 - vine damage
 - grape quality and maturity
 - harvesting effectiveness (amount of fruit left in fruiting zone)
 - matter other than grape (MOG) collected
 - hours worked and service history of machinery
 - problems and anomalies
 - climatic conditions
- Take corrective action in response to out-of-specification results or non-compliance
- Recognise problems and anomalies
- Report and/or record problems and/or corrective action taken
- Shut down equipment in response to an emergency situation
- Shut down equipment in response to routine requirements
- Identify, rectify and/or report environmental non-compliance
- Clean and store equipment
- Maintain work area to meet housekeeping standards
- Carry out routine maintenance of equipment according to enterprise procedures
- Interpret mechanical drawings according to enterprise procedures
- Use hand and power tools according to enterprise procedures
- Use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor

REQUIRED SKILLS AND KNOWLEDGE

- Work cooperatively within a culturally diverse workforce

Required knowledge

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- Effect of different climatic conditions on timing and management of harvest
- Basic vine physiology, as it applies to:
 - water intake
 - nutrient uptake
 - photosynthesis
 - respiration and transpiration
 - translocation
- Parts of the root, trunk, shoot and fruit systems of the grapevine, their role in how the vine works and their contribution to fruit quality, including:
 - buds, nodes and tendrils
 - cambium, epidermis, phloem and xylem
 - leaf blade, bract and petiole
 - bunch, berries and flowers
- Vine types, their characteristics and uses, including:
 - family, genus and species
 - *Vitis vinifera* and commercial varieties
 - native species and hybrids (e.g. *labrusca*)
 - rootstocks and scion stock
- Industry processes for new variety development
- Annual growth stages of grapevines, including:
 - budburst
 - flowering
 - veraison
 - maturity
- Key grape varieties and their distinguishing features. This may include factors, such as:
 - berry and bunch characteristics
 - frost and disease resistance
 - flavour and style
- Factors that affect grape ripening (e.g. canopy management, irrigation, grape variety and climatic conditions)
- Effect of fruit quality on wine
- Quality assurance procedures and controls
- Common problems and anomalies
- Harvesting procedures and operating parameters

REQUIRED SKILLS AND KNOWLEDGE

- Significance and method of monitoring equipment performance
- Role and operating difficulties of harvester support operator
- Purpose of mechanical harvester components
- Common faults and corrective action required
- Occupational health and safety (OHS) hazards and controls
- Environmental issues and controls
- Procedures and responsibility for reporting problems
- Cleaning and storage requirements associated with changeovers and types of shutdowns
- Emergency and routine shutdown sequences
- Recording and reporting procedures and requirements
- Cleaning and storage procedures
- Routine maintenance procedures for equipment where relevant
- Interpretation of mechanical drawings where relevant
- Procedures for use of hand and power tools where relevant

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Evidence of ability to:
- use personal protective clothing and equipment
 - select and confirm readiness of equipment and prepare according to instructions
 - attach and set up equipment to meet requirements
 - start and operate equipment in accordance with operation instructions and requirements of workplace and task
 - perform emergency and routine shutdowns
 - take corrective action in response to out-of-specification results or non-compliance
 - demonstrate knowledge of OHS hazards, controls

EVIDENCE GUIDE	
	<p>and emergency procedures</p> <ul style="list-style-type: none"> • sort, collect, treat, recycle or dispose of waste • record information appropriately.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	<p>This unit should be assessed together with other units of competency relevant to the function or work role.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

RANGE STATEMENT	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	Workplace information can include: <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules • instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal directions from manager or supervisor
Equipment	Equipment includes: <ul style="list-style-type: none"> • mechanical harvesting machinery • appropriate tools
Terrain	Terrain must enable safe and effective operation of a mechanical harvester. It may include: <ul style="list-style-type: none"> • tracks • access roads • straight or curving vineyard rows • open paddocks • flat, undulating, steep, hilly or terraced land • on- and off-road environments
Conditions	Conditions must enable safe and effective operation of a mechanical harvester. These may include: <ul style="list-style-type: none"> • dry • wet • slippery • boggy • icy • foggy • windy • day and night conditions.
Confirming equipment status	Confirming equipment status involves: <ul style="list-style-type: none"> • checking that all safety standards and pre-start requirements are met and that equipment is

RANGE STATEMENT	
	operational
Information systems	Information systems may be: <ul style="list-style-type: none"> • print or screen based
Problems and anomalies	Problems and anomalies may include: <ul style="list-style-type: none"> • adverse harvesting conditions • diseased, immature, over-ripe or rotten fruit • operating hazards, such as broken trellis and wires • MOG • equipment malfunction or breakdown
Grapes	Grapes may vary according to: <ul style="list-style-type: none"> • grape variety • crop quality • quantity • trellis systems • collection procedures

Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor environmental parameters	1.1 Environmental parameters are monitored against the production plan and according to workplace procedures 1.2 Environmental parameters are altered to meet the needs of the plants and according to workplace procedures
2. Determine daily water requirements	2.1 Plant water needs are determined according to workplace procedures 2.2 Water is applied according to the needs of the plants and workplace procedures 2.3 Water requirements are monitored according to workplace procedures
3. Implement treatments to promote plant growth	3.1 Potting media is tested to ensure specifications are met 3.2 Overall health of plants is monitored according to workplace procedures 3.3 Plant treatments are implemented according to production plans and workplace procedures 3.4 Problems and anomalies are identified, rectified and/or reported according to workplace procedures
4. Monitor the dispatch of stock	4.15 Availability of stock and timing of dispatch is confirmed with customers according to workplace procedures 4.2 Plants are prepared for dispatch in line with customer requirements 4.3 Stock is checked to ensure it meets quality specifications 4.4 Orders are checked against stock being dispatched to ensure

ELEMENT	PERFORMANCE CRITERIA
	compliance
5. Record information	5. Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information required to monitor and maintain nursery plants
- liaise with other work areas and customers
- select, fit and use appropriate personal protective clothing and/or equipment
- identify potential and existing hazards in the work area
- identify, rectify and/or report environmental non-compliance
- monitor work areas to ensure they meet workplace housekeeping standards
- monitor work area to ensure they meet workplace hygiene standards. This may include:
 - removing weeds
 - removing dead or diseased plant materials
 - washing work area on transfer of plants
 - disinfecting tools, equipment and work areas
 - using foot baths on entry to different work areas
- identify, rectify and/or report problems and anomalies
- implement safe work procedures to minimise hazards
- maintain workplace records
- maintain irrigation systems. This may include:
 - fixing blockages
 - servicing irrigation system components
 - identifying and reporting faults in the irrigation system
 - fixing leaking heads and hoses
- monitor water requirements. This may include:
 - using soil moisture devices
 - checking plants for physical signs of water stress or waterlogging
- test potting media. This may include identifying:
 - pH
 - drainage

- aeration
- salinity
- nitrate levels
- water repellence
- monitor health of the vines
- apply treatments to vines. These may include:
 - fungicides
 - fertilisers
 - insecticides
 - hormones
 - pruning
 - hardening off
 - irrigation
- monitor and/or prepare stock for dispatch. This may include:
 - labelling containers
 - checking orders against stock prepared
 - hydrating stock
- prepare, mix and use chemicals as required
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- basic vine physiology, as it applies to:
 - transpiration
 - water intake
 - nutrient uptake
 - photosynthesis
 - respiration
 - translocation
- parts of the root, trunk, shoot and fruit systems of the grapevine, their role in how the vine works and their contribution to fruit quality, including:
 - buds, nodes and tendrils
 - cambium, epidermis, phloem and xylem
 - leaf blade, bract and petiole
 - bunch, berries and flowers

- industry processes for new variety development
- key grape varieties and their distinguishing features. This may include factors, such as:
 - berry and bunch characteristics
 - frost and disease resistance
 - flavour and style
- annual grapevine growth stages, including:
 - budburst
 - flowering
 - veraison
 - maturity
- methods of calculating daily water needs
- methods for monitoring water use
- relationship between water needs of nursery plants and environmental parameters
- characteristics of various types of potting media
- tests to determine quality of potting media
- principles of nursery hygiene
- optimum growing conditions for plants in a nursery
- quality parameters for a range of nursery plants
- symptoms of unhealthy plants
- treatments required by plants at different growth stages and environmental parameters
- packing, dispatch and handling techniques of nursery plants
- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- reporting and recording requirements and procedures
- procedures and responsibility for reporting problems and anomalies

Evidence Guide

EVIDENCE GUIDE	
<p>The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.</p>	
<p>Overview of assessment</p>	<p>Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.</p>
<p>Critical aspects for assessment and evidence required to demonstrate</p>	<p>Evidence of ability to:</p>

EVIDENCE GUIDE	
competency in this unit	<ul style="list-style-type: none"> • use personal protective equipment, MSDS and follow other specified OHS procedures • identify environmental factors on plant growth and health • monitor and control application of water and special treatments to meet production outcomes • identify and address anomalies and problems • maintain stock levels to meet requirements • prepare stock for dispatch • complete documentation.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	<p>This unit should be assessed together with other units of competency relevant to the function or work role.</p>
Guidance information for assessment	<p>To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	<p>Workplace information can include:</p> <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • product labels • integrated pest management (IPM) programs • verbal directions from manager, supervisor, or senior operator
Nursery environment	<p>Nursery environment may include:</p> <ul style="list-style-type: none"> • glasshouses • shade houses • field nurseries • hardening-off areas
Environmental parameters	<p>Environmental parameters may include:</p> <ul style="list-style-type: none"> • light • temperature • humidity • wind
Crop water needs	<p>Crop water needs are determined by:</p> <ul style="list-style-type: none"> • using water monitoring devices or physical observation
Problems and anomalies	<p>Problems and anomalies may include:</p> <ul style="list-style-type: none"> • evidence of pests and diseases

RANGE STATEMENT	
	<ul style="list-style-type: none"> • insufficient new roots • insufficient number of new shoots • weak graft union • signs of dehydration • changes in environmental parameters • poor equipment performance
Stock	Stock may include: <ul style="list-style-type: none"> • cuttings and rootlings
Records	Records will include: <ul style="list-style-type: none"> • date • environmental parameters • treatments applied • rate of treatments • name of operator • dispatch records

Unit Sector(s)

FDFWGG3010A Implement a soil management program

Modification History

This unit supersedes but is not equivalent to FDFWGG3010B Implement a soil management program.

April 2012: Minor typographical corrections.

Unit Descriptor

Unit descriptor	This specialist unit has been developed for the wine grape growing stream of the wine sector. This unit covers the skills and knowledge required to monitor soil requirements and implement and evaluate a soil management program.
------------------------	---

Application of the Unit

Application of the unit	The application of this unit involves consultation with the manager and may require supervision of others in the implementation process.
--------------------------------	--

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units		
	FDFWGG2018A	Operate vineyard equipment
	FDFWGG3001A	Apply chemicals and biological agents

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Monitor vineyard soil management requirements	1.1 Vineyard soil is monitored according to workplace procedures 1.2 Results are interpreted correctly 1.3 Appropriate soil management activities are identified and recommended
2. Implement soil management program	2.1 Resources are coordinated and personnel briefed to deliver requirements 2.2 Agreed soil management program is implemented
3. Evaluate effectiveness of soil management activities	3.1 Vineyard is monitored to evaluate effectiveness of activities 3.2 Surrounding areas are monitored to evaluate environmental impact of soil management activities
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify soil management requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas
- consult with appropriate senior personnel
- apply sampling techniques
- conduct routine tests
- monitor the vineyard and interpret the results to identify vineyard soil management requirements. This may include monitoring:
 - soil moisture content
 - watertable level
 - weed population
 - signs of vine nutrient deficiencies
 - climatic conditions
 - cover crop practices
 - soil analyses (e.g. pH and salinity)
 - evidence of hard pans
 - soil texture
 - vine root distribution
 - nutrient levels in plant and soil
 - irrigation water quality
 - climatic conditions
 - erosion risk
 - soil management history
 - growth of mid-row sward
- calculate application rates for soil addition requirements (e.g. fertilisers and ameliorants)
- present and justify recommendations to senior personnel
- implement the soil management program. This will include consideration of:
 - resources, including operators with appropriate skills
 - equipment availability and capability
 - materials and chemicals
 - maintenance programs and supplies
 - specific needs of individual blocks
 - environmental conditions
 - other vineyard activities
- instruct operators as required
- monitor soil management activities. This will include monitoring:
 - operator performance
 - operating conditions
 - operating results
 - material supplies

- equipment performance
- take corrective action in response to out-of-specification results or non-compliance
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- maintain workplace records
- maintain work area to meet housekeeping standards
- report and/or record problems according to instructions
- plan and organise
- supervise operators according to enterprise procedures
- apply information technology systems according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- ideal soil environment for vines plus specific requirements of grapes grown
- soil management techniques and their affect on soil, vine growth, cropping levels and wine quality
- visual signs of vine nutrient deficiencies
- sampling techniques and procedures
- routine testing techniques and procedures
- interpretation of routine tests
- Occupational health and safety (OHS) hazards and controls
- environmental issues and controls
- procedures and responsibility for reporting problems
- resource requirements and availability
- reporting and recording requirements and procedures
- consultation requirements and procedures
- supervision techniques where relevant
- information technology systems where relevant
- resources required for assessment where relevant

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare cuttings for callusing	<p>1.1 Cuttings are counted, bundled and labelled according to instructions as required</p> <p>1.2 Cuttings are chemically treated according to instructions</p> <p>1.3 Cuttings are stored according to instructions</p>
2. Prepare and maintain callusing environment	<p>2.1 Sand bed or callusing room is prepared according to workplace procedures</p> <p>2.2 Cuttings are placed into callusing environment according to instructions</p> <p>2.3 Optimum callusing environment is maintained</p>
3. Prepare rootlings for customer or planting	<p>3.1 Rootlings are trimmed, graded, packed and stored according to instructions</p> <p>3.2 Waste is collected and disposed of according to workplace procedures</p> <p>3.3 Problems and anomalies are recognised, rectified and/or reported</p> <p>3.4 Work is conducted in accordance with workplace environmental guidelines</p>
4. Record information	<p>4.1 Workplace information is recorded in the appropriate format</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access workplace information to identify nursery requirements

- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas and customers
- count, bundle and label cuttings as required
- treat cuttings as required prior to callusing. This may include:
 - fungicide treatment
 - re-hydration
 - scoring
 - root promoter treatment
 - cutting just below basal bud
 - assimilation after cool storage
- store cuttings. This may include maintaining and monitoring cold storage facilities
- prepare sand bed or callusing room. This may include:
 - packing sand or vermiculite
 - lining boxes
 - ensuring heaters and ventilators are working correctly to required temperature
- plant or place cuttings in callusing environment. This may include:
 - feeling into ground or sand
 - packing into boxes with vermiculite
 - watering in
 - correct number of cuttings per box
 - spacing (e.g. not too tight)
 - correct way up (e.g. basal end at bottom)
 - arranging according to variety, clone and source
 - labelling and mapping of beds
 - adding hormone mixes
- maintain optimum callusing environment. This will include consideration of:
 - temperature
 - relative humidity
 - moisture levels of growing medium
 - weed and pest prevention
- trim rootlings (top growth and roots) ready for planting
- grade rootlings according to workplace or customer requirements and standards
- pack rootlings. This should include consideration of:
 - customer requirements
 - maintenance of rootling health
 - minimisation of vine damage
 - mode of transport
 - destination time
 - storage time and method
 - prevention of dehydration

- recognise problems and anomalies with vines, equipment and materials
- take corrective action in response to out-of-specification results, activity or non-compliance
- report and/or record problems and/or corrective action
- identify, rectify and/or report environmental non-compliance
- collect, sort, grade, treat and/or dispose of waste as required
- handle cuttings or rootlings to minimise damage
- select and operate equipment as required
- select and use materials as required
- maintain work area to meet housekeeping standards
- clean equipment as required
- prepare and mix chemicals as required
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- common features of healthy vine cuttings or rootlings. This may include:
 - thickness of original cane
 - no evidence of pests and diseases
 - number, strength and distribution of new roots
 - number, maturity and distribution of shoots
 - visually complete and robust graft union
- common features of unhealthy vine cuttings or rootlings. This may include:
 - galls on stem (e.g. crown gall)
 - galls on roots (e.g. nematodes)
 - no shoots or roots
 - damaged or destroyed buds
 - excessive disease staining or spots on canes
 - immature wood
 - shoots on incorrect nodes
 - faulty or broken graft unions
 - too few or unevenly distributed root development
- pre-callusing treatment requirements
- purpose and benefit of treatments
- storage requirements of cuttings prior to callusing
- preparation requirements of callusing environment

- callusing options (e.g. features, pros and cons)
- optimum callusing environment and its effect on the vine cutting
- common problems that occur during callusing and how they should be resolved (e.g. uneven callusing or evidence of dehydrated cuttings on arrival)
- preparation requirements for rootlings and procedures for sales or transfer to vineyard
- package or storage requirements and procedures for rootlings ready for sale or transfer
- factors that influence how a cutting should be graded and why
- reasons for specific requirements, for example:
 - rootling preparation
 - packing preparation
 - packaging and storage requirements
- waste disposal requirements and procedures
- reporting and recording requirements and procedures
- safe handling of chemicals
- equipment operation requirements and procedures
- Occupational health and safety (OHS) hazards and controls
- procedures and responsibilities for reporting problems
- environmental issues and controls
- cleaning requirements and procedures for work area and equipment. This should include additional considerations when cleaning between batches and varieties
- safe preparation and mixing of chemicals
- routine maintenance procedures for equipment where relevant.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare equipment for operation	1.1 Requirements are interpreted and confirmed 1.2 Materials are confirmed as available to meet requirements 1.3 Materials are prepared to meet requirements 1.4 Equipment is checked to confirm readiness for use 1.5 Equipment is attached and set up to meet application requirements
2. Operate equipment	2.1 Equipment is started up according to workplace procedures 2.2 Equipment is operated according to workplace procedures 2.3 Equipment performance is monitored to confirm performance is maintained within specification 2.4 Out-of-specification equipment performance is identified, rectified and/or reported 2.5 Materials are applied according to instructions 2.6 Problems and anomalies are recognised, rectified and/or reported
3. Shut down equipment	3.1 Equipment is shut down according to workplace procedures 3.2 Equipment is cleaned and stored according to workplace procedures 3.3 Waste generated by the process is collected, treated, disposed of or recycled according to workplace procedure 3.4 Work is conducted in accordance with workplace environmental guidelines
4. Record information	4.1 Workplace information is recorded in the appropriate format

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills include:

Note: The following required skills should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Ability to:

- access and interpret workplace information to identify seeding and spreading requirements
- select, fit and use appropriate personal protective clothing and/or equipment
- liaise with other work areas
- select appropriate equipment for the task
- confirm equipment status and condition. This may include checking:
 - belts and chains
 - lubricants
 - hydraulics
 - air intake
 - tyre pressure and wear
 - wear and tear
- attach, set up and calibrate equipment to meet application requirements
- select, prepare and load materials according to requirements
- start up equipment
- operate equipment to meet operating instructions. This should include:
 - driving forward and reversing
 - operating in confined spaces
 - operating amongst other vineyard activities and a variety of conditions as required
- monitor equipment performance and application rates. This may include monitoring:
 - status and condition
 - handling and stopping
 - ground speed
 - actual versus expected usage of materials
 - ground coverage
 - blockages
 - environmental operating conditions
- apply materials according to instructions. This may include:
 - correct variety or type of seed and/or fertiliser
 - correct soil ameliorant and/or treatment
 - application rate

- volume
- application depth
- density
- coverage
- recognise equipment performance problems and amend and/or report as instructed
- handle hazardous materials according to occupational health and safety (OHS) requirements
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- collect, sort, treat, dispose of and/or recycle waste
- identify, rectify and/or report environmental non-compliance
- clean equipment
- prepare equipment for storage
- store equipment according to workplace standards
- maintain work area to meet housekeeping standards
- maintain workplace records
- conduct routine maintenance of equipment according to enterprise procedures
- use oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- work cooperatively within a culturally diverse workforce.

Required knowledge includes:

Note: The following required knowledge should be applied as appropriate to the equipment and processes that are used in the particular winery or workplace.

Knowledge of:

- the purpose and application of spreading and seeding operations within the vineyard growing system. This may include the purpose and application of:
 - soil ameliorants (e.g. pH, texture, and mulching treatments, e.g. structure)
 - inter-row cropping species and varieties
 - inter-row cropping practices and techniques
 - inorganic and organic fertilising materials
- process specifications, procedures and operating parameters
- purpose and operation of equipment and instrumentation components
- common causes of variation and corrective action required
- required weather conditions for activity
- soil characteristics as they apply to spreading and seeding operations. These may include:
 - structure
 - compaction
 - condition
 - texture
 - fertility and toxicity

- moisture (e.g. too dry or waterlogged)
- significance and methods of monitoring equipment performance
- OHS hazards and controls
- material handling requirements
- lock-out and tag-out procedures
- procedures and responsibility for reporting problems
- reporting and recording requirements and procedures
- environmental issues and controls
- cleaning requirements and procedures associated with changeovers and types of shutdowns
- storage requirements associated with temporary or seasonal breaks in activity
- storage procedures for equipment and materials
- shutdown sequence
- routine maintenance procedures for equipment where relevant.

Evidence Guide

EVIDENCE GUIDE	
The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	Assessment must be carried out in a manner that recognises the cultural and literacy requirements of the assessee and is appropriate to the work performed. Competence in this unit must be achieved in accordance with food safety standards and regulations.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Evidence of ability to:</p> <ul style="list-style-type: none"> • use personal protective clothing and equipment • confirm availability of specified materials and prepare according to instructions • select and confirm status and suitability of equipment • attach, set up and calibrate equipment to meet application requirements • start and operate equipment in accordance with operation instructions and requirements of workplace and task • monitor spreading or seeding operation to achieve specified result • perform emergency and routine shutdowns • take corrective action in response to

EVIDENCE GUIDE	
	<p>out-of-specification results or non-compliance</p> <ul style="list-style-type: none"> • demonstrate knowledge of ohs hazards, controls and emergency procedures • sort, collect, treat, recycle or dispose of waste • record information appropriately.
Context of and specific resources for assessment	<p>Assessment must occur in a real or simulated workplace where the assessee has access to:</p> <ul style="list-style-type: none"> • personal protective clothing and equipment as required • work procedures, including advice on company practices, safe work practices, food safety, quality and environmental requirements • instructions, information, specifications and schedules as required • equipment, services and corresponding information as required • products and materials as required • internal and external customers and suppliers as required • cleaning procedures, materials and equipment as required • documentation and recording requirements and procedures.
Method of assessment	This unit should be assessed together with other units of competency relevant to the function or work role.
Guidance information for assessment	To ensure consistency in one's performance, competence should be demonstrated on more than one occasion over a period of time in order to cover a variety of circumstances, cases and responsibilities, and where possible, over a number of assessment activities.

Range Statement

RANGE STATEMENT
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with</p>

RANGE STATEMENT	
training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.	
Policies and procedures	Work is carried out in accordance with workplace procedures, licensing requirements and legislative requirements
Workplace information	Workplace information can include: <ul style="list-style-type: none"> • Standard Operating Procedures (SOPs) • specifications • production schedules • instructions • routine maintenance schedules • work notes • Material Safety Data Sheets (MSDS) • manufacturer instructions • verbal direction from manager, supervisor or senior operator
Spreading and seeding activities	Spreading and seeding activities may include: <ul style="list-style-type: none"> • planting cover crops • deep incorporation of ameliorants and fertilising
Equipment	Equipment may include: <ul style="list-style-type: none"> • seeders • spreaders (e.g. fertiliser and mulch)
Terrain	Terrain must enable safe and effective operation of equipment. It may include: <ul style="list-style-type: none"> • tracks • access roads • vineyard rows • open paddocks • flat, undulating, steep, hilly or terraced land • on- and off road environments
Conditions	Conditions must enable safe and effective operation of equipment. These may include: <ul style="list-style-type: none"> • dry • wet • slippery • boggy • icy

RANGE STATEMENT	
	<ul style="list-style-type: none"> • foggy • windy • day and night conditions
Loads	Loads, where applicable, may range from: <ul style="list-style-type: none"> • full to empty as required
Confirming equipment status	Confirming equipment status involves: <ul style="list-style-type: none"> • checking that all safety standards and pre-start requirements are met and equipment is operational • checking the operation and calibration of measuring instrumentation
Information systems	Information systems may be: <ul style="list-style-type: none"> • print or screen based
Materials	Materials may include: <ul style="list-style-type: none"> • organic and inorganic fertilisers • gypsum • lime • seed • ameliorants (e.g. grape marc) • mulch (e.g. straw)
Waste	Waste may include: <ul style="list-style-type: none"> • empty containers • bags • packaging materials • unused materials
Problems and anomalies	Problems and anomalies may include: <ul style="list-style-type: none"> • equipment blockages • uneven surfaces • size and flow of materials being applied
Work hazards	Work may involve exposure to: <ul style="list-style-type: none"> • chemical, dangerous or hazardous substances

FWPCOT2236 Fall trees manually (basic)

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to assess and manually fall small trees with a low level of complexity and to complete operator maintenance.

Basic trees typical to the scope of this unit may include the following characteristics:

- lean and distribution of the crown weight does not create a complex situation to assess or fell
- small dimensions relative to local forest size distribution
- no excessive lean
- no visible damage or defect
- species that are not prone to free splitting and adverse reactions during felling
- single stem or non-complex multi-stems
- diameter of tree is less than chainsaw bar length
- grown on terrain and slope that does not add significant complexity to the operation

The unit applies to those in a forest, agricultural, local council, emergencies services and other government agency environment. With the exception of minor forest produce, it is not relevant to commercial harvesting operations.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS <i>Elements describe the essential outcomes.</i>	PERFORMANCE CRITERIA <i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for felling	1.1 Identify and adhere to work specifications and site environmental protection measures relevant to felling basic trees in line with organisational requirements and relevant regulations 1.2 Review and check job requirements with appropriate personnel 1.3 Select tools and equipment appropriate to work requirements and check for operational effectiveness according to manufacturer recommendations 1.4 Identify trees to be retained and felled 1.5 Establish and maintain communication with others according to WHS requirements
2. Prepare for felling	2.1 Review location and stability for conditions likely to affect felling activities 2.2 Identify and report site environmental conditions to appropriate personnel 2.3 Identify and control potential and existing risks and hazards 2.4 Monitor and exclude location and activity of other personnel on the work site
3. Assess tree and plan felling	3.1 Assess limitations of own skills in safely felling trees, identify trees considered outside own skill level and seek assistance from appropriate personnel where required 3.2 Confirm that tree is safe to fell 3.3 Visually assess tree for felling characteristics, defects and stresses 3.4 Assess and check required falling direction and possible deviation 3.5 Plan sequence of cuts to fell tree according to standard felling procedures 3.6 Select suitable escape route and clear of growth and other obstacles according to environmental care principles and statutory requirements
4. Apply tree felling techniques	4.1 Fell individual trees using selected cutting techniques according to WHS and job requirements 4.2 Adjust cutting technique in response to movement and condition of tree

ELEMENTS	PERFORMANCE CRITERIA
	<p>4.3 Use planned escape route when tree starts to fall and monitor the fall and movement of tree on ground until determined stable</p> <p>4.4 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen</p> <p>4.5 Identify and implement procedures for removal of trees that are hung-up</p> <p>4.6 Dispose of waste materials in line with environmental and operational requirements</p>
5. Maintain equipment	<p>5.1 Inspect equipment on completion of trimming and cutting activities</p> <p>5.2 Identify damaged saws and cutting attachments for repair or replacement according to organisational requirements and manufacturer recommendations</p> <p>5.3 Remove, clean, adjust or replace chain and other components according to manufacturer recommendations</p> <p>5.4 Maintain tools and equipment according to WHS requirements and manufacturer recommendations</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	<ul style="list-style-type: none"> • estimate tree dimensions, including height, length, diameter and volume • complete routine calculations and report on size, length, diameter of felled trees.
Oral communication skills to:	<ul style="list-style-type: none"> • select and use appropriate spoken communication strategies with work colleagues and other personnel on site when felling trees • interpret hand signals with other operators to ensure safe tree felling
Reading skills to:	<ul style="list-style-type: none"> • interpret: <ul style="list-style-type: none"> • workplace health and safety and other organisational procedures • work orders • manufacturers' maintenance recommendations.
Writing skills to:	<ul style="list-style-type: none"> • complete accurate basic records for tree felling process, equipment faults and maintenance requirements.

Planning and organising skills to:	<ul style="list-style-type: none">• identify an unsafe tree• efficiently and logically sequence the stages of preparation for and felling of trees using work order to guide activities.

Assessment Requirements for FWPCOT2236 Fall trees manually (basic)

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT2236 Fall trees manually (basic), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including WHS, environmental and organisational policies and procedures relevant to felling trees at a basic level
- comply with organisational policies and procedures relevant to felling trees manually at a basic level
- comply with applicable licensing or certification requirements relevant to felling trees manually
- effectively communicate and use safe working practices, including maintaining an awareness of activity by other personnel in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at a basic level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route

- fell basic trees using a appropriate cuts safely without damage to personnel, equipment and surrounding environment
- identify trees that are hung up
- select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
- assess, plan and safely operate chainsaw equipment to manually fell trees at a basic level in forest, rural and community environments
- use tree felling techniques including scarf cutting , back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Workplace health and safety (WHS) requirements including:
 - PPE and clothing
 - safety equipment
 - first aid equipment
 - firefighting equipment
 - hazard and risk control procedures
 - fatigue management procedures
 - appropriate signage
 - elimination of hazardous materials and substances procedures
 - safe forest practices, including required actions relating to fire
 - techniques for manual handling, including shifting, lifting and carrying
- types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
- typical tree defects and how these affect tree felling activities:
 - shakes
 - insect defects
 - knots and resin pockets
 - pipe
 - drysides
- identifying trees:
 - that contain hazards and are deemed unsafe to fell
 - considered outside own skill level
 - trees where cuts made may lead to loss of control of tree in felling
- hazards and related risks and the impact on felling trees of:
 - uneven and unstable terrain
 - unsafe trees
 - fires
 - overhead and underground services

- excavations
- traffic
- structures
- hazardous materials
- insects and animals
- other personnel and machinery
- methods used to remove trees that are hung up and procedures for removal
- methods for assessing chain condition
- environmental protection measures to follow when felling trees related to:
 - native vegetation
 - soil and water
 - heritage and archeological artefacts
 - flora and fauna
 - geomorphologic features
 - landscape
 - external site pollution
 - recreational opportunities
 - regeneration opportunities
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and their effects on basic tree felling activities:
 - general forest lean
 - ground growth
 - ground hazards and obstacles
 - ground slope
 - gullies
 - presence and density of seed and habitat trees
 - water courses
 - wet and adverse weather conditions
 - wind speed and direction
- the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
 - warning signs
 - chainsaw and components
 - PPE and clothing
 - first aid equipment
 - maintenance requirements
 - support tools.

Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment that contains small trees with a low level of falling complexity
- PPE and clothing including:
 - safety helmet
 - safety gloves
 - protective footwear
 - eye protection
 - hearing protection
 - high visibility clothing
 - leg protection (trousers or chaps)
- materials and equipment including:
 - warning signs
 - chainsaw and components
 - first aid equipment
 - maintenance tools and equipment
 - support tools
 - manufacturers' instructions for use and maintenance of equipment
 - radio or communication device
 - fire fighting equipment (if prescribed)
- specifications and work instructions, including
 - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
 - policy and procedures for work health and safety (WHS)
 - risk assessment plan
 - general and specific environmental requirements
 - relevant state or territory logging code of practice
 - emergency and evacuation procedures
 - fire protocols
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT2237 Maintain chainsaws

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT2237A Maintain chainsaws, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to maintain engine or electrically operated hand-held chainsaws. It includes sharpening chains and completing routine and frequently required service requirements as well as periodic servicing. Work is completed in a variety of work settings including a forest environment, agricultural, workshop, arboretum and horticultural settings.

The unit applies to chainsaw operators.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for FWPCOT2237 Maintain chainsaws

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT2237A Maintain chainsaws, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement. This is the first release of this unit in the new standards format.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete these routine and frequently required service requirements on chainsaws in line with manufacturer's instructions:
 - removing, checking and cleaning air filter for damage and penetration of foreign material
 - cleaning saw body, air intake vents and cooling fins
 - cleaning chain brake
 - inspecting chain and guide bar
 - checking screws and nuts for tightness
 - checking safety devices
 - filling fuel tanks and chain oil tanks
- complete these types of periodic service requirements on chainsaws in line with manufacturer's instructions:
 - replacing drive sprocket
 - cleaning or replacing and setting spark plug
 - checking and replacing fuel filter
 - checking chain brake, oil system, flywheel assembly, anti-vibration system, muffler and spark arrestor
 - inspecting and replacing starter cord and starter spring

- matching pitches and gauges of cutting components
- dressing and cleaning cutter bar
- cleaning fly wheel
- removing and cleaning exhaust and fire screen
- complete these activities to check and sharpen chain saw chains in line with manufacturer's instructions:
 - inspecting and adjusting chain
 - inspecting and replacing chain that is worn, damaged or incorrectly sharpened
 - sharpening chain types and setting of depth gauges.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- types, purpose, features and operation of chainsaws for which repairs are completed
- features and names of different parts of chainsaws
- purpose, features and operation of tools and equipment used to repair and maintain chainsaws
- specifications and types of bars, chains and sprockets
- differences between frequent and periodic chainsaw maintenance requirements
- techniques for:
 - removing chains and other chainsaw components
 - assessing chain condition
 - sharpening chains to specified requirements
 - reassembling chainsaw components
- hazards for maintaining chainsaws and methods to minimise associated risks:
 - loud noise and exhaust fumes
 - mechanical vibration
 - handling hazardous substances
 - cuts and hot surfaces
 - rotating parts
- organisational procedures specific to repairing and maintaining chainsaws:
 - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
 - communication reporting lines
 - recording and reporting repairs, maintenance activities and equipment faults
- environmental protection practices for repairing and maintaining chainsaws:
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing materials
 - disposing of hazardous substances.

Assessment Conditions

The following resources must be made available:

- engine or electrically operated hand-held chainsaws
- tools and equipment used to repair and maintain chainsaws
- consumable chainsaw parts, oil and fuel
- personal protective equipment suitable for repairing and maintaining chainsaws including:
 - Safety boots
 - Safety helmet
 - Cut resistant leg protection
 - First aid kit
 - Hearing protection
 - High visibility clothing
 - Eye protection
 - Apron
 - Chain mesh gloves
- manufacturers' instructions and recommendations for repair and maintenance of chainsaws
- template documents for recording repairs, maintenance activities and equipment faults.
- organisational procedures for repairing and maintaining chainsaws.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

Assessment Requirements for FWPCOT2239 Trim and cut felled trees

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT2239A Trim and cut felled trees, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- safely and efficiently use a chainsaw to complete these activities:
 - trim and cut hardwood or softwood trees
 - delimb trees
 - trim branches
 - trim burls and other small growths
- use these cutting techniques:
 - bridging cuts
 - swinging cuts
 - side bind cuts
 - boring
 - wedge cut
 - ripping cuts
- trim and cut trees in these environmental conditions:
 - dry weather condition
 - wet weather condition
 - low and moderate wind speeds
- complete the following maintenance on a chainsaw:

- sharpening
- refuelling
- inspection, identification and replacement of bar, chain, drive sprockets
- bar oil checks and top up
- air filter, check, clean and replacement
- cleaning of saw body, air intake vents and cooling fans
- fitting spare chain and tension chain.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection measures including:
 - action to limit the impact of noise, wind speed and direction, fallen trees, ground slope, ground hazards and obstacles, general forest lean
 - action to limit the impact to ground growth, canopy, density of trees
 - action to limit the impact on flora, fauna and habitat
 - soil and water protection
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and effects on tree cutting and trimming activities:
 - ground growth
 - ground hazards and obstacles
 - ground slope
 - wet and adverse weather conditions
 - wind speed and direction
- typical tree defects and how they affect tree cutting activities:
 - splits
 - falling damage
 - fire damage
 - insect infestation
 - pipe
 - shake
 - twist
 - knots and resin pockets
- typical tree stresses and how they affect tree cutting activities
 - tension (fibres being stretched)
 - compression (fibres being squashed)
 - neutral fibres
- range of chainsaw cutting techniques:

- bridging cuts
- swinging cuts
- side bind cuts
- delimiting
- boring
- wedge cut
- ripping cuts
- cutting patterns used to optimise time and recovery of product from trees
- cutting sequences used to maintain control of cut sections and minimise cutting problems
- purpose, features, operation and basic non-specialist repair and maintenance: of chainsaws
- methods for assessing chain condition
- organisational procedures specific to tree trimming and cutting activities:
 - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
 - communication reporting lines
 - recording and reporting tree cutting outcomes, equipment faults and maintenance requirements.

Assessment Conditions

The following resources must be made available:

- chainsaws
- chainsaw fuel and oil containers
- support tools (hammer, wedges, logging tape, cant hook or breaking bar)
- maintenance tools and equipment for chainsaws
- personal protective equipment suitable for cutting trees and maintaining chainsaws
- manufacturers' instructions for use and maintenance of equipment
- work order with specific instructions for tree cutting activities
- template reports for recording tree cutting outcomes, equipment faults and maintenance requirements
- organisational procedures for tree trimming and cutting activities.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3202 Navigate in remote or trackless areas

Modification History

Release	Comment
1	Replaces equivalent FPICOT3202B Navigate in remote or trackless areas, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format

Application

This unit of competency describes the outcomes required to navigate in untracked, remote areas in situations where difficult environmental conditions and poor visibility are likely to occur. The unit includes interpretation and use of maps and other navigation aids.

The unit applies to Forestry Worker, Plantation Worker, Forest Harvester, Harvesting Technical Forestry Technician, Tree Planter, Mobile Equipment Operator, Arboriculture Technician.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Sawmilling and Processing

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for navigation	1.1 Identify and gather information and relevant factors and check with appropriate personnel.

	<p>1.2 Select suitable maps, equipment and navigation aids and check for accuracy, currency and operational effectiveness.</p> <p>1.3 Detect and correct faults or errors in maps and equipment.</p> <p>1.4 Establish communication with others in line with WHS and organisational requirements</p>
2. Plan the route	<p>2.1 Plan route in line with work instructions and WHS requirements.</p> <p>2.2 Examine maps to identify relevant symbols, information, navigation data and environmental requirements.</p> <p>2.3 Calculate accurate grid and magnetic bearings using maps and equipment in line with assignment instructions.</p> <p>2.4 Plan emergency exit routes and contingencies to combat other risks.</p>
3. Conduct navigation	<p>3.1 Undertake navigation in line with planned route and schedule.</p> <p>3.2 Orientate maps are correctly to surroundings in line with planned route.</p> <p>3.3 Use equipment and navigation aids in line with manufacturer recommendations.</p> <p>3.4 Navigate alternative routes to bypass obstacles and improve efficiency of course.</p> <p>3.5 Minimise impact on the environment as a result of navigation.</p> <p>3.6 Record and report navigation activities.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> • interpret scales, symbols, grid references, distance and data included on maps and navigation equipment • estimate travel time and distances • locate own position on a map.
Planning and organising skills to:	<ul style="list-style-type: none"> • estimate resource and equipment requirements • effectively bypass obstacles.
Problem solving skills to:	<ul style="list-style-type: none"> • identify and solve problems with equipment and navigation route.

Assessment Requirements for FWPCOT3202 Navigate in remote or trackless areas

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT3202B Navigate in remote or trackless areas, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow organisational policies and procedures for navigating in a remote or trackless area
- select, interpret, and use maps and other written and diagrammatic information for navigation
- use maps, compass and navigation aids to plan routes and navigate in remote or trackless area which must be either:
 - standard magnetic compass using latitude/longitude and Universal Transverse Mercator (UTM) coordinate systems
 - global positioning system (GPS)
 - cadastral maps (maps that show the boundaries and ownership of land parcels)
 - topographic maps
 - general maps
- plan and conduct an efficient navigation, effectively bypassing obstacles within designated timeframes
- maintain navigation tools and equipment
- establish and maintain effective communication with appropriate personnel as required
- record navigation activities.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- regulations, standards, codes of practice and established safe practices for navigating in a remote or trackless area
- environmental protection requirements, including the safe disposal of waste material and returning the environment to its original or near to original condition on completion of activity
- organisational and site standards, requirements, policies and procedures for navigating in a remote or trackless areas
- factors that may affect navigation, including:
 - types of terrain and gradient
 - weather conditions
 - obstacles
 - distance
 - estimated travelling time
 - availability of resources, including water, rest stops, camp sites
 - access and exit routes
- use and features of various maps, images and charts including:
 - cadastral and topographic maps
 - charts
 - guide books
 - photographs and other digital imagery
 - sketches
 - diagrams
- representation of topographic features on maps and plans, including:
 - grid lines and numbers
 - contour lines
 - magnetic variation
 - scale
 - map legend
 - local features
 - markers and beacons
 - water depth
- common scales and reference information used on maps and plans
- features and uses of environmental navigation aids:
 - survey markers
 - track markers and beacons
 - signs
 - arrows
 - natural landmarks and reference points

purpose, features and operation of navigation equipment, and procedures for their safe use and maintenance, including

- global positioning system (GPS) device

- magnetic compass, including adjustment for local magnetic variation
- locator beacons
- personal protective equipment and clothing
- techniques for estimating distance travelled within a particular activity context
- established communication modes, methods and protocols
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- site to navigate
- navigation equipment
- work order, workplace requirements and site standards for navigating in remote or trackless areas.
- communication devices

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3238 Operate a pole saw

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT3238B Operate a pole saw, which was first released with FPI11 Forest and Forest Products Training Package Version 1.</p> <p>Change of title to more accurately reflect the intended application of unit for use of power driven pole-mounted chain saws</p> <p>This is the first release in the new standards format.</p>

Application

This unit of competency describes the outcomes required to trim high branches reachable with a power driven pole saw and to promote tree growth by trimming and felling excess branches.

Power driven pole saw in this unit refers to professional standard pole-mounted chain saws that are typically fuel types, but may be battery powered, and generally telescopic.

It applies to those who operate a pole saw in a forest environment and includes equipment maintenance.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. for trimming	1.1 Identify and follow WHS, environmental, legal and organisational

	<p>requirements for operating a pole saw.</p> <p>1.2 Review work order and clarify with appropriate personnel.</p> <p>1.3 Select equipment appropriate to work requirements and check for serviceable condition in line with manufacturer recommendations.</p> <p>1.4 Carry out pre-startup checks of pole saw in line with site requirements.</p> <p>1.5 Establish and maintain communication with others to ensure safety.</p>
2. Assess trees	<p>2.1 Identify and assess tree type, location and stability for safe working conditions.</p> <p>2.2 Plan the trim of a tree in line with site procedures and environmental conditions.</p> <p>2.3 Identify trees unable to be trimmed safely and refer to appropriate personnel.</p> <p>2.4 Determine whether the height of the branch is within safe reach when using the pole saw</p> <p>2.5 Establish general falling direction of branches and limbs to be trimmed and identify clear escape route.</p>
3. Trim trees	<p>3.1 Trim accessible branches and knots to specifications in line with manufacturer recommendations and organisational safe work practices for angle and height allowances.</p> <p>3.2 Monitor movement and whereabouts of other personnel to ensure work site is safe.</p> <p>3.3 Undertake sequence of cuts to trim tree branches.</p> <p>3.4 Operate pole saw in line with safety regulations, adjusting technique in response to condition of the tree.</p> <p>3.5 Diagnose unexpected characteristics of a tree during trimming operations and review tree assessment if required.</p> <p>3.6 Complete cutting once initiated, to minimise splitting.</p> <p>3.7 Clear cut branches from the site in line with standard operating procedures and environmental requirements.</p> <p>3.8 Record and report trimming activity.</p>
4. Conduct operator maintenance	<p>4.1 Follow lock-out procedures in line with WHS legislation and site procedures.</p> <p>4.2 Inspect condition of saw and other equipment on completion of trimming activities.</p> <p>4.3 Remove, sharpen, adjust or replace chain and other components, in line with manufacturer recommendations.</p> <p>4.4 Recycle, re-use or dispose of blunt or damaged chain and other</p>

	<p>components in line with environmental requirements.</p> <p>4.5 Clear pole saw of dust, shavings and debris and check to make sure it meets relevant operational standards.</p> <p>4.6 Record and report equipment faults and maintenance activity.</p>
--	---

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	<ul style="list-style-type: none"> sharpen chain with files set to correct angles.
Writing skills to:	<ul style="list-style-type: none"> record trimming activity and maintenance records.
Problem solving skills to:	<ul style="list-style-type: none"> to identify problems and equipment faults and select treatments identify appropriate branches to be trimmed assess the capacity and suitability of equipment to the task of trimming trees.

Assessment Requirements for FWPCOT3238 Operate a pole saw

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT3238B Operate a pole saw, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- undertake trimming with a pole saw to correctly and safely demonstrate competency in the following:
- assess trees and site conditions to work safely
- correct use of safety attire and protective equipment
- conduct pre-operational checks of pole saw
- trim trees at safe height and angle in line with manufacturer recommendations and organisational safe working practices
- select/adjust trimming sequence and cutting techniques in response to various tree characteristics and site conditions
- conduct operator maintenance

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- workplace requirements and site standards for carrying out pole saw operations
- environmental risks and hazards associated with trimming trees with a pole saw
- characteristics of trees and timber defects
- Branch Bark Ridge (BBR) and Bark Branch Collar (BBC)
- appropriate trimming sequence and cutting techniques
- manufacturer recommendations and organisational safe working practices for operating a pole saw at safe height and angle limits

- methods for assessing condition of pole saw chain
- established communication channels and protocols
- problem identification and resolution strategies, and common fault finding techniques
- procedures for recording and reporting workplace information.
-

Assessment Conditions

The following resources must be made available:

- a professional standard fuel or battery powered pole-mounted chain saw with telescopic extension
- work order, workplace requirements and site standards for conducting pole saw operations
- relevant personnel for the purposes of communicating information

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT3259 Operate a four wheel drive on unsealed roads

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT3259 Operate a four wheel drive on unsealed roads, which was first released with FPI11 Forest and Forest Products Training Package Version 1.0. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to safely operate a four wheel drive (4x4) vehicle on unsealed roads.

The unit applies to operating a 4x4 vehicle in a variety of work settings with different terrains.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Harvesting and Haulage

Sawmilling and Processing

Timber Manufactured Products

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Identify four-wheel	1.1 Access, interpret and apply information relevant to

ELEMENTS	PERFORMANCE CRITERIA
drive specific terms and terminology	<p>operating a four-wheel drive vehicle on unsealed roads.</p> <p>1.2 Identify the structural and handling differences between a conventional two-wheel drive vehicle and a four-wheel drive vehicle.</p> <p>1.3 Identify four-wheel drive techniques.</p>
2. Conduct checks of 4x4 vehicle and equipment	<p>2.1 Perform pre-start checks.</p> <p>2.2 Secure loads in line with organisational, workplace safety and environmental requirements.</p> <p>2.3 Select suitable navigation aids where necessary.</p> <p>2.4 Advise passengers of any special safety precautions to be taken when traversing rough terrain.</p> <p>2.5 Check that tyre pressure is suitable for terrain and that it is changed as required in line with organisational procedures.</p> <p>2.6 Select and access maintenance equipment prior to departure after considering the contextual issues.</p>
3. Prepare for 4x4 operations	<p>3.1 Identify and follow work health and safety (WHS), environmental, and organisational requirements relevant to operating a 4x4 vehicle.</p> <p>3.2 Determine type of operation and ensure safe operating conditions.</p> <p>3.3 Establish communication with others and choose the required safety mechanisms in line with organisational requirements.</p>
4. Operate 4x4 vehicle on unsealed terrain types	<p>4.1 Continually monitor the track to identify hazards, assess risks, and select the best route in line with WHS and environmental requirements.</p> <p>4.2 Identify situations where the engagement of four-wheel drive is required and engage front hubs or centre differential lock where fitted.</p> <p>4.3 Use appropriate range, gear, speed, driving and braking technique to negotiate a range of terrain types while maintaining control of vehicle at all times.</p> <p>4.4 Check brakes and undercarriage after negotiating varying terrain.</p> <p>4.5 Park and shut down 4x4 vehicle in line with manufacturer specifications and organisational requirements.</p>
5. Operate 4x4 vehicle on	5.1 Inspect intended 4x4 vehicle path prior to negotiation of slope.

ELEMENTS	PERFORMANCE CRITERIA
a steep slope	<p>5.2 Use appropriate range, gear, speed, driving and braking technique to negotiate a steep slope, while maintaining control of vehicle.</p> <p>5.3 Use control braking to ascend and descend, and avoid skidding.</p> <p>5.4 Maintain traction in line with requirements of 4x4 vehicle.</p> <p>5.5 Apply appropriate automatic and manual techniques when 4x4 vehicle cannot proceed any further on a steep slope due to traction problems.</p>
6. Perform maintenance and minor repairs on 4x4 vehicles	<p>6.1 Perform operational maintenance and minor repairs as detailed in the vehicle operator manual and report vehicle defects to the appropriate person.</p> <p>6.2 Demonstrate safe use of a jack to support a 4x4 vehicle while changing a tyre under relevant road terrains and conditions within the operating environment</p> <p>6.3 Clean and store 4x4 vehicle and equipment after use in line with manufacturer specifications and organisational procedures.</p> <p>6.4 Document maintenance and minor repairs in line with organisational procedures.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	<ul style="list-style-type: none"> • correctly adjust tyre pressure and follow operating instructions on instruments for checking, repairing and operating a four wheel drive vehicle • estimate the impact of shape of terrain on driving conditions • estimate time of a journey, water depth and fuel consumption.
Reading skills to:	<ul style="list-style-type: none"> • follow instructions in safety and equipment manuals when checking and operating four wheel drive vehicle • interpret diagrams on equipment or in operational manuals.
Problem solving skills to:	<ul style="list-style-type: none"> • identify problems and equipment faults in four wheel drive vehicles and demonstrate appropriate response procedures • identify potential hazards and operational faults when driving four wheel drive vehicles and demonstrate appropriate response procedures • demonstrate appropriate response procedures to driving conditions when driving four wheel drive vehicles.

Assessment Requirements for FWPCOT3259 Operate a four wheel drive on unsealed roads

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT3259 Operate a four wheel drive on unsealed roads, which was first released with FPI11 Forest and Forest Products Training Package version 1.0. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- follow applicable workplace safety, environmental and regulatory requirements and codes of practice relevant to operating a 4x4 vehicle
- follow organisational policies and procedures relevant to operating a 4x4 vehicle, including:
 - own work role and responsibilities
 - procedural manuals
 - quality and continuous improvement
 - WHS, emergency and evacuation procedures
 - recording and reporting requirements
 - equipment use, maintenance and storage requirements
 - environmental management requirements
- communicate and work safely with others in rough terrain when operating a 4x4 vehicle
- perform pre-start checks of vehicle and equipment suitable to different terrains by checking loads and tyre pressure, selecting navigation aids and advising passengers of safety precautions
- operate safely, a 4x4 vehicle, on unsealed road conditions and different terrain types, including negotiating steep slopes, by identifying hazards and assessing risks
- use appropriate range, gear, speed, driving and braking techniques safely when operating a 4x4 vehicle on a steep slope

- demonstrate safe use of a jack to support a 4x4 vehicle while changing a tyre under relevant road terrains and conditions within the operating environment
- park and shut down 4x4 vehicle in line with *manufacturer specifications* and organisational requirements
- perform and document operational maintenance as permitted by vehicle operator handbook.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- four wheel drive operational information
- structural differences between conventional two wheel drive and a four wheel drive including:
 - recovery hooks and mounting features
 - purpose and use of front wheel hubs
 - factors affecting tyre size, fitment, rating and pressure
- applicable regulations, standards, codes of practice and established safe practices relevant to the operating a 4x4 vehicle
- road rules, regulations, permit and licence requirements of the relevant state or territory
- environmental protection requirements including the safe disposal of waste material
- prestart checks for 4 x 4 vehicle on:
 - fuel, either diesel, gas or petrol
 - water
 - oil
 - brake and transmission fluid levels
 - battery water levels and electrolyte checks
 - tyres
 - belts
 - leads
 - hydraulic lines and connections
 - air cleaners
 - brakes
 - off-road safety equipment
 - traction devices
- Types of communication equipment including:
 - personal location beacon (PLB)
 - flares
 - markers
 - phone
 - radio
 - V-Sheet

- safe operating conditions for a 4 X 4 vehicle
 - interpreting weather conditions to determine suitability for driving
 - determining food, water, PPE (sunglasses, high-visibility vest, etc.) and clothing requirements for journey
 - selecting routes to minimise damage to the environment
 - on and off-road conditions
 - traffic pattern and density
 - visibility
 - loading of four-wheel drive, including techniques to reduce overloading
- types of environmental risks and hazards associated with operating a 4x4 vehicle on unsealed roads including:
 - rocks and other unexpected obstacles
 - damage to vehicle
 - tidal influences
 - fire in vehicle
 - faulty brakes
 - leaking fuel
 - faulty steering mechanism on vehicle
 - animals and objects in vehicle path
 - crocodiles and snakes in some areas
 - windy or foggy sections of terrain
 - steep slopes
 - side slopes
 - slippery surfaces
 - land slides
 - overhead tree limbs
 - black ice
 - towing trailers
 - other vehicles
 - fallen trees, limbs and logs
 - icy terrain
 - flooded terrain
 - oil on road
 - parked vehicles on road
 - pedestrians on or near the road
 - poor visibility
- 4x4 driving techniques in different terrains including:
 - smooth
 - rough
 - uneven

- slippery
- wet
- boggy
- sandy
- steep or hilly
- rock
- icy
- snow
- mud, including:
 - brown clay
 - black silt
 - salt pan mud
 - red
- hard ground
- water
- operational knowledge of a 4x4 vehicle, including controls, instruments, indicators and their use
- tyre management principles for checking, changing and maintenance
- workplace communication channels and protocols
- techniques for travelling in convoy
- problem identification and resolution strategies, and common fault-finding techniques relevant to safely operating a four wheel drive vehicle
- types of tools and equipment relating to a 4x4 vehicle, and procedures for their safe use and maintenance
- maintenance equipment including spares and fluids
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace offering conditions including different terrain on unsealed roads and steep slopes
- materials and equipment relevant to undertaking work applicable to this unit, including manual or automatic four-wheel drive or all-wheel drive
- specifications and work instructions relevant to workplace requirements and the safe operation of four wheel drive vehicles
- personal protective equipment required for operating a four wheel drive on unsealed roads
- relevant personnel for the purposes of communicating information.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT6204 Use carbon accounting to estimate emissions

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT6204A Use carbon accounting to estimate emissions in the workplace which was first released with FPI11 Forest and Forest Products Training Package Version 2.2

Application

This unit of competency describes the outcome required to identify and apply carbon accounting methodologies to develop and analyse a carbon inventory. It applies to senior managers and can apply to the full scope of forest and wood products industry workplaces and to operations of all sizes.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Common Technical

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Evaluate context for carbon accounting	<p>1.1 Determine organisational need to quantify stocks, sources and sinks of carbon and other greenhouse gas (GHG) emissions in line with anthropogenic impacts on global climate.</p> <p>1.2 Investigate mandatory and voluntary obligations for carbon</p>

ELEMENTS	PERFORMANCE CRITERIA
	<p>accounting under international conventions and protocols within national context.</p> <p>1.3 Examine the principles of baseline scenario, leakage and permanence.</p> <p>1.4 Assess the role of forest and wood products industry in global balance of GHG emissions.</p> <p>1.5 Establish organisational objective of conducting carbon emission accounting.</p>
2. Identify carbon accounting methodologies and define approach	<p>2.1 Identify and explore methodologies for carbon accounting.</p> <p>2.2 Examine carbon accounting frameworks.</p> <p>2.3 Identify protocols for carbon biomass pools including harvested wood products and non-CO2 emissions.</p> <p>2.4 Establish approach for developing carbon inventory in line with nationally agreed standards.</p>
3. Establish accounting area	<p>3.1 Define organisational and operational boundaries for carbon inventory.</p> <p>3.2 Determine time period over which carbon emissions will be assessed.</p>
4. Collect data	<p>4.1 Identify emissions and offset sources.</p> <p>4.2 Determine collection of activity consumption and offset data, based on data availability, analytical capacity and available resources.</p> <p>4.3 Construct carbon inventory summary table, listing and separating emission sources into correct scopes.</p> <p>4.4 Include carbon offset sources outside scope in carbon inventory summary table.</p> <p>4.5 Record available data in separate spreadsheet tabs.</p> <p>4.6 Research and gather existing secondary and field data for carbon storage sources.</p>
5. Calculate carbon emissions	<p>5.1 Calculate carbon dioxide equivalent emissions consistent with GHG protocol within spreadsheets for each emissions source.</p> <p>5.2 Calculate carbon storage according to standardised methodology for each carbon offset source in the inventory.</p> <p>5.3 Populate carbon inventory summary with calculated emissions and offsets in descending order.</p>

ELEMENTS	PERFORMANCE CRITERIA
	5.4 Calculate total emissions for each scope and for removals and offsets. 5.5 Calculate sum total of emissions and offsets for inventory. 5.6 Estimate change in carbon stock if a baseline exists. 5.7 Display emissions by scope and source, using charts or graphs. 5.8 Formulate suitable ratio indicator for organisation and calculate value based on total carbon emissions in the summary. 5.9 Report value of ratio indicator in carbon inventory summary.

Foundation Skills

<i>This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.</i>	
Numeracy skills to:	<ul style="list-style-type: none"> • interpret a range of complex abstract numerical data • complete highly technical and complex calculations using equations • record abstract data with precision and prepare interpretative charts and graphs.
Reading skills to:	<ul style="list-style-type: none"> • interpret highly technical, complex and unfamiliar information within international and Australian protocol and convention documents.
Writing skills to:	<ul style="list-style-type: none"> • document clear explanatory notes for calculations.
Planning and organising skills to:	<ul style="list-style-type: none"> • source, collect and organise a range of data to inform carbon emission calculations • plan and organise collection of all required information and manage own timing and productivity to complete calculations.
Technology skills to:	<ul style="list-style-type: none"> • use a computer, keyboard and spreadsheet software to prepare and maintain calculations.

Unit Mapping Information

FPICOT6204A Use carbon accounting to estimate emissions in the workplace.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for FWPCOT6204 Use carbon accounting to estimate emissions

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT6204A Use carbon accounting to estimate emissions in the workplace which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- For a given forest and wood products industry organisation within any sector:
 - identify mandatory and voluntary obligations for carbon accounting
 - define organisational objectives for participating in carbon accounting processes
 - define boundaries for the carbon inventory
 - select a methodology for carbon accounting calculations for emissions and offsets
- Complete two different carbon accounting calculations for two different time periods in line with the selected methodology and include the following factors:
 - direct greenhouse gas (GHG) emissions
 - indirect GHG emissions
 - on-site and off-site emissions (geographical)
 - upstream emissions
 - downstream emissions
 - full cycle accounting
 - non-CO2 emissions; soil disturbance, fertilisation, biomass combustion

In forest applications also consider the following:

- above ground biomass
- below ground biomass
- dead organic matter - wood, litter
- soil organic matter

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Methods to access, locate and select applicable objectives and key content in relevant international and national conventions, protocols, standards and guidance frameworks, including the following key references:
 - Kyoto Protocol
 - ISO 14000 essentials:
 - ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
 - Greenhouse Gas Protocol Corporate Standard
 - Copenhagen Agreement
 - National Greenhouse Accounts (NGA) Factors Workbook
- Key drivers for carbon accounting
- Basic theory of the greenhouse effect and its impacts
- Basic principles of the carbon cycle and influences
- Carbon accounting terminology, frameworks and methods used to calculate carbon emissions and offsets
- Types of emissions and offset sources included in common calculations:
 - Direct GHG emissions
 - Indirect GHG emissions
 - On-site and off-site emissions (geographical)
 - Upstream emissions
 - Downstream emissions
 - Full cycle accounting
 - Non-CO2 emissions; soil disturbance, fertilisation, biomass combustion
- Sources of secondary data for carbon accounting
 - national statistical agencies
 - research institutes
 - information from sectoral experts
- Organisational and operational boundaries for the carbon inventory
- The full range of organisational emission sources and methods used to select key emission factors for calculations.

Assessment Conditions

The following resources must be made available:

- Computer, keyboard and spreadsheet software to prepare and maintain calculations
- Documents, spreadsheets and commonly used proformas for calculating carbon emissions

- Access to international and national conventions, protocols, standards and guidance frameworks including the following key references:
 - Kyoto Protocol
 - ISO 14000 essentials:
 - ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
 - Greenhouse Gas Protocol Corporate Standard
 - Copenhagen Agreement
 - National Greenhouse Accounts (NGA) Factors Workbook

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPCOT6205 Prepare an enterprise carbon management report

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT6205A Prepare an enterprise carbon management report which was first released with FPI11 Forest and Forest Products Training Package Version 2.2

Application

This unit of competency describes the outcomes required to write a carbon management report for an organisation for dissemination to internal personnel and or external authorities.

It applies to job roles, including senior managers and can apply to the full scope of forest and wood products industry workplaces and to operations of all sizes.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Common Technical

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare to write report	1.1 Establish and maintain information management system to manage data over the reporting period. 1.2 Review carbon reporting procedures outlined in regulatory or

ELEMENTS	PERFORMANCE CRITERIA
	<p>voluntary standards for carbon management.</p> <p>1.3 Determine scope of carbon reporting and relevant audience.</p> <p>1.4 Establish structure and specific objectives for each report heading in line with carbon reporting procedures content mandated by standards or regulatory bodies.</p> <p>1.5 Develop report format and style in line with organisational formats and style guides.</p> <p>1.6 Assess carbon inventory data for completeness, relevance and accuracy.</p>
2. Compile draft report	<p>2.1 Develop report content in line with report format and objectives.</p> <p>2.2 Gather evidence to generate specific findings and recommendations relevant to carbon management principles.</p> <p>2.3 Use appropriate language and ensure content covers the full scope of reporting requirements.</p>
3. Complete final report	<p>3.1 Present draft report to appropriate personnel, seek feedback and amend as required.</p> <p>3.2 Prepare final draft for executive sign-off and distribute to stakeholders.</p> <p>3.3 Name and store documents in line with organisational information management system requirements.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> Interpret a range of complex abstract numerical carbon inventory data Accurately transcribe carbon accounting data into reports.
Reading skills to:	<ul style="list-style-type: none"> Interpret highly technical, complex and unfamiliar information within carbon accounting records and international and Australian protocol and convention documents.
Writing skills to:	<ul style="list-style-type: none"> Develop and document reports requiring the presentation of precise complex information, using simple language structures for use by wide audiences.
Planning and organising skills to:	<ul style="list-style-type: none"> Source, collect and organise a range of data to inform reporting requirements and report contents.

	<ul style="list-style-type: none">Plan and organise collection of all required information and manage own timing and productivity to complete reports.
Technology skills to:	<ul style="list-style-type: none">Use a computer, keyboard and spreadsheet software to prepare and maintain reports.

Assessment Requirements for FWPCOT6205 Prepare an enterprise carbon management report

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT6205A Prepare an enterprise carbon management report which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- For a given forest and wood products industry organisation within any sector:
 - identify mandatory and voluntary obligations for reporting on carbon management
 - identify content mandated by standards or regulatory bodies
 - develop one report for one specified reporting time period using organisational styles and formats
 - include the following information in the report:
 - content mandated by standards or regulatory bodies
 - organisational drivers for carbon accounting and reporting
 - diagram of organisational and operational boundaries for the carbon inventory
 - organisational emissions sources, offsets and their scope
 - summary carbon inventory table
 - whether or not the organisation's total carbon emissions breach any reporting thresholds
 - financial implications and risks for the organisation of various carbon price signals
 - setting of carbon reduction targets and objectives for the organisation
 - options for the introduction of new carbon management principles
 - recommended actions for reducing organisational greenhouse gas emissions
 - recommended actions for improving carbon accounting and reporting
 - barriers experienced when developing the inventory and report.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Methods to access, locate and select applicable objectives and key content in relevant international and national conventions, protocols, standards and guidance frameworks, including the following key references:
 - Kyoto Protocol
 - ISO 14000 essentials:
 - ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
 - Greenhouse Gas Protocol Corporate Standard
 - Copenhagen Agreement
- Voluntary and mandatory requirements for reporting on carbon management to meet requirements of standards and regulation and required content.
- Key drivers for carbon accounting and reporting.
- Basic theory of the greenhouse effect and its impacts
- Basic principles of the carbon cycle and influences.
- Carbon accounting terminology, frameworks and methods used to report calculations for carbon emissions and offsets.
- Types of emissions and offset sources included in common calculations and reports, including:
 - direct GHG emissions
 - indirect GHG emissions
 - on-site and off-site emissions (geographical)
 - upstream emissions
 - downstream emissions
 - full cycle accounting
 - non-CO2 emissions; soil disturbance, fertilisation, biomass combustion
- Organisational and operational boundaries for the carbon inventory.
- The full range of organisational emission sources and methods used to select key emission factors for calculations and reports.

In forest applications a person must also be able to demonstrate knowledge of the following as they apply to preparing an enterprise carbon management report:

- above ground biomass
- below ground biomass
- dead organic matter - wood, litter
- soil organic matter

Assessment Conditions

The following resources must be made available:

- Computer, keyboard and software to prepare and maintain reports.
- Access to International and national conventions, protocols and standards:
- Kyoto Protocol
- ISO 14000 essentials:
 - ISO 14064-1 2006 Greenhouse gases -- Part 1: Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals
 - Greenhouse Gas Protocol Corporate Standard.
- Copenhagen Agreement
- Carbon inventory data for the organisation.
- Organisational formats and style guides for the presentation of reports.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPCOT6207 Develop forest management systems and processes

Modification History

Release	Comment
1	Replaces equivalent unit FPICOT6207A Develop forest management systems and processes which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Application

This unit describes the outcomes required to develop and implement systems for forestry management that meet the requirements for international treaties, conventions and initiatives; and commonwealth, state or territory law.

It applies to senior managers and can apply to a variety of work settings, such as native forests, plantations, agroforestry, farm forestry and operations of all sizes.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Common Technical

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Determine factors for inclusion in forest	1.1 Identify key requirements of relevant laws, international treaties, conventions and initiatives to confirm organisational

ELEMENTS	PERFORMANCE CRITERIA
management system	<p>compliance requirements.</p> <p>1.2 Quantify range and scope of organisational activities requiring compliance with laws, international treaties, conventions and initiatives.</p> <p>1.3 Monitor relevant information sources to identify and maintain knowledge of forest management issues.</p> <p>1.4 Measure and qualify strategic and operational factors impacting on organisational forest management processes.</p> <p>1.5 Identify strategic priorities and plan implementation to ensure compliance with laws, international treaties, conventions and initiatives.</p>
2. Establish forest management plans and system	<p>2.1 Direct and manage design of organisational forest management system.</p> <p>2.2 Develop criteria for implementing and maintaining systems for forest management.</p> <p>2.3 Develop methods for gathering and monitoring forest management information.</p> <p>2.4 Develop, circulate and maintain feedback systems supporting forest management processes.</p> <p>2.5 Develop processes for forest management; circulate and obtain sign-off from appropriate personnel.</p>
3. Implement forest management system	<p>3.1 Allocate material and equipment resources to implement systems in line with timelines and budget.</p> <p>3.2 Assign roles and responsibilities to appropriate personnel and provide information on expected outcomes.</p> <p>3.3 Coordinate training of personnel to ensure system and quality practices are incorporated into day-to-day work activities.</p> <p>3.4 Implement feedback methods for determining effectiveness of major elements of forest management system.</p> <p>3.5 Monitor system compliance of staff and contractors.</p>
4. Monitor and evaluate forest management system	<p>4.1 Monitor forest management systems regularly for compliance with laws, international treaties, conventions and initiatives.</p> <p>4.2 Evaluate information on forest condition and consider system improvements.</p> <p>4.3 Review reports to ensure compliance requirements are</p>

ELEMENTS	PERFORMANCE CRITERIA
	<p>consistently implemented and take corrective action as required.</p> <p>4.4 Discuss and analyse feedback for operational effectiveness of system.</p> <p>4.5 Make required changes to system based on consultation and analysis.</p>

Foundation Skills

<i>This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.</i>	
Numeracy skills to:	<ul style="list-style-type: none"> • Manage complex budgets for all system aspects.
Oral communication skills to:	<ul style="list-style-type: none"> • Hold high-level consultative discussions to generate feedback on systems and ideas for changes.
Reading skills to:	<ul style="list-style-type: none"> • Interpret highly complex and unfamiliar information within laws (or plain English equivalent documents), international treaties, conventions and initiatives.
Writing skills to:	<ul style="list-style-type: none"> • Develop system documents requiring the presentation of precise complex information, using simple language structures for use by wide audiences.
Planning and organising skills to:	<ul style="list-style-type: none"> • Source, collect and organise a range of data to inform system requirements. • Manage own timing and productivity to plan for and implement forest management systems.
Technology skills to:	<ul style="list-style-type: none"> • Use a computer, keyboard and software to create system documents.

Assessment Requirements for FWPCOT6207 Develop forest management systems and processes

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPICOT6207A Develop forest management systems and processes which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Complete a research project to determine and report on compliance requirements for a given organisation operating in a given forest location covering requirements for:
 - commonwealth, state or territory law
 - local government regulations
 - international treaties, conventions and initiatives.
- Develop a suite of systems and processes to maintain compliance with the identified requirements.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Objectives and key content of commonwealth, state or territory and local government laws and regulation relevant to forest management, including key areas of:
 - land ownership
 - boundary management
 - environmental management
 - access
 - silviculture
 - harvesting
 - forest protection

- Methods to access, locate and select applicable objectives and key content of international and national treaties, conventions and initiatives relevant to forest management, the following key references:
 - Australian Standard for Sustainable Forest Management AS4708 endorsed by PEFC
 - Forest Stewardship Council (FSC) Certification
- Factors to be considered in assessing forest management issues inherent to different types of forests.
- Forest management issues that impact on the organisation and its practices.
- Scope of forest operations and activities of the organisation, including:
 - operations in national parks
 - other operations on public land
 - operations on private land
 - timber growing and harvesting
 - fire management
- Strategic and operational factors impacting on organisational forest management processes and decision making, including:
 - fire management planning
 - flora and fauna planning
 - planning for environmental protection and monitoring
 - regulatory compliance issues
 - compliance with international treaties, conventions and initiatives
 - location and nature of sites
 - organisational policy and operational guidelines
 - public liabilities and exposure to risk
 - risk-management strategies and policies
- Financial and business administration principles relevant to organisational needs.

Assessment Conditions

The following resources must be made available:

- Computers, keyboards and software used to create system documents.
- Commonwealth, state or territory laws and local government regulations (or plain english documents issued by regulators) relevant to forest management.
- International treaties, conventions and initiatives relevant to forest management.
- Publications and journals relevant to forest management.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.
-

FWPFGM2207 Undertake brushcutting operations

Modification History

Release	Comment
1	Replaces equivalent unit FPIFGM2207B Undertake brushcutting operations, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to plan for and safely cut vegetation using a professional standard blade type brushcutter. Work is completed in a variety of work settings including forest environments, farms, nurseries and local council environments.

The unit applies to forestry worker, plantation forest officer, arboriculture worker.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for brushcutting	1.1 Review work order and where required check with appropriate personnel. 1.2 Select personal protective and other equipment and check for operational effectiveness.

ELEMENTS	PERFORMANCE CRITERIA
	<p>1.3 Identify and assess environmental conditions and site hazards in line with organisational procedures.</p> <p>1.4 Select appropriate cutting methods for identified types of vegetation and to optimise time and safety.</p>
2. Operate brushcutter	<p>2.1 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection practices.</p> <p>2.2 Use hand signals with other operators to maintain effective and safe operations.</p> <p>2.3 Adjust brushcutter safety harness and handles to correct ergonomic position.</p> <p>2.4 Monitor brushcutter for operational effectiveness and refuel as required.</p> <p>2.5 Operate brushcutter appropriate to site conditions and at a safe distance from other people present.</p> <p>2.6 Dispose of cut vegetation in line with environmental protection practices.</p>
3. Complete operator maintenance	<p>3.1 Follow organisational safety procedures to lock out equipment.</p> <p>3.2 Check brushcutter blades for bluntness or damage.</p> <p>3.3 Remove and replace brushcutter blades and other operator-replaceable components in line with manufacturer's recommendations.</p> <p>3.4 Dispose of used blades in line with environmental protection practices.</p> <p>3.5 Record and report equipment faults and maintenance requirements to appropriate personnel.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> • complete routine measurements of fuel volume.
Oral communication skills to:	<ul style="list-style-type: none"> • ask open and closed probe questions and actively listen to clarify contents of work orders.
Reading skills to:	<ul style="list-style-type: none"> • interpret: <ul style="list-style-type: none"> • workplace health and safety and other organisational

	procedures <ul style="list-style-type: none"> • work orders • manufacturers' instructions and maintenance recommendations.
Writing skills to:	<ul style="list-style-type: none"> • complete accurate basic records for equipment faults and maintenance requirements.
Planning and organising skills to:	<ul style="list-style-type: none"> • efficiently and logically sequence the stages of preparation and brushcutting activities using work order to guide activities.

Assessment Requirements for FWPFGM2207 Undertake brushcutting operations

Modification History

Release	Comment
Release 1	<p>Replaces equivalent unit FPIFGM2207B Undertake brushcutting operations, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- assess, plan and safely complete brushcutting jobs in line with work order prescribing areas and types of vegetation to be cut
- on completion of each of the above jobs:
 - dispose of cut vegetation in line with environmental protection practices
 - complete operator maintenance operator maintenance tasks including oil, fuel, safety checks, cleaning, lubricating, adjustments
 - complete basic records for equipment faults and maintenance requirements.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- typical workplace hazards associated with operating brushcutters and methods of minimising risks:
 - ground growth
 - ground slope
 - ground hazards
 - noise
 - weather
 - kickback

- flying objects
- safe working distances from other people present
- purpose, features and safe operation of brushcutters
- the correct ergonomic position in which to conduct brushcutter operations, including using a safety harness and handle adjustments
- methods for assessing blade condition, removing and replacing
- operator maintenance tasks including oil, fuel, safety checks, cleaning, lubricating, adjustments
- different types of vegetation and the appropriate brushcutting methods
- environmental protection practices for disposing of cut vegetation:
 - recycling vegetation where appropriate
 - sending vegetation to landfill only where it cannot be recycled
 - redirecting vegetation for energy recovery.
- organisational procedures specific to brushcutting operations:
- workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
- communication reporting lines
 - recording and reporting equipment faults and maintenance requirements.

Assessment Conditions

The following resources must be made available:

- brushcutters
- maintenance tools and equipment for removing and replacing blades
- consumable fuel, brushcutter blades and other components
- personal protective equipment suitable for operating brushcutters
- manufacturers' instructions for use and maintenance of equipment
- work order with specific instructions for brushcutting operations
- template documents for recording equipment faults and maintenance requirements
- relevant personnel for the purposes of communicating information
- organisational procedures for operating brushcutters.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPFGM3201 Manage seed collection

Modification History

Release	Comment
1	Replaces equivalent unit FPIFGM3201B Manage seed collection, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to plan and monitor the implementation of seed collection or sowing programs. The unit includes collection of native and non-native species.

The unit applies to those who manage seed collection in settings such as: forest environments, farms, agriculture, nurseries and local councils.

The unit applies to Forestry technician, Nursery technician, Supervisor (Forestry operations), Tree planter, Silviculturist, Arboriculture technician

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Plan seed collection	1.1 Analyse seeding and/or planting program and identify seed characteristic requirements.

	<p>1.2 Identify seed collection opportunities and determine a suitable area for seed collection.</p> <p>1.3 Select seed collection methods and determine the quantity, cost and impacts on provenances and species.</p> <p>1.4 Identify the required approvals and seek and obtain from relevant authorities.</p> <p>1.5 Determine measurable performance indicators, specifications and targets.</p> <p>1.6 Seed collection plan, costs and performance indicators are clearly documented and communicated to appropriate personnel.</p>
2. Implement and monitor seed collection	<p>2.1 Coordinate and schedule resources required for seed collection.</p> <p>2.2 Establish and maintain communication with others to ensure safety.</p> <p>2.3 Implement the seed collection plan.</p> <p>2.4 Monitor seed collection activities to ensure compliance requirements are adhered to.</p> <p>2.5 Adjust seed collection activities to meet site conditions and communicate to appropriate personnel.</p>
3. Review seed collection	<p>3.1 Assess and evaluate data from seed collection activity to confirm techniques, methodologies and costs are in line with plan.</p> <p>3.2 Identify issues and impediments to seed collection activities and program costs.</p> <p>3.3 Prepare a cost benefit analysis and make recommendations to improve future seed collecting activity.</p> <p>3.4 Record and report seed collection activity to appropriate personnel.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.	
Numeracy skills to:	<ul style="list-style-type: none"> calculate costs of seed collecting activity and simple cost benefit analysis
Oral communication skills to:	<ul style="list-style-type: none"> interact with land owners, and internal and external bodies and groups to gain approvals disseminate information about seed collecting activity to appropriate personnel.
Writing skills to:	<ul style="list-style-type: none"> prepare a seed collecting plan and report on seed collection

	activity.

Assessment Requirements for FWPFGM3201 Manage seed collection

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPIFGM3201B Manage seed collection, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

- A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:
- follow legal and regulatory requirements, and codes of practice for managing seed collection
- follow organisational policies and procedures for managing seed collection
- develop a plan for seed collection which includes measurable performance indicators, specifications and targets
- coordinate and schedule resources, and manage the work of others to achieve specific outcomes
- monitor seed collection operations, ensuring that activity follows quality standards
- document results from seed collection activities and prepare a report for relevant personnel.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- applicable regulations, standards, codes of practice and established safe practices for managing seed collection
- organisational and site standards, policies and procedures for managing seed collection
- environmental risks and hazards of seed collection
- seed collection methods including:
 - climbing

- removal of branches with rifle
- elevated platform vehicles
- collecting after falling or felling
- ladders
- shaking
- biological signs that indicate that the seed crop is ready to be collected
- procedures to extract and handle seed from collected material, including handling procedures of the seed crop after picking
- treatment and documentation requirements of extracted seed
- characteristics of seed including:
 - provenance
 - potential growth characteristics
 - forest types
 - optimum time to collect
 - physiology and biology
 - dormancy
 - species
- process for approvals to undertake seed collection
- established communication channels and protocols
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- seed collection site
- tools and equipment required to collect seed
- relevant personnel for the purposes of communicating information
- organisational requirements and standards for managing seed collection.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPFGM3202 Extract seed

Modification History

Release	Comment
1	Replaces equivalent unit FPIFGM3202B Extract seed, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to extract and process native or non-native seed using an extraction unit. It includes seed storage requirements and extraction unit maintenance.

The unit applies to those who extract seed in a variety of work settings, including forest environment settings such as farms, agriculture, workshops, domestic, nurseries and local councils.

The unit applies to Forestry technician, Nursery technician, Supervisor (Forestry operations), Tree planter, Silviculturist, Arboriculture technician

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for seed extraction	1.1 Review and clarify work order with appropriate personnel. 1.2 Receive and visually assess seed bearing material and ensure species is identified on container label.

	<p>1.3 Weigh and label containers with identifiers in line with site procedures.</p> <p>1.4 Store material in dry and well-ventilated conditions.</p>
2. Extract seed	<p>2.1 Plan and check seed extraction processes for safe working conditions</p> <p>2.2 Select appropriate extraction units and equipment and check for operational effectiveness.</p> <p>2.3 Operate and monitor seed extraction systems to extract maximum seed yield.</p> <p>2.4 Inspect seed capsules and reprocess as required to ensure maximum yield.</p>
3. Clean and store seed	<p>3.1 Weigh and store separated seed in line with species requirements and site procedures.</p> <p>3.2 Accurately record seed information.</p> <p>3.3 Package seed for storage with label to maintain traceability to collection source.</p>
4. Clean and maintain extraction unit	<p>4.1 Clean, maintain and calibrate extraction units and equipment.</p> <p>4.2 Dispose of residue and other waste material in line with site environmental management guidelines.</p> <p>4.3 Report abnormal operation or faults in equipment for corrective action.</p> <p>4.4 Clean and maintain work areas in line with site procedures, and organisational and environmental requirements.</p> <p>4.5 Record and report results of seed extraction process.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

- calibrate scales, ensuring compliance with weights and measure authority.
- correctly label seeds
- complete records, reports and maintenance logs.

Range of Conditions

Not Applicable

Unit Mapping Information

FPIFGM3202B Extract seed.

Assessment Requirements for FWPFGM3202 Extract seed

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPIFGM3202B Extract seed, which was first released with FPI11 Forest and Forest Products Training Package Version 1. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- apply safe and efficient techniques to identify, extract, clean and store seed in line with species requirements, work order and organisational guidelines
- operate seed extraction units and equipment including
 - kilns operated by gas, solar energy, oil or electricity
 - sieves of various sizes
 - air-drying racks and trays
 - conveyor belt
- clean, maintain and calibrate seed extraction units and equipment
- record seed species information and extraction results including
 - species name
 - weight
 - place or origin
 - container identifier.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- regulations, standards, codes of practice and established safe practices for extracting seed
- organisational and site standards, policies and procedures for extracting seed
- environmental protection requirements for extracting seed
- the cleaning maintenance and calibration of plant, tools and equipment
- hazards associated with seed extraction, processing and storage
- seed species, including native and non-native
- seed extraction processes
- identification of seed species from capsules
- storage procedures and requirements for different seed species
- procedures for recording and reporting workplace information.

Assessment Conditions

The following resources must be made available:

- manual or automated seed extraction equipment
- material with seed to be extracted
- relevant personnel for the purposes of communicating information
- documents, spreadsheets and commonly used proforma documents
- work order, workplace requirements and site standards for extracting seed.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPFGM3212 Fall trees manually (intermediate)

Modification History

Release	Comment
1	Replaces equivalent unit FPIFGM3212 Fall trees manually (intermediate), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to assess, plan and safely carry out manual tree-felling operations using a chainsaw.

This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and practical felling skills.

Persons competent in this unit should be able to effectively fell most trees except very large trees, and/or those with significant defects and/or characteristics that cause excessive complexity.

It applies to trees that have a diameter greater than the bar length of the chainsaw.

Trees typical to the scope of this unit may include the following characteristics:

- lean and weight distribution, which can be assessed and readily adapted to falling direction with the use of wedges and/or control with hinge-wood
- various dimensions relative to local forest size distribution
- limited visible damage or defect
- species prone to free splitting and adverse reactions during felling
- single or multi-stems
- diameter of tree greater than chainsaw bar length
- grown on terrain and slope that can add complexity to the operation

The unit applies to a non-production environment, including forest, rural and community environments.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction

Pre-requisite Unit

Nil

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for felling	<p>1.1 Identify and comply with applicable work health and safety (WHS), environmental, legislative and organisational requirements relevant to felling trees</p> <p>1.2 Identify and adhere to site environmental protection measures according to relevant legislation and regulations</p> <p>1.3 Review and check job requirements with appropriate personnel</p> <p>1.4 Sharpen and adjust chainsaw or change components according to manufacturer recommendations</p> <p>1.5 Assess tree and determine felling requirements</p> <p>1.6 Identify and control potential and existing risks and hazards in the work area</p> <p>1.7 Identify trees to be retained and felled</p> <p>1.8 Establish and maintain communication with others according to WHS requirements</p>
2. Visually assess site conditions and surroundings	<p>2.1 Review terrain and slope to determine if they add complexity to the operation</p> <p>2.2 Assess general factors affecting felling requirements and detect and control specific forest or site risks and hazards</p>
3. Assess tree and plan felling	<p>3.1 Visually assess tree for felling characteristics</p> <p>3.2 Confirm tree is safe to fell</p> <p>3.3 Select tools and equipment appropriate to work requirements and check for operational effectiveness according to manufacturer recommendations</p> <p>3.4 Identify trees to be felled for size, significant defects and any characteristics causing excessive complexity</p> <p>3.5 Assess and progressively plan tree-felling sequence for individual trees</p> <p>3.6 Assess and check required falling direction and possible deviation</p> <p>3.7 Plan sequence of cuts to fell tree according to standard felling</p>

	<p>procedures</p> <p>3.8 Assess limitations of own skills in safely felling trees, identify trees considered outside own skill level and seek assistance from appropriate personnel where required</p> <p>3.9 Monitor and exclude location and activity of other personnel on the work site</p>
4. Apply tree-felling techniques	<p>4.1 Select suitable escape route and clear of growth and other obstacles according to environmental care principles and statutory requirements</p> <p>4.2 Fell individual trees using planned techniques according to site requirements, at a safe distance from other personnel in the work area</p> <p>4.3 Adjust cutting technique in response to movement and condition of tree</p> <p>4.4 Use planned escape route when tree starts to fall and monitor the fall and movement of tree on ground until determined stable</p> <p>4.5 Delay movement back into the felling area until all tree material, including from adjacent tree crowns, has fallen</p> <p>4.6 Identify and implement procedures for removal of trees that are hung-up</p> <p>4.7 Dispose of waste materials in line with environmental and operational requirements</p> <p>4.8 Detect, rectify and report blunt or damaged saw chain according to workplace procedures</p> <p>4.9 Monitor chainsaw for operational effectiveness and record and report faults, malfunctions and problems according to workplace procedures</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> measure and record tree height, length and diameter estimate, measure and compare height, size and distance relevant to tree felling calculate product mass of individual trees and determine fall zone

Assessment Requirements for FWPFGM3212 Fall trees manually (intermediate)

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPIFGM3212 Fall trees manually (intermediate), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- comply with applicable federal, state or territory legislative and regulatory requirements and codes of practice including WHS, environmental and organisational policies and procedures relevant to felling trees at an intermediate level
- comply with organisational policies and procedures relevant to felling trees manually at an intermediate level
- comply with applicable licensing and certification requirements relevant to felling trees at an intermediate level
- effectively communicate and use safe working practices, including maintaining an awareness of other personnel activity in the work area
- assess site conditions, by applying environmental protection measures, detecting hazards and own skill level for felling trees at an intermediate level
- conduct a tree assessment
- identify structural defects and stresses in trees and the impact on felling, including exclusion of trees from hand felling due to hazardous and difficult situations for assessment, monitoring and safe falling including a crown that contains dead or broken material, entanglement or malformation
- plan a felling sequence for individual trees and preparing surroundings including escape route
- fell intermediate trees using appropriate cuts safely without damage to personnel, equipment and surrounding environment
- identify trees that are hung up

- select, prepare and maintain chainsaw equipment including recognising faults, problems and malfunctions
- assess, plan and safely operate chainsaw equipment to manually fell trees at an intermediate level in forest, rural and community environments
- use tree felling techniques including scarf cutting , back cutting to provide hinge-wood and the use of wedges to assist in controlling falling direction
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Workplace health and safety (WHS) requirements including:
 - PPE and clothing
 - safety equipment
 - first aid equipment
 - firefighting equipment
 - hazard and risk control procedures
 - fatigue management procedures
 - appropriate signage
 - elimination of hazardous materials and substances procedures
 - safe forest practices, including required actions relating to fire
 - techniques for manual handling, including shifting, lifting and carrying
 - types and purposes of cuts to fell trees, including scarf cutting and back cutting to provide hinge-wood and maintain control of tree
- typical tree defects and how these affect tree felling activities:
 - shakes
 - insect defects
 - knots and resin pockets
 - pipe
 - drysides
- Identifying trees:
 - that contain hazards and are deemed unsafe to fell
 - considered outside own skill level
 - trees where cuts made may lead to loss of control of tree in felling
- hazards and related risks and the impact on felling trees of:
 - uneven and unstable terrain
 - unsafe trees
 - fires
 - overhead and underground services
 - excavations

- traffic
- structures
- hazardous materials
- insects and animals
- other personnel and machinery
- methods used to remove trees that are hung up and procedures for removal
- methods for assessing chain condition
- environmental protection measures to follow when felling trees related to:
 - native vegetation
 - soil and water
 - heritage and archeological artefacts
 - flora and fauna
 - geomorphologic features
 - landscape
 - external site pollution
 - recreational opportunities
 - regeneration opportunities
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber and other waste
- key features of these varying environmental conditions and their effects on intermediate tree felling activities:
 - general forest lean
 - ground growth
 - ground hazards and obstacles
 - ground slope
 - gullies
 - presence and density of seed and habitat trees
 - water courses
 - wet and adverse weather conditions
 - wind speed and direction
- the use of types of tools and equipment for felling trees manually, and the procedures for their safe use, operation and maintenance including:
 - warning signs
 - chainsaw and components
 - PPE and clothing
 - first aid equipment
 - maintenance requirements
 - support tools
 -

Assessment Conditions

The following resources must be made available:

- workplace location or simulated workplace of a forest environment with trees typical to the scope of this unit
- relevant personnel for the purposes of communicating information
- PPE and clothing including:
 - Safety helmet
 - Safety gloves
 - Protective footwear
 - Eye protection
 - Hearing protection
 - High visibility clothing
 - Leg protection (trousers or chaps)
- materials and equipment including:
 - warning signs
 - chainsaw and components
 - first aid equipment
 - maintenance tools and equipment
 - support tools
 - manufacturers' instructions for use and maintenance of equipment
 - radio or communication device
 - fire fighting equipment (if prescribed)
- specifications and work instructions, including
 - information and instructions relevant to tree-felling operations, including processing location details and trees to be felled and retained
 - policy and procedures for work health and safety (WHS)
 - risk assessment plan
 - general and specific environmental requirements
 - applicable state or territory logging code of practice
 - emergency and evacuation procedures
 - fire protocols

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPFGM3213 Fall trees manually (advanced)

Modification History

Release	Comment
1	Replaces equivalent unit FPIFGM3213 Fall trees manually (advanced), which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to assess, plan and safely carry out manual tree-felling operations using a chainsaw.

This unit covers the felling procedures for trees with a level of complexity that requires significant tree assessment and advanced practical felling skills.

Persons competent in this unit should be able to effectively fell trees of any size, species and condition, including those with significant defects and characteristics that cause excessive felling complexity, that are deemed safe to fell.

Trees typical to the scope of this unit may include the following characteristics:

- lean and weight distribution that adds significant complexity yet can be assessed and adapted to site requirements
- larger dimensions relative to local forest size distribution
- substantial lean
- damage or defect that requires complex felling techniques
- multi-legged, hollow butts, culls and stags
- species prone to free splitting and adverse reactions during felling
- single or complex multi-stems
- diameter of tree greater than chainsaw bar length
- grown on terrain and slope that can add significant complexity to the operation

The unit applies to a non-production environment, including forest, rural and community environments.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction

FWPFGM6203 Manage sustainable tree inventory

Modification History

Release	Comment
1	Replaces superseded equivalent FPIFGM6203 Manage sustainable tree inventory which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.

Application

This unit of competency describes the outcomes required to develop a tree inventory plan to manage an inventory of forestry timber assets. The unit applies to those people who manage forests for enterprises but may also apply to people who have responsibility for sustainable tree management in urban or rural enterprises.

The unit applies to job roles including Forest Auditor, Forest Planner, Environmental Manager, Environmental Planner Forest Sustainability Manager And Sustainability Manager.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Forest Growing and Management

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Conduct risk assessment	1.1 Research and analyse sustainable tree management

ELEMENTS	PERFORMANCE CRITERIA
for managing tree inventory	<p>requirements.</p> <p>1.2 Identify resources and site characteristics.</p> <p>1.3 Research and assess external influences on tree inventory.</p> <p>1.4 Identify risks and potential outcomes related to identified resources and site characteristics and document risk management strategy.</p>
2. Obtain approvals for development of tree inventory plan	<p>2.1 Consult stakeholders and obtain support for development of tree inventory plan and management approach.</p> <p>2.2 Obtain approval for identified inventory plan and management approach.</p>
3. Prepare tree inventory plan for sustainable forest management	<p>3.1 Identify administrative tools, physical resources and recording methodology.</p> <p>3.2 Identify forest estate and associated management requirements.</p> <p>3.3 Forecast required human and financial resources to manage inventory.</p> <p>3.4 Establish quality assurance practices for collecting, documenting and verifying data.</p> <p>3.5 Clearly document plan and communicate to appropriate personnel.</p>
4. Manage the implementation of tree inventory plan	<p>4.1 Explain inventory plan requirements and responsibilities to participating stakeholders.</p> <p>4.2 Provide stakeholder support to ensure quality outcomes and objectives are met.</p> <p>4.3 Monitor finances and resources and maintain record keeping systems.</p> <p>4.4 Monitor risks and implement contingency management processes.</p>
5. Evaluate tree inventory plan	<p>5.1 Collect, analyse and store data about tree inventory in line with organisational procedures.</p> <p>5.2 Identify and investigate variations in tree inventory outcomes and objectives.</p> <p>5.3 Consult appropriate stakeholders on variation between desired results and actual outcomes.</p> <p>5.4 Evaluate outcomes and processes against tree inventory plan.</p>

ELEMENTS	PERFORMANCE CRITERIA
	5.5 Prepare recommendations for future plans based on consultation and analysis.

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> Analyse complex numerical data involving areas, ratios, percentages, volumes, lengths and diameters.
Oral communication skills to:	<ul style="list-style-type: none"> Hold high-level consultative discussions to generate ideas for and negotiate content of tree inventory plans.
Reading skills to:	<ul style="list-style-type: none"> Interpret complex information in a range of source documents to research and develop tree inventory plans.
Writing skills to:	<ul style="list-style-type: none"> Develop and document comprehensive tree inventory plans. Report on effectiveness of inventory management approach and potential improvements including rationale for recommendations.
Planning and organising skills to:	<ul style="list-style-type: none"> Source, collect and organise a range of data to inform plan content. Plan and manage own timing and productivity to plan, implement and evaluate management of tree inventory.
Technology skills to:	<ul style="list-style-type: none"> Use a computer, keyboard and software to prepare plans and reports.

Assessment Requirements for FWPFGM6203 Manage sustainable tree inventory

Modification History

Release	Comment
1	<p>Replaces superseded equivalent FPIFGM6203 Manage sustainable tree inventory which was first released with FPI11 Forest and Forest Products Training Package Version 2.2.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including 'Required Skills and Knowledge, Evidence Guide and Range Statement'.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit, and must be able to provide evidence that they can:

- Develop a comprehensive written plan to manage sustainability tree inventory for a given site.
- Incorporate these inclusions in the plan:
 - risk management strategy to manage and minimise risks
 - quality assurance practices for collecting, documenting and verifying data
 - required data collection and administrative tools
 - required human resources and responsibilities
 - data recording methodology
 - recording and reporting procedures.
- For a specified period, analyse data and record and report on the following types of outcomes:
 - established growth rates
 - established volumes
 - forecasted outputs
 - forecasted sustainability
 - monitored sustainability
 - preserved forest sustainability.
- Evaluate the effectiveness of the tree inventory plan and complete a report including recommendations for improving future plans and tree management approach.

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- Role of wood or waste products in generating renewable energy through biomass.
- Behavioural characteristics of a range of tree species.
- Silvicultural practices associated with management objectives.
- Key sustainability indicators for tree management.
- Key content and application of mensuration theory.
- Risks involved managing a sustainable tree inventory and methods used to minimise impacts, including:
 - biological
 - pests and diseases
 - weather and climate change
 - economic risk
 - erosion
 - fire
 - market failure
 - natural disaster
 - sabotage
 - water
 - structural failure.
- External influences and how they impact on managing a sustainable tree inventory, including:
 - international and Australian forestry and environmental standards
 - state, territory and local laws
 - advisory standards and codes of practice
 - land tenure and access
 - neighbouring tenure and access
 - habitat
 - cultural and heritage sites
 - agriforestry arrangements
 - fire management
 - data availability
 - human resource skills and availability.
- Purpose, features and application of inventory management tools, including:
 - measuring or diameter tapes
 - dataloggers and laptops
 - log sheets
 - compass
 - clinometer
 - height sticks

- prisms
- mobile GPS
- maps
- survey and title data
- survey equipment
- gantt charts
- flow charts.
- Key features and benefits of different recording methodologies, including:
 - dataloggers
 - log sheets
 - manual or electronic data transfer
 - analytical techniques and formulae
 - radio, UV, laser advanced technology
 - digital dataloggers and laptop computers
 - desk or field surveys
 - testing and calibration records.
- Organisational procedures specific to managing sustainable tree inventory:
 - communication reporting lines
 - database management and document control.

Assessment Conditions

The following resources must be made available:

- Computers, keyboards, printers and software used to document plans and reports.
- Administrative tools and equipment for managing sustainable tree inventory:
 - filing systems
 - field templates
 - operational manual
 - land access information
 - gantt charts
 - flow charts.
- Documents and commonly used proformas used to document risk management strategies and tree inventory plans.
- Organisational procedures for managing sustainable tree inventory.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- Hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence.

FWPHAR2206 Operate a mobile chipper/mulcher

Modification History

Release	Comment
1	Replaces equivalent unit FPIHAR2206B Operate a mobile chipper/mulcher, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.

Application

This unit of competency describes the outcomes required to operate a mobile chipping or mulching unit to chip or mulch timber refuse such as branches and other timber waste left after felling operations. Work is completed in a forest or forest farm setting.

The unit applies to those who operate a mobile chipping or mulching unit in a forest environment.

No licensing, legislative, regulatory, or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Harvesting and Haulage

Elements and Performance Criteria

<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions.</i>
1. Prepare for mobile chipping or mulching.	1.1 Review work order and where required check with appropriate personnel. 1.2 Select appropriate personal protective and other equipment and check for operational effectiveness. 1.3 Identify type and quantity of timber refuse to be chipped or

	<p>mulched.</p> <p>1.4 Plan chipping or mulching activities in line with work order.</p>
2. Chip or mulch timber refuse	<p>2.1 Reject timber refuse assessed as unsuitable for chipping or mulching and dispose of or recycle in line with environmental protection practices.</p> <p>2.2 Use equipment in line with organisational safety procedures, manufacturer's instructions and environmental protection requirements.</p> <p>2.3 Position, secure and set up chipping and mulching unit in line with manufacturer's specifications and required size.</p> <p>2.4 Direct timber refuse into chipper or mulcher at rate applicable to machine capacity.</p> <p>2.5 Chip timber refuse to chip sizes specified in work order.</p> <p>2.6 Respond to critical situations requiring emergency shutdown to prevent personal injury or damage to machine or product.</p>
3. Complete operator maintenance.	<p>3.1 Follow organisational safety procedures to lock out equipment.</p> <p>3.2 Check cutters for wear and damage at appropriate or recommended intervals.</p> <p>3.3 Remove, replace and dispose of cutters in line with manufacturer's recommendations, site procedures and environmental protection practices.</p> <p>3.4 Complete operator maintenance tasks in line with manufacturer's recommendations and site procedures.</p> <p>3.5 Record and report production outcomes and equipment faults to appropriate personnel.</p>

Foundation Skills

This section describes those core and employment skills that are essential to performance and are not explicit in the performance criteria.

Numeracy skills to:	<ul style="list-style-type: none"> identify quantities of required material within work orders read basic numerical machine settings and choose according to chip size complete routine production records involving quantities tallied against orders.
Oral communication skills to:	<ul style="list-style-type: none"> ask questions and actively listen to clarify contents of work orders.

Reading skills to:	<ul style="list-style-type: none"> interpret workplace health and safety and other organisational procedures work orders manufacturers' instructions and maintenance recommendations.
Writing skills to:	<ul style="list-style-type: none"> complete accurate basic records for production outcomes and equipment faults.
Planning and organising skills to:	<ul style="list-style-type: none"> efficiently and logically sequence the stages of preparation and processing activities using work order to guide activities.

Range of Conditions

Not Applicable

Assessment Requirements for FWPHAR2206 Operate a mobile chipper/mulcher

Modification History

Release	Comment
1	<p>Replaces equivalent unit FPIHAR2206B Operate a mobile chipper/mulcher, which was first released with FPI11 Forest and Forest Products Training Package Version 2.2. This is the first release of this unit in the new standards format.</p> <p>Assessment requirements now specify the performance and knowledge evidence, as well as assessment conditions for this unit of competency. These sections simplify and replace components used in the previous unit format, including Required Skills and Knowledge, Evidence Guide and Range Statement.</p>

Performance Evidence

A person demonstrating competency in this unit must satisfy all of the elements, performance criteria and foundation skills of this unit. If a specific volume or frequency is not stated below, then evidence must be provided that the following requirements have been performed on at least one occasion:

- complete chipping and mulching jobs in line with individual work orders which prescribe different quantities of timber refuse and different chip sizes
- complete operator maintenance, including fuelling, safety checks, cleaning, lubricating, operational adjustments, cutter inspection, removal, disposal and replacement to manufacturer recommendations and site procedures.
-

Knowledge Evidence

A person competent in this unit must be able to demonstrate knowledge of:

- environmental protection practices for forest and forest farm settings:
 - reducing water and energy use
 - cleaning plant, tools and equipment
 - disposing of, recycling and reusing timber
- types of timber refuse suitable and unsuitable for chipping and mulching
- purpose, features and operation of mobile chipping and mulching units
- capacity of chippers and mulchers to cope with differing sizes and diameters of branch
- feed rates at which waste is fed into chippers and mulchers to optimise output without damaging or blocking machinery
- methods for checking cutting blade condition

- operator maintenance procedures including for fuelling, safety checks, cleaning, lubricating, operational adjustments, cutter inspection, removal, disposal and replacement
- common hazards associated with chipping and mulching operations and methods to minimise associated risks
- organisational procedures specific to chipping and mulching timber refuse:
 - workplace health and safety with particular emphasis on equipment lock out and use of personal protective equipment
 - communication reporting lines
 - recording and reporting production outcomes and equipment faults.
 -

Assessment Conditions

The following resources must be made available:

- mobile chipping and mulching units feeding into a truck or other form of transportation:
 - truck mounted
 - trailer mounted
- tools and consumables for operator maintenance
- tools and equipment for removing and replacing cutters
- consumable cutters
- personal protective equipment suitable for chipping and mulching timber refuse
- timber refuse for processing
- manufacturers':
 - instructions for equipment use
 - recommendations for operator maintenance
- work order with specific instructions for chipping or mulching timber refuse
- template documents for recording production outcomes and equipment faults
- relevant personnel for the purposes of communicating information
- organisational procedures for chipping and mulching timber refuse.

Competency is to be assessed in the workplace or a simulated environment that accurately reflects performance in a real workplace setting.

Assessor requirements

Assessors must:

- hold the appropriate assessor competency standards as outlined in regulations; and
- be able to demonstrate vocational competencies at least to the level being assessed; and
- be able to demonstrate how they are continuing to develop their VET knowledge and skills as well as maintaining their industry currency and assessor competence
-

HLTAID001 Provide cardiopulmonary resuscitation

Modification History

Release	Notes
Release 5	Updated: <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Updated mapping information. Equivalent outcome.
Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria. Revised evidence requirements, including volume and frequency of assessment.

Application

This unit describes the skills and knowledge required to perform cardiopulmonary resuscitation (CPR) in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide CPR, in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and minimise immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for CPR
- 1.4 Seek assistance from emergency response services

2. Perform CPR procedures

- 2.1 Perform cardiopulmonary resuscitation in accordance with ARC guidelines
- 2.2 Display respectful behaviour towards casualty
- 2.3 Operate automated external defibrillator (AED) according to manufacturer's instructions

3. Communicate details of the incident

- 3.1 Accurately convey incident details to emergency response services
- 3.2 Report details of incident to workplace supervisor as appropriate
- 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAID001 Provide cardiopulmonary resuscitation

Modification History

Release	Notes
Release 5	<p>Updated:</p> <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards <p>Equivalent outcome.</p>
Release 4	<p>Updated mapping information. Changes to assessment requirements. Equivalent outcome.</p>
Release 3	<p>Updated mapping information. Equivalent outcome.</p>
Release 2	<p>Updated mapping information. Equivalent outcome.</p>
Release 1	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria.</p> <p>Revised evidence requirements, including volume and frequency of assessment.</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
 - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an automated external defibrillator (AED)
- Responded to at least one simulated first aid scenario contextualised to the candidate's workplace/community setting, including:
 - demonstrated safe manual handling techniques
 - provided an accurate verbal or written report of the incident

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
 - ARC Guidelines relevant to the provision of CPR
 - safe work practices to minimise risks and potential hazards
 - infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- Legal, workplace and community considerations, including:
 - awareness of potential need for stress-management techniques and available support following an emergency situation
 - duty of care requirements
 - respectful behaviour towards a casualty
 - own skills and limitations
 - consent
 - privacy and confidentiality requirements
 - importance of debriefing
- Considerations when providing CPR, including:
 - airway obstruction due to body position
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - chain of survival
 - standard precautions
- Basic anatomy and physiology relating to:
 - how to recognise a person is not breathing normally
 - chest

- response/consciousness
- upper airway and effect of positional change

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- AED training device
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor Requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
 - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least one simulated first aid scenario contextualised to the candidate's workplace/community setting, including:
 - demonstrated safe manual handling techniques
 - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
 - allergic reaction
 - anaphylaxis
 - bleeding control
 - choking and airway obstruction
 - respiratory distress, including asthma
 - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
 - ARC Guidelines relevant to provision of CPR and first aid
 - safe work practices to minimise risks and potential hazards
 - Infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations, including:
 - awareness of potential need for stress-management techniques and available support following an emergency situation
 - duty of care requirements
 - respectful behaviour towards a casualty
 - own skills and limitations
 - consent
 - privacy and confidentiality requirements
 - importance of debriefing
- considerations when providing basic emergency life support, including:
 - airway obstruction due to body position

- appropriate duration and cessation of CPR
- appropriate use of an AED
- chain of survival
- standard precautions
- principles and procedures for first aid management of the following scenarios:
 - allergic reaction
 - anaphylaxis
 - bleeding control
 - cardiac conditions, including chest pain
 - choking and airway obstruction
 - respiratory distress, including asthma
 - shock
 - stroke
- basic anatomy and physiology relating to:
 - considerations in provision of first aid for specified conditions
 - chest
 - how to recognise a person is not breathing normally
 - response/consciousness
 - upper airway and effect of positional change

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandage
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressing

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for first aid response
- 1.4 Assess the situation and seek assistance from emergency response services

2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

3. Communicate details of the incident

- 3.1 Accurately convey incident details to emergency response services
- 3.2 Report details of incident to workplace supervisor as appropriate
- 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

ELEMENT**PERFORMANCE CRITERIA**

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

4. Evaluate the incident and own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Performance Evidence

e candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

- performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
 - conducted a visual and verbal assessment of the casualty
 - demonstrated safe manual handling techniques
 - post-incident debrief and evaluation
 - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
 - allergic reaction
 - anaphylaxis
 - bleeding control
 - choking and airway obstruction
 - envenomation, using pressure immobilisation
 - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
 - respiratory distress, including asthma
 - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
 - ARC Guidelines relevant to provision of CPR and first aid
 - safe work practices to minimise risks and potential hazards
 - infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
 - awareness of potential need for stress-management techniques and available support following an emergency situation
 - duty of care requirements

- respectful behaviour towards a casualty
- own skills and limitations
- consent
- privacy and confidentiality requirements
- importance of debriefing
- considerations when providing first aid including:
 - airway obstruction due to body position
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - chain of survival
 - standard precautions
 - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
 - abdominal injuries
 - allergic reaction
 - anaphylaxis
 - basic care of a wound
 - bleeding control
 - burns
 - cardiac conditions, including chest pain
 - choking and airway obstruction
 - crush injuries
 - diabetes
 - dislocations
 - drowning
 - envenomation
 - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
 - eye and ear injuries
 - fractures
 - febrile convulsions
 - head, neck and spinal injuries
 - minor skin injuries
 - needle stick injuries
 - poisoning and toxic substances
 - respiratory distress, including asthma
 - seizures, including epilepsy
 - shock
 - soft tissue injuries, including strains and, sprains
 - stroke

- unconsciousness
- basic anatomy and physiology relating to:
 - how to recognise a person is not breathing normally
 - chest
 - response/consciousness
 - upper airway and effect of positional change
 - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Application

This unit describes the skills and knowledge required to provide first aid response and emergency life support to a casualty in a remote and/or isolated situation.

The unit applies to workers who may be required to prepare for and provide a first aid response in locations beyond the reach of timely medical assistance.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Respond to a remote emergency situation

- 1.1 Plan for isolated travel or work if required, accounting for expected contingencies
- 1.2 Recognise an emergency situation
- 1.3 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.4 Assess the casualty and recognise the need for first aid response
- 1.5 Assess the situation and evaluate options for medical assistance
- 1.6 Evaluate options for transporting casualty or waiting for medical assistance in relation to environmental issues, risks, transport availability and casualty condition

2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

3. Manage the incident

- 3.1 Seek assistance from others present to manage incident circumstances
- 3.2 Establish communication links with emergency response services and convey incident details
- 3.3 Report details of casualty condition, changes in

ELEMENT

Elements define the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

condition, management and responses

3.4 Assist in the evacuation of the casualty by following directions given by emergency response services as required

3.5 Maintain confidentiality of records and information in line with statutory and/or organisational policies

4. Evaluate the incident and own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit

Assessment Requirements for HLTAID005 Provide first aid in remote situations

Modification History

Release	Comments
Release 5	<p>Updated:</p> <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards <p>Equivalent outcome.</p>
Release 4	<p>Updated mapping information. Changes to assessment requirements. Equivalent outcome.</p>
Release 3	<p>Updated mapping information. Equivalent outcome.</p>
Release 2	<p>Minor changes to formatting to improve readability.</p>
Release 1	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the New Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit.</p> <p>New evidence requirements for assessment, including use of contextualised remote scenarios.</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
 - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least three simulated first aid scenarios contextualised to the candidate's remote and/or isolated situation:
 - demonstrated safe manual handling techniques
 - conducted a visual and verbal secondary survey assessment of the casualty
 - assessed vital signs, including respirations, pulse and temperature
 - post-incident debrief and evaluation
 - provided an accurate verbal and written report of the incident
- Applied first aid response in a remote situation for the following:
 - allergic reaction
 - anaphylaxis
 - basic care of a wound
 - bleeding control
 - choking and airway obstruction
 - envenomation, using pressure immobilisation
 - environmental impacts, including hypothermia, hyperthermia, dehydration and heat stroke
 - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
 - head, neck and spinal injuries, using immobilisation principles
 - respiratory distress, including asthma
 - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
 - ARC guidelines relevant to provision of CPR and first aid
 - safe work practices to minimise risks and potential hazards
 - infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:

- awareness of potential need for stress-management techniques and available support following an emergency situation
- duty of care requirements
- respectful behaviour towards a casualty
- own skills and limitations
- consent
- privacy and confidentiality requirements
- importance of debriefing
- considerations when providing first aid, including:
 - airway obstruction due to body position
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - chain of survival
 - standard precautions
 - how to conduct a visual and verbal secondary survey assessment
 - assessment and interpretation of vital signs, including respirations, temperature and pulse
- principles and procedures for first aid management of the following scenarios, contextualised to the candidate's remote and/or isolated situation:
 - abdominal injuries
 - allergic reaction
 - anaphylaxis
 - basic care of a wound
 - bleeding control
 - burns
 - cardiac conditions, including chest pain
 - choking and airway obstruction
 - crush injuries
 - diabetes
 - dislocations
 - drowning
 - envenomation
 - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
 - eye and ear injuries
 - febrile convulsions
 - fractures
 - head, neck and spinal injuries
 - minor skin injuries
 - needle stick injuries

- poisoning and toxic substances
- respiratory distress, including asthma
- seizures, including epilepsy
- shock
- soft tissue injuries, including sprains and strains
- stroke
- unconsciousness
- remote considerations in the provision of first aid, including:
 - typical hazards and strategies for preparing supplies to address contingencies
 - management options relating to transporting casualty, including aero-medical evacuation
 - how to identify and prepare areas for safe evacuation, including aero-medical evacuation
 - how and when to access emergency response services
 - communication systems, equipment and methods available in remote situations
 - priorities of management in first aid when dealing with life-threatening conditions
 - specific considerations contextualised to alpine, desert, marine, rural/remote settings and tropical environments
- basic anatomy and physiology relating to:
 - how to recognise a person is not breathing normally
 - chest
 - response/consciousness
 - upper airway and effect of positional change
 - considerations in provision of first aid for specified conditions, including specific considerations for remote settings

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

- Assessment resources must include:
 - adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
 - adrenaline auto-injector training device
 - AED training device
 - placebo bronchodilator and spacer device
 - roller bandages
 - thermometer
 - triangular bandages
 - workplace First Aid kit suitable for remote locations

- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTWHS001 Participate in workplace health and safety

Modification History

Release	Comments
Release 3	<p>Updated:</p> <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards <p>Equivalent outcome.</p>
Release 2	<p>Minor corrections to formatting to improve readability. Equivalent competency outcome.</p>
Release 1	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Updated to incorporate content of unit HLTWHS200A. Revised scope of unit to reflect requirements of workers. New evidence requirements for assessment.</p>

Application

This unit describes the skills and knowledge required for workers to participate in safe work practices to ensure their own health and safety, and that of others.

The unit applies to all workers who require knowledge of workplace health and safety (WHS) to carry out their own work, either under direct supervision or with some individual responsibility.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Follow safe work practices

1.1 Follow workplace policies and procedures for safe work practices

1.2 Identify existing and potential hazards in the workplace, report them to designated persons, and record them according to workplace procedures

1.3 Follow workplace emergency procedures

2. Implement safe work practices

2.1 Identify and implement WHS procedures and work instructions

2.2 Identify and report incidents and injuries to designated persons according to workplace procedures

2.3 Take actions to maintain safe housekeeping practices in own work area

3. Contribute to safe work practices in the workplace

3.1 Raise WHS issues with designated persons according to organisational procedures

3.2 Participate in workplace safety meetings, inspections and consultative activities

3.3 Contribute to the development and implementation of safe workplace policies and procedures in own work area

4. Reflect on own safe work practices

4.1 Identify ways to maintain currency of safe work practices in regards to workplace systems, equipment and processes in own work area

4.2 Reflect on own levels of stress and fatigue, and report to designated persons according to workplace procedures

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

- *Reading* – in order to accurately read and interpret workplace safety policies and

procedures including safety signs, dangerous goods classifications and safety instructions

The remaining foundation skills essential to performance are explicit in the performance criteria of this unit

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTWHS001 Participate in workplace health and safety

Modification History

Release	Comments
Release 3	Updated: <ul style="list-style-type: none">• assessor requirements statement• foundation skills lead in statement• licensing statement• modification history to reflect 2012 standards Equivalent outcome.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Updated to incorporate content of unit HLTWHS200A. Revised scope of unit to reflect requirements of workers. New evidence requirements for assessment.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be demonstrated evidence that the candidate has completed the following tasks at least once in line with state/territory WHS regulations, relevant codes of practice and workplace procedures:

- contributed to a WHS meeting or inspection in workplace
- conducted a workplace risk assessment and recorded the results
- consistently applied workplace safety procedures in the day-to-day work activities required by the job role
- followed workplace procedures for reporting hazards
- followed workplace procedures for a simulated emergency situation.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- state/territory legislation and how it impacts on workplace regulations, codes of practice and industry standards, including:
 - state/territory WHS authorities
 - rights and responsibilities of employers and workers, including duty of care
 - hazardous manual tasks
 - infection control
- safety signs and their meanings, including signs for:
 - dangerous goods classifications
 - emergency equipment
 - personal protective equipment (PPE)
 - specific hazards such as sharps, radiation
- hazard identification, including:
 - definition of a hazard
 - common workplace hazards relevant to the industry setting
 - workplace procedures for hazard identification
- workplace emergency procedures
- workplace policies and procedures for WHS

Assessment Conditions

Skills must be demonstrated:

- in the workplace

OR

- in an environment that provides realistic in-depth industry validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment must ensure use of:

- current workplace policies and procedures for WHS
- PPE relevant to the workplace and job role of the worker

In addition, assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

LGACOM404B Establish cooperative arrangements with other organisations

Modification History

LGACOM404B Release 1: Primary release.

Unit Descriptor

The unit covers identifying, developing, implementing and monitoring cooperative arrangements with other organisations in an effort to improve services provided to the community. The unit is appropriate for staff working in areas of council where community and business development are a major focus.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<p>1. Identify opportunities for cooperative arrangements</p>	<p>1.1. Opportunities for <i>cooperative arrangements</i> are identified through consultation with <i>other organisations</i>.</p> <p>1.2. Opportunities identified are analysed to ensure they will provide an increased level, or at least an equivalent level, of service to the community.</p>
<p>2. Develop and implement cooperative policies and projects with other organisations</p>	<p>2.1. Cooperative policies are agreed upon by all participating organisations and disseminated to all involved staff.</p> <p>2.2. Project objectives and <i>performance indicators</i> are determined and plans are drawn up to facilitate the smooth implementation and conduct of collaborative projects.</p> <p>2.3. Implementation methods are organised and agreed actions and work programs are allocated to relevant staff.</p> <p>2.4. Communications strategies are put in place to enable efficient and coherent implementation and conduct.</p> <p>2.5. Resources are identified and accessed in the most cost-effective manner.</p> <p>2.6. Communities are informed of the changes and benefits in service delivery due to the new collaborative arrangements.</p>
<p>3. Monitor and evaluate the effectiveness of the collaborative venture</p>	<p>3.1. Project progress is evaluated with reference to planned time lines and performance criteria at predetermined intervals to assess effectiveness for council and community.</p> <p>3.2. Project is reviewed and project plan and resource allocations are revised when necessary.</p> <p>3.3. Information gathered from project evaluation is used to provide input to continuous improvement and planning processes.</p> <p>3.4. Problems or contingencies that arise are managed and resolved professionally and promptly in conjunction with relevant personnel.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- negotiation with a range of personnel and other agencies
- research and evaluation, including cost-benefit analysis
- written and verbal communication with public and council personnel affected by implementation
- strategic and business planning
- planning and organisational
- time management
- ability to work as part of a team particularly with people from diverse backgrounds
- problem solving
- using appropriate software and technology

Required Knowledge

- relevant council policies and procedures
- sustainable practices
- council operations
- council goals, objectives and strategies
- other organisations potentially interested in cooperative arrangements

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- establish cooperative arrangements with other organisations on behalf of council that create measurable benefits to the organisation, incorporate effective evaluation mechanisms and support corporate direction and strategies
- communicate cooperative arrangements and their benefit effectively throughout the organisation.

Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables depending on council work flow and planning cycle as long as the critical aspects of evidence can be demonstrated.
Resource implications	Access to organisations with whom cooperative arrangements are to be developed or to simulated case studies.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<i>Cooperative arrangements</i> may include:	<ul style="list-style-type: none"> • joint funding for projects • shared promotional resources • joint ventures to build or construct community facilities • sponsorship arrangements
<i>Other organisations</i> may include:	<ul style="list-style-type: none"> • other councils within the region, state or nation • regional organisations of councils • state or commonwealth agencies • private or business enterprises • community groups
<i>Performance indicators</i> may include:	<ul style="list-style-type: none"> • increases in revenue • customer satisfaction reports • increases in service usage

- increased tourism to the region or municipality

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Devise consultation strategies	<p>1.1. A range of consultation strategies is identified and assessed for suitability.</p> <p>1.2. <i>Interested and affected parties</i> are identified.</p> <p>1.3. <i>Resources</i> required to conduct consultation are assessed.</p> <p>1.4. <i>Consultation strategies</i> are chosen that <i>enable and encourage relevant groups</i> or individuals to be involved.</p> <p>1.5. <i>Legislative</i> and council requirements are reviewed to ensure strategies meet all criteria.</p>
2. Conduct consultations	<p>2.1. <i>Information</i> is prepared that is clear, accurate and appropriate to the needs of all parties.</p> <p>2.2. All people involved in conducting the consultations are briefed on the process of consultation and the parties involved.</p> <p>2.3. <i>Information is presented</i> to affected parties at an appropriate time and place.</p> <p>2.4. <i>Access and equity</i> requirements are implemented in the consultations.</p> <p>2.5. Measures to expedite community consultation are taken to ensure consultation occurs within an identified time frame.</p> <p>2.6. Consultation is undertaken in an orderly manner to ensure all viewpoints are canvassed.</p>
3. Record, analyse and report on results	<p>3.1. Public consultation responses and processes are formatted to enable informed decision making to proceed.</p> <p>3.2. Appropriate suggestions for improvement are incorporated into design parameters.</p> <p>3.3. Summaries of responses and adopted amendments are provided to interested parties to ensure public consultation is recognised.</p> <p>3.4. Other issues raised during consultation are directed to relevant department or person to respond to community concern.</p> <p>3.5. An accurate report on community consultation that includes recommendations is prepared to enable informed decision making to occur.</p>

ELEMENT**PERFORMANCE CRITERIA**

- 3.6. The overall effectiveness of the consultation process is reviewed and evaluated and action is taken where necessary.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- consultation, presentation, negotiation and report writing
- research
- planning and organising
- information gathering and analysis

Required Knowledge

- relevant council policies and procedures
- relevant legislation, including planning and anti-discrimination
- relevant sections of local government act
- access and equity issues
- strategies for consultation
- codes of conduct and ethics

Evidence Guide**Overview of assessment requirements**

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to devise and conduct community consultations where:

- consultation ensures council's image or reputation is maintained or enhanced
- community consultation produces valid and useful information

Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.
Resource implications	Access to a range of real or simulated consultation processes including: <ul style="list-style-type: none"> • public and community meetings and forums • surveys and door knocks • appropriate communications equipment and aids such as overhead projectors and computer-based presentations

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<i>Interested and affected parties</i> may include:	<ul style="list-style-type: none"> • community groups • other authorities • individuals • emergency authorities (police, fire and ambulance) • private sector business interests • special interest groups • experts
<i>Resources</i> may include:	<ul style="list-style-type: none"> • human

- financial
 - locations
- Consultation strategies*** may include:
- public meetings
 - phone-ins
 - questionnaires
 - informal gatherings
 - door knocks
 - council meetings
- Enabling and encouraging relevant groups*** to be involved may include:
- physical accessibility
 - diverse language needs
 - culture, including Indigenous, youth and non-English speaking background
 - physical environment
 - number of people
- Legislation*** may include:
- local government
 - anti-discrimination
 - planning
- Information*** may include:
- written and oral records
 - anecdotes
 - reports
 - instructions
 - directions from supervisor or management
 - interviews
 - formal and informal team meetings
 -
- Access and equity*** may include:
- subject matter
 - manner in which consultations are conducted
 - physical accessibility
 - community profile
 -
 -
- Presentation of information*** may include:
- graphics
 - models
 - computer animations
 - video displays
 - overhead transparencies

LGACOMP008A Apply conflict resolution strategies

Modification History

LGACOMP008A Release 2: Layout adjusted.

LGACOMP008A Release 1: Primary release.

Unit Descriptor

This unit covers dealing effectively with conflict, both in the workplace and outside the organisation. The unit outlines the knowledge and skills required to assess potential conflict situations and deal appropriately with the situation to achieve a resolution. The unit is suitable for all people working within the organisation.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations within which councils must operate is essential. The unique nature of councils, as a tier of government directed by elected members and reflecting the needs of local communities, must be appropriately reflected.

Licensing/Regulatory Information

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be

consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess potential conflict situations	1.1 Signs, stages and possible <i>causes of conflict</i> are identified and anticipated. 1.2 Appropriate responses are evaluated against organisational procedures and <i>legal requirements</i> . 1.3 Additional information is identified and sought as required to assist in the assessment of the conflict situation.
2. Implement conflict resolution strategies	2.1 Factors and issues relevant to the conflict are clarified. 2.2 Strategies for dealing with conflict situations are developed in accordance with organisational procedures. 2.3 Assistance is sought as required and is appropriate to the person's skill and responsibility. 2.4 Options for resolution of the conflict are identified which allow for constructive responses to be negotiated. 2.5 <i>Negotiation techniques</i> are used to maintain positive interaction and to divert and minimise aggressive behaviour. 2.6 Effective <i>communication techniques</i> are used to ensure understanding of information received or relayed. 2.7 <i>Social and cultural differences</i> are taken into account in the negotiation style and approach taken. 2.8 Mutual agreement to the situation and its resolution is confirmed and follow up action is agreed upon by all parties. 2.9 Systems, records and reporting procedures are maintained according to organisational procedures.
3. Evaluate response and outcome	3.1 Effectiveness of response is evaluated and reviewed according to information available and organisational practices. 3.2 Accurate and constructive observations of incidents are provided in reviewing and debriefing the situation. 3.3 Records and reports are provided and maintained according to organisational requirements. 3.4 Effects of stress are recognised and addressed through stress management techniques and debriefing.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- problem-solving strategies to know how to deal with unexpected questions or attitudes
- interpersonal skills to develop rapport with other parties in the conflict
- capacity to evaluate own response to situations of conflict and manage own emotions
- communication skills to effectively come to an agreed outcome
- negotiation skills to negotiate difficult situations and resolve problems as they arise
- flexibility to adjust quickly to differing situations
- empathy to develop rapport and understanding with and for the other party
- dealing with difficult people and situations

Required Knowledge

- legislative and/or other legal provisions
- conflict resolution strategies
- organisational policies and procedures relating to managing conflict through negotiation
- recording and reporting procedures
- principles of cooperative team work
- different social and cultural practices

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- interpret accurately and comply with legal and procedural requirements
- identify typical symptoms and causes of conflict in the workplace and ways of resolving conflict situations
- select conflict resolution strategies that are most effective for the objective
- use negotiation techniques to defuse and resolve conflict
- use communication techniques to give clear and accurate

	information in a form that is preferred and understood by the receiver
Context of assessment	<p>Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.</p> <p>Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.</p> <p>Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.</p> <p>Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.</p>
Relationship to other units(prerequisite or co-requisite units)	To enable holistic assessment this unit may be assessed with other units that form part of the job role.
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of formal and informal situations, involving different types of problems and clients.
Resource implications	The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Causes of conflict*** may include:
- refusal to follow directions and guidance
 - dissatisfaction of client with council service or information
 - disagreement between members of the public
 - disagreement between members of the organisation
 - ejection of persons
 - persons suffering from emotional distress
 - bystander behaviour
- Legal requirements*** may include:
- relevant state and commonwealth legislation
 - decisions of relevant tribunals
 - roles and responsibilities
 - terms and conditions of employment
- Negotiation techniques*** may include:
- strategic questioning and listening to gather information and direct the focus of the people involved
 - positive, confident and cooperative language
 - control of tone of voice and body language
 - using language and concepts appropriate to the people involved
 - using clear presentations of options and consequences
 - demonstrating flexibility and willingness to compromise
 - summarising positions and agreements made to confirm understanding between the negotiating parties
- Communication techniques*** may include:
- verbal and non-verbal language
 - two-way interaction
 - constructive feedback
 - active listening
 - reflection and summarising
- Social and cultural differences*** may include:
- verbal and non-verbal language
 - beliefs and values
 - religious or spiritual observances
 - relationships and family structures
 - social conventions
 - codes of conduct

Unit Sector(s)

Common

LGAGCM710A Manage contracts and contractors

Modification History

LGAGCM710A Release 2: Layout adjusted.

LGAGCM710A Release 1: Primary release.

Unit Descriptor

This unit covers the skills and knowledge required of senior managers responsible for overseeing the development of tenders and the subsequent management of contracts and contractors.

Effective and efficient management of external contracts is now a major component of many managers' roles. The need for high levels of accountability and transparency while managing commercial relationships is addressed in this unit.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of all sizes. Knowledge of the legislation and regulations that provide the boundaries for the operation of councils is essential. The unique nature of councils, as a tier of government, directed by elected members and reflecting the needs of local communities must be appropriately reflected.

This unit may also be contextualised to other public or private sectors as long as the essential outcomes of the unit are not changed.

Licensing/Regulatory Information

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Scope council process and service requirements

- 1.1 ***Council procedures and protocols for management of tenders and contracts*** are identified, considered and used.
- 1.2 Council's strategic and operational plans are reviewed and considered to determine scope and nature of project or service to be contracted.
- 1.3 Size and scope of ***project or service to be contracted*** are determined and documented.
- 1.4 Process to manage tender and contract is documented and appropriate sign-off is secured in line with standard operating procedures.

2. Ensure tender process is planned and managed effectively

- 2.1 Anticipated expense levels of tender are identified and justified.
- 2.2 Tender objectives, including quality, quantity, location, time frame requirements and price limits are clearly defined and documented.
- 2.3 Processes for letting of tender are put in place in line with standard operating procedures.
- 2.4 ***Selection processes*** are developed that comply with legislative requirements, council policies and procedures.
- 2.5 Choice of contractor is justifiable, agreed upon and recorded according to council policies.
- 2.6 Contract is negotiated and agreement reached to maximise benefits for council and following appropriate legal scrutiny and advice.
- 2.7 Contract is drafted and signed according to legislative and organisational requirements and project objectives, reflecting agreement outcomes.

3. Manage contract to achieve desired outcomes

- 3.1 Management plan is developed to ensure effective management of contract.
- 3.2 Performance of contractual obligations is managed in accordance with agreed contract and management plan.

ELEMENT	PERFORMANCE CRITERIA
4. Manage relationships with contractors	<p>3.3 Performance by contractor is reviewed using agreed processes, with any variances analysed and agreed changes implemented to ensure project objectives are met within legal framework of contract.</p> <p>3.4 <i>Reports of project progress</i> and outcomes are prepared and presented in accordance with management plan and standard organisational procedures.</p> <p>3.5 Contracts are concluded in line with management plan and contractual requirements.</p> <p>4.1 Code of conduct is used and communicated to contractors to ensure relationship between parties is managed ethically, transparently and in accordance with legal requirements and council policies and procedures.</p> <p>4.2 Regular and formalised communication processes with contractors are established and rigorously applied.</p> <p>4.3 Sound business relationships with contractors are established and maintained to ensure effective communication and the early identification of potential service delivery problems.</p> <p>4.4 Contractual disputes that arise are managed in accordance with contractual requirements and using established mediation mechanisms.</p>
5. Plan for improved contract management and service delivery processes	<p>5.1 Effectiveness and benefits of contracting process and related service delivery are analysed.</p> <p>5.2 Opportunities for process and service delivery improvements are identified and communicated to appropriate senior personnel within council.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- tender management
- high-level negotiation
- literacy and numeracy skills to manage contracts
- project management
- high-level written and oral communication
- analysis of organisational systems, processes and activities
- developing a range of possible options in solving problems

- time management

Required Knowledge

- legal and council requirements for letting and managing tenders
- council code of conduct for the management of relationships with contractors

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the elements to the required performance level detailed in the performance criteria. The unit's skill and knowledge requirements must also be demonstrated. The candidate will demonstrate the capacity to manage contracts and contractors effectively, ethically and leading to the attainment of stated council objectives.

Critical aspects of evidence to be considered

The demonstrated ability to:

- manage contracts and contractors within council

Context of assessment

Assessment of performance requirements in this unit should be undertaken with the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the range of variables applicable to the workplace environment.

Method of assessment

The following assessment methods are suggested:

- preparation of a major workplace project report/portfolio (that may incorporate assessment of related units) as a key form of assessment that enables candidates to integrate the learning and assessment project into their regular work responsibilities, which enables integrated and holistic assessment of the complex skills and knowledge addressed in this unit
- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate his/her handling of a range of contingencies
- written and oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioner
- completion of self-paced learning materials, including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance

Evidence should be gathered over a period of time in a range of actual or simulated management environments.

Resource implications

Access to a workplace or simulated case study that provides the following resources:

- relevant council documents, such as strategic and operational plans
- relevant local government legislation and regulations

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Council procedures and protocols for the management of tenders and contracts may include:

- codes of conduct for transparent and accountable management of contracts and contractors
- tendering procedures
- reporting requirements

Contracts may cover provision of:

- short-term, one-off services
- lengthy and complex relationships with external service providers offering services to the community

Project or service to be contracted may relate to any sphere of council operation but typically may include:

- capital works
- parks and gardens maintenance
- provision of community care services, such as family care, disability services or child care
- provision of waste and recycling service

Tender selection processes may include:

- advertising period
- use of selective tenders, tender panels and 'open' tenders for contracts of differing values
- establishment of weighted selection criteria
- establishment of a selection panel with complementary expertise

Reports of project progress may include:

- compliance with required timelines
- indicators of service levels and quality
- actual cost against budgeted cost
- customer satisfaction

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Conduct background research	<p>1.1 Previous Indigenous cultural heritage and resource surveys are identified and reviewed.</p> <p>1.2 Relevant commonwealth and state or territory legislation and peak local government associations and council policies are researched and documented.</p> <p>1.3 Extent to which cultural heritage of other non-Indigenous cultures should be acknowledged is identified and taken into consideration.</p>
2 Identify the correct Indigenous people that are authorised to speak for a place	<p>2.1 <i>Indigenous people with rights and interests in a place</i> are identified through the traditional owners, especially those authorised to speak for a place.</p> <p>2.2 Both men and women with rights and interests in an area or place are identified because men and women may be responsible for different heritage places and values and may need to be consulted separately.</p> <p>2.3 Other Indigenous people are identified who may not necessarily be traditional owners but who have interests in a place.</p> <p>2.4 Indigenous people from surrounding areas who may be affected by a project or activity are identified and consulted.</p> <p>2.5 <i>Protocols</i> that Indigenous people have established for consultation are identified and adhered to throughout the process.</p> <p>2.6 Consultation on each new project is undertaken, unless traditional owners and other Indigenous people agree that this is not necessary.</p> <p>2.7 Non-Indigenous people with rights or interests in the place are identified and consulted.</p>
3 Consult with relevant Indigenous people to discuss the project or activity	<p>3.1 <i>Potential implications of the project or activity</i> are outlined factually and clearly.</p> <p>3.2 All <i>relevant documentation and information</i> are provided to the traditional owners and all other Indigenous people with rights and interests in a place.</p> <p>3.3 Sufficient time is allowed for all Indigenous people to decide whether they wish to become involved in the activity or project and to provide informed consent.</p> <p>3.4 All Indigenous groups with an interest in a place are provided with the same information and given sufficient time to provide informed consent.</p> <p>3.5 Where groups are in dispute, a process for developing</p>

ELEMENT	PERFORMANCE CRITERIA
	separate but consistent and similar agreements is established.
4 Establish a process for addressing Indigenous cultural heritage matters	<p>4.1 Manner, timing and level of consultation and involvement with the project or activity are agreed.</p> <p>4.2 The copyright holders of any work undertaken with Indigenous people and the management regime for Indigenous heritage places are identified.</p> <p>4.3 Need for separate reports for male and female traditional owners and a further report that is publicly available is established.</p> <p>4.4 Dissemination of reports is carried out effectively.</p> <p>4.5 The process for obtaining informed consent for displaying any gathered information is identified and agreed.</p> <p>4.6 Protocols and agreements are formalised and documented.</p> <p>4.7 Indigenous people are involved in the development of any terms of reference for, and selection of, consultants.</p> <p>4.8 Resources required to maintain community involvement are identified and secured.</p> <p>4.9 Relevant documentation for council is prepared, including presentation of alternative options.</p>
5 Consult with relevant Indigenous people in identifying their cultural heritage places and values	<p>5.1 Commonwealth and state or territory laws relating to Aboriginal and Torres Strait heritage are complied with by obtaining necessary permits for surveys and other activities required to identify Indigenous heritage values.</p> <p>5.2 Sensitive information collected in the course of identifying Indigenous heritage places and values is protected from further unnecessary disclosure.</p> <p>5.3 Details relating to custodians of information are recorded and protected from further unnecessary disclosure.</p>
6 Implement project or activity	<p>6.1 Meetings are held with identified stakeholders that enable Indigenous people to explain issues relating to Indigenous heritage to non-Indigenous stakeholders.</p> <p>6.2 Processes for mediation and dispute resolution are identified and established.</p> <p>6.3 A precautionary approach is identified in cases where Indigenous people refuse to be involved in a project.</p> <p>6.4 A process to prevent damage or desecration to any Indigenous heritage place is identified and established.</p> <p>6.5 Proposal or activity is revised or rejected in light of Indigenous people not agreeing because of unacceptable impact on their cultural heritage.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- oral and written communication
- cross-cultural competence
- gender and disability
- evaluation
- decision making
- research
- networking
- negotiation and dispute resolution

Required Knowledge

- cultural context
- community controls
- location and resources
- organisational processes
- equity and diversity principles
- legal requirements

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.

Critical aspects of evidence to be considered

The demonstrated ability to:

- conduct research into cultural heritage and protect any sensitive information collected in the course of the research process
- identify Indigenous people with rights and interests in a place
- meet with Indigenous people to discuss a project or activity

and reach agreement about involvement and consent to their involvement in the project or activity

- establish a process for addressing Indigenous cultural heritage matters in relation to a project or activity.

Context of assessment

Competency is demonstrated by performance of all stated criteria, with particular attention to the critical aspects of evidence and the knowledge and skills elaborated in the Evidence Guide, and within the scope of the Range Statement.

Assessment must take account of the endorsed Assessment Guidelines in the Local Government Training Package.

Assessment of performance requirements in this unit should be undertaken in an actual workplace or simulated environment.

Assessment should reinforce the integration of the key competencies for the particular AQF level. Refer to the key competency levels at the end of this unit.

Relationship to other units (prerequisite or co-requisite units)

To enable holistic assessment this unit may be assessed with other units that form part of the job role.

Method of assessment

The following assessment methods are suggested:

- observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies
- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor.

Evidence required for demonstration of consistent performance

Evidence should be collected over a set period of time that is sufficient to include dealings with an appropriate range and variety of situations.

Resource implications

The learner and trainer should have access to appropriate documentation and resources normally used in the workplace.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in

the Performance Criteria is detailed below.

- Indigenous people with rights and interests in a place*** may include:
- traditional owners
 - men
 - women
 - Indigenous people authorised to speak for a place
- Protocols*** may include:
- use of interpreters
 - talking to the appropriate people
 - laws and customs relating to places
 - respecting family, kinship and clan relationships
- Non-Indigenous people with rights or interests in a place*** may include:
- landholders
 - lessees
 - tourists and recreational users
 - state or territory government agencies
 - commonwealth departments and agencies
- Potential implications of the project or activity*** may include:
- economic or financial
 - cultural
 - social
 - environmental
 - educational
 - others
- Relevant documentation and information*** may include:
- maps
 - reports

Unit Sector(s)

Land Management

LGAPLEM508A Manipulate and analyse data within geographic information systems

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Develop procedures for manipulation and analysis of data	1.1 Desired data format is specified and based on job requirements. 1.2 Parameters are specified for manipulation of the data sets. 1.3 New procedures are documented clearly explaining the procedure and rationale for development.
2 Establish models required to provide outcome	2.1 Applicability of existing tools, models, theories, applications and solutions is evaluated. 2.2 Feasible parameters, equations and assumptions are specified. 2.3 Models required to provide specified outcome are established.
3 Analyse data	3.1 Steps to be undertaken to analyse and manipulate data are specified. 3.2 <i>Source data limitations</i> and other restricting <i>factors</i> are taken into account when selecting techniques for analysis. 3.3 Data is isolated and retrieved from its source. 3.4 Data is interrogated to ensure reliability. 3.5 Data is prepared for presentation media.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- analysing options
- using tools within software to manipulate data
- reading external data sets into data model

Required Knowledge

- database structures
- scripting and commands
- line instructions and programming
- operating systems:
- range of tools, models, theories, applications and solutions
- data analysis and manipulation techniques.

- UNIX
- DOS
- Windows
- NT

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	Suitable procedures are developed. New procedures are documented. Appropriate models are used and/or created.
Context of assessment	On the job or in a simulated work environment.
Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none">• observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies• written and/or oral questioning to assess knowledge and understanding• completion of workplace documentation• third-party reports from experienced practitioners• completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence will need to be gathered over time across a range of variables.
Resource implications	Access to geographic information systems databases and operating systems.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Source data limitations may include:

- currency
- structure
- accuracy
- source of data

Factors may include:

- time
- command line operation
- menu drivers options

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse request to develop solution	<p>1.1 Specific problem or question is clarified in consultation with <i>end user</i> to establish <i>end result specifications</i> .</p> <p>1.2 Information required to achieve result is defined and required <i>data</i> sets are correctly determined.</p>
2 Assess data availability	<p>2.1 Availability of required data sets is ascertained through research of <i>internal</i> and <i>external sources</i> .</p> <p>2.2 Custodianship of data is confirmed and access and pricing are determined.</p> <p>2.3 Data is obtained in line with <i>industry standards</i>, statutory requirements and council policy.</p> <p>2.4 Where appropriate, <i>procedures</i> are developed to capture data.</p>
3 Assess data quality	<p>3.1 Data is assessed for <i>integrity</i> to determine suitability for task.</p> <p>3.2 Disparities between data sets are investigated and resolved to ensure integrity of data used.</p>
4 Run standard query	<p>4.1 Appropriate standard query is selected.</p> <p>4.2 Selected query is run to achieve required outcome .</p>
5 Validate outcome	<p>5.1 Appropriate data validation procedures are determined.</p> <p>5.2 <i>Outcome</i> is validated in line with predetermined procedures.</p> <p>5.3 Procedures to refine model or analytical procedures are developed.</p> <p>5.4 End user is consulted regarding suitability of outcome and amendments are negotiated as necessary.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- analysing options
- researching and accessing information
- attention to detail
- negotiating with customers

Required Knowledge

- database structures
- scripting and commands
- line instructions and programming
- operating systems
- SQL or other generic query language
- relationship of spatial features of database
- specific geographic information systems software, such as Genamap, MapInfo or ArcInfo
- potential inaccuracies and problems
- internal and external policies and practices relating to custodianship of data, pricing and access including industry standards, statutory requirements and council policies
- legislation relating to trade practices, copyright, intellectual property, local government acts, roads act and freedom of information legislation.
- UNIX
- DOS
- Windows
- NT

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to: consider integrity of data ensure end result meets customer needs, including time frames.
Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria applicable to the workplace environment, within the scope of the Range Statement.
Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none"> • observation of the learner performing a range of workplace

tasks over sufficient time to demonstrate handling of a range of contingencies

- written and/or oral questioning to assess knowledge and understanding
- completion of workplace documentation
- third-party reports from experienced practitioners
- completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor

Evidence required for demonstration of consistent performance

Evidence should be gathered over a period of time in a range of actual or simulated management environments.

Resource implications

Access to a workplace or simulated case study that provides the following resources:

- relevant hardware and software such as geographic information systems, CAD, desktop publishing, desktop mapping, spreadsheets, word processing, multimedia, graphic animation, plotters, printers and terminals

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

End users may be:

- council departments
- residents and rate payers
- real estate agents
- general public
- council management
- elected members
- state and federal departments
- neighbouring councils
- bus companies
- statutory bodies including land titles office
- land information council
- utilities

End result specification may include:

- graph
- map
- table
- equations

- Data** may include:
- parameters
 - graphical
 - spatial
 - textual
 - hard copy and paper documents, including work registers, rate books, plans and maps
 - computer records using applications programs (databases, spreadsheets and accounting packages) relating to physical or virtual features, including council assets, community facilities, demographic data, census data, property ownership, property boundaries, zonings, organisations, rateable land, dog ownership, bus routes, property classifications, utilities and services and council facilities
- External sources of data sets** may include:
- other councils
 - water authority
 - telecommunications industry
 - gas authority
 - electricity authority
 - land titles office
 - valuer general
 - private industry
 - land information council
 - street directory companies
 - surveys
 - orthophotography
- Internal sources of data sets** may include:
- old plans
 - rates books
 - deeds books
 - transaction books
 - surveys
 - aerial photographs
- Industry standards** may include:
- protocols
 - de facto standards
 - confidentiality
 - privacy
- Procedures for manipulation of data sets** may include:
- command lines
 - SQL or other generic query language
 - scripts
 - programming language
- Integrity of data** may include:
- accuracy
 - quality, which may be affected by age or condition of hard copy documents

- Outcome* may include:
- currency
 - completeness
 - resolution
 - confidence limits
 - scale
 - information for external or internal client
 - creation of map layer
 - building up elements of database

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare inventory of heritage and cultural assets	<p>1.1 <i>Heritage</i> and cultural assets within the community, and council expectations and requirements relating to them, are identified.</p> <p>1.2 The <i>significance</i> of each heritage and cultural asset is assessed according to established criteria and community expectations.</p> <p>1.3 An adequate <i>information</i> base of significant places is obtained through comprehensive field investigation and research.</p> <p>1.4 <i>Data</i> is collected accurately and objectively on heritage and cultural assets.</p> <p>1.5 A comprehensive inventory of heritage and cultural assets is prepared with full and detailed descriptions of history and significance.</p>
2 Assess threats and opportunities for the protection of heritage and cultural assets	<p>2.1 <i>Threats</i> and opportunities are identified to ensure all factors are fully assessed.</p> <p>2.2 Based on input from council and the community, criteria are established to enable threats and opportunities to be prioritised.</p>
3 Identify and develop strategies for the protection of heritage and cultural assets	<p>3.1 <i>Criteria</i> are established to identify priorities.</p> <p>3.2 Consultation with the community and property owners is undertaken to seek views on the conservation action required to protect the significant attributes of the area.</p> <p>3.3 A framework for the legal protection of heritage and cultural assets is established through existing legislation.</p> <p>3.4 Practical and appropriate strategies to conserve heritage and cultural assets are determined.</p> <p>3.5 The effectiveness of strategies is assessed through a comparison with methods used elsewhere.</p> <p>3.6 The policy elements of the proposed heritage program are determined.</p> <p>3.7 Innovative approaches are developed to protect heritage and cultural assets in response to the local community need.</p>
4 Implement strategies for the protection of heritage and cultural assets	<p>4.1 The study and program are adopted by the local authority.</p> <p>4.2 Consultation is undertaken with the community and property owners about the study and proposed heritage program.</p> <p>4.3 Financial resources are identified and procured within budget cycles to support the achievement of required</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>outcomes.</p> <p>4.4 Personnel are identified, trained and assigned to tasks so that requirements for skills and knowledge are met.</p> <p>4.5 Physical facilities and equipment are identified and procured within budget cycles to support the achievement of required outcomes.</p> <p>4.6 Community education and <i>information</i> materials are prepared and distributed to ensure ongoing support for the strategy.</p> <p>4.7 The strategy is incorporated into council policies and procedures and relevant legislation.</p> <p>4.8 A timetable for implementation is established and priorities are set.</p>
<p>5 Monitor and review the effectiveness of strategies to protect heritage and cultural assets</p>	<p>5.1 Further research is undertaken on <i>places</i> listed as being of local significance in the study.</p> <p>5.2 Additional plans of significance are identified and reviewed.</p> <p>5.3 An annual heritage report is prepared if required.</p> <p>5.4 Information received from monitoring and review is used to develop new strategies that are based on accumulated knowledge and experience.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- research
- collation of information from local, national and international sources
- evaluation methodologies
- consultation with a range of community and government agencies
- strategic planning
- budgeting and lifecycle costings
- community education strategies
- project management

Required Knowledge

- heritage assets
- cultural assets
- asset classification

- council structures and services
- town planning
- community needs and expectations
- regulations, standards and policies
- community information

Evidence Guide

Overview of assessment requirements	A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	The demonstrated ability to: <ul style="list-style-type: none">• identify and protect heritage and cultural assets• identify and implement strategies to protect heritage and cultural assets• put in place monitoring processes
Context of assessment	Assessment of performance requirements in this unit should be undertaken within the context of the local government framework. Competency is demonstrated by performance of all stated criteria, including the Range of Variables applicable to the workplace environment.
Method of assessment	The following assessment methods are suggested: <ul style="list-style-type: none">• observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies• written and/or oral questioning to assess knowledge and understanding• completion of workplace documentation• third-party reports from experienced practitioners• completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Evidence should be gathered over a period of time in a range of actual or simulated management environments.

- Resource implications** Access to a workplace or simulated case study that provides the following resources:
- relevant data such as survey information
 - historical research
 - existing reports
 - studies and texts
 - financial and budget information
 - real or simulated consultation process
 - copies of relevant regulations, standards and policies

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Heritage*** may include:
- cultural and environmental issues
 - national and local area significance
 - danger component of heritage element or structure

- Significance*** may be:
- aesthetic, historical, scientific and social aspects
 - community expectations.
 - national
 - state
 - regional
 - local
 - contributory

- Data*** includes:
- survey information
 - historical research
 - existing reports
 - studies and texts

- Information*** may include:
- written and oral records
 - reports
 - instructions
 - directions from supervisor and management
 - formal and informal interviews
 - team meetings
 - reports from other services, agencies, specialists and experts
 - media

- Threats*** may include:
- political emphasis

Criteria may include:

- reductions in maintenance
- lack of planning
- other authorities' planning
- competing interests
- community attitudes
- community preferences
- budget constraints
- legislative provisions
- resources
- time frames
- age
- outstanding craftsmanship
- architectural style
- construction technology
- an association with important events or figures
- building type
- rarity
- technical or creative achievement
- representing a way of life
- artistic
- religious or cultural associations

Places of significance
may include:

- buildings
- structures
- plantings
- subsurface remains

Unit Sector(s)

Land Management

LGAREGS305A Undertake animal or reptile control duties

Modification History

LGAREGS305A Release 2: Layout adjusted.

LGAREGS305A Release 1: Primary release.

Unit Descriptor

This unit covers the capture, assessment of transport and care needs, impounding, monitoring, release and reporting of animals and/or reptiles.

Application of the Unit

This unit supports the attainment of skills and knowledge required for competent workplace performance in councils of varying size and locations. Knowledge of the legislation and regulations within which councils must operate is essential. The role of councils, as the third tier of government, in managing the application of a broad range of by-laws and regulations must be appropriately reflected.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Capture animals or reptiles	1.1 Response to request for assistance is timely and efficient use of resources is observed. 1.2 Traffic control precautions are used and access to incident site is controlled to ensure safety of public. 1.3 Safe and humane methods of handling <i>animals or reptiles</i> are observed. 1.4 Where appropriate, animals or reptiles are disposed of in accordance with legislative and council requirements and relevant statutes.
2 Assess transport or care needs	2.1 <i>Transport</i> or intermediate care is provided according to protocols or legislation. 2.2 Containment and loading are secure and safe. 2.3 Temporary holding facilities are arranged or negotiated with landowners where necessary.
3 Impound animals or reptiles	3.1 Impounding decision is consistent with legislative and council requirements. 3.2 <i>Ownership</i> of animals is determined using council records or stock brands. 3.3 Advisory/penalty notices are issued according to council regulations.
4 Monitor or care for animals or reptiles	4.1 Feeding and handling of animals during care is undertaken in accordance with pound procedures and legislative and council requirements. 4.2 Safe work practices, procedures and environmental conditions are observed during handling, monitoring and care duties.
5 Release animals or reptiles to owners/carers or return to environment	5.1 Decision to release or restore animal to environment is in accordance with relevant legislation and procedures. 5.2 Auction of unclaimed stock is performed according to council procedures. 5.3 Recovery of costs and revenue is assessed and enforced according to relevant legislation and procedures.
6 Report on animals or reptiles that are captured, impounded or disposed of	6.1 Reports containing accurate information drawn from council registers are forwarded to relevant officers or authorities.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit

Required Skills

- computers
- video, voice recorders and radio communication
- preparing and issuing instructions and/or explanations to the public
- reporting to council

Required Knowledge

- animal and reptile behaviour
- predators
- dominance
- fear
- aggression
- applicable impounding techniques
- animal and reptile handling and disabling techniques
- animal and reptile dietary and impounding needs
- routine medicinal, chemical and dipping application
- animal health treatment
- humane disposal techniques
- safe and effective use of firearms
- stock brands
- identification tags
- microchip reading
- local area geography
- terrain
- urban and rural navigation
- relevant statutes
- notice-serving process
- court evidence
- traffic control licensing requirements and direction

Evidence Guide

Overview of assessment requirements

A person who demonstrates competency in this unit will be able to perform the outcomes described in the Elements to the required performance level detailed in the Performance Criteria. The knowledge and skill requirements described in the Range Statement must also be demonstrated. For example, knowledge of the legislative framework and safe work

	practices that underpin the performance of the unit are also required to be demonstrated.
Critical aspects of evidence to be considered	<p>Impounding techniques used are appropriate to animal or reptile species and the condition of the animal or reptile.</p> <p>Assessments of animal or reptile health and condition, and the appropriate disposal of animals or reptiles, are in accordance with council policies and procedures.</p> <p>Traffic control is in accordance with relevant licensing requirements.</p> <p>Use of firearms is in accordance with relevant licensing requirements.</p> <p>Notices are served in accordance with council regulations.</p> <p>Safe work practices and concern for public safety are displayed by care and control staff.</p>
Context of assessment	<p>On the job or in a simulated work environment.</p> <p>Written or oral testing.</p>
Method of assessment	<p>The following assessment methods are suggested:</p> <ul style="list-style-type: none"> • observation of the learner performing a range of workplace tasks over sufficient time to demonstrate handling of a range of contingencies • written and/or oral questioning to assess knowledge and understanding • completion of workplace documentation • third-party reports from experienced practitioners • completion of self-paced learning materials including personal reflection and feedback from trainer, coach or supervisor
Evidence required for demonstration of consistent performance	Competency in duties may be displayed with domestic animals, livestock, wildlife or reptiles.
Resource implications	Access to a workplace or simulated environment that encompasses impounding processes, techniques and equipment.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in

the Performance Criteria is detailed below.

Animals or reptiles may include:

- domestic pets
- livestock
- feral animals
- native animals
- reptiles

Capture or control may include:

- traps
- poles and ropes
- tongs
- tranquilliser guns
- firearms
- vehicles
- loading and yarding
- health, condition and behaviour of animal or reptile from observation or reports
- supervision of, or communication to, other staff or agency personnel
- disposal of deceased animals or reptiles

Transport may include:

- dedicated or contracted transport
- appropriate for care and human safety.

Ownership issues may include:

- verification of claims to ownership by such things as tags or microchips
- recovery of costs relating to transport, sustenance and penalties

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify the need for First Aid	<p>1.1. Initial assessment is made of extent and nature of First Aid required from personal observation and/or witness reports</p> <p>1.2. Initial assessment is reported to personnel/emergency services in accordance with workplace procedures</p>
2. Ensure the safety of patient and carer	<p>2.1. Hygiene is maintained for protection of patient and carer</p> <p>2.2. Hazards to the patient and carer are identified and appropriate action is taken to prevent further injury to either party</p> <p>2.3. Patient is made as comfortable as possible and reassured by word, manner and actions</p>
3. Assess patient and apply First Aid	<p>3.1. Patient is assessed against the DRABC (danger, response, airway, breathing, ventilation and circulation) model</p> <p>3.2. Vital signs are measured, recorded and any changes noted and reported as appropriate</p> <p>3.3. Treatment appropriate to the patient's injuries is provided in accordance with recognised First Aid techniques</p> <p>3.4. First Aid equipment is operated/applied in accordance with recognised procedures and standards</p> <p>3.5. Patient's condition is monitored and reported as required by workplace procedures, with treatment being modified as appropriate</p> <p>3.6. Treatment is maintained until qualified medical assistants assume responsibility or until the patient is evacuated</p> <p>3.7. Provide additional assistance as requested by</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>medical/emergency services personnel</p> <p>3.8.Details of First Aid administered are reported in accordance with workplace procedures</p>
4. Complete work	<p>4.1.First Aid equipment is recovered (if practical), cleaned, inspected/tested, refurbished, replaced and stored as appropriate</p> <p>4.2.Medical waste is disposed of in accordance with workplace requirements</p> <p>4.3.Equipment faults are rectified and reported in accordance with workplace procedures</p> <p>4.4.Documentation is completed as required by legislative, regulatory and workplace requirements</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- collect, organise and analyse information related to workplace health and safety systems and procedures and the application of these to work situations
- communicate ideas and information on workplace safety issues, including the treating and recording/reporting of workplace incidents/accidents/illnesses and interpersonal communication with casualties
- plan and organise activities, including the inspection of first aid support facilities and treatment areas to ensure their completeness, adequacy, equipment and serviceability
- work with others and in a team to promote an awareness of first aid within the workplace and its provision when required
- use mathematical ideas and techniques to correctly complete measurements and calculations associated with assessment, treatment and monitoring of patient's condition
- use problem solving skills to assess and determine treatments and priorities in providing first aid to a patient
- use the workplace technology related to the reporting, recording and responding to workplace injuries and illnesses

Required knowledge

- workplace procedures and requirements for the treatment of workplace

REQUIRED SKILLS AND KNOWLEDGE

injuries/illnesses

- reporting responsibilities and requirements
- the provision of first aid including:
 - systems of the body (respiratory, skeletal, digestive, circulatory, nervous, urinary, skin)
 - causes and management of unconsciousness
 - priorities for life support (DRABC model)
 - resuscitation techniques
 - bleeding control and laceration treatment
 - patient assessment
 - principles of initial patient management
 - management and treatment of fractures and soft tissue injuries
 - management and treatment of burns

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects of evidence

- Accurately follow workplace procedures for reporting injuries/illnesses and providing First Aid in the workplace
- Identify and respond to injuries/illnesses occurring in the workplace
- Apply emergency response First Aid
- Provide appropriate treatment to and monitor patient's condition
- Accurately report and document injuries and illnesses and treatment provided

Resource implications

First Aid kit, stretchers and medical/First Aid facility
Enterprise health and safety policies and procedures
Personal protective equipment
Patients

Method of assessment

Assessment should be by direct observation of tasks and questioning on underpinning knowledge.

EVIDENCE GUIDE	
	Assessment may be conducted in conjunction with assessment of other relevant units of competency.
Context of assessment	Assessment may occur on the job or in a workplace simulated facility with relevant equipment, work instructions, casualties and urgency.

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
Unit context	<ul style="list-style-type: none"> • The provision of First Aid and workplace responsibilities is to conform to OHS legislation, material safety management systems, hazardous substances and dangerous goods code and local safe operating procedures • Work is carried out in accordance with legislative obligations, relevant health regulations and organisation insurance requirements • Work involves assessing situations, identifying appropriate control measures, awareness of emergency services responsibilities and responsiveness, treating injuries and maintaining equipment • Work may be conducted without supervision and guidance
First Aid	<ul style="list-style-type: none"> • First Aid is that assistance given to a patient who has suffered an injury or illness in the workplace. It is that assistance which is deemed necessary to attempt to resuscitate, stabilise and/or treat the patient until qualified medical personnel assume responsibility or until the patient is evacuated for appropriate medical treatment. • First Aid may include:

RANGE STATEMENT	
	<ul style="list-style-type: none"> • cardio-pulmonary resuscitation (CPR) • bleeding control • spinal injury care • basic patient management
Resources implications may include:	<ul style="list-style-type: none"> • First Aid kit • personal protective equipment • stretcher (may be improvised)
Personal protective equipment	Personal protective equipment is to include that prescribed under legislation, regulations and enterprise policies and practices.
Information and procedures may include:	<ul style="list-style-type: none"> • OHS legislation, regulations, codes of practice, environmental legislation, Australian Standards and codes of practice relating to hazards in the workplace, including: <ul style="list-style-type: none"> • obligations under relevant safety and health legislation and common law • local medical and emergency services • provisions relating to roles and responsibilities of health and safety representatives and/or OHS committees • risk management policies and procedures • First Aid procedures <ul style="list-style-type: none"> • safe manual handling and lifting procedures • emergency, fire and accident procedures • materials safety procedures • personal safety procedures • procedures for the use of personal protective equipment • job procedures and work instructions
Emergency services may include:	<ul style="list-style-type: none"> • support provided by ambulance, police, fire or SES personnel and equipment
Personnel may include:	<ul style="list-style-type: none"> • supervisors • managers • team leaders • First Aid attendants/other medically trained staff • specified OHS personnel • other persons authorised or nominated by the enterprise or industry to perform, approve,

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected.
4. Perform routine welding using <i>oxy acetylene</i>	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with oxy acetylene fuel gas
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instructions
- using measurement skills for joint preparation and routine oxy acetylene welding

Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- materials and consumables properties and characteristics
- equipment and equipment settings
- fuel gas properties and applications
- post welding treatments
- weld characteristics
- any applicable industry standards, NOHSC guides, State/Territory regulatory codes of practice/standards
- safe work practices and procedures
- safe welding practices
- use and application of personal protective equipment for routine oxy acetylene welding

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	A person who demonstrates competency in this unit must be able to prepare materials and carry out routine oxy acetylene welding.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine oxy acetylene welding or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Materials	Mild and low carbon steel and cast iron
Prepared	Preheating, setting up jigs, fixtures, clamps, joint preparation
Equipment	Hoses, blowpipes, regulators
Consumables	Filler rods, fluxes
Oxy acetylene	The term 'oxy-acetylene' is used here to describe a range of fuel gases, including acetylene, LPG, hydrogen etc.
Cleaned	Fluxes

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assemble/disassemble plant and equipment	1.1. Accessories and equipment are correctly selected and assembled for manual heating and thermal cutting.
2. Operate heating and thermal cutting equipment	2.1. Cutting process and/or procedure appropriate for material is selected. 2.2. All safety procedures are observed. 2.3. Equipment start-up procedures are followed correctly to standard operating procedures. 2.4. Equipment adjustments are made correctly using standard operating procedures. 2.5. Appropriate cutting allowances are made. 2.6. Material is used in the most economical way. 2.7. Defects are identified and corrective action is taken to standard operating procedures. 2.8. Material is heated and cut to specification.

ELEMENT	PERFORMANCE CRITERIA
	2.9.Shape/size/length is to accepted workplace standards.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- performing pre-start checks
- safely starting equipment
- following standard operating procedures
- adjusting equipment to operating specifications
- making cutting allowances
- economising material and minimising wastage
- identifying cutting defects and taking corrective action
- heating and cutting materials to specifications
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures. May include drawings
- following oral instructions
- performing measurements needed to meet the requirements of this unit
- entering routine and familiar information onto proformas and standard workplace forms

Required knowledge

Look for evidence that confirms knowledge of:

- cutting processes appropriate to various materials
- heating and cutting specifications
- procedures for heating and cutting
- the tools, equipment and techniques for heating and cutting
- assembling procedures for equipment and accessories
- hazards and control measures associated with manual heating and thermal cutting
- use and application of personal protective clothing and equipment
- equipment pre-checks and operation
- procedures for adjusting heating and cutting equipment

REQUIRED SKILLS AND KNOWLEDGE

- cutting allowances and reasons for applying them
- procedures for minimising waste material
- reasons for minimising waste material
- cutting defects and their causes
- procedures for correcting cutting defects
- tools, equipment and techniques required to correct cutting defects
- use and application of personal protective equipment
- safe work practices and procedures

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to perform manual heating and thermal cutting.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.

Context of and specific resources for assessment

This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.

This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with manual heating/thermal cutting or other units requiring the exercise of the skills and knowledge covered by this unit.

EVIDENCE GUIDE	
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questions should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Location of welds is identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Correct electrodes are selected to suit application and settings.
4. Perform routine welding using MMAW	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned in accordance with standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials and electrodes
- setting up welding equipment
- welding with MMAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- performing measurements for joint preparation and routine MMAW

Required knowledge

Look for evidence that confirms knowledge of:

- material and equipment preparation
- properties and characteristics of materials and consumables
- weld characteristics
- equipment set-up and settings
- MMAW processes and properties
- post-welding treatments
- safe welding practices
- use and application of personal protective equipment

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to prepare materials and carry out routine manual metal arc welding (MMAW).

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both. Where assessment occurs off the job, i.e. the candidate is not in productive work, then appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with performing routine manual metal arc welding or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning should not require language, literacy and numeracy skills beyond those required in this unit. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Materials	Low and mild carbon steel or similar
Prepared	Cleaning, setting up jigs, fixtures, clamps, joint preparation
Welding equipment	Welding leads, welding machines, electrode holder etc.
Cleaned	Slag and spatter, cleaning, using files and grinders

Unit Descriptor

Unit descriptor	This unit of competency covers the preparation, positioning, fixing, and manual welding techniques associated with general trade level welding using manual metal arc welding (MMAW) equipment including the selection and set up of the equipment appropriate to both the material and the weld to be performed, carrying out the MMAW to prescribed standards, and examining for and correcting defects, in a range of welded fabrications.
------------------------	---

Application of the Unit

Application of the unit	<p>This unit of competency applies to welds associated with heavy or light metal fabrications. Welds are fillet and butt welds in all positions on a range of ferrous and non-ferrous materials that may include carbon steel or stainless steel. Weld quality would conform to Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent.</p> <p>This unit has been primarily developed for Engineering Tradesperson - Fabrication apprenticeship training and the recognition of trade level skills in MMAW. It may also apply to other trade occupations requiring higher level MMAW welding skills.</p> <p>Where manual thermal processes associated with preparation, pre-heat and/or post-heat are required, MEM05007C Perform manual heating and thermal cutting and/or MEM05008C Perform advanced manual thermal cutting, gouging and shaping should be considered for selection.</p> <p>Band: A</p> <p>Unit Weight: 4</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare materials for manual metal arc welding (MMAW)	1.1. Weld requirements are identified from specifications and/or drawings 1.2. Materials are correctly prepared 1.3. Materials are assembled/aligned to specification, where required
2. Select welding equipment and consumables	2.1. Welding equipment and electrodes appropriate to the material and the weld are identified and selected
3. Assemble and set up welding equipment	3.1. Welding equipment is assembled and set up
4. Minimise and rectify distortion	4.1. Appropriate distortion prevention measures are selected and applied 4.2. Distortion is rectified
5. Weld to job specification using MMAW	5.1. Weld deposit is to specification 5.2. Joints are cleaned to specifications
6. Ensure weld conformance	6.1. Defects are rectified with minimum loss of sound metal using correct techniques and tools 6.2. Weld joints are visually inspected for conformance to specifications
7. Where required, maintain weld records	7.1. Where required, weld records are completed correctly

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying and interpreting welding specifications including appropriate standards e.g. Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent
- selecting and using appropriate tools and equipment

REQUIRED SKILLS AND KNOWLEDGE

- using a variety of welding machines and electrodes
- identifying and rectifying weld defects
- applying techniques for distortion prevention and rectification
- cleaning welds
- reading and interpreting information on sketches, written job instructions, specifications, standard operating procedures and engineering drawings
- recording routine information including routine weld records related to MMAW onto proformas and standard workplace forms
- following oral instructions
- measurement skills relating to joint preparation and MMAW

Required knowledge

Required knowledge includes:

- material preparation
- joint preparations
- electrode classification
- causes of distortion for materials within the scope of this unit
- causes of defects and methods of rectification
- the relationships between amperage, electrode and material
- safe welding practices
- use and application of personal protective equipment for MMAW

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to prepare materials, select and set up the welding equipment, carry out MMAW and examine for and correct defects, in a range of welding activities associated with MMAW. Competency in this unit cannot be awarded until all prerequisites have been satisfied.

Critical aspects for assessment and evidence required to demonstrate

Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in

EVIDENCE GUIDE	
competency in this unit	<p>this unit of competency in new and different workplace situations and contexts. Critical aspects of assessment and evidence include:</p> <ul style="list-style-type: none"> • following all safety procedures to protect self, other workers and members of the public • identifying and interpreting specifications for MMA welding including Australian Standard 1554 General Purpose • interpreting welding specifications including standard welding symbols used to show weld procedure • selecting appropriate weld preparation methods for material and position of welds. • preparing materials, setting up of jigs, fixtures, clamps, etc. and joint preparation including bevelling • consistently welding different ferrous and non-ferrous materials to AS 1554 General Purpose or equivalent • identifying defects as described in the range statement across a range of welded materials • rectifying defects.
Context of and specific resources for assessment	<p>Welding to AS 1554 General Purpose or equivalent requires both theoretical knowledge and high level practical skills. The assessment process must be designed to identify consistent performance to the standard and the specifications across a range of materials and positions. The assessment must also identify a level of workplace performance in terms of defect rates and weld failure rates. It is recommended that assessment involve demonstrations of competency under both workshop and site conditions. This means that the ideal assessment environment is either on the job or a combination of both on and off the job.</p> <p>The competencies covered by this unit may be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p>
Method of assessment	<p>Typically an Engineering Tradesperson - Fabrication and other tradespersons engaged in welding are required to exercise MMAW skills and techniques across a range of jobs and specifications.</p> <p>A single assessment event is not appropriate. On the job assessment should be included as part of the assessment</p>

EVIDENCE GUIDE	
	<p>process wherever possible. Where assessment occurs off the job, judgement must consider evidence of the candidate's performance in a productive work environment that includes a sufficient range of appropriate tasks and materials to cover the scope of application for this unit.</p> <p>Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency.</p> <p>The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.</p>
Guidance information for assessment	<p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with welding using MMAW process or other units requiring the exercise of the skills and knowledge covered by this unit.</p> <p>Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.</p>

Range Statement

RANGE STATEMENT
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>

RANGE STATEMENT	
Welds	Welds include fillet and butt welds carried out in all positions
Materials	Materials may include ferrous materials including carbon or stainless steel, as well as non-ferrous metals and alloys suitable for MMA welding
Prepared	Preparation of materials may include: <ul style="list-style-type: none"> • pre-heating • setting up of jigs, fixtures and clamps • joint preparation (e.g. bevelling)
Equipment	Equipment may include AC or DC welding machines
Distortion prevention measures	Distortion prevention measures may include: <ul style="list-style-type: none"> • pre heating • setting up of jigs, fixtures and clamps
Rectified	Rectified refers to oxy acetylene, air arc equipment and grinding devices
Defects	Defects may include: <ul style="list-style-type: none"> • porosity • slag inclusions • discontinuities • lack of penetration • undercut

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare materials for gas metal arc welding (GMAW)	1.1. Weld requirements are identified from specifications and/or drawings 1.2. Material is correctly prepared 1.3. Materials are assembled/aligned to specification where required
2. Select welding components and consumables	2.1. Welding machine settings, accessories and consumables are identified and selected
3. Assemble and set up welding equipment	3.1. Welding equipment is assembled and set up
4. Minimise and rectify distortion	4.1. Appropriate distortion prevention measures are selected and applied 4.2. Distortion is rectified
5. Weld to job specification using GMAW	5.1. Weld deposit is to specifications 5.2. Joints are cleaned to specifications
6. Ensure weld conformance	6.1. Weld joints are visually inspected for conformance to specifications 6.2. Defects are removed with minimum loss of sound metal using correct and appropriate techniques and tools
7. Maintain weld records as required	7.1. Weld records are completed correctly

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying and interpreting welding specifications including appropriate standards e.g. Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent
- selecting and using appropriate tools and equipment

REQUIRED SKILLS AND KNOWLEDGE

- using a variety of welding machines and electrodes
- identifying and rectifying weld defects
- applying techniques for distortion prevention and rectification
- cleaning welds
- reading and interpreting information on sketches, written job instructions, specifications, standard operating procedures and engineering drawings
- recording routine information including routine weld records related to GMAW onto proformas and standard workplace forms
- following oral instructions
- measurement skills relating to joint preparation and GMAW

Required knowledge

Required knowledge includes:

- types of gases and their uses
- the relationships between amperage/wire feed, voltage, gas flow, electrode and material
- the application of weld metal transfer (short arc, spray etc.)
- correct welding machine, leads, hand pieces and electrodes
- material preparation
- joint preparations
- electrode classification
- causes of distortion for materials within the scope of this unit
- safe welding practices
- use and application of personal protective equipment for GMAW

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to prepare materials, select and set up the welding equipment, carry out GMAW and examine for and correct defects, in a range of welding activities associated with GMAW. Competency in this unit cannot be awarded until all prerequisites have been satisfied.

ELEMENT	PERFORMANCE CRITERIA
1. Prepare materials for gas tungsten arc welding (GTAW)	1.1. Weld requirements are identified from specifications and/or drawings 1.2. Material is correctly prepared 1.3. Materials are assembled/aligned to specification, where required
2. Select welding equipment and consumables	2.1. Welding equipment and electrodes, accessories and consumables appropriate to the material are identified and selected
3. Assemble and set up welding equipment	3.1. Welding equipment is assembled and set up
4. Minimise and rectify distortion	4.1. Appropriate distortion prevention measures for weld and material type are selected and applied 4.2. Distortion is rectified
5. Weld to job specification using GTAW	5.1. Weld deposit is to specifications 5.2. Joints are cleaned to specifications
6. Ensure weld conformance	6.1. Defects are removed with minimum loss of sound metal using techniques and tools appropriate to the defect, material and process 6.2. Weld joints are visually inspected for conformance to specifications
7. Maintain weld records as required	7.1. Weld records are completed correctly

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills include:

- identifying and interpreting welding specifications including appropriate standards e.g. Australian Standard 1554 General Purpose, American Bureau of Shipping (ABS) or equivalent
- selecting and using appropriate tools and equipment

REQUIRED SKILLS AND KNOWLEDGE

- using a variety of welding machines and electrodes
- identifying and rectifying weld defects
- applying techniques for distortion prevention and rectification
- cleaning welds
- reading and interpreting information on sketches, written job instructions, specifications, standard operating procedures and engineering drawings
- recording routine information including routine weld records related to GTAW onto proformas and standard workplace forms
- following oral instructions
- measurement skills relating to joint preparation and GTAW

Required knowledge

Required knowledge includes:

- correct welding machine, leads, hand pieces and electrodes
- material preparation
- joint preparations
- electrode classification
- causes of distortion for materials within the scope of this unit
- causes of defects and methods of rectification
- the relationships between amperage, electrode and material
- types of gases and their uses
- types of electrodes, current settings and high frequency voltage
- filler materials and consumables
- safe welding practices
- use and application of personal protective equipment for GTAW

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to prepare materials, select and set up the welding equipment, carry out the GTAW welding and examine for and correct defects, in a range of welding activities associated with GTAW. Competency in this unit cannot

EVIDENCE GUIDE	
	be awarded until all prerequisites have been satisfied.
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>Assessors must be satisfied that the candidate can competently and consistently apply the skills covered in this unit of competency in new and different workplace situations and contexts. Critical aspects of assessment and evidence include:</p> <ul style="list-style-type: none"> • following all safety procedures to protect self, other workers and members of the public • identifying and interpreting specifications for GTAW including Australian Standard 1554 General Purpose • interpreting welding specifications including standard welding symbols used to show weld procedure • selecting appropriate weld preparation methods for material and position of welds. • preparing materials, setting up of jigs, fixtures, clamps, etc. and joint preparation including bevelling • consistently welding different ferrous and non-ferrous materials to AS 1554 General Purpose or equivalent • identifying defects as described in the range statement across a range of welded materials • rectifying defects.
Context of and specific resources for assessment	<p>Welding to AS 1554 General Purpose or equivalent requires both theoretical knowledge and high practical skills. The assessment process must be designed to identify consistent performance to standard and specification across a range of materials and positions. The assessment must also identify a level of workplace performance in terms of defect rate and weld failure rates. It is recommended that assessment involve demonstrations of competency under both workshop and site conditions. This means that the ideal assessment environment is either on the job or a combination of both on and off the job.</p> <p>The competencies covered by this unit may be demonstrated by an individual working alone or as part of a team. Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. The locations of welds are identified in accordance with standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected to suit application.
4. Perform routine welding using GTAW	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned to standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with GTAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- using measurement skills for joint preparation and routine GTAW

Required knowledge

Look for evidence that confirms knowledge of:

- preparatory requirements
- properties and characteristics of materials and consumables
- equipment and equipment settings
- fuel gas properties and applications
- post welding treatments
- weld characteristics
- safe welding practices
- use and application of personal protective equipment for routine GTAW

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

A person who demonstrates competency in this unit must be able to perform routine gas tungsten arc welding (GTAW).

EVIDENCE GUIDE	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	Assessors must be satisfied that the candidate can competently and consistently perform all elements of the unit as specified by the criteria, including required knowledge, and be capable of applying the competency in new and different situations and contexts.
Context of and specific resources for assessment	<p>This unit may be assessed on the job, off the job or a combination of both on and off the job. Where assessment occurs off the job, that is the candidate is not in productive work, then an appropriate simulation must be used where the range of conditions reflects realistic workplace situations. The competencies covered by this unit would be demonstrated by an individual working alone or as part of a team. The assessment environment should not disadvantage the candidate.</p> <p>This unit could be assessed in conjunction with any other units addressing the safety, quality, communication, materials handling, recording and reporting associated with carrying out routine gas tungsten arc welding or other units requiring the exercise of the skills and knowledge covered by this unit.</p>
Method of assessment	Assessors should gather a range of evidence that is valid, sufficient, current and authentic. Evidence can be gathered through a variety of ways including direct observation, supervisor's reports, project work, samples and questioning. Questioning techniques should not require language, literacy and numeracy skills beyond those required in this unit of competency. The candidate must have access to all tools, equipment, materials and documentation required. The candidate must be permitted to refer to any relevant workplace procedures, product and manufacturing specifications, codes, standards, manuals and reference materials.
Guidance information for assessment	

Range Statement

RANGE STATEMENT

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Materials	Mild and low carbon steel
Prepared	Preheating, setting up jigs, fixtures, clamps, joint preparation
Equipment	Hoses, welding leads and gas shrouds, electrodes, gas regulator, liners, contact tips
Consumables	Tungsten electrodes, filler wire, shielding gas
Cleaned	Slag, spatter

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify weld requirements	1.1. Weld requirements are identified from job instructions. 1.2. Locations of welds are identified in according to standard operating procedures and job specifications.
2. Prepare materials for welding	2.1. Materials are cleaned and prepared ready for welding.
3. Prepare equipment for welding	3.1. Welding equipment is set up correctly. 3.2. Settings and consumables are selected to suit application.
4. Perform routine welding using GMAW	4.1. Safe welding practices are applied. 4.2. Materials are welded to job requirements. 4.3. Welds are cleaned to standard operating procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- preparing materials
- setting up welding equipment
- welding with GMAW
- reading and interpreting routine information on written job instructions, specifications and standard operating procedures
- following oral instruction
- using measurement skills relating to joint preparation and routine GMAW

Required knowledge

Look for evidence that confirms knowledge of:

- different current and voltage settings, gas flow rates wire diameters, wire feed speed and other variables to suit typical situations.
- material and equipment preparation
- properties and characteristics of materials and consumables
- equipment and equipment settings
- fuel gas properties and applications
- post-welding treatments
- weld characteristics
- safe welding practices
- use and application of personal protective equipment for routine GMAW

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting hand tools appropriate to the task
- using hand tools safely
- identifying hand tool defects and marking for repair
- maintaining/sharpening hand tools using appropriate techniques
- storing hand tools in accordance with manufacturers'/standard operating procedures

Required knowledge

Look for evidence that confirms knowledge of:

- applications of different hand tools in a general engineering context
- common faults and/or defects in hand tools
- procedures for marking unsafe or faulty tools for repair
- routine maintenance requirements for a range of hand tools
- storage location and procedures for a range of hand tools
- hazards and control measures associated with using hand tools
- use and application of personal protective equipment
- safe work practices and procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Look for evidence that confirms skills in:

- reading and following information on standard operating procedures
- following verbal instructions
- selecting power tools appropriate to the task
- using power tools safely
- using clamping/securing devices
- identifying power tool defects
- maintaining power tools using appropriate techniques
- sharpening tools/tool bits within the scope of this unit
- storing power tools according to manufacturers'/ standard operating procedures.

Required knowledge

Look for evidence that confirms knowledge of:

- application of different power tools
- clamping/securing methods
- adjustments/alignments to a range of power tools
- common faults and/or defects in power tools
- procedures for marking unsafe or faulty power tools for repair
- routine maintenance requirements of a range of power tools
- tool sharpening techniques for a range of power tools
- storage location and procedures of a range of power tools
- hazards/control measures associated with power tools
- use and application of personal protective equipment
- safe work practices and procedures

MSL904001 Perform standard calibrations

Modification History

Release 1. Supersedes and is equivalent to MSL904001A Perform standard calibrations

Application

This unit of competency covers the ability to calibrate test and measurement equipment in accordance with standard calibration procedures and documented test methods. These procedures/methods specify all associated reference standards, materials, equipment and methods to be used and the required parameters or quantities and ranges to be tested, including the criteria for rejection or approval.

This unit of competency is applicable to laboratory and calibration technicians who carry out tests and/or calibrations using standard calibration methods in first, second and third party laboratories, and laboratories where testing and/or calibration forms part of inspection or product certification. Personnel are not permitted to deviate from explicit instructions in any manner, modify the procedure, nor substitute alternative equipment. They work under limited supervision and results of their work are interpreted and checked by the laboratory supervisor, quality inspector or designated signatory.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Calibration

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 **Prepare items for** 1.1 Select the authorised calibration procedure in

- calibration** accordance with workplace procedures
- 1.2 Identify hazards and use appropriate personal protective equipment (PPE), safety equipment and procedures
 - 1.3 Confirm all measuring equipment meets the laboratory's specification requirements and complies fully with the calibration procedure
 - 1.4 Assemble and set up specified reference standards and associated equipment prior to testing
 - 1.5 Verify performance of reference standards and measuring equipment prior to use and adjust or calibrate as necessary
 - 1.6 Identify and minimise potential sources of measurement error
- 2 **Perform calibration**
- 2.1 Perform individual tests without variance according to the documented procedure to ensure repeatability of measurement
 - 2.2 Confirm readings are the result of a valid measurement and record data as required (as-found or before adjustment)
 - 2.3 Adjust device under test to bring readings within specification and record data (as-left or after adjustment) where required
 - 2.4 Analyse resulting test data to detect trends or inconsistencies that would significantly affect the accuracy or validity of test results
 - 2.5 Seek appropriate advice when interpretation of results is outside authorised scope of approval
- 3 **Document results**
- 3.1 Estimate and document uncertainty of measurement in accordance with workplace procedures, where required
 - 3.2 Document compliance/non-compliance with test requirements and/or specifications
 - 3.3 Record the results of each test/calibration accurately, unambiguously and objectively

- 3.4 Ensure confidentiality of workplace information
- 4 **Finalise calibration**
- 4.1 Prepare and issue a final report on the job/item detailing testing carried out, traceability, statement of compliance and relevant information as required
- 4.2 Report any non-compliance and verify next course of action with supervisor
- 4.3 Attach calibration labels, equipment stickers, quality control tags and tamper resistant seals as required in workplace procedures
- 4.4 Store test equipment/measurement standards and results in accordance with workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace procedures include the current version of one or more of:

- Australian and international standards and codes covering:
 - general requirements for the competence of testing and calibration laboratories, laboratory safety, quality and environmental management
 - accuracy of measurement methods and results, expression of uncertainty (GUM), quantifying uncertainty in analytical measurement, quality assurance of measurement equipment
- national work health and safety (WHS) standards and codes of practice

- registration/licensing and/or National Association of Testing Authorities (NATA) accreditation requirements
- safety requirements for equipment, materials or products; material safety data sheets (MSDS); and incident and accident/injury reports
- standard operating procedures (SOPs), recording and reporting procedures
- quality manuals, equipment and operating/technical manuals
- test methods and calibration procedures (validated and authorised)
- test methods and calibration procedures published by international, national or regional standards, reputable technical organisations, scientific texts or journals and equipment manufacturers
- laboratory layout, work flows and schedules

Standard calibrations

Standard calibrations include, but are not limited to, testing and/or calibrating the following equipment and reference materials using standard methods and procedures:

- test equipment, such as anemometers, balances, barometers, callipers, environmental chambers, hygrometers, manometers, masses, micrometers, pressure equipment, spectrophotometers, tape measures, rules, temperature (digital) indicating systems, thermometers, thermocouples, timing devices, vibration analysis equipment and weighing instruments
- electrical reference standards, such as air-lines, analogue meters, attenuators, bridges-manual balance, capacitors, DC voltage references, digital instruments (calibrators, DMMs, electronic transfer standards), inductors, instrument and ratio transformers, instrument transformer test sets, potentiometers, resistors, radio frequency (RF) power meters, RF thermistor mounts and thermal converters, shunts, time interval and frequency standards, transfer standards AC-DC, voltage dividers, volt ratio boxes and watt-hour references
- working standards, instruments and testing equipment, such as electromagnetic compatibility (EMC) test equipment, field strength meters, flammability test equipment, gauges/test fingers/test pins, hipot testers, impact hammers, impulse testers, instrument calibrators, network analysers, signal generators and spectrum and harmonic analysers

Hazards

Hazards include, but are not limited to, one or more of:

- electric shock

- disturbance or interruption of services
- manual handling of heavy equipment boxes
- sources of electromagnetic radiation (lasers and RF generators/transmitters)
- fluids under pressure
- heat sources, such as ovens

Safety procedures Safety procedures include, but are not limited, to one or more of:

- ensuring access to service shut-off points
- use of PPE, such as hearing protection, gloves, safety glasses and coveralls
- handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and workplace procedures and regulations
- regular cleaning of equipment and work areas

Reference materials Reference materials include, but are not limited to, one or more of:

- colour standards
- graded granular materials
- hardness blocks

WHS and environmental management requirements WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL904001A Perform standard calibrations

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSL904001 Perform standard calibrations

Modification History

Release 1. Supersedes and is equivalent to MSL904001A Perform standard calibrations

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- selecting and applying appropriate test methods and calibration procedures
- safely calibrating test and measurement equipment in accordance with standard calibration procedures and documented test methods on at least two (2) occasions
- maintaining close attention to all relevant procedures, regulatory requirements and the accuracy and precision of measurement to ensure the quality and integrity of test/calibration results
- critically examining each calibration step to ensure repeatability and validity of data
- using calibration and correction charts
- performing calculations to give results in appropriate accuracy, precision and units
- using statistical analysis (means, ranges and standard deviations) and estimation of uncertainty of measurement, where required (can use software)
- preparing test/calibration documentation that is accurate and complies with requirements
- recognising problems or departures in systems and documentation and initiating actions to prevent or minimise them
- recognising and reporting opportunities for improvements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- purpose of metrology and calibration, including common terminology, concepts, principles, procedures and applications
- National Association of Testing Authority's (NATA) and National Measurement Institute's (NMI) role in the measurement and testing system in Australia
- traceability, including legal requirements for traceability
- requirements for the competence of testing and calibration laboratories (e.g. AS ISO/IEC 17025) as they affect job role and responsibilities
- hierarchy and appropriate selection of reference materials and instruments
- non-conformance/non-compliance procedures and protocols associated with equipment, reference material and calibration procedures
- troubleshooting procedures for equipment and test methods
- reporting procedures and legislative requirements

- handling, transport, storage and operation of reference and working standards
- work health and safety (WHS) and laboratory environmental control requirements.

Additional knowledge requirements relevant to the workplace context that apply for different calibration fields must be assessed, including testing and calibration conducted in the following fields:

- acoustic and vibration measurement
- chemical testing
- construction materials testing
- electrical testing
- heat and temperature measurement
- mechanical testing
- metrology
- non-destructive testing
- optics and radiometry
- pressure measurement.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence (provided a record is kept) or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept).
- This unit of competency may be assessed with:
 - MSL924001 Process and interpret data
 - relevant MSL974000 series unit/s of competency
 - relevant MSL975000 series unit/s of competency
- Holistic assessment methods include:
 - review of calibration results, uncertainty calculations and workplace documentation completed by the candidate
 - feedback from supervisors and/or customers regarding quality of calibration services provided by the candidate

- observation of the candidate performing standard calibrations
- oral or written questioning to check required knowledge of standard calibration procedures.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - specialised calibration/test equipment, reference standards and laboratory facilities
 - calibration methods, procedures and equipment specifications
 - workplace quality manual and procedures.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL913002 Plan and conduct laboratory/field work

Modification History

Release 1. Supersedes and is equivalent to MSL913002A Plan and conduct laboratory/field work

Application

This unit of competency covers the ability to plan and complete tasks individually or in a team context. The tasks involve established routines and procedures using allocated resources with access to readily available guidelines and advice. Work plans may need to be modified with supervisor agreement to suit changing conditions and priorities.

This unit of competency is applicable to instrument operators, laboratory assistants and technical assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Communication/organisation

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 1 | Plan and organise daily work activities | 1.1 | Clarify allocated work activities and required resources if necessary |
| | | 1.2 | Prioritise work activities as directed |
| | | 1.3 | Break down work activities into small achievable |

- components and efficient sequences
- 1.4 Review work plan in response to new information, urgent requests, changed situations or instructions from appropriate personnel
 - 1.5 Update work plan and communicate changes to appropriate personnel
- 2 **Complete allocated work**
- 2.1 Locate relevant workplace procedures for required tasks
 - 2.2 Undertake tasks following prescribed and routine work-related sequences
 - 2.3 Seek assistance from relevant personnel when difficulties cannot be handled
 - 2.4 Record completion of activities to confirm outputs in accordance with plan
- 3 **Identify and resolve work problems**
- 3.1 Recognise problems or opportunities for improved work performance
 - 3.2 Apply agreed problem-solving strategies to consider possible causes and solutions
 - 3.3 Identify and access appropriate sources of help
 - 3.4 Consider available alternatives and keep them open before agreeing on the most appropriate action
- 4 **Work in a team environment**
- 4.1 Cooperate with team members to negotiate and achieve agreed outcomes, timelines and priorities
 - 4.2 Recognise personal abilities and limitations when undertaking team tasks
 - 4.3 Confirm personal role and responsibility within the team for particular outputs
 - 4.4 Demonstrate sensitivity to the diversity of other team members' backgrounds and beliefs

- 5 **Update knowledge and skills as required**
- 5.1 Recognise own strengths and weaknesses and take advantage of skill development opportunities

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering safety in laboratories, and quality and environmental management
- national work health and safety (WHS) standards and codes of practice

Ethical and professional work performance

Ethical and professional work performance includes:

- following workplace policy and procedures, regulations and legislation
- behaving honestly and openly
- respecting others and treating them with courtesy and impartiality
- working diligently and responsibly
- ensuring confidentiality of information, including client information and test results
- ensuring proprietary rights, intellectual property (IP) and copyright are protected

Workplace activities

Workplace activities include, but are not limited to, one or more of:

- set-up and pre-use checks of laboratory equipment
- calibration status checks
- sampling and testing following standard procedures
- maintenance and cleaning tasks

Workplace procedures

Workplace procedures include, but are not limited to, one or more of:

- standard operating procedures (SOPs)
- job descriptions, job cards, batch cards and production schedules
- test methods, recipes, procedures and protocols

Problem-solving strategies Problem-solving strategies include one or more of:

- accessing relevant documentation
- identifying inputs and outputs and sequencing a process
- identifying and rectifying a problem step
- obtaining timely help
- implementing preventative strategies wherever possible

Teams

Teams include one or more groups:

- with ongoing responsibility for particular services or functions
- who are project based
- who have a mixture of full and part-time employees and contractors, laboratory, construction and production personnel
- who are separated by distance and work at sites outside laboratory facilities

Team operation

Team operation occurs within one or more of:

- small, medium and large contexts
- internal and external environments
- workplace guidelines covering access and equity principles and practices, licensing requirements, industrial awards, workplace bargaining agreements and codes of practice
- agreed responsibility and accountability requirements
- appropriate goals, objectives and allocated resources

Strategies to maintain work flow

Strategies to maintain work flow include, but are not limited to, one or more of:

- communicating critical events on shift
- recognising shortages in reagents and problems with equipment
- communicating quality breakdowns
- recognising urgent and abnormal results to be processed
- communicating and behaving in a courteous manner
- being punctual

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL913002A Plan and conduct laboratory/field work

Links

Assessment Requirements for MSL913002 Plan and conduct laboratory/field work

Modification History

Release 1. Supersedes and is equivalent to MSL913002A Plan and conduct laboratory/field work

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- clarifying tasks and recognising resource needs
- planning, prioritising and completing tasks individually or in a team context
- following workplace procedures consistently to achieve quality outputs within required timelines
- identifying and resolving work problems
- recognising potential disruptions or changed circumstances and modifying work plan in conjunction with relevant personnel
- working effectively with team members who may have diverse work styles, cultures and perspectives
- promoting cooperation and good relations
- conducting work based on ethical values and principles
- adjusting to a variety of working environments
- seeking assistance from relevant personnel if difficulties arise.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- workplace procedures covering:
 - customer service and quality
 - work health and safety (WHS) and environmental legislative requirements relevant to job role
 - technical work that the candidate routinely performs
- ethical issues relevant to the nature of the candidate's work
- problem-solving strategies
- interpersonal communication and conflict resolution techniques.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace, or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL913001 Communicate with other people
 - MSL943002 Participate in laboratory or field workplace safety
 - technical units related to the tasks undertaken
- Holistic assessment methods include:
 - review of documents detailing completed tasks, such as completed job cards, a report or suggestions for quality improvements
 - feedback from supervisors, peers and team members
 - review of a flowchart prepared by the candidate to show efficient sequencing of tasks
 - written or oral questions to partly assess the candidate's ability to handle a range of contingencies and work in a team environment
 - observation of the candidate performing a range of technical tasks over sufficient time to demonstrate their handling of a variety of contingencies.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - workplace procedures, equipment and materials for relevant technical tasks.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL922001 Record and present data

Modification History

Release 1. Supersedes and is equivalent to MSL922001A Record and present data

Application

This unit of competency covers the ability to record and store data, perform simple calculations of scientific quantities and present information in tables and graphs. The unit of competency requires personnel to solve predictable problems using clear information or known solutions. Where alternatives exist, they are limited or apparent.

This unit of competency is applicable to production operators, field assistants and laboratory assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Data

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|------------------------------|-----|--|
| 1 | Record and check data | 1.1 | Enter data into laboratory information system or record sheets as directed |
| | | 1.2 | Check data to identify transcription errors or atypical entries |
| | | 1.3 | Rectify errors in data using workplace procedures |

2	Calculate simple scientific quantities	2.1	Calculate simple scientific quantities using given formulae and data
		2.2	Ensure calculated quantities are consistent with estimations and expectations
		2.3	Report all calculated quantities with appropriate precision and units
3	Present data	3.1	Present data accurately in tables, charts and graphs using given formats and scales
		3.2	Recognise and report obvious features and trends in data
4	Store and retrieve data	4.1	File and store data in accordance with workplace procedures
		4.2	Maintain workplace confidentiality standards

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or enterprise requirements include the latest version of one or more of:

- relevant Australian and international standards, such as the international system of units (SI) and its application
- national measurement regulations and guidelines

Data

Data includes:

- worksheets, spreadsheets or databases linked to information management systems
- results of observations, tests and measurements, or surveys
- graphs, tables and control charts
- semi quantitative observations expressed on a scale e.g. 1 to 4 or + to ++++

Work health and safety (WHS) and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Assessment Requirements for MSL922001 Record and present data

Modification History

Release 1. Supersedes and is equivalent to MSL922001A Record and present data

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- accurately coding, checking, recording and storing data in the required format
- performing simple calculations involving scientific quantities, with or without a calculator or computer software. The following must be performed:
 - decimals, fractions, ratios, proportions and percentages
 - unit conversion, multiples and submultiples
 - use of significant figures, rounding off, estimation and approximation
 - substitution of data in formulae
 - conversions between SI units
 - performing at least five (5) of the following calculations:
 - perimeters
 - angles
 - areas (m^2) and volumes (mL, L, m^3) of regular shapes (e.g. packaging and moulds)
 - average mass, mass %, density, specific gravity, moisture, relative and absolute humidity
 - ratios, such as mass to mass, mass to volume and volume to volume percentages
 - industry specific ratios, such as g/cm^2 , kg/m^2
 - concentration (e.g. $g/100mL$, mg/L , mg/L)
 - dilution
 - statistical values, such as mean, median, mode and standard deviation
 - average count, colonies per swab surface and cell counts (live and dead/total)
 - process variables, such as pressure, velocity and flow rates
 - % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
 - food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability
- preparing and interpreting straightforward tables, graphs and charts of data
- recognising obvious features and trends in data, including:
 - maximum and minimum values
 - spread of data

- increasing/decreasing data, rate of change
- outliers, data beyond control limits or normal range
- presenting accurate results in the required format
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- concepts of metrology, including:
 - that all measurements are estimates
 - repeated measurements belong to a sample of the measured parameter
 - repeatability, precision, accuracy and significant figures
- the international system of units (SI)
- scientific and technical terminology relevant to job role
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- procedures for maintaining and filing records, and security of data

work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment, and assessment evidence must be relevant to the particular workplace context. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in either case).
- This unit may be assessed with technical units, such as:
 - MSL973001 Perform basic tests
 - MSL973002 Prepare working solutions
 - MSL973007 Perform microscopic examination
- Holistic assessment methods include:

- review of data worksheets, calculations, graphs and tables prepared by the candidate
- review of records transcribed, maintained or stored by the candidate
- feedback from supervisors and peers
- observation of the candidate as they record data and perform calculations
- questions to assess understanding of relevant procedures and trends in data.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - data sets and records
 - computer and relevant software or laboratory information system
 - relevant workplace procedures.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL924001 Process and interpret data

Modification History

Release 1. Supersedes and is equivalent to MSL924001A Process and interpret data

Application

This unit of competency covers the ability to retrieve data, evaluate formulae and perform scientific calculations, present and interpret information in tables and graphs and keep accurate records. The unit requires personnel to solve problems of limited complexity where the information may be less obvious, but not contradictory, and can be determined by direct reasoning.

This unit of competency is applicable to laboratory assistants, field/laboratory technicians and instrument operators in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Data

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--------------------------------|-----|---|
| 1 | Retrieve and check data | 1.1 | Store and retrieve data using appropriate files and/or application software |
| | | 1.2 | Verify the quality of data using workplace procedures |
| | | 1.3 | Rectify errors in data using workplace procedures |

- | | | |
|---|---|---|
| 2 | Calculate scientific quantities | 2.1 Calculate statistical values for given data |
| | | 2.2 Calculate scientific quantities using given formulae and data and estimate uncertainties |
| | | 2.3 Ensure calculated quantities are consistent with estimations and expectations |
| | | 2.4 Report all calculated quantities using the appropriate units and correct number of significant figures |
| | | |
| 3 | Present data | 3.1 Present data in clearly labelled tables, charts and graphs |
| | | 3.2 Graph data using appropriate scales to span the range of data or display trends |
| | | 3.3 Report all data using the appropriate units and number of significant figures |
| | | |
| 4 | Interpret data | 4.1 Interpret significant features of tables, charts and graphs, including gradients, intercepts, maximum and minimum values, and limit lines |
| | | 4.2 Recognise and report trends in data |
| | | |
| 5 | Keep accurate records and maintain confidentiality | 5.1 Transcribe information accurately |
| | | 5.2 Verify the accuracy of records following workplace procedures |
| | | 5.3 File and store workplace records in accordance with workplace procedures |
| | | 5.4 File all reference documents logically and keep them up-to-date and secured |
| | | 5.5 Observe workplace confidentiality standards |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or enterprise requirements include the latest version of one or more of:

- Australian and international standards, guides and the National Association of Testing Authorities (NATA) Technical Notes that cover the application of international system of units (SI), accuracy of measurement methods and results, and quantifying uncertainty in measurement
- national measurement regulations and guidelines
- validated sampling and test procedures and spreadsheets developed in-house for assay and process calculations where applicable
- workplace procedures, manuals and/or plans covering quality assurance, customer service, material safety data sheets (MSDS), equipment, supplier catalogues and handbooks

Data

Data includes:

- worksheets, spreadsheets and/or databases linked to information management systems
- results of observations, tests and measurements, analyses, surveys and/or quality assurance and control assessments
-

Calculations

Calculations are performed with or without a calculator and using computer software, spreadsheets, databases and statistical packages

Records

Records include information associated with one or more of:

- purchase of equipment and materials, service records

- safety procedures
- history of calibration and test results

Work health and safety (WHS) and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Assessment Requirements for MSL924001 Process and interpret data

Modification History

Release 1. Supersedes and is equivalent to MSL924001A Process and interpret data

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- retrieving coding, recording and checking data
- calculating scientific and statistical quantities with or without a calculator or computer software, including the following items:
 - converting units involving multiples and submultiples
 - scientific notation, significant figures, round off, estimate and approximate
 - transposing and evaluating formulae
 - fractions, decimals, proportions and percentages
 - mean
 - median
 - mode
 - standard deviation
- performing at least five (5) of the following calculations:
 - perimeters and angles
 - percentage and absolute uncertainties in measurements and test results
 - areas (m^2) and volumes (mL , L , m^3) of regular shapes, such as packaging
 - dose (mg), average mass, mass percentage, density, specific gravity, moisture, relative and absolute humidity, viscosity and permeability
 - ratios, such as mass to mass, mass to volume and volume to volume percentages
 - concentration, such as molarity, $g/100mL$, mg/L , ppm , ppb , dilution mL/L
 - average count, colonies per swab surface and cell counts, such as live and dead/total
 - process variables, such as pressure, gauge pressure, velocity and flow rates
 - biological oxygen demand (BOD), chemical oxygen demand (COD) and total organic carbons (TOC)
 - food properties, such as % concentration (dry), friability, bitterness, brix, free amino nitrogen, diastatic power, calorific content and yeast viability, % content of moisture, ash, fat, protein, alcohol, sulphur dioxide and trace metals, such as calcium or zinc
 - mechanical properties, such as stress, strain, moduli and force
 - presenting accurate results in the required format (significant figures, uncertainty units)
- preparing and presenting data in the following formats:

- tables
- graphs
- line graphs
- histograms
- pie charts, bar charts and control charts
- semi-quantitative observations expressed on a scale (e.g. 1 to 4 or + to ++++)
- recognising and interpreting significant points, anomalies and trends in data
- maintaining the confidentiality of data in accordance with workplace and regulatory requirements
- keeping accurate records that are up-to-date and secure.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- concepts of metrology, including:
 - that all measurements are estimates
 - measurements belong to a population of measurements of the measured parameters
 - repeatability, precision, accuracy and significant figures
 - sources of error, and uncertainty associated with measurement steps
 - traceability
- the international system of units (SI)
- scientific and technical terminology relevant to job role
- procedures for coding, entering, storing, retrieving and communicating data
- procedures for verifying data and rectifying mistakes
- procedures for maintaining and filing records, and maintaining security of data
- work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL924002 Use laboratory application software
 - technical units, such as:
 - relevant MSL973000 series units of competency
 - relevant MSL974000 series units of competency.
- Holistic assessment methods include:
 - review of data worksheets, calculations, computer files (such as spreadsheets, databases and statistical analysis), graphs, tables and/or charts prepared by the candidate
 - review of records transcribed, maintained or stored by the candidate
 - feedback from supervisors and peers
 - questions to assess understanding of calculations, relevant procedures and trends in data
 - observation of the candidate as they process data, file and store records.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - data sets and records
 - a calculator
 - spreadsheets, computer software, databases and statistical packages
 - computer and relevant software or laboratory information system
 - relevant workplace procedures.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL924002 Use laboratory application software

Modification History

Release 1. Supersedes and is equivalent to MSL924002A Use laboratory application software

Application

This unit of competency covers the ability to use and apply computer software in the laboratory, field and/or production plants for analysis and reporting.

This unit of competency is applicable to technical officers and laboratory technicians in all industry sectors. It describes the application and use of software packages in the context of a laboratory or fieldwork. Typically this software would be for the storage, retrieval, analysis and display of information. There is no expectation that candidates would be able to customise the software to meet specific needs.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Data

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|------------------------------------|-----|--|
| 1 | Access application software | 1.1 | Identify software required for the task |
| | | 1.2 | Open software from a personal computer or network terminal |
| | | 1.3 | Use information sources to locate details of software |

features and instructions for its use

- | | | | |
|---|--|-----|---|
| 2 | Use software for specified purposes | 2.1 | Input a range of scientific data into a computing system |
| | | 2.2 | Conduct searches for the retrieval of required data |
| | | 2.3 | Use application features for efficient computation |
| | | 2.4 | Construct data sets and databases for numerical and graphical analyses |
| | | | |
| 3 | Produce reports of retrieved data and/or processed data | 3.1 | Analyse data using features of the software package |
| | | 3.2 | Select options for constructing data reports |
| | | 3.3 | Print the results of data analyses using features of the software package |
| | | 3.4 | Integrate data from diverse application software units in a report |
| | | 3.5 | Report the outcomes and rationale for database searches where appropriate |
| | | 3.6 | Reference data sources according to the style requirements of the workplace |
| | | | |
| 4 | Perform simple record housekeeping | 4.1 | Maintain archived data according to workplace standard procedures |
| | | 4.2 | Maintain hard copy data according to workplace standard procedures |
| | | 4.3 | Apply approved antivirus software and standard quarantine procedures |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes of practice, workplace standard procedures

Where reference is made to Australian/international standards, industry codes of practice or workplace standard procedures, the latest version must be used

Information sources

Information sources include, but are not limited to, one or more of:

- printed and/or online manuals of workplace standard instructions
- printed and/or online manuals for hardware and software
- on-screen instructions embedded in the software
- printed and/or online training materials that orient software to workplace needs
- online networks and communities of practice

Software packages

Software packages include:

- common applications, such as word processing, spreadsheets and databases
- graphical and statistical analysis applications
- database and laboratory information management systems

Work health and safety (WHS) and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Release 1. Supersedes and is equivalent to MSL924002A Use laboratory application software

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- selecting the most appropriate software package for the task from the suite of software applications available
- using software for the analysis, reporting and management of laboratory and field data and information, such as quality control and instrument performance characteristics
- using software application features and instructions to input, save, analyse, sort, retrieve and display records and data
- using in-house software manuals to augment skills and solve operational problems
- using virus scanning software to protect in-house software and data.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- terminology associated with the software packages used in job role
- basic knowledge of the types of spreadsheet, database and data analysis packages that are available
- application of specific software package features to laboratory tasks relevant to job role
- relationship between the protocol for data input and file storage of the data
- general file and record maintenance
- work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.

- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL925001 Analyse data and report results
 - relevant MSL974000 series units of competency
 - relevant MSL975000 series units of competency
- Holistic assessment methods include:
 - review of analysis tasks linking test results to the generation of reports by the candidate
 - review of simple statistical and/or graphical analysis of quality control data completed by the candidate.
- Access is required to all instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - a computer network, personal computer or laptop
 - software packages that cover databases, spreadsheets, statistical analysis and simple graphics output
 - input and output data.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competency and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months

MSL933001 Maintain the laboratory/field workplace fit for purpose

Modification History

Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Application

This unit of competency covers the general cleaning of work surfaces, cleaning and storage of equipment and the monitoring of laboratory stocks under direct supervision.

This unit of competency is applicable to laboratory assistants and instrument operators working in all industry sectors.

This unit of competency forms a major part of the work of laboratory assistants. They work in accordance with work instructions and standard operating procedures (SOPs) which incorporate all relevant aspects of work health and safety (WHS) legislation and the codes, guidelines, regulations and Australian Standards applying to environmental hazards and dangerous goods.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Quality

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|--|-----|---|
| 1 | Clean work preparation areas | 1.1 | Clean preparation areas using appropriate cleaning agents and equipment according to workplace procedures |
| | | 1.2 | Remove spillages, if they occur, using appropriate agents, personal protective equipment (PPE) and workplace procedures |
| | | 1.3 | Collect and segregate wastes in accordance with workplace procedures, relevant codes and regulations |
| 2 | Clean, maintain and store equipment | 2.1 | Collect used equipment, inspect for faults and, where necessary, remove from service |
| | | 2.2 | Use appropriate agents, apparatus and techniques to clean equipment |
| | | 2.3 | Store clean equipment in the designated locations and manner |
| 3 | Monitor stocks of materials and equipment | 3.1 | Perform stock checks and maintain records of usage as directed |
| | | 3.2 | Store labelled stocks for safe and efficient retrieval |
| | | 3.3 | Inform appropriate personnel of impending stock shortages to maintain continuity of supply |
| 4 | Maintain a safe work environment | 4.1 | Use established safe work practices and PPE to ensure personal safety and that of other personnel |
| | | 4.2 | Report potential hazards and/or maintenance issues in own work area to designated personnel |
| | | 4.3 | Minimise the generation of waste and environmental impacts |
| | | 4.4 | Dispose of waste in accordance with workplace procedures, relevant codes and regulations |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards, guidelines and codes covering WHS; laboratory design and construction; occupational protective equipment; labelling of workplace substances; storage, handling and transport of dangerous goods; environmental management; physical containment levels and facility types
- industry specific codes, regulations and guidelines, such as Australian Radiation Protection and Nuclear Safety Agency (ARPANSA) Codes of Practice, Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations and Import Guidelines, gene technology regulations, National Health and Medical Research Council (NHMRC) Guidelines, and animal welfare

Typical equipment

Typical equipment includes, but is not limited to, one or more of:

- balances; glassware; plastic ware; glass, plastic and quartz cuvettes, pipettes, burettes and volumetric glassware
- blending, mixing and separating equipment, such as sieves and centrifuges
- autoclaves, dishwashers, refrigerators, freezers, ovens, hotplates, mantles, burners and muffle furnaces, microwave ovens, ultrasonic cleaners, incubators and water baths, and gas cylinders
- fume hoods, biohazard containers and biological safety cabinets
- microtomes and tissue processors, cell counters and staining machines
- colorimeters/spectrometers and polarimeters, light and fluorescence microscopes
- thermometers, thermohygrographs, hydrometers, conductivity meters and pH meters and ion-selective electrodes, noise meters,

melting point apparatus, viscometers and instrument chart recorders

- steel ruler/tapes and spirit levels, shovels, scoops, plates, rods, cylinder moulds and buckets
- rifflers and splitters and mixers, compaction rammers and soil classification equipment, penetrometers, force measuring equipment and tensiometers, and hardness testing equipment
- animal cages
- vehicles

Typical materials

Typical materials include, but are not limited to, one or more of:

- consumable items, such as syringes, pipette tips and weigh boats
- PPE
- distilled water, reagents, chemicals, disinfectants, detergents, agar media and plates
- equipment spares, such as fuses, bulbs and batteries
- oils/lubricants, fuels, industrial gases and cryogenics, such as dry ice and liquid nitrogen
- paper and stationery
- reference samples and standards

Cleaning requirements

Cleaning requirements include one or more of:

- decontamination and/or disinfection
- hygiene monitoring
- minimising environmental impacts
- operation of automatic cleaning apparatus, such as pipette washers, ultrasonic cleaners and dishwashers
- sterilisation and disposal of wastes using boiling, high pressure air or steam, microwaves, chemicals, gas, filtration, ultraviolet radiation and autoclaving
- use of specialised techniques, such as chromic acid baths and soaking in hypochlorite

Preparation areas

Preparation areas include one or more of:

- benches
- fume cupboards
- sheds
- sinks
-

- Agents for cleaning** Agents for cleaning include one or more of:
- cleaning solutions
 - decontaminants
 - organic solvents
- Spillages** Spillages include one or more of:
- chemicals
 - radioactive materials
 - biologically active materials
- Waste** Waste includes, but is not limited to, one or more of:
- broken glass and sharps
 - disposable PPE
 - spent reagents, spent or excess samples and test pieces, solvents and batteries
 - used containers, boxes, bags and palettes, plastic and metals
 - microorganisms
- Stock records** Stock records include one or more of:
- calibration and maintenance history
 - data sheets
 - handbooks, warranty documents, catalogues, manuals and material safety data sheets (MSDS)
 - records of usage, loans and breakages
- Maintenance issues** Maintenance issues include, but are not limited to, one or more of:
- hygiene issues, prevention of contamination, cleaning, recycling and waste disposal
 - checking materials and equipment are fit for purpose, equipment malfunction, and checking serviceability before storage
 - potential hazards, incidents and emergencies, spillages, leakages, breakages and contamination
 - stock requirements and shortages, and storage constraints
- Hazards** Hazards include, but are not limited to, one or more of:
- sharps, broken glassware and hand tools

- aerosols from broken centrifuge tubes and pipetting
- microbiological organisms and agents associated with soil, air, water, blood and blood products, and human or animal tissue and fluids
- chemicals, such as acids, heavy metals, pesticides and hydrocarbons
- sources of ignition, flammable liquids and gases
- cryogenic agents, such as dry ice and liquid nitrogen
- electric shock
- fluids under pressure, such as steam and industrial gas cylinders
- crushing, entanglement and cuts associated with moving machinery or falling objects
- manual handling, working at heights and working in confined spaces
- occupational overuse syndrome, slips, trips and falls
- pedestrian and vehicular traffic
- solar radiation, dust and noise

Established safe work practices

Established safe work practices include, but are not limited to, one or more of:

- applying containment procedures through the use of appropriate equipment, such as biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets, and Class PCII, PCIII, and PCIV physical containment facilities
- ensuring access to service shut-off points
- following established manual handling procedures for tasks involving manual handling
- handling and storage of all hazardous materials and equipment in accordance with labelling, MSDS and manufacturer instructions
- identifying and reporting operating problems or equipment malfunctions
- labelling of samples, reagents, aliquoted samples and hazardous materials
- recognising and observing hazard warnings and safety signs
- reporting to appropriate personnel of abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/wastewater, gases, smoke, vapour, fumes, odours and particulates
- use of PPE, such as hard hats, hearing protection, gloves, safety glasses, goggles, face guards, coveralls, gown, body suits, respirators and safety boots

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Links

Assessment Requirements for MSL933001 Maintain the laboratory/field workplace fit for purpose

Modification History

Release 1. Supersedes and is equivalent to MSL933001A Maintain the laboratory/field workplace fit for purpose

Performance Evidence

- Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:
- following workplace procedures, relevant codes and guidelines when maintaining the laboratory/field workplace
- applying information contained in material safety data sheets (MSDS) for materials handled regularly during the performance of maintenance tasks
- working safely and minimising exposure of hazards to self, others and the laboratory
- safely cleaning work preparation areas and equipment using appropriate cleaning agents, equipment and techniques
- safely removing spillages and disposing of wastes
- safely storing equipment and materials using workplace procedures, relevant codes and guidelines
- monitoring and reporting stock levels and the condition of laboratory materials and equipment
- keeping accurate, up-to-date records

reporting potential hazards and maintenance issues using workplace procedures.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- workplace procedures for the cleaning of work preparation areas, materials and equipment
- storage requirements for specific materials and equipment
- workplace procedures for minimisation and disposal of waste
- workplace procedures for monitoring of laboratory stocks
- work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.

- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL943002 Participate in laboratory or field workplace safety
- Holistic assessment methods include:
 - observation of the candidate's techniques for cleaning and/or removal of spillages and waste disposal
 - review of stock records completed by the candidate
 - feedback from supervisors and peers
 - questioning to assess required knowledge of regulations and procedures where direct observation is difficult (such as dealing with hazards) and choice of materials and equipment.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - work preparation areas, stocks, materials and equipment, cleaning, decontamination and/or disinfection agents and equipment
 - personal protective equipment (PPE)
 - stock order forms, labels and records/forms.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL933004 Perform calibration checks on equipment and assist with its maintenance

Modification History

Release 1. Supersedes and is equivalent to MSL933004A Perform calibration checks on equipment and assist with its maintenance

Application

This unit of competency covers the ability to perform set-up, pre-use and in-house calibration/validation checks on equipment and assist with its maintenance.

This unit of competency is applicable to laboratory assistants working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Perform set-up and pre-use checks of laboratory equipment	1.1	Perform laboratory equipment set-up and pre-use checks in accordance with workplace procedures
	1.2	Perform safety checks in accordance with relevant workplace and instrumental procedures
	1.3	Identify faulty or unsafe components and equipment and report to appropriate personnel
	1.4	Complete equipment log books/records to meet

- workplace requirements
- 2 **Perform calibration checks**
 - 2.1 Start up equipment according to operating procedures
 - 2.2 Use specified standards for calibration check
 - 2.3 Check equipment in accordance with calibration procedures and schedules
 - 2.4 Record all calibration data accurately and legibly
 - 2.5 Compare data with specifications and/or previous records to identify non-compliant equipment
 - 2.6 Quarantine out-of-calibration equipment

 - 3 **Assist with equipment maintenance**
 - 3.1 Ensure all equipment work areas are clean during and after equipment use
 - 3.2 Perform basic maintenance in accordance with workplace procedures
 - 3.3 Clean and store equipment according to workplace and/or manufacturer's specifications/procedures
 - 3.4 Identify and replace, repair or dispose of damaged/worn equipment as appropriate

 - 4 **Maintain records**
 - 4.1 Record and report information on unsafe or faulty equipment according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety and quality management
- national work health and safety (WHS) standards and codes of practice, national measurement regulations and guidelines
- industry specific codes, regulations and guidelines, such as good laboratory practice (GLP)
- workplace documents, such as standard operating procedures (SOPs), quality and equipment manuals, calibration check and maintenance schedules, material safety data sheets (MSDS) and safety procedures, material, production and product specifications, production and laboratory schedules, workplace recording and reporting procedures, and waste minimisation and safe disposal procedures

Typical equipment

Typical equipment includes, but is not limited to, one or more of:

- balances; glassware; plastic ware; glass, plastic and quartz cuvettes, pipettes, burettes and volumetric glassware
- blending, mixing and separating equipment, such as sieves and centrifuges
- autoclaves, dishwashers, refrigerators, freezers, ovens, hotplates, mantles, burners and muffle furnaces, microwave ovens, ultrasonic cleaners, incubators and water baths, and gas cylinders
- fume hoods, biohazard containers and biological safety cabinets
- microtomes and tissue processors, cell counters and staining machines
- colorimeters/spectrometers and polarimeters, light and fluorescence microscopes
- thermometers, thermohygrographs, hydrometers, conductivity meters and pH meters and ion-selective electrodes, noise meters, melting point apparatus, viscometers and instrument chart recorders
- steel ruler/tapes and spirit levels, shovels, scoops, plates, rods, cylinder moulds and buckets
- riffles and splitters and mixers, compaction rammers and soil classification equipment, penetrometers, force measuring

equipment and tensiometers, and hardness testing equipment

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL933004A Perform calibration checks on equipment and assist with its maintenance

Assessment Requirements for MSL933004 Perform calibration checks on equipment and assist with its maintenance

Modification History

Release 1. Supersedes and is equivalent to MSL933004A Perform calibration checks on equipment and assist with its maintenance

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- performing set-up and pre-use checks for at least three (3) items of equipment
- recognising non-standard behaviour of equipment
- performing calibration checks for at least two (2) items of basic equipment using standard procedures
- obtaining reliable calibration data with the required accuracy and precision
- identifying non-compliant equipment by comparing calibration data with specifications and/or previous data records
- following workplace data recording and reporting procedures
- performing basic cleaning and/or maintenance tasks for at least three (3) items of equipment
- following all relevant work health and safety (WHS) and environmental management requirements.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- role and importance of regular calibration checks and maintenance of equipment
- function of key components of the equipment and details of the pre-use, calibration and safety checks and operating procedures for items of equipment used
- sources of uncertainty in equipment operation and their control
- basic equipment cleaning, maintenance and storage procedures for items of equipment used
- workplace procedures for recording data and reporting results
- relevant hazards, WHS and environmental management requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.

- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL973001 Perform basic tests
- Holistic assessment methods include:
 - review of equipment log book entries, calibration data and maintenance records generated by candidate
 - feedback from peers and supervisors about the candidates ability to perform calibration checks and assist with basic maintenance
 - observation of the candidate performing equipment set-up, pre-use checks, shutdown procedures, calibration checks, cleaning and maintenance tasks
 - oral or written questioning to check required knowledge of workplace procedures for the safe use, cleaning and maintenance of the items of equipment used.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - standard laboratory equipped with appropriate equipment and reference materials; cleaning, decontamination and/or disinfection agents and equipment; and personal protective equipment (PPE)
 - workplace procedures, equipment manuals and information/records management system.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL934002 Apply quality system and continuous improvement processes

Modification History

Release 1. Supersedes and is equivalent to MSL934002A Apply quality system and continuous improvement processes

Application

This unit of competency covers the exercise of good laboratory practice (GLP) and effective participation in quality improvement teams. Personnel are required to ensure the quality and integrity of their own work, detect non-conformances and work with others to suggest improvements in productivity and quality.

This unit of competency is applicable to laboratory technicians working in all industry sectors who contribute to quality improvements in areas or processes associated with their own job function and/or specialisation. This unit of competency is relevant to experienced technical officers who may work individually or as part of a team.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Quality

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|---|-------------------------------|-----|--|
| 1 | Satisfy quality system | 1.1 | Access information on quality system requirements for own job function |
|---|-------------------------------|-----|--|

requirements in daily work	1.2	Record and report quality control data in accordance with quality system
	1.3	Follow quality control procedures to ensure products or data are of a defined quality as an aid to acceptance or rejection
	1.4	Recognise and report non-conformances or problems
	1.5	Conduct work in accordance with sustainable work practices
	1.6	Promote sustainability principles and work practices to other workers
	2 Analyse opportunities for corrective and/or optimisation action	2.1
2.2		Recognise variances that indicate abnormal or sub-optimal performance
2.3		Collect and/or evaluate batch and/or historical records to determine possible causes for sub-optimal performance
2.4		Use appropriate quality improvement techniques to rank the probabilities of possible causes
3 Recommend corrective and/or optimisation actions	3.1	Analyse causes to predict likely impacts of changes and decide on the appropriate actions
	3.2	Identify required changes to standards and procedures and training
	3.3	Report recommendations to designated personnel
4 Participate in the implementation of recommended actions	4.1	Implement approved actions and monitor performance following changes to evaluate results
	4.2	Implement changes to systems and procedures to eliminate possible causes
	4.3	Document outcomes of actions and communicate them to relevant personnel

- | | | | |
|---|--|-----|--|
| 5 | Participate in the development of continuous improvement strategies | 5.1 | Review all relevant features of work practice to identify possible contributing factors leading to sub-optimal performance |
| | | 5.2 | Identify options for removing or controlling the risk of sub-optimal performance |
| | | 5.3 | Assess the adequacy of current controls, quality methods and systems |
| | | 5.4 | Identify opportunities to continuously improve performance |
| | | 5.5 | Develop recommendations for continual improvements of work practices, methods, procedures and equipment effectiveness |
| | | 5.6 | Consult with appropriate personnel to refine recommendations before implementation of approved improvement strategies |
| | | 5.7 | Document outcomes of strategies and communicate them to relevant personnel |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories,

quality management systems and plans, measurement management, and sampling and testing

- national work health and safety (WHS) standards and codes of practice, and National Association of Testing Authorities (NATA) accreditation program requirements
- national measurement regulations and guidelines
- specific codes, regulations guidelines, procedures and methods, such as Australia New Zealand Food Standards (ANZFS) Code, Australian code of good manufacturing practice for medicinal products (GMP), principles of good laboratory practice (GLP), National Health and Medical Research Council (NHMRC) Guidelines, and Therapeutic Goods Regulations
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- customer-specific requirements/standards

Quality control procedures

Quality control procedures include one or more of:

- standards imposed by regulatory and licensing bodies
- working to a customer brief or batch card and associated quality procedures
- checklists to monitor job progress against agreed time, costs and quality standards
- preparation of sampling plans
- the use of hold points to evaluate conformance
- the use of inspection and test plans to check compliance

Sustainable work practices

Sustainable work practices include, but are not limited to, one or more of:

- examining work practices that use excessive electricity
- switching off equipment when not in use
- regularly cleaning filters
- insulating rooms and buildings to reduce energy use
- recycling and reusing materials wherever practicable
- minimising process waste

Quality improvement

Quality improvement tools and techniques include using one or

tools and techniques	<p>more of:</p> <ul style="list-style-type: none">• plan, do, check, act (PDCA)• Ishikawa fishbone diagrams and cause and effect diagrams, logic tree, similarity/difference analysis, Pareto charts and analysis, force field/strength, weakness, opportunities, threats (SWOT) analysis• run charts, control charts, histograms and scattergrams to present routine quality control data• statistical analysis of quality control data, mean, median, mode, ranges and standard deviations
Communication	<p>Communication includes interactions with one or more:</p> <ul style="list-style-type: none">• supervisors, managers and quality managers• administrative, laboratory and production personnel• internal/external contractors, customers and suppliers
Quality improvement opportunities	<p>Quality improvement opportunities include, but are not limited to, one or more of:</p> <ul style="list-style-type: none">• production processes• hygiene and sanitation procedures• reductions in waste and re-work• laboratory layout and work flow• safety procedures• communication with customers• methods for sampling, testing and recording data
Documenting and reporting information about quality	<p>Documenting and reporting information about quality includes, but are not limited to, one or more of:</p> <ul style="list-style-type: none">• verbal responses• data entry into laboratory or workplace database• brief written reports using workplace proformas
WHS and environmental management requirements	<p>WHS and environmental management requirements include:</p> <ul style="list-style-type: none">• complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time• applying standard precautions relating to the potentially

hazardous nature of samples

- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Assessment Requirements for MSL934002 Apply quality system and continuous improvement processes

Modification History

Release 1. Supersedes and is equivalent to MSL934002A Apply quality system and continuous improvement processes

Performance Evidence

- Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:
- applying relevant quality control procedures and regulatory requirements to ensure the quality and integrity of the products/services or data provided in work area
- applying and promoting sustainability principles and work practices in work area
- detecting non-conforming products or services and recognising opportunities for improvements in work area
- using at least three (3) quality improvement tools and techniques to analyse performance in work area
- applying effective problem-solving strategies, such as identifying inputs and outputs, sequencing a process, identifying and rectifying a problem step, and root cause analysis
- following workplace procedures for recording and reporting information about quality
- implementing and monitoring approved actions, changes and improvement strategies consulting and working with other team members to suggest improvements in productivity and quality.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- business goals and quality requirements associated with job function and/or work area as a basis for decision making and action
- scientific and technical requirements of the processes, procedures, equipment and instrumentation associated with the candidate's work tasks and duties
- specifications for laboratory products and services in the work area
- sustainable energy principles
- workplace procedures associated with the candidate's regular technical duties
- layout of the workplace, divisions and laboratory
- organisational structure of the workplace
- lines of communication
- role of laboratory services to the workplace and customers
- work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL924001 Process and interpret data
 - MSL954001 Obtain representative samples in accordance with sampling plan
 - relevant MSL974000 series units of competency
 - relevant MSL975000 series units of competency
- Holistic assessment methods include:
 - review of documentation completed by the candidate as part of regular quality control
 - feedback from supervisors and/or customers regarding quality of products/services and/or data regularly provided by the candidate
 - observation of the candidate's performance and participation in quality improvement teams over time in the workplace
 - review of reports from quality improvement teams where the candidate's role is clearly outlined and verified
 - verified reports of improvements suggested and implemented by the candidate individually
 - use of suitable simulations and/or a pilot plant and/or a range of quality improvement case studies and scenarios.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - workplace quality manual and procedures, quality control data/records
 - customer complaints and rectifications.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.

- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL934003 Maintain and control stocks

Modification History

Release 1. Supersedes and is equivalent to MSL934003A Maintain and control stocks

Application

This unit of competency covers the ability to order, maintain and control the use of laboratory materials and/or equipment in the work area.

This unit of competency is applicable to technicians and technical officers working in all industry sectors.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Quality

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1	Maintain and control stocks of materials or equipment	1.1	Label, document and store stocks in accordance with relevant standards and specific safety requirements
		1.2	Follow stock rotation procedures to maximise use of stocks within permitted shelf life
		1.3	Identify stock discrepancies and replace redundant or outdated stocks to maintain stocks at prescribed level

- 1.4 Identify and replace damaged/worn equipment or arrange for repairs or disposal as appropriate
 - 1.5 Initiate quality control sampling and testing procedures when appropriate
 - 1.6 Report stock problems outside own knowledge and authority limitations to relevant personnel
- 2 **Order and receive materials and equipment**
- 2.1 Determine requirements of customers and suppliers using appropriate communication and interpersonal skills
 - 2.2 Determine demand for stock, taking into account peak and seasonal variations in stock usage and production conditions
 - 2.3 Place and/or follow up approved orders using workplace systems and procedures
 - 2.4 Check condition of received goods and take appropriate action
- 3 **Maintain stock records**
- 3.1 Record all relevant details accurately using the specified forms/computer system
 - 3.2 Ensure that written information is legible and indelible
 - 3.3 File all records in the designated place
- 4 **Maintain a safe work environment**
- 4.1 Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel
 - 4.2 Minimise the generation of wastes and environmental impacts
 - 4.3 Ensure the safe collection of redundant/outdated stocks for subsequent disposal

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories; laboratory design and construction; laboratory safety; quality and environmental management; and labelling, storage, handling and transport of hazardous substances
- national work health and safety (WHS) standards and codes of practice, national measurement regulations and guidelines, and national environmental protection measures
- specific legislation, regulations, codes, guidelines, procedures and methods, such as Australian code of good manufacturing practice for medicinal products (GMP), principles of good laboratory practice (GLP), dangerous goods, animal welfare, Australian Quarantine and Inspection Service (AQIS) Export Control Orders and Import Guidelines, Australian Radiation Protection and Nuclear Safety Agency (ARPANSA), gene technology, and National Health and Medical Research Council (NHMRC)
- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- customer database and supplier catalogues, customer-specific requirements/standards, internal/external stock orders and overdue actions

Workplace

Workplace procedures include, but are not limited to, one or more of:

procedures

- ordering, purchase and receipt of stocks
- verification of temperature control for delivered and stored stocks (e.g. reagents containing enzymes)
- organisation of compatible batch or lot numbers
- storage of stocks, stock control and rotation of stock
- quality control testing, monitoring of use by dates of standards and shelf life of reagents (e.g. DNA, enzymes, antibodies, radioisotopes and vitamins)
- reporting non-conformances

Records

Records include, but are not limited to, one or more of:

- current inventories, stock usage, orders and progress of orders
- equipment servicing and repairs
- quality control sampling, testing and stock rotation

Hazards

Hazards include, but are not limited to, one or more of:

- electric shock
- chemicals, such as acids and hydrocarbons
- microbiological organisms associated with blood and blood products
- radioisotopes
- sharps, such as broken glassware
- disturbance or interruption of services
- manual handling of heavy boxes
- fluids under pressure and industrial gas bottles

Safety procedures

Safety procedures include:

- use of personal protective equipment (PPE), such as hearing protection, gloves, safety glasses, coveralls and safety boots
- ensuring access to service shut-off points
- handling and storing hazardous materials and equipment in accordance with labels, MSDS, manufacturer's instructions, and workplace procedures and regulations
- regular cleaning of equipment and work areas

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be

compromised at any time

- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL934003A Maintain and control stocks

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSL934003 Maintain and control stocks

Modification History

Release 1. Supersedes and is equivalent to MSL934003A Maintain and control stocks

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- accessing online databases and/or catalogues efficiently
- following workplace procedures for predicting and/or determining demand for stock; and researching, ordering and receiving stock, materials and equipment
- maintaining stocks of materials and equipment at prescribed levels for the work area, through regular inspections, timely ordering of replacement items and follow-up of late orders
- performing quality control sampling and testing and rotating stock in accordance with workplace procedures
- managing peak and seasonal variations in stock usage and production conditions
- interpreting labelling information (lot number, batch and date) and material safety data sheets (MSDS) correctly
- applying procedures for safe (manual) handling, storage and transport of stocks
- completing and recording all stock records and documentation accurately
- demonstrating effective communication and interpersonal skills when dealing with customers and suppliers.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- terminology associated with ordering and storage of stocks
- laboratory stock, product and service information relevant to job role
- types of hazardous chemical reactions and the rationale for recommended storage systems
- workplace procedures and quality system requirements for stock control
- codes of practice and regulations concerning the labelling, handling, storage and transport of stock relevant to job role
- relevant hazards, work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.

- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL935004 Maintain instruments and equipment
- Holistic assessment methods include:
 - review of documentation for orders prepared by the candidate
 - examination of stock records maintained by the candidate
 - feedback from the laboratory manager, quality manager, customer service manager, supervisor, customers and peers
 - oral or written questioning to check knowledge of the maintenance and control requirements for a selection of stock
 - observation of the candidate handling stock and conducting quality control sampling and testing.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - stocks of materials and equipment
 - stock order forms and documentation
 - sampling and testing equipment
 - online information systems, inventories, print records, databases and catalogues
 - codes of practice and regulations concerning the handling, storage and transport of the stock.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL973007 Perform microscopic examination

Modification History

Release 1. Supersedes and is equivalent to MSL973007A Perform microscopic examination

Application

This unit of competency covers the ability to set up a light microscope for optimum resolution, to prepare routine samples and to observe, identify and report sample characteristics.

This unit of competency is applicable to laboratory or technical assistants in all industry sectors. The unit of competency covers limited interpretation and analysis of results. Troubleshooting of equipment and procedures is not required.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

Nil

Competency Field

Testing

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--------------------------------------|--|
| 1 Interpret test requirements | 1.1 Review test request to identify samples to be tested, test method and equipment involved |
| | 1.2 Identify hazards associated with the sample, preparation methods and equipment, and implement workplace control measures |

- | | | | |
|---|--|-----|---|
| 2 | Set up work area for preparation and examination of samples | 2.1 | Collect equipment and arrange the workspace so that equipment can be used safely and efficiently |
| | | 2.2 | Perform pre-use and safety checks to ensure equipment is fit for purpose and report faulty or unsafe equipment to appropriate personnel |
| | | | |
| 3 | Prepare samples for examination | 3.1 | Log and label samples according to workplace procedures to ensure traceability |
| | | 3.2 | Check suitability of the original and prepared sample for the examination, and report unsuitable samples to appropriate personnel |
| | | 3.3 | Prepare and store the sample for examination following workplace methods |
| | | | |
| 4 | Set up and use a light microscope | 4.1 | Set up the light path to optimise resolution |
| | | 4.2 | Select the appropriate objectives and filter for the sample being examined |
| | | 4.3 | Ensure that the lenses are clean |
| | | 4.4 | Adjust settings and alignment of the light path to optimise performance |
| | | 4.5 | Place sample correctly on the stage |
| | | | |
| 5 | Observe, identify and report sample characteristics | 5.1 | Recognise and identify significant sample characteristics |
| | | 5.2 | Perform required calculations accurately |
| | | 5.3 | Prepare and view control samples and check that results are consistent with expected values |
| | | 5.4 | Identify and report out-of-specification or atypical results promptly to appropriate personnel |
| | | 5.5 | Record and report data in accordance with workplace procedures |

- | | | | |
|---|---|-----|---|
| 6 | Maintain a safe work environment | 6.1 | Ensure safety and minimise cross-contamination through the use of personal protective equipment (PPE) |
| | | 6.2 | Handle all samples and equipment in accordance with workplace safety protocols |
| | | 6.3 | Clean up spills using appropriate techniques to protect personnel, work area and environment |
| | | 6.4 | Minimise generation of waste and environmental impacts |
| | | 6.5 | Collect and dispose of all wastes safely |
| | | 6.6 | Report hazards and incidents to designated personnel using workplace procedures |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety and quality management
- national work health and safety (WHS) standards and codes of practice, and national measurement regulations and guidelines
- specific codes, guidelines and procedures, such as National Association of Testing Authorities (NATA) accreditation requirements, principles of good laboratory practice (GLP), and Australian code of good manufacturing practice for medicinal

products (GMP)

- workplace documents, such as standard operating procedures (SOPs); quality and equipment manuals; calibration and maintenance schedules; material safety data sheets (MSDS) and safety procedures; material, production and product specifications; production and laboratory schedules; workplace recording and reporting procedures; and waste minimisation and safe disposal procedures
- workplace procedures for microscopic examination of samples

Preparation of samples

Preparation of samples includes, but is not limited to, one or more of:

- drying and cooling
- physical separation, centrifugation, filtration and chemical separation
- sub-sampling
- labelling
- aseptic transfer of specimen
- thin film or smear on a slide
- fixing of films to minimise cell damage and the production of artefacts
- staining of fixed material to illustrate required characteristics
- mounting of stained films, sections and whole mounts to ensure long-term preservation
- permanent labels for smears, films and sections for presentation, storage and retrieval
- selection of diluent to preserve or enhance visibility of the cells to be counted
- serial dilution to enable individual cells to be reliably counted
- filling a counting chamber in one continuous flow without bubbles or overflow
- selection, filling and cover slipping of a clean, dry counting chamber to ensure even distribution of cells during filling

Biological samples

Biological samples include, but are not limited to, one or more of:

- smears, impression smears, sections, squashes, films and whole mounts
- a monolayer of cells in smears and films
- fixed smears for demonstration of bacteria by the methylene blue and Gram staining techniques
- blood films stained by a Romanowsky technique to clearly show differentiation of granulocytes
- stained sections of animal tissues using regressive haematoxylin

- and eosin to differentiate cytoplasmic and nuclear detail
- differentially stained monocotyledon and dicotyledon stem sections to demonstrate the structure of vascular bundles (xylem, phloem and cambium)
 - stained whole mounts of helminths
 - whole mounts, such as liver flukes, planaria and samples of animal faeces to demonstrate ova, cysts and larvae
 - pond water organisms
 - onion root tip squash
 - midstream sample of urine

Physical samples

Physical samples include, but are not limited to, one or more of:

- sand
- asbestos fibres
- coal samples
- construction materials for testing
- geological specimens

Sample characteristics

Sample characteristics are restricted to what can be viewed by bright light microscopy and include, but are not limited to, one or more of:

- shape and size of particles
- presence of contamination
- colour
- consistency and variability
- number of cells (e.g. cells in blood or other particulate samples, such as a yeast suspension or pollen grains)
- type of cells, percentage of atypical cells, presence/absence of cells, size of cells, viable and non-viable cells and trajectory
- presence of stained material, such as starch
- colour/staining and morphology
- motility

Workplace safety procedures

Workplace safety procedures include, but are not limited to, one or more of:

- ergonomic layout, correct illumination and organisation of workbench
- use of biohazard containers and laminar flow cabinet
- correctly labelling reagents and hazardous materials
- use of PPE, such as safety glasses, gloves and coveralls
- handling and storing hazardous materials and equipment in

- accordance with labels, MSDS and manufacturer instructions
- regularly cleaning and decontaminating equipment and work areas

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL973007A Perform microscopic examination

Assessment Requirements for MSL973007 Perform microscopic examination

Modification History

Release 1. Supersedes and is equivalent to MSL973007A Perform microscopic examination

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- safely performing microscopic examination of at least three (3) different samples and correctly identifying and reporting the characteristics of each
- checking suitability of samples, such as labelling, spillage, spoilage due to incorrect storage and transport conditions, temperature control and suitability for the examination
- safely preparing routine biological and/or physical samples in accordance with workplace procedures or standard methods
- checking the quality of prepared samples, such as:
 - clean and scratch-free microscope slides to reduce artefacts
 - preparation according to specified procedure/method
 - homogeneous suspension of sample
 - films and smears that have been fixed rapidly
 - thin films with a monolayer of cells
 - appropriate whole mounts for intact organisms
 - correct sample identification during and after processing
- performing pre-use checks of equipment, such as calibration, routine cleaning and maintenance, and use by dates of reagents
- setting up a light microscope for optimal resolution
- accurately observing, identifying and reporting sample characteristics
- performing counts on samples and basic measurements using grids
- performing accurate calculations as required by the method, such as:
 - dilutions
 - percentage viability
 - number of cells in original sample after dilution
 - calculation of cells/ml in a number of squares of a counting chamber
- interpreting and recording test results reliably
- logging and tracking samples through all steps from sample receipt to completion of the examination and reporting
- minimising cross-contamination and contamination of the laboratory and environment
- using personal protective equipment (PPE) and safety procedures to maintain personal safety and that of others

- handling/storing samples and equipment and collecting/disposing of waste in accordance with workplace procedures.

Knowledge Evidence

Must provide evidence that demonstrates knowledge of:

- nature of samples, sample preparation methods, methods of examination and associated hazards
- parts and functions of a light microscope and steps taken to optimise the resolution of images
- importance and appropriate use of controls and certified reference materials
- workplace and/or legal traceability requirements
- relevant work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgement of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL922001 Record and present data
 - MSL933002 Contribute to the achievement of quality objectives
 - MSL943002 Participate in laboratory or field workplace safety
 - MSL953001 Receive and prepare samples for testing
- Holistic assessment methods include:
 - review of data records prepared by the candidate, such as counts, observations and results
 - feedback from supervisors and peers about adherence to workplace procedures and sample preparation/examination methods
 - observation of the candidate performing microscopic examinations
 - oral/written questions about workplace procedures covering safe preparation and examination of samples.

- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - a standard laboratory equipped with appropriate equipment, including light microscopes and samples
 - workplace procedures, standard methods and materials
 - equipment, such as glass slides, counting chambers (e.g. haemocytometer), optical graticules and stage micrometers, and tissue culture flasks
 - a light microscope, such as:
 - bright field illumination microscope up to 1000 x magnification
 - stereomicroscopes and dissection microscopes
 - compound microscope
 - phase contrast microscope
 - inverted microscope.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience.
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.

MSL975017 Perform laboratory-based ecological techniques

Modification History

Release 1. Supersedes and is equivalent to MSL975017A Perform laboratory-based ecological techniques

Application

This unit of competency covers the ability to participate in laboratory investigations involving animals, plants and related environmental parameters. The animals or plants might be single specimens, parts of specimens or be in culture or under propagation. The investigations might also be part of experimental models that examine interactions of animals and/or plants and their environments. Investigations would generally relate to taxonomy, physiology and pathology, and would be oriented to scientific research, food production and manufacture, and to investigation of biological environments and ecosystems.

This unit of competency is applicable to laboratory technicians and technical officers working in biological, biotechnology and environmental industry sectors. It is expected that all work would conform to statutory and work health and safety (WHS) codes of practice. This unit of competency assumes that personnel perform tests and procedures under the close supervision of scientific staff and that the workplace will equip its workers with relevant animal handling skills should they be required. The unit does not cover procedures related to the handling of vertebrates that are subject to national and state/territory animal care and ethics regulations.

While no specific licensing or certification requirements apply to this unit at the time of publication, laboratory operations are governed by relevant legislation, regulations and/or external accreditation requirements. Local requirements should be checked.

Pre-requisite Unit

MSL974006 Perform biological procedures

Competency Field

Testing

Unit Sector

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|---|---|---|
| 1 | Process specimens and documentation | <p>1.1 Check specimens and request forms for labelling and documentation before acceptance</p> <p>1.2 Log specimens, applying required document tracking mechanisms</p> <p>1.3 Dispatch specimens to referral laboratories as required</p> <p>1.4 Store specimens appropriately until required for testing</p> |
| 2 | Participate in the identification and classification of species | <p>2.1 Record macroscopic and/or microscopic details of specimens to assist in their identification and classification</p> <p>2.2 Use taxonomic keys to assist in the identification and classification of species</p> <p>2.3 Perform laboratory analyses that can assist in identification and classification of species</p> <p>2.4 Preserve specimens for future reference</p> <p>2.5 Label preserved specimens for storage and reliable retrieval from collections</p> |
| 3 | Maintain viability and integrity of specimens during experimentation | <p>3.1 Provide nutrients and environments to maintain viability of individual specimens and organisms being cultured or propagated</p> <p>3.2 Perform procedures and analyses to monitor the experimental environment</p> <p>3.3 Perform procedures and analyses to monitor the physiology of organisms in the experimental environment</p> <p>3.4 Adjust nutrient requirements and environmental conditions as indicated by monitoring data</p> |

- | | | | |
|---|--|-----|--|
| | | 3.5 | Report to supervisors data and phenomena that may risk viability of individual specimens or cultures |
| | | 3.6 | Report to supervisors data and phenomena that are incompatible with the experimental design parameters |
| 4 | Integrate laboratory and field data | 4.1 | Locate field data relevant to the study or experiment |
| | | 4.2 | Ensure that field and laboratory data codes are matched for tracking, reporting and chain of custody requirements |
| | | 4.3 | Log field and laboratory data into information systems |
| | | 4.4 | Assist with writing reports of experiments and related field studies |
| 5 | Maintain a safe work environment | 5.1 | Use established safe work practices and personal protective equipment (PPE) to ensure personal safety and that of other laboratory personnel |
| | | 5.2 | Minimise the generation of waste and environmental impacts |
| | | 5.3 | Ensure the safe collection of laboratory and hazardous waste for subsequent disposal |
| | | 5.4 | Care for and store equipment and reagents as required |

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This field allows for different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of

the candidate, accessibility of the item, and local industry and regional contexts) are included.

Standards, codes, procedures and/or workplace requirements

Standards, codes, procedures and/or workplace requirements include the latest version of one or more of:

- Australian and international standards covering the requirements for the competence of testing and calibration laboratories, laboratory safety and quality management
- national WHS standards and codes of practice, and national environmental protection requirements
- specific codes, guidelines, procedures and methods, such as animal welfare legislation and codes of practice, guide to physical containment levels and facility types, and Australian Quarantine and Inspection Service (AQIS) Export Control (Orders) Regulations
- workplace documents, such as standard operating procedures (SOPs), quality and equipment manuals, calibration and maintenance schedules, material safety data sheets (MSDS) and safety procedures, safety procedures to minimise contraction of zoonoses, laboratory schedules, workplace recording and reporting procedures, waste minimisation disposal protocols and environment protection procedures
- workplace procedures for labelling, preparation, storage, transport and disposal of samples and specimens
- validated and authorised test procedures

Communication

Communication includes interactions with one or more of:

- scientists
- field workers
- local government professionals or representatives of state/territory authorities, such as environmental protection agencies
- supervisors and managers (laboratory, quality and customer service)
- clients

Disposal of biohazardous wastes

Disposal of biohazardous wastes includes, but is not limited to, one or more of:

- collection for sterilisation by autoclaving (e.g. autoclaving of microbiological plates)
- appropriate storage (e.g. of waste containing radioactive isotopes)
- use of biohazard waste containers

Safe work practices

Safe work practices include, but are not limited to, one or more of:

- ensuring access to service shut-off points
- recognising and observing hazard warnings and safety signs
- labelling of samples, reagents, aliquoted samples and hazardous materials
- handling and storage of hazardous materials and equipment in accordance with labelling, material safety data sheets (MSDS) and manufacturer instructions
- identifying and reporting operating problems or equipment malfunctions
- cleaning and decontaminating equipment and work areas regularly using workplace procedures
- using PPE, such as gloves, safety glasses, coveralls, gowns, hearing protection and safety boots
- using containment facilities (PCII, PCIII and PCIV physical containment laboratories), containment equipment (biohazard containers, laminar flow cabinets, Class I, II and III biohazard cabinets) and containment procedures
- following established manual handling procedures
- reporting abnormal emissions, discharges and airborne contaminants, such as noise, light, solids, liquids, water/wastewater, gases, smoke, vapour, fumes, odour and particulates, to appropriate personnel

WHS and environmental management requirements

WHS and environmental management requirements include:

- complying with WHS and environmental management requirements at all times, which may be imposed through state/territory or federal legislation. These requirements must not be compromised at any time
- applying standard precautions relating to the potentially hazardous nature of samples
- accessing and applying current industry understanding of infection control issued by the National Health and Medical Research Council (NHMRC) and State and Territory Departments of Health, where relevant

Unit Mapping Information

Release 1. Supersedes and is equivalent to MSL975017A Perform laboratory-based ecological techniques

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for MSL975017 Perform laboratory-based ecological techniques

Modification History

Release 1. Supersedes and is equivalent to MSL975017A Perform laboratory-based ecological techniques

Performance Evidence

Evidence of competence in this unit must satisfy all of the requirements of the elements and performance criteria, and include demonstration of:

- identifying and classifying at least five (5) different animal and plant species for scientific and experimental purposes
- processing, labelling, preserving and storing at least five (5) different kinds of specimens
- performing procedures and analyses to monitor the physiology of organisms/specimens in the experimental environment and maintain their viability on at least three (3) occasions
- taking representative samples for analysis
- not contaminating sterile environments or specimens
- integrating field and laboratory data to provide meaningful results in support of laboratory investigations
- using appropriate scientific terminology and technical concepts to report data and phenomena that may risk viability of individual specimens or cultures or are incompatible with the experimental design parameters
- safely collecting, storing and disposing of waste and minimising contamination of the environment
- following workplace safety procedures.

Knowledge Evidence

- Must provide evidence that demonstrates knowledge of:
- growth requirements of organisms that are subjects of laboratory or greenhouse culture or propagation relevant to job role
- general anatomy of plants and animals that is useful as classification data
- processes that are essential for preservation of plant and animal material for use as reference material
- relationships between field and laboratory data that are useful in giving commentary on the integrity or distress in biological environments
- rationale for selection of techniques used to monitor the experimental environment and the effects of variables on organisms in the experimental environment
- uses of environmental impact statements that incorporate the results of field and laboratory analyses
- workplace and/or legal traceability requirements

relevant hazards, work health and safety (WHS) and environment requirements.

Assessment Conditions

- Judgment of competence must be based on holistic assessment of the evidence. Assessment methods must confirm consistency of performance over time, rather than a single assessment event.
- This unit of competency is to be assessed in the workplace or a simulated workplace environment. A simulated workplace environment must reflect realistic operational workplace conditions that cover all aspects of workplace performance, including the environment, task skills, task management skills, contingency management skills and job role environment skills.
- Foundation skills are integral to competent performance of the unit and should not be assessed separately.
- Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.
- Knowledge evidence may be collected concurrently with performance evidence or through an independent process, such as workbooks, written assessments or interviews (provided a record is kept in each case).
- This unit of competency may be assessed with:
 - MSL925001 Analyse data and report results
 - MSL974007 Undertake environmental field-based monitoring
- Holistic assessment methods include:
 - review of data and results obtained by the candidate over time to ensure accuracy and consistency
 - inspection of records and workplace documentation completed by the candidate
 - feedback from supervisors or clients about the candidate's ability to perform laboratory-based ecological techniques in support of laboratory investigations involving animals, plants and related environmental parameters
 - observation of the candidate processing specimens and conducting analyses
 - questioning about procedures that form part of experiments relevant to job role
 - review of the candidate's responses to case studies/scenarios, such as:
 - relating field and laboratory data in an environmental impact statement
 - preservation of plant species and placement in a herbarium
 - plant propagation in a variety of controlled environments
 - maintenance of cultures of protozoans or invertebrates.
- Access is required to instruments, equipment, materials, workplace documentation, procedures and specifications associated with this unit, including, but not limited to:
 - equipment and resources for investigating the physiology of plants and animals in the laboratory
 - workplace procedures, sampling plans, test methods and equipment manuals
 - computers and programs for simulated experiments or data analysis

- items of equipment, reagents, specimens and systems for botanical and zoological techniques
- laboratory information management systems (LIMS), databases, record and filing systems, including specimen accessioning.
- Assessors must satisfy the assessor competency requirements that are in place at the time of the assessment as set by the VET regulator.
- The assessor must demonstrate both technical competence and currency.
- Technical competence can be demonstrated through:
 - relevant VET or other qualification/Statement of Attainment AND/OR
 - relevant workplace experience
- Currency can be demonstrated through:
 - performing the competency being assessed as part of current employment OR
 - having consulted with a laboratory about performing the competency being assessed within the last twelve months.
-

NWP203B Plan and organise personal work activities

Modification History

NWP203B Release 2: Layout adjusted. No changes to content.

NWP203B Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to plan and organise personal work activities to meet specified outcomes, including identifying and using resources and equipment and applying customer service policies.

Application of the Unit

This unit supports the attainment of skills and knowledge required for field and operational staff who work under supervision but who are required to exercise responsibility for their own effective work performance.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where *bold italicised* text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan and conduct assigned work activities.	1.1 Identify work activities and relevant <i>legislation and organisational procedures</i> . 1.2 Organise and <i>plan work activities</i> to achieve agreed outcomes. 1.3 Identify and obtain resources to complete planned work activities.
2 Monitor quality of work.	2.1 Interpret and check instructions against relevant organisational standards of work. 2.2 Seek clarification of work instructions as required. 2.3 Monitor and adjust work according to requirements for job quality, customer service, public responsibility and resource use.
3 Provide and obtain feedback and information on work activities.	3.1 <i>Record and report</i> work activities according to organisational requirements. 3.2 Access appropriate avenues to provide suggestions for improvement to personal work performance.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- prepare, identify and respond to operational problems
- complete basic reports, records and logs
- follow work instructions
- follow policies, procedures and standards
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- communicate such things as work requirements effectively
- assertiveness
- time management

Required knowledge:

- organisational reporting and communication systems
- work planning processes
- legislative and organisational policies, procedures and standards
- administrative procedures
- quality systems
- organisational procedures for contractors
- reporting procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to plan and organise personal work activities to meet specified outcomes, including:

- identifying and using resources and equipment
- applying customer service policies
- identifying, prioritising and planning work tasks
- identifying and applying appropriate quality standards
- monitoring work performance and seeking feedback

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be

authenticated and show that it represents competency demonstrated over a period of time

- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Legislation and organisational procedures include:

- by-laws and organisational policies
- standard operating procedures
- equal employment opportunity
- OHS

Plan work activities will require:

- interpretation of instructions and directions
- assessment and prioritisation of workload
- adherence to timelines
- interaction and communication with team members and individuals
- interpretation of legislation and organisational procedures
- reference to:
 - productivity requirements
 - total quality management principles
 - customer service requirements

Record and report information relating to work activities, including:

- completion of time sheets
- requisitions
- work sheets and job cards
- basic workplace records and verbal or written reports

Unit Sector(s)

Not applicable.

Competency field

Common

NWP209B Use maps, plans, drawings and specifications

Modification History

NWP209B Release 2: Layout adjusted. No changes to content.

NWP209B Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to read and interpret maps, plans, drawings and specifications.

Application of the Unit

This unit supports the attainment of skills and knowledge required for field and operational staff involved in the location, construction and maintenance or repair of assets, such as plants, pump stations and infrastructure.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Interpret maps, plans and drawings.	1.1 Identify main <i>types of maps, plans, drawings and specifications</i> used to support work tasks. 1.2 Identify parts of water systems and their interrelationship on a range of drawing types. 1.3 Interpret commonly used symbols and abbreviations. 1.4 Interpret function of the legend. 1.5 Verify latest version of map, plan or drawing.
2 Use maps and site plans to support work activities.	2.1 Apply organisation's <i>system for managing maps and plans</i> . 2.2 Apply relevant <i>technologies</i> used to gather, record and monitor, map and plan data. 2.3 Identify function and <i>key features of maps and site plans</i> in the planning of work. 2.4 Identify <i>orientation of the site</i> . 2.5 Identify and isolate access from roadways to work site. 2.6 Determine materials and distances from plans and drawings.
3 Read and interpret specifications.	3.1 Relate specifications to particular maps and plans and identify quality standards. 3.2 Identify and determine types of details from works specifications.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- read and interpret maps, plans, drawings and specifications
- measure accurately
- communicate effectively
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- use information provided in maps, plans and drawings to complete a job and in different work situations

Required knowledge:

- measurements and calculations
- contours
- datum points
- planes

- gradients
- sections
- orthographic projection
- symbols
- dimensions
- terminology

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to read and interpret maps, plans, drawings and specifications including:

- locating correct maps, plans, drawings and specifications for work tasks
- interpreting correctly all relevant information in maps, plans, drawings and specifications to enable the work to be performed correctly, effectively and according to organisational quality standards

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence only taken at the point when the

assessor has complete confidence in the person's competence over time and in various contexts

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Types of maps, plans, drawings and specifications may include:

- urban and rural topographical maps
- site plans and elevations
- process flow sheets
- survey plans
- sectional plans and elevations
- channel drainage plans
- pipe system plans
- location of assets plans
- details and specifications providing illustrations and dimensions

System for managing maps and plans used within organisation may be:

- geographic information systems
- electronic plans management systems
- manual systems
- hard copy systems

Technologies used to gather,

- vary across organisations

record and monitor map and plan data may:

Key features of maps and site plans will include combinations of:

- include use of global positioning system (GPS) technology and require the use of portable navigation devices by operators
- shape and orientation of site
- roads
- railways
- easements
- existing buildings and structures
- services, including:
 - drainage
 - sewerage
 - gas
 - water
 - electricity and telecommunications
- dimensions
- grades of pipelines and channels
- tree preservation orders
- geographical features
- power and transmission lines
- heritage and cultural features
- types of structure, including:
 - buildings
 - bridges
 - fabricated towers
 - fences
 - pipelines
 - regulators
 - poles
- environmental barriers
- environmental features, including:
 - fauna and flora habitats
 - cultural features
 - heritage features
 - water catchments
- shape of structure and building
- service requirements
- location of plant and equipment
- vertical and horizontal measurements
- clearance distance
- geological features
- service layouts

Orientation of the site may include:

- bore and casing details
- relationship to north
- currency of plan
- relationship between plan and site

NWP210B Perform basic water quality tests

Modification History

NWP210B Release 2: Layout adjusted. No changes to content.

NWP210B Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to perform basic water quality tests.

Application of the Unit

This unit supports the attainment of skills and knowledge required for field and operational staff with responsibility for preparing for, conducting and reporting on basic water quality tests in general water industry and water treatment operations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare for basic water quality tests.	<p>1.1 Receive instructions for conducting and recording <i>basic water quality tests</i> and confirm with appropriate personnel.</p> <p>1.2 Confirm <i>testing details</i> and <i>plan testing work</i> according to <i>legislative and organisational requirements</i>.</p> <p>1.3 Select, fit and use personal protective equipment specified for routine water tests.</p> <p>1.4 Prepare and check <i>testing equipment</i> according to organisational requirements.</p>
2 Conduct basic water quality tests.	<p>2.1 Identify and check correct samples for testing and report <i>abnormal sample characteristics</i>.</p> <p>2.2 Conduct basic water quality tests according to organisational requirements.</p> <p>2.3 <i>Maintain integrity of samples</i> during testing.</p> <p>2.4 Identify <i>atypical data</i> and take appropriate action.</p>
3 Finalise work.	<p>3.1 Record relevant <i>information</i> according to organisational requirements.</p> <p>3.2 Dispose of samples and clean and store test equipment according to organisational procedures.</p> <p>3.3 Clear and restore work area according to organisational requirements.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- conduct basic water quality tests
- calibrate testing equipment
- operate testing equipment
- conduct sub-sampling
- dispose of samples and waste
- communicate effectively
- produce reports and logs
- perform relevant work-related calculations
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- interpret work requirements

Required knowledge:

- range and purpose of basic water quality testing
- test procedures
- abnormal characteristics of water samples
- atypical test result data
- relevant work-related calculations
- maintenance and storage of reagents
- requirements for maintaining sample integrity
- documentation procedures for test results
- sample and waste disposal procedures
- relevant legislative and organisational requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to perform basic water quality tests by:

- interpreting testing requirements and procedures
- preparing, checking and using equipment correctly
- conducting at least three different types of test safely while maintaining the integrity of samples
- recording all relevant information

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical

requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Basic water quality tests include:

- range of tests required for competent performance of work tasks in the organisational context
- should comprise at least three of the following types of test:
 - pH
 - temperature
 - electrical conductivity
 - microscopy
 - turbidity

- colour
 - chlorine residual
 - jar testing
 - hardness
 - dissolved oxygen
- Testing details** may include:
- locations, including:
 - on-site testing
 - field-based testing
 - laboratory
 - range of testing procedures and techniques that apply to organisational, plant or field sites
 - variety of samples to be tested
 - testing equipment to be used
 - test reporting systems
- Plan testing work** may include:
- interpretation of instructions and directions
 - timelines
 - interaction and communication with team members and individuals
 - interpretation of legislative and organisational requirements
- Legislative and organisational requirements** may include:
- relevant federal and state or territory legislation and regulations
 - codes of practice, associated standards and guidance material
 - documented organisational policies, manuals and induction programs
 - relevant community planning and development agreements, such as land care agreements
- Testing equipment** may include:
- portable meters, such as:
 - pH meters
 - electrical conductivity meter
 - thermistors
 - comparators
 - pocket colorimeters
 - dissolved oxygen meters
 - test kits
 - microscopes
 - thermometers
- Abnormal sample characteristics** may include:
- insufficient sample volume
 - odour
 - visible contaminants, such as:

- scum
 - debris
 - discolouration
- Maintaining integrity of samples*** may include:
- application of correct:
 - holding time
 - storage procedures
 - sub-sampling procedures
- Atypical data*** may include:
- results that fall outside organisational range requirements
 - results that fall outside legislated range requirements
- Information*** may include:
- time and logging of sample receipt and testing
 - visual observations
 - equipment identification
 - atypical results
 - test results

NWP215B Install and replace basic volumetric metering equipment

Modification History

NWP215B Release 2: Layout adjusted. No changes to content.

NWP215B Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to install and replace basic volumetric metering equipment for domestic, industrial and commercial premises. The unit also includes the identification of defects and the reporting, replacement and adjustment of metering equipment.

Application of the Unit

This unit supports the attainment of skills and knowledge required for staff responsible for the effective and accurate operation of water metering equipment as a vital component of service delivery and compliance reporting.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit of competency contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan and prepare to install or replace basic volumetric metering equipment.	<p>1.1 Determine work requirements and work site boundaries from specifications or instructions.</p> <p>1.2 Plan work according to job and <i>safety requirements</i> using relevant plans, drawings, standards and technical data.</p> <p>1.3 Select and use electrical safety equipment according to <i>legislative and organisational requirements</i>.</p> <p>1.4 Check coordination issues, including permission to access third-party sites, isolations and permits to work with relevant personnel.</p> <p>1.5 Identify, check and prepare materials, equipment and resources required to satisfy job plan according to organisational requirements.</p> <p>1.6 Identify <i>basic metering equipment</i> and recognise specifications for operation.</p> <p>1.7 Select, fit and use personal protective equipment.</p>
2 Read metering equipment.	<p>2.1 Read meters according to the organisation's operational requirements.</p> <p>2.2 Report readings outside normal parameters and faulty meters and apply organisational procedures for estimating consumption.</p> <p>2.3 Collect and report information on performance metering equipment according to organisational requirements.</p>
3 Finalise work and complete documentation.	<p>3.1 Check, maintain and store equipment, tools and materials according to manufacturer guidelines and organisational requirements.</p> <p>3.2 Restore work site to meet environmental and organisational requirements.</p> <p>3.3 Maintain compliance reports and relevant workplace records as required.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- identify and respond to operational problems
- produce reports and logs

- operate communications equipment
- give and receive instructions
- follow plans, charts and instructions
- perform work-related calculations
- use safety equipment and personal protective equipment
- communicate with customers and other employees
- work effectively as part of a team
- use literacy skills in regard to verbal and written communication in the workplace
- secure metering devices

Required knowledge:

- relevant utilities and service bodies
- organisation's communication systems
- materials handling
- environmental, landscape and ground structure of water and wastewater systems
- risk factors and potential hazards involved with water systems
- equipment operation, capacity and limitations
- effects of weather and conditions on site
- meter types
- equipment placement and operation
- metering measurement procedures
- data collection and recording system
- lock-out procedures for mechanical and electrical installations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to install and replace basic volumetric metering equipment for domestic, industrial and commercial premises including:

- planning and preparing for installation or replacement of basic volumetric metering equipment
- installing or replacing meters
- reading meters and report faults
- completing reports

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation

- relevant codes, standards and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator and cultural issues that may affect responses to the questions, and will reflect the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of

the candidate, accessibility of the item, and local industry and regional contexts.

Safety requirements to be considered in planning work include:

- where relevant, meeting requirements to work in confined spaces and at heights
- use of appropriate personal protective equipment
- organisational electrical safety procedures
- adherence to OHS policies, and statutory and regulatory requirements

Legislative and organisational requirements may include:

- relevant federal and state or territory legislation and regulations
- codes of practice, associated standards and guidance material
- documented organisational policies, manuals and induction programs
- relevant community planning and development agreements, such as land care agreements

Basic metering equipment may include:

- domestic
- industrial
- commercial
- volumetric metering equipment

NWP410C Coordinate and monitor asset construction and maintenance

Modification History

NWP410C Release 2: Layout adjusted. No changes to content.

NWP410C Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to coordinate and monitor asset construction and maintenance, including site management and associated commissioning and post-commissioning activities.

Application of the Unit

This unit is required by operators with responsibility for ensuring that asset construction and maintenance activities are performed and completed in compliance with all relevant organisational and statutory requirements. The level of responsibility may vary according to the size, scope, location, and technical complexity of individual projects.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Plan and prepare for asset construction and maintenance.	<p>1.1 Determine <i>work requirements</i> according to asset purpose, maintenance history, components, maintenance schedules and known logistics.</p> <p>1.2 Confirm maintenance plan and prioritise and schedule work.</p> <p>1.3 Confirm <i>authorisations</i> and communication with stakeholders.</p> <p>1.4 Identify and address <i>stakeholders</i> issues that impact on construction or maintenance.</p> <p>1.5 Conduct <i>site inspections</i> according to organisational procedures and risk management guidelines.</p>
2 Undertake work site maintenance.	<p>2.1 Monitor material handling procedures according to organisational requirements.</p> <p>2.2 Monitor construction activities to ensure compliance with <i>occupational health and safety and environmental regulations</i>.</p> <p>2.3 Confirm maintenance requirements by detailed diagnosis of problems and conditions at the site.</p> <p>2.4 Carry out <i>maintenance tasks</i> according to the condition of the equipment and organisational requirements.</p> <p>2.5 Use equipment, tools and technology safely, effectively and productively.</p>
3 Test and commission work.	<p>3.1 Conduct tests and apply defined commissioning programs according to <i>organisational and manufacturers' requirements</i>.</p> <p>3.2 Monitor test results to ensure that the assets function within agreed specifications.</p> <p>3.3 Conduct and record inspections according to commissioning and stakeholders requirements.</p>
4 Conduct post-maintenance activities.	<p>4.1 Coordinate and monitor work site inspections and rehabilitation.</p> <p>4.2 Undertake a review of the construction or installation and monitor asset performance.</p> <p>4.3 Identify defects and make arrangements to rectify them.</p> <p>4.4 Complete reports and documentation required by the organisation.</p> <p>4.5 Store and secure reports according to information and data management system.</p>

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills:

- interpret and make adjustments to asset maintenance plan
- monitor work progress against a plan
- apply relevant organisational procedures based on legislation, risk management, manufacturers guidelines, site conditions and quality standards
- conduct site inspections and investigations
- communicate with supervisors, team members, contractors and the public using clear and direct communication
- prepare reports for management on asset monitoring and maintenance in organisation proformas
- interpret and apply a range of organisation documents
- liaise and negotiate with local and internal stakeholders
- detect and solve operational problems within area of authority and delegation
- work within safety requirements, identify hazards and use equipment and processes safely
- use safety and personal protective equipment
- interpret policies, standard operating procedures and standards related to monitoring and maintenance of water services assets
- control system operations, processes, failure and rectification
- use required forms of transport including marine craft, 4 wheel drive vehicles, aircraft, snow mobiles based on site location and conditions and safety and equipment management procedures
- use organisation equipment, tools and technology

Required knowledge:

- enterprise contract conditions and compliance
- site inspection and investigation procedures
- organisational policies, procedures, guidelines and requirements for asset monitoring and maintenance
- system layout, integrity, design and performance
- evaluation and investigation requirements
- enterprise auditing and recording procedures and reporting requirements
- characteristics, technical capabilities and limitations of materials and equipment according to manufacturers' specifications
- occupational health and safety policies and procedures including material handling procedures, use of protective equipment, safe driving in hazardous conditions, bush and water survival, working in the location of power supplies, working in confined spaces
- relevant environmental and natural resource management legislation
- risk factors and potential hazards involved with water pressures and flows

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to plan, coordinate and monitor the construction or maintenance of water industry assets, including:

- analysing work requirements
- prioritising and scheduling work
- liaising and negotiating with all relevant stakeholders and work teams
- planning construction or maintenance activities
- monitoring work performance for compliance with OHS and other organisational and statutory requirements
- providing technical advice on maintenance methods
- conducting risk and hazard assessments
- reporting recommendations for risk and hazard prevention
- conducting or supervising asset tests
- implementing commissioning programs and post commissioning inspections
- coordinating and monitoring the rehabilitation of the worksite
- reviewing the construction or installation and monitoring performance
- identifying and reporting defects

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical

requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work requirements will include the organisation and site specific requirements including:

- purpose and history of site and its assets
- maintenance plans and specifications
- site location and conditions
- risk and hazard management procedures
- communication methods and equipment
- authorisations, permits and restrictions
- environmental and heritage conditions
- recording and reporting asset condition and maintenance
- preparing and coordinating the availability and transporting

of:

- maintenance and construction support
- equipment and tools
- replacement assets
- safety and protective equipment
- communication equipment
- technical expertise
- surveying equipment
- camping and survival resources
- rescue and retrieval resources
- federal, state and local government
- quarantine controls
- legal access
- traffic management
- Blue Card

Authorisations may include:

Stakeholders may include:

- contractors
- government and regulatory authorities
- property owners
- utility organisations
- specialised work teams
- general public
- asset users

Site inspections may include:

- confirmation of:
 - plans
 - contracts
 - purpose
 - asset history
 - fault reports
 - components
 - risk factors
- inspection of preparation work
- assessment of compliance with specifications and manufacturers' guidelines
- assessment of compliance with procedures and legislation including:
 - occupational health and safety requirements
 - environmental
 - natural resource management
 - water quality

Occupational health and safety and environmental

requirements will include:

- confined spaces
- heights
- water
- forests
- equipment operation
- plant operation
- contamination issues
- weather exposure
- herbicides
- pesticides
- solvents
- fuels
- PPE requirements
- onsite communication and procedures for working remotely.
- equipment:
 - ladders
 - harness
 - trailer
- personnel safety:
 - medical constraints and conditions
 - CPR
 - First Aid
 - water survival
 - bush survival
 - self rescue
 - traffic management authority

Maintenance tasks will be influenced by consideration of:

- performance benchmarks
- reference marks
- CTF
- relevant section:
 - control
 - approach
 - inlet
 - tailwater
 - DM
- long survey
- staff gauges
- peak level indicators
- power supplies
- instrument circuits

Organisational and manufacturers'

requirements may include:

- lightning protection
- banks
- site access
- transducer exposure
- general and special conditions of contract and site specifications
- plans, maps and drawings
- authorisations and permits
- operational manuals
- manufacturers' manuals and specifications
- maintenance manuals
- plans of other authorities, services and utilities
- hazard and response reports
- project plans
- maintenance checklists

NWP513B Develop and review catchment management plan

Modification History

NWP513B Release 2: Layout adjusted. No changes to content.

NWP513B Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to develop and review catchment management plans that impact on water yield and/or quality.

Application of the Unit

This unit supports the attainment of skills and knowledge required for managers in water organisations with responsibility for the management of water catchments.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the required performance needed to demonstrate achievement of the element. Where **bold italicised** text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare for catchment management.	1.1 Identify and interpret <i>catchment management requirements</i> .
	1.2 Identify and evaluate <i>user and customer</i> requirements that impact on the catchment area.
	1.3 Gather <i>historical catchment information</i> and evaluate as input to the planning process.
	1.4 Identify, interpret and assess water quality and quantity requirements.
	1.5 Identify and interpret <i>environmental factors</i> and other relevant <i>issues</i> that impact on the catchment area.
2 Develop the catchment management plan.	2.1 Identify, interpret and validate <i>stakeholder</i> requirements that impact on the catchment area.
	2.2 Review and clarify organisational objectives and key performance indicators for the catchment management plan.
	2.3 Develop a catchment management plan.
3 Review and refine the catchment management plan.	3.1 Assess data from the ongoing implementation of the catchment management plan and use to inform the review of the plan.
	3.2 Review objectives of the management and implementation plans.
	3.3 Make recommendations for changes to objectives and implementation procedures.
	3.4 Provide advice and guidance to catchment area users and stakeholders.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- interpret and apply legislation and policies
- interpret and use measuring and testing activities
- conduct investigations
- assess environmental impacts
- use data to inform planning process
- communicate and consult with stakeholders

Required knowledge:

- water quality processes and parameters
- water management processes
- analysis of historical records
- relevant legislation
- relevant enterprise policies
- range of appropriate measuring and testing procedures
- risk management principles
- investigation procedures
- customer expectations and requirements
- occupational health and safety and environmental legislation
- Acts and procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to develop and review catchment management plans that impact on water yield and quality including:

- gathering, interpreting and synthesising information (including historical data, current legislation and standards, stakeholder views and water quality test results) to underpin the sound development of the water catchment management plan
- consulting widely and effectively
- developing effective catchment management plans that address the water organisation's objectives and requirements
- using data from testing and other monitoring arrangements to track the performance of the catchment management plan and inform the review of the plan
- preparing reports and recommendations for changes to the objectives of the management plan and its implementation

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include

equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry

and regional contexts.

Catchment management requirements may include:

- relevant federal legislation
- relevant state or territory legislation
- relevant local government by-laws
- organisational needs
- codes of practice

User and customer stakeholders may include:

- recreational users of the catchment area
- forestry and land management authorities
- housing developers and home owners
- farmers
- traditional land owners
- consumers of water
- water authorities

Historical catchment information may include:

- relevant hydrometrical information
- previous monitoring studies
- previous risk assessments
- vegetation surveys
- anecdotal information from land holders
- geological data
- hydro-geological data

Environmental factors that impact on the catchment area may include:

- flora
- fauna
- chemicals
- land degradation
- nutrients
- fire breaks
- farming practices
- land use

Issues that impact on or relate to the catchment area may include:

- existence of known cultural sites
- land use patterns
- environmental issues
- other human activity

Stakeholder groups may include:

- state forestry bodies
- state parks authorities
- land care groups
- catchment management trusts and community groups
- environmental interest groups
- native title and indigenous groups
- state government
- local councils/shires
- water authorities

NWP518B Prepare and report on data related to flood mitigation

Modification History

NWP518B Release 2: Layout adjusted. No changes to content.

NWP518B Release 1: Primary release.

Unit Descriptor

This unit of competency describes the outcomes required to collect and analyse data associated with rainfall, run-off, flood estimation and reporting required for the development and communication of flood mitigation plans.

Application of the Unit

This unit supports the attainment of skills and knowledge required for planners and managers in water organisations with responsibility for the preparation of flood mitigation reports.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the required performance needed to demonstrate achievement of the element. Where <i>bold italicised</i> text is used, further information is detailed in the range statement. Assessment of performance is to be consistent with the evidence guide.
---	---

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse rainfall and run-off regimes.	1.1 Access and interpret historical rainfall run-off and <i>flooding regimes</i> of specific catchments. 1.2 Delineate historical floods. 1.3 Model simulated, hypothetical or estimated rainfall intensity data and catchment characteristics. 1.4 Collate, manipulate and interpret <i>data</i> .
2 Estimate flooding.	2.1 Use <i>techniques for flood estimation</i> and apply to the development of flood estimation guidelines. 2.2 Estimate and record flood levels, extents and flow rates. 2.3 Complete and record <i>flood hazard assessments</i> . 2.4 Analyse and record the impact of <i>planning controls</i> of flood assessments.
3 Report and communicate information.	3.1 Collate, analyse and record information to meet organisational requirements. 3.2 Communicate information to <i>stakeholders</i> using standard organisational procedures. 3.3 Prepare and present reports in a clear, concise and timely manner to meet organisational requirements.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- use mathematical techniques to analyse and model flood data
- collect and interpret data
- manipulate and model data
- develop clear and effective reports
- communicate effectively

Required knowledge:

- catchment hydrology principles
- water flow measurement
- flow routing
- relevant legislation, by-laws and planning schemes
- mathematical calculation
- cultural environment
- occupational health and safety and environmental legislation, Acts and procedures

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to collect and analyse data associated with rainfall, run-off, flood estimation and reporting required for the development and communication of flood mitigation plans including:

- collecting relevant data
- analysing relevant data
- modelling of data
- preparing clear, concise and timely reports
- communicating data and outcomes to stakeholders and team members

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence

- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording, if used in the Performance Criteria, is detailed below. Add any essential operating conditions that may be present with training and assessment depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts.

Flooding regimes may include:

- flood levels
- peaks; flow rates
- area extent
- duration

Data may include:

- time series data
- historical
- rainfall
- flood levels

Techniques for flood estimation may include:

- base flow separation
- flood frequency
- rainfall modelling

Flood hazard assessments may include:

- the safety of people
- safety of animals
- land inundation
- house and other property inundation
- effects on communication and other infrastructures
- ability and extent of need for emergency services industry

- Planning controls** may include.
- cost analysis
 - land use planning
 - construction or destruction of physical structures (e.g. levee banks, sand bag levees)
 - infrastructure development
 - cultural land restrictions
- Stakeholders** may include:
- community groups
 - land holders
 - emergency response groups
 - town planners
 - utility managers (gas, electricity, water)
 - local government
 - industry and commerce

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse rainfall and run-off regimes.	1.1 Access and interpret historical rainfall run-off and <i>flooding regimes</i> of specific catchments. 1.2 Delineate historical floods. 1.3 Model simulated, hypothetical or estimated rainfall intensity data and model catchment. 1.4 Collate, manipulate and interpret <i>data</i> .
2 Estimate flooding.	2.1 Use <i>techniques for flood estimation</i> and apply to flood estimation guidelines. 2.2 Estimate and record flood levels, extents and flow rates. 2.3 Undertake and record <i>flood hazard assessment</i> .
3 Determine management and warning systems.	3.1 Evaluate the roles of storage and/or retarding basins safety and flood attenuation strategies. 3.2 Evaluate current flood classifications and impacts and formulate planning controls for flood plain or waterway management. 3.3 Evaluate current flood warning systems. 3.4 Recommend or develop changes to existing flood plain or waterway management controls and warning systems.
4 Report and communicate recommendations.	4.1 Prepare and present reports in a clear, concise and timely manner to meet organisational requirements. 4.2 Communicate findings and recommendations to <i>stakeholders</i> .

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required skills:

- use mathematical techniques to analyse and model flood data
- prepare and plan strategically
- computer skills
- collect and interpret data
- model data
- develop clear and effective reports
- communicate effectively
- interpret data
- manipulate data

- communicate with a range of stakeholders

Required knowledge:

- catchment hydrology principles
- water flow measurement; flow routing
- relevant legislation, by-laws and planning schemes
- mathematical calculation
- cultural environment
- occupational health and safety and environmental legislation, Acts and procedures

Evidence Guide

The Evidence Guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The candidate should demonstrate the ability to analyse and develop flood mitigation warning systems and strategies using the effective:

- collecting relevant data
- analysing relevant data
- modelling data
- developing critical flood warning systems
- developing strategies to mitigate the impact of potential future floods
- preparing clear, concise and timely reports
- communicating data and outcomes to stakeholders and team members

Context of and specific resources for assessment

Access to the workplace and resources including:

- documentation that should normally be available in a water industry organisation
- relevant codes, standards, and government regulations

Where applicable, physical resources should include equipment modified for people with disabilities.

Access must be provided to appropriate learning and/or assessment support when required.

Assessment processes and techniques must be culturally appropriate, and appropriate to the language and literacy capacity of the candidate and the work being performed.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period

of time reflecting the scope of the role and the practical requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice
- a decision of competence should only be made when the assessor has complete confidence in the person's competence over time and in various contexts
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence
- where assessment is for the purpose of recognition (RCC/RPL), the evidence provided will need to be authenticated and show that it represents competency demonstrated over a period of time
- assessment can be through simulated project-based activity and must include evidence relating to each of the elements in this unit

In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in a manner appropriate to the skill levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

NWPGEN005 Coordinate and monitor the application of environmental plans and procedures

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP401B Coordinate and monitor the application of environmental plans and procedures.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice• PC 2.5 removed• PC 3.4 and 5.3 revised

Application

This unit describes the skills required to monitor and coordinate the application of environmental plans and procedures to specific projects and to develop environmental procedures for the local work area.

This unit applies to those working in the water industry with a specific responsibility for ensuring that all relevant environmental plans and policies are applied to each project and work site within the scope of their job role, and for ensuring that environmental plans and policies are implemented, monitored, reviewed and reported according to organisational and statutory requirements.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously while performing complex tasks, in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Determine relevant environmental plans and procedures	1.1 Identify environmental plans and procedures and determine relevance to specific projects or work sites. 1.2 Interpret relevant environmental plans and procedures in relation to specific project or site activities.
2. Implement environmental plans and procedures	2.1 Identify environmental risks and impacts. 2.2 Manage and minimise environmental risks. 2.3 Apply emergency procedures. 2.4 Carry out activities according to environmental plans and procedures.
3. Manage project or site specific environmental procedures	3.1 Assess the need for project or site specific environmental procedures. 3.2 Consult stakeholders and address issues and concerns. 3.3 Develop specific project or site environmental procedures. 3.4 Review and maintain specific project or site environmental procedures.
4. Control environmental incidents	4.1 Identify environmental incidents at site and apply appropriate control measures. 4.2 Analyse environmental incidents to prevent recurrence. 4.3 Record and report environmental incidents and complete environmental management documentation.
5. Monitor and report on environmental plans and procedures	5.1 Monitor and report on the implementation of environmental plans and procedures. 5.2 Report environmental risks. 5.3 Coordinate reviews of environmental procedures and report.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP401B Coordinate and monitor the application of environmental plans and procedures.

Assessment Requirements for NWPGEN005 Coordinate and monitor the application of environmental plans and procedures

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reporting and recording environmental procedures
- developing local workplace environmental procedures
- coordinating and monitoring the application of environmental plans and procedures
- identifying and analysing environmental plans and procedures relevant to a representative variety of projects and work sites
- interpreting and implementing relevant environmental plans and procedures for a typical project or work site
- developing site or project specific environmental plans and procedures for an atypical project or work site, including consultation with stakeholders
- managing environmental incidents
- monitoring, reporting and reviewing the implementation of environmental plans and procedures
- coordinating participation by relevant sectors of the workforce

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant legislative requirements and procedures
- sedimentation and erosion control
- rare and endangered plants

- identification of risks and impacts
- potential environmental risks and incidents
- disposal of dangerous and contaminated soils
- environmental auditing
- concepts of due diligence
- principles of environmental protection
- endangered species and habitat protection
- environmental impact assessment
- waste management

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR002 Operate basic flow control and regulating devices in irrigation systems

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP222A Operate basic flow control and regulating devices in irrigation systems.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Elements 1 and 2 merged • PC 2.2 removed • PC 4.2 and 4.3 reworded

Application

This unit describes the skills required to operate basic flow control and regulating devices in irrigation systems.

This unit applies to those working as field and operational staff with responsibility for using flow control and metering devices according to organisational procedures.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or in a team, under direct supervision using own familiar resources as required, while performing routine tasks in range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Monitor and regulate required flows in irrigation systems	1.1 Access and apply operating requirements for flows in irrigation systems. 1.2 Use equipment to assist operational activities. 1.3 Monitor, measure and record flows at designated locations and systems according to schedule. 1.4 Identify potential operational problems and provide proactive advice. 1.5 Adjust flow regulation and control mechanisms to increase and decrease flow.
2. Record and report system adjustments	2.1 Produce information relating to flow adjustments. 2.2 Collect, record and report information on flows and abnormalities.
3. Respond to contingencies	3.1 Identify and assess potential risks and contingencies in the operation of flow control and regulating devices. 3.2 Respond to potential and actual risks and contingencies. 3.3 Inform relevant personnel within organisation of potential risks.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website..

Unit Mapping Information

This unit supersedes and is equivalent to NWP222A Operate basic flow control and regulating devices in irrigation systems.

Assessment Requirements for NWPIRR002 Operate basic flow control and regulating devices in irrigation systems

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- collecting and reporting system performance information
- interpreting data
- producing information, including at least one of:
 - meter reading reports
 - daily running sheets
- adjusting and maintaining flow system control mechanisms
- securing flow regulation devices
- identifying flow requirements
- preparing for and conducting flow monitoring
- identifying and reporting operational problems
- completing records and reports

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- impact of the principles of hydraulics on the operation of flows
- system layout
- risk factors and potential hazards
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of system and site

- system flow control mechanisms
- relevant lock-out procedures for mechanical and electrical installations

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR012 Construct open earthen channels or drains

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP251B Construct open earthen channels or drains.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 1.5 revised

Application

This unit of competency describes the skills required to plan and prepare for the construction of open channels or drains and to complete construction operations and subsequent site restoration.

This unit applies to those working as field and operational staff involved in the construction of earthen channels and drains for stormwater or irrigation systems or the remodelling or reconstruction of unserviceable systems.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and manufacturers' guidelines.

Those undertaking this unit would work under direct supervision, while performing routine tasks and ensuring minimal damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for construction work	1.1 Determine work requirements from design plans, specifications, instructions and work orders. 1.2 Check site and identify hazards. 1.3 Make appropriate drainage and diversion arrangements without damage to environment. 1.4 Check equipment and open-cut excavation methods to ensure that safety requirements of task and site are met. 1.5 Select suitable soil material.
2. Construct channels or drains	2.1 Construct earthen channels, drains and batters to planned width, depth and gradient. 2.2 Compact soil, apply additives and take earth samples. 2.3 Check construction works to ensure that specifications are met.
3. Restore work site and equipment	3.1 Check, maintain and store equipment, tools and materials. 3.2 Restore work site and add environmental improvements or controls to complete work, according to plans.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP251B Construct open earthen channels and drains.

Assessment Requirements for NWPIRR012 Construct open earthen channels or drains

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and responding to operational problems
- producing reports and logs
- using safety and personal protective equipment
- using tools and machinery
- interpreting plans, charts and instructions
- applying procedures and standards
- applying channel, drain and batter construction techniques
- identifying soil types, mechanics and compaction rates
- selecting and operating appropriate compaction plant, including tamping foot and smooth drum roller
- operating communication systems
- performing work related calculations
- constructing open earthen channels and drains
- planning work and preparing work site according to given specifications and instructions
- cutting channels to specification
- compacting soil
- taking soil samples
- checking that work meets specifications
- cleaning and storing equipment
- restoring work site

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- channel and drain system design basics
- channel and drain system layout
- environmental aspects of construction
- channel, drain and batter construction processes
- measures to reduce channel deterioration, infestation of weeds, pests and seepage
- relevant utilities and service providers
- safe use of lasers
- use of automatic levels
- basic levelling techniques
- profiles and boning rods
- survey principles
- soil types, mechanics and compaction rates
- capabilities of plant used for construction, including equipment operation, capacity and limitations
- communication systems
- work related calculations
- hazardous materials handling
- landscape and ground structure of work area
- risk factors and potential hazards of construction processes
- effects of weather and conditions on construction site or plant
- control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR013 Construct and install irrigation delivery and stormwater drainage assets

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP252B Construct and install irrigation delivery and stormwater drainage assets.</p> <ul style="list-style-type: none">• Unit code updated• Content and formatting updated to comply with the new standards• All PC transitioned from passive to active voice• Element 2 reworded• PC 2.2 and 2.3 merged

Application

This unit of competency describes the skills required to construct irrigation delivery or stormwater drainage assets on site and to install both constructed assets and prefabricated components.

This unit applies to those working as field staff with specific responsibility for ensuring that the construction and installation of irrigation or stormwater drainage assets is completed in a safe and timely manner.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS.

Those undertaking this unit would work under indirect supervision, while performing routine tasks and ensuring minimum damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for work	1.1 Determine work requirements from specifications and instructions. 1.2 Select, fit and use personal protective equipment. 1.3 Perform site check to identify hazards and prevent damage to other utilities. 1.4 Provide appropriate drainage and diversion from work site. 1.5 Check equipment and excavation methods to meet safety requirements of task and site.
2. Construct and install drains, channels and associated fittings	2.1 Provide bedding and foundations according to structure type, location and specification. 2.2 Select, place and install prefabricated components and fittings. 2.3 Check installed fittings and prefabricated components to ensure that specifications are met. 2.4 Construct components on-site.
3. Finalise work	3.1 Check constructions and installations to ensure that specifications are met. 3.2 Check, maintain and store equipment, tools and materials. 3.3 Backfill, compact and restore work site. 3.4 Maintain workplace records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5

NWPIRR014 Install meters for rural water supplies

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP302A Install meters for non-potable, non-urban water supplies.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • Element 2 removed • One new PC added to Element 1 • PC 1.4 removed • PC 2.4 renumbered • Element 2 and 4 merged • All PC revised

Application

This unit describes the skills required to install water meters for rural water supplies.

This unit applies to those working as field or operational staff installing meters.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently under direct supervision, while performing routine tasks ensuring minimum damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Confirm conditions of the site for meter installation	1.1 Identify the location of the site and establish client information from work plans and job specifications. 1.2 Identify access to the site and any conditions of access. 1.3 Assess the conditions of the site. 1.4 Set out the site. 1.5 Carry out a job safety analysis and identify and control hazards.
2. Install meter facilities	2.1 Ensure that excavations provide sufficient width for movements of installation. 2.2 Install meter as set out in design and specifications. 2.3 Check fittings, seals and operation. 2.4 Install ancillary equipment and check for operation and seal. 2.5 Check meter installation for compliance with manufacturer specifications.
3. Restore site	3.1 Backfill with suitable material, moisture content and compaction to maximise compaction efficiency. 3.2 Restore the site to original site conditions.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing NA					Oral communication NA					Numeracy				

Performance variables:

Assessment Requirements for NWPIRR014 Install meters for rural water supplies

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- planning meter installation and construction
- undertaking calculation of head, flow and measurements of pipes and pressure
- undertaking locational assessment and risk analysis for meter installation
- sampling and testing soil for backfill and installation structures
- analysing the impact of water infiltration on the stability of structures
- measuring the head of water to judge sufficiency for meter's accuracy
- checking power supply and links
- installing ancillary equipment
- positioning solar panels to maximise power collection
- undertaking a job safety analysis and checking hazards and safety requirements
- using and storing equipment on site
- determining excavation requirements
- calculating sump and headwall elevation and orientation
- calculating pipe and meter pit elevation, fall and presentation
- installing transducers and cabling safely
- interpreting manufacturer requirements for fitting meters in meter pits
- using techniques to protect meters from disturbance
- assessing the effectiveness of backfill
- undertaking site restoration
- identifying and analysing client requirements, site conditions and their impact on the types of meter required, and the design of the installation

- identifying and analysing environmental conditions and limitations and the impact of work to be undertaken
- identifying and analysing safety risks and hazards and responding to remove risks and hazards
- preparing sites and equipment for installation
- identifying faults, changes and failure indicators

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- the purpose and standards for non-urban water metering
- community expectations for water measurement and use
- standards for the installation of non-urban meters in open and closed conduit systems
- the social, environmental, economic and political responsibilities of water authorities in relation to meter installation
- requirements for checking the pattern approval of meters and compliance with meter installation standards
- meter manufacturers' guidelines and installation manual for specific meters
- the organisation's policies and procedures for water meter installation
- conditions for meter location and suitable installation assets and meters for the conditions
- causes of flow disturbance
- potential environmental causes of meter failure
- the organisation's environmental impact guidelines
- maintenance requirements for meter facility within and open channel
- relevant safety requirements including confined space

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR022 Maintain meters for rural water supplies

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP304A Maintain meter for non-potable, non-urban water supplies.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • PC 4.3 removed • PC 1.3 and 1.4 merged • PC 2.1, 2.3, 2.4 and 2.5 merged and revised

Application

This unit describes the skills required to maintain the operational integrity of already installed meters, metering systems and their components. This unit covers corrective, predictive and preventative maintenance.

This unit applies to those working in the water industry as field or operational staff maintaining meters for rural water supply.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under independently under direct supervision, while performing routine tasks in familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Confirm meter type and location within asset management system	1.1 Obtain organisational maintenance plan and manufacturer guidelines. 1.2 Locate meter emplacement on a map, or by GPS, or according to organisational procedures. 1.3 Confirm that meter type and number match maintenance plan or manufacturer guidelines.
2. Check condition of meters and metering system	2.1 Check components and identify faults using an asset condition checklist. 2.2 Establish maintenance requirements.
3. Maintain meter and meter facilities	3.1 Repair or replace faulty components. 3.2 Identify faults which need to be rectified by a third party.
4. Test and recommission	4.1 Ensure meter complies with standards. 4.2 Perform on-site re-test of meter. 4.3 Record faults and meter performance, maintenance and repairs.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication NA					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP304A Maintain meter for non-potable, non-urban water supplies.

Assessment Requirements for NWPIRR022 Maintain meters for rural water supplies

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. The candidate must be assessed in at least two of the different fault types listed in the Range of Conditions. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- reading and analysing electronic display
- inputting data into electronic controller
- working with low voltage wiring
- reading manufacturers' instructions, plans, exploded drawings and parts catalogues
- reading verification marks
- using tags and seals
- confirming the site and the meter
- checking meter condition
- replacing components
- documenting the maintenance

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant organisational policies and procedures for water meter maintenance
- organisational rights and responsibilities
- manufacturers' maintenance procedures for specific meter types
- knowledge of checking pattern approval requirements
- standards for non-urban metering

- GPS coordinates
- meter types and accuracy limits
- roles and responsibilities of maintenance personnel
- WHS guidelines
- environmental, cultural and heritage guidelines

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR024 Monitor and conduct maintenance on flow control and metering devices

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP305B Monitor and conduct maintenance of complex flow-control and metering devices.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • Unit title changed to better reflect unit outcomes • All PC transitioned from passive to active voice • One new PC added to Element 2 • All PC in Element reordered • PC 4.3 removed

Application

This unit describes the skills required to monitor the operation of flow control. This includes measuring and regulating devices, controlling water supply source systems and/or distribution systems.

This unit applies to those working as field staff with a responsibility for monitoring the operation of flow control, measuring and regulating devices, conducting maintenance and ensuring that problems and anomalies are rectified by specialist technicians.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS and manufacturer specifications.

Those undertaking this unit would work under indirect supervision, performing routine tasks ensuring minimum damage to the environment, in a familiar context.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for work	1.1 Interpret work requirements for monitoring flow control and metering devices from plans, drawing specifications and instructions. 1.2 Select and check equipment and tools to meet the safety requirements of the task and site. 1.3 Select, fit and use required safety equipment, including personal protective equipment.
2. Monitor device and equipment performance	2.1 Identify devices and equipment. 2.2 Check and interpret information and specifications on devices and equipment performance. 2.3 Report on devices and equipment performance.
3. Conduct minor maintenance on devices and equipment	3.1 Undertake routine maintenance tasks for complex devices. 3.2 Secure devices and equipment. 3.3 Identify and report problems and anomalies for correction.
4. Monitor system performance	4.1 Schedule and monitor routine inspections of system and networks. 4.2 Collect, analyse and report data on system performance and usage.
5. Compile process records and reports	5.1 Identify process faults and monitor the operational condition of the system and network. 5.2 Report on adjustment requirements and condition of the system.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning NA					Reading					Writing					Oral communication					Numeracy NA				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP305B Monitor and conduct maintenance of complex flow-control and metering devices.

Assessment Requirements for NWPIRR024 Monitor and conduct maintenance on flow control and metering devices

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and reporting operational problems
- collecting and reporting system performance information
- inspecting flow regulation, measuring and regulating devices
- producing reports and logs
- using communication systems
- giving and receiving instructions
- interpreting plans, charts and instructions
- interpreting policies, procedures and standards
- monitoring the operation of flow control, measuring and regulating devices
- selecting appropriate equipment and tools, including personal protective equipment
- identifying devices and equipment to be monitored and relevant operational specifications
- collecting and recording information on device performance
- conducting routine maintenance tasks and securing devices
- identifying and reporting problems and anomalies
- inspecting system and networks
- collecting and recording data on system performance
- reporting monitoring and inspecting findings
- identifying and reporting on system performance

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- monitoring flow control, measuring and regulating devices' performance
- system hydraulics
- system layout
- relevant utilities and service bodies
- communication systems
- materials handling
- environmental, landscape and ground structure of water distribution system and network risk factors and potential hazards
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of system and site
- flow measurement procedures
- data collection and recording
- system flow control mechanisms and control systems
- lock out procedures for mechanical and electrical installations

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR033 Coordinate and monitor the operation of irrigation delivery systems

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP425B Coordinate and monitor the operation of irrigation delivery systems.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • PC 2.1 removed • PC 2.2 reworded • PC 2.4 revised

Application

This unit describes the skills required to coordinate and monitor irrigation delivery systems to meet performance standards and including system maintenance and customer liaison.

This unit applies to those working as field and operational staff with a specific responsibility for ensuring that the operation of irrigation systems complies with organisational and statutory requirements.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently or in a team, while performing complex tasks ensuring minimum damage to the environment in a familiar context. However, the level of responsibility may vary according to the size, scope, location, and technical complexity of process.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Confirm performance measures in irrigation system's management plan	1.1 Identify customer requirements for irrigated culture. 1.2 Identify environmental factors that impact on the irrigation system. 1.3 Consult historic system information and stakeholders as appropriate. 1.4 Confirm performance requirements for an irrigation system management plan.
2. Monitor and coordinate processes and resource targets	2.1 Monitor and test programs and identify, investigate and report any deviations from water quantity, quality, release or flow. 2.2 Evaluate the duration, volume and flow rates of water deliveries and identify, investigate and report deviations from agreed service levels. 2.3 Evaluate maintenance activities and report deviations from targets. 2.4 Identify and record links between operational problems and maintenance activities.
3. Report outcomes of coordination and monitoring	3.1 Analyse, record and report coordination and monitoring data. 3.2 Identify and report current and potential problems. 3.3 Make recommendations for improvements in system performance and/or customer service.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP425B Coordinate and monitor the operation of irrigation delivery systems.

Assessment Requirements for NWPIRR033 Coordinate and monitor the operation of irrigation delivery systems

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- assessing environmental impact
- operating irrigation and/or domestic stock supply system
- checking channel flow
- identifying customer requirements for irrigated culture and environmental factors that impact on the irrigation system
- consulting historic system information and stakeholders as appropriate
- confirming performance requirements for an irrigation system management plan
- implementing monitoring and testing programs and investigating and reporting deviations from planned parameters
- evaluating performance of water deliveries and investigating and reporting deviations from agreed service levels
- evaluating performance targets
- analysing and reporting data
- identifying and reporting problems
- making recommendations for system performance or customer service improvements

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant legislation, policies and procedures

- customer expectations and requirements
- impact of the principles of hydraulics on the operation of flows
- coordination processes
- principles of scheduling
- system layout and operations
- environmental aspects of irrigation and/or stock and domestic supply system asset infrastructure
- environment, landscape and ground structure of work area
- risk factors and potential hazards of irrigation and/or domestic and stock supply systems
- equipment operation, capacity and limitations
- water flow calculations
- gravity systems
- control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR042 Monitor and schedule water deliveries

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP316B Monitor and schedule water deliveries.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit of competency describes the skills required to schedule water deliveries for irrigation and/or domestic and stock supply systems, including monitoring flows, analysing data, coordinating hydraulic processes and compiling operational reports.

This unit applies to those working as field staff and operators with a specific responsibility for ensuring that water deliveries meet varying customer requirements.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to, particularly those related to WHS.

Those undertaking this unit would work under indirect supervision, while performing routine tasks ensuring minimum damage to the environment, in a familiar.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Schedule water deliveries	1.1 Identify and record customer water orders. 1.2 Analyse water orders to determine water delivery and flow rate requirements. 1.3 Schedule water deliveries to meet flow rate requirements and organisational standards for channel balance and capacity restraints.
2. Monitor water delivery	2.1 Monitor channel flow rate, regulation and delivery according to customer requirements. 2.2 Maintain delivery performance records. 2.3 Analyse system performance using system data and records to determine actual and planned performance.
3. Coordinate and control water delivery	3.1 Calculate system adjustments according to demand and organisational requirements. 3.2 Coordinate flow regulation, channel levels, security of flow devices and settings according to demand and organisational requirements.
4. Compile records of water delivery	4.1 Compile reports from systems performance data. 4.2 Maintain appropriate measurement and delivery records.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5					
Learning NA					Reading					Writing					Oral communication					Numeracy				

Performance variables:

Assessment Requirements for NWPIRR042 Monitor and schedule water deliveries

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- identifying and responding to operational problems
- producing basic reports and logs
- following plans, charts and instructions
- performing work related calculations
- operating irrigation and/or domestic stock supply system
- checking channel flow
- identifying control system faults
- preparing schedules for water deliveries for customer orders for irrigation and/or domestic stock supply systems
- analysing volumes and flow rates required for water deliveries
- monitoring and regulating system performance
- adjusting system according to demand
- coordinating flow regulating devices
- completing relevant documentation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- system hydraulics
- impact of the principles of hydraulics on the operation of flows

- coordination processes
- principles of scheduling
- system layout and operations
- policies and standard operating procedures
- communication systems
- environmental aspects of irrigation and/or stock and domestic supply system asset infrastructure
- environment, landscape and ground structure of work area
- risk factors and potential hazards of irrigation and/or domestic and stock supply systems
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of site plant
- water flow calculations
- flow measurement procedures
- gravity systems
- control systems

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR062 Develop and review irrigation system management plan

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP531B Develop and review irrigation system management plan.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to develop and review the operation and maintenance of irrigation systems, including system performance analysis, customer liaison and planning.

This unit applies to those working as managers in water organisations with responsibility for the management of the irrigation system.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, with supervision responsibility, performing sophisticated tasks in a range of contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for management of the irrigation system	1.1 Determine and interpret water quantity and quality requirements including release and flow rates. 1.2 Access and interpret historic system capacity information. 1.3 Identify and access legislative, organisational and environmental requirements and system constraints that impact on the delivery of irrigation water.
2. Develop an irrigation system management plan	2.1 Identify and interpret irrigation system management requirements. 2.2 Identify and validate customer requirements for irrigated culture. 2.3 Consult stakeholders, or their representatives, and obtain input for the management plan. 2.4 Develop and record an irrigation system management plan.
3. Review and refine the irrigation system management plan	3.1 Monitor outcomes of the operations and maintenance evaluations and incorporate into the system management review. 3.2 Review objectives of the management and implementation plans. 3.3 Make recommendations for changes to plan objectives and operational and maintenance procedures. 3.4 Provide advice and guidance to stakeholders.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website

Unit Mapping Information

This unit supersedes and is equivalent to NWP531B Develop and review irrigation system management plan.

Assessment Requirements for NWPIRR062 Develop and review irrigation system management plan

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- interpreting and applying legislation and policies
- coordinating measuring and testing activities
- conducting investigations
- assessing environmental impacts
- developing and reviewing the operation and maintenance of irrigation systems
- gathering, interpreting and synthesising information including historical system capacity data, current legislation and standards, stakeholder views and monitoring results to underpin the sound development of the irrigation system management plan
- consulting widely and effectively
- developing effective irrigation system management plans that address the water organisation's objectives and requirements
- using data from monitoring arrangements to track the performance of the irrigation system management plan and inform the review of the plan
- preparing reports and recommendations for changes to the objectives of the management plan and its implementation

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- relevant legislation, policies and procedures
- measuring and testing procedures

- investigation procedures
- customer expectations and requirements

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

NWPIRR063 Develop and review surface water management plan

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP517B Develop and review surface water management plan.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to develop and review a surface water management plan to ensure environmental considerations are met and source of supply is maintained.

This unit applies to those working as managers in water organisations with responsibility for the management of surface water resources.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, managing staff, while performing sophisticated tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan and prepare for management of surface water flows and quality	1.1 Identify and interpret surface water flow requirements. 1.2 Identify and interpret water flow, quality and quantity requirements, including release. 1.3 Identify and interpret historic source water flow and system capacity information. 1.4 Identify and interpret environmental flows that impact on water flows and quality. 1.5 Identify and interpret environmental factors that impact on surface water. 1.6 Identify, interpret and review the current status of resource and operational protocols.
2. Develop the surface water management plan	2.1 Identify and interpret surface water management requirements. 2.2 Identify, interpret and validate stakeholder issues that impact on surface water. 2.3 Develop a surface water management plan.
3. Review the surface water management plan	3.1 Analyse and report deviations from planned performance measures. 3.2 Review objectives of the management and implementation plans. 3.3 Review parameters for water usage and quality through monitoring and testing programs. 3.4 Make recommendations for changes to plan objectives and procedures, and usage and quality parameters. 3.5 Provide advice and guidance to water users and stakeholders.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website

Unit Mapping Information

This unit supersedes and is equivalent to NWP517B Develop and review surface water management plan.

NWPIRR073 Implement and coordinate catchment management plan

Modification History

Release	Comments
1	<p>This unit was released in NWP Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP512B Implement and manage catchment management plan.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes • Element 4 reworded • PC 1.6 removed • PC 2.2 and 2.4 merged

Application

This unit describes the skills required to implement and coordinate activities in water catchments that impact on water yield and/or quality, to ensure performance measures for the catchment management plan are met.

This unit applies to those working as managers in water organisations with responsibility for the management of water catchments.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously, managing staff, while performing sophisticated tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Irrigation

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Prepare for catchment management	1.1 Confirm performance measures for the catchment management plan. 1.2 Identify and interpret catchment management requirements. 1.3 Identify user and customer requirements and environmental factors that impact on the catchment area. 1.4 Gather historical catchment information and evaluate as input to the management process. 1.5 Identify, interpret and assess water quality and quantity requirements.
2. Implement the catchment management plan	2.1 Inform stakeholders about catchment activity regulations. 2.2 Develop and coordinate management plan activities. 2.3 Develop the implementation plan.
3. Monitor the catchment management plan	3.1 Design and implement monitoring and testing programs. 3.2 Analyse, interpret and record testing results. 3.3 Manage the identification and investigation of current and/or potential problems. 3.4 Report the results of the investigation of problems and make recommendations. 3.5 Monitor the catchment area usage according to the plan. 3.6 Manage the identification, investigation and reporting of breaches of usage provisions.
4. Review the catchment management plan	4.1 Review objectives of the management and implementation plans. 4.2 Make recommendations for changes to objectives and implementation procedures.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

NWPTRT062 Operate and control reclaimed water irrigation

Modification History

Release	Comments
1	<p>This unit was released in NWP National Water Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to NWP362B Monitor, operate and control reclaimed water irrigation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice • Unit title changed to better reflect unit outcomes

Application

This unit describes the skills required to operate and control reclaimed water irrigation and the use of reclaimed water for irrigation practices.

This unit applies to those working as staff members with a specific responsibility for analysing the critical aspects of reclaimed water reuse management relating to a project or site and implementing reclaimed water reuse irrigation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work under indirect supervision, performing routine tasks in a familiar context, ensuring minimum damage to the environment.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Treatment

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Assess sites for reclaimed water irrigation	1.1 Identify soil/water interactions and soil properties important for plant growth. 1.2 Identify soil sampling sites, collect samples and conduct soil testing. 1.3 Classify soils using field texture, pH and structure analysis. 1.4 Monitor and determine the water holding capacity of the soil.
2. Assess quality of reclaimed water for irrigation	2.1 Sample and test reclaimed water and interpret quality parameters. 2.2 Determine crops suitable for the quality of reclaimed water and site conditions.
3. Implement reclaimed water irrigation	3.1 Identify basic features of irrigation systems. 3.2 Operate and maintain irrigation equipment. 3.3 Identify and apply irrigation scheduling options for reclaimed water. 3.4 Produce water budgets using crop factors and climate data. 3.5 Apply irrigation water and collect and monitor tail water or runoff.
4. Respond to water or soil quality issues	4.1 Develop irrigation management options to respond to water quality issues. 4.2 Identify and apply requirements and options for soil ameliorants. 4.3 Monitor infiltration and drainage.
5. Compile reclaimed water irrigation records	5.1 Compile reports from system data. 5.2 Report observations outside defined parameters for further action.

Foundation Skills

The foundation skills demands of this unit have been mapped for alignment with the Australian Core Skills Framework (ACSF). The following tables outline the performance levels indicated for successful attainment of the unit.

ACSF levels indicative of performance:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Learning					Reading					Writing					Oral communication					Numeracy				

Performance variables:

1	2	3	4	5	1	2	3	4	5	1	2	3	4	5	1	2	3	4	5
Support					Context					Text complexity					Task complexity				

Further information on ACSF and the foundation skills underpinning this unit can be found in the Foundation Skills Guide on the GSA website.

Unit Mapping Information

This unit supersedes and is equivalent to NWP362B Monitor, operate and control reclaimed water irrigation.

Assessment Requirements for NWPTRT062 Operate and control reclaimed water irrigation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in NWP National Water Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none">• Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- monitoring and managing soil
- solving operational problems
- accessing, interpreting and applying relevant legislation
- apply environmental policies, plans and procedures
- assessing environmental risks at the work site
- identifying soil groups
- using safety and personal protective equipment
- sampling and testing soil and water
- monitoring, operating and controlling reclaimed water irrigation
- analysing critical aspects of reclaimed water reuse management relating to the project or site
- implementing reclaimed water reuse irrigation
- identifying environment, health and safety risks and impact on soil, stock and operators
- applying environmental procedures
- participating in and contributing to reviews of reclaimed water reuse procedures

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- key principles of irrigation practices, including irrigation scheduling

- key characteristics of reclaimed water
- relevant legislative requirements
- standard operating procedures
- primary agencies involved in drinking water quality management
- water quality performance indicators
- an overview of the water supply system
- water hazardous agents and preventative strategies
- community and agency roles and responsibilities in monitoring water quality
- best management practices for the use of reclaimed water for irrigation purposes
- reclaimed water usage licensing procedures and requirements
- environmental, landscape and ground structure of work area
- equipment operation, capacity and limitations
- effects of weather and conditions on operation of site or plant
- interpretation and use of material safety data sheets
-

Assessment Conditions

Competency should be assessed in an actual workplace or in a simulated environment, with access to equipment and infrastructure appropriate to the outcome. Competency should be demonstrated over time to ensure the candidate is assessed across a variety of situations.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPPCY004 Support policy implementation

Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPPOL404A Support policy implementation.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to identify, implement and monitor relevant policy and report on implementation.

This unit applies to public sector staff and other stakeholders working in a role where they are required to support policy implementation.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently. They would perform routine tasks in a range of familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Policy

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Identify relevant policy	1.1 Identify work situations that are shaped by government or organisation policy. 1.2 Identify and locate policy relating to particular work situations.
2. Implement policy	2.1 Interpret policy to be implemented to identify and plan for change in work practices. 2.2 Identify the implications of policy for individual work practices, confirm and adjust practices to reflect policy requirements. 2.3 Support others affected by policy requirements to accommodate those requirements.
3. Monitor and report on policy implementation	3.1 Gather, record and report information that will assist with the evaluation of the effectiveness of policy implementation. 3.2 Gather, record and report information that will assist with evaluation of policy impact on organisational outcomes.

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPOL404A Support policy implementation.

Assessment Requirements for PSPPCY004 Support policy implementation

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion:

- reading complex and formal documents and providing information on their application
- preparing accurate written reports with language and structures suited to the intended audience
- working with legislation drafters and legal advisers
- consulting on and preparing policy guidelines
- adjusting communication to suit different audiences
- gathering and analysing policy feedback

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- practices and procedures for developing policy guidelines
- policy feedback mechanisms
- current organisation policies
- government policies and international policy obligations that impact on organisation policy
- organisation and government procedures and protocols
- public sector codes of ethics and code/s of conduct

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPPM402B Manage simple projects

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers management of generally low risk projects that may be small scale and managed by one person or a person with a small team. It includes implementing project start-up activities, coordinating project implementation, monitoring the project and arranging follow-up activities. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, managing simple projects overlaps with other generalist and specialist work activities such as applying government processes, using resources, gathering information, managing contracts etc.

This unit, and unit *PSPPM405A Administer simple projects*, are mutually exclusive. One or the other, but not both, may contribute to a qualification.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Implement start-up activities

- 1.1 The *project plan* is updated with confirmed information for key dates and activities, resources and project governance details in accordance with the project implementation strategy.
- 1.2 Project *stakeholders'* understanding of and agreement to fulfil the project requirements and their roles and responsibilities are confirmed.
- 1.3 *Required systems* are established and maintained throughout the project in accordance with the project plan.
- 1.4 A working knowledge of *project management tools* is used to facilitate integration of project activities and achievement of project outcomes.

2. Coordinate project implementation

- 2.1 *Integration* and *management* of project activities are handled in accordance with the project plan.
- 2.2 Stakeholder input and expectations are managed and their commitment is maintained throughout the life of the project in accordance with organisational policy and procedures and the project plan.
- 2.3 Disagreements and disputes are resolved or referred to a higher authority in accordance with organisational policy and procedures.
- 2.4 Project *change proposals* are received and changes are recommended/made in accordance with the project plan, and documented in accordance with *policy and procedures*.

3. Monitor project

- 3.1 All aspects of the project are continually monitored and

ELEMENT**PERFORMANCE CRITERIA**

- corrective action is taken as necessary to maintain progress in accordance with the project plan.
- 3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan when dealing with management, staff and/or contractors, steering committee members or other stakeholders.
- 3.3 Project governance plans and any related contracts are monitored, reviewed and amended as appropriate, and results are reported in accordance with the communication plan.
- 3.4 Project progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the contract.
- 3.5 Programmed review of objectives and achievement is implemented in accordance with the project plan.
- 4. Arrange project follow-up activities**
- 4.1 Project deliverables are analysed against *specifications*, performance standards and project objectives, under broad guidance, and the results are reported to stakeholders.
- 4.2 An initial support package or product manual is produced, if required, to provide guidance for stakeholders who will be required to apply the project results.
- 4.3 The support package includes options for stakeholders to take account of environmental and cultural factors in applying project results.
- 4.4 Operational and support authorities are consulted to research any testing/trialling/building requirements resulting from the project, and evaluation of any recommendations are included in the project report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project deliverables
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes

- responding to diversity, including gender and disability
- using project management tools applicable to small scale or low risk projects
- applying ethical decision making and problem solving related to project management of small scale or low risk projects
- writing recommendations and preparing implementation support packages requiring precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project management, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environment requirements
 - project governance requirements
 - quality standards
- risk management
- procurement guidelines
- human resources
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of small scale or low risk projects
- project management principles
- organisational and political context

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC401A Uphold and support the values and principles of public service
 - PSPGOV402B Deliver and monitor service to clients

- PSPGOV403B Use resources to achieve work unit goals
- PSPGOV411A Deal with conflict
- PSPGOV412A Use advanced workplace communication strategies
- PSPGOV422A Apply government processes
- PSPLEGN401A Encourage compliance with legislation in the public sector
- PSPPROC410A Administer contracts
- PSPPM401B Design simple projects
- PSPPM403B Close simple projects
- *Excluded units* that may not contribute to the same qualification as this unit:
 - PSPPM405A Administer simple projects

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when implementing projects, including coping with difficulties, irregularities and breakdowns in routine
- simple projects managed in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse

backgrounds

- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in *bold italics* in the Performance Criteria is explained here.

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones

- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Required systems for project management may include:

- planning and monitoring system
- financial management including:
 - budget allocation/funding
 - income generated
 - expenditure
- recordkeeping for documented information such as:

Project management tools may include:

- correspondence
- quality data including survey, needs, test results
- contracts
- time allocated and spent on each aspect of the project
- progress reports
- performance reports against milestones
- project outcomes
- samples, prototypes, models
- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
 - Gantt and bar charts
 - Program Evaluation and Review Technique (PERT) charts
 - Critical Path Method
 - cost schedule control system
 - logistics support analysis
 - life cycle cost analysis
 - spreadsheets
 - recording systems - electronic and manual

Integration of project activities may include:

- scope
- time
- cost
- quality
- human resources
- communications
- risk
- procurement

Management may include:

- scope management
- communication and reporting
- schedule management
- financial management
- quality management
- resources management
- people management
- logistics management
- risk management

Change proposals may include:

- contract management
- change management
- scope
- administration
- engineering, technical, technology changes
- time
- cost
- resources

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts
 - financial management and accounting legislation and regulations
 - privacy legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements

Specifications may include:

- functional
- technical
- performance
- material

PSPPM502B Manage complex projects

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers management of projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes managing start-up, project implementation, project integration and follow-up activities. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, managing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Manage start-up activities	<p>1.1 <i>Project plans</i> are refined in consultation with steering committee and team members, and precise details are included for schedules of activities, milestones and resources.</p> <p>1.2 <i>Required systems</i> are established and maintained throughout the project in accordance with the complexity of the project and in line with the project plan.</p> <p>1.3 Project team members' understanding of and commitment to fulfilling the project requirements and their roles and responsibilities for the duration of the project are confirmed.</p> <p>1.4 <i>Project management tools</i> are selected and applied effectively to achieve project outcomes.</p>
2. Manage project implementation	<p>2.1 <i>Integration</i> and <i>management</i> of complex project activities are handled in accordance with the project plan.</p> <p>2.2 Leadership and required <i>development</i> are provided to the project team, and morale, stress levels and triggers are managed throughout the life of the project in accordance with organisational <i>policy and procedures</i>.</p> <p>2.3 <i>Stakeholder</i> input and expectations are managed throughout the project in accordance with the communication plan.</p> <p>2.4 Disagreements and disputes are resolved to the satisfaction of stakeholders or referred to a higher authority in accordance with organisational policy and procedures.</p> <p>2.5 Project <i>change proposals</i> are negotiated, agreed and documented in accordance with policy and procedures.</p>
3. Manage project integration	<p>3.1 All aspects of the project and related projects are integrated and links are established to ensure objectives are met in accordance with the project plan.</p>

ELEMENT**PERFORMANCE CRITERIA**

- 3.2 Consultation and reporting mechanisms are applied in accordance with the communication plan and staff and contractors are regularly consulted to discuss progress and ensure effective results.
- 3.3 Project integration is monitored, and management plans and any related contracts are reviewed and amended as appropriate, with results reported in accordance with mechanisms identified in the communication plan.
- 3.4 Ongoing progress is monitored against agreed milestones in accordance with the project plan to provide a measure of performance throughout the life of the project.
- 3.5 Programmed review of objectives and achievement is planned and implemented in accordance with the project plan.
- 4. Coordinate project follow-up activities**
- 4.1 Significant judgment is applied in the analysis of project deliverables against *specifications*, performance standards and project objectives, and the results are reported to stakeholders.
- 4.2 Support package arrangements are identified and offered to stakeholders who will be required to apply the project results.
- 4.3 Options for stakeholders to take account of environmental and cultural factors in applying the project results are included in the support package.
- 4.4 Operational and support authorities are consulted to investigate any testing/trialling/building and evaluation requirements resulting from the project, and funding implications estimated in project report.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- leading and mentoring people to achieve project outcomes
- maintaining agreement of stakeholders and team members to timelines, roles and responsibilities
- negotiating with stakeholders and team members using communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- using project management tools applicable to reasonably complex projects

- applying ethical decision making and problem solving related to project management of reasonably complex projects
- writing recommendations and preparing project reports requiring precision of expression
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project implementation, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environmental and sustainability requirements
- project governance requirements
- quality standards
- risk management
- procurement guidelines
- financial management and budgetary framework
- human resources
- equal employment opportunity, equity and diversity principles
- project management tools to suit a range of reasonably complex projects in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project
- project management systems
- organisational and political context
- critical analysis in a project management context
- business and commercial issues related to the projects managed

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment

process include, but are not limited to:

- PSPETHC501B Promote the values and ethos of public service
- PSPGOV502B Develop client services
- PSPGOV503B Coordinate resource allocation and usage
- PSPGOV504B Undertake research and analysis
- PSPGOV505A Promote diversity
- PSPPM501B Design complex projects
- PSPPM503B Close complex projects
- PSPPROC501A Manage contract risk
- PSPPROC503A Manage contract performance

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project management in the organisation and the public sector
- workplace project documentation
- scenarios and case studies
- examples of project management tools

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when managing complete projects, including coping with difficulties, irregularities and breakdowns in routine
- management of complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds

- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- portfolios
- questioning
- scenarios
- authenticated evidence from the workplace and/or training courses

For consistency of assessment

Evidence must be gathered over time in a range of contexts to ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Project plans will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives

- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and human resource development
- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)

Required systems for project management may include:

- planning and monitoring system
- financial management including:
 - budget allocation/funding
 - income generated
 - expenditure
- recordkeeping for documented information such as:
 - correspondence
 - quality data including survey, needs, test results
 - contracts
- time allocated and spent on each aspect of the project
- progress reports
- performance reports against milestones
- project outcomes
- samples, prototypes, models

Project management tools may include:

- risk analysis
- organisational project governance framework
- communications plan
- reporting framework
- project management software and other tools:
 - Gantt and bar charts
 - Program Evaluation and Review Technique (PERT) charts

Integration of project activities may include:

- Critical Path Method
- cost schedule control system
- logistics support analysis
- life cycle cost analysis
- spreadsheets
- recording systems - electronic and manual
- scope
- time
- cost
- quality
- human resources
- communications
- risk
- procurement

Management may include:

- scope management
- communication and reporting
- schedule management
- financial management
- fraud control
- quality management
- resources management
- people management
- logistics management
- risk management
- contract management
- project implementation
- transition
- change management

Development may include:

- regular meetings
- feedback
- encouragement
- mentoring and coaching
- additional physical and human resources (within allocated budget) if and as required

Policy and procedures may include:

- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts
 - financial management and accounting legislation and regulations

- privacy legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements
 - environment and sustainability

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee
- end user
- supplier/service provider

Contract change proposals may include:

- administration
- cost
- engineering, technical, technology changes
- resources
- scope
- specifications
- time

Specifications may include:

- functional
- technical
- performance
- material

Modification History

Release	TP Version	Comments
3	PSP12V1	Unit descriptor edited.
2	PSP04V4.2.	Layout adjusted. No changes to content.
1	PSP04V4.1	Primary release.

Unit Descriptor

This unit covers closure of projects that may be reasonably complex in terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the projects. It includes reviewing project activity and managing project closure. Contract management requirements are not included as this aspect is addressed by units of competency within the Competency field of *Procurement and Contract Management*.

In practice, closing complex projects overlaps with other generalist and specialist work activities such as acting ethically, coordinating resource allocation and usage, developing client services, undertaking research and analysis.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication

Application of the Unit

Not applicable.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements are the essential outcomes of the unit of competency. Together, performance criteria specify the requirements for competent performance. Text in *bold italics* is explained in the Range Statement following.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Review project activity	1.1 Evaluation of project process, supplier performance and achievement against objectives is undertaken in consultation with <i>stakeholders</i> and results are reported in accordance with the <i>project plan</i> evaluation framework and organisational <i>policy and procedures</i> .
	1.2 The extent to which clients needs were met is evaluated and action to rectify problems is identified and documented.
	1.3 Implications of project outputs/outcomes for policies and operating procedures are identified and recommendations are made for their amendment.
	1.4 Information obtained from the evaluation of the project is provided in accordance with organisational requirements so it may be used to improve relevant policy and practice.
2. Manage project closure	2.1 Any funding associated with the project is acquitted against project budget items, and financial records are checked for accuracy and completed in accordance with organisational procedures.
	2.2 Project wind-down is <i>managed</i> and <i>documentation</i> , records and <i>approvals</i> are handled in accordance with project plan and organisational policy and procedures.
	2.3 Project stakeholders are debriefed, and infrastructure and resources are redeployed in accordance with organisational policy and procedures.
	2.4 Project hand-over to user/s is completed in accordance with organisational procedures, and lessons learnt are documented and reported to stakeholders to assist in continuous improvement.
	2.5 Stakeholders are advised of procedures and authorities for initial support to apply project results where relevant, and strategies

ELEMENT

PERFORMANCE CRITERIA

are provided to manage long-term project momentum in accordance with organisational requirements.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Skill requirements

Look for evidence that confirms skills in:

- analysing results and evaluating outcomes against objectives
- writing recommendations and preparing reports requiring precision of expression
- communicating with stakeholders and team members using a range of communication styles to suit different audiences and purposes
- responding to diversity, including gender and disability
- debriefing stakeholders and redeploying resources and infrastructure
- acquitting and reporting on resource expenditure including time and costs
- using project management tools applicable to reasonably complex projects
- applying workplace safety procedures in line with project requirements
- accessing/preparing information electronically or in hard copy

Knowledge requirements

Look for evidence that confirms knowledge and understanding of:

- legislation, organisational policies and procedures that may impact on project finalisation, for example:
 - public sector codes of ethics/conduct
 - occupational health and safety and environmental and sustainability requirements
 - project governance requirements
 - quality standards
 - risk management
 - procurement guidelines
 - financial management
 - human resource management and development
 - equal employment opportunity, equity and diversity principles
 - project specifications and objectives
- project management tools to suit a range of reasonably complex projects in

terms of scope, degree of risk, political, cultural and social factors that apply, consequences of failure and degree of control of the project

- project management principles and systems
- critical analysis in a project management context
- business and commercial issues related to the projects managed
- organisational and political environment

Evidence Guide

The Evidence Guide specifies the evidence required to demonstrate achievement in the unit of competency as a whole. It must be read in conjunction with the Unit descriptor, Performance Criteria, the Range Statement and the Assessment Guidelines for the Public Sector Training Package.

Units to be assessed together

- *Pre-requisite* units that must be achieved prior to this unit:*Nil*
- *Co-requisite* units that must be assessed with this unit:*Nil*
- *Co-assessed units* that may be assessed with this unit to increase the efficiency and realism of the assessment process include, but are not limited to:
 - PSPETHC501B Promote the values and ethos of public service
 - PSPGOV502B Develop client services
 - PSPGOV503B Coordinate resource allocation and usage
 - PSPGOV504B Undertake research and analysis
 - PSPGOV505A Promote diversity
 - PSPGOV507A Undertake negotiations
 - PSPGOV512A Use complex workplace communication strategies
 - PSPGOV517A Coordinate risk management
 - PSPPM501B Design complex projects
 - PSPPM502B Manage complex projects
 - PSPPROC504A Finalise contracts

Overview of evidence requirements

In addition to integrated demonstration of the elements and their related performance criteria, look for evidence that confirms:

- the knowledge requirements of this unit
- the skill requirements of this unit
- application of the Employability Skills as they relate to this unit (see Employability Summaries in Qualifications Framework)
- reviewing and closing complex projects in a range of (3 or

more) contexts (or occasions, over time)

Resources required to carry out assessment

These resources include:

- legislation, guidelines, procedures and protocols relating to project close-out
- workplace project documentation
- scenarios and case studies
- examples of project management tools suited to reasonably complex projects

Where and how to assess evidence

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when reviewing and closing complex projects, including coping with difficulties, irregularities and breakdowns in routine
- reviewing and closing complex projects in a range of (3 or more) contexts (or occasions, over time)

Assessment methods should reflect workplace demands, such as literacy, and the needs of particular groups, such as:

- people with disabilities
- people from culturally and linguistically diverse backgrounds
- Aboriginal and Torres Strait Islander people
- women
- young people
- older people
- people in rural and remote locations

Assessment methods suitable for valid and reliable assessment of this competency may include, but are not limited to, a combination of 2 or more of:

- case studies
- demonstration
- observation
- portfolios
- projects
- questioning
- scenarios
- simulation or role plays
- authenticated evidence from the workplace and/or training courses

For consistency of

Evidence must be gathered over time in a range of contexts to

assessment ensure the person can achieve the unit outcome and apply the competency in different situations or environments

Range Statement

The Range Statement provides information about the context in which the unit of competency is carried out. The variables cater for differences between States and Territories and the Commonwealth, and between organisations and workplaces. They allow for different work requirements, work practices and knowledge. The Range Statement also provides a focus for assessment. It relates to the unit as a whole. Text in ***bold italics*** in the Performance Criteria is explained here.

Stakeholders may include:

- project sponsor/funding bodies
- clients or customers (internal and external)
- industry
- other agencies
- general public
- relevant interest groups
- unions
- functional areas
- the organisation's senior management
- Ministers
- project team
- steering committee members
- end user
- supplier/service provider

Project plan will include some or all of:

- acquisition strategies
- budget and financial management strategy
- contract management
- cost estimates
- evaluation criteria
- expected outcomes/measurable benefits of the project
- facilities
- inclusions and exclusions from project
- information/communication strategy
- intellectual property strategies
- milestones
- objectives
- outputs/project deliverables and their acceptance criteria
- people plan including human resource management and

human resource development

- performance criteria/indicators
- project control mechanisms
- project implementation strategy
- project governance strategy
- purpose
- quality assurance
- quality control
- quality standards for project
- rationale
- required project resources
- resource management
- risk management
- roles and responsibilities
- schedule/timeline
- task/work breakdown structure (WBS)
- government legislation (Federal, State and Local) affecting organisation's administration such as:
 - public sector management acts
 - financial management and accounting legislation and regulations
 - privacy legislation
- government and organisational guidelines and procedures relating to:
 - project governance
 - resourcing
 - security
 - strategic plans
 - recruitment
 - risk management
 - procurement guidelines
 - designation approvals
 - industrial agreements
 - environment and sustainability

Policy and procedures
may include:

***Management of project
wind-down*** may include:

- risks
- issues
- assets
- consultants
- project team
- support staff

Documentation may include:

- project completion report
- supplier performance reports
- whole-of-life support plans
- transfer documents
- financial reports and acquittals
- evaluation reports
- transition plans

Approvals may be required from:

- project sponsor/funding body
- business owner of the project
- program manager
- line manager
- project governance office/personnel in the organisation
- chief executive officer, manager or management representative
- customer or client

PSPREG003 Apply regulatory powers

Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPREG401C Exercise regulatory powers.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to cover the exercise of powers under the organisation's enabling legislation and other relevant legislation for regulation, monitoring, inspection and investigation.

This unit applies to those working in public sector roles conducting regulatory activities.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently as part of a team, performing routine tasks involving a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Regulatory

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Establish regulatory powers	<p>1.1 Access and use current information relating to enabling legislation and regulations to maintain up-to-date knowledge of requirements.</p> <p>1.2 Confirm powers provided under the legislation and the boundaries of those powers.</p> <p>1.3 Identify and confirm compliance requirements of the legislation, related regulations, standards, codes of practice and policy.</p> <p>1.4 Identify and confirm acts and omissions that comprise non-compliance or offences under the legislation.</p>
2. Apply enabling legislation	<p>2.1 Identify and analyse circumstances where regulatory powers will be exercised to determine response or measures to apply.</p> <p>2.2 Identify circumstances requiring the exercise of regulatory powers that are outside own limits and refer to others.</p> <p>2.3 Identify risks associated with the exercise of regulatory powers and strategies to manage risks.</p> <p>2.4 Apply enabling legislation consistent with the boundaries and powers contained therein.</p>
3. Utilise other legislation and standards	<p>3.1 Identify other legislation and standards which impact on powers and confirm their requirements.</p> <p>3.2 Resolve or refer apparently conflicting legislative directions.</p>
4. Work with other organisations	<p>4.1 Identify organisations that have jurisdictions which may overlap and establish and maintain relationships.</p> <p>4.2 Identify organisations available to provide assistance and advice or take referrals and establish relationships for mutual benefit.</p> <p>4.3 Follow organisational protocols and procedures when working with other organisations.</p> <p>4.4 Refer compliance matters to other organisations for action when required.</p> <p>4.5 Follow lead agency protocols and/or lines of authority during operations involving more than one organisation.</p>

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPREG401C Exercise regulatory powers.

Assessment Requirements for PSPREG003 Apply regulatory powers

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- undertaking research and analysis
- using information technology to access relevant legislation and procedures
- reading complex written materials and applying them to work practices
- using scanning techniques
- engaging in discussion involving exchanges of often complex oral information
- choosing regulatory responses and/or measures to fit the circumstances and justifying those responses against legislation, guidelines, policy and regulations

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- full range of regulatory powers and the limits to those powers
- enabling legislation
- offences under the legislation
- aspects of criminal law, administrative law, industrial law, contract law
- statutory time limits
- terminology used in legislation and procedures
- organisational policies, guidelines and regulations
- public sector legislation including, health and safety and environment relating to the exercise of regulatory powers

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PUACOM012B Liaise with media at a local level

Modification History

Release	TP Version	Comments
3	PUA12 V2.1	Editorial changes.
2	PUA12 V2	Layout adjusted. Application added.
1	PUA00 V8.1	Primary release.

Unit Descriptor

This unit covers the liaison with media at a low level incident and providing information about local events.

Application of the Unit

This unit applies to workers of local public safety groups who are delegated the responsibility to liaise with media in both emergency and non-emergency situations.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of

performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Determine media requirements	<p>1.1 <i>Organisational protocols</i> are followed when <i>liaising with the media</i>.</p> <p>1.2 The media's potential interest is assessed and arrangements are made to meet needs where appropriate.</p> <p>1.3 <i>Operational responsibilities</i> are balanced against the provision of information to the <i>media</i>.</p>
2. Provide information to the media	<p>2.1 A positive image of the <i>organisation</i> is maintained when liaising with the media.</p> <p>2.2 Every opportunity is used to promote the organisation, its services and personnel.</p> <p>2.3 <i>Relevant and succinct information</i> is supplied to media when operational responsibilities are under control and when organisational representative is available to talk to the media.</p>
3. Publicise an event	<p>3.1 Relationship is established with media contacts.</p> <p>3.2 <i>Event</i> details and support materials are gathered and presented in a logical, relevant and concise manner to the media.</p> <p>3.3 Information provided to media is recorded and maintained.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- attention to detail
- communicating facts in a fluent, clear and interesting manner
- empathy with victims and operational personnel
- liaison with media and other organisation personnel
- media presentation
- prioritisation between operational responsibilities and provision of information to

media

- public speaking
- retaining professionalism under duress

Required Knowledge

- organisational protocols relating to media liaison, for example legal and organisation requirements relating to:
 - confidentiality
 - libel
 - accuracy
 - discrimination
- role of media in disseminating information
- requirements of media to present information in a newsworthy/informative manner
- requirements of different media:
 - newspapers
 - magazines
 - radio
 - television (local, regional, national media)
- communication skills
- establishing media relationship

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in providing information to media whilst managing operational responsibilities.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated work environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Organisation*** may include
- Fire
 - Police
 - State Emergency Service
 - Emergency Management

- Organisational protocols*** may include
- organisational policies and procedures
 - personal presentation being as neat as possible considering the operational circumstances
 - ensuring media liaison person is fully briefed and prepared
 - acknowledge support of other organisations
 - seeking advice from headquarters where appropriate
 - limiting comments on role of own service
 - relevant Federal and State legislation and regulations

- Liaising with the media*** may include
- print (local, community, daily newspapers, magazines)
 - television (live or pre-recorded)
 - radio (live or pre-recorded)

- Operational responsibilities*** may include
- preservation of life and property, which is the principal concern to all public safety personnel
 - presenting information relevant to the public

- Event*** may include
- long service to organisation
 - medal presentation
 - awarding of certificates
 - donations/sponsorships/fundraising
 - recruiting
 - new equipment
 - VIP visit
 - open day
 - training
 - unusual rescues
 - self help information

- Media's potential interest*** may include:
- enormous media event
 - standard report
 - human interest
 - in the public's interest

- Media's requirements*** may include:
- deadlines
 - capabilities

- visual and verbal requirements
- types of medium
- variation
- journalists
- amenities
- briefing area
- access to media liaison person
- bilingual personnel and bilingual information

Media may include:

- representatives from mainstream, community and ethnic television
- print and broadcast media

Organisational positive image may include:

- promote the relevance and efficiency of the service
- report the facts
- heroism of personnel
- organisational personnel are co-operative and responsive
- organisational personnel well presented
- handling media in most positive manner in even the most adverse conditions/circumstances

Media opportunity may include:

- opportunity to promote the services
- provide educational information to the public
- airplay

Relevant and succinct information may include:

- information that according to protocol is available for public release
- report facts and avoid speculation
- do not supply classified information
- use language that can be readily understood by all to avoid misinterpretation

PUAEMR026 Treat operational risk

Modification History

Release	TP Version	Comments
2	PUA12 V2.1	Editorial changes.
1	PUA12 V2	New unit.

Unit Descriptor

This unit describes the outcomes required to identify, plan and implement treatment options in order to reduce risk.

Application of the Unit

This unit applies to people working in a relatively simple and routine workplace in which they use the organisation's policy and procedures. They would normally have local supervisory/management responsibility and will apply known solutions to a variety of predictable problems.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

PUAEMR027 Assess operational risk

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the Performance Criteria describe the required performance

essential outcomes of a Unit of Competency.

needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Make risk decision	<p>1.1 Calculated level of risk is compared to the established <i>risk criteria</i> and determined to be acceptable or unacceptable in consultation with the supervisor.</p> <p>1.2 Risk that is determined as unacceptable is documented and noted for treatment.</p>
2. Identify and select treatment options	<p>2.1 <i>Treatment options</i> of known risks are identified and confirmed as contained in <i>organisational standards and guidelines</i> or supervisor's guidance.</p> <p>2.2 Treatment options under consideration are evaluated for <i>effectiveness</i> within the given context.</p> <p>2.3 Selected treatment options are documented and communicated in accordance with organisational policies and procedures.</p>
3. Implement treatment options	<p>3.1 <i>Treatment plans</i> incorporating selected options are implemented in accordance with organisational policies and procedures.</p> <p>3.2 Treatment plans are communicated in the workplace in accordance with organisational policies and procedures.</p>
4. Monitor and review risk and the process	<p>4.1 Effectiveness and efficiency of the treatment plan is <i>monitored</i>, reviewed and recorded in accordance with organisational policies and procedures to ensure compliance and validity.</p> <p>4.2 Residual risk is calculated and communicated to supervisors so that a decision can be made whether to accept this risk or to re-establish the risk management process.</p> <p>4.3 Treatments are adjusted and communicated following the review process.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating effectively with personnel at all levels of organisation and risk management specialists
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically treat risks and, where appropriate, access resources
- manage simple project implementation
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards (risk, hazard, risk assessment, risk management and risk treatment)
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- treatment options for risks relevant in the workplace
- team work principles and strategies
- basic project management strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholders' involvement throughout the treatment process and that an informed analysis and selection of treatment options has been undertaken using the methodology and procedures approved by the organisation.

Consistency in performance

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or under conditions that closely simulate the workplace.

Specific resources for assessment

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplace

Guidance information for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of treating operational risk, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of treating operational risk in a range of 3 or more contexts or occasions, over time

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and should include a combination of two or more of:

- workplace projects
- simulation or role plays
- case studies and scenarios
- observation
- portfolios

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Risk criteria*** may include:
- the nature and types of causes and consequences that can occur and how they will be measured
 - how likelihood will be defined
 - the timeframe(s) of the likelihood and/or consequence(s)
 - how the level of risk is to be determined
 - the views of stakeholders
 - the level at which risk becomes acceptable or tolerable
 - whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered
- Treatment options*** may include:
- avoidance of the risk
 - removing a risk source
 - changing the likelihood of
 - an initiating event or source of risk occurring
 - a hazard impacting on elements at risk
 - changing the consequences of an identified hazard impact
 - sharing the risk
 - retaining the risk based on an informed decision
- Organisational standards and guidelines*** may include:
- AS/NZS ISO 31000:2009 Risk management—Principles and guidelines
 - regulatory or legislative requirements
 - environmental protection and sustainability regulations
 - industry standards and codes of practice
 - organisational charter/business plan
 - organisational OHS, risk management or resilience

- policies or operating procedures
- Effectiveness** may include:
- benefits to the individual
 - benefits to the organisation
 - cost benefits resulting from the implementation of the treatment
 - cost of implementing the treatment option
- Treatment plans** may include:
- budgeting
 - expected outcome of treatments
 - performance measures
 - responsibilities
 - review process to be set in place
 - schedules
- Monitored** may include:
- critical observation
 - identification of changes over time
 - regular checking
 - regular recording

PUAEMR027 Assess operational risk

Modification History

PUAEMR027 Release 1: Primary release.

Unit Descriptor

This unit describes the outcomes required to identify and assess risk in an operational environment.

No licencing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Application of the Unit

This competency applies to workers at a relatively simple and routine level, in which they use established organisational policy and procedures. Workers would normally have local supervisory or management responsibility and apply known solutions to a variety of predictable problems.

The unit covers the first four steps of the risk management process and provides the skills and knowledge required to conduct a risk assessment.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Establish the risk context	<p>1.1 Objectives and scope are identified using organisational risk management standards and guidelines.</p> <p>1.2 Risk criteria are identified and confirmed as contained in organisational policies, procedures or supervisor guidance.</p> <p>1.3 Structure for the planning required to conduct a risk assessment is determined.</p> <p>1.4 Stakeholder aims and objectives are identified and recorded in accordance with workplace procedures and guidelines.</p>
2. Identify risk	<p>2.1 All possible sources of risk which may affect the situation or objectives are identified and recorded in consultation with stakeholders.</p> <p>2.2 Risks are identified using a specified methodology or tool in accordance with workplace procedures and guidelines.</p> <p>2.3 Risk statements describing consequences are generated.</p>
3. Analyse risk	<p>3.1 Risks are analysed by estimating the likelihood of particular consequences occurring.</p> <p>3.2 Levels of risk are determined, documented and communicated in accordance with organisational policies and procedures.</p>
4. Evaluate risk	<p>4.1 Levels of risk are prioritised for treatment.</p> <p>4.2 Calculated level of risk is compared to the established risk evaluation criteria, and communicated to supervisors.</p> <p>4.3 Risks are monitored and reviewed until appropriate treatment measures have been implemented.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicating effectively with risk management specialists and people at all organisational levels
- preparing more detailed reports for a range of target groups including OHS or risk committee, OHS representatives, managers and supervisors
- managing own tasks within time frame
- using consultation and negotiation skills, particularly in relation to developing plans and implementing and monitoring designated actions
- contributing to the assessment of the resources needed to systematically assess risks and, where appropriate, access resources
- analysing relevant workplace information and data, and make observations including of workplace tasks and interactions between people, their activities, equipment, environment and systems
- carrying out simple arithmetical calculations (e.g. % change), and produce graphs of workplace information and data to identify trends and recognise limitations
- interpreting information and data to identify areas for improvement
- using language and literacy skills appropriate to the workgroup and the task
- using basic computer and information technology skills to access internal and external information and data on risk
- undertaking basic research to access relevant information and data
- paying attention to detail when making observations and recording outcomes.

Required Knowledge

- organisational policies, procedures and guidelines relevant to risk
- risk management terminology and language in accordance with relevant standards
- specified methods or tools endorsed by an organisation and provided for use in the identification and analysis of risk
- team work principles and strategies
- techniques for giving and receiving feedback in a constructive manner
- concept of common law duty of care as applies in emergency risk management context
- structure and forms of legislation including regulations, codes of practice, associated standards and guidance material
- roles and responsibilities under OHS legislation of employees, including supervisors and contractors
- techniques/methods used to identify or analyse information
- verbal and non-verbal communication techniques including language style, active listening

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to define and identify risk language, definitions and terminology. Evidence must also be provided of stakeholder's involvement throughout the process and that an informed analysis of the risks has been undertaken using tools and methodology approved by the organisation.

Consistency in performance

Competency should be demonstrated by gathering evidence over a range of workplace scenarios, using a variety of tools and methodology and should include the assessment of a variety of risks that may adversely impact on the organisation.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in the workplace or under conditions that closely simulate the workplace

Specific resources for assessment

Access to:

- organisational documentation
- relevant organisational standards
- appropriate tools and methods used within the organisation
- simulated or real-world workplaces

Guidance information for assessment

Valid assessment of this unit requires:

- a workplace environment or one that closely resembles normal work practice and replicates the range of conditions likely to be encountered when applying the principles of operational risk assessment, including coping with difficulties, irregularities and breakdowns in routine
- application of the principles of operational risk assessment in a range of 3 or more contexts or occasions, over time.

Assessment methods should reflect but not exceed workplace demands, such as literacy, and the needs of individuals who might be disadvantaged.

Assessment methods suitable for valid and reliable assessment of this unit must use authenticated evidence from the workplace and/or training courses and may include a combination of two or more of:

- workplace projects

- simulation or role plays

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Organisational risk management standards and guidelines may include:

- Standard AS/NZS/ISO 31000:2009 Risk Management—Principles and Guidelines
- regulatory or legislative requirements e.g. ohs act
- environmental protection and sustainability regulations
- industry standards and codes of practice
- organisational charter/business plan
- organisational ohs, risk management or resilience policies or operating procedures

Risk criteria may include:

- the nature and types of causes and consequences that can occur and how they will be measured
- how likelihood will be defined
- the timeframe(s) of the likelihood and/or consequence(s)
- how the level of risk is to be determined
- the views of stakeholders
- the level at which risk becomes acceptable or tolerable
- whether combinations of multiple risks should be taken into account and, if so, how and which combinations should be considered

Structure for the planning may include:

- documentation required
- analysis tools which are required to conduct the assessment
- approach taken to conduct the assessment
- depth of assessment

Specified methodology or tools may include:

- a risk matrix
- analysis of risk registers
- brainstorming
- business continuity planning
- examining any available data e.g. audit

results/incident reports

- expert judgement
- focus groups
- nomogram
- scenario analysis

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

- | | |
|--|---|
| <p>1. Prepare to respond to fire</p> | <p>1.1 Information about location of fire, <i>type of wildfire</i> and most effective route to the fire is obtained, taking into account local conditions.</p> <p>1.2 Personal protective clothing and equipment, and food and fluid requirements are identified and relevant preparations undertaken prior to departure as per organisational standards.</p> |
| <p>2. Proceed to fire</p> | <p>2.1 Location of the fire and <i>type of fuel</i> is confirmed on approach.</p> <p>2.2 Access to the area is gained safely without damage to vehicles and equipment, and minimum damage to the environment.</p> <p>2.3 <i>Evidence relevant to fire cause</i> is noted and brought to the attention of the supervisor.</p> <p>2.4 <i>Indicators of fire behaviour</i> are observed and communicated to supervisor.</p> |
| <p>3. Obtain and use firefighting equipment and extinguishing media</p> | <p>3.1 Nominated <i>extinguishing media</i> and <i>firefighting equipment</i> are located and obtained.</p> <p>3.2 Equipment is used in accordance with organisational and manufacturer's procedures.</p> |
| <p>4. Combat wildfire</p> | <p>4.1 Instructions are received, <i>firefighting strategies and tactics</i> are confirmed and implemented in accordance with organisational safe work practices and procedures.</p> <p>4.2 <i>Suppression techniques</i>, equipment and extinguishing media appropriate to wildfire conditions are used.</p> <p>4.3 Control lines are prepared in accordance with supervisor's instructions.</p> <p>4.4 Equipment is positioned, made ready for use and protected from damage in accordance with</p> |

- organisational procedures.
- 4.5 Fire is attacked taking into account *wildfire hazards* as directed and in accordance with organisational procedures.
- 4.6 Evidence of fire cause and area of fire origin are protected.
- 4.7 *Communication* is maintained at all times in accordance with organisational procedures.
- 5. Observe and react to wildfire and weather conditions**
- 5.1 Conditions at the fire are observed and their effect on fire behaviour and development are noted and reported to supervisor.
- 5.2 *Weather conditions* and changes to fire behaviour are observed and reported to supervisor.
- 5.3 *Variations in topography, fuel features* and fuel arrangements are observed and effect on fire behaviour is reported to supervisor as required.
- 5.4 *Escape routes* and *safety zones* are identified and maintained at all times.
- 5.5 Communication is maintained with other firefighting personnel and supervisor throughout operational activities.
- 6. Participate in mop-up and patrol activities and support operations**
- 6.1 Mopping-up activities are carried out in accordance with organisational procedures.
- 6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures.
- 6.3 Activities to *support firefighting operations* are carried out in accordance with organisational procedures.
- 7. Recover and store equipment**
- 7.1 Equipment and *consumables* are recovered as directed.
- 7.2 Equipment is stored in accordance with organisational procedures.
- 7.3 Cleaning and maintenance are carried out in accordance with organisational procedures.
- 7.4 Damaged or lost equipment is reported in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- detect hot spots, hazardous trees, unsecured wildfire perimeter
- undertake dry and wet wildfire attack
- use wildfire control tools and equipment
- work as a member of a team

Required Knowledge

- communication on the fireground
- extinguishing media, water, foam, suppressants
- fire behaviour (fuel, weather and topography)
- health and fitness requirements
- hygiene and wellbeing
- organisational operating procedures
- safe work practices
- wildfire control tactics and techniques
- wildfire hazards, safety techniques

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- react to changing wildfire behaviour due to changes in weather, topography and fuel conditions
- use firefighting equipment
- participate in dry wildfire control
- use extinguishing media in wildfire control
- maintain health and safety of self, other workers and people in the immediate work area
- participate in mop-up and patrol
- undertake operational activities safely

Consistency in performance

Competency should be demonstrated over time in a range of actual and/or simulated field-based workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed in an agency approved simulated and/or field-based workplace environment.

Specific resources for assessment

Access is required to:

- controlled or contained fires and/or simulated workplace environment
- firefighting equipment and extinguishing media

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an industry-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. <i>Bold italicised</i> wording in the Performance Criteria is detailed below.	
<i>Type of wildfire</i> must include:	<ul style="list-style-type: none"> • crown • ground • surface
<i>Type of fuel</i> may include:	<ul style="list-style-type: none"> • crop • forest • grass • heath • peat, coal and combustible soils • plantation • scrub
<i>Evidence relevant to fire cause</i> may include:	<ul style="list-style-type: none"> • fresh vehicles tracks • items or objects at scene • nature and behaviour of fire at the scene upon arrival

	<ul style="list-style-type: none"> • nature and colour of smoke and number of columns • people and vehicles leaving the scene • whether gates on access routes to the fire are closed, opened or locked
Indicators of fire behaviour may include:	<ul style="list-style-type: none"> • flame height and length • noise • rate of spread • smoke colour and density • spotting
Extinguishing media must include:	<ul style="list-style-type: none"> • water
and may also include:	<ul style="list-style-type: none"> • Class A foam • retardants • soil • wetting agents
Firefighting equipment must include:	<ul style="list-style-type: none"> • drip torch • hand tools • hose and small gear • knap sack • pump • tanker
and may also include:	<ul style="list-style-type: none"> • chainsaw • ropes and lines
Firefighting strategies must include:	<ul style="list-style-type: none"> • defensive • direct attack • indirect attack • offensive: • parallel attack
Firefighting tactics may include:	<ul style="list-style-type: none"> • backburning • burning out • control line construction • mopping-up • patrol • use of extinguishing media
Suppression techniques may include:	<ul style="list-style-type: none"> • dry firefighting • wet firefighting
Wildfire hazards may include:	<ul style="list-style-type: none"> • burns • disorientation • electrical installations and powerlines • embers

	<ul style="list-style-type: none"> • falling branches/trees • fatigue • heat related illness • lack of visibility • machinery/vehicle • manual handling • noise • radiant heat • smoke inhalation • snake or insect bite • sprain or fracture • trips and falls • water bombing operations
Communication may include:	<ul style="list-style-type: none"> • paging • personal contact • phone • radio • written notes
Weather conditions may include:	<ul style="list-style-type: none"> • atmospheric stability • relative humidity • temperature • variations to wind speed and direction
Variations in topography may include:	<ul style="list-style-type: none"> • aspect • elevation • landscape features • slope
Fuel features must include:	<ul style="list-style-type: none"> • arrangement/distribution • moisture content • quantity • size • type
Escape routes may include:	<ul style="list-style-type: none"> • prepared tracks • roads • trails • waterways
Safety zones may include:	<ul style="list-style-type: none"> • bare ground • burnt areas • clearings • rivers • site of a recent wildfire or prescribed burn • static water bodies

<i>Support firefighting operations</i> may include:	<ul style="list-style-type: none">• providing/transporting food, water and equipment for an incident• working with earth moving equipment such as bulldozer, grader, tractor with blade
<i>Consumables</i> may include:	<ul style="list-style-type: none">• flagging tape• fuel• rubbish• signs

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1. Receive and report details of wildfire | <p>1.1 Details of the wildfire including its location, <i>type</i>, behaviour and development are received and recorded.</p> <p>1.2 Fire details are reported in accordance with organisational procedures.</p> |
| 2. Prepare to respond to fire | <p>2.1 Location of the wildfire is confirmed and the safest effective <i>access</i> route is determined.</p> <p>2.2 <i>Personal protective clothing and equipment</i>, apparel, food and water are obtained before departure, in accordance with organisational requirements.</p> <p>2.3 Most appropriate method of transport to the wildfire is selected and used.</p> |
| 3. Proceed to fire | <p>3.1 Location of the wildfire is confirmed by observation or from instructions while on approach.</p> <p>3.2 Access to area is determined and achieved without injury to personnel or damage to vehicles, equipment or <i>environmentally sensitive areas</i>.</p> <p>3.3 Evidence observed on approach relevant to wildfire cause is noted and brought to the attention of the appropriate authority.</p> <p>3.4 <i>Navigational aids</i> are used for planning and operational purposes.</p> |
| 4. Protect people and assets | <p>4.1 As far as conditions allow, number, location and safety of people and <i>assets</i> in the threatened area is determined and assessed.</p> |

- 4.2 Appropriate **protective procedures** are implemented under direction, to protect persons in the path of a wildfire.
- 4.3 Access by the public and personnel to hazardous locations is controlled as directed and in accordance with organisational procedures.
- 4.4 Defensibility of property is considered and, if appropriate, assistance is provided to help occupiers.
- 4.5 Safety of people and assets in the threatened area is monitored during the course of the fire.
- 4.6 Safety of people and security of assets in the area is checked and reported after the passing of the fire.

5. Combat wildfire

- 5.1 Access to the area of operations is gained in the safest and most effective manner.
- 5.2 Notification of arrival and appropriate report is provided.
- 5.3 Briefing is received including area of operations, strategies and tactics to be employed.
- 5.4 Most suitable location to commence wildfire control operations is selected.
- 5.5 **Firefighting media and equipment** are selected and used effectively and safely in accordance with organisational procedures.
- 5.6 **Fire hazards** are identified and action taken to minimise the risk of injury to the public, personnel and self.
- 5.7 **Firefighting strategies** are implemented to achieve objectives in accordance with organisational procedures.
- 5.8 Fire control activities are undertaken to minimise overall damage and impact on assets and the environment.
- 5.9 **Potential fire behaviour** is considered and acted upon to ensure safety and achievement of objective.
- 5.10 **Fuel, weather and topographical factors** are observed and potential fire behaviour anticipated.
- 5.11 Communication is maintained with supervisor and other firefighters in the work area.
- 5.12 **Fire reports** are provided to supervisor as required.
- 5.13 Area of origin and **evidence of fire cause** are protected and brought to attention of supervisor or relevant authority.
- 5.14 **Escape routes and safety zones** are established

- and communicated to personnel.
- 6. Conduct mop-up and patrol activities**
- 6.1 Mop-up activities are carried out in accordance with guidelines and conditions.
- 6.2 Patrol of the perimeter or sector of the fire is maintained in accordance with organisational procedures and guidelines.
- 7. Recover and maintain equipment**
- 7.1 Equipment is made up and made ready for operational use in accordance with organisational procedures.
- 7.2 Damaged or missing equipment is replaced, recorded and/or reported in accordance with organisational procedures.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate effectively in writing and orally
- detect hot spots and hazardous trees
- interpret fire weather, fuels and terrain and predict the likely impact on fire behaviour
- mop-up
- read maps
- receive briefings and confirm instructions
- undertake back burning and burning out
- use wildfire control tools and equipment
- work as part of a team

Required Knowledge

- defensive/offensive firefighting strategies and tactics:
 - asset protection
 - backburning and burning out
 - control lines and firebreaks
 - defensible space
 - direct, indirect, parallel attack
 - fire attack procedures
 - lighting patterns
 - standard operating procedures; reporting; patrol; mop-up
 - wet, dry firefighting
- fire behaviour:

- fire development
- flame height and intensity
- rate of spread,
- junction zones
- spotting
- firefighting protocols
- fireground hazards
- fire weather conditions and impact on fire behaviour:
 - atmospheric stability
 - relative humidity
 - temperature
 - wind speed and direction
- fuel and its impact on fire behaviour
 - moisture content, quantity, type, arrangement and distribution,
 - size, drought effect, curing
- organisational first aid requirements
- organisational procedures for dealing with injury
- protection of area of origin and evidence of fire cause
- safety near vehicles and machines
- terrain and physical feature and their impact on fire behaviour and suppression:
 - aspect
 - fuel variations
 - slope
 - weather variations

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- anticipate and react to changing wildfire behaviour
- observe and react to weather behaviour
- accurately assess whether or not it is safe to defend assets
- undertake dry wildfire control activity
- monitor effectiveness of tactics
- use firefighting equipment and extinguishing media
- maintain safety and health of self, other workers and

- people in the wildfire area
- use communication equipment
- read maps
- protect area of origin and evidence of fire cause

Consistency in performance

Competency should be demonstrated over time in a range of actual and/or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Evidence of performance at a wildfire or prescribed burn is required for attainment of Elements 5 and 6 of this unit.

The remaining elements should be assessed in an agency approved field-based environment or simulation.

Specific resources for assessment

Access is required to:

- access to wildfire or prescribed burns and/or approved field-based environment
- firefighting equipment and extinguishing media

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment. Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for

different work environments and situations that may affect performance. <i>Bold italicised</i> wording in the Performance Criteria is detailed below.	
<i>Types</i> must include:	<ul style="list-style-type: none"> • crown • ground • surface
<i>Access</i> may include:	<ul style="list-style-type: none"> • aircraft • boat • foot • vehicle
<i>Environmentally sensitive areas</i> may include:	<ul style="list-style-type: none"> • areas of: <ul style="list-style-type: none"> • fragile soils • native flora and fauna • rare and endangered species • threat to water quality
<i>Navigational aids</i> must include:	<ul style="list-style-type: none"> • maps
and may also include:	<ul style="list-style-type: none"> • aerial photographs • compass • global positioning systems
<i>Assets</i> may include:	<ul style="list-style-type: none"> • area of rare or sensitive flora and fauna • buildings • culturally significant sites • crops • plantations • property • public lands • stock • utilities and infrastructure (rail, power and telephone lines, water supply structures, communications towers, bridges)
<i>Protective procedures</i> may include:	<ul style="list-style-type: none"> • alerts and warnings • in-situ protection • relocation
<i>Firefighting media</i> must include:	<ul style="list-style-type: none"> • water
and may also include:	<ul style="list-style-type: none"> • Class A foam • earth • fire suppressants (short and long term) • retardants

	<ul style="list-style-type: none"> • wetting agent
Firefighting equipment must include:	<ul style="list-style-type: none"> • driptorch • hand tools • hose and small gear • pump • tanker
and may also include:	<ul style="list-style-type: none"> • aircraft • chainsaw • earth moving machinery • knap sack • ropes and lines
Fire hazards must include:	<ul style="list-style-type: none"> • burns • disorientation • environmental • falling branches and trees • falling objects • fatigue • heat-related illness (heat exhaustion and dehydration) • lack of visibility • manual handling • mine shafts • rolling objects • smoke inhalation • snake or insect bite • sprain or fracture • trips/falls • water bombing operation
Firefighting strategies must include:	<ul style="list-style-type: none"> • combination attack • combined strategy • defensive strategy • direct attack • indirect attack • mop-up • offensive strategy • parallel attack • patrol
Potential fire behaviour may include:	<ul style="list-style-type: none"> • fire development • flame height and intensity • fuel load and arrangement • rate of spread

	<ul style="list-style-type: none"> • spotting • change due to terrain, topography • change due to weather conditions - winds, fire whirls
Fuel may include:	<ul style="list-style-type: none"> • crop • forest • grass • heath • plantation: <ul style="list-style-type: none"> • stage 1 – post establishment • stage 2 – pre-canopy closure • stage 3a – canopy closure (unpruned) • stage 3b – canopy closure (pruned) • stage 4 – thinned • stage 5 – mature • stage 6 – harvesting/clear felling • scrub
Fuel factors which may impact on fire development must include:	<ul style="list-style-type: none"> • arrangement/distribution • effects of drought • moisture content • quantity • seasonal effects • size • topography • type
Weather factors which may impact on fire development must include:	<ul style="list-style-type: none"> • anabatic winds • atmospheric stability • cold fronts • diurnal variations • katabatic winds • land breezes • local effects • relative humidity • sea breezes • temperature • vegetation edge effects • wind changes • wind direction and speed
Topographical factors which may impact on fire development must include:	<ul style="list-style-type: none"> • aspect • elevation • local wind effects

	<ul style="list-style-type: none"> • slope • wind turbulence
<i>Fire reports</i> may include:	<ul style="list-style-type: none"> • effectiveness of strategies and tactics • fire behaviour • number and status of resources • safety and hazards • weather • welfare of personnel • work achieved and required
<i>Evidence of fire cause</i> may include:	<ul style="list-style-type: none"> • fresh vehicles tracks • nature and behaviour of fire at the scene upon arrival • nature and colour of smoke and number of columns • people and vehicles leaving the scene • whether gates on access routes to the fire are closed, opened or locked
<i>Escape routes</i> may include:	<ul style="list-style-type: none"> • prepared tracks • roads • trails • waterways
<i>Safety zones</i> may include:	<ul style="list-style-type: none"> • bare ground • burnt areas • clearings • rivers • site of a recent wildfire or prescribed burn • static water bodies

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the Required Skills and Knowledge and/or the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify target areas and burn objectives	<p>1.1 Areas requiring prescribed burning are identified in accordance with the organisation's procedures</p> <p>1.2 Burn objectives are developed in accordance with the organisation's procedures</p>
2. Prepare plans for prescribed burning	<p>2.1 Strategies and tactics which are suitable for the location and will meet objectives, are nominated in accordance with organisational procedures and programs</p> <p>2.2 Consultation with other <i>interested parties</i>, during the planning process, is conducted in accordance with organisational procedures</p> <p>2.3 Proposed strategies and tactics take into account the safety of persons and <i>protection of property, assets</i> and the <i>environment</i></p> <p>2.4 Resources required and conditions for implementation of the strategies and tactics, are specified in accordance with organisational procedures</p>
3. Monitor implementation of prescribed burning plans	<p>3.1 Progress of plan implementation is monitored for compliance with organisational requirements</p> <p>3.2 Prescribed burning activities are recorded in accordance with organisational procedures</p> <p>3.3 <i>Incidents</i> are reported and investigated in accordance with organisational procedures</p>

ELEMENT

PERFORMANCE CRITERIA

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

community consultation and liaison
recommending actions to be taken, communicating with others
preparation of plans
map reading
measuring quantities, calculating areas

Required Knowledge

wildfire hazards
prescribed burning strategies
wildfire behaviour
organisational procedures and programs
legislation relevant to wildfire hazard reduction
effects of fire on vegetation, fauna and fuel accumulation
effects of fire on areas and places of cultural significance

Evidence Guide

EVIDENCE GUIDE

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare to burn

- 1.1 Burn plan is identified in accordance with the organisational procedures and legislative requirements
- 1.2 A *contingency plan* is developed based on *local conditions at the time of burn* and communicated to all personnel
- 1.3 Permits are obtained in accordance with organisational procedures
- 1.4 Burn *notifications* are issued in accordance with organisational procedures
- 1.5 Resource requirements are identified
- 1.6 Control lines are specified and prepared in accordance with organisational procedures
- 1.7 *Assets* are *protected* in accordance with organisational procedures
- 1.8 *Weather conditions* are *monitored*

2. Conduct burn

- 2.1 *Resources* are gathered and deployed
- 2.2 Day of burn notifications are issued
- 2.3 Pre burn checks are conducted
- 2.4 *Lighting* is conducted in accordance with plan or organisational procedures
- 2.5 *Burning* is monitored and operational changes are made as required

ELEMENT	PERFORMANCE CRITERIA
3. Conduct post burn activities	2.6 Records are kept in accordance with organisational procedures 2.7 Burn operations are concluded 3.1 Outcomes of the burn are assessed and reported 3.2 Variations from the burn plan are reported in accordance with organisational procedures 3.3 Restoration and rehabilitation is carried out in accordance with organisational requirements

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

developing a prescribed burn
 conducting high and low intensity prescribed burns
 establishing control lines for prescribed burns
 developing a contingency plan
 monitoring the burn
 undertaking patrol activities

Required Knowledge

legislative, organisational policy and procedures for conducting a prescribed burn
 types of prescribed burns
 seasonal restrictions on prescribed burns
 authorisations required for conducting a burn
 high and low intensity prescribed burns
 ignition patterns and techniques
 developing a prescription
 resource requirements
 procedures for monitoring prescribed burns and securing burn area

REQUIRED SKILLS AND KNOWLEDGE

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence is demonstrated in:

- the preparation of burn plans for a designated area
- the effective conduct of a burn, utilising the appropriate resources and record action taken
- follow up activities once the burn is completed

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Evidence of competence may be demonstrated on the job and/or in a simulated environment

Specific resources for assessment

Access to a range of controlled or simulated fires
lighting equipment

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- demonstrated skills in verbal and written communications, presentations and submissions
- liaison/interpersonal skills
- review methods
- negotiation and analytical skills

Required Knowledge

- administrative procedures
- agency policies, procedures and practices
- communication methodologies

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the Performance Criteria, Required Skills and Knowledge, the Range Statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Assessment must confirm the ability to:

- develop, implement and review a range of policies and procedures

Consistency in performance

Competency should be demonstrated over time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Competency should be assessed on-the-job and by exercises/case studies in a simulated workplace environment.

Specific resources for assessment

There are no specific resource requirements for this unit.

Method of assessment

In a public safety environment assessment is usually conducted via direct observation in a training environment or in the workplace via subject matter supervision and/or mentoring, which is typically recorded in a competency workbook.

Assessment is completed using appropriately qualified assessors who select the most appropriate method of assessment.

Assessment may occur in an operational environment or in an agency-approved simulated work environment.

Forms of assessment that are typically used include:

- direct observation
- interviewing the candidate
- journals and workplace documentation
- third party reports from supervisors
- written or oral questions

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

<i>Stakeholders</i> may include:	<ul style="list-style-type: none"> • community groups • consultants • customers • executive management • industry, national and international associations • local, state and federal governments • other emergency management and non-government organisations • technical advisers • work groups and individuals internal to the agency
<i>Organisational policies, practices and procedures</i> may include:	<ul style="list-style-type: none"> • agency agreements • agency performance standards • agency practices and guidelines • corporate, strategic and operational plans • industrial agreements • ministerial/government directives • new reforms

	<ul style="list-style-type: none"> • orders and directives • procedures or guidelines • quality standards • relevant legislation
<i>Flow of information</i> may include:	<ul style="list-style-type: none"> • annual reports • business plans • chief executive officer reports • financial reports • notes and memos • personal letters or memos • personnel instructions/directives • publications • service standards • standing orders • technical journals • video, television, electronic information transfer
<i>Information systems</i> may include	<ul style="list-style-type: none"> • assets and stock registers • computer databases • files • notes and memos • personnel files • technical data banks • training and assessment records

PUALAW001B Protect and preserve incident scene

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application reviewed.
1	PUA00 V8.1	Primary release on TGA.

Unit Descriptor

This unit covers the competency required, on arrival at the scene of an accident or incident, to conduct initial assessment, take action to maintain public safety and preserve the scene, and note and record details and information.

The unit is particularly applicable in cases where organisation personnel are the first to arrive at the scene of an accident or incident.

Application of the Unit

This unit applies to all public safety workers at an incident who need to understand the importance of maintaining the legal integrity of the scene. It is not a specialist Crime Scene Investigation unit.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance Criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Secure and preserve scene	<p>1.1 Initial <i>assessment</i> is participated in to identify <i>factors which will impact</i> on public safety and scene preservation.</p> <p>1.2 <i>Incident/accident scene</i> is effectively secured to <i>preserve the scene</i> and maintain public safety in line with legislative requirements.</p>
2. Record and report details of incident scene	<p>2.1 <i>Details of the scene</i> are noted, <i>recorded and reported</i> according to organisation's policies and procedures.</p> <p>2.2 <i>Witness details</i> and information volunteered are recorded in accordance with <i>organisational and legislative requirements</i>.</p> <p>2.3 Information is communicated to <i>relevant personnel</i> in line with organisation's procedures.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- listening
- note taking
- observation
- questioning
- reporting

Required Knowledge

- legislative and organisation requirements relating to scene preservation

- methods of securing scene
- organisation requirements for taking witness details and information
- regulatory requirements for taking witness details and information
- techniques for estimating distance
- techniques for removing public from scene
- types of information which may assist in investigations

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Demonstrated ability to effectively secure scene and record and report details in accordance with the organisation's policies and procedures.

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments.

Context of and specific resources for assessment

Context of assessment

Performance at an incident, exercise or simulation is required to demonstrate competence in this unit. Written or verbal questions may be used as supporting evidence.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Incident scene may include:

- urban fire
- wild fire
- vehicle fire
- crime scene
- search for missing persons or evidence
- vehicle accident
- natural disaster
- industrial/mining accident
- incident involving death or injury to person or

- damage to property
 - urban scene
 - rural scene
 - indoor scene
 - outdoor scene
 - animal incident
 - marine
 - aircraft
 - train
 - explosions
 - hazardous materials
 - at scene
 - en route to and from scene
- Assessment of scene* may be conducted:
- Factors impacting* may include:
- public safety risk factors including factors that could impact on the safety of investigators
 - response team
 - the security/preservation of the actual site
 - the security and preservation of situational evidence
 - traffic
 - tactical factors affecting the quality of the investigation including environmental circumstances
 - chronology of events
 - access to scene
 - number of persons at scene
 - availability of support services
 - boundaries
 - incident scene specialists
 - forensic experts
 - potential witnesses
 - victims
 - other bystanders
 - personnel from other organisations
 - media
 - coroners
 - pathologists
 - medical practitioners
 - undertakers
 - forensic accountants
 - information technology consultants
 - legal officers
 - owners and/or occupiers
- Persons at scene* may include:

Security of scene may be affected by:

- topography
- climatic conditions
- human interference
- animal interference
- preservation of life/property
- structural integrity
- availability of personnel

Securing scene may include:

- removing non-emergency personnel from scene
- isolating scene
- erecting barriers

Details of scene may include:

- date
- time
- location
- damage
- persons present
- property involved
- possible causes
- items of evidence
- injuries
- status of utilities services such as broken water pipes
- animal species present
- flora
- fauna
- size and construction of building
- occupancy
- insurance details

Witness details may include:

- name
- contact details
- other details in accordance with organisation's policies and procedures

Relevant personnel may include:

- supervisor
- team leader
- police
- investigating officer
- other organisation's personnel

Communication may include:

- verbal
- completing standard forms
- written

Recording and reporting may include:

- taking notes
- completing standard forms
- making sketches

Preserving scene may include:

- taking photographs
- taping
- electronic videoing
- preserving evidence and the area of origin

Organisational and legislative requirements may vary between sectors and organisations and may include:

- legislation relevant to the operation/incident/response
- legislation relevant to the organisation
- operational
- corporate and strategic plans
- operational procedures
- operational performance standards
- organisation's personnel practices and guidelines
- organisation's quality standards

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1. Prepare for the brief/debrief

- 1.1 A ***briefing***/debriefing is planned and prepared in accordance with organisation's policy and procedures
- 1.2 ***Relevant personnel*** involved in the activity are identified and informed of debriefing requirements
- 1.3 Briefing/***debriefing*** meeting is scheduled as soon as possible following the incident
- 1.4 An appropriate location for the brief/debrief is selected
- 1.5 Appropriate incident information is collected

2. Conduct the brief/debrief

- 2.1 Purpose and structure of the brief/debrief is outlined to incident personnel
- 2.2 Discussion, analyses and evaluation by personnel of their anticipated or actual roles in the activity are encouraged
- 2.3 Contributions from personnel during the brief/debrief are continually sought, encouraged and valued
- 2.4 Review of the activity against the policies, practices and training of the organisation is undertaken to identify any discrepancies
- 2.5 Brief/debrief is conducted in accordance with the organisation's policies and procedures

3. Conclude the brief/debrief

- 3.1 Contributions of personnel are acknowledged in a positive way
- 3.2 ***Brief/debrief follow-up actions*** are identified

ELEMENT**PERFORMANCE CRITERIA**

- and acted upon in a timely manner
- 3.3 Brief/debrief findings are summarised and recorded if appropriate in a format suitable for **subsequent action** by the appropriate personnel
- 3.4 **Reports** are prepared for presentation to appropriate personnel as required

Required Skills and Knowledge**REQUIRED SKILLS AND KNOWLEDGE**

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- communicate clearly in a group setting
- manage group processes
- prepare a briefing/debriefing plan
- provide feedback and encourage contributions from group members

Required Knowledge

- organisation's policies
- organisation's procedures for activity debriefing
- practices and training processes in relation to activity

Evidence Guide**EVIDENCE GUIDE**

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in ability to communicate effectively with personnel and elicit and encourage contributions to the briefing/debriefing in a constructive and positive way

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- accessing information and support from the control facility

REQUIRED SKILLS AND KNOWLEDGE

- development of response plans including predicting consequences and identifying improvements
- effective and efficient deployment of human and physical resources including:
 - electronic data exchange systems etc.
 - equipment and consumables
 - identification and correct use of equipment
 - materials
 - other organisations
 - personnel
 - personnel and external authorities
 - processes and procedures
 - radio frequency devices
 - team and personnel management
 - team dynamics
- use of a range of information technology devices including computers
- using tools and techniques to solve problems

Required Knowledge

- codes of practice or other legislative requirements
- current principles and practices in response activities
- display of the following knowledge and skills in terms of job role or function:
 - emergency management plans
 - emergency site layout
 - focus of operation of work systems and equipment
 - legislation
 - organisational command structure
 - relevant agreements
 - roles and responsibilities of all organisations
 - security and confidentiality of material

Evidence Guide

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate

It is essential for this unit that competence be demonstrated in assessment of incident both functionally and strategically; development of a plan

EVIDENCE GUIDE

competency in this unit

and implementation of response in accordance with the organisation's policies and procedures.

Strategic reaction to changes within the emergency environment

Consistency in performance

Evidence should be gathered over a period of time in a range of actual or simulated workplace environments

Context of and specific resources for assessment

Context of assessment

Assessment may occur in an operational environment or in an industry-approved simulated work environment

Specific resources for assessment

Resources should involve access to, or simulation of, emergency situations in a multi-team response environment.

This includes resources relating to: equipment, personnel, facilities etc appropriate to the emergency situation and within the bounds of responsibility as designated within the requirements of control

Guidance information for assessment

Information that will assist or guide assessment will be written during Phase II of the Review of the PUA00 Public Safety Training Package.

Range Statement

RANGE STATEMENT

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Initial response options will be determined by

the availability of resources and estimated outcome
organisational guidelines
regulatory authorities
legislative requirements

Risks to life and property

fire

RANGE STATEMENT**may include**

flood
 hazardous materials
 landslip
 severe storm
 biological agents
 fauna rescue

Transport may include

on road
 off road
 aviation
 maritime
 rail

Command facility may include

field facility such as an existing airfield helipads or established operations centre

En route hazards may include

traffic
 prevailing weather
 road conditions
 terrain
 debris
 plumes
 animals
 atmospheric hazards
 tidal conditions
 restricted areas
 wires/masts/aerials
 other aircraft
 interference communications

Hazardous conditions may include

adverse weather
 after dark operations
 difficult terrain
 dangerous goods and substances
 time pressure

RANGE STATEMENT

Incident assessment may include	<ul style="list-style-type: none"> visibility type of incident risk to life property and environment hazards capability of assigned personnel adequacy of allocated equipment information gathered from existing plans/databases forecasts meteorological profiles
Communications systems may include	<ul style="list-style-type: none"> radio telephone computer facsimile pager mobile data terminal satellite signalling signage warnings
Incidents may include	<ul style="list-style-type: none"> life threatening situations protection of property and the environment
Constraints may include	<ul style="list-style-type: none"> legislative resources time prevailing weather restrictions on duration of work or the conditions under which personnel may be employed constraints on road closure redirection of water course military areas

RANGE STATEMENT

	Aboriginal and Torres Strait Islander sacred sites
	other areas of environmental and cultural significance
	seasonal factors
	wilderness areas
	hazardous areas
	other areas requiring permission and/or authorisation to enter
	existing emergency management plans
	financial
Documentation and reporting requirements may include	input to debriefs
	completion of logs
	sitreps
	journal records
	assessment of safety procedures utilised
	financial statements
	post-operational report
Resources may include	human -
	<ul style="list-style-type: none">• operations personnel• volunteers• support personnel
	local, federal and state/territory governments
	physical - equipment
	machinery
	vehicles
	technology devices
	communication devices
	equipment characteristics
	support services
	amenities
	parking
	safety equipment
	aircraft

RANGE STATEMENT

	<p>personnel</p> <p>specialised personnel such as aviation authorities</p> <p>equipment</p> <p>material</p>
<p>Command facility establishment procedures and principles may include</p>	<p>proximity to incident</p> <p>size and type of structure</p> <p>special incident requirements</p> <p>communication modes</p> <p>topography</p> <p>environment</p> <p>climatic conditions</p> <p>logistical operations</p> <p>site access and exit requirements</p> <p>security arrangements</p>
<p>Monitoring of operations may include</p>	<p>progress against plan</p> <p>welfare of personnel</p> <p>utilisation of resources and potential of incident</p>
<p>Organisational policy, procedures, requirements and guidelines may vary between sectors and organisations and may include</p>	<p>legislation relevant to the operation/incident/response</p> <p>legislation relevant to the organisation</p> <p>operational</p> <p>corporate and strategic plans</p> <p>operational procedures</p> <p>operational performance standards</p> <p>organisational personnel practices and guidelines</p> <p>organisational quality standards</p> <p>Civil Aviation Orders</p> <p>search and rescue time</p> <p>procedures/action</p>
<p>Operational plan may include</p>	<p>aims and objectives of the response/incident/operation</p> <p>possible strategies to achieve objectives</p> <p>possible tactics to implement strategies</p>

RANGE STATEMENT

Operational plan may include	resources required including their availability limitations contingencies and alternatives monitoring and evaluative procedures reporting requirements pre-plans flight plans consideration or aircraft type performance and suitability document (formal or informal) part of an overall plan cover one or more place area or region

Co-requisite Unit/s Nil

PUATEA001B Work in a team

Modification History

Release	TP version	Comments
2	PUA12 V1	Layout adjusted. Application revised.
1	PUA00 V8.1	First release in TGA.

Unit Descriptor

This unit covers competency in working with others and making a positive contribution to the effectiveness and efficiency of a team in a work environment when predominantly under direct supervision. Limited responsibility towards others is required.

Application of the Unit

This unit applies to all workers working in the Public Safety industry, but is particularly relevant to new workers in assisting integration with the organisational team culture of the agency.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Not applicable.

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit

Performance Criteria describe the required performance needed to demonstrate achievement of the element.

of Competency.

Where ***bold italicised*** text is used, further information is detailed in the Range Statement. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Contribute to team activities	<p>1.1 Roles and responsibilities of team members are recognised.</p> <p>1.2 Contribution is made to identifying team goals and objectives.</p> <p>1.3 <i>Activities</i> are completed to required standard within timeframe and in accordance with <i>organisation's policies and procedures</i>.</p> <p>1.4 <i>Assistance</i> in the completion of tasks is requested from other team members where appropriate.</p> <p>1.5 Team members are assisted to ensure efficient and safe completion of tasks in accordance with organisation's policies and procedures.</p> <p>1.6 Participation by team members is encouraged and acknowledged.</p> <p>1.7 Changes in allocated role and responsibilities are implemented.</p> <p>1.8 Team meetings are attended regularly and punctually.</p>
2. Share knowledge and information	<p>2.1 Information relevant to work is communicated effectively with team members to enable efficient completion of tasks in accordance with the organisation's policies and procedures.</p> <p>2.2 Knowledge and skills are shared between team members.</p>
3. Give and receive support to/from team members	<p>3.1 <i>Feedback</i>/assistance is given to other team members in an appropriate manner.</p> <p>3.2 Team members are supported in achieving workplace goals.</p> <p>3.3 Feedback from other team members is acted upon appropriately.</p>

Required Skills and Knowledge

This describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- encouraging others/team members
- following instructions
- interpersonal skills
- listening and using a variety of communication skills
- providing suggestions and information
- reporting information

Required Knowledge

- composition of workplace teams and roles and responsibilities of team members
- non operational and operational communication processes
- techniques for giving and receiving feedback in a constructive manner
- techniques for supporting others

Evidence Guide

Critical aspects for assessment and evidence required to demonstrate competency in this unit

It is essential for this unit that competence be demonstrated in the effective communication and contribution to the achievement of tasks consistent with agreed goals.

Consistency in performance

Evidence will need to be gathered over time in a variety of team situations including regular work group and occasional or one-off work group.

Context of and specific resources for assessment

Context of assessment

On the job or in a simulated workplace environment.

Specific resources for assessment

No special requirements.

Range Statement

The Range Statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

- Teams*** comprise
- two or more people working towards a shared purpose
- Appropriate situation to request assistance*** may include:
- difficulty meeting timelines
 - to comply with occupational health and safety requirements
 - unsure of best method to complete task
 - to maximise efficiency
- Assisting other team members*** may include:
- own tasks completed
 - to comply with occupational health and safety requirements
 - assistance requested
 - actions of others do not comply with requirements
 - other team member appears to be having difficulty completing task
- Contribute to workplace goals*** may include:
- completion of task
 - achievement of new competencies
 - development of new skills
 - attainment of new knowledge
 - personal development
- Activities*** may include:
- working with other members of a team in a work environment or responding in a combat or support role to natural emergencies technological/industrial emergencies
 - civil/political emergencies and non emergency operations including community events
 - public relations – activities
 - sporting events
 - parades
 - festivals
- Conditions*** under which this competency may be required include
- hazardous conditions eg adverse weather
 - after dark operations
 - difficult terrain
 - time pressure
 - varying time frames from immediate/short term to long term response operations
 - varying access to equipment/resources necessitating the use of improvised techniques
 - single or multi organisation responses
 - dealing with human behaviours that result from emergency situations
 - non-emergency operations and events eg training and community education
- Appropriate feedback on***
- acknowledging initiative

performance may include:

- aptitude
- ideas
- performance and assistance
- providing constructive criticism

Organisation's policy and procedures may vary between sectors and organisations and may include:

- legislation relevant to the operation/incident/response
- legislation relevant to the organisation
- operational
- corporate and strategic plans
- operational procedures
- operational performance standards
- organisation's personnel practices
- policy and procedures
- organisation's quality standards
- organisation's approach to environmental management and sustainability

Communication processes may include:

- established organisation's procedures for recording and reporting
- the use of logs
- notebooks
- pagers
- radios and telephones
- team members may be geographically dispersed and require communication systems and technology to remain in contact

Unit Sector(s)

Not applicable.

RIIMPO304D Conduct wheel loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO304B Conduct wheel loader operations. Performance Criteria amended to make requirements more explicit; manoeuvring, driving and parking up added; operator maintenance element added.
2	Modification History information inserted.
3	Knowledge Evidence amended; removed repetition in Performance Criteria; amend reference to Licensing requirements in Unit Application.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
5	Performance Criteria 1.4 and 1.8 were repetitive, removal of 1.8.

Application

This unit describes a participant's skills and knowledge required to conduct wheel loader operations in the Coal and Metalliferous mining and Extractive.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Coal mining

Extractive

Metalliferous mining

Elements and Performance Criteria

1. Plan and	1.1 Access, interpret and apply wheel loader operations
-------------	---

prepare for wheel loader operations	<p>documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work requirements</p> <p>1.3 Identify and address risks, hazards and environmental issues and implement control measures</p> <p>1.4 Select and wear personal protective equipment appropriate for work activities and interpret emergency procedures, and be prepared for fire/accident/emergency</p> <p>1.5 Access, interpret and apply geological and survey data required to complete the allocated job</p> <p>1.6 Inspect and prepare work area in coordination with others</p> <p>1.7 Select, and check for faults, equipment and/or attachments for work activities</p>
2. Operate the wheel loader	<p>2.1 Carry out start-up, park, shutdown and secure equipment procedures</p> <p>2.2 Coordinate activities with others at the site prior to commencing, during, and on completions of the work activity</p> <p>2.3 Drive loader, select and modify the operating technique to meet changing work conditions</p> <p>2.4 Monitor and manage equipment performance using indicators and alarms, and ensure efficiency of operation</p> <p>2.5 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p> <p>2.6 Complete the work plan, within the operating capacities of the equipment</p>
3. Carry out operator maintenance	<p>3.1 Prepare machine for maintenance</p> <p>3.2 Conduct inspection and fault finding</p> <p>3.3 Carry out scheduled maintenance tasks</p> <p>3.4 Return machine to service</p> <p>3.5 Process written maintenance records</p>
4. Conduct housekeeping activities	<p>4.1 Clear work area and dispose of or recycle materials</p> <p>4.2 Manage and/or report hazards, and maintain a safe working environment</p> <p>4.3 Process written records</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIMPO304D Conduct wheel loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO304B Conduct wheel loader operations. Performance Criteria amended to make requirements more explicit; manoeuvring, driving and parking up added; operator maintenance element added.
2	Modification History information inserted.
3	Knowledge Evidence amended; removed repetition in Performance Criteria; amend reference to Licensing requirements in Unit Application.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.
5	Performance Criteria 1.4 and 1.8 were repetitive, removal of 1.8.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of wheel loader operations including:
 - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
 - carrying out vehicle refuelling requirements and procedures
 - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
 - applying problem solving and troubleshooting techniques
 - conducting bucket loading and discharge
 - selecting and using the required tools and equipment
 - inspection and preparation of work area
 - working safely around other machines and personnel

- works effectively with others to undertake and complete wheel loader operations that meet all of the required outcomes including:
 - using a range of communications techniques and equipment to convey information to others
 - maintaining written and verbal reporting requirements and procedures
- demonstrates completion of conducting wheel loader operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - driving and operating the wheel loader for operations adjusting equipment operations to suit site conditions
 - shifting loads, carries the load as close to the ground as possible and deposits load to the correct location
 - selecting, removing and fitting attachments
 - following the steps to shut down the wheel loader

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting wheel loader operations:

- identifying equipment processes, technical capability and limitations
- identifying, interpreting and using geological and technical data (basic)
- identifying signs of operator fatigue and how it should be managed identifying
- apply loading techniques
- interpreting plans, reports, maps, specifications
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector's work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIMPO318E Conduct civil construction skid steer loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO318D Conduct civil construction skid steer loader operations. Performance criteria 3.3 and 5.2 amended. Element 5 title amended. Amendments made to performance and knowledge evidence. All changes were minor in relation to lifting, attachments, refuelling and relocating plant.

Application

This unit describes the skills and knowledge required to conduct civil construction skid steer loader operations in civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for skid steer loader operations	<p>1.1 Access, interpret and apply skid steer loader operations documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work requirements</p> <p>1.3 Identify and address risks, hazards and environmental issues and implement control measures</p> <p>1.4 Select and wear personal protective equipment appropriate for work activities</p> <p>1.5 Obtain, identify and implement traffic signage requirements</p> <p>1.6 Select, and check for faults, equipment and/or attachments for work activities</p> <p>1.7 Obtain and interpret emergency procedures, and be prepared</p>
--	--

	for fire/accident/emergency
2. Operate skid steer loader	<p>2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures</p> <p>2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity</p> <p>2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p> <p>2.4 Drive and operate loader, and modify the operating technique to meet changing work conditions</p> <p>2.5 Complete work plan within the operating capacity of the equipment</p> <p>2.6 Act on or report monitoring systems and alarms</p>
3. Load, carry and place materials	<p>3.1 Conduct communication practices associated with transportation and lifting of materials</p> <p>3.2 Establish weight of load and ensure it is within safe operational limits of the machine</p> <p>3.3 Select, appropriate attachment and/or required equipment in accordance with safe working load requirements</p> <p>3.4 Position machinery to ensure stability and locate to effectively shift materials according to job specifications</p> <p>3.5 Shift load safely and effectively</p> <p>3.6 Move load using hand/audible/communication signals</p>
4. Select, remove and fit attachments	<p>4.1 Select attachment for the task</p> <p>4.2 Remove and fit attachment</p> <p>4.3 Test attachment and ensure correct fitting and operation</p> <p>4.4 Use attachment in accordance with recommendations and design limits</p> <p>4.5 Clean and store removed attachments in designated location</p>
5. Prepare to relocate the skid steer loader	<p>5.1 Prepare for relocation of skid steer loader</p> <p>5.2 Move skid steer loader safely within and/or between work areas, observing relevant codes and traffic management requirements</p> <p>5.3 Load and unload machine from float/trailer</p>
6. Carry out machine operator maintenance	<p>6.1 Prepare machine for maintenance</p> <p>6.2 Conduct inspection and fault finding</p> <p>6.3 Carry out scheduled maintenance tasks</p>

	6.4	Process written maintenance records
7. Conduct housekeeping activities	7.1	Clear work area and dispose of or recycle materials
	7.2	Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

Assessment Requirements for RIIMPO318E Conduct civil construction skid steer loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO318D Conduct civil construction skid steer loader operations. Performance criteria 3.3 and 5.2 amended. Element 5 title amended. Amendments made to performance and knowledge evidence. All changes were minor in relation to lifting, attachments, refuelling and relocating plant.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of civil construction skid steer loader operations including:
 - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
 - driving and operating the equipment to site conditions
 - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
 - applying problem solving and troubleshooting techniques
 - applying levelling techniques
 - selecting and using the required tools and equipment
 - working safely around other machines and personnel
 - safely parking and securing equipment
 - applying methods of changing machine attachments
- works effectively with others to undertake and complete civil construction skid steer loader operations that meet all of the required outcomes including:
 - using a range of communications techniques and equipment to convey information to others
 - maintaining written and verbal reporting requirements and procedures
 - organising work activities to meet all task requirements
 - communicating clearly and concisely with others to receive and clarify work instructions

- demonstrates completion of conducting civil construction skid steer loader operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - completion of operations to specification using a variety of material types including:
 - stripping/spreading topsoil and materials
 - backfilling
 - lifting, loading vehicles
 - excavations
 - mixing materials
 - site clean-up
 - selecting, fitting, testing, using and removing a minimum of one (1) of the following attachments:
 - multipurpose bucket
 - forks
 - dozer blade
 - backhoe
 - auger
 - chain digger
 - power broom
 - profiler
 - tiller/mixer
 - rotary hoe
 - hammer
 - asphalt cutter/saw
 - concrete cutter/saw
 - rake

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting civil construction skid steer loader operations:

- ground conditions
- isolation procedures
- equipment processes, technical capability and limitations
- preparation for fire/accident/emergency
- signs of operator fatigue and how it should be managed
- interpretation of drawings and sketches
- site isolation and traffic control responsibilities and authorities
- Civil construction terminology
- project quality requirements
- basic principles of soil technology and soil compaction for civil works

- basic earthworks calculations
- Civil construction activity sequences of road construction, earthworks and drainage
- methods for calculating safe working loads
- operational, maintenance and basic diagnostics
- housekeeping activities
- vehicle refuelling requirements and procedures

Assessment Conditions

- Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors; and industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector’s work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other units of competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this unit of competency, and through the minimum years of current* work experience specified below in an industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an industry subject matter expert. The industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or industry sector as follows:

Industry sector	AQF** Level	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years

Other sectors	Where this unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and, where no industry standard is specified, should comply with any relevant regulation.
---------------	---

*Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the unit; or, for external assessors this can be demonstrated through exposure to industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a qualification the first numeric character in the unit code should be considered to indicate the AQF level.

RIIMPO319D Conduct backhoe/loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO319A Conduct backhoe loader operations.
2	Amended Performance Evidence and Performance Criteria; amend reference to Licensing requirements in Unit Application.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to conduct backhoe/loader operations in Civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for backhoe/loader operations	<p>1.1 Access, interpret and apply backhoe/loader operations documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work instructions</p> <p>1.3 Identify and address risks, hazards and environmental issues and implement control measures</p> <p>1.4 Select and wear personal protective equipment appropriate for work activities</p> <p>1.5 Identify, obtain and implement signage traffic management</p>
---	---

	<p>requirements</p> <p>1.6 Select, and check for faults, equipment and/or attachments for work activities</p> <p>1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency</p>
2. Operate backhoe/loader	<p>2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures</p> <p>2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity</p> <p>2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p> <p>2.4 Drive and operate machine, and modify the operating technique to meet changing work conditions</p> <p>2.5 Complete work plan within the operating capacity of the equipment</p> <p>2.6 Act on or report monitoring systems and alarms</p>
3. Load, carry and place materials	<p>3.1 Conduct communication practices associated with transportation and lifting of materials</p> <p>3.2 Establish weight of load and ensure it is within safe operational limits of the machine</p> <p>3.3 Select, attach and apply slings and lifting gear in accordance with safe working load requirements</p> <p>3.4 Position and locate machinery to ensure stability to effectively shift materials according to job specifications</p> <p>3.5 Shift load safely and effectively</p> <p>3.6 Move load using hand/audible/communication signals</p>
4. Select, remove and fit attachments	<p>4.1 Select attachment for the task</p> <p>4.2 Remove and fit attachment</p> <p>4.3 Test attachment and ensure correct fitting and operation</p> <p>4.4 Use attachment in accordance with recommendations and design limits</p> <p>4.5 Clean and store removed attachments in designated location</p>
5. Relocate the backhoe/loader	<p>5.1 Prepare backhoe/loader for relocation</p> <p>5.2 Move backhoe/loader safely between worksites, observing relevant codes and traffic management requirements</p>
6. Carry out machine	<p>6.1 Prepare machine for maintenance</p>

operator maintenance	6.2	Conduct inspection and fault finding
	6.3	Carry out scheduled maintenance tasks
	6.4	Process written maintenance records
7. Clean up	7.1	Clear work area and dispose of or recycle materials
	7.2	Process records

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIMPO319A Conduct backhoe loader operations

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIMPO319D Conduct backhoe/loader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO319A Conduct backhoe loader operations.
2	Amended Performance Evidence and Performance Criteria; amend reference to Licensing requirements in Unit Application.
3	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of backhoe/ loader operations including:
 - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
 - carrying out vehicle refuelling requirements and procedures
 - driving and operating the equipment to site conditions
 - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
 - applying problem solving and troubleshooting techniques
 - applying leveling techniques
 - selecting and using the required tools and equipment
 - working safely around other machines and personnel
 - safely parking and securing of equipment
 - applying methods of changing machine attachments
- works effectively with others to undertake and complete backhoe/ loader operations that meet all of the required outcomes including:

- using a range of communications techniques and equipment to convey information to others
- maintaining written and verbal reporting requirements and procedures
- organising work activities to meet all task requirements
- communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates completion of conducting backhoe/loader operations that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - completion of operations to specification using a variety of material types including:
 - mixing materials
 - stripping/spreading topsoils and materials
 - trench excavation
 - backfilling
 - lifting and carrying materials
 - loading dump trucks, wagons, hoppers, chutes, and cutting/boxing
 - fitting and removal a variety of attachments selected from the following:
 - extending devices
 - tilt bucket
 - buckets
 - compaction wheel
 - ripper
 - plate compactor
 - rock breaker
 - auger
 - broom
 - mower/slasher
 - forklift
 - 4 in 1 bucket and free/rock grab

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting backhoe/loader operations:

- identifying, interpreting ground conditions
- communicating and performing isolation procedures
- identifying equipment processes, technical capability and limitations
- being prepared for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed
- interpreting drawings and sketches
- identifying site isolation and traffic control responsibilities and authorities

- using civil construction terminology
- complying with project quality requirements
- applying basic principles of soil technology and soil compaction for civil works
- using basic earthworks calculations
- using civil construction activity sequences of road construction, earthworks and drainage
- applying leveling techniques
- using methods for calculating safe working loads
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector’s work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIMPO324E Conduct civil construction grader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO324D Conduct civil construction grader operations. 'Use of machine guidance system and laser levelling equipment' moved from performance evidence to knowledge evidence. Grammatical amendments made to the performance criteria. Added mapping table.

Application

This unit describes a participant's skills and knowledge required to conduct civil construction grader operations in civil construction.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry industry sectors. Relevant information must be sourced prior to application of the unit.

Unit Sector

Civil construction

Elements and Performance Criteria

1. Plan and prepare for grader operations	<p>1.1 Access, interpret and apply grader operations documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work instructions</p> <p>1.3 Identify and address risks, hazards and environmental issues and implement control measures</p> <p>1.4 Select and wear personal protective equipment appropriate for work activities</p> <p>1.5 Identify, obtain and implement traffic management signage requirements</p> <p>1.6 Select, and check for faults, equipment and/or attachments for work activities</p> <p>1.7 Obtain and interpret emergency procedures, and be prepared for fire/accident/emergency</p>
---	--

2. Operate grader	<p>2.1 Carry out pre-start, start-up, park, shutdown and secure equipment procedures</p> <p>2.2 Coordinate activities with others at the site prior to commencement of, and during, the work activity</p> <p>2.3 Continually monitor hazards and risks, and ensure safety of self, other personnel, plant and equipment</p> <p>2.4 Identify and apply operating techniques for grader to achieve optimum output within specified tolerances</p> <p>2.5 Drive and operate grader, and modify the operating technique to meet changing work conditions</p> <p>2.6 Complete work plan within the operating capacity of the equipment</p> <p>2.7 Act on or report monitoring systems and alarms</p>
3. Select, remove and fit attachments	<p>3.1 Select attachment for the task</p> <p>3.2 Remove and fit attachment</p> <p>3.3 Test attachment and ensure correct fitting and operation</p> <p>3.4 Use attachment in accordance with recommendations and design limits</p> <p>3.5 Clean and store removed attachments in designated location</p>
4. Relocate Prepare to relocate the grader	<p>4.1 Prepare grader for relocation</p> <p>4.2 Move grader safely within and between worksiteswork areas, observing relevant codes and traffic management requirements</p> <p>4.3 Load and unload machine from float/trailer</p>
5. Carry out machine operator maintenance	<p>5.1 Prepare machine for maintenance</p> <p>5.2 Conduct inspection and fault finding</p> <p>5.3 Carry out scheduled maintenance tasks</p> <p>5.4 Process written maintenance records</p>
6. Conduct housekeeping activities	<p>6.1 Clear work area and dispose of or recycle materials in accordance with project environmental management plan</p> <p>6.2 Process records</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

Code and title current version	Code and title previous version	Comments	Equivalence status
RIIMPO324E Conduct civil construction grader operations	RIIMPO324D Conduct civil construction grader operations	'Use of machine guidance system and laser levelling equipment' moved from performance evidence to knowledge evidence. Grammatical amendments made to the performance criteria. Add mapping table.	Equivalent

Assessment Requirements for RIIMPO324E Conduct civil construction grader operations

Modification History

Release	Comment
1	This unit replaces RIIMPO324D Conduct civil construction grader operations. 'Use of machine guidance system and laser levelling equipment' moved from performance evidence to knowledge evidence. Grammatical amendments made to the performance criteria. Added mapping table.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- implements the requirements, procedures and techniques for the safe, effective and efficient completion of grader operations including:
 - conducting prestart checks prior to commencing operations and shutdown procedures on completion of operations
 - carrying out vehicle refuelling requirements and procedures
 - driving and operating the equipment to site conditions
 - applying safe work practices and identifying and reporting all potential hazards, risks and environmental issues
 - applying problem solving and troubleshooting techniques
 - applying leveling techniques
 - applying cut and fill techniques
 - conducting towing of equipment/plant
 - selecting and using the required tools and equipment
 - working safely around other machines and personnel
 - safely parking and securing of equipment
 - applying methods of changing machine attachments
- works effectively with others to undertake and complete grader operations that meet all of the required outcomes including:
 - using a range of communications techniques and equipment to convey information to others
 - maintaining written and verbal reporting requirements and procedures

- organising work activities to meet all task requirements
- communicating clearly and concisely with others to receive and clarify work instructions
- demonstrates completion of civil construction grader operations that safely, effectively and efficiently meet all of the required outcomes on more than one (1) occasion including:
 - completion of operations to specification using a variety of material types including:
 - cutting and maintaining drains
 - forming/upgrading/maintaining roads
 - mixing/ spreading materials
 - scarifying and ripping
 - cutting and trimming of batters
 - trimming of road sub-grades and pavements
 - site clean-up
 - form and carry a windrow
 - select, fit and remove at least two (2) attachments

Knowledge Evidence

The candidate must demonstrate knowledge of the following when conducting civil construction grader operations:

- identifying, interpreting ground conditions
- communicating and performing isolation procedures
- identifying equipment processes, technical capability and limitations
- being prepared/preparation for fire/accident/emergency
- identifying signs of operator fatigue and how it should be managed
- interpreting drawings and sketches
- identifying site isolation and traffic control responsibilities and authorities
- using civil Civil construction terminology
- complying with project quality requirements
- applying basic principles of soil technology and soil compaction for civil works
- using basic earthworks calculations
- using civil Civil construction activity sequences of road construction, earthworks and drainage
- using methods for calculating safe working loads
- applying operational, maintenance and basic diagnostics
- completing housekeeping activities
- use machine guidance system and laser levelling equipment

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors; and industry regulations for certification and licensing; and,
- this unit must be assessed in the context of this sector’s work environment; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units units of Competencycompetency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit unit of Competencycompetency, and through the minimum years of current* work experience specified below in an industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an industry subject matter expert. The industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or industry sector as follows:

Industry sector	AQF** Level	Required assessor or industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit unit is being assessed outside of the Resources and Infrastructure Sectors, assessor and/or industry subject matter expert experience should be in-line with industry standards for the sector in which it is being	

	assessed and, where no Industry standard is specified, should comply with any relevant regulation.
--	--

*Assessors can demonstrate current work experience through employment within industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level.

RIIWH202D Enter and work in confined spaces

Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to enter and work in confined spaces in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles undertaking work in confined spaces.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1 Plan and prepare for working in confined space	<p>1.1 Access, interpret and apply procedures for confined space entry and the environmental management plan and ensure the work activity is compliant</p> <p>1.2 Obtain, confirm, clarify and apply work instructions and agreed procedure</p> <p>1.3 Obtain, confirm, clarify and apply safety requirements</p>
--	---

	<p>1.4 Obtain and confirm authorisation (entry permit) meets regulatory requirements</p> <p>1.5 Confirm the emergency response procedure is with the stand-by person and understood</p> <p>1.6 Identify, obtain and implement signage and barrier requirements</p> <p>1.7 Select tools and equipment for the tasks, check for serviceability and rectify or report any faults</p> <p>1.8 Identify, confirm and apply the environmental protection requirements</p> <p>1.9 Position rescue equipment by the entry permit</p>
2 Work in confined space	<p>2.1 Gain access to confined space</p> <p>2.2 Ensure that the atmosphere is tested and monitored for harmful elements</p> <p>2.3 Correctly apply tagging and lock-out procedures</p> <p>2.4 Enter the confined space correctly</p> <p>2.5 Maintain ongoing communication with the stand-by person</p> <p>2.6 Comply with entry permit requirements</p> <p>2.7 Monitor and adhere to allocated entry time</p>
3 Exit confined space	<p>3.1 Exit confined space correctly</p> <p>3.2 Recover tools, equipment and materials</p> <p>3.3 Conduct inspection of the confined space</p> <p>3.4 Secure access to the confined space</p> <p>3.5 Remove tagging and lock-out</p> <p>3.6 Accurately complete confined space entry permit</p>
4 Clean up	<p>4.1 Clear work area and dispose of or recycle materials</p> <p>4.2 Clean, check, maintain and store tools and equipment</p> <p>4.3 Remove, clean and store barriers and signs</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Unit Mapping Information

RIIOHS202A Entering and working in confined spaces

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for RIIWHS202D Enter and work in confined spaces

Modification History

Release	Comment
1	The unit replaces RIIOHS202A Enter and work in confined spaces.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of entering and working in confined spaces that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - obtain appropriate entry permit and instructions for performing work in confined space
 - interpreting and applying safe work method statements
 - apply tagging and lock out
 - selecting, wearing and caring for personal protective equipment applicable to all tasks and environment identified
 - entering the confined space
 - using atmospheric monitoring devices prior to entering the confined space
 - working in the confined space
 - using atmospheric monitoring devices during confined space activity
 - applying safe materials handling methods
 - exiting the confined space
 - remove tagging and lock out

Knowledge Evidence

The candidate must demonstrate knowledge of enter and work in confined spaces through:

- identifying areas that constitute confined spaces
- complying with site and equipment safety requirements
- complying with the entry and exit procedures, risks and regulations
- types of air contaminants and toxic gases
- identifying the limitations of breathing apparatus
- identifying equipment types, characteristics, technical capabilities and limitations
- complying with site isolation and site control responsibilities and authorities
- locations of safety data sheets (SDS) information and application
- using confined space and Industry terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWH204D Work safely at heights

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to work safety at heights in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles where they are required to perform work at heights.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1. Identify work requirements	<p>1.1 Access, interpret and apply height safety procedures and ensure the work activity is compliant</p> <p>1.2 Inspect site to determine layout and physical condition, condition of structures, prevailing weather conditions, equipment requirements and potential hazards</p>
-------------------------------	--

	<p>1.3 Adhere to WHS requirements</p> <p>1.4 Identify, select and check safety equipment for serviceability</p> <p>1.5 Identify, manage and report potential risks and hazards</p>
2. Identify work procedures and instructions	<p>2.1 Consult with authorised personnel to select materials, tools and equipment and check for serviceability</p> <p>2.2 Select, wear and care for personal protective equipment</p> <p>2.3 Inspect/install fall protection and perimeter protection equipment</p> <p>2.4 Identify approved methods of moving tools and equipment to work area and minimise potential hazards associated with tools at heights</p> <p>2.5 Ensure safety system has been installed correctly</p> <p>2.6 Select and install appropriate signs and barricades</p>
3. Access and install equipment	<p>3.1 Consult with authorised personnel to ensure anchor fall protection and associated equipment is correctly fitted and adjusted</p> <p>3.2 Ensure all required equipment is installed</p> <p>3.3 Use recommended methods to access work area for people, tools and equipment</p> <p>3.4 Locate tools and materials to eliminate or minimise the risk of items being knocked down</p>
4. Perform work at heights	<p>4.1 Check access from ground to work area and ensure it is safe</p> <p>4.2 Keep fall equipment in place and adjusted appropriately for movement during work</p> <p>4.3 Undertake manual handling of materials and equipment</p> <p>4.4 Locate materials and equipment ensuring that they are safely secured and distributed</p> <p>4.5 Check safety system periodically for compliance</p> <p>4.6 Monitor risk control measures to ensure that they are effective and appropriate</p> <p>4.7 Reassess risk control measures, as required, in accordance with changed work practices and/or site conditions and undertake alterations</p>
5. Clean up work area	<p>5.1 Consult with authorised personnel to ensure safety system is dismantled and removed</p> <p>5.2 Clear work area and dispose of or recycle materials</p> <p>5.3 Clean, check, maintain and store tools and equipment</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS204D Work safely at heights

Modification History

Release	Comments
1	This unit replaces RIIOHS204A Work safely at heights.
2	Formatting corrections.
3	Inserted Application information.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of working safely at heights that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - accessing, interpreting and applying technical and safety information for working at heights
 - assessing hazards and risk associated with working at heights and implement control methods
 - selecting wearing and caring for personal protective equipment
 - identifying required safety systems including fall protection and associated equipment
 - checking that fitting, adjusting and anchoring of fall protection and associated equipment is correct
 - performing work safely at heights

Knowledge Evidence

The candidate must demonstrate knowledge of the following when working safely at heights:

- names and functions of equipment, components and materials

- complying with equipment manufacturer's instructions and specifications
- safe shifting and handling of tools and materials
- adhering to statutory and regulatory authority requirements
- the nature of work undertaken at heights
- complying with heights safety systems
- the processes of providing for safe working practices
- using safety equipment/systems and considerations to facilitate working safely at heights
- complying with safe work methods

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years

Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWH205D Control traffic with stop-slow bat

Modification History

Release	Comment
1	The unit replaces RIIOHS205A Control traffic with stop-slow bat.
2	Editorial corrections; Performance Criteria numbering for element 1 corrected.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit describes a participant's skills and knowledge required to control traffic with stop-slow bat in the Resources and Infrastructure Industries.

This unit is appropriate for those working in operational roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1. Plan and prepare	1.1 Access, interpret and apply site traffic plan procedures and ensure the work activity is compliant 1.2 Obtain, confirm, clarify and apply work instructions 1.3 Obtain, confirm, clarify and apply safety requirements 1.4 Identify, obtain and implement signage and devices 1.5 Select tools and equipment, check for serviceability and rectify or report any faults
---------------------	---

	1.6 Identify, confirm, clarify and apply environmental protection requirements
2. Control traffic	2.1 Position or confirm temporary traffic signs and barriers 2.2 Direct traffic correctly 2.3 Control vehicles and pedestrian traffic and ensure safety 2.4 Monitor traffic, make adjustments for changing conditions and position waiting vehicles for smooth traffic flow 2.5 Use hand held stop/slow bats 2.6 Use visibly clear and unobstructed hand signals 2.7 Report traffic offenders
3. Operate communication devices	3.1 Adjust communication device controls for optimum reception/transmission results 3.2 Transmit messages clearly and concisely 3.3 Maintain communication device power supply 3.4 Check communications contact after nominated period of non-contact
4. Clean up	4.1 Remove or cover signs and devices sequentially to provide warning to motorists during shutdown 4.2 Clean, check, maintain and store tools and equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=88a61002-9a21-4386-aaf8-69c76e675272>

Assessment Requirements for RIIWHS205D Control traffic with stop-slow bat

Modification History

Release	Comment
1	The unit replaces RIIOHS205A Control traffic with stop-slow bat.
2	Editorial corrections; Performance Criteria numbering for element 1 corrected.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- demonstrates completion of controlling traffic with a stop-slow bat that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - reading and interpreting the work instruction and planning work activity accordingly
 - positioning signage and barriers
 - directing and controlling vehicle traffic
 - directing and controlling pedestrian traffic
 - communicating to drivers and pedestrians clearly using hand signals
 - using approved communication devices such as hand held radios or phones to transmit message and report of offenders
 - removing or covering signs after work completion

Knowledge Evidence

The candidate must demonstrate knowledge of controlling traffic with stop-slow bat through:

- site and equipment safety requirements

- traffic controlling requirements and procedures
- complying with traffic management plans
- erecting traffic control signage and barricades
- communication device operations
- determine equipment types, characteristics, technical capabilities and limitations
- operational and maintenance procedures for equipment
- detailing site isolation and traffic control responsibilities and authorities
- describing the effects of travel speed and vehicle mass on stopping distances
- interpreting and implementing safe work method statement

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector’s work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector’s workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,
- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal	1	1 Year

Mining, Extractive (Quarrying) and Civil Construction	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

RIIWHS302D Implement traffic management plan

Modification History

Release	Comment
1	The unit replaces RIIOHS302A Implement traffic management plan.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Application

This unit develops a participant's skills and knowledge required to implement a traffic management plan in Civil construction.

This unit is appropriate for those working in supervisory roles.

Licensing, legislative, regulatory and certification requirements that apply to this unit can vary between states, territories, and Industry sectors. Relevant information must be sourced prior to application of the unit.

Note: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

Elements and Performance Criteria

1 Plan and prepare to implement traffic management plan	<p>1.1 Access, interpret and apply traffic management documentation and ensure the work activity is compliant</p> <p>1.2 Obtain, read, interpret, clarify and confirm work requirements</p> <p>1.3 Identify, address and report potential risks, hazards and environmental issues and implement control measures</p> <p>1.4 Select and wear personal protective equipment appropriate for the work activity</p>
---	---

	<p>1.5 Identify, obtain and implement traffic control signage and devices</p> <p>1.6 Select, and check for faults, tools and equipment to carry out tasks</p> <p>1.7 Identify, confirm and apply environmental protection requirements</p> <p>1.8 Check the designated traffic controllers' training and qualifications for currency</p> <p>1.9 Advise traffic controllers of the traffic flow requirements</p>
2 Set out the traffic guidance scheme	<p>2.1 Select traffic guidance scheme to suit site conditions, traffic volumes and work activities</p> <p>2.2 Determine and ensure adherence to work schedule, maximum traffic delays, signals and site communications</p> <p>2.3 Ensure signs and devices are correctly positioned on the approaches to the work area</p> <p>2.4 Ensure that signs and devices are positioned and displayed on each approach</p> <p>2.5 Ensure signs and devices are positioned and displayed laterally</p> <p>2.6 Ensure traffic is controlled effectively to protect the work crew</p>
3 Monitor traffic guidance scheme	<p>3.1 Ensure traffic flow is monitored and effectiveness of guidance scheme determined</p> <p>3.2 Monitor work activities and provide guidance to adjust scheme</p> <p>3.3 Apply process for dealing with traffic controllers who fail to adhere to approved procedures</p> <p>3.4 Apply procedures to deal with offending motorists</p>
4 Close down traffic guidance scheme	<p>4.1 Ensure traffic is controlled to protect work crew removing traffic control devices</p> <p>4.2 Ensure signs are removed in sequence to provide maximum warning during removal</p> <p>4.3 Ensure guidance scheme details are recorded and reported as required</p> <p>4.4 Ensure incidents are recorded and reported as required</p>
5 Clean up	<p>5.1 Ensure work area is appropriately cleared</p> <p>5.2 Ensure tools and equipment are cleaned, checked, maintained</p>

	and stored
--	------------

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit. Further information is available in the Resources and Infrastructure Industry Training Package Companion Volume.

Assessment Requirements for RIIWHS302D Implement traffic management plan

Modification History

Release	Comment
1	The unit replaces RIIOHS302A Implement traffic management plan.
2	Editorial corrections.
3	Amended Application field.
4	Required frequency and volume of evidence amended in Performance evidence. Substantial amendments made in Assessment Conditions field, including: references to Industry Sectors, assessor and subject matter expert experience requirements, how assessment should be conducted and what it should confirm.

Performance Evidence

Evidence is required to be collected that demonstrates a candidate's competency in this unit. Evidence must be relevant to the roles within this sector's work operations and satisfy all of the requirements of the performance criteria of this unit and include evidence that the candidate:

- locates and applies relevant documentation, policies and procedures
- works effectively with others to undertake and complete the traffic management plans that meet all of the required outcomes including:
 - complying with written and verbal reporting requirements and procedures
 - communicating clearly and concisely with others to receive and clarify work instructions
 - communicating clearly and concisely with others to resolve coordination requirements prior to commencing and during work activities
- demonstrates completion of implementing traffic management plans that safely, effectively and efficiently meets all of the required outcomes on more than one (1) occasion including:
 - complying with State/Territory regulations on three separate live traffic projects, and
 - completing one (1) project controlling site construction vehicles
 - identify and select traffic guidance scheme according to conditions
 - identify and select traffic guidance scheme according to conditions select and implement signage and device requirements, position and display according to site plan

- monitor and adjust scheme according to variances in requirements
- apply procedures to deal with non-compliant crew and motorists

Knowledge Evidence

The candidate must demonstrate knowledge of implementing a traffic management plan through:

- accessing, interpreting and applying legislative, organization and site requirements and procedures for:
 - JSAs/JSEA/Safe work method statement
 - potential hazards and risks
 - controlling traffic
 - basic signalling
 - signs and devices
 - radio operations
- identifying equipment types, characteristics, technical capabilities and limitations
- identifying site isolation and traffic control responsibilities and authorities
- identifying quality requirements
- applying civil construction terminology

Assessment Conditions

- An assessor of this unit must satisfy the requirements of the NVR/AQTF or their successors; and Industry regulations for certification and licensing; and,
- this unit is best assessed in the context of this sector's work environment;
- where personal safety or environmental damage are limiting factors, assessment may occur in a simulated environment provided it is realistic and sufficiently rigorous to cover all aspects of this sector's workplace performance, including environment, task skills, task management skills, contingency management skills and job role environment skills; and,
- this unit must be assessed in compliance with relevant legislation/regulation and using policies, procedures, processes and operational manuals directly related to the industry sector for which it is being assessed; and,
- assessment may be conducted in conjunction with the assessment of other Units of Competency; and,
- assessment must confirm consistent performance can be applied in a range of relevant workplace circumstances; and,
- assessors must demonstrate the performance evidence, and knowledge evidence as outlined in this Unit of Competency, and through the minimum years of current* work experience specified below in an Industry sector relevant to the outcomes of the unit; or,

- where the assessor does not meet experience requirements a co-assessment or partnership arrangement must exist between the qualified assessor and an Industry subject matter expert. The Industry subject matter expert should hold the unit being assessed (or an equivalent unit) and/or demonstrate equivalence of skills and knowledge at the unit level. An Industry technical expert must also demonstrate skills and knowledge from the minimum years of current work experience specified below in the Industry sector, including time spent in roles related to the unit being assessed; and,
- assessor and Industry subject matter expert requirements differ depending on the Australian Qualifications Framework Level (AQF) of the qualification being assessed and/or Industry Sector as follows:

Industry sector	AQF** Level	Required assessor or Industry subject matter expert experience
Drilling, Metalliferous Mining, Coal Mining, Extractive (Quarrying) and Civil Construction	1	1 Year
	2	2 Years
Drilling, Coal Mining and Extractive (Quarrying)	3-6	3 Years
Metalliferous Mining and Civil Construction	3-6	5 Years
Other sectors	Where this Unit is being assessed outside of the Resources and Infrastructure Sectors assessor and/or Industry subject matter expert experience should be in-line with industry standards for the sector in which it is being assessed and where no Industry standard is specified should comply with any relevant regulation.	

*Assessors can demonstrate current work experience through employment within Industry in a role relevant to the outcomes of the Unit; or, for external assessors this can be demonstrated through exposure to Industry by conducting frequent site assessments across various locations.

**Where a unit is being delivered outside of a Qualification the first numeric character in the Unit code should be considered to indicate the AQF level

SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to receive and store retail stock. It requires the ability to check stock quality and quantity against order requirements; store or present stock correctly; and maintain cleanliness of stock-handling areas.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However; in smaller retail businesses, senior personnel also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Maintain stock handling and storage

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Maintain cleanliness of stock handling and storage areas.
- 1.2.Ensure correct environmental conditions for storage of

- areas. perishable and other stock to prevent loss or damage as required.
- 1.3. Remove and dispose of waste to minimise safety risks and environmental impacts.
 - 1.4. Report hazards and potential hazards to relevant personnel to minimise safety risks.
2. Accept stock delivery.
 - 2.1. Check incoming stock quantities against order documentation.
 - 2.2. Inspect incoming stock quality, and accurately report quality issues or damage to relevant personnel.
 - 2.3. Record stock delivery, and report discrepancies with orders as required.
 - 2.4. Unpack and handle stock according to manufacturer instructions and safe manual handling techniques to avoid personal health risk and stock damage.
 - 2.5. Store or display stock promptly in designated location.
 3. Replenish stock levels.
 - 3.1. Rotate, replenish and present stock according to organisational requirements for stock levels.
 - 3.2. Record stock waste or shrinkage according to organisational procedures.
 - 3.3. Maintain optimal stock levels on retail shop floor.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
 - plain English documents that outline organisational policies and procedures for stock control
 - basic order and delivery documentation and stock labels.
- Numeracy skills to:
- calculate stock levels.
- Planning and organising skills to:
- complete stock control activities in a logical and time efficient sequence.
- Technology skills to:
- use stock control technology to aid stock control processes.

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for SIRRINV001 Receive and handle retail stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow organisational policies and procedures, safe work practices and manufacturer instructions to perform each of the following stock control procedures:
 - receive and process incoming stock
 - store retail stock
 - maintain retail stock levels
 - maintain stock delivery records
- follow organisational stock control policies and procedures to process stock in each of the following situations:
 - stock quality is poor
 - stock quantity errors
 - incorrect stock is delivered
- maintain stock handling and storage areas, according to organisational policies and procedures, when completing the above stock control activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in the elements and performance criteria of this unit:

- principles of stock control procedures:
 - rotation and replenishment
 - product life cycle
- organisational stock control policies and procedures for:
 - receiving stock from suppliers
 - recording incoming stock
 - recording and reporting stock discrepancies and quality issues
 - recording stock waste and shrinkage
 - stock quality standards
 - unpacking, storage and display of stock
 - damaged or missing stock

- key features of retail products that relate to handling and storage:
 - handling techniques to minimise damage
 - general care
 - optimum storage conditions
 - features of damaged or spoiled stock
 - correct disposal methods
- safe manual handling techniques for moving and storing retail stock
- relevant legislation and standards relevant to receiving and storing retail stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure use of:

- manufacturer instructions for stock handling and storage
- organisational policies and procedures for stock handling and control
- retail stock display areas
- range of retail stock
- stock control documentation
 - delivery dockets
 - orders
 - reporting documentation
- stock receiving bay or area
- stock storage areas
- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRV002 Control stock

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to process stock orders, maintain stock levels, minimise stock losses, manage stocktakes and maintain all documents that relate to the administration of any type of stock.

This unit applies to individuals responsible for stock control. They work within organisational systems and procedures, but make decisions about stock administration and may have responsibility for others.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Inventory

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Monitor stock receipt and dispatch.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Implement organisational policies and procedures for receipt, dispatch and secure storage of stock.
- 1.2. Allocate tasks and monitor staff to ensure organisational procedures are followed, and documentation is completed

- correctly.
- 1.3. Confirm that stock quantity and quality inspections on receipt meet organisational standards.
 - 1.4. Act on variations to quantity and quality of delivered stock.
 - 1.5. Supervise safe stock handling and storage.
2. Maintain stock records.
 - 2.1. Monitor stock and maintain stock at required levels.
 - 2.2. Maintain, monitor and adjust stock reorder cycles as required.
 - 2.3. Provide clear information to team members about individual stock recording responsibilities.
 - 2.4. Maintain stock storage and movement records.
 - 2.5. Record and report stock discrepancies.
 - 2.6. Monitor stock performance and identify and report fast and slow-selling items.
3. Process and follow up orders.
 - 3.1. Process and raise stock orders according to organisational procedures.
 - 3.2. Monitor delivery of stock to ensure agreed deadlines and inventory requirements are met.
 - 3.3. Liaise with suppliers to ensure continuity of supply.
 - 3.4. Resolve routine supply problems or refer to appropriate personnel for action.
 - 3.5. Distribute stock within the organisation according to required allocations.
 - 3.6. Handle routine supply problems or refer to management as required by store policy.
4. Minimise stock losses.
 - 4.1. Regularly check storage of stock and ensure its protection.
 - 4.2. Identify, record and report stock losses.
 - 4.3. Identify avoidable losses and establish reasons for them.
 - 4.4. Recommend solutions and implement procedures to prevent future losses.
5. Coordinate stocktake or cyclical count.
 - 5.1. Explain procedures for stocktake and cyclical counts to team members.
 - 5.2. Allocate stocktaking tasks to individual team members ensuring effective use of staff resources to complete task.
 - 5.3. Provide team members with clear directions for performance of each task.
 - 5.4. Produce accurate reports for management on stocktake data, including discrepancies.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">interpret supplier purchasing agreements, purchase orders, records of incoming stock and organisational policies and procedures for stock control.
Numeracy skills to:	<ul style="list-style-type: none">calculate:<ul style="list-style-type: none">supplier costs and complex order costscomplex details of stock on hand and stock losses and produce complex numerically-based reportsreconcile incoming stock and invoices against purchase orders.
Technology skills to:	<ul style="list-style-type: none">use business technology for inventory management.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRINV002 Control stock

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain and order stock across one stock cycle according to organisational procedures using all of the following stock processes:
 - receipt
 - dispatch
 - ordering
 - stock level monitoring
 - records maintenance
- produce three different stock control reports
- organise and coordinate one stocktake or cyclical count
- provide clear and correct information to team members involved in stock control processes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - receipt and dispatch of goods, including inspection for quantity and quality
 - stock ordering and reordering
 - stock replenishment
 - stock rotation
 - reporting of stock discrepancies, damage and loss
 - safe transport, handling and storage of goods
 - stock control
 - stocktaking and cyclical counts
 - pricing, labelling and packaging
 - stock security
- key aspects of legislation and codes of practice relevant to stock control:
 - Australian Consumer Law
 - Work Health and Safety (WHS)

- manual handling
- licensing for mechanical movement of stock
- principles of stock control:
 - rotation and replenishment
 - product life cycle
- impact of business planning and sales forecasts on stock control
- types of stock control systems used in the sector
- reasons for stock loss and damage and methods to control these and protect stock.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation and codes of practice relevant to stock control as listed in Knowledge Evidence
- a computerised stock control system
- stock for use in stock control activities
- organisational policies and procedures for stock control
- team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRMER001 Produce visual merchandise displays

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to display retail merchandise. It requires the ability to prepare, produce and maintain merchandise displays in accordance with visual merchandising requirements.

This unit applies to all businesses that sell retail merchandise. It applies to frontline personnel who have limited autonomy and work under close supervision and guidance of others in frontline operational roles. However; in smaller businesses, senior personnel might also undertake this function.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Merchandising

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Prepare to produce visual merchandise display.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Review visual merchandising display guidelines, and seek clarification as required.
- 1.2. Obtain merchandise, materials and equipment required for

- the display.
- 1.3. Prepare product labels and price tickets from in-house documents and according to organisational requirements.
 - 1.4. Unpack merchandise according to manufacturer instructions.
2. Display merchandise.
- 2.1. Produce display following visual merchandising display guidelines.
 - 2.2. Ensure merchandise is displayed according to manufacturer instructions where specific requirements for display and storage exist.
 - 2.3. Display merchandise labels and price tickets according to organisational requirements.
 - 2.4. Handle and move stock and equipment according to safe manual handling guidelines to prevent injury to self.
 - 2.5. Promptly return excess stock to storage area, and store according to organisational requirements.
 - 2.6. Check and ensure area around the display remains clear of debris.
3. Maintain display.
- 3.1. Review displays against visual merchandising display guidelines, and refine as required.
 - 3.2. Maintain clear and correct product and pricing information for merchandise.
 - 3.3. Identify damaged or out of date stock, and remove from display as required.
 - 3.4. Rotate and replenish merchandise to maintain optimum stock levels.
 - 3.5. Monitor the display regularly to maintain appearance and cleanliness of display and display area.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret plain English documents that outline organisational policies and procedures related to display of merchandise.
- Numeracy skills to:
- estimate dimensions of display areas and appropriate size of displays from display documentation.
- Planning and organising skills to:
- prepare for display and complete display activities in a logical and time-efficient sequence.
- Technology skills to:
- prepare product labels and price tickets.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRMER001 Produce visual merchandise displays

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines and organisational procedures to prepare and produce three merchandise displays, from the following list, of varying sizes and complexities:
 - an existing merchandise range
 - a new merchandise range
 - a seasonal merchandise range
 - a promotional event
 - discounted merchandise
- maintain each of the above displays and display area, adequate stock level and appearance of display.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- basic principles of visual merchandising as they relate to producing retail visual merchandise displays
- visual merchandise display guidelines and how they are used in creating a retail displays
- organisational procedures for:
 - correct manual handling techniques for protection of self and merchandise
 - correct storage of merchandise and equipment
 - damaged or out of date stock
 - maintenance of display areas
 - merchandise rotation and replenishment
 - product labelling and pricing
 - unpacking merchandise.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- a range of retail merchandise
- display areas
- retail display equipment and props
- product labels and price tickets
- ticketing and pricing equipment
- organisational visual merchandise display guidelines
- organisational procedures for:
 - manual handling techniques for protection of self and merchandise
 - storage of merchandise and equipment
 - damaged or out of date stock
 - maintenance of display areas
 - merchandise rotation and replenishment
 - product labelling and pricing
 - unpacking merchandise
- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to coordinate store visual merchandising activities and ensure adherence to organisational standards, policies and procedures for the display of merchandise.

It applies to individuals working in frontline roles in a diverse range of retail industry sectors and business contexts that display retail products for sale. They operate with independence and under limited supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Merchandising

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Coordinate visual merchandise requirements.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Access and interpret organisational visual merchandising guidelines, and policies and procedures.
- 1.2. Communicate visual merchandising standards and display

- requirements to team members.
- 1.3. Plan appropriate timing for producing and dismantling visual merchandise displays.
 - 1.4. Communicate roles and responsibilities for visual merchandising to team members.
 - 1.5. Plan and coordinate promotional and special event displays as directed by management.
2. Supervise visual merchandise activities.
 - 2.1. Supervise construction and maintenance of displays to achieve balance and visual impact.
 - 2.2. Ensure display information accurately depicts product or service being promoted.
 - 2.3. Ensure displays are completed with minimum disruption to customer service and traffic flow.
 - 2.4. Ensure displays meet organisational standards and visual merchandise guidelines.
 - 2.5. Regularly monitor replenishment of merchandise and rotation of stock and take action to ensure optimal stock levels as required.
 3. Review impact of visual merchandise activities.
 - 3.1. Evaluate promotions or special event displays and determine impact on sales results.
 - 3.2. Report on visual merchandising activities to relevant personnel and make suggestions for improvements as required.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Problem solving skills to:

- overcome difficulties relevant to the display of merchandise.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow merchandising display guidelines, and organisational policies and procedures to coordinate visual merchandise activities for two of the following:
 - an existing merchandise range
 - a new merchandise range
 - a seasonal merchandise range
 - a promotional event
 - discounted merchandise
- for each of the above visual merchandising activities:
 - communicate requirements with team members
 - monitor visual merchandising displays and standards
- report on the effectiveness of the above merchandising activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - merchandise labelling and pricing
 - required stock levels
 - merchandise rotation and replenishment
- organisational visual merchandise standards and guidelines and their application to visual merchandising activities
- key aspects of relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
 - Australian Consumer Law
 - Work Health and Safety (WHS)
- objectives and use of visual merchandise displays
- interpretation of scaled versions of store design, layout and fixture placements
- techniques for creating effective visual merchandise displays:
 - types of displays and their impact

- display location
- display lighting
- display signage
- fundamental elements and principles of visual design and their use in the display and merchandise of products
- commercial impact of incorrect pricing both favourable and unfavourable:
 - customer complaints
 - profitability
- safe work practices for displaying merchandise with particular emphasis on:
 - safe use of equipment
 - safe manual handling techniques for bending, lifting and shifting heavy items
- product knowledge relevant to visual merchandise activities:
 - price
 - features
 - benefits.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- retail merchandise
- display areas
- retail display equipment and props
- product labels and price tickets
- ticketing and pricing equipment
- relevant documentation:
 - organisational visual merchandise display guidelines
 - organisational policies and procedures for:
 - merchandise labelling and pricing
 - required stock levels
 - merchandise rotation and replenishment
 - relevant industry codes of practice, legislation and statutory requirements for coordinating merchandise presentation:
 - Australian Consumer Law
 - Work Health and Safety (WHS)
- team members; these can be:
 - individuals in an industry workplace, or

- individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to balance and reconcile a register or terminal in a retail environment, clear registers, count money, calculate non cash transactions, and reconcile and record takings.

It applies to individuals working in frontline operational roles in a diverse range retail industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Retail Financials

Unit Sector

Retail

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Balance and secure takings.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Perform register or terminal balance at designated times.
- 1.2.Separate cash float from takings prior to balancing and secure takings.

- 1.3. Supply change to register or terminal and accurately record.
 - 1.4. Obtain and interpret register or terminal reading or print-out.
 - 1.5. Secure cash and non cash documents according to organisational procedures.
2. Reconcile takings.
- 2.1. Count cash accurately.
 - 2.2. Calculate non cash documents accurately.
 - 2.3. Determine balance between register or terminal reading and sum of cash and non cash transactions.
 - 2.4. Investigate or report discrepancies between register or terminal reading and sum of cash and non cash transactions to relevant personnel.
 - 2.5. Record takings and file records according to organisational procedures.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRRRTF001 Balance and secure point-of-sale terminal

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- consistently apply organisational policies and procedures to:
 - balance a register or terminal on three occasions with complete accuracy
 - reconcile three different sets of takings comprising both cash and non-cash with complete accuracy
 - identify and resolve three different types of balancing discrepancies
 - process three different types of takings according to organisational policies and procedures.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role and importance of the balancing process
- techniques for identifying and resolving discrepancies
- functions and procedures for operating point-of-sale equipment:
 - opening and closing
 - balancing
 - clearance of terminal and transference of tender
 - recording takings
 - consumables required by system
 - security
- cash handling procedures:
 - counting cash
 - handling cash floats
 - change required, denominations of change and tendering change
 - security
- organisational policies and procedures for non-cash transactions:
 - credit cards
 - EFTPOS

- vouchers
- organisational policies and procedures for:
 - exchanges
 - refunds
 - lay-by
 - cash handling
 - cash float
 - operation of point-of-sale equipment
 - register or terminal balance
 - security of cash and non cash transactions.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures related to point-of-sale
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXADM001A Apply retail office procedures

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to apply retail office procedures. It involves processing mail, operating office equipment, filing and retrieving documents, establishing contact with customers and preparing simple correspondence.

Application of the Unit

This unit applies to sales and administrative staff who operate and maintain office equipment, receive and dispatch correspondence in a variety of formats, file and retrieve documents, communicate with internal and external customers, and prepare simple correspondence according to store policy and procedures.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Process incoming and outgoing mail.	1.1. <i>Sort and dispatch incoming mail</i> to nominated recipients or locations. 1.2. Collect and check outgoing mail to ensure all items are correctly prepared for dispatch. 1.3. Record mail according to <i>store policy and procedures</i> . 1.4. Dispatch mail within designated time limits.
2. Process bulk mail.	2.1. Collate documents as required. 2.2. Sort and batch envelopes according to Australia Post specifications. 2.3. Lodge batched items for delivery.
3. Operate office equipment.	3.1. Identify appropriate <i>equipment</i> for intended application. 3.2. Operate equipment according to manufacturer instructions. 3.3. Identify and rectify equipment faults or report to <i>relevant personnel</i> . 3.4. Follow opening and shutdown processes according to store procedures. 3.5. Apply maintenance program for equipment to ensure down time is minimised.
4. File and retrieve documents.	4.1. <i>File documents</i> according to store policy. 4.2. Identify and retrieve documents as requested. 4.3. Update and modify existing records. 4.4. Remove, process and store designated inactive files according to store policy.
5. Establish contact with internal and external customers.	5.1. Use telephone system functions according to store policy. 5.2. Obtain and accurately record telephone and fax number or email <i>address</i> . 5.3. Answer incoming calls promptly and according to store policy. 5.4. Establish and clearly convey purpose of <i>contact</i> . 5.5. Transfer or place calls on hold as required. 5.6. Keep customers informed of delays and action being taken. 5.7. Record messages accurately and promptly return calls if

required.

- | | |
|-----------------------------------|---|
| 6. Prepare simple correspondence. | 6.1.Prepare and present correspondence for approval or signature according to set timeframes. |
| | 6.2.Write text using clear, concise language. |
| | 6.3.Use correct spelling, punctuation and grammar. |
| | 6.4.Use standard form letters according to store policy. |

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required Skills

- technical skills to operate a range of office technology
- planning and organising skills to complete tasks in a set timeframe
- literacy and numeracy skills to:
 - process, record and document information
 - generate a range of retail documents
- interpersonal communication skills to:
 - report equipment faults
 - answer telephone calls and keep customers informed of delays and action being taken through clear and direct communication
 - ask questions to identify and confirm requirements
 - share information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication

Required Knowledge

- store policy and procedures in regard to:
 - store administration and clerical systems
 - receiving and dispatching incoming and outgoing mail
 - processing information
 - reporting problems and faults
- relevant regulatory and licensing requirements, such as:

- Work Health and Safety (WHS)
- privacy policies

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies procedures for the processing of mail, including bulk mail
- operates and maintains office equipment according to store policy and procedures
- files and retrieves documents according to store policy and procedures
- follows procedures for establishing contact with internal and external customers
- applies procedures for the preparation of simple correspondence.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - manufacturer instructions and operation manuals
- a range of retail equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXICT001A Operate retail technology
- SIRXFIN002A Perform retail finance duties.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

- Procedures to ***sort and dispatch incoming mail*** may relate to:
- internal systems
 - Australia Post
 - courier services.
- Store policy and procedures*** in regard to:
- store administration
 - clerical systems
 - operating and maintaining retail equipment.
- Equipment*** may include:
- fax machine
 - telephone system
 - photocopier
 - answering machine or voicemail
 - public address system
 - paging system
 - franking machine
 - typewriters
 - computers
 - calculators
 - adapted equipment for people with a disability, for example, talking calculators, computer hard and software, and TTY.
- Relevant personnel*** may include:
- supervisor
 - team leader
 - manager.
- Systems used to record or ***file documents*** may be:
- manual
 - electronic.
- Contact*** may be established by:
- telephone
 - fax
 - email
 - letter
 - face-to-face contact.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Maintain office procedures.	<p>1.1. Monitor, record and <i>order</i> office supplies as required according to <i>store policy and procedures</i>.</p> <p>1.2. Implement store policy and procedures in regard to <i>special requests and requirements</i>, according to set timeframes.</p>
2. Process data in response to information requests.	<p>2.1. Document requests for information and identify responses according to store policy.</p> <p>2.2. Identify <i>relevant external information sources</i>.</p> <p>2.3. Obtain <i>access to identified sources</i>.</p> <p>2.4. Access and extract <i>relevant information</i>.</p> <p>2.5. Identify and offer <i>options and alternatives</i> where available information does not match defined needs.</p> <p>2.6. Accurately copy or summarise extracted information.</p> <p>2.7. Compile and update appropriate records required for regulatory compliance to maintain security and confidentiality of contents.</p>
3. Compose reports and correspondence.	<p>3.1. Collate relevant information and edit as required.</p> <p>3.2. Use clear, concise, easily understood language when writing text.</p> <p>3.3. Use correct spelling, punctuation and grammar.</p> <p>3.4. Draft and set out correspondence and reports according to store policy.</p> <p>3.5. Produced edited report and dispatch to <i>relevant personnel</i>.</p> <p>3.6. Copy and securely file final report according to store policy.</p>
4. Maintain existing recording and filing systems.	<p>4.1. Maintain <i>recording and filing systems</i> according to store policy.</p> <p>4.2. Allocate new documents to designated category.</p> <p>4.3. Monitor the issue and return of documents to ensure the integrity of the system is maintained.</p> <p>4.4. Archive, remove and update documents to ensure appropriate space available for current records.</p> <p>4.5. Identify and locate required files and dispatch to nominated person or section within designated time limits.</p>

- 4.6. Monitor and record file and document movements.
 - 4.7. Maintain documents in good condition and in correct location.
 - 4.8. Separate confidential files from general files, with access available to nominated personnel only.
 - 4.9. Monitor security system to ensure issued files are traceable at all times.
5. Maintain computer storage media.
 - 5.1. Maintain storage media and filing system according to store policy and procedures.
 - 5.2. Format *digital storage media* using correct procedures.
 - 5.3. Create back up files to ensure safety, security and confidentiality of files is maintained.
 - 5.4. Store back up files in the designated manner and location.
 - 5.5. Regularly perform virus checks on the system and back up storage media.
 - 5.6. Store *hardware* according to manufacturer instructions.
 - 5.7. File and store software according to organisational procedures.
 - 5.8. Observe *Work Health and Safety (WHS) guidelines* relating to screen based equipment and ergonomic work stations.
 6. Maintain computer filing system.
 - 6.1. Determine document filing requirements.
 - 6.2. Create a filing system that reflects the size, nature and complexity of the workplace.
 - 6.3. Implement security checks where necessary.
 - 6.4. Add file names to the filing system as required.
 - 6.5. Update the filing system regularly by deleting or archiving old files.
 - 6.6. Exit programs according to screen prompts to preserve data.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- literacy and numeracy skills to:
 - process, record and document information
 - write reports
 - use various computer software packages
- interpersonal communication skills to:
 - deal with information requests through clear and direct communication
 - ask questions to identify and confirm requirements

- share information
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication

Required knowledge

- store policy and procedures in regard to:
 - store administration and financial systems
 - systems and methods for organisation of work routine
 - appropriate clerical or office systems
 - mail procedures
 - transport procedures, including cab charge and courier systems
 - systems and procedures for processing information
- types and functions of records management systems
- types and functions of office technology, including:
 - computer
 - printer
 - software packages
 - installation of hardware and software packages
 - software licensing requirements
- relevant WHS requirements in relation to the retail office
- principles and techniques in interpersonal communication skills

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently implements workplace office procedures
- responds accurately and appropriately to requests for information according to store policy
- consistently applies procedures for maintaining records and filing system, including computerised records.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- sample policy and procedures in regard to:
 - store administration and clerical or office systems
 - processing of information

- format and technical vocabulary
- WHS legislation and codes of practice
- a range of office equipment, including:
 - computer
 - printer
 - software packages
 - a work team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Ordering procedures may include:

- fax
- phone
- email
- internet.

Store policy and procedures in regard to:

- store administration and clerical systems
- document format and technical vocabulary.

Special requests and requirements may include:

- mail
- ordering of stock
- bill payment
- taxation paperwork
- courier service
- transport, e.g. taxi, cab charge
- special mail procedures.

External information sources

- distributors

may include:

- suppliers
- manufacturers
- technical support personnel
- maintenance personnel.

Modes of *access to identified sources* may include:

- contact person
- contact details.

Relevant information may include:

- orders
- files
- letters
- correspondence
- warranties.

Options and alternatives may be limited by:

- regulatory requirements
- cost-effectiveness
- store policy.

Relevant personnel may include:

- relevant managers
- supervisor
- team leader.

Recording and filing systems may be:

- paper-based
- electronic.

Digital storage media may include:

- floppy disk
- USB drive
- zip disk
- CD-ROM
- DVD-ROM
- digital tape
- external hard drive.

Hardware may include:

- computer
- keyboard or typewriter
- printer
- scanner
- monitor
- mouse
- storage media.

OHS guidelines may include:

- lighting
- seating
- posture
- ventilation
- glare and reflection
- keyboard equipment and radiation
- eye strain

- setting up work stations.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Engage customers.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1.Greet customers in a polite and friendly manner within designated response times and make them a priority over other workplace duties.

- 1.2. Clearly communicate with customers using appropriate verbal and non-verbal communication.
- 1.3. Adapt communication style to appropriately communicate with customers from diverse backgrounds.
2. Assist customers.
 - 2.1. Identify and act on opportunities to assist customers and be available to assist customers when needed.
 - 2.2. Question and actively listen to customers to determine their needs.
 - 2.3. Resolve routine customer problems according to individual responsibility level and organisational policies and procedures.
 - 2.4. Address general customer enquiries and provide accurate information in a clear and courteous manner.
3. Contribute to a service culture.
 - 3.1. Act in line with organisational service standards to ensure quality customer service.
 - 3.2. Show interest in customer's needs and maintain a welcoming customer environment free of complacency.
 - 3.3. Seek assistance from relevant personnel when customer's needs are beyond scope of own responsibility.
 - 3.4. Identify and take opportunities to improve customer service standards.
 - 3.5. Refer customer service issues and feedback to relevant personnel for action.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for SIRXCEG001 Engage the customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- contribute to a customer service culture by providing customer service, in line with organisational service standards, across four different customer interactions
- for the above four customer interactions, individually or cumulatively involve:
 - customers from diverse backgrounds
 - resolution of two routine customer problems
 - provision of accurate information to address two general customer enquiries
 - referral of unresolved customer enquiry
 - use of effective communication techniques and positive body language.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational service standards and procedures for:
 - designated customer service response times
 - interacting with customers
 - solving routine customer problems
 - providing information to customers
- basic principles for achieving positive customer service
- verbal and non-verbal communication
- techniques for effective communication:
 - open and closed questioning
 - paraphrasing
 - effective listening
 - voice tonality and volume
- body language and its role in customer service
- effective communication strategies for interacting with customers of diverse backgrounds
- commercial impact of:
 - positive customer service
 - poor customer service

- organisational information and sources of information to assist customer with customer enquiries.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational service standards and procedures for:
 - designated customer service response times
 - interacting with customers
 - solving routine customer problems
 - providing information to customers
- customers from a diverse range of backgrounds; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXCLM402 Manage store facilities

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXCLM002A Manage store facilities.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to manage store facilities in a retail environment. It involves managing the store maintenance and housekeeping program, negotiating and monitoring maintenance contracts, and identifying and locating facilities requirements.

The unit covers the application of store policies and relevant legislation to the planning, coordination and implementation of activities associated with monitoring and maintaining premises, fittings, fixtures and equipment in a retail environment.

Application of the Unit

This unit applies to staff with managerial responsibility in a retail environment.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Elements and Performance Criteria

Element

Performance Criteria

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

1. Manage store maintenance program.

- 1.1. Monitor and maintain premises, fittings, fixtures and equipment, according to *store policy and procedures* and *relevant legislation*.
- 1.2. Identify deficiencies in store maintenance procedures and take remedial action as required.
- 1.3. Obtain *expert or specialist advice* as required, according to store policy.
- 1.4. Initiate contingency plan within scope of authority in the event of maintenance problems.

2. Manage retail equipment maintenance.

- 2.1. Develop and implement procedures to ensure retail equipment is maintained according to store policy.
- 2.2. Monitor and implement maintenance program for retail equipment, according to manufacturer design specifications and store policy.
- 2.3. Identify and rectify equipment faults where possible, without undue delay.
- 2.4. **Report** equipment faults or failures, according to service agreements and store policy.

3. Negotiate maintenance contracts.

- 3.1. Negotiate maintenance *contracts* with contractors and suppliers according to store policy and procedures.
- 3.2. Negotiate and implement contract terms and conditions to maximise benefits for the store, and communicate to *relevant personnel*.
- 3.3. Monitor maintenance procedures to ensure products and tasks meet contract specifications.

4. Identify facilities and space requirements.

- 4.1. Identify facilities and space requirements to reflect business needs and volume, according to store policy and budget requirements.
- 4.2. Locate suitable facilities and space to facilitate expansion or change of use in line with store policy and procedures.
- 4.3. Consult, as required, with senior manager or business owner to determine optimum strategy for store space and location.

4.4. Maximise use of space, with consideration to existing configuration, to optimise the merchandising of existing and incoming stock.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - ask questions to identify and confirm requirements
 - ensure listening and understanding
 - negotiate contracts and relay contractual requirements to staff
 - obtain expert or specialist advice
 - report faults
 - share information
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
- negotiation skills to negotiate maintenance contracts with contractors and suppliers
- literacy and numeracy skills to:
 - apply accounting processes and record data
 - develop, document and record procedures
 - estimate measurements and volumes
 - maintain records
 - read and interpret manufacturer instructions
 - work within a budget

Required knowledge

- store policy and procedures in regard to:
 - maintenance of store facilities
 - maintenance of retail equipment
- maintenance contract terms and options
- contract specifications
- relevant legislation and statutory requirements relating to managing store facilities, including:
 - work health and safety (WHS) legislation
 - food safety legislation and regulations
- relevant industry codes of practice relating to managing store facilities
- principles and techniques in:

- monitoring performance of contracts
- negotiating, in particular contract negotiation
- interpersonal communication

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- plans, coordinates and implements activities associated with monitoring and maintaining premises, fittings, fixtures and equipment according to store policy and procedures
- initiates contingency plans in response to maintenance problems as required
- proactively negotiates, monitors and implements maintenance contracts according to store policy and procedures
- identifies and uses space and facilities effectively
- evaluates and reports on effectiveness of maintenance contracts.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - maintenance contracts
 - store policy and procedures on maintenance of facilities, and contract negotiation
 - relevant legislation and statutory requirements
 - WHS
 - legislation and industry codes of practice
- a team
- equipment and technology.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- case study or research report
- written or verbal questioning to assess knowledge and understanding

- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

- Store policy and procedures*** in regard to:
- store maintenance
 - facilities management
 - reporting mechanisms
 - WHS
 - food safety.
- Relevant legislation*** may include:
- federal, state or territory and local legislation
 - food safety regulations
 - WHS.
- Expert or specialist advice*** may be sought regarding:
- point-of-sale terminals
 - EFTPOS terminals
 - computers, scanners and printers
 - pricing equipment
 - electronic bar coding equipment
 - portable data entry
 - electronic ordering equipment
 - wrapping and packing equipment
 - equipment for carrying or moving merchandise
 - equipment for storage of merchandise, including refrigerators
 - weighing machines
 - thermometers
 - security tag systems
 - trolley return equipment
 - fixtures and fittings
 - food preparation equipment.
- Faults may be ***reported***:
- verbally
 - in writing
 - by email
 - to service personnel

- to contractors
 - to relevant managers
 - to supervisor.
- Contracts:**
- may be negotiated internally and externally
 - may involve:
 - quality standards
 - building maintenance services
 - cleaning
 - security
 - electrical services
 - plumbing services
 - equipment maintenance.
- Relevant personnel** may include:
- managers
 - supervisors
 - specialist staff.

SIRXFIN002A Perform retail finance duties

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to perform retail finance duties. It involves processing petty cash and non-cash transactions, preparing banking documents, reconciling invoices for payment and preparing invoices for debtors.

Application of the Unit

This unit applies to team members who process petty cash, cash and non-cash transactions; reconcile and process banking; identify and rectify delivery and document discrepancies; and process invoices for creditors and debtors, according to store policy and procedures. These tasks are performed under some supervision.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Process petty cash transactions.	1.1. Check petty cash claims for approval, accuracy and authenticity before processing. 1.2. Check and balance transactions according to <i>store policy and procedures</i> . 1.3. Note irregularities and refer to <i>relevant personnel</i> for resolution. 1.4. Process and record petty cash transactions within designated time limits.
2. Prepare banking documents.	2.1. Balance cashbook entries against record of takings. 2.2. Compile and balance deposit entries. 2.3. List cash and <i>non cash transactions</i> on banking deposit forms, according to the banking institution's guidelines. 2.4. Process in store credit systems according to store policy.
3. Process non cash transactions.	3.1. Balance non cash transactions and present <i>documentation</i> to relevant personnel for checking. 3.2. Note irregularities and refer to relevant personnel for resolution.
4. Reconcile invoices for payment to creditors.	4.1. Identify discrepancies between invoices and delivery notes and report to relevant personnel or section for resolution. 4.2. Identify errors in invoice charges and report to relevant personnel or section for correction or resolution. 4.3. Rectify discrepancies and errors as directed. 4.4. Process corrected and authorised invoices for payment within designated time limits. 4.5. Resolve creditor enquiries or refer to relevant personnel or section for resolution.
5. Prepare invoices for debtors.	5.1. Perform <i>preparatory calculations</i> to produce accurate customer invoices. 5.2. Complete relevant documentation to ensure accuracy of contents. 5.3. Distribute documents to relevant personnel or section for certification prior to being dispatched. 5.4. Dispatch verified documents within designated time limits. 5.5. Copy and <i>file</i> documents for auditing purposes.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- self management skills to complete tasks within a set timeframe
- literacy skills to interpret documentation
- numeracy skills to:
 - process petty cash transactions
 - receive and process deliveries
 - perform sales transactions
 - balance cashbook entries and takings
 - generate invoices
- interpersonal skills to:
 - refer and report irregularities, discrepancies and errors in transactions to relevant personnel
 - resolve creditor enquiries or refer to relevant personnel through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication

Required knowledge

- store policy and procedures in regard to:
 - register or terminal balance
 - security of cash and non-cash transactions
 - petty cash
 - cash balances
 - banking procedures
 - purchase requisitions or orders
 - issuing of receipts
 - delivery dockets
 - credit notes
 - statements
 - remittance advices
 - cash register rolls
 - deposit books
 - change required and denomination of change
 - operation of equipment used at register or terminal

- processing delivery and delivery document discrepancies
- invoicing procedures for debtors and creditors
- payment and invoice procedures, including GST requirements
- cash and non-cash handling procedures, including:
 - opening and closing point-of-sale terminal
 - clearance of terminal and transference of tender
 - maintenance of cash balances
 - counting cash
 - calculating non-cash documents
 - customer credit ratings
 - balancing point-of-sale terminal
 - recording takings
 - change required and denominations of change
 - EFTPOS
 - credit cards
 - processing of cheques
 - gift vouchers
 - lay-by
 - cash on delivery (COD)
 - lay-by
 - credits and returns
 - customer refunds

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures in regard to petty cash and non-cash transactions, invoicing, banking processes and processing delivery and document discrepancies
- consistently applies skills related to the reconciliation and payments of invoices for creditors and debtors, according to store policy and procedures.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment

- relevant documentation, such as:
 - store policy and procedures manuals
 - financial transaction dockets, slips and invoices
 - banking deposit forms
- EFTPOS facilities and equipment
- registers and related equipment
- relevant financial management systems.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXADM001A Apply retail office procedures
- SIRXICT001A Operate retail technology.

Range Statement

The Range Statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the Performance Criteria is detailed below.

Store policy and procedures in regard to:

- store financial systems.

Relevant personnel may include:

- manager
- supervisor
- team leader
- specialist staff.

Non-cash transactions may include:

- EFTPOS and credit cards
- customer credit ratings
- cheques
- hire-purchase
- lay-by

Documentation may include:

- cash on delivery (COD)
- customer refunds.
- purchase requisitions
- purchase orders
- invoices
- receipts
- delivery dockets and receipts
- credit notes
- statements
- remittance advices
- cash register rolls
- deposit books.

Preparatory calculations may include:

- application of prior credit
- discounting
- quantity
- calculation of GST.

Methods used to **file** documents may include:

- manual
- electronic.

SIRXICT001A Operate retail technology

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to operate a variety of retail equipment. It involves identifying the correct equipment required for a given task, maintaining retail equipment, applying keyboard skills and operating data entry equipment.

Application of the Unit

This unit applies to frontline service personnel who operate and maintain a range of retail equipment, including point-of-sale systems, keyboards and data entry equipment, according to manufacturer instructions, design specifications, store policy and designated timeframes. This work is undertaken with some supervision and guidance.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Maintain retail equipment.	1.1. Identify purpose of <i>equipment</i> used in store or department. 1.2. Operate equipment, according to design specifications and <i>safety requirements</i> . 1.3. Identify equipment faults and report to <i>relevant personnel</i> . 1.4. Identify and apply maintenance program for retail equipment according to <i>store policy and procedures</i> .
2. Apply keyboard skills.	2.1. Operate keyboard using typing techniques within designated speed and accuracy requirements. 2.2. Enter and edit information accurately.
3. Operate data entry equipment.	3.1. Enter data using relevant equipment, according to store policy and procedures. 3.2. Operate price marking equipment, according to manufacturer instructions and store policy. 3.3. Enter data accurately and within designated time limits.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- planning and organising skills to complete tasks in set timeframe
- problem solving skills to deal with different types of transactions
- literacy and numeracy skills to:
 - read store procedures for operating equipment
 - enter data
 - perform point-of-sale transactions
 - follow common fault-finding procedures

Required knowledge

- store policy and procedures in regard to:
 - the operation and maintenance of store retail equipment
 - reporting problems and faults
- relevant legislation and statutory requirements in regard to operating retail technology, including Work Health and Safety (WHS) requirements
- relevant industry codes of practice
- purpose and impact of using electronic technology
- licensing requirements for carrying and moving merchandise (if applicable)

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- operates a range of store retail equipment according to store policy and procedures and industry codes of practice
- operates and maintains a range of store retail equipment according to manufacturer instructions and design specifications
- applies store maintenance program and reports faults and problems
- consistently applies safe working practices in the operation and maintenance of store retail equipment according to OHS legislation and codes of practice
- reads and interprets operation manuals to solve routine faults and errors and maintains and uses equipment effectively
- uses keyboard skills to enter and edit data accurately
- completes tasks in set timeframe.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated work environment
- relevant documentation, such as:
 - store policy and procedure manuals
 - manufacturer instructions and operation manuals
- a range of store retail equipment.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- a role play
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Equipment may include:

- point-of-sale terminals
- electronic bar coding equipment for price labelling and stocktaking
- portable data entry
- printers
- EFTPOS terminals
- electronic ordering equipment
- wrapping and packing equipment
- equipment for carrying or moving merchandise
- equipment for storage of merchandise, including refrigerators
- weighing machines
- thermometers
- security tag systems
- trolley return equipment
- computers
- scanners
- numerical keyboard equipment, including calculators.
- hazard identification (e.g. workplace inspections)
- emergency, fire and accident procedures
- personal safety procedures
- stress management
- procedures for the use of personal protective clothing and equipment

Safety requirements may include:

- Relevant personnel** may include:
- reporting incidents and accidents in the workplace.
 - supervisor
 - team leader
 - manager.
- Store policy and procedures** in regard to:
- store administration
 - clerical systems
 - operating and maintaining retail equipment
 - Work Health and Safety (WHS).

SIRXIND002 Organise and maintain the store environment

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to organise, clean and maintain the work environment to ensure optimal workplace appearance and safety.

It applies to individuals working in frontline operational roles in a diverse range of industry sectors and business contexts. They operate with some independence under general supervision and guidance from others, and within established organisational policies and procedures.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Working in Industry

Unit Sector

Cross-Sector

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Clean the store environment.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Clean work areas according to work health and safety requirements and organisational procedures.
- 1.2.Use and store cleaning products and equipment according to manufacturer instructions.

- 1.3. Complete cleaning tasks safely and efficiently with minimum inconvenience to customers and team members.
2. Maintain the store environment.
- 2.1. Store products and equipment in designated storage areas to minimise hazards and maintain the store appearance.
- 2.2. Sort, recycle, and dispose of waste according to organisational procedures.
- 2.3. Ensure customer services and point of sale areas are adequately stocked to minimise disruption when serving customers.
- 2.4. Identify and remove potential workplace hazards within scope of responsibility, and report any unresolved hazards to relevant personal.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> interpret manufacturers' instructions, warning labels and instructions for the use of chemicals and hazardous substances.
Numeracy skills to:	<ul style="list-style-type: none"> follow simple dilution ratios for cleaning products.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXIND002 Organise and maintain the store environment

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- organise and maintain a designated work area, within a store environment, during three shifts
- correctly use cleaning products and equipment to perform two cleaning tasks within the store environment.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- common cleaning product labels that identify chemicals and hazardous substances and their meaning
- organisational policies and procedures relevant to the organisation and maintenance of the store environment:
 - work health and safety (WHS)
 - general housekeeping
 - personal hygiene
 - reporting problems and faults
 - point of sale stock requirements
 - use, maintenance and storage of cleaning products and equipment
 - use of hazardous cleaning substances
 - waste disposal, recycling and environmental protection.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures for:

- work health and safety
- general housekeeping
- personal hygiene
- reporting problems and faults
- point of sale stock requirements
- use, maintenance and storage of cleaning products and equipment
- use of hazardous cleaning substances
- waste disposal, recycling and environmental protection
- cleaning products and equipment
- manufacturer instructions for use of cleaning equipment, cleaning materials and hazardous substances
- workplace waste for disposal
- work areas to be maintained
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXINV004A Buy merchandise

Modification History

Not applicable.

Unit Descriptor

Unit descriptor

This unit describes the performance outcomes, skills and knowledge required to buy merchandise in a retail environment. It involves analysing the market, planning the product range, establishing supplier relationships, negotiating supply of goods, introducing the product range, maximising profit and rationalising stock.

Application of the Unit

Application of the unit

This unit requires the consistent application of store policy and legislative requirements in regard to market analysis, planning merchandise and service ranges, procurement and rationalisation of stock, maintenance of supplier relations, quality control and staff merchandise training. The team member is required to recognise known and unknown loss and how it affects buying and ordering patterns, and to interpret and apply market trends to the store situation to create opportunities to improve sales and service while maximising profits.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units

Nil

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Analyse market.	<p>1.1 Identify and analyse <i>store merchandise and marketing policy and procedures</i>.</p> <p>1.2 Monitor <i>customer requirements</i> formally and informally in order to evaluate market trends and customer needs.</p> <p>1.3 Research new products and services.</p> <p>1.4 Identify, evaluate, implement and review opportunities to improve sales.</p> <p>1.5 Monitor <i>merchandise range</i> to identify the demand for individual items and seasonal variations.</p> <p>1.6 Monitor market competition.</p>

ELEMENT	PERFORMANCE CRITERIA
2 Analyse factors affecting stock levels and range requirements.	2.1 Apply mathematical calculations to measure analyse and report on existing and potential stock loss and dissipation and its <i>impact on business operations</i> . 2.2 Analyse store or department sales figures to determine contribution rates of product lines. 2.3 Determine store or department space requirements and brand product mix according to store policy. 2.4 Determine future directions for merchandise ranges according to store policy.
3 Plan merchandise ranges.	3.1 Develop and implement buying plan according to outcomes of analysis and store policy. 3.2 Determine future directions for merchandise ranges according to store policy. 3.3 Liaise with <i>relevant personnel</i> to coordinate promotional and marketing activities. 3.4 Analyse store or department sales figures to determine contribution rates of product lines. 3.5 Determine investment levels with reference to previous years' sales figures, predicted demand and projected gross profit. 3.6 Identify and act upon contribution improvement opportunities. 3.7 Determine store or department space requirements and brand product mix according to store policy. 3.8 Determine stock levels according to peak seasons, special events and supplier lead time. 3.9 Analyse, evaluate and amend merchandise range and sources of supply according to management, staff and customer <i>feedback</i> .
4 Establish supplier relations.	4.1 Develop cooperative relationships with supplier representatives according to store policy. 4.2 Continuously review existing suppliers in regard to quality, profitability, service and delivery status. 4.3 Identify new suppliers and delete existing suppliers according to <i>performance indicators</i> .

ELEMENT	PERFORMANCE CRITERIA
5 Negotiate supply of goods.	<p>5.1 <i>Negotiate</i> and implement arrangements with suppliers according to store policy and procedures, and communicate to relevant personnel.</p> <p>5.2 Authorise special <i>pricing arrangements</i> and customer payment agreements and communicate to relevant staff and management personnel according to store policy.</p> <p>5.3 Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.</p> <p>5.4 Identify <i>market factors</i> affecting supply and communicate to relevant personnel.</p> <p>5.5 Convey complete and accurate records of negotiations and agreements to relevant personnel within designated timelines.</p> <p>5.6 Take immediate corrective action where potential or actual problems with supply are indicated.</p> <p>5.7 Identify and develop new suppliers to maintain and improve sales and service delivery.</p> <p>5.8 Analyse, evaluate and amend stock range and source of supply according to management, staff and customer feedback.</p>
6 Monitor quality control.	<p>6.1 Establish merchandise quality standards with suppliers according to <i>legal requirements</i>, customer requirements and store policy.</p> <p>6.2 Monitor and ensure quality of merchandise during supply, manufacture and delivery processes.</p> <p>6.3 Record and analyse stock return figures against target figure.</p>
7 Introduce product ranges.	<p>7.1 Inform relevant personnel of new product ranges and advise on preferred location of merchandise.</p> <p>7.2 Implement <i>staff training</i> in product knowledge to introduce product range.</p> <p>7.3 Demonstrate or display new ranges to <i>staff</i> according to store merchandising plan.</p>

ELEMENT	PERFORMANCE CRITERIA
8 Maximise profit.	8.1 Calculate or estimate individual product range contributions against budget and targets. 8.2 Develop and implement product range assessment checks against budget and targets. 8.3 Calculate or estimate overall selling space contributions according to store merchandising plan. 8.4 Maximise profit margins in negotiations with suppliers. 8.5 Determine store pricing policies according to stated net profit margin in store merchandising plan and consumer law. 8.6 Negotiate specifications for <i>terms of trade</i> .
9 Rationalise stock.	9.1 Review and update stock range at regular intervals. 9.2 Identify stock lines to be <i>deleted</i> and take action to minimise adverse effect on profit. 9.3 <i>Consolidate stock</i> as required to maximise sales potential.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- evaluating and analysing:
 - market trends and projections
 - sales figures and investment levels
 - space requirements
- negotiation skills
 - interpersonal communication skills to:
 - liaise with relevant personnel
 - establish supplier relationships, negotiate supply of goods
 - provide information and training on product range
 - provide feedback and coaching through clear and direct communication

REQUIRED SKILLS AND KNOWLEDGE

- ask questions to identify and confirm requirements
- give instructions
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- group presentation skills
- report writing
- using and applying technology, including electronic data interchange
- literacy and numeracy skills in relation to:
 - developing pricing policies
 - calculating and estimating product range contributions
 - calculating the cost of stock loss and dissipation
 - analysing stock figures.

The following knowledge must be assessed as part of this unit:

- store policy and procedures in regard to:
 - marketing
 - buying
 - profit margins
 - quality control
 - stock inventory levels: current and future
 - stock location and allocated areas
- staff product knowledge training
- industry and store information, including:
 - market needs
 - range of merchandise available
 - market competition
 - existing and possible new suppliers
 - channels of distribution
- relevant legislation and statutory requirements
- relevant industry codes of practice
 - pricing procedures, including GST requirements.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- consistently applies store policy and procedures, industry codes of practice, statutory requirements and regulations in regard to buying, merchandising and marketing practices
- applies market analysis, planning, procurement and rationalisation of stock and merchandise and service ranges, maintenance of supplier relations and quality control
- interprets market trends and applies these to the store situation to create opportunities to improve sales and services, while maximising profits
- analyses market and plans the introduction of a product and service range
- identifies suppliers, negotiates supply of goods, rationalises stock and monitors quality control
- trains and communicates information to and from staff or team members in regard to stock and merchandise and service range.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant information and documentation, including:
 - store policy and procedures
 - legislation and statutory requirements
 - industry codes of practice
 - merchandise and supplier data.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback

EVIDENCE GUIDE

- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Store merchandise and marketing policies may include:

- store culture
- current market position
- target market.

Customer requirements may be monitored by:

- questionnaires
- surveys
- observation.

Merchandise range may include:

- existing stock
- new stock.

RANGE STATEMENT

Impact on business operations may include:

- buying
- ordering patterns
- planning
- budgeting.

Relevant personnel may include:

- frontline staff
- relevant managers
- supervisor
- team leader
- specialist staff.

Feedback may be sought and given:

- verbally
- in writing
- in groups
- individually.

Performance indicators may include:

- price
- quality
- performance
- supply reliability
- merchandise range.

Negotiation process may include:

- face-to-face
- correspondence
- meetings
- telephone or electronic media.

Pricing arrangements may include:

- cash on delivery (COD)
- cheque
- credit card
- invoice
- GST.

Market factors may include:

- fashion trends

RANGE STATEMENT

- product availability
 - sales performance.
- Legal requirements* may include:
- sale of second-hand goods
 - Trade Practices and Fair Trading Acts
 - licence, patent or copyright arrangements
 - pricing procedures, including GST requirements.
- Staff training* may include:
- on-the-job
 - off-the-job
 - one-on-one coaching
 - any combination of the above.
- Staff* may include:
- full-time, part-time, casual or contract staff
 - people from a range of social, cultural and ethnic backgrounds
 - people with varying degrees of language and literacy levels.
- Terms of trade* may include:
- special buys
 - payment terms
 - promotional deals with supplier.
- Stock lines may be *deleted* due to:
- changes in store policy and culture
 - sales performance
 - customer requirements
 - fashion trends
 - product availability
 - problems with supply.
- Methods to *consolidate stock* may include:
- movement of stock between departments or stores.

SIRXMER004A Manage merchandise and store presentation

Modification History

Not applicable.

Unit Descriptor

Unit descriptor This unit describes the performance outcomes, skills and knowledge required to manage merchandise and store presentation.

Application of the Unit

Application of the unit This unit requires the team member to apply knowledge of store merchandising to plan and manage store advertising and promotions, manage store pricing policies and housekeeping. It includes interpretation of and compliance with store layout and visual merchandising policies, developing and implementing procedures to manage merchandise pricing, and managing all aspects of store housekeeping, including contingency procedures. This role applies to frontline retail managers.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units Nil

Employability Skills Information

Employability skills The required outcomes described in this unit contain applicable facets of employability skills. The Employability Skills Summary of the qualification in which this unit is packaged will assist in identifying employability skills requirements.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the required performance needed to demonstrate achievement of the element. Where ***bold italicised*** text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Manage store merchandising.	<p>1.1 Ensure layout and presentation support market position and promote customer flow according to store <i>visual merchandising policies and plans</i>.</p> <p>1.2 Develop and implement layout assessment checks.</p> <p>1.3 Define standards for visual presentations and displays and clearly communicate to all staff</p> <p>1.4 Consult floor staff to assess customer response to space allocations.</p>
2 Plan and manage store advertising and promotions.	<p>2.1 Manage and implement store policies and procedures, in regard to store <i>promotional activities</i>.</p> <p>2.2 Organise activities in line with anticipated or researched customer requirements.</p> <p>2.3 Manage <i>promotions</i> in order to achieve maximum customer impact.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.4 Negotiate arrangements with suppliers in regard to special promotional activities.
	2.5 Coordinate store activities to complement shopping centre or retail complex promotions.
	2.6 Develop and implement assessment checks to measure effectiveness of promotions, including layout, visual impact and customer response.
	2.7 Document and report on promotional activities.
3 Manage store pricing policies.	3.1 Maintain store pricing according to <i>organisation pricing policies and procedures</i> in regard to pricing.
	3.2 Maintain accurate information on pricing trends and changes and communicate to relevant staff.
	3.3 Develop and implement procedures for pricing according to store policies and <i>legislative requirements</i> .
4 Manage housekeeping.	4.1 Develop and implement store policies and procedures in regard to <i>store housekeeping and maintenance</i> .
	4.2 Develop and manage rosters or schedules, ensuring store housekeeping standards are monitored and maintained.
	4.3 Initiate <i>contingency plan</i> in the event of merchandise or store presentation problems.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the essential skills and knowledge and their level, required for this unit.

The following skills must be assessed as part of this unit:

- providing feedback on performance
- interpersonal communication skills to:
 - communicate store standards and expectations to staff
 - consult floor staff
 - negotiate arrangements with suppliers, through clear and direct communication
 - ask questions to identify and confirm requirements

REQUIRED SKILLS AND KNOWLEDGE

- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- roster development
- report writing
- literacy skills in regard to:
 - researching, analysing and interpreting a broad range of written material
 - preparing rosters
 - preparing reports
 - documenting results

The following knowledge must be assessed as part of this unit:

- store policies and procedures, in regard to:
 - layout and presentation
 - advertising and promotions
 - pricing or marking down of goods, including risk assessment
 - housekeeping for premises, fittings, fixtures and equipment
 - store merchandise and service range
 - store merchandising plan
 - range and availability of new products and services
 - customer demand and market trends
 - product quality standards
- OHS legislation and codes of practice
- relevant legislation and statutory requirements
- relevant industry codes of practice
- pricing procedures, including GST requirements
- principles and techniques in:
 - visual merchandising
 - project management

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

EVIDENCE GUIDE

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- collaboratively plans layout and presentation of merchandise according to store policies and procedures
- assesses effectiveness of layout and presentation according to sales targets or predetermined objectives
- collaboratively plans, coordinates and implements advertising and promotions activities according to store policies and procedures
- assesses and reports on effectiveness of advertising and promotions to staff and management according to store policies and procedures
- collaboratively plans, coordinates and implements pricing activities according to store policies and procedures
- collaboratively plans, coordinates and implements housekeeping activities according to store policies and procedures and OHS legislation, regulations and codes of practice.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - store merchandising plan
 - legislation and statutory requirements
 - OHS legislation, regulations and codes of practice
- a work team.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Holistic assessment with other units relevant to the

EVIDENCE GUIDE

industry sector, workplace and job role is recommended.

Assessing employability skills

Employability skills are integral to effective performance in the workplace and are broadly consistent across industry sectors. How these skills are applied varies between occupations and qualifications due to the different work functions and contexts.

Employability skills embedded in this unit should be assessed holistically in the context of the job role and with other relevant units that make up the skill set or qualification.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Visual merchandising policies and plans may include:

- target market
- market research
- store image
- store layout and space availability
- seasonal lines
- pricing policy.

Promotional activities may involve:

- external and in-store activities
- corporate or locally based activities
- dealing with advertising agencies and consultants.

Promotions may include:

- advertising
- catalogues
- newspapers
- posters

RANGE STATEMENT

- Organisation pricing policies and procedures* may include:
- radio or TV
 - suppliers
 - internet
 - website.
 - marking down of slow moving stock
 - soiled or damaged goods
 - goods close to use-by date
 - end of season stock
 - pricing policies, including GST requirements.
- Legislative requirements* may include:
- Trade Practices and Fair Trading Acts
 - consumer law.
- Store housekeeping and maintenance* may include:
- store premises
 - fittings
 - fixtures
 - equipment.
- Contingency plan* may include:
- major spillages
 - flood, storm or cyclone
 - breakages
 - blackout
 - break-in.

- legislative requirements.
- 3.5. Identify optimum stock levels and replenish stock according to store policy.
- 3.6. Remove excess packaging and maintain display areas in a clean and tidy condition.
4. Protect merchandise.
- 4.1. Identify and apply correct handling, storage and display techniques according to stock characteristics and legislative requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- literacy and numeracy skills to:
 - prepare machine or manual labels and tickets
 - read and interpret store procedures and guidelines
 - read and interpret manufacturer instructions
- self-management skills to complete tasks in a set timeframe
- technology skills to operate and maintain manual and electronic labelling and ticketing equipment

Required knowledge

- store policies and procedures in regard to:
 - availability and use of display materials
 - correct storage of stock
 - correct storage procedures for labelling and ticketing equipment and materials
 - location of display areas
 - merchandise range
 - merchandising, ticketing and pricing of stock
 - scheduling for building or rotating displays
 - stock replenishment
 - stock rotation
 - store promotional themes, including advertising, catalogues and special offers
- correct manual handling techniques for protection of self and merchandise
- principles of display
- elements and principles of design and trends in retail design
- relevant WHS regulations, including:
 - manual handling
 - hygiene and sanitation

- hazardous substances
- labelling of workplace substances
- relevant legislation and statutory requirements relating to merchandising product
- pricing procedures, including inclusion and exclusion of GST
- relevant industry codes of practice relating to merchandising product

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment Evidence of the following is essential:

and evidence required to demonstrate competency in this unit

- applies store policies and procedures and legislative requirements in regard to displaying, merchandising, ticketing, pricing and storing stock
- displays merchandise on floor, fixtures, shelves and display areas, in determined locations, according to special manual handling techniques and other safety requirements
- prepares display labels and price tickets for merchandise with regard to store policies and procedures
- operates, maintains and stores a range of ticketing equipment according to:
 - store policy and procedures
 - industry codes of practice
 - manufacturer instructions and design specifications
- identifies damaged, soiled or out-of-date stock and takes corrective action as required by store procedures and legislative requirements
- maintains display areas and replenishes stock as required according to store procedures and legislative requirements
- performs correct manual handling, storage and display techniques.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail work environment
- a range of ticketing and pricing equipment
- merchandise for display
- display materials and props

- cleaning materials
- relevant documentation, such as:
 - store policy and procedure manuals on housekeeping, merchandising and WHS
 - manufacturer instructions and operation manuals for electronic ticketing equipment
 - relevant legislation and industry codes of practice.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- customer feedback
- answers to questions about specific skills and knowledge
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

- SIRXSLS201 Sell products and services
- SIRXSLS002A Advise on products and services.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Merchandise may be characterised by:

- type
- brand
- size
- customer needs
- colour
- price.
- merchandising of stock
- preparing and displaying labels and tickets
- maintaining displays.
- pricing requirements, including GST requirements

Store policy and procedures in regard to:

Legislative

- requirements** may include:
- industry codes of practice
 - discounted items
 - Australian Consumer law.
- Display** may include:
- setting new displays
 - maintaining existing displays.
- Handling techniques** may vary according to:
- stock characteristics
 - store policy
 - legislative requirements
 - industry codes of practice.
- Safety requirements** may relate to:
- transport, storage and handling of goods
 - hazardous substances
 - labelling of workplace substances.
- Preparation of **labels and tickets** may involve:
- pricing gun
 - shelf tickets
 - shelf talkers
 - written labels
 - swing ticketing
 - bar coding
 - price boards
 - header boards.
- Special promotion areas** may be:
- permanent or temporary
 - interior or exterior
 - publicly accessible
 - windows
 - shelves
 - wall fixtures
 - on floor.

SIRXMER406 Monitor in-store visual merchandising display

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXMER003A Monitor in-store visual merchandising display.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to interpret organisational visual merchandising plans and manuals and monitor in-store displays to ensure that they reflect and maintain current organisational visual merchandising directions.

It involves applying fundamental design principles, making decisions with regard to merchandise for display, and ensuring that displays contribute to the visual merchandising standards of the organisation and are constructed and located to ensure customer and staff safety.

Application of the Unit

This unit applies to frontline visual merchandising team members and other staff with a responsibility for monitoring displays to ensure they reflect and maintain current organisational visual merchandising directions.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Interpret a visual merchandising plan.	1.1. Identify <i>design requirements</i> of visual merchandising plan or manual. 1.2. Source <i>resources required</i> to implement plan. 1.3. Identify <i>factors that may affect the plan</i> . 1.4. Apply organisation's visual merchandising standards to the plan.
2. Monitor display requirements.	2.1. Regularly monitor display to ensure it meets the requirements of the <i>visual merchandising plan</i> . 2.2. Identify <i>damage or changes to the display</i> . 2.3. Take action to rectify unwanted changes to the display.
3. Maintain displays in line with organisational requirements and plan.	3.1. Maintain display so that it is clean and tidy. 3.2. Make additions or changes to display to ensure it consistently adheres to the visual merchandising plan. 3.3. Maintain organisation's requirements for visual merchandising in the display.
4. Contribute to the visual merchandising standards of the organisation.	4.1. Interpret visual merchandising standards of the organisation. 4.2. Identify opportunities for improving visual merchandising standards. 4.3. Make contributions to the visual merchandising standards as appropriate.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- artistic interpretation skills to create displays according to visual merchandising standards
- communication skills to share ideas
- creative thinking skills to generate ideas for improving visual merchandising standards
- literacy skills to interpret visual merchandising manuals

- observation skills to identify damage to displays or deviations from visual merchandising standards
- practical skills to maintain and update displays according to the visual merchandising plan

Required knowledge

- basic design principles
- basic principles of visual merchandising
- work health and safety (WHS) requirements relating to monitoring displays
- organisation's visual merchandising principles
- resources required to implement visual merchandising plans
- procedures for safe use of tools, equipment and materials used in visual merchandising displays

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- interprets and identifies the design requirements of a visual merchandising plan
- monitors the display closely and completes regular maintenance to ensure it meets the requirements of the visual merchandising plan and the organisation's visual merchandising standards
- contributes appropriately to the ongoing development of the organisation's visual merchandising standards.

Context of and specific resources for assessment

Assessment must ensure access to:

- a real or simulated retail visual merchandising work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - store visual merchandising standards.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- customer feedback
- answers to questions about specific skills and knowledge.

Guidance information

Holistic assessment with other units relevant to the industry sector,

for assessment workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Design requirements

may include:

- colours used
- functionality
- layout of display
- location of display in store
- merchandise for display
- size of display.

Resources required may include:

- fixtures and fittings
- lights
- materials
- people
- supports
- time.

Factors that may affect the plan may include:

- availability of display stands and structures
- availability of staff
- budget requirements
- merchandise availability
- store promotions
- time requirements.

Visual merchandising plan may include:

- display location
- retail image
- store plan and design.

Damage or changes to the display may include:

- changes in the appearance of the display
- damage to fixtures, fittings or display supports
- damage to items on display.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Review the image of the store.	1.1. Analyse the <i>components of the store image</i> . 1.2. Access and analyse relevant <i>store documentation</i> in relation to store image. 1.3. Promote the store image in an appropriate manner.
2. Research market demands for the store.	2.1. Select an <i>appropriate area for research</i> of market demands. 2.2. Use appropriate <i>market research techniques</i> according to <i>store policy</i> . 2.3. Plan market research according to store policy and procedures. 2.4. Collect, analyse and present <i>data</i> in an appropriate manner.
3. Profile the store's customers.	3.1. Research the demography of the store's <i>customers</i> . 3.2. Develop a demographic <i>profile</i> . 3.3. Access information about <i>changing trends</i> and relate to <i>customer demands</i> .
4. Implement methods to attract customers to store.	4.1. Access and analyse information about the customer. 4.2. Generate <i>ideas</i> to develop <i>methods for attracting customers</i> . 4.3. Select and develop a suitable idea in collaboration with others in the organisation. 4.4. Present and discuss the idea with <i>relevant personnel</i> . 4.5. <i>Evaluate</i> the idea to ensure that it meets the requirements for the target customers.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
 - carry out market research
 - generate ideas and discuss with relevant personnel through clear and direct communication

- ask questions to identify and confirm requirements
- use language and concepts appropriate to cultural differences
- use and interpret non-verbal communication
- collaborate with team members
- literacy and numeracy skills to:
 - interpret store policy and procedures
 - conduct research
 - analyse data
 - generate reports

Required knowledge

- store policy and procedures in regard to:
 - accessing documentation
 - promoting store image
- market research methods
- evaluation methods
- creative thinking techniques
- techniques in interpersonal communication

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- analyses components of the store image by accessing relevant store documentation
- promotes the store image in an appropriate manner
- researches market demands using appropriate market research techniques
- accurately profiles store customers
- generates ideas for attracting customers to store
- selects and develops a suitable idea in collaboration with others
- presents and discusses idea with supervisor
- evaluates idea to ensure that it meets requirements for target customers
- implements the idea according to store policies and budgetary requirements.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures manuals
 - store documentation in relation to store image
 - market data.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- third-party reports from a supervisor
- case studies
- research reports
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Components of the store image may include:

- logo
- products
- services
- layouts
- displays
- tickets
- visual merchandising
- promotional events and themes.

Store documentation may include:

- sales reports
- customer surveys
- market research.

Appropriate areas for research

- location

may focus on:

- consumer
- product
- brand
- price
- layout
- advertising.

Market research techniques

may include:

- interviews
- observations
- surveys
- questionnaires.

Store policy may relate to:

- marketing
- market research.

Data may include:

- internal: customer orders, random surveys, complaints, returns
- external: ABS statistics, books, newspaper reports, supplier information.

Customers may include:

- new or repeat contacts
- external and internal contacts
- business customers or individuals
- customers with routine or special requests
- people from a range of social, cultural and ethnic backgrounds and with varying physical and mental abilities.

Demographic **profile** may include:

- age
- buying power
- family structures
- employment patterns
- education levels
- tourism
- mobility
- occupations
- marital status
- cultural and ethnic background
- income levels
- population size.

Changing trends may include:

- tourism
- immigration
- technology
- selling approaches

Customer demands may vary according to:

- leisure time
- environmental issues
- discount operators
- quality demands
- advances in technology.
- preference
- health factors
- age
- cultural group
- dietary issues
- price.

Ideas may be generated using techniques such as:

- product association
- brainstorming
- visualising
- telling stories
- creative writing
- lateral thinking
- mind mapping, drawings
- using prompts.

Methods for attracting customers may include:

- advertising
- seasonal promotions
- new product launches
- public relations
- publicity.

Relevant personnel may include:

- team leader
- supervisor
- manager.

Methods used to **evaluate** ideas may include:

- developing checklists
- discussing the process with colleagues or supervisors
- writing a report of the outcomes.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Develop product and service knowledge.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Identify and access sources of information on products and services.
- 1.2. Interpret information about availability, features and benefits of products and services.

- | | |
|----------------------------------|--|
| | 1.3. Compare products and services based on product information. |
| | 1.4. Identify and use opportunities to update knowledge for the product and service range. |
| 2. Respond to customer requests. | 2.1. Answer customer questions about products and services with current and accurate information. |
| | 2.2. Use questions to clarify customer information needs. |
| | 2.3. Explain product and service details using clear communication. |
| | 2.4. Source additional information when answer to customer request is unknown or refer to relevant colleagues. |
| 3. Enhance information provided. | 3.1. Identify situations where additional information may assist the customer. |
| | 3.2. Advise on alternative products or services that may meet customer needs when requested item is not available. |
| | 3.3. Recommend complementary products, specials, new lines and promotions to customers according to their needs. |

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Numeracy skills to:

- interpret pricing information.

Unit Mapping Information

No equivalent unit.

Links

Assessment Requirements for SIRXPDK001 Advise on products and services

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- access and interpret sources of information on four different products or services
- respond to four different customer inquiries for product or service information that individually or cumulatively require provision of information on all of the following:
 - features and benefits
 - price
 - alternative products or services
 - complementary products or services.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - interactions with customers
 - product or service pricing
- basic key aspects of legislation that impact provision of information for the product or service range:
 - Australian Consumer Law
 - product or service specific legislation
- interpersonal communication techniques:
 - active listening and questioning
 - communication methods which convey information clearly and concisely
- product and service information for the product or service range:
 - features and benefits
 - price
 - care and handling of products
 - availability
 - storage requirements, shelf life and use by date
 - warranties

- ingredients or materials contained in product
- origins
- alternative products and services
- complementary products and services.

Assessment Conditions

Skills must be demonstrated in a services industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- a product or service range
- sources of product information
- relevant documentation:
 - current plain English regulatory documents distributed by government regulators outlining factors that impact provision of information for the product or service range
 - price lists
 - organisational policies and procedures relevant to product and service advice
- customers; these can be:
 - customers in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXPRO007A Improve supply and distribution chains

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
Second Release	Editorial updates

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to identify, evaluate and implement ways to improve supply and distribution chains for a retail or wholesale business.

Application of the Unit

This unit applies to personnel who are responsible for identifying, evaluating and implementing ways to continuously review and improve the supply and distribution of products or services for a retail or wholesale business. It includes maintaining continuity of supply whereby inventory can meet requirements for production, sales, distribution and service commitments provided to another business or directly to the end customer.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Confirm features of specific supply chains.	1.1. Determine position of the business in the supply chain. 1.2. Analyse features and impact of <i>business relationships</i> with <i>suppliers</i> to the business. 1.3. Establish <i>benchmarks</i> of supply chain efficiency.
2. Maintain information on suppliers.	2.1. Obtain and store <i>information on suppliers</i> of products and services to a retail or wholesale business according to <i>business policy and procedures</i> . 2.2. Update and regularly review information on suppliers of products and services to a business. 2.3. <i>Store information</i> on nature and feature of business relationship with suppliers to a retail or wholesale business and report, according to confidentiality, security, and business requirements.
3. Review distribution arrangements.	3.1. Review, compare and analyse sales, customer satisfaction and performance reports. 3.2. Review factors affecting supply of retail or wholesale products and services.
4. Devise policy and procedures for distribution and supply.	4.1. Establish policy and procedures for supply and distribution to business customers and end consumers. 4.2. Establish procedures to collect and analyse information on distribution chain management.
5. Forecast future contingencies affecting supply chain management.	5.1. Analyse forecasted market demand to confirm future requirements. 5.2. Communicate forward supply needs for the business to suppliers according to policy and contract provisions. 5.3. Confirm factors affecting forward purchasing and supply arrangements. 5.4. Set standards for supply of products and services to the business in qualitative and quantitative terms. 5.5. Communicate procedures for enforcing quality of supply to the business to relevant internal and external personnel.
6. Improve supply and distribution chain	6.1. Evaluate supply chain against agreed benchmarks and overall

- effectiveness. impact on business performance.
- 6.2. Benchmark comparative performance of supply chain against best in class or competitors.
 - 6.3. Assess *factors affecting future distribution and supply* of products.
 - 6.4. Make recommendations to relevant personnel to respond to opportunities for improvements in customer supply and distribution relationships.
 - 6.5. Confirm impact of proposed improvements to supply and distribution activities against budget and operational plans.
 - 6.6. Use prevailing trading terms to enhance supply and distribution chain management.
 - 6.7. Generate reports on business relationships with suppliers to the business using available business technology and agreed measures.
 - 6.8. Complete *reports* to *relevant personnel* (internal and external to operational unit) to promote recommended implementation of improvement to supply and distribution chain.

Required Skills and Knowledge

This section describes the essential skills and knowledge and their level, required for this unit.

Required skills

- interpersonal skills to:
 - communicate forward business needs to suppliers
 - communicate procedures to relevant internal and external personnel through clear and direct communication
 - ask questions to identify and confirm requirements
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication
- literacy and numeracy skills to:
 - interpret a range of workplace documentation
 - access and maintain information on suppliers
 - generate reports and recommendations for supply and distribution chain improvement to relevant personnel
- analytical skills to collect, organising and evaluate information
- management skills to:
 - implement benchmarks of supply chain efficiency
 - devise effective policy and procedures

Required knowledge

- relevant business policy and procedures
- principles and techniques in analysis, assessment, development and implementation
- approval processes and key personnel
- supply cycle
- supply chain for business and typical supply chain models used in different industry sectors and businesses
- procedures for collecting and analysing distribution chain management
- position of the business in the supply chain
- factors affecting supply and distribution management
- work and team priorities
- current forecasts and trends
- market information and data collection
- sales plans
- principles and techniques for measuring supply chain efficiency and quality standards
- Work Health and Safety (WHS) aspects of job
- relevant commercial law and legislation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the Assessment Guidelines for this Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit Evidence of the following is essential:

- evaluates and seizes opportunities to improve supply chain for a product or service within an operational context
- identifies and understands a range of current and emerging supply chain management models
- applies tools to measure and quantify supply chain quality standards and efficiency for a retail or wholesale business
- develops clear and effective policy and procedures for wholesale or retail distribution or supply activities
- develops and implements realistic and measurable performance benchmarks for supply and distribution into a business.

Context of and specific

Assessment must ensure access to:

resources for assessment

- a retail or wholesale work environment
- relevant sources of supply chain information
- relevant documentation, such as:
 - policy and procedure manuals
 - supply and distribution reports
 - supplier records
- a range of suppliers.

Methods of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- third-party reports from a supervisor
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. ***Bold italicised*** wording in the performance criteria is detailed below.

Business relationships may be influenced by:

- due diligence requirements
- risk sharing
- market position
- planning cycles and timing
- cost and price analysis
- terms and conditions agreed
- intellectual property and technology rights
- value management
- continuous improvement
- supply chain management
- infrastructural and capital outlay requirements
- organisational systems integration and compatibility.

Suppliers may be:

- commercial companies

Benchmarks may include:

- public agencies or organisations
- governments
- community and not-for-profit organisations
- internal.
- Australian standards
- international standards
- professional standards
- industry standards
- performance indicators
- quality measures and criteria
- planning milestones and timeframes
- manufacturer and supplier standards.

Information on suppliers may include:

- representative's name and contact details
- range of products and/or services
- transaction records
- contact history
- account terms
- prices
- dispatch and shipping procedures
- records of supplier performance
- details of items supplied or returned.

Business policy and procedures may relate to:

- purchasing
- supply and distribution of products or services
- approval processes
- storage and transport of goods.

Methods used to **store information** may be:

- manual
- electronic or digital.

Factors affecting future distribution and supply of retail or wholesale products and services may include:

- merchandise availability
- transport availability
- time requirements
- budget requirements
- logistics.

Relevant personnel may include:

- manager or supervisor
- colleagues
- business or area manager
- specialist or technical personnel.

Reports may be delivered:

- verbally
- in writing

- in groups
- individually.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Monitor and maintain store security.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Implement organisational policies and procedures to ensure store security is maintained.

1.2. Monitor and review security procedures continually and act on opportunities to improve store security.

1.3. Maintain security of merchandise, cash, points of sale and

- keys.
- 1.4.Ensure store security equipment is used and in correct working order.
 - 1.5.Report matters impacting store security to relevant personnel.
 - 1.6.Document breaches of security as required.
2. Facilitate security awareness.
- 2.1.Inform team members of organisational policies and procedures for security.
 - 2.2.Provide team members with feedback on their implementation or non-implementation of security procedures.
 - 2.3.Provide team members with ongoing supervision and training to facilitate security awareness.

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Links

Assessment Requirements for SIRXRSK002 Maintain store security

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- maintain store security over three different work shifts by:
 - monitoring adherence to organisational security policies and procedures
 - responding to two occurrences of non-adherence to security policies and procedures
 - communicating security policies and procedures to one team member
 - ensuring security equipment is utilised and in correct working order
 - reporting on opportunities for improved store security.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - use of security equipment
 - suspicious customer behaviour
 - suspicious team member behaviour
 - armed robbery
 - cash and non-cash security
 - merchandise security
 - theft
 - responding to security breaches
 - reporting security risks and breaches
 - surveillance of merchandise
 - personal security
 - general store security
 - team members' security training
 - security for opening and closing premises
 - reporting problems and faults
 - security of visitors, sales representatives, contractors and vendors
 - security risks likely to endanger customers or team members

- legislation as relevant to store security and own level of responsibility:
 - privacy laws
 - Australian Consumer Law
 - reporting procedures
- impacts of security breaches on individuals and organisation:
 - emotional distress
 - financial loss
 - commercial impacts
- common security risks within the retail workplace and techniques to:
 - identify risk
 - minimise risk
- types of store alarms and security systems used in industry.

Assessment Conditions

Skills must be demonstrated in a services industry environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant equipment:
 - alarm systems
 - surveillance equipment
 - point-of-sale equipment
 - communication equipment
- relevant documentation:
 - current plain English regulatory documents distributed by government regulators legislation as relevant to store security and own level of responsibility as listed in Knowledge Evidence
 - organisational policies and procedures as listed in the Knowledge Evidence
- customers and team members; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXRSK404 Control store security

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXRSK004A Control store security.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to control store security according to organisational policy and relevant legislation.

It involves developing and implementing security procedures for the prevention of theft, ensuring the safety of all personnel in the event of a robbery, and monitoring all security procedures.

Application of the Unit

This unit applies to team members responsible for facilitating the detection and prevention of theft and stock loss and the safety and security of staff and customers in the event of robbery.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - ask questions to identify and confirm requirements
 - converse clearly and directly with staff
 - use and interpret non-verbal communication
- literacy and numeracy skills to:
 - access and interpret store policy documents
 - calculate the cost of stock loss
 - document security procedures
 - handle cash
 - maintain records
- research and analysis skills to:
 - analyse stock control data
 - develop procedures
- problem-solving skills to establish and implement stock control procedures

Required knowledge

- organisational policy and procedures that relate to the development of store procedures for:
 - security
 - detection and apprehension of thieves
 - non-cash transactions
 - cash handling
 - stock control
- principles and techniques for:
 - detecting and preventing theft
 - ensuring safety of personnel in the event of robbery
- relevant codes of practice, legislation and statutory requirements, including:
 - industry codes of practice
 - retail case law or common law
 - state laws relating to property offences
 - work health and safety (WHS) legislation

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- develops and implements security procedures to facilitate the detection and prevention of theft
- develops and implements procedures to ensure safety and security of internal and external clients in the event of robbery
- calculates, analyses and reports on the cost and potential impact of identified loss and dissipation on:
 - buying
 - ordering patterns
 - planning
 - budgeting
- develops and implements procedures for:
 - opening and closing premises
 - cash security
 - non-cash transactions
 - stock control to minimise loss and dissipation
- communicates procedures to staff and monitors implementation.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - store policy and procedures on:
 - security
 - cash handling and non-cash transactions
 - stock control, including buying, ordering, planning and budgeting
 - relevant legislation and statutory requirements
 - industry codes of practice
 - WHS legislation and codes of practice
- a team
- a range of security equipment.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of performance in the workplace
- role play
- case studies
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Security procedures may relate to:

- armed robbery
- cash and cash movement
- customers
- equipment
- events likely to endanger customers or staff
- opening and closing of premises
- premises
- records
- staff and staff property
- stock
- theft
- visitors, sales representatives and contractors.

Organisational policy and procedures in regard to:

- cash handling
- non-cash transactions
- security
- stocktaking.

Staff may include:

- full-time, part-time, casual or contract staff
- people from a range of cultural, social and ethnic backgrounds
- people with a range of responsibilities and job descriptions
- people with varying degrees of language and literacy
- small work teams

- store team.
 - cheques
 - customer refunds
 - EFTPOS and credit cards
 - gift vouchers.
 - mentoring and coaching
 - on-the-job or off-the-job training
 - posters and pamphlets
 - simulated events.
 - budgeting
 - buying
 - ordering patterns
 - planning.
 - minimising out-of-date stock
 - minimising theft
 - monitoring stock levels
 - quality control
 - stocktaking and cyclical counts.
- Non-cash transactions* may include:
- Techniques used to *communicate security procedures* may include:
- Impact on business operations* may include:
- Stock control procedures* may include:

SIRXSL001 Sell to the retail customer

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to deliver quality customer service and sell to retail customers. It requires the ability to determine customer needs, match products and services to their needs, and facilitate a sale.

This unit applies to all retail sectors and business sizes from large format stores to small independents. It applies to retail personnel at all levels who play a role in engaging with customers with the purpose of selling.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Establish customer needs.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Connect with the customer within designated response times and establish rapport.
- 1.2. Use questioning and active listening to facilitate effective two-way communication.

- 1.3. Observe and determine appropriate level of interaction based on customer verbal and non-verbal cues.
- 1.4. Determine and clarify customer preferences, needs and expectations.
2. Provide advice on products and services.
 - 2.1. Use product and service knowledge to tailor options to specific customer needs, and offer alternatives when product is unavailable.
 - 2.2. Clearly explain and promote product and service features and benefits where relevant.
 - 2.3. Advise on promotional events where relevant.
 - 2.4. Provide additional information to address customer questions and objections.
 - 2.5. Offer comparisons to competitor product or service range as required.
 - 2.6. Collaborate with the customer to determine product or service option most suited to their needs.
 - 2.7. Take opportunities to upsell and cross sell products and services that enhance customer request and maximise profitability of sale.
3. Facilitate the sale of products and services.
 - 3.1. Select and use appropriate techniques to close sale.
 - 3.2. Direct the customer to designated point-of-sale and process sale, as required, according to organisational procedures.
 - 3.3. Farewell customer on leaving, and invite to return.
 - 3.4. Provide any required after sales service according to organisational procedures.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

- Reading skills to:
- interpret:
 - detailed in-house and supplier product information documents
 - plain English documents that outline organisational customer service policy and procedures.
- Numeracy skills to:
- interpret basic fee information from in-house documents and complete basic pricing calculations.
- Problem-solving skills to:
- respond to customer objections and provide appropriate solutions to satisfy customer needs.
- Technology skills to:
- use technologies equipped with search functionality and information systems to source product and service information.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXSL001 Sell to the retail customer

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interact with four different retail customers to initiate and close the sale of different retail products or services
- demonstrate the following during the above customer interactions:
 - appropriate communication
 - establishment and clarification of customer needs, wants and expectations
 - product and/or service knowledge
 - appropriate sales approach to sell benefits and features of products and/or services
 - overcome objections and close sales
 - upsell and/or cross sell additional products and/or services that complement the sale
 - promotion of customer loyalty and repeat sales.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- appropriate body language for customer service
- basic principles of positive customer service and sales
- open and closed questioning techniques related to the sale of product and services
- verbal and non-verbal cues indicating customer understanding of information
- techniques for effective communication with customers of diverse backgrounds:
 - cultural diversity
 - special needs
- sales techniques:
 - opening techniques
 - recognising buying signals
 - strategies to focus customer on specific products and services
 - selling add-ons and complementary products
 - overcoming customer objections
 - closing techniques

- primary components of consumer protection laws that relate to selling products and services, especially organisational responsibility for supplying products and services as described or substituting suitable products and services when unable
- primary components of privacy law, and actions that retail business must take to protect privacy of customer information
- for the specific retail sector:
 - professional service standards and protocols for retail industry personnel
 - attitudes and attributes expected by the retail industry to work with customers
 - different customer service needs and expectations
- for the particular retail organisation:
 - product and service knowledge:
 - product and service range offering
 - product specifications, features and benefits
 - designated response times for providing customer service
 - customer service procedures including recording of and storing customer details.

Assessment Conditions

Skills must be demonstrated in a retail environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- relevant documentation:
 - organisational policies and procedures for:
 - customer service
 - sale of products and services
 - resolving customer complaints
 - collection and storage of customer details
 - organisational product information and price lists
 - supplier brochures, information sheets and price lists
 - promotional activity information
 - current plain English regulatory documents distributed by government regulators for:
 - consumer protection law
 - privacy law
- customers with whom the individual can interact to sell products and services; these can be:
 - individuals in an industry workplace, or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation

- assessment activities that allow the individual to:
 - work within commercial speed, timing and productivity
 - manage tasks and contingencies in the context of the job role.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Follow point of sale work systems.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Open and close point-of-sale terminal at designated times and according to organisational procedures.
- 1.2.Clear point-of-sale terminal and transfer cash.
- 1.3.Handle cash according to organisational policies and

- procedures.
- 1.4.Maintain supplies of change at agreed levels in point-of-sale terminal to agreed levels.
 - 1.5.Maintain adequate supplies of consumables.
2. Process point-of-sale transactions.
 - 2.1.Identify transaction type and required procedure to be followed.
 - 2.2.Correctly interpret sale price information.
 - 2.3.Make accurate calculations for pricing and collection of payment.
 - 2.4.Enter accurate sale information into point-of-sale equipment.
 - 2.5.Confirm price to customer and check customer payment against sale value.
 - 2.6.Provide correct change for cash payments.
 - 2.7.Identify transaction errors, follow procedures for resolution and complete accurate records.
 3. Complete sales.
 - 3.1.Generate and complete documentation associated with the sale.
 - 3.2.Confirm and process any purchase follow up activities.
 - 3.3.Acknowledge and thank customer in line with organisational policy.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Numeracy skills to:	<ul style="list-style-type: none"> • interpret numerical information from various sources and calculate accurately with or without the use of a calculator. • measure or estimate quantities to calculate costs. • calculate percentage discounts.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SIRXSL002 Follow point-of-sale procedures

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- follow procedures for set up, maintenance and close of point-of-sale area/terminal on three different occasions
- perform three point-of-sale transactions for each of the following:
 - cash sales
 - non-cash sales
- perform three point-of-sale transactions for each of the following:
 - refunds
 - exchanges
- make six accurate financial calculations relating to product pricing that individually or cumulatively involve:
 - multiple products
 - products of varying prices
 - products with percentage discounts
- follow procedures to complete four sales that require post purchase activity.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for:
 - exchanges
 - refunds
 - lay-by
- basic key aspects of legislation that impact point-of-sale activities:
 - Australian Consumer Law
- features of products sold by the organisation
- functions and procedures for operating point-of-sale equipment:
 - opening and closing
 - clearance of terminal and transference of tender

- recording takings
- consumables required by system
- security
- cash handling procedures:
 - counting cash
 - handling cash floats
 - change required, denominations of change and tendering change
 - security
- procedures for non-cash transactions:
 - credit cards
 - EFTPOS
 - vouchers
- types of purchase follow up activities and associated organisational policies and procedures:
 - placing of orders
 - delivery
 - issuing of invoices
 - issuing of receipts
 - wrapping and packing.

Assessment Conditions

Skills must be demonstrated in a service industries environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- organisational policies and procedures for point-of-sale activities
- current plain English regulatory documents distributed by government regulators outlining key aspects of legislation that impact point-of-sale activities as listed in the Knowledge Evidence
- point-of-sale equipment and consumables
- financial transaction documentation for non-cash sales
- cash
- assessment activities that allow the individual to work with commercial speed, timing and productivity.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SIRXSL303 Build relationships with customers

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXSL004A Build relationships with customers.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to develop and maintain expert knowledge to provide accurate product information to customers, including post-sales support.

It also covers communication, analysis and sales techniques to plan and implement sales presentations, build positive relationships with customers, and resolve customer complaints to ensure positive business outcomes.

Application of the Unit

This unit applies to senior sales personnel.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element

Performance Criteria

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

1. Develop relationships with customers.

- 1.1. Establish rapport with *customers* and express genuine interest to *clarify customer requirements* and enhance *outcomes*.
- 1.2. Maintain *professional ethics* with the customer to promote store image and credibility.
- 1.3. Identify *customer needs and preferences* to maximise sales opportunities.
- 1.4. Maximise sales opportunities by use of add-on and complementary *sales techniques*.
- 1.5. Give customer space and time to evaluate purchase decision, while using time to maximum advantage for customer and store.
- 1.6. Use effective methods to close sales.

2. Apply expert knowledge.

- 2.1. Provide customer with accurate information regarding product and service appraisals, correct statements and warranties according to *legislative requirements*.
- 2.2. Provide detailed knowledge of supplier or manufacturer information according to customer needs and commercial confidentiality guidelines.
- 2.3. Provide evaluation of product range, demonstrate features and benefits of products or services where appropriate, and make recommendations to the customer to maximise sales potential.
- 2.4. Maximise customer interest in product or service through price negotiation where applicable and offer payment and credit options according to *store policy*.
- 2.5. Calculate prices and discounts according to pricing determinants and store policy.

3. Provide post-sales support.

- 3.1. Provide evidence of ongoing support as sale is concluded.
- 3.2. Explain *back-up service* and reassure customer according to legislative requirements and store policy.
- 3.3. Provide customer with store or salesperson's contact details to ensure customer follow-up according to store policy.
- 3.4. Enter customer and transaction details into *customer database* according to store policy.

4. Plan sales presentations.
 - 4.1. Plan presentation to complement *product characteristics*.
 - 4.2. Select client group according to product characteristics and store merchandising policy.
 - 4.3. Access *promotional materials* where required and distribute to client group.
 - 4.4. Select and prepare a range of products or services for presentation to reflect store image, demographics and merchandising plan.
5. Implement sales presentations.
 - 5.1. Ensure sufficient numbers of adequately briefed support staff, where required, for presentation.
 - 5.2. Apply communication skills to effectively create interest, focus attention, and encourage customer interaction with individuals or groups.
 - 5.3. Demonstrate products or services to create a buying environment.
 - 5.4. Measure results of sales presentation according to predetermined criteria, review overall performance and results, and apply information to enhance future *sales presentations*, according to store sales policy.
6. Maintain and use a customer database.
 - 6.1. Maintain customer confidentiality as required by store policy and legislative requirements.
 - 6.2. Develop and maintain accurate *customer records* and store securely according to store policy and procedures.
 - 6.3. Identify and follow up regular customers according to store marketing policy.
 - 6.4. Use customer records to advise customers on products and services of possible interest.
 - 6.5. Implement *customer loyalty schemes* where required according to store promotional activities.
7. Deal with difficult customers.
 - 7.1. Acknowledge customer complaints and problems and reassuringly support difficult customers to produce positive outcome.
 - 7.2. Use questioning and active listening to encourage customer to verbalise issue and minimise customer frustration.
 - 7.3. Develop customer's confidence in the candidate and product or service to promote long-term trust and commitment to store.
 - 7.4. Establish mutually acceptable resolution of complaint.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to resolve conflict
- literacy and numeracy skills to:
 - access and read relevant product information
 - calculate prices and discounts
 - read store policies and procedures
 - record client and sales information
- sales skills to apply selling techniques, including:
 - add-ons and complementary sales
 - identifying buying signals
 - opening and closing techniques
 - overcoming customer objections
 - presenting product information
 - promoting enhanced sustainability features of selected products and services
 - using strategies to focus customer on specific merchandise

Required knowledge

- customer types and needs, including:
 - customer buying motives, customer behaviour and cues
 - functional and psychological needs
 - individual and cultural differences, demographics, lifestyle and income
- work health and safety (WHS) requirements relating to:
 - manual handling
 - plant and equipment
 - hazardous substances and dangerous goods
 - workers compensation
- relevant industry codes of practice, legislation and statutory requirements relating to building relationships with clients
- store policies and procedures in regard to:
 - efficient use of resources
 - establishing, maintaining and using customer records
 - methods of maintaining customer confidentiality and secure storage of customer details
 - price negotiation and payment and credit options
 - pricing, including GST requirements
 - resolving customer complaints
 - updating and maintaining customer mailing lists
- store and area merchandise and service range

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- applies:
 - detailed knowledge of manufacturer and supplier supply, back-up service and warranty information to enhance customer support
 - industry codes of practice, relevant legislation and statutory requirements in regard to selling products and services
 - store policies and procedures in regard to selling products and services, dealing with customers, planning and implementing sales presentations, and providing after-sales support
- develops customer commitment to store and builds return customer base by establishing rapport and relationship with customer, maintaining professional ethics, and discerning customer buying motives, requirements and preferences
- establishes, records and maintains customer records and details, maintaining customer confidentiality, ensuring secure storage of data, and using customer records to maximise customer interest and create a buying atmosphere
- evaluates personal or team sales performance to maximise future sales
- maximises sales opportunities by using effective selling techniques, applying detailed product knowledge, and using an appropriate sales approach to sell the benefits of products, overcome objections and close sales
- plans, prepares and conducts sales presentations and briefs
- supports staff where required, to create a buying environment and maximise sales performance
- resolves customer complaints by acknowledging problems and supporting customer to produce positive outcomes and obtain mutually acceptable complaint resolution
- uses effective questioning, listening and observation skills to determine customer requirements.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant sources of product information
- relevant documentation, such as:

- policy and procedures manuals
- industry codes of practice and relevant legislation
- WHS legislation and codes of practice
- a range of customers with different requirements
- an appropriate range of products and equipment
- a customer database system.

Method of assessment A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- customer feedback
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the individual, accessibility of the item, and local industry and regional contexts) may also be included.

Customers may include:

- a single customer, couples, families or groups
- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Clarification of customer requirements may be achieved by:

- active listening
- appropriate questioning
- empathy
- observation
- reassurance and confirmation.

Outcomes may include:

- credibility of store
- customer commitment

- Maintaining *professional ethics* with the customer may include:
- customers' trust
 - increased return customer base.
 - confirmed appraisals of products and services
 - honesty
 - positive statements.
- Customer needs and preferences* may include:
- brand
 - customer physical needs
 - price
 - product characteristics
 - product type
 - size.
- Sales techniques* will include:
- add-on and complementary products and services
 - selling up or down
 - suggestive selling
 - variety of methods of closing sales.
- Legislative requirements* may include:
- environmental protection legislation
 - health and welfare law specific to local government, state and federal legislation
 - liquor laws
 - WHS
 - pricing procedures, including GST requirements
 - privacy laws
 - sale of second-hand goods
 - tobacco laws
 - Australian Consumer Law and fair trading Acts
 - transport, storage and handling of goods.
- Store policy* and procedures in regard to:
- dealing with difficult customers
 - maintaining and using client records
 - promotional, marketing, discounting and reward programs
 - resolving customer complaints
 - selling products and services.
- Back-up service* may include:
- delivery specifications
 - financial products and services
 - installation
 - returns policies
 - technical support
 - warranties and guarantees.
- Customer database* may be:
- computer-based
 - manual.

- Product characteristics*** may include:
- features and benefits
 - price range
 - supplier or manufacturer information
 - target group.
- Promotional materials*** may include:
- brochures
 - business cards
 - pamphlets
 - posters
 - promotional merchandise
 - vouchers.
- Sales presentations*** may be:
- at client site
 - in-house
 - verbal
 - visual.
- Customer records*** may include:
- anniversaries and special dates
 - details of items bought or returned
 - name and contact details
 - personal preferences
 - transaction records.
- Customer loyalty schemes*** may include:
- credit or discount facilities
 - customer clubs
 - customer reward schemes
 - special offers.

SIRXSL406 Manage sales and service delivery

Modification History

The version details of this endorsed unit are in the table below. The latest information is at the top.

Release	Comments
First Release	This is a revised unit, based on and equivalent to SIRXSL005A Manage sales and service delivery.

Unit Descriptor

This unit describes the performance outcomes, skills and knowledge required to monitor, maintain and improve sales and service delivery. It involves market research, developing new markets, and marketing products and services within the culture of the overall store policy.

The unit requires the team member to develop and maintain excellence in sales and service delivery by ensuring the provision of a well-resourced working environment for fellow staff. The team member is required to proactively pursue the continuous improvement of operations by seeking, evaluating and reporting feedback from customers and colleagues on sales and service delivery and working conditions; and locating and negotiating adequate supply of stock and other necessary resources according to store policy.

Application of the Unit

This unit applies to staff with managerial responsibility.

Licensing/Regulatory Information

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of endorsement.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements and Performance Criteria

Element	Performance Criteria
Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
1. Establish and respond to customer requirements.	<p>1.1. Plan and develop strategies to enhance provision of customer service according to store policy.</p> <p>1.2. Research and <i>analyse customer needs</i> in regard to local geographic and cultural issues.</p> <p>1.3. Resolve <i>customer</i> complaints referred by <i>staff</i>, according to store policy.</p> <p>1.4. Monitor sales and service targets and plans to ensure that customer requirements are met, and take appropriate remedial action if required.</p> <p>1.5. Encourage staff to take responsibility for meeting customer requirements.</p> <p>1.6. Seek and use feedback from customers to improve future operations.</p>
2. Monitor, maintain and improve sales and service delivery.	<p>2.1. Implement, communicate and review <i>policies and procedures for sales and service delivery</i> on a regular basis.</p> <p>2.2. Maintain adequate <i>resource</i> allocation for client service provision in line with <i>store policy and procedures</i>.</p> <p>2.3. Ensure sales and service targets and plans are consistent with quality and functional <i>specifications</i>.</p> <p>2.4. Communicate sales and service targets and plans to <i>relevant personnel</i> according to implementation schedules.</p> <p>2.5. Provide <i>feedback</i> to staff on operations and outcomes.</p> <p>2.6. Take corrective measures to minimise <i>factors that may cause disruption to operations</i>.</p> <p>2.7. Monitor and evaluate effectiveness of corrective actions for future operational planning.</p> <p>2.8. Ensure current and accurate <i>records</i> on sales are available to authorised personnel.</p>

- 2.9. Interpret and act on relevant reports as required.
3. Negotiate supply of goods.
- 3.1. *Negotiate* and implement *arrangements with suppliers*, according to store policies and procedures, and communicate to relevant personnel.
- 3.2. Authorise and communicate special pricing arrangements and customer payment agreements to relevant staff and management personnel according to store policy.
- 3.3. Monitor records of suppliers and stock for accuracy and legibility and take appropriate action where necessary.
- 3.4. Identify and communicate market factors affecting *supply* to relevant personnel.
- 3.5. Convey complete and accurate records of negotiations and agreements to appropriate personnel within designated time limits.
- 3.6. Take immediate corrective action where potential or actual *problems with supply* are indicated.
- 3.7. Identify and develop new suppliers to maintain and improve sales and service delivery.
4. Provide productive work environment.
- 4.1. Establish and maintain a sufficient supply of resources of the necessary quantity and quality to meet customer requirements.
- 4.2. Regulate and monitor access to and use of resources for maximum efficiency and sustainability.
- 4.3. Maintain staff working conditions to meet requirements of *relevant legislation* and store policy.
- 4.4. Ensure that maintenance frequency and use of equipment conform to recommended schedules and procedures.
- 4.5. Replace, repair or adapt resources that do not meet requirements as soon as practicable and with minimum disruption to work activity.
- 4.6. Communicate *recommendations* for improving conditions to relevant personnel within designated timeframe.
- 4.7. Maintain complete, accurate records and make them available to authorised personnel.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication and interpersonal skills to:
 - ask questions to identify and confirm requirements
 - communicate with staff through clear and direct communication
 - negotiate with suppliers and customers
 - present information
 - share information
 - use and interpret non-verbal communication
 - use language and concepts appropriate to cultural differences
- literacy and numeracy skills to:
 - calculate costs and pricing arrangements
 - document results
 - estimate volume
 - interpret and maintain data
 - prepare reports
 - research, analyse and interpret a broad range of written material
- technical skills to use new technology

Required knowledge

- customer demand and market trends
- principles and techniques for:
 - interpersonal communication
 - purchasing and supply specifications
 - stock control
- product quality standards
- range and availability of new products and services, especially those with enhanced sustainability features
- relevant industry codes of practice applicable to the sales environment
- relevant legislation and statutory requirements, including work health and safety (WHS) requirements applicable to the sales environment
- store merchandise and service range
- store merchandising plan
- store policies and procedures in regard to:
 - efficient and sustainable use of resources
 - pricing procedures, including GST requirements
 - quality assurance and control
 - sales and service delivery
 - stock maintenance and control
 - supply specifications

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- maintains, monitors and evaluates sales and service delivery
- communicates sales and service targets and plans and provides feedback on operations and outcomes to relevant personnel according to store policy
- proactively improves sales and service delivery operations
- interprets and maintains data on sales and services delivery
- negotiates and arranges supply of goods according to store policy and procedures
- authorises pricing and payment agreements according to store policy and procedures
- maintains, monitors and evaluates supply of stock.

Context of and specific resources for assessment

Assessment must ensure access to:

- a retail work environment
- relevant documentation, such as:
 - policy and procedures manuals
 - sales and service delivery targets and plans
 - records of sales and service
 - legislation and statutory requirements
 - industry codes of practice
 - WHS legislation and codes of practice
- suppliers
- a team.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- observation of the candidate in the workplace
- customer feedback
- research report
- written or verbal questioning to assess knowledge and understanding
- review of portfolios of evidence and third-party workplace reports of on-the-job performance.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Methods used to ***analyse customer needs*** may be:

- qualitative
- quantitative.

Customer may include:

- customers with routine or special requests
- internal and external contacts
- new or repeat contacts
- people from a range of social, cultural and ethnic backgrounds
- people with varying physical and mental abilities.

Staff may include:

- full-time, part-time, casual or contract staff
- people from a range of social, cultural and ethnic backgrounds
- people with varying degrees of language and literacy levels.

Policies and procedures for sales and service delivery may involve:

- customer complaints
- customer service and sales training
- service standards
- staff induction
- staff presentation.

Resource may include:

- equipment and technology
- finances
- materials
- people
- time.

Store policy and procedures in regard to:

- interaction with customers
- interaction with other team members
- WHS
- quality assurance and control
- acquisition and sale of products and services.

Specifications may include:

- customer agreements
- operational means for meeting agreements
- specific functional duties within the organisation.

Relevant personnel may

- managers

- include:
- members of own or other work teams
 - supervisors.
- Feedback** may be sought and given:
- in groups
 - in writing
 - individually
 - verbally.
- Factors that may cause disruption to operations** may include:
- operational resources
 - quality of materials
 - supply.
- Records** may be:
- electronic
 - hard copy.
- Techniques used to **negotiate** with suppliers may include:
- correspondence
 - email
 - face-to-face contact
 - meetings
 - telephone.
- Arrangements with suppliers** may relate to:
- credit levels
 - delivery
 - partnerships and exclusivity
 - pricing.
- Sources of **supply** may include:
- external organisations
 - internal departments and teams
 - internal and external personnel.
- Problems with supply** may involve:
- cost
 - coverage or content
 - quality
 - quantity
 - time schedules or scales.
- Relevant legislation** may include:
- equal employment opportunity and anti-discrimination laws
 - federal, state and local legislation
 - WHS.
- Recommendations** may be communicated to:
- colleagues, specialists, staff from other departments
 - external organisations with a health, safety or environmental responsibility
 - government bodies
 - higher-level managers
 - subordinates.

SISXRES001 Conduct sustainable work practices in open spaces

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to plan and conduct work in open spaces while upholding sustainable practices. This unit requires the ability to conduct research of the current land condition, capability, uses and practices, and develop and implement strategies to achieve sustainable practices for outdoor programs and activities.

This unit applies to operation or program managers who are responsible for planning, implementing and evaluating sport, recreation or fitness programs and activities across a range of activity areas. They work autonomously with responsibility for management of resources and upholding of sustainable work practices.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes

1. Plan sustainable

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Determine opportunities and options for using open space

- activities for work in open spaces.
- within the local community.
- 1.2 Review and document relevant codes of practice and local government requirements for use of open space.
 - 1.3 Consult with colleagues and other stakeholders about issues of responsibility for environmental and social sustainability.
2. Conduct minimal impact activities.
 - 2.1 Select and use minimal impact techniques and procedures appropriate to the area.
 - 2.2 Conduct activities using positive sustainable outcomes for local communities and environments.
 - 2.3 Advise clients of appropriate behaviours in open space environments and address any unacceptable behaviours.
 3. Monitor impacts and changes.
 - 3.1 Monitor and record changes in the natural environment using appropriate technology.
 - 3.2 Collect environmental information on behalf of environmental agencies or local government as required.
 - 3.3 Advise appropriate authorities of environmental and social change promptly.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> • analyse data on conservation strategies • research usage and potential usage.
Writing skills to:	<ul style="list-style-type: none"> • develop a plan to improve efficiency while drawing on data analysis.
Learning skills to:	<ul style="list-style-type: none"> • maintain currency of information related to sustainable practices in open spaces.
Problem-solving skills to:	<ul style="list-style-type: none"> • assess threats and opportunities • compare conservation strategies and select appropriate strategies • monitor and evaluate the effectiveness of strategies and develop alternative strategies where appropriate • identify current use of resources • develop strategies to maximise efficiency of resource use.
Planning and organising skills to:	<ul style="list-style-type: none"> • work within identified timeframes and budgets • plan, implement and monitor strategies for optimal resource use

- establish criteria to evaluate open spaces.
 - apply sustainable work practices on an ongoing basis.
- Self-management skills to:

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SISXRES001 Conduct sustainable work practices in open spaces

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and conduct at least three sessions in two or more open space environments to minimise environmental impacts of sport, fitness or recreation activities
- for each of the sessions incorporate:
 - local government requirements
 - industry codes of practice
 - provision of advice to clients regarding the use of open spaces
 - management of client behaviour in open spaces
- provide feedback on the environmental impact of at least five sport, fitness or recreation activities conducted in open spaces.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legislation, regulations and land management requirements and guidelines:
 - permits in national parks or on land under control of traditional owners
 - restrictions on camp site operations and use of open fires
- global environmental issues, in particular a layperson understanding of the science associated with:
 - climate change
 - energy
 - land management
 - waste and consumption
 - water
- environmental and social impacts of sport, fitness or recreation industry in relation to global environmental issues in particular sites and communities
- practical sustainability considerations for sport, fitness or recreation operations, incorporating those related to:
 - environmentally or culturally sensitive areas and associated minimal impact practices
 - handling and disposal of waste, including human waste

- industry codes of practice
- use of water sources
- minimal impact techniques and procedures in relation to:
 - activity-specific guidelines
 - energy use
 - group size
 - interaction with wildlife
 - local customs and courtesies
 - noise
 - setting of camps
 - souveniring
 - use of tracks
 - waste disposal
- biophysical and socio-cultural elements in an environment and the relationship between them
- information collection techniques for monitoring environmental and social impact, including what is observed and measured and how specific data is recorded.

Assessment Conditions

Skills must be demonstrated in:

- an outdoor space that could be used for sport, recreation or fitness work purposes.

Assessment must ensure access to:

- areas or locations containing natural systems or components of these systems
- resources and information relevant to the natural system
- relevant information impacting on conservation of natural systems
- relevant stakeholder and local government information regarding the use of open spaces
- industry code of ethical practice
- organisational documentation relevant to open space planning.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SITGDE001 Interpret aspects of local Australian Indigenous culture

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to share information about a specific local Australian Indigenous culture. It is this localised focus that distinguishes this unit from SITGDE007 Research and share information on Australian Indigenous cultures.

The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of local cultural knowledge, appropriate behaviour and local community consultation.

This unit applies to those people who are able to share local Australian Indigenous cultural knowledge with others. They may work at many different levels, as cultural knowledge has no direct relationship with organisational levels of responsibility.

The local Australian Indigenous cultural knowledge necessary to achieve competency in this unit may only be accessible to those individuals who identify as elders or who are authorised by local elders on behalf of their communities.

There are many different Indigenous language groups in Australia, therefore the focus of cultural interpretation will vary and should ultimately be decided in consultation with elders on behalf of the local community.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Guiding

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Consult with local Australian Indigenous community.
2. Share information about local Australian Indigenous culture.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1.Liaise with community members regarding tourism activities, and ways in which cultural information can be used to make these activities authentic to the local area.
- 1.2.Prepare for and conduct activities according to the needs and wishes of the local Australian Indigenous community.
- 1.3.Identify potential conflicts with the local Australian Indigenous community and seek solutions.
- 2.1.Share an appropriate level of information about aspects of Australian Indigenous culture with customers.
- 2.2.Advise customers about culturally appropriate behaviour.
- 2.3.Show respect for Australian Indigenous cultures and values through appropriate behaviour during activities.
- 2.4.Show customers traditional and contemporary practices when appropriate.
- 2.5.Use local language and share with customers when appropriate.
- 2.6.Invite customers to actively participate and share in the Australian Indigenous cultural experience when appropriate.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Writing skills to:	<ul style="list-style-type: none">• make notes about Australian Indigenous culture, to share with others.
Learning skills to:	<ul style="list-style-type: none">• develop own knowledge and understanding of Australian Indigenous cultures.
Teamwork skills to:	<ul style="list-style-type: none">• work effectively with the local Australian Indigenous community or with those who are authorised by elders on behalf of the community with regard to the preparation of appropriate information and activities.

Unit Mapping Information

SITTGDE101 Interpret aspects of local Australian Indigenous culture

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=68c40a93-e51d-4e0f-bc06-899dff092694>

Assessment Requirements for SITTGDE001 Interpret aspects of local Australian Indigenous culture

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- liaise with local Australian Indigenous community elders or persons approved by relevant local Indigenous community elders on at least three occasions and in a culturally appropriate manner to identify acceptable protocols for sharing aspects of local Indigenous culture with others
- share information on aspects of local Australian Indigenous culture with customers on at least three different occasions and at three different sites.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- culturally acceptable practices and protocols within a specific local Australian Indigenous community that address:
 - the type of information that can be shared
 - who can give information
 - who can receive the information
 - what activities are appropriate
 - who should be involved in activities
- aspects of a specific local Australian Indigenous culture as appropriate to specific community:
 - art
 - bush foods and medicine
 - dance
 - music
 - storytelling
 - tools and implements
- copyright and intellectual property issues associated with providing information about local Australian Indigenous cultures.

Assessment Conditions

Skills must be demonstrated in an Australian Indigenous tourism environment. This can be:

- an industry workplace where research is conducted and shared on Australian Indigenous cultures
- a simulated activity involving the researching and sharing of information on Australian Indigenous cultures.

Assessment must ensure access to:

- sites where Indigenous cultural experiences take place:
 - cultural centre
 - gallery
 - natural setting
- involvement of relevant local Indigenous community elders or persons approved by relevant local Indigenous community elders in the assessment process
- customers with whom the individual can interact; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in the tourism industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTGDE002 Work as a guide

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to work effectively as a guide. It covers key legal, ethical, safety, environmental and professional development issues that guides must consider in their day-to-day work.

This unit applies to guides who may work across multiple industry sectors as employees, volunteers, or independent contractors. They may operate within a single site, or in a particular city, region or tourist precinct, but often move across sites, cities and regions.

Guides apply discretion and judgement within established organisational procedures, and when guiding a tour or activity they take a lead role without supervision. Sometimes guides are the owner-operators of small tour operations.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Guiding

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Plan guiding activity.

2. Communicate with tourism industry operators.

3. Guide tours or activities.

4. Develop guiding skills and knowledge.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1. Identify key guide information sources and contacts.

1.2. Review required roles and responsibilities for prospective guiding activity.

1.3. Plan resource, labour and logistical aspects of the guiding activity.

1.4. Use industry knowledge and guide networks to enhance the quality of guiding services provided to customers.

2.1. Liaise with internal and external stakeholders to organise all aspects of the guiding activity.

2.2. Achieve mutual understanding and agree on details relevant to guiding activities.

2.3. Provide accurate information and explanations about customer requirements and special requests.

2.4. Identify nature and key facts of operational problems and provide appropriate solutions in consultation with tourism operator.

3.1. Conduct guiding activities according to legal, industry and safety requirements.

3.2. Actively participate in risk assessment as an integral part of work activities.

3.3. Take account of ethical considerations for particular contexts.

3.4. Support sustainable work practices.

4.1. Identify and use opportunities to update knowledge and skills required by guides.

4.2. Maintain knowledge of technologies used by guides.

4.3. Identify and access sources of guide support when required.

4.4. Share knowledge with colleagues to enhance quality of service provided to customers.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">• read and interpret industry codes of practice and regulations.
Writing skills to:	<ul style="list-style-type: none">• complete risk assessment documentation.
Problem-solving skills to:	<ul style="list-style-type: none">• evaluate legal, ethical, safety and sustainability issues and requirements for guiding activities• make decisions on appropriate behaviours and actions.
Initiative and enterprise skills to:	<ul style="list-style-type: none">• make contingency plans when required, to deal with unexpected circumstances.
Teamwork skills to:	<ul style="list-style-type: none">• work effectively with industry operators.

Assessment Requirements for SITTGDE002 Work as a guide

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and conduct three guiding activities with different customers or groups which involve:
 - liaising with one or more tourism industry operators
 - identifying potential operational problems and appropriate solutions
 - incorporating client requirements and special requests
- undertake a full risk assessment for each of the above guiding activities that:
 - identifies inherent risks
 - identifies hazards
 - reports on hazards
- demonstrate how legal, ethical, safety and sustainability requirements have been met in the planning of each of the above guiding activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- interrelationship between tour operations and wholesaling sectors and the role of guiding in the tourism industry
- cultural considerations in dealing with industry colleagues, customers, suppliers and local communities
- roles and responsibilities for guides, and the specific roles of each of these guides:
 - adventure guides
 - city hosts
 - driver guides
 - meet and greet guides
 - site guides
 - tour guides
 - tour managers
- roles and services provided to guides by peak guiding bodies and industry associations to assist in developing guiding knowledge
- industry and legal compliance requirements that affect guiding operations:

- consumer protection laws
- occupational licensing and industry accreditation
- contents of various guiding codes of conduct or practice and the impacts of non-compliance
- public liability and the guide's duty of care
- environmental laws
- permit requirements for operating in protected areas
- Queensland Tourism Services Act 2003 requirements for guides when working in Queensland
- work health and safety
- different types of technologies and their uses:
 - presentation technologies
 - radio-frequency identification (RFID) codes for handheld devices
 - social networking
- opportunities to update own knowledge as a guide:
 - familiarisation tours
 - industry seminars
 - participation in industry accreditation schemes
 - participation or membership in professional guide associations
 - research
 - social networking
 - training courses
- tourism operators that work in collaboration with guides:
 - inbound tour operators
 - other guides
 - retail outlets:
 - factory outlets
 - opal or souvenir outlets
 - tax free stores
 - suppliers of any tourism product or service that is a component of the touring itinerary:
 - accommodation providers
 - airlines
 - attraction or theme parks
 - coach companies
 - cultural sites
 - event venues
 - food and beverage outlets
 - tour operators and cruise operators
- safety issues that affect guiding operations in particular contexts, particularly those related to customer safety in different environments

- ethical considerations for guides:
 - compliance with industry codes of conduct
 - cultural considerations
 - dealings with local communities
 - dealings with Indigenous communities
 - provision of services as promoted or confirmed
 - relationships with industry colleagues, customers and suppliers
 - avoiding unconscionable conduct
- sustainable work practices includes considerations for:
 - economic:
 - business profitability
 - environmental:
 - minimal impact practices
 - waste minimisation
 - social:
 - host community interactions
 - Australian Indigenous contexts.

Assessment Conditions

Skills must be demonstrated in an operational guiding environment. This can be:

- a real guiding activity
- a simulated industry environment or activity.

Assessment must ensure access to:

- environments in which guiding activities take place:
 - tourist attractions
 - visitor sites
 - on board various forms of transportation
- organisational specifications:
 - codes of conduct
 - procedures for liaising with tourism industry operators that are involved in the operation of guided activities
 - running sheets for tours and activities
 - incident report templates
 - passenger lists
 - risk assessment template
- microphone
- props and signage

- customer groups of a size and nature that reflect the commercial environment in which the guide operates
- tourism industry operators with whom the individual can interact; these can be:
 - those involved in organising a tour or activity who interact with the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities set up for the purpose of assessment in an operational touring context
- participants undertaking a tour or activity for whom the individual can act as guide; participants can be:
 - those participating in a tour or activity who interact with the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities set up for the purpose of assessment in an operational touring context.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTGDE007 Research and share general information on Australian Indigenous cultures

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to research and share information about Australian Indigenous cultures in an appropriate way. It focuses on information that is widely available to the general community.

The unit recognises that there is no single Australian Indigenous culture and emphasises the importance of culturally appropriate behaviour and local community consultation.

This unit applies across many industry sectors. It is particularly relevant to cultural tourism operations and to individuals who work in customer service and guiding roles with differing levels of responsibility. Information could apply to Australian Indigenous communities and cultures across Australia, or to a specific Australian Indigenous community and culture.

Tour guides, residing anywhere in Australia, are required to undertake training and assessment prescribed by Parks Australia to guide within Kakadu and Uluru–Kata Tjuta National Parks in the Northern Territory.

When working in Queensland, all guides, regardless of their place of residence, are subject to the Queensland Tourism Services Act 2003.

No other occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Research general information on Australian Indigenous cultures.
2. Share general information on Australian Indigenous cultures.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Identify key information sources on Australian Indigenous cultures.
- 1.2. Select and use formal and informal research techniques to access current, accurate and relevant information about Australian Indigenous cultures.
- 1.3. Obtain information in a culturally appropriate way.
- 2.1. Identify and use Australian Indigenous interpreters where possible.
- 2.2. Provide guidance to customers on appropriate behaviour when interacting with Australian Indigenous people.
- 2.3. Share clear and accurate information on Australian Indigenous cultures to enhance cultural awareness, ensuring acknowledgment of the diversity of cultures.
- 2.4. Share information in a manner respectful of local community values and customs.
- 2.5. Answer questions according to community wishes about what information can be shared.
- 2.6. Respond to culturally inappropriate behaviour by customers to minimise the likelihood of causing offence.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Writing skills to:

- make notes about Australian Indigenous culture to share with others.

Learning skills to:

- develop own knowledge and understanding of Australian Indigenous cultures.

- Teamwork skills to:
- work respectfully with Australian Indigenous interpreters and Australian Indigenous communities or with those who are authorised by elders on behalf of the community with regard to the preparation of appropriate information and activities.

Assessment Requirements for SITTGDE007 Research and share general information on Australian Indigenous cultures

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- liaise with relevant Australian Indigenous community elders or persons approved by relevant Indigenous community elders in a culturally appropriate manner to identify acceptable protocols for sharing knowledge on local Indigenous culture with others
- using relevant sources of information listed in the knowledge evidence, undertake research on Australian Indigenous culture relevant to the regional context to develop current knowledge of:
 - art and music
 - bushcraft, bush food and bush medicine
 - contemporary Australian Indigenous life and culture
 - cultural centres, galleries and natural sites
 - dance
 - history, pre- and post-European contact
 - land ownership
 - tools and implements
 - traditional life and culture
- share information on aspects of local Australian Indigenous culture with customers on at least three different occasions and using at least three different locations.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information on Australian Indigenous cultures:
 - artworks
 - events
 - exhibitions
 - experiences (of self or others)
 - films
 - images
 - internet

- music
- performances
- Indigenous people
- traditional owners
- presentations
- professional associations
- printed texts
- protocols for researching and sharing information about Australian Indigenous cultures that address:
 - the type of information that can be shared
 - who can give information
 - who can receive the information
 - what activities are appropriate
 - who should be involved in activities
- fundamental Australian Indigenous intellectual property issues:
 - strong links between intellectual property and cultural heritage
 - issues associated with the reproduction and sale of Indigenous cultural works.

Assessment Conditions

Skills must be demonstrated in an Australian Indigenous tourism environment. This can be:

- an industry workplace where research is conducted and shared on Australian Indigenous cultures
- a simulated activity involving the researching and sharing of information on Australian Indigenous cultures.

Assessment must ensure access to:

- cultural sites, galleries or natural settings
- information sources verified or supported by Indigenous communities
- involvement of relevant local Indigenous community elders or persons approved by relevant local Indigenous community elders in the assessment process
- customers with whom the individual can interact; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTGDE008 Prepare specialised interpretive content on flora, fauna and landscape

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to research and critically analyse specialised information on flora, fauna and landscape to develop interpretive themes and messages. It highlights the need for ongoing research to update and expand knowledge.

This unit applies across many industry sectors and has particular application to guides who work in national parks, or who conduct tours with a strong focus on the natural environment. In this context, guides work independently to research and prepare interpretive content.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Assessment Requirements for SITTGDE008 Prepare specialised interpretive content on flora, fauna and landscape

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- prepare three different presentations, with each presentation:
 - using at least four credible and reliable sources of information
 - demonstrating knowledge of flora, fauna and landscape as listed in the knowledge evidence
 - using appropriate ecological terminology and concepts
 - incorporating interpretive themes and messages
 - organising information in a logical and suitable manner for presentation.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role of interpretation in creating a powerful customer experience
- sources of information on flora, fauna and landscape in the relevant geographic context
- landscapes of interest within a local region and their general characteristics
- key ecological terminology and concepts:
 - biodiversity and abundance
 - biotic and physical factors
 - carbon cycle
 - community relations
 - energy flow
 - food web
 - life cycles
 - nutrient cycle
 - populations
 - succession
 - water cycle
 - zonation
- interrelationships between parts of the ecosystem:

- developmental processes related to the formation of local landscapes:
 - geological formations and history
 - soil composition and its relation to plant and animal life and water catchment areas
- principles of Gondwana theory and the impact of Gondwana on plant and animal communities
- major landscape types and their characteristics:
 - alpine
 - coastal
 - desert
 - outback
 - temperate
 - tropical
- major species of flora and fauna within the local landscape:
 - characteristics
 - commonalities
 - interactions between species and the environment
 - nature of species and where it is found
 - nutrition and life cycles
 - roles of individual species
 - species harmful to humans
- identification techniques for flora and fauna
- environmental influences that affect landscape:
 - climate
 - earthquake
 - fire
 - flood
- human impact on landscape:
 - industrial activity
 - land clearing
 - mining
- management regimes and codes of practice for local landscape
- Australian Indigenous perspective on local landscape
- information sources frequently used by guides:
 - artworks
 - events
 - exhibitions
 - experiences and observations (of self or others)
 - films
 - geological societies, plant study groups or wildlife societies
 - images

- internet
- music
- local experts
- traditional owners
- performances
- presentations
- professional associations
- printed texts.

Assessment Conditions

Skills must be demonstrated in an operational guiding environment. This can be:

- an industry workplace where specialised interpretive content is developed for guiding activities
- a simulated activity involving the development of specialised interpretive content for guiding activities.

Assessment must ensure access to:

- current sources of information as listed in the knowledge evidence
- current interpretive resources
- equipment used to source, record and store information:
 - computer and software
 - internet
 - data storage equipment.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTPPD002 Develop interpretive activities

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to develop interpretive activities for different customer groups. It requires the ability to establish educational, interpretive and commercial objectives for an activity; develop operational aspects; and evaluate the success of the activity. The actual presentation of activities is covered in the unit SITTGDE005 Prepare and present tour commentaries or activities.

The unit applies to many industry sectors and has particular relevance in tourism, sport and recreation, and cultural contexts. Interpretive activities take place on historical, cultural, heritage or nature-based tours, in attractions and theme parks, in national parks or in locations such as museums, galleries, libraries, performing arts centres and zoos. Activities could be virtual.

Planning and developing interpretive activities may be for a series of activities in a venue or tour operation or for a one-off activity. It could be the responsibility of the person delivering the activity or be developed by senior operational or supervisory personnel. The planning role applies to those who work independently with limited guidance from others. This could include senior guides, activities coordinators, or owner-operators of small organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Establish need for activities.

1.1. Identify need for interpretive activities, based on customer, organisation and community needs.

1.2. Establish educational, interpretive and commercial objectives in consultation with appropriate colleagues.

2. Create activities.

2.1. Identify and evaluate a range of potential information and resources, including other specialists as required.

2.2. Develop interpretive framework for activities.

2.3. Generate and select ideas for potential messages, themes and storylines.

2.4. Identify relationships between themes, storylines and the site.

2.5. Incorporate interpretive media that matches the site.

2.6. Conduct a risk assessment and incorporate controls into activity development.

2.7. Evaluate and integrate legal, ethical and sustainability considerations.

2.8. Develop resources to support activities.

2.9. Develop activity within budget to meet agreed objectives.

3. Evaluate activities.

3.1. Obtain formal and informal feedback from customers and colleagues during piloting or conduct of activities.

3.2. Modify activities according to feedback received.

3.3. Establish and implement ongoing review mechanisms to ensure continuous improvement of activities in line with its objectives.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Reading skills to:

- evaluate wide ranging information and tease out creative themes and messages for activities
- analyse and interpret complex information and communicate it creatively to customers.

Oral communication

- consult with colleagues about development issues for interpretive

skills to: activities.

Numeracy skills to:

- calculate costs in order to work within established budgets.

Planning and organising skills to:

- coordinate creative and practical aspects of activities.

Technology skills to:

- use software to develop products that support the delivery of educational and commercial interpretive activities in both real and virtual contexts.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for SITTPD002 Develop interpretive activities

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and develop one single interpretive activity and one series comprising at least three interpretive activities combined into an overall program, for at least two of the following:
 - attractions
 - guided activities or walks
 - sporting activities
 - theme parks
 - virtual activities
- plan and develop the above interpretive activities using at least two of the following themes:
 - cultural
 - heritage
 - historical
 - nature
- ensure above interpretive activities include key messages that reflect subject matter knowledge and meet the needs of different customer groups and commercial and operational constraints
- identify review mechanisms for above interpretive activities.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- subject matter around which activities are developed
- influential principles and theories of interpretation
- physical and digital interpretive media
- resource considerations for the development of interpretive activities:
 - apps and other digital content
 - costumes
 - guest speakers
 - handouts

- information and communications technology
- natural resources
- props
- professional organisations
- special interest organisations
- specialists:
 - actors and performers
 - creative designers
 - cultural advisers
 - designers
 - environmental educators
 - heritage specialists
 - historians
 - interpretation consultants
 - marketers
 - subject matter experts
 - technical experts
- practical processes that support activity development:
 - budgeting
 - evaluation
 - needs analysis
 - resource development
 - scheduling
- creative communication techniques for interpretive activities:
 - games
 - illustrated talks
 - role-playing
 - sensory awareness exercises
 - storytelling
 - use of apps, podcasts, near response codes, quick response codes
- safety requirements specific to activities
- risk assessment processes:
 - determining overall risk level
 - determining exposure to the risk
 - estimating probability of negative impacts
 - identifying consequences that could result from the identified risk
- legal, ethical and sustainability considerations for activity development:
 - cultural appropriateness
 - duty of care
 - minimal impact

- minimising waste and conserving resources.

Assessment Conditions

Skills must be demonstrated in an operational tourism environment. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- a real or simulated environment for which interpretive activities can be planned and developed
- information sources on subject matter of interpretive activities, resources and other specialists
- current technology for use in activity development
- customers sufficient in number to reflect different customer, organisational or community needs and locations for interpretive activities; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTPPD009 Develop environmentally sustainable tourism operations

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to plan strategically for environmentally sustainable operations. This is subject to a range of regulatory requirements that relate to environmental sustainability at land management agency and federal, state or territory, and local government level. It requires the ability to establish and operate a sustainable operation and to monitor its environmental impact.

The unit applies to those in the tourism industry with managerial responsibilities in strategic planning and product development. Planning may be for a whole region or local area or for a particular venue, organisation, event or product. The unit applies to any operation with a strong focus on environmental sustainability.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Planning and Product Development

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.	demonstrate achievement of the element.
1. Plan for environmental sustainability.	<p>1.1. Make environmental sustainability an integral part of product planning processes.</p> <p>1.2. Conduct evaluations prior to any decision to establish operation.</p> <p>1.3. Consult stakeholders and incorporate their views into planning process.</p> <p>1.4. Investigate methods of managing impact.</p> <p>1.5. Develop strategies that provide social and economic returns to communities.</p> <p>1.6. Proactively seek opportunities for new, innovative and more sustainable approaches to conducting operations.</p> <p>1.7. Develop strategies that balance environmental sustainability and economic viability.</p>
2. Implement environmentally sustainable operations.	<p>2.1. Establish and integrate best practice environmental standards to limit negative environmental impacts.</p> <p>2.2. Evaluate and use technologies for environmental best practice.</p> <p>2.3. Develop environmentally-friendly codes of practice for the operation and for customer use.</p> <p>2.4. Conduct operations according to environmentally sustainable practices, guidelines and legal requirements.</p> <p>2.5. Promote environmental awareness among stakeholders.</p>
3. Evaluate environmental impact.	<p>3.1. Monitor and assess environmental impacts as part of regular management reviews.</p> <p>3.2. Monitor compliance with codes of practice and legislative requirements.</p> <p>3.3. Initiate follow-up action based on assessment of environmental impact and compliance.</p>

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Reading skills to:	<ul style="list-style-type: none"> interpret materials describing environmental regulatory requirements and codes of practice.
Writing skills to:	<ul style="list-style-type: none"> develop plans, systems and procedures for tourism operations.

- Oral communication skills to:
- consult with diverse stakeholders on potentially divisive and nuanced issues.
- Numeracy skills to:
- perform complex calculations to assess profitability considerations.
- Problem-solving skills to:
- respond to complex internal and external management challenges.
- Initiative and enterprise skills to:
- evaluate complex issues and information, and develop strategic responses.
- Planning and organising skills to:
- coordinate interrelated planning and operational processes.

Unit Mapping Information

SITTPPD602 Develop environmentally sustainable tourism operations

Links

Assessment Requirements for SITTPPD009 Develop environmentally sustainable tourism operations

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop a plan for a tourism operation that supports environmental sustainability and provides evidence of:
 - analysis of key environmental issues
 - consultation with key stakeholders
 - evaluation of proposed operation
 - development of strategies and operational approaches that maximise positive impacts
 - integration of current legislation, regulations and industry codes
- implement the above plan, complying with environmentally sustainable practices, guidelines and legal requirements
- monitor and evaluate the environmental impact of the above tourism operation through:
 - community consultation and involvement
 - internal and external education programs
 - implementing sustainable operational initiatives:
 - regularly reviewing optimal group sizes
 - scheduling for optimal weather conditions and seasons
 - selecting most appropriate equipment and transport modes.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- current research trends in the area of ecologically sustainable operations
- current and emerging issues and trends relevant to above operation and the environment
- global environmental issues, in particular a layperson's understanding of the science associated with:
 - climate change
 - energy
 - land management
 - waste and consumption
 - water

- relevance of particular environmental issues to the area or region of work and the specific features and vulnerabilities of the local environment
- methods of environmental evaluation:
 - environmental impact study (EIS)
 - evaluation of organisational capacity to comply with:
 - environmental and community protection laws
 - industry and ecotourism codes of practice
 - social sustainability
 - site studies
- consultation and communication mechanisms used by organisations in the product development process:
 - features
 - nature
 - objectives and outcomes
 - scope
 - time parameters
- strategic frameworks and operational systems and procedures that support environmentally sustainable operations:
 - customers
 - equipment and supplies
 - staff
- ways of balancing ecological sustainability and the economic viability of an operation
- potential negative environmental impacts:
 - disturbance of flora and fauna
 - introduction of exotic and feral species
 - physical damage
 - pollution
 - visual impacts
 - waste issues
- laws, regulations and land management requirements and guidelines:
 - need for permits in national parks or on land under control of traditional owners
 - restrictions on operations in relevant areas.

Assessment Conditions

Skills must be demonstrated in a destination, location, organisation or event for which an environmentally sustainable operation can be established. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- current information about environmental practices:
 - legislation
 - guidelines
 - industry codes of practice
- current information and communications technology to support the research and planning process
- stakeholders with whom consultations can take place, these can be:
 - consumer representatives
 - host community
 - investors
 - government authorities
 - land management agencies
 - suppliers of environmentally-friendly products; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITXCCS002 Provide visitor information

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to access general information on facilities, products and services available in the local area and to provide this to visitors.

The unit applies to frontline service personnel working in a range of tourism, travel, hospitality, entertainment and cultural contexts. Information is often provided face-to-face, but may be by telephone or other remote mechanisms.

It applies to frontline service personnel who routinely respond to visitor requests for general local area information. They may be working independently or with guidance from others in restaurants, hotels, wineries, attractions, entertainment venues, tour operations, visitor information centres and at tour desks.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|---|
| 1. Access and update visitor information. | 1.1. Identify and access sources of visitor information.
1.2. Obtain general information on local facilities, products and services to meet different visitor needs.
1.3. Share information with colleagues to support the efficiency and quality of service.
1.4. Identify and use <i>opportunities to update and maintain local area knowledge</i> . |
| 2. Provide information to visitors. | 2.1. Identify specific information and assistance needs of visitors, including those with special needs.
2.2. Provide appropriate scope and depth of information to meet visitor needs.
2.3. Identify and use opportunities to promote internal products and services. |
| 3. Seek feedback on information provision. | 3.1. Proactively seek visitor feedback to ensure required information has been provided.
3.2. Follow procedures for any formal visitor evaluation.
3.3. Provide information on visitor feedback to relevant colleagues. |

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> • interpret sometimes detailed product and local area information • research, sort and use relevant information.
Writing skills to:	<ul style="list-style-type: none"> • record simple notes and basic information on local facilities, products and services for visitors.
Oral communication skills to:	<ul style="list-style-type: none"> • listen and respond to range of visitor requests, asking questions to clarify and confirm.
Learning skills to:	<ul style="list-style-type: none"> • review own knowledge of information required to assist visitors and participate in activities that continuously update it.

Range of Conditions

Specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the

candidate, accessibility of the item, and local industry and regional contexts) are included.

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Opportunities to update and maintain local area knowledge must include at least four of the following:

- informal discussions with colleagues and visitors
- internal newsletters and external promotional material
- local information centre
- participating in local familiarisation tours
- local media: newspaper, radio and television
- personal observation or exploration
- principal or supplier of the product or service
- staff noticeboards
- team meetings.

Assessment Requirements for SITXCCS002 Provide visitor information

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide current, accurate and relevant information about local area features to three different visitors on three different occasions
- provide above information and assistance in a culturally appropriate manner and according to organisational service standards
- extend personal knowledge of relevant facilities, products and services
- seek formal and informal feedback from visitors on above services.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information on the available local area facilities, products and services:
 - brochures
 - library
 - local council
 - local people and local identities with specialised knowledge
 - local visitor guide booklets and maps
 - online reservation systems
 - organisation information
 - organisation-designed information systems
 - principal supplier of a product
 - product library
 - room directories
 - social media websites
 - state or territory government tourism authority information systems
 - timetables
- information on the local area features:
 - accommodation options
 - dining options

- entertainment venues
- local attractions
- local personal services facilities
- local shopping facilities
- local transport options
- organisation-specific information
- road conditions
- sporting facilities
- tours, local outings and trips
- travelling routes
- weather conditions
- organisational service procedures and standards:
 - designated response times for acknowledging customers and their enquiry
 - personal presentation and hygiene standards
- awareness of customs and practices of various social and cultural groups of visitors to assist with meeting visitor needs and expectations in regards to:
 - modes of greeting, farewelling and conversation
 - body language and body gestures
 - formality of language
 - clothing
- methods of collecting feedback:
 - formal:
 - surveys
 - interviews
 - structured questioning
 - informal:
 - observation
 - casual discussion
- organisational service procedures and standards.

Assessment Conditions

Skills must be demonstrated in an operational customer service environment in a service based industry such as tourism, travel, hospitality or events where information is sourced and provided to visitors. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- sources of information on the local area facilities, services and general products, and their availability
- organisational specifications for customer service standards
- visitor surveys and feedback forms
- visitors from different cultural backgrounds with whom the individual can interact; these can be:
 - visitors to an industry workplace during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

SITXCOM004 Address protocol requirements

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to source and access information on protocol requirements to fulfil any sales or operational need. It requires the ability to identify appropriate information sources, access and interpret specific details of protocol requirements, and coordinate the use of protocol.

The unit applies to many tourism, travel, hospitality and event sectors and is particularly relevant to events, function coordination, tour operations and tour guiding.

Protocol affects a broad range of business and government activity and the breadth and depth of protocol knowledge required will vary. This unit does not require in-depth knowledge of protocol requirements, but rather focuses on the ability to collect and interpret protocol information.

This unit applies to a range of people working independently or with limited guidance, including tour and event coordinators and managers, tour guides, and front of house or duty managers.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Assessment Requirements for SITXCOM004 Address protocol requirements

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- source accurate information on protocol requirements for at least two of the following:
 - organising an event or function, such as a meeting, reception or tour
 - organising accommodation
 - issuing marketing materials reflecting correct titles of dignitaries
 - meeting the requirements of dignitaries and officials
 - meeting the requirements of entertainers and masters of ceremony
- integrate protocol requirements into oral and written material for each of the above
- update and integrate knowledge of protocol when organising each of the above.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- main types of civic functions held in Australia
- importance and role of protocol in different business situations
- key sources of information on protocol for:
 - Australian honours system:
 - order of precedence
 - ranks and forms of address
 - wearing of honours and medals
 - involvement of Indigenous Australians and other cultural groups in business activities
 - correct use of national and state symbols:
 - flags
 - anthems
 - military salutes
 - forms of address for different dignitaries and officials, both for written correspondence and in oral communication
- sources of protocol information:
 - Aboriginal Land Councils

- Australia Day Council
- customers, clients, their agents and personal assistants
- federal, state or territory, and local government protocol departments
- internet
- libraries
- Office of the United Nations
- specific work activities impacted by protocol requirements:
 - addressing and introducing dignitaries and officials
 - correspondence to dignitaries and officials
 - issuing invitations
 - liaison with dignitaries and officials
 - preparing:
 - briefing papers
 - marketing materials
 - running sheets
- protocols for the following different situations:
 - invitations to dignitaries and officials
 - arrival procedures, for heads of state or government officials
 - introduction protocols and order of speakers
 - order of precedence for official guests
 - seating arrangements
 - dress styles
- opportunities to update protocol knowledge:
 - informal networking with colleagues
 - internet research
 - reading relevant journals.

Assessment Conditions

Skills must be demonstrated in an operational tourism, travel, hospitality or events environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- current protocol information relevant to organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify the core business and establish the strategic direction of the organisation	1.1 Identify the core business of the organisation
	1.2 Identify, explain and document the relationships between the organisation and other stakeholders
	1.3 Interact with key stakeholders to inform them of achievements and to ensure their input into the determination of strategic goals and directions
	1.4 Document the organisation's strategic direction and priorities
	1.5 Establish performance targets, that form the basis for evaluation of performance
2 Follow legal requirements when carrying out Board duties	2.1 Identify and refer to the relevant provisions of the legal framework under which the organisation was established
	2.2 Monitor relevant aspects of the appropriate federal, state and local legislation and by-laws for organisation compliance
3 Work within the structure of the organisation	3.1 Differentiate and document the member, governance and management issues of the organisation in the organisation's governance policy guidelines
	3.2 Identify, document and refer to the relationships between governance issues and management issues
	3.3 Identify and document the role of the Board in the organisation's governance policy guidelines
	3.4 Identify and document the role of the individual Directors in the organisation's governance policy guidelines
	3.5 Identify and document the role of the Chairperson in the organisation's governance policy guidelines
	3.6 Identify and document the role of the Secretary in the organisation's governance policy guidelines

- 3.7 Document delegations of the Board's authority
- 3.8 Undertake and evaluate duties outlined in job descriptions of Board members regularly as a whole **Board assessment** and an **individual Director assessment**
- 4 **Monitor trends and changes in the industry**
 - 4.1 Ensure the Board is aware of **emerging issues** in the industry that are likely to have an impact on the organisation's business
 - 4.2 Evaluate the identified **emerging issues** within a risk management and due diligence framework for their impact on the organisation
 - 4.3 Ensure those **emerging issues** requiring attention by the organisation are dealt with by the Board in an appropriate manner
 - 4.4 Demonstrate how the Board regularly reviews its policies and procedures to take account of the **emerging issues**
- 5 **Monitor the organisation's operations**
 - 5.1 Ensure preparation for meetings is adequate and timely
 - 5.2 Record meeting attendance and encourage effective participation by all Board members
 - 5.3 Utilise information provided in analysing the efficiency and effectiveness of the organisation in meeting its stated objectives and performance targets
 - 5.4 Review policies, procedures, operations and **workplace responsibilities** of the organisation and adapt accordingly
- 6 **Supervise the senior management of the organisation**
 - 6.1 Receive information and advice regularly from the senior management of the organisation to form the basis of informed decision-making
 - 6.2 Provide instructions to the senior management of the organisation to implement specific policy directions as required
 - 6.3 Seek feedback from senior management of the organisation in relation to the implementation of the specific policy directions

- 6.4 Assess the performance of the Chief Executive Officer (CEO) regularly in accordance with the **legal framework** under which they are engaged

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements

Critical aspects of evidence to be considered

Assessment must confirm sufficient knowledge of being an effective paid or unpaid member of the Board of a sport or recreation organisation in the work environment

Assessment of performance should be over a period of time covering all categories of the Range Statements that are applicable in the learner's environment

In particular, assessment must confirm the ability to

identify the core business and establish the strategic direction of the organisation

follow legal requirements when carrying out Board duties

work within the structure of the organisation

monitor trends and changes in the industry

monitor the organisation's operations

supervise the senior management of the organisation

Interdependent assessment of units

This unit must be assessed after attainment of competency in the following unit(s)

Nil

This unit must be assessed in conjunction with the following unit(s)

SRXGOV002B Undertake the role of an individual Director of an organisation

For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)

Nil

Required knowledge and skills

Required knowledge

Knowledge of natural justice and fair process as it relates to the evaluation and assessment of the effectiveness and efficiency of a Board and individual Directors

Knowledge of the business and operations of the organisation as it relates to participating in the formulation of strategic directions

Knowledge of the legal framework under which the organisation operates and the Memorandum and/or Articles of Association of the organisation

Knowledge of roles and responsibilities of particular functions on the Board such as Chairperson, Secretary and Director

Knowledge of the role policies and procedures play in the effective running of an organisation

Knowledge of the separation of the governance (Board) and management (Chief Executive Officer) functions of the organisation and how the management issues are effectively functions of the Board that are delegated to the Chief Executive Officer (CEO)

Knowledge of performance measurement systems as they relate to the measurement of the efficiency and effectiveness of the organisation in meeting its stated performance targets

Knowledge of effective human resource management practices as they relate to the delegation, monitoring and evaluation of the Chief Executive Officer (CEO) and senior management

Knowledge of issues to do with Occupational Health and Safety (OH&S) as they relate to the employment of staff

Required skills

Literacy and numeracy skills as they relate to the reading, comprehension, evaluation and analysis of documentation that relates to the organisation's strategic direction, governance policy guidelines, undertaking of the function of Director and the monitoring of trends in industry

Research skills as they relate to the monitoring of trends in industry

Verbal communication skills as they relate to the presentation of cogent arguments within the Board processes

Written communication skills as they relate to the presentation of papers at a Board meeting

Negotiation skills as they relate to active participation in Board discussions and decision - making

Consultation skills as they relate to the meaningful engagement of relevant stakeholders in the organisation's operations

Policy development skills as they relate to the drafting of, consultation on and endorsement of policies and procedures for the effective operation of the organisation

Resource implications

Physical resources - assessment of this competency requires access to either real or simulated organisations and their respective Board processes

Human resources - assessment of this unit of competency will require human resources

consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must be competent in this unit but preferably be competent in the unit at the level above be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the **Standards for Registered Training Organisations**

Consistency in performance

Due to issues such as performing various duties as a member of a Board of an organisation, this unit of competency must be assessed over period of time in order to ensure consistency of performance over the Range Statements and contexts applicable to participating as a member of an effective Board of an organisation

Context for assessment

This unit of competency must be assessed in the context of participating as a member of an effective Board of a sport or recreation organisation

Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes

Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

KEY COMPET ENCIES

Collect, Analyse & Organise Information	Communicate Ideas & Information	Plan & Organise Activities	Work with Others & in Teams	Use Mathematical Ideas & Techniques	Solve Problems	Use Technology
3	3	3	3	3	3	2

These levels do not relate to the Australian Qualifications Framework. They relate to the seven areas of generic competency that underpin effective workplace practices.

The three levels of performance (1, 2 and 3) denote the level of competency required to perform the task:

Use routine approaches

Select from routine approaches

Establish new approaches

Collecting, analysing

**and
organising
informatio**

n -
Collecting

Solving problems -

Identifying the need to hold an extraordinary meeting

Using technology

- Taking part in a teleconference

Please refer to the Assessment Guidelines for advice on how to use the Key Competencies.

Range Statement

Range Statements

The Range Statements provide advice to interpret the scope and context of this unit of competence, allowing for differences between enterprises and workplaces. The Range Statements relate to the unit as a whole and helps facilitate holistic assessment. In addition, the following variables may be present for this particular unit of competency

RANGE STATEMENT

Board assessment

CATEGORIES

[all categories]

the assessment of the Board as a whole could

be undertaken by four key issues

chat with the Chairperson

yes/no questionnaire

grading questionnaire

written questionnaire

the introduction of an effective process of Board assessment will involve

implementation over time

gaining commitment

careful preparation

deciding the issues to be covered by the Board assessment

defining measures of performance: organisation and Board

communicating performance

implementing changes

reviewing the process

Chief Executive Officer assessment

[all categories]

the Chief Executive Officer (CEO) assessment should be

undertaken by the Board, as the Chief Executive Officer (CEO) is responsible to the Board as a whole, not just the Chairperson

part of a policy framework

based on objective performance criteria

reviewed as part of an organisation and Board performance review

linked to a remuneration policy which reflects objective performance

the aim of the performance evaluation is to align the long - term interests of the Chief Executive Officer (CEO) with the long - term interests of the organisation. This would require a three stage process of

the Board setting goals for/with the Chief Executive Officer

monitoring the performance of the organisation against the goals

responding to the difference between expected and actual outcomes

performance measures should be

valid

verifiable

controllable

global

communicable

Core business of the organisation

[all categories]

that business that is consistent with the intent and purpose for which the organisation was established

that business that is consistent with the Memorandum and Articles of Association

Emerging issues

[all categories]

the Corporate Law Economic Reform Bill (1998)

technology

information

Individual Director assessment

[all categories]

the assessment of Directors who are currently on the Board can be undertaken by various means

chat with the Chairperson

chat with the Governance Committee

Director self-assessment

aggregated results to give Board profiles

qualitative peer assessment

the assessment of a Director prior to appointment should consider the following issues

the profile should be related to the goals of the organisation and the organisation and Board performance criteria

an external search process should be used to complement the probable likely suspects known to the Board

the appointment term should be considered relevant information should be discussed prior to the appointment

current Directors should meet the final candidate to ensure they are comfortable that the new Director will contribute the skills knowledge and experience sought in a team-like manner

a thorough induction process should be undertaken

Legal framework

[all categories]

the legal context within which the organisation operates

association - Associations law

corporation - Corporation law

Legislation

[all categories]

specific laws

Corporation law

the Corporations law, the complementary State legislation and the Ordinances of the relevant Territories

the Company Law Review Act (1998)

the Corporate Law Economic Reform Bill (1998)

Associations law

Trade Practices law

competition

consumer protection

Contract law

Environmental law

Taxation law

Regulatory compliance

laws relating to people

Industrial Relations/Workplace Relations Act

Occupational Health and Safety (OH&S) Acts

Employment

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Identify the roles of governance and management	1.1 Differentiate and document the member, governance and management issues of the organisation in the organisation's governance policy guidelines
	1.2 Identify, document and refer to the relationships between governance issues and management issues
2 Facilitate the development of an effective Board	2.1 Provide information to enable the Board to analyse the efficiency and effectiveness of the organisation in meeting its stated objectives and performance targets
	2.2 Ensure new Directors understand the way that the Board operates and the organisation's governance policy guidelines
	2.3 Highlight continuing professional development opportunities to the attention of all Directors
	2.4 Monitor relevant aspects of the appropriate federal, state and local legislation and by-laws for organisation compliance and provide advice to ensure Directors follow legal requirements when carrying out Board duties
3 Provide detailed information for the Board to deal with the right matters	3.1 Ensure the Board is aware of emerging issues in the industry that are likely to have an impact on the organisation's business
	3.2 Evaluate the identified emerging issues within a risk management and due diligence framework for their impact on the organisation and provide this information to the Board
	3.3 Differentiate governance and management issues of the organisation to ensure the Board deals with the right matters
	3.4 Collate a well structured Board paper, containing all necessary information items and including a recommendation from management, for all agenda items

- 3.5 Ensure **Board** members receive the papers in sufficient time to study them before the meeting
- 3.6 Establish processes to source appropriate internal and external professional advice for Directors to inform their decision-making (where required)
- 3.7 Establish processes to deal with extraordinary matters that arise outside scheduled meetings
- 4 **Ensure that Board decisions are implemented properly**
 - 4.1 Ensure complete and accurate minutes are recorded and reported to the **Board**
 - 4.2 Identify and implement actions that flow from the decisions clearly
 - 4.3 Implement the appropriate policies and procedures to support the Board's decisions within agreed timeframes
 - 4.4 Advise the **Board** promptly of **issues** affecting the implementation of **Board** decisions
- 5 **Ensure regular communication with the Board**
 - 5.1 Provide information and advice regularly to the **Board** to foster informed decision-making
 - 5.2 Brief the Chairperson in great detail on all substantive issues at all times
 - 5.3 Seek clear instructions from the **Board** in order to implement specific policy directions (as required)
 - 5.4 Seek feedback from the **Board** in relation to the performance of staff regarding implementation of the specific policy directions

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of

competence and should be read in conjunction with the Range Statements

Critical aspects of evidence to be considered

Assessment must confirm sufficient knowledge of working effectively with the Board of a recreation organisation or facility in the work environment

Assessment of performance should be over a period of time covering all categories of the Range Statements that are applicable in the learner's environment

In particular, assessment must confirm the ability to

differentiate between management and governance issues

ensure the Board follows the organisation's governance policy guidelines

facilitate the establishment of an effective Board team

arrange for the Board to deal with the right matters

provide sufficient documentation for the Board to reach informed decisions

ensure that the decisions are implemented properly

communicate regularly with the Board and ensure the Chairperson is well briefed on current issues affecting the organisation

Interdependent assessment of units

This unit must be assessed after attainment of competency in the following unit(s)

Nil

This unit must be assessed in conjunction with the following unit(s)

Nil

For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)

Nil

Required knowledge and skills

Required knowledge

Knowledge of the business and operations of the organisation as it relates to the formulation of strategic directions

Knowledge of the legal framework under which the organisation operates and the Memorandum and/or Articles of Association of the organisation

Knowledge of roles and responsibilities of particular functions on the Board such as Chairperson, Secretary and Director

Knowledge of the role policies and procedures play in the effective running of an organisation

Knowledge of the separation of the governance (Board) and management (Chief Executive Officer) functions of the organisation and how the management issues are effectively functions of the Board that are delegated to the Chief Executive Officer (CEO)

Knowledge of human resource management practices as they relate to the development of effective working relationships between paid staff and volunteer Boards

Required skills

Literacy and numeracy skills as they relate to the reading, comprehension, evaluation and analysis of documentation that relates to the organisation's strategic direction, governance policy guidelines and the monitoring of trends in industry

Research skills as they relate to the monitoring of trends in industry

Verbal communication skills as they relate to the presentation of information to the Board

Written communication skills as they relate to the presentation of papers at a Board meeting

Consultation skills as they relate to the

meaningful engagement of relevant Board members in the organisation's operations

Policy development skills as they relate to the drafting of, consultation on and endorsement of policies and procedures for the effective operation of the organisation

Facilitation and project management skills as they relate to the implementation of Board decisions

Leadership skills as they relate to demonstration of appropriate individual standards of performance, influencing others, making decisions, facilitating group decision - making and the utilisation of appropriate leadership styles

Resource implications

Physical resources - assessment of this competency requires access to

either real or simulated organisations and their respective Board processes

Human resources - assessment of this unit of competency will require human resources consistent with those outlined in the Assessment Guidelines. That is, assessors (or persons within the assessment team) must

be competent in this unit but preferably be competent in the unit at the level above

be current in their knowledge and understanding of the industry through provision of evidence of professional activity in the relevant area

have attained the mandatory competency requirements for assessors under the Australian Quality Training Framework (AQTF) as specified in Standard 7.3 of the **Standards for Registered Training Organisations**

Consistency in performance

Due to issues such as the varied issues that are required to be discussed by a Board, this unit of competency must be assessed over period of time in order to ensure consistency of performance over the Range Statements and contexts applicable to working

effectively with the Board or management committee of a sport or recreation organisation

Context for assessment

This unit of competency must be assessed in the context of working effectively with the Board or management committee of a sport or recreation organisation

Assessment of this unit of competence will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes

Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

Elements and Performance Criteria

Element	Performance Criteria
1 Identify conflict situations	1.1 Identify (quickly) signs and possible causes of conflict 1.2 Determine accurately the stage of the conflict, with respect to progression and possible escalation 1.3 Take swift and tactful action to prevent escalation 1.4 Identify (quickly) situations where personal safety of clients or staff may be threatened and organise appropriate assistance (if required) 1.5 Identify factors within the individual or workplace environment which relate to the developing conflict
2 Implement conflict resolution strategies	2.1 Take responsibility for resolving the conflict within scope of individual responsibility 2.2 Clarify factors and issues relevant to the conflict 2.3 Demonstrate correct use of conflict resolution techniques to manage the conflict after consideration of the particular situation 2.4 Identify options for resolution of the conflict which allow for constructive responses to be negotiated and enable established work relationships to continue 2.5 Encourage, treat with respect, and accept (where appropriate) all points of view during negotiations and discussions
3 Use effective interpersonal skills	3.1 Demonstrate use of effective verbal and non verbal communication during negotiations (including body language, questioning, language style, active listening and reflection) 3.2 Provide assertive feedback, and receive feedback non-defensively during negotiations

Required Skills and Knowledge

Not applicable.

Evidence Guide

Evidence Guide

The Evidence Guide identifies the critical aspects, knowledge and skills to be demonstrated to confirm competence for this unit. This is an integral part of the assessment of competence and should be read in conjunction with the Range Statements

Critical aspects of evidence to be considered

Assessment must confirm sufficient knowledge of typical symptoms and causes of conflict in the work environment and conflict resolution techniques

Assessment of performance should be over the resolution of a minimum of three (3) different conflict situations, covering the prescribed number of categories from the Range Statements

Assessment must confirm the ability to apply this knowledge and appropriate techniques to identify sources of conflict in the workplace resolve a range of different conflict situations, using different options for resolution

use suitable communication skills to facilitate effective discussion between all parties and achieve resolution

Interdependent assessment of units

This unit must be assessed after attainment of competency in the following unit(s)

Nil

This unit must be assessed in conjunction with the following unit(s)

Nil

For the purpose of integrated assessment, this unit may be assessed in conjunction with the following unit(s)

Nil

Required knowledge and skills

Required knowledge

Signs and stages of conflict in the workplace

Possible causes/sources of conflict
(ideational, status and power, goal conflict)

Functions of conflict (functional and
dysfunctional)

Options for constructive responses to typical
conflict situations

Required skills

Interpersonal skills

Participation in small informal work groups

Problem solving

Ability to gather, record, and convey
information

Resource implications

Physical resources - assessment of this unit
of competency requires access to

real or simulated work group situations

access to information relevant to the
workplace

Human resources - assessment of this unit of
competency will require human resources
consistent with those outlined in the
Assessment Guidelines. That is, assessors (or
persons within the assessment team) must

be competent in this unit but preferably be
competent in the unit at the level above

be current in their knowledge and
understanding of the industry through
provision of evidence of professional activity
in the relevant area

have attained the mandatory competency
requirements for assessors under the
Australian Quality Training Framework
(AQTF) as specified in Standard 7.3 of the
**Standards for Registered Training
Organisations**

Consistency in performance

Due to issues such as differences in conflict
situations, this unit of competency must be

assessed over the resolution of a minimum of three (3) different conflict situations, to ensure consistency of performance over the Range Statements and contexts applicable to conflict arising in workplaces

Context for assessment

This unit of competency must be assessed in the context of responding to a conflict issue arising during a sport or recreation activity for a group of clients. For valid and reliable assessment the clients should be real, i.e., not peers, and the sport or recreation activity should be similar to those that occur in the learners work environment. The environment should be safe with the hazards, circumstances and equipment likely to be encountered in a real workplace

Assessment of this unit of competency will usually include observation of processes and procedures, oral and/or written questioning on required knowledge and skills and consideration of required attitudes

Where performance is not directly observed and/or is required to be demonstrated over a "period of time" and/or in a "number of locations", any evidence should be authenticated by colleagues, supervisors, clients or other appropriate persons

TAEASS401 Plan assessment activities and processes

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to plan the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system.

It applies to individuals with assessment planning responsibilities.

In planning activities and processes, individuals are required to identify the components of assessment tools, analyse and interpret assessment tools, and develop assessment instruments (also known as assessment tasks) and assessment plans.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the assessment approach	1.1 Identify the candidate and confirm the purposes and context of the assessment with relevant people according to legal, organisational and ethical requirements 1.2 Identify and access applicable industry or workplace standards for the assessment, and any specific assessment requirements
2. Prepare the assessment	2.1 Analyse units of competency and assessment requirements to

ELEMENT	PERFORMANCE CRITERIA
plan	<p>identify evidence needed to demonstrate competence, according to the rules of evidence</p> <p>2.2 Select assessment methods and instruments to support the collection of defined evidence, taking into account the context in which the assessment will take place</p> <p>2.3 Develop the assessment plan and gain approval from relevant stakeholders</p>
3. Identify modification and contextualisation requirements	<p>3.1 Use information from the candidate and, where relevant, the candidate's workplace to identify contextualisation needs</p> <p>3.2 Check advice provided by the training package or course developer relevant to identified contextualisation needs</p> <p>3.3 Analyse existing assessment tools and record amendments required to address identified contextualisation needs</p> <p>3.4 Determine opportunities for integrated assessment activities and record any changes required to assessment tools</p>
4. Develop the assessment instruments	<p>4.1 Analyse available assessment instruments for their suitability for use, and identify any required modifications</p> <p>4.2 Develop assessment instruments to meet the required standard and specific workplace/candidate needs</p> <p>4.3 Map assessment instruments against the unit or course requirements</p> <p>4.4 Write clear instructions for the candidate and assessor regarding the use of assessment instruments</p> <p>4.5 Check and confirm that draft assessment instruments meet required standards and specific workplace/candidate needs and record outcomes of checks</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Assessment Requirements for TAEASS401 Plan assessment activities and processes

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must demonstrate the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- planning and organising the assessment process on a minimum of five separate occasions
- planning and organising two Recognition of Prior Learning (RPL) assessments (which may be two of the five assessment processes above.)

The evidence requirements for each occasion must include:

- a documented assessment plan
- a different endorsed or accredited unit of competency (or clusters of units of competency) for each of the five occasions
- contextualisation of the unit(s) of competency and the selected assessment tools, where required
- incorporation of reasonable adjustment strategies
- development of suitable assessment instruments for each of the five occasions

following organisational arrangements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- obligations of an assessor under applicable legislation and/or standards
- the major features of a unit of competency, and how they are to be addressed in assessment activities and processes
- interpreting competency standards as the minimum standard for assessment
- guidelines for contextualising units of competency

- different purposes of assessment and different assessment contexts, including RPL
- the purpose and features of evidence, and different types of evidence, used in competency-based assessments, including RPL
- the principles of assessment, and how they guide the assessment process
- the rules of evidence and how they guide the assessment process
- different assessment methods, including their suitability for collecting various types of evidence
- the components of assessment tools

different types of assessment instruments and their purpose and relevance for specific evidence-gathering opportunities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and which are typical of those experienced in the training and assessment environment. This includes access to the units of competency used in assessment planning activities.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessors of this unit must hold the *TAE50116 Diploma of Vocational Education and Training* or the *TAE50111 Diploma of Vocational Education and Training* or be able to demonstrate equivalence of competencies.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=35337905-785d-4f93-8777-e9991ad4c6c3>

TAEASS402 Assess competence

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to implement an assessment plan, and gather quality evidence to assess the competence of a candidate using compliant assessment tools.

It applies to teachers, trainers and assessors in enterprises and registered training organisations (RTOs) and those providing assessment advisory services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the assessment	1.1 Interpret assessment planning documentation and applicable organisational, legal and ethical requirements for conducting the assessment and confirm with the relevant people 1.2 Access and interpret units of competency that are to be used as benchmarks for assessment, and the nominated assessment tools, to confirm the requirements for the evidence to be collected 1.3 Determine opportunities for integrated assessment activities

ELEMENT	PERFORMANCE CRITERIA
	<p>and document any changes to the assessment instruments, where required</p> <p>1.4 Determine opportunities for evidence-gathering in actual or simulated activities, through consultation with the candidate and relevant personnel</p> <p>1.5 Conduct a candidate briefing and explain, discuss and agree on the details of the planned assessment</p> <p>1.6 Arrange identified material and physical resource requirements</p> <p>1.7 Identify any specialist support requirements for the assessment, and organise if necessary</p>
2. Gather quality evidence	<p>2.1 Use agreed assessment methods and tools to gather, organise and document evidence in a format suitable for determining competence</p> <p>2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence</p>
3. Support the candidate	<p>3.1 Discuss and guide candidates in gathering their own evidence to support the recognition of prior learning (RPL)</p> <p>3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to individual differences and enables two-way feedback</p> <p>3.3 Make decisions on reasonable adjustments with the candidate, based on the candidate's needs and characteristics</p> <p>3.4 Access specialist support, if required, in accordance with the assessment plan</p> <p>3.5 Address any workplace health and safety (WHS) risk to a person or equipment immediately</p>
4. Make the assessment decision	<p>4.1 Assess the collected evidence, and to evaluate whether it reflects the evidence required to demonstrate competence</p> <p>4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence</p> <p>4.3 Make the assessment decision in line with agreed assessment procedures and according to the agreed assessment plan</p> <p>4.4 Provide clear and constructive feedback to the candidate regarding the assessment decision, and clearly document follow-up, if required</p>
5. Record and report the assessment decision	<p>5.1 Record assessment outcomes promptly and accurately</p> <p>5.2 Complete and submit required assessment documentation,</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>according to assessment procedures and confidentiality conventions</p> <p>5.3 Inform other relevant parties of the assessment decision, according to confidentiality conventions</p>
6. Review the assessment process	<p>6.1 Review the assessment process in consultation with candidates and other relevant people to improve future practice</p> <p>6.2 Document and record the review according to relevant assessment system policies and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Assessment Requirements for TAEASS402 Assess competence

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- assessment of at least five candidates within the vocational education and training (VET) context against at least one endorsed or accredited unit of competency according to the organisation's assessment processes and practices.
- using recognition of prior learning (RPL) processes in the assessment of at least one candidate (which may be one of the five candidates above)
- making reasonable adjustments in the assessment of at least one candidate.

The assessments must be undertaken under the supervision of a qualified assessor and cover an entire unit of competency for each candidate, including:

- the application of different assessment methods and instruments involving a range of activities and events
- using two-way communication and feedback with the candidate
- exercising judgement in making the assessment decision
- recording and reporting assessment outcomes in accordance with the assessment system and organisational, legal and ethical requirements

reviewing the assessment process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment, including:
 - VET as a competency-based system
 - how competency based assessment differs from other types of assessment
 - competency standards as the basis of qualifications

- structure and application of competency standards
- the principles of assessment and how they are applied
- the distinction between assessment tools and assessment instruments
- the rules of evidence and how they are applied
- the range of assessment purposes and assessment contexts, including RPL
- different assessment methods, including suitability for gathering various types of evidence, suitability for the content of units, and resource requirements and associated costs
- reasonable adjustments and when they are applicable
- types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
- the training and assessment strategies, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations in assessment activities
- current legislative requirements relevant to the assessor and the assessment process
- workplace health and safety (WHS) responsibilities associated with assessing competence, including:
 - requirements for reporting hazards and incidents
 - emergency procedures
 - procedures for the use of relevant personal protective equipment
 - the safe use and maintenance of relevant equipment
 - sources of WHS information.

Assessment Conditions

Gather evidence to demonstrate consistent performance in a real assessment environment. The assessment environment must include access to assessment tools and recording materials.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessors of this unit must hold the *TAE50116 Diploma of Vocational Education and Training* or the *TAE50111 Diploma of Vocational Education and Training* or be able to demonstrate equivalence of competencies.

TAEASS403 Participate in assessment validation

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to participate in an assessment validation process.

It applies to assessors and workplace supervisors with assessment validation responsibilities participating in, but not necessarily leading, the process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for validation	1.1 Discuss and confirm the purpose, context and scope of the validation process within relevant assessment system policies and procedures 1.2 Arrange materials for validation activities 1.3 Check all documents used in the validation process for accuracy and version control 1.4 Analyse relevant units of competency and agree on the evidence needed to demonstrate competence

ELEMENT	PERFORMANCE CRITERIA
2. Participate in the validation of assessment tools	<p>2.1 Demonstrate active and appropriate participation in validation sessions and activities using agreed communication methods and modes</p> <p>2.2 Apply principles of assessment and rules of evidence during validation sessions and activities</p> <p>2.3 Check that context and conditions of assessment include clear instructions for assessor and candidate and relate directly to the assessment conditions of the relevant unit</p> <p>2.4 Check that tasks to be administered to the candidate include clear and concise instructions and an outline of evidence requirements</p> <p>2.5 Check that assessment decision-making rules and benchmarks, are clear and enable consistent outcomes</p> <p>2.6 Check that recording mechanisms are clear and allow for sufficient information to be recorded</p> <p>2.7 Review and use assessment maps to assist in determining validity of assessment instruments</p>
3. Contribute to validation outcomes	<p>3.1 Discuss validation findings to support improvements in the quality of assessment in a collective environment</p> <p>3.2 Discuss, agree and record recommendations to improve assessment practice</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.3, 2.4, 2.5, 2.6, 2.7	<ul style="list-style-type: none"> Analyses and interprets relevant policies and procedures, benchmarks and validation materials
Writing	1.1, 3.2	<ul style="list-style-type: none"> Records key information from the validation process accurately to meet requirements
Oral Communication	1.1, 1.4, 2.1, 2.2, 3.1, 3.2	<ul style="list-style-type: none"> Communicates with others to confirm approaches, exchange ideas and information, articulate opinions, and reach agreement with others, using suitable tone, style and language
Navigate the world of work	1.1	<ul style="list-style-type: none"> Identifies, confirms and takes responsibility for adherence to policies and procedures
Interact with others	1.1, 2.1, 2.2, 3.1, 3.2	<ul style="list-style-type: none"> Collaborates with others and contributes to activities requiring joint responsibility and accountability
Get the work done	1.1, 1.2, 1.3, 1.4, 2.3, 2.4, 2.5, 2.6, 2.7, 3.2	<ul style="list-style-type: none"> Organises and prioritises work commitments with a sense of what is achievable within the timeframe Uses analytical processes in non-routine situations gathering information, and identifying and evaluating options against agreed criteria

Assessment Requirements for TAEASS403 Participate in assessment validation

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- actively participating in a minimum of three validation sessions that address the critical aspects of validation
- clearly identifying the purpose for each validation, and the legal and ethical responsibilities of assessors
- collating and presenting documentation for each validation in a logical manner
- communicating and liaising with relevant people
- providing feedback and interpreting documentation in validation sessions
- recording their contribution to validation findings.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to determine the evidence needed to demonstrate competence in a competency-based environment
- the reasons for carrying out validation and different approaches to validation that may be appropriate before, during and after an assessment
- the components of assessment tools
- critical aspects of validation, including validation of assessment processes, methods and products
- how principles of assessment are addressed in validation
- how rules of evidence are addressed in validation
- work health and safety legislation, codes of practice, standards and guidelines that impact on assessment

- obligations of an assessor under applicable legislation and/or standards, particularly in relation to validation activities.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to:

- the texts and tasks usually found in the workplace
- units of competency and other materials used in validation sessions.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessors of this unit must hold the *TAE50116 Diploma of Vocational Education and Training* or the *TAE50111 Diploma of Vocational Education and Training* or be able to demonstrate equivalence of competencies.

TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

ELEMENT	PERFORMANCE CRITERIA
	<p>materials for suitability and relevance, and seek assistance to interpret the contextual application</p> <p>1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration</p> <p>1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan</p>
2. Conduct instruction and demonstration	<p>2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment</p> <p>2.2 Follow the learning program and/or delivery plan to cover all learning objectives</p> <p>2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training</p> <p>2.4 Use delivery techniques to structure, pace and enhance learning</p> <p>2.5 Apply coaching techniques to assist learning</p> <p>2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills</p> <p>2.7 Provide opportunities for practice during instruction and through work activities</p> <p>2.8 Provide and discuss feedback on learner performance to support learning</p>
3. Check training performance	<p>3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge</p> <p>3.2 Monitor learner progress and outcomes in consultation with the learner</p> <p>3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs</p>
4. Review personal training performance	<p>4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement</p> <p>4.2 Maintain, store and secure learner records, according to organisational and legal requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.1	<ul style="list-style-type: none"> Reflects on practice to improve
Reading	1.1, 1.3, 1.4, 2.2	<ul style="list-style-type: none"> Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> Accurately maintains learner records and documentation appropriate to the learning context and audience
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	<ul style="list-style-type: none"> Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	<ul style="list-style-type: none"> Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes Asks questions in order to clarify understanding, and to provide and seek feedback Builds rapport to establish effective working relationships and to achieve effective outcomes
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Assessment Requirements for TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
 - different learning objectives
 - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
 - risk controls for the specific learning environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL404 Mentor in the workplace

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace.

It applies to workplace supervisors or other work colleagues who work under limited supervision and who have responsibility for mentoring one or more individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop a mentoring plan	1.1 Identify scope and boundaries of the mentoring relationship according to organisational procedures 1.2 Document mentoring plan in accordance with organisational requirements 1.3 Establish ground rules and negotiate realistic expectations 1.4 Establish and maintain confidentiality of the relationship in

ELEMENT	PERFORMANCE CRITERIA
	accordance with legislation, policy and procedures
2. Facilitate mentoring relationship	<p>2.1 Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship</p> <p>2.2 Share personal experiences and knowledge with the person being mentored according to agreed objectives</p> <p>2.3 Support the person being mentored to develop and use skills in problem solving and decision making</p> <p>2.4 Use personal and professional networks to assist the person being mentored</p> <p>2.5 Provide information, and guidance to enhance engagement in the workplace</p> <p>2.6 Use techniques for resolving differences without damaging the relationship, and obtain assistance according to organisational policy and procedures</p>
3. Monitor mentoring relationship	<p>3.1 Provide planning assistance and guidance as requested by the person being mentored in a form and style to suit their requirements</p> <p>3.2 Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process</p> <p>3.3 Recognise and discuss changes in the mentoring relationship with appropriate stakeholders</p> <p>3.4 Negotiate and manage closure of the mentoring arrangement once objectives have been met</p>
4. Evaluate effectiveness of mentoring	<p>4.1 Establish and discuss benefits gained from the mentoring process</p> <p>4.2 Reflect on and articulate the personal benefits gained from providing mentoring</p> <p>4.3 Identify and report the outcomes of the mentoring arrangement and the benefits to the organisation according to organisational policy and procedures to improve the mentoring system or program</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4	<ul style="list-style-type: none"> Sources and interprets texts relevant to mentoring context, including organisational policies and learner information
Writing	1.1, 1.3, 2.5, 3.1, 3.2, 4.3	<ul style="list-style-type: none"> Develops content and documents information relevant to mentoring plan
Oral Communication	2.4, 3.3, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> Uses appropriate communication techniques to build rapport, trust, engagement and provide guidance and feedback
Navigate the world of work	1.1, 1.4, 2.6, 4.3	<ul style="list-style-type: none"> Follows legislative requirements, organisational protocols, policies and procedures in workplace mentoring
Interact with others	1.2, 2.1-2.3, 2.5, 2.6, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> Builds rapport using collaboration with others to achieve joint outcomes and effective interaction Provides mentoring and role modelling to achieve agreed outcomes Cooperates and consults with others to clarify understanding and seek feedback
Get the work done	1.1-1.4, 2.1-2.6, 3.1-3.4, 4.1-4.3	<ul style="list-style-type: none"> Plans, organises and completes work according to defined requirements taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to problems, considering options for different approaches

Assessment Requirements for TAEDEL404 Mentor in the workplace

Modification History

Release	Comments
Release1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- preparing a mentoring plan between the mentor and mentee that sets out clear objectives for a mentoring relationship that will last at least one year
- facilitating at least three mentoring sessions
- documenting information on sessions, including comments and notes from both mentor and mentee.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring, including training contracts and responsibilities of employer, registered training organisation (RTO) and funding body where they exist
- mentoring methodologies and strategies
- learning theories in relation to mentoring
- strategies for working with a mentee including encouraging self reflection, confidence and the building of rapport
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- how a mentor can support the mentee's employer to meet its WHS obligations for the mentee.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- documentation of any existing training plan or contract if applicable to the mentoring relationship.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to shift loads safely using manual handling methods. Work must be carried out in compliance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning the manual handling and movement of loads.

It includes assessing the risks associated with relocating the load, planning the relocation process and carrying out the relocation in accordance with the plan.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Assess risks associated with

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Products, goods or materials to be relocated are identified and assessed to determine appropriate relocation method

relocating load

- 1.2 Storage locations are determined and potential routes to be followed are identified
- 1.3 Effect of load relocation on original load base is predicted
- 1.4 Points of balance are estimated
- 1.5 Required clearances are compared to available space and adjustments are made to moving loads to reflect required clearance
- 1.6 Effects of moving contents, which may be loose, liquid, dangerous or hazardous, are considered
- 1.7 Risks in potential routes are considered
- 1.8 Risks to self are identified arising from the required lifting, load carrying, set down or movement of the goods
- 1.9 Manual handling procedures for lifting, lowering and carrying, pushing and pulling are identified
- 1.10 Team lifting processes are considered when moving loads
- 1.11 Appropriate personal protective equipment is determined
- 1.12 Size to weight ratio of items to be manually handled are identified

2 Plan load relocation

- 2.1 Relocation of the load is planned, consistent with the code of practice for manual handling and in accordance with the risk assessment
- 2.2 Process for relocating load is proposed including predicting and planning for potential difficulties
- 2.3 Proposed process is checked for compliance with code of practice and workplace procedures

3 Relocate load

- 3.1 Actions for lifting, lowering and carrying, pulling and pushing a load are in accordance with workplace procedures and WHS/OHS requirements
- 3.2 Applications appropriate for team relocation of load are identified
- 3.3 Team lifting tasks are coordinated
- 3.4 Planned process and route are followed

- 3.5 Relocated materials are set down without damage to goods, personnel or equipment and are checked for stability
- 3.6 Relocation is checked to see it meets work requirements and variance/s are reported

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID1001A Shift materials safely using manual handling methods.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID1001 Shift materials safely using manual handling methods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when manually lifting and handling materials and goods
- applying relevant legislation and workplace procedures
- communicating effectively with others when manually lifting and handling materials and goods
- implementing contingency plans when manually lifting and handling, materials and goods
- interpreting and following operational instructions and prioritising work
- interpreting manual handling risks
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in loads and materials in accordance with standard operating procedures
- reading and interpreting instructions, procedures and information relevant to the manual lifting and handling of materials and goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using correct manual handling practices
- working collaboratively with others when manually lifting and handling materials and goods
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- relevant WHS/OHS procedures and guidelines concerning the manual lifting and movement of loads
- risks when manually lifting and handling materials and goods, and related precautions to control the risk, including:
 - controlled actions on a movement during lifting
 - distance over which load is to be shifted
 - frequency of shifting operations
 - load on the spine during lifting
 - postures and positions during lifting
 - rotation and side movement of the spine during lifting
 - time allowed for shifting the load
 - type, weight and position of the load
 - work layout
 - site layout and obstacles
- workplace procedures and policies for manual handling.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice

and operation manuals.

TLID2022 Conduct weighbridge operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct weighbridge operations in accordance with regulatory requirements and workplace procedures, within the transport and logistics industry.

It includes setting up for weighbridge operations, weighing loaded and unloaded vehicles, finalising weighbridge operations, and completing required records and documentation.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Set up for weighbridge operations**
 - 1.1 Weighbridge systems, including equipment, computer and recording arrangements, are checked for operational status
 - 1.2 Tests to confirm accuracy of weighbridge operation and related functions are conducted in accordance with workplace procedures, manufacturer instructions and relevant legislation
 - 1.3 Accurate reporting of results of inspection and testing is kept in accordance with statutory requirements, workplace procedures and industry guidelines
 - 1.4 Hazards are identified, risks are assessed and control measures are implemented
 - 1.5 Faults/discrepancies in weighbridge operation are identified and appropriate action is undertaken in accordance with workplace procedures
- 2 Weigh loaded vehicles**
 - 2.1 Vehicles likely to exceed weighbridge weight limit are turned away in accordance with workplace procedures
 - 2.2 Vehicles are directed onto platform to obtain accurate weight
 - 2.3 Weight of loaded stationary vehicle is registered against vehicle and load identification
 - 2.4 Vehicle and load information is entered into workplace recording system and driver is issued with receipt and/or statement
 - 2.5 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures
- 3 Weigh unloaded vehicles**
 - 3.1 Vehicles are directed onto platform to obtain accurate weight
 - 3.2 Weight of unloaded stationary vehicle is registered against vehicle
 - 3.3 Proposed load weight is assessed for conformance to statutory requirements
 - 3.4 Loading operations are commenced in accordance with legal loading weight, customer requirements and workplace procedures, and vehicle is re-weighed to establish final load weight, as required
 - 3.5 Vehicle and load information are entered into workplace recording system and invoice is issued to driver, as required

- 3.6 Driver signatures on weighbridge documents, invoices or receipts are obtained in accordance with statutory and workplace requirements
- 3.7 Areas of dispute are resolved or forwarded for further action to be undertaken in accordance with workplace procedures
- 4 Complete weighbridge operations**
 - 4.1 Weighbridge systems, including equipment, computer and recording arrangements are secured or made ready for next shift
 - 4.2 Record of operations is maintained and filed in accordance with workplace procedures and statutory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2022A Conduct weighbridge operations.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID2022 Conduct weighbridge operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- identifying, selecting, and efficiently and effectively using weighbridge equipment
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of weighbridge equipment
- operating and adapting to differences in equipment in accordance with workplace operating procedures
- reading, interpreting and following relevant instructions, procedures and information
- reporting and/or rectifying identified problems, errors or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- setting up and maintaining weighbridge equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- calculation method and approaches for metric and imperial systems
- classification procedures
- correct weighing procedures including statutory and workplace requirements
- emergency response procedures
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- problems that may occur when conducting weighbridge operations and appropriate action that can be taken to resolve these problems
- records and documentation requirements for weighbridge operations
- relevant regulations for conducting weighbridge operations including current Australian Dangerous Goods (ADG) Code
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout
- weights and measures regulations
- workplace procedures for conducting weighbridge operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, weights and measures regulations, national Load Restraint Guide (LRG), current ADG Code, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID3014 Load and unload vehicles carrying special loads

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload vehicles carrying special loads, in accordance with relevant state/territory roads and traffic authority licence and permit requirements and regulations, as well as specific code, regulatory and permit requirements.

It includes loading and unloading special loads onto and from a vehicle, securing and protecting vehicle and load, and completing all required documentation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Load and unload vehicle**
 - 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading procedures
 - 1.2 Hazardous cargo is identified and handled in accordance with required workplace procedures for hazardous and dangerous cargo
 - 1.3 Vehicle is loaded in accordance with vehicle loading regulations and workplace safety requirements
 - 1.4 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
 - 1.5 Vehicle is unloaded or partially unloaded in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
 - 1.6 Ancillary equipment is operated in accordance with company procedures and manufacturer instructions during loading and unloading operations
- 2 Secure and protect vehicle and load**
 - 2.1 Vehicle load is secured using correct load restraint and protection equipment for different loads, vehicles and carriage conditions
 - 2.2 Load is protected in accordance with legal and workplace safety requirements
 - 2.3 Load distribution is checked to ensure it is even, legal and within vehicle safe working capacity
 - 2.4 Loaded vehicle is inspected and checked for security to travel
- 3 Complete documentation**
 - 3.1 Documentation is completed and proofread in accordance with workplace procedures
 - 3.2 All required cargo transportation documentation is completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3014A Load and unload vehicles carrying special loads.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLID3014 Load and unload vehicles carrying special loads

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- applying techniques for load security
- communicating effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying and correctly using equipment required to load and unload various types of special loads
- identifying and interpreting containers and goods coding, International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- interpreting and following operational instructions and prioritising work
- loading and unloading a load safely
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment and conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- using manual handling techniques safely
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics of various types of special loads
- containers and goods coding, IMDG Code markings and emergency information panels, including their meaning and implications for loading and unloading processes
- housekeeping standards and procedures
- methods for securing various types of special loads
- national Load Restraint Guide (LRG)
- relevant state/territory mass and loading regulations for various types of special loads, including current Australian Dangerous Goods (ADG) Code and Australian Code for the Transport of Explosives by Road and Rail
- risks and hazards when loading and unloading various types of special loads, and related precautions to control the risk
- site layout and obstacles
- WHS/OHS procedures and guidelines for lifting and moving loads
- workplace procedures and policies for loading and unloading vehicles designed to carry special loads.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID3020 Care for livestock in transit

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare and care for livestock in transit, in accordance with relevant regulations and industry codes of practice for caring for livestock in transit.

It includes making preparations to transport livestock, caring for and controlling livestock in transit, and using appropriate animal husbandry techniques, as required.

Work is performed under limited or minimum supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Prepare to transport livestock**
 - 1.1 Condition, quality and quantity of livestock to be transported is checked prior to transport operation, in accordance with client requirements and workplace procedures
 - 1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
 - 1.3 Poor quality livestock is identified and reported to specified personnel in accordance with workplace procedures
 - 1.4 Feed provisions and other requirements for livestock, prior to and during transit, are identified and organised
 - 1.5 Portable stockyards are assembled as required
- 2 Care for and control livestock in transit**
 - 2.1 Condition of livestock is regularly monitored during loading, transit and unloading, and appropriate action is taken in accordance with relevant government regulations, workplace procedures, and humane and permit requirements
 - 2.2 Working dogs and appropriate handling equipment are used to aid handling of livestock during loading and unloading operations, in accordance with regulations and workplace procedures
 - 2.3 Required action is taken for care and wellbeing of animals in an accident during transit
 - 2.4 Distressed stock is handled in an appropriate manner in accordance with government regulations and workplace procedures
- 3 Use animal husbandry techniques**
 - 3.1 Symptoms of animal diseases and parasites are identified and appropriate action is taken to control them in accordance with relevant government regulations, workplace procedures, and humane and permit requirements
 - 3.2 Documentation is completed and proofread in accordance with workplace procedures
 - 3.3 Prescribed medication is administered to livestock in accordance with veterinary directions and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3020A Care for livestock in transit.

Links

Assessment Requirements for TLID3020 Care for livestock in transit

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using required equipment
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures and information
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to animals or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian animal welfare standards and guidelines for transporting livestock by land
- housekeeping standards and procedures when caring for livestock during transit
- insurance rights and responsibilities
- methods of securing livestock during transit
- relevant regulations for caring for livestock in transit
- risks when caring for livestock in transit and related precautions to control the risk
- specialised livestock handling equipment and procedures for its use
- work health and safety (WHS)/ occupational health and safety (OHS) procedures and guidelines for lifting and moving loads
- workplace procedures and policies for caring for livestock in transit.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIE2008 Process workplace documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to process workplace documentation in accordance with workplace requirements. Processing documentation is carried out as an integral part of work operations in the context of the workplace concerned.

It includes planning and completing documentation to fulfil an identified purpose.

Work may be performed in team and autonomous working situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan documentation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Purpose of workplace documentation is identified and confirmed

1.2 Information for completing workplace documentation is

collected, interpreted, analysed and organised as required

2 Complete documentation

- 2.1 Required documentation is prepared and/or forms are completed, in accordance with workplace policies and procedures
- 2.2 Information is entered into computer-based documents, as required
- 2.3 Logs or diaries are maintained accurately and in a timely manner, in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE2008A Process workplace documentation.

Assessment Requirements for TLIE2008 Process workplace documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- completing workplace documentation, forms, logs or diaries
- operating and adapting to differences in computing equipment in accordance with standard operating procedures
- reading, interpreting and organising information needed for completing and processing workplace documentation, forms, logs or diaries
- working collaboratively with others when completing and processing workplace documentation, forms, logs or diaries
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- writing and/or entering information into computer-based documentation systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- protocols and procedures for processing workplace documentation using relevant workplace technology
- purpose of workplace documentation, forms, logs or diaries
- relevant work health and safety (WHS)/occupational health and safety (OHS) responsibilities
- relevant procedures and duty of care requirements
- requirements for workplace documentation, forms, logs or diaries
- sources of information for completing workplace documentation, forms, logs or diaries
- typical problems in processing workplace documentation and appropriate action and

solutions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to estimate and calculate mass, area and quantify dimensions of loads in accordance with workplace requirements and relevant regulations, as part of work functions within the transport and logistics industry.

It includes estimating loads to be transported or placed in storage, estimating load limits of transport and/or storage systems, and organising a load.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Estimate loads for transport or storage**
 - 1.1 Order forms/work orders are read and requirements are noted
 - 1.2 Shape, balance characteristics, dimensions and mass of load/s are identified
 - 1.3 Area/volume required for storage is estimated
 - 1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system
- 2 Estimate load limits of transport and/or storage**
 - 2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures
 - 2.2 Capacity of transport and storage systems in terms of mass, area and volume is calculated
- 3 Organise load**
 - 3.1 Load/s is restricted to allowable range
 - 3.2 Load/s is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems
 - 3.3 Appropriate workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3002A Estimate/calculate mass, area and quantify dimensions.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying, selecting and using relevant calculators, computing and office equipment
- interpreting and following operational instructions and prioritising work
- performing basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- reading and interpreting relevant instructions, procedures, information and labels
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to workplace activities
- documentation requirements for the workplace activities concerned
- focus of operation of work systems, equipment, management and site operating systems for transporting and/or storing goods and stock
- problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities, and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines

- workplace procedures and policies for estimating and/or calculating mass, area and volumes of loads, and transport and storage facilities, including the quantification of dimensions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIE3004 Prepare workplace documents

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare workplace documents and forms in accordance with workplace requirements and applicable regulations or codes, as part of work activities within the transport and logistics industry.

It includes planning and preparing simple workplace documents and gathering relevant information enabling the completion of a workplace form.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|-------------------------------------|-----|--|
| 1 Plan workplace document | 1.1 | Purpose and audience for document are identified |
| | 1.2 | Appropriate format for document is established to meet workplace requirements |
| | 1.3 | Relevant information is identified and selected for inclusion in document |
| 2 Prepare workplace document | 2.1 | Document is drafted in accordance with workplace procedures and conventions for sentence construction, grammar, spelling, style, punctuation and vocabulary appropriate for reader/s |
| | 2.2 | Document is edited and presented in a final version appropriate to task |
| 3 Complete workplace forms | 3.1 | Work related form/s is interpreted to identify information required for its completion |
| | 3.2 | Required information for completion of form is gathered from relevant sources in accordance with workplace procedures |
| | 3.3 | Form/s is completed in accordance with workplace policy and procedures, and applicable regulations and codes |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3004A Prepare workplace documents.

TLIF2010 Apply fatigue management strategies

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply fatigue management strategies within the transport and logistics industry. Work is undertaken in compliance with relevant legislation, regulations, codes and guidelines.

It includes identifying and acting on signs of fatigue and implementing appropriate strategies to minimise fatigue during work activities, in particular when operating equipment, trains, vehicles, load shifting equipment, marine vessels and aircraft.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|--|
| 1 Identify and act on signs of fatigue | 1.1 Potential causes of fatigue are identified and action is taken to minimise their effects in accordance with company procedures |
|---|--|

- 1.2 Personal warning signs of fatigue are recognised and necessary steps are taken in accordance with workplace procedures, to ensure that effective work capability and alertness are maintained
- 2 Implement strategies to minimise fatigue**
- 2.1 Workplace procedures are assessed to minimise fatigue
- 2.2 Factors that increase the risk of fatigue-related accidents and incidents are minimised
- 2.3 Fatigue management strategies are implemented in accordance with workplace policy
- 2.4 Lifestyle choices are made that promote the effective long-term management of fatigue
- 2.5 Effective practices in combating fatigue are adopted and applied
- 2.6 Personal fatigue management strategies are communicated to relevant people
- 2.7 Appropriate counter measures are planned to combat fatigue

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF2010A Apply fatigue management strategies.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in rosters and standard operating procedures as they relate to fatigue management
- adjusting lifestyle patterns to ensure effective fatigue management during work activities
- applying precautions and required action to minimise and control the effects of fatigue when carrying out own work functions
- applying relevant legislation and workplace procedures
- communicating effectively with others when applying fatigue management strategies
- identifying and meeting own learning needs about fatigue management related matters
- modifying activities and taking appropriate initiatives to manage fatigue in the workplace depending on work contexts, risk situations and environments
- reading and interpreting instructions, procedures, regulations and signs related to fatigue management and applying them to work activities
- recognising symptoms of fatigue and taking appropriate action in accordance with fatigue management regulations and workplace procedures
- working collaboratively with others to manage and minimise the effects of fatigue during work activities.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on workers
- factors that increase fatigue-related accidents
- how fatigue affects workplace performance

- how fatigue contributes to workplace accidents
- lifestyles that promote effective long-term fatigue management
- relevant fatigue management codes, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) regulations as they relate to fatigue
- risks and hazards created by workplace fatigue
- sources of information on fatigue
- strategies and ways of managing fatigue
- ways of recognising fatigue
- workplace policies and procedures related to fatigue management and the control of factors that can contribute to fatigue and fatigue-related accidents.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulation
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

TLIH2001 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to interpret road maps and to navigate routes as part of transport operations.

It includes identifying and determining the most appropriate route, and completing required route documentation in accordance with operational requirements.

Work is performed under general or limited supervision. It involves the application of map reading principles and procedures when interpreting street directories and road maps, and following pre-determined routes.

Work must be carried out in accordance with relevant state/territory roads and traffic authority regulations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

H – Route Planning and Navigation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify and determine pre-planned route

2 Complete necessary documentation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Pre-determined route documentation is accessed and interpreted
- 1.2 Relevant street directory, global positioning system (GPS) and road maps are identified and accessed
- 1.3 Street directory, GPS and road map symbols are recognised and interpreted
- 1.4 Points of departure and destination are identified in a directory index and information is used to locate designated places on appropriate map
- 1.5 Pre-determined route directions are interpreted and route is traced using a street directory, GPS and road map
- 1.6 Key intersections and other landmarks along route are identified for use in following planned route
- 1.7 Alternative contingency routes are identified for emergencies or traffic delays
- 1.8 Pre-determined route is correctly followed
- 2.1 Required route documentation is completed in accordance with purpose of transportation and workplace requirements
- 2.2 Required route documentation is filed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIH2001A Interpret road maps and navigate pre-determined routes.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIH2001 Interpret road maps and navigate pre-determined routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- completing documentation related to route navigation
- estimating route distances using map information
- interpreting and following operational instructions and prioritising work
- navigating a pre-determined route
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment in accordance with workplace protocols
- planning alternative contingency routes for road works, emergencies or delays
- planning own work, predicting consequences and identifying improvements
- plotting a route from one destination to another relevant to job role
- reading and interpreting relevant instructions, procedures, information and signs
- using global positioning system (GPS) devices to navigate pre-determined routes as required
- using maps and other route documentation to correctly identify and interpret:
 - map symbols
 - roads and intersections
 - town and suburb locations
- working collaboratively with others as required (such as fleet managers, sales team)
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- current information about accidents or emergencies that might close or restrict traffic on a particular route
- height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- location of service stations/rest stops as required
- operational procedures for interpreting road maps, using GPS devices and navigating routes
- relevant state/territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- security hazards and issues
- traffic conditions at various times of the day/night along specific routes
- typical problems that may arise concerning interpreting road maps, using GPS devices and navigating pre-determined routes, and appropriate action that should be taken
- workplace requirements for recording and documenting route information.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry:
 - GPS
 - road map

- street directory.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

TLIH3002 Plan and navigate routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to plan and navigate routes as part of transport operations, in accordance with relevant state/territory roads and traffic authority regulations.

It includes interpreting information from a road map, street directory or global positioning system (GPS) device; planning the most appropriate route taking into account pertinent factors; and completing required trip documentation in accordance with operational requirements.

This unit relates to the work of transport and distribution personnel involved in passenger services and/or the delivery of a range of possible goods and materials including valuables, secured products documents and materials.

Work is performed under general or limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

H – Route Planning and Navigation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Interpret street maps

2 Plan routes

3 Follow planned route

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Symbols in a street directory/road map/GPS are recognised and interpreted
- 1.2 Places are identified in a directory index and information is used to locate places on appropriate map
- 2.1 Given a location and a destination, the most direct and alternative routes between two points are identified using a street directory/road map/GPS
- 2.2 Hazards are identified, risks are assessed and control measures are implemented
- 2.3 Information on height, width and load limits of road infrastructure and other restrictions on thoroughfares is accessed, interpreted and taken into account when planning a route for a journey, as required
- 2.4 Suitable route is selected to ensure the most efficient, safe, secure and legal transport operation, taking into account relevant criteria for transport operation concerned
- 3.1 Planned route is correctly followed with aid of a street directory, road map and/or GPS system
- 3.2 Geographic regions, tourism features and other places of interest are identified, as required
- 3.3 Route documentation is completed in accordance with purpose of transportation and workplace requirements
- 3.4 Parking procedures are observed in accordance with enterprise procedures and relevant legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIH3002A Plan and navigate routes.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIH3002 Plan and navigate routes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and interpreting required information and developing contingency routes (including road restrictions, traffic conditions, service stations/rest stops)
- adapting to changes and difference in vehicle navigation technology, maps and street directories as they relate to route planning
- adapting to changes in vehicle navigation technology, maps and street directories as they relate to route planning
- applying fatigue management techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- completing relevant documentation
- implementing contingency arrangements
- interpreting and following operational instructions and prioritising work
- interpreting information to allow effective route planning
- modifying route planning activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in vehicles, loads and equipment in accordance with standard operating procedures
- planning alternative routes for contingencies such as road works, emergencies or delays
- planning and navigating a route effectively
- planning for transport routes to meet workplace requirements
- planning routes in accordance with workplace guidelines
- reading and interpreting relevant instructions, procedures, information and signs:
 - estimating route distances using map information
 - identifying roads and intersections
 - identifying town and suburb locations
 - reading and interpretation of map symbols
- reporting and/or rectifying identified problems promptly, in accordance with workplace procedures

- selecting and using relevant route planning and navigation technology including GPS devices.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic GPS operation
- current information about accidents or emergencies that might close or restrict traffic on particular routes
- features and contents of maps and street directories, and techniques for their use in transport navigation
- known traffic conditions at various times of the day along specific routes
- location of service stations and rest stops
- operational procedures for planning and navigating transport routes
- physical hazards such as height, width and mass limitations of bridges, tunnels and other critical physical structures along a possible route
- relevant state/territory permit and licence regulations and requirements
- road conditions for various routes, including sections undergoing road works
- security hazards on long routes
- workplace requirements for recording and documenting route information.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

TLIL5019 Implement and monitor transport logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and monitor transport logistics in accordance with relevant regulatory requirements, standards and codes of practice, including the Australian Dangerous Goods (ADG) Code and workplace procedures.

It includes mobilising resources, coordinating multi-modal transport activities, monitoring consignment/s and implementing a contingency management strategy.

Work is under general guidance on progress and outcomes of work. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

The unit generally applies to those with responsibility for resource coordination and allocation, who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Mobilise resources**
 - 1.1 Optimal resource level is acquired to meet operational schedule requirements
 - 1.2 Relevant regulatory and insurance requirements are determined and implemented
 - 1.3 Allocated resources are assessed and monitored to ensure operational effectiveness and efficiency
 - 1.4 Changes to resource allocation are undertaken where deficiencies or over-supply are apparent, in accordance with enterprise procedures
- 2 Coordinate multi-modal transport activities**
 - 2.1 Facilities, personnel and equipment are made ready to accommodate interchange functions
 - 2.2 Security arrangements are invoked as required
 - 2.3 Loading and unloading operations are conducted in accordance with operational schedule and applicable statutory requirements, codes of practice and enterprise procedures
 - 2.4 Relevant documentation is completed/updated in accordance with operational schedule and reporting requirements
- 3 Monitor consignment tracking**
 - 3.1 Consignment tracking systems are monitored against workplace quality standards
 - 3.2 Variations from workplace quality standards are identified and appropriate action is initiated to rectify identified problems or to institute required improvements
- 4 Implement contingency management strategy**
 - 4.1 Operational schedule is continually reviewed in taking into account information updates, reports and feedback
 - 4.2 Nature, extent and impact of issues or incidents are identified and assessed against contingency management strategy
 - 4.3 Relevant information is processed to establish priorities and responses for dealing with issues or incidents
 - 4.4 Operations are redirected and controlled to meet changes in transport environment and tasks, in accordance with enterprise procedures
 - 4.5 Liaison is initiated and maintained with organisations/individuals affected by changed operational schedules

4.6 Actions undertaken are clearly documented and filed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL5019A Implement and monitor transport logistics.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIL5019 Implement and monitor transport logistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating effectively with others when implementing and monitoring transport logistics
- completing documentation related to implementing and monitoring transport logistics
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communication equipment to required protocol
- prioritising work and coordinating self and others in relation to transport logistics activities
- providing leadership and working collaboratively with others
- reading and interpreting transport schedules, regulatory requirements, customer instructions, workplace procedures and manuals relevant to implementing and monitoring transport logistics
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and applying appropriate application of technology, information systems and procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of current competencies within functional activity
- application of relevant Australian standards and associated certification requirements
- business policies, procedures and plans including procedures for outsourcing components of operations and engaging additional resources
- code, regulatory, permit and licence requirements relevant to transport logistics
- operational transport logistics systems, resources, management and workplace operating systems
- problems that may occur when implementing and monitoring transport logistics and action that can be taken to resolve or report these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and regulations
- relevant regulations, codes of practice and legislative requirements including local and international regulations relevant to transport logistics
- relevant workplace documentation procedures
- resource availability including the competencies of individuals in the team/group
- risks and hazards related to implementing and monitoring transport logistics and ways of controlling the risks involved
- transport and equipment applications, capacities, configurations, safety hazards and control mechanisms
- workplace policies and procedures, including those covering issue resolution and grievance
- workplace procedures for implementing and monitoring transport logistics.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to operate a forklift truck safely.

Forklift truck means a powered industrial truck equipped with lifting media made up of a mast and an elevating load carriage to which is attached a pair of fork arms or other arms that can be raised 900 mm or more above the ground, but does not include a pedestrian-operated truck or a pallet truck.

A person performing this work is required to hold a forklift truck high risk work (HRW) licence.

This unit requires a person operating a forklift truck to plan the work, conduct routine checks on a forklift truck, shift loads in a safe manner, and safely shut down and secure equipment after completing operations.

Licensing/Regulatory Information

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, HRW and meets Commonwealth, state and territory HRW licensing requirements.

Any alteration to this unit would result in a unit that would not be acceptable to work health and safety (WHS)/occupational health and safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit

Not applicable.

Competency Field

LIC – Licensing

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan work

- 1.1 Potential workplace hazards are identified
- 1.2 Risk control measures are identified consistent with regulatory requirements and the hierarchy of control
- 1.3 Appropriate forklift truck is selected in accordance with load and workplace conditions
- 1.4 Working area is inspected to determine appropriate paths for moving loads and forklift truck in accordance with workplace conditions
- 1.5 Methods for communicating are identified and confirmed in accordance with workplace procedures

2 Conduct routine checks

- 2.1 Prior to operation, forklift truck is visually checked for any damage or defects
- 2.2 All signage and labels are checked to ensure they are visible and legible, in accordance with the appropriate standard
- 2.3 All controls are located, identified and confirmed
- 2.4 Pre-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures
- 2.5 Forklift truck is started in accordance with manufacturer specifications and workplace procedures, and is checked for any abnormal noise
- 2.6 Post-start operational checks are carried out in accordance with manufacturer specifications and workplace procedures

- 2.7 All forklift truck functions and safety devices are tested to their maximum in accordance with manufacturer specifications and workplace procedures
- 2.8 Issues, defects and damage identified during routine checks are reported and recorded in accordance with workplace procedures, and appropriate action is taken

3 Shift load

- 3.1 Weight of load is assessed to ensure compliance with forklift truck data plate specifications
- 3.2 Appropriate hazard prevention/control measures are implemented and communicated to personnel in the work area
- 3.3 Forklift truck is operated at a safe speed in accordance with manufacturer specifications and workplace procedures
- 3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards
- 3.5 Load movement is monitored constantly to ensure safety of personnel and load, and structural stability
- 3.6 Unplanned and/or unsafe situations are responded to in accordance with workplace procedures and emergency plans

4 Shut down and secure forklift truck

- 4.1 Forklift truck is parked to avoid hazards
- 4.2 Forklift truck is shut down in accordance with manufacturer specifications and workplace procedures
- 4.3 Routine post-operational forklift truck checks are carried out in accordance with manufacturer specifications and workplace procedures
- 4.4 Forklift truck is secured to prevent unauthorised access/use
- 4.5 All defects and damage are reported and recorded in accordance with manufacturer specifications and workplace procedures, and appropriate action is taken

Foundation Skills

The language, literacy, numeracy and employment skills that are essential to performance that are not explicit in the unit are listed below.

Skill	Performance feature
Employment skills to:	<ul style="list-style-type: none"> • operate a forklift truck in different types of workplaces transferring key principles of safe operation to different contexts • improve own performance in safely and efficiently operating a forklift truck by incorporating learnings from different workplaces and different conditions into current performance
Numeracy skills to:	<ul style="list-style-type: none"> • interpret numerical information including: <ul style="list-style-type: none"> • selecting appropriate forklift in accordance with load and workplace conditions • load weight assessment, to ensure compliance with forklift truck data plate specifications • controlling and monitoring instrument readings
Language skills to:	<ul style="list-style-type: none"> • use and interpret vocabulary specific to forklift truck operations and workplace procedures to communicate with other workplace personnel • use non-verbal feedback to support effective communication • use relevant communications conventions
Literacy (reading) skills to:	<ul style="list-style-type: none"> • interpret documentation that includes technical specificity including: <ul style="list-style-type: none"> • forklift truck data plate • plant operation manuals and manufacturer specifications • workplace procedures, including emergency plan • workplace signage and labels
Literacy (writing) skills to:	<ul style="list-style-type: none"> • accurately record and maintain information relating to operating a forklift truck, including: <ul style="list-style-type: none"> • incident reports • vehicle checking and maintenance records
Self-management skills	<ul style="list-style-type: none"> • implement risk control measures • initiate emergency management strategies

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit is equivalent to TLILIC2001A Licence to operate a forklift truck

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLILIC2001 Licence to operate a forklift truck

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

A person who demonstrates competency in this unit must provide evidence of safely operating a forklift truck and satisfy all of the unit elements, performance criteria and foundations skills requirements on at least one occasion including:

- applying risk assessment and hazard control strategies, including hierarchy of control as applied to safely operating a forklift truck
- carrying out post-start operational checks, which must ensure:
 - attachment movements and control functions are smooth and comply with operating requirements
 - hazard warning systems (e.g. lights and horns) are functional
 - safety devices are checked, including
 - deadman's switch
 - emergency descent device (hydraulic)
 - reversing beepers
 - start-up is in accordance with procedures
 - steering, transmission and brake functions comply with operating requirements
- carrying out pre-start operational checks, which must include:
 - battery charge checks, as required
 - ensuring availability of logbook, records, handbook and/or operating manuals
 - fitting and interpreting forklift truck data plate
 - fluid checks
 - forklift truck attachment security checks
 - identifying approved modifications and/or attachments fitted, to manufacturer specifications in accordance with forklift truck or attachment data plate
 - locating, identifying and confirming all controls
 - safety equipment checks
 - signage and label visibility and legibility checks
 - updating records as required
- communicating with other workplace personnel through
 - using appropriate worksite protocols

- listening
- making and interpreting hand signals
- questioning to confirm understanding
- signage
- verbal and non-verbal language
- written instructions
- complying with Commonwealth, state and territory work health and safety (WHS)/occupational health and safety (OHS) legislation and regulations
- conducting and monitoring safe forklift truck operations that include moving loads safely, driving and manoeuvring, picking up and placing loads at various stack heights and carrying out all functions to the maximum height and load capacity
- driving a forklift truck with load in forward and reverse, while maintaining visibility
- planning and preparing for forklift truck operations including:
 - conducting a workplace risk assessment
 - identifying hazards associated with operating a forklift truck, which must include
 - forklift truck instability (e.g. due to overloading, poor load placement, irregular loads)
 - ground conditions (e.g. condition of pavement, slopes)
 - insufficient lighting
 - overhead hazards (e.g. electric lines, service pipes)
 - traffic (e.g. pedestrians, vehicles, other plant) and the risk of collision with people, moving plant and fixed structures
 - weather conditions (e.g. wind, lightning, rain)
 - selecting hazard prevention strategies in accordance with the hierarchy of control
 - putting in place effective controls for identified hazards
 - visually checking a forklift truck for any damage or defects prior to operation including
 - evidence of damage
 - leaks
 - structural weaknesses (including paint separation or stressed welds)
- receiving and interpreting workplace instructions, safety information and emergency procedures
- shutting down a forklift truck in accordance with manufacturer specifications and workplace procedures including
 - parking in a suitable location away from dangerous areas
 - correctly positioning fork arms (tips down, tilted forward, lowered to ground)
 - selecting appropriate transmission/gear for parking (relevant to transmission type)
 - applying hand/parking brake
 - turning off engine power
 - removing ignition key as required
 - shutting off LPG gas cylinder valve as required

- securing equipment in accordance with manufacturer specifications and against unauthorised operation
- securing site
- ensuring access ways are clear
- identifying and segregating defective equipment and reporting to authorised personnel
- connecting batteries to charger as required
- verifying problems and equipment faults, and implementing appropriate response procedures to unplanned and/or unsafe situations including
 - environmental conditions (e.g. wind, lightning, storms)
 - failure/loss of control (e.g. brakes and steering)
 - failure of equipment (e.g. hydraulic system)
 - forklift truck instability (e.g. due to deterioration of ground condition, overloading, poor load placement, irregular loads).

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and industry standards relevant to operating a forklift truck
- Commonwealth, state or territory WHS/OHS legislation and approved codes of practice in relation to one's own responsibilities
- forklift truck characteristics and capabilities (including use of load data plates)
- forklift truck operations and safe operating techniques
- hierarchy of control:
 - elimination
 - substitution
 - isolation
 - engineering controls
 - administrative controls
 - personal protective equipment (PPE)
- methodology to determine weight of a load including the estimation or determination from labels, markings or load paperwork such as:
 - control labels
 - forklift data plates/labels
 - forklift warning decals
- organisational and workplace standards, requirements, policies and procedures for operating a forklift truck
- procedures for recording, reporting and maintaining workplace records and information
- relevant Australian and industry standards, codes of practice and guidelines to safely

- operate a forklift truck
- risk control measures including:
 - barricades and traffic control (e.g. traffic management plan)
 - compliance with permit condition requirements from electrical supply authority, including
 - adequate illumination
 - disconnected power
 - excavation safeguards
 - insulated electric lines
 - maintaining safety observer zone
 - movement of obstructions
 - observing limits of approach
 - pedestrian control (barricades, signs, etc.)
 - power disconnection or compliance with electrical supply authority requirements
 - safety tags on electrical switches/isolators
 - using safety observer inside exclusion zone
 - using personal protective equipment
 - selecting forklift truck to suit load and workplace conditions
 - typical routine problems encountered operating a forklift truck and equipment, and adjustments required for correction.

Assessment Conditions

Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).

As a minimum, assessors must satisfy applicable regulatory requirements, which may include requirements in the Standards for *Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessment must be conducted in the English language.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which typically reflect:

- performing tasks/activities within timelines that would be expected in a workplace
- standard and authorised work practices, safety requirements and environmental constraints
- using full-scale equipment

Forklift truck operation assessment must be conducted in a working zone in accordance with state/territory arrangements.

If the working zone is located at a 'live' site, assessment should continue in all weather conditions unless the safety of the candidate or others could be compromised.

Simulators must **not** be used in the assessment of this unit of competency.

Accredited assessors are responsible for ensuring that candidates have access to:

- a suitable forklift truck that complies with AS 2359 Powered industrial trucks and is in a safe condition
- associated equipment appropriate to forklift truck operations
- suitable loads
- required personal protective equipment (PPE) for the purpose of Performance Assessment
- relevant workplace procedures and standards for operating a forklift truck, including:
 - approved codes of practice and guidance
 - relevant Australian and international technical standards
 - manufacturer guidelines (instructions, specifications or checklists) for the purpose of Performance Assessment
 - relevant industry standards and operating procedures (where applicable)
 - safe work method statements (SWMS), as required.

TLILIC2001A Licence to operate a forklift truck

Modification History

Not Applicable

Unit Descriptor

Unit Descriptor	This unit specifies the outcomes required for the operation of a powered industrial truck equipped with a mast and an elevating load carriage to which is attached a pair of fork arms or other attachment, for licensing purposes. This definition also includes a truck on which the operator is raised with the attachment for order-picking.
------------------------	--

Application of the Unit

Application of the Unit	<p>THIS UNIT REQUIRES THE OPERATOR TO BE ABLE PLAN THE WORK, CONDUCT ROUTINE CHECKS ON THE FORKLIFT, SHIFT LOADS IN A SAFE MANNER, AND SHUT DOWN AND SECURE THE EQUIPMENT AFTER THE COMPLETION OF OPERATIONS.</p> <p>This unit is based on the National Standard for Licensing Persons Performing High Risk Work.</p> <p>This unit in its current form meets state and territory licensing requirements. Any alteration will result in a unit which is not acceptable to regulators for the purpose of licensing.</p>

Elements and Performance Criteria

ELEMENT <i>Elements describe the essential outcomes of a unit of competency.</i>	PERFORMANCE CRITERIA <i>Performance criteria describe the required performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge and/or the range statement. Assessment of performance is to be consistent with the evidence guide.</i>
1. Plan work	1.1 Potential workplace <i>hazards</i> are identified 1.2 <i>Hazard control measures</i> are identified consistent with <i>appropriate standards</i> to ensure the safety of personnel and equipment 1.3 Appropriate <i>forklift</i> truck is selected according to the load and workplace conditions 1.4 Working area is inspected to determine appropriate path of movement for loads and forklift truck 1.5 <i>Communication methods</i> are identified according to <i>procedures</i>
2. Conduct routine checks	2.1 Forklift is visually checked for any damage or defects 2.2 All <i>signage and labels</i> are visible and legible according to the <i>appropriate standard</i> 2.3 All controls are located and identified 2.4 <i>Pre-start operational checks</i> are carried out according to <i>procedures</i> 2.5 <i>Forklift</i> is started according to <i>procedures</i> and checked for any abnormal noise 2.6 <i>Post-start operational checks</i> are carried out according to <i>procedures</i> 2.7 All forklift functions and safety devices are tested to their maximum according to <i>procedures</i>

	2.8 Defects and damage are reported and recorded according to <i>procedures</i> , and appropriate action is taken
3. Shift load	<p>3.1 The weight of load is assessed to ensure compliance with <i>forklift</i> truck data plate specifications</p> <p>3.2 Appropriate <i>hazard prevention/control measures</i> are implemented and communicated with personnel in the work area</p> <p>3.3 <i>Forklift</i> is operated at a safe speed and according to <i>procedures</i></p> <p>3.4 Loads are moved and placed to ensure stability of material and avoidance of hazards</p> <p>3.5 Load movement is monitored constantly ensuring safety to personnel and load, and structural stability</p> <p>3.6 <i>Unplanned and/or unsafe situations</i> are responded to in line with <i>procedures</i></p>
4. Shut down and secure forklift truck	<p>4.1 <i>Forklift</i> truck is parked to avoid hazards</p> <p>4.2 Forklift is <i>shut down</i> according to <i>procedures</i></p> <p>4.3 Routine post-operational forklift checks are carried out according to <i>procedures</i></p> <p>4.4 Forklift is secured to prevent unauthorised access/use</p> <p>4.5 All defects and damage are reported and recorded according to <i>procedures</i>, and appropriate action is taken</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This describes the essential skills and knowledge and their level required for this unit.

Required skills:

- Accurately interpret information relating to conducting forklift truck operations (e.g. procedures)
- Safely conduct forklift truck operations including all functions to the maximum height and load capacity
- Identify hazards associated with the operation of the forklift truck, assess risks and put into place effective hazard prevention/control measures for those hazards identified
- Use communication skills at a level sufficient to communicate with other site personnel (e.g. receive and interpret work instructions, safety information, emergency procedures)

REQUIRED SKILLS AND KNOWLEDGE

- Drive forklift with load in forward and reverse, maintaining visibility
- Verify problems and equipment faults and demonstrate appropriate response procedures

Required knowledge:

- Methodology of determining the weight of a load
- Commonwealth, state or territory OH&S legislation, standards relevant to the safe operation for the forklift trucks
- Understanding of forklift characteristics and capabilities (including use of load data plates)
- Understanding of the hierarchy of hazard identification and control
- Organisational and workplace standards, requirements, policies and procedures for conducting operations for the crane class
- Procedures for the recording, reporting and maintenance of workplace records and information
- Forklift truck operations and safe operating techniques
- Typical routine problems encountered in the operation of the crane and equipment and adjustments required for correction

Evidence Guide**EVIDENCE GUIDE**

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, the range statement and the assessment guidelines for the Training Package.

Overview of assessment

- Successful assessment of this unit meets the competency requirement of the National Standard for Licensing Persons Performing High Risk Work.
- State/territory OH&S regulators have mandated the use of Assessment Instruments and Instructions for Assessment for this unit which have been endorsed by the national body responsible for OH&S matters.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

- Compliance with OH&S licensing legislation.
- Communicate and work safely with others in the work area.
- Identify hazards associated with the operation of the forklift truck and put in place effective hazard controls for those hazards identified.

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • Conduct pre-start-up, operational, moving loads and shut down and secure checks of the forklift truck according to procedures. • Operate the forklift truck and move loads safely, including driving and manoeuvring, picking up and placing of loads at various stack heights. • Drive forklift truck with load in forward and reverse, maintaining visibility.
Context of and specific resources for assessment	<ul style="list-style-type: none"> • Assessment of the safe application of knowledge and skills to workplace tasks (performance) must be undertaken using the endorsed Assessment Instrument. • Assessment of performance must be undertaken either in the workplace or in a realistically simulated workplace setting. • Assessment must occur under standard and authorised work practices, safety requirements and environmental constraints. • Applicants must have access to: <ul style="list-style-type: none"> • Personal Protective Equipment (PPE) for the purpose of the Performance Assessment • associated equipment appropriate to forklift truck operations • suitable loads as described by the endorsed Assessment Instrument • manufacturers specifications • appropriate forklift truck in a safe condition.
Method of assessment	<ul style="list-style-type: none"> • Assessment must be conducted using the endorsed Assessment Instrument. These Instruments provide instruction on their application. • The use of 'simulators' in the assessment of this unit of competency is not acceptable. • Assessment may be in conjunction with the assessment of other units of competency. • Assessment methods must confirm consistency and accuracy of performance together with application of underpinning knowledge. • Assessment must confirm a reasonable inference that competency is not only able to be satisfied under the particular circumstance, but is able to be transferred to other circumstances.
Guidance information for	<ul style="list-style-type: none"> • Further information about endorsed Assessment Instruments may be obtained from state/territory

EVIDENCE GUIDE**assessment**

OH&S regulators.

Range Statement**RANGE STATEMENT**

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below.

Hazards

May include but not limited to:

- ground conditions (e.g. condition of pavement, slopes)
- overhead hazards (e.g. powerlines, service pipes)
- insufficient lighting
- traffic (e.g. pedestrians, vehicles, other plant)
- weather (e.g. wind, lightning, rain)
- forklift instability (e.g. overloading, poor load placement, irregular loads)
- other hazards (e.g. dangerous materials)

Hazard control measures

Refers to the systematic process of eliminating or reducing the risk to personnel and property through the application of controls

It includes the application of the hierarchy of control, the six-step preference of control measures to manage and control risk:

- 1 elimination
- 2 substitution
- 3 isolation
- 4 engineering control measures
- 5 using safe work practices
- 6 personal protective equipment

Appropriate standards

May include but not limited to:

- legislation
- Australian standards
- manufacturer's specifications
- industry standards (where applicable)

RANGE STATEMENT	
Forklift truck	<p>May include but not be limited to:</p> <ul style="list-style-type: none"> • counterbalanced • reach trucks • rough terrain • internal combustion petrol, diesel, gas • electric
Communications methods	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • verbal and non-verbal language • written instructions • signage • hand signals • listening • questioning to confirm understanding • appropriate worksite protocol
Procedures	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • manufacturer's guidelines (instructions, specifications or checklists) • industry operating procedures • workplace procedures (work instructions, operating procedures, checklists)
Pre-start operational checks	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • safety devices fitted where appropriate • forklift data plate fitted and interpreted • logbook, handbook or operating manuals available • external visual check including, evidence of damage, leaks, visual evidence of structural weaknesses (including paint separation or stressed welds) is carried out • forklift attachment is checked for security • approved modifications and/or attachments fitted to manufacturer's specifications (e.g. as per forklift or attachment data plate) are identified • checks for adaptations or modifications outside manufacturer's specifications (e.g. not listed on the forklift or attachment data plate) are carried out • maintenance logbook/records checked

RANGE STATEMENT	
Post-start operational checks	<p>May include checks of the forklift truck and equipment after start-up to ensure:</p> <ul style="list-style-type: none"> • hazard warning systems (for example lights and horns), are functional • attachment movements and control functions are smooth and comply with operating requirements • steering, transmission and brake functions comply with operating requirements
Hazard prevention/control measures	<p>May include but not limited to:</p> <ul style="list-style-type: none"> • barricades and traffic control • safety tags on electrical switches/isolators • insulated powerlines • safety observer used inside exclusion zone • disconnected power • pedestrian control (barricades, signs, etc.) • excavation safeguards • movement of obstructions • personal protective equipment • adequate illumination
Unplanned and/or unsafe situations	<p>May include but not limited:</p> <ul style="list-style-type: none"> • failure/loss of control (e.g. brakes and steering) • failure of equipment (e.g. hydraulic system) • environmental condition
Shut down	<p>May include, but is not limited to:</p> <ul style="list-style-type: none"> • parking in a suitable location away from dangerous areas • fork arms are correctly positioned (tips down, tilted forward, lowered to ground) • appropriate transmission/gear is selected for parking (relevant to transmission type) • hand/parking brake is applied • engine power is turned off • ignition key is removed (if applicable) • LPG gas cylinder valve is shut off (where fitted) • securing equipment against unauthorised operation • securing the site • ensuring access ways are clear • identifying and segregating defective equipment

RANGE STATEMENT	
	and reporting to authorised personnel <ul style="list-style-type: none">• batteries are connected to the charger (if applicable)

Unit Sector(s)

Not Applicable

TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit specifies the skills and knowledge required to safely operate a boom-type elevating work platform where the length of the boom is 11 metres or more.

Boom-type elevating work platform means a telescoping device, hinged device, or articulated device, or any combination of these, used to support a platform on which personnel, equipment and materials may be elevated.

A person performing this work is required to hold a boom-type elevating work platform high risk work (HRW) licence.

This unit requires a person operating a boom-type elevating work platform to plan the work, conduct routine checks, set up elevating work platform, operate elevating work platform, and shut down and secure elevating work platform.

Licensing/Regulatory Information

This unit is based on the licensing requirements of Part 4.5 of the Model Work Health and Safety (WHS) Regulations, HRW and meets Commonwealth, state and territory HRW licensing requirements.

Any alteration to this unit would result in a unit that would not be acceptable to work health and safety (WHS)/occupational health and safety (OHS) regulators for the purpose of licensing.

Pre-requisite Unit

Not applicable.

Competency Field

LIC – Licensing

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan work

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Potential workplace hazards are identified

1.2 Hazard control measures are identified consistent with appropriate standards to ensure the safety of personnel and equipment

1.3 Elevating work platform is appropriate for the task

1.4 Appropriate communications methods are identified

2 Conduct routine checks

2.1 Service logbook for elevating work platform is checked for compliance

2.2 Elevating work platform is visually checked for damage or defects in accordance with procedures

2.3 Routine pre-operational checks are carried out in accordance with procedures

2.4 Safety equipment is inspected in accordance with procedures

2.5 Elevating work platform is accessed in a safe manner

2.6 Safety equipment is fitted and secured to elevating work platform in accordance with procedures

2.7 All controls are located and identified

2.8 Elevating work platform is started in accordance with procedures

2.9 All safety devices are identified and tested in accordance with procedures

2.10 Post-start operational checks are carried out in accordance with procedures

- 2.11 Communications equipment is checked for serviceability
- 2.12 All damage and defects are reported and recorded in accordance with procedures, and appropriate action is taken
- 3 Set up elevating work platform**
 - 3.1 Ground suitability is inspected and checked
 - 3.2 Elevating work platform is driven to or located at work area in accordance with procedures
 - 3.3 Elevating work platform is positioned for work application and stability in accordance with procedures
 - 3.4 Appropriate hazard prevention/control measures are applied to work area in accordance with procedures
 - 3.5 Work gear and tools are stowed and secured
- 4 Operate elevating work platform**
 - 4.1 Elevating work platform is operated using all relevant plant movements in accordance with procedures and appropriate standards
 - 4.2 Elevating work platform is mobilised using best mobile practice and appropriate procedures
 - 4.3 Elevated working platform operations are monitored constantly, to ensure safety of personnel and stability
 - 4.4 Unplanned and/or unsafe situations are responded to in accordance with procedures
- 5 Shut down and secure elevating work platform**
 - 5.1 Elevating work platform is lowered and stowed in accordance with procedures
 - 5.2 Relevant motion locks and brakes are applied as required
 - 5.3 Safety equipment is disconnected from platform
 - 5.4 Egress from elevated work platform is conducted in accordance with procedures
 - 5.5 Outriggers/stabilisers are stowed and secured in accordance with procedures as required
 - 5.6 Plates or packing are stowed and secured as required
 - 5.7 Elevating work platform is shut down in accordance with procedures
 - 5.8 Routine post-operational checks are carried out in

accordance with procedures

5.9 Damage and defects are reported and recorded in accordance with procedures, and appropriate action is taken

Foundation Skills

The language, literacy, numeracy and employment skills that are essential to performance that are not explicit in the unit are listed below.

Skill	Performance feature
Employment skills to:	<ul style="list-style-type: none"> • operate a boom-type elevating work platform with a boom length of 11 metres or more in different types of workplaces transferring key principles of safe operation to different contexts • improve own performance in safely and efficiently operating a boom-type elevating work platform by incorporating learnings from different workplaces and different conditions into current performance
Numeracy skills to:	<ul style="list-style-type: none"> • interpret numerical information including: <ul style="list-style-type: none"> • selecting appropriate boom-type elevating work platform in accordance with load and workplace conditions • load weight assessment, to ensure compliance with boom-type elevating work platform data plate specifications • controlling and monitoring instrument readings
Language skills to:	<ul style="list-style-type: none"> • use and interpret vocabulary specific to boom-type elevating work platform operations and workplace procedures to communicate with other workplace personnel • use non-verbal feedback to support effective communication • use relevant two-way radio conventions
Literacy (reading) skills to:	<ul style="list-style-type: none"> • interpret documentation that includes technical specificity including: <ul style="list-style-type: none"> • boom-type elevating work platform data plate • plant operation manuals and manufacturer specifications • workplace procedures, including emergency plan • workplace signage and labels
Literacy (writing) skills to:	<ul style="list-style-type: none"> • accurately record and maintain information relating to operating a boom-type elevating work platform including: <ul style="list-style-type: none"> • incident reports • vehicle checking and maintenance records
Self-management	<ul style="list-style-type: none"> • implement risk control measures • initiate emergency management strategies

Skill	Performance feature
skills to:	

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit is equivalent to TLILIC2005A Licence to operate a boom-type elevating work platform (boom length 11 metres or more).

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

A person who demonstrates competency in this unit must provide evidence of safely operating a boom type elevating work platform with a boom lengths of 11 metres or more and satisfy all of the elements, performance criteria and foundation skills requirements of the unit on at least one occasion including:

- applying appropriate mathematical procedures to estimate loads
- applying best operating practice including:
 - avoiding ground depressions
 - gently accelerating and braking
 - minimum speed
 - minimum boom/jib length
- applying emergency procedures and safety equipment, including the use of safety harnesses, energy absorbers, lanyard and anchor points
- applying hazard prevention/control measures including:
 - disconnected power
 - illumination requirements
 - insulated electric lines
 - moving obstructions
 - pedestrian controls
 - personal protective equipment
 - safety tags on electrical switches/isolators
 - using safety observer inside exclusion zone
 - suitable area for set-up
 - suitable firm and stable standing
 - traffic barricades and controls
 - trench covers
- applying relevant plant movements including:
 - articulating
 - hinging

- lowering boom
- raising boom
- slewing
- telescoping
- applying risk assessment and hazard control strategies, including hierarchy of control as applied to positioning and safely operating an elevating work platform
- assessing ground conditions to confirm site is suitable (e.g. firm, level and safe) to extend and travel the elevating work platform
- communicating with other workplace personnel through:
 - appropriate worksite protocols
 - bells
 - buzzers
 - listening
 - making and interpreting hand signals
 - questioning to confirm understanding
 - signage
 - two way radios
 - verbal and non-verbal language
 - written instructions
- complying with WHS/OHS licensing legislation
- identifying problems and equipment faults and where practicable demonstrating appropriate response procedures
- operating and controlling a boom type elevating work platform including all functions to their maximum extension within the safe working (rated) capacity including:
 - a telescoping device
 - articulated device
 - hinged device
 - or any combination of the above used to support a platform on which personnel, equipment and materials may be elevated to perform work
- positioning, stabilising, set up of elevating work platforms, including the use of outriggers/stabilisers and packing to ensure that the safest lift is performed
- receiving and interpreting workplace instructions, safety information, emergency procedures
- recording and maintaining accurate information relating to operating elevating work platform
- shutting down a boom type elevating work platform in accordance with manufacturer specifications and workplace procedures including:
 - idling engine to stabilise temperature
 - folding boom/jib into the transport position
 - removing key from ignition
 - retracting boom/jib

- retracting outriggers/stabilisers
- turning off engine
- stabilising a boom type elevating work platform by:
 - correctly positioning plates or packing
 - deploying outriggers
 - establishing correct size plates or packing
- using and interpreting manufacturer specifications and data
- using communications signals including:
 - luff boom down – hand
 - luff boom down – whistle and/or two-way radio
 - luff boom up – hand
 - luff boom up – whistle and/two-way radio
 - stop –hand
 - stop – whistle and/or two-way radio
 - telescope out – hand
 - telescope out – whistle and/or two-way radio
 - telescope in – hand
 - telescope in – whistle and/or two-way radio
- using outriggers/stabilisers and packing to ensure safest lift is performed
- verifying problems and equipment faults and applying appropriate response procedures to unplanned and/or unsafe situations including:
 - contact with overhead electrical conductors
 - damage caused by contact with obstructions
 - environmental conditions (e.g. wind, lightning, storms, etc.)
 - failure of controls
 - illness of personnel
 - loss of power.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- appropriate mathematical procedures for estimating loads to ensure elevating work platform is not overloaded
- Australian and industry standards relevant to operating a boom-type elevating work platform (boom length 11 metres or more)
- boom length capability including:

- nominal reach, measured horizontally from centre point of rotation to outer edge of platform in its most extended position
- vertical distance from floor of platform to surface supporting elevating work platform with platform at its maximum height
- Commonwealth, state or territory WHS/OHS legislation, standards and codes of practice relevant to the full range of processes for the crane class
- ground stability including:
 - backfilled ground
 - bitumen
 - concrete
 - hard compacted soil
 - rock
 - rough uneven ground
 - soft soils
- elevating work platform characteristics, operations and operating techniques
- emergency procedures and safety equipment, including the use of safety harness, energy absorber, lanyard and anchor points
- hazards including:
 - environmental conditions (e.g. wind, lightning, storms, etc.)
 - ground stability (e.g. ground condition, recently filled trenches, slopes)
 - insufficient lighting
 - other specific hazards (e.g. tidal areas, chainsaws, pressure washers, dangerous materials)
 - overhead hazards (e.g. electric lines, service pipes, trees, buildings etc.)
 - traffic (e.g. pedestrians, vehicles, plant)
- hierarchy of hazard identification and control:
 - elimination
 - substitution
 - isolation
 - engineering controls
 - administrative controls
 - personal protective equipment (PPE)
- procedures for recording, reporting and maintaining workplace records and information, including using the service logbook
- organisational and workplace standards, requirements, policies and procedures for conducting elevating work platform operations
- rated capacity and working load limits
- risks associated with overhead electric lines/electrical cables, ground conditions, wind, pedestrians and tipping
- systematic process of eliminating or reducing risk to personnel and property through the application of controls
- typical routine problems encountered in the process and with equipment, and adjustments

required for correction.

Assessment Conditions

Assessments must be conducted by an assessor accredited for this high risk work (HRW) licence class in the Commonwealth/state/territory where the licence will be obtained (i.e. an assessor authorised by a Commonwealth/state/territory WHS/OHS regulator).

As a minimum, assessors must satisfy applicable regulatory requirements, which may include requirements in the Standards for *Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and all assessment must be conducted in the English language.

Assessment of performance must be undertaken in the workplace and/or under realistic workplace conditions which typically reflect:

- performing tasks/activities within timelines that would be expected in a workplace
- standard and authorised work practices, safety requirements and environmental constraints
- using full-scale equipment

Boom-type elevating work platform (boom length 11 metres or more) operation assessment must be conducted in a working zone in accordance with state/territory arrangements.

If the working zone is located at a 'live' site, assessment should continue in all weather conditions unless the safety of the candidate or others could be compromised.

Simulators must **not** be used in the assessment of this unit of competency.

Accredited assessors are responsible for ensuring candidates have access to:

- appropriate boom-type elevating work platform (boom length 11 metres or more) and associated equipment in safe condition
- appropriate safety equipment and devices including:
 - anchor points
 - audible and visual reversing devices
 - energy absorber
 - horns/sirens
 - lanyard
 - lights as required
 - operator restraint devices (platform gate)

- safety harness
- communications equipment including:
 - mobile phone
 - two-way radios
- required personal protective equipment (PPE) for the purpose of the Performance Assessment
- where appropriate, relevant workplace procedures and standards for operating a boom-type elevating work platform including:
 - approved codes of practice and guidance
 - Australian Standards
 - checklists
 - industry operating procedures
 - relevant industry standards (where applicable)
 - manufacturer guidelines (instructions, specifications or checklists) for the purpose of the Performance Assessment
 - safe work method statement (SWMS), as required
 - service logbooks/logbooks
 - signage and labels
 - history record system where service and maintenance history is kept.

TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to source goods/services and to evaluate contractors in accordance with workplace policy and procedures.

The unit generally applies to those with responsibility for resource coordination and allocation and who lead individuals or teams.

It includes analysing supply requirements as well as evaluating and selecting appropriate potential contractors.

This unit involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

Work is performed under general guidance on progress and work outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Analyse supply requirements

- 1.1 Purpose and specifications of required goods/services are identified
- 1.2 Criteria to evaluate potential or existing contractor performance is established
- 1.3 Quantities of required goods/services are determined
- 1.4 Frequency of ordering/requesting of goods/services is identified

2 Evaluate potential contractors

- 2.1 Contractors of requested goods/materials/services are identified
- 2.2 Comparative costings for goods/materials/services are obtained
- 2.3 Contractor ability to provide a consistent level of performance on repeat jobs is assessed
- 2.4 Contractors are evaluated in relation to established criteria and in accordance with workplace and regulatory procedures
- 2.5 Prioritised contractor shortlist is established based on contractor capacity to provide a cost competitive quality service
- 2.6 Contractor selection process outcomes are documented including recommendations for actioning agreements/contracts with selected contractors
- 2.7 Information and data generated during selection process is filed and maintained in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIR4002A Source goods/services and evaluate contractors.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and negotiating effectively with others
- completing relevant documentation
- determining supply requirements
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures and signs
- selecting and appropriately applying technology, information systems and procedures to workplace tasks
- sourcing appropriate personnel to supply goods/services in accordance with workplace requirements
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational recording, reporting and statistical analysis systems and resources
- relevant chain of responsibility legislation, regulation and codes of practice requirements
- resource availability including processing capacity of equipment and software systems for data statistical analysis
- typical problems that can occur when sourcing goods and services and evaluating contractors, and related appropriate action that can be taken

- workplace business policies and plans as they relate to supply contracts, including procedures for maintaining confidentiality
- workplace grievance and disputation handling policies and procedures
- workplace policies, procedures and protocols for sourcing and supplying goods/services, and evaluating potential supply contractors.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

TLIR4003 Negotiate a contract

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to contract transport and logistics services in compliance with relevant regulations, standards, legal requirements, codes of practice and workplace procedures.

It includes negotiating the contract, finalising the contract negotiations, as well as completing all contract requirements with a contractor.

The unit generally applies to those with responsibility for resource coordination and allocation, and who lead individuals or teams.

Work is under general guidance on progress and outcomes. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Negotiate contract specifics with contractor

1.1 Requirements of the contract are clearly documented and agreed to by the relevant parties

1.2 Areas of ambiguity or concern are clarified and resolved

1.3 Negotiations are undertaken with selected contractor for the contracting of required goods/services on a 'without prejudice' basis

1.4 Conditions for service and/or supply of goods/services are agreed between the enterprise and the contractor including the determination of key performance indicators

1.5 Alternative contractors are negotiated with if agreement is unable to be reached with preferred contractor

1.6 Contract negotiations are conducted in accordance with established workplace requirements and relevant legislation

2 Complete contract negotiations

2.1 Contract documentation is drafted in accordance with relevant legislation, workplace procedures and negotiated conditions of service and supply

2.2 Technical support in drafting contracts is accessed as required

2.3 Contract documentation is signed and exchanged between relevant parties

3 Complete enterprise contract requirements

3.1 Documentation systems are established to ensure traceability of orders and financial transactions

3.2 Workplace systems that require interaction with contractors are identified and actioned

3.3 Quality assurance procedures for supplied goods/services are initiated

3.4 Contract and ancillary documentation is completed and stored as required, in accordance with workplace procedures and regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIR4003A Negotiate a contract.

Assessment Requirements for TLIR4003 Negotiate a contract

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when negotiating a contract
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when negotiating a contract
- completing documentation related to negotiating a contract
- modifying activities to cater for variations in workplace contexts and environment
- operating electronic communications equipment to required protocol
- planning and monitoring work activities in terms of schedule
- prioritising work and coordinating self and others in relation to workplace activities
- providing leadership and working collaboratively with others when negotiating a contract
- reading, interpreting and following instructions, procedures and regulatory requirements relevant to negotiating a contract
- selecting and applying appropriate technology and information systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and the range of conditions on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate risks that may exist when negotiating a contract
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when negotiating a contract
- completing documentation related to negotiating a contract
- modifying activities to cater for variations in workplace contexts and environment
- operating electronic communications equipment to required protocol
- planning and monitoring work activities in terms of schedule
- prioritising work and coordinating self and others in relation to workplace activities
- providing leadership and working collaboratively with others when negotiating a contract
- reading, interpreting and following instructions, procedures and regulatory requirements relevant to negotiating a contract
- selecting and applying appropriate technology and information systems.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

UETDREL14A Working safely near live electrical apparatus as a non-electrical worker

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

1) Scope:

1.1) Descriptor

This Competency Standard Unit covers compliance with working safely up to the defined “safe approach distance” near energised electrical apparatus (inc. electrical powerlines) for non-electrical workers. It includes work functions that may be performed, such as vegetation control, scaffolding, rigging, painting, and/or any other activity that requires working safely and complying with requirements and/or established procedures near live electrical apparatus by a non-electrical worker. Also included is the preparation of risk assessment control measures that encompass job safety assessment. It does not include any work that is or may be performed by other competent operatives within the defined “safe working zone”. The defined “safe working zone” is that so defined by relevant State or Territory regulatory agencies/bodies, local government legislation, Industry bi-partite body – Guidelines/Codes of Practices or other related requirements for Safe work and access near live Electrical and Mechanical Apparatus.

Application of the Unit

Application of the Unit 2)

This competency standards unit shall apply to Transmission, Distribution, Rail Traction, Telecommunications and Vegetation Management Control industry sectors.

Licensing/Regulatory Information

License to practice 3)

The skills and knowledge described in this unit may require a licence/registration to practice in the work place subject to regulations for undertaking of electrical work. Practice in workplace and during training is also subject to regulations directly related to Occupational Health and Safety, electricity/telecommunications/gas/water industry safety and compliance, industrial relations, environmental protection, anti discrimination and training. Commonwealth, State/Territory or Local Government legislation and regulations may exist that limits the age of operating certain equipment.

Pre-Requisites

Prerequisite Unit(s) 4)

Competencies 4.1)

Granting of competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed.

Where pre-requisite pathways have been identified. All competencies in the Common Unit Group must be have been completed plus all the competencies in one (1) of the identified Pathway Unit Group(s):

There are no prerequisite competencies to this unit.

Literacy and numeracy skills 4.2)

Participants are best equipped to achieve this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 "Literacy and Numeracy".

Reading 3 Writing 3 Numeracy 3

Employability Skills Information

Employability Skills 5)

The required outcomes described in this unit of competency contain applicable facets of Employability Skills. The Employability Skills Summary of the qualification in which this unit of competency is packaged will assist in identifying Employability Skill requirements.

Elements and Performance Criteria Pre-Content

6) Elements describe the essential outcomes of a competency standard unit
Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

1 Prepare to work safely near live electrical apparatus as non-electrical worker	1.1	Instructions related to the work to be performed safely near live electrical apparatus as non-electrical worker are received and confirmed.
	1.2	Relevant requirements and established procedures to be followed and, relevant personnel to be communicated with for the work to be performed are identified.
	1.3	OHS policies and procedures to be followed for the work to be performed are received and confirmed.
	1.4	Suggestions to assist in meeting the safety requirements for working near live electrical apparatus as a non-electrical worker are made to others involved in the work.
	1.5	Hazards are identified, OHS risks assessed and control measures are prioritised, implemented and monitored including emergency exits kept

ELEMENT

PERFORMANCE CRITERIA

- clear according to established procedures.
- 1.6 Scope of responsibility and process of relevant work permit(s) issue is identified, received and confirmed according to requirements and established procedures.
- 1.7 Relevant responsibility associated with First Aid, Safety Observers and/or other related work safety procedures at the worksite are identified in accordance with requirements and established procedures to ensure safety measures are followed in the instance of an incident.
- 1.8 Processes for identifying and reporting client issues to appropriate personnel in accordance with industry/acceptable /community standards are identified.
- 1.9 Site and the work schedule to be prepared are confirmed according to given instructions for a quality outcome and to minimise risk and damage to property, commerce, stock and individuals in accordance and established procedures.
- 1.10 Electricity infrastructure assets, related voltages and requirements for working safely near live electrical apparatus as non-electrical worker are identified.
- 1.11 Safe approach distances including any zones thereof that may apply, as defined in industry guidelines, requirements and/or established procedures for the intended work are confirmed.
- 2 Carry out the work safely near live electrical apparatus as non-electrical worker.
- 2.1 OHS principles and practices to reduce the incidents of accidents are identified in accordance with given instructions, requirements and/or established procedures.
- 2.2 Working safely and complying with all safety requirements for working near live electrical apparatus as a non-electrical worker are followed in accordance with given instructions and

ELEMENT	PERFORMANCE CRITERIA
	established routines/procedures.
	2.3 Processes for monitoring and reporting/referring hazards and OHS risks to the immediate authorised personnel for directions according to established procedures are followed.
	2.4 Non-routine events are referred to the immediate authorised personnel for directions according to established procedures.
	2.5 Unexpected events associated with working safely near live electrical apparatus as a non-electrical worker are responded to using acquired known solutions and skills related to routine procedures to ensure work instructions and established procedures are met.
3 Complete the work safely near live electrical apparatus as non-electrical worker.	3.1 Work schedule and anomalies for completion and checking of the work are reported to authorised personnel in accordance with established procedures.
	3.2 Processes for reporting to authorised personnel accidents and/or incidents are confirmed in accordance with established procedures.
	3.3 Requirements for returning work permit(s) and/or access authorisation permits are confirmed.
	3.4 Appropriate personnel are notified of work completion according to established procedures.
	3.5 Works completion records, report forms/data sheets are completed accurately in accordance with given instructions and established procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

8) Essential Knowledge and Associated Skills (EKAS): This describes the essential

REQUIRED SKILLS AND KNOWLEDGE

skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of working safely near live electrical apparatus as non electrical worker.

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-TEL14A Power Line Safety – Non Electrical Workers

Evidence shall show an understanding of power line safety – non electrical workers to an extent indicated by the following aspects:

T1 Basic electrical principles encompassing:

- Fundamental units - basic measurement of units
- Electrical characteristics of material: characteristics of solid materials, insulators; terms electrical charge, electrical current, electromagnetic forces
- Nature of electrical current and change - basic rules of electrical current flow
- Sources of Electricity: basic fundamentals of alternating current, direct current and single EMF source (induction)
- A simple circuit - circuit protection devices used on the network, effects of an open circuit, a closed circuit and a short circuit and earthing – using the ground as a form of conductor to return current back to a source
- Resistance - relationship between voltage and current and resistance (Ohms Law)
- Effects of current - physiological effects and protection for physiological effects; basic principle by which electrical current can result in the production of heat, light and electromagnetic fields and typical effects of current.
- Three phase and single phase power systems: star delta configurations, three phase star connections, relationship between line and phase voltages, three phase 4 wire systems - purpose of the neutral
- Consequences of short circuits - arc flash, ESI Protection schemes
- Magnetism - magnetic field patterns, concepts of electromagnetism, effects of electromagnetism and magnetic fields around straight conductors
- Hazards encountered in an ESI environment - touch and step potentials, electric shock, fire, chemicals, falls, safe use of tools and equipment.

T2 Transmission, distribution and rail power systems encompassing:

- Relationship between the transmission, distribution and rail/tram system within an overall power system - different organisations responsible for generation, transmission, distribution and rail/tram and, how they correlate and their functions
- Characteristics of a transmission, a distribution and a rail system - principal components, typical voltage levels and methods of transmission and distribution including grid type transmission systems, radial, parallel and ring main feeders
- Relationship between an overhead and underground supply systems within an overall power system - advantages/disadvantages, applications.
- Single line drawings and layouts - drawings and layouts of transmission and distribution systems including, radial, parallel and ring main feeders and the HV

REQUIRED SKILLS AND KNOWLEDGE

equipment associated with substations

T3 Fundamentals for working safely near live electrical apparatus for non-electrical worker encompassing:

- Standards, guidelines/codes of practice, State/Territory/local government legislation, supply authority regulations and or enterprise requirements including relevant certification and licensing, applicable to working safely up to the defined “safe working zone” near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker
- Definitions of terminologies - ‘safe working zone’, ‘risk assessment’, ‘safe approach distances zones’, ‘safe working distances’, ‘work permits’, ‘access authorisation permits’, ‘Technical standards’, ‘isolation procedures’ and ‘compliance requirements’
- OHS policies and procedures for working safely - duties of a safety observer, permit to work systems and isolation procedures, safe application of different types of tools and equipment and operation of mobile plant and machinery (e.g. EWP) near live electrical apparatus
- Techniques and precautions in undertaking different work functions and working safely up to the defined “safe working zone” near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker (work functions that may be performed include, vegetation control, scaffolding, rigging, painting, and/or any other activity that requires working safely near live electrical apparatus by a non-electrical worker)

Evidence Guide

EVIDENCE GUIDE

9) This provides essential advice for assessment of the competency standard unit and must be read in conjunction with the Performance Criteria and the range statement of the competency standard unit and the Training Package Assessment Guidelines.

The Evidence Guide forms an integral part of this Competency Standard Unit and shall be used in conjunction with all component parts of this unit and, performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment 9.1)

Longitudinal competency development approaches to assessment, such as Profiling, require data to be reliably gathered in a form that can be consistently interpreted over time. This approach is best utilised in Apprenticeship programs and reduces assessment

intervention. It is the Industry's preferred model for apprenticeships. However, where summative (or final) assessment is used it is to include the application of the competency in the normal work environment or, at a minimum, the application of the competency in a realistically simulated work environment. It is recognised that, in some circumstances, assessment in part or full can occur outside the workplace. However, it must be in accord with Industry and, Regulatory policy in this regard.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Hence, sources of evidence need to be 'rich' in nature so as to minimise error in judgment.

Activities associated with normal every day work have a bearing on the decision as to how much and how detailed the data gathered will contribute to its 'richness'. Some skills are more critical to safety and operational requirements while the same skills may be more or less frequently practiced. These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments. Sample assessment instruments are included for Assessors in the Assessment Guidelines of this Training Package.

Critical aspects of evidence required to demonstrate competency in this unit 9.2)

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated Performance Criteria shall be demonstrated on at least two occasions in accordance with the "Assessment Guidelines – UET12". Evidence shall also comprise:

- A representative body of Performance Criteria demonstrated within the timeframes typically expected of the discipline,

work function and industrial environment. In particular this shall incorporate evidence that shows a candidate is able to:

- Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the Performance Criteria and range; and
- Apply sustainable energy principles and practices as specified in the Performance Criteria and range; and
- Demonstrate an understanding of the essential knowledge and associated skills as described in this unit to such an extent that the learner's performance outcome is reported in accordance with the preferred approach; namely a percentile graded result, where required by the regulated environment; and
- Demonstrate an appropriate level of employability skills; and
- Conduct work observing the relevant Anti Discrimination legislation, regulations, policies and workplace procedures; and
- Demonstrated performance across a representative range of contexts from the prescribed items below:

Range of tools/equipment/materials/procedures/workplaces/other variables		
Group No	The minimum number of items on which skill is to be demonstrated	Item List
A	All of the following:	Confirmation of the "safe working zone" for Safe work and access near live Electrical Apparatus Identification of the relevant technical standards. Acts, regulations and codes/guidelines Identification of established (Enterprise) procedures
B	All of the following:	Confirmation of the principles of electricity,

		<p>the three phase power system, electric shock and resuscitation, power system</p> <p>Recognition of aerial voltage systems</p> <p>Identification of Low Voltage Aerial Circuits</p> <p>Identification of High Voltage</p>
C	All of the following:	<p>Procedures in the event of an incident</p> <p>Events constituting an incident</p> <p>Procedures for responding to incidents</p> <p>Hazard and risk assessment procedure</p> <p>Conduct Work-site Hazard Assessment</p> <p>Confirmation of essential components of Hazard Assessment Checks</p> <p>Applying Hazard Identification in Electrical Work</p> <p>Confirmation of the Basic Safety Principles for Work on Electrical works</p> <p>Hazard Identification and Risk Assessment</p> <p>Hazard Control</p> <p>Risk Assessment and Management (JSAs) Control</p> <p>The Hierarchy of Controls including Evaluation, Worksite Hazard and Risk</p>

		Assessment Checklist, Pre-job Hazard Assessment Check (HAC) Items, Planned Inspection and Pre-Work Hazard Risk Assessment Form
D	All of the following:	Use of work permits and/or authorisation permits Sustainable energy principles and practices Possible affects of weather conditions on working near electrical apparatus as a non-electrical worker
E	At least one occasion	Dealing with an unplanned event by drawing on essential knowledge and associated skills to provide appropriate solutions incorporated in the holistic assessment with the above listed items.

Context of and specific resources for assessment 9.3)

This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to safely undertake actual work near live electrical apparatus

In addition to the resources listed above, in context of and specific resources for assessment, evidence should show demonstrated

competency working below ground, in limited spaces, with different structural/construction types and method and in a variety of environments.

Method of assessment **9.4)**

This Competency Standard Unit shall be assessed by methods given in Volume 1, Part 3 “Assessment Guidelines”.

Note:

Competent performance with inherent safe working practices is expected in the Industry to which this Competency Standard Unit applies. This requires that the specified essential knowledge and associated skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and associated skills described in this unit.

Concurrent assessment and relationship with other units **9.5)**

For optimisation of training and assessment effort, competence in this unit is not recommended to be assessed concurrently with any other unit.

Range Statement

RANGE STATEMENT

10) This relates to the competency standard unit as a whole providing the range of contexts and conditions to which the Performance Criteria apply. It allows for different work environments and situations that will affect performance.

This Competency Standard Unit shall be demonstrated in relation to safe working so defined by relevant State or Territory regulatory agencies/bodies, local government legislation, Industry bi-partite body – Guidelines/Codes of Practices or other related requirements for Safe work and access near live Electrical Apparatus.

Work functions that may be performed, such as vegetation control, operation of cranes, elevating work platforms, excavators, concrete pumps etc, scaffolding,

RANGE STATEMENT

rigging, painting, and/or any other activity that requires working safely and complying with requirements and/or established procedures near live electrical apparatus by a non-electrical worker/

Working safely up to the defined “safe working zone” near energised electrical apparatus (inc. electrical powerlines) for non-electrical worker including an understanding of risk assessment control measures that encompass job safety assessment but excluding any work that is or may be performed by other competent operatives within the defined “safe working zone”.

Safe use of plant, equipment and tools within electrical environments including but not limited by the electricity supply infrastructure assets, infrastructure constructions and excavations including an understanding of safe approach distances zones/Safe Working Clearance, work permit(s) and/or access authorisation permits, technical standards and Industry Guidelines, rural applications, road construction, pavements and effect of inclement weather

The following constants and variables included in the element/Performance Criteria in this unit are fully described in the Definitions Section 1 of this volume and form an integral part of the Range Statement of this unit:

- Appropriate and relevant persons
- Appropriate authorities
- Assessing risk
- Authorisation
- Drawings and specifications
- Emergency
- Established procedures
- Hazards
- Identifying hazards
- Legislation
- Notification
- OHS practices
- OHS issues
- Permits and/or permits to work
- Work clearance systems

Competency Field 11)

Entry Level – Cross Discipline Units.

UETIDRRF03B Perform EWP rescue

Modification History

Release	Action		Details	Points
	Update	Pre-requisite	HLTAID001 Provide cardiopulmonary resuscitation	

Unit Descriptor

Unit Descriptor

1) Scope:

1.1) Descriptor

This Competency Standard Unit covers the performance of rescue procedures from an Elevating Work Platform (EWP) in the work place. It specifies the mandatory requirements of rescue from a raised EWP by a work party member on the ground and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for, health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

Application of the Unit

Application of the Unit 2)

This competency standard unit shall be selected as part of an endorsed skill set for the purposes of refresher training and/or to meet regulatory and/or network requirements.

Delivery and assessment of this unit should be undertaken within regard to the requirements of License to Practice (1.2 above), Prerequisite Competencies and Literacy and Numeracy skills (2 above) and the recommendations for concurrent assessment and relationship with other units (9.5 below).

Practice in the workplace and during training is also subject to regulations directly related to occupational health and safety and where applicable contracts of training such as apprenticeships.

Note:

1. Compliance with permits may be required in various jurisdictions and typically relates to the operation of plant, machinery and equipment such as elevating work platforms, powder operated fixing tools, power operated tools, vehicles, road signage and traffic control and lifting equipment. Permits may also be required for some work environments such as confined spaces, working aloft, near live electrical apparatus and site rehabilitation.
2. Compliance may be required in various jurisdictions relating to currency in First Aid, confined space, lifting, risk safety measures etc.

Licensing/Regulatory Information

License to practice 3)

The skills and knowledge described in this unit may require a licence/registration to practice in the work place subject to regulations for undertaking of electrical work. Practice in workplace and during training is also subject to regulations directly related to Occupational Health and Safety, electricity/telecommunications/gas/water industry safety and compliance, environmental protection, anti discrimination and training. Commonwealth, State/Territory or Local Government legislation and regulations may exist that limits the age of operating certain equipment.

ESI employees are required to maintain currency in this Unit for authorisation/approval to work on ESI Networks.

Pre-Requisites

Prerequisite Unit(s) 4)

Competencies 4.1)

Prerequisite Unit(s) 4)

Granting of competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed.

Where pre-requisite pathways have been identified. All competencies in the Common Unit Group must be have been completed.

Common Unit Group

Unit Code	Unit Title
HLTAID001	Provide cardiopulmonary resuscitation

Literacy and numeracy skills 4.2)

Participants are best equipped to achieve this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 ‘Literacy and Numeracy’

Reading	3	Writing	3	Numeracy	3
---------	---	---------	---	----------	---

Employability Skills Information**Employability Skills 5)**

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

6) Elements describe the essential outcomes of a competency standard unit

Performance Criteria describe the required performance needed to demonstrate achievement of the element.
Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1 Prepare to perform EWP rescue procedures	1.1 Instruction in hazards and risk control measures for specific work areas and work activities are identified and obtained. (This will include the risk assessment and control measures taken by the individual performing the rescue).
	1.2 Tools and emergency equipment are checked for safety, functionality and placed in an accessible location to facilitate response and rescue according to established procedures.
2 Carry out EWP rescue procedure.	2.1 Workplace procedures and work instructions for controlling risk are followed.
	2.2 Workplace procedures for removing the victim, where necessary, from contact with or in vicinity of live apparatus and lowering the EWP to the ground are followed.
	2.3 Workplace procedures for removing the victim from the EWP are followed.
	2.4 Workplace procedures for carrying out CPR if required at the site and treatment where necessary by medical professionals are followed.
	2.5 The worksite is secured and entry controlled until appropriate authorities inspect and release the site.
3 Complete the EWP rescue procedure	3.1 Processes for reporting accidents and/or incidents to authorised personnel are confirmed in accordance with established procedures

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

8) Essential Knowledge and Associated Skills (EKAS): This describes the essential skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of performing EWP rescue procedure.

REQUIRED SKILLS AND KNOWLEDGE

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-TRF03B EWP Rescue

Evidence shall show an understanding of EWP rescue to an extent indicated by the following aspects:

T1 Emergency procedures for the EWP rescue of a victim encompassing:

- Inspection of rescue equipment
- Assessing hazards to rescuer, victim and others
- Isolation procedures where appropriate
- Knowledge of Safe Approach Distances (SAD's) appropriate to EWP Rescue
- Involvement of external emergency services
- Emergency retrieval systems

T2 Emergency procedures for the skills required to undertake EWP rescue of a victim encompassing:

- Placement of rescue equipment
- Controlling hazards to rescuer, victim and others
- Maintaining Safe Approach Distances (SAD's) appropriate to EWP Rescue
- Practical demonstration of rescuing a person
- Removing victim to safe location / place of safety

Evidence Guide

EVIDENCE GUIDE

9) This provides essential advice for assessment of the competency standard unit and must be read in conjunction with the Performance Criteria and the range statement of the competency standard unit and the Training Package Assessment Guidelines.

The Evidence Guide forms an integral part of this Competency Standard Unit and shall be used in conjunction with all component parts of this unit and, performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment 9.1)

In accordance with the National Refresher Training Recognition Protocol for the Electricity Supply Industry, this unit is identified as a Refresher Training unit and is only available for use by industry to meet industry protocols and regulatory requirements.

Industry has defined Refresher Training as:

“A competency confirmation event which may include training, the purpose of which is to compensate for or prevent deterioration in a previously achieved standard of performance”

Under the protocol and the applicable State or Territory legislative and regulatory requirements, Electricity Supply Industry employees are required to maintain currency in this Unit for authorisation/approval to work on ESI Networks.

Industry accepts that opportunities to practice emergency procedures are generally restricted to simulated exercises in a controlled environment during competency confirmation programs.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Hence, sources of evidence need to be ‘rich’ in nature so as to minimise error in judgment.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments.

An industry endorsed Learning Assessment Plan (LAP) has been developed to support this unit.

**Critical aspects
of evidence
required to
demonstrate
competency in
this unit** 9.2)

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated Performance Criteria shall be demonstrated at each competency confirmation event.

- In accordance with State and Territory regulations and the “Assessment Guidelines – UET12”. Evidence shall also

comprise:

- Performance demonstrated within the timeframes typically expected of the rescue procedure. In particular the assessment of this unit shall confirm that a candidate is able to:
- Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the Performance Criteria and range; and
- Demonstrate an understanding of the essential knowledge and associated skills as described in this unit to such an extent that the learner’s performance outcome is reported in accordance with the preferred approach; namely a percentile graded result, where required by the regulated environment; and
- Demonstrate an appropriate level of employability skills; and
- Conduct work observing the relevant Anti Discrimination legislation, regulations, policies and workplace procedures; and
- Demonstrated performance across a representative range of contexts from the prescribed items below:

Range of tools/equipment/materials/procedures/workplaces/other variables		
Group No	The minimum number of items on which skill is to be demonstrated	Item List
A	All, to the satisfaction of the assessor	Identification of operational instructions and confirmation of the function of emergency equipment to facilitate rescue from an incident in an EWP
B	All, to the satisfaction of the assessor	Accessing controls and lowering the EWP in accordance with mobile equipment instructions/workplace procedures.

C	All, to the satisfaction of the assessor	Removing the victim from the EWP to the ground in accordance with workplace procedures
---	--	--

Context of and specific resources for assessment 9.3)

This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to safely undertake actual performance of EWP rescue procedures in the workplace.

In addition to the resources listed above, in Context of and specific resources for assessment, evidence should show demonstrated competency working in realistic environment and a variety of conditions.

Method of assessment 9.4)

This Competency Standard Unit shall be assessed by methods given in Volume 1, Part 3 “Assessment Guidelines”.

Note:

Competent performance with inherent safe working practices is expected in the Industry to which this Competency Standard Unit applies. This requires that the specified essential knowledge and associated skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and associated skills described in this unit.

Concurrent assessment and relationship with 9.5)

other units

For optimisation of training and assessment effort, competence in this unit is not recommended to be assessed concurrently with any other unit.

Range Statement

RANGE STATEMENT

10) This relates to the competency standard unit as a whole providing the range of contexts and conditions to which the Performance Criteria apply. It allows for different work environments and situations that will affect performance.

This Competency Standard Unit shall be demonstrated in relation to EWP rescue procedures in the workplace and will include the following:

Applying work procedures and instructions as they apply to risk control and personal safety measures.

Inspection and function of emergency equipment to facilitate a prompt response and rescue from a raised EWP.

Accessing emergency lowering device in accordance with mobile equipment instructions/workplace procedures.

Removing the victim from contact with or in vicinity of live apparatus where necessary in accordance with workplace procedures.

Operation of emergency lowering device in accordance with mobile equipment instructions/workplace procedures.

Lowering the basket to the ground, removing the victim from the basket and performing CPR if required, in accordance with workplace procedures.

Facilitating treatment by medical professionals when and where required

The following constants and variables included in the element/Performance Criteria in this unit are fully described in the Definitions Section 1 of this volume and form an integral part of the Range Statement of this unit:

- Appropriate and relevant persons
- Assessing risk
- Assessment
- Authorisation
- Emergency
- Established procedures
- Fall prevention
- Hazards

RANGE STATEMENT

- Identifying hazards
- Inspect
- Legislation
- Notification
- OHS practices
- OHS issues
- Permits and/or permits to work
- Personnel
- Requirements
- Testing procedures
- Work clearance systems

Refresher Training Unit.

UETTDRRF08B Perform EWP controlled descent escape

Modification History

Not applicable.

Unit Descriptor

Unit Descriptor

1) Scope:

1.1) Descriptor

This Competency Standard Unit covers the performance of Elevating Work Platform (EWP) controlled descent escape procedures in the work place. It specifies the mandatory requirements for self rescue from a raised EWP and how they apply in the context of transmission, distribution or rail work functions. It encompasses responsibilities for, health, safety and risk management processes at all operative levels and adherence to safety practices as part of the normal way of doing work.

Application of the Unit

Application of the Unit 2)

This competency standard unit shall be selected as part of an endorsed skill set for the purposes of refresher training and/or to meet regulatory and/or network requirements.

Delivery and assessment of this unit should be undertaken within regard to the requirements of License to Practice (1.2 above), Prerequisite Competencies and Literacy and Numeracy skills (2 above) and the recommendations for concurrent assessment and relationship with other units (9.5 below).

Practice in the workplace and during training is also subject to regulations directly related to occupational health and safety and where applicable contracts of training such as apprenticeships.

Note:

1. Compliance with permits may be required in various jurisdictions and typically relates to the operation of

plant, machinery and equipment such as elevating work platforms, powder operated fixing tools, power operated tools, vehicles, road signage and traffic control and lifting equipment. Permits may also be required for some work environments such as confined spaces, working aloft, near live electrical apparatus and site rehabilitation.

2. Compliance may be required in various jurisdictions relating to currency in First Aid, confined space, lifting, risk safety measures etc

Licensing/Regulatory Information

License to practice 3)

The skills and knowledge described in this unit may require a licence/registration to practice in the work place subject to regulations for undertaking of electrical work. Practice in workplace and during training is also subject to regulations directly related to Occupational Health and Safety, electricity/telecommunications/gas/water industry safety and compliance, environmental protection, anti discrimination and training. Commonwealth, State/Territory or Local Government legislation and regulations may exist that limits the age of operating certain equipment.

ESI employees are required to maintain currency in this Unit for authorisation/approval to work on ESI Networks.

Pre-Requisites

Prerequisite Unit(s) 4)

Competencies 4.1)

Granting of competency in this unit shall be made only after competency in the following unit(s) has/have been confirmed.

Where pre-requisite pathways have been identified. All competencies in the Common Unit Group must have been completed plus all the competencies in one (1) of the identified Pathway Unit Group(s):

Prerequisite Unit(s) 4)

There are no prerequisite competencies to this unit.

Literacy and numeracy skills 4.2)

Participants are best equipped to achieve this unit if they have reading, writing and numeracy skills indicated by the following scales. Description of each scale is given in Volume 2, Part 3 “Literacy and Numeracy”

Reading 3 Writing 3 Numeracy 3

Employability Skills Information**Employability Skills 5)**

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

6) Elements describe the essential outcomes of a competency standard unit Performance Criteria describe the required performance needed to demonstrate achievement of the element. Assessment of performance is to be consistent with the Evidence Guide.

Elements and Performance Criteria**ELEMENT****PERFORMANCE CRITERIA**

1 Prepare to perform EWP controlled descent escape	1.1	Instruction in hazards and risk control measures for specific work areas and work activities are identified and obtained.
	1.2	Tools and emergency descent equipment is checked for safety and function to ensure accessibility according to established procedures.

ELEMENT	PERFORMANCE CRITERIA
2 Carry out EWP controlled descent escape	2.1 Workplace procedures and work instructions for controlling risk are followed.
	2.2 Workplace procedures for evacuating a EWP basket employing emergency descent equipment are followed.
	2.3 The worksite is secured and entry controlled until appropriate authorities inspect and release the site.
3 Complete the EWP controlled descent escape procedure	3.1 Processes for reporting accidents and/or incidents to authorised personnel are confirmed in accordance with established procedures.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

8) Essential Knowledge and Associated Skills (EKAS): This describes the essential skills and knowledge and their level, required for this unit.

Evidence shall show that knowledge has been acquired of EWP controlled descent escape procedures.

All knowledge and skills detailed in this unit should be contextualised to current industry practices and technologies.

KS01-TRF08B EWP Controlled descent escape

Evidence shall show an understanding of EWP controlled descent escape to an extent indicated by the following aspects:

T1 Procedures for EWP controlled descent escape encompassing:

- Inspection of rescue equipment
- Assessing hazards to self and others
- Involvement of external emergency services as appropriate
- Knowledge of Safe Approach Distances (SAD's) appropriate to EWP controlled descent escape

T2 Skills required for EWP controlled descent escape encompassing:

- Fitting of rescue equipment
- Controlling hazards to self and others
- Maintaining Safe Approach Distances (SAD's) for an EWP controlled descent escape

REQUIRED SKILLS AND KNOWLEDGE

- Practical demonstration of rescuing self
- Removing self to safe location / place of safety

Evidence Guide

EVIDENCE GUIDE

9) This provides essential advice for assessment of the competency standard unit and must be read in conjunction with the Performance Criteria and the range statement of the competency standard unit and the Training Package Assessment Guidelines.

The Evidence Guide forms an integral part of this Competency Standard Unit and shall be used in conjunction with all component parts of this unit and, performed in accordance with the Assessment Guidelines of this Training Package.

Overview of Assessment 9.1)

In accordance with the National Refresher Training Recognition Protocol for the Electricity Supply Industry, this unit is identified as a Refresher Training unit and is only available for use by industry to meet industry protocols and regulatory requirements.

Industry has defined Refresher Training as:

“A competency confirmation event which may include training, the purpose of which is to compensate for or prevent deterioration in a previously achieved standard of performance”

Under the protocol and the applicable State or Territory legislative and regulatory requirements, Electricity Supply Industry employees are required to maintain currency in this Unit for authorisation/approval to work on ESI Networks.

Industry accepts that opportunities to practice emergency procedures are generally restricted to simulated exercises in a controlled environment during competency confirmation programs.

The critical safety nature of working with electricity, electrical equipment, gas or any other hazardous substance/material carries risk in deeming a person competent. Hence, sources of evidence need to be ‘rich’ in nature so as to minimise error in judgment.

Methods chosen for a particular assessment will be influenced by various factors. These include the extent of the assessment, the

most effective locations for the assessment activities to take place, access to physical resources, additional safety measures that may be required and the critical nature of the competencies being assessed.

These points are raised for the assessors to consider when choosing an assessment method and developing assessment instruments.

An industry endorsed Learning Assessment Plan (LAP) has been developed to support this unit.

Critical aspects of evidence required to demonstrate competency in this unit 9.2)

Before the critical aspects of evidence are considered all prerequisites shall be met.

Evidence for competence in this unit shall be considered holistically. Each element and associated Performance Criteria shall be demonstrated at each competency confirmation event.

- In accordance with State and Territory regulations and the “Assessment Guidelines – UET12”. Evidence shall also comprise:
 - A performance demonstrated within the timeframes typically expected of the rescue procedure. In particular the assessment of this unit shall confirm that a candidate is able to:
 - Implement Occupational Health and Safety workplace procedures and practices including the use of risk control measures as specified in the Performance Criteria and range; and
 - Demonstrate an understanding of the essential knowledge and associated skills as described in this unit to such an extent that the learner’s performance outcome is reported in accordance with the preferred approach; namely a percentile graded result, where required by the regulated environment; and
 - Demonstrate an appropriate level of employability skills; and
- Conduct work observing the relevant Anti Discrimination legislation, regulations, policies and workplace procedures; and

- Demonstrated performance across a representative range of contexts from the prescribed items below:

Range of tools/equipment/materials/procedures/workplaces/other variables		
Group No	The minimum number of items on which skill is to be demonstrated	Item List
A	All, to the satisfaction of the assessor	Accessing, inspecting, securing and attaching emergency descent equipment to self in accordance with workplace procedures
B	All, to the satisfaction of the assessor	Evacuating the EWP and descending to the ground in accordance with workplace procedures

Context of and specific resources for assessment 9.3)

This unit should be assessed as it relates to normal work practice using procedures, information and resources typical of a workplace. This should include:

- OHS policy and work procedures and instructions.
- Suitable work environment, facilities, equipment and materials to safely undertake actual performance of EWP controlled descent escape procedures in the workplace.

In addition to the resources listed above, in Context of and specific resources for assessment, evidence should show demonstrated competency working in a realistic environment and a variety of conditions.

Method of assessment 9.4)

This Competency Standard Unit shall be assessed by methods given in Volume 1, Part 3 “Assessment Guidelines”.

Note:

Competent performance with inherent safe working practices is expected in the Industry to which this Competency Standard Unit applies. This requires that the specified essential knowledge and associated skills are assessed in a structured environment which is primarily intended for learning/assessment and incorporates all necessary equipment and facilities for learners to develop and demonstrate the essential knowledge and associated skills described in this unit.

**Concurrent
assessment and
relationship with
other units**

9.5)

For optimisation of training and assessment effort, competence in this unit is not recommended to be assessed concurrently with any other unit.

Range Statement

RANGE STATEMENT

10) This relates to the competency standard unit as a whole providing the range of contexts and conditions to which the Performance Criteria apply. It allows for different work environments and situations that will affect performance.

This Competency Standard Unit shall be demonstrated in relation to performing EWP controlled descent escape procedures in the workplace and will include the following:

Inspection of rescue equipment to facilitate a controlled descent from a EWP.

Applying work procedures and instructions as they apply to risk control and personal safety measures.

Accessing, securing and attaching the lowering device to self in accordance with workplace procedures.

Lowering self to the ground from the raised EWP.

The following constants and variables included in the element/Performance Criteria in this unit are fully described in the Definitions Section 1 of this volume and form an integral part of the Range Statement of this unit:

AHCSS00026 Advanced Chemical Spray Application Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release. Not equivalent to AHCSS00001 in AHC10.

Description

Pathways Information

These units provide credit towards a large number of qualifications in the AHC Training Package, including but not limited to AHC40116 Certificate IV in Agriculture and AHC40316 Certificate IV in Production Horticulture.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AHCWRK302	Monitor weather conditions
AHCMOM315	Operate chemical application machinery and equipment
AHCCHM401	Develop procedures to minimise risks in the use of chemicals* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCCHM402	Plan and implement a chemical use program* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>

AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals

Target Group

Individuals responsible for planning, risk management and application tasks associated with the spray application of chemicals used in primary production.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for those responsible for planning and risk management associated with the spray application of chemicals in primary production.

AHCSS00027 Agricultural Chemical Skill Set

Modification History

- AHC41116 Certificate IV in Irrigation

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 2 units of competency.

Unit Code	Unit Title
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals

Target Group

Individuals responsible for applying agricultural chemicals.

Suggested words for Statement of Attainment

These competencies meet State / Territory licensing requirements for the application of agricultural chemicals.

AHCSS00028 Basic Introduction to Beekeeping Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit toward the Certificate III in Beekeeping.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AHCBEK202	Use a bee smoker
AHCBEK203	Open and reassemble a beehive
AHCBEK204	Construct and repair beehives
AHCBEK302	Manipulate honey bee brood
AHCBEK304	Remove a honey crop from a hive
AHCBEK306	Manage pests and disease within a honey bee colony

Target Group

Entry level or unqualified workers in the beekeeping industry and hobbyist beekeepers.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for the basic maintenance and monitoring of beehives.

AHCSS00029 Cotton Industry Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards AHC20116 Certificate II in Agriculture.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 7 units of competency.

Unit Code	Unit Title
AHCBAC202	Assist agricultural crop maintenance
AHCMOM202	Operate tractors
AHCMOM304	Operate machinery and equipment
AHCWHS201	Participate in work health and safety processes
AHCWRK202	Observe environmental work practices
AHCWRK204	Work effectively in the industry
HLTAID002	Provide basic emergency life support

Target Group

Those working as farm hands in the cotton production industry.

Suggested words for Statement of Attainment

These competencies meet the minimum industry requirements for cotton industry work.

AHCSS00030 Farm Business Management Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release. Not equivalent to AHCSS00025 in AHC10.

Description

Pathways Information

These units provide credit towards the following Certificates:

- AHC40116 Certificate IV in Agriculture
- AHC41016 Certificate IV in Agribusiness
- AHC50116 Diploma of Agriculture
- AHC51416 Diploma of Agribusiness Management

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AHCBUS506	Develop and review a business plan
AHCBUS507	Monitor and review business performance
AHCBUS509	Develop and implement business structures and relationships
BSBR501	Manage risk

Target Group

Farmers and farm business managers with responsibility for farm business planning and management, including risk management.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for those responsible for farm business planning and management, including risk management.

AHCSS00031 Gravity Fed Irrigation Operator Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release. Not equivalent to AHCSS0004

Description

Pathways Information

These units provide credit towards a Certificate III in Irrigation.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AHCIRG333	Maintain pressurised irrigation systems
AHCIRG303	Measure irrigation delivery system performance
AHCIRG334	Operate and maintain gravity fed irrigation systems
AHCIRG306	Troubleshoot irrigation systems
AHCSOL401	Sample soils and interpret results
AHCWRK405	Implement and monitor environmentally sustainable work practices

Target Group

Individuals who are working with gravity fed systems as irrigation operators.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for Irrigation Australia Ltd certified gravity fed irrigation operator.

AHCSS00032 Identify Plants for Indigenous Land Management Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards AHC31516 Certificate III in Indigenous Land Management.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AHCILM302	Provide appropriate information on cultural knowledge
AHCPCM201	Recognise plants
AHCPCM303	Identify plant specimens

Target Group

Workers in a range of industries who are working on Country or with Indigenous Communities.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for an introduction to recognising and working with plants that are significant to Indigenous Communities.

AHCSS00033 Irrigation Agronomist Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards the Diploma of Irrigation Management.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 7 units of competency.

Unit Code	Unit Title
AHCIRG402	Determine hydraulic parameters for an irrigation system
AHCIRG404	Implement an irrigation-related environmental protection program
AHCIRG408	Schedule irrigations
AHCIRG501	Audit irrigation systems
AHCIRG504	Develop an irrigation and drainage management plan
AHCSOL402	Develop a soil use map for a property
AHCWRK509	Provide specialist advice to clients

Target Group

Individuals who are working as irrigation agronomists.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for Irrigation Australia Ltd certified irrigation agronomist.

AHCSS00034 Irrigation Contractor Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release. Not equivalent to AHCSS00006 in AHC10.

Description

Pathways Information

These units provide credit towards the Certificate IV in Irrigation.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AHCIRG431	Supervise irrigation system installation
AHCIRG402	Determine hydraulic parameters for an irrigation system
AHCWRK405	Implement and monitor environmentally sustainable work practices

Target Group

Individuals who are working as irrigation installation contractors.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for Irrigation Australia Ltd certified irrigation contractor.

AHCSS00035 Irrigation Installer Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release. Not equivalent to AHCSS00007 in AHC10.

Description

Pathways Information

These units provide credit towards the Certificate III in Irrigation.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 6 units of competency.

Unit Code	Unit Title
AHCIRG331	Install pressurised irrigation systems
AHCIRG303	Measure irrigation delivery system performance
AHCIRG306	Troubleshoot irrigation systems
AHCSOL401	Sample soils and interpret results
AHCWRK405	Implement and monitor environmentally sustainable work practices
CUAACD303	Produce technical drawings

Target Group

Individuals who are working as irrigation installers.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for Irrigation Australia Ltd certified irrigation installer.

AHCSS00036 Irrigation Manager Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards the Certificate IV in Irrigation.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AHCIRG402	Determine hydraulic parameters for an irrigation system
AHCIRG404	Implement an irrigation-related environmental protection program
AHCIRG408	Schedule irrigations
AHCSOL402	Develop a soil use map for a property

Target Group

Individuals who are working as irrigation managers.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for Irrigation Australia Ltd certified irrigation manager.

AHCSS00037 Irrigation Retailer Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards the Certificate III in Irrigation.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AHCIRG402	Determine hydraulic parameters for an irrigation system
AHCWRK208	Provide information on products and services
SIRXSLS001	Sell to the retail customer
SIRXPDK001	Advise on products and services

Target Group

Individuals who are working as irrigation products and services retailers.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for Irrigation Australia Ltd certified irrigation retailer.

AHCSS00038 Landscape Business Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards a Certificate IV in Landscape.

Licensing/Regulatory Information

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
BSBSMB405	Monitor and manage small business operations
AHCBUS404	Operate within a budget framework
BSBSMB404	Undertake small business planning
TLIR4002	Source goods/services and evaluate contractors

Target Group

Sole traders or a small business providing services as professional landscape contractors.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for those involved in establishing a sole trading/small business as a professional landscape contractor.

AHCSS00039 Landscape Design Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards a Diploma of Landscape Design.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 2 units of competency.

Unit Code	Unit Title
AHCDES501	Design sustainable landscapes
AHCDES502	Prepare a landscape project design

Target Group

Individuals or businesses undertaking commercial design landscape work.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for those involved in commercial landscape design work.

AHCSS00040 Landscape Plant Management Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards a Certificate IV in Landscape or Diploma of Horticulture.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AHCPCM401	Recommend plants and cultural practices
AHCPGD402	Plan a plant establishment program
AHCPGD501	Manage plant cultural practices
AHCPCM501	Diagnose plant health problems

Target Group

Sole traders or businesses involved in the landscape maintenance industry.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for those involved in landscape maintenance industry.

AHCSS00041 Landscape Professional Practice Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards a Diploma of Landscape Design.

Licensing/Regulatory Information

Skill Set Requirements

Complete 3 units of competency.

Unit Code	Unit Title
AHCBUS504	Prepare estimates, quotes and tenders
AHCWRK507	Implement professional practice
AHCLSC502	Manage landscape projects

Target Group

Sole traders or businesses involved in tendering and managing landscape projects.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for those involved in tendering and managing landscape projects.

AHCSS00042 Organic Crop Management Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards AHC41616 Certificate IV in Organic Farming and AHC51816 Diploma of Organic Farming.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 4 units of competency.

Unit Code	Unit Title
AHCORG403	Manage organic soil improvement
AHCBAC505	Plan and manage long-term weed, pest or disease control in crops
AHCBAC408	Manage agricultural crop production
AHCAGB501	Develop climate risk management strategies

Target Group

Individuals responsible for planning, implementing and managing organic crop production.

Suggested words for Statement of Attainment

These competencies meet industry requirements for managing organic crop production.

AHCSS00043 Vertebrate Pest Management Planning Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards:

- Certificate III in Pest Management
- Certificate IV in Pest Management

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
BSBPMG418	Apply project stakeholder engagement techniques
AHCPMG413	Define the pest problem
AHCPMG412	Develop a pest management plan
AHCPMG409	Implement a pest management plan
AHCPMG306	Determine pest control techniques

Target Group

- Authorised Control Officers in NSW and the ACT

- Agency biosecurity officers
- Local government officers
- Land owners
- Land managers

Suggested words for Statement of Attainment

These competencies meet the industry standards for applying a strategic approach to integrated vertebrate pest management, incorporating the principles of pest management.

AHCSS00044 Organic Horticulture Management Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards AHC41616 Certificate IV in Organic Farming and AHC51816 Diploma of Organic Farming.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
AHCAGB501	Develop climate risk management strategies
AHCORG403	Manage organic soil improvement
AHCPHT402	Develop a crop regulation program
AHCPHT404	Implement and monitor a horticultural crop harvesting program
AHCPMG410	Implement the pest monitoring and evaluation plan

Target Group

Individuals responsible for planning, implementing organic horticultural production.

Suggested words for Statement of Attainment

These competencies meet the minimum industry requirements for managing organic horticultural production.

AHCSS00045 Spray Operator Skill Set

Modification History

Release	TP Version	Comment
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards Certificate II in Conservation and Land Management.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

Complete 5 units of competency.

Unit Code	Unit Title
AHCPMG203	Work effectively in a pest management environment
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals

Target Group

Individuals who plan and prepare for a specific weed management program.

Suggested words for Statement of Attainment

These competencies meet the industry requirements for those who work with team members to carry out a specific weed management program.

AHCSS00046 Organic Livestock Management Skill Set

Modification History

Release	TP Version	Comments
1	1.0	Initial release

Description

Pathways Information

These units provide credit towards AHC41616 Certificate IV in Organic Farming and AHC51816 Diploma of Organic Farming.

Licensing/Regulatory Information
