 - rotation schedules and successional grazing regimes
 - accident and emergency reports
 - entries into data base or other management software
 - worker records and reports
 - emergency reports
 - animal morbidity
 - work procedures and practices
 - seasonal factors and weather records
 - questioning client and/or workers
 - observations from inspecting animal systems
 - operational practices such as bedding change rotation, cell grazing, alternating flocks
- industry animal health requirements
- legislative requirements, such as:
 - compliance with council ordinances
 - planning approval
 - licence from government agency
 - animal welfare legislation
 - workplace legislation and awards

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHC PER409 Manage a permaculture seed bank

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a permaculture seed bank. It requires the ability to plan seed collection, implement seed collection and maintain a seed collection in storage. Managing a permaculture seed bank requires knowledge of plant biology, handling and extraction of seed, treatment and documentation, collecting ethics, protocols and legislative parameters and storage techniques.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

essential outcomes.	demonstrate achievement of the element.
1. Plan seed collection for a permaculture seed bank	1.1 Analyse requirements for seed collecting, and interpret them for required seed characteristics and implementation issues 1.2 Identify opportunities for seed collection from field observation and liaison with other specialists in this field 1.3 Identify and mark on a plan suitable areas and plants for seed collection 1.4 Select method of seed collection appropriate to the geography of the local area, size and type of plants and available resources 1.5 Determine and document quantity of seed to be collected from each provenance 1.6 Liaise with relevant authorities or owners and seek approvals where required
2. Implement seed collection program	2.1 Coordinate and schedule people, materials and equipment required by the seed collection program 2.2 Identify and obtain any permits and approvals required for the seed collection 2.3 Identify the seed and complete the required documentation
3. Maintain a seed collection	3.1 Check the quantity, quality and provenances of the collected seed 3.2 Check and monitor the health of seed collected and take remedial action where required 3.3 Control pests and conditions detrimental to seed health 3.4 Dispose appropriately of seeds that are non-viable owing to age or pest attack 3.5 Supply true to type and appropriately labelled seed to others 3.6 Record up to date details of seeds held in storage

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER409 Manage a permaculture seed bank

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan seed collection
- implement a seed collection program
- maintain a seed collection

Knowledge Evidence

The candidate must demonstrate knowledge of:

- flowering biology of the target species
- biological signs which indicate that the seed crop is ready to be collected
- seed banks, such as:
 - community seed banks and networks
 - private seed collections
 - organic food production enterprises such as market gardens
 - community supported agriculture seed sources
 - community garden and city farm seed banks
 - supply of vegetative propagation for perennial plants
 - heritage and non-hybrid seed distributors
 - heritage and non-hybrid seed producers
 - permaculture plant and seed nurseries
 - community seed swaps
- methods of seed collection, such as:
 - hand-picking seeds or seed capsules

- harvesting whole plant
- collecting and ripening fruit
- collecting after felling
- using ladders
- climbing
- shaking
- high-powered rifles (licensed operators only)
- elevated platforms
- extraction of the seed from the collected material
- handling of the seed crop after picking
- storage of seed, such as:
 - bags or envelopes
 - appropriate containers
 - cool, dry location
 - dehumidifying agents (silica gel, wood ash)
 - oxygen exclusion techniques
 - freezer or refrigerator
 - pest deterrent mechanisms
 - light exclusion mechanisms
- documentation of the extracted seed, such as:
 - information on provenance
 - botanical name: family, genus, species, variety and/or cultivar
 - common names
 - brief plant description
 - identity of collector
 - date collected or use by date
 - quantity (by weight or number of seeds)
 - viability test results
 - organic certification of grower
 - growing instructions such as recommended season and spacing
- provenances of seed, such as:
 - location and growing conditions of parent plant
 - sub-catchment identification of seed from endemic native plant populations
 - species and/or varieties adapted to local conditions
- collecting ethics, protocols and legislative parameters, such as:
 - limits on quantity allowed for collection
 - limits on time period for collection
 - particular use or destination for seed
 - indigenous plant regulatory conditions

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER410 Recommend approaches for sustainable community and bioregional development

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recommend approaches for sustainable community and bioregional development. It requires the ability to identify the potential for sustainable community and bioregional development, develop processes to consult and to communicate with stakeholders.

For indigenous contexts, the delivery and assessment against this competency standard must comply with community protocols and guidelines and be supported by elders and custodians of country.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify potential for sustainable community and bioregional development	1.1 Broadly scope opportunities and constraints for sustainable community and bioregional development 1.2 Identify potential involvement of individual and group stakeholders 1.3 Source information on the community and bioregion
2. Develop processes to consult stakeholders	2.1 Identify cultural protocols to ensure contacts with individuals and communities are successful 2.2 Identify key people who may influence relationships 2.3 Formulate steps to develop and maintain contacts with community groups 2.4 Develop processes that are inclusive of an equitable involvement of various sections of the community and their perspectives 2.5 Adjust processes and communication modes for culturally diverse groups
3. Communicate potential and support for sustainable community and bioregional development	3.1 Consult with community groups and individuals in development of options 3.2 Discuss and evaluate options in consultation with community using agreed parameters 3.3 Develop preferred option and communicate its implications to community stakeholders 3.4 Facilitate links between individuals and community groups to ensure good community relationships and development of the program

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER410 Recommend approaches for sustainable community and bioregional development

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and modify procedures and processes
- write materials appropriate to audience
- identify cultural protocols
- consult with community groups

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sustainable community and bioregional development, such as:
 - local food security initiatives
 - community gardens and city farms
 - climate action and energy descent initiatives
 - transition towns programs
 - community education and outreach
 - local economy and trade including complementary currencies
 - sustainable enterprise and business development
 - social wellbeing and welfare services
 - renewable energy production
 - landcare and environment programs
 - sustainable agriculture and land use
 - sustainable forestry and reforestation

- catchment and water resources management
- sustainable development and housing
- waste reduction and recycling
- principles governing sustainable community and bioregional development
- sources of relevant materials and verbal information
- cultural protocols and perspectives, such as:
 - beliefs, religion & taboos
 - world views (mythological, political, social, biological)
 - acceptable modes of communication/language
 - body language
 - concepts of family and community
 - community leadership
 - relationships between community members, ages and sexes
 - acceptable modes of dress
- relevant legislation and guidelines
- principles of equal opportunity and affirmative action
- community governance, financial systems, legal and health systems
- current relationships between culturally diverse groups in the area
- understanding of the role of various sections of the community in historical and relationship terms

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

Assessment Requirements for AHCPER411 Operate within a sustainable community and bioregional development program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research a community and a bioregion
- work within an existing sustainable community or bioregional development program
- participate in ongoing development of the sustainable community or bioregional development program

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to sustainable community and bioregional development
- Sustainable community and bioregional development programs, such as:
 - Transition Towns group activities or programs
 - climate change programs
 - peak oil or peak resource programs
 - alternative economic systems such as local exchange trading systems (LETS)
 - environmental, water catchment and natural resource conservation projects
 - social and cultural programs
 - housing and community development programs
 - community supported agriculture, organic and sustainable primary production and consumer networks and programs
 - energy descent action planning
 - local food and water security projects
 - renewable energy and appropriate technology projects

- greenhouse emission reduction and sequestration projects
- community profile development
- community consultation and facilitation methodologies, such as:
 - team and community building activities
 - community forums and discussion
 - open space events
 - cultural mapping processes
 - creative problem solving processes
 - visualisation and experiential processes
 - information gathering processes
- group dynamics and conflict resolution strategies

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

Assessment Requirements for AHCPER501 Carry out permaculture field research

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- formulate and justify research questions
- design a field research plan
- conduct research and evaluate information
- enter, analyse and organise data quantitatively and qualitatively in charts, tables and graphs
- produce written reports on research outcomes and provide conclusions based on appropriate evidence and reasoned arguments

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles, practices and ethics, such as:
 - topics for field research
 - people or groups of people participating in or related to permaculture projects
 - people or groups of people participating in or related to other topics which themselves relate to permaculture
 - systems and/or technical elements of permaculture systems
 - animals-related studies (including insects, reptiles, birds and fish)
 - plant-related studies
 - studies of integrated plant and animal systems
 - appropriate technologies or technological solutions
 - appropriate energy generation, storage and capture
 - water treatment, catchment and storage systems

- natural systems
- environmental issues
- product comparisons
- field research methods, such as:
 - group and individual interviews
 - dialogue and storytelling
 - use of communications technology
 - records and testimonials
 - electronic recordings
 - questionnaires
 - statistical sampling
 - observation
 - surveys
- research methodologies, such as:
 - action research
 - needs studies
 - case studies
 - statistical sampling
- field research plan design – a staged sequence of steps and accompanying methodologies for obtaining answers to research questions
- permaculture systems implementation and management techniques and practices
- growth habits, physiological properties and taxonomic specification of animals and plants involved in permaculture
- participants and stakeholders of permaculture systems and projects, such as:
 - those who will use the research to influence decision making and policy
 - those who will benefit from the research
 - the researchers
 - ethics committees
 - anyone who is researched
- scientific and mathematical research approaches, data collection, processing and analytical techniques and procedures
- auditing and reporting procedures
- research planning and budgeting

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER502 Design an integrated permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design integrated permaculture systems in a range of contexts including developing a design brief, undertaking a site analysis, developing conceptual designs and producing a final design. It includes knowledge of landscape, building and settlement design and working with specialists and professionals. It includes drawing plans and projections by hand as well as using computer aided drafting and design.

The preparation of an integrated permaculture system design requires detailed knowledge of permaculture design principles, the ability to transfer concepts to novel permaculture situations, strong evaluation and planning skills, landscape design skills and research capacities.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a design brief	1.1 Initiate contact with the client when appropriate 1.2 Establish purpose, needs and requirements of design by consulting with client 1.3 Evaluate integrated permaculture design context and consider impacts of design stages, elements, functions and relationships 1.4 Develop a design brief in consultation with the client 1.5 Negotiate cost structures and timelines with the client 1.6 Evaluate and document cost structures and plan for budgeting limits and possibilities
2. Undertake design analysis and base plan	2.1 Obtain existing maps, geospatial data and aerial photographs of site 2.2 Survey and obtain social research data relevant to integrated permaculture design 2.3 Undertake field research supporting integrated permaculture design contexts and specific fields of inquiry, where required 2.4 Include Zones 1, 2, 3, 4 and 5 in the survey area using survey tools and equipment 2.5 Prepare a base plan 2.6 Record site assessment factors on the base plan 2.7 Carry out analysis of the site and bioregional analysis of the local area
3. Interpret site in permaculture terms	3.1 Carry out research of potential permaculture design elements to assess their suitability for the site 3.2 Identify functional interconnections between elements to increase yield and minimise resource use 3.3 Choose permaculture design elements on the basis of research 3.4 Work with architects, builders and planners or other contractors who may be involved in the project 3.5 Revise brief with client in relation to research and analysis
4. Prepare design concepts	4.1 Determine appropriate concepts 4.2 Prepare concept design drawings to illustrate conceptual themes and patterns informing the location and layout of proposed design elements 4.3 Present chosen concepts in a consistent graphic style 4.4 Compile lists of materials and quantities 4.5 Prepare a list of plant and animal species and varieties suitable

Element	Performance criteria
	for chosen concepts 4.6 Prepare a preliminary budget for conceptual design
5. Review the design concepts	5.1 Review the concepts against permaculture principles and ethics 5.2 Prepare presentations of draft design concept options for the client 5.3 Undertake consultation with the client to agree on options and approaches for design development 5.4 Review and revise concepts, elements, budget and the design brief after taking feedback from the client
6. Produce final design and integrated permaculture report	6.1 Design integrated permaculture system appropriate to the design brief, available budget, research, analysis, chosen elements and concepts 6.2 Produce detailed permaculture design documents 6.3 Present design plans, drawings and permaculture design report documents to the client 6.4 Obtain feedback from the client and revise design as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD125DES02C.

Assessment Requirements for AHCPER502 Design an integrated permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- demonstrate drafting and drawing techniques
- negotiate with clients
- undertake a site analysis and site survey
- provide urban and rural permaculture design solutions
- analyse zones and sectors of a site
- develop concepts
- develop planting schedules and bills of quantity
- develop a design budget
- develop final design drawings including elevations and projections
- design presentations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- elements of integrated permaculture design
- principles of integrated permaculture design
- strategies for urban and rural permaculture design
- strategies for building design and working with builders and architects
- strategies for settlement design and working with planning authorities
- design brief elements
 - statement of scope of design
 - statement of client needs and requirements
 - food production

- system efficiency
- system production
- fibre, energy and building material production
- water harvesting
- waste treatment
- energy planning and design
- biodiversity habitat
- soil carbon building
- soil fertility
- establishment of financial budget
- establishment of time budget
- maintenance of financial budget
- maintenance of time budget
- design of establishment documents
- maintenance planning
- sustainable commercial enterprises
- social amenities
- cultural considerations
- list of project elements
- list of assessable tasks
- design analysis and research techniques
- plan interpretation and map reading
- site surveying methods and tools
 - onsite measurement of site boundaries
 - mapping of boundaries to scale to a plan drawing
 - onsite layout of 1m contour
 - mapping of contour lines to a scale plan drawing
 - measurement and location of existing infrastructure and natural features on site
 - mapping of existing infrastructure and natural features to a scale plan drawing
 - dumpy level or equivalent surveying instrument for taking vertical measurements on site
 - dumpy level or equivalent surveying instrument for measuring angles on site
 - GPS, satnav
 - measuring tapes for measuring distance on site.
- design concepts and detailed design drawings
 - property boundaries, scale and north point
 - authors of plans, contact details
 - address of site
 - date plan drawn
 - existing infrastructure and natural features

- drawing to scale
- relevant overlays and drawing numbers
- large format planning (at least A1 or A2)
- overlays such as fire, flora and fauna, soil and geology, local planning ordinances, buffer and riparian zones, use zones
- contour lines or other appropriate indication of slope direction and gradients
- drainage features
- Lot, DP, landowner address and contact details
- permaculture design methods
- conventional design symbols
- design drafting and drawing conventions
- computer-aided drafting and design
- plant and animal selection

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is NOT sufficient at this level.

AHCPER503 Develop a strategic plan for a permaculture project or enterprise

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a strategic plan for a permaculture project or enterprise. It requires the ability to prepare a strategic plan brief, research and analyse planning information, develop strategic plan stages, document a strategic plan, and review a strategic plan against desired outcomes. Developing a strategic plan for a permaculture project requires knowledge of permaculture principles and practices, climate change and peak oil impacts, sustainable community development practices, research methods and strategic planning methodologies.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a strategic plan brief for a permaculture project or enterprise	1.1 Evaluate the current context of the permaculture project or enterprise 1.2 Determine core values of the project or enterprise 1.3 Define project vision statement, aims and objectives 1.4 Establish project or enterprise goals in consultation with stakeholders 1.5 Evaluate strategic plan values, goals and vision statement with respect to permaculture principles and ethics 1.6 Document strategic planning brief 1.7 Develop protocols on cultural respect and sensitivity 1.8 Review and revise strategic plan brief at appropriate project development intervals
2. Research and analyse strategic planning information	2.1 Determine information needed for strategic plan with reference to plan brief 2.2 Identify key elements and themes 2.3 Determine research subjects 2.4 Compose research plan and methodologies 2.5 Review local, state and national government legal and planning acts and codes relevant to project or enterprise 2.6 Review and revise strategic plan brief in relation to research findings
3. Identify strategic planning stages	3.1 Identify strategies required to achieve planning goals in consultation with relevant parties 3.2 Determine action plans required to execute strategies 3.3 Order strategies and action plans into a series of strategic planning stages 3.4 Determine planning benchmarks for future stage completion review 3.5 Review and revise plan brief with reference to strategic planning stages
4. Document and distribute strategic plan	4.1 Produce a clear, concise and consistently formatted written strategic planning document 4.2 Distribute strategic plan to all relevant parties to ensure effective communication of project or enterprise planning 4.3 Take feedback on plan documentation and review and revise documentation as required

Element	Performance criteria
5. Review strategic plan	5.1 Determine mechanism for evaluation of strategic plan 5.2 Determine timeframes for evaluation 5.3 Evaluate with reference to permaculture principles and practices 5.4 Evaluate feedback from all relevant parties on implementation issues and outcomes 5.5 Identify problems and revise as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD125PLA03C.

Assessment Requirements for AHCPER503 Develop a strategic plan for a permaculture project or enterprise

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a strategic plan brief
- acquire project resources
- undertake stakeholder consultation
- document a strategic plan
- evaluate the vision statement
- interpret feedback on the strategic plan
- demonstrate group leadership

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles, ethics and practices
 - The two main summaries of permaculture principles are found in Bill Mollison and Reny Mia Slay *Introduction to Permaculture* (1991) and David Holmgren *Permaculture: Principles & Pathways Beyond Sustainability* (2002)
 - sustainable agriculture
 - garden agriculture
 - sustainable horticulture
 - sustainable aquaculture
 - soil restoration
 - bush regeneration
 - biodiversity regeneration
 - sustainable community development

- sustainable project and enterprise development
- bioregional development
- relocalisation
- sustainable design
- sustainability education
- earth care
- people care
- return of surpluses and setting limits to growth
- permaculture values
 - environmental restoration
 - sustainable food production
 - sustainability education
 - environmentally sustainable human habitation
 - sustainable community development
 - sustainable community transition
 - right livelihood
 - social justice
 - ecological economics
 - universal human rights
 - cultural recognition
- permaculture projects or enterprises
 - community gardens
 - permaculture workshops, training and education
 - sustainable agricultural systems
 - urban permaculture systems
 - community sustainable transition initiatives
 - climate change initiatives
 - conservation organisations
 - sustainability not-for-profits, NGOs, businesses, companies, trusts and incorporated community associations
 - permaculture design consultancies
 - permaculture system implementation services
 - alternative community finance and economic systems
 - permaculture information and communication services
- strategic planning
 - vision statement
 - statements of where project or enterprise would like to be in future
 - imagined futures
 - statements of possible futures for world outside of project
 - project or enterprise goals

- environmental targets
- community development targets
- food production
- design criteria
- happiness indicators
- sustainability indicators
- strategies
 - human resource management
 - financial planning
 - purchases and acquisitions
 - cost cutting
 - income generation
 - promotion and marketing
 - organisational restructuring
 - project or enterprise start up
 - mentoring and education
 - new project or enterprise initiatives
 - political lobbying
 - grant applications
 - community consultation
 - research and development
- action plans - sequences of smaller steps necessary to achieve strategies
- timelines
- benchmarks, such as
 - verifiable stage completion criteria
 - numerical indicators
 - qualitative indicators
 - observable outcomes
- community development
- project management
- feasibility study methodology
- contract law
- budgetary frameworks

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER504 Manage a permaculture project or enterprise

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a permaculture project or enterprise. It requires the ability to initiate, plan, manage, monitor and complete a permaculture project or enterprise. Managing a permaculture project or enterprise requires knowledge of permaculture principles and practices, permaculture design, bioregional and community development, community sustainable transition strategies, ecological agriculture, costing and pricing, and project management.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Initiate permaculture project or enterprise	1.1 Undertake strategic planning assessment of permaculture project or permaculture enterprise 1.2 Initiate community and bioregional assessment of project or enterprise 1.3 Determine the scope of the project or enterprise 1.4 Determine feasibility of project or enterprise 1.5 Determine stakeholders in project or enterprise
2. Cost and quote for permaculture project or enterprise start up	2.1 Prepare costings and quotations using realistic price structure 2.2 Include a contingency amount in case of need 2.3 Include allowances for work in kind and volunteers, ensuring that the right livelihood of all is considered 2.4 Prepare a detailed budget with stages of implementation 2.5 Submit quotation and cost outline to client and be prepared to justify costs
3. Manage permaculture project or enterprise	3.1 Secure human and material resources required to achieve strategies 3.2 Execute action plans to achieve strategic ends 3.3 Follow budget and project stages 3.4 Direct process outlined in action plans and timelines 3.5 Integrate project human and material resources to achieve planned project outcomes 3.6 Establish communication process including responsibilities for conflict resolution 3.7 Take feedback on management practices and processes
4. Monitor permaculture project or enterprise	4.1 Observe execution of project or enterprise action plan processes 4.2 Review and correct problematic planning processes 4.3 Measure project or enterprise activities 4.4 Measure costs against budget and communicate with client regarding any over-runs 4.5 Monitor project or enterprise variables
5. Undertake permaculture project or enterprise	5.1 Confirm completion of action plan processes 5.2 Determine success of project or enterprise strategies in relation to stage benchmarks, budget and timelines 5.3 Document permaculture project or enterprise management initiation, planning, execution, monitoring and completion or

Element	Performance criteria
	ongoing progress 5.4 Conclude permaculture project or continue to manage and monitor permaculture enterprise

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER504 Manage a permaculture project or enterprise

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out strategic planning assessment of a permaculture project or enterprise
- acquire project resources
- develop project pricing and costing
- consult with stakeholders
- manage project activities
- evaluate and report on project
- manage human resources
- demonstrate group leadership

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles, ethics and practices
- permaculture projects
 - initiatives with a defined sustainability purpose and time horizon
 - sustainable community development projects
 - bioregional initiatives
 - not-for-profit projects
 - projects on public land
 - community gardens
 - community supported agriculture systems
 - land restoration and conservation works
 - alternative technology programs

- sustainability education
- social and economic development activities
- community carbon reduction and sequestration strategies
- energy descent or transition projects
- disaster preparedness, response and recovery
- permaculture enterprises
 - ethical for-profit businesses where surpluses are returned to earth care and people care
 - initiatives with a focus on right livelihood with plans for ongoing operation and/or growth
 - sustainable farming
 - community food distribution businesses
 - permaculture design and consultancies
 - energy descent planning services
 - climate change planning services
 - permaculture works implementation businesses
 - community and bioregional sustainability planning services
 - community economic and enterprise systems
 - integrated social, housing and community development programs
 - community supported agriculture
 - organic and sustainable primary production
 - local food and water security enterprises
 - greenhouse emission reduction and sequestration enterprises
 - sustainable regional transport networks and systems
- strategic planning
- project management
 - human resource management
 - financial planning
 - purchases and acquisitions
 - costing and pricing
 - income generation including issues of right livelihood
 - promotion and marketing
 - organisational restructuring
 - project or enterprise start up
 - mentoring and education
 - new project or enterprise initiatives
 - political lobbying
 - grant applications
 - community consultation
- research and development
- community development

- feasibility study methods
 - economic and financial assessment
 - legal and planning issues
 - market opportunities and challenges
 - community and cultural acceptance
 - bioregional suitability
 - operational considerations
 - resource availability
 - sustainability criteria
 - energy descent/transition strategies
 - climate change strategies
 - environmental, water catchment and natural resource conservation issues
- contract law
- budgetary frameworks
- benchmarking

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

Assessment Requirements for AHCPER505 Plan and supervise the implementation of permaculture project works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine and review project scope of work
- assess a site for opportunities and constraints associated with implementation of permaculture works
- prepare schedules for implementation of permaculture works
- prepare a staged permaculture works plan
- complete a work health and safety briefing
- prepare a Statement of Environmental Effects
- supervise permaculture project works

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- Permaculture project works, such as:
 - food gardens
 - community gardens
 - urban permaculture systems
 - rural permaculture systems
 - aquaculture systems
 - horticultural systems
 - forest systems
 - grazing and pasture systems
 - animal systems and tractors

- integrated food, fibre and energy systems
- permaculture structures
- soil treatments
- preparation of soil surfaces
- installation of irrigation and/or drainage systems including earthworks
- planting methods such as hand sowing, direct seeding, tube planting, hand or machine assisted planting of seedlings, planting of divisions and transplanting
- natural area regeneration
- fencing of stock and pest animals
- the cultural or biological control of weeds and feral animals
- protection of plants by staking, tying and guarding
- permaculture design techniques including zone and sector planning
- biophysical factors of a site, such as:
 - location of the site
 - site boundaries
 - environmental considerations
 - access issues
 - potential hazards
 - utility service
 - availability and locations
 - adjacent landholder considerations
 - security issues
 - aspect of the site
 - rainfall
 - humidity
 - wind and sunlight intensity
 - soil types
 - nutrients and deficiencies
 - slope
 - natural and artificial watercourses
 - outcrops of rock
 - presence of indigenous or other significant vegetation, indigenous or otherwise
 - plants that may become a weed problem
 - animals that may become a management issue, feral species or otherwise
- practical understanding of the environmental issues associated with undertaking permaculture works, such as:
 - use of materials that come from sustainable sources
 - duty of care in conserving sites natural values
 - work practices

- the use and movement of machinery, storage of materials, removal of weeds and movement of soil and other materials into, across and beyond the site
- principles of ecology including specific plant and animal relationships and habitat requirements
- statutory compliance and obligations, such as
 - compliance with legislation, ordinances, regulations or by laws relating to the works or the work site
 - site responsibilities, including OHS, industrial relations and equal opportunity and employment
- site evaluation techniques including methods of analysing soils, waterways and their condition
- control techniques against unwanted plant and animal species
- soil conservation, erosion control and enhancement techniques and their advantages and disadvantages in reference to specific sites and habitats
- selection and use of appropriate combinations of machinery and tools
- work health and safety hazards and the controls necessary to remove or minimise risks associated with them
- contract documentation including specifications, plans of permaculture works, services, supplies and surveyors documents
- scope of works determination
- works breakdown into tasks
- scheduling and time line generation
- task specifications and evaluation

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify key issues in	1.1 Research the community and the bioregion to identify most

Element	Performance criteria
the transition community	pressing transition issues 1.2 Research history of dealing with these issues 1.3 Research ways in which other communities or bioregions have dealt with these issues 1.4 Research existing solutions to the problems identified
2. Work with transition community to devise an energy descent action plan	2.1 Involve local community in the issues identified through community consultation 2.2 Reach out to as many people as possible in the community to ensure all views are canvassed 2.3 Support the development of a core group to distil the community work 2.4 Support development of new groups to explore preferences at the individual and family level 2.5 Coordinate the participation of diverse interest groups and individuals in the ongoing development of the project 2.6 Maintain communications and resolve conflicts as required
3. Develop a strategy or an Energy Descent Action Plan	3.1 Collate feedback from groups and organisations 3.2 Prepare a strategic plan to address the issues identified 3.3 Prepare an Energy Descent Action Plan (EDAP), if required, containing all the issues, strategies and actions to be undertaken 3.4 Include a timeline and benchmarks for energy descent action so that the community can follow progress
4. Circulate the strategy or EDAP for comment	4.1 Carry out a process of community consultation and feedback on the EDAP 4.2 Take comments and evaluate responses 4.3 Update and re-circulate the EDAP as required
5. Publish the strategy or EDAP	5.1 Launch the strategy or EDAP in a culturally appropriate manner that involves as many members of the community as possible 5.2 Make the strategy or EDAP available in different forms for different audiences including summaries and graphic representations 5.3 Support the role out of the action strategies and continue to encourage participation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER506 Develop a relocalisation or transition project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify key issues in the transition community
- work with community to develop energy descent action strategies
- develop an energy descent action strategy or an Energy Descent Action Plan (EDAP)
- consult with the community on the strategy or EDAP
- support actions from the strategy or plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles, ethics and practices
- relocalisation of essential services and community functions
- Climate Change strategies
- transition Towns
- Energy Descent Action Planning
- positive action strategies for:
 - food production and supply
 - infrastructure – urban and rural
 - water and waste water
 - energy production and supply
 - housing and settlement design
 - communications
 - education and upskilling
 - employment

- economics and alternative economics
- health and wellbeing
- community governance and decision making systems
- land ownership and stewardship
- emergency preparedness and critical supply strategies
- strategic planning
- community development
- feasibility study methods

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER507 Research and interpret requirements for a permaculture project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to gather and validate information in order to advise on planned permaculture projects. Researching and interpreting requirements for a permaculture project requires knowledge of permaculture principles and practices, research methodologies, consultation models, feasibility studies, information systems, report presentation, cultural analysis of information, cultural implications of research methods and legislative requirements.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation. They undertake functions with initiative and judgement and take personal responsibility and exercise autonomy in undertaking complex work. They have accountability for the work of others (teams) within broad parameters, analyse and synthesise information as well as analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select appropriate research strategies	1.1 Select and justify appropriate research methods for the requirements of the permaculture project and the available resources 1.2 Develop and justify a research question or hypothesis 1.3 Select a combination of research methods to promote the validity of the outcomes 1.4 Negotiate the selection of research strategies with key people
2. Gather information	2.1 Identify relevant information sources and review relevant and credible literature related to the research topic 2.2 Assess and analyse legislative requirements impacting on the project 2.3 Identify government departments and agencies with a potential interest in the permaculture project 2.4 Collect and catalogue information from a wide range of sources
3. Consult with key people	3.1 Identify and consult a representative range of people and groups with an interest in the issues relating to the permaculture project 3.2 Review information, check for accuracy and identify the need for further information and follow-up 3.3 Liaise with key people, where required 3.4 Undertake community consultations following agreed practices and protocols
4. Organise and analyse information	4.1 Organise data generated by the research 4.2 Check the results against other available research 4.3 Look for patterns, observations and explanations and interpret them against the context 4.4 Clearly explain the concepts being analysed to key people and continue with community consultations
5. Report the findings of the research	5.1 Report complete and accurate details of the research methodology, information and analysis 5.2 Provide opportunities for the validation of the research findings using a range of different processes 5.3 Report the research findings in an accessible and useable style and format 5.4 Make the research available to all key people and those who have an interest in the project

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER507 Research and interpret requirements for a permaculture project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select and justify appropriate research strategies
- gather information
- assess practical from impractical solutions
- consult with key people with an interest in the issues relating to the permaculture project
- organise and analyse information
- report the findings of the research

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices and their role in sustainable development and design
- climate change science and mitigation strategies
- research methods, such as:
 - group and individual interviews
 - dialogue and storytelling
 - libraries – digital and conventional
 - electronic recordings
 - questionnaires
 - statistical sampling
 - observation
 - surveys
- research methodologies, such as:

- action research
- needs studies
- literature searches and correct referencing
- case studies
- consultation models
- feasibility study methodologies
- information systems (conventional and electronic)
- report presentation
- cultural analysis of information
- cultural implications of research methods

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCPER508 Manage a permaculture aid and development project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a permaculture aid and development project in a remote community. It requires good management, communication and financial management skills. It requires knowledge of the aid and development industry, organisational structures, government and non-government functions, legal issues covering charities and working with vulnerable communities, disaster planning, relief and response issues.

For indigenous contexts, the delivery and assessment against this competency standard must comply with community protocols and guidelines and be supported by elders and custodians of country.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain information on the aid project	1.1 Contact the peak aid organisation or government department to obtain information about aid projects 1.2 Research similar projects and their outcomes 1.3 Research the remote community or location to start fully informed about cultural protocols and issues
2. Develop a plan for the project in consultation with others	2.1 Ascertain the nature of the project, the issues and the key personnel at the remote location 2.2 Work with other organisations involved in the aid project and clarify chain of command 2.3 Establish clear communication channels as early as possible 2.4 Confirm budget allocations and allowances attached to the project 2.5 Document the permaculture aid and development project as a strategic plan 2.6 Distribute the strategic plan as required
3. Obtain resources and confirm logistics for transportation to remote location	3.1 Negotiate material resources, equipment and other needs with the remote community 3.2 Communicate in a culturally sensitive manner at all times and maintain correct communication sequence 3.3 Arrange transportation to remote location with full documentation, procedures and cultural protocols in place 3.4 Monitor transportation phase closely
4. Organise human resources and confirm transit and living arrangements, food and supplies for staff	4.1 Interview and engage personnel 4.2 Confirm living arrangements with contact at remote community 4.3 Confirm food and supply lines for personnel separately from aid arrangements 4.4 Document and communicate these arrangements 4.5 Brief personnel on arrangements and project ahead of departure
5. Document the emergency plan	5.1 Write up the emergency plan with the aims and objectives of the project 5.2 List strategies for achieving the aims 5.3 Allocate personnel and resources to the strategic actions 5.4 Include benchmarks and timeline for operations 5.5 Include processes, procedures and communication lines for

Element	Performance criteria
	adoption by personnel on the ground
6. Manage the permaculture aid and development project	6.1 Maintain regular communication with the team on the ground 6.2 Troubleshoot any issues that arise 6.3 Document the roll out of the plan and address any gaps or misunderstandings immediately 6.4 Reduce paperwork and stress for operatives on the ground by simplifying reporting procedures and actioning requests quickly 6.5 De-brief personnel on return, and maintain detailed records of the project

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER508 Manage a permaculture aid and development project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- obtain information about the permaculture aid and development project
- develop a plan for project consultation
- obtain resources for the permaculture project
- obtain human resources for the permaculture project
- document the emergency plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles, ethics and practices related to aid and development in remote communities and overseas
- permaculture aid and development projects, such as:
 - disaster response and recovery
 - disaster planning
 - community projects in remote communities
 - social and economic development projects
 - educational projects in remote communities
 - health and wellbeing projects in remote communities
 - resource management project for remote communities
 - sustainable farming projects
 - regional autonomy projects
- strategic planning
- project management, such as:

- human resource management
- financial planning
- purchases and acquisitions
- organisational structure
- mentoring
- training
- new project or enterprise initiatives
- grant applications
- community consultation
- research and development
- community development
- cultural protocols and taboos
- religious practices and sensitivities
- engineering issues associated with remote area power supply, water supply, sewerage and waste treatment, erosion and sediment control, structural support and emergency housing
- feasibility study methods, such as:
 - economic and financial assessment
 - legal and planning issues
 - market opportunities and challenges
 - community and cultural acceptance
 - bioregional suitability
 - operational considerations
 - resource availability
 - sustainability criteria
 - energy descent/transition strategies
 - climate change strategies
 - environmental, water catchment and natural resource conservation issues
- contract law
- budgetary frameworks
- benchmarking

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER509 Design permaculture structures and features

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design permaculture structures and features. It requires the ability to develop a design brief, undertake a site analysis, develop a concept design, produce a final plan and prepare bill of quantities and estimates. Designing permaculture structures and features requires knowledge of permaculture design process, construction and engineering principles, drafting techniques, cost estimating, and calculations of materials, labour, machinery and equipment.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation. They undertake functions with initiative and judgement and take personal responsibility and exercise autonomy in undertaking complex work. They have accountability for the work of others (teams) within broad parameters, analyse and synthesise information as well as analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a design brief	1.1 Consult client to establish the purpose and requirements of design 1.2 Develop design brief in agreement with the client 1.3 Negotiate cost structures and timelines with the client 1.4 Clarify and negotiate use of consultants and sub-contractors with client
2. Undertake a site analysis	2.1 Inspect site where the permaculture structure or feature is to be located 2.2 Record the physical elements and features of the site 2.3 Analyse and record assessment of soil, topography, aspect, existing vegetation and climatic factors 2.4 Assess and record other relevant information 2.5 Assess legal requirements and constraints on development
3. Develop a concept design	3.1 Prepare concept plan to illustrate location and layout of proposed structure or feature according to the design brief 3.2 Undertake consultation with the client to establish agreement on options and approaches for development 3.3 Present the concept plan in a consistent graphic style
4. Produce a final plan	4.1 Produce a detailed final plan according to the design brief 4.2 Prepare design to scale 4.3 Provide information on the plan that is relevant and precise and clearly communicates development works to be undertaken 4.4 Include notes and specifications on the plan to assist in plan interpretation 4.5 Apply appropriate construction and engineering principles to permaculture plan
5. Prepare documentation	5.1 Prepare bill of quantities listing scope and extent of works 5.2 Prepare cost estimate for the client covering items in bill of quantities, labour and machinery and equipment costs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCPER510 Prepare a sustainable community and bioregional development strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare a sustainable community and bioregional development strategy, including the ability to prepare a brief, analyse available information, consult with individuals, groups and the community, identify required strategies, design organisational structures, and document a community and bioregional development strategy.

It requires knowledge of permaculture and community development principles and practices, transition town processes, community profiles, structure, processes and characteristics of community organisations, funding sources and their policies and strategies for encouraging community input and participation, relevant local, state and federal strategies and legislation and specific knowledge of particular groups or issues.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation. They undertake functions with initiative and judgement and take personal responsibility and exercise autonomy in undertaking complex work. They have accountability for the work of others (teams) within broad parameters, analyse and synthesise information as well as analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare a brief	1.1 Define aims and objectives of the sustainable community and bioregional development strategy in the brief and the strategic plan 1.2 Define core values, principles and guidelines in the brief and the strategic plan 1.3 Develop protocols for the design, implementation and ongoing management in consultation with stakeholders
2. Analyse available information	2.1 Collate information on the community and bioregion 2.2 Identify key elements and themes 2.3 Map interconnections and relationships between key elements and themes 2.4 Determine legal and planning instruments and guidelines relating to the community and bioregion 2.5 Identify key people, specialist advisers and consultants to assist in the development of the strategy
3. Consult with individuals, groups and the community	3.1 Respond to individual concerns in a manner which engages support and cooperation 3.2 Identify opportunities and approaches to ensure community access and involvement in consultation and participatory processes 3.3 Identify and develop processes for feedback and ongoing community or group involvement in the planning process and action outcomes 3.4 Provide guidance to the group and respond with appropriate options and solutions to address their concerns and issues 3.5 Select and apply appropriate community consultation methods and document results
4. Identify required strategies	4.1 Develop steps required to implement strategies that are logical and capable of implementation 4.2 Clearly formulate strategies and make available to relevant parties for comment, where appropriate 4.3 Develop strategies in consultation with all relevant parties 4.4 Recognise and document opportunities and constraints to

Element	Performance criteria
	implementation 4.5 Document approaches and methods and any adjustments for future reference
5. Design organisational structures	5.1 Provide assistance to groups in designing appropriate mechanisms and actions to address the range of issues 5.2 Contribute to the development of policies and processes to facilitate resolution of group concerns in the public arena 5.3 Employ effective interpersonal skills to motivate the group to work cooperatively 5.4 Develop operational arrangements to facilitate group processes 5.5 Assist the group to identify additional assistance and resources as required 5.6 Contribute to organisational or management strategies for coordination of multiple activities and initiatives
6. Document community and bioregional development strategy	6.1 Support proposed strategies for sustainable community and bioregional development and transition with available evidence 6.2 Confirm that sound operational plans can be implemented based on the proposed strategies 6.3 Develop documentation 6.4 Distribute the strategy plan to all relevant parties and ensure effective communication of information

Assessment Requirements for AHCPER510 Prepare a sustainable community and bioregional development strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare a brief
- analyse available information
- consult with individuals, groups and the community
- identify required strategies
- design organisational structures
- document a community and bioregional development strategy

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to bioregional development
- bioregional analysis and development
- climate change, Peak Oil and resource depletion responses
 - Transition Towns
 - community or bioregional development strategies, such as:
 - Transition Towns group activities or programs
 - ways of reducing the ecological ‘footprint’ of individuals, organisations or the community at large
 - ways of influencing government policy
 - ways of influencing business practices
 - support for ideas and solutions which enable transition to a low-carbon/low-energy future
 - environmental, water catchment and natural resource conservation projects

- community economics and enterprise
- social and cultural programs
- housing and community development programs
- strategic planning frameworks
- community supported agriculture, organic and sustainable primary production and consumer networks and programs
- energy descent plans
- local food and water security
- renewable energy and appropriate technologies
- greenhouse emission reduction and sequestration
- disaster preparedness, response and recovery
- strategic planning framework including:
 - core values
 - vision
 - goals
 - strategies
 - action plans
 - benchmarks
 - timelines
- community profile development
- community consultation and facilitation methodologies, such as:
 - team and community building activities
 - community forums and discussion
 - open space events
 - cultural mapping processes
 - creative problem solving processes
 - visualisation and experiential processes
 - information gathering processes
- structure, processes and characteristics of community organisations, such as:
 - non-government organisations
 - government organisations
 - cooperatives
 - incorporated and non-incorporated groups
 - companies both limited and unlimited
 - public companies both listed and unlisted
 - trusts
- funding sources and their policies and strategies for encouraging community input and participation, such as grants, gifts and crowd-sourced funding
- relevant local, state and federal strategies and legislation
- specific knowledge of particular groups or issues

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER511 Facilitate participatory planning and learning activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to facilitate participatory planning and learning activities. It requires the ability to devise strategies for facilitating participatory planning and learning and to carry out, report on and review participatory planning and learning. Facilitating participatory planning and learning activities requires knowledge of permaculture principles and practices, a range of participatory planning and learning activities, codes of conduct and ethical behaviour and group presentation methodology.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation. They undertake functions with initiative and judgement and take personal responsibility and exercise autonomy in undertaking complex work. They have accountability for the work of others (teams) within broad parameters, analyse and synthesise information as well as analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCPER511 Facilitate participatory planning and learning activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- devise strategies for facilitating participatory planning and learning
- facilitate group processes in an engaging and inclusive way
- conduct participatory planning and learning activities
- communicate with people of a wide diversity of ages and socio-economic or cultural groups
- review and report-on participatory planning and learning
- coordinate and brief team members
- problem-solve and build group dynamics

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- learning styles and methodologies, including accelerated and experiential learning
- strategies for facilitation of participatory planning and learning
- participatory planning and learning activities and processes, such as:
 - team building – ice breakers, trust games, creative and social activities, goal-setting, celebration and cultural activities
 - creative expression – wild design, mime, performing and visual arts, story telling
 - problem solving – brainstorming, mind mapping, random-input processes, PMI, SWOT, Six Thinking Hats, theming and chunking, affinity matrix, modelling
 - experiential – visualisation, affirmation, role play, cultural mapping, 6 senses, modelling, simulations, educational and experiential games

- information gathering – group and individual research and observation activities, sharing information, questioning, resource and skills mapping, surveys, field trips
- Negotiation – open forum, active listening, prioritisation, consensus building, win-win.
- *Dynamic Groups, Dynamic Learning*TM facilitation skills and methodology (Robin Clayfield)
- conflict resolution and strategies to deal with strong personalities
- codes of conduct and ethical behaviour
- group presentation methodology

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER512 Plan community governance and decision-making processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan community governance and decision-making processes. It requires the ability to assess future needs and, for existing groups, current community governance and decision-making processes. It requires the ability to develop options for community governance and decision-making frameworks and processes and report on preferred options for implementation. Planning community governance and decision-making processes requires knowledge of strategic planning, legal frameworks, advanced negotiation techniques, organisational change and development, group and individual goal setting techniques, risk management processes and techniques, action planning methods and information technology.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation. They undertake functions with initiative and judgement and take personal responsibility and exercise autonomy in undertaking complex work. They have accountability for the work of others (teams) within broad parameters, analyse and synthesise information as well as analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess current community governance and decision-making processes	1.1 Identify responsibilities and duties of individuals and community groups 1.2 Investigate and define proposed or existing community governance and decision-making processes 1.3 Collate information on proposed or existing governance issues and arrangements
2. Develop options for community governance and decision-making processes	2.1 Identify opportunities and constraints for development of community governance and decision-making process options 2.2 Consult with community on options for community governance and decision-making processes 2.3 Evaluate options in consultation with community through detailing advantages and disadvantages for each
3. Report on preferred options for implementation	3.1 Select preferred options for implementation based on comparative advantages 3.2 Base options for community governance and decision-making processes on sufficient, valid and reliable information and analysis 3.3 Ensure options for community governance and decision-making processes are consistent with legal frameworks and community and group values, policies, needs, guidelines and procedures 3.4 Implement options for community governance and decision-making processes, and provide for decisions to be made in and actioned in the appropriate timeframe

Assessment Requirements for AHCPER512 Plan community governance and decision-making processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess current community governance and decision-making processes
- assess community needs and plan around these needs
- demonstrate high level communication skills
- develop options for community governance and decision-making processes
- report on preferred options for implementation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- community governance and decision-making processes, such as:
 - governance of community resources, enterprises and activities
 - meeting facilitation, negotiation and mediation
 - conflict resolution procedures
 - decision-making methodologies
 - consensus processes
 - qualified decision-making processes
 - protocols
 - codes of conduct
 - recording and sorting decisions, such as *Many Baskets process* (Robin Clayfield)
- strategic planning
- community needs analysis techniques, such as:

- SWOT analysis
- 6 thinking hats (de Bono)
- PMI (de Bono)
- T.O.A.S.T. processes (Robin Clayfield)
- L.O.V.E. processes (Robin Clayfield)
- opportunities and constraints for community development, such as:
 - seeing solutions rather than problems
 - viewing the negative in a positive light
 - modifications or extensions of existing systems to solve inherent problems
 - applying old or simple technology to new or complex problems
 - behaviour change, including organisational change and transformation
 - willingness or unwillingness to participate
 - legal framework requirements
 - vested interests and hidden agendas
- advanced negotiation techniques
- organisational change and development
- group and individual goal setting techniques
- risk management processes and techniques
- action planning methods
- information technology
- legal frameworks obligations and responsibilities

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPGD101 Support gardening work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide support for gardening work.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for gardening work	1.1 Identify required materials, tools and equipment according to lists provided and supervisor's instructions 1.2 Conduct checks on all materials, tools and equipment and tell supervisor if there are insufficient or faulty items 1.3 Use correct manual handling techniques when loading and

Element	Performance criteria
	unloading materials and minimise damage to the load and the vehicle 1.4 Use suitable personal protective equipment (PPE) selected as directed by supervisor and ensure correct fit 1.5 Tell supervisor if any risks are identified
2. Undertake gardening work as directed	2.1 Follow instructions and directions provided by supervisor and ask for clarification when necessary 2.2 Communicate with other staff and clients in a professional manner 2.3 Handle and dispose of materials 2.4 Tell supervisor of there are problems or difficulties in completing work to required standards or timelines 2.5 Undertake gardening work in a safe and environmentally appropriate manner
3. Handle materials and equipment	3.1 Store waste material and debris produced during gardening work in a designated area 3.2 Handle and transport materials, equipment and machinery 3.3 Maintain a clean and safe work site while undertaking landscaping activities
4. Clean up on completion of gardening work	4.1 Return materials to store or disposed of as required 4.2 Clean, maintain and store tools and equipment 4.3 Restore site 4.4 Tell supervisor of work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD101A Support gardening work.

Assessment Requirements for AHCPGD101 Support gardening work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare materials, tools and equipment
- handle materials and equipment
- follow safe work practices and safety directions
- undertake gardening work as directed
- clean up on completion of landscape work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of gardening work
 - garden tools and equipment
 - maintenance practices for planted areas
 - planting techniques
 - repair and maintenance of garden features
 - safe work practices

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCPGD201 Plant trees and shrubs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manually plant trees and shrubs and other containerised and bare-rooted plants.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for planting operations	1.1 Identify work health and safety hazards and tell the supervisor 1.2 Select and use personal protective equipment (PPE) and ensure correct fit 1.3 Use and maintain tools and equipment for planting 1.4 Mark site out as directed

Element	Performance criteria
	1.5 Control competing plants 1.6 Modify soil as directed
2. Prepare trees and shrubs for planting	2.1 Excavate planting holes 2.2 Water trees and shrubs prior to planting 2.3 Confirm root ball is damp 2.4 Remove trees and shrubs from containers
3. Inspect plants and report problems	3.1 Inspect plant and root ball 3.2 Report dry, water repellent and loose root balls 3.3 Report the presence of symptoms of pests or disease 3.4 Apply root treatments as directed
4. Install trees, shrubs and/or other plants	4.1 Place plants in prepared hole 4.2 Back-fill planting hole and consolidate soil 4.3 Water plants to eliminate air pockets 4.4 Apply mulch as directed
5. Complete work	5.1 Dispose of or recycle soil and waste material from the site to minimise damage to the environment 5.2 Clean and store all tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD201A Plant trees and shrubs.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD201 Plant trees and shrubs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare for planting operations
- apply root treatments
- excavate planting holes
- inspect root ball condition
- install plants
- use tools and equipment for planting

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for planting trees and shrubs
 - basic plant structure and the physical and nutritional requirements of plants
 - botany and plant physiology as it applies to planting trees and shrubs
 - factors affecting the timing and method of tree or shrub planting
 - initial establishment needs of young plants
 - mulches and fertilisers
 - planting techniques relating to specific species
 - soil amelioration techniques
 - the effect of adverse outdoor climatic conditions
 - the impact of planting activities on the surrounding environment

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD202 Prepare and maintain plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare and maintain a plant display.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare the display site	1.1 Prepare the display site as instructed 1.2 Select and use materials, tools, equipment and machinery 1.3 Identify hazards and report to supervisor 1.4 Select and use suitable personal protective equipment (PPE)

Element	Performance criteria
2. Install plants	2.1 Place plants in the pattern specified by the plan 2.2 Choose accessories and materials specified in the plan
3. Maintain plants	3.1 Monitor the health of the plants to ensure they retain optimum appearance 3.2 Fertilise and water plants to maintain optimum health and appearance 3.3 Replace plants when no longer at optimum health and appearance 3.4 Remove rubbish, litter and decaying material from plants, pots and surrounds to maintain optimum appearance of display

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD202A Prepare and maintain plant displays.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPGD202 Prepare and maintain plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- use hand tools and machinery for preparation of plant displays
- interpret planting plans
- calculate quantities of plants and materials
- complete plant display in a timely manner
- use fertilisers and chemicals for maintenance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant display maintenance
 - common problems occurring with display plants
 - maintenance techniques for annuals and/or indoor displays
 - planting techniques for annual bed displays
 - remedial action required for display plants displaying health problems

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD203 Prune shrubs and small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prune shrubs and small trees that are less than three meters in height while standing on the ground.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify pruning requirements	1.1 Identify work health and safety hazards and report to the supervisor 1.2 Select and use personal protective equipment (PPE) and ensure correct fit 1.3 Select appropriate pruning tools and equipment for the location,

Element	Performance criteria
	access and size of material to be pruned 1.4 Identify plants that require pruning and confirm with supervisor 1.5 Confirm with the supervisor pruning method to be used
2. Undertake pruning of shrubs and small trees	2.1 Carry out pre-operational and safety checks on pruning tools and equipment 2.2 Operate machinery, equipment and tools as required 2.3 Carry out pruning as directed 2.4 Use correct manual handling techniques when lifting or moving heavy loads 2.5 Record and report work outcomes to the supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD203A Prune shrubs and small trees.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD203 Prune shrubs and small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- identify pruning requirements
- identify and report site and tree hazards
- recognise plants, shrubs and trees
- prune shrubs and small trees
- use appropriate tools, equipment and safety equipment
- minimise environmental disturbance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of pruning
- basic botany and physiology as they apply to pruning
- correct and safe use and care of tools and equipment
- effects of pruning on plant growth and habit
- plant health principles
- plant names and growth habits
- use of hygienic practices
- AS4373-2007 Pruning of amenity trees

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD204 Transplant small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to transplant small trees and shrubs without the use of lifting machinery or equipment.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for tree or shrub removal	1.1 Confirm transplanting instructions confirmed with the supervisor 1.2 Identify work health and safety hazards and report to the supervisor 1.3 Locate all underground services as outlined by supply authorities 1.4 Prepare and use tools and equipment appropriate to the task being

Element	Performance criteria
	undertaken 1.5 Select and use suitable personal protective equipment (PPE)
2. Prepare tree or shrub and undertake earthworks for removal	2.1 Prepare crown as required by the species and time of removal 2.2 Clear and water site prior to transplanting 2.3 Confirm root ball width and depth with the supervisor to ensure the root system can colonise new ground, depending on the needs of the species and size of the specimen
3. Remove tree or shrub from original site	3.1 Excavate the soil around the root zone 3.2 Prune tree roots where required to meet the appropriate Australian Standard 3.3 Stabilise tree as the root system is undercut and apply anti-transpirants as a root soak or foliar spray to ensure viability of the plant is maintained 3.4 Bind root ball with appropriate material to ensure adequate soil is retained and kept moist prior to transportation and installation 3.5 Lift tree and secure for potential storage or transportation using safe lifting techniques 3.6 Prepare and handle tree or shrub to minimise damage during handling and transportation
4. Replant tree or shrub in new environment	4.1 Provide appropriate drainage to ensure root system survival is maintained according to the needs of the species and conditions of the planting site 4.2 Modify soil according to the cultural requirements of the species 4.3 Plant tree or shrub in prepared hole 4.4 Install plant support devices as instructed
5. Complete transplant operation	5.1 Maintain transplanted plant with regular aftercare activities appropriate to the requirements of the species 5.2 Clean, maintain and store tools and equipment 5.3 Collect waste and dispose of or recycle to minimise damage to the external environment 5.4 Maintain records of transplant

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD204A Transplant small trees.

Assessment Requirements for AHCPGD204 Transplant small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- identify and report site and tree hazards
- prepare for tree or shrub removal
- prepare crown, root ball and earthworks
- prune roots where appropriate
- use tools and equipment in a safe and effective manner
- remove tree or shrub from original site
- transplant tree or shrub in selected site
- maintain transplanted specimen
- install support devices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of transplanting trees
 - causes of damage or drying-out of trees and shrubs, and prevention methods
 - factors affecting the timing and method of lifting trees and shrubs
 - techniques of securing and anchoring transplanted trees and shrubs
 - the effect of adverse outdoor climatic conditions, such as rain, hail, or very high ultraviolet radiation, which may prevent or impede transplanting operations
 - transference of soil or root-borne diseases
 - transplanting practices associated with different soil types and relationships to plant care
 - trees and shrubs that are most suited to transplanting

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD205 Prepare a grave site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare a gravesite.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare site for excavation	1.1 Identify work health and safety hazards, assess risks and report to the supervisor 1.2 Select and use personal protective clothing (PPE) and equipment 1.3 Select, prepare and use tools, equipment and machinery 1.4 Inspect surrounding monuments, masonry or headstones that threaten the stability of the new gravesite and remove if

Element	Performance criteria
	<p>necessary, after consultation with supervisor</p> <p>1.5 Use sludge pump to remove excess water if required</p> <p>1.6 Mark gravesite out to suit coffin dimensions</p>
2. Assist with the excavation	<p>2.1 Assist with excavation of grave</p> <p>2.2 Shore sides of grave where depth of grave exceeds 1.5 metres or as instructed</p> <p>2.3 Cover surface area for 400 mm from the edge of the excavation with an approved material to ensure the integrity and stability of the soil</p> <p>2.4 Secure gravesite with protective restraints to limit access to the site while being established and when left unattended</p>
3. Backfill and enhance the gravesite following burial	<p>3.1 Back-fill grave with soil free from large lumps, plant debris or waste material</p> <p>3.2 Use backfilling techniques to consolidate the soil, to minimise cavities and to restore the ground to its original level</p> <p>3.3 Replace surrounding monuments, masonry or headstones as necessary</p> <p>3.4 Dispose of waste material and plant debris removed from the gravesite in an environmentally safe manner</p> <p>3.5 Enhance gravesite as instructed</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD205A Prepare a grave site.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD205 Prepare a grave site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare site for excavation
- assist with the site excavation
- shore up sides of grave as required
- backfill and enhance the gravesite following burial

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of grave site preparation
 - safe work practices working in and around confined spaces
 - the environmental implications of pumping sludge water from an excavation site and the effects it may have on surrounding gravesites
 - work health and safety responsibilities of employees

Assessment Conditions

Assessors must satisfy current standards for RTO's.

AHCPGD206 Conduct visual inspection of park facilities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out routine visual inspections of park and recreational facilities to identify visible hazards and existing and potential risks.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for visual inspection	1.1 Interpret site plans and inspection checklists and clarify requirements with the supervisor 1.2 Clarify the specific terminology used in checklists 1.3 Identify park site to be inspected and locate on the site plan

Element	Performance criteria
	1.4 Identify park facilities, equipment and services on site from checklist descriptions and site plan
2. Undertake visual inspection	2.1 Inspect park facilities, equipment and services and compare to enterprise presentation standards and workplace health and safety requirements 2.2 Identify work health and safety hazards and adverse environmental impacts and record on the appropriate form 2.3 Report situations requiring urgent action to supervisor
3. Submit report	3.1 Confirm that inspection activity reports and checklists are concise and accurate and comply with enterprise standards 3.2 Forward checklist and report promptly to supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD206A Conduct visual inspection of park facilities.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD206 Conduct visual inspection of park facilities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare for visual inspection of park facility
- carry out a visual inspection of park facility
- determine the extent of problems
- evaluate serious issues that may be present
- identify environmental risks and impacts from site facilities
- rate the condition of facilities
- rate the hazards and associated environmental implications of malfunctioning facilities, equipment and services
- report urgent situations
- complete and submit inspection activity checklist and report

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of park facility visual inspection
 - cleaning, servicing and hygiene requirements of public conveniences
 - hazards investigation and risk assessment
 - effective maintenance and repair work particularly in relation to end use of the facilities and equipment, and the safety of users
 - recognition of the range of park facilities, equipment and services relevant to the enterprise
 - reporting requirements, procedures and materials for use in park inspection
 - terminology used to describe different components of the range of facilities, equipment and services relevant to the enterprise

- the effect of adverse outdoor climatic conditions, such as rain, hail, wind, or very high ultraviolet radiation, on park facilities inspection activities
- hazards that are likely to be encountered by visitors using the park facilities and equipment
- the practical application of site plans, checklist descriptions and presentation standards to locate and effectively assess facilities and equipment against the required parameters
- the relevant Australian Standards

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD301 Implement a plant establishment program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish planting areas in new projects and in programs of extensive replacement and renovation works across a range of situations and environments.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to establish a planting area	1.1 Identify the planting site, planting methods and plant species and cultivars from the site plan 1.2 Select appropriate materials, tools, equipment and machinery 1.3 Carry out pre-operational and safety checks on tools, equipment

Element	Performance criteria
	<p>and machinery</p> <p>1.4 Identify work health and safety hazards, assess risks and implement controls</p> <p>1.5 Select and use suitable safety and personal protective equipment (PPE)</p> <p>1.6 Maintain a clean and safe work area throughout work</p>
2. Prepare the planting area	<p>2.1 Determine the layout of services, check depths against the site plan and report discrepancies to the supervisor and the relevant authority</p> <p>2.2 Carry out earthworks as directed</p> <p>2.3 Select and apply additives as required by site conditions</p> <p>2.4 Water the planting site where required</p> <p>2.5 Mark out the positions of plants on site</p> <p>2.6 Remove debris and pollutants from the site and dispose of in an environmentally safe manner</p>
3. Undertake planting operation	<p>3.1 Inspect all plants for health, vigour and well-established root systems prior to being planted</p> <p>3.2 Return plants with major defects to the supplier or set aside to be returned</p> <p>3.3 Trim or treat plants with minor defects to maintain health and vigour</p> <p>3.4 Space plants appropriately</p> <p>3.5 Use planting methods that comply with the growing requirements of individual plant species and cultivars</p> <p>3.6 Provide newly placed plants with post-planting care</p> <p>3.7 Prune, where necessary, according to the needs of the species and cultivar to ensure plants develop a sound framework for their growth and habit</p>
4. Review the plant establishment works	<p>4.1 Review the plant establishment program as required</p> <p>4.2 Identify, record and report plants incorrectly planted, or situations that will prevent plants from reaching their full potential</p> <p>4.3 Take remedial action to ensure all requirements of the plant establishment program are implemented</p>
5. Complete establishment works	<p>5.1 Complete earthworks and surface finishes</p> <p>5.2 Remove waste material from the planting site and dispose of in an environmentally safe manner</p> <p>5.3 Clean, maintain and store equipment, tools and machinery</p> <p>5.4 Record work outcomes and report to the supervisor</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD301A Implement a plant establishment program.

Assessment Requirements for AHCPGD301 Implement a plant establishment program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare to establish a planting area
- interpret site plans and plant establishment specifications
- measure quantities, calculate material requirements, area, volume, ratios and application rates
- carry out planting operations
- ensure planting methods comply with plant species and cultivar growing requirements
- prune plants to ensure they develop a sound framework for their growth and habit
- inspect and determine plant quality and health
- record and report work outcomes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant establishment
 - soils and soil amelioration techniques
 - the identification of pests and diseases, plant symptoms of infections, treatment threshold levels, recommended treatments, methods of application and environmental implications
 - the objectives of the plant establishment program, including finished plant forms, site appearance, end use and time constraints
 - the physiology of required plant species and cultivars, culture and planting procedures, including growth rates, main nutrient and water requirements, deficiency symptoms, recommended treatments and associated environmental implications

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD302 Plan and maintain plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and establish plant displays either indoors or as seasonal displays of annual and perennial plants in garden beds.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare plans for plant displays	1.1 Inspect the display site for aesthetic, environmental and physical attributes 1.2 Identify occupational Health and Safety (OHS) hazards, assess risks assess and implement controls

Element	Performance criteria
	1.3 Select, use and maintain personal protective equipment (PPE) according to procedures 1.4 Identify on the display plan the location and projected life of the display 1.5 Identify on the display plan the plant types suitable for aesthetic effects, environmental and physical attributes 1.6 Identify on the display plan actions, timelines and work organisation, in consultation with the supervisor or manager. 1.7 Confirm the availability of plants, materials and services for preparing the display 1.8 Select materials, tools, equipment and machinery according to the display plan and enterprise work procedures
2. Select plants	2.1 Select plants that are healthy and vigorous and comply with enterprise specifications for quality. 2.2 Select number and size of plants according to the display plan. 2.3 Select plants that display the ability to survive in the display position for the length of the display
3. Place plants	3.1 Plants are placed in a pattern specified by the plan 3.2 Accessories and materials are chosen as specified in the plan 3.3 Work is undertaken according to OHS requirements
4. Maintain plants	4.1 Monitor the health of the plants to ensure they retain optimum appearance. 4.2 Fertilise and water plants to maintain optimum health and appearance. 4.3 Replace plants when they are no longer at optimum health and appearance. 4.4 Remove rubbish, litter and decaying material plants, pots and surrounds to maintain optimum appearance of display.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD302A Plan and maintain plant displays.

Links

Assessment Requirements for AHCPGD302 Plan and maintain plant displays

Modification History

NotReleased	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare design plans and specifications
- determine spatial measurements of display site
- calculate number of plants and materials
- select plants according to the display that comply with quality specifications and the ability to survive for the length of the display.
- place the plants according to the display plan and pattern
- complete plant display in a timely manner
- maintain the plant display

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant display maintenance
 - aim and purpose of building plant displays
 - common problems occurring with display plants
 - design principles for plant displays
 - features and characteristics of a range of plants used for display purposes
 - growing requirements of a range of common plants used in plant displays
 - remedial action required for display plants displaying health problems

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD303 Perform specialist amenity pruning

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform specialist amenity pruning using specialist pruning techniques.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for specialist amenity pruning	1.1 Inspect plants and determine pruning strategy according to the plants' characteristics or desired outcome 1.2 Identify common diseases, pests and nutrition deficiencies in trees 1.3 Identify work health and safety hazards, assess risks and implement suitable controls

Element	Performance criteria
	1.4 Select and prepare pruning tools and equipment required by the pruning program 1.5 Consult references where required to determine best pruning strategies for special plants
2. Undertake specialist pruning	2.1 Undertake pruning using established and specialist pruning techniques 2.2 Adhere to site environmental procedures 2.3 Assess pruned plants to determine if pruning requirements have been met 2.4 Carry out remedial work where required
3. Complete work	3.1 Dispose of or recycle waste material from the site to minimise damage to the environment 3.2 Clean, maintain and store tools, equipment and machinery 3.3 Clean and clear site 3.4 Record completed pruning and report to supervisor or the client

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD303A Perform specialist amenity pruning.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD303 Perform specialist amenity pruning

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare for pruning
- sharpen and maintain tools required for pruning
- meet pruning program requirements
- carry out pruning using specialist pruning techniques
- store and carry tools safely
- assess pruning quality
- clean and clear pruning site
- record and report completed pruning to supervisor or client

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of specialist pruning
 - anatomy and physiology of plants, shrubs and trees
 - AS4373-2007 Pruning of amenity trees
 - compartmentalisation of decay in trees (CODIT)
 - effect on plant growth and habit after pruning
 - identification of plant species and their pruning requirements
 - local government tree protection and preservation regulations
 - principles and methods of specialist pruning to achieve given objectives
 - specialist tools and equipment

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD304 Implement a landscape maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a landscape maintenance program of newly constructed or established landscapes.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret a landscape maintenance program	1.1 Determine the scope of the maintenance works from the landscape maintenance program 1.2 Determine the frequency of maintenance works and implement 1.3 Establish landscape maintenance standards 1.4 Plan and prepare maintenance tasks

Element	Performance criteria
	1.5 Identify occupational health and safety (OHS) hazards, assess risks and implement controls
2. Monitor and maintain landscape areas	2.1 Prepare or use a site inspection checklist 2.2 Identify remedial action, repairs, renovations, treatments and replacements required to restore site to full effectiveness 2.3 Implement maintenance tasks 2.4 Report items which are beyond the scope of the maintenance program to the nominated person 2.5 Record items requiring further action 2.6 Evaluate and record results of maintenance works

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD304A Implement a landscape maintenance program.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD304 Implement a landscape maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- determine maintenance requirements
- implement maintenance operations
- treat diseased plants
- repair and renovate landscape structures and features
- identify and items requiring further action
- evaluate and record results of maintenance works

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of landscape maintenance
 - actions permitted in the event of variations to maintenance programs or contracts
 - horticultural practices for heritage and cultural areas
 - characteristics of a range of plants
 - common problems occurring in a range of plants
 - landscape maintenance programs or contracts
 - optimal growing conditions for a range of plants
 - principles and applications of an integrated pest management (IPM) program

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD305 Conduct operational inspection of park facilities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to inspect park or recreational facilities to identify hazards, existing and potential risks and non-conformities with Australian Standards and workplace health and safety requirements.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for operational inspection	1.1 Determine, from the operational request, the specific facilities and equipment to be inspected and purpose of the inspection 1.2 Select required tools and equipment for testing and inspection 1.3 Carry out pre-operational and safety checks on tools and

Element	Performance criteria
	equipment 1.4 Prepare appropriate checklists and reporting formats to suit the application 1.5 Identify the different types of facilities from checklist descriptions 1.6 Clarify specific terminology used in checklists with the supervisor 1.7 Identify workplace health and safety hazards, assess risks and implement controls 1.8 Select and use appropriate personal protective equipment (PPE)
2. Undertake operational inspection	2.1 Identify and record modes of non-conformity with Australian Standards, work health and safety guidelines and enterprise standards 2.2 Identify and record hazards and indications and signs of hidden faults 2.3 Ensure checklist entries are concise and accurate
3. Finalise the park inspection	3.1 Report to supervisors situations requiring urgent action or closure of facilities 3.2 Note recommendations to rectify non-conformities, as required 3.3 Complete an inspection report and submit to the client or supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD305A Conduct operational inspection of park facilities.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD305 Conduct operational inspection of park facilities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- determine the purpose of the inspection and the facilities and equipment to be inspected and tested
- carry out pre-operational and safety checks on tools and equipment
- clarify specific terminology used in checklists with the supervisor
- identify workplace health and safety hazard, assess risks and implement controls
- interpret design symbols and terminology
- compare actual measurements of inspected components with legal, workplace health and safety and/or enterprise standards and specifications
- determine the degree of urgency to report serious situations
- evaluate the condition of facilities
- use proforma reporting and work procedure documents

Knowledge Evidence

The candidate must demonstrate knowledge of:

- different modes of non-conformity that may be identified in reference to relevant Australian Standards and work health and safety requirements
- identification, assessment and control of hazards
- inspection procedures and techniques, and legal and enterprise reporting requirements for maintenance, repair and replacement recommendations
- principles and practices of park facility operational inspections
- terminology used to describe different components of park or recreational facilities and equipment
- operational expectations and enterprise standards for the presentation and working order of a range of park or recreational facilities and equipment

- the range, use and safety parameters of park or recreational facilities and equipment, their material construction and maintenance requirements
- work health and safety legislative requirements and codes of practice associated with public use of park facilities

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD306 Implement a maintenance program for an aquatic environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a maintenance program for an aquatic environment in a park or garden setting.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for maintenance activities	1.1 Identify, interpret and apply requirements for the maintenance of the aquatic environment 1.2 Select and prepare tools, equipment and machinery for use 1.3 Identify work health and safety hazards, assess risks and

Element	Performance criteria
	implement controls 1.4 Select and use appropriate personal protective equipment 1.5 Identify environmental implications associated with maintenance activities and report to supervisor
2. Maintain aquatic organisms	2.1 Identify indigenous, exotic and pest aquatic animals and plants for the specific aquatic environment 2.2 Monitor aquatic plants and animals and record and maintain relevant data and apply to aquatic plant maintenance activities 2.3 Report issues to supervisor, with recommendations for action 2.4 Implement control methods for excess aquatic animals and plants, and identified pest animals and plants 2.5 Process waste plant and animal material with regards to environmental issues
3. Maintain water quality	3.1 Monitor water quality where appropriate for the aquatic environment and the input water resource 3.2 Record monitoring data, maintain and apply to water quality maintenance activities 3.3 Remove debris and process using appropriate equipment 3.4 Report water quality issues to supervisor, with suggestions for remedial action 3.5 Discharge water, clean environment, and recharge water from the designated storage area or other input water resource

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD306A Implement a maintenance program for an aquatic environment.

Assessment Requirements for AHCPGD306 Implement a maintenance program for an aquatic environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- interpret site plans and maintenance program requirements, and use proforma reporting, recording, analysis and work procedure documents
- measure materials and aquatic site dimensions
- schedule and implement monitoring activities correctly and record, interpret and apply monitoring data

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of aquatic environment maintenance
 - aquatic systems ecology
 - correct safety procedures working from boats or adjacent to large bodies of water
 - enterprise systems and procedures for the safe operation and maintenance of machinery and equipment in aquatic environments
 - food chain and nutrient cycling in aquatic systems
 - recognition, physiology and biological characteristics of animals and/or plants specific to the aquatic environment
 - regulations and industry standards for water quality requirements in association with specified use
 - relevant legislation regarding water pollution and management
 - safe systems and procedures for handling, transporting and storing chemicals and hazardous substances taking into account toxicity levels and environmental impacts
 - wildlife habitats associated with the aquatic environment

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD401 Design plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design plant displays in a wide range of locations and situations, buildings and structures. It applies to permanent, semi-permanent and temporary displays of plant life under a range of gardening, exhibition, visual merchandising, marketing and commercial leasing and hiring activities.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop the design	1.1 Consult with client to establish the purpose and requirements of

Element	Performance criteria
concept plan	the design 1.2 Evaluate site or location for aesthetic, environmental and physical attributes 1.3 Determine timelines for display and incorporate into the plan 1.4 Clarify budget parameters for concept plan with client or manager 1.5 Develop concept plan using common horticultural conventions
2. Ensure compliance with the design plan	2.1 Present concept plan to client and negotiate agreement on design 2.2 Develop final design plan documentation 2.3 Inspect plants and display materials prior to installation to ensure they meet required quality standard 2.4 Inspect plant display to ensure compliance with design plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD401A Design plant displays.

Links

Assessment Requirements for AHCPGD401 Design plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- develop maintenance programs
- evaluate sites or locations to determine the effect of aesthetic, environmental and physical attributes on nature of display
- research and analyse information about plant and materials specifications, cultural requirements and environmental requirements
- consult with clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant display design
- characteristics of a range of plants used in plant displays
- growth and maintenance requirements of plants in natural and artificial environments
- horticultural conventions for design plans
- plant selection
- principles of design
- processes and techniques for preparing, costing and documenting plans for plant displays
- plants commonly used in plant displays

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD402 Plan a plant establishment program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a plant establishment program and a relevant site plan and specifications.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out preliminary planning activities for the plant establishment	1.1 Consult with client and clarify preferences and requirements for the plant establishment program 1.2 Research plant species and cultivars; and local by-laws and

Element	Performance criteria
program	<p>restrictions that may affect the plant establishment program</p> <p>1.3 Identify environmental implications of the planned program and, if necessary, report to relevant personnel for further research</p> <p>1.4 Develop a concept plan that reflects client preferences and requirements and takes into account site factors and any identified environmental requirements</p> <p>1.5 Present the concept plan to the client for discussion and approval</p>
2. Determine requirements of the plant establishment program	<p>2.1 Identify plant species and cultivars appropriate to the site and consistent with the agreed concept plan</p> <p>2.2 Calculate and cost the required quantity and confirm availability with suppliers</p> <p>2.3 Select plant establishment procedures that suit the characteristics of available plant materials, the resources and equipment available and environmental factors that would affect the success of the plant establishment program</p> <p>2.4 Identify post-planting care requirements</p> <p>2.5 Identify and cost resources, tools, equipment and machinery required for planting and post-planting care and confirm availability confirmed with suppliers, contractors and appropriate personnel</p> <p>2.6 Identify work health and safety hazards, assess risks and develop controls, estimate costs and documented in the plan</p> <p>2.7 Outline staged implementation and development, where appropriate, and provide access for future works provided</p> <p>2.8 Determine timelines for preparations, planting and post-planting care, taking into account the needs of the plant species and cultivars, site conditions, and any other planning requirements</p>
3. Prepare and document the plant establishment program and specification	<p>3.1 Produce a scaled site plan which can be readily interpreted and understood by on-site personnel</p> <p>3.2 Develop and document detailed on-site procedures and schedules required for the planting of the site and post-planting care of plants</p> <p>3.3 Prepare detailed plan, specifications and quotation based on the requirements of the program, and present to the client for acceptance</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD402A Plan a plant establishment program.

AHCPGD501 Manage plant cultural practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a plant cultural program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Define the plant cultural requirements of the site	1.1 Survey and record the range of plant life areas and plant species 1.2 Determine, acquire and maintain materials, equipment and labour required for implementation and maintenance

Element	Performance criteria
	<p>1.3 Identify work health and safety hazards, assess risks and implement appropriate controls</p> <p>1.4 Assess staff capability and skills and knowledge against implementation and maintenance requirements</p> <p>1.5 Implement staff training and development as required to bridge gaps</p>
2. Develop a plant cultural program for the site	<p>2.1 Determine plant cultural practices over the duration of a documented planning period</p> <p>2.2 Sample, prepare and test soil types and growing media through field tests by staff and laboratory tests by specialist services</p> <p>2.3 Allocate resources and develop appropriate budgets for the implementation period</p> <p>2.4 Source and contract required specialist cultural practice services</p> <p>2.5 Develop a schedule of operations for the implementation period</p> <p>2.6 Allow for environmental and cultural contingencies in the site program</p>
3. Manage the implementation of the program	<p>3.1 Implement routine and contracted services</p> <p>3.2 Interpret test results and appropriately ameliorate soils and growing media</p> <p>3.3 Allocate and supervise staff and appraise for performance</p> <p>3.4 Confirm that materials and equipment are used according to work health and safety requirements and documented safe operating procedures</p> <p>3.5 Log progress reports detailing the on-going results of the plant cultural program</p>
4. Monitor, review and document the program	<p>4.1 Itemise daily workplace records, weekly or monthly expenses, and other information relevant to the plant cultural program in registers or diaries</p> <p>4.2 Evaluate costs and expenditure against budgets and document in a report</p> <p>4.3 Monitor, and evaluate routine and contracted services and record performance audits</p> <p>4.4 Compare the plant cultural program to previous programs and make appropriate adjustments</p> <p>4.5 Document results in a report covering all items of recorded information in the program</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPGD501 Manage plant cultural practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- allocate resources
- contract specialist services
- determine plant cultural requirements
- develop a plant cultural program and budget documentation
- manage contingencies
- plan schedule of operations
- supervise, monitor and appraise the performance of work team and contracted services

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant cultural practice management
 - budgeting and planning
 - operation and maintenance of irrigation systems
 - plant anatomy, physiology, morphology, taxonomy and nomenclature
 - plant cultural practices
 - plant identification and selection
 - plant maintenance practices
 - plant nutrition requirements and practices
 - soil types, properties, field tests and sampling techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PGD502 Plan the restoration of parks and gardens

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan the restoration of parks and gardens of historical or cultural significance, develop a comprehensive restoration program of works and develop a relevant site plan, specifications and work procedures.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out preliminary planning activities for	1.1 Consult with client and confirm preferences and requirements for the park or garden

Element	Performance criteria
restoration works	<p>1.2 Assess the site for biophysical factors, historical and cultural attributes, services and site modifications</p> <p>1.3 Research the legal attributes and local by-laws and restrictions that may affect the plan for restoration works</p> <p>1.4 Identify the environmental implications of the planned restoration works and, if necessary, report to relevant personnel for further research</p> <p>1.5 Develop a concept plan that reflects client preferences and requirements and takes into account heritage issues, site factors and any identified environmental requirements and present to the client for discussion and approval</p> <p>1.6 Consult other professionals to assist in research and planning of restoration works to meet legislative requirements</p>
2. Determine requirements of restoration works	<p>2.1 Identify plants that are appropriate to the site, consistent with the agreed concept plan and the original design philosophy, and take into consideration historical and cultural values</p> <p>2.2 Calculate and cost the required quantity of plants and confirm availability and genetic integrity with suppliers</p> <p>2.3 Select restoration procedures that are consistent with the agreed concept plan, account for the characteristics of available plant materials, resources and equipment and account for the environmental factors affecting the success of the restoration works</p> <p>2.4 Include maintenance of softscape and hardscape components of the park or garden</p> <p>2.5 Identify and cost resources, tools, equipment and machinery required for the planting and ongoing maintenance of the restoration works and confirm availability with suppliers, contractors and appropriate personnel</p> <p>2.6 Identify work health and safety hazards, assess risks and develop controls</p> <p>2.7 Outline staged implementation and development, where appropriate, including providing access for future works as required by client and site requirements</p> <p>2.8 Determine timelines for preparations, planting and maintenance, taking into account the needs of the restoration species, the softscape and hardscape components, site conditions, and other relevant planning requirements</p>
3. Prepare and document the restoration plan and specifications	<p>3.1 Prepare a detailed plan, specifications and quotation based on horticultural conventions, original design philosophy and the requirements of the restoration works, and present to the client for acceptance</p> <p>3.2 Produce a scaled site plan which can be readily interpreted and</p>

Element	Performance criteria
	<p>understood by on-site personnel</p> <p>3.3 Develop and document detailed on-site procedures and schedules required for the restoration of the park or garden and its ongoing maintenance</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD502A Plan the restoration of parks and gardens.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD502 Plan the restoration of parks and gardens

Modification History

NRelease	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- determine requirements of the restoration work
- consult with clients
- select restoration procedures that are consistent with the agreed concept plan, appropriate to the site and account for historical and cultural values, available resources and relevant environmental factors
- calculate the cost and spatial and logistical requirements of components of the restoration works
- comply with legislative requirements
- research and evaluate information
- prepare and document the restoration plan and specifications
- prepare a site plan that can be understood by on-site personnel

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of park and garden restoration
 - construction procedures, plant selection and cultural practices for historically or culturally significant parks and gardens
 - growth habits and cultural requirements of specific plants under a range of soil and environmental conditions
 - historic parks and gardens management principles and guidelines
 - legislation and regulations relating to heritage sites and restoration works
 - maintenance requirements and practices for specific plants prior to and after initial establishment

- principles of the Australian Natural Heritage Charter, the Draft Guidelines for the Protection, Management and Use of Aboriginal and Torres Strait Islander Cultural Heritage Places and the Burra Charter
- role of project briefs and client consultation processes in planning restoration works
- site evaluation techniques, including methods of analysing the condition of soils, plants and waterways for restoration activities

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD503 Manage parks and reserves

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage parks and reserves.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Implement business, financial, marketing and human resource	1.1 Identify goals and objectives for park or reserve management as well as the goals and objectives or charter of linked external agencies

Element	Performance criteria
management plans	1.2 Identify the actions required to achieve the plans and determine operational objectives 1.3 Consult with appropriate personnel to communicate the roles, responsibilities and performance targets of staff and work groups
2. Implement and monitor a purchasing plan	2.1 Determine the quantity, quality and timing of supply of each input and service as required by the business plan and cash flow budgets 2.2 Confirm that the purchasing system and records facilitate the selection of suppliers and arrangement of orders 2.3 Isolate inefficiencies, stock outs and system problems, identify solutions and modify systems as required 2.4 Establish asset databases and prepare and present asset management reports 2.5 Consider work health and safety requirements in all purchase decisions 2.6 Communicate purchasing plan to responsible personnel, initiate and monitor systems and maintain inventories
3. Schedule park or reserve operations	3.1 Document schedules and timelines of operations in a form that is accessible and understandable to all relevant personnel 3.2 Identify and coordinate quantity, quality and timing of supply of each input and service as required by the financial, physical and human resource requirements of the operation 3.3 Coordinate operations to ensure that available labour matches the quantity and type of work to be completed 3.4 Establish key performance outcomes and indicators to measure performance of all park or reserve operations and personnel 3.5 Undertake benchmarking as required by the particular organisation 3.6 Isolate coordination inefficiencies and problems, identify solutions and modify systems as required
4. Manage enterprise office	4.1 Develop and implement sound office and administrative systems and communications 4.2 Ensure necessary office equipment is available or purchase where necessary and cost effective to do so 4.3 Identify work health and safety hazards, assess risks and implement suitable controls 4.4 Assess and implement innovations in office procedures where appropriate
5. Monitor, review and report on changing conditions	5.1 Establish systems to monitor operational objectives, identify variance from plans and adjust actions where necessary 5.2 Establish systems to monitor the immediate and related

Element	Performance criteria
	environments 5.3 Identify variances likely to affect the achievement of business, financial, marketing and human resource management goals and objectives and report to senior management 5.4 Maintain records, provide reports and document reviews
6. Recommend improvements to operation	6.1 Review operations and identify possible improvements affecting business planning, personnel morale, productivity and systems efficiency 6.2 Document recommendations for improvements to operations that are supported by appropriate evidence and reasoned arguments, and present to senior management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD503A Manage parks and reserves.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD503 Manage parks and reserves

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- assess environmental impacts on the immediate and related environments and impact reduction techniques
- assess financial systems, prepare and monitor budgets and liaise effectively with consultants and other industry contacts on the spatial and logistical aspects of management systems and on-ground operations
- assign work, receive and interpret staff feedback and consultants reports, and respond effectively to achieve management objectives
- interpret business, financial, marketing and human resource management plans
- research and consult to obtain the information required for effective maintenance and development of the park or reserve

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of park and reserve management
 - asset and resource management
 - budgeting, monitoring systems and allocation of monetary resources
 - legislative and regulatory requirements relevant to parks and reserve land use applications and management activities including OHS, HAZCHEM, dangerous goods, duty of care and Australian Standards as they apply to Parks and Gardens - AS/NZS 4486.1:1997
 - management information systems
 - performance management and benchmarking
 - policies applying across all levels of government and within the specific region, including those under catchment plans

- principles of the Australian Natural Heritage Charter and the Draft Guidelines for the Protection, Management and Use of Aboriginal and Torres Strait Islander Cultural Heritage Places and the Burra Charter
- sports and recreational land use applications and associated environmental implications
- staff training and development principles, practices and techniques
- technologically assisted management tools such as computing systems, software and hardware, and telecommunications equipment

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD504 Develop and implement a streetscape management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and implement a streetscape management plan.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Define the need for a streetscape	1.1 Identify the management plan objectives for the streetscape 1.2 Consult with client and identify brief requirements

Element	Performance criteria
management plan	1.3 Identify a planning team including specialists and consultants
2. Undertake preliminary planning activities	2.1 Identify major stakeholders 2.2 Determine the availability of specialists to assist in management planning work and prepare contracts where required 2.3 Establish timelines for development of the management plan and reporting arrangements to client 2.4 Identify required resources for developing management strategies
3. Prepare a site description	3.1 Identify and map landscape values of the area 3.2 Identify and map physical features and characteristics of the streetscape 3.3 Research land , including current, cultural and historical modifications, and determine and record their effects on the streetscape 3.4 Assess and document physical condition of site 3.5 Document the biological characteristics of the site
4. Analyse site information and description	4.1 Evaluate information in terms of core principles and objectives 4.2 Produce documents, including plans, technical reports and maps 4.3 Determine priorities and key management issues 4.4 Identify and document opportunities and constraints to meeting planning objectives and goals 4.5 Make a presentation to clients and residents and incorporate feedback into planning documentation
5. Identify management strategies	5.1 Identify management strategies that address defined objectives 5.2 Design management strategies to alleviate existing impacts or to target management action 5.3 Cost management strategies and compare to existing budgets and available resources 5.4 Plan implementation of work to prioritise outcomes and management resource allocation 5.5 Consult with clients and residents and incorporate feedback into documentation
6. Prepare the management plan	6.1 Develop a draft management plan that includes site information and management strategies 6.2 Consult with stakeholders and clients and incorporate agreed changes into the final plan 6.3 Present final plan to client

Element	Performance criteria
7. Implement the management plan	7.1 Implement the management plan within predetermined budget, and according to the schedule and strategies set out in the plan 7.2 Modify the implementation strategy to address on-going feedback from clients and residents 7.3 Provide reports to clients and residents on the progress of implementation works

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD504A Develop and implement a streetscape management plan.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPGD504 Develop and implement a streetscape management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- define the need for a management plan
- undertake preliminary planning activities
- analyse site information and description
- identify management strategies
- prepare the management plan
- prepare a site description
- implement the management plan

Knowledge Evidence

The candidate must explain:

- principles and practices for streetscape management planning
 - basic civil design
 - community consultation processes
 - horticultural, landscape and arboricultural practices used in streetscape management
 - landscape assessment, survey and analysis techniques
 - management planning principles and issues
 - soil, plant and water testing processes and procedures, interpretation and application of results

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPGD505 Conduct comprehensive inspection of park facilities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct a compliance audit of park or recreational facilities to identify non-conformities with Australian Standards, legislative and work health and safety requirements, as well as manufacturers' standards.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Parks and gardens (PGD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for comprehensive	1.1 Determine the specific facilities and equipment to be inspected as well as the purpose of the inspection as outlined in the operational

Element	Performance criteria
inspection of park facilities	request 1.2 Identify the tools and equipment for testing and inspection and confirm availability with appropriate personnel 1.3 Carry out pre-operational and safety checks on tools and equipment 1.4 Prepare appropriate checklists and reporting formats to suit the activity 1.5 Identify the types of facilities from checklist descriptions
2. Undertake comprehensive inspection of park facilities	2.1 Identify and record instances of non-conformity with Australian Standards, work health and safety guidelines and manufacturers' standards 2.2 Undertake inspections for structural integrity in an efficient and safe manner, according to enterprise policy. 2.3 Identify and detail safety risks and hazards and situations. 2.4 Ensure that checklist entries are concise and accurate. 2.5 Undertaken inspections according to OHS requirements.
3. Assess age and predict effective lifespan of existing park facilities	3.1 Identify the manufacturer of playground equipment and structures through reference to original plans and specifications 3.2 Determine and record the age and future lifespan of park facilities 3.3 Estimate and record the cost of repair or replacement of park facilities
4. Submit report and recommendations	4.1 Address situations requiring urgent action 4.2 Prepare concise and accurate reports and submit to management 4.3 Review existing management systems, particularly regarding frequency of inspection, and make improvements in consultation with management 4.4 Make recommendations for future action that are consistent with industry standards and best practice 4.5 Submit collected data and information for inclusion on the asset management system

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPGD505A Conduct comprehensive inspection of park facilities.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPGD505 Conduct comprehensive inspection of park facilities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- prepare for a comprehensive inspection of park facilities
- carry out a comprehensive inspection of park facilities
- interpret design symbols and terminology
- interpret standards, specifications and legal requirements
- determine age and calculate effective lifespan of existing park facilities
- estimate costs of repair or replacement

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of park facility inspection
 - different modes of non-conformity that may be identified in relation to specific park facilities and equipment
 - hazard identification, assessment and control
 - information management systems such as AS4456
 - hazards associated with conducting a comprehensive inspection of park facilities and equipment, and the controls necessary to remove or minimise associated risks
 - park facilities and equipment including installation methods, intended use, intended users and safety parameters
 - practical understanding of inspection and auditing procedures and techniques, and legal and enterprise reporting requirements for recommendations on maintenance, repair and replacement of park facilities
 - practical understanding of the terminology used to describe different components of park facilities and equipment

- relevant national industry standards such as AS486.1, AS4422, AS1924.1 and AS1924.2)
- work health and safety legislative requirements and Codes of Practice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC504 Manage equine nutrition

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit applies to owners, managers and supervisors of equine enterprises with responsibility for the management of the nutritional requirements of a diverse range of performance horses. It covers all aspects of feeding plan development, implementation and monitoring as well as the selection and management of pasture for horses.

The work functions within this unit require the demonstration of ration formulation based on digestive physiology and anatomy, scientific evidence, industry practice, and the identification of and appropriate response to nutritional-related disorders.

This unit applies to individuals working in all horse industry sectors including training and competition centres, stud farms, agistment centres and riding schools.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Performance Horse (PHR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Determine the nutritional requirements of horses	1.1 Identify credible sources of information on equine nutrition relevant to enterprise needs including scientific and technical literature, historical records and industry practice information 1.2 Analyse research findings to determine credibility, relevance and currency of information 1.3 Determine the nutritional needs of horses of various classes based on research findings relevant to enterprise requirements 1.4 Apply relevant research findings to the management of enterprise nutrition practices
2. Manage ingredients for horse rations	2.1 Identify suitable nutrients for inclusion in an equine diet according to the individual needs of each horse, availability, quality and cost 2.2 Organise for laboratory testing to determine the quality and quantities of ingredients required for ration formulation 2.3 Implement safe, secure and hygienic storage of feed and ingredients 2.4 Calibrate measuring equipment and calculate quantities at regular intervals
3. Formulate and modify effective feeding plans, rations and methods	3.1 Develop a feeding plan to supply nutritional requirements to meet appropriate horse condition, performance and health outcomes 3.2 Formulate rations on the basis of identified nutritional requirements, digestive physiology and anatomy, and availability of feedstuffs 3.3 Implement feeding methods and techniques to support natural feeding behaviours 3.4 Adapt feeding plan to respond to variations in nutritional requirements and seasonal conditions 3.5 Apply a cost-effective approach to sourcing and supplying required nutrients 3.6 Assess and manage the environmental impacts of supplying feedstuffs
4. Monitor and manage the feeding of horses	4.1 Supply rations to horses according to enterprise schedules and requirements 4.2 Ensure feeding records and feed orders are maintained, monitored and prepared according to enterprise requirements 4.3 Monitor the implementation of the program using appropriate measures to ensure the goals of the feeding plan are achieved 4.4 Monitor and document reactions to changes in feed types, ingredients or schedules 4.5 Develop and implement a plan to manage documented adverse reactions to rations

Element	Performance criteria
	4.6 Monitor, review and record the feeding plan and implement improvements and adjustments as required
5. Evaluate health implications of feeding plans, rations and methods	5.1 Monitor the health of horses for signs of inadequate nutrition or nutrition-related diseases 5.2 Research and implement solutions for identified nutrition-related health problems and seek veterinarian or professional advice where necessary 5.3 Implement alternative feed regimes, diets or methods to counter the effects of poor nutrition 5.4 Implement strategies to prevent the development of nutrition-related diseases
6. Manage pasture for horses	6.1 Identify and select pasture species on the basis of nutritional value, persistence under grazing by horses and environmental requirements 6.2 Identify the deleterious effects of pasture species for various classes of horses and develop a management strategy to ensure herd health 6.3 Identify and remove plants poisonous to horses from pastures and areas accessed by horses 6.4 Develop and implement a pasture management plan to maximise nutritional value, minimise negative health impacts and minimise negative environmental impact

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

No equivalent unit.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHR504 Manage equine nutrition

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and evaluate feed types, pasture species, plants poisonous to horses
- identify the nutritional needs of a wide range of horse classes, breeds, ages and categories
- formulate, supply and store rations for a range of horses to meet identified nutritional needs
- identify feed suppliers
- assess horse body condition score
- apply knowledge of anatomy and physiology to the formulation of diets and management of equine nutrition
- identify and manage nutrition related health disorders
- undertake independent research on equine nutritional and health topics and evaluate findings for credibility and relevance
- apply research findings to the management of equine nutrition
- manage pastures for horses to maximise nutritional content, control weeds and minimise environmental degradation
- apply literacy skills to read and produce written documentation such as scientific reports, product specifications, feed plans and reports
- apply verbal communication skills to communicate with clients, staff, veterinarians and industry professionals
- apply numeracy skills to the computation of rations, nutrient budgets feeding schedules, weights and measures, cost calculations
- apply appropriate animal welfare practices relevant to enterprise and legislative requirements and in accordance with relevant Prevention of Cruelty to Animals acts
- apply work health safety practices relevant to enterprise and legislative requirements

- apply biosecurity and environmental practices relevant to enterprise and legislative requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the main structures and functions of the digestive system and the sites and mechanisms of digestion
- the rate of passage of different nutrients and feedstuffs
- feed types and sources
- feeding systems
- classes of horses and related nutrient needs
- nutrient classes and their values
- credible sources of information regarding equine nutrition, feeding and related health issues
- feed storage methods
- ration formulation methods
- individual horse feeding behaviour
- herd behaviour as it relates to supplying and managing nutrition
- nutrition-related health and behaviour impacts
- pasture species and plants poisonous to horses
- pasture management techniques and the environmental impacts of horse grazing behaviour on pastures
- work health safety standards, policies and procedures relevant to enterprise and legislative requirements
- biosecurity standards, policies and procedures relevant to enterprise and legislative requirements
- animal welfare standards, policies and procedures relevant to enterprise and legislative requirements
- environmental management standards, policies and procedures relevant to enterprise and legislative requirements

Assessment Conditions

Assessment may be conducted in a simulated or real work environment.

Performance should be demonstrated consistently over time and in a suitable range of contexts.

Assessors must satisfy current standards for RTOs.

AHC PHT101 Support horticultural production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare materials, tools and equipment for work; complete routine horticulture production assistance work, including the safe use and operation of farm tools and equipment; clean up and dispose of waste consistent with environmental and enterprise requirements.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for horticultural	1.1 Select materials, tools and equipment according to lists provided or supervisor's instructions 1.2 Conduct checks on all materials, tools and equipment and report

Element	Performance criteria
production work	faulty items 1.3 Demonstrate correct manual handling techniques when loading and unloading materials 1.4 Select and check suitable personal protective equipment (PPE) 1.5 Provide work support safely and as instructed 1.6 Identify and report workplace hazards
2. Undertake horticultural production work as directed	2.1 Follow instructions and directions provided by supervisor and seek clarification when necessary 2.2 Interact with other staff and customers in a positive and professional manner 2.3 Follow enterprise policy and procedures in relation to workplace practices, handling and disposal of materials 2.4 Report problems or difficulties in completing work to required standards or timelines
3. Clean up on completion of work	3.1 Return materials to store and dispose of waste materials 3.2 Clean, maintain and store tools and equipment 3.3 Report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT101A Support horticultural production.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHT101 Support horticultural production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare materials, tools and equipment for work
- follow safety directions
- handle materials and equipment
- complete routine horticulture production assistance work, including the safe use and operation of farm tools and equipment
- clean up and dispose of waste consistent with environmental and enterprise requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for supporting production of horticultural crops
 - planting, picking, packing, loading and transporting techniques appropriate to this level
 - safe work practices
 - use of horticultural tools and equipment
 - work health and safety and environmental protection legislation and enterprise procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PHT201 Plant horticultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plant horticultural crops in the annual, vegetable and flower growing industries.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for crop planting operations	1.1 Follow instructions about planting the crop 1.2 Prepare machinery, equipment and tools for crop planting 1.3 Recognise workplace hazards and report safety concerns 1.4 Use and maintained personal protective equipment (PPE)

Element	Performance criteria
2. Prepare the site and plant material for planting	2.1 Prepare soil or growing media 2.2 Implement crop protection 2.3 Apply pre-planting treatments 2.4 Store planting material where required 2.5 Operate machinery, equipment and tools for soil preparation
3. Carry out planting operations	3.1 Select planting material 3.2 Store, handle and transport planting materials to the site 3.3 Carry out planting 3.4 Water plants in and apply post-planting treatments

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH201A Plant horticultural crops.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHT201 Plant horticultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply agricultural chemicals under supervision
- apply enterprise quality standards
- estimate spacing and planting patterns
- follow safety procedures
- identify workplace hazards
- measure quantities of plant materials and treatments
- operate machinery to manufacturers specifications and low risk operating procedures
- select planting material
- use and maintain planting equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for planting horticultural crops
 - basic plant physiology
 - basic preparation of soil and growing media
 - environmental impacts and risks of planting horticultural crops
 - growing requirements of plants
 - importance of correct timing and procedures for crop planting
 - importance of field hygiene and quality control in regard to crop planting
 - nutritional, water and other requirements of the crop
 - principles of pest, weed and disease control
 - pre-planting soil and plant treatments and their importance

- soil structure and health

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH202 Carry out canopy maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out maintenance and pruning on crop canopies.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for canopy maintenance activities	1.1 Confirm instructions for canopy maintenance 1.2 Prepare tools and equipment for use 1.3 Recognise workplace hazards and report safety concerns 1.4 Use and maintained personal protective equipment (PPE)

Element	Performance criteria
2. Carry out basic canopy maintenance	2.1 Identify and remove unwanted growth 2.2 Pull pruned material out of the canopy 2.3 Perform post-pruning treatments on the canopy 2.4 Shape, support or position canopy 2.5 Use control measures to regulate exposure of the crop to sun and to protect crop from damage 2.6 Operate and maintain equipment
3. Complete canopy maintenance activities	3.1 Clean, sharpen and store tools and equipment 3.2 Dispose of pruned material 3.3 Identify and report problems and anomalies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH202A Carry out canopy maintenance.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHT202 Carry out canopy maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret instructions correctly
- communicate with team members and supervisor
- calculate hours and personal production rate
- participate in teams and contribute to team objectives
- use and maintain basic hand and power tools and equipment
- dispose of pruning waste in an environmentally aware and sensitive manner

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of canopy maintenance
- basic canopy maintenance techniques and their importance in relation to the desired quality of fruit the enterprise is aiming to produce
- the difference between fruiting and non-fruiting wood
- the effect of different climatic conditions on canopy maintenance requirements
- the importance of hygiene and quality control when performing basic canopy maintenance activities
- work health and safety responsibilities of employees when maintaining a canopy

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PHT203 Support horticultural crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to pick crops and perform related tasks such as routine estimation of crop readiness for harvest, basic sorting, bunching and grading, and transportation of the crop from the field.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare equipment for harvesting	1.1 Carry out pre-operational and safety checks tools, equipment and machinery 1.2 Recognise workplace hazards and report safety concerns 1.3 Use and maintained personal protective equipment (PPE)

Element	Performance criteria
2. Harvest the crop	2.1 Ensure harvesting procedures minimise crop and plant damage 2.2 Carry out basic sorting and grading 2.3 Clean and maintain harvesting tools, equipment and machinery 2.4 Report harvesting problems
3. Transport the crop	3.1 Use safe manual handling when handling containers 3.2 Move and stack containers to minimise damage to the crop 3.3 Maintain temperature of the harvested crop 3.4 Transport the crop from the field to the processing or storage area 3.5 Maintain containers in good working order

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT203A Support horticultural crop harvesting.

Assessment Requirements for AHCPHT203 Support horticultural crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- estimate the readiness of produce for picking
- harvest the crop using the correct technique
- select and grade produce at picking where required
- stack produce in containers without causing damage or losses
- transport produce from the field according to enterprise requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for harvesting horticultural crops
 - enterprise quality procedures
 - grading characteristics of each crop
 - recognition of crop maturity of a range of crops
 - the effect of adverse climatic conditions such as rain, hail, extreme wind with dust, or very high ultraviolet radiation, which may downgrade the quality of affected crop, prevent or impede harvest operations or severely influence the time taken to complete the harvest program
 - the importance of maintaining quality of produce, including cooling requirements and quick transport from field to processing areas

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPT204 Undertake field budding and grafting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to bud and graft trees, shrubs, vines and other plant types in nurseries or in-field situations.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare parent material for budding and grafting	1.1 Follow workplace hygiene practices to ensure tools and equipment are clean 1.2 Prepare plant material and use a suitable method of taking budding or grafting material 1.3 Select and use appropriate tools

Element	Performance criteria
2. Prepare budding and grafting materials	2.1 Select budding/grafting material for propagation 2.2 Use appropriate storage methods to maintain viability of materials 2.3 Dispose of discarded material 2.4 Prepare stock according to species guidelines 2.5 Handle budding/grafting materials and stock in a way that prevents damage
3. Bud/graft scion	3.1 Select budding/grafting method according to species guidelines 3.2 Seal bud/graft is sealed according to instructions 3.3 Affix labels and identification 3.4 Complete records accurately and timely 3.5 Identify, rectify or report out-of-specification process and equipment performance
4. Complete budding/grafting activities	4.1 Clean tools and equipment 4.2 Dispose of or store unused grafting material 4.3 Collect, treat, dispose of or recycle waste generated by both the grafting and cleaning procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH204A Undertake field budding and grafting.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHT204 Undertake field budding and grafting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select and prepare stock for budding and grafting
- demonstrate a range of budding and grafting techniques
- maintain labels and records of the budding and grafting operation
- store unused grafting material
- treat plants after budding/grafting

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for field budding and grafting
 - cleaning requirements of work area and equipment
 - common problems and corrective action required
 - environmental issues and controls
 - importance of selection and use of rootstock
 - maintenance requirements of equipment
 - operation, components and purpose of budding/grafting and equipment
 - plant features and processes relevant to budding and grafting
 - procedures and responsibilities for reporting problem
 - recording requirements and procedures
 - root stocks and scion stock
 - stages of the budding/grafting procedure and their purpose

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PHT205 Carry out post-harvest operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out routine post-harvest operations on a horticultural enterprise.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for postharvest operations	1.1 Identify post-harvest treatments and operations to be performed and client specifications 1.2 Select materials, tools, equipment and machinery 1.3 Carry out pre-operational and safety checks on tools, equipment and machinery

Element	Performance criteria
	1.4 Comply with Hazard Analysis Critical Control Point (HACCP) and food safety requirements applicable to crop under cultivation 1.5 Follow site quarantine protocols and farm and personal hygiene requirements
2. Transport harvested produce	2.1 Transport produce from field to post-harvest processing or storage area with care 2.2 Maintain temperature of harvested produce at levels set by industry and enterprise work procedures 2.3 Maintain containers and other materials and equipment
3. Grade, label, treat, weigh and pack produce	3.1 Grade and label produce according to client specifications 3.2 Apply post-harvest treatments to produce 3.3 Identify quality parameters of produce and specifications for packaging materials, containers, filling techniques and labelling 3.4 Select packaging materials and containers for specific produce 3.5 Weigh filled containers, record weight and repack to correct weight 3.6 Use correct filling techniques for specific containers and produce 3.7 Apply wraps and lids and label containers according to client specifications
4. Store produce in a facility	4.1 Place containers onto pallets or racks to ensure stability and optimum airflow 4.2 Transport to and arrange pallets or racks in storage facility 4.3 Read storage facility monitoring gauges and report abnormal readings 4.4 Check condition of stored produce and remove damaged produce and containers from storage facility 4.5 Clean storage facility and packing containers

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH205A Carry out post-harvest operations.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPHT205 Carry out post-harvest operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify post-harvest treatments and operations to be performed
- label produce accurately and correctly
- maintain records of post-harvest operations to allow traceability
- minimise handling damage to produce
- transport, grade, treat, pack and store harvested produce according to market requirements and industry and enterprise standards
- use a range of equipment for handling and transporting produce

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of post-harvest operations
 - attributes of enterprise produce in relation to desired quality of produce to be presented to client
 - characteristics and procedures for the use of cool rooms
 - cool chain principles and practices
 - correct storage temperatures for a range of enterprise produce
 - disposal of waste materials to minimise damage to external environment
 - environmental effects of post-harvest treatments
 - humidity levels and its effect on quality of enterprise produce
 - hygiene issues in the handling and storage of plant produce
 - industry standards for packaging
 - produce handling and cooling requirements

- relationship between quality attributes of produce and packing techniques and packaging
- storage methods for different enterprise produce

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH206 Handle and move mushroom boxes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to handle and move mushroom boxes as part of the post-harvest process on a mushroom farm.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Distribute boxes for filling to picking rooms	1.1 Select, assemble and position materials, tools and equipment 1.2 Carry out pre-operational and safety checks on materials, tools and equipment 1.3 Distribute empty boxes to pickers in a timely and efficient manner 1.4 Follow site quarantine protocols and farm and personal hygiene

Element	Performance criteria
	requirements 1.5 Undertake work in an environmentally aware and safe manner
2. Collect and move filled boxes	2.1 Coordinate collection of filled boxes with delivery of empty boxes 2.2 Stack filled boxes on trolleys to the recommended height 2.3 Move stacked trolleys safely from picking rooms and with consideration for other traffic flow in the area 2.4 Stack filled boxes are stacked in cool room 2.5 Record cool room air and mushroom pulp temperatures 2.6 Report variations of temperature or any other anomalies and take remedial action as directed
3. Finalise tasks	3.1 Check, clean and return trolleys and other equipment to store area or position for work for next shift 3.2 Report faulty items for repair or replacement 3.3 Complete daily work records legibly and accurately 3.4 Report work outcomes and seek feedback on performance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT206A Handle and move mushroom boxes.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHT206 Handle and move mushroom boxes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out an inventory of mushroom boxes
- collect filled boxes to ensure continued smooth flow of picking and packing work
- estimate quantities of boxes
- estimate rate of packing for collection
- record cool room air and mushroom pulp temperatures
- supply appropriate quantities of empty boxes to mushroom pickers in a number of picking rooms

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for handling and moving mushroom boxes
 - collection and packing procedures
 - quality requirements
 - safe manual handling techniques
 - storage requirements for mushrooms

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPT207 Perform mushroom substrate process tasks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare mushroom substrate either in a general mushroom farming enterprise or in a specialist substrate preparation enterprise. It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for each process stage	1.1 Confirm work requirements with supervisor 1.2 Check and prepare tools, machinery and equipment 1.3 Report and fix faults or variations from required settings 1.4 Follow site quarantine protocols and farm and personal hygiene requirements
2. Fill units with	2.1 Operate filling equipment at a speed that maintains continuous

Element	Performance criteria
mushroom substrate	operation 2.2 Fill units with mushroom substrate
3. Assist with spawning processes	3.1 Inspect and report any abnormalities found in spawn 3.2 Mix spawn into mushroom substrate 3.3 Check spawn usage rate and report any observed variation 3.4 Apply and mix supplement if required 3.5 Install spawned mushroom substrate in spawn run rooms 3.6 Take samples of mushroom substrate 3.7 Check mushroom substrate for presence of pests and take remedial action if required
4. Prepare and apply casing mixture	4.1 Assemble and check required quantities of pesticides, peat, limestone and additives for casing 4.2 Blend casing ingredients according to farm procedures 4.3 Take samples of prepared casing and mushroom substrate before casing has been added 4.4 Apply and mix supplement if required 4.5 Check casing depth, structure and consistency and report any variation
5. Finalise mushroom substrate processes	5.1 Clean, check and return equipment and tools 5.2 Clean up at the end of each process stage 5.3 Complete records legibly and accurately 5.4 Report work outcomes and seek feedback on performance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH207A Perform mushroom substrate process tasks.

Links

Assessment Requirements for AHCPHT207 Perform mushroom substrate process tasks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- maintain site quarantine protocols and personal hygiene
- fill units with mushroom substrate
- apply spawn into mushroom substrate
- prepare and apply casing mixture
- accurately complete records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of mushroom substrates
- farm standards and procedures, including those relating to workplace health and safety, food safety, HACCP, quality systems and emergency procedures
- the impact on the rest of mushroom production cycle of deviations of mushroom substrate quality from farm standards for substrate
- the mushroom production cycle
- substrate production
- site quarantine protocols

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH208 Water mushroom crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to water in mushroom crops.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to use watering equipment	1.1 Assemble and connect watering equipment components to water supply 1.2 Add chemicals to water 1.3 Read and record water meter for the area to be watered 1.4 Identify rooms and required watering pattern that require watering

Element	Performance criteria
2. Operate watering equipment	2.1 Follow site quarantine protocols and farm and personal hygiene requirements 2.2 Check and adjust water pressure to ensure correct spray or droplet pattern is achieved 2.3 Provide and distribute evenly water in the correct quantity and pressure 2.4 Report and fix faults or variations
3. Finalise watering operations	3.1 Read and water meter and record amount of water used 3.2 Disconnect watering equipment and return to storage area 3.3 Check watering equipment 3.4 Report work outcomes and seek feedback on performance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT208A Water mushroom crops.

Links

Assessment Requirements for AHCPHT208 Water mushroom crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare to use watering equipment
- deliver water to the mushroom crop at required rate and pressure
- estimate flow rate of water by the range of watering equipment in use
- measure correct doses of additives for water
- record water use

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for watering mushroom crops
 - effect on mushrooms of under-watering, overwatering, insufficient evaporation, late watering and moisture imbalance
 - effects of water on casing structure, mycelium, yields and quality
 - factors affecting effective operation of watering tree or other equipment used
 - how panning occurs
 - 'light', 'medium' and 'heavy' water and when each type is used
 - safe and effective use of fungicides and other water additives

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PHT209 Produce trellis dried grapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate a trellis-dried grape system in a viticulture production environment. It applies to vineyard workers who perform summer pruning and crown bunch removal, emulsion application, harvest and post-harvest drying.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Summer prune a grape crop for trellis drying	1.1 Reduce leaf coverage on fruiting canes to assist cutting, emulsion application and drying 1.2 Cut canes in accordance with enterprise standards

Element	Performance criteria
	1.3 Leave replacement canes intact and undamaged to ensure next year's fruiting 1.4 Spray grapes requiring emulsion treatment to ensure full and complete coverage
2. Prepare for harvesting trellis dried grapes	2.1 Identify uncut grapes, cut crown bunches and hung them on trellis without causing damage for drying or removal 2.2 Sample crop and test for moisture content and readiness to harvest 2.3 Select and check harvest tools, equipment and machinery 2.4 Select, use, maintain and store suitable personal protective equipment (PPE)
3. Harvest trellis dried grapes	3.1 Operate harvesting machinery and ancillary equipment in a safe manner and at speeds to suit crop conditions 3.2 Maximise the quality of the crop by implementing and maintaining standards that meet processor and enterprise requirements 3.3 Remove, store and treat full bulk bins as soon as possible to minimise deterioration of crop quality 3.4 Clean harvest tools, equipment and machinery of pests and other contaminants to maintain crop quality 3.5 Recognise and control risks to self, others and the environment
4. Carry out postharvest drying	4.1 Select and check drying tools, equipment and machinery 4.2 Carry out post-harvest drying as directed to meet processor requirements 4.3 Monitor moisture and temperature of crop during drying and returned to bulk bins after appropriate cool down has occurred 4.4 Identify and report tool, equipment and machinery malfunctions, faults, irregular performance, damage and the need for corrective action

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPHT209 Produce trellis dried grapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- summer prune vines according to enterprise requirements
- select, fit and use appropriate personal protective equipment (PPE)
- handle and use trellis drying tools, equipment and machinery safely
- identify parts of the vine
- carry out post-harvest drying

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for producing trellis dried grapes
 - crown and cordon bunch picking or removal requirements and procedures
 - environmental impact issues
 - hazard identification and control
 - processor quality standards and requirements
 - summer pruning requirements and procedures
 - year-round preparation required for trellis drying

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPHT301A Carry out a crop regulation program

Modification History

Not Applicable

Unit Descriptor

Unit descriptor	This unit covers the process of co-ordinating a crop regulation program in which thinning and pruning of flower, fruit or vegetable crops is undertaken to control yield and quality and defines the standard required to: prepare for crop regulation activities; co-ordinate work groups; use a range of methods to achieve crop regulation goals; assess the effects on plant growth, habit and production levels of thinning and pruning operations; record or report activities; store and maintain equipment and materials.
------------------------	---

Application of the Unit

Application of the unit	This unit applies to working under limited supervision from others with checking only related to overall progress.
--------------------------------	--

Licensing/Regulatory Information

Not Applicable

Pre-Requisites

Prerequisite units		

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Not Applicable

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Prepare for the crop regulation program	<p>1.1.The site and operational requirements of the crop regulation program are identified according to the site plan and enterprise work procedures.</p> <p>1.2.Crop regulation materials are selected according to enterprise work procedures.</p> <p>1.3.Services are located using site plans and in consultation with the supervisor.</p> <p>1.4.Occupational Health and Safety (OHS) hazards are identified, risks assessed, controls implemented and reported to the supervisor.</p> <p>1.5.Suitable safety and Personal Protective Equipment (PPE) are selected, used and maintained.</p>
2. Prepare crop regulation equipment	<p>2.1.Tools, equipment and machinery are selected according to enterprise work procedures.</p> <p>2.2.Pre-operational and safety checks are carried out on tools, equipment and machinery according to manufacturers specifications and enterprise work procedures.</p> <p>2.3.Tools, equipment and machinery are calibrated and adjusted according to manufacturer's guidelines and enterprise work procedures.</p>
3. Implement the crop regulation program	<p>3.1.Enterprise work team and contractors are identified and work tasks are co-ordinated in a sequential, timely and effective manner in consultation with the supervisor.</p> <p>3.2.Work pattern is planned to cover the site in an efficient, sequential and co-ordinated manner</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>according to enterprise work procedures.</p> <p>3.3. Crop regulation tasks are undertaken according to OHS requirements and with due consideration of the environmental implications.</p> <p>3.4. Crop regulation tasks are monitored and remedial action is undertaken where necessary to achieve program objectives.</p> <p>3.5. A clean and safe work area is maintained throughout and on completion of work.</p>
4. Complete crop regulation activities	<p>4.1. Waste material is removed from the site and disposed of in an environmentally aware and safe manner according to enterprise work procedures.</p> <p>4.2. Tools, equipment and machinery are cleaned, maintained and stored according to enterprise work procedures.</p> <p>4.3. Work outcomes are recorded or reported to the supervisor according to enterprise work procedures.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- communicate orally and in writing with work team members, supervisors and contractors
- utilise proforma recording, reporting and work procedure documents
- interpret site plans and crop regulation specifications
- measure quantities, calculate material requirements, area, volume, ratios and application rates, and calibrate machinery
- co-ordinate work group, contractors and own activities
- monitor enterprise plants for quality
- minimise noise, dust, high activity vehicle traffic and water run-off to prevent nuisance-level environmental disturbance
- use chemicals to label and MSDS directions
- carry out thinning and pruning techniques
- use interpersonal skills to work with and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities.

REQUIRED SKILLS AND KNOWLEDGE

Required knowledge

- principles of thinning and pruning and the methods used to achieve crop regulation goals
- effects on plant growth, habit and production levels of thinning and pruning operations in relation to the market goals of the enterprise
- enterprise quality procedures and characteristics of a crop relative to varying market requirements
- types of crop regulation materials
- safe work procedures for use of machinery and equipment
- environmental impacts of crop regulation and disposal of waste.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competency in this unit must be relevant to workplace operations and satisfy holistically all of the requirements of the performance criteria and required skills and knowledge and include achievement of the following:

- prepare for crop regulation activities
- co-ordinate work groups
- use a range of methods to achieve crop regulation goals
- assess the effects on plant growth, habit and production levels of thinning and pruning operations
- record or report activities
- store and maintain equipment and materials.

Context of and specific resources for assessment

Competency requires the application of work practices under work conditions. Selection and use of resources for some worksites may differ due to the regional or enterprise circumstances.

Range Statement

RANGE STATEMENT	
The range statement relates to the unit of competency as a whole.	
Crop regulation methods may include:	<ul style="list-style-type: none"> • chemical and manual thinning • selective harvesting • training • summer and winter pruning • hedging, skirting, topping and trimming.

AHC PHT303 Implement a post-harvest program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a post-harvest program for horticultural crops.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for implementation of post-harvest operations	1.1 Identify post-harvest operations to be performed 1.2 Select materials, tools, equipment and machinery 1.3 Carry out pre-operational and safety checks on tools, equipment and machinery

Element	Performance criteria
2. Coordinate post-harvest work	2.1 Identify enterprise work team and coordinate tasks 2.2 Undertake post-harvest operations 2.3 Maintain a clean, safe and hygienic work area
3. Implement post-harvest treatments	3.1 Grade and label harvested produce 3.2 Identify and dispose of produce that does not meet specifications and enterprise standards 3.3 Select post-harvest treatments according to harvested produce requirements 3.4 Ensure timing, rate, application method, environmental requirements and handling techniques conform to the requirements of the harvested produce 3.5 Ensure post-harvest practices are economical, methodical, meet established work schedules and minimise damage to produce 3.6 Clean and maintain tools, equipment and machinery
4. Implement hazardous waste disposal guidelines	4.1 Review waste disposal requirements and determine operational tasks 4.2 Monitor collection of waste and disposal 4.3 Report conditions likely to impact on business viability
5. Implement packing and presentation requirements of produce	5.1 Review specified packing and presentation requirements and determine operational tasks 5.2 Monitor and adjust packing and presentation processes 5.3 Record packing and presentation processes
6. Implement storage requirements of produce	6.1 Review specified storage requirements and determine operational tasks 6.2 Monitor storage processes and facilities 6.3 Record storage processes and conditions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT303A Implement a post-harvest program.

Assessment Requirements for AHCPHT303 Implement a post-harvest program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify post-harvest operations to be performed
- coordinate post harvest operations
- dispose of hazardous waste materials in line with guidelines and enterprise requirements
- implement post-harvest treatments and packing, presentation and storage requirements according to market specifications

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices postharvest treatments and processes
 - attributes of produce in relation to the desired quality of produce to be presented to the client
 - characteristics and procedures for the use of cool rooms
 - cool chain principles and practices
 - correct storage temperatures for a range of produce
 - enterprise confined spaces policy and safety procedures
 - environmental effects of post-harvest treatments and hazardous waste disposal methodologies, application and purpose
 - humidity levels and their effect on the quality of produce
 - hygiene issues in the handling and storage of plant produce
 - industry standards for packaging
 - integrated pest management principles and enterprise policy

- relationship between the quality attributes of produce and packing techniques and packaging
- storage methods for a range of produce
- the importance of maintaining the quality of produce including handling and cooling requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPHT304 Harvest horticultural crops mechanically

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate machinery and related equipment used in the harvest of horticultural crops.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare machinery for use	1.1 Select and use appropriate personnel protective equipment (PPE) 1.2 Conduct routine pre-operational checks and housekeeping tasks 1.3 Replace and report damaged or worn components 1.4 Identify and report potential workplace hazards

Element	Performance criteria
	1.5 Attach ancillary equipment and check for correct operation
2. Operate machinery and equipment	2.1 Operate machinery and equipment in a safe, efficient and controlled manner 2.2 Operate machinery according to task requirements, conditions and manufacturer operating guidelines 2.3 Monitor machinery performance and efficiency and make adjustments as required
3. Complete work	3.1 Follow shutdown procedures 3.2 Complete operational records 3.3 Carry out routine operator servicing 3.4 Identify and report malfunctions, faults, irregular performance or damage

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT304A Harvest horticultural crops mechanically.

Assessment Requirements for AHCPHT304 Harvest horticultural crops mechanically

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- attach and uncouple associated equipment
- conduct pre- and post-operational checks
- operate horticultural harvesting machinery and equipment in a safe, efficient and controlled manner
- perform operator maintenance tasks
- record work activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for operating crop harvesting machinery
 - basic diagnostic techniques
 - components and controls features and functions
 - crop quality assurance and hygiene requirements
 - equipment characteristics, technical capabilities and limitations
 - manufacturer and workplace requirements for pre-operational checks, machinery operation techniques, operator level servicing and shutdown and emergency procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH305 Regulate crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to regulate crops by thinning and pruning flower, fruit or vegetable crops to control yield and quality.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for crop regulation	1.1 Select crop regulation tools, equipment and machinery 1.2 Carry out pre-operational and safety checks on crop regulation tools, equipment and machinery 1.3 Select and prepare chemicals to be used for crop regulation 1.4 Select, use and maintain personal protective equipment (PPE)

Element	Performance criteria
2. Undertake crop regulation	2.1 Identify the plant material to be thinned or pruned 2.2 Undertake the crop regulation program 2.3 Operate crop regulation tools, equipment and machinery safely and effectively 2.4 Record and report signs of diseases and pests
3. Complete crop regulation	3.1 Dispose of waste material removed from the site 3.2 Follow correct manual handling techniques when lifting or moving heavy loads 3.3 Clean, maintain and store tools, equipment and machinery 3.4 Maintain a clean and safe work area 3.5 Record or report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH305A Regulate crops.

Assessment Requirements for AHCPHT305 Regulate crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out pre-operational and safety checks on crop regulation tools, equipment and machinery
- assess the effects on plant growth, habit and production levels of thinning and pruning operations
- interpret requirements for pruning or thinning and work to instructions
- use and maintain a range of plant thinning or pruning tools
- remove and dispose of waste material
- report signs of diseases and pests
- operate crop regulation tools, equipment and machinery

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of crop regulation
 - effect of weather which may prevent or impede crop regulation activities
 - effects on plant growth, habit and production levels of thinning and pruning operations in relation to the market goals of the enterprise
 - enterprise quality procedures and characteristics of a crop relative to varying market requirements
 - principles of thinning and pruning and the methods used to achieve crop regulation goals
 - safe work procedures for use of machinery and equipment
 - tools, equipment and machinery used for crop regulation
 - types of crop regulation materials

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH306 Establish horticultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish horticultural crops by seed, seedlings or other vegetative means.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare machinery and equipment for use	1.1 Select and prepare machinery and equipment and confirm against the work plan 1.2 Attach and calibrate equipment for operation 1.3 Identify workplace hazards, assess and control risks
2. Prepare for	2.1 Monitor soil and weather conditions for optimal seeding

Element	Performance criteria
horticultural crop establishment	conditions 2.2 Recognise and confirm soil conservation and sustainable land management practices and procedures 2.3 Confirm and prepare seeding/planting, fertiliser, and pest and weed control requirements
3. Sow/plant the crop	3.1 Undertake seeding/planting and fertiliser applications out 3.2 Coordinate pest and weed control treatment with seeding/planting and fertiliser applications
4. Complete seeding/planting operations	4.1 Maintain seeding/planting, machinery and equipment operation records 4.2 Report machinery and equipment damage, malfunctions or irregular performance 4.3 Clean, secure and store machinery and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH306A Establish horticultural crops.

Assessment Requirements for AHCPHT306 Establish horticultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out ground preparation and apply pre-planting treatments
- prepare and service machinery and equipment
- carry out sowing/planting operations and fertiliser application
- monitor the environmental impacts of establishing the crop
- clean, secure and store machinery and equipment
- keep records of the sowing/planting operation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for establishing crops
 - crop types, preparation of seeds/plants, seeding/planting methods and application techniques
 - effects of weather conditions on seeding/planting and fertilising applications
 - enterprise policies for seeding/planting operations and recording and reporting routines
 - fertiliser types, rates of application and crop nutrient requirements
 - operating principles and operating methods for machinery and equipment
 - positive environmental practices, negative environmental impacts and minimisation measures associated with seeding operations
 - personal protective equipment (PPE) and when and how it should be used
 - pre-operational and safety checks, servicing and maintenance procedures for seeding/planting machinery and equipment
 - principles of weight distribution with regard to load shifting and vehicle movement

- procedures for cleaning, securing and storing machinery, equipment and materials
- relevant legislation, regulations and codes of practice with regard to workplace health and safety and the use and control of hazardous substances
- sustainable land management and soil conservation techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PHT307 Prepare raw materials and compost feedstock

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare and mix raw materials into a suitable feedstock mixture for commercial-scale composting and compost feedstock mixtures to manufacture compost products.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise for processing	1.1 Review job sheet to identify all processing requirements 1.2 Check machinery, equipment and materials for serviceability and safe operation 1.3 Identify and assess workplace hazards and take action to

Element	Performance criteria
	minimise risk to self and others
2. Prepare raw materials and compost the feedstock mixture	2.1 Identify, collect and check raw materials and additives for physical contamination 2.2 Confirm composting technology and methods to be used as appropriate to raw material types and enterprise product requirements 2.3 Pre-process raw materials into suitable forms for composting 2.4 Mix pre-processed raw materials into suitable feedstock mixtures for composting 2.5 Handle feedstock mixtures for composting according to technology, appropriate method and industry best practice 2.6 Assign batch numbers or codes and create batch documentation to enable tracking of batch
3. Monitor composting process	3.1 Monitor composting batch by observing and using field testing equipment 3.2 Maintain processing and operations records for process control and to track batch through the compost production cycle 3.3 Report to supervisor faults or variations observed at any stage of the process and take remedial action to maintain effective and consistent compost production
4. Conduct quality control inspection	4.1 Inspect and assess finished compost for compliance with enterprise product requirements 4.2 Report faults or variations 4.3 Reprocess non-compliant product with necessary adjustments 4.4 Confirm compliance of compost batch with product requirements 4.5 Complete batch documentation for compliant compost product 4.6 Inform sales and operational staff members that product is suitable for sale and/or preparation of value-added products
5. Clean up area	5.1 Clean loading-shifting machinery and other processing equipment 5.2 Clear away raw materials and finished compost products to designated areas and clean processing site

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPHT307A Prepare raw materials and compost the feedstocks.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPHT307 Prepare raw materials and compost feedstock

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct and interpret basic field test results to confirm effective processing and define intervention required to rectify composting processes
- establish and maintain appropriate compost batch documentation accurately and promptly
- prepare batches for composting according to defined compost recipes
- prepare raw materials for composting according to enterprise product requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for preparing composting raw materials
 - Australian composting standards
 - batch documentation techniques
 - characteristics of a range of raw materials
 - compost production cycle
 - compost quality standards
 - fundamental characteristics of compost quality
 - key process control stages critical to consistent compost production
 - overview of systems and technologies used in compost production
 - principles of commercial compost production
 - range and characteristics of categories of compost product
 - steps in pre-processing compost materials

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH308 Prepare value added compost-based products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare or blend compost with other materials or products to produce various value added compost-based products.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise for value-added product preparation	1.1 Review job sheet or work order to identify product requirements 1.2 Organise equipment required for product preparation 1.3 Identify workplace hazards and environmental implications and assess and manage risk

Element	Performance criteria
2. Prepare value-added products	2.1 Confirm compost and product additives against job sheet 2.2 Measure and transport compost and additives to preparation area 2.3 Monitor and check compost and additives against specifications and identify and report variations or non-conformances 2.4 Blend and process compost, materials and other additives 2.5 Clean machinery and site to avoid contamination between batches
3. Conduct quality inspection and readiness for sale	3.1 Inspect and check product for compliance with job sheet and product requirements 3.2 Document product details accurately and promptly 3.3 Transport product to holding bay and confirm quantity of product 3.4 Label product according to regulatory and customer requirements 3.5 Release product for dispatch

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT308A Prepare value added compost-based products.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHT308 Prepare value added compost-based products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify value-added product requirements
- interpret batch sheets and follow enterprise production procedures
- prepare batches of value-added product according to defined batch recipes and methods
- recognise value-added products and their characteristics
- recognise, quantify and handle products

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for preparing value added compost based products
 - Australian standards for products
 - common product contaminants
 - enterprise product specifications and standards
 - environmental license requirements, aspects and management measures associated with operation of machinery and equipment
 - hazards in handling materials and additives and appropriate risk control measures
 - identification of contaminants
 - legislation, regulations and codes of practice with regard to licensing, roads and traffic requirements
 - legislation, regulations and codes of practice with regard to workplace health and safety and use and control of hazardous substances
 - operating principles and methods for plant and machinery
 - potential risks and hazards associated with operation of machinery and equipment

- procedures for cleaning, securing and storing machinery, equipment and materials
- product types and characteristics
- raw materials, compost and additives commonly used to manufacture value-added products
- value-added product types and characteristics

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PHT309 Supervise mushroom substrate preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise the achievement of farm quality standards and processes associated with mushroom substrate preparation (Phase II), either in a general mushroom farming enterprise or in a specialist substrate preparation enterprise.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Confirm requirements for mushroom substrate preparation	1.1 Inform details of quantities of substrate and dates/times to be achieved for each stage of the process with personnel 1.2 Determine availability, quality, serviceability and cleanliness of resources required for mushroom substrate preparation 1.3 Follow site quarantine protocols and farm and personal hygiene requirements
2. Monitor mushroom substrate preparation process	2.1 Monitor mushroom substrate preparation processes 2.2 Take samples of materials and/or outputs 2.3 Monitor and position probes to ensure that they provide representative readings 2.4 Record production information required for Hazard Analysis Critical Control Point (HACCP) 2.5 Report faults or variations from required settings or farm quality standards 2.6 Monitor compost, rooms and work areas for the presence of pests and take remedial action
3. Finalise mushroom substrate preparation process	3.1 Monitor clean-up activities at end of each process stage 3.2 Clean and check equipment and hand tools 3.3 Carry out preventative maintenance according and report any faults 3.4 Complete records legibly and accurately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT309A Supervise mushroom substrate preparation.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHT309 Supervise mushroom substrate preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- observe and report non-compliance with farm quality standards
- organise the process of mushroom substrate preparation
- coordinate work activities so that standards relating to productivity, workflow requirements, farm procedures and quality are met
- record and report production information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for supervising mushroom substrate preparation
 - casing function, application, required depth and required surface structure
 - impact on mushroom production cycle of deviations of mushroom substrate quality from farm standards for substrate
 - overview of mushroom production cycle
 - overview of Phase I and Phase II substrate production
 - relevant legislation and industry codes of practice
 - site quarantine protocols
 - standards and procedures for workplace health and safety, food safety, HACCP, quality systems, emergency procedures, organisational structure and workplace communication channels and protocols

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH310 Coordinate horticultural crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate crop harvesting activities.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for crop harvesting	1.1 Identify the crop to be harvested and the requirements and procedures to assure crop quality 1.2 Determine crop maturity by experience, specification charts, aids or devices and according to client, enterprise and industry quality assurance specifications

Element	Performance criteria
	1.3 Identify that suitable weather conditions for picking are established according to enterprise work procedures 1.4 Select tools, equipment and machinery according to harvest requirements 1.5 Carry out pre-operational and safety checks on tools, equipment and machinery
2. Coordinate harvesting activities	2.1 Inform seasonal labour of the harvest plan/strategy 2.2 Assign daily work tasks to harvest staff 2.3 Ensure work program allows for contingencies caused by weather or other interruptions 2.4 Monitor the harvest and coordinate changes to work activities as required
3. Monitor crop quality throughout harvest	3.1 Ensure harvesting procedures and the harvested crop comply with specifications 3.2 Ensure crop is handled in a way that minimises damage 3.3 Ensure sorting and grading of the crop complies with specifications 3.4 Minimise post-harvest deterioration in crop storage according to enterprise work procedures 3.5 Transport the crop with minimum damage 3.6 Calculate and record picking tallies or harvest yields
4. Deliver crop to specified destination	4.1 Confirm delivery details including quantity, timing and destination 4.2 Deliver crop with damage levels that are within specifications 4.3 Ensure crop complies with client, enterprise and industry quality assurance specifications 4.4 Complete delivery documentation accurately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH310A Coordinate horticultural crop harvesting.

Assessment Requirements for AHCPHT310 Coordinate horticultural crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- coordinate a work group
- maintain harvest requirements
- monitor crop quality
- prepare for crop harvesting activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for
 - effect of adverse climatic conditions (e.g., rain, hail, extreme wind, or very high ultraviolet radiation), which may prevent or impede crop harvesting operations, or severely influence the time taken to complete the tasks necessary to fulfil the operation
 - enterprise quality procedures and characteristics of a crop relative to varying market requirements
 - grading characteristics of each crop
 - importance of maintaining quality of produce including cooling requirements and quick transport from field to processing areas
 - industry wage rates and conditions, contractors services, conditions and rates
 - licensing requirements for use of forklifts, trucks and machinery
 - recognition of the maturity parameters of a range of crops

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH401 Assess olive oil for style and quality

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assess olive oil for style and quality.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish and implement appropriate tasting protocols	1.1 Establish appropriate tasting conditions 1.2 Apply accepted industry tasting procedures 1.3 Taste oils in the order that will best show the character of each oil

Element	Performance criteria
2. Determine style and sensory quality of the olive oil	2.1 Identify and assess characteristics of the olive oil 2.2 Taste oil to assess 2.3 Smell and taste oil to assess sensory quality 2.4 Analyse and record observed defects for future action
3. Determine the analytical quality of the olive oil	3.1 Send oil samples to laboratory to test key chemical indices 3.2 Interpret key chemical indices to assess analytical quality of oil 3.3 Record for future action observed chemical indices that are beyond the normal range
4. Identify factors influencing the style and quality of the olive oil	4.1 Identify horticultural factors that may influence style and quality of the olive oil 4.2 Identify processing factors that may influence style and quality of the olive oil 4.3 Identify other factors that may influence style and quality of the olive oil
5. Implement findings of tastings and chemical analyses	5.1 Maintain records of season's tastings and chemical analyses 5.2 Evaluate horticultural and processing activities and methods in terms of modifications and improvements to be made 5.3 Adjust and document horticultural production plan for next season 5.4 Document and communicate processing requirements for next season to processing personnel

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT401A Assess olive oil for style and quality.

Assessment Requirements for AHCPHT401 Assess olive oil for style and quality

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify olive oil styles
- identify common olive oil defects
- modify horticultural and/or processing practices to remedy variations from desired style and quality

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for assessing olive oil
 - cause of olive oil defects and how they can be remedied
 - horticultural and processing practices that affect olive oil style, and reasons for the effect
 - relationship between critical chemical parameters and oil style and quality

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPHT402 Develop a crop regulation program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a crop regulation program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess crop regulation methods	1.1 Identify production targets and requirements in terms of quantity, quality and availability of specified crops 1.2 Research the characteristics and growing requirements of plant

Element	Performance criteria
	species and cultivars that may affect the crop regulation program 1.3 Assess the benefits and limitations of available crop regulation methods for specified crops 1.4 Evaluate implementation risk of available methods and record and cost risk controls 1.5 Determined the most cost-effective approach to crop regulation and submit to management for approval
2. Identify the requirements of a crop regulation program	2.1 Develop the crop regulation program to achieve the appropriate yield and quality 2.2 Identify and confirm availability of resources, tools, equipment and machinery for the program 2.3 Outline staged implementation and development according to the range of conditions over the growing cycle 2.4 Determine timelines for crop regulation activities, taking into account the needs of the crop and site conditions
3. Prepare and document the crop regulation program and specifications	3.1 Prepare a plan, specifications and quotation based on the requirements of the program 3.2 Develop and document on-site procedures and schedules for the program
4. Monitor the crop regulation program	4.1 Monitor implementation of the program to ensure requirements of the production plan are achieved 4.2 Monitor and review the program to ensure it remains responsive to changing conditions 4.3 Implement appropriate courses of action to alleviate or overcome identified shortcomings 4.4 Document and report remedial action undertaken to management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT402A Develop a crop regulation program.

Assessment Requirements for AHCPHT402 Develop a crop regulation program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess and select cost-effective techniques, resources and equipment for the regulation of horticultural crops
- develop a crop regulation program to achieve the yield and quality specified in the enterprise production plan
- document a crop regulation plan, specifications and quotation
- document detailed schedules and work procedures
- prepare a cost-benefit analysis on available crop regulation methods
- review the crop regulation program
- implement appropriate courses of action in response to identified shortcomings

Knowledge Evidence

The candidate must demonstrate knowledge of:

- crop regulation published data on the species and cultivars
- principles and practices for developing a crop regulation program
- processes and techniques for preparing, costing and documenting plans for scheduling crop regulation activities
- site evaluation techniques, including analysis of the condition of soils, plants and the site for production activities
- specific crop physiology and timing of regulation
- the characteristics of soil and other growth media types and the use of additives to enhance the available nutrition for specific plant species and cultivars
- the relationship between enterprise crop regulation methods, such as thinning, pruning and RDI, and the yield and quality of specific crops

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPHT403 Develop harvesting and processing specifications to produce an olive oil

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop specifications that will produce the required quantity, style and quality of oil from an olive crop.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Specify the style and other characteristics	1.1 Specify desired properties of the olive oil using standard industry terminology

Element	Performance criteria
desired of the olive oil	
2. Establish the appropriate time and conditions for harvesting	2.1 Estimate maturity of fruit using informal and formal methods 2.2 Schedule harvest so that fruit picked will produce desired quality, style and amount of olive oil 2.3 Evaluate range of harvest methods available and select the ones most likely to contribute to production of desired olive oil 2.4 Obtain and brief harvesting personnel about harvest requirements and procedures
3. Specify post-harvest handling and processing method	3.1 Specify post-harvest handling and treatment for olive crop using standard industry terminology 3.2 Specify processing using standard industry terminology 3.3 Specify packaging, storage and transport requirements for processed olive oil using standard industry terminology
4. Select an olive oil processor	4.1 Obtain details of suitable available processors 4.2 Review and apply criteria for selecting a processor 4.3 Select most suitable processor using predetermined criteria 4.4 Agree with specifications and related processing requirements with selected processor and incorporate into a contract 4.5 Document the specifications and related processing requirements in a report

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPHT403A Develop harvesting and processing specifications to produce an olive oil.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHT403 Develop harvesting and processing specifications to produce an olive oil

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- arrange for an appropriate method of processing to produce the desired style and quality of oil
- document the specifications and related processing requirements in a report
- estimate and schedule fruit maturity
- incorporate specifications into a contract
- select an appropriate style of oil that can be produced from a crop and describe it using standard industry terminology

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for developing specifications for olive oil
 - how an olive oil is produced from olives
 - influence of processing on chemical composition of oil (polyphenols, aroma and flavour compounds)
 - influence of various harvesting methods on olive oil style and quality (bitterness, pungency, aroma and flavour)
 - market preferences for styles of olive oil
 - methods of olive oil extraction and advantages/disadvantages associated with each
 - post-harvest handling (including storage and transport) requirements for olive fruit intended for olive oil processing
 - post-processing storage and handling requirements of olive oil

- relevant legislation and regulations covering food safety, trade practices and contract law

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPHT404 Implement and monitor a horticultural crop harvesting program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement and monitor of a horticultural crop harvesting program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture [PHT]

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for harvesting	1.1 Assess and record crop maturity and quality 1.2 Estimate best time to harvest crop

Element	Performance criteria
	1.3 Undertake pre-harvest treatments for control and eradication of pests 1.4 Determine harvesting resource requirements and estimate when to harvest
2. Coordinate the harvest strategy	2.1 Implement harvesting operations according to customer requirements, weather, equipment and staff availability 2.2 Coordinate and monitor equipment operation for maximum efficiency and effectiveness 2.3 Identify and control hazards
3. Complete harvest operation	3.1 Locate storage resources 3.2 Determine strategies for drying crops if necessary 3.3 Monitor work to ensure that crop is graded, packed and stored according to enterprise requirements 3.4 Evaluate harvesting operations and outcomes against harvest strategy 3.5 Provide feedback on performance to personnel under supervision 3.6 Document crop quality, pre-harvest treatments and outcomes of harvest for continual analysis and effective planning management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPHT404A Implement and monitor a horticultural crop harvesting program.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHT404 Implement and monitor a horticultural crop harvesting program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- coordinate equipment
- document a crop harvesting report
- establish strategies for pre-harvest and harvest
- estimate crop quality and yield
- evaluate harvest operations and outcomes
- implement treatments for control and eradication of pests
- implementing safe workplace and positive environmental practices
- organise resources for the harvest

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for crop harvesting
 - crop measurement techniques and parameters
 - customer requirements
 - environmental controls and codes of practice applicable to harvesting operations
 - functions and limitations of harvesting equipment
 - location and relative skills and abilities of available staff, contractors or casual staff
 - market information and sources
 - relevant legislation and regulations relating to workplace health and safety, contractor engagement, chemical use and application, and vehicle and plant use
 - required productivity rates
 - weather or other conditions that may affect harvest

- where relevant to enterprise's production: food safety and Hazard Analysis Critical Control Point (HACCP) requirements, and requirements for export markets

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH405 Manage mushroom substrate preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage mushroom substrate preparation.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Confirm status of system requirements for mushroom	1.1 Determine details of quantities of substrate required and dates/times to be achieved for each process stage and communicate to personnel

Element	Performance criteria
substrate preparation	1.2 Determine availability, quality, serviceability, and cleanliness of all rooms, work areas, machinery, equipment and materials for mushroom substrate preparation 1.3 Allocate staff duties and responsibilities 1.4 Follow site quarantine protocols and farm and personal hygiene requirements
2. Confirm quality and consistency of Phase II outputs	2.1 Ensure Phase II process conforms to required production schedule and farm procedures 2.2 Record key factors and critical points 2.3 Take random samples of end product and dispatch for analysis 2.4 Record test results, compare to standards and take remedial action
3. Monitor and manipulate spawning and spawn run	3.1 Assess condition and quality of compost before spawning and take remedial action 3.2 Take temperature readings and record and adjust if required 3.3 Measure, record and control carbon dioxide content 3.4 Monitor spawn growth and appearance of mycelium during spawn run period 3.5 Select product and its rate of application where supplement is to be added to substrate at spawning 3.6 Monitor room hygiene and occurrence of pests and diseases and implement control measures
4. Manage clean-up procedure	4.1 Manage clean-up activities at the end of each process stage 4.2 Conduct cook-out or chemical disinfestations treatment before removal of spent substrate 4.3 Return equipment and hand tools to storage area after cleaning, basic preventative maintenance and checking for future serviceability 4.4 Report faults to maintenance personnel 4.5 Complete workplace records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPHT405A Manage mushroom substrate preparation.

Assessment Requirements for AHCPHT405 Manage mushroom substrate preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establish and review farm procedures for mushroom substrate preparation
- monitor and manipulate all interactions between inputs, conditions and outputs for each stage of substrate process
- set and monitor productivity standards for mushroom substrate and rest of production cycle
- record and analyse production data

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for managing mushroom casing production
 - casing function, application, required depth and required surface structure
 - detailed knowledge of all stages in Phase II substrate preparation process
 - farm standards and procedures, including those relating to OHS, food safety, Hazard Analysis Critical Control Point (HACCP), quality systems, emergency procedures, organisational structure and workplace communication channels and protocols
 - how mushrooms are grown, with a focus on interaction between compost, environmental factors (such as temperature, water, relative humidity, carbon dioxide and ammonia) and mushroom growth
 - industry and workplace awards and conditions
 - key parameters to be recorded and monitored and appropriate ranges in relation to temperature, ammonia, relative humidity, moisture content, carbon dioxide and time
 - overview of mushroom production cycle and possible impact of deviations from farm standards on substrate and rest of production cycle

- overview of Phase I compost production
- relevant legislation and industry codes of practice and quality

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH406 Control Phase II mushroom substrate process

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to control Phase II of mushroom substrate.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Confirm the requirements for Phase II mushroom substrate	1.1 Monitor and manage Phase II mushroom substrate process and ensure that all equipment is operated safely 1.2 Check to ensure all temperature probes are functioning correctly

Element	Performance criteria
preparation	1.3 Ensure site quarantine protocols and farm and personal hygiene requirements are followed 1.4 Assess condition and quality of compost before filling
2. Carry out Phase II process	2.1 Monitor placement of probes in air and substrate 2.2 Check the evenness of filling and the amount filled 2.3 Ensure doors are secure and vents and thermostats are set at completion of filling 2.4 Measure and record key factors and critical points 2.5 Adjust equipment settings to ensure optimum conditions for each Phase II sub-stage 2.6 Take random representative samples for laboratory testing 2.7 Determine ammonia levels before cool down for spawning

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT406A Control Phase II mushroom substrate process.

Assessment Requirements for AHCPHT406 Control Phase II mushroom substrate process

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess room or tunnel layout and determine most appropriate locations for taking substrate and air measurements
- carry out effective troubleshooting during Phase II process
- differentiate between Phase I substrate and substrate ready for spawning and describe desired parameters of each stage
- monitor and manage Phase II process for at least eight crops

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for controlling Phase II processes
 - concept of compost selectivity and biological indicators of compost quality
 - correct probe placement and calibration
 - factors influencing air quantity and distribution
 - farm standards and procedures, including those relating to workplace health and safety, food safety, Hazard Analysis Critical Control Point (HACCP), quality systems, emergency procedures, organisational structure
 - interpretation of chemical test results
 - how different systems (shelf, tray and tunnel) impact on temperature zones in substrate
 - key parameters to be recorded and monitored relating to temperature, ammonia and moisture content
 - objectives and desired parameters of each sub-stage of Phase II substrate preparation
 - overview of Phase I compost production and how it impacts on Phase II process

- relevant legislation and industry codes of practice
- site quarantine protocols

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPTH407 Manage mushroom crop development

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage mushroom crop development, including the selection, application and management of the mushroom casing and all activities up to the end of the harvesting period.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Manage casing application	1.1 Select casing materials and recipe 1.2 Assess condition and quality of spawn run before casing

Element	Performance criteria
	<p>1.3 Where supplement is to be added to substrate at casing, product and its rate of application are selected and instructions are given to appropriate personnel</p> <p>1.4 Check casing mixture is checked against farm standards for moisture, structure and depth, and remedial action is taken if required</p>
<p>2. Control environment during casing colonisation growth phase</p>	<p>2.1 Crop is installed in growing room according to farm procedures</p> <p>2.2 Air conditioning system in the growing room is set up and checked for correct functioning</p> <p>2.3 Temperature, relative humidity and carbon dioxide content are measured, recorded, and where required, adjusted</p> <p>2.4 Mycelium growth is assessed and decisions are made on the timing and quantity of water to be applied</p> <p>2.5 Pest and disease status is monitored and recorded and, where required, remedial action is taken</p>
<p>3. Initiate fruit body formation and manage pinning and pre-picking growth phases</p>	<p>3.1 Assess growth and make changes to temperature and ventilation to initiate fruit body formation according to farm procedures</p> <p>3.2 Record and adjust temperature, relative humidity and carbon dioxide content</p> <p>3.3 Identify and analyse variations from expected or required ranges of temperature, relative humidity and carbon dioxide content and take appropriate remedial action</p> <p>3.4 Assess mycelium development and pin development and determine timing and quantity of water and additives to be applied to water</p> <p>3.5 Monitor and record pest and disease status and take remedial action where required</p>
<p>4. Assess crop maturity, flush development and quality, and monitor the harvesting process</p>	<p>4.1 Assess crop maturity to determine when and what to pick</p> <p>4.2 Instruct pickers about tasks to be performed</p> <p>4.3 Monitor picking results to ensure instructions continue to be appropriate and are being carried out</p> <p>4.4 Consult markets to ensure product meets market needs and specifications</p> <p>4.5 Monitor crop quality, recognise disorders stimulated by environmental conditions and implement remedial action if required</p> <p>4.6 Monitor and record pest and disease status during this stage and take remedial action where required</p> <p>4.7 Plan daily work schedule for waterers and coordinate picking and watering schedules</p> <p>4.8 Review harvest process for compliance with quality standards and</p>

Element	Performance criteria
	identify, document and implement areas for improvement where appropriate 4.9 Provide feedback to pickers on individual and team performance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH407A Manage mushroom crop development.

Assessment Requirements for AHCPHT407 Manage mushroom crop development

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop work schedules
- maintain environment within parameters for production
- monitor and manage growing room conditions, watering and flush development of mushroom crops
- identify stages of growth and development, and factors impacting on yields and mushroom quality
- identify the interdependency of stages of growth and impact of early stages of production cycle on production results

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of mushroom crop development
 - available options of additives to irrigation water to promote mushroom quality and the main considerations of their use
 - basic understanding of air conditioning principles, particularly relative humidity
 - casing function, application and depth and surface structure requirements
 - desirable physical, biological and chemical characteristics of casing
 - farm standards and procedures, including those relating to OHS, food safety, Hazard Analysis Critical Control Point (HACCP), quality systems, emergency procedures, organisational structure and workplace communication channels and protocols
 - goals and sub-stages of Phase II substrate preparation and impact of Phase II on yields and quality

- growth phases of a mushroom crop and interactions that occur between the compost, casing, environmental factors (such as temperature, water, relative humidity and carbon dioxide) and growth of the mushroom
- how nature of casing and the appearance and quantity of mycelium growth in casing affect the number, distribution and quality of fruit bodies formed
- impact of mushroom numbers and size on picking and quality
- industry and workplace awards and conditions
- management impacts of supplementing at spawning or casing
- management requirements of casing - Compost Added at Casing (CAC) and/or Casing Inoculums (CI)
- OHS and environmental legislation, industry codes of practice and enterprise procedures
- overview of Phase I substrate production and its impact on yields and quality
- site quarantine protocols

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -

AHCPTH408 Overseer vineyard practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and implement a program of vineyard practices and to monitor and review the growing program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Define the requirements of the vineyard	1.1 Identify the range of grape varieties and cultivars, and growing systems 1.2 Determine materials, equipment and labour required for

Element	Performance criteria
	maintaining the vineyard 1.3 Determine consumables required for maintaining the vineyard 1.4 Check staff skills and knowledge
2. Develop a program of vineyard practices	2.1 Determine vineyard practices from planting out to harvest and for the annual growing season 2.2 Allocate resources 2.3 Make allowance in the program for unforeseen circumstances, damage caused by weather and new developments
3. Implement the program	3.1 Maintain daily workplace records and other information relevant to the vineyard program 3.2 Allocate and supervise staff 3.3 Ensure materials and equipment are used according to safe operating procedures
4. Monitor and review the program	4.1 Check the vineyard program against previous programs and make adjustments as necessary 4.2 Review production plans to determine and align schedule of activities 4.3 Review vineyard practices to identify opportunities for improvements in performance 4.4 Compare costs and estimates of the vineyard program with resource allocation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT408A Oversee vineyard practices.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPHT408 Oversee vineyard practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine and organise work schedules
- determine maintenance requirements for the vineyard
- oversee the implementation of vineyard practices
- plan and program vineyard practices
- recognise wine grape varieties and cultivars

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for overseeing vineyard practices
 - irrigation systems
 - plant nutrition practices
 - safe operating practices
 - supervision and team building
 - trellis and harvesting systems
 - vineyard practices and growing systems for grape varieties and cultivars
 - weed, pest and disease control practices
 - wine grape varieties and cultivars

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPHT502 Develop a horticultural production plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a production plan for a horticultural enterprise.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out planning activities	1.1 Ensure client preferences and requirements are understood and confirmed according to enterprise marketing and business plans 1.2 Assess the production site for growing factors, services and site

Element	Performance criteria
	<p>modifications</p> <p>1.3 Research the growing requirements of plant species and cultivars and restrictions that may affect the production plan</p> <p>1.4 Identify sustainable land use issues that may affect planned production</p> <p>1.5 Set production targets that are consistent with the marketing strategy and business plan</p> <p>1.6 Determine production requirements in terms of quantity, quality and availability of the product</p> <p>1.7 Develop a plan that reflects client preferences and requirements</p>
2. Determine the requirements of horticultural production	<p>2.1 Identify plant species that are consistent with the plan and the calculate, cost and confirm availability with the supplier</p> <p>2.2 Select plant establishment procedures consistent with the agreed plan</p> <p>2.3 Ensure design of the site includes irrigation and drainage systems, and takes into account the growing requirements of plants and sustainable land use practices</p> <p>2.4 Provide cultural management of the growing environment from planting to harvest</p> <p>2.5 Determine harvesting dates to meet market deadlines</p> <p>2.6 Identify resources required for the establishment of the site</p>
3. Schedule production activities	<p>3.1 Outline staged implementation and development with future works access provided for</p> <p>3.2 Determine timelines, taking into account any other planning requirements</p> <p>3.3 Plan marketing and schedule according to the production schedule and marketing strategy</p>
4. Plan monitoring of the production plan	<p>4.1 Determine production activities to be monitored, the format for recording factors, frequency of monitoring and the thresholds for remedial action</p> <p>4.2 Document required remedial for implementation by staff</p> <p>4.3 Review on a regular basis the effectiveness of the monitoring system</p> <p>4.4 Compare the production program with feedback and projections from clients</p>
5. Prepare and document the production plan and specification	<p>5.1 Prepare detailed plan, specifications and quotation based on horticultural conventions and the requirements of production</p> <p>5.2 Develop and document detailed on-site procedures and schedules required for production</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH502A Develop a horticultural production plan.

Assessment Requirements for AHCPHT502 Develop a horticultural production plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a horticultural production plan that reflects client preferences and requirements
- design and incorporate infrastructure into planning
- document and cost the production plan
- establish product specifications
- research site factors and land use issues
- select and source plants or plant material for seeding or propagation
- develop a monitoring program to cover the horticultural operation from sowing to sale

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for developing a horticultural production plan
 - advantages and limitations of sustainable horticulture systems
 - establishment and maintenance of a range of enterprise horticultural products in relation to client needs and the standards required by the marketplace
 - establishment procedures, plant selection and cultural practices for a range of enterprise horticultural products
 - processes and techniques for preparing, costing and documenting plans for and scheduling horticultural production
 - role of business and marketing plans and client consultation processes in planning horticultural production

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPT503 Manage a controlled growing environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage controlled growing environments.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify crop requirements	1.1 Determine crop growth and production requirements according to a documented production plan 1.2 Research environmental parameters for optimal growing

Element	Performance criteria
	<p>conditions for the specific crop, using available information resources</p> <p>1.3 Identify and record controlled growing environment factors</p>
<p>2. Determine requirements for controlled growing environment</p>	<p>2.1 Identify, cost and confirm availability of structures, machinery, equipment and resources required to control environmental conditions</p> <p>2.2 Identify detrimental environmental impacts associated with the controlled growing environment system</p>
<p>3. Prepare a management plan for controlled growing environment</p>	<p>3.1 Determine management objectives for controlled growing environment consistent with production plan and market requirements for crop quantity and quality</p> <p>3.2 Develop a schedule of environmental control procedures according to controlled environment management objectives</p> <p>3.3 Evaluate and report staff training needs with regard to operation and maintenance of environmental control systems</p> <p>3.4 Document a budget supporting the controlled environment management plan and seek approval</p> <p>3.5 Communicate the schedule of environmental control procedures clearly to staff</p>
<p>4. Manage controlled growing environment</p>	<p>4.1 Identify controlled environment indicators and thresholds for remedial action for monitoring</p> <p>4.2 Develop monitoring frequency and schedule according to the requirements of the production plan and communicate to staff</p> <p>4.3 Record, analyse and apply all monitoring data to ensure optimal plant development</p> <p>4.4 Document and report remedial action undertaken</p> <p>4.5 Monitor costs of the controlled growing environment system against budget</p> <p>4.6 Record and report budget adjustments</p> <p>4.7 Evaluate recorded information, budget data and production outputs and document operational achievements towards management objectives in a report</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCPHT503 Manage a controlled growing environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a management plan to cover staff training, budgets, operating procedures and remedial actions
- develop environmental monitoring procedures
- evaluate and document the achievements towards management objectives
- identify the growing requirements of the crop
- prepare specifications for controlled growing infrastructure

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for managing controlled growing environments
 - controlled environmental conditions in regard to crop plant physiology, growth stages, and product quality and quantity
 - legislation and regulations relating to the controlled environment systems
 - market requirements for crop quantity and quality
 - monitoring, analysis and recording systems
 - plant physiology and biochemistry
 - quality production methods and techniques for a range of controlled environment plants
 - staff training requirements
 - techniques and methods of implementing optimal growing conditions for a range of horticultural crops

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PHT504 Develop a grape production plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a production plan for a grape growing enterprise using knowledge of issues and trends affecting the industry, grape market requirements and vineyard site factors, suitable plant species and cultivars, resources and equipment for establishing a vineyard.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out preliminary	1.1 Identify and evaluate trends and issues affecting the Australian

Element	Performance criteria
planning activities	<p>viticulture industry for their impact on planning decisions</p> <p>1.2 Determine client preferences and requirements for the production of grapes</p> <p>1.3 Assess the vineyard site for growing environment factors, services and site modifications</p> <p>1.4 Conduct research into the characteristics and growing requirements of grape varieties and cultivars, legal attributes of the site, and local by-laws and restrictions that may affect the production plan</p> <p>1.5 Identify sustainable land use issues that may affect planned production</p> <p>1.6 Set production targets that are consistent with the marketing strategy and business plan</p> <p>1.7 Determine production requirements in terms of quantity and quality of grapes</p> <p>1.8 Develop a draft plan that reflects client preferences and requirements and takes into account site factors and any identified sustainable land use requirements</p>
2. Determine the production requirements for grapes	<p>2.1 Identify grape varieties that are appropriate to the site and consistent with the plan</p> <p>2.2 Calculate, cost and confirm the quantity required with the supplier</p> <p>2.3 Select establishment procedures consistent with the agreed preliminary plan</p> <p>2.4 Document cultural management practices to achieve optimal growth</p> <p>2.5 Determine harvesting dates to meet market specifications and deadlines</p> <p>2.6 Identify and cost resources, tools, equipment and machinery required for production</p> <p>2.7 Identify hazards associated with production activities, assess risks and identify and document controls in the plan</p> <p>2.8 Identify policy concerning grapes not meeting specifications according to customer requirements, quality assurance policies and marketing strategy</p>
3. Schedule grape production activities	<p>3.1 Outline staged implementation and development of the grape production activities</p> <p>3.2 Determine and document timelines for grape production activities</p> <p>3.3 Plan and schedule marketing according to the production schedule and marketing strategy</p>
4. Plan monitoring of the grape production plan	<p>4.1 Determine production activities to be monitored, the format for recording factors, frequency of monitoring and the thresholds for</p>

Element	Performance criteria
	remedial action 4.2 Document required remedial action for implementation by staff 4.3 Review on a regular basis the effectiveness of the monitoring system 4.4 Compare the production program with feedback and projections from clients
5. Prepare and document the grape production plan and specifications	5.1 Prepare detailed plans, specifications and quotations based on industry conventions and the requirements of production 5.2 Produce a scaled vineyard site plan which can be readily interpreted and understood by on-site personnel 5.3 Develop and document detailed on-site procedures and schedules required for grape production

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCPHT504 Develop a grape production plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research, evaluate and record relevant information calculate the cost and logistical requirements of the production plan
- Plan and schedule grape production activities
- Plan and schedule marketing
- communicate and negotiate with the client, staff, managers, suppliers, contractors and consultants
- document plans, specifications and production work procedures
- prepare reports for staff, managers, clients and contractors
- produce a site plan which can be readily understood by on-site personnel

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for developing a grape production plan
 - establishment and management of grape production in relation to client needs and the standards required by the marketplace
 - establishment procedures, plant selection and cultural practices for grape production
 - processes and techniques for preparing, costing and documenting plans for and scheduling grape production
 - the role of business and marketing plans and client consultation processes in planning grape production
 - trends and issues of the Australian viticulture industry

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPT505 Evaluate wine

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to evaluate a variety of wine types and style and make recommendations for the improvement of wine making and viticultural practices to enhance the quality of wine produced.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Analyse chemical components of wine	1.1 Determine chemical components for a particular wine style and identify testing laboratories

Element	Performance criteria
	<p>1.2 Take samples of grapes, juice or wine according to standard sampling procedures and laboratory requirements</p> <p>1.3 Perform simple wine analysis procedures and record results</p> <p>1.4 Evaluate and compare results of chemical analyses with desired values to identify potential chemical problems in the winemaking process and any required additions or fining agents</p>
2. Resolve wine making problems	<p>2.1 Evaluate wine or juice using standard laboratory and organoleptic procedures</p> <p>2.2 Identify the protein stability of a wine using a buttes or heat technique</p> <p>2.3 Identify the need for cold stabilisation of a wine</p> <p>2.4 Use additives and/or fining agents to alleviate problems or improve quality</p> <p>2.5 Evaluate the effectiveness of additives and/or fining agents used to alleviate problems or improve quality and adjust their use where indicated</p> <p>2.6 Carry out wine-making and handling processes in a hygienic working environment</p> <p>2.7 Describe, record and use cellar operations procedures and instructions during the winemaking process</p>
3. Taste and evaluate a wine	<p>3.1 Use accepted tasting procedures for tasting the wine</p> <p>3.2 Identify the flavour and aroma components and characteristics of the wine using organoleptic evaluation techniques</p> <p>3.3 Identify the relative contribution and interaction of wine components to the wine taste, aroma and appearance, using accepted wine description terminology</p>
4. Analyse the effect of winemaking techniques on wine	<p>4.1 Identify evidence of the winemaking technique in the wine to distinguish it from other influences on the wine</p> <p>4.2 Identify faults in the wine attributable to the winemaking technique and distinguish from bottle age characteristics</p> <p>4.3 Determine the effect of winemaking techniques on suitability of wine for cellaring</p>
5. Analyse the effect of site characteristics, viticultural practices and grape varieties on wine quality	<p>5.1 Identify effects of climate in the wine</p> <p>5.2 Identify effects of the physical characteristics of vineyard sites in the wine</p> <p>5.3 Identify and analyse effects of grape variety</p> <p>5.4 Identify and evaluate effects of viticultural practices in the wine in terms of modifications and improvements to be made for the next season</p> <p>5.5 Adjust, document and communicate viticultural production plan</p>

Element	Performance criteria
	for next season to vineyard personnel
6. Analyse current packaging methods, bottle closure methods and wine labelling laws	6.1 Identify the range of wine packaging available and used in the Australian wine industry 6.2 Identify and compare the range of wine bottle closure methods used in the Australian wine industry 6.3 Identify and interpret current wine labelling regulations and their impact on the wine industry

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPT505A Evaluate wine.

Assessment Requirements for AHCPHT505 Evaluate wine

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- perform chemical analyses necessary for the winemaking process
- evaluate a wine, following tasting
- determine the effect of winemaking techniques on wine
- determine wine characteristics and faults using organoleptic evaluation techniques
- identify and recommend improvements to viticultural practices that will contribute to enhanced wine quality in the next season
- analyse current packaging methods, bottle closure methods and wine labelling lawsresearch, evaluate and record information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for evaluating wine
 - 'balance' in relation to wine taste
 - changes to the chemical characteristics of grapes during ripening including acid, sugar and flavour
 - changes to the physical characteristics of grapes during ripening including size, hardness and colour
 - climatic and physical features of wine grape growing areas and wine styles produced
 - factors involved in the initiation and management of primary, secondary and malolactic fermentation processes
 - food safety requirements
 - ideal Australian cellaring conditions
 - main export markets

- packaging, regulations and relationship to product marketing and quality
- sensory evaluation of wines with potential for cellaring
- types and styles of wine produced in Australia
- varieties of wine grapes in Australia
- vintage ratings in Australia

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPT506 Manage a wine making process

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to acquire grapes for processing and prepare for and produce a variety of wine types and styles.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Production horticulture (PHT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine type and style of wine to be produced and	1.1 Determine the type and style of wine to be produced according to variety and characteristics of the grapes, winemaking factors, consumer preferences, client requirements and industry trends

Element	Performance criteria
winemaking process to be followed	1.2 Determine the winemaking process to be followed according to type and style of wine to be produced, quality and quantity of grapes available, and availability of required equipment and personnel
2. Acquire, deliver and prepare grapes for fermentation	2.1 Harvest and handle grapes in accordance with standard vineyard practices and quality criteria 2.2 Acquire and deliver to the winery grapes that meet the desired variety and quality parameters 2.3 Prepare grapes for fermentation, and deliver must or juice to fermentation vessels to meet the desired wine type and style requirements
3. Initiate a ferment	3.1 Select yeasts types/strains to produce a given wine type and style 3.2 Prepare fermentation vessels and transfer must or juice according to wine type and style requirements 3.3 Prepare yeast culture according to specifications and add to fermentation vessels
4. Manage primary fermentation	4.1 Monitor and adjust physical characteristics of ferment 4.2 Monitor and adjust chemical characteristics of ferment 4.3 Predict potential fermentation problems 4.4 Detect the presence of undesirable fermentation characteristics 4.5 Outline steps to rectify fermentation problems 4.6 Rack off gross lees or pressings into appropriate vessels at a determined time 4.7 Maintain records of additions and adjustments
5. Manage secondary fermentation	5.1 Obtain and check oak barrels for serviceability for use if required 5.2 Inoculate wine with selected malolactic fermentation bacteria 5.3 Manage malolactic fermentation to the predetermined end point
6. Mature wine in storage vessels	6.1 Select suitable maturation storage vessels to produce a given wine style and check for serviceability and use 6.2 Transfer wine into the selected vessels according to determined wine style characteristics 6.3 Monitor condition of wine in storage 6.4 Bottle and seal wine 6.5 Make and maintain records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPTH506A Manage a wine making process.

Assessment Requirements for AHCPHT506 Manage a wine making process

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- acquire and process grapes for wine production
- calculate the cost and logistical requirements of components of the wine production
- identify and recommend improvements to viticultural practices that will contribute to enhanced wine quality in the next season
- identify, establish, supervise and monitor daily cellar work practices
- initiate and manage the fermentation process
- make additions and finings as required
- operate the filtration and bottling processes
- operate the range of equipment required to process grapes from winery receipt point to the fermentation tank
- organise and undertake routine cellar operations
- perform chemical analyses necessary for the winemaking process
- perform must handling processes
- plan processes that may be used to maximise production of grapes that meet winery quality requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for managing a wine making process
 - 'balance' in relation to wine taste
 - changes to the chemical characteristics of grapes during ripening, including acid, sugar and flavour

- changes to the physical characteristics of grapes during ripening, including size, hardness and colour
- climatic and physical features of wine grape growing areas and wine styles produced
- equipment and processes for wine filtration
- factors involved in the initiation and management of primary, secondary and malolactic fermentation processes
- ideal Australian cellaring conditions
- must and marc handling procedures
- processes involved in handling grapes from the vineyard to the winery in order to produce wine
- routine winemaking and cellar operation procedures including maintenance of a clean, safe working environment
- ranges of equipment and using this equipment to process grapes and must in a winery
- types and styles of wine produced in Australia
- varieties of wine grapes in Australia
- vineyard practices relevant to the production of grapes that meet the requirements of the winery

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPLY201 Collect store and handle eggs from breeder flocks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect, store and handle fertile eggs from breeder flocks.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to handle eggs	1.1 Follow biosecurity procedures

Element	Performance criteria
	<p>1.2 Follow personal hygiene requirements including washing and sanitising hands</p> <p>1.3 Identify work health and safety hazards, assess risks and implement suitable controls</p> <p>1.4 Select, use and maintain suitable personal protective equipment and clothing</p> <p>1.5 Check work area is clean</p> <p>1.6 Check equipment is clean and working correctly</p>
2. Collect and sort eggs	<p>2.1 Ensure that nests and egg belts are free of sick or injured birds, carcasses and other obstructions in line with enterprise animal welfare procedures</p> <p>2.2 Collect eggs from nesting system</p> <p>2.3 Collect floor eggs and keep separate</p> <p>2.4 Ensure that procedures are implemented to minimise floor eggs</p> <p>2.5 Control flow of eggs to match handling rate</p> <p>2.6 Remove very dirty, cracked, leakers or weak shelled eggs</p> <p>2.7 Wash eggs as required using approved sanitisers and temperatures</p> <p>2.8 Operate egg handling equipment appropriately</p> <p>2.9 Sort eggs into settable and non-settable and categories within each</p>
3. Pack and store eggs	<p>3.1 Place eggs on appropriate trays with pointed end down</p> <p>3.2 Assemble and stack trays in categories and label clearly and accurately</p> <p>3.3 Transfer eggs to storage in order of age, category or dispatch order</p> <p>3.4 Operate egg storage facilities/ cool rooms according to enterprise procedures</p> <p>3.5 Fumigate eggs if required</p>
4. Complete hygiene and administration activities	<p>4.1 Clean and disinfect or sanitise egg belts/conveyors, equipment and work area</p> <p>4.2 Clean, sanitise and check cool room and equipment</p> <p>4.3 Safely handle and measure chemicals used in the cleaning process</p> <p>4.4 Take and prepare samples for testing as required</p> <p>4.5 Dispose of non settable eggs and waste in line with enterprise environmental policies</p> <p>4.6 Monitor pest and vermin presence and implement control measures in line with enterprise procedures</p> <p>4.7 Record and report all required information and issues</p> <p>4.8 Follow industry standards and enterprise procedures for excess</p>

Element	Performance criteria
	eggs which are destined for human consumption

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPLY201A Collect store and handle eggs from breeder flocks.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPLY201 Collect store and handle eggs from breeder flocks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow personal hygiene requirements
- check nest boxes and egg belts are free of obstructions
- match egg collection equipment flow rate to handling rate
- collect nest and floor eggs and keep separate
- ensure that practices to minimise floor eggs are implemented
- assess and sort eggs into settable and non settable and categories within each
- place eggs on trays pointed end down
- pack, label and store eggs correctly
- complete hygiene and administration activities
- operate egg washing equipment at correct temperature and sanitiser/detergent levels
- clean and sanitise equipment, egg washing equipment, cool rooms and work areas
- monitor pest and vermin presence and implement control measures
- identify work health and safety hazards, assess risks and implement suitable controls
- follow biosecurity requirements
- follow enterprise animal welfare procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry standards, codes of practice, and enterprise procedures for collecting, handling, sorting, packing and storing settable eggs
- commonly used methods of pest and vermin control
- types, uses, cleaning and maintenance of machinery and equipment

-
- relevant documentation, records and reports that are required
 - criteria for sorting and determining eggs that are unfit for setting and disposal methods
 - procedures for egg handling, collection, washing, sorting, packing, labelling, storage and fumigation
 - temperature, humidity, cleaning and operation for cool rooms and egg washing machines
 - procedures for handling, measurement and usage of cleaning chemicals, disinfectants and sanitisers
 - procedures for taking and handling samples for testing
 - enterprise environmental and sustainability requirements, and procedures for disposal and management of wastes, debris and run-offs
 - enterprise work health and safety, biosecurity and animal welfare policies and procedures

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY202 Maintain health and welfare of poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain poultry health and welfare.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor and assess poultry health and	1.1 Maintain biosecurity protocols and quarantine procedures at all

Element	Performance criteria
welfare	times 1.2 Follow enterprise work health and safety policies 1.3 Check poultry health and welfare regularly 1.4 Recognise and report signs of ill health, common diseases, parasite infestations and physical abnormalities 1.5 Identify cull birds using criteria established by the enterprise or industry quality assurance program 1.6 Record flock health status
2. Provide an optimal environment for poultry	2.1 Check bird housing conditions to ensure that protection is provided from external factors that compromise poultry health and welfare 2.2 Monitor, maintain and operate temperature and humidity control equipment 2.3 Install equipment and housing infrastructure appropriately 2.4 Monitor welfare of poultry and report non-compliance with animal welfare codes promptly 2.5 Record information which is relevant to the welfare and health of stock
3. Administer medicines or other chemicals	3.1 Store labelled veterinary chemicals or other medicines appropriately 3.2 Carry out routine prevention procedures for disease agents and parasites 3.3 Handle and measure medicines and chemicals safely and appropriately for administration 3.4 Medicate poultry appropriately as instructed or under supervision where required 3.5 Complete required documentation and records for administration of medicines and chemicals
4. Collect samples for analysis	4.1 Take swabs from surfaces and work areas regularly and prepare swabs for laboratory testing 4.2 Label and pack swabs and samples for dispatch appropriately
5. Remove non-viable poultry	5.1 Identify and remove sick, injured or unthrifty poultry in line with enterprise animal welfare policies 5.2 Treat sick poultry 5.3 Provide post-mortem assistance where necessary
6. Report and complete records	6.1 Report individual bird and flock health status promptly so that prevention strategies can be planned and implemented 6.2 Complete all required documentation and records clearly, promptly and accurately, and store appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPLY202A Maintain health and welfare of poultry.

Assessment Requirements for AHCPLY202 Maintain health and welfare of poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor and assess poultry health and welfare
- provide an optimal environment for poultry
- administer medicines or other chemicals
- collect samples for analysis
- remove non-viable poultry
- report and complete records
- follow enterprise work health and safety policies
- follow biosecurity protocols
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for biosecurity and quarantine
- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for animal welfare of poultry
- signs of health, signs of ill health, and methods for assessing poultry health and welfare
- common diseases of poultry, treatment regimes, prevention and management strategies
- criteria for determining birds to be culled
- relevant documentation, records and reports that are required
- types, functions and characteristics of housing, housing infrastructure and housing equipment for poultry, and the criteria and methods for determining that they are in working condition

- types, uses, handling, storage and routes of administration of commonly used veterinary medicines and chemicals
- procedures for taking, handling, labelling, packing and transporting swab samples
- procedures for assisting a post-mortem examination
- effects and impacts of individual bird health and welfare on flock health status and vice versa
- relevant work health and safety requirements and environmental policies

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY203 Set up shed for placement of day-old chickens

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to set up shed for placement of day-old chickens.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work in	1.1 Follow biosecurity procedures

Element	Performance criteria
poultry shed	1.2 Confirm work to be undertaken from work program and management 1.3 Follow enterprise work health and safety policies 1.4 Select, use and maintain suitable personal protective equipment 1.5 Select, check and maintain tools and equipment
2. Check and maintain shed and equipment	2.1 Check biosecurity procedures are in place to prevent entry of pathogens on personnel and equipment 2.2 Check shed and all equipment are clean, sanitised to required standards and maintained in working condition 2.3 Check that pest and vermin controls are in place, and maintain if required 2.4 Ensure that rodent barriers are in place and working 2.5 Operate and check lights, time switches and shed equipment
3. Prepare shed	3.1 Spread or place litter/paper as per enterprise procedures 3.2 Ensure litter/paper is clean & dry 3.3 Setup feeders, drinkers, heaters and other equipment in shed 3.4 Ensure that bird wires are in place and working 3.5 Install brooder curtains if required 3.6 Test watering, feeding, ventilation and cooling systems 3.7 Check and adjust lighting levels for day old chicks 3.8 Reset or adjust shed climate management system if required 3.9 Test alarm systems and time switches 3.10 Test brooders for proper operation and temperature control 3.11 Adjust time clocks 3.12 Install additional drinkers if required 3.13 Install additional feeders or lay paper & spread feed on it as required 3.14 Start heaters prior to chick placement to ensure brooding section is at required temperature for chick placement
Place chicks	4.1 Check that feed, water and shed conditions are adequate 4.2 Check shed and litter are at required temperatures 4.3 Carry chick containers safely and gently remove chickens from boxes and place on litter or paper 4.4 Check chick behaviour and health regularly after placement in line with enterprise animal welfare policies
Complete hygiene and administration activities	5.1 Clean and sanitise containers and equipment as required 5.2 Dispose of waste in line with enterprise environmental policies 5.3 Complete required records and documentation promptly and accurately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPLY203A Set up shed for placement of day-old chickens.

Assessment Requirements for AHCPLY203 Set up shed for placement of day-old chickens

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- make preparations to work in poultry sheds
- check cleanliness of shed and equipment
- check and maintain shed and equipment
- check pest and vermin controls are in place
- prepare shed (spread litter or place paper, setup feeders, drinkers, adjust time clocks)
- place day old chicks
- check chick behaviour
- complete hygiene and administration activities
- follow enterprise work health and safety policies
- follow biosecurity procedures
- follow enterprise animal welfare and environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for biosecurity
- relevant animal welfare requirements and practices for poultry and day old chicks
- types, uses, cleaning and maintenance of suitable equipment, tools, machinery and personal protective equipment
- types, characteristics, cleaning and maintenance of poultry sheds
- commonly used methods of pest and vermin control
- types, characteristics and maintenance of bird wires and rodent barriers

- lighting systems, time switches, alarm systems, brooders, watering systems, feeding systems, ventilation systems and fogging systems, and methods for determining that they are in working condition
- requirements of day old chicks to ensure their health and welfare
- behavioural signs of health and methods for assessing health and welfare in day old chicks
- types, characteristics, uses and maintenance of litter for poultry
- biosecurity requirements for brooding and rearing chickens
- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes
- relevant documentation and records that are required
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY206 Catch and load poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to catch, handle and load poultry for transfer to new facilities or processing plant. Poultry can be meat chickens, layer or breeder pullets or spent hens.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to catch or pick up poultry	1.1 Follow biosecurity procedures 1.2 Confirm and identify sheds, flocks and bird numbers to be caught and loaded 1.3 Identify work health and safety hazards, assess risks and implement suitable controls 1.4 Select, use and maintain suitable personal protective equipment 1.5 Dim lights and set ventilation and cooling appropriately 1.6 Raise feeders, drinkers, nests and perches as required 1.7 Check and ensure that catching, movement path and vehicle loading area is clear of all obstacles 1.8 Set up catching equipment according to age, stock type and production system 1.9 Select, use and maintain tools and equipment 1.10 Follow relevant work health and safety and animal welfare procedures
2. Catch or pick up poultry	2.1 Quietly and calmly move birds into catching area 2.2 Catch and handle birds gently and calmly 2.3 Place birds in crates/modules according to space or weight requirements 2.4 Check birds regularly for overheating and smothering 2.5 Move crates/modules and load onto vehicle gently and calmly
3. Complete hygiene and administration activities	3.1 Clean, sanitise, maintain and appropriately store equipment and tools 3.2 Dispose of waste and debris in line with enterprise environmental procedures 3.3 Complete required records and documentation promptly and accurately

Assessment Requirements for AHCPY206 Catch and load poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow biosecurity requirements
- identify flocks or shed to be caught
- make preparations for catching
- set up shed and catching area
- catch and handle poultry gently, quietly and calmly
- load birds into crates/modules according to space or weight requirements
- complete hygiene and administration requirements
- follow work health and safety procedures
- follow biosecurity procedures
- follow animal welfare procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety requirements
- relevant biosecurity requirements
- relevant animal welfare requirements and practices
- types, uses, cleaning and maintenance of equipment, tools, machinery and personal protective equipment required
- techniques and methods for handling, catching, placing into containers and loading poultry
- how to assess poultry condition and welfare including overheating and smothering

- relevant environmental requirements, and procedures for disposal and management of wastes, debris and fluids
- relevant documentation and records that are required

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY207 Identify and sex poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to identify and sex poultry by feather or plumage colour.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to sex birds	1.1 Confirm work to be undertaken from work program and management

Element	Performance criteria
	1.2 Follow biosecurity procedures 1.3 Follow animal welfare requirements 1.4 Select, check and maintain tools and equipment 1.5 Identify work health and safety hazards, assess risks and implement suitable controls 1.6 Select, use and maintain suitable personal protective equipment
2. Identify and sex birds	2.1 Confirm and identify hatchlings to be sexed 2.2 Handle and sort chickens with care 2.3 Sex birds according to method 2.4 Place sexed chicks into trays marked accordingly
3. Complete hygiene and administration activities	3.1 Dispose of all debris and waste in line with enterprise environmental policies 3.2 Clean, maintain and store tools, machinery and equipment appropriately 3.3 Clean and maintain work areas 3.4 Complete documentation, records and reports promptly and accurately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPLY207 Identify and sex poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow biosecurity procedures
- make preparations to sex poultry
- identify hatchlings to be sexed
- sex poultry using feather or colour sexing methods
- handle birds appropriately
- follow hygiene requirements
- follow administration requirements
- follow animal welfare requirements
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- feather and colour sexing methods
- methods for identifying trays of hatchlings
- types and use, of machinery and equipment required
- relevant work health and safety requirements
- methods and animal welfare considerations for handling and holding poultry
- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes
- requirements and procedures for cleaning and maintaining work areas
- relevant records that are required
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY301 Artificially inseminate poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect semen and artificially inseminate poultry.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for insemination of birds	1.1 Schedule timing to ensure availability of resources and personnel 1.2 Implement biosecurity procedures

Element	Performance criteria
	1.3 Implement animal welfare requirements 1.4 Follow enterprise procedures for personal hygiene 1.5 Follow enterprise work health and safety policies 1.6 Select, use and maintain personal protective equipment 1.7 Prepare, clean and sterilise insemination equipment by following enterprise procedures for cleaning chemicals, disinfectants and sanitisers 1.8 Prepare birds for semen collection and insemination
2. Collect semen	2.1 Identify males for semen collection 2.2 Catch and handle birds appropriately 2.3 Collect semen aseptically 2.4 Store semen
3. Inseminate birds	3.1 Prepare semen for insemination 3.2 Identify intended recipient birds 3.3 Catch, restrain and prepare hen for insemination appropriately 3.4 Inseminate hen using appropriate aseptic procedures 3.5 Return birds to allocated pens
4. Complete hygiene and administration activities	4.1 Dispose of waste and debris according to recommended hygiene standards and environmental policy 4.2 Clean work area appropriately 4.3 Clean, maintain and store equipment appropriately 4.4 Complete records promptly and accurately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPLY301A Artificially inseminate birds.

Assessment Requirements for AHCPLY301 Artificially inseminate poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for artificial insemination of poultry
- apply personal hygiene
- carry out semen collection
- carry out artificial insemination of birds
- complete hygiene and administration activities
- implement biosecurity procedures
- implement animal welfare requirements
- follow enterprise work health and safety policies
- implement enterprise hygiene standards and environmental policy

Knowledge Evidence

The candidate must demonstrate knowledge of:

- resource and manpower requirements, biosecurity requirements, industry standards, codes of practice and procedures for artificial insemination of poultry
- relevant animal welfare practices for the conduct of artificial insemination in poultry
- relevant work health and safety requirements
- collection, handling, storage and use of poultry semen for artificial insemination
- preparation of birds for collection of semen and insemination
- handling, dilution and insemination of poultry
- types, uses, maintenance and storage of equipment
- methods and procedures for cleaning and sterilisation of equipment used for artificial insemination

- procedures for handling, measurement and usage of cleaning chemicals, disinfectants and sanitisers
- relevant documentation and records that are required
- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes and debris
- requirements and procedures for cleaning and maintaining work areas

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY302 Brood poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to brood poultry.

This unit applies to all poultry species and breeds.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for brooding	1.1 Confirm work to be undertaken from work program and

Element	Performance criteria
	<p>management</p> <p>1.2 Follow biosecurity procedures</p> <p>1.3 Hold discussions with other workers who may be affected by the brooding operations to ensure smooth operation of enterprise production processes</p> <p>1.4 Select, check and maintain tools and equipment</p> <p>1.5 Identify work health and safety hazards, assess risks and implement suitable controls</p> <p>1.6 Select, use and maintain suitable personal protective equipment</p>
2. Place hatchlings	<p>2.1 Check shed and equipment has been set up correctly for placement of chickens and for brooding</p> <p>2.2 Start heaters prior to chick placement to ensure brooding section is at required temperature for chick placement</p> <p>2.3 Check feed, water and shed conditions are adequate</p> <p>2.4 Check shed and litter are at required temperatures</p> <p>2.5 Carry chick containers safely and gently remove chickens from boxes and place on litter, paper or matting</p> <p>2.6 Check chick behaviour regularly after placement</p> <p>2.7 Follow enterprise animal welfare policies</p>
3. Carry out brooding operations	<p>3.1 Observe chick behaviour regularly</p> <p>3.2 Check temperature regularly and adjust according to chicks requirements</p> <p>3.3 Pick up dead birds and dispose of carcasses</p> <p>3.4 Identify and remove sick, injured or unthrifty birds</p> <p>3.5 Remove paper or matting at appropriate time</p> <p>3.6 Extend brooding area as young birds grow</p> <p>3.7 Check equipment, shed climate, litter condition and ventilation regularly, and adjust as necessary</p> <p>3.8 Clean drinkers and equipment regularly</p> <p>3.9 Remove wet litter and replace where appropriate</p> <p>3.10 Adjust lighting program as chickens grow</p> <p>3.11 Carry out black-out training where required</p> <p>3.12 Monitor beak tipping at appropriate times</p> <p>3.13 Monitor body weight regularly</p> <p>3.14 Monitor feed and water intake</p>
4. Complete cleaning, maintenance and administration activities	<p>4.1 Dispose of waste in line with enterprise environmental policies</p> <p>4.2 Clean, maintain and store tools, machinery and equipment appropriately</p> <p>4.3 Clean and maintain work areas</p>

Element	Performance criteria

Assessment Requirements for AHPLY302 Brood poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check and confirm that shed or section is ready for brooding
- place hatchlings
- carry out brooding operations
- monitor chick behaviour and sensors and adjust temperature and ventilation appropriately
- monitor body weight and beak tipping where applied regularly
- complete cleaning, maintenance and administration activities
- implement work health and safety policies
- follow biosecurity procedures
- follow enterprise animal welfare policies
- apply enterprise environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the effects and impacts of brooding operations on enterprise production processes
- the types, uses, maintenance and storage of relevant tools, machinery and equipment
- relevant work health and safety requirements
- the requirements, industry standards, codes of practice and procedures for welfare and health of poultry during brooding
- the effects and impacts of temperature and shed climate on chick behaviour and how temperature and shed conditions are checked
- the range, effects and impacts of stocking density and overcrowding on poultry behaviour, health and welfare
- the relevant lighting and lighting programs for chickens and pullets and effects on welfare and performance

- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes
- the requirements and procedures for cleaning and maintaining work areas
- relevant records and reports that are required
- describe relevant animal welfare and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY304 Incubate eggs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to incubate eggs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

Candidates should confirm the regulatory requirements in regard to the use of fumigants that apply in their relevant State or Territory before undertaking this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Receive and store eggs	1.1 Implement enterprise work health and safety policies 1.2 Implement enterprise biosecurity procedures 1.3 Unload eggs and record required information 1.4 Transfer eggs from delivery dollies/trolleys to setter dollies/trolleys 1.5 Store eggs with regard to position, temperature, humidity and period of storage 1.6 Attach eggs to turning machine to ensure maximum viability is maintained 1.7 Manage egg stock to minimise egg age on setting 1.8 Monitor temperature, humidity and airflow to maintain required settings
2. Monitor and operate setter	2.1 Take and record setter readings 2.2 Recognise alarms and carry out specified sequence of operations during a breakdown 2.3 Operate, repair and maintain setter 2.4 Calibrate temperature probes with known standards
3. Transfer eggs to hatcher	3.1 Move dollies to the egg handling and transfer area in the sequence required by the organisation 3.2 Check temperature, humidity and airflow 3.3 Transfer eggs to hatching trays in sequence

Element	Performance criteria
4. Fumigate setter or hatcher	4.1 Determine need for fumigation from supervisor's instructions 4.2 Prepare fumigant and apparatus 4.3 Seal and fumigate setter or hatcher 4.4 Air room or chamber to completely remove traces or vapours of the fumigant prior to re-entry of staff, re-installation of equipment and placement of eggs
5. Monitor and operate hatcher	5.1 Take and record readings 5.2 Carry out adjustments to temperature, humidity and airflow when instructed 5.3 Recognise alarms and carry out correct sequence of operations during a breakdown as set out by employer
6. Complete hygiene and administration activities	6.1 Dispose of waste and debris from the work areas in line with enterprise environmental policies 6.2 Clean, maintain and store tools, equipment and machinery 6.3 Clean and maintain safe work areas 6.4 Complete documentation, records and reports promptly and accurately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPLY304A Incubate eggs.

Assessment Requirements for AHPLY304 Incubate eggs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- receive and store eggs
- monitor and operate setter
- transfer eggs to hatcher
- fumigate setter or hatcher
- monitor and operate hatcher
- complete hygiene and administration activities
- implement enterprise work health and safety policies
- implement enterprise biosecurity procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- requirements, methods and procedures for handling, unloading, storing, transferring and turning eggs
- types, uses, cleaning, maintenance and storage of machinery, equipment and tools used in incubating operations
- range, effects and impacts of environmental parameters on incubating eggs
- types, handling, use and disposal of fumigating agents, work health and safety and environmental practices for these agents
- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes and debris
- requirements and procedures for cleaning and maintaining work areas
- relevant documentation and records that are required
- enterprise work health and safety policies
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY305 Beak tip poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to tip the beaks of poultry.

This unit applies to beak treatment of day old chicks and beak trimming of poultry of various ages. Poultry include all poultry species and breeds used for meat or egg production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCLSK307 Euthanase livestock.

Unit Sector

Assessment Requirements for AHCPLY305 Beak tip poultry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- make preparations for beak tipping poultry
- carry out beak tipping
- complete beak tipping and post-operation procedures
- carry out euthanasia of cull birds in line with enterprise policies
- implement enterprise work health and safety policies
- implement enterprise biosecurity procedures
- implement animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant regulatory requirements, industry standards, codes of practice and enterprise biosecurity principles and enterprise requirements for poultry production
- relevant work health and safety requirements for beak tipping operations
- relevant animal welfare principles and practices for beak tipping operations
- signs of health, signs of ill health and methods of assessing health and welfare of poultry
- beak treatment and beak trimming procedures and the effects and impacts (negative and positive) of such procedures on the health and welfare of poultry
- relevant regulatory requirements, codes of practice, industry standards, methods and procedures for euthanasia of poultry
- types, uses, cleaning, maintenance and servicing of beak treatment and beak trimming equipment and tools
- site preparation procedures for beak tipping operations
- criteria for determining birds to be culled before and after beak tipping operations

- types and uses of documentation, records and reports that are required for beak tipping operations

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY306 Clean and disinfect poultry production sheds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to wet or dry clean and disinfect (sanitise, disinfect or fumigate) sheds used for poultry production. The standard of cleaning and disinfection applied depends in the type of stock, enterprise disease status and disease risk.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

Candidates should confirm the regulatory requirements in regard to the use of fumigants that apply in their relevant State or Territory before undertaking this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to clean sheds	1.1 Confirm work requirements 1.2 Confirm standard of cleaning (wet or dry), sanitation, disinfection or fumigation required 1.3 Identify work health and safety hazards, and assess risks and implement suitable controls 1.4 Select, use and maintain suitable personal protective equipment 1.5 Identify environmental impacts of cleaning the shed, assess likely outcomes and take responsive action 1.6 Raise, dismantle or remove equipment for cleaning 1.7 Raise or remove feed and watering equipment, and clean to industry standards 1.8 Cover or seal electrical switchboards and other equipment to prevent entry of water
2. Clean sheds and surrounds	2.1 Apply insecticides for initial knock down if required 2.2 Remove and dispose of litter or manure and sweep floors 2.3 Service filters and flush drinker lines and tanks 2.4 Clean shed, feeders, drinkers and equipment 2.5 Empty and clean silos 2.6 Mix chemicals, detergents and disinfectants appropriately 2.7 Dry clean electrical equipment 2.8 Manage waste, effluent and run-offs from cleaning activity appropriately 2.9 Maintain all shedding, equipment and machinery
3. Sanitise, disinfect or fumigate sheds	3.1 Prepare equipment (including safety equipment) and chemicals for application of sanitiser, disinfectant or fumigant 3.2 Prepare shed for sanitisation, disinfection or fumigation by sealing sensitive and or electrical equipment 3.3 Seal shed to minimise escape of disinfectant to the outside 3.4 Carry out disinfection of shed according to legislative, enterprise and manufacturers requirements 3.5 Air shed to completely remove traces or vapours of the disinfectant prior to re-entry of staff, re-installation of equipment and placement of eggs 3.6 Apply insecticides if required
4. Complete hygiene and	4.1 Check cleaning and disinfection is done correctly

Element	Performance criteria
administration tasks	4.2 Apply biosecurity requirements 4.3 Clean and maintain cleaning and disinfection equipment, disinfect and store 4.4 Dispose of leftover fluids, containers and waste in line with enterprise environmental policies 4.5 Complete records and documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPLY306A Clean and fumigate intensive production sheds.

Links

Assessment Requirements for AHCPLY306 Clean and disinfect poultry production sheds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- make preparations to clean sheds
- raise or remove equipment including feeders and drinkers
- clean equipment, sheds and surrounds
- maintain sheds, silos, feeders, drinkers and all equipment
- clean silos safely
- prepare sheds and equipment for cleaning
- sanitise, disinfect or fumigate sheds and equipment safely and in line with legislative requirements
- apply insecticide both in and outside shed
- dry clean and effectively cover electrical equipment
- complete hygiene and administration tasks
- implement enterprise work health and safety procedures
- apply biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of sheds, machinery and equipment found in sheds
- how to handle, raise or remove equipment in sheds
- methods of sealing or covering electrical or sensitive equipment to prevent entry of water
- methods for litter and manure removal
- methods for dry cleaning electrical equipment
- procedure for dry or wet cleaning sheds and equipment

- environmental impacts of shed cleaning operation, and measures to mitigate these impacts
- equipment and machinery used for shed cleaning and disinfection, its operation, maintenance and storage
- methods of disposal of effluent and waste
- cleaning, maintenance and servicing of filters, drinker lines, tanks and silos
- handling and application of insecticides, sanitisers, disinfectants and fumigants and the relevant legislative requirements
- types, handling, use and disposal of cleaning agents
- types of documentation and records that need to be completed after the cleaning operations
- relevant work health and safety requirements
- relevant biosecurity requirements
- environmental impacts and controls of cleaning and fumigating sheds
- chemical spillage management and safety equipment and clothing

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPLY307 Implement and monitor biosecurity measures in poultry production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement and monitor biosecurity measures for poultry enterprises.

All work must be carried out to comply with workplace procedures, legislation, codes of practice, and guidelines relating to work health and safety, biosecurity, animal welfare, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems in relation to biosecurity.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Note:

Pest is a bird or animal or insect which can be a carrier of infectious disease or which can cause stock losses or loss of productivity through predation.

Weed is a poisonous plant or one declared as a noxious weed (free range runs).

Pre-requisite Unit

Nil.

Unit Sector

Poultry (PLY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply biosecurity procedures for site entry	1.1 Identify potential biosecurity threats to the enterprise 1.2 Identify potential sources of disease, pest or weed contamination being carried between sites 1.3 Consult with supervisor and management on the requirements for maintaining the enterprise as a biosecure zone as appropriate, in compliance with relevant legislation, Codes of Practice, industry guidelines and enterprise procedures 1.4 Maintain the integrity of enterprise as a biosecure zone 1.5 Maintain personal sanitation and hygiene on entry to enterprise 1.6 Complete sign in procedures 1.7 Ensure contractors and visitors are signed in, checked for risk profile and instructed in biosecurity requirements 1.8 Ensure all equipment, machinery or vehicles prior to entry onto the site are cleaned and disinfected 1.9 Check poultry, feed and feed ingredients to be introduced to the enterprise for health, pest and contamination status and isolate them from other poultry and feedstock where necessary 1.10 Implement enterprise work health and safety policies 1.11 Use and maintain appropriate personal protective equipment
2. Implement biosecurity procedures to minimise spread of disease, pest or weed where relevant within the enterprise	2.1 Implement procedures for entering production areas or facilities or moving from one site to another 2.2 Implement enterprise requirements, order of priority and prescribed routes for specified movements of personnel, vehicles, equipment, feedstuffs and poultry 2.3 Ensure all surface water used for drinking, cooling and washing down is sanitised 2.4 Implement appropriate personal sanitation and equipment cleaning procedures for movement between sites 2.5 Implement a health control program including vaccination 2.6 Keep enterprise areas clear of debris 2.7 Implement biosecure procedures for carcass, effluent, organic waste and inorganic waste removal and disposal
3. Implement biosecurity procedures on detection of disease, pest or weed where	3.1 Identify signs of disease, pest or weed incursion, or unusual signs in the poultry flocks 3.2 Follow enterprise animal welfare policies

Element	Performance criteria
relevant	3.3 Assess severity and extent of disease or incursion 3.4 Seek immediate advice from supervisors, professionals or appropriate authorities where signs indicate an unusual disease or pest presence 3.5 Immediately report signs of unusual disease or pest to management or appropriate authorities 3.6 Implement instructions from supervisors, enterprise and appropriate authorities for additional biosecurity measures
4. Apply enterprise sanitation and disinfection practices to reduce the risk of disease, pest or weed	4.1 Ensure all used bedding, organic and inorganic waste are removed from facilities or sites and disposed of in line with enterprise environmental policies 4.2 Remove dust from surfaces 4.3 Clean production areas, facilities or sites using pressure cleaning, water or dry cleaning method where appropriate 4.4 Clean feeding and watering equipment using an appropriate method 4.5 Sanitise or disinfect facilities, sites and equipment appropriately
5. Implement pest control	5.1 Identify pests that can introduce or spread high risk pathogens 5.2 Exclude wild birds from the poultry housing and other pests from the facilities by effective physical barriers 5.3 Monitor wild bird and pest numbers 5.4 Carry out procedures to discourage wild birds and to control pests
6. Monitor, record and report	6.1 Monitor effectiveness and progress of control activities and compare with enterprise requirements 6.2 Monitor production areas, facilities or sites as part of work duties to ensure work practices and procedures are applied 6.3 Complete records accurately and timely 6.4 Report issues and concerns with biosecurity to management 6.5 Work with management to review procedures, activities and communicate revisions to other staff

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCPLY307 Implement and monitor biosecurity measures in poultry production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply biosecurity procedures for site entry and between sections
- implement biosecurity procedures
- implement biosecurity procedures as instructed on detection of disease, pest or weed where relevant
- identify abnormal signs in a flock
- implement wild bird, pest and weed control measures
- monitor application of biosecurity procedures
- implement enterprise work health and safety policies
- implement enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant statutory requirements, codes of practice, industry standards and procedures for biosecurity
- types, characteristics, methods of spread, signs, prevention, control and treatment of diseases, pests or weeds relevant to the enterprise
- requirements for maintaining an enterprise as a biosecure zone including perimeter fencing, lockable gates, vehicle access, enterprise boundaries, production area boundaries, dirty and clean production areas, poultry housing and pasture boundaries and appropriate signage
- specific biosecurity procedures applicable to an enterprise and enterprise work routines, including personnel, visitors, vehicles, equipment, machinery, introduced poultry, pests, wild birds and health program

- requirements, procedures and resources for entry to enterprise, production areas, facilities or sites
- normal signs of a healthy flock
- relevant work health and safety requirements
- methods and procedures for cleaning and disinfection of facilities, sheds, feeding and watering equipment and other shed equipment
- requirements, methods and procedures for treatment and sanitisation of drinking, cooling and washing down water supplies as appropriate to an enterprise
- procedures for handling, measurement and usage of cleaning chemicals, disinfectants and sanitisers
- relevant environmental and sustainability requirements, methods and procedures for disposal and management of effluent, organic and inorganic waste and debris
- essential principles and key aspects of Commonwealth and State disease control emergency plans, including AUSVETPLAN
- types and maintenance of relevant documentation and records
- requirements and methods for reporting, reviewing, revising and communicating biosecurity procedures

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPMG201 Treat weeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise significant weed species and apply a range of weed treatment control options.

This unit applies to supervised workers treating weeds in commercial crops, nurseries, parks and gardens, turf, and natural areas and is carried out following strict work instructions and under supervision.

Supervisors are required to hold current chemical handling certification and a first aid certificate. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to treat weeds	1.1 Recognise target weeds by common name 1.2 Record details of the weed occurrence and discuss with supervisor

Element	Performance criteria
	1.3 Identify appropriate control technique with supervisor 1.4 If spraying is necessary, calculate application rates required and confirm calculations with supervisor 1.5 Select and prepare equipment for use according to enterprise guidelines, supervisor's direction and manufacturer's specifications 1.6 Place caution or warning signs as required by work instructions or standard operating procedures 1.7 Identify work health and safety and environmental hazards and report safety concerns to the supervisor
2. Treat weeds	2.1 Wear personal protective equipment according to manufacturer's specifications 2.2 Prepare treatments according to supervisor's instructions, manufacturer guidelines, label directions and safety data sheets 2.3 Apply treatments to minimise damage to non-target species according to work health and safety and regulatory requirements
3. Carry out post treatment operation	3.1 Clean and store personal protective equipment and application equipment 3.2 Dispose of treatment waste in a way that causes minimal environmental damage 3.3 Maintain records according to enterprise guidelines and regulatory requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPMG201A Treat weeds

Assessment Requirements for AHCPMG201 Treat weeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow supervisor instructions to prepare and apply treatments to weeds
- identify and report safety and environmental hazards according to workplace requirements
- shut down and clean and store personal protective equipment and application equipment in a way that minimises environmental impacts
- dispose of treatment waste according to workplace procedures and without causing environmental damage
- maintain records according to workplace and legislative requirements
- use standard industry terminology for plants, weeds and chemicals
- apply work health and safety practices in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of information on weeds and treatments
- environmental considerations when using chemicals for treating weeds
- equipment required to complete the task
- equipment capabilities and limitations
- personal protective equipment required for treating weeds
- weeds and dispersal methodologies common to work area
- a range of treatment methods
- caution or hazard signs and signals
- purpose of chemical labels and safety data sheets
- where to access safety data sheets

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG202 Treat plant pests, diseases and disorders

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to treat plant pests, diseases and disorders.

This unit applies to supervised workers in plant or pasture-based industries and is carried out following strict work instructions and under supervision.

Supervisors are required to hold current chemical handling certification.

No other occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to treat plant pests, diseases and disorders	1.1 Recognise plant pests, diseases and disorders by common name 1.2 Record details of the plant pest, disease and disorder occurrence and report to the supervisor

Element	Performance criteria
	1.3 Select treatment methods in consultation with the supervisor 1.4 Calculate application rates required if spraying is necessary, and confirm calculations with supervisor 1.5 Select and prepare equipment for use according to enterprise guidelines, supervisor's directions and manufacturer's specifications 1.6 Identify work health and safety hazards and report safety concerns to the supervisor 1.7 Place caution or hazard signs and signals as required by work instructions and standard operating procedures
2. Apply treatments to plant pests, diseases and disorders	2.1 Wear personal protective equipment according to work health and safety policies and procedures 2.2 Prepare treatments according to supervisor's instructions, safety data sheets or chemical labels and manufacturer's guidelines 2.3 Apply treatments according to work health and safety, environmental and regulatory requirements, to minimise damage to non-target species
3. Carry out post treatment operation	3.1 Clean and store personal protective equipment and application equipment 3.2 Dispose of treatment waste in a way that causes minimal environmental damage or biosecurity risks 3.3 Maintain records according to enterprise guidelines and regulatory requirements 3.4 Monitor response to treatment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPMG202 Treat plant pests, diseases and disorders

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare and apply treatments to plant pests, diseases or disorders
- identify and report work health and safety and environmental hazards
- follow work health and safety policies and procedures to treating plant pests, diseases and disorders
- follow instructions to prepare and apply treatments to minimise damage to non-target plant and animal species
- dispose of treatment waste without causing environmental damage
- shut down and clean equipment in a way that minimises environmental impacts
- use, clean and store personal protective equipment and application equipment according to workplace procedures
- maintain records to legislative and workplace standards
- apply biosecurity measures in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental considerations when using chemicals
- equipment capabilities and limitations
- plant pests, diseases and disorders common to host plants in a work area
- equipment required to complete the task
- treatment methods appropriate to the issue and the environment
- caution or hazard signs and signals required when treating plant pests, diseases and disorders
- purpose of, and information provided in chemical labels and safety data sheets

- how to access safety data sheets in own workplace and what information is included in them

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG203 Work effectively in a pest management environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to interpret and apply industry and organisation procedures, guidelines, policies, ethical standards and sustainability requirements for working in the pest management sector. It requires the ability to identify and follow legislative and procedural requirements and complete daily work activities under routine supervision and within organisational guidelines.

The unit applies to individuals who undertake defined activities under general supervision. They exercise limited autonomy and take some accountability for their own work.

The skills and knowledge described in this unit underpin a broad range of activities applicable to job roles throughout the pest management industry at various levels.

Participants operating in this field may be required to hold current chemical handling certification. Other licensing conditions may also apply to this unit. Specific determination should be sought through your relevant State or Territory.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Demonstrate basic understanding of pest management principles	1.1 Recognise common invasive pests relevant to field of work 1.2 Identify characteristics of specific pest species and their impacts on the community and environment 1.3 Identify pest management plans applicable to area of work 1.4 Apply principles of integrated pest management according to supervisor instructions 1.5 Identify risks associated with presence of pest species in area of work 1.6 Identify own responsibilities and boundaries of own job role in relation to pest management practices
2. Work within industry guidelines, procedures and legislation	2.1 Assist with identifying key stakeholders and contribute to stakeholder engagement and consultation processes 2.2 Apply the following work health and safety practices: use of personal protective equipment and safe chemical handling, where applicable 2.3 Identify environmental, legislative, ethical and organisational requirements relevant to working in the pest management sector 2.4 Identify licenses, permits and permissions required to enter a property for the purpose of pest management activities 2.5 Relate standard operating procedures and Codes of Practice to field of work 2.6 Follow procedures to ensure applicable legislative, licensing and procedural requirements are ethically implemented to required standards
3. Use technology, equipment and tools to carry out work tasks	3.1 Identify and use suitable navigational tools for onsite orientation 3.2 Calibrate or prepare equipment for use 3.3 Use communication devices onsite effectively and correctly to meet communication needs of self and others 3.4 Operate a range of equipment and tools required for work tasks 3.5 Identify equipment faults and take action or tell your supervisor 3.6 Record information and data regarding the pest control program in relevant database or information system according to workplace procedures
4. Prioritise and undertake daily work activities	4.1 Seek clarification from senior officer regarding target area and, where necessary, methods to be used in the pest management program

Element	Performance criteria
	4.2 Identify, prioritise and carry out work tasks within designated timeframes in accordance with work orders 4.3 Identify and select equipment required to carry out pest management program 4.4 Review factors affecting the achievement of work tasks and tell your supervisor 4.5 Dispose of waste material in accordance with organisational procedures and biosecurity practices 4.6 Undertake routine monitoring of pest management area and, as appropriate, discuss any factors that might impact the effectiveness of the program to your supervisor 4.7 Follow work health and safety requirements for all activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPMG203 Work effectively in a pest management environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- work in a pest management environment
- apply procedures for the safe use of chemicals, equipment and tools relevant to a pest management treatment plan
- follow safe waste disposal procedures
- use communication, navigational and date recording equipment relevant to field work, including any necessary preparations according to organisational requirements
- assist with identifying key stakeholders and gaining an understanding of their attitudes towards pests, the damage pests cause and issues that may influence pest management
- communication strategies used to engage with supervisor and stakeholders
- apply work health and safety policies and procedures in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- common pest management methods, strategies and monitoring techniques and why they are used for a specific species
- standard operating procedures and codes of practice applicable to own work
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- invasive pest species common to field of work and their harmful impact on the environment
- the relevant licenses, permits and permissions required to enter a property
- pest signs and the presence of recent pest activity at the site

- risk factors, including human, health and environmental associated with the pest management activity

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG301 Control weeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and coordinate weed control activities.

This unit applies to workers in agriculture, horticulture or land management-based enterprises who are required to carry out the control of weed infestations using cultural, biological and chemical methods to provide effective, economical control of weeds while minimising damage to the environment.

The unit applies to workers who demonstrate autonomy and judgement and take limited responsibility in known contexts.

Individuals operating in this field who use chemicals for weed control are required to hold current chemical handling certification. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assess weed infestation	1.1 Record details of weeds and potential for weeds in target area 1.2 Identify the scope, stage and size of the weed infestation that adversely impacts on the landscape or production 1.3 Determine if plant health or growth or production requirements are compromised by level of infestation 1.4 Identify tolerable levels of infestation according to client, legislation, market, environmental and Integrated Pest Management requirements 1.5 Seek professional advice or conduct research on possible approaches to control of the weed infestation 1.6 Identify non-target plant and animal species present in the area 1.7 Assess the site for access, suitability of control measures, work health and safety and environmental risk
2. Plan control measures	2.1 Determine suitable control options according to Integrated Pest Management principles, legislative requirements and industry practice 2.2 Identify, assess, and control risks to all stakeholders and the environment, including risks to self, the public, non-target plant and animal species 2.3 Identify appropriate tools, equipment machinery and resources for the planned control measure 2.4 Select appropriate personal protective equipment in accordance with work health and safety requirements 2.5 Prepare or select an integrated plan for the control measures or strategies according to Integrated Pest Management principles and environmental sustainability practices 2.6 Prepare documentation for control measures, including work health and safety, safety data sheets, and chemical use according to workplace and legislative requirements
3. Implement weed control	3.1 Assess if conditions are appropriate for control plan to proceed and make any necessary adjustments to the plan 3.2 Implement control measures in accordance with Integrated Pest Management plan and standard industry practice 3.3 Ensure that control measures minimise non-target species and environmental damage 3.4 Maintain records and documentation of the control measures applied
4. Monitor control measures	4.1 Monitor control measures to identify signs of adverse impact on humans, animals, non-target plants or environment 4.2 Assess effectiveness of control measures in accordance with Integrated Pest Management guidelines and available industry

Element	Performance criteria
	standards 4.3 Report assessment of control measures to client or organisation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPMG301A Control weeds.

Assessment Requirements for AHCPMG301 Control weeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify range of weeds and beneficial organisms in the work area
- plan and coordinate weed control activities
- identify threshold levels or tolerance of weeds
- identify target weeds at different growth stages
- conduct a site hazard identification and risk control assessment for weed control
- prepare, maintain and calibrate equipment
- select and apply weed management methods appropriate to the context
- maintain records of weed management activities
- monitor, record and report the effectiveness of methods
- minimise damage to non-target species and the environment
- apply work health and safety practices in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- suitable weed control measures and timing of weed control activities based on:
 - the lifecycle and ecology of a range of relevant weeds in the area
 - the cyclical nature of weeds and control programs
 - how weeds grow and spread and methods of weed dispersal
 - weed characteristics
 - beneficial organisms in the area
 - new and emerging weed species present in the area
 - how plant health or growth requirements can be compromised by infestation levels

- economic, aesthetic, health, fire hazard and environmental thresholds for a range of weeds, common to the area
- weed control methods and when they should be selected, including prevention strategies
- non-target plants common to the area, especially plants with morphological features similar to the target pest plant
- key concepts of Integrated Pest Management
- risk factors including human, animal health and environmental associated with control measures
- factors that affect the efficacy of weed management
- how to conduct activities in a manner that avoids or minimises disturbance to other plant or animal species
- signs of adverse impact on humans, animals, non-target plants and the environment due to implemented control measures and ways of minimising these adverse effects
- a range of site-monitoring techniques that may be used to implement the weed control plan
- hazard identification and risk assessment methodologies
- types of equipment including personal protective equipment appropriate to the control measure
- work health and safety requirements pertaining to the use of cultural, biological and chemical agents
- relevant parts of the organisation's pest management plan and survey strategy
- legislative requirements relevant to weed control

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG302 Control plant pests, diseases and disorders

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to control plant pests, diseases and disorders, taking into consideration Integrated Pest Management options. The unit describes the skills and knowledge required to identify a range of pests, diseases and disorders and beneficial organisms, assess damage or threat to plants and select and apply pest and disease controls and timing of operations. It includes preparing and calibrating equipment, monitoring the effectiveness of controls and keeping records.

This unit applies to workers in plant-based enterprises or activities working under limited supervision from others with checking only related to overall progress. Workers may require limited organisation and have limited responsibility for the work of others.

Individuals operating in this field are required to hold current chemical handling certification and a first aid certificate. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assess pests and disease infestation	1.1 Assess the scope and size of the infestation 1.2 Identify and report or record plant pests, diseases and disorders, beneficial organisms and hosts 1.3 Determine thresholds of pest infestations tolerated by the client, market or environment from the Integrated Pest Management strategy
2. Plan the implementation of management measures	2.1 Select management measures from Integrated Pest Management strategy suitable for the infestation 2.2 Select management measures to minimise impact on non-target plant or animal species and to meet production or environmental objectives 2.3 Select tools, equipment and machinery for each work activity according to enterprise work procedures 2.4 Identify work health and safety hazards, assess risks and implement risk controls 2.5 Select, use and maintain personal protective equipment according to label or manufacturer instructions 2.6 Select management measures in full consideration of work health and safety and environmental implications and legislation
3. Implement management measures	3.1 Follow work health and safety procedures throughout management activities 3.2 Coordinate enterprise work team, contractors and Integrated Pest Management product suppliers in a sequential, timely and effective manner in consultation with the supervisor 3.3 Implement management measures according to the Integrated Pest Management standards or industry Code of Practice 3.4 Maintain a clean and safe work area throughout and on completion of each activity 3.5 Maintain records as required by legislation and enterprise guidelines
4. Monitor management methods	4.1 Monitor management measures to identify side effects to other plants, animals or external environment 4.2 Assess effectiveness of management methods in reference to specified industry, work health and safety and enterprise standards 4.3 Make adjustments to Integrated Pest Management methods where necessary to meet enterprise specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPMG302 Control plant pests, diseases and disorders

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate that they can:

- identify pests, diseases and disorders, beneficial organisms and host plants in target area
- assess damage or threat to plants
- select and apply pest and disease management options and determine timing of operations according to pest management plans, to maximise impact on target species and minimise risks to non-target plant and animal species in the area
- prepare and calibrate equipment
- monitor the effectiveness of pest and disease management methods
- keep records of pest and disease management activities to regulatory and enterprise standards
- follow of work health and safety procedures when carrying out pest and disease management activities
- apply appropriate environmental sustainability practices when planning and carrying out work

Knowledge Evidence

The candidate must explain:

- pest, disease and disorder and symptom recognition of host stress
- economic, aesthetic or environmental thresholds for a range of plant pests, diseases and disorders
- chemical, biological and cultural methods and treatments available to the enterprise within the parameters of an Integrated Pest Management program
- range and use of tools, equipment and machinery available to the enterprise for implementing the management measures

- range of site monitoring and analysis techniques that may be used to implement an Integrated Pest Management program
- implications of choice of plant pest and disease methods with site limitations, environmental implications, end market and production or environmental objectives for the site
- basic principles of Integrated Pest Management standards or industry Code of Practice
- work health and safety responsibilities for employees and employers
- correct use, maintenance and storage of personal protective equipment
- work health and safety and environmental legislative requirements including hazardous substances regulations

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC PMG304 Use firearms to humanely destroy animals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to destroy animals humanely using firearms. Shooting is a quick and effective means of humanely destroying animals and in some situations is the only practical method available in the field.

Shooting may be conducted on foot or with various vehicles. Techniques in shooting pest animals will depend on the type of animal that is being shot and whether the shooter is stationary or mobile. This unit is not applicable to using firearms from aircraft.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

Firearms licensing conditions apply to this unit. Specific approval should be sought through the relevant State or Territory Firearms licensing agency.

Appropriate firearms licences and training are also required for those involved in training and assessment against this unit.

Destruction of pest animals must comply with state animal cruelty legislation. In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for the shooting job	1.1 Map location and boundaries for the shoot in accordance with the pest management plan and monitoring program 1.2 Confirm location of habitats, habits and range of movement of target animal 1.3 Determine timing of the shoot based on the activity patterns of the target animal and estimate time required to complete the shoot 1.4 Identify hazards associated with the shoot 1.5 Identify environmental and personal and public safety risks associated with the shoot 1.6 Identify and use suitable personal protective equipment and warning signs required for the job
2. Prepare for the shooting job	2.1 Confirm anatomy and physical features identifying location of vulnerable organs of target animal 2.2 Take precautions to minimise hazards and environmental risks associated with the shoot 2.3 Select vehicles, equipment and materials intended for use and check for serviceability 2.4 Check firearm licences and permits are applicable to purpose and obtain new license/permit if necessary 2.5 Select firearm and ammunition types to comply with those recommended for the target animal 2.6 Check firearms, ammunition, and stowage for transportation meets licensing requirements 2.7 Check and prepare firearm and ammunition 2.8 Zero and test fire firearm 2.9 Stow firearm for transport making sure it is unloaded and in a safe mode
3. Shoot animals	3.1 Carry firearm safely with muzzle pointing in safe direction at all times 3.2 Load, discharge and unload firearm safely 3.3 Aim firearm at vulnerable site, on the target animal and kill using a single shot 3.4 Check each target animal to ensure it is dead prior to selecting the next target animal where possible 3.5 Destroy target animals that have not been killed cleanly in a

Element	Performance criteria
	humane manner 3.6 Handle carcasses that are required for research or commercial use carefully and in a way to minimise personal health and safety and biosecurity risks 3.7 Dispose of animal carcasses that are not required for research or other purposes according to enterprise procedures to minimise biosecurity or public safety and health risks
4. Clean and store equipment and material	4.1 Clean and store carcasses for research or commercial use 4.2 Clean and store equipment and materials 4.3 Clean, maintain and store firearms 4.4 Store ammunition safely 4.5 Report or record job completion

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCVPT203A Use firearms to humanely destroy animals

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPMG304 Use firearms to humanely destroy animals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- operate a firearm safely in accordance with statutory requirements
- zero and test fire the firearm safely at a range under supervision at a distance that is commensurate with the target animals to be destroyed
- stow the firearm safely for transport
- clean, maintain and store firearms safely and in accordance with statutory requirements
- check target animal is dead and euthanase immediately, if necessary, according to relevant animal welfare codes of practice
- use personal protective equipment to handle carcasses to prevent contracting zoonotic diseases
- apply work health and safety policies and procedures at all times
- apply biosecurity measures when handling, transporting or disposing of carcasses
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to find the pertinent information in the organisation's pest management plan
- the environmental hazards and risks associated with the shoot
- the safety hazards and risk management strategies associated with the shoot
- how to check and prepare the firearm and ammunition
- how to check a target animal that has been fired on to ensure it is dead
- anatomy and physical features and vulnerable sites, or humane points on target animal
- procedures for the safe handling of carcasses required for research or commercial use

- procedures for the safe disposal of animal carcasses not required for other purposes
- reporting and recording procedures required by the pest management plan
- location and boundaries for the shoot
- habitats, habits and range of movement of target animals
- personal protective equipment required for the shoot
- application of the 1996 National Firearms Agreement to the licensing, storage and use of firearms
- firearm and ammunition types recommended for the target animal
- State and territory gun control laws, acts and regulatory requirements relating to the use of firearms to humanely destroy animals
- the basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- prevention of cruelty to animals legislation applicable to destruction of animals
- basic requirements for biosecurity in the context of destruction of animals

Assessment Conditions

Assessment must involve the use of a firearm but can be undertaken using live animals, carcasses or simulated targets. Assessment must be conducted under field conditions. The assessment team must include assessors with firearms licences.

Assessment must comply with Animal Welfare Codes of Practice and Standard Operating Procedures.

Assessor must satisfy current standards for RTOs.

AHCPMG305 Survey pests

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to survey pest abundance by conducting ground counts, aerial counts or both.

Pests may be weeds, vertebrate or invertebrate pests or a combination of these.

Work may be conducted as part of an emergency response to an incursion or as part of routine surveillance. It must be conducted to comply with the organisation's pest management plan, survey strategy and monitoring program and in accordance with established standards and protocols.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to conduct survey	1.1 Access the organisation's pest management plan, survey strategy and monitoring program documents 1.2 Map location and boundaries for the count and obtain required permits 1.3 Work with key stakeholders to develop trust and effective working relationships 1.4 Identify natural areas and features 1.5 Confirm location of habitats and the range of movement of the target pest 1.6 Determine items of direct evidence of the pest to be counted and survey method 1.7 Determine time and duration of the count and notify relevant personnel 1.8 Identify safety hazards and take precautions to minimise risks associated with the selected survey method 1.9 Identify environmental risks and take precautions to minimise risks associated with the count 1.10 Check serviceability of resources required to complete the count
2. Conduct survey and record observations	2.1 Operate equipment appropriately 2.2 Conduct count within boundaries of specified location 2.3 Record observations of direct evidence of the target pest and report to supervisor 2.4 Clean and store equipment and materials 2.5 Apply animal welfare policies and procedures when conducting survey

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPMG305 Survey pests

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- organise and complete a pest survey according to the organisation's pest management plan and survey strategy
- recognise signs or evidence of common pest
- count, add and record observations
- operate equipment safely and in accordance with organisation workplace procedures
- clean and store the equipment at the conclusion of the job
- take appropriate safety precautions for all pest survey activities
- apply appropriate animal welfare practices in the context of own work
- use appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- survey techniques appropriate to the geography and type of pest being surveyed
- precautions to be taken when aerial observation is employed as a survey method
- the basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- relevant parts of the organisation's pest management plan and survey strategy
- survey techniques that may be used
- the types of permits that may be required
- range of pest species in pest survey plan
- pest behaviour and habitats including areas that have a high probability of infestation
- direct evidence of range of pests included in pest management plan

Assessment Conditions

Assessors must satisfy current standards for RTOs

AHCPMG306 Determine pest control techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select a pest control technique for a strategic approach to pest management.

Pests may be weeds, vertebrate or invertebrate pests or a combination of these.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess targeted pest	1.1 Identify the target pest, pest biology and lifecycles 1.2 Confirm the location and extent of the pest problem 1.3 Confirm target pest behaviour and movement patterns 1.4 Assess the impact of the pest on assets
2. Assess techniques	2.1 Identify purpose of control program and determine desired outcomes 2.2 Discuss with supervisor suitability of eradication, containment, reduction or a combination of these techniques, and to what degree control is required 2.3 Identify biosecurity risks associated with control methods 2.4 Determine legislative, economic or social constraints on pest control techniques 2.5 Identify non-target species and any constraints that they may impose 2.6 Determine whether urban areas are involved and their impact on the planning of control techniques
3. Plan the control	3.1 Source information on a variety of techniques applicable to the type of pest 3.2 Identify necessary permits, licenses or clearances required to carry out pest control activities 3.3 Assess the relative humaneness of pest control techniques, where target pests include animals 3.4 Determine control measures to address identified constraints 3.5 Identify safety hazards associated with control measures and apply relevant work health and safety policies and procedures to manage risks 3.6 Discuss techniques with supervisor to determine which technique, or combination of techniques, would best suit the situation to obtain the desired outcome, while minimising the risk to non-target species, in particular spray drift 3.7 Determine monitoring techniques to be used

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCPMG306 Determine pest control techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the impact of pests on assets
- identify the target pest
- determine the desired outcomes of pest control
- plan appropriate control techniques
- use a variety of monitoring techniques to determine pest numbers
- identify non-target species that may be at risk during a control program
- follow work health and safety policies and procedures when applying pest control techniques
- awareness of biosecurity in the context of own work
- use appropriate animal welfare practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- pest lifecycles and behaviours, including modes of dispersal, biology and reproduction
- the features of target and non-target species
- habitats of target and non-target pest animals
- impacts pest control activities can have on native species
- licenses, permits and clearances that may need to be obtained
- the impact nearby urban areas may have on pest control
- the impact pest control can have on nearby urban areas
- pest control techniques that may be appropriate for the context of work

- key conditions for the survival of pests and methods for eliminating or controlling those conditions
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice, where target pests are vertebrate animals
- how pests can impact assets, including environmental impacts
- what the acceptable limits are in relation to pest numbers
- the types of constraints that apply to pest control techniques
- how legislation regarding declared species applies to pest control

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG307 Apply animal trapping techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to trap and hold live animals and release or humanely destroy. Animals may be native animals, domestic animals, animals determined to be pests or feral animals.

Trapping techniques call for the use of a variety of equipment and may include the use of lures or baits.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

Some forms of traps are strictly regulated in some States and Territories in Australia. Specific determination should be sought through the relevant State or Territory authority.

Firearms may be required if trapped animals are to be killed. If this is appropriate, firearm licensing conditions will apply and specific determination should be sought through the relevant State or Territory.

Appropriate firearms licences may also be required for those involved in training and assessment against this unit.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for trapping	1.1 Identify purpose of animal capture and set objectives 1.2 Confirm the location and size of the area designated for trapping activities 1.3 Confirm target animal movement patterns, behaviour and lifecycles to determine trapping location and placement of equipment and appropriate timing of trapping activity 1.4 Identify potential non-target animals 1.5 Estimate time required to complete trapping 1.6 Identify and check vehicles, materials and equipment required for trapping 1.7 Select appropriate traps for target animal and the environment 1.8 Clean, maintain and prepare trapping equipment 1.9 Identify hazards associated with trapping and select appropriate personal protective equipment 1.10 Identify and manage environmental risks associated with trapping animals 1.11 Obtain relevant permissions to enter property 1.12 Determine precautions for minimising trapping of non-target animals
2. Place and set traps	2.1 Undertake site surveillance prior to setting traps 2.2 Select and prepare site to maximise opportunity for trapping target animals and minimise the chance of trapping non-target animals 2.3 Position, set and calibrate trapping equipment and check it for strength and security 2.4 Apply lures, decoys, baits or toxins as necessary 2.5 Camouflage traps as required 2.6 Apply precautions to prevent trapping of non-target animals 2.7 Set traps in accordance with legislative requirements and animal welfare codes of practice
3. Check and remove traps	3.1 Inspect traps at the required frequency 3.2 Identify trapped animals then release, humanely destroy or

Element	Performance criteria
	prepare for transport as required 3.3 Handle captured animals humanely and in accordance with animal welfare codes of practice 3.4 Transport animals from site, when required, in a safe and appropriate manner 3.5 Observe work health and safety procedures and public safety requirements prior to and during trapping activities 3.6 Release trap mechanism safely and remove trap 3.7 Restore trap-site to its prior condition
4. Record data	4.1 Use Global Positioning System (GPS) loggers 4.2 Use appropriate data sheets or other recording instruments to record details of trap sets and lures as well as target and non-target capture
5. Clean and store equipment and material	5.1 Clean and store carcasses for research or other purposes 5.2 Clean and store equipment and materials to workplace standards to minimise biosecurity risks 5.3 Record target and non-target kills
6. Report completion of work	6.1 Report results of trapping activities, including any incidents with animals

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPMG307 Apply animal trapping techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- humanely trap animals and release or destroy the animals as required, following Standard Operating Procedures
- identify target and non-target animals present in area
- check vehicles, equipment and materials for serviceability and clean equipment before starting and on completing the job
- select and prepare the trapping site and restore it on completion of the job
- position, set, calibrating and regularly checking trapping equipment
- apply lures or baits, if required
- select, use and store baits or toxins according to workplace procedures
- handle and euthanase captured animals in accordance with animal welfare guidelines
- summarise and present trapping data to supervisor
- clean and store equipment and carcasses using approved chemicals in accordance with Safety Data Sheets and enterprise procedures to minimise biosecurity risks to other animals
- apply work health and safety practices in the context of own work
- apply appropriate environmental sustainability practices in the context of own work
- apply appropriate animal welfare practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- the purpose for trapping the animal

- the target animal's range, movement patterns and behaviour and how to apply knowledge of these to selecting trapping location and equipment
- the reproductive cycle of the target animal to determine appropriate timing of trapping activities
- food preferences, both general and local, of target animals
- capture and kill points for target animals
- permissions that may be required to undertake trapping
- principles relating to property, stock and duty of care
- precautions that need to be taken to minimise trapping of non-target animals
- how to camouflage traps
- how to safely set off traps to render them inactive
- work health and safety procedures that relate to trapping animals
- recording and reporting requirements
- how to use decoys and lures
- how to prepare baits or toxins
- applicable State or Territory legislation on the use and storage of baits or toxins
- applicable legislation on the capture and handling of animals
- suitable traps and techniques for the target animal
- target animals and non-target native animals also found in the area
- suitable personal protective equipment
- transportation methods for captured animals

Assessment Conditions

Assessment must be conducted in a real work environment, under work conditions, setting traps for live animals.

If firearms are used to destroy animals then the assessment team must hold firearms licences.

Assessors must satisfy current standards for RTOs.

AHC PMG308 Implement pest management strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist in the implementation of a pest management plan.

Pests may be weeds, vertebrate or invertebrate pests or a combination of these.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the direction of others. They use discretion and judgement in the selection and use of available resources and provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for implementation	1.1 Identify and read the pest management plan and discuss requirements with supervisor 1.2 Identify legislative requirements appropriate to the plan and determine whether declared species are involved 1.3 Identify the basic concepts of the organisation's pest management plan and how these impact the plan 1.4 Identify key stakeholders and their attitudes towards pest management plan 1.5 Select and prepare vehicles suitable to the activity 1.6 Select and prepare required materials, tools, machinery and equipment 1.7 Follow work health and safety policies and procedures 1.8 Use and maintain appropriate personal protective equipment 1.9 Identify budgetary or financial constraints for implementing the plan and tailor activities appropriately
2. Assess targeted pest	2.1 Identify the targeted pest and determine pest characteristics, including movement paths, habitat use and recolonisation ability 2.2 Identify pest management control method, or combination of methods to be used 2.3 Identify pest status in the context of location, land use, legislative requirements, benefits and damage caused 2.4 Assess target area terrain and hazards and environmental risks associated with implementing the plan, including the potential for the plan to clash with local land management practices
3. Implement the plan	3.1 Use safeguards to ensure that the target pest is controlled and all other species remain unharmed 3.2 Assess and control environmental impacts and use biosecurity and sustainability principles outlined in the plan 3.3 Use appropriate application processes or techniques for long term outcomes 3.4 Apply applicable Federal and State legislation relating to animal welfare, property, stock and duty of care 3.5 Identify relevant monitoring techniques and adapt them to obtain the data necessary to assess the effectiveness of the plan 3.6 Use follow-up techniques, where required, to minimise possibility of reinfestation
4. Complete activities	4.1 Dispose of carcasses or weeds according to enterprise procedures and legislative requirements 4.2 Review outcomes and discuss with supervisor to determine whether there were any obvious failures in implementing the plan 4.3 Complete required documentation and make recommendations to

Element	Performance criteria
	supervisor on issues or improvements 4.4 Clean, store and maintain equipment, tools and machinery

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPMG308 Implement pest management strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out the implementation of the plan to organisational standards and in accordance with relevant legislative requirements
- apply the appropriate techniques to achieve long term outcomes
- assist with the identification of key stakeholders
- apply standard monitoring techniques
- follow work health and safety policies and procedures
- apply biosecurity measures in the context of own work
- apply appropriate animal welfare practices in the context of own work
- use appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate legislative requirements with regards to declared species
- basic sustainability principles, including the ecological role provided by some pests
- Federal and State legislation relating to property, animal welfare and duty of care
- risk management approaches
- stakeholder engagement and consultation strategies
- pest characteristics and how they influence pest management, particularly with regard to pest populations and the ability of pests to rapidly recolonise
- pest management control methods and techniques and how they fit into an integrated strategy
- standard monitoring techniques

- pest status in the context of location, land use, benefits and damage caused
- types of follow up techniques that may be required to minimise the possibility of reinfestation
- information sources used for identifying and managing pests
- animal welfare requirements, if implementing vertebrate pest controls
- relevant legislation regarding the destruction, movement and propagation of a declared species
- concepts of the strategic approach to Integrated Pest Management
- biosecurity principles, including prevention of pest spread
- requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG309 Apply pest animal control techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply control techniques for pest animals, in compliance with a pest management plan.

Control techniques may involve the use of vertebrate pesticides, traps, cages, lures and firearms with the animal humanely destroyed in accordance with industry guidelines or protocols.

This unit applies to individuals who work within a pest management program, under broad direction and take responsibility for their own work.

Some forms of traps are strictly regulated in some States and Territories in Australia. Specific determination should be sought through the relevant State or Territory authority.

Firearm licensing conditions will apply if firearms are used for the destruction of animals. Specific determination should be sought through the relevant State or Territory. In this case, appropriate firearms licences are also required for those involved in training and assessment of this unit.

Pest animal control techniques must comply with state animal cruelty legislation. In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for control	1.1 Identify control techniques to be used in the pest management plan 1.2 Identify and minimise risks associated with the control technique and apply appropriate precautions including personal protective equipment 1.3 Identify hazards and minimise risks that could adversely impact on the environment including public health during the control, and apply appropriate precautions 1.4 Select and check materials, equipment and vehicles required 1.5 Clean, calibrate and prepare equipment 1.6 Identify environmental and welfare risks associated with animals and determine precautions to minimise these risks. 1.7 Obtain relevant permissions to enter property and follow appropriate notification plan for all stakeholders 1.8 Prepare timeline for pest control operation according to industry best practise or protocols
2. Implement control	2.1 Identify target animal sign 2.2 Select site to maximise impact of control methods on target animals and minimise the impact on non-target animals. 2.3 Confirm predetermined control technique is appropriate for target pest, site, current conditions and timing of control 2.4 Follow work health and safety procedures for carrying out control activities 2.5 Place required signage and apply required notifications 2.6 Follow control timelines for control technique 2.7 Apply precautions to prevent injury or harm to humans and non-target animals 2.8 Use appropriate data sheets or other recording instruments to record details 2.9 Inspect site at the required times and frequency relevant for local conditions 2.10 Humanely destroy animals using firearms, where necessary

Element	Performance criteria
3. Complete the control work	3.1 Ensure all equipment, baited or destroyed animals and unused baits are removed and accounted for 3.2 Restore site to its prior condition 3.3 Clean, maintain and store equipment and materials 3.4 Report results of control activities, including any incidents with non-target animals

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCPMG309 Apply pest animal control techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify target and non-target animals
- check vehicles, select appropriate equipment and materials for serviceability and clean equipment before starting and on completing the job
- select and prepare the control site and restore it on completion of the job
- position, set, calibrate and regularly check equipment
- if firearms are required, select appropriateness of firearm and calibre and check its accuracy
- identify lures or baits that may be required
- prepare baits and poisons as required
- identify appropriate location for controls
- account for all, and remove controls within specified timeframes
- record details of control activities to comply with enterprise and legislative requirements
- summarise and present control data to supervisor
- comply with all relevant legislative requirements
- apply work health and safety practices in the context of own work
- apply appropriate animal welfare and environmental best practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- requirements for ensuring the welfare of animals described in the relevant Codes of Practice and Standard Operating Procedures
- the purpose and scope of the animal control program
- suitable control techniques and timing of control activities based on:

- the target animal's range, movement patterns, behaviour and habitats
- the reproductive cycle of the target animal
- target animal behaviours and biology relevant to control technique
- food preferences, both general and local, of target animals
- scent station and other animal tracks and traces
- target pests and non-target native animals found in the area
- the environment and terrain of the target area
- appropriate calibre of firearm required to humanely destroy target animals
- humane destruction procedures, including capture and kill points for target animals
- permissions and protocols that may be required
- precautions that need to be taken to minimise harm to non-target animals
- work health and safety procedures that relate to animal control activities
- recording and reporting requirements
- procedures for use and recording of baits and poisons, if used
- application of relevant legislation to pest animal control activities
- suitable personal protective equipment
- transportation methods for captured animals, where this forms part of the control activities

Assessment Conditions

If firearms are used to destroy animals then the assessment team must hold firearms licences.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCPMG310 Prepare, monitor and maintain biological agents

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare and propagate biological agents according to laboratory policies and procedures
- transfer cultures to growing environment according to laboratory policies and procedures
- harvest and store biological agents according to laboratory policies and procedures
- monitor and keep records of observations and details of any abnormalities according to laboratory policies and procedures
- apply work health and safety policies and procedures in the context of own work
- apply appropriate sustainability and biosecurity practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- laboratory procedures
- the range of media available for culture maintenance
- culture and media preparation techniques
- available biological control agents and their use
- the range of pest species that are to be targeted with biological agents
- biosecurity and quarantine requirements

Assessment Conditions

Candidates must have access to bioagent media and cultures, appropriate equipment and resources for the purpose of assessment.

Assessors must satisfy current standards for RTOs.

AHCPMG311 Use firearms for pest control activities from aircraft

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct pest control activities from the air using firearms.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

All work must be carried out to comply with the relevant statutory requirements.

Workers operating in this field are required to hold a first aid certificate. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Firearms licensing conditions apply to this unit. Specific determination should be sought through the relevant State or Territory agency.

Appropriate firearms licences are also required for those involved in training and assessment against this unit.

Approval to carry and discharge firearms from aircraft must be gained from the Civil Aviation Safety Authority (CASA). The holder of an Air Operator's Certificate is responsible for gaining this approval and personnel involved must ensure such an approval is issued and comply with any conditions specified in the approval documentation.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Undertake pre-flight procedures	1.1 Confirm location and boundaries for the activities with pilot 1.2 Obtain appropriate approvals and permits to conduct pest control activity 1.3 Comply with conditions of CASA approval 1.4 Check time and duration of flight and notify relevant personnel 1.5 Confirm flight plans and search and rescue operations with the pilot and ground crew 1.6 Check on-board emergency equipment with pilot 1.7 Check emergency landing procedures with pilot 1.8 Check landing-site requirements 1.9 Confirm intent to approach or leave the aircraft with pilot 1.10 Approach aircraft in the recommended safe manner 1.11 Check functioning of firearms including sighting in
2. Conduct activities from aircraft	2.1 Stow equipment safely on aircraft 2.2 Wear harnesses and helmet, as required, during pest control activities 2.3 Plot route and location of activities accurately on property, local or regional map 2.4 Carry out pest control activity according to legislative requirements, enterprise procedures and pilot or supervisor instructions, if applicable 2.5 Ensure animal is humanely destroyed 2.6 Observe and record pest numbers if applicable
3. Complete work	3.1 Clean and store equipment and materials 3.2 Dispose of waste and debris 3.3 Document and report activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCVPT304A Conduct vertebrate pest activities from aircraft

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPMG311 Use firearms for pest control activities from aircraft

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- safely use firearms to shoot targets from a platform, then from an aircraft at animals
- apply air safety principles
- safely store firearms in an aircraft
- shoot pest animals humanely
- apply work health and safety practices
- ensure all animals are humanely destroyed according to Animal Welfare Codes of Practice and Standard Operating Procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- requirements for ensuring the welfare of animals described in the relevant Codes of Practice relating to the activity being undertaken
- how to read maps and plot locations
- air safety principles and emergency procedures appropriate to firearms
- approvals required for carrying firearms airside
- relevant work health and safety procedures as set out in the organisation's workplace procedures
- relevant environmental, animal welfare prevention of cruelty to animals, and pest control legislation
- appropriate personal protective equipment for role

Assessment Conditions

Assessment must comply with Animal Welfare Codes of Practice and Standard Operating Procedures.

The assessment team must include assessors with firearms licences and appropriate experience in using firearms from aircraft for pest control.

Assessors must satisfy current standards for RTOs.

AHCPMG409 Implement a pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement pest management plans.

Pests may be weeds, vertebrate or invertebrate pests or a combination of these.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgment in the selection, allocation and use of available resources.

Individuals operating in this field may be required to hold current chemical handling certification and a first aid certificate. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and allocate resources for the pest management plan	1.1 Consult with management on the prepared pest management plan and discuss timelines, milestones and objectives 1.2 Conduct a site inspection 1.3 Consult with stakeholders and discuss the pest management plan with a view to gaining cooperation from all involved and provide advice on pest management activities 1.4 Identify budgetary restraints and allocated resources 1.5 Identify human health and environmental and biosecurity risks 1.6 Allocate personnel with relevant skills and competency to complete required activities 1.7 Apply relevant work health and safety standards, other Federal, State/Territory and local legislation and regulations relevant to the allocation and procurement of human and physical resources 1.8 Procure machinery, equipment, tools and materials identified in the plan
2. Brief personnel on pest management plan activities	2.1 Inform personnel of the requirements of the pest management plan 2.2 Inform personnel of land owner or manager expectations and reporting and recording requirements 2.3 Advise personnel of work health and safety standards and other statutory and regulatory requirements to be applied when carrying out required activities
3. Implement the pest management plan	3.1 Check machinery, equipment, tools and materials for serviceability 3.2 Check personal protective equipment and clothing used or worn by personnel for compliance 3.3 Manage the pest control techniques used 3.4 Monitor procedures and skills applied by personnel for compliance with work health and safety standards, animal welfare guidelines if required, chemical use if required, and environmental sustainability guidelines 3.5 Provide feedback, advice and coaching to personnel, as required, to improve or correct processes and skills
4. Coordinate contingency management activities	4.1 Reschedule activities that are not carried out due to accident, injuries, other incident or unfavourable conditions within the monthly, weekly or daily work plans 4.2 Notify personnel, management and other relevant stakeholders of

Element	Performance criteria
	changes to the schedule
5. Report progress in relation to pest management plan	5.1 Assess reports and records supplied by personnel to determine whether progress is in line with the pest management plan 5.2 Document and compile reports and records 5.3 Provide regular progress reports to management and other relevant stakeholders

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit has resulted from the merging of AHCVP302A Implement vertebrate pest control program and AHCPMG405A Implement pest management action plans and is not equivalent to either of these units.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPMG409 Implement a pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate they can use a range of control techniques. At least one control technique demonstrated must include the use of a vertebrate poison.

The candidate must provide evidence that they can:

- manage the implementation of a pest management plan
- supervise others to meet work health and safety, statutory and regulatory requirements in their work
- check machinery, equipment tools and materials to manufacturer and statutory requirements
- implement monitoring procedures
- communicate with stakeholders and provide advice on pest management activities
- conduct a site inspection
- instruct and supervise others to carry out pest management work according to the pest management plan
- identify and support workers who need extra training, coaching or feedback to meet safety, environmental and organisational standards when undertaking pest management work
- provide clear instructions and explanations to workers to ensure work meets organisational standards
- manage costs of pest management plan to meet budget requirements
- manage work health and safety risks according to policies and procedures
- apply biosecurity measures in the context of own work
- monitor the application of animal welfare practices
- monitor the application of appropriate sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the application of the organisation's Integrated Pest Management strategy in the target area
- factors affecting the selection of pest control methods and techniques, including:
 - pest biology and lifecycle
 - potential diseases and toxicity
 - principles of sustainability
 - herbicide resistance and the alternatives that are available
 - pest status in the context of location, land use, benefits and damage caused
- contingency management principles
- risk assessment and management processes
- pest management control programs and how to use them in an integrated manner
- the legal responsibilities of a landholder
- relevant local, regional, State and national pest management strategies
- Federal, State or Territory legislation and regulations relating to pest management activities
- key concepts in the Integrated Pest Management strategy
- in broad terms, the concepts and underpinning principles of the strategic approach to invasive pest management and how to manage damage caused by pests
- in broad terms, the importance of monitoring and evaluating the effectiveness of invasive pest management and how to plan and implement an appropriate monitoring program for a pest management plan
- common causes of failure in pest management
- requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- relevant environmental and pesticides legislation as they apply to the workplace

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG410 Implement the pest monitoring and evaluation plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement the pest monitoring plan and evaluate and report on performance of pest management.

Pests may be weeds, vertebrate or invertebrate pests or a combination of these.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain and collate all	1.1 Determine the objectives of the pest monitoring and evaluation

Element	Performance criteria
available data	plan 1.2 Collate data on pest numbers, economic and environmental impacts of pests and pest management plan operating costs 1.3 Consult with stakeholders about the pest management plan 1.4 Identify pest signs and confirm if there is presence of recent pest activity around the site 1.5 Identify signs of previous control activity
2. Monitor the pest management plan	2.1 Determine monitoring points in the monitoring plan 2.2 Measure response to the control procedures used 2.3 Confirm that work health and safety requirements are being followed 2.4 Confirm that environmental requirements are being followed 2.5 Record any corrective actions required, processes used and outcomes achieved and report to management
3. Evaluate data against objectives and performance criteria	3.1 Compare data with objectives and performance criteria in the monitoring plan 3.2 Compare costs with budget 3.3 Document costs and benefits
4. Compile a report of the evaluation	4.1 Isolate and examine indicators of good and poor performance 4.2 Use clearly stated conclusions, supported by data, in relation to changes in pest abundance and impacts 4.3 Compile a report that includes discussion of data analysis results
5. Recommend modifications	5.1 Make recommendations to modify or eliminate causes of poor performance or to enhance current performance 5.2 Make recommendations to reduce impacts on land management and production processes 5.3 Provide recommendations to management in the required format

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit has resulted from the merging of AHCPMG407A Monitor and evaluate the local pest management action plan, AHCPMG408A Assess and monitor weed, pest and/or disease control programs and AHCPMG505A Evaluate the pest management strategy and is not equivalent to any of these units.

Assessment Requirements for AHCPMG410 Implement the pest monitoring and evaluation plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement a pest monitoring and evaluation plan to organisational requirements
- collate data as required in the pest monitoring and evaluation plan
- conduct a site inspection
- consult with stakeholders about the plan
- measure responses to the organisation's pest control procedures
- analyse data against objectives and performance criteria
- produce a report on the results of monitoring operations and a report with evaluation results
- apply all monitoring techniques stipulated in the monitoring and evaluation plan
- apply work health and safety policies and procedures in all monitoring activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to compare data with objectives and performance criteria
- how to compare actual costs with budgeted costs
- environmental and economic impacts of pests on land management and production processes
- the organisation's pest management plan
- monitoring and evaluation principles and how they work in the pest management plan
- land management and production purposes
- range of pests identified in the pest management plan, their lifecycles, threshold levels and the effects of control methods upon them

- relevant local, regional, State or Territory and national pest management strategies
- Federal, State or Territory legislation and regulations relating to pest management activities
- principles of integrated pest management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCPMG411 Ensure compliance with pest legislation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed meeting with a stakeholder. All work must be carried out in accordance with relevant Federal, State or Territory legislation regarding pest management activities and the destruction and movement of declared pests.

The candidate must provide evidence that they can:

- identify a non-compliance issue
- provide advice to stakeholders of a non-compliance issue according to authority guidelines and in a manner and language appropriate to the situation
- provide advice and support to stakeholder to manage the issue in accordance with authority guidelines
- follow right of entry requirements
- investigate and collect evidence of breaches
- report findings of non-compliance and compliance according to legislative requirements
- issue relevant notices
- complete recording and reporting requirements to authority and workplace standards

Knowledge Evidence

The candidate must demonstrate a knowledge of:

- relevant Federal, State, Territory and local government legislation regarding pest management and the destruction and movement of declared species
- the legislative status of particular pests and how to identify whether a pest is a declared species

- the types of breaches that generally occur in the locality and the appropriate control options
- conflict avoidance and resolution techniques
- property owners' rights
- delegations under the relevant Acts and Certificates of Authority
- control measures appropriate to the pests and environment in the area

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG412 Develop a pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a pest management plan. It covers the process of identifying the activities required to meet the objectives of the organisation and the coordination of human and physical resources in order to achieve those objectives.

Pests may be weeds, vertebrate or invertebrate pests or a combination of these. The pest problem may be in a local or broader regional area.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine goals of the plan	1.1 Determine scope of the plan 1.2 Conduct and document consultation with stakeholders to determine goals 1.3 Determine realistic time periods to allow for the achievement of plan
2. Set specific objectives for the pest management plan	2.1 Define and document objectives to be achieved in consultation with stakeholders 2.2 Define roles and responsibilities of stakeholders in delivering objectives
3. Identify activities required to achieve specific objectives	3.1 Determine and document activities required to achieve objectives by proposed deadlines in consultation with stakeholders 3.2 Select and schedule activities according to critical control points in the target pests' life cycle and the land management and production activity cycles in accordance with Animal Welfare Codes of Practice 3.3 Conduct risk management for community, environment, production and work health and safety 3.4 Develop contingency plans for identified risks and external influences 3.5 Determine monitoring methods and procedures 3.6 Determine control methods relevant to the plan 3.7 Identify site clean-up requirements 3.8 Identify biosecurity issues and prepare contingency plans
4. Estimate resources required to complete required activities	4.1 Determine human and physical resources required for plan 4.2 Estimate cost of plan
5. Finalise plan	5.1 Prioritise activities in plan 5.2 Document and present plan to stakeholders for approval

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPMG412 Develop a pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a pest management plan that is guided by local, State or Territory and Federal strategies and the defined pest problem, in consultation with stakeholders
- scope geographical area, landscape and land uses within area and stakeholders
- develop specific, measurable, achievable, realistic and time-based objectives
- estimate costs of pest management methods appropriate to the defined pest problem
- prioritise activities according to budgetary constraints
- incorporate work health and safety policies and procedures into pest management plan
- apply appropriate biosecurity measures to the plan
- address animal welfare practices in the plan
- apply appropriate sustainability practices in the plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- project planning and management processes
- how to identify activities required to achieve specific objectives
- factors that impact on selection of pest management activities, including:
 - pest behaviour
 - pest population dynamics and economic and environmental thresholds
 - target pest biology and lifecycles
 - potential diseases or toxicity risks
 - relevant local, regional, State or Territory and national pest management strategies
 - the principles that underpin the strategic approach to managing pests

- land management and production processes of targeted area
- Federal, State or Territory legislation and regulations relating to pest management activities
- chemical, biological, physical and habitat control techniques for pest management
- pest control methods and techniques
- requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG413 Define the pest problem

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required apply a strategic pest management approach to define a pest problem.

Pests may be weeds, vertebrate or invertebrate pests or a combination of all three. The pest problem may be in a local or broader regional area.

This unit applies to individuals who take personal responsibility for their own work. They exercise autonomy in undertaking complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Establish the background to the target pest problem	1.1 Determine landscape and land use within target area 1.2 Establish appropriate consultation with stakeholders in affected area to identify and record their knowledge, concerns and constraints, as part of a program to underpin the planning for the management of the target pest 1.3 Identify desired environmental management and production outcomes 1.4 Collect and record information about management or production processes that relate to the pest problem 1.5 Identify non-target species populations in target area
2. Analyse the target pest problem in the area	2.1 Establish and document the stakeholder's understanding of the distribution of the target pest within the affected area 2.2 Confirm target pest population, damage, and distribution data obtained from stakeholders, through analysis of other sources of information 2.3 Identify factors, particularly environmental and pest biology, which may influence the target pest population and distribution within the area 2.4 Document the target pest lifecycle, identifying optimum times, locations and behaviours that may impact on the effectiveness of the management program 2.5 Identify non-target species populations and distribution in the area 2.6 Identify risks and benefits to non-target species, environmental, local ecology and production that may be at risk due to the impact of the pest or pest control activities, including possible steps within the management program to minimise or eliminate any adverse impacts on these species 2.7 Identify potential ecological role of target pest in area 2.8 Define potential risks relating to exotic disease or toxicity
3. Determine critical control points for management of the target pest problem	3.1 Identify periods of greatest risk as a result of the impact of the target pest or the proposed management program 3.2 Identify periods of significant vulnerability during target pest lifecycle 3.3 Determine appropriate time period for pest management activity
4. Define and document the impacts of the target pest	4.1 Estimate economic losses and environmental impacts of the pest presence 4.2 Conduct a cost-benefit analysis of managing pest 4.3 Prepare a report on outcomes of investigation for stakeholders 4.4 Determine whether the pest problem warrants the need for a pest management plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit has resulted from the merging of AHCPMG401A Define the pest problem in a local area and AHCPMG502A Define the pest problem in a regional or broader context and is not equivalent to either of these units.

Assessment Requirements for AHCPMG413 Define the pest problem

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- produce a written report that details the pest problem in a defined area
- identify relevant stakeholders
- define the pest problem in consultation with stakeholders
- determine the target pest population and distribution and factors impacting population and distribution
- determine non-target species populations and distribution in area
- identify appropriate times for pest control activities
- undertake cost-benefit analysis of pest management
- conduct site inspections and consult with relevant stakeholders
- apply animal welfare considerations to assessment of pest problem
- identify environmental impacts of pest presence and pest management activity

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the environment, particularly relevant land use, land management and production processes
- behaviour of target pests, particularly those behaviours that impact pest susceptibility to being effectively managed
- Animal Welfare Codes of Practice and Standard Operating Procedures
- pest biology and lifecycles of target pests
- land management and production processes of targeted area
- ecology of targeted area

- economic and environmental thresholds relevant to proposed management approaches
- performance criteria for measuring land management and production outcomes
- techniques used to validate the target pest population and distribution data supplied by stakeholders and how to obtain other relevant data
- how to measure or estimate economic losses and environmental impacts resulting from pest presence
- potential ecological role some pests provide
- potential disease or toxicity risks
- relevant parts of local, regional, State or Territory and national pest management strategies
- target pest biology and lifecycles
- principles that underpin the strategic approach to managing pests
- Federal, State or Territory legislation regulations relating to environmental management, private and public property, stock and duty of care
- factors that influence pest population and distribution
- periods of vulnerability in the lifecycle of pests
- critical control points for management of pest problem
- range of pests, non-target species, plant pests and diseases relevant to the targeted area

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -

AHCPMG414 Apply predator trapping techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to effectively use leg hold traps to capture predator species, to release the animal unharmed as part of research programs or to humanely euthanase in accordance with pest management programs.

This unit primarily deals with the use of leg or foothold traps to capture predator pest species including dogs, foxes and cats. Animals may be native animals, domestic animals, animals determined to be pests or feral animals. Trapping techniques call for the use of a variety of equipment and may include the use of lures or attractants baits.

Trapping must be carried out in accordance with an approved pest management plan or research project plan.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

Some forms of traps are strictly regulated in some States and Territories in Australia. Specific determination should be sought through the relevant State or Territory authority.

Where feral animals are trapped they may need to be euthanased with a firearm. Firearms licensing conditions apply to this unit, in particular the use of either Cat A, B or C firearms. Specific approval should be sought through the relevant State or Territory Firearms licensing agency.

Appropriate firearms licences and training are also required for those involved in training and assessment against this unit.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for trapping	1.1 Identify purpose of animal capture and set objectives 1.2 Confirm the location and extent of the pest problem 1.3 Confirm target animal movement patterns and behaviour to determine trapping location and placement of equipment 1.4 Identify non-target animals present in the area 1.5 Estimate time required to complete trapping 1.6 Identify and check vehicles, materials and equipment required for trapping 1.7 Clean and maintain trapping equipment and prepare traps for trapping 1.8 Identify hazards associated with trapping and select appropriate personal protective equipment 1.9 Identify environmental risks associated with trapping animals 1.10 Determine correct protocols or requirements for entering and working on private and public land 1.11 Obtain relevant permissions and permits to enter property 1.12 Identify necessary precautions for minimising trapping of non-target animals 1.13 Tune, modify and prepare traps in working order to minimise non-target capture
2. Place and set traps	2.1 Undertake site surveillance prior to setting traps 2.2 Identify and interpret signs of target animal 2.3 Select and prepare trap site to maximise opportunity for trapping target animals

Element	Performance criteria
	2.4 Position, set and calibrate trapping equipment and check it for strength and security 2.5 Apply lures, decoys or baits and toxins as required 2.6 Camouflage traps as required 2.7 Apply precautions to prevent trapping of non-target animals
3. Check and remove traps	3.1 Inspect traps at the required frequency 3.2 Identify trapped animals then release, destroy or prepare for transport as required 3.3 Handle captured animals humanely according to animal welfare Codes of Practice 3.4 Transport animals from site, when required, in a safe and appropriate manner 3.5 Observe work health and safety procedures and public safety requirements prior to and during trapping activities 3.6 Release trap mechanism safely and remove trap 3.7 Restore trap-site to its prior condition
4. Record data	4.1 Record details of trap sets and lures as well as target and non-target capture 4.2 Report results of trapping activities, including any incidents with animals 4.3 Report trapping results in relation to approved management plan 4.4 Record trap locations and capture using Global Positioning System (GPS) device, approved software or maps, where required
5. Clean and store equipment and material	5.1 Remove, retain or dispose of carcasses as required 5.2 Clean and store and maintain equipment and materials

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- humanely trap animals and release or destroy the animals as required
- identify target and non-target animals in the field
- check vehicles, equipment and materials for serviceability and clean equipment before starting and on completing the job
- select and prepare the trapping site and restore it on completion of the job
- position, set, calibrate and regularly check trapping equipment
- manufacture and apply lures or attractants, if required
- handle and euthanase captured animals in accordance with animal welfare guidelines
- identify signs of target animals, using scent stations and other animal tracks and traces
- summarise and present trapping data to supervisor
- use appropriate data sheets or other recording instruments to record details of trap sets and lures as well as target and non-target capture
- apply work health and safety practices in the context of own work
- apply appropriate animal welfare practices in trapping and handling trapped animals

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice and Standard Operating Procedures
- the purpose of the animal capture
- the target animal's range, movement patterns and behaviour and how to apply knowledge of these to selecting trapping location and equipment

- Factors affecting choices around equipment and resources and timing of trapping activities, including:
 - the reproductive cycle of the target animal
 - food preferences, both general and local, of target animals
 - biology of non-target animals that may be impacted by trapping program in the area
 - permissions and permits that may be required
 - suitable traps for the target animal
 - precautions that need to be taken to minimise trapping non-target animals
- capture and humane killing methods for target animals
- principles relating to property, stock and duty of care
- how to camouflage traps
- how to safely set off traps to render them inactive
- work health and safety procedures that relate to trapping animals
- recording and reporting requirements
- how to use decoys and lures
- how to prepare toxins
- applicable State or Territory legislation on the use and storage of toxins
- applicable legislation on the capture and handling of pest animals
- suitable personal protective equipment
- transportation methods for captured animals

Assessment Conditions

Assessment must be conducted in a real work environment trapping live animals.

The assessment team must include assessors with firearms licences.

Assessors must satisfy current standards for RTOs.

AHCPMG506 Manage the implementation of legislation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage the implementation of legislation and provide support and advice to landholders to ensure compliance within organisational guidelines or legislative requirements.

This unit relates to management of pests, including weeds, vertebrate or invertebrate pests or a combination of these.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse information and exercise judgement to complete a range of advanced skilled activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Develop procedures to identify infestations and locations	1.1 Analyse and interpret pest legislation 1.2 Develop procedures to identify land ownership, and responsibilities of all parties, in accordance with legislation 1.3 Develop procedures to contact landowners, and notify them of infestation and control requirements, consistent with organisational and regulatory guidelines 1.4 Confirm that record-keeping documents meet regulatory guidelines 1.5 Develop and implement procedures for serving notices 1.6 Develop and implement guidelines on collecting evidence and reporting findings 1.7 Establish organisational policy to provide assistance and advice to landholders in implementing pest management plans
2. Administer the implementation of legislation	2.1 Interpret, analyse and evaluate existing policy and provide recommendations 2.2 Determine need for legal action 2.3 Explain, to relevant workers, the policies dealing with right of entry and ensure that workers can adequately communicate these policies to landowners 2.4 Confirm that monitoring program identifies infestations that contravene existing legislation 2.5 Issue and serve penalty notices when required 2.6 Provide pest management advice to landholders 2.7 Collate evidence and findings for presentation in court or to legal representatives 2.8 Prepare ministerial briefs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPMG506A Manage the implementation of legislation.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPMG506 Manage the implementation of legislation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate that they can:

- develop procedures to identify infestations in accordance with relevant legislation
- interact with landholders to explain the ramifications of legislation
- provide pest management advice to landholders which is consistent with organisational guidelines and legislative requirements
- explain policies detailing right of entry to relevant workers
- if required, serve penalty notices
- collate evidence and findings for presentation in a court or to legal representatives
- write ministerial briefs and responses to correspondence

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Commonwealth and State/Territory legislation and regulation relevant to pest management
- relevant legislation regarding identification, destruction, movement, and propagation of declared species
- legislation relating to gathering and presenting evidence
- appropriate record-keeping systems
- environmental protection processes
- land management and production principles
- policy and procedure development techniques
- how to present evidence for court proceedings
- principles that underpin a strategic approach to managing pests

- pest control treatments relating to pests dealt with under legislation
- monitoring points in the pest management plan and evidence of infestations
- potential diseases and toxicity
- relevant local, regional, State/Territory and national pest management strategies

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG507 Develop a regional pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a pest management plan that applies to a large or regional level. It also describes the skills and knowledge required to gain agreement and commitment from stakeholders to implement the plan.

Pest management plans are used by land managers who practice sustainable land management principles and require a collaborative approach with neighbouring landholders.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in specific technical areas, are able to analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine goals of the plan	1.1 Determine scope of the plan 1.2 Determine the need for, and establish a steering committee, where necessary 1.3 Determine consultation requirements 1.4 Conduct and document consultation with stakeholders to determine goals 1.5 Assess and document options for controlling pest populations, changing land management or production practices, in terms of economic factors, technical difficulty, practical feasibility, and social and environmental acceptability
2. Set specific objectives for the pest management plan	2.1 Define and document objectives to be achieved in consultation with stakeholders 2.2 Define roles and responsibilities of stakeholders in delivering objectives
3. Identify activities required to achieve specific objectives	3.1 Determine and document activities required to achieve objectives in consultation with stakeholders 3.2 Prioritise activities and seek commitment from relevant stakeholders, where relevant 3.3 Conduct risk management for community, environment, work health and safety and production 3.4 Ensure activities align with pest management plan, environmental sustainability policies and biosecurity plans or legislation 3.5 Determine monitoring, evaluation and reporting methods
4. Determine performance criteria for objectives	4.1 Determine measurable performance criteria in terms of target pest population levels, economic impacts and environmental impacts
5. Publish the plan	5.1 Check the plan meets all biosecurity, legislative and national and State or Territory strategic policies 5.2 Submit draft plan to stakeholders for review 5.3 Finalise plan and seek endorsement by key stakeholders 5.4 Publish and distribute plan according to organisational requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit has resulted from the merging of AHCPMG402A Develop a pest management action plan within a local area and AHCPMG503A Develop a strategy for the management of target pests and is not equivalent to either of these units.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPMG507 Develop a regional pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- produce a pest management plan that contains objectives and management options which comply with relevant legislation and best practice principles of pest management
- consult with stakeholders to reach agreed upon outcomes from identified objectives
- scope geographical area, landscape and land uses within area and with stakeholders
- develop pest management plan according to defined pest problem
- align pest management plan to biosecurity plans or legislation
- develop pest management plan in accordance with sustainable land use principles, economic feasibility, environmental acceptability and statutory requirements for pest control
- develop, evaluate and document all management options to control, eradicate or prevent pest populations
- achieve approval of the plan by key stakeholders
- conduct risk assessments and cost-benefit analyses of the range of management options available in order to select the best option for the specific context
- apply work health and safety policies and procedures in the context of own work
- include appropriate animal welfare Code of Practice and Standard Operating Procedures in the plan
- apply appropriate sustainability practices in the plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- planning techniques

- concepts of the strategic approach to pest management, the importance of monitoring and the effectiveness of management evaluation
- relevant local, regional, State/Territory and national pest management strategies
- Federal, State or Territory legislation and regulations relating to pest management activities
- principles of integrated pest management
- types of monitoring technology available
- land use processes, ecological systems and production systems
- pest management options and strategies
- techniques used to validate target pest population and distribution data supplied by stakeholders, and methods of obtaining other relevant data
- how to measure or estimate economic losses and environmental impacts from pest presence
- Federal and State or Territory legislation and regulations relating to property, stock and duty of care
- target pest biology and lifecycles
- potential diseases or toxicity risks
- pest population dynamics and economic and environmental thresholds
- wildlife issues and how to minimise risks to non-target species as well as deal with pest behaviour
- environmental protection legislation
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG508 Develop a system to monitor and evaluate the pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a pest monitoring and evaluation program.

Pests may be weeds, vertebrate or invertebrate pests or a combination of these.

The pest problem may be in a local or broader regional area.

This unit applies to individuals who take personal responsibility, and exercise autonomy, in undertaking complex work. They demonstrate deep knowledge in a specific technical area, are able to analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research and identify pest monitoring and evaluation requirements	1.1 Determine monitoring and evaluation requirements 1.2 Assess attitudes, and land management practices, of stakeholders for their relevance and usefulness to the monitoring and evaluation program 1.3 Document how results from monitoring and evaluation will be used
2. Develop procedures for monitoring and evaluation	2.1 Identify target pests and select monitoring sites 2.2 Specify timing of sampling, observation systems, level of accuracy required and sample size 2.3 Identify economic and environmental impacts to be monitored 2.4 Identify factors that would trigger an emergency response 2.5 Define how reporting will be carried out and how results of sampling will be verified and analysed 2.6 Develop procedures for monitoring and recording the economic and environmental impacts of pests 2.7 Develop procedures for monitoring and recording pest abundance 2.8 Confirm monitoring program includes a schedule that is aligned to milestones in the pest management plan
3. Document the monitoring program	3.1 Design recording documents and forms 3.2 Document all procedures and recording systems and make accessible to relevant personnel 3.3 Ensure pest monitoring program aligns with relevant local, regional, state and national pest management strategies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit has resulted from the merging of AHCPMG403A Develop monitoring procedures for the local pest management strategy and AHCPMG504A Develop a system for monitoring the pest management strategy and is not equivalent to either of these units.

Links

Assessment Requirements for AHCPMG508 Develop a system to monitor and evaluate the pest management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a pest monitoring and evaluation program, in accordance with the local, regional, State or Territory and national pest management strategies
- consult with stakeholders to assess attitudes and land management practices, where relevant
- research and identify required operational and performance monitoring
- develop procedures for monitoring and evaluation, including how to access relevant techniques and adapt them for the pest management plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- procedures for monitoring and recording
- pest biology, behaviour and lifecycles and how they influence monitoring procedures
- pest population dynamics and economic and environmental thresholds
- relevant local, regional, State, Territory and national pest management strategies
- Federal, State or Territory legislation and regulations relating to pest management activities
- key concepts in the Integrated Pest Management strategy
- monitoring and evaluation principles and how they should be included in the management program
- reporting and recording procedures, including knowing how to appropriately package information in the correct format and at the appropriate level for the various target groups
- how to monitor and record pest abundance and the damage caused by the target pest
- target pests and monitoring points

- non-target species in the area
- potential economic and environmental impacts of pest population
- factors that would trigger an emergency response
- aims, objectives and milestones in the pest management plan
- requirements for ensuring the welfare of animals described in the relevant Codes of Practice, where monitoring plan involves pest animals
- potential diseases and toxicity relevant to the area and pests

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG509 Investigate a pest control failure

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to investigate causes of pest control failure after the implementation of a pest management plan.

Pests may be weeds, vertebrate or invertebrate pests or a combination of these.

Treatment may be any measure used to decrease the pest population and the damage caused by it.

This unit applies to regional pest control officers and managers who take personal responsibility for their own work and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

Individuals operating in this field are required to hold current chemical handling certification and a first aid certificate. Other licensing conditions may also apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess planning techniques used	1.1 Determine and assess management techniques used in the pest management plan 1.2 Assess the level of community and stakeholder consultation carried out 1.3 Evaluate the level of commitment gained from the community and stakeholders 1.4 Assess whether the definition of the pest problem is correct 1.5 Assess staff understanding of the pest and the damage caused 1.6 Determine monitoring techniques used and assess suitability
2. Assess treatment failure	2.1 Assess whether damage caused by the pest after treatment is within expectations 2.2 Determine pre-treatment and post-treatment pest infestation levels by monitoring pest management plan records and inspection 2.3 Determine expected pest population after treatment using available information 2.4 Assess the difference between expected and monitored population 2.5 Assess treatments and application techniques used 2.6 Determine whether failure is due to product failure or pesticide resistance if pesticides are involved 2.7 Determine operator's qualifications and experience in applying a particular pest treatment where appropriate
3. Evaluate solutions to the failure	3.1 Assess possible solutions to the failure 3.2 Determine best option for solution based on cost, appropriateness to the problem and timing 3.3 Review pest management plans and implementation plans as required and advise stakeholders, personnel and contractors of the changes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCPMG406A Investigate a reported pest treatment failure

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPMG509 Investigate a pest control failure

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate and assess a pest treatment failure
- find solutions to the failure
- analyse pre-treatment and post-treatment pest infestation levels
- assess planning techniques used
- evaluate solutions to the failure

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to survey pest populations to determine infestation levels
- monitoring techniques
- how to assess whether the definition of the pest problem is correct
- range of pest treatments appropriate to context
- a deep understanding of a variety of pest control measures
- the principles that underpin the strategic approach to managing pests
- Federal, State or Territory legislation and regulations relating to pest management activities
- chemical, biological, physical and habitat techniques for pest management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPMG510 Develop a pest survey strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a plant pest survey strategy to determine the presence, distribution and prevalence of a pest.

Pests may be weeds, vertebrate or invertebrate pests or a combination of these.

The work may be conducted as part of an emergency response to an incursion or as part of routine surveillance, and must be conducted in accordance with established standards and protocols.

This unit applies to individuals who have been appointed or engaged to undertake a role within a pest incursion response. They may also be involved with planning responses to emergency animal diseases and aquatic animal diseases.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They are accountable for the work of others within broad parameters and analyse information and exercise judgement to complete a range of advanced skilled activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Pest Management (PMG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain and analyse biological information for survey design	1.1 Identify the biological and dispersal characteristics of the pest 1.2 Determine impact of climate on reproduction rates and the predicted distribution of the pest 1.3 Identify the geographical distribution of the host 1.4 Analyse information to determine priority areas to be surveyed
2. Develop survey methodology	2.1 Determine particular type of survey to be designed according to phase of incursion 2.2 Determine field data collection methodology in consultation with technical experts 2.3 Incorporate quality assurance standards that apply to survey methodology and documentation 2.4 Select appropriate diagnostic tests for use in confirming pest presence in samples 2.5 Include procedure for sustainability and biosecurity in survey plan 2.6 Develop instructions for survey teams
3. Determine the resources required	3.1 Determine and document resources required for survey activities in conjunction with technical experts
4. Obtain approval for the survey design	4.1 Document survey design according to protocols and standards 4.2 Submit survey design to appropriate authorities for approval
5. Determine post-survey review processes	4.1 Determine review processes to evaluate implementation and effectiveness of survey program

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPMG601A Develop a pest survey strategy

Assessment Requirements for AHCPMG510 Develop a pest survey strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- produce a pest survey strategy in accordance with local, regional, State/Territory and national pest management strategies
- write work instructions for survey teams
- work with other technical experts
- analyse biological information for survey design
- develop survey methodology appropriate for target pest, environment and terrain
- prepare plans to workplace and authority standards
- develop review processes according to workplace requirements
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate detailed knowledge of:

- biometric principles to biological survey design
- the biology of groups of pests and pathogens relevant to the survey
- the types and distribution of hosts relevant to the survey
- requirements for ensuring the welfare of animals described in the relevant Codes of Practice

The candidate must demonstrate knowledge of:

- pest biology, behaviour and lifecycles
- diagnostic tests for use in confirming pest presence in samples

- resources required for survey activities

Assessment Conditions

Assessment must take place in a functioning control centre, or a control centre established for a pest response simulation exercise.

Assessors must satisfy current standards for RTOs.

AHCPRK201 Care for health and welfare of pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for the health and welfare of pigs. This unit applies to workers in pork production enterprises operating under routine supervision.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Check and assess pig health and welfare	1.1 Check pig health and welfare regularly 1.2 Recognise and report signs of ill health, diseases, parasite infestations and physical abnormalities 1.3 Record pig health and welfare status 1.4 Seek immediate advice where signs indicate an unusual disease
2. Provide an optimal environment for pigs	2.1 Operate and check temperature and other environment control equipment where appropriate 2.2 Record relevant information on shed environmental conditions
3. Establish and maintain hygiene	3.1 Use and maintain personal protective equipment, and follow work health and safety procedures 3.2 Follow biosecurity procedures 3.3 Follow personal hygiene practices 3.4 Clean work areas, machines and surfaces appropriately 3.5 Remove and dispose of all waste and debris appropriately in line with enterprise environmental policies
4. Administer medication to pigs	4.1 Store labelled vaccines, veterinary medicines and other chemicals appropriately as directed 4.2 Carry out routine disease or parasite prevention procedures 4.3 Measure and administer medication under supervision 4.4 Administer vaccines as required, and identify pigs that have been vaccinated 4.5 Complete required documentation and records for administration of vaccines, medicines and chemicals
5. Remove dead or non-viable pigs	5.1 Dispose of dead pigs appropriately 5.2 Recognise, report and carry out appropriate procedures for unhealthy or non-viable pigs 5.3 Provide post-mortem assistance where necessary
6. Report and complete records	6.1 Complete all required documentation and records of diseases, pig losses and treatments clearly, promptly and accurately 6.2 Report to enterprise where relevant so that prevention strategies can be planned and implemented

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPRK201A Care for health and welfare of pigs.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPRK201 Care for health and welfare of pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check and assess pig health and welfare
- provide an optimal environment for pigs
- establish and maintain hygiene
- administer medication to pigs
- remove dead or non-viable pigs
- report and complete records
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for biosecurity
- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for animal welfare of pigs
- signs of health, signs of ill health, and methods for assessing pig health and welfare
- techniques and methods for humane handling and restraint of pigs
- common diseases of pigs, treatment regimes, prevention and management strategies
- criteria for handling compromised pigs
- relevant documentation, records and reports that are required

- types, functions and characteristics of housing, housing infrastructure and housing equipment for pigs, and the criteria and methods for determining that they are in working condition
- types, uses, handling, storage and routes of administration of commonly used vaccines, veterinary medicines and chemicals
- requirements, methods and procedures for removing and disposing of waste and debris
- procedures for conducting post-mortem examinations
- effects and impacts of individual pig health and welfare on herd health status and vice versa
- relevant work health and safety requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK203 Move and handle pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to move and handle pigs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to workers in pork production enterprises operating under routine supervision within organisational guidelines.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Control and move pigs	1.1 Conduct moving, manual handling, lifting and restraining of pigs in a safe and appropriate manner in compliance with relevant work health and safety requirements

Element	Performance criteria
	1.2 Move and handle pigs either singly or in groups safely and humanely, using appropriate positive behavioural methods 1.3 Monitor pigs constantly for signs of distress and take appropriate action 1.4 Record as required
2. Restrain pigs	2.1 Restrain pigs safely and humanely in line with enterprise animal welfare policies
3. Weigh or condition score pigs	3.1 Weigh individual pigs and groups of pigs as required, in line with enterprise biosecurity policies 3.2 Read ear tag, ear notch or pen number to identify pigs
4. Return pigs to housing	4.1 Return pigs to their housing or secure pigs at their final destinations as appropriate

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- control and move pigs
- restrain pigs
- weigh and condition score pigs
- return pigs to housing
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- techniques and methods for humane handling and restraint of pigs
- relevant regulatory requirements, industry standards and codes of practice for ensuring animal welfare of pigs
- signs of health, signs of ill health, signs of distress and methods for assessing pig health, welfare and behaviour
- requirements, methods and procedures for weighing pigs
- types and methods of identifying pigs
- relevant work health and safety and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK204 Care for weaner pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for weaner pigs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare accommodation for	1.1 Clean, disinfect and prepare appropriate accommodation for all classes of weaned pigs according to enterprise procedures and

Element	Performance criteria
weaners	instructions 1.2 Check and adjust housing environment and conditions as required to ensure appropriate ventilation, temperature and humidity 1.3 Fill or prepare feeders and drinkers according to supervisor's instructions 1.4 Identify problems with accommodation or environmental controls and report to the supervisor for appropriate action 1.5 Conduct all work according to enterprise requirements, work health and safety, biosecurity, animal welfare and industry regulations
2. Carry out weaner pig operations	2.1 Group pigs from different litters to form viable groups based on body weight and sex at stocking densities to achieve optimal productivity 2.2 Monitor behaviour, health and condition of weaners regularly and take appropriate actions 2.3 Provide weaners with water and appropriate feed according to the established feed schedule to meet nutritional and growth requirements 2.4 Record or report weaner mortalities to the supervisor and remove deceased stock according to enterprise policy 2.5 Administer preventative treatments according to enterprise schedules and the supervisor's instructions
3. Transition weaners to grower facility	3.1 Identify pigs for transition to grower facilities 3.2 Separate pigs not fit to load and take appropriate actions according to company policy 3.3 Identify pigs that have been treated and record withholding periods (WHP) for grower facility 3.4 Complete documentation clearly, accurately and promptly

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPRK204 Care for weaner pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare accommodation for weaners
- carry out weaner pig operations
- transition weaners to grower facility
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, characteristics, requirements and care of weaner pigs
- types, functions, characteristics, cleaning and maintenance of relevant pig accommodation and production installations and equipment, such as feeders and drinkers
- range, effects and impacts of ventilation, temperature, humidity and other environmental parameters on weaner pig health and welfare
- optimal range of values for ventilation, temperature, humidity and other environmental parameters for weaner pigs and methods for measuring these values
- requirements and components of enterprise work routines for weaner pigs
- techniques and methods for humane handling and restraint of pigs
- requirements, methods and procedures for weaning piglets
- requirements, methods and procedures for formation of viable weaner groups, and the impacts of a viable group on individual pig health and production
- signs of health, signs of ill health, and methods for assessing pig health, welfare and behaviour

- nutritional requirements and methods and procedures for feeding and watering weaner pigs
- criteria and methods of assessing optimal stocking densities of weaner pigs
- criteria for assessing suitability of weaner pigs for transition to grower facilities
- requirements, methods and procedures for removal and disposal of pig carcasses
- types, uses and procedures of relevant veterinary and preventive treatments of weaner pigs
- withholding periods of veterinary chemicals and medicines and rationale for withholding periods
- types, handling, use and disposal of cleaning agents and disinfectants, work health and safety and environmental practices for these chemicals
- types of documentation and records that are required for weaner pig operations
- relevant work health and safety and biosecurity requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK205 Care for health and welfare of outdoor pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for the health and welfare of outdoor pigs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Check and assess pig	1.1 Check pig health and welfare regularly

Element	Performance criteria
health and welfare	1.2 Recognise and report signs of ill health, diseases, parasite infestations and physical abnormalities 1.3 Record pig health and welfare status 1.4 Seek immediate advice where signs indicate an unusual disease
2. Provide an optimal environment for pigs	2.1 Check outdoor housing conditions and record relevant information where appropriate
3. Establish and maintain hygiene	3.1 Use and maintain personal protective equipment, and follow work health and safety procedures 3.2 Follow biosecurity procedures 3.3 Follow personal hygiene practices 3.4 Clean work areas, machines and surfaces appropriately 3.5 Remove and dispose of all waste and debris appropriately in line with enterprise environmental policies
4. Administer medication to pigs	4.1 Store labelled vaccines, veterinary medicines and other chemicals appropriately as directed 4.2 Carry out routine disease or parasite prevention procedures 4.3 Measure and administer medication under supervision 4.5 Administer vaccines as required, and identify pigs that have been vaccinated 4.6 Complete required documentation and records for administration of vaccines, medicines and chemicals
5. Remove dead or non-viable pigs	5.1 Dispose of dead pigs appropriately 5.2 Recognise, report and carry out appropriate procedures for unhealthy or non-viable pigs 5.3 Provide post-mortem assistance where necessary
6. Report and complete records	6.1 Complete all required documentation and records of diseases, pig losses and treatments clearly, promptly and accurately 6.2 Report to enterprise where relevant so that prevention strategies can be planned and implemented

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPRK205 Care for health and welfare of outdoor pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check and assess pig health and welfare
- provide an optimal environment for pigs
- establish and maintain hygiene
- administer medication to pigs
- remove dead or non-viable pigs
- report and complete records
- follow work health and safety procedures
- follow biosecurity procedures
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for biosecurity and quarantine
- relevant regulatory requirements, codes of practice, industry standards and enterprise procedures for animal welfare of pigs
- signs of health, signs of ill health, and methods for assessing pig health and welfare
- techniques and methods for humane handling and restraint of pigs
- common diseases of pigs, treatment regimes, prevention and management strategies
- criteria for handling compromised pigs
- relevant documentation, records and reports that are required

- the types, functions and characteristics of housing, housing infrastructure and housing equipment for outdoor pigs, and the criteria and methods for determining that they are in working condition
- types, uses, handling, storage and routes of administration of commonly used vaccines, veterinary medicines and chemicals
- requirements, methods and procedures for removing and disposal of waste and debris
- procedures for conducting a post-mortem examination
- effects and impacts of individual pig health and welfare on herd health status and vice versa
- relevant work health and safety requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK206 Conduct outdoor pig operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct outdoor pig operations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare housing	1.1 Follow enterprise work health and safety and biosecurity policies

Element	Performance criteria
	1.2 Clean, disinfect and prepare housing for pigs 1.3 Prepare and fill feeders and drinkers 1.4 Prepare appropriate outdoor environment amenities as required 1.5 Report problems with housing
2. Provide for care and welfare of pigs	2.1 Identify and check that care and welfare needs of pigs are met in compliance with the relevant legislation, codes of practice and industry standards and guidelines 2.2 Provide appropriate feed and water supplies for pigs 2.3 Carry out handling, husbandry and enterprise procedures safely and appropriately
3. Carry out operational tasks	3.1 Wean litter according to established enterprise schedules if required 3.2 Select pigs from different litters to form viable groups based on body weight and sex at optimal stocking densities for maximum productivity, if required 3.3 Check behaviour and condition of pigs regularly and report as required 3.4 Administer preventative treatments according to enterprise schedules and supervisor instructions 3.5 Carry out maintenance of production environment as required
4. Check pigs	4.1 Check pig condition and health as part of regular routine 4.2 Check feeders and drinkers as part of regular routine 4.3 Check infrastructure and amenities, and carry out maintenance as required 4.4 Move pig groups as required in line with growth and condition 4.5 Remove poor performing pigs from existing groups and regroup 4.6 Isolate sick, injured or unhealthy pigs or identify for euthanasia 4.7 Apply health treatments when required 4.8 Remove dead pigs and report and record as required. 4.9 Check production environmental conditions, report and carry out maintenance as required
5. Complete records	5.1 Complete required documentation and records accurately and promptly 5.2 Report to supervisor and management as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPRK206 Conduct outdoor pig operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare housing
- provide for care and welfare of pigs
- carry out operational tasks
- check pigs
- complete records
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant legislation, codes of practice, industry standards and guidelines for outdoor pig production
- types, functions, characteristics, cleaning and maintenance of outdoor pigs
- requirements and components of enterprise work routines for outdoor pigs
- types, functions, characteristics, cleaning and maintenance of relevant outdoor pig housing and production installations and equipment, such as feeders and drinkers
- techniques and methods for humane handling and restraint of pigs in outdoor production environments
- requirements, methods and procedures for weaning piglets
- requirements, methods and procedures for formation of viable groups, and the impacts of a viable group on individual pig health and production

- signs of health, signs of ill health, and methods for assessing pig health, welfare and behaviour
- nutritional requirements and methods and procedures for feeding and watering outdoor pigs
- criteria and methods of assessing optimal stocking densities of pigs
- requirements, methods and procedures for removal and disposal of pig carcasses
- types, uses and procedures of relevant veterinary and preventive treatments of pigs
- types, handling, use and disposal of cleaning agents and disinfectants, work health and safety and environmental practices for these chemicals
- types of documentation and records that are required for pig operations
- requirements and maintenance of outdoor pig production environment
- relevant work health and safety and biosecurity requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK301 Pregnancy test pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to test pigs for pregnancy.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for pregnancy testing	1.1 Prepare pregnancy testing work site and relevant documentation 1.2 Select, use and maintain personal protective equipment

Element	Performance criteria
	1.3 Identify pigs to be tested according to the breeding program 1.4 Assemble required resources and manpower 1.5 Isolate individual pigs for testing or marking as required
2. Carry out pregnancy testing procedures	2.1 Handle individual pigs safely and humanely while testing and check breeding records 2.2 Use ultra sound equipment for pregnancy diagnosis 2.3 Apply knowledge of relevant anatomy and physiology 2.4 Use strict hygiene procedures between individual pigs in line with enterprise biosecurity policies 2.5 Complete records and report outcomes 2.6 Assess and record individual pig health and condition for input to herd health management
3. Carry out post pregnancy testing procedures	3.1 Identify pigs as pregnant or not pregnant 3.2 Return pigs to their appropriate destination 3.3 Clean work site, remove and dispose of waste and debris appropriately in line with enterprise environmental policies 3.4 Check pigs post testing regularly for health and condition

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPRK301A Pregnancy test pigs.

Assessment Requirements for AHCPRK301 Pregnancy test pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for pregnancy testing
- carry out pregnancy testing procedures
- carry out post pregnancy testing procedures
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- techniques and methods for humane handling and restraint of pigs
- requirements, methods and procedures for pregnancy testing of pigs
- requirements and types of relevant documentation and records
- information required from breeding records for pregnancy testing
- reproductive anatomy, reproductive physiology, pregnancy development and embryological/foetal development in pigs
- types, methods and procedures for pregnancy diagnosis of pigs
- types, handling, use and disposal of cleaning agents and disinfectants, work health and safety and environmental practices for these chemicals
- methods and procedures for hygiene practices during pregnancy diagnosis
- signs of health, signs of ill health, and methods for assessing pig health, welfare and behaviour
- effects and impacts of individual pig health and welfare on herd health status and vice versa

- types and methods of identifying pigs
- requirements, methods and procedures for cleaning work sites
- relevant work health and safety and biosecurity requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK302 Treat rectal prolapse in pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to treat rectal prolapse in pigs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Respond to signs of rectal prolapse	1.1 Recognise signs of rectal prolapse 1.2 Remove pig from pen

Element	Performance criteria
	1.3 Determine treatment based on severity of injury and animal's health and condition 1.4 Seek supervisor's, veterinary or other expert advice where required 1.5 Prepare work site, required resources and materials for treatment 1.6 Isolate pig in hospital pen where required 1.7 Follow enterprise animal welfare and biosecurity policies 1.8 Recognise outbreaks of rectal prolapse in a herd and notify management
2. Treat rectal prolapse	2.1 Select, use and maintain appropriate personal protective equipment 2.2 Apply knowledge of relevant animal anatomy and physiology 2.3 Clean prolapses appropriately 2.4 Treat as prescribed by veterinary advice 2.5 Recognise and treat rectal strictures where appropriate 2.6 Administer antibiotics to pigs with rectal prolapse where required
3. Report and reduce incidence of rectal prolapse	3.1 Report incidents and treatments to supervisor or management 3.2 Identify possible causes of prolapse 3.2 Implement changes to pig management to reduce incidence of rectal prolapse

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPRK302A Treat rectal prolapse in pigs.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPRK302 Treat rectal prolapse in pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- respond to signs of rectal prolapse
- treat rectal prolapse
- report and reduce incidence of rectal prolapse
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- signs, causes, treatment, management and prevention of rectal prolapse
- anatomy and physiology of relevant organs and tissues
- techniques and methods for humane handling and restraint of pigs for rectal prolapse
- signs of health, signs of ill health, and methods for assessing pig health, welfare and behaviour
- work site requirements, resources and materials for treatment of rectal prolapse
- characteristics, signs, management and control of rectal prolapse outbreaks
- relevant work health and safety requirements for treatment of rectal prolapse
- signs, causes, treatment, management and prevention of rectal strictures
- requirements, functions and procedures for setting up hospital pens
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK303 Artificially inseminate pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to artificially inseminate pigs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for artificial insemination	1.1 Follow appropriate hygiene and biosecurity procedures 1.2 Follow enterprise work health and safety policies

Element	Performance criteria
	1.3 Obtain semen supplies and resources 1.4 Follow artificial insemination program and procedures
2. Inseminate pigs and record data	2.1 Identify sows for insemination and ensure they are at the correct stage of their oestrus cycles 2.2 Handle pigs humanely in line with enterprise animal welfare policies 2.3 Prepare pigs for artificial insemination 2.4 Apply knowledge of relevant animal anatomy and physiology 2.5 Conduct insemination using appropriate hygiene procedures 2.6 Complete required documentation and records promptly and accurately
3. Clean work area and equipment	3.1 Return pigs to designated area 3.2 Dispose of waste and debris appropriately in line with enterprise environmental policies 3.3 Clean work area appropriately 3.4 Clean, maintain and store equipment appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPRK303A Artificially inseminate pigs.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPRK303 Artificially inseminate pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for artificial insemination
- inseminate pigs and record data
- clean work area and equipment
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- resource and manpower requirements, biosecurity requirements, industry standards, codes of practice and procedures for artificial insemination of pigs
- relevant animal welfare practices for the conduct of artificial insemination in pigs
- procurement, transportation, handling, maintenance, storage and use of porcine semen for artificial insemination
- anatomy and physiology of reproductive organs and structures in pigs
- relevant documentation and records that are required
- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes and debris
- requirements and procedures for cleaning and maintaining work areas
- types, uses, maintenance, servicing and storage of equipment
- methods and procedures for cleaning and disinfection of equipment used for artificial insemination

- procedures for handling, measurement and usage of cleaning chemicals, disinfectants and sanitisers
- work health and safety and biosecurity requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessments must be conducted on live animals.

Assessors must satisfy current standards for RTOs.

Links

AHCPRK304 Mate pigs and monitor dry sow performance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage the mating of pigs and monitor dry sow performance.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine condition of pigs and adjust	1.1 Determine and record condition scores of pigs 1.2 Rank pigs according to scores and adjust nutritional requirements

Element	Performance criteria
nutrition for mating	<p>to ensure pigs are in optimum condition at mating</p> <p>1.3 Ensure feeding strategies are appropriate for the housing environment and seasonal conditions</p> <p>1.4 Monitor and assess condition of pigs regularly</p>
2. Facilitate mating	<p>2.1 Apply knowledge of relevant animal anatomy and physiology</p> <p>2.2 Carry out oestrus inducement and detection procedures</p> <p>2.3 Follow enterprise work health and safety and biosecurity policies</p> <p>2.4 Ensure mating areas are secure and provide for access during joining</p> <p>2.5 Use mating procedures and handling techniques that maximise welfare of pigs</p> <p>2.6 Supervise mating and intervene when required to maximise conception rates</p>
3. Complete mating procedures	<p>3.1 Carry out regular post-mating heat detection to identify sows returning to oestrus</p> <p>3.2 Complete mating records promptly and accurately</p>
4. Determine and provide adequate nutrition for pregnant sows	<p>4.1 Determine nutritional needs of pregnant sows using the enterprise feeding plan</p> <p>4.2 Provide adequate and suitable feed and feed supplements in accordance with the feeding plan and sow condition</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPRK304A Mate pigs and monitor dry sow performance.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPRK304 Mate pigs and monitor dry sow performance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine condition of pigs and adjust nutrition for mating
- facilitate mating
- complete mating procedures
- determine and provide adequate nutrition for pregnant sows
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- criteria and methods for body condition scoring of pigs
- nutritional requirements, types of feed and feeding methods for pregnant and non-pregnant sows
- methods and procedures for determining nutritional requirements of pregnant and non-pregnant sows
- relevant husbandry and management practices for pregnant and non-pregnant sows
- relevant anatomy and physiology of sows
- reproductive physiology and pregnancy development of sows
- methods and procedures for oestrus detection in sows
- requirements, methods, procedures and management of mating in pigs
- methods and management of conception rates in pigs
- relevant animal welfare practices for mating of pigs

- methods and procedures for pregnancy diagnosis in sows
- relevant documentation and records that are required
- relevant work health and safety and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK305 Care for grower and finisher pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for grower pigs.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare accommodation for	1.1 Clean and prepare accommodation for new grower stock according to enterprise procedures

Element	Performance criteria
growers	1.2 Follow enterprise work health and safety policies 1.3 Control and monitor environment in line with established enterprise biosecurity and environmental policies 1.4 Fill or prepare feeders and drinkers according to instructions 1.5 Identify problems with accommodation and/or environmental controls and report to supervisor for appropriate action
2. Carry out grower and finisher pig operations	2.1 Monitor pig condition and health regularly as an integral part of daily routines 2.2 Check feeders and drinkers regularly as part of daily routines 2.3 Move pig groups as required in line with growth, condition and stocking density 2.4 Remove poor performing pigs from groups and reassign in line with enterprise policy 2.5 Isolate sick, injured or unhealthy pigs in a quarantine area or identify for euthanasia according to enterprise animal welfare policies 2.6 Apply health treatments when required and according to supervisor's instructions and enterprise policy 2.7 Record or report grower mortalities to the supervisor and remove deceased stock according to enterprise policy.
3. Identify and select sale pigs	3.1 Identify pig according to enterprise market requirements 3.2 Assess pigs for transportation prior to loading 3.3 Complete or verify property banding for every sale animal 3.4 Separate pigs not fit to load and take appropriate action according to enterprise policy 3.5 Complete pig pass and other documentation for accurately and consistently

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPRK305 Care for grower and finisher pigs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare accommodation for growers
- carry out grower and finisher pig operations
- identify and select sale pigs
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, characteristics, requirements and care of grower and finisher pigs
- types, functions, characteristics, cleaning and maintenance of relevant pig accommodation and production installations and equipment, such as feeders and drinkers
- range, effects and impacts of ventilation, temperature, humidity and other environmental parameters on grower pig health and welfare
- optimal range of values for ventilation, temperature, humidity and other environmental parameters for grower pigs and methods for measuring these values
- requirements and components of enterprise work routines for grower pigs
- techniques and methods for humane handling and restraint of pigs
- requirements, methods and procedures for formation of viable grower groups, and the impacts of a viable group on individual pig health and production
- signs of health, signs of ill health, and methods for assessing pig health, welfare and behaviour

- nutritional requirements and methods and procedures for feeding and watering grower pigs
- criteria and methods of assessing optimal stocking densities of grower pigs
- requirements, methods and procedures for removal and disposal of pig carcasses
- types, uses and procedures of relevant veterinary and preventive treatments of grower pigs
- types, handling, use and disposal of cleaning agents and disinfectants , work health and safety and environmental practices for these chemicals
- types of documentation and records that are required
- criteria, methods and procedures for assessing suitability of pigs for transport and loading
- features and requirements of property banding and PigPass
- relevant work health and safety and biosecurity requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK306 Monitor and maintain outdoor pig production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and maintain outdoor pig production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work in the production area	1.1 Confirm work to be undertaken from work program where necessary, and clarify with supervisor if required

Element	Performance criteria
	<p>1.2 Identify work health and safety hazards, assess risks and implement suitable controls</p> <p>1.3 Select and use suitable personal protective equipment</p> <p>1.4 Select, check and maintain tools and equipment suitable for the work to be undertaken</p> <p>1.5 Communicate the personal protective equipment and other safety requirements to staff and contractors, and obtain confirmation of understanding</p> <p>1.6 Monitor weather and carry out preparations or adjustments to work program as required</p>
2. Coordinate work activities and monitor progress	<p>2.1 Communicate the work required to staff and contractors clearly and unambiguously following the production plan and program</p> <p>2.2 Meet work schedules, plans and priorities according to the needs of the organisation or situation</p> <p>2.3 Ensure the allocation of work optimises resources and the existing competencies of staff</p> <p>2.4 Communicate with operational staff and any contractors regularly to ensure smooth operation and progress</p> <p>2.5 Provide feedback to staff and management on request, or as necessary</p>
3. Monitor pig health	<p>3.1 Observe pigs for signs of ill health, and record and report changes</p> <p>3.2 Observe and monitor pig behaviour, and record and report abnormalities</p> <p>3.3 Ensure that welfare and care needs of pigs are adequately provided</p> <p>3.4 Ensure that pigs have access to clean and adequate water supply</p> <p>3.5 Examine dead pigs for evidence of disease through post-mortem techniques in line with regulatory and industry standards and veterinary advice</p> <p>3.6 Identify disease status of herd and request staff or veterinary assistance when required</p> <p>3.7 Check components of biosecurity procedures for compliance</p>
4. Monitor pig housing, sheds, shelters and infrastructure	<p>4.1 Monitor outdoor pig housing, sheds or shelters for wear and tear, and carry out maintenance and repair as required</p> <p>4.2 Monitor outdoor facilities and infrastructure such as fencing, feeders and drinkers, and carry out maintenance or repair as required</p>
5. Monitor effluent and waste removal, storage and treatment	<p>5.1 Remove manure and litter if required, and store or treat appropriately</p> <p>5.2 Remove, store and treat liquid effluent appropriately and as</p>

Element	Performance criteria
	<p>required</p> <p>5.3 Check that manure and effluent storage and treatment systems are operated according to the production program and manufacturer's instructions</p> <p>5.4 Ensure that all waste and used consumables are removed from production site and disposed of in line with enterprise environmental policies</p> <p>5.6 Ensure work, health and safety requirements are being observed and followed</p>
6. Monitor and maintain production environment	<p>6.1 Identify and monitor production environment components</p> <p>6.2 Observe production environment for signs of deterioration, and record and report to management</p> <p>6.3 Monitor nutrient, soil and water conditions of production environment, report and carry out maintenance as required</p> <p>6.4 Coordinate or carry out maintenance of production environment as required.</p>
7. Complete records and documentation	<p>7.1 Collate information gathered throughout production operations</p> <p>7.2 Document collated information where required, and prepare for reporting to supervisor or manager</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPRK306 Monitor and maintain outdoor pig production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for work in the production area
- coordinate work activities
- monitor daily operations
- monitor herd health
- monitor production environment
- complete records and documentation
- follow work health and safety policies
- follow biosecurity policies
- follow animal welfare policies
- follow environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant legislation, codes of practice, industry standards and guidelines for outdoor pig production
- features and uses of enterprise production plans, enterprise work programs, environmental management plan and nutrient management plan
- requirements, maintenance, mitigation and protection measures for nutrients, soils, ground and surface water
- significance, effects and control measures for chemicals, gaseous emissions and odours that impact on the production environment and surrounding community
- relevant regulatory, industry and enterprise work health and safety requirements, codes of practice and standards

- use and maintenance of personal protective equipment
- types, functions, cleaning and maintenance of relevant tools and equipment
- types, requirements for and methods for determining allocation of enterprise resources
- strategies for communicating with and providing feedback to staff, contractors and management
- effects and impacts of weather elements on enterprise work programs and outdoor production environments, and preparations and adjustments to mitigate such impacts
- types, functions, characteristics, cleaning and maintenance of relevant outdoor pig housing and production installations and equipment, such as fencing, feeders and drinkers
- requirements, methods and procedures for manure and litter removal and treatment
- types, characteristics, functions, operation and maintenance of effluent storage and treatment systems
- requirements, methods and procedures for waste removal and disposal
- common diseases signs of health, signs of ill health, and methods for assessing individual pig and herd health and condition
- requirements, methods and procedures for conducting post mortem examination of pigs
- relevant regulatory, industry and enterprise biosecurity requirements, codes of practice and standards
- relevant regulatory, industry and enterprise environmental and sustainability requirements, codes of practice and standards
- criteria, methods and procedures for monitoring environmental health and condition
- relevant documentation, records and reports that are required
- relevant animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK401 Implement a feeding strategy for pig production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a feeding strategy for pig production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine feed rations and schedules	1.1 Determine feed quantities required from the production program 1.2 Use relevant laboratory results when determining quantities and

Element	Performance criteria
	ration formulation of stockfeed 1.3 Schedule and allocate responsibility for feeding in line with the production program and other operations in the facilities 1.4 Determine methods of providing feed to livestock
2. Manage storage of feed	2.1 Develop a plan for secure and hygienic storage of feed in line with enterprise biosecurity policies 2.2 Select storage location with safe access 2.3 Organise rotation and replenishment of feedstock supplies to ensure freshness 2.4 Formulate feeding plan to suit the needs of livestock, their nutritional requirements and the equipment available in the organisation 2.5 Collect and prepare samples of feed for testing according to the production program 2.6 Supervise calibration of measuring equipment and calculation of quantities regularly 2.7 Check that suitable personal protective equipment are appropriately used and maintained, and enterprise work health and safety policies are followed
3. Supervise feeding	3.1 Ensure that rations are supplied according to the production program and feeding plan. 3.2 Ensure continuous supplies of potable water are available to livestock 3.3 Monitor the health and condition of livestock and their production levels; and report any reaction or change to a change in feed types, ingredients or schedules 3.4 Provide advice to enterprise staff on the feeding of livestock when requested, or when the need arises 3.5 Remove and dispose of all waste and debris from the facilities appropriately in line with enterprise environmental policies 3.6 Complete required documentation and records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPRK401A Implement a feeding strategy for pig production.

Links

Assessment Requirements for AHCPRK401 Implement a feeding strategy for pig production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine feed rations and schedules
- manage storage of feed
- supervise feeding
- implement work health and safety policies
- implement biosecurity policies
- implement animal welfare policies
- implement environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of nutrition, feeding strategies and feeding management of pigs
- types, characteristics and quality assessments of feed ingredients, and the methods for assessing their nutritional value in meeting the needs of pigs
- types, forms and characteristics of pig feeds
- correlation and application of nutritional test results in formulating feeding strategies and feeding plans
- criteria, requirements, types of and principal considerations for feed storage
- features, criteria and requirements for formulating a feeding plan
- requirements, methods and procedures for collecting, preparing and transporting feed samples for testing
- types, calibration and use of measuring equipment
- relevant work health and safety requirements and selection, use and maintenance of personal protective equipment

-
- requirements, types and maintenance of potable water supplies to pigs
 - signs of health, ill health, good condition and poor condition in livestock, and methods for assessing pig health and condition in relation to nutrition and feeding
 - possible production changes in relation to changes in nutrition, feeds and feeding strategies
 - types of and disposal methods for organic and non-organic waste
 - relevant documentation and records that are required
 - relevant animal welfare and biosecurity requirements and environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPRK402 Maintain outdoor pig production environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain outdoor pig production environment.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Pork (PRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify components of production	1.1 Identify relevant legislation, codes of practice, industry standards

Element	Performance criteria
environment and work required	and guidelines for outdoor pig production environments 1.2 Access enterprise environment management plan and nutrient management plan where available 1.3 Apply biosecurity requirements, guidelines and enterprise policies 1.4 Identify components of the production environment relevant to the enterprise and confirm with management on the work required for these components 1.5 Identify and assess work health and safety risks, and carry out suitable controls 1.6 Select, use and maintain suitable personal protective equipment
2. Check and maintain outdoor pig housing and infrastructure	2.1 Check pig housing, sheds or shelters and carry out maintenance or repair as required 2.2 Check outdoor facilities and infrastructure such as fencing, feeders and drinkers, and carry out maintenance or repair as required
3. Carry out manure, effluent and waste operations	3.1 Carry out removal, storage, treatment or spreading of manure and effluent appropriately 3.2 Remove waste and debris from production environment, and dispose of appropriately in line with enterprise environmental policies
4. Check and maintain production environmental conditions	4.1 Confirm nutrient, soil and water monitoring/test results with supervisor where applicable 4.2 Carry out maintenance work or mitigation measures to maintain or improve production environment 4.3 Carry out control measures for chemicals, gaseous emissions and odours where required
5. Complete records	5.1 Complete required documentation and records accurately and promptly as required 5.2 Report and provide feedback to management as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPRK402 Maintain outdoor pig production environment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify components of production environment and work required
- check and maintain outdoor pig housing and infrastructure
- carry out manure, effluent and waste operations
- check and maintain production environmental conditions
- complete records
- implement work health and safety policies
- implement biosecurity policies
- implement environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant legislation, codes of practice, industry standards and guidelines for outdoor pig production environments
- characteristics, features and use of environment management plans and nutrient management plans
- regulatory requirements, codes of practice, guidelines, industry standards and enterprise policies for biosecurity
- components of outdoor pig production environment and their effects, impacts, maintenance programs, mitigation measures and protection measures
- relevant regulatory, industry and enterprise work health and safety requirements, codes of practice and standards
- types, functions, characteristics, cleaning and maintenance of relevant outdoor pig housing and production installations and equipment, such as fencing, feeders and drinkers

- requirements, methods and procedures for manure and litter removal and treatment
- types, characteristics, functions, operation and maintenance of effluent storage and treatment systems
- requirements, methods and procedures for waste removal and disposal
- significance, effects and control measures for chemicals, gaseous emissions and odours that impact on the production environment and surrounding community
- relevant documentation, records and reports that are required
- relevant environmental practices

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSAW201 Conduct erosion and sediment control activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to control erosion and sediment using earthworks construction and other land forming activities.

Construction is often carried out using a single earthmoving machine in varied conditions and terrains that requires the plant operator to develop skills that are unique to this sector.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work, they undertake defined routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Read work instructions relating to the activity and clarify purpose

Element	Performance criteria
	<p>and issues with the supervisor</p> <p>1.2 Prepare tools and equipment and use as instructed by supervisor</p> <p>1.3 Identify manual handling and other work health and safety hazards, tell supervisor and apply safe work practices to minimise risks</p> <p>1.4 Select personal protective equipment and clothing and ensure correct fit</p>
2. Conduct erosion and sediment control activities	<p>2.1 Identify erosion and sediment risks at a site and confirm with supervisor</p> <p>2.2 Assemble structures to prevent erosion and control sediment at site</p> <p>2.3 Carry out sediment control and maintenance activities</p> <p>2.4 Operate tools, machinery and equipment as instructed</p>
3. Complete work	<p>3.1 Dispose of or recycle soil and waste material from the site to minimise damage to the environment</p> <p>3.2 Clean, store and maintain all tools and equipment</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSAW201A Conduct erosion and sediment control activities

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCSAW201 Conduct erosion and sediment control activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct erosion and sediment control activities as instructed by a supervisor
- identify hazards and follow safe operating procedures
- identify erosion and sediment control structures, measures and practices
- carry out routine work with control measures and structures
- identify areas at risk of erosion
- operate or use machinery tools and equipment required for the tasks involved safely and efficiently

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the need for erosion and sediment control, including:
- the cost of erosion and sedimentation to the community
- the effect of loss of habitat
- how water quality is affected
- how soil erosion can cause loss of production, assets and amenities
- re-occurring maintenance, repair and monitoring requirements for controls
- agents and processes of erosion and sedimentation and ways to control them
- types of erosion and sediment control structures and techniques for constructing them
- role of vegetation in erosion control
- basic catchment issues
- characteristics of soils with an emphasis on erodible soils

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSAW301 Construct conservation earthworks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use specialised earthmoving techniques to achieve fine tolerances in the construction of conservation earthworks.

Construction is often carried out using a single earthmoving machine in varied conditions and terrains that requires the plant operator to develop skills that are unique to this sector.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

Special vehicle licenses may apply to this unit, dependent on the type of machinery being used. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for	1.1 Confirm construction details and sequence

Element	Performance criteria
construction	1.2 Identify and locate worksite, site indicators and survey pegs according to maps and plans of the site 1.3 Confirm work readiness of machinery and equipment 1.4 Assess and minimise risks to others and the environment 1.5 Select and use appropriate personal protective equipment 1.6 Verify that equipment and attachments match terrain and program tasks
2. Carry out conservation earthworks construction work	2.1 Follow industry endorsed earthwork methods and patterns for specific machines 2.2 Monitor and maintain optimum machinery loads in accordance with prevailing conditions 2.3 Ensure that safe machinery operating techniques are deployed to match terrain, site conditions other operators and workers 2.4 Ensure that excavation, transport, dumping and compaction of material is conducted appropriately and according to enterprise, client and legislative requirements 2.5 Carry out work in accordance with work health and safety policies and procedures
3. Apply finishing techniques	3.1 Finish batters and surfaces 3.2 Retain site features and vegetation 3.3 Clear site and remove debris 3.4 Complete topsoiling of disturbed areas and surfaces
4. Finalise work	4.1 Complete work records 4.2 Clean, store and maintain machinery, tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSAW301A Construct conservation earthworks

Assessment Requirements for AHCSAW301 Construct conservation earthworks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- prepare for construction according to construction plans and enterprise requirements
- carry out planned earthworks, minimising damage to natural areas
- apply finishing techniques
- read maps and plans to identify and peg out construction sites
- identify work site, site indicators and survey pegs
- determine soil properties and types
- use specialist earthmoving equipment relevant to the task
- follow work health and safety policies and procedures in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- erosion and sediment control standards
- soils and soil formation
- principles of conservation earthwork construction and erosion and sediment control including:
 - catchment management and soils
 - earthmoving principles
 - levels and levelling
 - natural area protection (including topsoil) and rehabilitation
 - design
 - natural area protection (particularly topsoil) and rehabilitation principles
- types and application of personal protective equipment

- application of legislation and regulations relating to own role in conservation earthwork construction
- enterprise work health and safety procedures
- risk factors including human health and environmental damage
- environmental impacts and controls for constructing conservation earthworks

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSAW302 Implement erosion and sediment control measures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to construct, install and maintain a range of measures specified on erosion and sediment control plans.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for implementation and construction	1.1 Confirm that erosion and sediment control plan and schedule of works match site conditions 1.2 Identify survey pegs and site indicators on site 1.3 Match equipment and tools to program works and terrain on site 1.4 Verify work readiness of selected equipment and tools

Element	Performance criteria
	1.5 Assess and minimise risks to others and the environment 1.6 Select and use appropriate personal protective equipment 1.7 Select materials to complete proposed works in line with construction schedule
2. Carry out implementation and construction	2.1 Plan work sequence 2.2 Construct earthworks 2.3 Install erosion and sediment control products and materials
3. Carry out repairs and maintenance procedures	3.1 Monitor site, identify issues and carry out repairs as necessary 3.2 Complete maintenance procedures as required 3.4 Clean and store machinery, tools and equipment 3.5 Complete work records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSAW302A Implement erosion and sediment control measures

Links

Assessment Requirements for AHCSAW302 Implement erosion and sediment control measures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- construct, install and maintain a range of erosion and sediment control measures
- identify hazards and implement safe work procedures
- prepare for implementation and construction
- read and follow plans to carry out implementation and construction
- identify survey pegs and site indicators on site and on the plans
- carry out repairs and maintenance procedures to enterprise standards
- select equipment and materials appropriate for the task
- operate equipment and machinery according to safe work practices and manufacturer instructions
- clean and store equipment, machinery and tools according to organisational requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- materials cartage pollution control
- sequence of working and timing/duration
- work health and safety issues relating to the equipment and the site
- equipment used
- materials suitable for constructing erosion and sediment control measures and where to source them on site
- limitations of structures including timing of maintenance, structure life cycle, specifications and standards

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSAW401 Set out conservation earthworks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to set out standard structures using specialised pegging and marking techniques, for erosion and sediment control earthworks.

This unit applies to individuals who take responsibility for their own work and use discretion and judgement in the selection, allocation and use of available resources. This includes undertaking a range of routine and non-routine activities and work in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret plans and specifications	1.1 Determine overall plan in consultation with landholder and surveyor 1.2 Establish earthworks specifications in consideration of desired

Element	Performance criteria
	outcome and prevailing conditions 1.3 Verify plan in line with job requirements
2. Relate plan to site	2.1 Locate key plan points on site 2.2 Identify additional features on site plan 2.3 Identify and record site issues which affect survey and pegging
3. Peg project	3.1 Establish pegging sequence in consultation with the site surveyor 3.2 Measure site dimensions in compliance with job specification 3.3 Establish peg locations using prescribed methods 3.4 Peg earthworks in line with project specification 3.5 Advise all construction personnel of pegging and the need for site integrity

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSAW401A Set out conservation earthworks

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCSAW401 Set out conservation earthworks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- set out conservation earthworks
- identify hazards and ensure the safety of self, field operators and any other person on site
- interpret plans and specifications
- relate plan to site
- measure out site dimensions precisely and peg project
- protect site

Knowledge Evidence

The candidate must demonstrate knowledge of:

- different types of survey equipment
- civil engineering and survey techniques applicable to conservation earthworks
- erosion control and design principles
- principles of native topsoil conservation and protection
- interpretation of plans and general and technical specification

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSAW403 Supervise implementation of conservation earthworks plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise the on-site implementation of earthworks designed to control erosion and sediment at a given site.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. This includes using discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan efficient implementation of erosion and sediment control works	1.1 Review plans and specifications and relate to the work site 1.2 Determine personnel and other resources required to undertake the work 1.3 Plan and record work sequences to meet with proposed work

Element	Performance criteria
	<p>schedule</p> <p>1.4 Identify the need for weed control and plan the use of chemicals</p> <p>1.5 Order materials to complete proposed works in line with construction schedule</p> <p>1.6 Identify potential regulatory planning and environmental impacts of the work and notify senior management</p> <p>1.7 Identify work health and safety hazards, assess risks and implement control measures</p>
2. Direct and monitor work	<p>2.1 Communicate clear instructions to plant operators to ensure work meets and maintains quality standards</p> <p>2.2 Provide on the job training for staff that require it</p> <p>2.3 Confirm the use of modified techniques to minimise the effect of site limitation in achieving job requirements</p> <p>2.4 Identify issues likely to cause delays or alter the scope of the work and record and report to senior management</p> <p>2.5 Inspect work periodically to confirm work outcomes are being achieved and adjust activity or plan if required</p> <p>2.6 Monitor safe machine operations to ensure they meet relevant work health and safety requirements</p> <p>2.7 Monitor the work site to ensure it is being kept in a clean and safe condition</p> <p>2.8 Monitor application of work health and safety, environmental sustainability and biosecurity practices</p> <p>2.9 Liaise with the media, community and special interest groups where required</p>
3. Complete work	<p>3.1 Inspect site prior to completion of work to confirm all work has been undertaken</p> <p>3.2 Note any work that does not comply with specifications and organise rectification work</p> <p>3.3 Supervise the maintenance of machinery and equipment</p> <p>3.4 Complete a report of work undertaken and forward to senior management</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCSAW402A Supervise on-site implementation of conservation earthworks. No equivalent unit.

Assessment Requirements for AHCSAW403 Supervise implementation of conservation earthworks plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- supervise the implementation of conservation earthworks
- identify hazards and implement safe systems of work
- plan efficient implementation of works
- protect natural areas from damage
- direct the implementation of planned works
- monitor job specifications
- identify and address risks to achieving planned outcomes
- provide information to the media, community and special interest groups about work undertaken
- providing on the job training to staff where required
- ensure work health and safety policies and procedures are adhered to by all personnel and contractors on site
- monitor application of biosecurity measures and sustainability practices in work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- erosion and sediment control standards and principles
- natural area topsoil protection and rehabilitation principles
- supervision techniques
- erosion control and design principles
- sediment control principles
- earthmoving principles

- principles for machine operation
- work sequence knowledge
- equipment most suitable to the constructing of erosion and sediment control works
- quality assurance systems, processes and practices
- staff deployment, supervision and training
- application of work health and safety and environmental legislation, codes of practice and enterprise requirements to work site

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSAW501 Design control measures and structures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design erosion and sediment control measures and structures.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. This includes analysing, designing and communicating solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify measures or structures to be designed	1.1 Review the erosion and sediment control plan for technical accuracy and environmental impacts 1.2 Confirm adherence to regulations and legislation and note on works plans 1.3 Confirm budget constraints for project with management or client

Element	Performance criteria
	1.4 Apply design criteria in line with industry standards
2. Apply design procedures	2.1 Calculate catchment characteristics to required accuracy 2.2 Determine design specifications 2.3 Develop draft design for structure that meets budget constraints 2.4 Modify structure design in response to application of design procedures and accepted industry practices 2.5 Ensure design applies environmentally sustainable practices
3. Prepare specification schedule	3.1 Confirm that provided documentation aligns with the plan and follows industry standards 3.2 Confirm suitability of design specifications to comply with the category of work and legislative requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSAW501A Design control measures and structures

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCSAW501 Design control measures and structures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- produce a design for erosion and sediment control measures and structures
- identify measures to be designed
- apply design procedures
- prepare specification schedule
- cost the project and provide recommendations in line with budget constraints
- use computer design programs
- determine design specifications using methods that meet industry standards
- develop design plan to meet client, organisational and regulatory requirements
- consult with management or client to confirm design meets requirements
- identify how the design applies sustainability principles

Knowledge Evidence

The candidate must demonstrate knowledge of:

- erosion control and design principles:
 - soils and soil formation
 - levels and levelling
 - earthmoving principles
 - total catchment issues
 - managing peak water flows
- subsurface and surface drainage principles and systems
- environmental issues related to the design
- the limitations of design aids provided for industry

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSAW502 Plan erosion and sediment control measures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop erosion and sediment control plans.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish suitability of development proposal	1.1 Compile data concerning suitability of development site 1.2 Note alterations or modifications to the development proposal and report to developer or consent authority 1.3 Establish compliance with relevant regulatory planning authority and environmental legislation

Element	Performance criteria
	1.4 Confirm development proposal meets erosion and sediment control guidelines
2. Develop erosion and sediment control strategy	2.1 Develop erosion control measures 2.2 Develop sediment control measures 2.3 Apply work health and safety and environmentally sustainable practices to strategy 2.4 Establish erosion and sediment control strategies and document in co-operation with the developer and relevant consent authority
3. Prepare an erosion and sediment control plan	3.1 Check selection criteria for earthwork structures or measures against industry guidelines 3.2 Develop erosion and sediment control plan, incorporating design specifications for structures 3.3 Confirm the erosion and sediment control plan and supporting documentation follow industry guidelines

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSAW502A Plan erosion and sediment control measures

Links

Assessment Requirements for AHCSAW502 Plan erosion and sediment control measures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a plan for erosion and sediment control measures that meets regulatory requirements and industry standards
- establish suitability of development proposal to location and environment
- prepare reports on erosion and sediment control plans to enterprise standards
- develop erosion and sediment control measures consistent with industry principles and selection criteria
- prepare an erosion and sediment control plan to industry standards and to comply with relevant regulatory planning authority

Knowledge Evidence

The candidate must demonstrate knowledge of:

- application of relevant environmental, planning and groundwater legislation in erosion and sediment control work
- planning process for erosion and sediment control
- erosion control and design principles:
 - soils and soil formation
 - levels and levelling
 - earthmoving principles
 - total catchment issues
 - how to manage peak water flows
 - subsurface and surface drainage principles and systems

- permits or consents potentially required for developing erosion and sediment control structures
- environmental issues related to erosion and sediment
- awareness of the limitations of design aids provided for industry
- work health and safety implications of implementing plans

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSAW503 Plan conservation earthworks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a conservation earthworks plan to control runoff to prevent soil erosion, safely store and distribute water, and rehabilitate eroded or disturbed areas.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. This includes analysing, designing and communicating solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil and Water Conservation (SAW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish client needs	1.1 Consult with land holder regarding the proposed land use 1.2 Review and discuss the catchment characteristics with consideration of the proposed land use 1.3 Explain to the landholder how legislation and policies impact on

Element	Performance criteria
	<p>the project</p> <p>1.4 Determine budget constraints for the project</p> <p>1.5 Discuss the possible strategies with the landholder</p> <p>1.6 Confirm the proposed land use and agreed strategy with landholder in writing</p>
2. Develop the strategy to utilise earthworks	<p>2.1 Confirm property ownership and boundary by checking maps and titles</p> <p>2.2 Determine profile of catchment from survey and aerial photographs</p> <p>2.3 Develop earthworks concept that is consistent with industry principles and selection criteria</p> <p>2.4 Establish final water disposal points in line with proposed strategy</p> <p>2.5 Test proposed location of structures by survey and discuss with landholder</p> <p>2.6 Document preferred strategy</p>
3. Prepare a detailed works plan	<p>3.1 Apply selection criteria for earthwork structures or measures that align with industry standards</p> <p>3.2 Cost project and develop schedule for plan</p> <p>3.3 Communicate design of relevant structures with specific details to qualified designer</p> <p>3.4 Prepare and present plan and relevant documentation</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSAW503A Plan conservation earthworks

Assessment Requirements for AHCSAW503 Plan conservation earthworks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- produce a plan of conservation earthworks that meets client needs, conforms to industry standards and complies with legislation and policy requirements
- establish client needs through consultation
- carry out site investigations using surveys, aerial photographs and maps
- negotiate agreed project outcomes
- explain legislation and policies that may impact on the project to the landholder
- develop a strategy to protect natural areas consistent with industry principles and that comply with regulatory requirements
- develop the strategy to utilise earthworks consistent with industry principles and that comply with regulatory requirements
- prepare detailed project costing that meets client's budget
- prepare a detailed works plan
- communicate design requirements to designer to achieve desired outcomes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how relevant environmental, planning and groundwater legislation impacts on the development of conservation earthworks planning
- environmental, planning and earthwork construction standards and Codes of Practice relevant to planning conservation earthworks projects
- earthwork structures
- erosion control and design principles
- natural areas (particularly topsoil) protection and rehabilitation principles

- soils and soil formation
- levels and levelling survey plans and titles
- earthmoving principles
- total catchment issues
- land use and land development strategies
- environmental issues
- how to manage peak water flows
- subsurface and surface drainage principles and systems
- limitations of design aids provided for industry

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDP301 Undertake preparation of land for seed crop production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare land for seed crop production. It applies to workers on properties where commercial seed production is undertaken. Workers operate with some judgement and discretion and work would normally be carried out under minimal supervision within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed production (SDP)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for cultivation	1.1 Confirm work requirements from the planting plan 1.2 Determine the method of cultivation from the planting plan

Element	Performance criteria
	1.3 Identify work health and safety hazards, assess risks and implement suitable controls 1.4 Select, use and maintain suitable personal protective equipment (PPE) 1.5 Identify environmental implications of cultivating the site, assess likely outcomes and take responsible action
2. Prepare the cultivating equipment	2.1 Clean and inspect vehicles, machinery and equipment according to certified seed production procedures 2.2 Service and adjust vehicles and equipment for the conditions and replace worn parts 2.3 Dispose of all containers, leftover fluids, waste and debris from the maintenance and servicing work 2.4 Record maintenance and servicing
3. Cultivate soil	3.1 Remove, incorporate or burn previous crop debris 3.2 Follow and complete the cultivation plan for each paddock 3.3 Select, use and maintain suitable personal protective equipment (PPE) 3.4 Operate vehicles and equipment in a safe, effective and efficient manner at speeds to suit the conditions 3.5 Ensure the quality of cultivation is maximised by continually checking and adjusting the vehicles and equipment as necessary 3.5 Meet all timelines, resource and quality requirements of the planting plan
4. Prepare site for planting	4.1 Complete the planting layout as required by the planting plan 4.2 Undertake weed and pest control as required 4.3 Apply fertilisers, ameliorants, and/or other pre-planting treatments as required 4.4 Identify the environmental implications of site preparation, assess likely outcomes and, if necessary, take responsible action
5. Complete land preparation operations	5.1 Clean and store machinery and equipment according to manufacturer specifications, organisational procedures and regulations 5.2 Dispose of all containers, leftover fluids, waste and debris from the cleaning and maintenance work 5.3 Complete all required records and documentation accurately and promptly

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDP301A Undertake preparation of land for seed crop production.

Assessment Requirements for AHCS DP301 Undertake preparation of land for seed crop production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for cultivation
- complete pre- and post-operational checks on tools, vehicles and equipment
- interpret production or planting plans
- produce standards, quality specifications and work procedure documents
- measure materials and site plan specifications
- cultivate soil in accordance with paddock cultivation plans
- service, operate, adjust and calibrate cultivation equipment safely
- complete records and documentation accurately and promptly

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for preparing land for seed crop production
 - pre-planting treatments, their purpose and method of application
 - environmental issues of cultivating soil for planting, such as drainage and irrigation systems, soil amelioration and waste disposal procedures
 - methods of cultivating a range of soil types
 - operation and maintenance of planting equipment
 - procedures and standards for certified seed
 - work health and safety guidelines, procedures and principles, including manual handling and exposure to hazardous substances

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCS DP302 Establish seed crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out sowing operation and fertiliser application
- carry out tillage and apply pre-planting treatments
- clean, secure and store machinery and equipment
- keep records of the sowing operation
- monitoring the environmental impacts of establishing the crop
- prepare and service machinery and equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of seed crop establishment
 - effects of weather conditions (normal and adverse) on seeding and fertilising applications
 - enterprise policies with regard to seeding operations, and recording and reporting routines
 - fertiliser types, rates of application and crop nutrient requirements
 - operating principles and operating methods for machinery and equipment
 - positive environmental practices, negative environmental impacts and minimisation measures associated with seeding operations
 - personal protective equipment (PPE) and when and how it should be used
 - pre-operational and safety checks, servicing and maintenance procedures for seeding machinery and equipment
 - principles of weight distribution with regard to load shifting and vehicle movement
 - procedures for cleaning, securing and storing machinery, equipment and materials

- record keeping for certified seed
- relevant state/territory legislation and regulations with regard to licensing requirements and the use and control of machinery and equipment
- relevant state/territory legislation, regulations and codes of practice with regard to workplace health and safety and the use and control of hazardous substances
- seed crop types, preparation of seeds, seeding methods and application techniques
- sustainable land management and soil conservation techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCS DP303 Maintain seed crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement pest and disease control strategies
- monitor crops for levels of pests and diseases and moisture
- monitor the health and maturity of the crop
- complete records and documentation accurately and promptly

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of seed crop maintenance
 - appropriate legislative requirements, manufacturer's instructions and organisation procedures/instructions
 - contractor machinery cleanliness
 - environmental impacts associated with the operation of machinery and equipment in a harvesting context
 - general machine maintenance procedures
 - hygiene requirements for agricultural crops and equipment that comes into contact with the crop
 - machinery operating principles and safe operating methods
 - organisation recording and reporting procedures
 - potential hazards associated with the operation of basic tools and equipment
 - signs of pest and disease infestation (such as bacterial wilt in lucerne), moisture stress and nutrient deficiencies
 - symptoms of crop lacking health and vigour

- types and uses of herbicides, insecticides and other pesticides and alternative pest control methods (non-chemical)
- work health and safety and pesticides legislative and enterprise requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs

AHCSDP304 Harvest seed crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to harvest seed crops. It applies to workers on properties where commercial seed production is undertaken. Workers operate with some judgement and discretion and work would normally be carried out under minimal supervision within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed production (SPD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to harvest seed crops	1.1 Confirm harvest requirements 1.2 Identify work health and safety hazards, assess risks and implement risk controls for the harvesting operation

Element	Performance criteria
	1.3 Select, use and maintain personal protective equipment (PPE) 1.4 Identify the environmental impacts of harvesting the crop and take action 1.5 Sample crop for moisture content to assess timing of harvest 1.6 Identify from the harvest strategy or the crop storage plan the hygiene standards for the crop and the paddock
2. Prepare the harvesting equipment	2.1 Clean harvesting machinery and other equipment of pests and other contaminants to maintain crop and paddock hygiene standards 2.2 Assess machinery and equipment for reliability 2.3 Service, adjust and replace parts of machinery and equipment for harvesting conditions 2.4 Dispose of all containers, leftover fluids, waste and debris from the maintenance and servicing work 2.5 Document all maintenance and servicing according to the requirements of the organisation
3. Harvest crops	3.1 Follow and complete the harvest strategy for each paddock 3.2 Operate harvesting machinery at speeds to suit crop conditions 3.3 Maintain the hygiene of all surfaces that come into contact with the crop 3.4 Check and adjust the harvester height and other settings 3.5 Take fire prevention measures as described in the harvest strategy
4. Complete harvesting operations	4.1 Clean equipment in accordance with manufacturer's specifications, organisational procedures and regulations 4.2 Clean and store attachments and other ancillary equipment according to manufacturer's specifications and regulations 4.3 Apply insecticides as required by the harvest strategy 4.4 Dispose of all containers, leftover fluids, waste and debris from the maintenance and servicing work 4.5 Move harvesting equipment in compliance with legislation that includes hygiene requirements 4.6 Complete all required records and documentation accurately and promptly

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDP304A Harvest seed crops.

Assessment Requirements for AHCS DP304 Harvest seed crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- complete pre and post operational checks on tools, harvesting machinery and equipment
- handle and manoeuvre harvesting equipment
- monitor efficiency of harvesting equipment and make adjustments to height and other settings
- perform routine safety, service and maintenance procedures on tools, harvesting machinery and equipment
- sample crops to assess moisture content and maturity/ripeness of the crop
- transport, clean and store harvesting equipment
- complete records and documentation accurately and promptly

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of seed crop harvesting
 - appropriate legislative requirements, manufacturer's instructions and organisation procedures/instructions
 - certified seed procedures
 - environmental impacts associated with the operation of machinery and equipment in a harvesting context
 - fire prevention strategies
 - general machine maintenance procedures
 - hygiene procedures for harvesting machinery and equipment
 - machinery operating principles and operating methods

- organisation moisture and hygiene requirements for the crop and equipment that comes into contact with the crop such as bins, augers, trucks and harvesters
- organisation recording and reporting procedures
- pests and signs of pest infestation in the crop
- potential hazards and safe operating procedures for basic tools and equipment
- pre-operational and safety checks, servicing and maintenance procedures for tools and equipment
- requirements for harvesting machinery and equipment transport
- safe operating procedures and standards for harvesting and ancillary equipment
- seed quality and the impact of harvesting practices (such as on lucerne seed)

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDP401 Plan a seed crop establishment program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan a seed crop establishment program. It applies to workers on properties where commercial seed production is undertaken.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed production (SPD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine requirements of the	1.1 Determine paddock suitability for a seed crop from its history 1.2 Identify species and cultivars that meet production needs, cost the

Element	Performance criteria
seed crop establishment program	required quantity and confirm availability with suppliers 1.3 Determine crop establishment procedures 1.4 Plan post-planting care according to production needs, enterprise standards and site capabilities 1.5 Identify and plan for plant germination and nutrient requirements taking account of soil characteristics 1.6 Cost resources, equipment and machinery required for planting and post-planting care and confirm availability 1.7 Identify work health and safety hazards associated with the crop establishment program, assess risks and develop controls
2. Prepare and document the seed crop establishment program	2.1 Prepare plans based on the crop establishment program and production requirements 2.2 Produce plan which can be readily understood by personnel 2.3 Develop and communicate procedures and schedules for the planting and post-planting care 2.4 Plan for contingencies and identify alternative strategies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDP401A Plan a seed crop establishment program.

Assessment Requirements for AHCS DP401 Plan a seed crop establishment program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess site factors
- determine resources and equipment for planting and post-planting care
- identify threats to pasture establishment including weeds, pests and diseases
- select suitable pasture species and cultivars

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for planning seed crop establishment
 - environmental impacts of seed crop establishment
 - establishment techniques of specific seed crop species and cultivars
 - maintenance requirements and practices for specific seed crop species and cultivars after initial establishment
 - planning process, including costing and scheduling of works
 - plant identification of seed crops and weed species
 - role of crops in sustainable land use
 - seed crop varieties and their characteristics, requirements and production potential
 - seed production contracts
 - the advantages and disadvantages of seed crop establishment procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDP402 Supervise seed crop establishment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise seed crop establishment. It applies to workers on properties where commercial seed production is undertaken.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed production (SPD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare planting plan	1.1 Determine from the organisation's production plan the seed crop and method of planting to be used

Element	Performance criteria
	<p>1.2 Assess and calculate the resources required for the planting operations from the area to be sown, the method of planting to be used, and the available timelines</p> <p>1.3 Set the target dates for planting, including the sequencing for planting across paddocks or crop areas, in line with the overall production/management planning for the organisation</p> <p>1.4 Select and organise the chemical applications required pre- and post-planting to occur at an appropriate time</p> <p>1.5 Prepare the plan to ensure that any potential detrimental environmental impacts are minimised or eliminated, including the proper disposal of containers, drums and other waste</p> <p>1.6 Identify and assess Occupational Health and Safety (OHS) hazards</p> <p>1.7 Implement and oversee staff carrying out safe work practices for planting</p> <p>1.8 Seek, identify and obtain any approvals required for the planting operations</p> <p>1.9 Determine measurable indicators, specifications and targets, based on the production/management plan and the method, resources, and seed to be used</p>
2. Determine scheduling and key responsibilities	<p>2.1 Determine scheduling for planting, taking into consideration the range of geographic and resourcing factors, as well as operations that will be occurring at the same time as the planting</p> <p>2.2 Determine the key responsibilities for specific preparatory processes that are required before planting</p> <p>2.3 Determine key responsibilities for specific implementation processes</p> <p>2.4 Determine and put in place recordkeeping requirements and procedures to ensure compliance with the range of applicable regulations</p> <p>2.5 Clearly document the plan, including scheduling and key responsibilities relating to the type, format, frequency and detail of any reporting required by both managers and operators</p>
3. Monitor and adjust the planting plan	<p>3.1 Adhere to monitoring points outlined in the implementation plan</p> <p>3.2 Carry out checks to ensure that OHS procedures are being observed and followed</p> <p>3.3 Carry out checks to ensure that the site environmental requirements are being observed and followed</p> <p>3.4 Communicate regularly with operational staff and contractors to ensure smooth operation and progress</p> <p>3.5 Carry out checks to ensure that the documentation required by the organisation, or other regulating bodies, is completed clearly and</p>

Element	Performance criteria
	accurately during the progress of the planting process 3.6 Initiate and take action where any corrective action or amendment to the planting plan is required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDP402A Supervise seed crop establishment.

Assessment Requirements for AHCS DP402 Supervise seed crop establishment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine planting scheduling for planting and the key responsibilities for preparatory and implementation processes
- carry out pest, weed and disease control either pre- or post-planting if required
- identify the seasonal conditions which affect crop establishment
- plan the planting operation including timing and resources required
- supervise staff and monitor the planting operation
- monitor the planting operation
- adjust the planting plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for supervising seed crop production
 - crop establishment requirements
 - environmental controls and codes of practice applicable to the enterprise
 - equipment servicing requirements
 - integrated pest and weed management techniques
 - legislation, codes of practice and enterprise procedures for workplace health and safety and environmental management
 - management practices and processes to minimise environmental impacts such as noise, soil degradation and debris from planting operations
 - Plant Breeder's Rights and open market seed

- the equipment that is required for a range of tillage methods, and pest and weed control prior to planting

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDP403 Plan and implement seed crop maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and implement seed crop maintenance. It applies to workers on properties where commercial seed production is undertaken.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed production (SPD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine condition of seed crops	1.1 Calculate soil water percentage from an assessment of soil moisture

Element	Performance criteria
	1.2 Calculate water requirement according to soil analysis data, standing crop and forecast weather conditions 1.3 Assess nutrient requirements and availability for crops and identify deficiencies 1.4 Identify factors affecting crop capacity 1.5 Implement sustainable land management
2. Determine pest control	2.1 Assess evidence of pests and disease and determine integrated control measures appropriate to type and species of infestation 2.2 Locate areas of weed infestation and identify species 2.3 Select integrated control methods to control pests and weeds 2.4 Schedule control methods at the optimum time 2.5 Record severity of infestations and keep treatment records
3. Manage crop health	3.1 Maintain crop water and nutritional requirements 3.2 Monitor the weed and pest control program and modify as required 3.3 Assess benefits from soil and plant inputs and treatments and document for analysis in future management programs 3.4 Monitor cropping programs for efficiency and effectiveness and document for future best practice 3.5 Document relevant data for continual analysis and effective crop management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDP403A Plan and implement seed crop maintenance.

Assessment Requirements for AHCS DP403 Plan and implement seed crop maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess crop needs
- carry out crop cultural practices and treatments
- determine time of harvest with specialist advice
- determine water requirements from survey advice and weather forecasts
- measure soil moisture and interpret data
- monitor and assess crop maturity

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of seed crop maintenance
 - chemical use if applicable
 - crop growth requirements compared to soil nutrient status
 - crop growth stages and keys
 - factors leading to development of chemical resistance
 - fertiliser and soil ameliorant types and application times, methods and rates
 - integrated pest management strategies
 - legislation and codes of practice with regard to environmental protection
 - life-cycles of pest, diseases and weeds
 - relevant codes of practice with regard to the use and control of hazardous substances
 - work health and safety legislative requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCS DP404 Supervise seed crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- arrange storage and delivery requirements
- assess crop maturity and quality in readiness for harvesting
- establish strategies, procedures and controls for crop harvesting, including fire prevention and control plans
- estimate crop yields
- maintain budgetary controls
- negotiate and arrange contracts and agreements
- segregate grain for quality and monitor for moisture content

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of seed crop harvesting
 - crop maturity and yield potential
 - crop measurement techniques and parameters
 - environmental controls and codes of practice applicable to harvesting operations
 - functions and limitations of harvesting equipment
 - grain or seed quality
 - hygiene requirements for certified seed
 - location and relative skills and abilities of available contractors
 - market information and sources
- relevant legislation, codes of practice and enterprise requirements for work health and safety, contractor engagement, environment and pesticides

- supervisor responsibilities in managing the safety of a workplace
- weather conditions which may affect the harvest

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDP405 Inspect a seed crop for quality assurance purposes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to undertake a field inspection and prepare a report on a commercial seed production crop. It applies to workers on properties where commercial seed production is undertaken.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed production (SPD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for field inspection	1.1 Research paddock history and crop type before inspection 1.2 Determine inspection date according to suitable crop growth stage

Element	Performance criteria
	and related activities 1.3 Arrange a suitable time for crop inspection with grower 1.4 Check and prepare vehicle, machinery, equipment and recording materials before undertaking crop inspection
2. Undertake a visual analysis of a commercial seed crop	2.1 Identify weed species visually and record weed counts or density 2.2 Inspect visually and record insect/disease damage 2.3 Inspect visually and record the varietal identity of crop 2.4 Inspect visually and record varietal purity of crop, i.e. the presence of off-types 2.5 Estimate yield by counting crop plants using a quadrat or rule
3. Complete an inspection report	3.1 Document and analyse results of visual inspection 3.2 Determine the quality and suitability of the crop for commercial and/or regulatory production 3.3 Record the determination in a crop inspection report and forward to relevant parties
4. Complete decontamination procedure prior to leaving site	4.1 Check and clean vehicles, machinery and equipment of seeds, soil and other contaminants 4.2 Check and clean clothing and footwear of seeds, soil and other contaminants 4.3 Dispose of contaminants and other foreign materials

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDP405A Inspect a seed crop for quality assurance purposes.

Assessment Requirements for AHCSDP405 Inspect a seed crop for quality assurance purposes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for a field inspection
- visually analyse a commercial seed crop
- complete a crop inspection report
- classify seed to species and/or variety level
- update seed reference collection
- use taxonomic terms to describe seed
- carry out decontamination prior to leaving a site

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of seed crop inspection
 - concepts of disease pressure
 - concepts of pest pressure
 - crop sampling techniques and use of quadrats
 - crop/seed certification systems for example Organisation for Economic Co-operation and Development (OECD), Australian Seed Authority (ASA)
 - field inspectors reports
 - hygiene requirements for crop inspectors
 - plant breeders' rights
 - relevant health, safety and environment requirements
 - requirements of Australian Quarantine Inspection service (AQIS) and AQIS Authorised Officers (AAO) phytosanitary reports

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDT301 Prepare a working sample

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to obtaining a working sample from a seed sample submitted for testing. It applies to seed analysts working within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Receive submitted sample	1.1 Receive submitted sample and verify with submitted documentation 1.2 Notify supervisor if type, condition or quantity of sample is unsatisfactory

Element	Performance criteria
	1.3 Check paperwork and complete labelling and data entry 1.4 Prepare submitted sample for testing as soon as practicable 1.5 Handle submitted sample and, if necessary, store under optimum species specific conditions
2. Reduce sample	2.1 Check working area and equipment for cleanliness 2.2 Reduce submitted sample to equal or greater than the required working sample size 2.3 Undertake sample reduction using prescribed apparatus and methods 2.4 Use mechanical dividers where appropriate 2.5 Present working sample for testing 2.6 Complete labelling and records
3. Store working sample after testing	3.1 Check and verify records and labels for tested samples before storing 3.2 Handle samples according to enterprise guidelines where live insects have been detected before storage 3.3 Store samples after testing in environmental conditions that minimise changes in seed quality traits

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for seed identification	1.1 Confirm seeds requiring identification 1.2 Prepare resources and equipment for use in identification 1.3 Identify, select and prepare for use, processes for seed identification

Element	Performance criteria
2. Identify seed	2.1 Identify specified seeds according to their general characteristics 2.2 Record botanical name of seed to species level where possible 2.3 Seek advice when necessary and where appropriate to confirm identification
3. Update the reference collection	3.1 Consult supervisor about possible addition to the reference collection 3.2 Document information and add the seed to the reference collection if appropriate

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT302A Identify seeds.

Assessment Requirements for AHCSDT302 Identify seeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for seed identification
- recognise or identify seed to genus and, where possible, species level
- contribute to enterprise seed reference collection

Knowledge Evidence

The candidate must demonstrate knowledge of:

- binomial nomenclature
- concepts of seed identification
- enterprise and/or legal traceability requirements
- enterprise standard operating procedures (SOPs)
- relevant work health, safety and environment requirements
- seed identification techniques
- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDT303 Perform a fluorescence test on seeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform tests that determine the presence of seeds of annual ryegrass species in seedlots of perennial ryegrass. It applies to seed analysts working within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for a fluorescence test	1.1 Identify seed to be tested and complete records 1.2 Prepare working sample from submitted sample 1.3 Prepare the required number of replicates of 100 seeds 1.4 Prepare substrate as prescribed for a germination test using

Element	Performance criteria
	dormancy breaking treatments if necessary 1.5 Place replicates in a germination cabinet/room
2. Assess germinated seeds	2.1 Count off and record all un-germinated seeds and abnormal seedlings 2.2 Examine normal seedlings under ultra violet light 2.3 Count off and record normal seedlings that have fluorescent roots under ultra violet light 2.4 Count off and record normal seedlings that do not have fluorescent roots under ultra violet light 2.5 Minimise exposure of bare skin to ultra violet light 2.6 Complete enterprise worksheet
3. Maintain a safe work environment	3.1 Record, calculate and report results of test 3.2 Collect and dispose of laboratory and hazardous waste safely 3.3 Clean and store apparatus and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT303A Perform a fluorescence test on seeds.

AHCSDT304 Perform a seed purity analysis

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to test the analytical purity of seed in a working sample to infer the composition of a seed lot. It applies to seed analysts working within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for a purity test	1.1 Identify samples, test methods and equipment to perform the test 1.2 Clean and calibrate equipment and working spaces 1.3 Prepare a working sample using mixing and dividing processes 1.4 Check and record sample details on worksheets and sample

Element	Performance criteria
	packets
2. Assess working samples	2.1 Separate the working sample into its component parts using appropriate equipment 2.2 Separate pure seed using visual characteristics, mechanical or pressure aids appropriate to the type of seed 2.3 Handle seeds carefully so as not impair their capacity for germination 2.4 Weigh separated component parts and matter to the number of decimal places required by enterprise guidelines 2.5 Identify contaminant seeds
3. Process and interpret data	3.1 Add and compare weights of all components' parts with original working sample weight 3.2 Undertake a retest if required 3.3 Refer to a supervisor seeds that cannot be identified 3.4 Calculate the percentage weight of various component parts to one decimal place 3.5 Add percentages of all fractions together and round to 100% 3.6 Report results of test

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT304A Perform a seed purity analysis.

AHCSDT305 Perform a seed moisture test

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to determination of the moisture content of seeds by an oven method for routine use. It applies to seed analysts working within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for testing	1.1 Check submitted sample is in an intact, moisture-proof container with as much air as possible excluded 1.2 Select appropriate apparatus for seed moisture testing 1.3 Equilibrate temperature of submitted sample to that of the testing

Element	Performance criteria
	laboratory 1.4 Reduce exposure of sample to the atmosphere of the laboratory to an absolute minimum, according to the species and ISTA requirements
2. Prepare samples for drying	2.1 Mix submitted sample thoroughly 2.2 Take a minimum of three subsamples and combine to form a working sample of the required size 2.3 Limit exposure to air to thirty seconds during sample reduction 2.4 Where cutting or grinding is required, prepare one working sample so that two replicates can be drawn from the cut/ground material 2.5 Undertake pre-drying where moisture content exceeds International Seed Testing Association (ISTA) requirements 2.6 Weigh containers and lids before and after filling 2.7 Ensure weighing procedures conform with ISTA requirements and express weight in grams to at least three decimal places 2.8 Keep lids on containers until samples are placed in oven
3. Dry and weigh sample	3.1 Distribute working sample evenly over the surface of the container 3.2 Rapidly place open containers and their lids into an oven maintained at the required temperature for the species being tested 3.3 Commence drying period once oven returns to the required temperature after placement of containers 3.4 Replace lids before cooling to ambient temperature in desiccators at the end of prescribed drying period 3.5 Weigh the containers with lids and dried contents after cooling
4. Calculate results	4.1 Express moisture content as a percentage of the weight of the original sample 4.2 Report result of test

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT305A Perform a seed moisture test.

AHCSDT306 Perform a seed germination test

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to performing germination tests on a seed sample under laboratory conditions. It applies to seed analysts working within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret and schedule test requirements	1.1 Identify seeds to be germinated, test methods and equipment 1.2 Recognise hazards and enterprise control measures associated with the sample, seed pre-treatment, test methods, reagents and/or equipment

Element	Performance criteria
	1.3 Plan work sequences
2. Prepare materials for test	2.1 Draw prescribed number of replicates 2.2 Select and prepare growing media 2.3 Pre-treat seed to break physiological dormancy where necessary 2.4 Check water quality and pH is within required tolerances 2.5 Check and prepare apparatus and equipment for germinating seeds
3. Plant and maintain seeds	3.1 Plant seed on or into selected media 3.2 Monitor temperature and light conditions of germination apparatus in accordance with test procedures
4. Evaluate test results	4.1 Categorise seedlings and count as normal or abnormal 4.2 Assess un-germinated seed as hard, fresh or dead 4.3 Assess other determinations for un-germinated seed if required 4.4 Record and report results
5. Maintain a safe work environment	5.1 Use safe work practices and personal protective equipment (PPE) 5.2 Minimise wastes and environmental impacts 5.3 Collect and dispose of laboratory and hazardous waste 5.4 Clean and store equipment and reagents

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT306A Perform a seed germination test.

AHCSDT307 Perform a 'Determination of Other Seeds by Number' test

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to estimate the number of other species of seeds either generally (e.g. all other species) or by reference to one category or species of seed. It applies to seed analysts working within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare a working sample	1.1 Identify seed to be tested and complete records 1.2 Prepare a working sample from submitted sample

Element	Performance criteria
	1.3 Ensure that size of working sample conforms with International Seed Testing Association (ISTA) rules 1.4 Select the extent of determination of other species based on client requirements, seed quantity or seed characteristics
2. Examine seeds in working sample	2.1 Search working sample for seeds of all other species or of certain stated species as required 2.2 Count number of seeds found for each species
3. Calculate results	3.1 Express result as the number of seeds belonging to each stated species or category found in the quantity examined 3.2 Calculate the number of seeds per unit weight 3.3 Express result as total number of seeds found in total weight examined where two or more tests are carried out 3.4 Make comparison of result with other determinations in the same or in a different laboratory
4. Report results	4.1 Report result under 'other determinations' 4.2 Record actual weight of seed examined 4.3 Record the scientific name and number of seeds of each species sought and found in the actual weight of seed examined 4.4 Record the extent of other species of seed

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCSDT401 Maintain a quarantine approved laboratory

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and monitor a quarantine-approved laboratory that meets Department of Agriculture (DA) certification.

It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret and communicate quarantine	1.1 Keep and update information on quarantine requirements impacting on laboratory 1.2 Distribute clear information on the responsibilities of individuals

Element	Performance criteria
requirements	to maintain the laboratory's quarantine compliance 1.3 Explain to all personnel the implications of non-compliance within the laboratory
2. Ensure that work practices are compliant	2.1 Plan work practices to ensure compliance 2.2 Implement testing procedures so that methods and equipment are fit for purpose 2.3 Implement systems to ensure the accuracy and/or efficiency of equipment 2.4 Coach and mentor team members to manage their responsibilities around maintaining quarantine compliance in the laboratory
3. Monitor, analyse, adjust and report performance	3.1 Identify, rectify and report actual and potential problems with quarantine compliance 3.2 Minimise potential non-compliance through on-going analysis and supervision activities 3.3 Advise laboratory personnel of strategies to improve compliance 3.4 Communicate new and improved procedures to laboratory personnel 3.5 Maintain systems, records and reporting procedures according to DA requirements
4. Investigate, rectify and report non-conformance	4.1 Investigate and manage incidents and occurrences of non-compliance 4.2 Provide on and/or off job training for laboratory personnel to acquire and apply competencies to meet compliance 4.3 Redesign or adjust work practices to ensure that non-compliance is not repeated

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT401A Maintain a quarantine approved laboratory.

Assessment Requirements for AHCSDT401 Maintain a quarantine approved laboratory

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- maintain and monitor a quarantine approved laboratory that meet Department of Agriculture (DA) certification
- initiate appropriate action to rectify potential problems or instances of non-compliance
- keep required records complete, current and secure as required by DA
- design and negotiate changes to work processes and procedures to meet DA compliance
- provide coaching and mentoring support to laboratory personnel to change work practices
- provide information to laboratory staff on DA compliance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- DA requirements for a quarantine approved laboratory
- compliant laboratory systems, records and reporting procedures
- enterprise standard operating procedures (SOPs)
- relevant health, safety and environment requirements
- statutory and legal compliance requirements
- coaching and mentoring strategies

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDT402 Prepare and maintain a seed reference collection

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare and maintain a seed reference collection that can be used in the identification of seeds and which enables the quality control of laboratory procedures. This unit does not include the identification of seeds.

It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Acquire responsibility	1.1 Review standard operating procedures for maintaining a seed

Element	Performance criteria
for a seed reference collection	reference collection 1.2 Check existing seed reference materials to ensure labels and records are up to date 1.3 Confirm procedures for introducing new seeds to the collection 1.4 Establish record keeping and staff access arrangements
2. Maintain a seed reference collection	2.1 Review storage conditions to ensure that they comply with SOPs 2.2 Monitor storage conditions to ensure specimens remain in good condition 2.3 Update collection and records as new seeds are added 2.4 Advise management of indicators of deterioration of seeds in collection
3. Update the reference collection	3.1 Update reference collection as new seeds are identified and identification has been appropriately verified 3.2 Document information about seed specimen and add to the reference collection 3.3 Source new verified specimens as required to maintain currency and relevance of the collection
4. Provide seed reference materials on request	4.1 Provide seed reference material with action taken to prevent contamination 4.2 Verify external requests for access to the seed reference collection and seek approval before being processed 4.3 Maintain records of access to collection and removal of seeds from collection
5. Maintain a safe work environment	5.1 Observe safety and biosecurity protocols when handling and processing seed reference materials 5.2 Dispose of redundant, diseased and outdated seed safely and appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT402A Prepare and maintain a seed reference collection.

Assessment Requirements for AHCSDT402 Prepare and maintain a seed reference collection

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate with clients and others
- keep workplace records
- prepare, maintain and update a seed collection for the identification of seeds
- source new materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise Standard Operating Procedures (SOPs)
- quarantine and isolation procedures
- relevant health, safety and environment requirements
- seed biology
- seed reference collections - what they are, when and why they should be used
- storage requirements of different seed varieties
- taxonomic nomenclature

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDT403 Perform an Anguina test on annual ryegrass seed

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to test annual ryegrass seed for nematode gall (*Anguina spp.*).

It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for <i>Anguina</i> testing	1.1 Review test request to identify samples to be tested, required test methods, equipment and staff to be involved in the test 1.2 Clean and calibrate equipment and working space

Element	Performance criteria
	1.3 Prepare the working sample or sub-samples using mixing and dividing processes 1.4 Record sample details on worksheets and sample packets
2. Inspect seed samples	2.1 Inspect a prescribed sample weight of ryegrass seed on a diaphanoscope for the presence of galls 2.2 Separate any galls present into yellow and black galls, count and report separately
3. Examine galls	3.1 Soak galls in water for prescribed period 3.2 Dissect galls and examine under a microscope for the presence of nematodes 3.3 Record the presence of nematodes
4. Report results	4.1 Review testing procedures carried out by analysts 4.2 Issue a report of 'no galls found' where no galls are found on the prescribed weight of seed 4.3 Report as 'number of galls per sample weight' where galls containing nematodes have been detected

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT403A Perform an Anguina test on annual ryegrass seed.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCSDT403 Perform an Anguina test on annual ryegrass seed

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify galls on ryegrass seed
- inspect seed samples using a diaphanoscope
- plan and delegate testing tasks
- use a microscope to detect nematode gall (*Anguina spp.*)

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic nematode identification
- enterprise standard operating procedures (SOPs)
- recording and reporting protocols
- relevant health, safety and environment requirements
- seed biology

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDT404 Develop and implement laboratory policy and procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and implement workplace policies and procedures in a seed testing laboratory, including modifying policy to suit changed circumstances.

It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and who demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop workplace	1.1 Define scope of policy and procedures

Element	Performance criteria
policy and procedures	1.2 Identify and consult stakeholders as a key component of the development process 1.3 Review operational strategies relevant to all stages of work covered by the policy 1.4 Propose recommendations for policy and procedures options based on likely effectiveness, timeframes and cost 1.5 Reflect the organisation's purpose and operational goals in the policy and procedures 1.6 Seek agreement on implementation strategy
2. Communicate the policy	2.1 Promote the policy and procedures and the expected outcome to key stakeholders 2.2 Assign the expected outcomes, activities to be undertaken and responsibilities and inform those involved in implementing the policy and procedures
3. Implement the policy	3.1 Develop and communicate processes to help implement the policy and procedures 3.2 Establish record system for tracking adoption of policy and procedures
4. Review policy implementation	4.1 Provide outcomes and feedback to key personnel and stakeholders 4.2 Identify issues and non-conformances that may require remedial action 4.3 Investigate success or otherwise of policy and procedures 4.4 Modify policy and/or procedures as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT404A Develop and implement laboratory policy and procedures.

Assessment Requirements for AHCSDT404 Develop and implement laboratory policy and procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and implement workplace policies and procedures
- modify policy to suit changed circumstances
- monitor and analyse effectiveness of policy and procedures
- prepare strategies for communicating and implementing policy and procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise standard operating procedures (SOPs)
- equal employment opportunity, equity and diversity principles and occupational health and safety implications of policy/s being developed
- legislation, protocols and rules impacting on the laboratory workplace
- relevant policy and procedure development and implementation processes
- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDT405 Handle and store quarantinable seeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to store and handle seeds subject to quarantine or isolation in accordance with laboratory procedures and in compliance with Australian Department of Agriculture (DA) or other regulatory requirements.

It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Handle and test quarantinable seed	1.1 Plan work practices involving the handling and testing of quarantinable seed to ensure compliance

Element	Performance criteria
	1.2 Undertake seed testing procedures so that methods and equipment are fit for purpose 1.3 Implement procedures to ensure the accuracy, efficiency and DA compliance of equipment 1.4 Supervise and mentor team members to ensure DA compliance
2. Store quarantinable seeds	2.1 Identify DA and laboratory requirements for storage facilities and associated document processes 2.2 Store quarantinable seeds in accordance with DA requirements and documented procedures 2.3 Secure stored quarantinable seed to prevent unauthorised access
3. Report non-compliance	3.1 Report incidents and occurrences of non-compliance with storage or handling of quarantinable seeds 3.2 Provide supervision and training for laboratory personnel to meet compliance 3.3 Redesign or adjust workplace practices to prevent repetition of non-compliance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT405A Handle & store quarantinable seeds.

Links

Assessment Requirements for AHCSDT405 Handle and store quarantinable seeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle and store quarantinable seeds
- maintain records and documentation relating to DA compliance
- redesign work procedures to prevent reoccurrence of non-compliance
- report non-compliance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- DA requirements required for handling and storing quarantinable seeds
- laboratory systems, records and reporting procedures for dealing with quarantinable seeds
- relevant work health, safety and environment requirements
- statutory and legal compliance requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDT406 Undertake internal audits in a seed laboratory

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out an internal audit in a seed testing laboratory. It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and they analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for internal audit	1.1 Review previous internal audits 1.2 Source and review relevant enterprise documents 1.3 Prepare audit plan to suit staff availability and laboratory operations 1.4 Prepare appropriate checklists and audit related documentation

Element	Performance criteria
	1.5 Agree on specific methods and techniques
2. Conduct audit	2.1 Ensure seed testing techniques are conducted by analysts and observed and reported on by auditor 2.2 Use questioning strategies to obtain further information on testing techniques and approaches from analysts 2.3 Report deviations to the standard operating procedures (SOPs) observed during observations of testing 2.4 Inspect seed storage, chemical store and sampling areas 2.5 Scrutinise work charts, schedules, reports and plans 2.6 Ensure the availability and currency of laboratory documents 2.7 Inspect archived documents to ensure they are complete and meet the statutory holding period
3. Report findings	3.1 Hold staff meeting to discuss outcomes of audit 3.2 Complete continuous improvement forms by auditor with suggested corrective actions 3.3 Prepare and provide an audit report to management for review 3.4 Present continuous improvement forms at future staff meetings until all corrective action is completed 3.5 File data collected during audit in laboratory information management system 3.6 Maintain confidentiality and security of enterprise information and laboratory data

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT406A Undertake internal audits in a seed laboratory.

Assessment Requirements for AHCSDT406 Undertake internal audits in a seed laboratory

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare an audit plan and strategy for a seed testing laboratory audit
- gather data and information by a variety of methods
- undertake an internal audit in a seed testing laboratory
- prepare an audit report for management review
- develop a continuous improvement report with suggested corrective actions

Knowledge Evidence

The candidate must demonstrate knowledge of:

- auditing methods and techniques
- enterprise standard operating procedures (SOPs)
- relevant legislation affecting business operation
- seed testing techniques, equipment and methodologies
- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDT407 Perform an endophytic seed test

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to determine of the presence of fungal endophyte in certain grasses.

It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for endophyte testing	1.1 Review test request to identify samples to be tested, test methods and equipment 1.2 Clean and prepare equipment and working space

Element	Performance criteria
	1.3 Prepare endophyte staining solution and alkaline or acid solution depending on method to be used 1.4 Prepare working sample from Pure Seed
2. Test seed for endophyte presence	2.1 Soften seed for recommended time in the prepared solution at the prescribed temperature 2.2 Rinse seed thoroughly in running tap water 2.3 Remove lemma, palea and endosperm from seed and place the remaining tissue on a microscope slide in a drop of endophyte staining solution crushing if necessary 2.4 Place cover glass on seed, applying gentle pressure and blot up excess stain 2.5 Examine seed with compound microscope and score as positive if endophytic hyphae are present, or negative if absent
3. Test seedlings for endophyte presence	3.1 Take 200-250 seeds from working sample at random 3.2 Sow seeds in good quality commercial potting mix at low density to allow for good growth 3.3 Examine well-developed seedlings from the germinated sample after growing for a minimum of 42 days 3.4 Cut seedling away from remnant seed and remove outermost sheath from the base of the seedling 3.5 Discard sheaths which are discoloured or have developed chlorophyll 3.6 Isolate a 3-5 mm wide longitudinal section of the sheath and place section on a microscope slide with the epidermis side down 3.7 Stain section immediately with the endophyte staining solution for prescribed time period 3.8 Place cover glass over the stained sheath section, press gently and blot of any excess staining solution 3.9 Examine the section with compound microscope and score as positive or negative if endophytic hyphae are present or absent
4. Record and report test results	4.1 Enter results under 'other determinations' 4.2 Record sample size used for testing and whether seeds or seedlings were tested 4.3 Report results in terms of the percentage of seeds or seedlings in which endophyte was detected

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT407A Perform an endophytic seed test.

AHCSDT408 Perform an electrophoresis test on a seed sample

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to test seed by separating proteins of varying size and/or electric charge to get a banding pattern that can be used to identify or verify a particular variety.

It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and who demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare seed extraction and	1.1 Prepare working sample from submitted sample 1.2 Identify seed to be tested and complete records

Element	Performance criteria
gel	1.3 Cut or crush single seeds and transfer to centrifuge tubes 1.4 Add extraction solution and mix with crushed seeds and allow to stand for prescribed period 1.5 Centrifuge tubes and collect and store supernatants 1.6 Prepare gel mixture and chemicals and use to achieve required level of polymerisation
2. Carry out electrophoresis	2.1 Place buffer solution in tanks 2.2 Load samples into wells and place gel in tanks 2.3 Carry out electrophoresis at the prescribed voltage and duration 2.4 Maintain temperature as required throughout the process
3. Fix and stain sample	3.1 Remove gel from tank and treat with chemicals as prescribed 3.2 Wash gel and treat to enhance stain 3.3 Examine and/or photograph stain
4. Evaluate stain	4.1 Compare banding pattern with that of an authentic variety or that of a known control sample 4.2 Provide records and reports 4.3 Determine if obvious procedure or equipment problems have led to atypical data or results
5. Maintain a safe work environment	5.1 Use established safe work practices and personal protective equipment 5.2 Minimise the generation of wastes and environmental impacts 5.3 Ensure the safe collection of laboratory and hazardous waste for subsequent disposal 5.4 Care for and store equipment and reagents
6. Maintain laboratory records	6.1 Enter approved data into laboratory information management system 6.2 Maintain confidentiality and security of enterprise information and laboratory data

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT408A Perform an electrophoresis test on a seed sample.

AHCSDT409 Perform a tetrazolium test

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform a tetrazolium test to assess seed viability or germination potential.

It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare replicates for testing	1.1 Draw seeds from the pure seed fraction for the number of replicates to be tested ensuring there is no selection of seed which may cause biased results

Element	Performance criteria
	1.2 Use safe work practices and personal protective equipment
2. Prepare seed and tetrazolium solution	2.1 Pre-moisten seed under prescribed temperature and light conditions to reduce possibility of injury to seeds when puncturing or cutting and to enable penetration of the tetrazolium solution 2.2 Remove sticky mucilage from seeds as necessary 2.3 Expose seed tissue before staining as appropriate for the species being tested 2.4 Keep seeds moist before testing 2.5 Prepare tetrazolium solution using distilled water and add trace amounts of fungicide or antibiotics to solution if necessary for the species being tested
3. Stain with tetrazolium solution	3.1 Immerse seeds in tetrazolium solution 3.2 Maintain test at a temperature within the range 20 to 40°C, and maintain low light levels to facilitate staining 3.3 Increase duration of staining if temperatures below 30°C are used or decrease if higher temperatures are used 3.4 Decant the solution at end of staining period, rinse seeds with water and keep damp
4. Evaluate test results	4.1 Examine and evaluate each seed as viable or non-viable based on staining patterns applicable to the species being tested 4.2 Count the number of seeds considered viable in each replicate 4.3 Calculate the percentage of viable seed in each replicate and determine average percentage of viable seed across all replicates
5. Finalise reporting and clean up	5.1 Record and report results of test 5.2 Collect and dispose of laboratory and hazardous waste 5.3 Clean apparatus and equipment used in tetrazolium test and dispose of used chemicals and solutions safely

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT409A Perform a tetrazolium seed viability test.

Assessment Requirements for AHCSDT409 Perform a tetrazolium test

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare replicates for testing
- prepare seed and tetrazolium solution
- stain seeds with a tetrazolium solution
- evaluate and report test results
- record and report test results
- clean apparatus and equipment used in test and dispose safely of used products

Knowledge Evidence

The candidate must demonstrate knowledge of:

- calculations, tolerances and rounding results
- enterprise and/or legal traceability requirements
- enterprise standard operating procedures (SOPs)
- interpretation and recording of test result, including simple calculations
- relevant health, safety and environment requirements
- seed biology
- tetrazolium testing procedures
- the role of the International Seed Testing Association (ISTA) and the ISTA Rules for Seed Testing

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSDT410 Perform a seed vigour test

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to test for seed vigour to provide information about planting value in a wide range of environments and/or storage potential of seed lots.

It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed testing (SDT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for a seed vigour test	1.1 Review test request to identify samples to be tested, required test methods and equipment

Element	Performance criteria
	1.2 Clean and calibrate equipment and working space to enterprise standards
2. Receive and prepare samples	2.1 Log samples using standard operating procedures (SOPs) 2.2 Record sample description, compare with specification and report discrepancies 2.3 Prepare samples in accordance with testing method requirements 2.4 Maintain traceability of samples from receipt to reporting of results 2.5 Ensure control samples are prepared to enterprise guidelines if they are being used
3. Check equipment before use	3.1 Set up equipment and instruments in accordance with test method requirements 3.2 Perform pre-use and safety checks 3.3 Identify and report faulty or unsafe components and equipment 3.4 Check equipment calibration using specified standards and procedures 3.5 Quarantine out of calibration equipment and instruments 3.6 Ensure reagents required for the test are available and meet quality requirements
4. Conduct test	4.1 Determine the test method to be used according to the type of seed or as requested by the person requesting the test 4.2 Clean equipment and maintain in a clean state 4.3 Prepare a working sample and replicates using mixing and dividing processes 4.4 Prepare, place and/or treat seed to suit test method requirements 4.5 Measure or count and record results as determined by test method
5. Evaluate test results	5.1 Count the number of seeds or seedlings with required characteristics in each replicate 5.2 Calculate the percentage of seed or seedlings with required characteristics in each replicate and determine average percentage across all replicates 5.3 Report result of seed vigour test
6. Process and interpret data	6.1 Record test data noting atypical observations 6.2 Record and report results 6.3 Interpret trends in data or results and report out of specification or atypical results 6.4 Determine if obvious procedure or equipment problems have led to atypical data or results
7. Maintain a safe work	7.1 Use established safe work practices and personal protective

Element	Performance criteria
environment	equipment 7.2 Minimise the generation of wastes and environmental impacts 7.3 Collect laboratory and hazardous waste for subsequent disposal 7.4 Clean and maintain equipment and store equipment and reagents
8. Maintain laboratory records	8.1 Enter approved data into laboratory information management system 8.2 Maintain confidentiality and security of enterprise information and laboratory data 8.3 Maintain equipment and calibration logs

AHCSDT411 Perform a 1000 seed weight test

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to determine the weight per 1000 pure seeds from a submitted sample.

It applies to senior seed analysts who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Seed testing

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare a working sample	1.1 Obtain pure seed following a purity analysis or as a representative fraction of a submitted sample 1.2 Use mechanical dividers where appropriate

Element	Performance criteria
	1.3 Maintain moisture content of working sample before counting through storing it in moisture-proof containers 1.4 Complete labelling and records
2. Count and weigh seed by machine	2.1 Put the entire working sample through a counting machine and record the total number of seeds indicated 2.2 Weigh working sample to the required number of decimal places
3. Count and weigh replicates by hand	3.1 Count out eight replicates of 100 seeds randomly from the working sample 3.2 Weigh each replicate to the required number of decimal places 3.3 Record weights of each replicate 3.4 Calculate variance, standard deviation and coefficient of variance 3.5 Test a new set of replicates where the coefficient of variance exceeds the prescribed value 3.6 Determine the average weight of 1000 seeds where the coefficient of variance does not exceed the prescribed value
4. Report results	4.1 Report results of weight determination under "other determinations" to the prescribed number of decimal places 4.2 Report the method used and the results calculated

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSDT411A Perform a 1000 seed weight test.

AHCSHG201 Crutch sheep

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to crutch a sheep.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AHCSHG201 Crutch sheep

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify potential and existing hazards to the supervisor
- select and use equipment and materials appropriate for crutching sheep
- avoid contamination, second cuts and damage to wool, animals and people
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- clean and maintain crutching equipment, site and facilities
- communicate problems, faults and workplace hazards to the owner or overseer
- tally crutched sheep count
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions, and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool.
- common sheep diseases as they relate to work health and safety and humane treatment of animals
- the impacts of sheep behaviour on moving, handling and shearing sheep
- personal protective clothing and equipment, and when and how it should be used

- Federal and/or State shearing awards and agreements associated with shearing sheep
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSHG202 Assist in preparing for shearing and crutching

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- arrange and position shearing equipment and materials ready for shearing or crutching
- maintain contamination and hazard-free environment for shearing and wool handling
- carry out minor maintenance and repairs to equipment and facilities as directed
- disposal of waste in accordance with enterprise environmental requirements
- communicate verbally with owner/classer and follow instructions
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- shearing shed layouts and equipment
- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role
- enterprise environmental policies

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSHG203 Shear sheep to novice level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed shearing a minimum of 40 adult merino sheep or 50 adult crossbred sheep per day to industry standards.

The candidate must provide evidence that they can:

- follow safe work practices
- select and use equipment and materials appropriate for shearing sheep
- load a handpiece correctly
- avoid contamination, second cuts
- shear sufficient sheep within eight hours to match novice skill level
- use appropriate suturing for cuts to sheep
- catch and release sheep safely
- provide due care and handle sheep humanely
- clean and maintain shearing equipment, site and facilities
- communicate problems, faults and workplace hazards to the owner or overseer
- tally shorn sheep count
- apply work health and safety policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions, and method of shearing

- safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool
- common sheep diseases as they relate to work health and safety and humane treatment of animals
- the impacts of sheep behaviour on moving, handling and shearing sheep
- personal protective clothing and equipment, and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG204 Shear sheep to improve r level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select, handle and shear sheep under supervision to improve r level.

Improver level is defined as shearing a minimum of 80 adult merino sheep or 100 adult crossbred sheep per day to industry standards.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad supervision and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AHCSHG208 Shear alpacas

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed shearing alpacas.

The candidate must provide evidence that they can:

- identify hazards, apply safe work practices and maintaining safe and hazard-free equipment
- select, set up and operate equipment appropriate to shearing tasks
- position alpaca and restrain for shearer safety
- handle and shear alpacas with due care using industry-accepted methods and procedures
- appropriately treat injured alpacas
- avoid contamination, second cuts and damage to fleece, alpacas and people
- demonstrate safe and environmentally responsible workplace practices
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare and biosecurity policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic alpaca anatomy and behavioural characteristics as they impact on shearing of alpaca
- common goat diseases and treatments as they impact on work health and safety and humane treatment of goats
- components and functions of shearing equipment and machinery
- industry-accepted handling and shearing techniques and positions
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG209 Support alpaca shearing operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to support alpaca shearing operations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity requirements and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for	1.1 Identify required materials, tools and equipment from provided

Element	Performance criteria
alpaca shearing support activities	<p>lists or a supervisor's instructions</p> <p>1.2 Check materials, tools and equipment and report to supervisor if there are insufficient available or faults</p> <p>1.3 Identify potential and existing hazards in the workplace and report to the supervisor</p> <p>1.4 Select, use and maintain suitable personal protective equipment</p>
2. Carry out alpaca shearing support duties	<p>2.1 Follow supervisor's instructions and seek clarification when necessary</p> <p>2.2 Handle, pen and work around alpacas in a safe and environmentally appropriate manner, using correct manual handling techniques and in accordance to enterprise and work health and safety guidelines and animal welfare policies</p> <p>2.3 Interact with others in a positive and professional manner</p> <p>2.4 Report problems or difficulties that may impact on completion of work to the required standards or achievement of timelines and take remedial action as directed</p> <p>2.5 Observe site quarantine and other biosecurity protocols</p> <p>2.6 Store waste material produced during alpaca shearing in a designated area</p> <p>2.7 Keep own work area clean and tidy while working and provide assistance as instructed to keep the general work area clean and tidy</p> <p>2.8 Monitor weather conditions post-shearing for risk of exposure for shorn animals</p>
3. Clean up on completion of alpaca shearing	<p>3.1 Return materials to store or dispose of according to supervisor's instructions</p> <p>3.2 Clean, maintain and store tools and equipment</p> <p>3.3 Report work outcomes to supervisor, seek feedback on performance and note any required improvements for future action</p> <p>3.4 Apply enterprise biosecurity policies</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG209A Support alpaca shearing operations

Assessment Requirements for AHCSHG209 Support alpaca shearing operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed supporting alpaca shearing operations.

The candidate must provide evidence that they can:

- identify hazards and apply safe work practices
- clean up during and on completion of alpaca shearing
- handle, pen and work around alpacas safely and humanely
- prepare and handle materials, tools and equipment for alpaca shearing support tasks
- apply work health and safety in the context of own work
- apply enterprise biosecurity protocols in the context of own work
- apply enterprise animal welfare policies in the context of own work
- apply enterprise environmental sustainability policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- alpaca fleece types
- basic fleece handling practices
- safe work practices associated with alpaca shearing activities
- shearing tools and equipment required for alpaca shearing
- biosecurity legislation and codes of practice applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG210 Undertake basic shearing and crutching

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required for basic wool removal as part of a shearing and crutching operation.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Set-up shearing handpiece as directed	1.1 Identify potential and existing hazards in the workplace and report to supervisor

Element	Performance criteria
	1.2 Check shearing equipment for correct operation 1.3 Assemble comb and cutter on handpiece 1.4 Set lead and throw 1.5 Set tension to enable comb and cutter to cut wool cleanly with minimum friction 1.6 Lubricate working surfaces and moving parts
2. Follow health and fitness procedures	2.1 Prepare for exercises to warm-up the body 2.2 Perform back, shoulder, leg, arm, and abdomen stretches 2.3 Recognise the necessities of hydration, nutrition and rest periods 2.4 Select suitable personal protective equipment and ensure correct fit
3. Catch sheep for shearing	3.1 Catch and move sheep in line with organisational, work health and safety, industry and animal welfare standards 3.2 Move sheep from the catching pen to the shearing board using safe manual handling techniques 3.3 Position sheep for shearing and crutching
4. Remove wool	4.1 Activate handpiece and position in readiness for shearing and crutching operations 4.2 Shear and crutch section of sheep as directed 4.3 Release sheep safely from the board into the count-out pens

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCSHG210 Undertake basic shearing and crutching

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow safety directions
- select, prepare and use tools equipment and materials appropriate for shearing sheep work
- ensure health and fitness for shearing
- avoid contamination, second cuts and damage to wool, sheep and people
- catch and shear a sheep in line with organisational, animal welfare and work health safety standards
- demonstrate safe and responsible workplace practices
- clean and maintain shearing equipment, site and facilities
- communicate problems, faults and workplace hazards, and to comprehend instructions provided by the owner or overseer

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing and crutching techniques, and positions and method of shearing
- features of safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe, humane removal of wool.
- common sheep diseases as they relate to work health and safety and humane treatment of animals
- the impacts of sheep behaviour on moving, handling and shearing sheep

- animal welfare requirements in relation to sheep
- personal protective clothing and equipment and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep
- work health and safety legislation and codes of practice apply to the job role
- animal welfare legislation and codes of practice apply to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG301 Prepare livestock for shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to sort and prepare livestock for shearing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity requirements and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Sort livestock for	1.1 Locate, identify and confirm livestock with as specified in

Element	Performance criteria
shearing	shearing plan 1.2 Muster livestock and move to shearing facilities, sort, count and yard livestock 1.3 Identify livestock with pigmented fleece and cull for separate shearing operations 1.4 Identify potential and existing hazards, assess risks and implement control measures in line with enterprise work health and safety policies 1.5 Select, use and maintain suitable personal protective equipment 1.6 Comply with animal welfare codes of practice
2. Prepare livestock for shearing	2.1 Check shearing, cleaning and drenching equipment for correct operation 2.2 Crutch livestock as required 2.3 Remove contaminated and stained wool and dispose of appropriately 2.4 Take livestock off feed to allow emptying out before shearing
3. Monitor livestock	3.1 Provide and maintain feed and water supplies for livestock 3.2 Provide and maintain suitable shelter for livestock 3.3 Monitor livestock condition and health status for evidence of sickness, and record or report as required 3.4 Monitor and control environmental implications associated with shearing activities 3.5 Apply enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCSHG301 Prepare livestock for shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed preparing livestock for shearing.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- select equipment appropriate to crutching and shearing tasks
- organise crutching and shearing operations
- muster, move, draft and handle livestock in compliance with animal welfare requirements
- observe and monitor livestock health and condition and detect disease or nutritional disorders and treat appropriately
- organise feed and water supplies
- avoid and remove contamination of fleece
- demonstrate safe and environmentally responsible workplace practices
- communicate verbally with work team and manager
- calculate livestock numbers, keep mobs separate
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work
- follow enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- different types and purposes of shearing boards, yards and catching pens
- components and functions of shearing, cleaning and drenching equipment
- handling, mustering and movement techniques

- livestock breeds, nutritional and hygiene requirements
- possible fleece contaminants and types of pigmentation faults
- biosecurity legislation and codes of practice applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSHG304 Shear sheep to professional level

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed shearing a minimum of 120 adult merino sheep or 140 adult crossbred sheep per day to industry standards.

The candidate must provide evidence that they can:

- identify hazards and work safely
- avoid contamination, second cuts and injury to animals
- shear sufficient sheep within eight hours to match skill level of a professional shearer
- analyse and increase on improver shearer level
- shear with the industry accepted pattern
- use appropriate suturing for cuts to sheep
- catch and release sheep safely
- demonstrate safe and responsible workplace practices
- provide due care and handle sheep humanely
- apply enterprise workplace health and safety policies in the context of own work
- apply enterprise biosecurity policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry agreed shearing techniques and positions and method of shearing
- safe handling techniques for catching, dragging, shearing and releasing sheep

- the impacts of sheep behaviour on moving and handling sheep and shearing sheep
- Federal and/or State shearing awards and agreements associated with shearing sheep
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Requirements for AHCSHG305 Maintain consistent shearing performance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed maintaining shearing control, coordination and rhythm over a working day.

The candidate must provide evidence that they can:

- identify hazards and implement risk controls
- maintain optimum shearing output by correct preparation and set up of equipment
- maintain application of improved techniques
- maintain speed and accuracy
- assess and monitor the shearing conditions and environment to maintain shearing performance
- maintain control, coordination, rhythm and output during shearing

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry shearing techniques and positions and method of shearing
- aspects of safe handling techniques for catching, dragging, shearing and releasing sheep.
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool.
- the impacts of sheep behaviour on moving and handling sheep and shearing sheep
- personal protective clothing and equipment, and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep

- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1. Monitor weather	1.1 Monitor weather during and after shearing operations, and revise

Element	Performance criteria
conditions	<p>work programs in response to changing circumstances</p> <p>1.2 Identify adverse weather conditions and assess and report the likely impacts on livestock, feed and property</p> <p>1.3 Determine the appropriate actions required to minimise loss or damage to livestock during adverse weather conditions</p>
2. Assess and monitor livestock condition	<p>2.1 Assess and record livestock condition and health status</p> <p>2.2 Identify and report abnormal behaviour or evidence of sickness</p> <p>2.3 Determine and provide water and feed requirements for livestock, and arrange supplementary feeding as required</p> <p>2.4 Apply enterprise animal welfare policies</p>
3. Maintain livestock environment	<p>3.1 Maintain livestock yards and facilities so that they are clean, secure and safe</p> <p>3.2 Maintain suitable shelter for shorn livestock to prevent losses</p> <p>3.3 Identify existing and potential hazards, assess risks and implement control measures</p>
4. Complete post-shearing operations	<p>4.1 Monitor and control environmental implications associated with shearing activities</p> <p>4.2 Clean shearing facilities and equipment and dispose of waste</p> <p>4.3 Record relevant information and report to appropriate personnel</p> <p>4.4 Follow enterprise biosecurity policies where required</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG306A Carry out post-shearing procedures

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCSHG306 Carry out post-shearing procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed caring for shorn livestock.

The candidate must provide evidence that they can:

- identify existing and potential hazards implement control measures
- relate weather conditions to livestock requirements
- prepare contingency plan and anticipate emergency action
- handle livestock with due care
- weigh livestock and assess condition
- observe and monitor livestock behaviour, health and condition
- read and interpret weather information
- provide feed and water based on livestock numbers
- rug animals where required
- apply enterprise work health and safety policies in the context of own work
- apply enterprise animal welfare and biosecurity policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- impacts of adverse weather conditions on shorn livestock
- physiological conditions brought on by stress post shearing, and treatment of same
- types and constructs of livestock shelter
- livestock handling techniques in response to adverse weather
- condition scoring
- appropriate types of feed for stressed livestock

- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG307 Plan and prepare for alpaca shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and make preparations prior to alpaca shearing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity requirements and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Complete work contracts for shearers	1.1 Arrange shearing services in advance

Element	Performance criteria
and shed staff	1.2 Agree on terms and conditions of employment or engagement and check against the award or other accepted arrangements 1.3 Record employment terms and conditions into an employment contract where employment is arranged and ensure they are signed by employer and employees
2. Develop work plan for shearing day	2.1 Discuss, develop and agree on a shearing work plan with shearing team and document 2.2 Identify hazards relevant to the preparation and conduct of shearing and document in work plan and take appropriate action to minimise risks 2.3 Carry out work according to work plan 2.4 Review work plan with shearing team and note required improvements for future action
3. Check shearing equipment	3.1 Use work plan to identify and obtain all equipment and supplies necessary for shearing 3.2 Check and prepare equipment required for shearing and ensure it is clean, set up and functioning correctly
4. Ensure shed and yards are prepared for shearing	4.1 Check and clean shearing shed prior to commencement of shearing 4.2 Check and clean yards prior to commencement of shearing 4.3 Remove sources of alpaca fibre contamination 4.4 Report safety hazards to fibre grower or shed manager
5. Pen up alpacas	5.1 Move alpacas according to shearing sequence 5.2 Pen alpacas by mobs, according to work plan 5.3 Determine pen density to avoid crushing, trampling or soiling of alpaca fibre 5.4 Secure gates to prevent mixing of mobs or escape of alpacas 5.6 Monitor alpaca numbers in holding pens to ensure continuous supply to shearer 5.7 Monitor pens to maintain alpaca in standing position to avoid soiling of alpaca fibre 5.8 Apply enterprise animal welfare policies 5.9 Apply enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG307A Plan and prepare for alpaca shearing

Assessment Requirements for AHCSHG307 Plan and prepare for alpaca shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must produce a shearing work plan and ensure that all required planning and preparation for shearing has been completed.

The candidate must provide evidence that they can:

- carry out cleaning and decontamination of pens and shearing shed to industry standards
- move alpacas according to work health and safety, animal welfare and enterprise requirements
- muster and draft alpacas into pens according to enterprise and industry standards
- operate any necessary equipment to industry standards
- use industry-accepted alpaca handling techniques
- apply enterprise biosecurity policies in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Alpaca Industry Best Practice Standards for Harvesting of Alpaca Fibre
- elements of effective and appropriate alpaca shearing work plans
- equipment requirements for alpaca shearing
- how to clean and decontaminate sheds and pens
- industry-accepted alpaca handling and moving techniques
- relevant industry awards and conditions
- enterprise biosecurity policies applying to the job role
- work health and safety legislation and codes of practice applying to the job role

- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG401 Apply advanced shearing techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply advanced shearing techniques.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity requirements and sustainability practices.

This unit applies to individuals who take responsibility for their own work and use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and set up equipment to optimise	1.1 Confirm that the range and condition of equipment available for selection meets anticipated shearing conditions

Element	Performance criteria
shearing output	1.2 Select equipment and set up based on the assessment of shearing conditions to ensure the optimum yield and shearing throughput 1.3 Monitor equipment performance and make adjustments to maintain optimum shearing throughput
2. Assess and monitor the shearing conditions and environment	2.1 Confirm that the style and approach adopted for the shear are appropriate to the shearing conditions, and maintain the quality and throughput at the appropriate level 2.2 Adopt approaches for mitigating adverse shearing conditions prior to and during the shearing 2.3 Monitor and assess the shearing environment with consideration of the whole wool harvesting operation 2.4 Identify potential and existing hazards, assess risks and implement control measures 2.5 Identify opportunities to support and encourage the performance of other shearers and respond constructively while maintaining own output 2.6 Implement enterprise animal welfare policies
3. Maintain control, rhythm and output during shearing	3.1 Adapt personal position and shearing method to accommodate limitations in equipment performance and set up 3.2 Use timing, length and width of blows that optimise selected shearing pattern 3.3 Ensure blow commencement and finish positions are economical of effort and reflect the shortest route 3.4 Ensure blow placement, body work and sheep positioning combine to represent sustainable shearing effort and output

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG401A Apply advanced shearing techniques

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCSHG401 Apply advanced shearing techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed applying advanced shearing techniques while shearing.

The candidate must provide evidence that they can:

- identify potential and existing hazards, assess risks and implement control measures
- prepare and set up equipment to optimise shearing output
- assess and monitor a diverse range of shearing conditions and environments
- maintain control, co-ordination, rhythm, high quality performance and output during shearing
- support and encourage the performance of other shearers as part of a team and respond constructively while maintaining own output
- implement enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- shearing machinery required and their relative functions
- industry shearing techniques and positions and method of shearing
- aspects of safe handling techniques for catching, dragging, shearing and releasing sheep
- basic anatomy of male and female sheep as it relates to the safe humane removal of wool
- common sheep diseases
- the impacts of sheep behaviour on moving and handling sheep and shearing sheep
- personal protective clothing and equipment, and when and how it should be used
- Federal and/or State shearing awards and agreements associated with shearing sheep

- work health and safety legislation and codes of practice applying to the job role
- animal welfare legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG402 Conduct equipment experting for machine shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare a comb for shearing, or experting the comb.

All work must be carried out to comply with workplace procedures and work health and safety policies.

This unit applies to individuals who take responsibility for their own work and use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Trim and finish combs	1.1 Identify signs of non-optimal equipment performance and remedy 1.2 Identify potential and existing work health and safety hazards and

Element	Performance criteria
	implement control measures 1.3 Confirm that the trim and finish meet the requirements of the current shearing task 1.4 Maintain control of comb and tools throughout the experting process 1.5 Adapt the comb in a form that meets individual shearing style
2. Scallop comb	2.1 Recognise and apply the principles and method of scalloping 2.2 Determine the interrelationship between correctly scalloped combs and shearing performance in terms of density of wool, time of year, and breed 2.3 Scallop combs to meet the shearing style of individual shearers

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSHG402A Conduct equipment experting for machine shearing

Links

Assessment Requirements for AHCSHG402 Conduct equipment experting for machine shearing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed conducting equipment experting for machine shearing.

The candidate must provide evidence that they can:

- trim and finish combs
- scallop combs
- identify work health and safety hazards and implement safe work practice

Knowledge Evidence

The candidate must demonstrate knowledge of:

- different types of combs and cutters
- trimming and finishing techniques
- tools and equipment used in experting
- scalloping techniques
- the relationship of comb preparation to shearing performance.
- work health and safety legislation and codes of practice applying to the job role

Assessment Conditions

Competency is to be assessed in the workplace or workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG403 Account for shearing shed supplies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to account for shearing shed supplies.

All work must be carried out to comply with workplace procedures and legislative requirements.

This unit applies to individuals who take responsibility for their own work and use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine supplies for shearing	1.1 Prepare a list of required supplies 1.2 Determine and record existing supplies

Element	Performance criteria
	1.3 Identify required storage facilities
2. Obtain supplies for shearing	2.1 Identify an appropriate supplier of required goods 2.2 Order and purchase supplies prior to commencement of shearing operations 2.3 Arrange delivery of supplies
3. Record supplies for shearing	3.1 Maintain stores inventory for duration of shearing 3.2 Store supplies appropriately 3.3 Prepare stores account and submit to the grower

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCSHG403 Account for shearing shed supplies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine supplies for shearing
- identify appropriate supplier and order supplies
- maintain stores inventory for duration of shearing and prepare stores account

Knowledge Evidence

The candidate must demonstrate knowledge of:

- supplies required to support shearing operations
- procedures for ordering supplies and purchasing
- required books of account and GST requirements associated with shearing shed supplies
- record keeping systems

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSHG405 Arrange employment for shearing operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to arrange employment for shearing operations.

All work must be carried out to comply with workplace procedures and legislative requirements.

This unit applies to individuals who take responsibility for their own work and use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Shearing (SHG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine staffing requirements	1.1 Assess the numbers and types of staff required for wool harvesting

Element	Performance criteria
	1.2 Prepare a list of duties for additional staff 1.3 Define the required capabilities of staff prior to selection
2. Seek applicants	2.1 Make informal enquiries and advertise vacancies 2.2 Follow up possible staff by telephone and in person
3. Select staff	3.1 Interview potential staff against selection criteria 3.2 Select staff with due regard to equal employment opportunity
4. Induct staff	4.1 Brief new staff on relevant awards, enterprise agreements, pay rates and related administration 4.2 Advise new staff of terms and conditions and sign on 4.3 Familiarise new staff with the workplace and colleagues 4.4 Outline work health and safety and animal welfare requirements in detail to staff

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCSOL202 Assist with soil or growing media sampling and testing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with the sampling and testing of soil or growing media sampling and testing.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soils and media (SOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect soil or media samples for testing	1.1 Discuss task requirements with supervisor and seek clarification where necessary 1.2 Prepare tools and materials for collecting samples

Element	Performance criteria
	1.3 Take and prepare samples as instructed 1.4 Assist with labelling and recording samples if required
2. Perform basic tests on soil or media sample	2.1 Recognise basic features of a soil profile 2.2 Assist with testing or inspecting physical properties of samples 2.3 Assist with testing chemical properties of samples 2.4 Relate soil test results to suitability of the soil or media for growing

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCSOL202 Assist with soil or growing media sampling and testing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect soil and media samples
- perform basic descriptive tests for soil texture, salinity and pH
- describe soils or media using commonly used descriptive terms
- assist with the use of simple soil testing equipment for testing pH and salinity
- prepare records of soil sampling results as required

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for recognising soils or growing media properties
 - basic soil or media field tests
 - soil or media chemical properties
 - soil or media physical properties
 - soil or media plant relationships
 - soil sampling techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSOL301 Prepare growing media

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to determine the requirements of a growing media for various plants and preparing and storing the media in accordance with the production specifications.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soils and media (SOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Clarify work instructions with supervisor 1.2 Prepare tools and equipment 1.3 Identify hazards, assess risks and implement control measures 1.4 Select and use personal protective equipment (PPE)

Element	Performance criteria
2. Confirm specifications of growing media	2.1 Investigate and select various media components for specific plant requirements 2.2 Determine nutrient requirements for growing period 2.3 Determine growing media by plant requirements and accepted industry practice 2.4 Investigate sources of nutrients for their suitability 2.5 Analyse growing media for chemical, physical and biological characteristics to confirm suitability for plants 2.6 Determine sterilisation methods of the growing media
3. Prepare and store growing media	3.1 Establish growing media composition 3.2 Maintain soil mixing equipment in a clean and effective condition 3.3 Store components in a safe and hygienic manner 3.4 Weigh and mix components into the growing media 3.5 Dispose of waste in an environmentally safe manner 3.6 Store growing media is stored in safe and hygienic manner 3.7 Keep records

Assessment Requirements for AHCSOL301 Prepare growing media

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and analyse data
- confirm specifications of growing media
- interpret chemical labels
- prepare growing media
- store growing media

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for preparing growing media
 - alternative methods of incorporating ingredients into a growing media
 - hygiene in the preparation and storage of the media
 - ingredients used in the preparation of growing media
 - physical, chemical and biological characteristics required of the media
 - plant nutrition
 - properties of the various ingredients used in the preparation of the growing media
 - requirements of a growing media
 - volume and weight determination

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSOL303 Implement soil improvements for garden and turf areas

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide information about and determine its suitability for garden beds or turf areas and determine ameliorants or additives to improve it.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soil (SOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and collect soil samples for testing	1.1 Determine reasons for testing of soil 1.2 Prepare tools and materials for collecting samples

Element	Performance criteria
	1.3 Take samples according to recognised sampling techniques 1.4 Label and record samples
2. Determine physical characteristics of sample	2.1 Conduct tests for texture and structure on the samples 2.2 Determine soil colour and the presence of organic matter 2.3 Determine characteristics of soil profile where required 2.4 Determine depth of topsoil and determine if sufficient for the requirements of the plants to be installed 2.5 Determine the ability of soil to drain or retain water 2.6 Assess the physical characteristics of soil and determine improvements needed
3. Determine chemical characteristics of sample	3.1 Conduct tests for pH and salinity 3.2 Determine the suitability of soil for particular plants 3.3 Determine the soil's fertility and the need for additional fertiliser or other amendments 3.4 Determine the chemical characteristics of soil and improvements needed
4. Prepare soils for planting or replanting	4.1 Improve physical characteristics of garden or lawn areas as required 4.2 Adjust pH and salinity of soil in garden or lawn areas as required 4.3 Incorporate additional soil as needed to establish final levels 4.4 Finish soil level and consolidate ready for planting according to planting plans and enterprise procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCSOL303 Implement soil improvements for garden and turf areas

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct tests to determine soil physical properties of texture and structure
- conduct tests to determine soil chemical properties of pH and salinity
- make observations about fertility, mineral and organic matter content based on sample colour
- make observations about soil drainage and water holding capacity
- make recommendations to improve soils based on results of simple soil tests

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for providing information on soils or growing media
 - physical properties of soils and media
 - chemical properties of soils and media
 - products and processes for improving soils and media
 - sample collection, testing and methods used to perform tests
 - water holding capacity and readily available water
 - organic matter in soil and media
 - soil ameliorants and improvement techniques
 - nutrient availability in soils

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSOL401 Sample soils and interpret results

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to take a soil sample and interpret the test results.

This unit applies to individuals whose job role includes undertaking soil or growing media sampling and interpreting the results as a foundation for further horticultural operations such as nutrition programs and irrigation scheduling.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soils and media (SOL)

Elements and Performance Criteria

Assessment Requirements for AHCSOL401 Sample soils and interpret results

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect soil and media samples using appropriate sampling methodology
- file and record analytic results for future use
- implement a nutrient and nutrition program
- prepare soil and media samples for dispatch to soil analysis laboratory
- receive and interpret analytic results

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of soils sampling
 - environmental implications associated with soil surveying activities and the application of analytical results
 - practical understanding of the range of sample collection, testing and analytical methods that may be used to perform soil surveys, and the association of surveying methods with site conditions, environmental implications and intended horticultural use of the surveyed site
 - soil ameliorants and soil improvement techniques for addressing site limitations identified through surveying
 - the capacity of soils to provide water to plants
 - the importance of organic matter in soil in relation to the intended horticultural use
 - the physical and chemical properties of soils in relation to their ability to support specified horticultural production

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSOL403 Prepare acid sulphate soil management plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop management plans that address the relevant legislation and issues associated with land and ground water disturbing activities for acid sulphate soil (ASS).

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soils and media [SOL]

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Conduct assessment of the disturbing activity	1.1 Establish and document current or proposed land use following discussions with landholder and relevant consent authority

Element	Performance criteria
for ASS risk	1.2 Assess site data following industry guidelines and relevant consent authority standards 1.3 Establish compliance issues with relevant regulatory authority or environmental legislation or industry procedures 1.4 Communicate site investigations to landholder and establish agreement to develop a management plan in accordance with relevant consent authority requirements
2. Develop ASS remediation or management strategy	2.1 Review field investigation and laboratory test data and match to strategy options consistent with industry principles and relevant consent authority standards 2.2 Identify ASS management options consistent with industry guidelines and relevant consent authority requirements 2.3 Identify and document remediation or management strategies in consultation with the landholder and relevant consent authority
3. Prepare an ASS site management plan	3.1 Check remediation or management strategies against industry guidelines and relevant consent authority requirements 3.2 Incorporate design specifications for structures in management plan details 3.3 Detail monitoring strategies for the site in line with prevailing site factors and relevant consent authority standards 3.4 List on site responsibilities following industry guidelines and relevant consent authority requirements 3.5 Ensure contingency procedures in accordance with industry guidelines and relevant consent authority requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSOL403A Prepare acid sulphate soil management plans.

Assessment Requirements for AHCSOL403 Prepare acid sulphate soil management plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and use field and test data to identify strategies to remediate and manage the site
- complete a desktop assessment of the land for actual and potential ASS risk based on current and proposed land use, site data and compliance issues
- document an ASS management plan and effectively communicate it to the landowner, relevant consent authority and contractors
- support implementation of ASS management plan by reports on materials management and remediation and site rehabilitation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for preparing acid sulphate soil management plans
 - ASS assessment tools
 - earthmoving principles
 - environmental impact issues
 - environmental impacts of ASS
 - environmental plans, strategies and options for management and remediation
 - managing acid leachate water flows
 - planning process for remediation and management plans
 - principles of duty of care and due diligence
 - relevant environmental, planning and groundwater legislation
 - soils and soil chemistry
 - subsurface and surface drainage principles and systems

- total catchment issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCSOL501 Monitor and manage soils for production projects

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify particular soil properties that are relevant to the workplace and research for further enquiry
- apply information from soil testing to production and/or management plan
- develop and conduct soil improvement programs
- document the soil management plan or production plan
- interpret soil analytical data for the purposes of developing management or production plans
- review and analyse ongoing soil monitoring programs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for managing soils for production
 - basic soil field tests
 - interpreting laboratory results
 - plant nutrition through soil management
 - soil chemical properties
 - soil conservation strategies and sustainable production techniques
 - soil physical properties
 - soil sampling techniques
 - soil types
 - techniques to ameliorate soil properties

Assessment Conditions

AHCSOL502 Manage soils to enhance sustainability

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency standard covers the process of assessing soil characteristics, developing and implementing a plan to improve the health of soils, and monitoring and reviewing the results.

Soil chemistry, physical chemistry and biology are used in understanding the analysis of soil tests, and the importance of the role of soil biota in soil structure and plant nutrition. Strategies to combine improved production with improved soil biota are considered, and the opportunity to increase biodiversity by strategic use of unproductive land is covered.

Healthy soils are the basis of all sustainable land-based production systems. The principles of developing healthy soils involve improving soil structure, increasing soil macronutrients and micronutrients to optimum levels, balancing exchangeable cations, achieving optimum pH, eliminating toxic nutrient levels, and enhancing activity of soil biota.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to persons who have a role in managing a land based production business. This unit is likely to require consultation with external experts, such as pasture consultants, fertiliser representatives, contractors, extension officers from State Agricultural Departments, agronomists and producer groups.

No occupational licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soils (SOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify characteristicsof Australian soils to assess their currenthealth	1.1 Identify the common characteristics of Australian soils and their limitations 1.2 Refer to a paddock assessment to establish soil characteristics 1.3 Research soil biota and its relationship to soil fertility 1.4 Evaluate current production practices in terms of their possible contribution to land degradation and soil problems 1.5 Identify and select appropriate land preparation methods matched to machinery and equipment to maintain and improve soil productivity and structure
2. Develop a plan to improve and maintain the health of soils	2.1 Identify the impact of weather and climate on operational activities on soil structure and fertility and develop contingency plans to account for climatic or other events 2.2 Interpret soil test analysis and compare with historical data in the development of a plan 2.3 Select required nutrient balance levels to improve soil fertility for effective use and uptake of plants 2.4 Evaluate alternative strategies or products to improve soil fertility 2.5 Develop a soil amendment strategy including soil ameliorating activities and soil ameliorant products to enhance sustainability of soil health 2.6 Select appropriate production crops suitable for soil type and climate for a land use rotation plan to improve or maintain soil productivity 2.7 Determine soil conservation strategies to minimise soil erosion and increase soil capacity productivity and sustainability 2.8 Assess the environmental implications of chemical use, consider and document alternative methods and organic preventive methods 2.9 Develop a plan to improve and maintain the health of soils 2.10 Develop a plan to monitor soil health and productivity 2.11 Communicate the plan and the system to monitor and record soil health to stakeholders
3. Implement plan for	3.1 Implement a schedule for soil improvement taking into account

Element	Performance criteria
improvement and maintenance of a healthy soil	seasonal, geographical and resource factors and stock/crop rotation 3.2 Implement strategies to integrate the most suitable methods of soil improvement operations with the proposed land use rotation plan 3.3 Determine key staff responsibilities for specific implementation processes and allocate duties 3.4 Modify plan to meet all contingencies and communicate with appropriate staff 3.5 Record soil management activities and file in the appropriate manner
4. Review plan, implementation strategy and the outcomes and determine necessary modifications	4.1 Analyse effectiveness of the soil improvement management plan, through evaluation at key points, making adjustments as necessary 4.2 Prepare recommendations for future strategies, based on the analysis of paddock observations and production data to further enhance soil ecosystem and production

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to VBP148 Manage soils to enhance sustainability.

Assessment Requirements for AHCSOL502 Manage soils to enhance sustainability

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research information on soils
- assess soil type, texture and structure in the paddock
- diagnose areas with soil problems or potential soil problems
- diagnose and interpret soil sample test results and determine priorities for improving soil health
- consider and select alternatives including organic products and methods for improving soil health
- calculate amounts of nutrients required and prepare a fertiliser program which reflects needs and priorities
- record and store information
- develop, implement and evaluate a plan to achieve healthy soils through application of soil science
- monitor soil health from the application of soil science

Knowledge Evidence

The candidate must demonstrate knowledge of:

- physical, chemical and biological properties of soils
- soil biota – types, role in cycling nutrients and improving soil structure
- basic chemistry concepts related to interpreting soil test analysis: symbols, elements and compounds; valency, anions, cations; reactions; EC (electrical conductivity), CEC (Cation Exchange Capacity); organic matter; pH and its importance in the availability of nutrients; role of macronutrients and micronutrients in plant nutrition. Concept of limiting factors for production

- basic biology: the chemical basis of plants and animals; basic plant structure and function; plant nutrition; water, proteins, sugar, nitrate, lignin content; extent and nature of soil micro organisms
- natural cycling of nutrients: carbon, nitrogen, phosphorous and the role of soil biota in the cycles.
- factors affecting soil biota: moisture, temperature, aeration, nutrient supply, pH, and organic matter
- possibility of problems with the use of conventional chemical fertilisers including acidification contamination of soil and associated water contamination and harm to soil biota
- alternative methods to improve soil fertility, including products and use of machinery for aeration and mulching
- appropriate timing for fertiliser applications
- strategies to reduce herbicide use and to reduce and recycle waste
- soil conservation strategies and sustainable production techniques
- underground water movement

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSOL503 Manage erosion and sediment control

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the development and implementation of a plan to address existing erosion problems and to prevent further erosion and sediment problems. The development of the plan will address the relevant legislation and issues associated with land disturbing projects. It requires the ability to identify and establish suitable strategies to develop, implement and monitor an erosion and sediment strategy and manage the project from implementation through to completion to achieve required outcomes.

Planning and managing erosion and sediment control measures requires a knowledge of relevant environmental, planning and ground water legislation, erosion and sediment control techniques, setting work specifications and objectives for the property or catchment system.

This unit is applicable to persons who have a role in the managing of the following land based business:

- Agricultural related industries
- Production Horticulture
- Agro- Forestry
- Natural resource management
- Roadside management and civil construction
- Extractive mining industries

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit will require consultation with external experts such as land management consultants, planning authorities, Catchment Management Authority, Landcare, State and Federal Government Departments who provide advice, contractors, neighbours and other interested groups.

No occupational licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Conduct a property or catchment audit and identify areas with erosion and sediment problems	1.1 Identify soils susceptible to erosion and sediment loss and relationship to land classes for erosion potential 1.2 Conduct a property or site audit and document details using appropriate methodology 1.3 Identify and classify types of erosion and sediment loss 1.4 Identify the environmental and man made factors that influence rates and effects of erosion and sediment 1.5 Estimate the economic and environmental losses caused by erosion and sediment losses 1.6 Identify appropriate external sources of support to assist in the planning processes 1.7 Identify relevant regulatory planning authorities or environmental legislation for current project and future planning developments
2. Develop erosion and sediment control plan	2.1 Investigate erosion and sediment control measures consistent with industry principles 2.2 Develop erosion and sediment control strategy/s for project area and record in co-operation with land owner, relevant government and planning authorities and any other key stakeholders 2.3 Identify potential problems that may require future rectification and modification to original strategies 2.4 Develop erosion and sediment control plan to meet design specifications including environmental concerns, physical impacts, land use, production systems and key personnel 2.5 Develop monitoring processes for evaluating and reporting performance against erosion and sediment control plan for achieving short and long-term outcomes

Element	Performance criteria
	2.6 Determine roles and responsibilities to all key personnel and stakeholders
3. Implement and manage the erosion and sediment control plan	3.1 Implement tasks in accordance with erosion and sediment control plan and structure specification 3.2 Manage the communication process including strategies for conflict resolution and problem solving 3.3 Monitor progress to ensure time, performance, cost and quality of work is achieved 3.4 Investigate and negotiate proposed variations in consultation with all key stakeholders
4. Evaluate the erosion and sediment control plan	4.1 Conduct inspection to review work completion and collate monitoring data 4.2 Identify alterations or modifications to the development plan and report to industry sector personnel, developer or consenting authority 4.3 Review outcomes of completed erosion and sediment control plan against agreed short and long term objectives and report to all key stakeholders

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to VBP149 Manage erosion and sediment control.

Assessment Requirements for AHCSOL503 Manage erosion and sediment control

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate erosion and sediment control strategy methods
- prepare plans and reports on erosion and sediment control plans
- develop an erosion and sediment control plan
- communicate and collaborate effectively with all stakeholders for planning and conflict resolution
- implement work health and safety control measures at site work operations
- monitor, evaluate and analyse effectiveness of erosion and sediment plan outcomes
- organise required resources and key stakeholders

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environment sustainability as a whole farm system approach
- environmental issues with regard to water catchment, ecosystems, habitats and waste minimisation
- relevant environmental, planning and groundwater legislation including licences and permits to implement erosion and sediment control activities
- erosion control and design principles
- planning processes for erosion and sediment control
- project and risk management techniques and tools for the management of erosion and sediment control
- soils and soil formation
- earthmoving principles
- work health and safety obligations and "Duty of Care"

- subsurface and surface drainage principles and systems

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSOL504 Develop and manage a plan to reclaim land affected by salinity

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the development and management of a plan to reclaim salt affected land for profitable, sustainable agricultural production. The plan will include the assessment of the area to determine the source of the salt, the level of salinity and the extent of the infestation as well as plan to reduce flooding and the effect of water logging on the soil. The plan will recommend strategies to be used to reclaim the land. The cost of the plan will be calculated. Plant and pasture establishment and management methods will be recommended for saline sites. Management of the reclaimed area is intended to increase production and profitability. The plan will include strategies for prevention of further salinity problems and for community involvement to reduce salinity in the area.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to a person who has a role in managing the farm. This unit is likely to require consultation with a range of external institutions, groups, government departments and individuals.

No occupational licensing, legislative, regulatory or certification requirements apply to this competency at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Soils (SOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Review the saline area to increase productivity	1.1 Map the property and determine the type and severity of the salinity and install fencing to subdivide classes of land and salt affected areas for appropriate management of each area 1.2 Assess area for water logging, determine the cause and recommend strategies to divert water or drain water from the area 1.3 Review and select suitable plant and pasture species and management options available to reclaim the saline area 1.4 Calculate the cost and the beneficial returns of reclaiming the area including financial, environmental and social benefits 1.5 Outline the management for the reclaimed area to protect it at vulnerable times of the year and certain times in the plant reproduction cycle
2. Develop a plan to manage water use and movement	2.1 Install fencing to protect the watercourses through the property 2.2 Test and modify salinity and pH of the water entering and leaving the property 2.3 Calculate the water used by the enterprise and establish targets to reduce the quantity by improving irrigation methods and general management practices
3. Develop a plan to protect and manage natural areas	3.1 Plan a strategy to protect the natural area from increased salinity and other stresses that will accelerate decline 3.2 Develop strategies to increase biodiversity 3.3 Plan to manage soil structure and fertility to improve soil biota 3.4 Identify review indicators and develop the long-term plan
4. Implement a strategy to reduce salinity in the area	4.1 Work with adjacent properties and relevant other authorities and community groups to reduce extent and cause of local saline areas by monitoring quality and quantity of water 4.2 Monitor improvements in productivity and review against current leading edge and research developments

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to VBP150 Develop and manage a plan to reclaim land affected by salinity.

Assessment Requirements for AHCSOL504 Develop and manage a plan to reclaim land affected by salinity

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess land forms and soil types
- determine categories of saline land
- take soil and water samples for testing
- calculate optimum stocking rate
- identify indicator plant species
- assess the level of degradation and damage through salinity
- research the latest innovations and management techniques
- manage the crop and animal enterprise selected for the farm to utilize the saline area
- calculate the costs of the project
- calculate benefits of salinity reduction to the enterprise and the property
- work with producers and community groups

Knowledge Evidence

The candidate must demonstrate knowledge of:

- salt tolerant plant and pasture species and the management of each
- range of methods for reclaiming saline land
- strategies to profit from the saline area
- value of using natural species and natural systems to improve farm production
- benefits of biodiversity on plant production and the animal enterprise
- strategic and responsible use of susceptible land
- consequences of poor management or removal of vegetation on the land

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSP0301 Operate a screen cleaner for seed processing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate screen cleaners to process seed. It applies to the operation of screen cleaners and aspirators for cleaning or processing commercial quantities of seed. Workers operate with some judgement and discretion and work would normally be carried out under minimal supervision within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed processing (SPO)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select and prepare a screen cleaning	1.1 Select and prepare screen cleaning machinery and equipment to job requirements and confirm against work plan

Element	Performance criteria
machine for use	1.2 Complete routine pre-operational checks of the machine to manufacturer's specifications and enterprise requirements 1.3 Recognise workplace health and safety hazards in the workplace and assess and minimise risks
2. Operate a screen cleaning machine	2.1 Operate machinery and equipment in a safe and controlled manner and monitor for performance and efficiency 2.2 Anticipate risks to self, others and the environment and implement minimisation strategies accordingly 2.3 Select, use, maintain and store suitable personal protective equipment (PPE) 2.4 Report environmental implications associated with machinery operation
3. Complete and report on the seed cleaning operation	3.1 Complete shut-down procedures to manufacturer's specifications and enterprise requirements 3.2 Complete and maintain screen cleaning machinery and equipment operational records 3.3 Report malfunctions, faults and observation of irregular performance of screen cleaning machinery and equipment 3.4 Clean, secure and store screen cleaning machinery and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSP0301A Operate a screen cleaner for seed processing.

Assessment Requirements for AHCSP0301 Operate a screen cleaner for seed processing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assemble and operate a screen cleaner
- assess the input and outputs of the screen cleaner
- complete and report on cleaning operation
- define the processing requirements of a seed processing job
- disassemble and clean a screen cleaner
- select and place screens and prepare machinery for use

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for operating a screen cleaner
 - ball trays and their purpose
 - documentation associated with seed cleaning
 - machinery safety
 - possible contamination points
 - required maintenance and usual wear points
 - screen types and designs
 - the adjustment and effect of airflow within each of the screen cleaner's chambers
 - the correct clean down procedure
 - the different types of screen cleaners available for the task
 - types of impurities and the machine's ability to handle impurities

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- set up and prepare seed treatment machinery for use
- calculate, calibrate and measure dose rates
- formulate a chemical mix to achieve the best treatment
- operate seed treatment machinery and equipment
- complete and report on seed treatment machinery and equipment operation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for operating seed treatment machinery
 - basics of programmable logic controller/treatment control systems and electrical process
 - chemical types and classes
 - difference between coating and pelleting [<5% weight gain film coating (insecticide/fungicide) or >5% weight gain is pelleting]
 - disposal of waste chemical
 - hazards of chemicals
 - labelling requirements associated with coated seed
 - methods of applying chemical and basic recipe formula
 - methods of applying powders
 - personal protective equipment (PPE)
 - procedures for drying, scalping and aspiration of treated seed
 - rules and regulations for storage, transportation and bunding

- the expectations and limitations of different types of seed coating machines
- the interaction of biological components and their effect on other chemicals, powders, polymers and heat
- the use and differences in biological components in seed coatings
- types of seed treatment machinery and equipment

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Seed processing (SPO)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select and prepare seed packaging and	1.1 Select and prepare seed transferring, storing, packaging and labelling machinery and equipment to job requirements and

Element	Performance criteria
labelling machinery and equipment for use	confirm against work plan 1.2 Complete routine pre-operational checks of the machine to manufacturer's specifications and enterprise requirements 1.3 Check information for labelling against work orders and job descriptions 1.4 Report machine performance, efficiency and irregularities 1.5 Recognise work health and safety hazards in the workplace and assess and minimise risks
2. Operate seed transferring, storing, packaging and labelling machinery and equipment	2.1 Operate machinery and equipment in a safe and controlled manner and monitor for performance and efficiency 2.2 Anticipate risks to self, others and the environment and implement minimisation strategies accordingly 2.3 Select, use, maintain and store suitable personal protective equipment (PPE) 2.4 Report environmental implications associated with machinery operation
3. Complete and report on seed transferring, storing, packaging and labelling machinery and equipment operation	3.1 Complete shut-down procedures to manufacturer's specifications and enterprise requirements 3.2 Complete and maintain seed transferring, storing, packaging and labelling machinery and equipment operational records 3.3 Report malfunctions, faults and observation of irregular performance of seed transferring, storing, packaging and labelling and equipment 3.4 Clean, secure and store machinery and equipment
4. Move and store packaged seed	4.1 Handle and load packaged seed onto pallets ready for moving and storage 4.2 Store and retrieve packaged seed

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCSP0307A Handle, package and store commercial quantities of seed.

Assessment Requirements for AHCSP0307 Handle, package and store commercial quantities of seed

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- label and stencil seed bags
- move and store packaged seed
- operate a pallet wrapper to shrink wrap palletised seed
- operate bag and pallet transportation systems
- operate bulk seed transportation equipment
- operate industrial sewing machines
- operate label printers and label and apply stickers and labels
- operate packaging and labelling machinery
- operate palletising equipment
- perform basic machinery maintenance
- prepare packaging
- seal seed packages
- set up and prepare machinery for use

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for handling commercial quantities of seed
 - alternative methods of bag sealing
 - associated regulations and legislation that covers labelling of packaged seed
 - basic equipment maintenance
 - bulk seed storage
 - chemical warnings and the seed details that must be put on the bag

- enterprise labelling requirements
- enterprise storage plans
- machinery and workplace safety
- packaged product transport and storage
- seed packaging methods and equipment
- types of packaging

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSP0308 Sample seed before and after processing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to sample seed on arrival at a processing plant and after processing for quality and certification purposes. Workers operate with some judgement and discretion and work would normally be carried out under minimal supervision within enterprise requirements and procedures.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Seed processing (SPO)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Sample seed before cleaning or processing	1.1 Prepare the seed lot for sampling in accordance with job requirements 1.2 Select sampling equipment for use in accordance with the type of

Element	Performance criteria
	seed and the job requirements 1.3 Inspect samples visually for contaminants 1.4 Record or report results of sampling 1.5 Direct seed load for storage as appropriate 1.6 Label, record and store samples
2. Sample seed after processing	2.1 Prepare the seed lot for sampling in accordance with job requirements 2.2 Select sampling equipment for use in accordance with the type of seed and the job requirements 2.3 Take samples using specified sampling techniques 2.4 Batch and label samples 2.5 Package samples with accompanying notation and forward to relevant authorities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCSP0308 Sample seed before and after processing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out moisture testing, temperature and seed density tests in accordance with enterprise requirements
- complete relevant sampling documentation
- package and label seed samples
- prepare samples for despatch
- recognise common weed seeds and other seed contaminants
- record workplace information about seed samples
- sample graded and/or treated seed
- sample seed from a truck on arrival at a processing plant using appropriate sampling techniques
- sample seed in bulk containers and/or sacks using appropriate sampling techniques
- select and evaluate the sampling equipment to provide a representative sample within the guidelines of the relevant certification authority
- take seed samples for testing by other agencies
- use appropriate recording and labelling techniques
- use tools for sampling and prepare a sample for despatch

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of seed sampling
 - correct methods of sampling
 - personnel protective equipment used for sampling treated seed

- relevant workplace records and other documentation
- seed handling and the importance of seed moisture content at all stages of the cleaning process
- the controlling bodies of seed movement - Australian Quarantine and Inspection Service (AQIS), the Organisation for Economic Co-operation and Development (OECD), the Association of Official Seed Certifying Agencies (AOSCA) and other certification agencies
- seed types that require sampling

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCSUS501 Develop and manage a plan for sustainable supply and use of water on a farm

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the development and management of a plan to provide a reliable supply of quality water on a property. The plan will review trading rules and regulations and the costs associated with supply and use of all classes of water. Testing of water is undertaken to assess suitable quality for stock, domestic and irrigation purposes. The plan will include efficient use of minimum quantity of water and maintain the quality of the water in storage and the reticulation system. New farming practices can be improved by the selection and management of pastures and crops. Water is managed to protect sensitive areas from degradation. New and innovative methods of treatment and re-cycling are assessed. The quality of water leaving the farm and down-stream impact is monitored.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to persons who have a role in managing the farm. This unit is likely to require consultation with external experts, such as water authorities, shire council planning personnel, irrigation suppliers and State Government departments.

No occupational licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Sustainability (SUS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a plan for strategic and sustainable use of water on the farm	1.1 Determine the feasibility of trading water on the short term profitability of the farm and the long term implications 1.2 Contact the authorities to determine rules and regulations for the trading and use of water 1.3 Investigate the availability of different classes of water and the regulations for its use and select suitable crops for each class 1.4 Select appropriate recycling options in the whole farm plan 1.5 Analyse purification options on the basis of their merits and suitability for the environment and the enterprise 1.6 Evaluate information from water management specialists and incorporate in relevant aspects of water management 1.7 Review options, develop and implement strategies to use water efficiently by computer controlled irrigation systems and remote operation
2. Design a water supply and management system for the farm	2.1 Identify planning parameters that affect the design of the water system 2.2 Carry out water testing to determine the suitability for stock, crops, pesticide and domestic use 2.3 Draw a plan and layout of a farm water system, including provision for drainage, recycling and back up water supply
3. Develop and implement a plan to protect watercourses and water quality on the farm	3.1 Develop a strategy to protect the areas susceptible to degradation and contamination 3.2 Identify the environmental implication of water use and run off 3.3 Work with community groups to plan a strategy for water quality improvement in the district 3.4 Develop a strategy to improve the biodiversity of water storage areas and watercourses

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to VBP147 Develop and manage a plan for sustainable supply and use of water on a farm.

Assessment Requirements for AHCSUS501 Develop and manage a plan for sustainable supply and use of water on a farm

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse weather patterns, rainfall and variability
- take water samples for testing and interpret test results
- fence eroded areas, dams, streams and rivers to protect vegetation and water quality
- research and source a wide range of local indigenous plants specific to revegetation area
- select pasture and crop species
- construct drains and effluent collection sites
- calculate the total farm water requirement for the enterprise, natural areas, farmhouse and garden
- analyse financial return from purchased water
- irrigate crops and pastures efficiently
- map erosion, salt and problem areas
- compare pumps and other equipment for energy efficiency
- calculate the cost of production including purchased water, storage, transfer and application
- fill out applications and forms for licensing and registration

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the variation and risk associated with weather patterns
- volume of water used for production and living
- the classes of water required for production
- the various sources of water and suitable storage

- methods of water quality testing
- water efficient pasture and native species
- crop cultivation methods for moisture retention and optimum production
- efficient irrigation practice
- methods of recycling water
- the water cycle
- the impact of water shortage on natural systems
- the causes and consequences of contaminated water
- the legal aspects of licensing, registration and trading of water
- methods of transferring water using renewable energy
- appropriate management when water and rain are limited
- water purchasing and water trading policies and procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCSUS502 Develop and manage a plan to improve biodiversity on a farm

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the development and management of a plan to improve the biodiversity on the property with the view to improving profitability and sustainability of the production system, as well as the long-term viability of the farming enterprise. The focus is to protect, enhance and manage natural areas in balance with the production enterprise. Improved biodiversity is considered a core part of the vision for the property, providing improved profitability, personal fulfilment, community benefits, and the long-term sustainability of soil, water, and local flora and fauna.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to a person who has a role in managing a farm. This unit is likely to require consultation with family members and a range of external institutions, groups, government departments and individuals.

No occupational licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Sustainability (SUS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Undertake an audit to determine the health and range of biodiversity on the property	1.1 Map the existing features and soil types on the property for protection 1.2 Obtain a list of local native flora and fauna species specific to habitat types and assess the health and diversity of native vegetation areas and isolated trees in comparison to the local or regional list 1.3 Analyse soil samples for chemical and biological content and assess the health and diversity of the grasslands and pasture 1.4 Analyse water samples and assess the health and diversity of the riparian zone
2. Develop and implement a management plan to improve water quality and biodiversity on the farm	2.1 Plan and implement grazing management strategies to achieve the target ground cover for soil protection for natural areas and pasture 2.2 Protect retained vegetation and provide access for pest plant and animal control and continue to monitor biodiversity of these areas 2.3 Develop a plan to restore and revegetate areas to improve number and range of species of flora and fauna 2.4 Monitor water quality and quantity and develop and implement strategies to prevent contamination and reduce run off 2.5 Review all chemicals and fertilisers used on the farm to identify their potential impact with the view to minimising the effects on the biodiversity through reduced use where possible 2.6 Monitor soil fertility and soil biology in pasture by soil testing and develop strategies to improve soil biota 2.7 Develop and implement a plan to control weeds and pests by using methods that reduce the impact on biodiversity 2.8 Apply for funding to assist with biodiversity project work on the farm and in the local community
3. Evaluate benefits of improved biodiversity of the farm	3.1 Estimate the benefits that will include increased financial value from the farm enterprise and the improved sale, resale or capital value of the farm as a result of the improvement in biodiversity 3.2 Identify personal benefits that biodiversity may contribute to the individual, the farm and the wider community 3.3 Identify the benefits to the environment of improved biodiversity 3.4 Survey the number and diversity of flora and fauna species annually on the farm 3.5 Monitor water quality and quantity leaving the property in

Element	Performance criteria
	comparison to initial values and local benchmarks 3.6 Work with Landcare groups and other community groups to develop plans to extend corridors and improve water quality beyond the farm

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to VBQU076 Develop and manage a plan to improve biodiversity on a farm.

Assessment Requirements for AHCSUS502 Develop and manage a plan to improve biodiversity on a farm

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess natural areas, vegetation type, species, health and value
- assess vegetation ground cover and the risk of erosion
- identify plants using a field guide and recognise endangered species
- identify weed species using a field guide
- take soil tests and water sample tests and interpret test results
- map natural areas and plan improvements on a whole farm plan
- calculate financial value of planned improvements
- calculate costs and prepare implementation plan for improvements
- record personal and family values and goals
- recognise saline areas
- identify bird, frog and macro-invertebrates and estimate populations by a field survey
- communicate and work co-operatively with Landcare and community groups

Knowledge Evidence

The candidate must demonstrate knowledge of:

- complex interdependence of plants and animals
- greater the biodiversity the greater the resilience to change
- need for maintaining biodiversity within a particular species, maintaining the number of different species, and maintaining the range of ecosystem types
- indigenous plants in revegetation projects
- how to manage pests, diseases and weeds in natural areas
- water cycle

- value of biodiversity on the pasture production and the animal enterprise
- consequences of contamination and pollution of water, air and soil
- methods of restoration and regeneration of vegetation
- benefit of natural areas for personal health, family activities and pleasure
- philosophy of working with nature to improve the environment for future generations
- value of natural areas in improving the aesthetic value of the farm

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCTRF101 Support turf work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide support to other workers in the green keeping and turf production industry.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for turf work	1.1 Identify the required materials, tools and equipment according to lists provided 1.2 Conduct checks on materials, tools and report insufficient equipment or faulty items 1.3 Demonstrate correct manual handling techniques used when

Element	Performance criteria
	loading and unloading materials 1.4 Select and check suitable personal protective equipment (PPE) 1.5 Provide turf support according to work health and safety requirements 1.6 Identify and report workplace health and safety hazards
2. Undertake turf work as directed	2.1 Follow instructions and directions and seek clarification 2.2 Interact with other staff and turf users in a positive and professional manner 2.3 Observe enterprise policy and procedures in relation to workplace practices, handling and disposal of materials 2.4 Report problems or difficulties in completing work to required standards or timelines
3. Handle materials and equipment	3.1 Store plant debris and waste material produced during turf work in a designated area 3.2 Handle and transport materials, equipment and machinery 3.3 Maintain a clean and safe work site while completing turf activities
4. Clean up on completion of turf work	4.1 Return materials to store or dispose of 4.2 Clean, maintain and store tools and equipment 4.3 Report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCTRF201 Assist with turf construction

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to support workers in a team who are constructing soil profiles for the establishment of turf.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for soil profile construction	1.1 Locate services using site and construction plans and in consultation with the supervisor 1.2 Identify work health and safety hazards, assess and report risks 1.3 Select suitable safety equipment for the soil profile construction program

Element	Performance criteria
	1.4 Prepare the construction site according to the construction plan
2. Prepare equipment for soil profile construction	2.1 Select construction tools, equipment and machinery 2.2 Carry out pre-operational and safety checks on tools, equipment and machinery 2.3 Select, use and maintain suitable personal protective equipment (PPE)
3. Undertake soil profile construction	3.1 Grade and consolidate the base to the specified level and on a consistent slope to achieve uniform compaction over the site 3.2 Dig trench lines to the specified depth, width and fall, with all superfluous material evacuated and stored safely
4. Restore the site after drainage and irrigation installation	4.1 Back fill trenches with specified construction materials, consolidate and level 4.2 Level the site as each layer of the soil profile is installed 4.3 Water the site thoroughly on completion 4.4 Remove and dispose of waste material from the site 4.5 Clean, maintain and store tools, equipment and machinery 4.6 Maintain a clean and safe area 4.7 Record or report work outcomes

Assessment Requirements for AHCTRF202 Prepare turf surfaces for play

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the condition of the existing surface with advice from senior greenkeepers for subsequent routine preparations, treatments and turf cultural practices
- prepare a turf surface or sports playing field according to the rules of the game
- use turf surface preparation machinery and equipment safely according to manufacturer's specifications to achieve the desired playing surface outcome

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of turf preparation for play
 - competition playing requirements affecting preparation of the turf surface
 - effect of adverse outdoor climatic conditions
 - effective and safe use of tools and machinery
 - high performance uses of turf surfaces
 - irrigation and drainage system design and operational techniques
 - potential public nature of turf renovation work sites
 - purpose of turf surface preparation in maintaining turf presentation
 - various requirements of turf species and their cultural requirements

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establish the purpose of turf renovation programs in maintaining turf presentation, particularly in relation to the end use of the turf
- record turf maintenance activities as required by the enterprise
- transport, clean and store turf renovation machinery and equipment
- use turf renovation machinery and equipment to restore turf health and condition

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of grass area renovation
 - different soil preparations for renovation
 - effect of adverse outdoor climatic conditions
 - effective and safe use of tools and machinery
 - hazards and responsibilities working near public access
 - influences on the selection of tools, machinery and safety equipment
 - potential public nature of turf renovation work sites

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF204 Support turf establishment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish turf by seed, sod or other methods.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to establish a planted area	1.1 Select materials, tools, equipment and machinery for planting 1.2 Carry out pre-operational and safety checks on tools, equipment and machinery 1.3 Identify the environmental implications of the turf establishment program

Element	Performance criteria
2. Prepare the planting area	2.1 Determine layout of services before undertaking earthworks 2.2 Control existing weeds 2.3 Check soil for moisture, tilth, compactness, depth and organic matter 2.4 Apply soil additives as instructed 2.5 Rake the surface evenly to achieve a consistent surface and level as required 2.6 Water the planting site 2.7 Remove and disposed of debris and rubbish
3. Plant turf	3.1 Inspect turf plant material before planting and discard material with defects 3.2 Ensure seed is evenly distributed over the whole planting area with no overlap or areas missed 3.3 Rake surface evenly and water thoroughly 3.4 Position sods and roll evenly onto a moist surface 3.5 Water newly laid turf thoroughly to encourage establishment
4. Provide post-planting care	4.1 Protect the site from animals, pedestrian and vehicular traffic 4.2 Roll the site evenly and efficiently with no disturbance 4.3 Mow turf according to a specified pattern and height 4.4 Apply top dressing evenly to the required depth over the whole area and is work or rub into the surface 4.5 Water dry or under-watered plants 4.6 Check watering patterns for dry spots
5. Complete establishment of the planted area	5.1 Remove and dispose of waste material 5.2 Clean, maintain and store tools, equipment and machinery 5.3 Maintain a clean and safe work area throughout and on completion of work 5.4 Record and report work outcomes to the supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF204A Support turf establishment.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCTRF204 Support turf establishment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- erect safety equipment
- follow procedures and sequence work during the course of the growing-in period
- handle manual loads correctly
- transport, clean and maintain and store turf establishment machinery and equipment
- use turf establishment machinery and equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practice for supporting turf establishment
 - different soil preparations for establishment
 - effective and safe use of tools and machinery
 - requirements of turf species and their cultural requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCTRF301 Construct turf playing surfaces

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to construct soil profiles for the establishment of high-performance sports and recreational turf surfaces.

It applies to the construction of turf playing surfaces in new projects and to the complete renovation of existing soil profiles in sporting, commercial and public recreational open spaces such as golf greens and tees, cricket pitches and other turfed sporting surfaces.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Plan for construction activities	1.1 Identify the construction site and the construction method 1.2 Take representative samples for soil tests 1.3 Locate services and utilities, check depths against the site plan and report discrepancies to the supervisor 1.4 Consider the site history when planning construction details 1.5 Determine likely consequences of site aspect, features and run-off from adjacent sites and incorporated in construction plans 1.6 Identify work health and safety hazards, assess risks, implement controls 1.7 Select, use and maintain suitable safety equipment and personal protective equipment (PPE)
2. Survey and lay out the construction site	2.1 Set up surveying equipment and establish and record existing levels and temporary benchmark 2.2 Set new levels and place pegs according to specifications 2.3 Determine the existing lay of the land and proposed contours 2.4 Shape new contours into the proposed site
3. Prepare for construction work	3.1 Obtain or develop plans for the new construction profile 3.2 Estimate and cost materials 3.3 Schedule work in a logical, timely and effective manner
4. Set out site for construction	4.1 Check and verify boundaries and features against the actual site and existing features 4.2 Check finishing levels, provision for drainage and irrigation to ensure nominated levels are workable 4.3 Check all measurements against the construction plan, peg out the construction area and account for variances
5. Excavate the construction site	5.1 Remove and stockpile excess soil in a designated area 5.2 Grade the base to the level and slope specified in the design 5.3 Consolidate the base of the profile to achieve uniform compaction over the entire site 5.4 Install sub-surface irrigation system components to the required depth and design specified in the plan
6. Install drainage system	6.1 Dig drainage trenches to the depth specified in the plan 6.2 Lay drainage material on the base of the trench, install pipes and cover trenches
7. Install soil profile	7.1 Calculate quantities of material to be spread over the area 7.2 Compact each profile layer to reflect the final contour 7.3 Ensure the interface between profile layers is uniform and unbroken

Element	Performance criteria
	7.4 Mix soil amendments thoroughly and apply evenly over the area 7.5 Give the finished surface a final levelling and consolidate in readiness for planting

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF301A Construct turf playing surfaces.

Assessment Requirements for AHCTRF301 Construct turf playing surfaces

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine turf construction requirements from plans
- implement a turf construction project
- interpret existing site and construction plans and specifications
- organise work and use tools and equipment for turf construction project

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for constructing turf playing surfaces
 - environmental implications associated with construction and excavation activity, drainage and irrigations systems, soil amendments and waste disposal procedures
 - materials, tools, equipment and machinery available to the enterprise for construction of soil profiles, including soil amendments and base construction materials
 - practical understanding of surveying principles and techniques
 - range of construction methods that may be used to construct soil profiles for high performance turf surfaces, and the association of construction methods with site limitations, environmental implications, and end use of the turf surface
 - soil testing techniques and the application of results to the construction process

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF302 Establish turf

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish turf by sowing, turf laying, sprigging and chaffing or stolonization in sporting, public recreational open space, commercial and residential sites.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Sample soil for testing	1.1 Take and test site soil samples from a representative area 1.2 Use test results to guide soil preparation for establishing turf
2. Plant turf	2.1 Select tools and equipment for the task being undertaken and use safe working practices

Element	Performance criteria
	2.2 Prepare planting site and sow seed or roll out lawn 2.3 Water and top-dress newly planted turf as required
3. Maintain newly established turf	3.1 Water and fertilise newly established turf 3.2 Mow turf according to a specified pattern and height 3.3 Monitor newly established turf, identify problems and report any changes 3.4 Apply top dressing according to the establishment plan
4. Report and repair areas of damaged turf	4.1 Monitor turf condition for quality and repair as necessary 4.2 Prepare work reports and recommendations

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF302A Establish turf.

Assessment Requirements for AHCTRF302 Establish turf

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- demonstrate turf establishment by sowing, turf laying, sprigging and chaffing/stolonization
- determine turf establishment methods and requirements
- implement successful turf establishment works
- operate and store turf establishment machinery and equipment
- organise work and use tools, equipment and machinery for a turf establishment project

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for establishing turf:
 - common weeds, pests and diseases
 - fertiliser use and application
 - soils and turf nutrition
 - turf identification and growth characteristics
 - turf establishment methods
 - watering practices

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF303 Implement a grassed area maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and repair grassed areas.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for grassed area maintenance work	1.1 Clarify with supervisor requirements of the maintenance program 1.2 Identify equipment and material resource requirements according to the scope of the coordination work 1.3 Identify the priorities for maintenance activities and time allocation

Element	Performance criteria
2. Maintain and repair grassed areas	2.1 Mow lawns and trim edges 2.2 Undertake coring and scarifying as necessary 2.3 Undertake top dressing and fertilising as required 2.4 Spread fertiliser as necessary 2.5 Undertake control measures for broad leaf weeds and grass weeds 2.6 Perform repairs to irrigation systems as required
3. Coordinate and report on grassed area maintenance activities	3.1 Instruct machinery operators of appropriate use and their responsibilities in respect to operational maintenance requirements of machinery and equipment 3.2 Monitor personnel, activities, timelines and materials usage 3.3 Recognise contingency situations and take corrective actions 3.4 Prepare a report of work undertaken

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF303A Implement a grassed area maintenance program.

Assessment Requirements for AHCTRF303 Implement a grassed area maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct a risk assessment for work in a turf area
- determine the maintenance requirements for a turf area
- carry out weed control measures
- repair irrigation systems
- safely adjust and use turf maintenance machinery and equipment
- coordinate and report on grassed area maintenance activities
- write a report on the maintenance program activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of grassed area maintenance
 - growth rates and cultural requirements of specific turf types
 - methods and practices for maintaining grassed areas
 - range, use and availability of materials, equipment and machinery that may be required for the project
 - turf grass physiology as it applies to grassed area maintenance
 - types of turf and specific maintenance requirements
 - work schedule programming
 - work health and safety issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF304 Monitor turf health

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor the health and condition of high performance sports turf playing surfaces.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for monitoring activities	1.1 Identify the turf site to be monitored, the nature and regularity of monitoring and time constraints for delivering reports 1.2 Identify plant tissue and soil analysis consultants and determine their sampling specifications in consultation with the supervisor and/or consultants

Element	Performance criteria
	1.3 Select monitoring tools and equipment
2. Collect soil and plant tissue samples	2.1 Perform on-site soil tests according to testing instrument instructions 2.2 Collect samples for off-site testing from a representative area and prepare, package and despatch 2.3 Replace divots from soil sampling sites and dispose of waste materials 2.4 Clean sampling tools and equipment and return to storage 2.5 Record and compare results of analysis with acceptable parameters 2.6 Make recommendations to address identified deficiencies and to meet target chemical balances
3. Visually monitor turf health	3.1 Assess indicators of turf health visually with reference to researched and experiential awareness 3.2 Identify deficiencies in turf health and quality visually with reference to researched and experiential awareness 3.3 Make reports and recommendations according to the playing requirements and desired objectives of the enterprise

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF304A Monitor turf health.

Assessment Requirements for AHCTRF304 Monitor turf health

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess turf health
- identify deficiencies and diseases in turf
- inspect and report on the condition of turfed surfaces
- perform soil sampling and analyse results
- prepare turf maintenance recommendations according to the playing requirements and desired objectives of the enterprise

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of turf health
 - botany and turf physiology as it applies to turf health
 - main, simple and compound fertiliser products available to the enterprise including analysis, solubility, salt index, rates and cost
 - rates and regularity of recommended fertiliser and pesticide application to achieve optimum plant health objectives while minimising external environment impact through leaching, excessive spraying and overuse
 - role of trace elements and nutrients required by turf grass plants, and symptoms of toxicities and deficiencies
 - soil and plant tissue analysis as a monitoring and turf management tool, the main elements of analysis and their significance as indicators of nutritional deficiency and toxicity
 - turf grass diseases, including commonly occurring regional diseases, seasonality, site history and visual disease symptoms

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF305 Renovate sports turf

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement renovation or remediation of a sports turf area for minor projects and seasonal renovations in the turf industry.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to renovate turf	1.1 Identify the turf renovation site and extent of works 1.2 Select turf and renovation materials 1.3 Identify work health and safety hazards, assess risks and implement controls

Element	Performance criteria
	1.4 Select, use and maintain safety and personal protective equipment (PPE)
2. Prepare renovation equipment	2.1 Carry out pre-operational and safety checks on tools, equipment and machinery 2.2 Calibrate and adjust tools, equipment and machinery
3. Implement sports turf renovation	3.1 Identify renovation works from the program and schedule work in a sequential, timely and effective manner 3.2 Review renovation tasks and undertake remedial action 3.3 Maintain a clean and safe work area throughout and on completion of work
4. Complete renovation activities	4.1 Remove and dispose of waste material in an environmentally aware and safe manner 4.2 Clean, maintain and store tools, equipment and machinery 4.3 Record and report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF305A Renovate sports turf.

Assessment Requirements for AHCTRF305 Renovate sports turf

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct a site hazard identification and risk control assessment
- implement a sports turf renovation program
- prepare, check and calibrate turf renovation machinery and equipment
- record outcomes of renovation works
- renovate a sports turf for successful high performance use
- use turf renovation machinery and equipment to restore turf health and condition

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of turf renovation
 - field measurement techniques such as infiltration rate, organic fines, hardness, traction, surface smoothness, and turf sward height
 - nutrition and plant growth regulators
 - planting, care and renovation scheduling requirements of grass species and cultivars
 - specialist turf renovation practices to achieve high performance turf
 - standards for turf surface appearance and quality
 - structure of a sports turf soil profile

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF401 Develop a sports turf maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and document a sports turf maintenance program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Test soil and plant material	1.1 Develop a soil and plant testing program which defines field and off-site testing activities, scheduling and information outcomes 1.2 Implement and monitor testing tasks and undertake remedial

Element	Performance criteria
	<p>action</p> <p>1.3 Present data and readings in a form that can be easily interpreted by the turf manager</p> <p>1.4 Consider seasonal issues affecting test results from information on the turf species and cultivars, historical records and own experience</p> <p>1.5 Determine nutritional status of the turf plant species and cultivars by analysing collected data and comparing with accepted standards</p>
2. Identify the requirements of a sports turf maintenance program	<p>2.1 Define the standards for turf presentation according to client requirements and industry best practice</p> <p>2.2 Identify the different maintenance requirements for a range of conditions over the growing cycle</p> <p>2.3 Select sports turf maintenance procedures to achieve the standards for turf presentation</p> <p>2.4 Identify and confirm availability of resources, tools, equipment and machinery required for the sports turf maintenance program</p> <p>2.5 Determine the most cost-effective approach to maintaining the sports turf playing surface</p>
3. Prepare and document the sports turf maintenance program	<p>3.1 Prepare detailed plan, specifications and quotation based on the requirements of the program</p> <p>3.2 Develop and document on-site procedures and schedules for the sports turf maintenance program</p>
4. Monitor the sports turf maintenance program	<p>4.1 Monitor the program to ensure enterprise standards for presentation of sports turf playing surfaces are achieved</p> <p>4.2 Review the sports turf maintenance program to ensure it remains responsive to changing conditions</p> <p>4.3 Implement appropriate courses of action to overcome shortcomings in the program</p> <p>4.4 Document and report remedial action undertaken to management</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF401A Develop a sports turf maintenance program.

Assessment Requirements for AHCTRF401 Develop a sports turf maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare an seasonal/annual program according to the requirements of the enterprise and the grounds maintenance budget
- outline the scheduled activities in the sports turf maintenance program to green keeping staff and their respective roles and responsibilities
- use existing information and records to determine a comprehensive maintenance program
- monitor and review the program to ensure responsiveness to changing conditions
- implement appropriate courses of action to overcome program shortcomings

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of maintaining a range of sports turf playing surfaces
 - growth habits and cultural requirements of specific turf plant species and cultivars under a range of soil and environmental conditions
 - maintenance requirements and practices for specific turf plant species and cultivars after initial establishment
 - nutrients required by specific turf plant species and cultivars and the effects of nutrient deficiency and toxicity on individual plant species and cultivars, including visual symptoms
 - plant diseases, pests and disorders and weeds of specific turf plant species and cultivars
 - site evaluation techniques including analysis of the condition of soils, plants, and the site for turf maintenance activities

- soil ameliorants commonly required to treat the soil problems experienced by the enterprise
- the characteristics of soil and other growth media types, uses and additives to enhance the available nutrition for specific turf plant species and cultivars
- the main simple and compound fertiliser products available to the enterprise

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC TRF402 Plan and implement sports turf renovation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and implement sports turf renovation. It applies to greenkeepers and turf managers who plan, coordinate and supervise the renovation of a sports turf area for minor projects and seasonal renovations in the turf industry.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare the turf	1.1 Identify the turf renovation site and undertake field measurements

Element	Performance criteria
renovation program	and tests 1.2 Select and calculate renovation materials and resource requirements 1.3 Interpret existing design plans and documentation 1.4 Develop a renovation program containing the site assessment report, results of field measurements and tests, risk controls, and material and resource calculations 1.5 Develop and record schedule of works and specifications in the works program
2. Prepare renovation equipment	2.1 Check machinery maintenance logs and prepare machinery for the program 2.2 Carry out pre-operational and safety checks on tools, equipment and machinery
3. Implement the renovation program	3.1 Identify work team and contractors and coordinate work in a sequential, timely and effective manner 3.2 Organise and direct work pattern according to the schedule of works 3.3 Monitor renovation tasks and undertake remedial action 3.4 Maintain a clean and safe work area throughout and on completion of work
4. Complete renovation activities	4.1 Review site and surrounds for completion of works 4.2 Inspect and repair tools, equipment and machinery 4.3 Record expenses and review against budget 4.4 Review the renovation program for costs, scheduling, works procedures and quality of work

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCTRF402 Plan and implement sports turf renovation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct a site hazard identification and risk control assessment
- plan a sports turf renovation program
- document a sports turf renovation program
- develop a schedule of works and specifications for a sports turf renovation program
- implement the schedule of works for sports turf surfaces
- coordinate a work team and contractors

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of sports turf renovation
- enterprise and industry standards for turf surface appearance and quality
- environmental implications of renovation activities, turf and soil treatments, and waste disposal procedures
- field measurements, such as infiltration rate, organic fines, hardness, traction, surface smoothness and turf sward height
- planting, care and renovation scheduling requirements of grass species and cultivars
- specialist turf renovation practices to achieve high performance turf

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF501 Plan the establishment of sports turf playing surfaces

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish sports turf playing surfaces and develop a design for the site, its specifications and work procedures. It applies to the planning processes involved in establishing turf in new constructions and major renovations of existing sports turf surfaces.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Carry out preliminary planning activities for turf establishment	1.1 Confirm client preferences and requirements for the sports turf playing surface 1.2 Assess the site for biophysical factors, services and site modifications 1.3 Research turf plant species and cultivars, legal attributes and local by-laws and restrictions that may affect the plan for turf establishment 1.4 Identify environmental implications of the planned turf establishment works and report to personnel for further research 1.5 Develop a concept plan that reflects client preferences and requirements and takes into account site factors and any identified environmental requirements and present to the client for discussion and approval
2. Determine requirements of turf establishment works	2.1 Select turf establishment procedures consistent with the concept plan according to site factors and available resources and equipment 2.2 Determine resources required for the construction of soil profiles, planting and ongoing maintenance of the playing surface 2.3 Ensure that the design of the soil profile to support the playing surface takes into account the turf use, soil characteristics and includes irrigation and drainage systems 2.4 Identify plants that are appropriate to the site and consistent with the concept plan 2.5 Calculate and cost the quantity and confirm availability with the supplier 2.6 Provide management of new turf that encourages optimal growth 2.7 Determine timelines for preparations, construction of soil profiles, planting and maintenance
3. Prepare and document the turf establishment plan and specification	3.1 Prepare designs of the soil profile and detailed plans of the scope of works, specifications and quotation based on the requirements of the turf establishment work 3.2 Develop and document on-site procedures and schedules for the establishment of the sports turf playing surface and its ongoing maintenance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF501A Plan the establishment of sports turf playing surfaces.

Assessment Requirements for AHCTRF501 Plan the establishment of sports turf playing surfaces

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- design sectional and elevation plans of the turf establishment works
- develop a schedule and a plan of the scope of works
- develop and interpret construction documentation
- develop specifications and prepare a bill of quantities
- identify and incorporate sub-contracted works into the turf establishment plan
- order and arrange for purchase and delivery of goods and services
- prepare a maintenance program for turf establishment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for establishing and maintaining sports turf playing surfaces
 - construction procedures, plant selection and cultural practices for sports turf playing surfaces
 - growth habits and cultural requirements of specific turf plant species and cultivars under a range of soil and environmental conditions
 - irrigation, drainage and the interrelationship of soil air, water and the physical structure of existing and manufactured soils and sports turf mixes
 - legislation and regulations relating to sports turf sites and turf establishment works
 - maintenance requirements and practices for specific turf plant species and cultivars prior to and after initial establishment
 - site evaluation techniques including analysis of the condition of soils, plants and the site for turf establishment activities

- surveying principles and techniques
- the role of project briefs and client consultation processes in planning turf establishment works

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF502 Manage sports turf renovation programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to identify and implement turf renovation programs appropriate to site requirements. It applies to sports turf managers, such as golf course superintendents, bowling greenkeepers, sports ground curators and turf contractors, who are responsible for the coordination of turf renovation programs.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify turf renovation	1.1 Inspect and visually evaluate turf surfaces to determine their

Element	Performance criteria
needs	condition 1.2 Undertake soil tests to determine their need for amelioration 1.3 Perform compaction, visual, physical and chemical tests 1.4 Undertake water quality tests, where appropriate, to determine its effect on turf growth and development
2. Select appropriate renovation techniques	2.1 Consider a range of renovation techniques and practices based on past practices and existing condition of turf 2.2 Refer to renovation records for information about previous practices and timing 2.3 Select turf renovation techniques according to the condition of the turf and the intended outcome of the program 2.4 Determine the timing of the renovation program according to the requirements of the turf species, requirements of the practice and the needs of players and use of the turf facility 2.5 Prepare an on-going turf maintenance program
3. Organise staff and resources for turf renovation project	3.1 Record and program the turf renovation program 3.2 Determine machinery and equipment for the renovation program and check for availability and working condition 3.3 Calculate and order consumable requirements 3.4 Contact and hire contractors and machinery, if necessary, according to the requirements of the program
4. Review renovation outcomes and complete associated record keeping	4.1 Record soil testing and water quality test results 4.2 Record direct costs of consumables and contractors 4.3 Record indirect costs of staff involvement 4.4 Record renovation practices and outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCTRF502 Manage sports turf renovation programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop renovation documentation
- develop program specifications
- develop a schedule and a plan of the scope of works
- order and arrange purchase and delivery of goods and services
- identify and incorporate sub-contracted works into the turf renovation plan
- prepare an on-going turf maintenance program

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for managing sports turf renovation programs
 - comparative environmental implications of renovation activities, turf and soil treatments and waste disposal procedures
 - enterprise and industry standards for turf surface appearance and quality
 - field measurement techniques such as infiltration rate, organic fines, hardness, traction, surface smoothness and turf sward height
 - impact of climatic conditions on turf recovery
 - planting, care and renovation scheduling requirements of turf grass species and cultivars.
 - requirements of the turf's intended use
 - schedule and intensity
 - soil physical and chemical properties for imported and existing soils
 - specialist turf renovation principles and practices

- turf nutrition and plant growth regulators

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF503 Develop sports turf management programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop sports turf management programs including turf establishment programs, extension/redesign, turf surface upgrades and renovation programs based on the organisation's available resources.

It applies to sports turf managers, such as golf course superintendents, 'grow in' superintendents, project managers and turf contractors, who have a responsibility for developing short-term, annual and on-going sports turf management and maintenance programs.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research turf management principles and practices	1.1 Establish or develop project briefs 1.2 Determine principles underpinning sports turf growth and development as appropriate for site conditions 1.3 Identify and consider environmental impacts of the turf management programs
2. Determine turf management program scope and objectives	2.1 Undertake a site assessment is undertaken that includes the assessment of the turf growing environment, the resources available for on-going turf maintenance, the source of water and its quantity and quality, the type of turf and its condition, intended use and intensity of use 2.2 Estimate the program duration and resource requirements 2.3 Develop a program schedule and budget that reflects the approach taken to the turf management programs 2.4 Review and confirm the turf management program with others
3. Communicate turf management programs to others	3.1 Identify and confirm current turf management practices for the project requirements 3.2 Record and communicate the intended programs in an appropriate format to staff and management or client 3.3 Identify and communicate key parts of the turf management program that involve others 3.4 Develop project schedules and timelines
4. Record and review turf management programs for use by others	4.1 Inspect turf regularly and implement changes to the management plan according to the monitoring process 4.2 Monitor the turf management program and consider and communicate changes to the program 4.3 Record information from team meetings 4.4 Report and file information for future use

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF503A Develop sports turf management programs.

Assessment Requirements for AHCTRF503 Develop sports turf management programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance should be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a works schedule and a plan of the scope of works
- develop specifications and bills of quantity for turf management programs
- develop turf management programs
- prepare a turf maintenance program
- record and communicate programs in an appropriate format to staff, management or client
- identify turf maintenance practices based on turf type and usage
- record and review turf management programs for use by others

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for
- impact of climatic conditions on turf varieties
- impact of intended usage on turf
- nutritional requirements for different stages of turf development
- project programming
- renovation requirements and techniques
- requirements of intended use of turf
- soil type and characteristics
- turf establishment techniques and requirements
- turf varieties and characteristics
- water quality and its impacts on soils and turf

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCTRF504 Manage sports turf facility assets

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage infrastructure and other facilities at sports turf grounds. It applies to sports turf managers, such as golf course superintendents, bowling greenkeepers and sports ground curators, who have a responsibility for the management of physical resources (other than the turf playing surfaces) at a sporting venue or club.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Turf (TRF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Develop an asset database	1.1 Identify and record physical resources and infrastructure for management purposes 1.2 Determine physical resources and infrastructure according to their type and maintenance requirements
2. Identify ongoing maintenance requirements for turf facilities	2.1 Identify and program particular maintenance requirements of various resources 2.2 Purchase and store resources and consumables for the maintenance of different types of facilities 2.3 Consider user manuals and other operational or maintenance documents provided by suppliers where necessary
3. Schedule and monitor program of maintenance works	3.1 Identify and program maintenance activities for enterprise's facilities 3.2 Inform staff responsible for maintenance activities 3.3 Develop record keeping requirements and use to monitor ongoing maintenance and inform others 3.4 Consider and plan for work health and safety issues associated with maintenance of turf facilities 3.5 Ensure that facilities that are unserviceable are dealt with accordingly 3.6 Plan for replacement of facilities that are no longer serviceable
4. Review maintenance works	4.1 Review maintenance schedules in a timely manner and update maintenance programs accordingly 4.2 Notify management of status of turf facilities and make plans for their upgrade or replacement if necessary

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTRF504A Manage sports turf facility assets.

AHCWAT201 Set up, operate and maintain water delivery systems for compost

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to set up, operate and maintain water delivery systems for composting.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Water (WAT)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to set up a water delivery system	1.1 Confirm details of location 1.2 Select and use hoses, tools and equipment and components 1.3 Identify appropriate water sources on site

Element	Performance criteria
	1.4 Identify workplace health and safety hazards associated with task 1.5 Select and use appropriate personal protective equipment 1.6 Measure and mark out water delivery lines 1.7 Set up water delivery system
2. Operate a water delivery system	2.1 Commence water delivery 2.2 Set water application rate 2.3 Check all pipes, hoses and all joints and confirm they are secure and leak free 2.4 Check and operate pumps
3. Check the efficiency of a water delivery system	3.1 Check the water application rate and distribution 3.2 Inspect water delivery system for operating faults and dry areas 3.3 Look for variations from required rate or settings, leaks, operating faults and dry areas at any stage in process 3.4 Carry out remedial action 3.5 Record the amount of water delivered to location

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- identify control system faults
- identify hazards and implement safe work procedures
- prepare and apply chemical dosing
- use water sampling and testing techniques

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for monitoring and operating water treatment processes
 - chemical dosing processes
 - environmental impacts of irrigation using water from any ground or underground source
 - environmental issues associated with water treatment
 - hazardous materials handling
 - water quality monitoring methods and techniques
 - water treatment and water filtration techniques
 - work health and safety procedures relating to the operation of machinery and the use of chemicals

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCWAT502 Manage water systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse performance and audit data
- develop and implement enterprise work health and safety and environmental procedures
- evaluate irrigation system performance
- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- strategically manage irrigated production systems

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of water systems management
 - cost or benefit analysis
 - enterprise policies and procedures
 - environmental impacts of irrigation, using water from any ground or underground source
 - plant requirements
 - water quality

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWHS101 Work safely

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to work safely. It applies to new employees working under supervision, within established and well-known parameters and with limited autonomy.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work Health and Safety (WHS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify safety issues at work	1.1 Identify and explain employee and employer duty of care requirements

Element	Performance criteria
	1.2 Identify and explain own responsibilities to comply with safe work practices
2. Observe safe work practices	2.1 Read, follow and observe instructions, notices and workplace safety signs 2.2 Use protective clothing and equipment when completing work tasks 2.3 Check safety of machines, tools and equipment before use 2.4 Operate machines, tools and equipment safely 2.5 Use correct manual handling techniques
3. Participate in workplace safety meetings	3.1 Report work health and safety hazards to supervisor 3.2 Participate in workplace safety meetings
4. Follow incident and emergency response procedures	4.1 Follow workplace procedures for dealing with accidents, fire and emergencies 4.2 Follow enterprise procedures for the provision of first aid

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCOHS101A Work safely

Assessment Requirements for AHCWHS101 Work safely

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- comply with their responsibilities to work safely
- following workplace procedures for hazard identification
- read and follow safety warning signs, symbols and work instructions
- safely operate machines, tools and equipment
- report workplace safety hazards
- participate in workplace safety meetings
- follow enterprise incident and emergency response procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- employee and employer work health and safety duty of care responsibilities
- enterprise procedures relating to hazards, fires, emergencies, accidents and risk control
- hazards and risks in the industry sector
- relevant machinery and equipment operator manuals
- relevant work health and safety legislation, codes of practice and enterprise workplace policies
- work health and safety signs and symbols relevant to area of work

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWHS201 Participate in work health and safety processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise and report hazards in the workplace. It also describes the skills and knowledge required to follow workplace safety procedures and directions.

This unit is applicable to supervised workers who are required to follow work health and safety policies and procedures.

All work must be carried out in accordance with enterprise procedures, recommended safe practices and the relevant legislation.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work Health and Safety (WHS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Follow workplace procedures for hazard identification and risk control	1.1 Recognise hazards in the workplace and report them to designated personnel 1.2 Assess risks associated with identified hazards 1.3 Follow workplace procedures and work instructions to control risks 1.4 Follow workplace procedures for dealing with accidents, fire and emergencies within the scope of responsibilities and competencies 1.5 Recognise risks to fellow workers, other people and animals and take action to eliminate or reduce them 1.6 Recognise and carry out employee responsibilities prescribed in work health and safety legislation 1.7 Undertake safety training as directed
2. Observe safe practices during work operations	2.1 Identify, use, maintain and store personal protective equipment (PPE) 2.2 Undertake safety checks on all machinery and equipment before operation 2.3 Identify and report hazards associated with handling hazardous substances and assess risk 2.4 Identify noise hazards, notify relevant personnel and assess associated risks 2.5 Assess risks associated with manual handling jobs prior to commencing activity or carrying out work 2.6 Access information on work health and safety as required
3. Participate in arrangements for maintaining the health and safety of all people in the workplace	3.1 Raise work health and safety issues with designated personnel 3.2 Make contributions to participative arrangements in the workplace within the scope of own responsibilities and competencies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCWHS301 Contribute to work health and safety processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out enterprise work health and safety policies and procedures.

This unit is applicable to individuals. They typically work within clear reporting lines and procedures.

All work must be carried out to comply with workplace procedures and work health and safety and other relevant legislation and codes.

This unit applies to individuals who actively participate in the workplace safety system and work under broad direction and take responsibility for their own work. They work in a range of known contexts and complete routine activities.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work Health and Safety (WHS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply work health and safety policies and procedures	1.1 Make information regarding organisation work health and safety policies and procedures readily accessible to all employees 1.2 Identify and carry out employee responsibilities prescribed in work health and safety legislation, codes of practice and national standards 1.3 Identify and carry out employee responsibilities prescribed in enterprise work health and safety policies, including emergency procedures
2. Assist in workplace hazard identification and risk control	2.1 Provide and explain information regarding hazard identification and risk control regularly 2.2 Recognise hazards in the workplace and report them to designated personnel 2.3 Assess risks associated with identified hazards 2.4 Follow workplace procedures, safety signs and work instructions for controlling risks accurately 2.5 Recognise risks to fellow workers, other people and animals and take action to eliminate or reduce them 2.6 Undertake or provide safety training where required
3. Observe safe practices during work operations	3.1 Identify, use, maintain and store Personal Protective Equipment (PPE) required for work 3.2 Read and follow safety warning signs 3.3 Undertake basic safety checks on all machinery and equipment before operation 3.4 Identify hazards associated with handling hazardous substances, assess risks and implement risk controls in accordance with enterprise procedures and work health and safety requirements 3.5 Identify noise hazards, notify relevant personnel, assess associated risks and implement controls in accordance with work health and safety requirements 3.6 Assess manual handling risks prior to commencing activity and use safe lifting practices 3.7 Access information on work health and safety for specific work operations

Element	Performance criteria
4. Participate in arrangements for maintaining the health and safety of all people in the workplace	4.1 Contribute to ongoing monitoring and reporting of all aspects of workplace safety 4.2 Raise work health and safety issues with designated personnel in accordance with enterprise procedures and relevant work health and safety legislation 4.3 Make contributions to participative arrangements in the workplace within the scope of responsibilities and competencies 4.4 Make suggestions to assist the development of effective solutions and control the level of risk associated with enterprise activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCWHS401 Maintain work health and safety processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to facilitate meetings and document actions that relate to the consideration of work health and safety issues in the workplace.

This unit is applicable to nominated work health and safety representatives in a workplace.

All work must be carried out to comply with workplace and legislative requirements.

This unit applies to individuals who take responsibility for their own work. They provide and communicate solutions to a range of predictable and unpredictable problems.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work Health and Safety (WHS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Provide information about work health and safety	1.1 Explain, with accuracy and clarity, relevant provisions of work health and safety legislation and Codes of Practice to the work group 1.2 Provide information on enterprise work health and safety policies, procedures and programs in a readily accessible manner, and accurately and clearly explain the information to the work group 1.3 Regularly provide, and accurately and clearly explain, information about identified hazards, the outcomes of risk assessment and control procedures
2. Facilitate the participation of workers in work health and safety observance and decision-making	2.1 Implement and monitor enterprise procedures for consultation on work health and safety issues to ensure that all members of the work group have the opportunity to contribute 2.2 Describe, with clarity, procedures used by workers to report work health and safety hazards, assess risks, and take action to control risks, to the work group 2.3 Deal with and resolve issues raised through consultation or refer them to the appropriate personnel 2.4 Communicate, with promptness, the outcomes of consultation over work health and safety issues to the work group
3. Implement procedures for identifying hazards and assessing and controlling risks	3.1 Identify existing and potential hazards and report them to ensure the implementation of adequate risk assessment and effective control measures 3.2 Check that the work group implements procedures to control work health and safety risks and undertakes regular monitoring to ensure ongoing adherence and effectiveness of risk control 3.3 Identify inadequacies in existing risk control measures in accordance with the hierarchy of control and report inadequacies to designated personnel 3.4 Identify and report inadequacies in allocation of resources to management to ensure safe work practice 3.5 Monitor and regularly report existing risk control measures in accordance with workplace procedures
4. Implement workplace procedures for dealing with emergencies and hazardous events	4.1 Implement workplace procedures for dealing with work health and safety emergencies, where necessary, to ensure prompt and effective control action 4.2 Report work health and safety emergencies in accordance with established enterprise procedures 4.3 Implement control measures based on the hierarchy of control to

Element	Performance criteria
	prevent recurrence and minimise the risk of emergencies and hazardous events, or alternatively, refer measures to designated personnel for implementation
5. Implement and monitor enterprise procedures for providing work health and safety training	5.1 Identify work health and safety induction and training needs accurately, specifying the gaps between the required work health and safety competencies and those held by the work group 5.2 Make arrangements for meeting identified work health and safety training needs in both on and off-the-job training programs in consultation with relevant parties
6. Implement and monitor enterprise procedures for maintaining work health and safety records	6.1 Accurately and legibly complete work health and safety records for work area 6.2 Use aggregate information from work health and safety records to identify hazards and monitor risk control procedures within the work area in accordance with own responsibilities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWHS401 Maintain work health and safety processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- facilitate the participation of workers in work health and safety observance and decision-making
- establish procedures to document the identification of hazards and assessment of risk covering the operations of the enterprise
- identify work health and safety hazards and conducting the risk assessment process
- implement enterprise emergency procedures and organise safety drills
- provide staff with work health and safety training in risk assessment, and other areas nominated by risk controls
- respond to emergencies and work health and safety issues in an appropriate and timely manner
- facilitate meetings and document actions to consider work health and safety issues in the workplace
- distribute information concerning work health and safety processes and requirements to staff
- maintain work health and safety records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- hazards in the workplace
- relevant work health and safety legislation and Codes of Practice
- hazard identification and risk control processes
- the hierarchy of work health and safety risk control and its implementation for hazards in land-based industries

- work health and safety training
- communication and engagement strategies with workers
- relevant enterprise management systems and procedures
- accident and incident investigation
- enterprise emergency procedures
- participative work practices

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWHS501 Manage work health and safety processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop work health and safety policies and procedures that demonstrate enterprise commitment to work health and safety.

This unit is applicable to the development of management systems and procedures. It is also applicable to the management of the implementation process, which is usually conducted within policy guidelines and procedures that require the use of discretion and judgement.

All work must be conducted in accordance with relevant legislative requirements, Codes of Practice, workplace procedures and safe work practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced, skilled activities.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) and occupational safety and health (OSH) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State and Territory OHS legislative requirements.

No occupational licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work Health and Safety (WHS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop work health and safety policies and procedures	1.1 Develop a work health and safety business plan and program for the enterprise in consultation with designated personnel and management 1.2 Clearly define and allocate work health and safety responsibilities and duties and include them in job descriptions and duty statements for all relevant positions 1.3 Identify, seek and provide financial and human resources for implementing work health and safety policies and procedures as required 1.4 Provide and explain information on the work health and safety system and procedures, for the area of responsibility, in a form which is readily understood by employees
2. Establish and maintain processes to ensure the participation of all employees in the application of work health and safety	2.1 Establish and maintain consultation processes with employees and their representatives 2.2 Deal with issues raised through participation and consultation and resolve them promptly and effectively 2.3 Provide information about the outcomes of participation and consultation in a manner readily accessible to employees
3. Establish and maintain procedures for identifying hazards	3.1 Identify and confirm existing and potential hazards within the area of responsibility in accordance with trends identified using the work health and safety records system 3.2 Develop and integrate a procedure for the ongoing identification of hazards within systems of work and procedures 3.3 Appropriately monitor activities to ensure that the procedure is effectively adopted throughout areas of managerial responsibility 3.4 Address hazard identification at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created
4. Establish and maintain procedures for assessing risks	4.1 Assess risks associated with identified hazards using information derived from workplace records and industry-wide information 4.2 Develop a procedure for ongoing assessment of risks and integrate it within systems of work and procedures 4.3 Monitor activities to ensure the effective adoption of risk

Element	Performance criteria
	<p>assessment procedures throughout the area of managerial responsibility</p> <p>4.4 Address risk assessment at the planning, design and evaluation stages of any change in the workplace to ensure that the risk from hazards is not increased</p> <p>4.5 Investigate and record accident and dangerous occurrences in accordance with work health and safety procedures</p>
<p>5. Implement interim risk control measures until a better or permanent control measure is developed</p>	<p>5.1 Develop and implement measures to control assessed risks in accordance with the hierarchy of control and trends identified from the work health and safety records system</p> <p>5.2 Implement interim solutions, when measures which control a risk at its source are not immediately practicable, until a permanent control measure is developed</p> <p>5.3 Develop a process of ongoing hazard identification and risk assessment, and a review of effectiveness of control programs, and integrate them into enterprise management arrangements</p> <p>5.4 Monitor activities to ensure effective adoption of the risk control procedure throughout the area of managerial responsibility</p> <p>5.5 Address risk control at the planning, design and evaluation stages of any change in the workplace to ensure the inclusion of adequate risk control measures</p> <p>5.6 Design systems to reduce risk and design administrative arrangements to ensure the implementation of safe work health and safety practices where unable to eliminate hazard</p> <p>5.7 Implement effective work health and safety risk management measures during any modification to buildings and structures or machinery and work activities</p> <p>5.8 Identify inadequacies in existing risk control measures and seek or provide resources enabling the implementation of new measures</p>
<p>6. Plan and manage enterprise procedures for dealing with hazardous events</p>	<p>6.1 Identify, with accuracy, potential emergencies posing risks to the health and safety of workers and the public</p> <p>6.2 Develop plans and procedures, which control the risks associated with hazardous events, in consultation with appropriate emergency services</p> <p>6.3 Provide appropriate information and training to employees to enable the implementation of correct emergency procedures</p> <p>6.4 Train adequate numbers of workers in First Aid to ensure that first aid is applied to preserve life and minimise injury</p>
<p>7. Establish and maintain a work health and safety induction and</p>	<p>7.1 Develop a work health and safety induction program to meet the work health and safety needs of new employees</p> <p>7.2 Develop a work health and safety training program as part of</p>

Element	Performance criteria
training program	supervisors' and employees' general training
8. Establish and maintain a system for work health and safety records	8.1 Establish and monitor a system for keeping work health and safety records to allow identification of patterns of occupational injury and disease in the enterprise 8.2 Regularly update records and use them to evaluate the effectiveness of the enterprise work health and safety program
9. Evaluate the enterprise work health and safety system and related policies, procedures and programs	9.1 Assess the effectiveness of the work health and safety system and related policies, procedures and programs according to enterprise aims with respect to work health and safety 9.2 Develop and implement improvements to the work health and safety system to ensure more effective achievement of enterprise aims 9.3 Assess compliance with work health and safety legislation and Codes of Practice to ensure, as a minimum, the maintenance of legal work health and safety standards

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWHS501 Manage work health and safety processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop work health and safety policies and procedures that demonstrate enterprise commitment to work health and safety
- establish and maintain arrangements to ensure the involvement of all employees in the management of work health and safety
- establish and maintain procedures for identifying hazards
- establish and maintain procedures for assessing risks
- establish and maintain procedures for controlling risks
- establish and maintain enterprise procedures for dealing with hazardous events
- establish and maintain a work health and safety induction and training program
- establish and maintain a system for work health and safety records
- analyse recorded data to determine where the work health and safety program can better meet enterprise and employee needs
- evaluate the enterprise work health and safety system and related policies, procedures and programs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- data and documentation for industry injury statistics
- legislated employer and employee work health and safety responsibilities
- significant hazards and areas of risk in the workplace
- all relevant work health and safety legislation and Codes of Practice consistent with the hierarchy of work health and safety risk control and its implementation for hazards in land-based industries

- risk control measures
- the hierarchy of risk controls
- relevant management systems and procedures
- public safety issues

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWOL101 Support woolshed activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide support to others during shearing and wool preparation operations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for	1.1 Identify the required materials, tools and equipment from provided lists and supervisor's instructions

Element	Performance criteria
woolshed activities	1.2 Check all materials, tools and equipment and inform supervisor if there are insufficient or faulty items 1.3 Use techniques when loading and unloading materials that demonstrate correct manual handling and minimise damage to the load and the vehicle 1.4 Select and use suitable personal protective equipment 1.5 Identify work health and safety hazards and inform supervisor
2. Undertake woolshed activities as directed	2.1 Follow instructions and directions provided by supervisor and seek clarification when necessary 2.2 Undertake work in a safe and environmentally appropriate manner 2.3 Carry out interactions with other workers and owners and classers in a positive and professional manner 2.4 Move animals humanely into pens as directed 2.5 Undertake board duties as directed 2.6 Provide support to shearing as directed 2.7 Provide support to wool sorting, replacing butts and wool pressing as directed 2.8 Inform supervisor if there are problems or difficulties in completing work to required standards or timelines
3. Handle materials and equipment	3.1 Store waste material produced during woolshed activities in a designated area as directed by supervisor 3.2 Handle and transport materials, equipment and machinery as instructed 3.3 Maintain a clean and safe work site while completing woolshed activities
4. Clean up on completion of woolshed activities	4.1 Return materials are returned to store or dispose of appropriately 4.2 Clean, store and maintain tools and equipment 4.3 Inform supervisor of the work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use safe work procedures
- prepare materials, tools and equipment for woolshed activities
- provide support to shearing and crutching
- move and pen animals
- assist with wool handling
- undertake woolshed activities as directed
- handle materials and equipment
- clean up on completion of woolshed activities
- communicate with supervisor and team members using industry standard terminology
- apply work health and safety procedures in the context of own work
- apply enterprise animal welfare practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of safe work practices
- characteristics of wool types and sheep breeds that relate to sorting wool
- features of shearing and wool preparation tools and equipment
- basic wool handling practices
- relevant sections of federal, state and territory industrial awards that relate to working conditions in the woolshed
- enterprise work health and safety, environmental protection and animal welfare policies and procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

AHCWOL201 Pen sheep

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and maintain the supply of sheep to shearer catching pens.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Provide continuous supply of sheep to	1.1 Identify work health and safety hazards and report to the

Element	Performance criteria
shearers	supervisor 1.2 Select and use suitable personal protective equipment 1.3 Apply animal welfare principles to the movement and penning of sheep 1.4 Pen sheep in their separate mobs as instructed 1.5 Secure gates to prevent sheep escaping on to the board 1.6 Monitor the speed of shearers and arrange numbers of sheep in catching pens so that shearers all complete shearing at or near mob cutout 1.7 Monitor sheep numbers in catching pens and fill pens as they empty to ensure continuous supply to shearers 1.8 Refill other pens as required
2. Keep mobs separate	2.1 Secure gates to prevent mixing of mobs 2.2 Fill pens with sheep from only one mob at any given time to avoid mixing mobs and wool types 2.3 Inform supervisor of mob cutout 2.4 Move sheep to other catching pens to ensure that mob cutout is simultaneous 2.5 Use safe workplace practices and observe animal welfare requirements with regard to livestock handling
3. Prevent contamination of wool	3.1 Arrange pen density at optimum numbers 3.2 Monitor pens to maintain sheep in standing position to avoid crushing, trampling or soiling of wool 3.3 Minimise and remove potential contaminants within pens 3.4 Follow enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCWOL201 Pen sheep

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards minimise risks and use safe work procedures
- accept and interpret advice from the shed supervisor
- observe differences between mobs of sheep
- monitor shearers workflow and estimate rates for refilling the catching pens and for mob cutout
- move sheep in a shed and pen them up
- use the accepted communications signals in the shed when shearing and sheep movement is in full force
- apply work health and safety in the context of own work
- follow enterprise biosecurity policies where required
- apply animal welfare practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of shearing sheds, boards and catching pens
- types of gates and catches in shearing sheds
- safe handling techniques for catching, dragging, and releasing sheep
- animal welfare requirements in relation to sheep
- features of sheep behaviour in the shearing sheds and yards
- hazards associated with handling livestock
- safety features of personal protective equipment and clothing, and when and how it should be used
- relevant industry awards and conditions that relate to working conditions in the wool industry

- relevant sections of State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare, and biosecurity as applied to working in the wool industry

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Remove contamination	1.1 Identify work health and safety hazards and report to the

Element	Performance criteria
from the fleece	supervisor 1.2 Select and use suitable personal protective equipment 1.3 Remove stained wool, black/coloured wool and contamination on the shearing board as instructed 1.4 Apply safe working practices and using the available safety equipment
2. Remove fleeces and component parts from the shearing board	2.1 Pick wool up after the shearing handpiece has been disengaged and not before 2.2 Identify wet wool and remove for drying 2.3 Pick belly wool up and remove stained wool 2.4 Remove crutch wool and reposition the hind leg if necessary 2.5 Arrange the hind legs of the fleece to allow for the fleece to be picked up efficiently 2.6 Pick fleece up in a controlled bundle and remove from shearing stand as soon as sheep is shorn 2.7 Carry fleece to the wool table and throw to land flat and spread out ready for skirting 2.8 Collect loose wool remaining in the let-out chute 2.9 Place all wool removed from the fleece and from the shearing board in the correct bins or on the correct table
3. Handle non-fleece wool	3.1 Sweep up locks and place in correct bins 3.2 Separate board and table locks where directed 3.3 Remove shanks and jowls if directed and placed in appropriate bin 3.4 Remove pizzle stain from bellies and place in stains line 3.5 Remove brisket wool if directed by the wool classer 3.6 Sweep crutchings clear of the board, remove stain and dags and place in appropriate bins 3.7 Carry lambs wool and prematurely shorn wools to the wool table using boards or paddles, if required 3.8 Place lambs wool on tables for sorting
4. Skirt fleeces under supervision	4.1 Seek information on wool classer requirements for mob 4.2 Remove ribs and sweats and place in appropriate bins 4.3 Remove short crutch wool and wiggings and place with locks 4.4 Remove wool carrying vegetable matter under wool classer supervision 4.5 Seek feedback on accuracy of skirting and fleece to skirtings ratio 4.6 Assist wool classer or wool roller in separating fleece wool, which has been identified as defective or lacking uniformity

Element	Performance criteria
5. Sweep the board and wool room	5.1 Sweep shearing boards, wool room and area beneath the wool table regularly and when necessary during the shearing operation 5.2 Keep the shearing boards and the wool room free of potential contamination 5.3 Remove waste and place appropriately in full consideration of environmental implications
6. Empty bins and other wool containers	6.1 Empty bins and other wool containers as necessary, and replace as directed
7. Perform cut-out duties	7.1 Empty all butts and bins and press wool 7.2 Stack bales 7.3 Sweep wool working area 7.4 Store equipment 7.5 Wash board down and disinfect

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCWOL202 Perform board duties

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- remove fleeces and sweep boards before the next sheep is dragged for shearing
- pick up and throw fleeces safely onto wool table
- remove non-fleece wools from the board and place in correct bins
- identify and accurately remove stains
- use correct technique for skirting and rolling fleece
- check quantities in bins
- sweep floors and remove contamination
- work rapidly within specified timeframes
- communicate with supervisor, the wool classer and the shearers
- apply work health and safety practices in the context of own work
- apply enterprise environmental sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the parts of a fleece
- types of shearing shed layouts
- duties and responsibilities of a board person
- types and sources of contamination of the fleece and be able to explain the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to the preparation of skirtings and oddments

- methods of handling fleece that minimise risk to own health, including safe lifting and bending techniques.

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Assessment Requirements for AHCWOL203 Carry out wool pressing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- observe and report on work health and safety hazards and risks
- apply standard operating procedures for the press and equipment
- operate different types of wool presses under supervision
- operate the various types of scales and manual handling devices and supervision
- maintain uniform bale weights for each line
- brand bales clearly and accurately
- handle and stack wool bales efficiently and without risk to self, other people or machinery
- record bale information to be interpreted and used by other people
- communicate with wool classer/supervisor
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of contamination of the fleece
- the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to wool pressing
- methods of handling fleece and bales that minimise risk to own health, including safe lifting and bending techniques
- features of industry standards for weight, length of bales, fastening methods and type of pack
- industry standards for bale branding
- features of the recording system for bale details in use in the organisation

- enterprise work health and safety policies

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

AHCWOL204 Undertake basic skirting of alpaca fleece

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to undertake basic skirting of alpaca fleece during and after shearing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for skirting	1.1 Assemble and check all tools, equipment and materials required

Element	Performance criteria
	for the task 1.2 Identify work health and safety hazards and report to the supervisor 1.3 Select and use suitable personal protective equipment 1.4 Follow site quarantine and other biosecurity protocols 1.5 Take midside fleece samples from each alpaca prior to shearing
2. Collect fleece during shearing	2.1 Use safe work practices at all times 2.2 Pick fleece up as blanket, neck and pieces during shearing 2.3 Keep blanket, neck and pieces and weigh separately, label and record weight 2.4 Discard severely contaminated fleece 2.5 Carry blanket to classing table to enable skirting
3. Skirt saddles under supervision and according to industry guidelines	3.1 Throw blanket lightly onto classing table exposing entire fleece so as to enable loose sand or dirt to fall through without disturbing structure of saddle 3.2 Remove fleece with excessive medullation, or not consistent with general style, character, micron and length of staples and place in pieces bag 3.3 Discard Fleece with major faults and of No Commercial Value (NCV)
4. Process neck pieces and finalise operation	4.1 Separate individual pieces into small bags 4.2 Place small bags containing pieces into a larger bag regardless of colour, micron or length 4.3 Place neck pieces in appropriate classing line 4.4 Seek feedback on work done from supervisor and note any required improvements for future action

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWOL204 Undertake basic skirting of alpaca fleece

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe work practices
- pick up and throw alpaca fleeces
- skirt of alpaca fleece to industry standards
- package fleece and skirtings to industry standards
- communicate faults, malfunctions and workplace hazards
- report on and maintain operational records
- communicate with supervisor and work team
- follow work health and safety policies
- follow enterprise biosecurity protocols
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the parts of Huacaya and Suri alpaca fleeces
- types of shearing shed layouts
- duties and responsibilities of a board person
- types and sources of contamination of the alpaca fleece
- enterprise policies with regard to recording and reporting routines
- equipment and bag requirements for skirting and handling fleece to industry standards
- relevant state and territory legislation, regulations and codes of practice with regard to work health and safety, environment, biosecurity and animal welfare.
- features of the Alpaca Fleece classing Code of Practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

AHCWOL301 Appraise wool using industry descriptions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to appraise wool by applying the industry description system (AWEX-ID) to classed lines of wool.

All work is carried out to industry standards using the AWEX system for the appraisal and description of non-measured characteristics of greasy wool (AWEX-ID) and Code of Practice for the Preparation of Australian Wool Clips.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source and prepare information on wool to	1.1 Identify and access sources of information on wool appraisal

Element	Performance criteria
be appraised	1.2 Describe the features of AWEX - ID the system for the appraisal and description of non-measured characteristics of greasy wool 1.3 Identify and classify the visual characteristics to be appraised using the relevant descriptors
2. Apply the industry description to lines in a clip	2.1 Check wool clip classing lines for compliance with the Code of Practice 2.2 Appraise wool clip classing lines and record the AWEX-ID 2.3 Evaluate the consistency of appraisal across a wool clip against appraisals for the clip in the sale catalogue
3. Use the industry description to establish a market value for lines made	3.1 Access market information 3.2 Identify premiums and discounts for wool characteristics 3.3 Determine a value for each line made
4. Review clip preparation strategies using an industry description	4.1 Check clip preparation strategies and revise using the AWEX-ID descriptors, and the market value applied to the lines made 4.2 Provide feedback on market information, the effect of management on the wool clip and possible future selection strategies to the woolgrower using the AWEX-ID descriptors applied to the lines

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Wool appraised must include wool from Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Unit Mapping Information

This unit is equivalent to AHCWOL301A Appraise wool using industry descriptions

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWOL301 Appraise wool using industry descriptions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- source and prepare information on wool to be appraised for industry description (AWEX-ID)
- apply an industry description (AWEX-ID) to lines in a clip and record appraisal result
- use an industry description (AWEX-ID) to establish a market value for lines made
- review clip preparation strategies using industry standard terminology to communicate feedback to the grower

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of Code of Practice for the Preparation of Australian Wool Clips
- features of AWEX system for the appraisal and description of non-measured characteristics of greasy wool (AWEX-ID)
- features of the Australian Wool Exchange Wool Selling Rules
- interpretation of the wool sale catalogue
- interpretation of wool testing data
- relevant sources of wool sale lot information
- features of subjective assessment of style, colour, type of vegetable matter fault, degree of stain and faults, and defects.

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL303 Prepare wool based on its characteristics

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare wool based on its characteristics.

All work must be carried out to comply with the requirements of Code of Practice for the Preparation of Australian Wool Clips, workplace procedures, work health and safety and biosecurity requirements and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Separate wools with characteristics outside	1.1 Make assessment of sheep breed and wool type

Element	Performance criteria
the uniformity requirements of the Code of Practice.	1.2 Separate wools into different lines based on fibre diameter, length and strength, colour and character and handle and style 1.3 Check staple formation and tip 1.4 Separate pigmented wool and wool which includes medulated fibres
2. Separate wool showing faults that impact on processing or fabric quality.	2.1 Separate wool for dogginess that will impact on fabric quality 2.2 Separate cotted wool that will require extra processing 2.3 Identify and remove skin pieces 2.4 Check wool for dermatitis and kept separate 2.5 Identify and separate wool based on the level and type of vegetable matter contamination where it requires different processing 2.6 Identify mobs with high pigmented fibre risk and keep their wool completely separate from low risk wool 2.7 Identify wool from sheep with shedding characteristics and keep completely separate from non-shedding white woolled sheep, record risk of exposure to shedding breeds on the classer's report 2.8 Keep fleeces containing pigmented fibre in a white woolled flock separate 2.9 Keep wool containing stain separate
3. Recognise impurities of greasy wool and their effect on processing and yield.	3.1 Examine wool for natural impurities 3.2 Identify applied impurities and assess their effect on processing 3.3 Identify acquired impurities and assess their effect on processing and yield of clean fibre

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Preparation must include wool from Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Unit Mapping Information

This unit is equivalent to AHCWOL303A Prepare wool based on its characteristics

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCWOL303 Prepare wool based on its characteristics

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess key wool characteristics
- identify and separate wool faults
- identify and separate wool with impurities
- separate wool that does not meet Code of Practice requirements for uniform, predictable low risk lines of wool
- identify and separate wool from shedding sheep breeds
- identify and separate wools with a high pigmented fibre risk

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics of the breeds of sheep
- inherent wool characteristics - diameter, length and strength, colour, yield, VM type, curvature, and comfort factor and explain how these characteristics impact on processing and final wool product
- features of impurities in wool and explain their impact on processing and yield of clean fibre after processing
- types and sources of contamination and explain their impact on processing and final wool product
- features of the main wool faults and explain their impacts on processing
- techniques used to measure wool characteristics
- processing methods - woollen and worsted, stages of processing
- wool growth, skin and fibre biology, and discuss the effect of genetics and environment on fibre characteristics

- requirements for handling shedding and pigmented fibres
- relevant aspects of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards that related to preparing wool.

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL304 Prepare fleece wool for classing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare fleece wool for classing to comply with the requirements of the Code of Practice for the Preparation of Australian Wool Clips.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction of the wool classer and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify characteristics	1.1 Identify characteristics of wool important in processing and assess

Element	Performance criteria
of greasy wool and relate to processor requirements	uniformity within the fleece 1.2 Determine the portion of fleece to be removed to ensure uniformity of the fleece with the other fleeces from the mob
2. Check fleeces for impurities	2.1 Identify natural impurities of the wool and determine the portion of fleece to be removed 2.2 Identify vegetable matter types and determine the portion of fleece to be removed 2.3 Identify mineral impurities and relate to yield potential and determine the portion of fleece to be removed 2.4 Identify and remove any contamination from the fleece 2.5 Check work regularly with the wool classer and adjust procedures if required
3. Check fleeces for presence of wool faults	3.1 Identify hairy breeches and cotted wool and determine the portion of fleece to be removed 3.2 Identify unscourable colour, water stain and dermatitis and handled as directed 3.3 Remove skin pieces and place where directed 3.4 Carry out work safely and at a rate appropriate to the enterprise
4. Skirt and roll fleeces	4.1 Skirt fleeces to remove those portions determined above that adversely affect the uniformity and value of the remaining fleece 4.2 Double skirt fleeces containing clumpy vegetable matter or prepared as directed 4.3 Assess necks and backs for soundness, dust and VM levels, and handled as directed 4.4 Roll fleeces and present to classer 4.5 Place skirtings in the nominated bins 4.6 Remove waste and dispose of appropriately taking into account environmental implications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Classing must include the preparation of Fine/Superfine Merino, Medium/Strong Merino and Crossbred fleece wools

1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess fleece characteristics and prepare fleeces as directed by wool classer
- assess levels of vegetable matter and other impurities
- accurately skirt fleeces at commercial pace
- roll fleeces in preparation for classing
- communicate with wool classer and other team members using industry standard terminology
- follow enterprise work health and safety procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics wool and their impacts on processing
- principles and requirements of wool processing methods-woollen and worsted
- features of wool growth
- features of the parts of a fleece
- features of wool faults and impurities
- enterprise the work health and safety procedures
- requirements of Code of Practice for the Preparation of Australian Wool Clips as they relates to the preparation of fleece wool

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs.

AHCWOL305 Prepare skirtings and oddments

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare non-fleece wool to comply with the requirements of the Code of Practice for the Preparation of Australian Wool Clips.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare skirtings	1.1 Identify types of skirtings and oddments

Element	Performance criteria
	1.2 Identify types of pieces and separate 1.3 Prepare Merino skirtings as directed 1.4 Prepare Crossbred skirtings as directed by wool classer
2. Prepare belly wool	2.1 Identify and separate belly wool 2.2 Remove stains and briskets as directed 2.3 Prepare Crossbred and Merino belly wool as directed by wool classer
3. Prepare lambs wool	3.1 Identify types of lambs' wool 3.2 Separate lambs' wool 3.3 Remove stains and trimmings 3.4 Prepare Merino lambs wool as directed 3.5 Prepare Crossbred lambs wool as by wool classer
4. Prepare locks	4.1 Identify types of locks 4.2 Separate board and table locks 4.3 Prepare Crossbred and Merino locks as by wool classer
5. Prepare crutchings	5.1 Identify types of crutchings 5.2 Remove stains and other impurities 5.3 Prepare Merino and Crossbred crutchings as by wool classer
6. Prepare stain	6.1 Identify types of stain 6.2 Prepare Merino and Crossbred stain as by wool classer
7. Prepare other oddments	7.1 Define and identify other oddments 7.2 Describe the preparation of other oddments 7.3 Identify and remove medulated fibre and shedding breeds wool

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Preparation must include the preparation of Fine/Superfine Merino, Medium/Strong Merino and Crossbred skirtings and oddments

Unit Mapping Information

This unit is equivalent to AHCWOL305A Prepare skirtings and oddments

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCWOL305 Prepare skirtings and oddments

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- accurately skirt fleeces at commercial rates
- recognise and remove contamination
- recognise wool faults
- identify impurities in wool
- identify and remove stain
- identify oddments
- prepare skirtings and oddments
- communicate with team members, wool classer and the shearer

Knowledge Evidence

The candidate must demonstrate knowledge of:

- processing methods - woollen and worsted and stages of processing
- features of wool growth, skin and fibre biology
- features of fleece parts, skirtings, locks, crutchings, wool faults, impurities, contamination and stain and their impact on processing
- methods of handling fleece that minimise risk to own health, including safe lifting and bending techniques
- requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to the preparation of skirtings and oddments

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs.

AHCWOL306 Supervise clip preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise board persons, wool handlers and the wool presser in preparing the wool clip.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Explain organisation requirements for clip	1.1 Explain the organisation's requirements for quality and standard of wool clip preparation to the wool handlers

Element	Performance criteria
preparation	1.2 Explain the organisation's procedures for operating safely and for the use of personal protective equipment to the wool handlers 1.3 Explain the impact of contamination in the wool to the wool handlers 1.4 Introduce or indicate the key personnel in the wool shed or room to the wool handlers 1.5 Allocate and explain responsibilities for specific functions or procedures are to wool handlers 1.6 Identify work health and safety hazards, assess risks and implement suitable controls 1.7 Confirm that all personal protective equipment and clothing is selected, used and maintained appropriately by wool handlers
2. Supervise shed hands	2.1 Monitor board persons performance including picking up and throwing fleece, sweeping board and preparing non fleece wools 2.2 Monitor wool handlers performance to ensure they follow the set procedures for each of the clip preparation tasks 2.3 Monitor penner up performance to ensure mobs are handled humanely in line with animal welfare policies and kept separate, and catching pens are monitored and filled as required 2.4 Monitor wool pressers' activities including keeping wool press area clean, pressing, branding, weighing and recording bale details in the wool book
3. Oversee preparation of wool	3.1 Supervise shed staff to maintain a clear board and ensure fleeces are thrown correctly 3.2 Supervise shed staff in the removal and preparation of fleece wool

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCWOL306 Supervise clip preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- explain clip preparation requirements to shed staff and monitor their performance
- oversee shed staff to ensure quality clip preparation
- communicate preparation requirements with shed staff
- implement enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the parts of fleece
- procedures for handling skirtings, bellies, lambs wool, premature shorn wool, locks and crutchings, and stained wool and oddments
- responsibilities of board and table staff
- characteristics of different wool types and parts of the fleece
- premiums and discounts for wool characteristics
- pressing and branding requirements
- skirting technique and appropriate skirting ratios for different clip types
- personal protective clothing and equipment requirements for shed staff
- on job training techniques
- principles of staff supervision
- requirements of work health and safety legislation and animal welfare codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL307 Document a wool clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare the documentation for a wool clip to meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips, relevant legislation and the enterprise.

It includes instructing others in the use of the system, maintaining the records and advising the owner or manager of issues where appropriate.

The documentation of a wool clip contributes to the wool harvesting operation by optimising efficiency for the grower.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish recording system and documentation	1.1 Select documentation that complies with the requirements of the Code of Practice for the Preparation of Australian Wool Clips, relevant legislation and the enterprise 1.2 Establish guidelines for the use of the recording system including the type, frequency and format of recording 1.3 Inform those who are to use the recording system of their obligations and any specific instructions that are necessary 1.4 Check documentation regularly to confirm that it is accurately completed and updated at the proper times
2. Complete records for wool classing	2.1 Complete documents and records required by the organisation and the market 2.2 Complete wool clip specification prior to consignment, to ensure that the correct lotting advice is provided to the selling broker or buyer 2.3 Make any additional notes or give advice necessary on the documents so that they are clearly understood 2.4 Obtain all signatures and registrations that are required and include on documentation 2.5 Prepare wages statements for contractors according to the agreements reached in employment conditions
3. Provide information and advice to the woolgrower	3.1 Make suggestions for improved safety and fleece quality that are derived from observations, smoothness of workflow, and discussions with operators within the wool shed 3.2 Communicate the wool clip specification to the appropriate authority at shed cutout

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL307A Document a wool clip

Assessment Requirements for AHCWOL307 Document a wool clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop the recording system for wool clips and bales
- communicate recording requirements clearly to wool handlers and pressers
- prepare and maintain records as required by the Code of Practice for the Preparation of Australian Wool Clips, legislation or enterprise
- observe, identify and react appropriately to work health and safety hazards
- observe the work and identify areas of the work or the facilities that could be improved
- communicate information and advice to the woolgrower on improvements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- features of quality assurance schemes used in the organisation and in the industry, and their documentation requirements
- requirements for the completion of a clip specification
- employment conditions and agreements for a range of workers in a wool harvesting and preparation team
- documentation requirements for wool clip preparation and shearing operations

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

Assessment Requirements for AHCWOL308 Prepare facilities for shearing and crutching

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- maintain contamination and hazard-free environment for shearing and wool handling
- recognise and remedy health and safety hazards
- carry out minor maintenance and repairs to equipment and facilities
- disposal of waste in an environmentally responsible manner
- pen sheep humanely in line with enterprise animal welfare policies
- communicate with shed staff and direct operations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- sources and types of contamination
- principles of moving and penning animals
- shearing requirements
- features of efficient shed and board layouts
- requirements of work health and safety legislation and animal welfare codes of practice as they relate to the shearing and wool preparation sector

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWOL310 Press wool for a clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to press wool into bales and carry out related tasks such as branding the bales, recording bale weights and numbers, and subsequently storing the wool bales.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes.

This unit applies to wool pressers who work in close cooperation with the wool classer and maintain a rate of pressing that ensures wool flow can be maintained. The work is carried out within established routines, methods and procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for wool pressing	1.1 Identify the lines of wool and confirm with the wool classer 1.2 Check the wool press for safe operation, and lubricate and maintain it as required 1.3 Inspect the work area to confirm it is free of all contaminants in readiness for pressing 1.4 Confirm that supplies of wool packs, bale fasteners and hooks, stencils and bale-branding inks are located in appropriate place 1.5 Identify the appropriate recording system 1.6 Check the scales to be used for accuracy and calibrate if necessary 1.7 Check the press and its location for safety 1.8 Identify any defective equipment and report to the appropriate person
2. Press wool	2.1 Consult the wool classer to determine mob cut-outs and pressing requirements 2.2 Apply safe work practices at all times and use available safety equipment in line with work health and safety policies 2.3 Remove contamination from the woolpack and place in the appropriate location 2.4 Check woolpacks for conformity 2.5 Seek directions for order of pressing and any special requirements from the wool classer 2.6 Place all wool correctly and evenly in the press to produce even density bales
3. Carry out the role and responsibilities of the wool presser	3.1 Press bales to optimal weights to reduce selling costs and within specified weight and length dimensions in compliance with Code of Practice 3.2 Press lines to avoid mixed bales 3.3 Monitor wool flow and build-up in bins 3.4 Maintain work area in a condition that avoids contamination of wool 3.5 Carry out pressing within time restrictions and workflow of the wool room
4. Close and store bales	4.1 Use approved bale dividers as instructed, and fasten flaps correctly 4.2 Identify bales for branding before removing them from the press 4.3 Store bales safely, avoiding injury to presser, risk to other workers, and damage to bales and equipment 4.4 Store bales to maximise shed space and to avoid weather damage
5. Complete recording	5.1 Brand bales appropriately

Element	Performance criteria
requirements	5.2 Weigh bales appropriately 5.3 Record bale weights, numbers and descriptions clearly using the appropriate recording system

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWOL310 Press wool for a clip

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and implement safe work practices
- operate different types of wool presses and carry out basic lubrication and maintenance according to manufacturer instructions
- operate the various types of scales and manual handling devices
- check woolpacks and wool to ensure freedom from contamination
- assess and monitor wool-flow and build-up in bins
- maintain uniform bale weights for each line
- brand bales clearly and accurately to meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips
- handle and store wool bales efficiently and without risk to self, other people or machinery
- record bale information to be interpreted and used by other people
- communicate with wool classer
- work safely in compliance with enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sources of contamination of wool
- the requirements of Code of Practice for the Preparation of Australian Wool Clips as it relates to wool pressing
- operating requirements for different types of wool presses
- methods of handling wool and bales that minimise risk to own health, including safe lifting and bending techniques
- industry standards for weight, length of bales, fastening methods and type of pack
- industry standards for bale branding

- features of the recording system for bale details in use in the organisation
- enterprise work health and safety policies

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWOL311 Perform shed duties

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform shed duties covering the board and table and to provide mentoring to less experienced staff.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Perform board duties	1.1 Remove stained wool, black wool, and contamination on the shearing board

Element	Performance criteria
	<p>1.2 Pick up belly wool and remove stained wool</p> <p>1.3 Remove crutch wool and reposition the hind leg if necessary</p> <p>1.4 Pick up fleece and throw or park and retrieve later if wool table is not clear</p> <p>1.5 Monitor removal of wool and maintenance of the board and provide extra support when needed</p> <p>1.6 Provide mentoring and demonstration of work skills to inexperienced board staff as required</p> <p>1.7 Apply safe work practices at all times and use available safety equipment</p> <p>1.8 Comply with enterprise animal welfare and biosecurity policies and procedures</p>
2. Prepare wool	<p>2.1 Sweep up locks and keep board and table locks separate where directed</p> <p>2.2 Remove shanks and jowls if directed and place in correct bin</p> <p>2.3 Remove pizzle stain from bellies and placed in stains line</p> <p>2.4 Remove brisket wool if directed by the wool classer</p> <p>2.5 Sweep crutchings clear of the board, remove stain and dags and place in correct bins</p> <p>2.6 Carry lambs wool and prematurely shorn wools to the wool table using boards or paddles if required</p> <p>2.7 Provide mentoring and support in wool handling to inexperienced staff as part of the work team role</p>
3. Skirt fleeces	<p>3.1 Seek information on wool classer requirements for mob</p> <p>3.2 Remove fribs and sweats and place in appropriate bins</p> <p>3.3 Remove short crutch wool and wiggings and place with locks</p> <p>3.4 Remove wool carrying clumpy vegetable matter if directed by the wool classer</p> <p>3.5 Seek feedback on accuracy of skirting and fleece to skirtings ratio</p> <p>3.6 Remove fleece wool which is defective or lacks uniformity if directed by the wool classer</p>
4. Maintain wool flow and minimise contamination risk	<p>4.1 Sweep the immediate shearing area after each sheep is shorn</p> <p>4.2 Sweep shearing boards, wool room, and area beneath the wool table as regularly as necessary during the shearing operation</p> <p>4.3 Keep the shearing boards and the wool room free of potential contamination</p> <p>4.4 Remove waste and place appropriately in full consideration of environmental implications</p> <p>4.5 Minimise the risk of mixing wool between lines through regular sweeping and maintenance of bins, other containers and the wool</p>

Element	Performance criteria
	area 4.6 Complete all tasks and cover contingencies through a professional, team-based approach
5. Carry out tasks to support the shearing operation	5.1 Observe the rate of shearing and estimate the frequency of refilling the catching pens and for mob cutout 5.2 Keep different mobs of sheep separate 5.3 Implement directions from the wool classer and provide feedback on sheep supply and wool flow 5.4 Empty all butts and bins and press wool 5.5 Store bales as directed 5.6 Sweep wool working area clean 5.7 Store equipment at the end of shearing 5.8 Wash board down and disinfect after shearing cutout

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL311A Perform shed duties

Assessment Requirements for AHCWOL311 Perform shed duties

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- remove fleeces and sweep boards before the next sheep is dragged for shearing
- pick up and throw fleeces safely
- remove non-fleece wools from the board and place in correct bins
- identify and accurately remove stain
- use correct technique for skirting and rolling fleece
- sweep floors and remove contamination
- work rapidly within specified timeframes
- interpret verbal and visual communication signals within the wool shed given by the supervisor, the wool classer and the shearers
- monitor sheep supply in pens and fill as necessary
- monitor wool flow and the wool working area to ensure risk of mixing between lines is minimised
- provide mentoring to less experienced staff
- deal with contingencies by supporting other staff in tasks as required
- observe and report on adverse environmental impacts
- apply work health and safety requirements in the context of own work
- apply enterprise animal welfare policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- maintenance and hygiene requirements of shearing sheds, boards and catching pens
- types of contamination and their sources
- properties of the parts of a fleece

- principles of moving and penning animals
- shearing requirements
- shearing shed and board layouts
- environmental codes of practice with regard to shearing
- relevant work health and safety and animal welfare legislation, codes of practice and enterprise requirements that apply to wool harvesting and pressing

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWOL312 Class goat fibre

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare and class goat fibre.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for fibre classing	1.1 Confirm clip preparation methods and classing criteria 1.2 Identify potential and existing work health and safety hazards,

Element	Performance criteria
	assess risks and implement control measures 1.3 Arrange shed layout, facilities and equipment for efficient fibre flow and pressing 1.4 Place clearly labelled bins and containers in line with the classing strategy, quality management system and enterprise 1.5 Identify and remove contaminants and sources of contaminants and dispose of in an environmentally responsible manner 1.6 Select, use and maintain suitable personal protective equipment 1.7 Establish and maintain sufficient staffing ratio
2. Class goat fibre	2.1 Prepare clip and check for contamination 2.2 Handle and skirt fleeces to the required standards 2.3 Check fibre to ensure freedom from contamination and stain 2.4 Check fibre to ensure adequate and optimum skirting 2.5 Class fibre according to classing criteria, industry standards, and relevant national codes of practice 2.6 Identify fibre of higher and lower market value and processing requirements and make lines to maximise return to the owner
3. Complete classing activities	3.1 Place fibre in bins in readiness for pressing 3.2 Identify and dry wet fibre 3.3 Clean work area and dispose of waste appropriately 3.4 Apply enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL312A Class goat fibre

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWOL312 Class goat fibre

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and apply safe work procedures
- arrange layout of bins and equipment for efficient operation
- handle and skirt fleeces to the required standards
- establish and maintain consistent methods of clip preparation
- class fibre to industry standards
- maintain clean working conditions for clip preparation and classing procedures
- accurately assess fibre quality and types
- measure goat fibre
- apply enterprise work health and safety in the context of own work
- apply enterprise animal welfare and biosecurity policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the parts of a fleece
- fleece measurement criteria and appraisalment types
- fleece handling procedures
- clip analysis reports and comparisons
- classing specifications
- features of the code of practice for Preparation of Australian Cashmere, Cashgora Fleece and Mohair
- sources of fleece contamination
- requirements of the code of practices for animal welfare
- enterprise work health and safety legislative requirements and biosecurity policies

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCWOL313 Class alpaca fleece

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to class alpaca fleece.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for classing of alpaca fleece	1.1 Arrange equipment, facilities and layout of shed according to predetermined classing strategy for efficient fleece flow, quality management and pressing

Element	Performance criteria
	1.2 Select, use and maintain personal protective equipment and clothing 1.3 Identify work health and safety hazards, assess risks and implement control measures 1.4 Apply site quarantine/biosecurity protocols and follow hygiene requirements and monitor as required by owner or manager instructions 1.5 Place bins and containers appropriately and ensure they are clearly labelled according to classing strategy and quality management system requirements
2. Carry out classing of alpaca fleece	2.1 Apply safe work practices at all times and use available safety equipment 2.2 Follow enterprise animal welfare policies 2.3 Handle and skirt fleece to standards outlined in classing strategy 2.4 Check fleece to ensure freedom from contamination and stain 2.5 Check fleece to ensure adequate and optimum skirting 2.6 Keep different classes of fleece separate as required 2.7 Appraise fleece for its characteristics 2.8 Identify fleece of higher and lower market value and make lines that maximise return to fleece owner 2.9 Class fleece to Alpaca Fleece Classing Code of Practice or as required by alternative selling methods 2.10 Record data about fleece
3. Dispose of fleece and report on wet fleece	3.1 Place fleece in correct bins ready for pressing and ensure that cross-contamination does not occur 3.2 Identify wet fleece as required by classing strategy and report
4. Follow up classing outcomes	4.1 Seek feedback on classing outcomes and compliance with industry standards from owner or processor and note any required improvements for future action 4.2 Take action to ensure awareness of changes in classing techniques, standards, and processor and market requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL313A Class alpaca fleece

Assessment Requirements for AHCWOL313 Class alpaca fleece

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- arrange layout of bins and fleece table in a variety of sheds for optimum efficiency of fleece flow and pressing
- label bins and containers correctly
- assess pigmented fibre risk and separating fleece as required
- check fleece to ensure freedom from contamination and stain
- check fleece to ensure optimum and adequate skirting
- identify and appraise alpaca fleece characteristics
- identify fleece of higher and lower market value and ensuring lines are made that maximise return to grower
- class alpaca fleece according to the Alpaca Fleece Classing Code of Practice or as required by alternative selling methods
- seek feedback on classing outcomes and compliance with industry standards from owner or processor
- implement enterprise work health and safety policies
- implement enterprise biosecurity policies and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- classing requirements for the range of customers
- effect of genetics and environment on fibre characteristics
- fleece growth, skin and fibre biology
- fleece measurement criteria and techniques used to measure fleece characteristics

- inherent alpaca fleece characteristics (such as diameter, length and strength, colour, vegetable matter amount and type and yield)
- interpretation of test results
- preparation of documentation of fleece clips
- Alpaca Fleece Classing Code of Practice
- principles of classing
- raw fleece characteristics and their effect on processing and final product
- features of shed layouts that promote efficient fleece flow and handling.
- requirements of work health and safety legislation, biosecurity and animal welfare codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Huacaya and Suri clips

AHCWOL401 Determine wool classing strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop classing strategies to be used for classing a wool clip and communicating the strategy to shed staff and owner and/or manager, then evaluating the strategy for the clip.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source information for	1.1 Obtain information on previous year's clip preparation and sale

Element	Performance criteria
input to classing strategies	<p>results, including classer's specification, test results, skirting ratios, AWEX-ID, sale prices, and any grower or processor feedback</p> <p>1.2 Obtain information on growing and management history for the mobs over the last twelve months from the grower</p> <p>1.3 Research current market trends and premiums and discounts</p> <p>1.4 Identify current recommendations appropriate to the specific wool clip in the Code of Practice for Preparation of Australian Wool Clips</p> <p>1.5 Obtain current specific exporter and processor requirements and limitations and record relevant details</p> <p>1.6 Identify marketing and selling methods and end uses for the wool from the marketing plan and determine their implications on clip preparation</p> <p>1.7 Identify estimated prices for specific lines from market information</p> <p>1.8 Identify factors that will influence the classing process in the organisation</p>
2. Develop strategies for classing this clip	<p>2.1 Identify fleece type and set up suitable fleece, skirting and oddment lines</p> <p>2.2 Select clip preparation methods and standards to suit the fleece type and market requirements in consultation with the manager and other shed personnel</p> <p>2.3 Adopt operating procedures that eliminate contamination</p> <p>2.4 Select wool classing procedures, methods and criteria in line with fleece type, market requirements and industry standards</p> <p>2.5 Select shed layout and facilities that will permit efficient workflow</p> <p>2.6 Identify work health and safety hazards, assess risks and implement suitable control measures</p> <p>2.7 Select requirements for labelling and placement of bins and containers</p>
3. Communicate classing strategy	<p>3.1 Prepare the shed layout, equipment and facilities required and convey requirements for clip preparation to shed staff</p> <p>3.2 Clip preparation methods and classing procedures are clearly communicated to, and confirmed with, the wool handlers</p>
4. Review the success of the strategies for the clip	<p>4.1 Analyse classed clips and review strategies based on lines made, AWEX-ID, test results, selling costs and prices obtained</p> <p>4.2 Compare alternative clip preparation and classing strategies for profitability of the clip</p> <p>4.3 Incorporate conclusions and actions of review processes into</p>

Element	Performance criteria
	future classing decisions and instructions to shed staff 4.4 Discuss a review of classing and marketing alternatives is with owner or manager

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL401A Determine wool classing strategies

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCWOL401 Determine wool classing strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a classing strategy based on owners enterprise goals, research of past performance of the clip, current management, growing season, market and processor requirements which conforms with the Code of Practice for the Preparation of Australian Wool Clips
- establish and maintain consistent methods of clip preparation
- analyse classed clips and test alternative classing strategies for profitability
- review classing strategies based on broker and buyer feedback
- adapt classing strategies for buyer requirements, marketing systems and owner manager
- value lines of wool using industry descriptions and test results
- incorporate review of classing strategies into instructions for shed staff
- discuss clip test results, prices and alternative classing strategies with owner/shed manager
- observe, identify and react appropriately to environmental implications and work health and safety hazards
- provide feedback to grower/manager on performance of clip preparation strategy adopted.
- communicate classing strategy to shed staff and owner/manager
- implement work health and safety policies and procedures into classing strategy
- implement animal welfare practices into classing strategy

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of the industry description system (AWEX-ID)
- requirements of the organisation's wool marketing and production plans
- implications of wool testing, broking and export organisations on clip preparation

- clip preparation and analysis processes for the major wool types
- requirements and standards of the national wool processing industry
- methods used for processing wool and their impact on clip preparation and marketing
- marketing alternatives and their implications for classing
- wool brokering services
- features of efficient wool room layout
- sale catalogue and market reports
- specifications for classers
- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of the relevant work health and safety legislation, environmental protection, biosecurity and animal welfare legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL402 Use individual fleece measurements to prepare wool for sale

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use individual fleece measurements to prepare wool for sale as required by the enterprise's classing strategy and marketing plan.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Gather objectively measured data.	1.1 Arrange shed or wool room layout for efficient sampling operation where required 1.2 Identify potential and existing work health and safety hazards, assess risks and implement control measures 1.3 Collate available information 1.4 Assess tested sample to determine its appropriateness as a representative sample 1.5 Determine the requirements for additional information needed to validate measurements
2. Analyse collected data	2.1 Review and evaluate available data to determine possible lines 2.2 Make comparisons with previous measurements if available
3. Analyse market trends	3.1 Review information produced by industry to determine market trends 3.2 Evaluate the potential for movement in prices against available data 3.3 Determine the extent to which discounts are applied
4. Prepare wool to meet requirements of the market	4.1 Analyse the impact on the market of variable quantities 4.2 Use available information to prepare the wool to best advantage 4.3 Package wool in the most appropriate manner

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWOL402A Use individual fleece measurements to prepare wool for sale

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWOL402 Use individual fleece measurements to prepare wool for sale

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- arrange shed or wool room layout for sampling efficient operation where required
- understand and interpret the individual fleece measurements
- class wool to standards in accordance with the Code of Practice for the Preparation of Australian Wool Clips, or as required by the enterprise classing strategy and marketing plan
- communicate specific and detailed requirements for wool preparation and classing to wool handling staff
- identify wool of higher and lower market value and make lines which maximise return to woolgrower
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features of wool room layouts which promote efficient wool flow and handling
- characteristics different breeds of sheep
- inherent wool characteristics , including fibre diameter, staple length and strength, colour, yield, VM type, curvature, comfort factor
- fleece measurement criteria - techniques used to measure wool characteristics
- interpretation of test results
- principles of classing , including mob/flock concept, variability for fibre diameter and staple length, soundness, defects
- classing scenarios requiring detail of clip break-ups
- clip analysis reports and comparisons

- clips and other relevant quality standards
- requirements of work health and safety legislation, codes of practice and enterprise procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL403 Plan, implement and review wool harvesting and clip preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare for, implement and review wool harvesting, clip preparation and classing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Plan and implement wool harvesting and preparation operations	1.1 Consult the flock owner or manager about their requirements and inform them of any planning issues taking into account weather and environmental issues 1.2 Determine the order of mobs for wool harvesting and preparation 1.3 Determine staffing needs by negotiation with owner or manager according to clip type, enterprise requirements, legislative requirements, employment agreements and awards 1.4 Allocate staff duties and give staff directions where necessary 1.5 Arrange the shed equipment and materials in line with shearing plan, work health and safety requirements and the quality management system 1.6 Implement the wool harvesting and preparation plan and adjust as required
2. Implement plan and monitor work flows	2.1 Monitor sheep numbers, mob cut outs and shearing speeds to match wool preparation capacity 2.2 Supervise shed staff to maintain a clear board and ensure fleeces are thrown correctly 2.3 Direct shed staff to use appropriate skirting strategies and monitor fleece to skirting ratios 2.4 Direct staff to close off bins and lines for mob cut outs 2.5 Manage wool harvesting and preparation team to comply with quality management system requirements 2.6 Monitor compliance with enterprise and legislative requirements including work health and safety, animal welfare, biosecurity, industrial, and environmental practices 2.7 Manage staff performance and provide direction where necessary
3. Supervise wool pressing	3.1 Instruct presser on pressing strategies to reduce mixed bales while meeting code of practice requirements for uniformity in bales 3.2 Inform presser of order for pressing and procedures to minimize contamination 3.3 Monitor rate of build up in lines by consulting with wool presser 3.4 Monitor bale weights to ensure efficiencies are achieved for the grower without creating overweight bales 3.5 Brand bales appropriately 3.6 Monitor wool book to ensure it is up to date, accurate and legible
4. Provide feedback to grower on classing strategies, clip performance and wool harvesting and preparation operations	4.1 Review staff performance in clip preparation 4.2 Provide feedback on classing strategies, clip preparation in relation to mob characteristics, skirting ratios, bale weights and any workflow issues 4.3 Provide feedback on possible improvements to wool handling

Element	Performance criteria
	facilities 4.4 Report on equipment effectiveness and maintenance requirements 4.5 Explain lines made and bale details in relation to mob characteristics 4.6 Provide feedback on lotting advice 4.7 Complete wool clip documentation and present to owner or manager for signature

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Unit is equivalent to AHCWOL403A Prepare for, implement and review wool harvesting, clip preparation and classing

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWOL403 Plan, implement and review wool harvesting and clip preparation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and implement wool harvesting and preparation operations
- organise and schedule staff and work tasks
- supervise staff and monitor productivity
- implement risk management strategies
- monitor environmental impacts and implement control measures
- implement relevant legislative requirements associated with the shearing industry including employment agreements and awards
- communicate using industry standard terminology written and oral information to team members and management
- review and evaluate operational performance and clip preparation standards
- provide feedback to grower on the shearing operation and the preparation and classing of the clip
- calculate resources and bale weights for mob cut outs
- implement and monitor work health and safety requirements for work team
- implement relevant enterprise biosecurity policies and procedures
- implement animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- supervisory procedures with regard to operations and personnel
- principles staff management including team building and conflict resolution
- wool industry codes of practice and quality systems

- industry requirements with regard to hygiene and safety for wool harvesting and preparation facilities and equipment
- how weather conditions can impact on wool harvesting programs
- features of workplace documentation required for wool harvesting and preparation
- employment agreements, industrial awards, relevant to the wool harvesting sector
- the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of work health and safety legislation, biosecurity and animal welfare codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL404 Establish work routines and manage wool harvesting and preparation staff

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish work routines and manage wool harvesting and preparation staff.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Define work roles for shed staff	1.1 Define the roles and responsibilities of shed staff 1.2 Identify the skills of shed staff and match with available tasks and duties 1.3 Identify the requirements of job duties and Code of Practice and communicate to shed staff 1.4 Explain work health and safety policy and procedures to staff and monitor implementation 1.5 Explain animal welfare and biosecurity policies to staff and monitor implementation
2. Induct shed staff	2.1 Identify work health and safety hazards, assess risks and implement suitable controls 2.2 Communicate the details of shearing, including flock and mob details to staff 2.3 Brief new staff on relevant awards, enterprise agreements, pay rates and related administration 2.4 Advise new staff of terms and conditions and sign on 2.5 Familiarise new staff with the workplace and colleagues 2.6 Explain the enterprise's environmental policy and procedures and monitor implementation
3. Support on-the-job training	3.1 Encourage individuals to self-evaluate performance and identify areas for improvement 3.2 Determine training needs through appraisal of staff and monitoring of work performance 3.3 Analyse practical skills and then explained and demonstrated as required 3.4 Provide workplace learning opportunities with coaching and mentoring to support learning 3.5 Adjust staff responsibilities to allow for practice and skills development where required
4. Performance manage shed staff	4.1 Establish performance standards for clip preparation and communicate to individuals and the team 4.2 Explain skirting requirements and monitor skirtings ratio 4.3 Describe the requirements for separating specific parts of the fleece to wool handlers using the Code of Practice and processor requirements 4.4 Use motivation strategies for shed staff to maintain a consistent focus on clip preparation standards and timing of operations
5. Maintain effective working relations with the team	5.1 Recognise problems and address through discussion with work group 5.2 Seek assistance from work group members when difficulties arise

Element	Performance criteria
	in achieving allocated tasks 5.3 Use discussion and information sharing to communicate requirements of work activities through a participative approach 5.4 Manage disagreements and conflicts constructively using appropriate conflict management strategies
6. Provide feedback to shed staff	6.1 Provide confirmatory feedback to emphasise good performance and technique and its importance for clip quality 6.2 Provide corrective feedback in a constructive way, including an explanation of the effects of poor performance or incorrect technique and strategies for improvement 6.3 Address under performance both on an individual and team basis 6.4 Use clip data to share feedback on clips prepared with team members

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- supervise and instruct staff to achieve work activities
- delegate and allocate tasks
- identify staff training needs and provide on job training, mentoring and coaching as required
- implement effective time management
- use problem solving techniques to address staffing and resource issues motivate and performance manage work team
- manage conflicts within work team
- communicate with team members
- implement and monitor work health and safety policies and procedures
- implement enterprise biosecurity policies and procedures
- implement and monitor enterprise animal welfare policies and procedures
- implement enterprise environmental policies and procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- shearing industry awards, agreements and personnel processes
- principles of team work, negotiation and time management
- principles of workplace instruction/training and coaching techniques
- principles of conflict management
- features of effective communication for feedback and motivation
- principles of staff performance management

- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of the relevant work health and safety legislation, environmental protection, biosecurity and animal welfare legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWOL405 Class fleece wool

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to class fleece wool from merino and crossbred sheep into lines that meet the requirements of the Code of Practice for the Preparation of Australian Wool Clips.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes.

The unit applies to wool classers who class wool as a professional service after consultation with the grower or shed manager.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Wool (WOL)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for wool classing	1.1 Arrange the layout of the shed, equipment and facilities according to the determined classing strategy for efficient wool flow, quality management and pressing 1.2 Identify potential and existing work health and safety hazards, assess risks and implement control measures 1.3 Place clearly labelled bins and containers in line with the classing strategy, quality management system and enterprise requirements 1.4 Establish and maintain sufficient staffing ratio
2. Carry out classing of fleece wool	2.1 Identify hazards, apply safe working practices and use available safety equipment 2.2 Handle and skirt fleece wool to the required standards 2.3 Check wool to ensure freedom from contamination and stain 2.4 Check wool to ensure adequate and optimum skirting 2.5 Assess pigmented fibre risk and keep wool separate as required 2.6 Identify wet wool, stained, cotted and coloured wool and keep separate 2.7 Appraise wool for its characteristics 2.8 Class wool to standards of the enterprise classing strategy, the Code of Practice and as required by alternative selling methods 2.9 Identify wool of higher and lower market value and processing requirements and make lines to maximise return to the wool owner
3. Place wool in bins for pressing	3.1 Place wool in the correct bins ready for pressing and ensure that cross contamination does not occur 3.2 Check wool flow into bins and communicate with wool presser

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Classing must include the classing of Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Unit Mapping Information

This unit is equivalent to AHCWOL405A Class fleece wool

Assessment Requirements for AHCWOL405 Class fleece wool

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and apply safe work procedures
- arrange layout of bins and wool table for optimum efficient wool flow and pressing in a variety of sheds
- label bins and containers correctly
- monitor clip preparation and skirting
- assess pigmented fibre risk and separate wool as required
- identify and appraise wool characteristics
- class wool to standards in accordance with the Code of Practice for the Preparation of Australian Wool Clips or as required by alternative selling methods
- identify wool of higher and lower market value and lines made which maximise return to grower.
- separate wools of different processing or end user requirements
- identify and keep separate wet wool, stained, cotted and coloured wool and contamination
- communicate with team members in completing tasks associated with classing fleece wool.
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- shed layouts which promote safe, efficient wool flow and classing
- characteristics of the breeds of sheep
- types and sources of contamination
- impact of the wool production areas of Australia on clip characteristics

- inherent wool characteristics - diameter, length and strength, colour, yield, VM type, curvature, and comfort factor and explain how these characteristics impact on classing
- techniques used to measure wool characteristics
- processing methods - woollen and worsted, and stages of processing
- effect of raw wool characteristics on wool processing and final product
- features of wool growth, skin and fibre biology, and discuss the effect of genetics and environment on fibre characteristics
- requirements for handling shedding and pigmented fibres
- interpretation of test results, clip feedback and reports
- principles of classing (mob/flock concept, variability for fibre diameter and staple length, soundness, defects)
- documentation requirements for wool clips
- features of the Code of Practice for the Preparation of Australian Wool Clips and other relevant quality standards
- requirements of work health and safety legislation in a wool preparation workplace

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Evidence of competency must be demonstrated in Fine/Superfine Merino, Medium/Strong Merino and Crossbred wool clips.

Assessors must satisfy current standards for RTOs and be currently registered with the Australian Wool Exchange as Australian Wool classers.

AHCWRK101 Maintain the workplace

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain a range of work areas.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and use tools, equipment and machinery	1.1 Identify required materials, tools and equipment according to lists provided and supervisor's instructions 1.2 Check all materials, tools and equipment and inform supervisor of

Element	Performance criteria
	insufficient or faulty items 1.3 Use correct manual handling techniques at all times 1.4 Use suitable personal protective equipment selected as directed by supervisor and ensure correct fit 1.5 Inform supervisor if any risks are identified 1.6 Clarify channels for communicating with workers
2. Maintain a clean and safe workplace	2.1 Locate services using site plans and clarify with the supervisor 2.2 Sweep, wash and treat floors, benches and other flat work surfaces to minimise nuisance level environmental disturbance 2.3 Store tools, equipment and materials not in use neatly and remove waste and used materials and place in disposal containers as instructed 2.4 Identify potential hazards, assess risks and implement control measures 2.5 Apply sustainability practices relative to workplace and activity
3. Maintain structures and workplace surroundings	3.1 Identify maintenance requirements of structures and workplace surroundings and clarify with supervisor 3.2 Maintain structures and workplace surroundings as instructed 3.3 Identify structural damage and deterioration in the workplace and inform supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK101A Maintain the workplace.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWRK101 Maintain the workplace

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow safe work practices
- participate in teams and contribute to team objectives
- understand instructions
- read labels, site plan measurements and work health and safety symbols
- communicate effectively with team members and supervisor
- tally work hours, calibrating tools and equipment, measuring volumes to apply cleaning agents, measuring quantities of materials and estimating areas
- minimise noise, dust and water run-off to prevent nuisance-level environmental disturbance
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise standards for presentation of buildings, structures and surroundings
- the effect of outdoor climatic conditions (including rain, hail, extreme heat and wind, and very high ultraviolet radiation), which may prevent or impede maintenance activities, or influence the selection of tools, equipment and safety equipment to minimise the hazards presented
- the relationship between specific maintenance activities and the external environment, and reasons for procedures that help to minimise the impact that these activities may have on the environment
- workplace hazards and work health and safety symbols, signs and practices in the context of own work

- sustainability practices in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK201 Observe and report on weather

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to observe and contribute to positive environmental work practices.

The skills and knowledge described in this unit underpin a broad range of activities applicable to a variety of job roles throughout industries at various levels.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Clarify work instructions with supervisor 1.2 Select and use tools and equipment and carry out pre-operational

Element	Performance criteria
	safety checks 1.3 Select and use personal protective equipment 1.4 Identify hazards and inform supervisor 1.5 Identify and action work health and safety policies and procedures and legislative requirements
2. Check weather and climate information	2.1 Check weather and climate information to determine likely conditions 2.2 Recognise changed weather and climate situations 2.3 Anticipate likely impact of changes in weather and climate in respect to work tasks, safety of others, property, natural resources and local environment 2.4 Report anticipated impact of weather and climate to supervisor
3. Carry out preventative action	3.1 Disseminate information and advice to relevant personnel 3.2 Determine the preventative action required according to the known effects on livestock, crops and work tasks 3.3 Implement actions to minimise loss and damage 3.4 Adjust livestock, horticultural or crop management program or schedule of work tasks according to weather and climatic changes
4. Monitor weather and climate	4.1 Access regular updates to determine ongoing suitability of current programs 4.2 Review the viability of livestock, horticultural or crop management practices to ensure suitability within meteorological conditions 4.3 Research forecasting techniques to maintain currency of information 4.4 Document relevant information

Foundation Skills

This unit of competency describes the skills and knowledge required to observe and contribute to positive environmental work practices.

The skills and knowledge described in this unit underpin a broad range of activities applicable to a variety of job roles throughout industries at various levels.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Range of Conditions

Assessment Requirements for AHCWRK201 Observe and report on weather

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor physical signs of weather in the context of available information
- relate forecasts to impact on current operations and activities
- communicate information on weather and situations that may be impacted
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- effects of wind and rain on wind chill
- effects of wind shear and wind chill exposure
- enterprise and industry policies for monitoring weather and climate conditions, and recording and reporting weather and climate conditions
- weather and climate conditions impact upon farming and grazing activities
- effects of wind chill on metabolism of animals
- effects of prolonged dry periods on pastures and animal production, and natural resources
- effects of extreme heat on animals, including during birthing, and effects of heat stress on neonates
- work health and safety requirements and practices, especially as they relate to weather and climate monitoring and preparations for hazardous weather
- sustainability practices in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs

AHCWRK202 Observe environmental work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to observe and contribute to positive environmental work practices.

The skills and knowledge described in this unit underpin a broad range of activities applicable to a variety of job roles throughout industries at various levels.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Follow environmental workplace practices	1.1 Recognise and follow workplace practices and work instructions relating to potential environmental impacts and seek clarification

Element	Performance criteria
	where necessary 1.2 Respond to changes to work practices and procedures positively and promptly
2. Contribute to improved environmental work practices	2.1 Gather information and suggest improvements to support the development of improved workplace approaches to environmental practices 2.2 Discuss environmental issues and their relationship to workplace practices in the workplace with colleagues and designated personnel 2.3 Make contributions to the review of environmental practices and policies within limits of responsibility
3. Recognise and report on a potential environmental threat	3.1 Recognise signs or symptoms of a potential environmental threat 3.2 Report information about or observations of a potential environmental threat to supervisors or appropriate authorities 3.3 Record the location and extent of the potential environmental threat
4. Maintain environmental records	4.1 Prepare and maintain environmental records as required 4.2 Store environmental records securely in a form accessible for reporting purposes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK202A Observe environmental work practices

Assessment Requirements for AHCWRK202 Observe environmental work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate with supervisors and workplace colleagues
- recognise basic environmental hazards and threats
- follow workplace directions and instructions related to environment
- keep simple environmental records
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant legislation from all levels of government on environmental issues
- relevant environmental policies and workplace and industry practices and procedures
- good practice approaches relevant to work area particularly in regard to minimising environment hazards and risks, and improving environmental performance
- environmental issues, especially in regard to water catchments, air, noise, ecosystems, habitat, efficient use of resources, sustainability and waste minimisation
- potential environmental threats and problems relevant to a given region and occupation
- general work place practices and their potential impact on the environment
- work health and safety in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK203 Operate in isolated and remote situations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan, prepare for and work safely in isolated and remote situations.

The skills and knowledge described in this unit underpin a broad range of activities applicable to job roles throughout the horse industries at various levels.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for operating in remote environments	1.1 Collate and record information relating to the operating environment and location

Element	Performance criteria
	1.2 Establish detailed operating and travel plans, including a disaster plan and fallback position requirements in consultation with supervising staff 1.3 Notify the appropriate authorities of the action plans and time schedules 1.4 Identify and source relevant maps 1.5 Assess factors that may impact on public and personal health and safety and the environment, for consideration in preparations
2. Prepare for operating in remote environments	2.1 Prepare personal needs for activities or travel in remote areas 2.2 Prepare transportation and equipment for use in prescribed work location or along prescribed routes 2.3 Obtain and study relevant maps prior to departure 2.4 Record planned activities and itinerary prior to departure 2.5 Identify weather patterns and indicators
3. Prepare for emergency situations	3.1 Confirm that provisioning meets expected operational and possible emergency needs 3.2 Use initial planning and regular monitoring to ensure structured usage of available provisions and resources 3.3 Structure an operating plan to include training in remote area survival techniques prior to operating in remote situations 3.4 Include emergency management procedures as an integral part of operating plans and enterprise policy
4. Operate in remote environment	4.1 Complete activities according to instructions and established time schedules 4.2 Use bushcraft skills to modify the living environment where necessary 4.3 Carry out all activities in remote situations in accordance with prescribed procedures 4.4 Handle emergency situations in accordance with prescribed procedures 4.5 Follow established reporting procedures on completion of planned activities and on return to base

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK203A Operate in isolated and remote situations

Assessment Requirements for AHCWRK203 Operate in isolated and remote situations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare for operating in remote environments
- prepare for emergency situations
- source and interpret maps of the area
- operate in remote environments
- implement workplace procedures to notify location, activities and travel
- prepare provisions to cover essential and emergency needs
- preparing communication equipment
- use bushcraft skills to modify the living environment and reduce the risk of mishap
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- map reading and navigation skills including direction finding (including GPS, use of compass, stars or watch)
- local topography, nearby inhabitants and locations within that area
- survival techniques and human needs relating to survival situations
- clothing requirements for sun or heat protection
- first aid procedures for common injuries
- bush craft including making a fire, cooking and wild food gathering
- water supplies, sources and generation methods
- emergency vehicle and mechanical equipment repair

- the operation of communication equipment (including field communications by two-way, satellite telephony or HF radio), and distress signalling including use of signalling mirrors
- weather patterns and indicators
- work health and safety in the context of work in isolated and remote situations
- environmental impacts of work in isolated and remote situations
- rope skills including useful knots including: reef, clove hitch, truckie's hitch, and bowline; simple lashings and tying down of loads.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK204 Work effectively in the industry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to work effectively on an individual basis and with others as well as within a hierarchy of management.

The skills and knowledge described in this unit underpin a broad range of activities applicable to a variety of job roles throughout industries at various levels.

The unit applies to individuals who work at various levels and should be contextualised to accommodate the responsibility of the individual.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain information about the industry	1.1 Identify and access sources of information about the industry 1.2 Collect information to assist effective and safe work performance

Element	Performance criteria
	<p>within the industry</p> <p>1.3 Obtain and update specific information on sector of work</p> <p>1.4 Apply industry and work health and safety information to day-to-day work activities</p> <p>1.5 Identify employment terms and conditions</p> <p>1.6 Identify career pathways within the industry</p> <p>1.7 Maintain biosecurity protocols and procedures at all times</p>
2. Observe employment requirements	<p>2.1 Use industry developments in the workplace context to improve quality, productivity and conditions</p> <p>2.2 Confirm that work practices comply with Codes of Practice and workplace expectations</p> <p>2.3 Recognise faults and abnormalities in workplace practices and take remedial action as required</p> <p>2.4 Ensure that dress and personal requirements comply with workplace standards</p> <p>2.5 Observe punctuality in work attendance</p> <p>2.6 Meet employer's expectations through completion of workplace routines and specific instructions within enterprise policies and procedures</p>
3. Accept responsibility for quality of own work	<p>3.1 Keep personal work space in a well organised and safe condition, and meets relevant standards and policies</p> <p>3.2 Adhere to the workplace code of conduct</p> <p>3.3 Detect variations in the quality of service or products from required standards and report as required</p>
4. Plan and conduct own work	<p>4.1 Interpret and follow instructions</p> <p>4.2 Identify factors affecting work requirements and take appropriate action</p> <p>4.3 Assess work load and prioritise within allocated timeframes</p> <p>4.4 Communicate the need for assistance to improve performance clearly to the appropriate person</p>
5. Promote workplace cooperation	<p>5.1 Undertake responsibilities and duties in a positive manner to promote co-operation and good relationships</p> <p>5.2 Conduct co-operation with others in a courteous manner and is appropriate to culture, special needs and linguistic background and position in the organisation</p> <p>5.3 Recognise problems and conflict and resolve, where possible, through personal communication or refer to a supervisor, manager or employer for resolution</p>
6. Contribute to a productive work	<p>6.1 Fulfil commitments to undertake work or assist co-workers</p> <p>6.2 Share information relevant to work with co-workers to ensure</p>

Element	Performance criteria
environment	<p>designated work goals are met</p> <p>6.3 Share knowledge and skills co-workers through conversations and meetings</p> <p>6.4 Recognise and seek contributions of individuals of different gender and social and cultural backgrounds</p> <p>6.5 Observe and implement the principles of equal employment opportunity</p> <p>6.6 Ensure work is consistent with workplace standards relating to anti-discrimination and workplace harassment</p>
7. Undertake an activity to workplace requirements	<p>7.1 Interpret work schedules with the schedule and tasks defined</p> <p>7.2 Discuss knowledge and skills required for task with supervisors and co-workers</p> <p>7.3 Check the availability of materials and equipment to ensure they are consistent with work schedules and the requirements of the tasks</p> <p>7.4 Create a daily schedule for completing workplace activities and allocated tasks including priorities, allocated start times, estimation of completion times and materials, equipment and assistance required for completion is decided upon</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWRK204 Work effectively in the industry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect information on the industry
- observe employment requirements
- accept responsibility for quality of own work
- manage own work
- maintain the safety of others
- contribute to a productive work environment
- interpret work schedules
- meet the industry standard for dress and work practices
- communicate effectively with team members and supervisors
- use industry standard terminology

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry and workplace awards and conditions
- employer's expectations
- relevant legislation and Codes of Practice applying to the industry
- workplace policies and procedures including those relating to quality systems
- emergency procedures
- organisational structure
- workplace communication channels
- awareness of workplace health and safety in the context of own work
- biosecurity in the context of own work

- animal welfare practices in the context of own work where applicable
- sustainability practices in the context of own work

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCWRK205 Participate in workplace communications

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- following simple spoken messages
- performing routine workplace duties following simple written instructions
- gathering and providing information in response to workplace requirements
- completing relevant work-related documents
- estimating, calculating and recording routine workplace measures
- using basic mathematical processes of addition, subtraction, division, multiplication, percentages, decimal points and ratios
- participating in workplace meetings and discussions
- use of industry standard terminology
- awareness of work health and safety in the context of own work
- appropriate sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- effective communication, including the role of body language
- different modes of communication (e.g. written and non-verbal)
- effective communication in a work team
- communication procedures and systems, and technology relevant to the organisation and the individual's work responsibilities.

Assessment Conditions

Assessors must satisfy current standards for RTOs

1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect and record production data obtained from a variety of sources.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify data to be collected	1.1 Determine the specific requirements of the data to be collected by discussion with the supervisor or by reading work instructions 1.2 Select materials or tools required for data collected and calibrate where necessary 1.3 Identify difficulties that may be encountered in collecting the data and seek advice from the supervisor if needed

Element	Performance criteria
	1.4 Communicate advice about the proposed data collection to others as required 1.5 Select and use suitable personal protective equipment 1.6 Determine whether notices relating to site quarantine are in effect and, where required, follow site quarantine procedures
2. Record production data	2.1 Record production data in the correct format and to meet specific requirements
3. Present and store production data	3.1 Present production data in the correct format and to meet specific requirements 3.2 Store production data sheets appropriately 3.3 Download or enter production data into a computer where required, using specified formats and applications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK207A Collect and record production data

Assessment Requirements for AHCWRK207 Collect and record production data

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collecting data as part of the work role or job function
- entering data into specified written or electronic formats
- storing data in the prescribed location and format
- referring to data to complete work activities if necessary
- use of industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- purposes for which the recorded data might be used
- software programs used for recording or storing data
- the enterprise's recording methods
- workplace health and safety in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCWRK208 Provide information on products and services

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide information on products and services in a range of settings.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify information requirements	1.1 Use appropriate interpersonal skills identify customer's information needs 1.2 Handle customer enquiries courteously and promptly 1.3 Update knowledge and understanding of products and services via authoritative sources and appropriate personnel 1.4 Identify personal and professional limitations in addressing

Element	Performance criteria
	customer information needs and seek assistance from appropriate personnel when required 1.5 Follow enterprise work health and safety policies
2. Provide information	2.1 Provide information that addresses customer requirements to customers in a timely and professional manner 2.2 Exhibit product and services that may meet customer requirements to customer as required 2.3 Refer enquiries that fall outside own areas of responsibility and knowledge within enterprise for follow up and completion

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK208A Provide information on products and services.

Assessment Requirements for AHCWRK208 Provide information on products and services

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- respond to customer requests for information
- use questioning to identify customer requirements
- refer or seek advice from supervisor when required
- engage customer, especially in relation to giving and receiving information
- assess initial customer needs
- access and research product information
- seek assistance as required
- recommend products
- encourage repeat business
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- customer service techniques
- how to effectively engage and communicate with a range of customers
- customer requirements in various rural and horticultural settings
- the enterprise's business values, structure, products and services
- work health and safety in the context of own work.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK209 Participate in environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to follow workplace procedures and instructions and to participate in environmentally sustainable work practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work.

No licensing, legislative or certification requirements apply to this qualification at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify current resource use	1.1 Identify workplace environmental and resource efficiency issues 1.2 Identify resources used in own work role 1.3 Document and measure current usage of resources using appropriate techniques

Element	Performance criteria
	1.4 Record and file documentation measuring current usage, using technology (such as software systems) where applicable 1.5 Identify and report workplace environmental hazards to supervisor
2. Comply with environmental regulations	2.1 Follow workplace procedures to ensure compliance 2.2 Report breaches or potential breaches to appropriate personnel
3. Seek opportunities to improve resource efficiency	3.1 Follow organisational plans to improve environmental practices and resource efficiency 3.2 Work as part of a team, where relevant, to identify possible areas for improvements to work practices in own work area 3.2 Make suggestions for improvements to workplace practices in own work area

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK209A Participate in environmentally sustainable work practices

Assessment Requirements for AHCWRK209 Participate in environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify workplace environmental and resource efficiency issues
- identify and measure resources used in own work role
- record measurements of current usage and filing documentation using appropriate technology
- identify and report workplace environmental hazards to supervisor
- follow workplace procedures to ensure compliance
- report breaches or potential breaches to supervisor
- follow organisational plans to improve environmental practices and resource efficiency
- work as part of a team to identify possible areas for improvements
- use industry standard terminology
- apply work health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental and resource hazards and risks
- environmental or sustainability legislation, regulations and codes of practice applicable to own work role
- work health and safety issues and requirements applicable to own role
- organisational structure, and reporting channels and procedures
- relevant environmental and resource efficiency systems and procedures
- sustainability in the workplace

- terms and conditions of employment including policies and procedures, such as daily tasks, employee and employer rights, equal opportunity.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK301 Collect samples for a rural production or horticulture monitoring program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect samples as part of a rural production or horticulture monitoring program or while conducting post-mortem examination of livestock or other animals.

Samples collected will usually be analysed by laboratory staff, although collection staff may undertake some testing.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Plan for collection of samples	1.1 Confirm the purpose and scope of sample collection activity from discussion with supervisor or work instructions 1.2 Confirm the sample collection schedule with supervisor 1.3 Confirm the sampling site location and gain approval for site access where required 1.4 Identify the samples to be collected and preserved with supervisor 1.5 Assess the range of likely operating conditions, hazards and difficult or sensitive environments for impact on sampling and testing
2. Prepare equipment and resources	2.1 Source equipment required for sampling and preserving as outlined in sampling procedures 2.2 Check equipment for availability and serviceability 2.3 Select and use appropriate personal protective equipment 2.4 Collect data or record sheets or books for use 2.5 Move equipment, data sheets and personnel to sampling sites and prepare for use 2.6 Apply safe work practices at all times
3. Carry out sampling and preserving procedures	3.1 Collect samples as outlined in sampling plan 3.2 Preserve and record samples 3.3 Prepare and package samples for external analysis in line with laboratory standards and send to laboratory 3.4 Package and transport hazardous materials appropriately 3.5 Make observations including information on the surrounding area and environmental conditions 3.6 Report and deliver collection outcomes including presentation of samples
4. Complete sample collection activities	4.1 Clean, sanitise and store equipment and clothing 4.2 Repair damaged or malfunctioning equipment on site or sent to manufacturer or specialist 4.3 Record sampling results and observations on data sheets and forward to appropriate person 4.4 Advise supervisor of changes in field conditions and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK301A Collect samples for a rural production or horticulture monitoring program

Assessment Requirements for AHCWRK301 Collect samples for a rural production or horticulture monitoring program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan for collection of samples and moving equipment to the site
- collect and preserve samples for a given site
- record sampling results and observations on data sheets
- carry out sampling procedures
- distinguish atypical circumstances
- prepare samples
- package samples for transport to laboratory
- use and operate relevant tools and equipment
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- hydrological cycle
- field procedures for sampling and preservation
- collecting equipment and methods
- preservation equipment and processes
- basic habitat assessment
- water quality issues
- fauna and flora recognition relevant to sampling activities
- topographical, climatic or environmental influence on material or sampling procedure.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK302 Monitor weather conditions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and interpret weather and climate conditions and assess the likely impact.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret weather and climate information	1.1 Monitor weather and climate information and warnings regularly to determine likely conditions 1.2 Anticipate and assess potential variations in weather and climate conditions according to warnings, weather patterns and historical experience 1.3 Identify the possible impacts of weather and climate on crops,

Element	Performance criteria
	livestock and work tasks to determine appropriate preventative action 1.4 Review suitable preventative actions to ensure availability of appropriate resources and responses
2. Carry out preventative action	2.1 Disseminate information and advice to relevant personnel 2.2 Determine preventative action according to the known effects on livestock, crops and work tasks 2.3 Implement actions to minimise loss and damage 2.4 Adjust and revise livestock or crop management program and work schedules according to climatic changes
3. Monitor weather and climate	3.1 Access regular updates to determine the ongoing suitability of current programs 3.2 Review the viability of livestock and crop management practices and scheduling of work tasks to ensure suitability within meteorological conditions 3.3 Undertake research on forecasting techniques to maintain currency of information 3.4 Record relevant information

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Equivalent to AHCWRK302A Monitor weather conditions

Assessment Requirements for AHCWRK302 Monitor weather conditions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor and interpret weather and climate information
- communicate warnings and concerns
- implement actions to minimise loss and damage
- relate forecasts to impact on current operations and activities
- relate weather and climate conditions and changes to decision-making and prevention of loss and damage
- monitor physical signs in the context of available information.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- weather and climate conditions and its impact upon farming and grazing activities
- effects of wind and rain on wind chill
- enterprise and industry policies for monitoring weather and climate conditions and recording and reporting weather and climate conditions
- effects of shearing and parturition and wind chill exposure if applicable
- effects of prolonged dry periods on pastures and animal production and natural resources if applicable.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK303 Respond to emergencies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise and respond to workplace emergencies.

Workplace emergencies may include such incidents as a small fire that can be controlled using a nearby fire extinguisher; or a chemical spill that can be controlled using personal protective clothing and equipment, and a small spill kit; or other workplace accident where there is no significant injury or damage.

Responding to emergencies may also include application of basic first aid to injured persons. A first aid certificate will be required.

All aspects of the unit must be undertaken in line with legislative requirements, workplace policies and procedures, and accepted safe practices

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for emergency situations	1.1 Identify potential workplace emergency situations and appropriate responses, within the range of current skills and relevant workplace emergency procedures 1.2 Identify relevant emergency resources and their location in the work area 1.3 Carry out regular checks of the workplace to minimise potential hazards and report any issues 1.4 Select, use and maintain personal protective equipment, safety equipment and other aids as required for emergencies and store properly after use 1.5 Identify problems with the serviceability of the emergency resources and report to relevant people
2. Identify and evaluate the emergency	2.1 Recognise and assess the identified or potential emergency situation and evaluate the risks and effectiveness of initial response actions 2.2 Seek advice in evaluating the emergency with appropriate personnel 2.3 Determine emergency needs and priority, including any assistance that may be required 2.4 Evaluate the potential for further development of the emergency and assess any hazards or risks to staff, clients or animals 2.5 Maintain high standards of hygiene and infection control to reduce the risk of infection or cross infection where necessary
3. Implement fire protection and control procedures	3.1 Minimise the risk of fire hazards and any hazardous fuelling procedures in the workplace 3.2 Use fire extinguishers and equipment appropriate to the fire situation and notify authorities 3.3 Follow procedures for evacuation to nominated assembly points 3.4 Carry out safety procedures for the handling and use of industrial gases
4. Safely confine the emergency where possible	4.1 Confine emergency to the immediate area using available resources within current skill limits 4.2 Carry out emergency procedures and operate equipment using safe practices and as trained 4.3 Coordinate use of equipment with other emergency actions 4.4 Implement strategies for group control, including removal of staff, clients and animals from danger and monitor ongoing

Element	Performance criteria
	condition 4.5 Acquire and document information required to assist emergency services and notify as appropriate 4.6 Amend plan of action to accommodate changes in situational variables
5. Manage the emergency situation	5.1 Evacuate casualties using established emergency procedures 5.2 Minimise the risk to self and casualty's health by isolating the hazard if possible 5.3 Assess vital signs and reassure casualty in a calm and caring manner using available resources 5.4 Provide first aid in accordance with established first aid procedures 5.5 Seek first aid assistance and advice from others where necessary 5.6 Implement organisational procedures and policies in the event of a near miss, major injury or death

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK303A Respond to emergencies

Links

Assessment Requirements for AHCWRK303 Respond to emergencies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- evaluate the emergency
- avoid and controlling escalation of the emergency
- develop a plan of action decisively
- implement a plan of action
- render first aid care
- deal with contingencies
- operate emergency equipment according to manufacturer's specifications and training
- use appropriate fire protection and control techniques relevant to the organisation and industry
- apply basic first aid to individuals across a range of incident situations applicable to the job role, organisation or sector
- use industry standard terminology
- apply work health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the use of safe working practices
- the emergency network and contacts
- enterprise plan and evacuation procedures
- work health and safety legislative requirements and Codes of Practice
- legal responsibilities and duty of care
- use of communications equipment

- organisational and legal policies and procedures in the event of an accident/incident
- local call out procedures to access emergency services personnel
- practical first aid skills using prepared and improvised materials
- the emergency evacuation procedure and assembly point/s
- techniques to emergency response network and procedures to access relevant emergency personnel
- legal responsibilities and duty of care for persons and animals as appropriate to industry and emergency situation
- the proper use and technique for handling industrial gases
- hazard identification and risk assessment techniques and tools relevant to the organisation and industry
- use of communications equipment and protocols in the event of an emergency
- procedures to minimise infection and cross infection
- procedures for dealing with major injury or death prepare for, evaluate and act appropriately in emergency situations.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK304 Respond to rescue incidents

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to respond to emergency and rescue incidents.

Work health and safety requirements should be followed at all times and form part of the planning and response activities.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for response	1.1 Check equipment to ensure availability and serviceability

Element	Performance criteria
	1.2 Obtain task and operational instructions 1.3 Confirm location details of incident 1.4 Select and use personal protective equipment 1.5 Notify local environment conditions
2. Respond to incident	2.1 Travel to incident location in a safe and efficient manner 2.2 Maintain communication with base station and other personnel at all times 2.3 Carry out on site search activities as necessary
3. Rescue is effected	3.1 Assess and monitor incident scene for hazards and appropriateness of planned procedures 3.2 Modify planned procedures where necessary in response to local circumstances 3.3 Provide support to other rescue services as appropriate 3.4 Obtain access to casualties safely 3.5 Operate equipment safely and appropriately 3.6 Communicate the progress of the rescue to appropriate people 3.7 Treat and monitor casualties and move to safety
4. Implement post incident responses	4.1 Recover, clean and service equipment 4.2 Complete documentation 4.3 Report incidents

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK304A Respond to rescue incidents.

Assessment Requirements for AHCWRK304 Respond to rescue incidents

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate the circumstances and logistics for the emergency
- carry out preparation and move to the rescue site
- assess the situation and establish communication with additional or specialist help
- carry out the required rescue or response to emergency
- implement post incident responses
- use industry standard terminology
- apply workplace health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- local environmental conditions
- search and rescue methods
- operation and characteristics of rescue equipment, tools and vehicles
- environmental, public health and safety issues
- types of hazards and how they should be handled
- enterprise procedures, legislative and work health and safety requirements
- first aid, life preservation.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK305 Coordinate work site activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate work site activities for small scale projects.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work site activities	1.1 Clarify the requirements of the work with supervisor 1.2 Identify personnel, equipment and material resource requirements according to the scope of the project and supervisors instructions 1.3 Identify and document the order of activities and time allocation and present to the supervisor for verification

Element	Performance criteria
	1.4 Identify the environmental implications of the proposed work site activities and assess the likely outcomes and report to supervisor 1.5 Carry out a work health and safety risk assessment 1.6 Select, use and maintain personal protective equipment according to the type of work site activities to be undertaken
2. Organise resources	2.1 Purchase materials and hire equipment and machinery as authorised by the supervisor 2.2 Obtain external agency permits in the correct order as necessary 2.3 Notify neighbours and affected parties of works to be undertaken as necessary 2.4 Organise delivery of materials, equipment and machinery to site as outlined in the order of activities 2.5 Organise personnel to be on site when they are required
3. Coordinate and report on activities	3.1 Coordinate all resources to suit the scope of the project and order of activities 3.2 Direct personnel in activities for each period of work 3.3 Monitor and document personnel, activities, timelines and resource usage 3.4 Identify contingency situations and report to the supervisor and take corrective actions as required 3.5 Write a simple project report to inform management of work site activities undertaken and completed

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK305A Coordinate work site activities.

Assessment Requirements for AHCWRK305 Coordinate work site activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read and interpreting documentation associated with work site activities
- prepare and planning worksite activities
- calculate material and resource requirements
- schedule activities and allocating tasks and responsibilities
- coordinate a team to achieve optimum performance
- communicate with personnel at all levels
- monitor activities and recording costs and production levels
- document results clearly and concisely
- perform a work health and safety risk assessment
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental awareness associated with undertaking project works to ensure the impact on the environment is minimal
- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for obtaining external agency permits as necessary
- the range, use and availability of materials, equipment and machinery that may be required for the project
- work health and safety issues, legislative requirements and Codes of Practice.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK306 Comply with industry quality assurance requirements

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to comply with industry quality assurance requirements in the production of food and fibre products.

Quality assurance can include systems for food safety, biosecurity, environmental management and animal welfare.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Follow quality assurance practices	1.1 Determine the elements of the industry quality assurance requirements 1.2 Identify hazards to food safety and quality for work area if applicable 1.3 Determine critical control points for work area 1.4 Complete record keeping 1.5 Conduct a safety hazard analysis and risk assessment and implement the Critical Control Point (HACCP) approach to quality assurance
2. Implement standard operating procedures	2.1 Implement standard operating procedures 2.2 Report non-conforming or defective product to supervisor 2.3 Take corrective action as required
3. Report problems that affect quality	3.1 Identify potential or existing quality problems 3.2 Identify instances of variation in quality from specifications or work instructions 3.3 Report variations and potential problems to supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK306A Comply with industry quality assurance requirements.

Assessment Requirements for AHCWRK306 Comply with industry quality assurance requirements

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and reporting issues that impact on product quality
- follow quality assurance practices
- implement standard operating procedures
- contribute to reviews of work output against quality standards
- complete records
- determine critical control points for work area
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry quality assurance requirements
- work processes in own field of work
- Hazard Analysis and Critical Control Point (HACCP) approach to quality assurance
- workplace procedures, policies, guidelines and standard operating procedures for own area of work.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK307 Develop and apply fertiliser and soil ameliorant product knowledge

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and apply fertiliser and soil ameliorant product knowledge.

The unit applies to contractors and employees working in a number of roles within the fertiliser and soil ameliorant industry, including those involved in fertiliser and soil ameliorant spreading or application, warehousing, wholesale and retail sales and transport and the storage of fertilisers and soil ameliorants.

Work is carried out to comply with industry codes of practice, quality assurance requirements, environmental best practices and relevant legislative requirements.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
<p>1. Identify fertiliser and soil ameliorant products and associated work health and safety, food safety and environmental issues</p>	<p>1.1 Source information about new products and developments continually</p> <p>1.2 Provide information about fertiliser and soil ameliorant product to customers</p> <p>1.3 Explain work health and safety, food safety and environmental issues relating to particular products to customers, with particular reference to their safe storage, handling and application</p> <p>1.4 Identify bulk fertiliser and soil ameliorant products using a combination of visual and physical examination of product characteristics</p> <p>1.5 Use correct terminology when distinguishing between different products and services</p> <p>1.6 Maintain biosecurity protocols and quarantine procedures at all times</p>
<p>2. Work with fertiliser and soil ameliorant products</p>	<p>2.1 Identify and apply storage and handling requirements of products consistently</p> <p>2.2 Identify work health and safety hazards associated with particular products and take appropriate action to minimise risks to self and others</p> <p>2.3 Identify environmental risks associated with particular products and take appropriate action to minimise any likely risks to self and others</p> <p>2.4 Select, use and maintain suitable personal protective equipment</p> <p>2.5 Use inventory and labelling systems to locate products within the workplace or store</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK307A Develop and apply fertiliser and soil ameliorant product knowledge.

Assessment Requirements for AHCWRK307 Develop and apply fertiliser and soil ameliorant product knowledge

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify fertiliser and soil ameliorant products using information about their characteristics
- provide information to customers about fertiliser and soil ameliorant products
- refer customers to other appropriate sources of information about products
- work safely with products
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics and key label components (including product analysis, impurities and warnings) of the range of fertiliser and soil ameliorants sold or handled in the workplace
- key environmental, work health and safety and food safety risks associated with the use, spreading, storage, handling and transport of fertilisers and soil ameliorants.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK308 Handle bulk materials in storage area

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to receive, move and sample bulk materials in a storage area.

Bulk materials are handled to industry standards and the bulk material storage program in relation to segregation and storage conditions ensuring minimum loss or damage and optimum returns.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work in bulk	1.1 Interpret work to be undertaken from the work program where

Element	Performance criteria
materials storage area	<p>necessary, and confirmed with supervisor</p> <p>1.2 Identify work health and safety hazards, assess risks and implement suitable control measures</p> <p>1.3 Select, use and maintain suitable personal protective clothing</p> <p>1.4 Select, check and maintain tools and equipment suitable for the work to be undertaken</p> <p>1.5 Identify environmental implications of undertaking work in the bulk materials storage area, assess likely outcomes and responsible action taken if necessary</p> <p>1.6 Maintain biosecurity protocols at all times</p> <p>1.7 Identify legislative, regulatory and industry requirements</p> <p>1.8 Design and implement contingency strategies</p>
2. Sample bulk materials for testing	<p>2.1 Take representative samples of bulk materials for testing in line with the requirements of the bulk materials storage program</p> <p>2.2 Undertake sampling safely, following the prescribed guidelines for the activity</p> <p>2.3 Prepare representative bulk materials samples for dispatch by clearly labelling and packaging accordingly</p> <p>2.4 Dispatch samples to the analysing body</p>
3. Move bulk materials into and out of storage	<p>3.1 Identify bulk materials for handling and storage from written or verbal instructions</p> <p>3.2 Segregate bulk materials according to type, variety and quality characteristics</p> <p>3.3 Take measures to minimise insect and weed infestation and contamination during the movement of the bulk materials</p> <p>3.4 Check bulk materials regularly for insect infestation and contamination during movement</p> <p>3.5 Clean any storage and handling equipment that is used thoroughly after emptying, and dismantle if necessary</p> <p>3.6 Select silo types and handling equipment for each bulk material type in relation to their storage characteristics and flow properties</p> <p>3.7 Implement suitable measures to minimise the effect of desiccant dusts on the flow properties of bulk materials</p> <p>3.8 Update and store records appropriately</p>
4. Repair and maintain storage facility	<p>4.1 Identify the need for repairs to the facility through observation or instruction</p> <p>4.2 Conduct maintenance and repairs as required</p> <p>4.3 Complete maintenance records and other appropriate information</p> <p>4.4 Clean and maintain workshop and work areas</p> <p>4.5 Report maintenance and repairs, damage, malfunctions or</p>

Element	Performance criteria
	irregular performance in machinery, tools and equipment 4.6 Clean, maintain and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWRK308 Handle bulk materials in storage area

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check equipment and storage facilities and identify current or impending faults
- record bulk materials stocks and movements
- conduct silo readings
- identify bulk materials pests and damage
- use communication systems
- sample and conduct a simple analysis of bulk materials
- handle and manoeuvring equipment
- test bulk materials for moisture, contamination and quality
- complete pre-operational checks on basic tools and equipment
- perform routine safety, service and maintenance procedures on tools, equipment and machinery
- operate hand and independently powered tools and clean equipment to industry standards
- clean, securing and storing machinery and equipment
- perform basic trouble shooting
- recognise and rectifying minor operational faults
- handle hazardous substances (fuels) safely
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the client's sampling and classification requirements
- bulk materials types and characteristics

- common bulk materials pests and problems
- legislative requirements, manufacturer's instructions and workplace procedures
- silo operations and configuration, machinery and operating practices
- organisation requirements for protective equipment and safe practices in relation to work health and safety
- organisation and industry guidelines for segregation of bulk materials quality assurance principles
- pre-operational and safety checks, servicing and maintenance procedures for tools and equipment
- potential hazards associated with the operation of basic tools and equipment
- general machine maintenance procedures
- machinery operating principles and operating methods
- machinery storage and protection methods
- environmental impacts associated with the operation of machinery and equipment
- personal protective clothing and equipment and when and how it should be used
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK309 Apply environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply environmentally sustainable work practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others.

Work routines meet organisational and compliance requirements for ethical handling and welfare of animals, environmental sustainability, work health and safety, and biosecurity appropriate to the work role.

No licencing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify current practices in relation to resource usage and sustainability	1.1 Identify current environmental regulations and associated procedures applying to the workplace 1.2 Identify environmental sustainability policy and procedures applicable to the workplace 1.3 Identify resource usage in the workplace using purchasing and other relevant data 1.4 Access information on impact of resource usage on environmental sustainability 1.5 Conduct a safety hazard analysis and risk assessment
2. Contribute to the review of workplace environmental sustainability practices	2.1 Collect information on environmental sustainability and resource efficiency systems relevant to the workplace 2.2 Review current practices and identify potential areas for improvement 2.3 Seek suggestions and ideas from stakeholders to improve the management of the environment and resource efficiency 2.4 Contribute to development of tools or resources to help make improvements in the workplace, using collected information 2.5 Communicate proposed improvements to management
3. Apply improvement strategies	3.1 Use appropriate techniques and tools to assist in achieving efficiencies and environmental targets 3.2 Apply life cycle management principles 3.3 Apply strategies to minimise waste and employ recycling, re-use or re-purposing where appropriate 3.4 Apply strategies to minimise environmental risks and impacts
4. Record and report on work practices	4.1 Use monitoring and evaluation tools and technology where available 4.2 Record incidents where sustainability policy and procedures have been breached 4.3 Record and report on progress against resource efficiency and environmental targets 4.4 Provide feedback to management on environmental sustainability review and improvement process 4.5 Promote organisational improvement strategies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCWRK313A Implement and monitor environmentally sustainable work practices. No equivalent unit.

Assessment Requirements for AHCWRK309 Apply environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify current procedures and practices related to environmental regulations
- identify current procedures and practices related to minimising impact of resource usage on environment
- make contributions to the review of environmental sustainability procedures and practices through research and development of tools or techniques
- use appropriate techniques and tools to assist in achieving resource efficiencies and environment targets
- use communication skills to:
 - convey proposed improvements
 - provide feedback on improvement processes
 - promote organisational improvement strategies
- apply life cycle management principles in strategies to improve resource usage, reduce waste, employ recycling, re-use, or re-purposing, and to minimise environmental risks and impacts
- use tools and technology to monitor effectiveness of improvement strategies, and incidents that breach sustainability policy and procedures
- record and report on progress against resource efficiency and environmental targets.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic environmental sustainability principles
- environmental legislation, regulations, standards, codes of practices as may be relevant to industry sector and workplace

- relevant internal and external sources of information that can be used to identify sustainability improvements
- common environmental and energy efficiency issues within the industry
- environmental hazards and risks associated with the relevant industry sector
- organisation's sustainability work policies and procedures
- principles of resources efficiency and life cycle management
- practices for disposal or recycling of waste associated with relevant industry sector
- organisation's recording and reporting systems.

Assessment Conditions

Assessors must satisfy current standards for RTOs

AHCWRK310 Provide on-job training support

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide on-job training support.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify needs for on-the-job training support	1.1 Determine training needs in consultation with supervisor and employee or trainee 1.2 Obtain agreement on the extent and scope of training support to be provided with the supervisor 1.3 Define outcomes from training prior to commencement

Element	Performance criteria
	1.4 Clarify methods of providing on-job training support and obtain agree from supervisor
2. Support on-the-job training	2.1 Confirm training outcomes with the learner 2.2 Deliver training as directed and in accordance with workplace procedures and relevant legislation 2.3 Practice opportunities are provided to re-enforce the training
3. Provide follow-up and support to learner	3.1 Opportunities to apply competencies on-the-job are provided 3.2 Constructive feedback and coaching are provided to assist learning 3.3 Feedback of employee's progress is given to the supervisor in the workplace

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK310A Provide on-job training support.

Assessment Requirements for AHCWRK310 Provide on-job training support

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and providing a safe learning environment
- determine training needs and required outcomes
- deliver training in work skills
- identify needs for on-the-job training support
- provide follow-up and support to learner
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- adult learning principles
- setting up on-job training support
- approaches to on-job training support
- resources required for on-job training support
- reviewing and reporting on on-job training support
- work health and safety issues related to on-job training support.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK311 Conduct site inspections

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct a site inspection, including verification of the location, ownership, orientation and boundaries of a site.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect information	1.1 Obtain site location and relevant details 1.2 Source site maps and plans where available and review 1.3 Identify the scope of inspection in line with client-stakeholder needs and local regulations

Element	Performance criteria
	1.4 Determine climate and weather conditions from historical data 1.5 Seek formal approval is sought to visit site where required 1.6 Identify and record covenants 1.7 Check remote sensing systems for status
2. Prepare for a site visit	2.1 Identify and prepare requirements for inspection 2.2 Plan methods for recording inspection and confirm forms are available for use 2.3 Evaluate the scope of proposed work and prepare field notes to checklist specific concerns 2.4 Evaluate environmental conditions in preparation for likely site conditions 2.5 Consider traffic management requirements where required
3. Conduct site inspection	3.1 Carry out site orientation and verify ownership and site boundaries 3.2 Identify site hazards for a site inspection, assess risks and implement appropriate control measures 3.3 Identify, estimate and record site dimensions and gradients 3.4 Identify soil types from soil identification reference chart guidelines 3.5 Test soil samples in the field and record detailed notes for analysis of potential problems 3.6 Inspect relevant vegetation to determine the identity, health, condition and location 3.7 Investigate observable signs of fauna 3.8 Identify and record existing on-site services and adjacent site features
4. Document information	4.1 Prepare a base plan of the site 4.2 Document site inspection information in an inspection or site inventory report or on the base plan if required 4.3 Complete documents and forward to client or supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK311A Conduct site inspections.

Assessment Requirements for AHCWRK311 Conduct site inspections

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify a wide range of vegetation common to the region
- recognise plant health problems and defects
- perform hazard identification and risk control procedures
- conduct soil field tests
- estimate dimensions and gradients
- report findings to the client or supervisor
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- plan and map interpretation
- soil pH, texture, structure and type
- plant identification and plant physiology
- measuring and estimating methods
- current land use and environmental threats to site hazards associated with undertaking site inspections
- protocols of accessing and visiting a site
- relevant legislative and regulatory requirements including environmental protection legislation
- local government regulations relating to the proximity of trees to buildings, services and roads
- local tree protection and preservation regulations

- relevant Codes of Practice.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK401 Implement and monitor quality assurance procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement and monitor quality assurance procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish quality specifications for product	1.1 Source market specifications 1.2 Identify legislated requirements

Element	Performance criteria
2. Identify hazards and critical control points in the production of quality product	2.1 Identify critical control points impacting on quality 2.2 Determine the degree of risk for each hazard
3. Assist in planning of quality assurance procedures	3.1 Develop procedures for each identified control point to ensure optimum quality 3.2 Minimise hazards and risks by application of appropriate controls 3.3 Develop processes to monitor the effectiveness of quality assurance procedures
4. Implement quality assurance procedure	4.1 Allocate responsibilities for carrying out procedures to staff and contractors 4.2 Prepare instructions 4.3 Provide staff and contractors with induction training on the quality assurance policy 4.4 Provide staff and contractors with in-service training relevant to their allocated procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK401A Implement and monitor quality assurance procedures.

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Communicate work roles	1.1 Define and document the roles and responsibilities of staff 1.2 Identify the skills of staff and match with available tasks and duties 1.3 Identify the requirements of jobs and communicate to personnel 1.4 Develop information on activities and provide to personnel

Element	Performance criteria
	1.5 Implement work health and safety policy and procedural requirements for supervisors
2. Coordinate activities	2.1 Prioritise work activities to ensure completion of tasks within available timelines 2.2 Develop work plans to establish targets and objectives of activities, and to define tasks and timelines 2.3 Identify training and learning opportunities and incorporate into work activities 2.4 Clarify supervisory and reporting responsibilities and maintain 2.5 Implement enterprise environmental policy and procedures for supervisors
3. Maintain effective working relations	3.1 Recognise and address problems through discussion with work group 3.2 Seek assistance from work group members when difficulties arise in achieving allocated tasks 3.3 Use discussion and information sharing routinely to communicate requirements of work activities through a participative approach 3.4 Manage disagreements and conflicts constructively using appropriate conflict management strategies
4. Provide feedback	4.1 Provide clear and constructive feedback to individuals to support achievement of outcomes 4.2 Identify difficult situations and use negotiation techniques to achieve results 4.3 Monitor team and individual performances regularly to ensure personnel are able to achieve goals 4.4 Maintain supervisory structures and lines of reporting

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK403A Supervise work routines and staff performance.

Assessment Requirements for AHCWRK403 Supervise work routines and staff performance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- supervise and instruct staff to achieve work activities
- delegate and allocate tasks
- assess and evaluate staff capability
- identify and provide training requirements
- plan timesheets and timetables to meet deadlines
- demonstrate safe workplace and environmentally responsible practices
- solve staffing and resourcing problems
- evaluate performance, provide feedback and prepare reports and performance appraisals
- promote and maintain effective relationships between staff
- monitor productivity and maintain staff records as required
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise personnel processes
- enterprise organisational structure and responsibilities
- techniques for building trust and relationships
- principles of team work and negotiation
- leadership for the work team
- performance appraisal systems and procedures
- principles of time management
- conflict management techniques

- enterprise training requirements and processes
- relevant State and Territory legislation, regulations and Codes of Practice with regard to work health and safety, environmental protection and employment
- work health and safety hazard identification, risk assessment and development of risk controls.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK405 Implement and monitor environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Investigate current practices in relation to resource usage	1.1 Identify environmental regulations applying to the enterprise 1.2 Analyse procedures for assessing compliance with environmental and sustainability regulations

Element	Performance criteria
	<p>1.3 Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate</p> <p>1.4 Collect, analyse and organise information from a range of sources to provide information, advice, tools and resources for improvement opportunities</p> <p>1.5 Measure and document current resource usage of members of the work group</p> <p>1.6 Analyse and document current purchasing strategies</p> <p>1.7 Analyse current work processes to access information and data to assist in identifying areas for improvement</p> <p>1.8 Follow enterprise work health and safety policies</p>
<p>2. Set targets for improvements</p>	<p>2.1 Seek input from stakeholders, key personnel and specialists</p> <p>2.2 Access external sources of information and data as required</p> <p>2.3 Determine alternative solutions to workplace environmental issues</p> <p>2.4 Set efficiency targets</p>
<p>3. Implement performance improvement strategies</p>	<p>3.1 Source and use appropriate techniques and tools to assist in achieving efficiency targets</p> <p>3.2 Apply continuous improvement strategies to own work area of responsibility, including ideas and possible solutions to communicate to the work group and management</p> <p>3.3 Implement and integrate environmental and resource efficiency improvement plans for own work group with other operational activities</p> <p>3.4 Supervise and support team members to identify possible areas for improved practices and resource efficiency in work area</p> <p>3.5 Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon where appropriate</p> <p>3.6 Implement costing strategies to fully value environmental assets</p> <p>3.7 Implement efficient supply chain procedures</p>
<p>4. Monitor performance</p>	<p>4.1 Use and develop evaluation and monitoring, tools and technology</p> <p>4.2 Document and communicate outcomes to report on efficiency targets to key personnel and stakeholders</p> <p>4.3 Analyse strategies and improvement plans</p> <p>4.4 Set new efficiency targets, and investigate and apply new tools and strategies</p> <p>4.5 Promote successful strategies and reward participants where possible</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK313A Implement and monitor environmentally sustainable work practices.

Assessment Requirements for AHCWRK405 Implement and monitor environmentally sustainable work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify the environmental regulations applicable to the enterprise
- analyse information on environmental and resource efficiency systems and explain it to the work group
- measure and document current resource use
- analyse current work processes to identify areas for improvement
- set targets for improvement
- implement environmental improvement plans for own work group
- develop and use evaluation and monitoring tools
- apply supervisory skills to work effectively with a team
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant compliance requirements in own area of work
- hazards and risks associated with work area
- environmental and energy efficiency issues, systems and procedures specific to industry practice
- external benchmarks and support for particular benchmarks to be used within enterprise, including approaches to improving resource use for work area and expected outcomes
- work health and safety issues and requirements
- organisational structure and reporting channels and procedures
- quality assurance systems relevant to own work area

- strategies to maximise opportunities and to minimise impact relevant to own work area
- supply chain procedures
- terms and conditions of employment including policies and procedures, such as daily tasks, work area responsibilities, employee, supervisor and employer rights, equal opportunity.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK501 Plan, implement and review a quality assurance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan, implement and review a quality assurance program.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine quality assurance objectives for the enterprise	1.1 Assess future market requirements for quality assured products 1.2 Determine premiums for quality assurance products 1.3 Assess strategic benefits of a quality assurance program

Element	Performance criteria
2. Plan the quality assurance program and develop implementation strategies	2.1 Define product quality standards 2.2 Audit current status of products and operations 2.3 Evaluate and cost industry quality assurance programs 2.4 Document required processes and practices in the quality assurance program manual and prepare an implementation plan
3. Implement the quality assurance program	3.1 Document instructions defining task and process requirements 3.2 Implement contractor and staff training 3.3 Confirm communication takes account of social, cultural and ethnic backgrounds 3.4 Introduce changes to processes and practices 3.5 Establish processes to monitor and verify product quality 3.6 Introduce recording systems 3.7 Validate operating instructions under conditions to verify their suitability 3.8 Analyse problems and issues and resolve appropriately, promptly and decisively 3.9 Conduct system analysis, HAACCP or related processes
4. Review the quality assurance program	4.1 Establish reporting formats 4.2 Implement mechanisms for gaining feedback information 4.3 Make preparations for quality assurance audits

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK501A Plan, implement and review a quality assurance program.

Assessment Requirements for AHCWRK501 Plan, implement and review a quality assurance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine quality assurance objectives for the enterprise
- plan the quality assurance program and develop implementation strategies
- implement the quality assurance program
- review the quality assurance program
- maintain required records to support quality assurance
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- market projections and customer requirements
- cost/benefit of quality assurance implementation
- system analysis, HAACCP or related processes
- enterprise culture and values
- leadership and administrative skills
- human resources induction practices
- human resources performance monitoring practices.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK502 Collect and manage data

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect, analyse and manage data.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Determine the type and extent of data to be collected	1.1 Define data requirements and communicate to all staff involved in data collection 1.2 Identify relevant data sources 1.3 Define the type and extent of data required 1.4 Identify work health and safety hazards associated with data collecting 1.5 Define data collection methods and techniques relative to data requirements
2. Access and collate data	2.1 Format data collection sheets to assist collection 2.2 Research or collect data from field source 2.3 Collate data by appropriate electronic means 2.4 Monitor appropriateness of data and record during collection 2.5 Research information using appropriate methods and technologies 2.6 Review sources of information regularly for usefulness, validity, reliability and cost 2.7 Use channels and sources of information effectively 2.8 Take opportunities to establish and maintain contacts with those who may provide useful information 2.9 Follow appropriate work health and safety requirements and work practices
3. Evaluate data	3.1 Collect data that is relevant, valid and sufficient 3.2 Seek clarification and assistance where data is unclear or difficult to interpret 3.3 Obtain additional data where data is inadequate 3.4 Analyse information for its validity and reliability
4. Manage and retrieve data	4.1 Store data by appropriate electronic means 4.2 Present data using appropriate graphical aids and techniques 4.3 Assemble data and provide to the manager or client as required 4.4 Retrieve data as required 4.5 Suggest and introduce new methods of recording and storing data as needed
5. Analyse and interpret data	5.1 Analyse data using appropriate statistical and analytical techniques 5.2 Interpret data to determine its significance, validity and reliability 5.3 Report findings based on the analysis and interpretation of the data 5.4 Organise data into a suitable report format to aid decision making

Element	Performance criteria
	5.5 Ensure conclusions drawn are based on reasoned argument and appropriate evidence

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK502A Collect and manage data.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCWRK502 Collect and manage data

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify data requirements and establish sampling and data collection techniques
- collect and collate data using standardised recording sheets and systems
- review sampling and data collection techniques based on validity and reliability of the data
- manage data to facilitate retrieval and analysis
- analyse data using appropriate statistical and analytical techniques
- draw conclusions based on reasoned argument and appropriate evidence
- produce a report in required format with information and data presented to support decision making
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- data collection techniques and procedures
- data recording and evaluation techniques
- data analysis and interpretive techniques
- data storage and retrieval methods
- data reporting methods.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK503 Prepare reports

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare comprehensive reports.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research material	1.1 Identify and describe the topic of the report 1.2 Determine the sources of information 1.3 Collect and organise information appropriate to the task
2. Evaluate information	2.1 Confirm that information collected is relevant and sufficient to

Element	Performance criteria
	provide a full report 2.2 Seek clarification where information is unclear or difficult to understand and seek assistance if required 2.3 Obtain additional information where available information is inadequate 2.4 Assess information for its validity and reliability and organise into a suitable form to aid decision making 2.5 Confirm that conclusions drawn from relevant information are based on reasoned argument and appropriate evidence
3. Produce a document	3.1 Use language that is applicable to the task and audience 3.2 Organise the document logically, and confirm it is structured and balanced according to purpose, audience and context 3.3 Format the document 3.4 Confirm that conclusions reached reflect the stated objectives of the report 3.5 Complete preparation within the specified timeframe 3.6 Follow enterprise and work health and safety requirements and procedures
4. Deliver a verbal presentation	4.1 Confirm language is applicable to the task and audience 4.2 Use concise and well presented support materials are used in oral presentations 4.3 Allocate sufficient time to allow clear presentation of the desired topic 4.4 Deliver verbal presentation is delivered within a specified time

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK503A Prepare reports.

Assessment Requirements for AHCWRK504 Assess new industry developments

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- critically evaluate information and research findings of relevance to enterprises and industry sector
- integrate research and development into enterprise planning
- evaluate the potential of research proposals with other producers, associates or colleagues
- document a report on new industry developments
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate avenues to disseminate industry sector information to a range of stakeholders
- correct names and terminology relevant to one's industry sector
- credible sources of information
- key industry development and promotion programs relevant to one's industry sector
- roles and responsibilities of stakeholders and organisation's relevant to own industry sector
- supply chain for industry sector enterprises.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK505 Manage trial and research material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a trial and research material as part of a designated research project.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify scope and extent of work	1.1 Identify trial and research hypothesis and parameters as required by researchers 1.2 Plan the trial or research to meet research objectives 1.3 Assess the data relevant to managing trial or research materials according to research parameters

Element	Performance criteria
	1.4 Assess data relevant to managing trial or research materials 1.5 Identify work health and safety, assess risks and develop controls and cost and document in the survey design 1.6 Identify and cost tools, equipment and machinery required for managing trial or research materials and confirm availability with suppliers, contractors and appropriate personnel 1.7 Determine research design according to the trial or research plan
2. Oversee management of trial/research materials	2.1 Prepare, maintain and monitor trial or research in line with project parameters 2.2 Conduct field work to verify and collect data as required by the trial or research design and research parameters 2.3 Monitor work activities for accuracy, validity and compliance to the parameters of the trial or research design 2.4 Undertake staged data collection as required by the trial or research design, scheduling and access requirements 2.5 Record monitoring and data
3. Prepare reports on work complete	3.1 Record collected data 3.2 Analyse data statistically to determine significance of research results 3.3 Accept or reject hypothesis based on data collected 3.4 Produce reports which conform to the structure and content required by the researcher

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK505A Manage trial and/or research material.

Assessment Requirements for AHCWRK507 Implement professional practice

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate and analyse business structures and working practice
- develop legal, professional and ethical responsibilities working in an industry
- evaluate and reflect on own work practice
- develop a professional practice plan to meet professional goals
- operate within an agreed ethical code of practice and ethics
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- typical business management structures
- issues of professional practice for the job role
- team roles, responsibilities and accountabilities
- legislation, ethical and financial considerations
- legislation covering protection of copyright and intellectual property
- local and international professional organisations relevant to the industry
- workplace occupational health and safety policies and procedures
- understanding of relevant theories, principles, practices and their application and other aspects of knowledge, desirable or necessary in order to practise effectively within the industry
- expert witness roles and processes
- personal goal setting strategies
- measuring performance

- time management strategies
- marketing principles
- professional practice considerations
- communication principles
- strategies for promoting awareness of a product.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK508 Interpret legislation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to interpret and apply legislation.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine applicable legal framework	1.1 Identify and access current legislation, regulations, organisational procedures, standards and codes of practice affecting the workplace, industry, occupation or client 1.2 Determine legal accountability obligations in relation to workplace, industry, occupation or client

Element	Performance criteria
	1.3 Identify consequences of non-compliance with legislation, regulations, organisational procedures, standards and codes of practice
2. Research, interpret and apply appropriate legislation	2.1 Monitor sources of information for changes to the legal framework 2.2 Regularly update and communicate information and changes to legal framework components which impact on work activities
3. Promote compliance with relevant legislation	3.1 Access current information about the range of legislation and other legally binding policies and protocols relating to own work 3.2 Clarify compliance requirements to confirm understanding and ensure consistency of interpretation and application 3.3 Obtain advice to assist in applying relevant legislation to own work and identifying compliance requirements 3.4 Identify areas of uncertainty in own work related to compliance requirements and take action to clarify issues 3.5 Identify possible implications of non-compliance and use these to guide own work practices
4. Assess situations which may potentially present legal problems and issues	4.1 Identify and document details of suspected or actual incidences of illegal conduct by self or others in the workplace 4.2 Contribute to ongoing monitoring and compliance with legal framework 4.3 Ensure that work is undertaken in a legally compliant manner 4.4 Recognise limits of own expertise, legal accountability obligations and access appropriate sources of expertise as required 4.5 Assess conduct of self and others in the workplace against specific components of the legal framework applicable to the workplace 4.6 Take appropriate actions to resolve or report illegal conduct, as required by applicable legislation, regulations, organisational procedures, standards and codes of practice

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCWRK508A Interpret legislation

Assessment Requirements for AHCWRK508 Interpret legislation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine legislation and legal framework applicable to task
- research, interpret and apply appropriate legislation
- promote compliance with relevant legislation
- assess situations which may potentially present legal problems and issues
- maintain knowledge of legal frameworks and relevant legislation
- develop and implement strategies to manage compliance with appropriate legislation
- provide advice and documentation regarding applicable legislation, regulations, organisational procedures and codes of practice
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the provisions contained in key relevant legislation and other legally binding legal policies and protocols from all levels of government that affect the relevant industry
- relevant Australian Standards
- organisational policies and procedures relating to legislation in organisation's functional area
- penalties for non-compliance with legislative requirements
- auditing requirements
- work health and safety requirements applicable to own work and functional area
- the scope of legal practitioner and support role and own responsibilities and obligations to provide legal advice, complete or sign off on legal work and appear in court as described by relevant jurisdictions
- how to encourage and support own compliance and that of others in the workplace

- relevant conventions, treaties, agreements, guidelines, declarations, recommendations, laws and rules
- how to apply legal information to the workplace
- techniques to monitor compliance and identify illegal conduct
- where to find appropriate sources of information and specialist personnel when limits of own expertise are reached in determining applicable legislation
- accepted codes of practice relevant to the workplace including those relating to:
 - privacy and confidentiality
 - use of company property
 - duty of care
 - ethical behaviour
 - non-discriminatory practice
 - conflict of interest
 - compliance with reasonable direction
 - relevant general legal terminology.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK509 Provide specialist advice to clients

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain technical currency for specialist knowledge and provide specialist advice to clients.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop and maintain specialist knowledge	1.1 Use research skills regularly to build a comprehensive knowledge and understanding of specialist information from industry and other sources 1.2 Identify characteristics of industry practices, products and services and analyse using available documentation

Element	Performance criteria
	1.3 Document information and maintain in a format consistent with enterprise requirements 1.4 Apply acquired knowledge to improve quality within personal work areas 1.5 Identify legislative, regulatory and industry requirements relating to own work
2. Consult with clients	2.1 Conduct consultation with clients in a professional and courteous manner at all times 2.2 Use appropriate interpersonal skills to facilitate accurate and relevant exchange of information 2.3 Use work practices that reflect sensitivity to client's requirements, specific needs and cultural, family and individual differences
3. Provide a response to client enquiries and need	3.1 Prepare information relevant to client's needs 3.2 Use research skills to find verifiable evidence in support of information and document in the appropriate format 3.3 Structure information to identify clear benefits to clients and the organisation 3.4 Document and present information in a professional format and style to the client for consideration and discussion 3.5 Evaluate client feedback by survey to improve future provision of technical information and professional services

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWRK509 Provide specialist advice to clients

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and maintain industry wide specialist knowledge
- provide a professional service to client enquiries and needs
- show discretion and judgement in stakeholder interaction
- implement professional practice in stakeholder consultation and report documentation
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- products, treatments services of the industry
- environmental sustainability and land use issues relevant to the industry
- enterprise policy and procedures for customer service including handling customer complaints
- service standards and best practice models
- strategies for planning and monitoring activities
- consultation methods, techniques and protocols
- current enterprise, government and local council policy, legislation and regulations
- mechanisms to obtain and analyse customer feedback.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCWRK510 Audit site operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to audit site operations.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Work (WRK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine the scope of the audit	1.1 Prepare objectives and scope of the audit 1.2 Confirm expectations of client or organisation 1.3 Determine the pattern of random or non-random audit events 1.4 Identify individual and personal actions for audit requirements 1.5 Identify groups and processes for audit for audit requirements

Element	Performance criteria
	1.6 Prepare a list of audit items 1.7 Identify legislative, regulatory and industry requirements for audit
2. Specify the audit requirements	2.1 Identify and document precise parameters of acceptable conditions and results 2.2 Describe the relevant sections of Codes of Practice and specific clauses in Australian Standards 2.3 Communicate written guidelines to the audited group and individual staff members 2.4 Provide detailed information to audit groups in a durable format for working conditions
3. Define the audit process	3.1 Determine and assign responsibilities for audit implementation and evaluation 3.2 Determine the timing and frequency of the audit events of audit events 3.3 Confirm schedules and logistical arrangements and plan contingency arrangements 3.4 Confirm expectations with the audited group and individual staff members 3.5 Document audit process and communicate to appropriate people
4. Manage the audit implementation	4.1 Organise an audit meeting in advance at a mutually agreed time 4.2 Examine the activities of audited group and individual staff members 4.3 Identify and record items of compliance and non compliance 4.4 Interview appropriate persons for detailed information, clarification and feedback 4.5 Gather and record relevant information and sample documentation 4.6 Take contingency actions as required and record
5. Evaluate and document the audit findings into a report	5.1 Examine results and findings against audit objectives and present to the audited group or individual 5.2 Seek and reach agreement on corrective action reports 5.3 Explain and discuss context and consequences of audit during follow-up meetings 5.4 Provide feedback on results to client or organisation 5.5 Document the final audit report and present to client or organisation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCWRK511 Develop workplace policy and procedures for sustainability

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- participate in planning, development and implementation of organisational policy that complies with legislative requirements
- communicate with stakeholders to discuss approaches to policy development and implementation and contribute to the resolution of disputes that may arise due to different points of view
- develop and monitor policies for analysing data on enterprise resource consumption
- review policies and identify improvements while benchmarking against industry best practice
- implement new approaches as required
- use industry standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- best practice approaches relevant to own work area
- environmental or sustainability legislation, regulations and codes of practice applicable to industry and organisation
- equal employment opportunity, equity and diversity principles and work health and safety implications of policy being developed
- policy development processes and practices
- principles, practices and available tools and techniques of sustainability management relevant to the particular industry context
- quality assurance systems relevant to own organisation
- relevant industry competency

- relevant organisational policies, procedures and protocols
- relevant systems and procedures to aid in the achievement of workplace sustainability.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCWRK603 Design and conduct a field-based research trial

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establishing sound research parameters that enables achievable results
- conducting research consistent with recognised scientific practice
- calculate the cost and spatial and logistical requirements of components of the trial
- enter, analyse and organise data in a mathematically sound and accurately graphed, charted or tabled representation, consistent with the trial design
- comply with legislative requirements
- use of industry standard terminology
- awareness of workplace health and safety in the context of own work
- appropriate sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- growth habits, physiological properties and taxonomic specification of animals and plants involved in the trial
- physical and biochemical properties of products involved in the trial
- properties and current, best practice application of treatments involved in the trial
- scientific and mathematical trialling, data collection, processing and analytical techniques and procedures
- auditing and reporting procedures
- the enterprise business and marketing plans
- enterprise work team management guidelines
- bio-ethics (where animals are involved in the trial).

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AMPMGT806 Commercialise research and technology product or idea

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Application

This unit describes the skills and knowledge required to undertake the fundamentals of product/idea commercialisation. It describes the process from conception to launch to full production.

Competency requires developing the skills and knowledge to successfully research, analyse, cost and develop a business opportunity for a product/idea. This unit also describes the skills required to manage commercialisation and evaluate product success.

This unit applies to leaders or managers responsible for developing a commercialisation strategy for an innovative product or technique, which has been developed through research.

Leaders undertaking product commercialisation must investigate and negotiate the legal and partnership implications of commercialisation, undertake market testing and develop commercialisation strategies.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Investigate commercialisation options	1.1 Describe product/innovation to be commercialised 1.2 Analyse innovation alignment against organisation's innovation objectives 1.3 Research, analyse and test market opportunities 1.4 Investigate optimum business structure and funding options
2. Develop commercialisation proposal	2.1 Determine resourcing requirements 2.2 Develop marketing plan 2.3 Determine supply chain strategy 2.4 Determine strategies for managing Intellectual Property (IP) 2.5 Determine environmental sustainability of proposed product/idea 2.6 Develop risk mitigation plan 2.7 Negotiate proposal modifications with key stakeholders
3. Prepare for implementation	3.1 Develop project implementation plan 3.2 Determine monitoring process 3.3 Establish and develop required business processes 3.4 Assemble project team

Assessment Requirements for AMPMGT806 Commercialise research and technology product or idea

Modification History

Release	TP Version	Comment
1	AMPv1.0	Initial release

Performance Evidence

Candidates must undertake the fundamentals of product/idea commercialisation from conception to launch to full production.

Candidates must demonstrate ability to:

- analyse market trends
- budget, including forecasting, capacity and asset analysis, setting targets and compliance mechanisms
- negotiate licensing IP (in and out), contractual supply chain arrangement and partnerships
- use communication skills to:
 - maintain appropriate relationships with colleagues and others
 - value and be open to the opinions of others
 - work as part of a team
 - model collaborative communication and learning
 - use active listening and negotiation skills
 - present and negotiate proposals
 - seek opinions and feedback from a range of stakeholders
 - develop plain English texts dealing with complex ideas and concepts
- generate and evaluate ideas by analysing information and concepts at an abstract level
- provide strategic leadership during change and negotiation processes
- use problem-solving, initiative and enterprise skills to:
 - direct, motivate, consult and delegate appropriately
 - collect, analyse and interpret data using a range of methods
 - shape strategic thinking and inspire others with a shared vision
 - work with teams with diverse emotional intelligence and cognitive ability
- provide leadership in workplace health and safety practice, ethical standards and legislative requirements

- review own personal and professional competence against personal development objectives
- support and use participative arrangements aimed at establishing trust
- to develop, negotiate and structure an agreed commercialisation strategy
- to apply leadership style and approach appropriate to individuals involved, outcomes being sought and contextual factors

Knowledge Evidence

Candidates must demonstrate specialised and integrated technical and theoretical knowledge of:

- relevant legislation
- business strategies and legal requirements underpinning trademarks, copyright and patents
- legal requirements underpinning partnership arrangements, contracts and taxation
- commercial environmental analysis techniques, including Strengths, Weaknesses, Opportunities, Threats (SWOT)/TOWS
- market testing strategies and techniques
- strategies for analysing and assessing the upstream and downstream implications of an innovation
- risk assessment strategies and techniques
- team selection, management and support strategies
- environmental sustainability principles

Assessment Conditions

Competency must be demonstrated through sustained performance over time, at an appropriate level of responsibility and under typical operating and production conditions for the enterprise.

Assessment must ensure:

- access to an actual workplace or simulated environment
- assessment over a sufficient timeframe to allow holistic assessment of the candidate's capacity to lead the development of a commercialisation strategy
- resources normally used in the workplace, including organisational policies and procedures, and relevant legislation
- access to stakeholders, potential partners and clients

Assessors must satisfy current standards for RTOs.

BSBADM409 Coordinate business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine and analyse existing and required resources, their effective application and the accountability for their use.

It applies to individuals with a broad knowledge of business resources who contribute well developed skills and knowledge to ensure adequate resources are available to perform the work of the organisation. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Determine resource requirements	1.1 Determine resource requirements in accordance with business and operational plans and organisational requirements 1.2 Provide opportunities to individuals and workgroups to contribute to the identification of resource requirements 1.3 Ensure resource expenditure is realistic and makes efficient use of available budget resources 1.4 Present recommendations on resource requirements in the

ELEMENT	PERFORMANCE CRITERIA
	required format, style and structure using relevant business equipment and technology
2 Acquire and allocate resources	2.1 Acquire physical resources and services in accordance with organisational requirements 2.2 Check resources to ensure quality and quantity are in line with service agreements 2.3 Allocate resources promptly to enable achievement of workgroup objectives 2.4 Ensure consultation with individuals and teams on allocation of resources is participative and is conducted using appropriate interpersonal skills
3 Monitor and report on resource allocation and usage	3.1 Measure effectiveness of resource planning and assess against actual costs, identified shortfalls and surpluses 3.2 Develop and implement methods of monitoring resource use to enable timely and accurate reporting against business and operational plans 3.3 Identify improvements in resource planning through consultation and feedback, and implement in accordance with organisational requirements 3.4 Maintain records concerning equipment and resource purchases in accordance with organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.2, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Identifies and interprets information from organisational plans, policies and procedures
Writing	1.4, 2.1, 3.1-3.4	<ul style="list-style-type: none"> Develops a range of documents using structure and vocabulary appropriate to audience, context and purpose
Oral Communication	1.2, 2.4, 3.3	<ul style="list-style-type: none"> Participates effectively in spoken interactions using active listening and questioning to confirm and clarify understanding

Numeracy	1.3, 2.2, 3.1, 3.2	<ul style="list-style-type: none"> Interprets and comprehends a range of mathematical information that is embedded in familiar texts Calculates and compares numeric data to track expenditure
Navigate the world of work	1.1, 2.1, 3.3, 3.4	<ul style="list-style-type: none"> Recognises and responds to explicit and implicit organisational procedures and protocols and legislative/regulatory requirements
Interact with others	1.2, 1.4, 2.4, 3.3	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Cooperates with others as part of familiar routine activities playing an active role in facilitating group interaction
Get the work done	1.1, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> Applies formal processes when planning complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time constraints Recognises and takes responsibility for addressing predictable problems in familiar work contexts Utilises a range of features within digital applications to access, store and share information Reflects on the ways in which variables impact on decision outcomes to identify improvement opportunities

Assessment Requirements for BSBADM409 Coordinate business resources

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- monitor resource usage
- maintain records of resource requirements and usage
- calculate costs and expenditures in relation to use and maintenance of business resources
- acquire and allocate physical resources and services to team members
- consult and communicate with individuals and teams about acquiring and using resources
- monitor, review and report on resource use acquisition, allocation, use and procedures
- follow organisational policies and procedures in relation to business resource acquisition and monitoring.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the functions of business equipment used in an organisation and identify common faults
- identify organisational policies, plans and procedures in relation to business resource acquisition and monitoring.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

- records relating to business resources
- policies and procedures relating to resources

- case studies, and where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBADM504 Plan and implement administrative systems

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan for or review the requirements of effective administrative systems and procedures for implementing, monitoring and reviewing the system.

It applies to individuals employed in a range of work environments in senior administrative roles.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Plan for the new or modified administrative system	<p>1.1 Identify requirements of, or modifications to, the administrative system through consultation with system users and other stakeholders in accordance with organisational and budgetary requirements</p> <p>1.2 Obtain quotations from suppliers/developers for the identified requirements or modifications to be made to the system in accordance with organisational policy and procedures</p> <p>1.3 Select supplier or developer in accordance with organisational</p>

ELEMENT	PERFORMANCE CRITERIA
	policy and procedures
2 Implement new or modified administrative system	<p>2.1 Identify and develop implementation strategies in consultation with staff</p> <p>2.2 Encourage staff to participate in all stages of the implementation process</p> <p>2.3 Implement system in accordance with organisational and legislative requirements</p> <p>2.4 Define and communicate procedures for using the system to staff</p> <p>2.5 Provide training and support for staff on the use of the new or modified system</p> <p>2.6 Deal with contingencies to ensure minimal impact on users</p>
3 Monitor administrative system	<p>3.1 Monitor system for usage, security and output in accordance with organisational requirements</p> <p>3.2 Modify system to meet changing needs in accordance with organisational requirements</p> <p>3.3 Clearly identify further modifications and notify users</p> <p>3.4 Monitor staff training needs and train new staff on administrative system</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	2.5, 3.4	<ul style="list-style-type: none"> Actively reinforces own knowledge and skills by training or mentoring others
Reading	1.2, 1.3, 3.1	<ul style="list-style-type: none"> Extracts, analyses and evaluates information from complex texts, including organisational policies and procedures
Writing	1.1, 2.1, 2.4, 3.2, 3.3	<ul style="list-style-type: none"> Gathers and utilises information and ideas from a range of sources to create texts to meet organisational requirements Creates instructional texts using grammatical structures and vocabulary appropriate to audience and

		context
Oral Communication	1.1, 2.1, 2.2, 2.4, 2.5, 3.4	<ul style="list-style-type: none"> Participates in verbal exchanges using appropriate style, tone and vocabulary for audience, context and purpose Uses listening and questioning techniques to elicit key information and confirm understanding Presents complex information adjusting presentation style and vocabulary to suit the audience
Numeracy	1.1, 1.2	<ul style="list-style-type: none"> Recognises and interprets numerical information related to budgets
Navigate the world of work	1.1-1.3, 2.3, 2.4, 3.1	<ul style="list-style-type: none"> Develops systems to meet organisational and legislative requirements
Interact with others	1.1, 1.2, 2.1, 2.2, 2.4	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Collaborates with others to achieve joint outcomes, providing guidance to others , where necessary
Get the work done	1.1-1.3, 2.1, 2.3, 2.4, 2.6, 3.2, 3.3	<ul style="list-style-type: none"> Applies formal processes when planning complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time constraints Monitors progress of plans and changes them to meet new demands or priorities Systematically gathers and analyses all relevant information and evaluates options to make informed decisions Anticipates potential problems and implements contingency plans as soon as warning signs are recognised Uses and investigates new digital technologies and applications to manage and manipulate data Demonstrates awareness of the importance of data security in a digital environment

BSBCMM401 Make a presentation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0

Application

This unit covers the skills and knowledge required to prepare, deliver and review a presentation to a target audience.

This unit applies to individuals who may be expected to make presentations for a range of purposes, such as marketing, training and promotions. They contribute well developed communication skills in presenting a range of concepts and ideas.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Communication – Interpersonal Communication

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Prepare a presentation	1.1 Plan and document presentation approach and intended outcomes 1.2 Choose presentation strategies, format and delivery methods that match the characteristics of the target audience, location, resources and personnel needed 1.3 Select presentation aids, materials and techniques that suit the format and purpose of the presentation, and will enhance audience understanding of key concepts and central ideas

ELEMENT	PERFORMANCE CRITERIA
	1.4 Brief others involved in the presentation on their roles/responsibilities within the presentation 1.5 Select techniques to evaluate presentation effectiveness
2 Deliver a presentation	2.1 Explain and discuss desired outcomes of the presentation with the target audience 2.2 Use presentation aids, materials and examples to support target audience understanding of key concepts and central ideas 2.3 Monitor non-verbal and verbal communication of participants to promote attainment of presentation outcomes 2.4 Use persuasive communication techniques to secure audience interest 2.5 Provide opportunities for participants to seek clarification on central ideas and concepts, and adjust the presentation to meet participant needs and preferences 2.6 Summarise key concepts and ideas at strategic points to facilitate participant understanding
3 Review the presentation	3.1 Implement techniques to review the effectiveness of the presentation 3.2 Seek and discuss reactions to the presentation from participants or from key personnel involved in the presentation 3.3 Utilise feedback from the audience or from key personnel involved in the presentation to make changes to central ideas presented

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.2	<ul style="list-style-type: none"> Reviews and analyses documents to identify information relevant to a specific presentation
Writing	1.1, 3.3	<ul style="list-style-type: none"> Develops material to convey ideas and information to target audience in an engaging way
Oral	1.4, 2.1, 2.2, 2.3,	<ul style="list-style-type: none"> Presents information using words and non-verbal features appropriate to the audience and context

Communication	2.4, 2.5, 2.6, 3.2	<ul style="list-style-type: none"> • Uses listening and questioning techniques to gather information required to develop or modify presentations • Interprets audience reactions and changes words or non-verbal features accordingly
Interact with others	1.4, 2.1, 2.2, 2.4, 2.5, 2.6, 3.2	<ul style="list-style-type: none"> • Selects and uses appropriate conventions and protocols to encourage interaction or to present information • Demonstrates sophisticated control over oral, visual and written formats, drawing on a range of communication practices to achieve goals • Recognises the need to alter personal communication style in response to the needs or expectations of others
Get the work done	1.1-1.5, 2.2, 2.5, 3.1-3.3	<ul style="list-style-type: none"> • Takes responsibility for planning, sequencing and prioritising tasks and own workload to achieve outcomes • Uses feedback from others, analytical and lateral thinking to review current practices and develop new ideas • Uses the main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBCOM602 Develop and create compliance requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- access and interpret information on relevant Australian and international standards
- collaborate with others to clarify the purpose and scope of the compliance requirements
- plan the compliance requirements using a suitable project methodology
- consult relevant stakeholders about compliance requirements according to the approved plan
- prepare draft recommendations on compliance requirements based on information collected during consultations
- collaborate with others to conduct a validation process on the draft compliance requirements
- document the final compliance requirements according to organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant compliance requirements
- explain methods and techniques suitable for the development and creation of compliance requirements
- outline elements of compliance program/management systems including:
 - documentation of compliance requirements relevant to the organisation
 - specification of compliance management functions, accountabilities and responsibilities within the organisation
 - compliance related management information systems
 - record keeping systems required for compliance management

- liaison procedures with relevant internal and external personnel on compliance related matters
 - breach management policies and processes including the identification, classification, investigation, rectification and reporting of breaches in compliance requirements
 - compliance reporting procedures
 - corporate induction and training processes related to compliance management
 - processes for the internal and external sharing and promotion of information on compliance requirements and a compliance program management system
 - compliance complaints handling systems
 - continuous improvement processes for compliance including monitoring, evaluation and review
 - strategies for developing a positive compliance culture within the organisation
 - techniques and performance indicators for monitoring the operation of a compliance program/management system
 - reporting processes on compliance management including reports on breaches and rectification action.
- explain relevant organisational policies and procedures including compliance plans in various compliance area and organisational standards for operations and ethics.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the compliance field of work and include access to:

- organisational policies and procedures and documentation relevant to compliance requirements
- Australian and international standards relevant to compliance requirements
- interaction with others
- computer resources and business technology
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCUS301 Deliver and monitor a service to customers

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify customer needs, deliver and monitor customer service and identify improvements in the provision of customer service.

It applies to individuals who apply a broad range of competencies in various work contexts. In this role, individuals often exercise discretion and judgement using appropriate theoretical knowledge of customer service to provide technical advice and support to customers over short or long term interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Identify customer needs	1.1 Use appropriate interpersonal skills to accurately identify and clarify customer needs and expectations 1.2 Assess customer needs for urgency to determine priorities for service delivery according to organisational and legislative requirements 1.3 Use effective communication to inform customers about available choices for meeting their needs and assist in the selection

ELEMENT	PERFORMANCE CRITERIA
	<p>of preferred options</p> <p>1.4 Identify limitations in addressing customer needs and seek appropriate assistance from designated individuals</p>
2 Deliver a service to customers	<p>2.1 Provide prompt service to customers to meet identified needs in accordance with organisational and legislative requirements</p> <p>2.2 Establish and maintain appropriate rapport with customers to ensure completion of quality service delivery</p> <p>2.3 Sensitively and courteously handle customer complaints in accordance with organisational and legislative requirements</p> <p>2.4 Provide assistance or respond to customers with specific needs according to organisational and legislative requirements</p> <p>2.5 Identify and use available opportunities to promote and enhance services and products to customers</p>
3 Monitor and report on service delivery	<p>3.1 Regularly review customer satisfaction with service delivery using verifiable evidence according to organisational and legislative requirements</p> <p>3.2 Identify opportunities to enhance the quality of service and products, and pursue within organisational and legislative requirements</p> <p>3.3 Monitor procedural aspects of service delivery for effectiveness and suitability to customer requirements</p> <p>3.4 Regularly seek customer feedback and use to improve the provision of products and services</p> <p>3.5 Ensure reports are clear, detailed and contain recommendations focused on critical aspects of service delivery</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2 2.1, 2.3, 2.4, 3.1, 3.5	<ul style="list-style-type: none"> Comprehends textual information to determine customer service requirements Proofreads texts for clarity of meaning and accuracy of grammar and punctuation

Writing	2.3, 3.5	<ul style="list-style-type: none"> Completes responses to customer complaints in required format Prepares reports using sequencing, format and words to communicate recommendations clearly and effectively
Oral Communication	1.1, 1.3, 1.4, 2.2, 2.3, 2.4	<ul style="list-style-type: none"> Provides information or advice using structure and language to suit the audience Asks questions and listens to gain information or confirm understanding
Navigate the world of work	1.2, 2.1-2.4, 3.1, 3.2	<ul style="list-style-type: none"> Recognises, understands and applies organisational policies and procedures relevant to role
Interact with others	1.1, 1.3, 1.4, 2.2, 2.3, 2.4, 3.4	<ul style="list-style-type: none"> Selects and uses appropriate communication conventions to establish connections, build rapport, seek information and develop professional working relationships Adjusts personal communication style in response to the opinions, values and particular needs of others
Get the work done	1.2, 2.3, 2.5, 3.1-3.5	<ul style="list-style-type: none"> Plans and implements systems to gather and organise information Monitor actions and progress against goals and implements adjustments as appropriate Uses problem-solving skills to analyse and respond to customer complaints or enquiries Identifies and follows up on opportunities to improve work practices and outcomes

Assessment Requirements for BSBCUS301 Deliver and monitor a service to customers

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use communication skills to establish rapport and build relationships with customers in accordance with organisational requirements
- identify customer needs using appropriate questioning and active listening skills
- provide customer service in accordance with organisational requirements
- respond to and record customer feedback and action taken according to organisational standards, policies and procedures
- produce a report which identifies and recommends ways to improve service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise key provisions of relevant legislation from all levels of government that may affect aspects of business operations
- explain organisational policy and procedures for customer service, including handling customer complaints
- provide examples of verifiable evidence that could be used to review customer satisfaction
- outline the interpersonal skills needed for serving customers, including customers with specific needs.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and technology
- workplace documents, organisational policies and procedures for customer service
- examples of customer complaints and feedback
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment conditions
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop strategies to manage organisational systems that ensure products and services are delivered and maintained to standards agreed by the organisation.

It applies to individuals who supervise the provision of quality customer service within an organisation's procedures framework by others. At this level, individuals must exercise considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Stakeholder Relations – Customer Service

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Plan to meet internal and external customer	1.1 Investigate, identify, assess, and include the needs of customers in planning processes

ELEMENT	PERFORMANCE CRITERIA
requirements	1.2 Ensure plans achieve the quality, time and cost specifications agreed with customers
2 Ensure delivery of quality products and services	2.1 Deliver products and services to customer specifications within organisation's business plan 2.2 Monitor team performance to consistently meet the organisation's quality and delivery standards 2.3 Help colleagues overcome difficulties in meeting customer service standards
3 Monitor, adjust and review customer service	3.1 Develop and use strategies to monitor progress in achieving product and/or service targets and standards 3.2 Develop and use strategies to obtain customer feedback to improve the provision of products and services 3.3 Develop, procure and use resources effectively to provide quality products and services to customers 3.4 Make decisions to overcome problems and to adapt customer services, products and service delivery in consultation with appropriate individuals and groups 3.5 Manage records, reports and recommendations within the organisation's systems and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.1, 3.2, 3.3, 3.5	<ul style="list-style-type: none"> Interprets and analyses textual information from a variety of sources and applies the knowledge that has been gained to evaluate standards for organisation's products and services
Writing	1.2, 3.1, 3.2, 3.3, 3.5	<ul style="list-style-type: none"> Produces a range of text types to convey information, requirements or recommendations matching style of writing to purpose and audience
Oral Communication	1.1, 1.2, 2.1, 2.3, 3.2	<ul style="list-style-type: none"> Clearly articulates systems and standards in a team environment using language suitable to diverse audiences Uses listening and questioning techniques to obtain

		feedback and confirm understanding
Numeracy	1.2	<ul style="list-style-type: none"> Interprets and comprehends mathematical information in organisation's business and customer service plans.
Navigate the world of work	2.1, 2.2, 3.1, 3.5	<ul style="list-style-type: none"> Recognises and applies organisational protocols and meets expectations associated with own work
Interact with others	1.1, 2.3, 3.4	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with colleagues and customers Collaborates with others, taking into account their strengths and experience, to achieve desired outcomes Provides support in field of expertise to team
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1-3.5	<ul style="list-style-type: none"> Develops and implements plans using logical processes and monitors and evaluates progress against stated goals Accepts responsibility for addressing complex or non-routine difficulties, applying problem solving processes in determining a solution. Uses digital technology to access, organise and present information in a format that meets requirements

Assessment Requirements for BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and manage organisational systems for quality customer service
- develop and review plans, policies and procedures for delivering and monitoring quality customer service
- implement policies and procedures to ensure quality customer service
- solve complex customer complaints and system problems that lead to poor customer service
- monitor and assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation relevant to customer service
- describe organisational policy and procedures for customer service including handling customer complaints
- identify service standards and best practice models
- summarise public relations and product promotion
- outline techniques for dealing with customers including customers with specific needs

- explain techniques for solving complaints including the principles and techniques involved in the management and organisation of:
 - customer behaviour
 - customer needs research
 - customer relations
 - ongoing product and/or service quality
 - problem identification and resolution
 - quality customer service delivery
 - record keeping and management methods
 - strategies for monitoring, managing and introducing ways to improve customer service relationships
 - strategies to obtain customer feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- legislation, regulations and codes of practice related to customer service
- business technology
- workplace documentation and resources
- complex customer complaints
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBDES305 Source and apply information on the history and theory of design

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to source information on design history and theory, and to apply that information in the individual's design work.

It applies to individuals who work in design and need to develop and maintain a general knowledge of design history and theory.

More complex research into design theory and design trends is covered by BSBDES602 Research global design trends and BSBDES801 Research and apply design theory.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Collect information on design history and theory	1.1 Identify and access relevant sources of information on design history and theory 1.2 Organise research material and findings for current or future use in design practice, facilitating easy access and

ELEMENT	PERFORMANCE CRITERIA
	cross-referencing
2 Apply information to own area of work	2.1 Evaluate information in the context of current design practice 2.2 Assess which aspects of information on design history and theory could be used or adapted to inform current practice 2.3 Use relevant information in a culturally appropriate way to develop an understanding of own area of work
3 Update and maintain knowledge of design trends	3.1 Identify and use opportunities to update and expand knowledge of design trends and developments 3.2 Incorporate and integrate knowledge into design activities

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 3.1	<ul style="list-style-type: none"> Identifies, interprets and evaluates information on historical and current design trends from a range of sources
Writing	1.2, 3.1	<ul style="list-style-type: none"> Notes findings and sources of information for design knowledge, trends and developments Documents information for colleagues and peers as requested
Oral Communication	1.1, 3.1	<ul style="list-style-type: none"> Asks questions to clarify information, listens to responses and shares ideas with others
Navigate the world of work	2.3	<ul style="list-style-type: none"> Understands main tasks, responsibilities and boundaries of own role
Get the work done	1.1, 1.2, 2.2, 3.2	<ul style="list-style-type: none"> Plans and implements tasks required to achieve required outcomes Contributes to new approaches within immediate work environment Takes responsibility for routine low-impact decisions within familiar situations Follows routine procedures for using digital technology to enter, store and retrieve information

		directly relevant to role

Assessment Requirements for BSBDES305 Source and apply information on the history and theory of design

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- show how the history and theory of design can be adapted and used in own professional practice
- maintain currency of theoretical and design knowledge.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise current design trends
- describe the evolution of design
- identify the organisational information practices and their application
- outline sources of information on design history and theory relevant to own design work.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to information sources on design history and theory.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES403 Develop and extend design skills and practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and extend skills as a practising designer.

It applies to individuals who work as a designer, in any industry context, either independently or employed by an organisation.

Designers must continually refine, develop and evaluate their own conceptual and technical skills. Research, experimentation and collaboration are key factors in this process.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Acquire and develop technical skills	1.1 Plan strategies to ensure the development of appropriate technical skills in design practice 1.2 Plan and use opportunities to develop and assess technical skills 1.3 Identify and use practice, feedback, discussion and evaluation

ELEMENT	PERFORMANCE CRITERIA
	<p>opportunities to continuously improve technical skills</p> <p>1.4 Develop and extend technical skills through testing capabilities of materials, tools and equipment</p> <p>1.5 Identify and use relevant media to stimulate technical and professional development</p>
2 Develop conceptual skills and ideas	<p>2.1 Engage in ongoing experimentation and exploration of different ideas and techniques</p> <p>2.2 Discuss ideas with others and apply knowledge gained to inform own work</p> <p>2.3 Use work practice to gain experience in a range of genres and interpretations</p> <p>2.4 Study the work of others to stimulate conceptual and technical skills development</p> <p>2.5 Research and share ideas across a range of design disciplines</p> <p>2.6 Identify and use a range of opportunities to develop own skills and keep informed about current design practice</p>
3 Develop own voice	<p>3.1 Explore and experiment with new ideas in making and/or interpreting design work</p> <p>3.2 Explore and use technology, where appropriate, to develop own voice and expand practice</p> <p>3.3 Demonstrate own voice through design project realisation implementation</p>
4 Evaluate own work	<p>4.1 Seek and apply constructive criticism from others to improve own work</p> <p>4.2 Evaluate own work against planned strategy for own practice</p> <p>4.3 Evaluate own work in the context of work by others to extend own practice</p> <p>4.4 Adjust work processes and practice as necessary to improve technical, conceptual and commercial outcomes</p>
5 Research work opportunities	<p>5.1 Correctly identify sources of information relating to work opportunities for designers</p> <p>5.2 Identify networks and promotional opportunities for designers which may be helpful in developing career opportunities</p> <p>5.3 Incorporate research results and information into own work and career planning</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.1-1.5, 2.2, 2.4, 2.6, 3.2, 4.1-4.3	<ul style="list-style-type: none"> Uses practical strategies to identify and implement improvements in own creative skills and technical design skills and practice
Reading	1.5, 2.4, 2.5, 5.1-5.3	<ul style="list-style-type: none"> Researches and evaluates a variety of textual information from a wide range of sources
Writing	2.5, 4.1, 5.3	<ul style="list-style-type: none"> Uses clear and specific language to document ideas, feedback and research results
Oral Communication	1.3, 2.2, 2.5, 4.1	<ul style="list-style-type: none"> Participates in a range of verbal exchanges and presentations using appropriate tone and vocabulary to suit the audience Uses active listening and questioning techniques to clarify and confirm understanding
Navigate the world of work	1.2, 1.3, 2.3, 4.1, 5.2	<ul style="list-style-type: none"> Recognises the importance of developing technical skills and of learning from feedback and self-reflection Begins to broaden areas of interest and focus, seeking new challenges and recognising that expertise can be adapted and applied in diverse contexts
Interact with others	2.5, 4.1, 5.2	<ul style="list-style-type: none"> Begins to cultivate relationships with people with the knowledge, skills and influence to provide collaborative support
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 2.3, 2.6, 3.1-3.3, 4.2, 4.4, 5.1	<ul style="list-style-type: none"> Takes responsibility for planning and implementing tasks required to achieve outcomes, including those times when interaction with others is Systematically analyses and evaluates information to aid in decision making and problem solving Applies some basic principles of lateral thinking to generate new or innovative ideas Recognises the potential of new approaches to enhance work practices and outcomes Evaluates effectiveness of decisions on how well they meet stated goals Understands key principles and concepts underpinning the design and operation of digital systems and applies these when seeking to understand the potential of new technology

Unit Mapping Information

Assessment Requirements for BSBDES403 Develop and extend design skills and practice

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use strategies to develop or extend skills, ideas and a unique voice
- adjust work processes as a result of peer feedback and self-evaluation
- research work options, networking and promotional opportunities and incorporate information into own work and career development.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list current and emerging designers in the relevant design discipline
- discuss current and emerging trends and technologies in the relevant design discipline, and the opportunities and challenges they represent
- identify professional development information and resources available to designers
- summarise sources of information relating to work opportunities and career planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to materials, resources and equipment used in the development of technical and conceptual skills in the relevant design context.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES501 Implement design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to take a design concept or solution to the implementation stage. The outcome of work could be a completed product, object, system or service, but is more likely to be a complete or partial prototype or model for the design. The focus of the unit is on a general knowledge of design techniques and processes, and practical application to a specific design context.

It applies to individuals who implement concepts and solutions in response to a design challenge in any industry context.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Organise resources for realising the design solution	1.1 Confirm the nature and scope of the proposed design solution 1.2 Research resources required for developing the design concept to implementation stage 1.3 Investigate different factors impacting the selection and use of resources 1.4 Select and prepare resources based on research and other

ELEMENT	PERFORMANCE CRITERIA
	legislative or organisational requirements
2 Test the design solution	<p>2.1 Experiment with a range of different techniques and processes to test the design solution</p> <p>2.2 Evaluate, challenge and refine testing processes</p> <p>2.3 Gain input and feedback from key stakeholders during testing</p> <p>2.4 Accurately document outcomes of testing</p> <p>2.5 Select final design solution based on outcomes of testing and input from others</p>
3 Develop prototype or model	<p>3.1 Create prototype or model based on agreed approaches</p> <p>3.2 Select and organise materials, tools and equipment, where appropriate, according to chosen design solution</p> <p>3.3 Expose model or prototype to quality checks and ongoing analysis, enhancement and refinement</p> <p>3.4 Compare completed prototype or model against identified needs and other considerations and make adjustments as required</p>
4 Present prototype or model	<p>4.1 Identify key stakeholders design should be presented to</p> <p>4.2 Select appropriate format for presentation based on nature of audience and design</p> <p>4.3 Present prototype or model to optimise clarity, conciseness and appeal</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 3.4	<ul style="list-style-type: none"> Researches and accurately interprets textual information from a wide range of sources
Writing	1.2, 1.3, 2.3, 2.4, 3.4, 4.3	<ul style="list-style-type: none"> Documents research, resource requirements and testing outcomes using appropriate language and formats
Oral Communication	1.1, 2.3, 4.3	<ul style="list-style-type: none"> Participates in a range of verbal exchanges and presentations using appropriate tone and vocabulary to suit audience

		<ul style="list-style-type: none"> • Uses active listening and questioning techniques to gain input and feedback
Numeracy	1.1-1.3, 2.4, 2.5	<ul style="list-style-type: none"> • Interprets and applies numeric information relevant to design solution • Compares numerical data gathered from testing
Navigate the world of work	1.4	<ul style="list-style-type: none"> • Understands and adheres to organisational policies, procedures and legislative requirements during planning and implementation of design solution
Interact with others	4.3	<ul style="list-style-type: none"> • Recognises importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate, with whom, why and how
Get the work done	1.1-1.4, 2.1, 2.2, 2.5, 3.1-3.4, 4.1, 4.2	<ul style="list-style-type: none"> • Sequences and schedules routine and complex activities, monitors implementation, and manages relevant communication • Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process • Makes a range of critical and non-critical decisions in relatively complex situations, taking client requirements and range of constraints into account • Creates new or innovative ideas through exploration, analysis and critical thinking

Assessment Requirements for BSBDES501 Implement design solutions

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- undertake critical analysis, testing and development of a model, prototype or aspect of a design solution to meet an identified need
- present model to key stakeholders using the most appropriate best practice methods.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the elements and principles of design and their application in relevant design context
- describe key features of the wider industry, with the economic, social and historical context for the design solution
- discuss design trends and technologies including other designs and the work of other design practitioners in the relevant context
- summarise sources of information that support the development of technical and other knowledge
- describe the technical expertise, resources, materials, tools, equipment, techniques and industry processes required for the area the design solutions are being implemented in.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- other people to reflect the collaborative nature of the design process

- resources required to test a design solution in a given industry context including materials, tools, equipment and expertise.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBDES502 Establish, negotiate and refine a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to work proactively with a client or commissioning organisation to develop and negotiate a design brief.

It applies to individuals working in any industry or design context where the designer plays a key role in determining the scope and nature of work required. Establishment, negotiation and refinement of a design brief requires the integration of highly-developed creative thinking, communication and planning skills in a process that may not be linear. Adaptability and effective responses to change and new ideas are crucial.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Design – Design Process

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Establish design requirements	1.1 Identify and make appropriate contact with relevant stakeholders for the design project, in addition to the client 1.2 Identify and source information and references relevant to the design project 1.3 Undertake critical analysis of sources and extract key information to inform the design project

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Liaise with client and other key stakeholders to determine overall objectives and parameters for the design project</p> <p>1.5 Proactively seek, review and act on information needed to inform constructive communication with client</p> <p>1.6 Build trust and respect between self and client through effective communication and demonstration of professional integrity</p>
2 Develop and refine design brief	<p>2.1 Develop concepts and ideas for inclusion in design brief, taking account of overall objectives and parameters</p> <p>2.2 Undertake own analysis of concept and challenge ideas and approaches taken to ensure responsiveness to project needs</p> <p>2.3 Present ideas in an appropriate format/medium and seek feedback from key stakeholders</p> <p>2.4 Use effective communication techniques to generate discussion, debate and critical analysis</p> <p>2.5 Re-evaluate and refine options based on own analysis and discourse with others</p> <p>2.6 Establish and agree on final nature and scope of design brief with client and accurately document details</p>
3 Negotiate terms and conditions	<p>3.1 Negotiate and agree terms and conditions of brief in accordance with relevant organisational and professional standards</p> <p>3.2 Clarify, agree and document roles and responsibilities of those involved in the project</p> <p>3.3 Confirm agreements in writing in accordance with organisational requirements</p> <p>3.4 Identify the need for specialist advice when developing formal agreements or contracts, and seek appropriate assistance</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.2, 2.5	<ul style="list-style-type: none"> Identifies and interprets textual information from

		various sources to develop ideas and concepts
Writing	1.1, 1.3-1.5, 2.1-2.3, 2.6, 3.1-3.3	<ul style="list-style-type: none"> Develops a range of documents using appropriate vocabulary, context and formatting for different audiences
Oral Communication	1.1, 1.4-1.6, 2.3, 2.4, 2.6, 3.1, 3.2	<ul style="list-style-type: none"> Participates in discussions to elicit views of others by asking questions and listening to responses Presents ideas and seeks feedback from others using appropriate tone, vocabulary and language structures
Numeracy	1.2-1.4	<ul style="list-style-type: none"> Interprets and applies numeric information relevant to design brief
Navigate the world of work	1.2, 1.3, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Identifies and adheres to organisational policies and procedures, industry standards and legislative requirements during planning and design of design solution
Interact with others	1.1, 1.4-1.6, 2.3, 2.4, 2.6, 3.1, 3.4	<ul style="list-style-type: none"> Uses appropriate communication conventions and protocols to seek information from stakeholders Uses a range of collaborative techniques to clarify and refine ideas and negotiate agreeable outcomes with others
Get the work done	1.1-1.3, 1.5, 2.1, 2.2, 2.5, 3.2	<ul style="list-style-type: none"> Sequences and schedules complex activities, monitors implementation, and manages relevant communication Applies formal problem-solving processes when responding to unpredictable issues and challenges that arise during the testing process Makes a range of critical and non-critical decisions in relatively complex situations, taking client and organisational requirements and possible constraints into account Generates new or innovative ideas or concepts through exploration, analysis and critical thinking

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Information and references relevant to the design brief must include consideration of:	<ul style="list-style-type: none"> legislative and regulatory context financial/budgetary information organisational materials technical reports/data.

Assessment Requirements for BSBDES502 Establish, negotiate and refine a design brief

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and finalise at least TWO design briefs for a specific industry purpose
- demonstrate highly-developed interpersonal skills, self-evaluation techniques and the ability to seek expert advice when required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss the legal issues that affect negotiations and contracts in the relevant work context
- explain the design process within the specific industry context/design discipline
- compare and contrast the scope, nature and potential variations that occur within design briefs relevant to a specific context
- identify sources of information to assist the development of design concepts within a specific industry context.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the design process field of work and include access to:

- appropriate equipment and media to communicate and present ideas and concepts
- sources of information relevant to industry context
- interaction with others to reflect the collaborative nature of the work, and communication and negotiation skills required.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIA301 Maintain financial records

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to maintain daily financial records such as reconciling debtors' and creditors' systems, preparing and maintaining a general ledger and trial balance and includes activities associated with monitoring cash control for accounting purposes.

It applies to individuals who are skilled operators and apply a broad range of competencies in various work contexts and may exercise discretion and judgement using appropriate theoretical knowledge of financial records.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Maintain daily financial records	<p>1.1 Correctly maintain daily financial records in accordance with organisational and legislative requirements for accounting purposes</p> <p>1.2 Identify and rectify or refer discrepancies or errors in documentation or transactions to designated persons in accordance with organisational and legislative requirements</p>

ELEMENT	PERFORMANCE CRITERIA
	1.3 Accurately credit and debit transactions and promptly enter into journals in accordance with organisational and legislative requirements
2 Maintain general ledger	2.1 Maintain general ledger in accordance with organisational and legislative requirements 2.2 Post transactions into general ledger in accordance with organisational and legislative reporting requirements 2.3 Reconcile systems for accounts payable and receivable with general ledger 2.4 Accurately prepare trial balance from general ledger in accordance with organisational and legislative requirements
3 Monitor cash control	3.1 Ensure cash flow is accurately accounted for in accordance with organisational and legislative requirements 3.2 Make and receive payments in accordance with organisational and legislative requirements 3.3 Collect or follow up outstanding accounts within designated timelines 3.4 Check payment documentation for accuracy of information and despatch to creditors within designated timeline

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1-3.4	<ul style="list-style-type: none"> Recognises and interprets numerical and textual information to determine and complete required activities
Writing	1.3, 2.1-2.4, 3.1-3.4	<ul style="list-style-type: none"> Integrates data from different sources and records numerical information in a format appropriate to context and purpose of material Prepares clear and detailed information and instructions using format, structure and tone suitable to audience
Oral	1.2, 3.2, 3.3	<ul style="list-style-type: none"> Explains financial issues and requirements clearly, using facts and examples, and uses listening and

Communication		questioning techniques to obtain sequenced instructions
Numeracy	1.1-1.3, 2.1-2.4, 3.1-3.4	<ul style="list-style-type: none"> Uses a limited range of mathematical calculations to reconcile amounts using whole numbers and decimals and arrange/compare numerical information
Navigate the world of work	1.1-1.3, 2.1-2.4, 3.1-3.3	<ul style="list-style-type: none"> Recognises, understands and monitors adherence to legislative and organisational requirements in undertaking own work
Interact with others	3.3, 3.4	<ul style="list-style-type: none"> Understands the importance of using appropriate practices and protocols when handling confidential information
Get the work done	1.1-1.3, 2.1-2.4, 3.1-3.4	<ul style="list-style-type: none"> Takes responsibility for own workload and monitors adherence to specified goals and timelines Uses digital technologies to access, record, store, organise and compile data as required

Assessment Requirements for BSBFIA301 Maintain financial records

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- maintain daily transactions and identify and respond to discrepancies and errors
- transfer and record financial data accurately
- reconcile expenditures and revenue in a timely manner.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the key provisions of relevant legislation, codes of practice and national standards that may affect financial record keeping
- discuss organisational policies and procedures relating to maintaining financial records
- define credits/creditors and debits/debtors
- describe principles of double entry bookkeeping and accrual accounting
- identify methods of presenting financial data.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer equipment and relevant software
- examples of source documents relating to financial record keeping
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIA302 Process payroll

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to process payroll from provided data using manual and computerised payroll systems.

It applies to individuals employed in a range of work environments who are responsible for payroll functions within an organisation. They may work as individuals providing administrative support within an enterprise, or may be other members of staff who have been delegated payroll responsibilities.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance – Financial Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Record payroll data	1.1 Check payroll data and clarify discrepancies with designated persons 1.2 Enter employee pay period details and any deductions and allowances in payroll system in accordance with source documents 1.3 Calculate payment due to individual employees to reflect standard pay and variations in accordance with employee source

ELEMENT	PERFORMANCE CRITERIA
	data
2 Prepare payroll	<p>2.1 Prepare payroll within designated timelines and in accordance with organisational policy and procedures</p> <p>2.2 Reconcile total wages for pay period, check or correct irregularities or refer to designated persons for resolution</p> <p>2.3 Make arrangements for payment in accordance with organisational and individual requirements</p> <p>2.4 Obtain authorisation of payroll and individual pay advice in accordance with organisational requirements</p> <p>2.5 Produce, check and store payroll records in accordance with organisational policy and security procedures</p> <p>2.6 Follow security procedures for processing payroll and for maintaining payroll records</p>
3 Handle payroll enquiries	<p>3.1 Respond to payroll enquiries in accordance with organisational and legislative requirements</p> <p>3.2 Provide information in accordance with organisational and legislative requirements</p> <p>3.3 Ensure all enquiries outside area of responsibility and knowledge are referred to designated persons for resolution</p> <p>3.4 Complete additional information or follow-up action within designated timelines in accordance with organisational policy and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.6, 3.1-3.4	<ul style="list-style-type: none"> Interprets a range of textual information to determine activities required
Writing	1.1-1.3, 2.1-2.6, 3.1-3.4	<ul style="list-style-type: none"> Accurately records textual information and maintains personal and banking details using format, language and structure in context

Oral Communication	1.1, 3.1-3.4	<ul style="list-style-type: none"> Explains financial issues clearly using terminology and tone appropriate to audience Uses questioning and listening skills in verbal exchanges to clarify information
Numeracy	1.1-1.3, 2.1, 2.2, 2.5, 3.1-3.3	<ul style="list-style-type: none"> Uses a limited range of mathematical calculations to calculate and reconcile amounts and arrange/compare numerical information
Navigate the world of work	1.2, 1.3, 2.1, 2.3-2.6, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> Adheres to legislative requirements and organisational policies and procedures relevant for own work
Interact with others	1.1, 2.2, 3.1-3.3	<ul style="list-style-type: none"> Selects the appropriate mode of communication for a specific purpose Collaborates with others to achieve predetermined goals
Get the work done	1.1-1.3, 2.1-2.6, 3.2, 3.4	<ul style="list-style-type: none"> Takes responsibility for own workload and monitors adherence to specified goals and timelines Recognises and takes responsibility for resolving problems relevant to own role Takes responsibility for routine low-impact decisions within familiar situations Uses digital technologies to access, record, store, organise and compile data as required

Assessment Requirements for BSBFIA402 Report on financial activity

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- organise and present financial data including budget variances, budgets and forecasts, cash flow/profit reports, balance sheets, financial year reports, operating statements, expenditure and receipts and profit and loss statements to highlight relevant features and meet workplace requirements
- use conversion and consolidation procedures such as moving averages, standardised variables, trend analysis and unit costs
- identify, resolve or refer discrepancies such as absence of auditable trail, expenditure report mismatches, incorrect payments and unreconciled cash flows
- record income and expenditure to meet statutory requirements
- calculate liabilities for tax including completing Business Activity Statements
- provide financial business recommendations
- apply knowledge of relevant legislation and regulations
- perform double entry bookkeeping and accrual accounting.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the key provisions of legislation, regulation and codes of practice relevant to financial operations
- describe the techniques used for forecasting and analysis
- identify the options, methods and practices for deductions, benefits and depreciations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial administration field of work and include access to:

- office equipment and resources
- computer with relevant software
- examples of financial data, reports and documents
- workplace financial policies and procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to undertake financial management within a work team in an organisation. It includes planning and implementing financial management approaches, supporting team members whose role involves aspects of financial operations, monitoring and controlling finances and reviewing and evaluating effectiveness of financial management processes.

It applies to managers in a wide range of organisations and sectors who have responsibility for ensuring that work team financial resources are used effectively and are managed in line with financial objectives of the team and organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Finance - Financial Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Plan financial management approaches	1.1 Access budget/financial plans for the work team 1.2 Clarify budget/financial plans with relevant personnel within the organisation to ensure that documented outcomes are achievable, accurate and comprehensible 1.3 Negotiate any changes required to be made to budget/financial

ELEMENT	PERFORMANCE CRITERIA
	plans with relevant personnel within the organisation 1.4 Prepare contingency plans in the event that initial plans need to be varied
2 Implement financial management approaches	2.1 Disseminate relevant details of the agreed budget/financial plans to team members 2.2 Provide support to ensure that team members can competently perform required roles associated with the management of finances 2.3 Determine and access resources and systems to manage financial management processes within the work team
3 Monitor and control finances	3.1 Implement processes to monitor actual expenditure and to control costs across the work team 3.2 Monitor expenditure and costs on an agreed cyclical basis to identify cost variations and expenditure overruns 3.3 Implement, monitor and modify contingency plans as required to maintain financial objectives 3.4 Report on budget and expenditure in accordance with organisational protocols
4 Review and evaluate financial management processes	4.1 Collect and collate for analysis, data and information on the effectiveness of financial management processes within the work team 4.2 Analyse data and information on the effectiveness of financial management processes within the work team and identify, document and recommend any improvements to existing processes 4.3 Implement and monitor agreed improvements in line with financial objectives of the work team and the organisation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.1-3.4, 4.2, 4.3	<ul style="list-style-type: none"> Interprets and analyses information to determine activities required

Writing	1.1, 1.4, 4.1-4.3	<ul style="list-style-type: none"> Records information in correct forms and prepares materials which convey detailed and factual content in accordance with internal procedures
Oral Communication	1.2, 1.3, 2.1-2.3	<ul style="list-style-type: none"> Presents information about financial issues and requirements to a range of audiences using structure and language to suit the audience Uses active listening and questioning to clarify information and to confirm understanding
Numeracy	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.1-4.3	<ul style="list-style-type: none"> Uses a wide range of mathematical calculations to analyse numeric information in budgets or financial plans
Navigate the world of work	2.2, 3.3, 3.4, 4.3	<ul style="list-style-type: none"> Recognises, understands and adheres to organisational requirements in undertaking own work
Interact with others	1.2, 1.3, 2.1, 2.2, 3.1, 2.3, 4.2, 4.3	<ul style="list-style-type: none"> Uses a range of strategies to connect, collaborate and cooperate with other work colleagues in activities requiring collective effort and diverse skills and knowledge
Get the work done	1.1, 1.4, 2.3, 3.1-3.4, 4.1-4.3	<ul style="list-style-type: none"> Uses logical processes in planning, implementing and evaluating complex tasks and developing alternative strategies in achieving goals and timelines Uses a range of digital technologies to access, filter, compile, integrate and logically present complex information from multiple sources

Assessment Requirements for BSBFIM501 Manage budgets and financial plans

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use financial skills to work with and interpret budgets, ageing summaries, cash flow, petty cash, Goods and Services Tax (GST), and profit and loss statements
- communicate with relevant people to clarify budget/financial plans, negotiate changes and disseminate information
- prepare, implement and modify financial contingency plans
- monitor expenditure and control costs
- support and monitor team members
- report on budget and expenditure
- review and make recommendations for improvements to financial processes
- meet record keeping requirements for the Australian Taxation Office (ATO) and for auditing purposes.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe basic accounting principles
- identify and explain the relevant legislation and current requirements of the Australian Taxation Office, including the Goods and Services Tax (GST)
- explain the key requirements for financial record keeping and auditing
- describe the principles and techniques involved in managing:
 - budgeting
 - cash flows
 - electronic spreadsheets

- GST
- ledgers and financial statements
- profit and loss statements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial management field of work and include access to:

- resources and documentation used in the workplace
- workplace policies and procedures
- workplace budgets and financial plans
- business technology
- case studies and, where available, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBHRM405 Support the recruitment, selection and induction of staff

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to execute tasks associated with the recruitment cycle and apply in-depth knowledge of the work of the organisation, and how recruitment and selection practices fit with other human resources functions.

This unit applies to individuals who support recruitment, selection and induction functions under the direction of a human resource manager.

No licensing, legislative, or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Human Resource Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Plan for recruitment	1.1 Obtain approval to fill position, clarify time lines and requirement for appointment 1.2 Assist in preparing job descriptions that accurately reflect the role requirements, according to organisational policies and procedures, legislation, codes, national standards and work health and safety (WHS) considerations 1.3 Consult with relevant personnel about job descriptions and

ELEMENT	PERFORMANCE CRITERIA
	<p>workforce strategy</p> <p>1.4 Assist in ensuring that job descriptions comply with legislative requirements and reflect the organisation's requirements for a diverse workforce</p> <p>1.5 Obtain approvals to advertise position</p>
2 Plan for selection	<p>2.1 Choose appropriate channels and technology to advertise vacancies and/or identify potential talent pool</p> <p>2.2 Advertise vacancies for staffing requirements according to organisational policies and procedures</p> <p>2.3 Consult with relevant personnel to convene selection panel and develop interview questions</p> <p>2.4 Assist in ensuring that interview questions comply with legislative requirements</p> <p>2.5 Assist in short-listing applicants</p> <p>2.6 Schedule interviews and advise relevant people of times, dates and venues</p>
3 Support selection process	<p>3.1 Participate in interview process and assess candidates against agreed selection criteria</p> <p>3.2 Discuss assessment with other selection panel members</p> <p>3.3 Correct biases and deviations from agreed procedures and negotiate for preferred candidate</p> <p>3.4 Contact referees for referee reports</p> <p>3.5 Prepare selection report and make recommendations to senior personnel for appointment</p> <p>3.6 Advise unsuccessful candidates of outcomes and respond to any queries</p> <p>3.7 Secure preferred candidate's agreement</p> <p>3.8 Complete necessary documentation according to organisational procedures, observing confidentiality and privacy requirements</p>
4 Induct successful candidate	<p>4.1 Provide successful candidate with employment contract and other documentation</p> <p>4.2 Advise manager and work team of new appointment</p> <p>4.3 Advise managers and staff of candidate's starting date and make necessary administrative arrangements for pay and employee record keeping</p> <p>4.4 Arrange successful candidate's induction according to</p>

ELEMENT	PERFORMANCE CRITERIA
	organisational policy

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.4, 2.4, 2.5	<ul style="list-style-type: none"> Synthesises ideas, concepts and specific information from workplace and regulatory texts to inform development of workplace documents Evaluates information to make judgements
Writing	1.1, 1.2, 1.5, 2.2, 3.5, 3.6, 3.8, 4.2, 4.3	<ul style="list-style-type: none"> Produces a range of text types using specific information, workplace conventions and templates
Oral communication	1.1, 1.3, 1.5, 2.3, 2.5, 3.1-3.5, 3.7	<ul style="list-style-type: none"> Asks questions and listens carefully to gather, interpret or evaluate information Uses appropriate vocabulary to present ideas or persuasive arguments
Navigate the world of work	1.2, 1.4, 2.4, 3.3, 3.8, 4.1, 4.4	<ul style="list-style-type: none"> Applies workplace protocols, legislation or regulations relevant to own responsibilities
Interact with others	1.3, 2.3, 3.2, 3.3	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with personnel, candidates or referees Participates in conversations relevant to role responding, explaining, negotiating and persuading as required

Assessment Requirements for BSBHRM405 Support the recruitment, selection and induction of staff

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare job descriptions
- use job descriptions to support sourcing, selecting and appointing suitable staff
- use different advertising channels to promote vacancies and/or establish a potential talent pool
- consult with managers to gain approvals
- develop selection criteria and interview questions in consultation with relevant personnel
- schedule interviews and advise relevant people of times, dates and venues
- participate in interviews and other selection techniques including assessing candidates against selection criteria to short list them
- obtain referees' reports
- prepare and distribute a selection report including feedback to give unsuccessful candidates
- advise unsuccessful candidates of the results
- secure preferred candidate's agreement and provide an employment contract
- advise other staff of the successful candidate and arrange induction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify documentation required for recruitment, selection and induction
- explain human resources life cycle and the place of recruitment and selection
- identify legislation relevant to recruitment, selection and induction of staff
- describe channels and technology to advertise vacancies

- explain a range of interviewing techniques and other selection processes and their application.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- workplace policies and procedures
- business technology
- position descriptions
- legislation, regulations, Codes and Standards relevant to staff recruitment, selection and induction
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBHRM506 Manage recruitment selection and induction processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage all aspects of recruitment selection and induction processes in accordance with organisational policies and procedures.

It applies to individuals or human resource personnel who take responsibility for managing aspects of selecting new staff and orientating those staff in their new positions. It is not assumed that the individual will be directly involved in the selection processes themselves, although this may well be the case.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Human Resource Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Develop recruitment, selection and induction policies and procedures	1.1 Analyse strategic and operational plans and policies to identify relevant policies and objectives 1.2 Develop recruitment, selection and induction policies and procedures and supporting documents 1.3 Review options for technology to improve efficiency and effectiveness of recruitment and selection process

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Obtain support for policies and procedures from senior managers</p> <p>1.5 Trial forms and documents supporting policies and procedures and make necessary adjustments</p> <p>1.6 Communicate policies and procedures to relevant staff and provide training if required</p>
2 Recruit and select staff	<p>2.1 Determine future human resource needs in collaboration with relevant managers and sections</p> <p>2.2 Ensure current position descriptors and person specifications for vacancies are used by managers and others involved in recruitment, selection and induction processes</p> <p>2.3 Provide access to training and other forms of support to all persons involved in recruitment and selection process</p> <p>2.4 Ensure advertising of vacant positions complies with organisational policy and legal requirements</p> <p>2.5 Utilise specialists where necessary</p> <p>2.6 Ensure selection procedures are in accordance with organisational policy and legal requirements</p> <p>2.7 Ensure processes for advising applicants of selection outcome are followed</p> <p>2.8 Ensure job offers and contracts of employment are executed promptly, and new appointments are provided with advice about salary, terms and conditions</p>
3 Manage staff induction	<p>3.1 Provide access to training and ongoing support for all persons engaged in staff induction</p> <p>3.2 Check induction processes are followed across the organisation</p> <p>3.3 Oversee management of probationary employees and provide them with feedback until their employment is confirmed or terminated</p> <p>3.4 Obtain feedback from participants and relevant managers on extent induction process is meeting its objectives</p> <p>3.5 Make refinements to induction policies and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.2, 2.4, 2.6, 2.7	<ul style="list-style-type: none"> Critically evaluates and applies content from a range of complex texts to determine legislative and business requirements
Writing	1.2-1.6, 2.1, 3.3-3.5	<ul style="list-style-type: none"> Demonstrates clear writing skills by selecting appropriate conventions and to express precise meaning relevant to context and audience
Oral Communication	1.4, 1.6, 2.1, 2.3, 3.3, 3.4	<ul style="list-style-type: none"> Draws on a repertoire of open questioning and active listening when seeking feedback from others Uses appropriate terminology and non-verbal features to present information and clarify understanding
Numeracy	2.8	<ul style="list-style-type: none"> Analyses numerical information to determine employees' remuneration packages Makes basic calculations to ensure work output is delivered in a timely manner
Navigate the world of work	1.1, 1.2, 1.5, 1.6, 2.4, 2.6	<ul style="list-style-type: none"> Understands and adheres to relevant organisational policies and procedures Develops or updates organisational policies to meet organisational objectives Considers own role in terms of its contribution to broader goals of work environment
Interact with others	1.4, 1.6, 2.1-2.3, 2.5, 2.7, 2.8, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Seeks expert advice and skills training where required Selects appropriate mode of communication for a specific purpose relevant to own role Uses effective communication skills to liaise with a range of people across the organisation
Get the work done	1.1-1.3, 1.5, 1.6, 2.1, 2.3, 2.7, 2.8, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> Plans and implements tasks required to deliver timely outcomes, negotiating some key aspects with others Monitors implementation of plans and adjusts as necessary Considers whether and how often others should be involved, using consultative or collaborative processes as an integral part of the decision-making process Analyses outcomes of decisions to identify improvement opportunities Actively identifies systems, devices and applications with potential to meet current and future needs

Assessment Requirements for BSBHRM506 Manage recruitment selection and induction processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop or critically analyse a policy and procedures framework for recruitment, selection and induction
- identify the need for recruitment
- prepare and oversee appropriate documentation required for recruitment
- select and advise job applicants appropriately
- manage the induction process
- comply with relevant legislation and organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe recruitment and selection methods, including assessment centres
- explain the concept of outsourcing
- describe the purpose of employee contracts and industrial relations
- summarise relevant legislation, regulations, standards and codes of practice that may affect recruitment, selection and induction
- explain why terms and conditions of employment are an important aspect of recruitment
- explain the relevance of psychometric and skills testing programs to recruitment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- an appropriate range of documentation and resources normally used in the workplace
- relevant organisational policies and procedures
- relevant legislation, regulations and codes of practice
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM201 Process and maintain workplace information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to collect, process and store, and maintain workplace information and systems. It also includes the maintenance of filing and records systems.

It applies to individuals who perform a range of routine tasks in the workplace, using a limited range of practical skills and fundamental knowledge of information and information systems in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Collect information	1.1 Collect information in a timely manner and ensure it is relevant to organisational needs 1.2 Use business equipment/technology available in the work area to effectively obtain information 1.3 Apply organisational requirements relating to security and confidentiality in handling information

ELEMENT	PERFORMANCE CRITERIA
2 Process workplace information	<p>2.1 Use business equipment/technology to process information in accordance with organisational requirements</p> <p>2.2 Process information in accordance with defined timeframes, guidelines and procedures</p> <p>2.3 Update, modify and file information in accordance with organisational requirements</p> <p>2.4 Collate and despatch information in accordance with specified timeframes and organisational requirements</p>
3 Maintain information systems	<p>3.1 Maintain information and filing systems in accordance with organisational requirements</p> <p>3.2 Identify, remove and/or relocate inactive or dead files in accordance with organisational requirements</p> <p>3.3 Establish and assemble new files in accordance with organisational requirements</p> <p>3.4 Update reference and index systems in accordance with organisational requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.4, 3.1-3.4	<ul style="list-style-type: none"> Recognises and interprets textual information to complete tasks according to organisational requirements
Writing	1.3, 2.1-2.4, 3.4	<ul style="list-style-type: none"> Records simple and routine content using an established format to organise information
Oral Communication	1.1, 1.2	<ul style="list-style-type: none"> Uses listening and questioning skills to clarify and adhere to requirements
Numeracy	2.2, 2.4, 3.4	<ul style="list-style-type: none"> Comprehends basic mathematical measurements relating to times and number sequences
Navigate the world of work	1.3, 2.1, 2.3, 2.4, 3.1-3.4	<ul style="list-style-type: none"> Recognises organisational procedures and understands relevance of legislative requirements
Get the work	1.1-1.3, 2.1, 2.2, 2.4,	<ul style="list-style-type: none"> Follows clearly defined instructions and monitors own

done	3.1-3.3	progress to achieve timelines <ul style="list-style-type: none"> • Solves problems directly related to tasks, and makes low-impact decisions • Uses digital technologies following instructions regarding data entry and retrieval

BSBINM401 Implement workplace information system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement and review the workplace information system. It involves the identification, acquisition, initial analysis and use of appropriate information which plays a significant part in the organisation's effectiveness.

It applies to individuals whose work will normally be carried out within routine and non-routine methods and procedures which require planning and evaluation, leadership and guidance of others, and some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Identify and source information needs	1.1 Determine and locate information required by teams 1.2 Acquire and review information held by the organisation to determine suitability, accessibility, currency and reliability according to organisational policies
2 Collect, analyse and report information	2.1 Collect information, which is adequate and relevant to the needs of teams, in a timely manner

ELEMENT	PERFORMANCE CRITERIA
	<p>2.2 Ensure information is in a format suitable for analysis, interpretation and dissemination</p> <p>2.3 Analyse information to identify and report relevant trends and developments in terms of the needs for which it was acquired</p>
3 Implement information systems	<p>3.1 Implement management information systems effectively to store, retrieve and regularly review data for decision making purposes</p> <p>3.2 Use technology available in the work area to manage information effectively</p> <p>3.3 Submit recommendations for improving the information system to designated persons and/or groups</p>
4 Prepare for information system changes	<p>4.1 Collect information about information system future needs in consultation with colleagues, including those who have a specialist role in resource management</p> <p>4.2 Ensure estimates of information system future needs reflect the organisation's business plans, and customer and supplier requirements</p> <p>4.3 Support proposals to secure resources by clearly presenting submissions that describe realistic options, benefits, costs and outcomes</p> <p>4.4 Prepare team members to work with new technology and information system changes</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.3, 4.4	<ul style="list-style-type: none"> Critically analyses complex documentation from a variety of sources and consolidates information relating to specific criteria to determine requirements
Writing	1.2, 2.1, 2.3, 3.1, 3.3, 4.1, 4.2, 4.3, 4.4	<ul style="list-style-type: none"> Develops material for a specific audience using clear and detailed language in order to convey explicit information, requirements and recommendations
Oral	1.1, 3.3, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> Uses active listening and questioning and reading of verbal and non-verbal signals to convey and clarify

Communication		information and to confirm understanding
Numeracy	4.1-4.3	<ul style="list-style-type: none"> Selects from and uses a variety of developing mathematical and problem solving strategies to ensure estimates of information reflect the business plan and staff requirements
Navigate the world of work	1.2	<ul style="list-style-type: none"> Takes responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation
Interact with others	1.1, 3.3, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with clients and co-workers in a range of work contexts Cooperates with others and contributes to work practices where joint outcomes are expected and deadlines are to be met
Get the work done	1.1, 1.2, 2.1, 2.3, 3.1, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> Takes responsibility for planning, sequencing and prioritising tasks and own workload for efficiency and effective outcomes Contributes to continuous improvement of current work practices by applying basic principles of analytical thinking Uses familiar digital technologies and systems to access, enter, present and communicate data and information

Assessment Requirements for BSBINM401 Implement workplace information system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify, source and analyse information to determine
 - information system needs
 - whether it is fit for purpose
 - trends and developments
- implement and review the workplace information system
- review a workplace information system and prepare and present a submission recommending improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the information systems that are, or should be, available in the workplace
- explain the information management systems and technology typically associated with the workplace including:
 - budgets and financial management systems
 - customer information software or records
 - databases
 - personal digital assistant (PDA)
 - product and service information
 - project management software
 - record management systems
 - spreadsheets.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- business technology
- a workplace information system
- workplace policies and procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU203 Communicate electronically

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to send, receive and manage electronic mail (email), as well as collaborate online using chat rooms, intranets and instant messaging.

It applies to individuals who use business technology to perform a range of routine tasks to communicate with co-workers, customers or others. The individual will use a limited range of practical skills and fundamental knowledge in a defined context under direct supervision or with limited individual responsibility.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement procedures to send and receive electronic mail	1.1 Login to software for sending and receiving email in accordance with organisational requirements 1.2 Check outgoing email for accuracy and ensure any required attachments are prepared, in accordance with organisational and service provider requirements 1.3 Identify urgent, confidential, personal, suspicious or potentially dangerous email and take appropriate action

ELEMENT	PERFORMANCE CRITERIA
	1.4 Deal with returned email in accordance with organisational policies and procedures
2. Manage electronic mail	<p>2.1 Set security levels and/or filters for incoming email in accordance with organisational requirements</p> <p>2.2 Create and maintain individual mailboxes in accordance with organisational requirements</p> <p>2.3 Store email and/or attachments in accordance with organisational requirements</p> <p>2.4 Empty inboxes and archive or permanently delete in accordance with organisational requirements</p> <p>2.5 Prepare and maintain electronic mailing lists in accordance with organisational requirements</p>
3. Collaborate online	<p>3.1 Identify software to be used in collaboration</p> <p>3.2 Ensure online collaboration is undertaken in accordance with organisational policy, procedures and net etiquette (netiquette)</p> <p>3.3 Respond to posts or communications in accordance with agreed parameters, organisational requirements and netiquette</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 2.1-2.5, 3.2, 3.3	<ul style="list-style-type: none"> Recognises textual information within different materials and interprets information to determine requirements as well as confirming accuracy of content
Writing	1.1, 2.2, 2.5, 3.2, 3.3	<ul style="list-style-type: none"> Records key information relevant to requirements and prepares simple correspondence using basic punctuation, text and correct spelling
Oral Communication	1.4	<ul style="list-style-type: none"> Obtains information through listening and questioning and uses clear and appropriate language suitable to audience
Navigate the world of work	1.1, 1.2, 1.4, 2.1-2.5, 3.2, 3.3	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role

Get the work done	1.3	<ul style="list-style-type: none"> Recognises and responds to routine problems in context of own work

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow organisational and service provider requirements when communicating electronically
- follow organisational policy and procedures when managing all aspects of electronic communication
- comply with netiquette
- collaborate in accordance with agreed parameters for electronic communication
- identify most appropriate software applications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify different methods of electronic communication
- outline key provisions of relevant legislation that affect aspects of business operations
- outline relevant organisation policies and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- organisational policies and procedures
- relevant legislation
- relevant workplace documentation and resources
- industry software packages.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU304 Produce spreadsheets

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop spreadsheets through the use of spreadsheet software.

It applies to individuals employed in a range of environments who tend to be personally responsible for designing and working with spreadsheets under minimal supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare resources	1.1 Adhere to ergonomic, work organisation and occupational health and safety requirements 1.2 Use energy and resource conservation techniques to minimise wastage 1.3 Identify spreadsheet task requirements in relation to data entry, storage, output and presentation
2. Plan spreadsheet design	2.1 Ensure spreadsheet design suits purpose, audience and information requirements of task

ELEMENT	PERFORMANCE CRITERIA
	<p>2.2 Ensure spreadsheet design enhances readability and appearance, and meets organisational and task requirements for style and layout</p> <p>2.3 Use style sheets and automatic functions to ensure consistency of design and layout</p>
3. Create spreadsheet	<p>3.1 Ensure data is entered, checked and amended to maintain consistency of design and layout, in accordance with organisational and task requirements</p> <p>3.2 Format spreadsheet using software functions to adjust page and cell layout to meet information requirements, in accordance with organisational style and presentation requirements</p> <p>3.3 Ensure formulae are tested and used to confirm output meets task requirements, in consultation with appropriate personnel as required</p> <p>3.4 Use manuals, user documentation and online help to overcome problems with spreadsheet design and production</p>
4. Produce simple charts	<p>4.1 Select chart type and design that enables valid representation of numerical data, and meets organisational and task requirements</p> <p>4.2 Create charts using appropriate data range in spreadsheet</p> <p>4.3 Modify chart type and layout using formatting features</p>
5. Finalise spreadsheets	<p>5.1 Preview, adjust and print spreadsheet and any accompanying charts, in accordance with task requirements</p> <p>5.2 Ensure data input meets designated timelines and organisational requirements for speed and accuracy</p> <p>5.3 Name and store spreadsheet in accordance with organisational requirements and exit application without data loss/damage</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.2, 3.1-3.4, 5.1	<ul style="list-style-type: none"> Recognises and interprets numerical and textual information to determine organisational and task

		requirements
Writing	2.1, 3.1-3.3, 4.2, 4.3, 5.1-5.3	<ul style="list-style-type: none"> Inputs numerical and key reporting information when creating and finalising spreadsheets and uses format, layout, style guides and standard naming conventions to organise data according to purpose and audience
Oral Communication	3.3	<ul style="list-style-type: none"> Participates in exchange of information to determine whether formulae utilised produce result required
Numeracy	4.1, 4.2	<ul style="list-style-type: none"> Uses mathematical equations to create simple formulae and validate numerical data
Navigate the world of work	1.1-1.3, 2.1-2.3, 3.1-3.3, 4.1, 5.1-5.3	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	3.3	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes
Get the work done	2.1-2.3, 3.1-3.4, 4.1-4.3, 5.1-5.3	<ul style="list-style-type: none"> Uses advanced features within applications to address routine and complex work tasks

Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- design spreadsheets that address a range of data and organisational requirements
- use software functions, graphics and support materials to create spreadsheets
- apply knowledge of formatting requirements for workplace documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe formatting requirements of workplace documents
- identify organisational guidelines on spreadsheet design and use
- explain organisational requirements for ergonomic standards, work periods and breaks, and conservation techniques.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- industry software packages
- computer user information
- relevant legislation and codes of practice
- organisational policies and procedures
- relevant workplace documentation and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU306 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design and produce various business documents and publications. It includes selecting and using a range of functions on a variety of computer applications.

It applies to individuals who possess fundamental skills in computer operations and keyboarding. They may exercise discretion and judgement using appropriate theoretical knowledge of document design and production to provide technical advice and support to a team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and prepare resources	1.1 Select and use appropriate technology and software applications to produce required business documents 1.2 Select layout and style of publication according to information and organisational requirements 1.3 Ensure document design is consistent with company and/or client requirements, using basic design principles

ELEMENT	PERFORMANCE CRITERIA
	1.4 Discuss and clarify format and style with person requesting document/publication
2. Design document	2.1 Identify, open and generate files and records according to task and organisational requirements 2.2 Design document to ensure efficient entry of information and to maximise presentation and appearance of information 2.3 Use a range of functions to ensure consistency of design and layout 2.4 Operate input devices within designated requirements
3. Produce document	3.1 Complete document production within designated timelines according to organisational requirements 3.2 Check document produced to ensure it meets task requirements for style and layout 3.3 Store document appropriately and save document to avoid loss of data 3.4 Use manuals, training booklets and/or help-desks to overcome basic difficulties with document design and production
4. Finalise document	4.1 Proofread document for readability, accuracy and consistency of language, style and layout prior to final output 4.2 Make any modifications to document to meet requirements 4.3 Name and store document in accordance with organisational requirements and exit application without data loss/damage 4.4 Print and present document according to requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.2, 3.2, 3.4, 4.1	<ul style="list-style-type: none"> Recognises and interprets textual information from a range of sources to determine and adhere to requirements Applies strategies to self-correct and verify clarity and conformity of information

Writing	2.2, 2.3, 3.1, 4.2, 4.3	<ul style="list-style-type: none"> Develops documents using required format, accurate spelling and grammar and terminology specific to requirements Organises content to support purposes and audience of material, using clear and logical language
Oral Communication	1.4	<ul style="list-style-type: none"> Confirms requirements with relevant personnel using specific terminology and listening and questioning techniques
Navigate the world of work	1.2, 1.3, 2.1, 2.4, 3.1, 3.2, 4.2-4.4	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.4	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating in a range of familiar work contexts
Get the work done	1.1-1.3, 2.1-2.4, 3.1-3.4, 4.1-4.4	<ul style="list-style-type: none"> Uses basic features and functions within applications to access, store, organise data and perform routine work tasks

Assessment Requirements for BSBITU306 Design and produce business documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- select appropriate technology and software for design and production of business documents
- adhere to organisational requirements when:
 - selecting layout and style
 - opening and generating files
 - producing documents within designated timelines
 - naming and storing documents
 - printing and presenting documents
- adhere to task requirements when producing documents including:
 - applying basic design principles
 - applying consistent formatting
 - using appropriate styles
 - using correct layouts
 - proofreading as required
- use appropriate data storage options
- apply knowledge of functions and features of contemporary computer applications
- print and present completed documents.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify appropriate technology for production requirements

- describe functions and features of contemporary computer applications
- outline organisational policies, plans and procedures
- list organisational requirements for document design e.g. style guide.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- office equipment and resources
- relevant software applications
- examples of style guides
- organisational procedures.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU401 Design and develop complex text documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design and develop business documents using complex technical features of word processing software.

It applies to individuals who work in a range of business environments and have skills which may be applied in the provision of administrative support within an enterprise, or by technical/knowledge experts responsible for producing their own word processed documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to produce word processed documents	1.1 Use safe work practices to ensure ergonomic, work organisation, energy and resource conservation requirements are met 1.2 Identify document purpose, audience and presentation requirements, and clarify with relevant personnel as required 1.3 Identify organisational requirements for text-based business documents to ensure consistency of style and image 1.4 Evaluate complex technical functions of software for its

ELEMENT	PERFORMANCE CRITERIA
	<p>usefulness in fulfilling requirements of the task</p> <p>1.5 Match document requirements with software functions to provide efficient production of documents</p>
2. Design complex documents	<p>2.1 Design document structure and layout to suit purpose, audience and information requirements of task</p> <p>2.2 Design document to enhance readability and appearance, and to meet organisational and task requirements for style and layout</p> <p>2.3 Use complex software functions to enable efficient manipulation of information and other material, and ensure consistency of design and layout</p> <p>2.4 Use manuals, user documentation and online help to overcome problems with document design and production</p>
3. Add complex tables and other data	<p>3.1 Insert a standard table into document, changing cells to meet information requirements</p> <p>3.2 Format rows and columns as required</p> <p>3.3 Insert images and other data, formatting as required</p>
4. Produce documents	<p>4.1 Use complex operations to develop documents, and achieve required results</p> <p>4.2 Preview, adjust and print documents in accordance with organisational and task requirements</p> <p>4.3 Name and store documents in accordance with organisational requirements and exit application without information loss/damage</p> <p>4.4 Prepare documents within designated timelines and for speed and accuracy</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.2, 2.4, 4.3, 4.4	<ul style="list-style-type: none"> Recognises and interprets textual information from a range of resources to determine and confirm requirements and to assist with document issues

Writing	2.1-2.4, 3.3, 4.2-4.4,	<ul style="list-style-type: none"> Develops material using required format and incorporating technical functions to meet business needs
Oral Communication	1.2	<ul style="list-style-type: none"> Uses specific and relevant language to confirm understanding of requirements and listens carefully to verbal instructions and discussions
Numeracy	1.4, 3.3	<ul style="list-style-type: none"> Recognises and inputs numerical information according to requirements
Navigate the world of work	1.1-1.3, 1.5, 2.1-2.3, 3.1-3.3, 4.1-4.4	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.2	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes
Get the work done	1.4, 1.5, 2.1-2.4, 3.1-3.3, 4.1-4.4	<ul style="list-style-type: none"> Applies formal processes when planning more complex/unfamiliar tasks, producing plans with logically sequenced steps Uses advanced features within applications to access, store, organise data and perform routine and complex work tasks

Assessment Requirements for BSBITU401 Design and develop complex text documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow organisational and safe work practices including:
 - ergonomic requirements
 - energy and resource conservation techniques
- adhere to organisational requirements for:
 - producing documents within designated timelines
 - naming and storing documents
- adhere to task requirements when producing complex documents including:
 - using appropriate styles and layout consistently throughout the document
 - using correct formatting and document structure
- resolve issues by referring to user documentation and online help
- use appropriate data storage options
- apply knowledge of complex operation and functions of industry software applications
- communicate with relevant personal.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline various formatting styles and their effect on formatting, readability and appearance of documents
- explain organisational requirements for ergonomics, work periods and breaks, and conservation techniques
- describe purpose and contents of an organisational style guide.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- organisational policies and procedures
- relevant workplace documentation and resources
- industry software packages and user instructions.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBITU404 Produce complex desktop published documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to design and produce complex desktop published documents.

This unit applies to individuals employed in a range of work environments who require well-developed skills in desktop publishing. They may be individuals providing administrative support within an enterprise, or others responsible for production of their own documents.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Information and Communications Technology – IT Use

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare to produce desktop published documents	1.1 Use safe work practices including addressing ergonomic requirements and using work organisation strategies 1.2 Use energy and resource conservation techniques 1.3 Identify document purpose, audience, presentation and final output requirements, and clarify with relevant personnel as required 1.4 Identify organisational and task requirements for desktop

ELEMENT	PERFORMANCE CRITERIA
	published documents to ensure consistency of style and image
2. Design desktop published documents	<p>2.1 Design document to enhance readability and appearance, according to organisational and task requirements</p> <p>2.2 Determine document type and assess production and design requirements</p> <p>2.3 Set up and use master pages, templates and styles to ensure consistency of design and layout</p> <p>2.4 Set up colour palettes according to organisational and task requirements</p>
3. Create desktop published documents	<p>3.1 Prepare, format and enter required text</p> <p>3.2 Import text from other applications and resolve any formatting issues</p> <p>3.3 Scan or import graphics from other applications and resolve any formatting issues</p> <p>3.4 Use complex software functions to arrange text and graphics on page, according to organisational and task requirements</p>
4. Finalise desktop published documents	<p>4.1 Ensure pages and combined graphics and text are composed correctly, to suit organisational and task requirements</p> <p>4.2 Check numerical sequencing and layout of document is correct, to meet binding and finishing requirements</p> <p>4.3 Incorporate bleed allowance in margins and borders</p>
5. Produce desktop published documents	<p>5.1 Review text for possible errors and omissions, and resolve any issues</p> <p>5.2 Produce completed document in line with required final output</p> <p>5.3 Name and store text documents, in accordance with organisational requirements and exit application without information loss/damage</p> <p>5.4 Prepare text documents within designated timelines and organisational requirements for speed and accuracy</p> <p>5.5 Use manuals, user documentation and online help to overcome problems with document design and production</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.4, 2.1, 2.2, 3.1-3.4, 4.1, 4.2, 4.5, 5.1, 5.2	<ul style="list-style-type: none"> Evaluates and integrates information and ideas to construct meaning, to design, set up and create a published document, and review final document for possible errors and other issues
Writing	2.1, 2.2, 3.1-3.4, 5.1-5.5	<ul style="list-style-type: none"> Communicates relationships between ideas and information in a style appropriate to audience and purpose in accordance with organisational and task requirements
Oral Communication	1.3, 1.4	<ul style="list-style-type: none"> Uses everyday language and listens to short specific instructions to clarify document purpose, audience and presentation requirements with appropriate personnel
Numeracy	4.2, 4.3	<ul style="list-style-type: none"> Uses basic numeracy calculations to deal with margin bleeding and arranges sequential numerical information during process of finalising document.
Navigate the world of work	1.1, 1.3, 1.4, 2.1-2.4, 3.4, 4.1, 4.2, 5.2-5.4	<ul style="list-style-type: none"> Recognises and follows explicit and implicit protocols and meets expectations associated with own role
Interact with others	1.3	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes
Get the work done	2.1, 2.3, 2.4, 3.1-3.4, 4.1-4.3, 5.1-5.5	<ul style="list-style-type: none"> Recognises and responds to routine problems in context of own work Uses advanced features within applications to access, store, organise data and perform routine and complex work tasks

Assessment Requirements for BSBITU404 Produce complex desktop published documents

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- follow organisational and safe work practices including:
 - ergonomic requirements
 - energy and resource conservation techniques
- adhere to organisational requirements for:
 - ensuring consistency of style and image
 - logically sequencing data
 - producing documents within designated timelines
 - naming and storing documents
- adhere to task requirements when producing documents including:
 - applying consistent formatting
 - using appropriate templates and master pages
 - using appropriate colour palettes
 - using correct layouts
 - providing bleed allowance
 - meeting binding and finishing requirements
- resolve any issues including:
 - formatting issues
 - errors and omissions
 - problems with design and production.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline various formatting styles and their effect on formatting, readability and appearance of documents
- explain organisational requirements for ergonomics, work periods and breaks, and energy and resource conservation techniques
- identify purposes, uses and functions of desktop publishing software
- describe purpose and contents of an organisational style guide.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the information and communications technology – IT use field of work and include access to:

- organisational policies and procedures
- relevant workplace documentation and resources
- industry software packages and user instructions.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan to achieve team outcomes	1.1 Lead the team to identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members 1.2 Engage team members to incorporate innovation and

ELEMENT	PERFORMANCE CRITERIA
	productivity measures in work plans 1.3 Lead and support team members in meeting expected outcomes
2. Lead team to develop cohesion	2.1 Provide opportunities for input of team members into planning, decision making and operational aspects of work team 2.2 Encourage and support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities 2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions 2.4 Recognise and address issues, concerns and problems identified by team members or refer to relevant persons as required 2.5 Model expected behaviours and approaches
3. Participate in and facilitate work team	3.1 Actively encourage team members to participate in and take responsibility for team activities and communication processes 3.2 Give the team support to identify and resolve problems which impede its performance 3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers
4. Liaise with management	4.1 Maintain open communication with line manager/management at all times 4.2 Communicate information from line manager/management to the team 4.3 Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken 4.4 Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description
-------	-------------	-------------

	Criteria	
Writing	1.1, 4.2	<ul style="list-style-type: none"> Prepares workplace plans that communicate intent and elicits feedback clearly and effectively
Oral communication	1.1, 1.3, 2.2, 2.3, 3.1, 3.2, 4.2-4.4	<ul style="list-style-type: none"> Engages in discussions or provides information using structure and language appropriate to the audience and situation
Interact with others	1.1-1.3, 2.1-2.5, 3.1, 3.3, 4.1	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with team members Adapts personal communication style to model required behaviours, build trust and positive working relationships and to show respect for the opinions and values of others Plays a lead role in situations requiring effective collaboration, demonstrating conflict resolution skills and ability to engage and motivate others
Get the work done	1.1-1.3, 3.2	<ul style="list-style-type: none"> Develops, implements and monitors plans and processes to ensure team engagement and effectiveness Uses formal analytical thinking techniques to identify issues and generate possible solutions, seeking input from others as required

Assessment Requirements for BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply knowledge of organisational goals, objectives and plans
- develop a team work plan including documentation of how it was generated and how it will be monitored
- identify and incorporate innovation and productivity measures into a team work plan
- communicate with team members and management to identify and establish the team purpose, roles, responsibilities, goals plans and objectives and resolve problems
- use techniques to consult, encourage, support and provide feedback to team members
- model team leadership behaviours and approaches
- liaise with management to develop the teamwork plan, resolve issues and ensure follow-up action is taken.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must explain principles and techniques associated with:

- delegation and work allocation
- goal setting
- group dynamics and processes
- individual behaviour and difference
- leadership styles
- motivation
- negotiation
- problem solving
- planning

- workplace innovation
- workplace productivity.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- information about the organisation, including organisational structure, goals, objectives and plans
- case studies, and where possible, real situations
- workplace equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLIB502 Manage the development of collections

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to determine collection needs to accession and de-accession collection material for galleries and collection bodies.

It applies to individuals who possess specialised knowledge, have a degree of autonomy and are responsible for managing all aspects of collections development.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Library – Collection Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Determine collection needs	1.1 Review collection material against organisational objectives and collection requirements 1.2 Determine priorities in consultation with key stakeholders
2 Assess collection material to be accessioned	2.1 Use options to identify material that could be accessioned to meet collection needs 2.2 Assess key internal and external factors that impact options 2.3 Obtain expert advice on material and its relevance to collections

ELEMENT	PERFORMANCE CRITERIA
	<p>2.4 Assess potential material for significance and relevance to collections according to organisational collection management policies</p> <p>2.5 Examine records to establish provenance and confirm significance</p> <p>2.6 Identify resources required for accessioning collection material</p> <p>2.7 Develop recommendations for accessioning collection material according to collection needs</p>
3 Coordinate accessioning of collection material	<p>3.1 Seek approval for accessioning collection material</p> <p>3.2 Establish clear conditions for accessioning collection material according to organisational procedures and guidelines</p> <p>3.3 Organise appropriate resources to accession collection material according to approval and conditions</p> <p>3.4 Comply with legal, ethical and financial requirements and cultural protocols in the accession process</p> <p>3.5 Negotiate terms and organise transfer of rights according to organisational procedures</p> <p>3.6 Document agreements and terms according to organisational procedures and guidelines</p>
4 Coordinate de-accessioning of collection material	<p>4.1 Identify material to be de-accessioned from collections</p> <p>4.2 Consult with experts on the material to determine impact of de-accessioning on the collection</p> <p>4.3 Select options to de-accession material</p> <p>4.4 Develop and implement recommendations for de-accessioning collection material according to organisational policies and strategies</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 2.1, 2.2, 2.4-2.6,	<ul style="list-style-type: none"> Analyses and compares collection material and documents to determine requirements

	3.2, 3.4, 3.6, 4.1	<ul style="list-style-type: none"> Checks prepared documentation for compliance with terms, conditions and procedures for collection management
Writing	1.2, 2.3, 3.1-3.3, 3.5, 4.2	<ul style="list-style-type: none"> Prepares specific information conveying an understanding of outcomes and alternatives, and uses terminology appropriate to present to relevant personnel Ensures produced material reflects cultural protocols and legal, ethical and financial requirements Uses specific and appropriate language to develop accessioning and de-accessioning agreements and recommendations
Oral Communication	1.2, 2.3, 2.7. 3.1, 3.5. 3.6, 4.2	<ul style="list-style-type: none"> Initiates and participates in verbal exchanges of ideas and elicits views and opinions of others by listening and questioning Uses a range of persuasive responses appropriate to audience and environment, and makes comparisons which show an understanding of requirements
Numeracy	3.4	<ul style="list-style-type: none"> Interprets numerical information for compliance with financial requirements
Navigate the world of work	1.1, 2.4, 3.2-3.6, 4.4	<ul style="list-style-type: none"> Takes full responsibility for following policies, procedures and legislative requirements Takes responsibility for managing organisational policies, procedures, and protocols relevant to own role
Interact with others	1.2, 2.3, 2.7. 3.1, 3.5. 3.6, 4.2	<ul style="list-style-type: none"> Uses collaborative techniques to engage stakeholders and colleagues in consultations and negotiations
Get the work done	1.1, 1.2, 2.1-2.7, 3.1-3.3, 4.1-4.4	<ul style="list-style-type: none"> Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others taking into account capabilities, efficiencies and effectiveness Systematically gathers and analyses all relevant information and evaluates options to make decisions about accessioning and de-accessioning collection material Uses problem-solving techniques to identify and analyse issues Uses main features and functions of digital tools to complete work tasks and access information

Assessment Requirements for BSBLIB502 Manage the development of collections

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- make and justify decisions regarding accessioning and de-accessioning collection material to meet collection needs
- apply organisational procedures and guidelines to manage development of collections
- negotiate and document processes and agreements in relation to collection material.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and interpret organisational procedures and guidelines regarding managing specific items and whole collections
- identify and explain the purpose of subject matter expertise, including curatorial and conservation
- locate and interpret sources for accessioning and de-accessioning options
- interpret and explain information regarding comparable collections and their importance
- describe legal, ethical and financial requirements for accessioning and de-accessioning
- locate and interpret cultural protocols for collections development and management that impact accessioning and de-accessioning of cultural material, including those for Aboriginal or Torres Strait Islander material
- explain security issues associated with collection material.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Library – Collection Management field of work and include access to:

- an established or proposed collection as basis of decision-making
- organisational objectives, procedures and guidelines
- relevant personnel to reflect necessary communication and negotiation.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBLIB602 Develop and monitor procedures for the movement and storage of collection material

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Application

This unit describes the skills and knowledge required to develop and monitor procedures for the movement and storage of collection material.

It applies to individuals who work autonomously within established guidelines, and often as a team leader.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Library – Collection Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Establish procedures for handling, moving and storing collection material	1.1 Assess key information about collection material 1.2 Assess internal and external factors that impact moving and storing collection material 1.3 Integrate current industry best practice in procedure development 1.4 Locate and consult with stakeholders on complex matters of movement and storage

ELEMENT	PERFORMANCE CRITERIA
	<p>1.5 Identify and address legal, insurance and other administrative requirements impacting handling, moving and storing collection material</p> <p>1.6 Identify and assess work health and safety issues and legislative requirements</p> <p>1.7 Document procedures for moving and storing collection material</p>
2 Manage operations	<p>2.1 Organise and monitor movement and storage arrangements according to agreed procedures and work requirements</p> <p>2.2 Check movement and storage of collection material against schedules and allocated budgets, and take action to address problems</p> <p>2.3 Evaluate information records to ensure completeness, currency, accuracy and compliance with legal, ethical and cultural constraints</p> <p>2.4 Make adjustments and enhancements to record-keeping formats and systems based on ongoing review of records and feedback from users</p>
3 Maintain procedures for moving and storing collection material	<p>3.1 Consult with colleagues to obtain feedback on movement and storage procedures</p> <p>3.2 Update procedures based on feedback and industry practice</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 1.5, 1.6, 2.2-2.4	<ul style="list-style-type: none"> Analyses and interprets a wide range of information for incorporation into organisational practices and procedures
Writing	1.3, 1.5, 1.7, 2.4, 3.2	<ul style="list-style-type: none"> Develops and updates detailed procedures which clearly and concisely define organisational systems and practices Develops documents using language understood by target audience

Oral Communication	1.4, 1.5, 2.4, 3.1	<ul style="list-style-type: none"> Elicits views and opinions of others and obtains information by listening and questioning Participates in a verbal exchange of ideas/solutions and uses inclusive and collaborative techniques to clarify and present information according to requirements and audience
Numeracy	2.2-2.4	<ul style="list-style-type: none"> Interprets and uses budgets to meet required outcomes Works effectively with numerical recordkeeping systems to manage and monitor storage collection materials and operations
Navigate the world of work	1.3, 1.5-1.7, 2.1-2.3, 3.1, 3.2	<ul style="list-style-type: none"> Works autonomously making high level decisions to achieve and improve organisational goals Develops and implements strategies to ensure organisational policies, procedures, timelines and regulatory requirements are met Monitors and reviews organisation's policies, procedures and adherence to legislative requirements to implement and manage change
Interact with others	1.4, 1.5, 2.4, 3.1	<ul style="list-style-type: none"> Uses a variety of strategies to build and maintain effective working relationships
Get the work done	1.1-1.7, 2.1-2.4, 3.1, 3.2	<ul style="list-style-type: none"> Sequences and schedules complex activities, monitors implementation and manages relevant communication Plans, organises, implements and reviews systems and processes to manage compliance within relevant regulations and legislation Accepts responsibility for planning, prioritising and sequencing complex tasks and workload Gathers and analyses data and seeks feedback to improve plans and processes Evaluates effectiveness of systems and processes to inform decisions on how to implement improvements Uses problem-solving techniques to identify and analyse issues Uses main features and functions of digital tools to complete work tasks

Assessment Requirements for BSBLIB602 Develop and monitor procedures for the movement and storage of collection material

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0.

Performance Evidence

Evidence of the ability to:

- develop procedures for moving and storing collection material
- implement and monitor procedures for moving and storing collection material
- integrate into procedures, internal, external and technical issues that impact movement and storage of collection material.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- assess copyright, moral rights and intellectual property legislation and issues that impact moving and storing collection material
- identify and interpret cultural protocols that affect movement and storage of material, including Aboriginal or Torres Strait Islander material
- outline legal and administrative requirements for moving and storing collection material
- interpret procedures and practices for protection, transportation, storage and security of collection material
- explain safety legislation and requirements that impact moving and storing collection material
- describe technical and conservation issues associated with moving and storing collection material.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Library – Collection Management field of work and include access to:

- relevant policies and procedures manuals
- a collection, for which procedures can be planned.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement operational plan	1.1 Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Implement operational plans to contribute to the achievement of organisation's performance/business plan 1.3 Identify and use key performance indicators (KPIs) to monitor

ELEMENT	PERFORMANCE CRITERIA
	<p>operational performance</p> <p>1.4 Manage contingencies by adjusting the implementation of the operational plan in consultation with others</p> <p>1.5 Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes</p>
2. Implement resource acquisition	<p>2.1 Recruit and induct employees within organisation's policies, practices and procedures</p> <p>2.2 Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel</p>
3. Monitor operational performance	<p>3.1 Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets</p> <p>3.2 Analyse and use budget and actual financial information to monitor profit/productivity performance</p> <p>3.3 Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies</p> <p>3.4 Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely</p> <p>3.5 Present recommendations for variation to operational plans to the designated persons/groups and gain approval</p> <p>3.6 Implement systems, procedures and records associated with performance in accordance with organisation's requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.4	<ul style="list-style-type: none"> Actively reinforces learning by applying new knowledge and skills in mentoring, coaching and supervising others
Reading	1.1-1.5, 2.1, 2.2, 3.1, 3.2, 3.6	<ul style="list-style-type: none"> Identifies, interprets, analyses and reviews textual information related to the operational plan and

		monitoring of operational performance
Writing	1.1-1.5, 2.1, 2.2, 3.2-3.6	<ul style="list-style-type: none"> Communicates relationships between ideas and information, matching style of writing to purpose and audience Researches, plans and prepares workplace documentation for relevant stakeholders using organisational formats
Oral Communication	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Participates in a variety of spoken exchanges with a range of audiences varying structure and language to suit the audience
Numeracy	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> Selects and uses familiar mathematical techniques to organise timely supply of adequate resources for the operational plan and to use budgetary information to monitor performance
Navigate the world of work	1.5, 2.1, 2.2, 3.3, 3.4, 3.6	<ul style="list-style-type: none"> Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with diverse individuals to build rapport, seek or present information Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3, 3.6	<ul style="list-style-type: none"> Takes responsibility for planning, organising, implementing and monitoring tasks required to achieve required outcomes Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria Evaluates effectiveness of decisions in terms of how well they met stated goals Recognises and addresses an increasing range of familiar problems by implementing contingency plans

Assessment Requirements for BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives. including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT616 Develop and implement strategic plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish the strategic direction of the organisation, sustain competitive advantage and enhance competitiveness. It covers analysis and interpretation of relevant markets, capability assessment of the organisation and analysis of the organisation's existing and potential competitors and allies. It also covers implementation of the strategic plan and developing specific actions and initiatives that will be undertaken by people working in various roles.

It applies to individuals working in senior roles in the organisation who have responsibility for ensuring that the organisation is positioned to ensure its long-term viability and success.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Confirm organisational vision and mission	1.1 Check with stakeholders that organisational vision and mission are still held to be current and are supported 1.2 Make any changes or refinements to vision or mission statement as required 1.3 Review or develop organisational values to support the vision

ELEMENT	PERFORMANCE CRITERIA
	<p>and mission statement</p> <p>1.4 Gain support for strategic planning process from all relevant stakeholders</p>
2. Analyse the internal and external environment	<p>2.1 Determine information requirements and undertake or commission research to deliver relevant information</p> <p>2.2 Analyse political, economic, social, and technological developments in a global context</p> <p>2.3 Seek advice from appropriate experts wherever necessary</p> <p>2.4 Identify and consider strengths and weaknesses of existing and potential competitors and allies</p> <p>2.5 Analyse organisation's strengths, weaknesses, opportunities and threats</p> <p>2.6 Consider cooperative ventures that are supported by risk and cost benefit analyses, are consistent with the organisational vision, mission and values and provide for due diligence</p> <p>2.7 Check that analysis of internal and external environment is consistent with the perspectives of other informed people</p>
3. Write strategic plan	<p>3.1 Document relevant research and background for inclusion in the strategic plan</p> <p>3.2 Formulate strategic objectives and strategies needed for the future</p> <p>3.3 Detail each strategy with an assigned priority, a timeframe, responsible parties and measurable performance indicators</p> <p>3.4 Circulate strategic plan for comment, support and endorsement</p>
4. Implement strategic plan	<p>4.1 Communicate strategic plan to all relevant parties</p> <p>4.2 Brief people with a specific role in relation to strategies</p> <p>4.3 Use performance indicators to monitor progress in implementing plan</p> <p>4.4 Make necessary refinements to plan</p> <p>4.5 Evaluate achievement of objectives at agreed milestones</p> <p>4.6 Review effectiveness of plan and consider methods for improving strategic planning processes</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.2, 2.4-2.6, 3.1, 3.3, 4.4-4.6	<ul style="list-style-type: none"> Identifies and analyses complex organisational texts to determine business requirements Reviews, evaluates, interprets and applies content from a range of sources to aid in development of strategies
Writing	1.2, 1.3, 2.1, 2.2, 2.4-2.6, 3.1-3.3, 4.3-4.6	<ul style="list-style-type: none"> Prepares strategic plans for relevant stakeholders incorporating appropriate vocabulary, grammatical structure and conventions Incorporates amendments to documents according to organisational requirements Collates and compiles data to convey specific information, requirements and recommendations
Oral Communication	1.1, 1.4, 2.3, 4.1, 4.2	<ul style="list-style-type: none"> Presents information and seeks advice using language and register appropriate to audience Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	2.6, 3.2, 3.3, 4.5, 4.6	<ul style="list-style-type: none"> Interprets and analyses statistical data and mathematical information to consider trends and resource implications of proposed strategies
Navigate the world of work	1.1-1.3	<ul style="list-style-type: none"> Works autonomously making high level decisions to achieve and improve organisational goals Takes a lead role in the development of strategies to achieve organisational goals
Interact with others	1.1, 1.4, 2.3, 3.4, 4.1, 4.2	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role Seeks feedback or expert advice where required
Get the work done	1.3, 2.1, 2.2, 2.4-2.7, 3.2, 4.3-4.6	<ul style="list-style-type: none"> Develops flexible plans for complex, high impact activities with strategic implications, taking into account capabilities, efficiencies and effectiveness Systematically gathers and analyses all relevant information and evaluates options to inform decisions about organisational strategies Evaluates outcomes to identify opportunities for

		improvement <ul style="list-style-type: none"> • Applies problem solving processes to identify risks, evaluate options and determine solutions

Assessment Requirements for BSBMGT616 Develop and implement strategic plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- consult and communicate effectively with relevant stakeholders to:
 - confirm or revise the organisation's mission, vision and values
 - validate findings of research and analysis
 - get input to and endorsement of strategic plans
 - brief relevant parties about the plan
- analyse organisation's internal and external environment to formulate strategic plans including:
 - background and research relevant to the plan
 - legislation, regulations and codes of practice, including for intellectual property
 - objectives, strategies and priorities
 - roles and responsibilities
 - performance indicators
 - timeframes
 - consideration of co-operative ventures
 - cost-benefit and risk analysis
- seek advice from appropriate experts wherever necessary
- monitor and evaluate the implementation of the plan and make refinements as appropriate
- review effectiveness of planning processes and identify opportunities for improvement.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislation, regulations and codes of practice relevant to the organisation's strategic plan.
- give examples of risks and risk management strategies relevant to strategic planning including:
 - intellectual property rights and responsibilities
 - other risks
- outline strategic planning methodologies including political, economic, social and technological (PEST) analysis and strengths, weaknesses, opportunities and threats analysis (SWOT)
- identify internal and external sources of information relevant to the organisation's market, competitors, customer base, vision, values and capabilities
- outline techniques for developing organisational values.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT617 Develop and implement a business plan

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to run a business operation and covers the steps required to develop and implement a business plan.

It applies to individuals who are running an organisation or who take a senior role in determining the effective functioning and success of the organisation. As such, they may oversee the work of a number of teams and other managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop business plan	1.1 Review and evaluate pre-existing strategic, business and operational plan, if available 1.2 Analyse and interpret business vision, mission, values and objectives 1.3 Consult with key stakeholders 1.4 Review market requirements for the product or service, profile customer needs and research pricing options

ELEMENT	PERFORMANCE CRITERIA
	1.5 Develop performance objectives and measures through consultation with key stakeholders 1.6 Identify financial, human and physical resource requirements for the business 1.7 Consider any permits or licences that may be required for new activity 1.8 Write business plan
2. Monitor performance	2.1 Communicate business plan to all relevant parties and ensure understanding of performance requirements and timeframes 2.2 Ensure skilled labour is available to implement plan 2.3 Test performance measurement systems and refine, if necessary 2.4 Ensure timely reports on all key aspects of the business are available, user-friendly and balanced in terms of financial and non-financial performance 2.5 Report system failures, product failures and variances to the business plan as they occur
3. Respond to performance data	3.1 Analyse performance reports against planned objectives 3.2 Review performance indicators and refine if necessary 3.3 Ensure groups and individuals contributing to under-performance are coached, and provide training where appropriate 3.4 Review system processes and work methods regularly as part of continuous improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 1.7, 2.3, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> Gathers, interprets and analyses textual information when developing the business plan and monitoring operational performance Utilises understanding of distinguishing structures and features of a range of text as well as recognising and

		reflecting on context, purpose and audience

Assessment Requirements for BSBMGT617 Develop and implement a business plan

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- analyse and research business vision, mission, values, objectives, goals, competitors, financial targets, management arrangements, marketing approaches and strategic, business and operational plans
- write a business plan which includes a description of the business, products and services, financial, physical and human resource requirements, permit and licence requirements, marketing activity, financial indicators, productivity and performance targets for key result areas
- implement a business plan including ensuring skilled labour is available, and that training is provided where appropriate
- monitor and respond to business performance including evaluation of performance against key results indicators including profit and loss, community awareness or branding, environmental impact, governance, quality, sales, triple bottom line and the workforce
- consult, communicate with and report to key stakeholders including business partners, financiers, customers, staff and technical advisers
- provide an analysis of the strengths and weaknesses of a business plan.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline processes for developing business plans
- describe performance objectives and measures including key performance indicators
- identify key stakeholders.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- appropriate documentation and resources normally used in the workplace
- strategic, business and operational plans
- business information and data
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT623 Monitor corporate governance activities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the performance outcomes, skills and knowledge required to develop and implement procedures to ensure the organisation meets its corporate governance obligations. It covers researching corporate governance trends, standards and practices, establishing processes to promote compliance, reviewing compliance and taking corrective action on non-compliances.

It applies to individuals in any sector or type of organisation with responsibility for monitoring and managing compliance to corporate governance requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish corporate governance standards and practices	1.1 Monitor the application of, and adherence to, professional and legal standards to identify emerging trends and interpretations of statutory and other regulatory requirements 1.2 Research governance audit reports and practices to assess methodologies and recommendations
2. Identify corporate	2.1 Analyse organisational practices to identify corporate

ELEMENT	PERFORMANCE CRITERIA
governance reporting trends	<p>governance obligations and performance</p> <p>2.2 Review queries from statutory and other regulatory authorities for corporate governance failure to identify the need for changes to internal control procedures</p> <p>2.3 Analyse the organisation's governance reports, returns and review processes to identify whether they meet current requirements</p>
3. Determine processes for corporate governance adherence	<p>3.1 Analyse internal control procedures to determine corporate governance compliance performance indicators</p> <p>3.2 Evaluate whether information technology systems meet corporate governance obligations for recording data from operations and transactions</p> <p>3.3 Establish management processes to support corporate governance</p> <p>3.4 Establish reporting plans to ensure the organisation meets compliance and reporting deadlines</p>
4. Review corporate governance compliance	<p>4.1 Monitor compliance performance indicators</p> <p>4.2 Monitor compliance preparation processes for compliance</p> <p>4.3 Analyse non-compliances to identify cause/s and implement corrective actions</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Assessment Requirements for BSBMGT623 Monitor corporate governance activities

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop, implement, monitor and review corporate governance
- access and interpret legislation and regulations to identify corporate governance compliance requirements
- research and analyse information to identify trends in corporate governance practices and reporting
- establish and implement processes for corporate governance adherence including determining corporate governance indicators and establishing a reporting plan
- meet statutory reporting requirements
- monitor compliance and analyse the causes of non-compliances including analysing governance reports, returns, review processes and the information technology system
- identify and implement corrective actions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislation, regulations and statutory requirements and standards that relate to corporate governance obligations for the organisation including at least those covering:
 - finances and taxation
 - industrial relations, equal opportunity, employment records and superannuation
 - intellectual property
 - corporate entities
 - competition, ethical practice and consumer rights
 - work health and safety

- outline principles of internal control including statutory requirements
- understand statutory reporting requirements
- state the principles of valuation and apply common methods of depreciation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- workplace documentation and resources including governance reports and returns
- business information technology systems
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBPMG418 Apply project stakeholder engagement techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- work with others to establish various stakeholders needs and interests
- engage with project stakeholders using effective interpersonal skills and appropriate methods of communication
- select and use communications methods relevant to the project needs and stakeholder expectations
- complete all relevant documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe different types of stakeholders
- explain the different levels of stakeholder engagement on projects
- describe techniques and strategies for stakeholder engagement
- explain why the interests and expectations of stakeholders must be considered
- describe common problems leading to variances in stakeholder engagement.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- project documentation detailing stakeholder engagement
- examples of stakeholder engagement activities.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPRO301 Recommend products and services

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to provide advice and information within an organisation about the development and distribution of its products and services.

It applies to individuals who apply a broad range of administrative competencies in varied work contexts, using some discretion and judgement and who may provide technical advice and support to a team.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Product Skills and Advice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop and maintain knowledge of products and services	1.1 Actively and regularly research knowledge and understanding of industry products and services using authoritative sources 1.2 Use available product and service documentation to identify and understand characteristics of products and services, and to make comparisons with other products and services 1.3 Accurately document and maintain information on products and services in a format consistent with organisational requirements

ELEMENT	PERFORMANCE CRITERIA
	1.4 Apply acquired knowledge to improve quality within personal work areas
2. Recommend products and services	<p>2.1 Ensure that recommendations on products and services are in line with organisational requirements</p> <p>2.2 Provide recommendations that emphasise product and service issues relevant to client needs</p> <p>2.3 Ensure that evidence in support of recommendations is verifiable and presented in a suitable format</p> <p>2.4 Structure recommendations to identify clear benefits to clients and the organisation</p>
3. Advise on promotional activities	<p>3.1 Provide advice that is clear, is supported by verifiable evidence and is compatible with organisational requirements</p> <p>3.2 Ensure that promotional documentation and materials are appropriate to presentation of the organisation's products and services</p> <p>3.3 Ensure that costs of promotional activities conform to budget resources</p> <p>3.4 Estimate impact of promotional activities from verifiable customer feedback sources</p> <p>3.5 Evaluate the benefits of promotional activities and incorporate in plans for future promotional activities</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 3.4	<ul style="list-style-type: none"> Interprets, understands and compares textual information about products and services from a range of sources

Assessment Requirements for BSBPRO301 Recommend products and services

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use appropriate sources to document accurate information about the organisation's products and services
- prepare and provide advice about products and services according to organisational requirements
- evaluate promotional activities including consideration of:
 - whether promotional materials meet organisational requirements
 - actual costs against budget
 - customer feedback.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list authoritative sources of information about the organisation's products and services
- outline the organisation's products and services
- outline the policies and procedures that apply when providing advice or recommendations about products and services
- list and describe organisational promotional activities
- explain methods used to gather verifiable customer feedback about products and services
- explain how and why customer feedback is analysed.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – product skills and advice field of work and include access to:

- relevant organisational policies and procedures
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRES401 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to gather, organise, analyse and present workplace information using available systems. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality of the information, and preparing and producing reports.

It applies to individuals who are required to apply their broad knowledge of the work environment to analysis and research tasks, evaluate information from a variety of sources and apply solutions to a range of unpredictable problems

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Gather and organise information	1.1 Gather and organise information in a format suitable for analysis, interpretation and dissemination in accordance with organisational requirements 1.2 Access information held by the organisation ensuring accuracy and relevance in line with established organisational requirements 1.3 Ensure that methods of collecting information are reliable and

ELEMENT	PERFORMANCE CRITERIA
	<p>make efficient use of resources in accordance with organisational requirements</p> <p>1.4 Identify research requirements for combining online research with non-electronic sources of information</p> <p>1.5 Use business technology to access, organise and monitor information in accordance with organisational requirements</p> <p>1.6 Update, modify, maintain and store information, in accordance with organisational requirements</p>
2. Research and analyse information	<p>2.1 Clearly define objectives of research ensuring consistency with organisational requirements</p> <p>2.2 Ensure that data and research strategies used are valid and relevant to the requirements of the research and make efficient use of available resources</p> <p>2.3 Identify key words and phrases for use as part of any online search strategy, including the use of Boolean operators and other search tools</p> <p>2.4 Use reliable methods of data analysis that are suitable to research purposes</p> <p>2.5 Ensure that assumptions and conclusions used in analyses are clear, justified, supported by evidence and consistent with research and business objectives</p>
3. Present information	<p>3.1 Present recommendations and issues in an appropriate format, style and structure using suitable business technology</p> <p>3.2 Structure and format reports in a clear manner that conforms to organisational requirements</p> <p>3.3 Report and distribute research findings in accordance with organisational requirements</p> <p>3.4 Obtain feedback and comments on suitability and sufficiency of findings in accordance with organisational requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.1, 1.2, 1.4, 2.1-2.5, 3.4	<ul style="list-style-type: none"> Analyses and evaluates textual information to develop research strategies, integrate facts and ideas and meet organisational requirements
Writing	1.1, 1.5, 1.6, 2.1, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> Gathers, evaluates and integrates information from a range of sources Presents findings, recommendations and issues in required format using language, structure and style appropriate to audience.
Oral Communication	3.3, 3.4	<ul style="list-style-type: none"> Presents recommendations and issues using language appropriate to audience and according to organisational requirements
Numeracy	1.1, 1.2, 1.3, 2.2, 2.4, 3.3	<ul style="list-style-type: none"> Extracts and evaluates meaning from data and interprets numerical information to apply within the context of requirements
Navigate the world of work	1.2, 1.3, 1.5, 1.6, 2.1, 2.5, 3.2, 3.3, 3.4	<ul style="list-style-type: none"> Recognises and follows organisational policies and procedures and meets expectations associated with own role
Interact with others	3.3, 3.4	<ul style="list-style-type: none"> Selects and uses appropriate communication practices when seeking or sharing information
Get the work done	1.1, 1.4, 1.5, 2.2, 2.3, 2.4, 3.1	<ul style="list-style-type: none"> Plans, organises and implements tasks to meet organisational requirements Takes responsibility for the outcomes of routine decisions related directly to own role Uses the main features and functions of digital technologies and tools to complete work tasks Recognises and takes responsibility for addressing predictable and some less predictable problems in familiar work contexts

Assessment Requirements for BSBRES401 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify or confirm research requirements and objectives
- gather, organise and present workplace information and data
- update, modify, maintain and store information
- maintain and handle data and documents systematically and securely
- prepare and produce reports including:
 - recommendations based on the analysis of information
 - clear and justified assumptions and conclusions
 - use of efficient, valid and reliable methods
- use Boolean operators and other search tools
- analyse, evaluate and interpret data to support organisational activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain organisational systems for recordkeeping/filing, including security procedures
- identify organisational policies and procedures and legal and ethical obligations relating to workplace information
- explain concepts related to research and analysis including reliability and validity
- give examples of techniques for data analysis and how they are applied
- explain research processes and strategies to identify new sources (online and print) of information and to use them most efficiently and effectively.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- workplace information systems, equipment and resources
- workplace policies and procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to plan, conduct and report on applied research to influence strategic practices and outcomes within an organisational context.

The unit also covers constructing an applied research strategy, using a range of applied research techniques, and analysing and presenting findings.

It applies to leaders or managers using applied research to ensure learning can enhance individual, team and organisational performance. The intended purpose and approach to applied research may vary across a range of contexts and organisations. In this unit, the focus is on applied research to attain improved organisational outcomes.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Construct an applied research strategy	1.1 Clarify and confirm applied research purpose and needs of the target group 1.2 Determine policies and procedures in relation to conducting applied research 1.3 Establish mechanisms for collecting and maintaining data in a

ELEMENT	PERFORMANCE CRITERIA
	systematic manner 1.4 Analyse factors affecting the reliability and validity of data 1.5 Review relevant research ethics and codes of conduct 1.6 Prepare applied research strategy and hypothesis 1.7 Frame a research strategy in consideration of available tools and resources
2. Use a range of applied research techniques	2.1 Review and evaluate a range of applied research methods, theories and data collection techniques 2.2 Select appropriate methods to gather and analyse data 2.3 Use suitable technology and technology services to support data collection and analysis 2.4 Access appropriate sources of information and contributors relevant to the research 2.5 Optimise relevance of the research through integrity of the data collected and analysis tools used
3. Analyse and present findings	3.1 Evaluate how research findings such as trends and changes will impact on learning strategy 3.2 Review data and research findings for accuracy of details and adherence to any legal requirements 3.3 Collate and analyse data for relevance against the original applied research strategy 3.4 Document and present research findings in a clear and logical manner consistent with audience needs 3.5 Identify the need for and an appropriate approach to, further research

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.5	<ul style="list-style-type: none"> Evaluates and reflects on the need for further research to contribute to ongoing organisational improvement

Reading	1.1, 1.2, 1.5, 2.4, 3.1, 3.2	<ul style="list-style-type: none"> Collects, analyses, compares and evaluates textual information from a range of resources to inform research strategies
Writing	1.6, 3.3, 3.4	<ul style="list-style-type: none"> Develops texts dealing with complex ideas and concepts Uses specialised and detailed language to convey explicit information, requirements and recommendations in accordance with legal, ethical and organisational requirements
Oral Communication	1.1, 3.4	<ul style="list-style-type: none"> Uses specialised vocabulary appropriate to context and audience to discuss and confirm research requirements Applies listening and questioning techniques to check or confirm understanding
Numeracy	3.2, 3.3	<ul style="list-style-type: none"> Applies knowledge of mathematical information to statistically analyse data and identify possible trends and confirm reliability
Navigate the world of work	1.2, 1.5, 3.2	<ul style="list-style-type: none"> Is highly autonomous, taking responsibility for determining applicable organisational policies and procedures and considering legal and ethical obligations Monitors adherence to legal and regulatory rights and responsibilities for self and possibly for others
Interact with others	3.4	<ul style="list-style-type: none"> Demonstrates sophisticated control over oral, visual and/or written formats, drawing on a diverse range of communication practices to achieve goals
Get the work done	1.1, 1.2, 1.3, 1.7, 2.1, 2.2, 2.3, 2.4, 2.5, 3.3	<ul style="list-style-type: none"> Develops plans for complex activities, regularly reviewing priorities and performance during implementation, identifying and addressing issues as they arise Considers the strategic and operational potential of digital trends to achieve work goals, enhance work processes, create opportunities and enhance or reduce risks Uses formal analytical thinking to make informed decisions about research strategies and techniques, seeking input, advice and feedback as required

Assessment Requirements for BSBRES801 Initiate and lead applied research

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- plan, conduct and report on applied research relevant to organisational strategic practices and outcomes
- formulate a research proposal or plan which includes:
 - specific research questions or hypotheses
 - valid population or sample size
 - description of the geographical, cultural, social or institutional context within which the research will be carried out
 - full description of the data collection methods
 - analysis of the limitations to research design including the reliability and validity of data
- design an applied research project using applied research tools and techniques
- document and present research findings including analysis of data, valid and reliable findings and recommendations for further research.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe communication processes and methods
- explain data collection and analysis methods including the use of technology and technology services
- explain legal requirements, policies, procedures and guidelines relating to research including handling and storing data, privacy and freedom of information
- describe presentation techniques

- describe reporting methods
- explain research ethics and codes of conduct
- give examples of applied research tools and methods and how they are applied.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – research field of work and include access to:

- business technology
- relevant workplace policies and procedures
- relevant legislation and codes of conduct
- case studies and, where possible, real situations .

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRSK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify risks and to apply established risk management processes to a defined area of operations that are within the responsibilities and obligations of the role.

It applies to individuals with a broad knowledge of risk analysis or project management who contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

In this unit, risks applicable within own work responsibilities and area of operation, may include projects being undertaken individually or by a team, or operations within a section of the organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify risks	1.1 Identify the context for risk management 1.2 Identify risks using tools, ensuring all reasonable steps have

ELEMENT	PERFORMANCE CRITERIA
	<p>been taken to identify all risks</p> <p>1.3 Document identified risks in accordance with relevant policies, procedures, legislation and standards</p>
2. Analyse and evaluate risks	<p>2.1 Analyse and document risks in consultation with relevant stakeholders</p> <p>2.2 Undertake risk categorisation and determine level of risk</p> <p>2.3 Document analysis processes and outcomes</p>
3. Treat risks	<p>3.1 Determine appropriate control measures for risks and assess for strengths and weaknesses</p> <p>3.2 Identify control measures for all risks</p> <p>3.3 Refer risks relevant to whole of organisation or having an impact beyond own work responsibilities and area of operation to others as per established policies and procedures</p> <p>3.4 Choose and implement control measures for own area of operation and/or responsibilities</p> <p>3.5 Prepare and implement treatment plans</p>
4. Monitor and review effectiveness of risk treatment/s	<p>4.1 Regularly review implemented treatment/s against measures of success</p> <p>4.2 Use review results to improve the treatment of risks</p> <p>4.3 Provide assistance to auditing risk in own area of operation</p> <p>4.4 Monitor and review management of risk in own area of operation</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2	<ul style="list-style-type: none"> Comprehends documents and texts of varying complexity to extract and analyse relevant information
Writing	1.3, 2.1, 2.3, 3.5	<ul style="list-style-type: none"> Uses specific, industry related terminology and logical organisational structure in workplace documents that identify and analyse risk and report management process outcomes

Oral communication	2.1	<ul style="list-style-type: none"> Participates effectively in interactions with stakeholders by using questioning and listening to elicit opinions and clarify understanding
Numeracy	1.2, 4.1	<ul style="list-style-type: none"> Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 1.3, 3.3	<ul style="list-style-type: none"> Complies with organisational and legislative requirements Takes responsibility for identification and management of risk within own work context and refers matters to others as required
Interact with others	2.1	<ul style="list-style-type: none"> Selects appropriate communication protocols and conventions when conferring with others to establish risk management requirements
Get the work done	1.1, 1.2, 2.1, 2.2, 3.1, 3.2, 3.4, 3.5, 4.1, 4.2, 4.3, 4.4	<ul style="list-style-type: none"> Determines job sequence and works logically and systematically to undertake defined tasks Uses analysis and consultative processes to inform decisions about selection and implementation of risk control measures Evaluates effectiveness of plans and results to inform improvement decisions Uses familiar digital technologies and systems to access information, prepare plans and communicate with others

Assessment Requirements for BSBRK401 Identify risk and apply risk management processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to apply organisational policies, procedures and processes to:

- identify risks
- consult with relevant stakeholders to analyse and evaluate risks
- identify and evaluate control measures
- develop and implement treatment plans for own area or responsibility
- refer risks that are beyond own area of responsibility to others
- maintain risk management documentation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline techniques for identifying and evaluating risks
- outline organisational policies, procedures or processes for risk management
- give examples of areas where risks are commonly identified in an organisation
- outline the purpose and key elements of current risk management standards
- outline the legislative and regulatory context of the organisation in relation to risk management
- describe the organisation's auditing requirements relating to risk management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk - risk management field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRSK501 Manage risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes skills and knowledge required to manage risks in a range of contexts across an organisation or for a specific business unit or area in any industry setting.

It applies to individuals who are working in positions of authority and are approved to implement change across the organisation, business unit, program or project area. They may or may not have responsibility for directly supervising others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Risk Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish risk context	1.1 Review organisational processes, procedures and requirements for undertaking risk management in accordance with current risk management standards 1.2 Determine scope for risk management process 1.3 Identify internal and external stakeholders and their issues 1.4 Review political, economic, social, legal, technological and policy context

ELEMENT	PERFORMANCE CRITERIA
	1.5 Review strengths and weaknesses of existing arrangements 1.6 Document critical success factors, goals or objectives for area included in scope 1.7 Obtain support for risk management activities 1.8 Communicate with relevant parties about the risk management process and invite participation
2. Identify risks	2.1 Invite relevant parties to assist in the identification of risks 2.2 Research risks that may apply to scope 2.3 Use tools and techniques to generate a list of risks that apply to the scope, in consultation with relevant parties
3. Analyse risks	3.1 Assess likelihood of risks occurring 3.2 Assess impact or consequence if risks occur 3.3 Evaluate and prioritise risks for treatment
4. Select and implement treatments	4.1 Determine and select most appropriate options for treating risks 4.2 Develop an action plan for implementing risk treatment 4.3 Communicate risk management processes to relevant parties 4.4 Ensure all documentation is in order and appropriately stored 4.5 Implement and monitor action plan 4.6 Evaluate risk management process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4, 1.5, 2.2	<ul style="list-style-type: none"> Comprehends a variety of relatively complex texts Gathers, interprets and analyses textual information from a range of sources to identify relevant information
Writing	1.6, 1.8, 2.1, 2.3, 4.3	<ul style="list-style-type: none"> Develops textual material and organises content in a manner that effectively documents

		risk management analysis and assessment priorities and processes
Oral Communication	1.8, 2.1, 2.3, 4.3	<ul style="list-style-type: none"> Participates in interactions with stakeholders using questioning and listening to elicit opinions, and to confirm and clarify understanding
Numeracy	2.2	<ul style="list-style-type: none"> Uses numerical tools to assess risk and uses numerical data to review plans
Navigate the world of work	1.1, 2.1, 4.3	<ul style="list-style-type: none"> Refers to organisational processes, procedures and requirements when making decisions about risk management
Interact with others	1.8, 2.1, 2.3, 4.3	<ul style="list-style-type: none"> Establishes and uses appropriate conventions and protocols when communicating with stakeholders about risk management Consults and negotiates with stakeholders about risk management processes and outcomes
Get the work done	1.2, 1.3, 1.5, 1.7, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.1, 4.2, 4.4, 4.5, 4.6	<ul style="list-style-type: none"> Sequences and schedules a range of routine and complex activities, monitors implementation, evaluates processes and manages relevant communication Systematically analyses information to decide on appropriate risk management treatments Uses digital technologies and systems to access information, document plans and communicate with others

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

Elements and Performance Criteria

Element	Performance Criteria
1 Employ prospecting methods	1.1 Identify a range of prospecting methods
	1.2 Consider and evaluate the strengths and limitations of primary and secondary prospecting methods
	1.3 Select prospecting methods to match the market to which the product is targeted
	1.4 Target present, previous and new clients through chosen prospecting methods
2 Qualify prospects	2.1 Research and establish criteria for qualifying leads
	2.2 Ensure criteria are established according to buyer accessibility, buyer motives , product affordability, purchase authority, legal compliance and return for the seller
	2.3 Ensure the established criteria represent a standard against which the buying potential of individuals and groups is gauged
3 Manage prospect information	3.1 Develop a system to record prospect information
	3.2 Implement the system for recording prospect information
	3.3 Monitor the system for recording prospect information for effectiveness
	3.4 Evaluate the system for recording prospect information

3.5 Refine the system for recording prospect information based on evaluation of system

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

literacy skills to interpret legal requirements, company policies and procedures

research and data analysis skills to determine prospect requirements

technology skills to design and record formats to facilitate information storage and retrieval.

Required knowledge

principles of buyer motives

identification and overview knowledge of key provisions of relevant legislation from all levels of government that affects business operations, codes of practice and national standards, such as:

anti-discrimination

ethical principles

consumer protection

contract law

privacy laws

Trade Practices Act

benefits and key features of own organisation's and competitors' products

information management strategies used to manage prospect data

prospecting methods used in the sales process.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence of the following is essential:

- demonstration of the use and management of different prospecting methods targeting a present, previous and new client
- research and establishment of criteria used in qualifying leads identified through prospecting methods
- recording, storage and retrieval of prospect information.

Context of and specific resources for assessment

Assessment must ensure:

- access to an actual workplace or simulated environment
- access to organisational sales prospect information, databases and records.

Method of assessment

A range of assessment methods should be used to assess practical skills and knowledge. The following examples are appropriate for this unit:

- analysis of responses to case studies and scenarios
- assessment of criteria developed to qualify sales leads
- demonstration of prospecting methods
- direct questioning combined with portfolios of evidence and third party workplace reports of on-the-job performance by the candidate
- observation of use of prospecting methods
- oral or written questioning to assess knowledge of principles of buyer motives
- review of research undertaken to establish criteria for qualifying leads
- evaluation of the system developed to record prospect information.

Guidance information for assessment

Holistic assessment with other units relevant to the industry sector, workplace and job role is recommended, for example:

customer service units

other sales units.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Prospecting methods may include:

brokers

cold canvassing

databases

direct mail

internet

intra organisational leads

journals

magazines

media advertising

networking

newspapers

personal observation

public records

referrals

spotters

telemarketing

Products may include:

goods

ideas

services

Clients may include:

consumers
customers
members
patients
members of other business units within an organisation
other work teams within an organisation
person or organisation who receives or has the potential to receive products, services or ideas supplied by the organisation

Buyer motives may include:

browsing
buying for unqualified prospect e.g. dependant
gift
housekeeping
replacement item
self reward
self-gratification

Assessment Requirements for BSBSMB401 Establish legal and risk management requirements of small business

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- demonstrate a systematic approach to identifying, managing and meeting legal and regulatory requirements, specifically in regard to WHS, business registration and environmental requirements
- ensure compliance, by:
 - following taxation and industrial relations principles
 - updating and maintaining legal documents
 - investigating areas of non-compliance
 - monitoring provision of products and services
 - taking corrective action where necessary
- negotiate and arrange contracts, including:
 - seeking legal advice
 - investigating procurement rights
 - identifying options of leasing or ownership of business premises.
- Identify, assess and treat risks specific to the business including
 - prioritising risks with highest probability of occurrence and greatest negative impact on the business
 - identifying insurance requirements

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline business registration and licensing requirements
- identify all government legislative requirements relating to the specific business operation
- explain creation and termination of relevant legal contracts
- summarise relevant cultural differences and legal implications
- describe legal rights and obligations of alternative ownership structures
- outline necessary record keeping to meet minimum legal and taxation requirements
- summarise relevant consumer legislation and industry codes of practice
- outline the key steps in the risk management process
- explain relevant insurance requirements and products.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- office equipment and resources
- business technology including internet access
- specialist software for analysis of data
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies, or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB402 Plan small business finances

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to identify financial requirements of a business, including profit targets, cash flow projections and strategies to garner financial support.

It applies to individuals who operate a small business or work within an existing micro or small businesses and interpret financial data.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify costs, calculate prices and prepare profit statement	1.1 Identify and document costs associated with production and delivery of business products and services 1.2 Calculate prices based on costs and profit margin, as an hourly

ELEMENT	PERFORMANCE CRITERIA
	charge-out rate for labour or unit price for products 1.3 Calculate break-even sales point to establish business viability and profit margins 1.4 Identify appropriate pricing strategies in relation to market conditions to meet business profit targets 1.5 Prepare projected profit statement to supplement the business plan
2. Develop a financial plan	2.1 Set profit targets or goals to reflect owner's desired returns 2.2 Identify working capital requirements necessary to attain profit projections 2.3 Identify non-current asset requirements and consider alternative asset management strategies 2.4 Prepare cash flow projections to enable business operation in accordance with business plan and legal requirements 2.5 Identify capital investment requirements accurately for each operational period 2.6 Select budget targets to enable ongoing monitoring of financial performance
3. Acquire finance	3.1 Identify start-up and ongoing financial requirements according to financial plan/budget 3.2 Identify sources of finance, including potential financial backers, to provide required liquidity for the business to complement business goals and objectives 3.3 Investigate cost of securing finance on optimal terms 3.4 Identify strategies to obtain finance as required to ensure financial viability of the business

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.5, 2.1-2.5, 3.1,	<ul style="list-style-type: none"> Identifies, analyses and evaluates complex information from a range of sources

Assessment Requirements for BSBSMB402 Plan small business finances

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a financial plan which identifies financial requirements of the business, including cash flow projections and a projected profit statement
- follow the financial plan, including:
 - demonstrating an awareness of appropriate legal requirements
 - implementing strategies to monitor financial performance
- identify sources and investigate costs of securing appropriate financial assistance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain break-even analysis
- clarify costing for the business, including margin or mark-up, hourly charge-out rates and unit costs
- summarise financial decision-making relevant to the business
- outline methods and relative costs of obtaining finance
- summarise principles for preparing balance sheets
- provide a detailed explanation of:
 - principles for preparation of cash flow forecasts
 - principles for preparation of profit and loss statements

- purpose of financial reports
- explain relevant accounting terminology
- describe working capital cycles.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- software for financial calculations
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBSMB403 Market the small business

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- determine marketing activity focus in line with objectives of the business plan
- evaluate customer base
- understand what is ethically and culturally appropriate
- determine a marketing mix according to market and business needs, including:
 - ability to optimise sales and profit
 - ability to evaluate costs and benefits
 - determine customer needs and promotional activities
- determine marketing strategies, including briefing appropriate personnel on their responsibilities
- identify marketing opportunities in the digital environment
- develop approaches to engage, respond and monitor customers in the digital space
- monitor and evaluate activities and performance, and correct performance gaps
- consult and communicate effectively with relevant people
- research and monitor ongoing changes and improvements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss industry market trends
- identify performance evaluation methods
- explain methods of analysing costs and benefits of marketing strategies
- summarise methods of developing marketing objectives and marketing mix
- compare current digital devices, platforms and technologies for effectiveness in achieving marketing objectives
- outline methods of monitoring customer satisfaction
- identify relevant market analysis and research
- provide a detailed explanation of relevant marketing concepts and methods.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business technology
- software for analysis of data
- workplace documents and case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSMB404 Undertake small business planning

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to research and develop an integrated business plan for achieving business goals and objectives.

It applies to individuals who operate a small business that operates independently, or as part of a larger organisation. Individuals in this role interpret business information and numerical data competently.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify elements of the business plan	1.1 Identify purpose of the business plan 1.2 Identify and review essential components of the business plan 1.3 Identify and document business goals and objectives as a basis for measuring business performance

ELEMENT	PERFORMANCE CRITERIA
2. Develop a business plan	2.1 Research resources, legal and compliance requirements, specifically in relation to work health and safety (WHS), in accordance with business goals and objectives 2.2 Research market needs, and market size and potential 2.3 Identify sources and costs of finance, from financial plan, to provide required liquidity and profitability for the business 2.4 Identify methods, from marketing strategies, to promote market exposure of the business 2.5 Identify methods or means of production or operation from production or operations plan to conform with business goals and objectives 2.6 Identify staffing requirements to effectively produce or deliver products and services 2.7 Identify, assess and prioritise internal and external risks 2.8 Identify specialist services and sources of advice, where required, and cost in accordance with available resources
3. Develop strategies for minimising risks	3.1 Identify specific interests and objectives of relevant people and seek and confirm their support of planned business direction 3.2 Identify and develop risk management strategies according to business goals and objectives, and relevant legal requirements 3.3 Develop a contingency plan to address possible areas of non-conformance with the plan

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1-2.7, 3.1, 3.2	<ul style="list-style-type: none"> Identifies, analyses and evaluates complex workplace documentation during planning process
Writing	1.3, 2.3-2.7, 3.1-3.3	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral	1.1, 3.1	<ul style="list-style-type: none"> Articulates ideas and requirements clearly and

Communication		creatively based on techniques appropriate to assess business performance
Numeracy	2.2, 2.3, 2.5-2.7	<ul style="list-style-type: none"> Interprets numerical information to determine prospective markets, resource allocations and business profits/losses
Navigate the world of work	2.1, 3.2	<ul style="list-style-type: none"> Appreciates implications of legal and regulatory responsibilities related to own work
Interact with others	3.1	<ul style="list-style-type: none"> Looks for strengths in others, finding ways of working with and building on these and sharing own knowledge and experience freely
Get the work done	1.1, 1.2, 2.1-2.7, 3.2, 3.3	<ul style="list-style-type: none"> Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and to evaluate alternative strategies Implements actions as per plan, making slight adjustments if necessary, and addressing some unexpected issues Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account Identifies concepts, principles and features of approaches in use in other contexts, and redesigns these to suit own situation Uses formal and informal processes to monitor implementation of solutions and reflect on outcomes

Assessment Requirements for BSBSMB404 Undertake small business planning

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop a business plan which provides for finance, marketing and provision of products or services to facilitate all business goals and objectives
- identify and plan all work health and safety (WHS) and duty of care responsibilities
- identify and assess internal and external risks to the business
- develop risk management strategies including a contingency plan for non-conformance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to business operation, especially in regard to WHS and environmental issues, equal employment opportunity, industrial relations and anti-discrimination
- explain methods of evaluation
- summarise WHS responsibilities and procedures for identifying hazards relevant to the business
- outline planning processes
- describe preparation of a business plan
- identify principles of risk management relevant to small business planning
- outline common risks particular to the small business type or industry
- explain reasons for, and benefits of, business planning

- clarify relevant industry codes of practice
- outline setting goals and objectives
- explain types of business planning – feasibility studies; strategic, operational, financial and marketing planning.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBSMB406 Manage small business finances

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- operate the business according to the business plan, including:
 - adhering to legal requirements
 - meeting requirements of financial backers
 - defining strategies for debt collection and contingencies for debtors
 - managing cash flow
 - defining key performance indicators
 - communicating with relevant people
- monitor the business against financial plan and make changes as required.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss benchmarking
- explain financial decision-making relevant to the business
- summarise significant financial indicators
- outline purposes of financial reports
- clarify preparation and interpretation of budget/actual reports
- identify principles for preparing balance sheets and their interpretation
- outline debt collection procedures or strategies

- characterise principles for preparing profit and loss statements and their interpretation
- discuss stock records and stock control relevant to the business.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select, induct, train and develop staff members to enhance business operations within the parameters of all relevant legislative requirements.

It applies to individuals who operate a small business that stands alone, or is part of a department within a larger organisation. Individuals in this role have a good knowledge of industrial relations and team management and use effective, responsive and supportive communication in workplace interactions.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Small and Micro Business

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop staffing plan	1.1 Determine staffing requirements to allow the business to run effectively, in accordance with requirements outlined in the

ELEMENT	PERFORMANCE CRITERIA
	<p>business plan</p> <p>1.2 Identify and compare existing skills of owner/s and staff with business requirements to identify any gaps</p> <p>1.3 Develop policies and procedures for owner/s and staff, in accordance with the business plan</p>
2. Recruit, induct, train and retain team	<p>2.1 Develop job or position descriptions, competencies required and selection criteria to meet business' needs</p> <p>2.2 Judge information obtained from each candidate against specified selection criteria, and select according to business needs and legal requirements</p> <p>2.3 Induct new staff members in accordance with policies and procedures of the business</p> <p>2.4 Make team members aware of their responsibilities and performance requirements as soon as practicable, and take opportunities to coach team members who are unfamiliar with procedures of the business</p> <p>2.5 Develop and implement a staff development program and career paths based on requirements of business and staff competencies</p> <p>2.6 Advertise staff vacancies appropriately in accordance with staffing plan</p>
3. Comply with industrial relations obligations	<p>3.1 Clarify workplace rights and obligations of employers and employees, in accordance with legal requirements and codes of practice</p> <p>3.2 Counsel staff, if required, in a positive and constructive manner and record outcomes accurately</p>
4. Maintain staff records	<p>4.1 Develop staff records system to provide timely and accurate information, in accordance with confidentiality, legal and taxation requirements</p> <p>4.2 Monitor and accurately maintain system for recording and retrieving personnel and payroll information, and seek specialist advice where required</p>
5. Manage staff	<p>5.1 Regularly review contribution and skills of self and other team members to ensure performance is in line with agreed performance measures</p> <p>5.2 Monitor and adjust staffing requirements to respond to any changes in tasks and functions required by the business</p> <p>5.3 Support and encourage staff, and acknowledge and reward</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>their contribution</p> <p>5.4 Regularly provide opportunities for staff to discuss work related issues</p> <p>5.5 Develop contingency plans to cope with unexpected or extreme situations and take appropriate corrective action as required</p>
6. Review team performance	<p>6.1 Develop positive and constructive relationships with and between team members</p> <p>6.2 Review and update team objectives in support of business goals on a regular basis in consultation with team members</p> <p>6.3 Identify strengths and weaknesses of team against current and expected work requirements</p> <p>6.4 Schedule time, on a regular basis, for team members to review work operations to maintain and improve operational efficiency</p> <p>6.5 Encourage team members to monitor their own performance, suggest improvements and identify professional development needs, in accordance with personal and business requirements</p> <p>6.6 Monitor and review staff turnover rate</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.2, 2.3, 2.5, 2.6, 3.1, 4.1, 5.1, 6.3, 6.5, 6.6	<ul style="list-style-type: none"> Evaluates complex text to determine legislative, regulatory and workplace documentation
Writing	1.3, 2.1-2.6, 3.1, 3.2, 4.1, 4.2, 5.5, 6.1-6.3, 6.5	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.2, 2.2-2.4, 3.1, 3.2, 4.2, 5.3, 5.4, 6.1, 6.2, 6.4, 6.5	<ul style="list-style-type: none"> Articulates clearly using specific and relevant language suitable to audience to convey requirements, and employs listening and questioning techniques to confirm understanding Participates in verbal negotiations and coaching using tone and language suitable to audience

Numeracy	6.4	<ul style="list-style-type: none"> • Uses basic mathematical formulas to review staff performances within available work schedules
Navigate the world of work	1.3, 2.2, 3.1, 4.1	<ul style="list-style-type: none"> • Understands own legal rights and responsibilities and is extending understanding of general legal principles across work contexts • Monitors adherence to organisational policies and procedures and considers own role for its contribution to broader goals of the work environment
Interact with others	2.4, 2.6, 5.3, 6.1, 6.5	<ul style="list-style-type: none"> • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion • Looks for ways of establishing connections and building genuine understanding with a diverse range of people • Actively identifies important communication exchanges, selecting appropriate channels, format, tone and context to suit purpose and audience, and monitors impact
Get the work done	1.1, 1.2, 2.2, 2.3, 2.5, 4.2, 5.1, 5.2, 5.5, 6.3, 6.6	<ul style="list-style-type: none"> • Uses digital technologies and systems safely, legally and ethically when gathering, storing, accessing and sharing information • Develops plans to manage relatively complex, non-routine tasks with an awareness of how they may contribute to longer-term operational and strategic goals • Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into account • Uses formal and informal processes to monitor implementation of ideas and reflect on outcomes • Recognises and anticipates an increasing range of familiar problems, their symptoms and causes, actively looking for early warning signs and implementing contingency plans

Assessment Requirements for BSBSMB407 Manage a small team

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify intent of unit
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use the business plan to:
 - determine staffing requirements
 - coordinate skill-gap training where required
 - develop human resource policies and procedures
- develop job descriptions and selection criteria
- determine induction processes
- implement staff development program
- adhere to legal requirements and codes of practice
- develop staff records system
- conduct ongoing performance measures
- communicate effectively with staff members
- develop contingency plans
- develop strategies to review team performance
- monitor and review staff.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- discuss all government legislative requirements relating to staffing the business operation

- explain work health and safety (WHS) responsibilities and procedures for managing hazards
- summarise relevant industry awards or enterprise agreements
- outline staff development pathways
- identify training course options for staff development
- summarise staff counselling, grievance and disciplinary procedures
- identify unfair dismissal legislation and procedures.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the Management and Leadership – Small and Micro Business field of work and include access to:

- business equipment and resources
- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBSUS401 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0. Version created to better align unit to AQF level.

Application

This unit describes the skills and knowledge required to effectively analyse the workplace in relation to environmentally sustainable work practices and to implement improvements and monitor their effectiveness.

It applies to individuals with responsibility for a specific area of work or who lead a work group or team and addresses the knowledge, processes and techniques necessary to implement and monitor environmentally sustainable work practices, including the development of processes and tools.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Sustainability

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Investigate current practices in relation to resource usage	1.1 Identify environmental regulations applying to the enterprise 1.2 Analyse procedures for assessing compliance with

ELEMENT	PERFORMANCE CRITERIA
	environmental/sustainability regulations 1.3 Collect information on environmental and resource efficiency systems and procedures, and provide to the work group where appropriate 1.4 Collect, analyse and organise information from a range of sources to provide information/advice and tools/resources for improvement opportunities 1.5 Measure and document current resource usage of members of the work group 1.6 Analyse and document current purchasing strategies 1.7 Analyse current work processes to access information and data to assist in identifying areas for improvement
2. Set targets for improvements	2.1 Seek input from stakeholders, key personnel and specialists 2.2 Access external sources of information and data as required 2.3 Evaluate alternative solutions to workplace environmental issues 2.4 Set efficiency targets
3. Implement performance improvement strategies	3.1 Source and use appropriate techniques and tools to assist in achieving efficiency targets 3.2 Apply continuous improvement strategies to own work area of responsibility, including ideas and possible solutions to communicate to the work group and management 3.3 Implement and integrate environmental and resource efficiency improvement plans for own work group with other operational activities 3.4 Supervise and support team members to identify possible areas for improved practices and resource efficiency in work area 3.5 Seek suggestions and ideas about environmental and resource efficiency management from stakeholders and act upon where appropriate 3.6 Implement costing strategies to fully utilise environmental assets
4. Monitor performance	4.1 Use and/or develop evaluation and monitoring, tools and technology 4.2 Document and communicate outcomes to report on efficiency targets to key personnel and stakeholders 4.3 Evaluate strategies and improvement plans 4.4 Set new efficiency targets, and investigate and apply new tools

ELEMENT	PERFORMANCE CRITERIA
	and strategies 4.5 Promote successful strategies and reward participants where possible

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.4, 1.6, 1.7, 2.3, 3.1	<ul style="list-style-type: none"> Identifies and analyses complex texts to determine legislative, regulatory and business requirements Reviews reported information to evaluate workplace strategies and improvement practices
Writing	1.5, 1.6, 2.1, 2.2, 2.4, 3.1-3.3, 4.4, 4.5	<ul style="list-style-type: none"> Documents findings of investigations from written and oral sources according to organisational requirements Provides updates about progress using formats and language appropriate to the audience and context
Oral Communication	2.1, 2.2, 3.3-3.5, 4.4, 4.5	<ul style="list-style-type: none"> Presents information and seeks advice using structure and language appropriate to audience Participates in discussions using listening and questioning to elicit the views of others and to clarify or confirm understanding
Numeracy	1.5, 2.4, 3.1, 3.6, 4.4	<ul style="list-style-type: none"> Analyses numerical information to measure usage and calculates metric measurements, quantities/ratios and financial data using appropriate tools
Navigate the world of work	1.1, 1.2	<ul style="list-style-type: none"> Recognises and follows legislative requirements and organisational policies and procedures associated with own role
Interact with others	1.3, 2.1, 2.2, 3.3-3.5, 4.2, 4.4, 4.5	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders to seek or share information Collaborates and consults with a range of stakeholders to achieve shared understanding of individual roles in meeting objectives
Get the work done	1.2, 1.4-1.7, 2.3, 2.4, 3.1, 3.2, 3.3, 3.5, 3.6, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> Develops plans to manage routine and non-routine tasks for own work group with an awareness of how they contribute to the broader organisation Uses systematic, analytical processes to set

		<p>environmental targets, gather relevant information, identify and evaluate alternative approaches</p> <ul style="list-style-type: none"> • Evaluates outcomes of decisions to identify opportunities for improvement • Uses the main features and functions of digital tools to complete work tasks and access information

Assessment Requirements for BSBSUS401 Implement and monitor environmentally sustainable work practices

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 2.0. Version created to better align unit to AQF level.

Performance Evidence

Evidence of the ability to:

- analyse information from a range of sources to identify current procedures, practices and compliance requirements in relation to environmental and resource sustainability
- consult and communicate with relevant stakeholders to seek input and encourage engagement with developing and implementing sustainability improvements, encourage feedback and suggestions and report on outcomes
- plan and organise work group activities to:
 - measure current resource usage
 - solve problems and generate ideas for improvements
 - evaluate and implement strategies to improve resource usage
 - plan, implement and integrate improvements into operations
 - meet environmental requirements
- apply continuous improvement approach to sustainability performance
- apply change management techniques to support sustainability performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify relevant internal and external sources of information and explain how they can be used to identify sustainability improvements

- explain the compliance requirements for the work area with reference to legislation, regulations, codes of practice and workplace procedures that relate to environmental and resource issues
- outline common environmental and energy efficiency issues within the industry
- give examples of benchmarks for environmental and resource sustainability that are relevant to the organisation
- outline organisational systems and procedures that relate to environmental and resource sustainability improvements including:
 - supply chain, procurement and purchasing
 - quality assurance
 - making recommendations and seeking approvals

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies or, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS302 Apply knowledge of WHS legislation in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to understand and comply with work health and safety (WHS) Acts, regulations and codes of practice in the workplace.

This unit applies to individuals who contribute to actions to achieve compliance with WHS legislation as part of their WHS responsibilities, which are in addition to their main duties.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the legal framework for WHS in	1.1 Identify and access current WHS legislation and related documentation relevant to the workplace, occupation and industry

ELEMENT	PERFORMANCE CRITERIA
the workplace	<p>1.2 Apply knowledge of the relationship between WHS Acts, regulations and codes of practice to assist in identifying WHS legislative requirements in the workplace</p> <p>1.3 Identify duty holders</p> <p>1.4 Identify legal obligations and duties for who to consult with regarding training of workers and health and safety representatives</p> <p>1.5 Identify consequences of non-compliance with WHS Acts, regulations, codes of practice, standards and organisational WHS policies, procedures, processes and systems</p>
2. Contribute to activity that reflects WHS legislative requirements	<p>2.1 Contribute to monitoring compliance with legislation</p> <p>2.2 Contribute to ensuring that workplace complies with legislation</p> <p>2.3 Identify and take appropriate action on non-compliance with legislation</p> <p>2.4 Recognise limits of own expertise and legal duties, and access help and advice when required</p>
3. Keep up-to-date with legislation and relevant publications	<p>3.1 Use relevant sources to keep up-to-date with legislation and relevant publications</p> <p>3.2 Communicate information on relevant legislative changes and relevant publications to others</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1	<ul style="list-style-type: none"> Identifies and evaluates information from formal and informal sources to update knowledge
Reading	1.1-1.5, 3.1	<ul style="list-style-type: none"> Interprets a range of textual information to determine regulatory and procedural requirements and necessary actions
Writing	2.3, 3.2	<ul style="list-style-type: none"> Documents WHS information in a sequential manner using required format, correct grammar and industry specific language
Oral	2.1, 2.2, 2.3, 3.2	<ul style="list-style-type: none"> Provides information or advice using language appropriate to audience

communication		<ul style="list-style-type: none"> • Uses listening and questioning to clarify and confirm understanding
Navigate the world of work	2.1- 2.3, 3.1	<ul style="list-style-type: none"> • Follows policies, procedures and legislative requirements relevant to own role • Keeps up to date on changes to legislation or regulations relevant to own role
Interact with others	2.4, 3.2	<ul style="list-style-type: none"> • Selects appropriate communication protocols and conventions to provide or seek information
Get the work done	1.1-1.5, 2.3, 3.1	<ul style="list-style-type: none"> • Plans, sequences and prioritises tasks and activities to support compliance with WHS regulatory requirements • Initiates standard procedures in response to non-compliance issues, requesting assistance if necessary • Uses the main features and functions of digital tools to complete work tasks and access information

Assessment Requirements for BSBWHS302 Apply knowledge of WHS legislation in the workplace

Modification History

Release	Comments
Version 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and apply work health and safety (WHS) legislative requirements applicable to the workplace, occupation and industry, including keeping up to date with legislation and relevant publications
- identify and act on non-compliances with WHS legislation
- identify duty holders
- communicate WHS information to others
- refer issues of non-compliance to responsible persons or authorities and seek advice from appropriate sources.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain the WHS legislative duties of self and others including limits on own expertise
- outline the key organisational WHS policies, procedures, processes and systems
- outline the key requirements in relevant commonwealth and state or territory WHS Acts, regulations, codes of practice, standards and guidance material, and other relevant publications
- identify obligations and duties for consultation and who must be consulted
- identify people who could be accessed for help
- identify the consequences of non-compliance
- explain ways to get information about compliance with legislation.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational policies, standard operating procedures, procedures and plans with information on compliance requirements
- relevant Acts, regulations, codes of practice, licensing requirements and standards
- guidance materials and alerts issued by the relevant WHS regulator
- relevant WHS data files
- appropriate office equipment and resources.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBWHS404 Contribute to WHS hazard identification, risk assessment and risk control

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify and interpret information and data about work health and safety (WHS) requirements and apply it to the selection and application of techniques, tools and processes for hazard identification, risk assessment and risk control and the development of a risk control plan
- contribute to documenting and evaluating risk management processes
- communicate about WHS requirements and compliance with a range of people
- comply with WHS requirements for hazard identification, risk assessment and risk control activities
- identify WHS duty holders and their duties.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the WHS risk management (hazard identification, risk assessment and risk control) requirements specified in:
 - relevant WHS Acts and regulations
 - organisational WHS policies, procedures, processes and systems
- explain the difference between hazards and risks in the work context
- outline a range of common workplace hazards, the harms they may cause and how these harms are caused
- explain how risk assessment and controls can eliminate or minimise risks
- identify internal and external sources of WHS information and data and how to access them.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- office equipment and resources
- relevant legislation, standards and guidelines
- relevant policies, procedures, processes and systems
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

ELEMENT	PERFORMANCE CRITERIA
systematic management of WHS risk	objectives, principles and framework of a systematic approach to managing WHS risk
2 Contribute to effective consultation and participation during all stages of risk management	2.1 Identify individuals and parties who need to participate and be consulted 2.2 Apply knowledge of effective consultation and participation to contribute to ensuring effective consultation and participation processes occur
3 Contribute to establishing the context for risk management	3.1 Apply knowledge of WHS legislation to identify duty holders and legislative requirements for WHS risk management 3.2 Identify individuals and parties impacting on risk management 3.3 Apply knowledge of organisation to identify factors that will impact on risk control 3.4 Contribute to establishing the context of the risk management process 3.5 Contribute to defining risk criteria
4 Contribute to risk assessment	4.1 Apply knowledge of workplace hazards and risks to contribute to risk identification 4.2 Apply knowledge of WHS legislation, risk assessment and workplace WHS information and data to contribute to risk analysis and evaluation
5 Contribute to risk treatment	5.1 Apply knowledge of WHS hazard and risk control, and WHS legislation to contribute to the selection of risk treatment options 5.2 Apply knowledge of the organisation's WHS management system (WHSMS) and WHS information system (WHSIS) to prepare and implement risk treatment/s
6 Contribute to monitoring, reviewing and recording risk management process	6.1 Apply knowledge of the organisation's WHSMS to contribute to monitoring and reviewing risk management processes 6.2 Apply knowledge of the organisation's WHSIS to contribute to recording risk management process

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 3.1,	<ul style="list-style-type: none"> Organises, evaluates and integrates information from a range of sources to determine requirements
Writing	2.2, 3.4, 3.5, 4.2, 5.2, 6.2	<ul style="list-style-type: none"> Records results of investigations using clear and comprehensible language and layout Creates a range of formal texts using industry language appropriate to audience and environment
Oral Communication	2.2, 3.4, 3.5, 4.2	<ul style="list-style-type: none"> Uses listening and questioning techniques to clarify understanding and elicit the views of others Presents information varying level of technical vocabulary to suit audience
Numeracy	1.1, 4.1, 4.2, 6.1, 6.2	<ul style="list-style-type: none"> Collates, interprets and compares numerical and statistical information relevant to requirements
Navigate the world of work	3.1, 4.2, 5.1, 5.2, 6.1, 6.2	<ul style="list-style-type: none"> Considers legal and regulatory responsibilities when implementing, monitoring or reviewing risk management processes
Interact with others	2.2, 3.4, 3.5, 4.2	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with others Plays a lead role in situations requiring effective collaboration skills demonstrating the ability to guide discussions and negotiate outcomes
Get the work done	1.1, 1.2, 2.1, 3.1-3.3, 4.1, 4.2, 5.1, 5.2, 6.1, 6.2	<ul style="list-style-type: none"> Develops plans or processes to manage relatively complex risk management tasks, with an awareness of how they contribute to operational and strategic goals Considers whether, and how, others should be involved, using consultative or collaborative processes as an integral part of the decision-making process Applies problem solving processes to determine solutions to risk management issues Uses analytical and lateral thinking to review practices and suggest improvements Uses a range of digitally based technology and applications to access, organise and share relevant information in effective ways

Assessment Requirements for BSBWHS503 Contribute to the systematic management of WHS risk

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify, interpret and apply information from a range of sources to contribute to the development, implementation, monitoring and evaluation of a systematic approach to work health and safety (WHS) risk management
- apply WHS Acts, regulations codes of practice and standards, including the Safe Work Australia model Code of Practice: How to Manage Work Health and Safety Risks
- identify duty holders
- explain the differences between a hazard and a risk and identify hazards and risks in the organisation
- prepare an action plan to implement a systematic approach to WHS risk management
- prepare positive performance indicators for evaluation of a systematic approach to WHS risk management
- consult effectively with relevant stakeholders.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe formal and informal communication and consultation processes, and key personnel related to communication, including duty holders
- explain how the characteristics and composition of the workforce impact on WHS risk and the management of WHS with reference to:
 - communication skills
 - cultural background/diversity
 - gender
 - labour market changes

- language, literacy and numeracy
- structure and organisation of the workforce, for example part time, casual and contract workers, shift rosters, geographical location
- workers with specific needs and limitations
- workplace culture towards alcohol and other drug use
- describe internal and external sources of WHS information and data, and explain how to access these sources
- outline the limitations of generic hazard identification and risk assessment checklists, and risk ranking processes
- describe the nature of workplace processes including work flow, planning and control and hazards relevant to the workplace
- describe organisational behaviour and culture as it impacts on WHS, change and the work team
- describe the key features of organisational WHS policies, procedures, processes and systems
- identify other functional areas in the organisation that impact on the management of WHS
- outline the key features of relevant commonwealth and state/territory WHS Acts, regulations, codes of practice, standards and guidance material
- describe the key principles and/or practices of:
 - a systematic approach to managing WHS
 - duty of care including concepts of causation, foreseeability and prevention
 - incident causation and injury processes
- describe risk analysis and assessment techniques and tools, and their application and limitations
- explain risk, as the effect of uncertainty, on objectives
- explain the duty of persons conducting businesses or undertakings (PCBUs) in regard to risk management under WHS legislation
- describe the sources of occupational disease and their prevention
- describe standard industry controls for hazards
- describe techniques, tools and processes for identifying and controlling health and safety hazards and risks including :
 - hazard and risk checklists
 - hazard hunts
 - job safety analysis
 - manifests and registers including dangerous goods, hazardous chemicals and plant
 - safe work method statements
 - surveys using questionnaires, interviews and other survey techniques
 - workplace inspections and walk throughs
- describe the key features of the toxicology of hazardous chemicals and potential health effects in the workplace.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- relevant WHS legislation, standards, codes of practice and guidelines
- workplace policies and procedures and documentation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS508 Manage WHS hazards associated with plant

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to effectively manage work health and safety (WHS) hazards and to comply with WHS legislation as it applies to the management or control of plant (not the design, manufacture, supply, installation, construction or commissioning of plant or issuing of licences associated with plant).

It applies to individuals who may provide leadership and guidance to others using managerial and communication skills and who use systematic approaches to identify and resolve issues.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Comply with WHS	1.1 Apply knowledge of WHS legislation to advise individuals and

ELEMENT	PERFORMANCE CRITERIA
legislation as it applies to plant	<p>parties of their duties, rights and obligations with regard to plant as appropriate to their job roles and the nature of the organisation</p> <p>1.2 Ensure the management of hazards associated with plant, complies with relevant WHS legislation and organisational policies, procedures, processes and systems</p>
2 Ensure organisational policies, procedures, processes and systems incorporate effective management of hazards associated with plant	<p>2.1 Apply knowledge of organisational policies, procedures, processes and systems to determine if they effectively manage hazards associated with plant</p> <p>2.2 Develop and implement modifications to organisational policies, procedures, processes and systems as necessary to ensure hazards associated with plant are effectively managed</p> <p>2.3 Follow organisational policies, procedures, processes and systems when managing hazards associated with plant</p>
3 Identify WHS hazards associated with plant	<p>3.1 Access sources of information, data and advice to assist with identifying hazards associated with plant</p> <p>3.2 Identify and consult with others, as necessary, as part of hazard identification</p> <p>3.3 Record and report on hazard identification</p>
4 Assess WHS risks associated with plant	<p>4.1 Access sources of information, data and advice to assist with assessing WHS risks associated with plant hazards</p> <p>4.2 Identify and consult with others, as necessary, as part of WHS risk assessment</p> <p>4.3 Record and report on WHS risk assessments</p>
5 Control WHS risks associated with maintenance and continued safe use of plant	<p>5.1 Access sources of information, data and advice, including the outcomes of risk assessments to assist with developing risk control options for hazards associated with the maintenance and continued safe use of plant</p> <p>5.2 Identify, consult with and report to others as necessary, during all stages of risk control</p> <p>5.3 Develop risk control options and determine which options will be implemented</p> <p>5.4 Implement, evaluate and monitor risk controls</p> <p>5.5 Record and report on risk controls</p> <p>5.6 Review risks controls implemented and recommend improvements, where necessary</p>
6 Advise on registration,	6.1 Identify types of plant requiring registration and tasks requiring

ELEMENT	PERFORMANCE CRITERIA
licensing and certification issues associated with plant	<p>operator licensing and/or certification, in accordance with legislative requirements</p> <p>6.2 Document registration, licensing and certification requirements and communicate these to individuals and parties</p> <p>6.3 Identify, document and communicate to individuals and parties, training requirements to meet registration, licensing and certification, in accordance with legislative requirements</p> <p>6.4 Determine training needs required for new plant and/or new operating methods</p> <p>6.5 Ensure training is undertaken and completed prior to commencement of work using new plant and/or new operating methods</p> <p>6.6 Monitor and report compliance with regulatory requirements for registration, licensing and certification</p> <p>6.7 Identify, document and maintain appropriate records for plant and operator skill requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.1, 2.2, 3.1, 4.1, 5.1, 5.6, 6.1, 6.3, 6.7	<ul style="list-style-type: none"> Analyses a wide range of technical, non-technical information and numeric data to determine actions and adhere to requirements
Writing	1.1, 2.2, 3.2, 3.3, 4.3, 5.1-5.3, 5.5, 5.6, 6.2, 6.3, 6.6, 6.7	<ul style="list-style-type: none"> Matches style of writing to purpose and audience Uses appropriate formats, vocabulary and grammatical structures to record, report and present information
Oral Communication	1.1, 3.1-3.3, 4.1-4.3, 5.1, 5.2, 5.5, 5.6, 6.2, 6.3, 6.6	<ul style="list-style-type: none"> Explains information clearly and involves others in collaborative discussions using listening and questioning techniques Uses pace, intonation and gestures to present information and encourage engagement with others
Numeracy	2.1, 2.2, 3.1-3.3, 4.1, 5.1,	<ul style="list-style-type: none"> Collates, interprets and compares numerical and statistical information to apply relevance to requirements

Navigate the world of work	1.1, 1.2, 2.1-2.2, 6.1, 6.5	<ul style="list-style-type: none"> • Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulations • Modifies or develops organisational policies and procedures to comply with legislative requirements and organisation goals
Interact with others	1.1, 3.1-3.3, 4.1-4.3, 5.1, 5.2, 6.2, 6.3	<ul style="list-style-type: none"> • Establishes and uses appropriate conventions and protocols when communicating with others regarding management of WHS • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	2.2, 2.3, 3.1-3.3, 4.1-4.3, 5.1-5.6, 6.1-6.7	<ul style="list-style-type: none"> • Takes responsibility for developing and applying organisational processes to aid compliance with legislative requirements • Sequences and schedules complex activities, monitors implementation, records progress and manages relevant communication • Systematically gathers and analyses all relevant information and evaluates options in order to make informed decisions • Uses formal analytical thinking techniques for identifying issues and generating possible solutions, seeking input from others when necessary • Evaluates effectiveness of systems and processes to inform decisions on how to implement improvements • Fully utilises features of digital tools to complete complex tasks

Assessment Requirements for BSBWHS508 Manage WHS hazards associated with plant

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- manage effective identification of hazards and develop risk control options for the operation of plant as defined in work health and safety (WHS) legislation
- develop, implement, monitor and modify WHS policies and procedures for the operation of plant
- use relevant systems and procedures in the operation and maintenance of plant
- implement general licensing and training requirements associated with plant
- identify, record and report on WHS hazards and assessing risk
- develop and implement risk control options
- communicate in the workplace to:
 - advise people of their rights, obligations and duties
 - consult about policies and procedures
 - identify hazards
 - assess WHS risk
 - advise people about registration, licensing and certification requirements
- use machinery safety control measures to control plant risks, including following registration and licensing requirements
- identify training needs and organise training.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe the basic principles of incident causation and injury processes
- explain the differences between a hazard and a risk

- identify factors that impact on risk
- explain the hierarchy of control and considerations for choosing between different risk controls
- identify high-risk work licences required for specific plant
- identify internal and external sources of WHS information and data, and explain how to access these sources
- discuss the management of risk associated with plant as a duty of a person conducting a business or undertaking (PCBUs) under WHS legislation
- describe the methods for providing evidence of compliance with WHS legislation
- outline workplace processes (such as work flow, planning and control) and hazards relevant to the workplace
- discuss organisational behaviour and culture as it impacts on WHS, change and work team
- describe the key features of organisational WHS policies, procedures, processes and systems
- identify other functional areas that impact on the management of WHS
- outline key features of plant specific knowledge including:
 - basic physics of fluids under pressure and pressure vessels, and the behaviour of pressurised fluid when pressure is released
 - duties, rights and obligations of individuals and parties specified in WHS legislation
 - hazards associated with plant and systems of work associated with plant
 - industry practices related to permit to work and isolation and tag out systems
 - registration requirements of plant, licensing and certification competencies
- describe the key principles and practices of a systematic approach to managing WHS
- describe the strategies for guarding moving parts in machinery, human factors related to machine guarding, safe design principles, features and limitations
- outline the key features of WHS Acts, regulations, codes of practice and other instruments issued by WHS regulators.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- manufacturers' manuals including specifications and operational information and data
- relevant WHS Acts, regulations, codes of practice, standards, guidelines
- sources of information, data and advice
- workplace policies and procedures
- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR204 Use business technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to select and use computer software and organise electronic information and data.

It applies to individuals who apply a limited range of practical skills with a fundamental knowledge of equipment use and the organisation of data in a defined context, under direct supervision or with limited individual responsibility.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select and use technology	1.1 Select appropriate technology and software applications to achieve requirements of the task 1.2 Adjust workspace, furniture and equipment to suit user's ergonomic requirements 1.3 Use technology according to organisational requirements and in a way that promotes a safe work environment
2. Process and organise	2.1 Identify, open, generate or amend files and records according

ELEMENT	PERFORMANCE CRITERIA
data	<p>to task and organisational requirements</p> <p>2.2 Operate input devices according to organisational requirements</p> <p>2.3 Store data appropriately and exit applications without damage to or loss of, data</p> <p>2.4 Use manuals, training booklets and/or online help or helpdesks to overcome basic difficulties with applications</p>
3. Maintain technology	<p>3.1 Identify and replace used technology consumables in accordance with manufacturer's instructions and organisational requirements</p> <p>3.2 Carry out and/or arrange routine maintenance to ensure equipment is maintained in accordance with manufacturer's instructions and organisational requirements</p> <p>3.3 Identify equipment faults accurately and take action in accordance with manufacturer's instructions or report fault to designated person</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 2.1, 2.2, 2.4, 3.1-3.3	<ul style="list-style-type: none"> Recognises and interprets information from familiar sources to determine job role and task requirements
Writing	2.1, 2.3, 3.2, 3.3	<ul style="list-style-type: none"> Produces and amends files to meet task and organisational requirements Completes required documentation using organisational formats
Oral Communication	3.3	<ul style="list-style-type: none"> Uses specific and relevant language to refer faults to others
Navigate the world of work	1.2, 1.3, 2.1, 2.2, 3.1-3.3	<ul style="list-style-type: none"> Recognises and follows legislative requirements and organisational policies and procedures associated with own role
Get the work done	1.1, 1.3, 2.1-2.4, 3.1-3.3	<ul style="list-style-type: none"> Uses business technologies and systems safely, when gathering, storing, accessing and sharing information Understands purposes, specific functions and key

		features of common digital systems and business tools <ul style="list-style-type: none"> Operates digital systems and business tools effectively to complete routine tasks using some basic troubleshooting strategies as required

Assessment Requirements for BSBWOR204 Use business technology

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- select and use technology safely and according to organisational requirements
- access, retrieve and store required data
- demonstrate basic maintenance on a range of equipment using manuals or help-files
- identify and address faults according to requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the organisation's work health and safety requirements
- outline the organisation's requirements for file naming and storage
- explain why regular back-ups of data are done
- list 'routine maintenance' tasks
- summarise the procedure for addressing equipment faults.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability – workplace effectiveness field of work and include access to:

- office equipment and resources
- electronic files and data
- workplace documentation and equipment manuals
- case studies and, where possible, real situations

- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR404 Develop work priorities

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to monitor and obtain feedback on own work performance and access learning opportunities for professional development.

This unit applies to individuals who are required to design their own work schedules and work plans and to establish priorities for their work. They will typically hold some responsibilities for the work of others and have some autonomy in relation to their own role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and complete own work schedule	1.1 Prepare workgroup plans which reflect consideration of resources, client needs and workgroup targets 1.2 Analyse and incorporate work objectives and priorities into personal schedules and responsibilities

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Identify factors affecting the achievement of work objectives and establish contingencies and incorporate them into work plans</p> <p>1.4 Efficiently and effectively use business technology to manage and monitor planning completion and scheduling of tasks</p>
2. Monitor own work performance	<p>2.1 Identify and analyse personal performance through self-assessment and feedback from others on the achievement of work objectives</p> <p>2.2 Seek and evaluate feedback on performance from colleagues and clients in the context of individual and group requirements</p> <p>2.3 Routinely identify and report on variations in the quality of service and performance in accordance with organisational requirements</p>
3. Co-ordinate professional development	<p>3.1 Assess personal knowledge and skills against organisational benchmarks to determine development needs and priorities</p> <p>3.2 Research and identify sources and plan for opportunities for improvement in consultation with colleagues</p> <p>3.3 Use feedback to identify and develop ways to improve competence within available opportunities</p> <p>3.4 Identify, access and complete professional development activities to assist career development</p> <p>3.5 Store and maintain records and documents relating to achievements and assessments in accordance with organisational requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4	<ul style="list-style-type: none"> Develops strategies to reflect on own performance, obtain feedback, and plan and source professional development opportunities
Reading	1.2, 2.1, 2.3, 3.1, 3.5	<ul style="list-style-type: none"> Recognises and interprets textual information from relevant sources to understand organisation's policies and practices

Writing	1.1, 1.3, 2.2, 2.3, 3.2, 3.5	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	2.2, 2.3, 3.2	<ul style="list-style-type: none"> Provides or seeks information using language suitable to audience and context Employs listening and questioning techniques to confirm understanding
Numeracy	1.1, 1.2, 1.3	<ul style="list-style-type: none"> Interprets numerical information related to budgets and timeframes
Navigate the world of work	1.2, 2.1, 2.3, 3.1, 3.5	<ul style="list-style-type: none"> Identifies and understands roles and responsibilities in relation to organisational objectives, policies and procedures
Interact with others	2.2, 2.3, 3.2	<ul style="list-style-type: none"> Selects and uses appropriate practices when communicating with internal and external stakeholders to seek or share information Establishes and builds rapport and relationships with others to foster a culture of trust and honesty in communications
Get the work done	1.1-1.4, 2.3, 3.1, 3.2, 3.4, 3.5	<ul style="list-style-type: none"> Plans, organises and implements tasks to meet organisational requirements Systematically gathers and analyses information and evaluates options in order to anticipate potential problems and develop contingency plans Uses the main features and functions of digital technologies and tools to complete work tasks efficiently and effectively

Assessment Requirements for BSBWOR404 Develop work priorities

Modification History

Release	Comments
Release 2	This version first released with BSB Business Services Training Package Version 1.1. Version created to correct mapping table information
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare and communicate own work plan
- schedule work objectives and tasks to support the achievement of the workgroup goals
- review own work performance against workgroup objectives through self-assessment and seeking and acting on feedback from clients and colleagues
- plan and access learning opportunities to extend personal work competencies.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how business technology applications can be used to schedule tasks and plan work
- explain techniques to prepare personal plans and establish priorities
- identify methods to identify and prioritise personal learning needs
- outline a range of professional development options
- explain methods to elicit, analyse and interpret feedback
- provide a detailed explanation of methods that can be used to evaluate own performance.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documentation including policies and procedures, and benchmarks for work group productivity and performance
- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create systems and process to organise information and prioritise tasks.

It applies to individuals working in managerial positions who have excellent organisational skills. The work ethic of individuals in this role has a significant impact on the work culture and patterns of behaviour of others as managers at this level are role models in their work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish personal work goals	1.1 Serve as a positive role model in the workplace through personal work planning 1.2 Ensure personal work goals, plans and activities reflect the organisation's plans, and own responsibilities and accountabilities 1.3 Measure and maintain personal performance in varying work conditions, work contexts and when contingencies occur

ELEMENT	PERFORMANCE CRITERIA
2. Set and meet own work priorities	<p>2.1 Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives</p> <p>2.2 Use technology efficiently and effectively to manage work priorities and commitments</p> <p>2.3 Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to</p>
3. Develop and maintain professional competence	<p>3.1 Assess personal knowledge and skills against competency standards to determine development needs, priorities and plans</p> <p>3.2 Seek feedback from employees, clients and colleagues and use this feedback to identify and develop ways to improve competence</p> <p>3.3 Identify, evaluate, select and use development opportunities suitable to personal learning style/s to develop competence</p> <p>3.4 Participate in networks to enhance personal knowledge, skills and work relationships</p> <p>3.5 Identify and develop new skills to achieve and maintain a competitive edge</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Investigates and uses a range of strategies to develop personal competence
Reading	1.2, 3.1, 3.2	<ul style="list-style-type: none"> Analyses and interprets textual information from organisational policies and practices or feedback to inform personal development planning
Writing	3.2	<ul style="list-style-type: none"> Uses feedback to prepare reports that summarise ways to improve competence
Oral Communication	3.2	<ul style="list-style-type: none"> Uses active listening and questioning to seek and receive feedback
Navigate the world of work	1.2, 2.1	<ul style="list-style-type: none"> Understands how own role contributes to broader organisational goals Considers organisational protocols when planning own career development

Interact with others	1.1, 3.2, 3.4	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders Uses interpersonal skills to establish and build positive working relationships with others
Get the work done	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.1	<ul style="list-style-type: none"> Plans and prioritises tasks in order to meet deadlines, manage role responsibilities and to manage own personal welfare Identifies and uses appropriate technology to improve work efficiency

Assessment Requirements for BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use business technology to create and use systems and processes to organise and prioritise tasks and commitments
- measure and maintain personal work performance including assessing competency against competency standards and seeking feedback
- maintain an appropriate work-life balance to manage personal health and stress
- participate in networks
- develop a personal development plan which includes career objectives and an action plan
- develop new skills.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain principles and techniques involved in the management and organisation of:
 - performance measurement
 - personal behaviour, self-awareness and personality traits identification
 - a personal development plan
 - personal goal setting
 - time
- discuss management development opportunities and options for self
- describe methods for achieving a healthy work-life balance
- outline organisation's policies, plans and procedures
- explain types of learning style/s and how they relate to the individual
- describe types of work methods and practices that can improve personal performance.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

CHCCDE002 Develop and implement community programs

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p>

Application

This unit describes the skills and knowledge required to develop community programs to ensure maximum participation.

This unit applies to workers in both health and community sectors and/or a community development work context. Workers at this level will be part of a professional team and have the responsibility of supervision of others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

Elements define the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|-------------------------------|--|
| 1. Develop program parameters | <p>1.1 Analyse issues of wide community concern to develop an agency position and to ascertain the priority for new program</p> <p>1.2 Undertake appropriate work to ascertain support, capacity for a coordinated effort and factors which will effect provision of services</p> <p>1.3 Undertake research to identify key people, priorities to be addressed, possible strategies and options for action</p> <p>1.4 Identify measures and evidence of program plan</p> |
|-------------------------------|--|

success and possible risks

1.5 Develop appropriate plans via participation of relevant communities and stakeholders

2. Design programs with the community

2.1 Develop a program plan which reflects identified parameters and incorporates an evaluation of a range of program options within organisation policy

2.2 Engage stakeholder participation to determine preferred program options particularly in areas of high priority or with targeted communities

2.3 Seek help from participating agencies for implementation arrangements

2.4 Develop and implement promotion and marketing strategies

2.5 Develop and maintain systems and resources for administrative support of community programs

2.6 Identify and seek resources

3. Implement programs

3.1 Conduct and evaluate pilots and make adjustments to ensure the program achieves its objectives

3.2 Implement and monitor in accordance to the plan

4. Evaluate programs

4.1 Evaluate program design and outcomes according to criteria and specifications identified in the program plan

4.2 Use results of evaluation for revision and ongoing development

4.3 Involve interested and/or relevant people in program evaluation

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit

Assessment Requirements for CHCCDE002 Develop and implement community programs

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed, implemented and evaluated at least 1 community program

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- relevant legislation and public policies
- social, community and youth issues
- contemporary economics and politics and their impact on community development
- traditional community development approaches:
 - needs-based
 - gap-based
- principles and practices of contemporary community development approaches and techniques for mobilisation in relation to:
 - asset-based (ABCD)
 - rights-based
- social movements
- sociology fundamentals, including:
 - commonly accepted social theories
 - social inequality

- sociology of class
- sociology of gender, including impacts of culture on gender dynamics

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCCDE010 Develop and lead community engagement strategies to enhance participation

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p> <p>Significant changes to knowledge evidence</p>

Application

This unit describes the skills and knowledge required to apply advanced community engagement skills to increase participation in the community development environment.

The high level engagement skills described in this unit apply to a range of workplace contexts involving skill development, application and evaluation of engagement strategies to ensure effective community participation in relevant projects and activities.

This unit applies to workers in both health and community sectors and/or a community development work context. Workers at this level will be part of a professional team and have the responsibility of supervision of others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT

Elements define the essential outcomes

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

ELEMENT

PERFORMANCE CRITERIA

1. Develop an effective community engagement plan

- 1.1 Document the purpose and scope of the community engagement
- 1.2 Identify and document relevant stakeholders and individuals who should be involved in the engagement process
- 1.3 Analyse and determine the level of impact that stakeholders have in any decisions and the level of public participation required
- 1.4 Specify the engagement tools and methods to be used within specified timeframes and considering any specific barriers to participation
- 1.5 Identify and document evaluation mechanisms
- 1.6 Develop a budget proposal
- 1.7 Present the completed plan to management and the community for revision and endorsement

2. Implement the engagement plan

- 2.1 Organise the participation activity according to the plan
- 2.2 Proactively identify and address the specific priorities of individuals who are disengaged
- 2.3 Promote participation to the relevant stakeholders using appropriate communication methods
- 2.4 Undertake the engagement activity using relevant tools and techniques
- 2.5 Encourage all group members to contribute their ideas constructively and respectfully during group discussions
- 2.6 Routinely use strategies that enhance effective group interactions and communication
- 2.7 Respond to questions in a manner consistent with organisation standards
- 2.8 Document the participation feedback from participants
- 2.9 Conduct an evaluation of the participation activities

3. Evaluate and review the outcomes and effectiveness of

- 3.1 Review the engagement activities in comparison with the plan objectives

ELEMENT

the participation plan

PERFORMANCE CRITERIA

3.2 Document the outcomes and evaluation feedback

3.3 Report this information to relevant stakeholders

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit

Assessment Requirements for CHCCDE010 Develop and lead community engagement strategies to enhance participation

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p> <p>Significant changes to knowledge evidence</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- developed 1 engagement plan
- facilitated at least 3 group discussions, including:
 - used a range of group facilitation strategies to enhance interactions between group members and to gather relevant feedback
 - provided feedback to the group regarding outcomes

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively do the task outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- communication styles and techniques
- group facilitation processes and mechanisms for group support
- principles of effective community engagement and participation
- traditional and contemporary models of engagement
- community engagement techniques including online tools and use of social media
- methods of research
- sustainability
- empowerment; community control and hegemony

- capacity building
- asset based community development
- methods of engagement and participation
- evaluation and review
- building and maintaining partnerships
- social capital
- reporting mechanisms
- reengagement strategies for individuals who are disengaged

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors

CHCCDE012 Work within organisation and government structures to enable community development outcomes

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p> <p>Significant changes to knowledge evidence</p>

Application

This unit describes the skills and knowledge required to work within community and government structures to enable community development processes.

This unit applies to workers in both health and community sectors and/or a community development work context. Workers at this level will be part of a professional team and have the responsibility of supervision of others.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Work within the structures and process of the organisation

1.1 Identify and work within the management and governance structure, philosophy and purpose of own organisation

1.2 Work within lines of decision-making and accountability in contributing to planning processes in relation to

ELEMENT

PERFORMANCE CRITERIA

	organisation's community development activities
	1.3 Ensure decisions and processes are documented and accessible to all involved
2. Assess extent to which organisation supports community development work	<p>2.1 Plan for aspects of the management structure, philosophy and purpose, governance structures, policies and procedures which are supportive of community development work</p> <p>2.2 Plan for aspects of the management structure, philosophy and purpose, governance structures, policies and procedures which may create barriers to community development work</p>
3. Utilise all levels of government for community development activities and projects	<p>3.1 Research all levels of government that provide community funding</p> <p>3.2 Identify current and possible future funding sources for community resources and programs</p> <p>3.3 Plan for government policy barriers and, with community members, identify strategies to support change</p> <p>3.4 Develop strategic alliances between organisation, community members and relevant government agencies to support community development activities</p> <p>3.5 Proactively seek opportunities to influence government decision and policy making in line with community issues and priorities</p> <p>3.6 Ensure community development activities and projects adhere to relevant commonwealth, state/territory and local government legal requirements</p> <p>3.7 Regularly update information about current legal requirements and if appropriate, develop proposals to modify organisation policy and procedures in relation to community development activities</p>
4. Maintain the profile of community development work within the organisation	<p>4.1 Use formal and informal networks to communicate the organisation's community development activities and achievements</p> <p>4.2 Use a range of communication media and activities to convey information about community development activities and achievements of the organisation to encourage support</p>

ELEMENT

PERFORMANCE CRITERIA

and interest

4.3 Seek and utilise opportunities to promote the organisation and its community development work and activities

4.4 Display confidentiality and sensitivity in details, content and extent of public comment on organisation's activities

5. Maintain management support for community development activities and projects

5.1 Identify and advise management of political, social, cultural and economic trends that may impact on community development activities and projects

5.2 Ensure community development activities and project work is within the policies and procedures of the organisation

5.3 Promptly address problems in implementing defined procedures to ensure resolution

5.4 Identify and seek to resolve conflict between organisation policies and community or public issues

5.5 Ensure information about community development activities and projects is provided within the management structures to facilitate effective and informed deliberations and decision-making

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit

Assessment Requirements for CHCCDE012 Work within organisation and government structures to enable community development outcomes

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p> <p>Significant changes to knowledge evidence</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be demonstrated evidence that the candidate has:

- identified aspects of at least 1 organisation's structure and philosophy which support community development work and the potential implicit barriers to that work
- prepared at least 1 report on community development activities and projects in a comprehensive and accurate manner and presented to relevant stakeholders and management

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage the task and manage contingencies in the context of the work role. This includes knowledge of:

- relevant legislation and public policies
- structures and systems that support or present barriers to community development
- principles of participatory democracy
- range of management and governance structures operating with the community services industry
- social, economic, political, cultural and economic development
- all possible funding sources

- critical theories for analysing human service organisations
- critique of managerial approaches including:
 - management systems and principles
 - performance standards
 - service quality development
 - consumer focus
 - enterprise agreements
 - performance monitoring and review
- change management principles

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CHCVOL003 Recruit, induct and support volunteers

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p> <p>Significant changes to knowledge evidence</p>

Application

This unit describes the skills and knowledge required to recruit, orientate, develop and support volunteer workers in an agency, service or program. Workers at this level will be responsible for the ongoing coordination and supervision of volunteers who may be working in a range of contexts.

This unit applies to a range of sectors.

The skills in this unit must be applied in accordance with Commonwealth and State/Territory legislation, Australian/New Zealand standards and industry codes of practice.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Plan and develop a volunteer recruitment program

1.1 Develop and implement processes and procedures to support the identification of volunteer roles

1.2 Apply models of volunteering to develop volunteering roles within the organisation

1.3 Plan and develop recruitment, selection and induction policies and procedure

ELEMENT**PERFORMANCE CRITERIA**

Elements define the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

2. Select and induct volunteers

- 2.1 Develop appropriate advertising strategies ensuring compliance with organisation policy and legal requirements
- 2.2 Undertake appropriate screening, interviewing and selection processes
- 2.3 Develop and implement volunteer induction program

3. Develop and implement volunteer support systems

- 3.1 Develop and implement training appropriate for volunteer roles
- 3.2 Establish and maintain regular communication with volunteers
- 3.3 Regularly review roles and performance and provide feedback to the volunteer
- 3.4 Review recruitment, induction and support systems and identify areas for continuous improvement

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for CHCVOL003 Recruit, induct and support volunteers

Modification History

Release	Comments
Release 1	<p>This version was released in <i>CHC Community Services Training Package release 2.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to performance criteria</p> <p>New evidence requirements for assessment including volume and frequency requirements</p> <p>Significant changes to knowledge evidence</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- planned and implemented all aspects of the recruitment of 2 volunteers
- developed and implemented 1 induction program for volunteers, that included:
 - organisation purpose and services
 - role of volunteers in the organisation
 - insurance
 - rights & responsibilities of all parties including work health and safety (WHS)
 - organisation structure and lines of communication and authority
 - expenses and reimbursements processes
 - relevant policies and procedures and codes of conduct
- conducted a performance review for 1 volunteer

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- relevant legislation and public policies relating to the employment of unpaid workers
- rights and responsibilities of both organisation and volunteer
- implications of differences in attitudes and values in working in the organisation

- *Universal declaration on volunteering* and current national volunteering codes and standards
- definitions of volunteering
- paid versus unpaid role responsibilities and the delineation of these roles
- structure of volunteer sector including support and recruitment agencies
- role of government and government bodies in volunteering
- motivations of volunteers, what can de-motivate volunteers and how volunteer motivation changes over time
- different models of volunteering taken from an organisation perspective, including the involvement of volunteers as service providers, fundraisers, corporate volunteering, activist and in community development
- range of diverse sectors and roles where volunteers are involved
- screening processes, including police checks, interviews, application forms, referee checks and meetings
- current trends and issues in volunteering
- engagement strategies for volunteering
- performance appraisal methods and techniques
- recognition and rewards for volunteers

Assessment Conditions

Skills must have been demonstrated in the workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as, using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

CPCCCM2010B Work safely at heights

Modification History

Photovoltaic (solar) panels added to range statement

Equivalent to CPCCCM2010A

Unit Descriptor

This unit of competency specifies the outcomes required to work safely on construction sites where the work activity involves working above 1.5 metres from ground level and where fall protection measures are required.

Application of the Unit

Construction work is undertaken on domestic and commercial work sites within new construction, renovation or refurbishment, and maintenance.

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

CPCCOHS2001A Apply OHS requirements, policies and procedures in the construction industry

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|----------------------------------|-----|---|
| 1 | Identify work area requirements. | 1.1 | Site of proposed <i>work at heights</i> is identified from relevant <i>information</i> . |
| | | 1.2 | Method of accessing work area is identified. |
| | | 1.3 | Tasks to be completed are identified from work orders and supervisor instructions. |
| | | 1.4 | Fall protection equipment is identified if required by site job <i>workplace health and safety (WHS)</i> analysis and <i>statutory and regulatory</i> requirements. |
| | | 1.5 | Approved methods of moving tools and equipment to work area are identified to minimise potential of falling objects, removal of scaffold components, inappropriate carrying of materials on ladders, and excessive bending or twisting in pass-up situations. |
| 2 | Access work area. | 2.1 | Fall protection equipment where required is correctly fitted, adjusted and anchored. |
| | | 2.2 | Arrangements are made to appropriately install required equipment taking account of all potential <i>hazards</i> . |
| | | 2.3 | Appropriate methods are used to access work area for self, <i>tools and equipment</i> , and <i>materials</i> . |
| | | 2.4 | Tools and materials are placed to eliminate or at least minimise the risk of items being knocked down. |
| 3 | Conduct work tasks. | 3.1 | Work is conducted following workplace approved procedures. |
| | | 3.2 | Fall protection equipment is kept in place and adjusted appropriately to cater for movement during work. |
| | | 3.3 | Scaffold components and fall barriers are kept in place during work. |
| | | 3.4 | Egress from work area is completed following work site supervisor approved methods for self, tools, materials |

and *environmental requirements*.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- quality requirements
- types, characteristics, uses and limitation of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan, OHS regulations and state and territory legislation applicable to workplace operations
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- select and use appropriate height access and fall protection equipment and work methods, including inspecting fall protection equipment, scaffold and fall barriers for faults
- apply knowledge of industry products to identify:
 - manual handling risks
 - types of lifting and support structures approved for use
- modify work activities to cater for variations in work site procedures, contexts and environment and use appropriate behaviour for safe work at heights
- use safe handling requirements, based on information provided, for equipment, products and materials.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement

- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning

experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work at heights includes:

- assessment of conditions and hazards
- determination of work requirements
- identification of equipment defects
- inspection of work sites.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- material safety data sheets (MSDS)
- memos
- signage
- verbal or written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

Workplace health and safety is to be in accordance with state or territory legislation and regulations, organisational safety policies and procedures, and project safety plan

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control

and may include:

- hazardous materials and substances
- safe operating procedures, including the conduct of operational risk assessment and treatments associated with:
 - earth leakage boxes
 - lighting
 - photovoltaic (solar) panels
 - power cables, including overhead service trays, cables and conduits
 - restricted access barriers
 - surrounding structures
 - traffic control
 - trip hazards
 - work site visitors and the public
 - working in confined spaces
 - working in proximity to others
 - working with dangerous materials
- organisational first aid
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- relevant OHS legislation applying in the jurisdiction where work is carried out, including:
 - AS6001 - 1999 Working platforms for domestic application
 - AS1576 - Scaffolding
 - AS/NZS4576 - 1995 Guidelines for scaffolding
- use of tools and equipment
- workplace environment and safety.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

Hazards include:

- air temperature
- construction activity involving other workers and contractors
- dust and vapours
- electrical equipment
- energy sources
- equipment and materials
- hazardous materials

- light
- manual handling
- moisture
- noise
- photovoltaic (solar) panels
- stationary and moving plant
- work at heights.

Tools and equipment include:

- air compressors and hoses
- hand and power tools
- nail guns
- power leads
- scaffolding.

Materials include:

- materials used on the construction work site.

Environmental requirements include:

- clean-up management
- noise and dust
- vibration
- waste management.

CPCCCM3001C Operate elevated work platforms

Modification History

Prerequisite unit identifier code updated

Equivalent to CPCCCM3001B

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to safely and effectively operate some types of elevated work platforms (EWPs) in a variety of different terrains and situations to access isolated work areas. The unit includes locating, setting up, operating and shutting down EWPs.

In addition to achievement of this competency, an EWP operator may need to obtain additional certification of training and experience before being allowed to operate the equipment.

Application of the Unit

Application of the unit

This unit of competency assists in the safe and effective operation of electrical, hydraulic or mechanical EWPs. The unit does not cover powered telescoping devices, hinged devices or articulated devices, or any combination of these used to support a platform on which personnel, equipment and materials may be elevated to perform work and which has a boom length of 11 metres or more. An OHS authority Certificate of Competency may be required to operate boom type EWPs of 11 metres or more in some jurisdictions.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	<p>1.1. <i>Work planning and preparation</i> are conducted using plans, specifications, quality requirements and operational details, obtained, confirmed and applied from relevant <i>information</i>.</p> <p>1.2. <i>Safety (OHS)</i> requirements for the <i>types of EWP</i> to be operated are followed in accordance with safety plans and policies.</p> <p>1.3. Signage and barricade requirements are identified and implemented.</p> <p>1.4. Plant, <i>tools and equipment</i> and <i>personal protective equipment</i> are selected to carry out tasks are consistent with job requirements, checked for serviceability, and any faults are rectified or reported prior to commencement.</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>1.5. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.</p> <p>1.6. Environmental requirements are identified for the project in accordance with environmental plans and statutory and regulatory authority obligations, and are applied.</p>
<p>2. Conduct routine checks of platform.</p>	<p>2.1. Power source is determined and connected to platform equipment according to manufacturer specifications.</p> <p>2.2. Routine pre-operational equipment checks are carried out in accordance with checklist from operator's manual or manufacturer specifications.</p> <p>2.3. Equipment is switched on in accordance with start up procedures and controls are checked for correct operation and ease of movement.</p> <p>2.4. Emergency safety devices are checked to comply with instructions from operator's manual and checked for manual operation.</p> <p>2.5. Work location is checked for level ground or floor surface to determine stabilising and safe working area requirements.</p>
<p>3. Locate equipment in place for work application.</p>	<p>3.1. Platform is positioned for work application and stabilisers are engaged to set equipment base level into place according to safe operating procedures.</p> <p>3.2. Tools, equipment and materials are placed into bucket or on platform according to job application requirements.</p>
<p>4. Elevate platform to work location.</p>	<p>4.1. Harness is fitted securely and lanyard connected to attachment point.</p> <p>4.2. EWP operation and controls are operated to manufacturer recommendations and platform is elevated to work position.</p> <p>4.3. Power is switched off where specified and locking devices are engaged according to operator's manual.</p> <p>4.4. Work is carried out to job specification and safety (OHS) requirements of operator's manual.</p>
<p>5. Lower platform and shut down.</p>	<p>5.1. Controls are operated to manufacturer recommendations and platform is lowered to down position.</p> <p>5.2. Shut down procedures are carried out to operator's manual and equipment is switched off.</p>

ELEMENT**PERFORMANCE CRITERIA**

-
- | | |
|--------------|---|
| 6. Clean up. | 6.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification. |
| | 6.2. Plant, tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices. |
| | 6.3. Work completion procedures are applied and relevant personnel notified that work is finished. |

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - determine requirements
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - documentation from a variety of sources
 - drawings and specifications
 - report faults
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
 - written skills to complete inspection log and handover
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- numeracy skills to apply measurements and make calculations
- organisational skills, including the ability to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:

REQUIRED SKILLS AND KNOWLEDGE

- use a range of mobile technology, such as two-way radio and mobile phones
- voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- designs, functions and operational limitations of EWP equipment
- EWP equipment types and OHS authority certification of competency requirements
- EWP techniques
- fault finding and identification
- general construction terminology
- job safety analysis (JSA) and safe work method statements
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, specifications and drawings
- processes for the calculation of load mass requirements
- quality requirements
- relevant Acts, regulations and codes of practice
- safe working at heights
- signalling methods and communications
- types, characteristics, uses and limitations of plant, tools and equipment
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment

A person who demonstrates competency in this

EVIDENCE GUIDE

and evidence required to demonstrate competency in this unit

unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures, including quality requirements
- safely and effectively use tools, plant and equipment
- communicate and work effectively and safely with others
- complete set up and operation of a range of EWPs as listed in the range statement, including all functions.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources,

EVIDENCE GUIDE

and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training

EVIDENCE GUIDE

staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work planning and preparation include:

- assessment of conditions and hazards
- consideration that EWPs must not be operated anywhere with overhead powerlines above, or within specified clearance distances set out in documentation such as Electrical Safety - Power line NO GO Zones, unless permission has been obtained from the power authority and a JSA has been developed
- determination of work requirements
- equipment defect identification
- work site inspection.
- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions where specified
- MSDS
- memos
- regulatory and legislative requirements pertaining to EWPs
- relevant Australian standards
- safe work procedures related to operating EWPs, including the safe working load written on the EWP which must be checked to ensure it is not exceeded
- signage
- verbal or written and graphical instructions
- work bulletins

Information includes:

RANGE STATEMENT

Safety (OHS) is to be in accordance with legislation, regulations, codes of practice, organisational safety policies and procedures, and project safety plan and may include:

- work schedules, plans and specifications.
- procedures related to equipment operation, including emergency shutdown and stopping, extinguishing equipment fires, organisational first aid requirements and evacuation
- handling of materials
- hazard control
- hazardous materials and substances
- organisational first aid
- personal protective clothing and equipment
- use of firefighting equipment
- use of tools and equipment
- workplace environment and safety.

Types of EWP:

- EWPs include scissor lifts, boom and knuckle boom lifts with a boom length under 11 metres
- EWPs are classified as:
 - trailer mounted boom lift (TL)
 - self-propelled boom lift (BL)
 - vertical lift (VL)
 - scissor lift (SL)
 - truck-mounted boom lift (TM), which is not covered by this unit of competency.

Tools and equipment include:

- EWPs, extension leads, logbooks, service manuals, operation manuals, safety harnesses and lanyards
- special attachments, which may have to be installed if equipment is to be shifted with the EWP, as lifting loads via cables and ropes from an EWP is not permitted.

Personal protective equipment includes:

- that prescribed under legislation, regulations, codes of practice and workplace policies and practices.

Environmental requirements include:

- clean-up protection
- noise and dust
- sedimentation control
- vibration
- waste management.

Statutory and regulatory authorities include:

- federal, state and local authorities administering applicable Acts, regulations and codes of practice.

RANGE STATEMENT

- Emergency safety devices*** include:
- bleed valves
 - electronic override
 - emergency descent devices
 - ground controls
 - hydraulic accumulators.
- Safe operating procedures*** include:
- conduct of operational risk assessment and treatments associated with:
 - earth leakage boxes
 - lighting
 - power cables, including overhead service trays, cables and conduits
 - restricted access barriers
 - surrounding structures
 - traffic control
 - trip hazards
 - work site visitors and the public
 - working at heights
 - working in confined spaces
 - working in proximity to others
 - working with dangerous materials
 - not using slab terrain EWPs on any surface other than concrete or level asphalt.
- Harnesses*** include:
- energy or shock absorbers that must be used with all fall arrest lanyard, harness and inertia reel systems
 - full body rescue harness
 - lanyards and inertia reels, which should be attached to the harness installed so that the maximum distance a person equipped with a harness would free fall before the fall arrest system takes effect is 2 metres.
- EWP operation*** includes:
- boom up and down
 - operate attachments
 - operate outriggers
 - slew left and right
 - telescope in and out.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Plan and prepare.	<p>1.1. Work instructions and operational details are obtained using relevant <i>information</i>, confirmed and applied for <i>planning and preparation</i> purposes.</p> <p>1.2. <i>Safety (OHS)</i> requirements are followed in accordance with safety plans and policies.</p> <p>1.3. Signage and barricade requirements are identified and implemented.</p> <p>1.4. <i>Tools and equipment</i> selected to carry out tasks are consistent with the requirements of the job, checked for serviceability and any faults are rectified or reported prior to commencement.</p> <p>1.5. Materials quantity requirements are calculated in accordance with plans, specifications and <i>quality requirements</i>.</p> <p>1.6. Materials appropriate to the work application are identified, obtained, prepared, safely handled and located ready for use.</p> <p>1.7. <i>Environmental requirements</i> are identified for the project in accordance with environmental plans and regulatory obligations and applied.</p>
2. Select dogging equipment.	<p>2.1. Resources, materials and equipment are selected and inspected for compliance with job specifications.</p> <p>2.2. Job sequencing schedule is communicated with team</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>members and others to ensure coordination.</p> <p>2.3. Load mass is <i>calculated</i> and confirmed using load charts and standard calculations.</p> <p>2.4. Loads in <i>slings</i> and equipment are calculated to suit job requirements.</p>
3. Sling loads.	<p>3.1. <i>Lifting devices</i> are assembled and erected for the movement of load.</p> <p>3.2. Using appropriate <i>load slinging method</i>, loads are slung to <i>crane</i> ready for lifting.</p>
4. Shift loads.	<p>4.1. Loads are shifted ensuring stability and in compliance with work method statement.</p> <p>4.2. Load is directed to landing position using communications in compliance with Australian standards and recognised work practices.</p> <p>4.3. Load is landed in required position on packing or bearers.</p>
5. Remove dogging equipment.	<p>5.1. Load shifting equipment is dismantled and inspected for wear.</p> <p>5.2. Logbook and site records are completed to company requirements.</p>
6. Clean up.	<p>6.1. Work area is cleared and materials disposed of, reused or recycled in accordance with legislation, regulations, codes of practice and job specification.</p> <p>6.2. Tools and equipment are cleaned, checked, maintained and stored in accordance with manufacturer recommendations and standard work practices.</p> <p>6.3. Work completion procedures are applied and relevant personnel notified that work is finished.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

REQUIRED SKILLS AND KNOWLEDGE

- communication skills to:
 - determine requirements
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - read and interpret:
 - documentation from a variety of sources
 - drawings and specifications
 - report faults
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
- evaluating own actions and making judgments about performance and necessary improvements
- identifying and accurately reporting to appropriate personnel any faults in tools, equipment or materials
- organisational skills, including the ability to plan and set out work
- recognising procedures, following instructions, responding to change and contributing to workplace responsibilities, such as current work site environmental and sustainability frameworks or management systems
- teamwork skills to coordinate own work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technological skills to:
 - use a range of mobile technology, such as two-way radio and mobile phones
 - voice and hand signals to access and understand site-specific instructions.

Required knowledge

Required knowledge for this unit is:

- crane operations and limitations
- designs and functions of lifting equipment
- dogging equipment
- dogging techniques
- elevated work platforms
- general construction terminology
- job safety analysis (JSA) and safe work method statements
- logbooks
- material safety data sheets (MSDS)
- materials storage and environmentally friendly waste management
- plans, drawings and specifications
- processes for the calculation of material requirements

REQUIRED SKILLS AND KNOWLEDGE

- quality requirements
- relevant Acts, regulations and codes of practice
- safe working at heights and fall arrest
- safe working load tags
- signalling methods and communications
- types, characteristics, uses and limitations of plant, tools and equipment
- weather and ground considerations
- workplace and equipment safety requirements.

Evidence Guide

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment, provided that simulated or project-based assessment techniques fully replicate construction workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications
- comply with site safety plan and OHS legislation, regulations and codes of practice applicable to workplace operations
- comply with organisational policies and procedures including quality requirements
- safely and effectively operate and use tools, plant and equipment
- communicate and work effectively and safely with others
- as a minimum, read tags, sling, load, direct and land loads in conjunction with a slewing

EVIDENCE GUIDE

mobile crane with a telescopic boom and a winch, out of sight for:

- rigid heavy loads to two thirds capacity of the crane
- luff movements, boom retract and boom extend, slew right and slew left, winch up and down in combination
- a flexible load with a minimum of three lifting points
- using hand signals and whistle from minimum radius to maximum radius.

Context of and specific resources for assessment This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the mandatory task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of

EVIDENCE GUIDE

the Construction, Plumbing and Services Training Package

- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Information includes:

- diagrams or sketches
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions, where specified
- MSDS
- memos
- regulatory and legislative requirements pertaining to performing dogging
- relevant Australian standards
- safe work procedures relating to performing dogging
- signage
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.
- assessment of conditions and hazards
- determination of work requirements and safety plans and policies
- equipment defect identification
- work site inspection.

Planning and preparation include:

Safety (OHS) is to be in accordance with state and territory legislation and regulations and project safety plan and may include:

- emergency procedures, including extinguishing fires, organisational first aid requirements and evacuation
- handling activities that may require the assistance of others or the use of manual or mechanical lifting devices where size, weight or other issues, such as a disability are a factor
- hazard control
- hazardous materials and substances
- organisational first aid
- PPE prescribed under legislation, regulations and workplace policies and practices
- safe operating procedures, including the

RANGE STATEMENT

conduct of operational risk assessment and treatments associated with:

- earth leakage boxes
- lighting
- power cables, including overhead service trays, cables and conduits
- restricted access barriers
- surrounding structures
- traffic control
- trip hazards
- work site visitors and the public
- working at heights
- working in confined spaces
- working in proximity to others
- use of firefighting equipment
- use of tools and equipment
- workplace environmental requirements and safety.

Tools and equipment include:

- brick cages
- kibbles
- personnel cages
- rescue cages
- rubbish bins
- spreader bars and beams.

Quality requirements include:

- internal company quality policy and standards
- manufacturer specifications, where specified
- relevant regulations, including Australian standards
- workplace operations and procedures.

Environmental requirements include:

- clean-up management
- noise
- vibration
- waste management.

Calculations include:

- delivery dockets
- load charts
- load share
- pre-cast compliance charts
- safe working loads
- standard calculations.

RANGE STATEMENT

- Slings*** include:
- chain
 - flexible steel wire rope
 - natural or synthetic fibre.
- Lifting devices***:
- include:
 - eye bolts
 - lifting clutches
 - shackles
 - snatch blocks
 - tags
 - may include:
 - collared eye bolts
 - equalizing sheaves
 - lifting lugs
 - rigging screws
 - turn buckles.
- Load slinging methods*** include:
- straight sling
 - adjustable sling
 - reeved sling
 - inclined sling.
- Cranes*** include:
- fixed cranes
 - hydraulic mobile cranes
 - lattice boom mobile cranes
 - slewing cranes
 - tower cranes.

Unit Descriptor

Unit descriptor

This unit of competency specifies the outcomes required to undertake Occupational Health and Safety (OHS) induction training within the construction industry.

It requires the ability to demonstrate personal awareness of OHS legislative requirements, and the basic principles of risk management and prevention of injury and illness in the construction industry.

Licensing requirements will apply to this unit of competency depending on the regulatory requirements of each jurisdiction.

Application of the Unit

Application of the unit

This unit of competency supports the attainment of the basic OHS knowledge required prior to undertaking designated work tasks within any of the sectors within the construction industry. The unit relates directly to the general induction training program specified by the *National Code of Practice for Induction for Construction Work* (ASCC 2007).

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency. Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify OHS legislative requirements.	<p>1.1. Applicable <i>OHS legislative requirements</i> relevant to own work, role and responsibilities are identified and explained.</p> <p>1.2. Duty of care requirements are identified.</p> <p>1.3. Own responsibilities to comply with <i>safe work practices</i> are identified and explained.</p>
2. Identify construction hazards and control measures.	<p>2.1. Basic principles of risk management are identified.</p> <p>2.2. <i>Common construction hazards</i> are identified and discussed.</p> <p>2.3. <i>Measures for controlling</i> hazards and risks are identified.</p>
3. Identify OHS communication and reporting processes.	<p>3.1. OHS communication processes, information and documentation are identified and discussed.</p> <p>3.2. Role of <i>designated OHS personnel</i> is identified and explained.</p>

ELEMENT	PERFORMANCE CRITERIA
4. Identify OHS incident response procedures.	<p>3.3. <i>Safety signs and symbols</i> are identified and explained.</p> <p>3.4. Procedures and <i>relevant authorities</i> for reporting hazards, <i>incidents</i> and injuries are identified.</p> <p>4.1. <i>General procedures</i> for responding to incidents and <i>emergencies</i> are identified and explained.</p> <p>4.2. Procedures for accessing first aid are identified.</p> <p>4.3. Requirements for the selection and use of relevant <i>personal protective equipment</i> are identified and demonstrated.</p> <p>4.4. <i>Fire safety equipment</i> is identified and discussed.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

Required skills for this unit are:

- communication skills to:
 - clarify OHS legislative requirements
 - verbally report construction hazards and risks
 - ask effective questions
 - relay information to others
 - discuss OHS issues and information
- comprehension skills to:
 - explain the basic OHS legislative requirements which will be applicable to own work
 - explain the meaning of safety signs and symbols
 - identify common construction hazards
 - discuss the basic principles of risk management.

Required knowledge

Required knowledge for this unit is:

- applicable Commonwealth, State or Territory OHS legislation, regulations, standards, codes of practice and industry standards/guidance notes relevant to own

REQUIRED SKILLS AND KNOWLEDGE

work, role and responsibilities

- basic principles of risk management and assessment for construction work
- common construction hazards
- common construction safety signage and its meanings
- general construction emergency response and evacuation procedures
- general construction work activities that require licenses, tickets or certificates of competency
- general first aid response requirements
- general procedures for raising OHS issues
- general procedures for reporting OHS hazards, accidents, incidents, emergencies, injuries, near misses and dangerous occurrences
- general procedures for responding to hazards, incidents and injuries
- general workers' compensation and injury management requirements
- OHS hierarchy of controls
- OHS responsibilities and rights of duty holders, including:
 - persons in control of construction work/projects
 - employers and self-employed persons
 - supervisors
 - employees
 - designers
 - inspectors
 - manufacturers and suppliers
- own responsibilities to comply with safe work practices relating to:
 - housekeeping
 - identification of hazards
 - preventing bullying or harassment
 - smoking
 - use of amenities
 - use of drugs and alcohol
- role of OHS committees and representatives
- types of common personal protective equipment and fire safety equipment
- types of OHS information and documentation.

Evidence Guide

EVIDENCE GUIDE

EVIDENCE GUIDE

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

Evidence must confirm personal awareness of the following:

- applicable OHS legislative and safety requirements for construction work including duty of care
- the range of common construction hazards and procedures for the assessment of risk and application of the hierarchy of control
- OHS communication processes, information and documentation including the role of OHS committees and representatives, the meaning of common safety signs and symbols, and procedures for reporting hazards, incidents and injuries
- general procedures for responding to incidents and emergencies including evacuation, first aid, fire safety equipment and PPE.

Context of and specific resources for assessment

- Resources must be available to support the program including participant materials and other information or equipment related to the skills and knowledge covered by the program.
- It is recommended that the assessment tool designed specifically to support this unit of competency will provide consistency in assessment outcomes.
- Where applicable, physical resources should include equipment modified for people with disabilities
- Access must be provided to appropriate assessment support when required.
- Assessment processes and techniques must be culturally appropriate, and appropriate to the oracy, language and literacy capacity of the assessee and the work being performed
- In all cases where practical assessment is used it will be combined with targeted questioning to assess the underpinning knowledge. Questioning will be undertaken in such a

EVIDENCE GUIDE

manner as is appropriate to the oracy, language and literacy levels of the operator, any cultural issues that may affect responses to the questions, and reflecting the requirements of the competency and the work being performed.

Method of assessment

Assessment methods may include more than one of the following:

- practical assessment
- oral questioning
- written test
- work-based activities
- simulated project based activity

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

OHS legislative requirements relate to:

- Australian standards
- construction industry OHS standards and guidelines
- duty of care
- health and safety representatives, committees and supervisors
- licences, tickets or certificates of competency
- National Code of Practice for Induction Training for Construction Work
- national safety standards
- OHS and welfare Acts and regulations
- safety codes of practice.

Duty of care requirements relate to:

- legal responsibility under duty of care to do everything reasonably practicable to protect others from harm

RANGE STATEMENT

- Safe work practices*** include:
- own responsibilities to comply with safe work practices, including activities that require licences, tickets or certificates of competency
 - relevant state OHS requirements, including employers and self-employed persons, persons in control of the work site, construction supervisors, designers, manufacturers and suppliers, construction workers, subcontractors and inspectors.
- Risk*** relates to:
- access to site amenities, such as drinking water and toilets
 - general requirements for safe use of plant and equipment
 - general requirements for use of personal protective equipment and clothing
 - housekeeping to ensure a clean, tidy and safer work area
 - no drugs and alcohol at work
 - preventing bullying and harassment
 - smoking in designated areas
 - storage and removal of debris.
 - likelihood of a hazard causing injury or harm.
- Principles of risk management*** include:
- assessing the risks involved
 - consulting and reporting ensuring the involvement of relevant workers
 - controlling the hazard
 - identifying hazards
 - reviewing to identify change or improvement.
- Hazard*** relates to:
- any thing (including an intrinsic property of a thing) or situation with the potential to cause injury or harm.
- Common construction hazards*** include:
- confined spaces
 - electrical safety
 - excavations, including trenches
 - falling objects
 - hazardous substances and dangerous goods
 - HIV and other infectious diseases
 - hot and cold working environments
 - manual handling
 - noise
 - plant and equipment

RANGE STATEMENT

Measures for controlling risk to eliminate or minimise hazards in accordance with the hierarchy of control include:

- traffic and mobile plant
- unplanned collapse
- ultraviolet (UV) radiation
- working at heights.
- elimination
- substitution
- isolation
- engineering control
- administrative control
- personal protective equipment.

OHS communication processes include:

- discussions with OHS representatives
- OHS meetings
- OHS notices, newsletters, bulletins and correspondence
- OHS participative arrangements
- processes for raising OHS issues
- toolbox talks
- workplace consultation relating to OHS issues and changes.

OHS information and documentation includes:

- accident and incident reports
- Acts and regulations
- Australian standards
- codes of practice
- construction documentation and plans
- emergency information contact
- evacuation plans
- guidance notes
- job safety analyses
- labels
- material safety data sheets (MSDS)
- proformas for reporting hazards, incidents and injuries
- reports of near misses and dangerous occurrences
- risk assessments
- safe work method statements
- safety meeting minutes
- site safety inspection reports.
- first aid officers
- OHS committee members

Designated OHS personnel includes:

RANGE STATEMENT

- Safety signs and symbols*** include:
- OHS representatives
 - supervisors.
 - emergency information signs (e.g. exits, equipment and first aid)
 - fire signs (e.g. location of fire alarms and firefighting equipment)
 - hazard signs (e.g. danger and warning)
 - regulatory signs (e.g. prohibition, mandatory and limitation or restriction)
 - safety tags and lockout (e.g. danger tags, out of service tags).
- Relevant authorities*** include:
- emergency services (e.g. police, ambulance, fire brigade and emergency rescue)
 - OHS regulatory authority
 - supervisor.
- Incidents*** include:
- accidents resulting in personal injury or damage to property
 - near misses or dangerous occurrences which do not cause injury but may pose an immediate and significant risk to persons or property, and need to be reported so that action can be taken to prevent recurrence, for example:
 - breathing apparatus malfunctioning to the extent that the user's health is in danger
 - collapse of the floor, wall or ceiling of a building being used as a workplace
 - collapse or failure of an excavation more than 1.5 metres deep (including any shoring)
 - collapse or partial collapse of a building or structure
 - collapse, overturning or failure of the load bearing of any scaffolding, lift, crane, hoist or mine-winding equipment
 - damage to or malfunction of any other major plant
 - electric shock.
 - electrical short circuit, malfunction or explosion
 - uncontrolled explosion, fire or escape of gas, hazardous substance or steam
 - any other unintended or uncontrolled incident or event arising from operations carried on at a

RANGE STATEMENT

- General procedures* for responding to incidents and emergencies include:
- workplace.
 - basic emergency response (keep calm, raise alarm, obtain help)
 - evacuation
 - notification of designated OHS personnel and authorities
 - notification of emergency services (e.g. when and how)
 - referring to site emergency plans and documentation.
- Emergencies* include:
- chemical spill
 - fire
 - injury to personnel
 - structural collapse
 - toxic and/or flammable vapours emission
 - vehicle/mobile plant accident.
- Personal protective equipment* includes:
- aprons
 - arm guards
 - eye protection
 - gloves
 - hard hat
 - hearing protection
 - high visibility retro reflective vests
 - protective, well fitting clothing
 - respiratory protection
 - safety footwear
 - UV protective clothing and sunscreen.
- Fire safety equipment* includes:
- breathing apparatus
 - fire blankets
 - firefighting equipment.

Functional area

Functional area

CPCPCM2040A Read plans and calculate plumbing quantities

Modification History

Changes to performance criteria, required skills and knowledge, range statement and critical aspects

Not equivalent to CPCPCM2004A

Unit Descriptor

This unit of competency specifies the outcomes required to use and interpret plans and specifications associated with construction work, and accurately complete measurements and calculations to establish quantities of materials for the plumbing and services industry.

The unit requires the interpretation of plans, drawings and specifications to interpret requirements, and making measurements and calculations to determine quantities of plumbing materials.

Application of the Unit

This unit of competency supports skills to read and interpret plans for a variety of plumbing and services applications.

Site location for work application may be either domestic or commercial and may be a new work site or an existing structure being renovated, extended, restored or maintained. It may be a customer's premises or employer's workplace, either on or off-site.

Licensing/Regulatory Information

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised

unit of competency. text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|---|-----|---|
| 1 | Prepare for work. | 1.1 | Plans, drawings, specifications and standards are obtained and required calculations are identified. |
| | | 1.2 | Work health and safety (WHS) requirements associated with reading plans, calculating plumbing requirements and the workplace environment are adhered to throughout the work. |
| | | 1.3 | Quality assurance requirements are identified and adhered to according to workplace requirements. |
| | | 1.4 | Work area and materials are prepared to support the efficient reading of plans and the calculation of plumbing requirements. |
| 2 | Identify types of plans and drawings and their functions. | 2.1 | Plans and drawings used in the plumbing industry are identified. |
| | | 2.2 | Key functions of each type of drawing are identified. |
| | | 2.3 | Key users of drawings are identified. |
| 3 | Identify commonly used scales, symbols and abbreviations. | 3.1 | Commonly used scales, symbols and abbreviations are used. |
| | | 3.2 | Function of legend is understood and identified. |
| 4 | Locate and identify key features on a services plan. | 4.1 | Key features and dimensions of sectional details and elevations on a plan are identified and located. |
| | | 4.2 | Location and types of services are identified. |
| | | 4.3 | General and structural features and major horizontal and |

- vertical measurements are located.
- 5 Read and interpret job specifications.
- 5.1 Purpose of job specification is identified.
 - 5.2 Details in job specification are obtained.
 - 5.3 Job specifications are read in conjunction with plans.
- 6 Obtain measurements and perform calculations
- 6.1 Work *measurements* are obtained.
 - 6.2 Quality assurance requirements associated with calculations are applied.
 - 6.3 Measurements and dimensions are obtained from plans.
 - 6.4 Simple *calculations* are carried out.
- 7 Calculate material quantities.
- 7.1 *Material* quantities are calculated and recorded from plans and specifications according to workplace procedure.
 - 7.2 *Information* from plans, *specifications* and work area are obtained from job instructions.
 - 7.3 Measurements are identified and recorded.
- 8 Clean up.
- 8.1 Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice, and job specification.
 - 8.2 *Tools and equipment* are cleaned, checked, maintained and stored according to manufacturer recommendations and workplace procedures.
 - 8.3 Information is accessed and documentation completed according to workplace requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - request relevant documentation and information
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
- literacy skills to:
 - complete relevant workplace documentation
 - read and interpret:
 - documentation from a variety of sources
 - plans and specifications
 - record calculations, measurements and material quantities
- numeracy skills to apply measurements and calculations
- plan-reading skills, including:
 - boundaries
 - easements (sewer, stormwater, etc.)
 - existing services
 - orientation
 - pedestrian and vehicular access
 - preservation orders
 - set backs
 - site features
 - site geography, including levels
 - surrounding buildings and fences
- planning and organising skills to plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities

Required knowledge

- job safety analysis (JSA) and safe work method statements (SWMS)
- measurements, calculations and quantities
- range of plans and specifications relevant to the plumbing and services industry
- relevant Acts, regulations and codes of practice
- simple industry calculations

- symbols, dimensions, terminology and key features of plans
- tools, equipment and materials relative to plans, drawings and specifications
- work schedules, work plans, charts, work bulletins and memos
- workplace safety requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- locating, interpreting and applying relevant information, standards and specifications for reading plans and calculating plumbing quantities
- applying safety requirements throughout the work sequence, including electrical safety requirements and the use of personal protective clothing and equipment
- given the plans and specifications for a project, completing the following in respect of interpreting the plans and determining quantities:
 - apply sustainability principles and concepts
 - identify type and purpose of the plan and drawing
 - identify its dimensions, symbols, abbreviations, key features, title and reference date (as current version)
- identify material types from the specifications, measurements and calculations, indicating items of plumbing material required, ensuring:
 - correct selection and use of appropriate processes, tools and equipment
 - completion of all work to specification

- compliance with regulations, standards and organisational quality procedures and processes.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be

transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work health and safety is to be according to commonwealth, state and territory legislation and regulations and may include:

- handling of materials
- hazard control, including of electrical hazards
- hazardous materials and substances
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of first aid equipment

- use of tools and equipment
- workplace environment and safety.

Quality assurance requirements may include:

- Australian standards
- environmental policy
- Environment Protection Authority (EPA)
- internal company quality assurance policy and risk management strategy
- International Standards Organisation
- site safety plan
- workplace operations and procedures.

Types of **drawings** may include:

- drainage plans
- elevations and sections
- floor plans
- hydraulic plans
- mechanical services and drainage plans
- sanitary plans
- sewerage plans
- site plans
- specifications.

Key features of detailed **elevations and plans** may include:

- boundaries
- building lines
- cross-sections of construction details
- easements
- layout of rooms
- location of works relative to other buildings
- orientation
- service locations
- shape of building and structure
- type of construction
- type of structure, including structural members
- vertical and horizontal measurements.

Measurements may include:

- all dimensions used in plumbing
- laser or similar technology
- SI units of measurement
- the use of:

- calipers
- dividers
- rulers
- squares
- tape measures.

Calculations:

- are to be performed manually or with the aid of a calculator
- require numeracy skills to apply the basic arithmetic calculations of addition, subtraction, multiplication and division in order to estimate simple projects and determine consumables required for a task, and may include:
 - area
 - circumference
 - diameter
 - gradient
 - length
 - mass
 - perimeter
 - pressure
 - ratios (e.g. ingredients, elements and triangulation)
 - scales
 - volume.

Materials for reading plans and calculating plumbing quantities may include:

- drawings
- plans
- specifications.

Information may include:

- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions
- organisation work specifications and requirements
- recognised formulas or tables accepted by the regulatory authority
- regulatory and legislative requirements, particularly those pertaining to:
 - building codes
 - WHS and environmental requirements

- plumbing and gasfitting authority regulations
- relevant Australian standards
- safe work procedures relating to reading plans and calculating plumbing requirements
- verbal, written and graphical instructions, including:
 - charts and hand drawings
 - plans and sketches
 - job drawings
 - material safety data sheets (MSDS)
 - memos
 - plans and specifications
 - signage
 - work bulletins
 - work schedules.

Key features of *specifications* may include:

- material details
- preferred suppliers
- quality of finishes
- quantities
- specific skill requirements.

Tools and equipment may include:

- calculators
- laser measuring devices
- rulers, dividers, tape measures or squares.

CPCPCM2043A Carry out WHS requirements

Modification History

Changes to application, elements and performance criteria, required skills and knowledge, range statement and critical aspects

Not equivalent to CPCPCM2023A

Unit Descriptor

This unit of competency specifies the outcomes required to carry out work health and safety (WHS) requirements through safe work practices in a plumbing and services work environment.

The unit requires the performance of work in a safe manner through awareness of risks, work requirements and the planning and performance of safe work practices with concern for personal safety and the safety of others.

It includes the initial response to workplace emergencies; the safe use of electricity; the identification of hazardous materials, including asbestos; and compliance with legislated work safety practices.

Application of the Unit

This unit of competency supports safe work practices for the plumbing and services industry.

Site location for work application may be either domestic or commercial and may be a new work site or an existing structure or fitting being renovated, extended, restored or maintained. It could also be conducted in an on or off-site workshop or at a customer's premises.

The unit does not cover the removal of asbestos, which is a licensed activity.

Licensing/Regulatory Information

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites

Nil

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|--|---|
| 1 | Participate in workplace induction. | <p>1.1 <i>Workplace induction</i> is received.</p> <p>1.2 Location of emergency equipment is identified.</p> <p>1.3 Current workplace emergency and evacuation procedures are identified.</p> <p>1.4 Identify safe working conditions with employer.</p> <p>1.5 Identify employee and employer rights and responsibilities regarding safe working conditions.</p> |
| 2 | Assess risks. | <p>2.1 Hazards in the work area are identified, assessed and reported to designated personnel.</p> <p>2.2 WHS issues and risks in the work area are identified, assessed and reported to designated personnel.</p> <p>2.3 <i>Safe work practices</i>, procedures and instructions are followed.</p> <p>2.4 WHS, hazard, accident or incident reports are completed according to workplace procedures and <i>statutory and regulatory authorities</i> and legislation.</p> |
| 3 | Identify hazards and hazardous materials on work site. | <p>3.1 Hazardous materials on a work site are identified, secured and tagged using appropriate signs and symbols; and if appropriate, handled and used according to company and legislated procedures.</p> <p>3.2 Measures for controlling risks and construction hazards</p> |

- are applied effectively and immediately.
- 3.3 ***Asbestos-containing materials (ACM) are identified*** on a work site ***and reported*** to designated personnel.
- 4 Plan and prepare for safe work practices.
- 4.1 Quality assurance requirements of company operations and safe work practices are identified and adhered to.
- 4.2 Personal protective equipment (PPE) is selected, correctly fitted and used according to the requirements of the job.
- 4.3 Tools and equipment are selected consistent with safe work practice requirements, checked for serviceability, and any faults are reported to supervisor.
- 4.4 Required barricades, hoardings and signage are determined and erected at job location.
- 4.5 Material safety data sheets (MSDS) are identified and applied.
- 4.6 ***Sustainability principles and concepts*** are observed when preparing for and undertaking work process.
- 5 Use safe work practices to carry out work.
- 5.1 Work is carried out safely and according to state or territory statutory requirements and company policy.
- 5.2 ***Safety hazards*** and common workplace accidents and incidents are identified in the course of work and reported according to policy.
- 5.3 Industry, site and personal safety rights and responsibilities are applied.
- 5.4 Prohibited tools and equipment in areas with identified asbestos are identified and isolated.
- 5.5 Firefighting equipment is selected and used according to type of fire and correct operating procedures.
- 5.6 Current site emergency and first aid procedures are followed.

- | | | |
|---|-------------------------------------|---|
| 6 | Maintain safety of self and others. | 6.1 Safety signs, identified in terms of colour and shape, symbols and alarms, are adhered to. |
| | | 6.2 Hazardous chemicals and materials are identified, handled and stored, maintaining the safety to self, others and the environment. |
| | | 6.3 Incidents are reported according to legislative requirements and workplace procedures. |
| | | 6.4 Common causes of accidents in the industry are identified and prevention measures implemented in line with site induction. |
| | | 6.5 Site area is maintained to prevent incidents and accidents and protect self and others |
| 7 | Use electricity safely. | 7.1 Safest supply and route for electrical supply are determined. |
| | | 7.2 Leads are supported and placed according to regulations. |
| | | 7.3 Power board visual check is conducted. |
| | | 7.4 Leads and equipment are checked for tags and visual damage. |
| | | 7.5 Electrical hazards are identified and reported. |
| 8 | Apply emergency response. | 8.1 Emergencies are identified. |
| | | 8.2 Emergency response is provided according to company procedures and requirements. |
| | | 8.3 Details of actions taken are reported according to company procedures and requirements using appropriate communications. |
| 9 | Clean up work site area. | 9.1 Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice and job specifications. |
| | | 9.2 Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations |

and standard work practices.

- 9.3 Information is accessed and documentation completed according to workplace requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - complete written reports and other relevant documentation
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
- initiative and enterprise skills to:
 - evaluate safety issues in the workplace and determine appropriate action
 - recognise WHS hazards, including asbestos, and take all opportunities to alleviate safety problems in a variety of construction work sites and environments
- initiative and enterprise skills to identify and report to appropriate personnel any faults in tools or materials
- literacy skills to read and interpret:
 - documentation from a variety of sources
 - MSDS
 - work safety procedures and instructions
- self-management skills to deal calmly and effectively with any potential safety problems and work closely with other team members and supervisors to ensure safe working conditions are maintained
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technology skills to:
 - access and understand site-specific instructions in a variety of media
 - use mobile communication technology

Required knowledge

- asbestos management code relating to prevention of exposure
- job safety analysis (JSA) and safe work method statements (SWMS)

- manual handling techniques
- MSDS
- relevant legislation, regulations and workplace requirements relating to WHS, including hazard reduction and personal safety
- requirements for working in confined spaces and at height, including on rooves
- tools and equipment prohibited from being used near identified ACM
- risk assessment
- safe work practices in normal working environment
- types, possible location and risks of ACM, including serpentine and amphibole groups and their use in common building materials
- workplace and equipment safety requirements
- workplace hazards and their precautions and reduction
- workplace response to emergencies

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of the ability to:

- locate, interpret and apply relevant information, standards and specifications for applying safe work practices in the workplace
- apply safety requirements throughout the performance of work sequences, including electrical requirements and personal protective clothing and equipment
- apply sustainability principles and concepts
- undertake site and workplace induction
- correctly identify the location of ACM
- understand and apply policies and procedures for reporting presence of ACM to designated personnel
- assess workplace risks and interpret and apply safe work practices

- understand workplace requirements for emergency response, including evacuation procedures
- correctly locate and identify workplace firefighting and other safety equipment and appliances
- correctly select and use appropriate processes, tools and equipment
- safely complete all work to specification
- comply with regulations, standards and workplace instructions, procedures and processes, including reporting and documentation
- communicate and work effectively and safely with others.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or

simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application

- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Workplace induction may include:

- first aid officers and kits

- personnel competent and/or licensed in the safe handling of asbestos
- site induction work site locations
- specific site WHS issues
- specific site requirements.

Safe work practices are to be according to state and territory legislation and regulations and may include:

- handling of materials
- hazard control procedures and procedures for handling hazardous materials and substances
- PPE prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of first aid equipment
- use of tools and equipment
- workplace environment and safety.

Statutory and regulatory authorities include:

- commonwealth, state or territory, and local authorities administering applicable Acts, regulations and codes of practice.

Identifying and reporting asbestos-containing materials:

- includes recognising common types of ACM that may be found in construction materials and buildings
- covers asbestos rope/fabrics, asbestos cement sheeting, asbestos cement piping and lagging on pipes, bituminous waterproof membrane, millboard, asbestos flues, sheeting under ceramic or vinyl floor or wall tiles in wet areas
- involves reporting ACM to person in control of the workplace as set out in the relevant Asbestos Management Code.

Sustainability principles and concepts:

- cover the social, economic and environmental use of resources to meet current and future needs
- may include:
 - selecting appropriate components and material
 - choosing efficient products
 - using material efficiently
 - storing and disposing of hazardous material to ensure minimal environmental impact.

Safety hazards may include:

- hazards and risks associated with tools and equipment
- inflammable materials and fire hazards
- lifting practices
- lighting, gases, electricity and water
- spillage, waste and debris
- toxic and hazardous substances
- working at heights
- working in confined spaces.

Emergencies may include:

- accidents
- fires
- injuries
- sudden illness.

Emergency response may include:

- common site signs
- equipment tags
- facility or location signs
- safety barricades and warning signs
- site direction
- traffic signs
- workplace evacuation involving staff and customers.

CPCPCM2047A Carry out levelling

Modification History

Prerequisite unit updated

Changes to performance criteria, required skills and knowledge, range statement and critical aspects

Not equivalent to CPCPCM2027A

Unit Descriptor

This unit of competency specifies the outcomes required to plan and use levelling equipment to establish, record and apply those levels to the plumbing and services industry.

Application of the Unit

This unit of competency supports skills to undertake levelling operations for application in the plumbing and services industry.

Site location for work application may be either domestic or commercial and may be a new work site or an existing structure being renovated, extended, restored or maintained.

Licensing/Regulatory Information

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites

CPCPCM2043A Carry out WHS requirements

Employability Skills Information

This unit contains employability skills..

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of

performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | | |
|---|--------------------|-----|--|
| 1 | Prepare for work. | 1.1 | Requirements of the job are determined and various levels are obtained. |
| | | 1.2 | Work health and safety (WHS) and environmental requirements associated with levelling activities are adhered to throughout the work. |
| | | 1.3 | Quality assurance requirements are identified and adhered to according to workplace requirements. |
| | | 1.4 | Tools and equipment , including personal protective equipment, are selected and checked for serviceability. |
| 2 | Perform levelling. | 2.1 | Height to be transferred is identified from drawings, plans or instructions. |
| | | 2.2 | Levelling equipment is set up and operated according to manufacturer instructions, workplace procedures and relevant Australian standards. |
| | | 2.3 | Levels are taken, recorded and marked according to job requirements and workplace procedures within the required tolerance and specifications. |
| | | 2.4 | Sustainability principles and concepts are observed when preparing for and undertaking work process. |
| 3 | Clean up. | 3.1 | Work area is cleared and materials are disposed of, reused or recycled according to legislation, regulations, codes of practice and job specification. |
| | | 3.2 | Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and workplace procedures. |
| | | 3.3 | Information is accessed and documentation completed according to workplace requirements. |

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - determine requirements, follow instructions and access information
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - use language and concepts appropriate to cultural differences
 - use and interpret non-verbal communication, such as hand signals
- initiative and enterprise skills to identify and report to appropriate personnel any faults in tools, equipment or materials
- literacy skills to:
 - complete workplace documentation
 - read and interpret:
 - plans and specifications
 - documentation from a variety of sources
- numeracy skills to apply measurements and calculations
- planning and organising skills to plan and set out work
- technical skills to operate levelling equipment to read, record, establish and check:
 - levels: horizontal, vertical and at gradient used for the placement of plumbing and services
 - recording levels at specific points along a set out
 - recording and checking levels in drainage and sanitary excavations and plumbing services
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technology skills to:
 - access and understand site-specific instructions in a variety of media
 - use mobile communication technology

Required knowledge

- different types of levelling equipment, their applications and their method of operation
- how to access relevant information, including codes and technical standards
- job safety analysis (JSA) and safe work method statements (SWMS)
- process of establishing, recording and checking levels and alignment

- relevant statutory requirements related to establishing, recording and checking levels
- simple calculations relating to carrying out levelling
- SI system of measurements
- workplace and equipment safety requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit A person who demonstrates competency in this unit must be able to provide evidence of:

- locating, interpreting and applying relevant information, standards and specifications for the establishment, recording and checking of levels
- applying safety requirements throughout the work sequence, including electrical safety requirements and the use of personal protective clothing and equipment
- using either a pipe laser, rotary laser or automatic level and either boning rods or string line
- grading a pipe (or equivalent) over 10 metres on a grade to a tolerance of + or - 5mm, ensuring:
 - applying sustainability principles and concepts
 - correctly identifying, recording and checking level
 - correctly selecting and using appropriate processes, tools and equipment
 - completing all work to specification
 - complying with regulations, standards and organisational quality procedures and processes
 - communicating and working effectively and safely with others.

Context of and specific This competency is to be assessed using standard and authorised work practices, safety requirements and environmental

resources for assessment constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace
- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has

complete confidence in the person's demonstrated ability and applied knowledge

- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work health and safety is to be according to commonwealth, state and territory legislation and regulations and may include:

- handling of materials
- hazard control, including of electrical hazards
- hazardous materials and substances
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of first aid equipment
- use of tools and equipment
- workplace environment and safety.

Quality assurance requirements may include:

- environmental policy
- Environment Protection Authority (EPA)
- internal company quality assurance policy and risk management strategy
- International Standards Organisation
- relevant Australian standards
- site safety plan
- workplace operations and procedures.

- Tools and equipment*** may include:
- hand tools
 - measuring equipment
 - string line.
- Levelling equipment*** may include:
- boning rods
 - rotating laser level
 - pipe laser level
 - spirit level
 - water level.
- Sustainability principles and concepts***
- cover the social, economic and environmental use of resources to meet current and future needs
 - may include:
 - efficient use and recycling of tools and equipment
 - disposing of waste material to ensure minimal environmental impact
 - energy efficiency
 - water efficiency.
- Information*** may include:
- building codes
 - charts and hand drawings
 - instructions issued by authorised organisational or external personnel
 - job drawings
 - manufacturer specifications and instructions
 - material safety data sheets (MSDS)
 - memos
 - WHS and environmental requirements
 - organisation work specifications and requirements
 - plans and sketches
 - regulatory and legislative requirements, particularly those pertaining to plumbing and gasfitting authority regulations
 - relevant Australian standards
 - safe work procedures relating to handling and storing levelling equipment
 - signage
 - verbal, written and graphical instructions
 - work bulletins
 - work schedules, plans and specifications.

CPCPIG2021A Design domestic urban irrigation systems

Modification History

Prerequisite unit added to unit

Changes to descriptor, performance criteria, required skills and knowledge, range statement and critical aspects

Not equivalent to CPCPIG2011A

Unit Descriptor

This unit of competency specifies the outcomes required to prepare basic designs and irrigation drawings for domestic irrigation systems.

Application of the Unit

Work is normally undertaken in a drafting office environment. Location for drawing and design application may be either domestic or commercial, and may be a new work site or an existing structure being renovated, extended, restored or maintained.

Licensing/Regulatory Information

In some jurisdictions, this unit of competency may form part of accreditation, licensing, legislative, regulatory or certification requirements.

Pre-Requisites

CPCPCM2043A Carry out WHS requirements

Employability Skills Information

This unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

- | | | |
|---|--------------------------------|---|
| 1 | Prepare for work. | 1.1 Site survey is conducted of proposed irrigation area according to client requirements. |
| | | 1.2 Work health and safety (WHS) and environmental requirements associated with design of domestic irrigation systems are adhered to throughout the work. |
| | | 1.3 Quality assurance requirements are identified and adhered to according to workplace requirements. |
| | | 1.4 Tasks are planned and sequenced in conjunction with others involved in or affected by the work and statutory and regulatory authorities' requirements. |
| | | 1.5 Tools and equipment for preparing basic irrigation designs and drawings are selected and checked for serviceability. |
| | | 1.6 Work area is prepared to support efficient design of domestic irrigation systems. |
| 2 | Identify drawing requirements. | 2.1 Areas requiring irrigation and system design components are identified. |
| | | 2.2 Information is obtained on the soil type, ground slope, contours and prevailing wind. |
| | | 2.3 Underground services, buildings, paths and other permanent structures are located and noted. |
| | | 2.4 Water supply is located and its influence on design requirements is determined. |
| | | 2.5 Appropriate emitters are selected to suit function and design requirements. |
| 3 | Design irrigation system. | 3.1 Site plan is drawn to include structures, paths and property boundaries. |

- 3.2 Garden areas are sketched to include locations of lawns, garden beds, trees, vegetable patches or ferneries.
 - 3.3 Pipe runs and water emitters are sketched to design requirements.
 - 3.4 Sizes of pipes are calculated using standard data and information is recorded in required format.
 - 3.5 List of *materials* is compiled to include number and type of water emitters, control valves, quantities of pipes, fittings and components.
 - 3.6 *Sustainability principles and concepts* are applied throughout the design process.
 - 3.7 Drawing and design are submitted for approval.
- 4 Clean up.
- 4.1 Work area is cleared and materials disposed of, reused or recycled according to legislation, regulations, codes of practice and job specification.
 - 4.2 Tools and equipment are cleaned, checked, maintained and stored according to manufacturer recommendations and workplace procedures.
 - 4.3 Documentation is completed according to workplace requirements.

Required Skills and Knowledge

This section describes the skills and knowledge required for this unit.

Required skills

- communication skills to:
 - access information
 - determine requirements
 - enable clear and direct communication, using questioning to identify and confirm requirements, share information, listen and understand
 - follow instructions
 - use language and concepts appropriate to cultural differences

- use and interpret non-verbal communication, such as hand signals
- initiative and enterprise skills to identify and report to appropriate personnel any faults in tools, equipment or materials
- literacy skills to:
 - compile list of materials
 - complete workplace documentation
 - read and interpret:
 - documentation from a variety of sources
 - plans and specifications
 - record information
- technical skills to design and draw a domestic urban irrigation system, including:
 - identifying material requirements
 - selecting and locating components
 - site layout
 - site requirements and structures
- numeracy skills to apply measurements and calculations
- planning and organising skills to:
 - plan and sequence tasks with others
 - plan and set out work
- teamwork skills to work with others to action tasks and relate to people from a range of cultural and ethnic backgrounds and with varying physical and mental abilities
- technology skills to:
 - access and understand site-specific instructions in a variety of media
 - use mobile communication technology

Required knowledge

- job safety analysis (JSA) and safe work method statements (SWMS)
- process and workplace requirements for basic irrigation design
- processes for accessing information and for calculating material requirements
- properties of water, including pressure and flow rates
- relevant statutory and authority requirements related to drawing and installing irrigation systems
- SI system of measurement
- specifications of the range of irrigation products available
- standards applicable to the installation
- technologies for irrigation measurement and drawings
- various types of irrigation systems, including types of materials and components used
- workplace and equipment safety requirements

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

This unit of competency could be assessed in the workplace or a close simulation of the workplace environment providing that simulated or project-based assessment techniques fully replicate plumbing and services workplace conditions, materials, activities, responsibilities and procedures.

Critical aspects for assessment and evidence required to demonstrate competency in this unit

A person who demonstrates competency in this unit must be able to provide evidence of:

- locating, interpreting and applying relevant information, standards and specifications to the design of domestic irrigation systems
- applying safety requirements throughout the work sequence, including electricity safety requirements and the use of personal protective clothing and equipment
- given the site plan and specifications for the irrigation of a 200 square metre garden (of lawn, shrubs, trees and flowers), designing and preparing a drawing of the system, incorporating automatic timers and controls, varying sprinkler heads and zones, and indicating the materials required (by number and type), ensuring:
 - application of sustainability principles and concepts
 - correct identification of location, design and details of proposed system
 - correct selection and use of appropriate processes, tools and equipment
 - completing all work to specification
 - compliance with regulations, standards and organisational quality procedures and processes
 - communicating and working effectively and safely with others.

Context of and specific resources for assessment

This competency is to be assessed using standard and authorised work practices, safety requirements and

environmental constraints.

Assessment of essential underpinning knowledge will usually be conducted in an off-site context.

Assessment is to comply with relevant regulatory or Australian standards' requirements.

Resource implications for assessment include:

- an induction procedure and requirement
- realistic tasks or simulated tasks covering the minimum task requirements
- relevant specifications and work instructions
- tools and equipment appropriate to applying safe work practices
- support materials appropriate to activity
- workplace instructions relating to safe work practices and addressing hazards and emergencies
- material safety data sheets
- research resources, including industry-related systems information.

Reasonable adjustments for people with disabilities must be made to assessment processes where required. This could include access to modified equipment and other physical resources, and the provision of appropriate assessment support.

Method of assessment

Assessment methods must:

- satisfy the endorsed Assessment Guidelines of the Construction, Plumbing and Services Training Package
- include direct observation of tasks in real or simulated work conditions, with questioning to confirm the ability to consistently identify and correctly interpret the essential underpinning knowledge required for practical application
- reinforce the integration of employability skills with workplace tasks and job roles
- confirm that competency is verified and able to be transferred to other circumstances and environments.

Validity and sufficiency of evidence requires that:

- competency will need to be demonstrated over a period of time reflecting the scope of the role and the practical requirements of the workplace

- where the assessment is part of a structured learning experience the evidence collected must relate to a number of performances assessed at different points in time and separated by further learning and practice, with a decision on competency only taken at the point when the assessor has complete confidence in the person's demonstrated ability and applied knowledge
- all assessment that is part of a structured learning experience must include a combination of direct, indirect and supplementary evidence.

Assessment processes and techniques should as far as is practical take into account the language, literacy and numeracy capacity of the candidate in relation to the competency being assessed.

Supplementary evidence of competency may be obtained from relevant authenticated documentation from third parties, such as existing supervisors, team leaders or specialist training staff.

Range Statement

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

Work health and safety is to be according to commonwealth, state and territory legislation and regulations and may include:

- handling of materials, including hazardous materials and substances
- hazard control
- personal protective clothing and equipment prescribed under legislation, regulations and workplace policies and practices
- use of firefighting equipment
- use of first aid equipment
- use of tools and equipment
- workplace environment and safety.

Environmental requirements cover water quality management and may

- clean-up protection
- stormwater protection
- waste management.

include:

Quality assurance requirements

may include:

- Environment Protection Authority (EPA)
- internal company quality assurance policy and risk management strategy
- International Standards Organisation
- site safety plan
- workplace operations and procedures.

Statutory and regulatory authorities

include:

- commonwealth, state or territory, and local authorities administering applicable Acts, regulations and codes of practice.

Tools and equipment may include:

- calculator
- computer design software
- drawing and drafting equipment
- laser measuring devices
- measuring equipment.

System design components may include:

- backflow prevention devices
- controls
- pipework
- valves
- water emitters, which may include:
 - drip emitters
 - gear drive
 - impact
 - in-line turbo drippers
 - mist sprays
 - oscillating
 - pop up
 - pulsating
- selection of water emitters, based on:
 - automatic control systems
 - manufacturer specifications
 - physical site conditions
 - site requirements
 - subsoil systems
 - types of plants requiring irrigated water.

Information may include:

- charts and hand drawings
- instructions issued by authorised organisational or external personnel
- manufacturer specifications and instructions
- material safety data sheets (MSDS)
- memos
- maps
- organisation work specifications and requirements
- regulatory and legislative requirements, particularly those pertaining to:
 - building codes
 - WHS and environmental requirements
 - plumbing regulations
- relevant Australian standards
- safe work procedures relating to the design of domestic irrigation systems
- signage
- sketches and plans, including job plans
- verbal, written and graphical instructions
- work bulletins
- work schedules, plans and specifications.

Materials may include:

- drafting and drawing equipment
- plans.

Sustainability principles and concepts:

- cover the current and future social, economic and environmental use of resources
- may include:
 - efficient use of material
 - minimising water wastage
 - considering use of alternative water supply
 - selecting appropriate components and material to ensure minimal environmental impact.
