AHC Agriculture, Horticulture and Conservation and Land Management Training Package

Release: 1.0

CONTENTS

AHC Agriculture, Horticulture and Conservation and Land Management Training	
Package.....	53
AHC10116 Certificate I in Conservation and Land Management.....	54
AHC10216 Certificate I in AgriFood Operations.....	57
AHC10316 Certificate I in Horticulture	61
AHC10416 Certificate I in Permaculture.....	63
AHC20116 Certificate II in Agriculture	65
AHC20316 Certificate II in Production Horticulture.....	74
AHC20416 Certificate II in Horticulture	78
AHC20516 Certificate II in Arboriculture.....	83
AHC20616 Certificate II in Parks and Gardens	87
AHC20716 Certificate II in Production Nursery	90
AHC20816 Certificate II in Retail Nursery.....	93
AHC20916 Certificate II in Sports Turf Management.....	96
AHC21016 Certificate II in Conservation and Land Management	98
AHC21116 Certificate II in Irrigation	105
AHC21216 Certificate II in Rural Operations	108
AHC21316 Certificate II in Shearing.....	110
AHC21416 Certificate II in Wool Handling.....	112
AHC21516 Certificate II in Floriculture	114
AHC21616 Certificate II in Landscaping.....	117
AHC21716 Certificate II in Permaculture	120
AHC30116 Certificate III in Agriculture	123
AHC30216 Certificate III in Agriculture (Dairy Production).....	136
AHC30416 Certificate III in Pork Production.....	141
AHC30516 Certificate III in Poultry Production.....	147
AHC30616 Certificate III in Production Horticulture	152
AHC30716 Certificate III in Horticulture.....	156
AHC30816 Certificate III in Arboriculture	160
AHC30916 Certificate III in Landscape Construction.....	168
AHC31016 Certificate III in Parks and Gardens.....	170
AHC31116 Certificate III in Production Nursery.....	174
AHC31216 Certificate III in Retail Nursery	178
AHC31316 Certificate III in Sports Turf Management	181
AHC31416 Certificate III in Conservation and Land Management.....	184
AHC31516 Certificate III in Indigenous Land Management.....	191
AHC31616 Certificate III in Lands, Parks and Wildlife	197
AHC31716 Certificate III in Natural Area Restoration	202
AHC32016 Certificate III in Beekeeping	206
AHC32116 Certificate III in Commercial Seed Processing.....	209
AHC32216 Certificate III in Commercial Composting.....	211
AHC32316 Certificate III in Conservation Earthworks.....	214
AHC32416 Certificate III in Irrigation.....	217
AHC32516 Certificate III in Aboriginal Sites Work.....	220
AHC32616 Certificate III in Rural Machinery Operations.....	226
AHC32716 Certificate III in Rural Merchandising.....	229
AHC32816 Certificate III in Rural Operations.....	233
AHC32916 Certificate III in Shearing	235
AHC33016 Certificate III in Wool Clip Preparation	238

AHC33116 Certificate III in Advanced Wool Handling.....	240
AHC33216 Certificate III in Floriculture	243
AHC33316 Certificate III in Feedlot Operations	247
AHC33416 Certificate III in Seed Production.....	254
AHC33516 Certificate III in Seed Testing	258
AHC33616 Certificate III in Pest Management	261
AHC33816 Certificate III in Permaculture.....	266
AHC40116 Certificate IV in Agriculture	270
AHC40316 Certificate IV in Production Horticulture	278
AHC40416 Certificate IV in Horticulture	282
AHC40516 Certificate IV in Parks and Gardens	286
AHC40616 Certificate IV in Production Nursery	289
AHC40716 Certificate IV in Retail Nursery	292
AHC40816 Certificate IV in Sports Turf Management.....	295
AHC40916 Certificate IV in Conservation and Land Management.....	298
AHC41016 Certificate IV in Agribusiness	305
AHC41116 Certificate IV in Irrigation.....	309
AHC41316 Certificate IV in Wool Classing	312
AHC41416 Certificate IV in Seed Production.....	314
AHC41516 Certificate IV in Seed Testing.....	317
AHC41616 Certificate IV in Organic Farming	320
AHC41716 Certificate IV in Pest Management.....	326
AHC41916 Certificate IV in Arboriculture.....	331
AHC42016 Certificate IV in Landscape.....	334
AHC42116 Certificate IV in Permaculture	337
AHC42216 Certificate IV in Shearing Contracting.....	340
AHC50116 Diploma of Agriculture	343
AHC50216 Diploma of Pork Production.....	350
AHC50316 Diploma of Production Horticulture.....	353
AHC50416 Diploma of Horticulture	356
AHC50516 Diploma of Arboriculture	360
AHC50616 Diploma of Landscape Design	363
AHC50716 Diploma of Parks and Gardens Management.....	366
AHC50816 Diploma of Production Nursery Management.....	369
AHC50916 Diploma of Retail Nursery Management.....	372
AHC51016 Diploma of Sports Turf Management.....	375
AHC51116 Diploma of Conservation and Land Management.....	378
AHC51216 Diploma of Community Coordination and Facilitation	385
AHC51316 Diploma of Pest Management.....	390
AHC51416 Diploma of Agribusiness Management	395
AHC51516 Diploma of Viticulture.....	399
AHC51616 Diploma of Irrigation Management.....	402
AHC51816 Diploma of Organic Farming	405
AHC52016 Diploma of Landscape Project Management.....	410
AHC52116 Diploma of Permaculture	412
AHC60216 Advanced Diploma of Horticulture	415
AHC60316 Advanced Diploma of Agribusiness Management.....	418
AHC60415 Advanced Diploma of Conservation and Land Management.....	422
AHC60516 Advanced Diploma of Arboriculture	425
AHC80116 Graduate Diploma of Arboriculture	428
ACMGAS301A Maintain and monitor animal health and wellbeing	431
ACMGAS303A Plan for and provide nutritional requirements for animals	442
ACMGAS305A Rescue animals and apply basic first aid	452

ACMWS401A Maintain workplace health and safety processes463
ACMWS501A Manage workplace health and safety processes.....476
AHCAGB301 Keep production records for a primary production business490
Assessment Requirements for AHCAGB301 Keep production records for a primary
production business493
AHCAGB401 Plan and implement property improvement.....495
Assessment Requirements for AHCAGB401 Plan and implement property improvement498
AHCAGB402 Analyse and interpret production data.....500
Assessment Requirements for AHCAGB402 Analyse and interpret production data502
AHCAGB501 Develop climate risk management strategies504
Assessment Requirements for AHCAGB501 Develop climate risk management strategies507
AHCAGB502 Plan and manage infrastructure requirements.....509
Assessment Requirements for AHCAGB502 Plan and manage infrastructure
requirements.....512
AHCAGB503 Plan and monitor production processes.....514
Assessment Requirements for AHCAGB503 Plan and monitor production processes ...517
AHCAGB504 Plan production for the whole business519
Assessment Requirements for AHCAGB504 Plan production for the whole business.....523
AHCAGB505 Develop a whole farm plan525
Assessment Requirements for AHCAGB505 Develop a whole farm plan528
AHCAGB506 Manage application technology530
Assessment Requirements for AHCAGB506 Manage application technology.....533
AHCAGB507 Select and use agricultural technology535
Assessment Requirements for AHCAGB507 Select and use agricultural technology538
AHCAGB508 Improve agricultural sustainability using renewable energy and recycle
systems.....540
Assessment Requirements for AHCAGB508 Improve agricultural sustainability using
renewable energy and recycle systems543
AHCAGB509 Select and implement a Geographic Information System (GIS) for
sustainable agricultural systems545
Assessment Requirements for AHCAGB509 Select and implement a Geographic
Information System (GIS) for sustainable agricultural systems548
AHCAGB510 Implement the introduction of biotechnology into the production system550
Assessment Requirements for AHCAGB510 Implement the introduction of biotechnology
into the production system.....553
AHCAGB511 Develop and manage a plan for sustainable production reflecting
sustainable production principles555
Assessment Requirements for AHCAGB511 Develop and manage a plan for sustainable
production reflecting sustainable production principles558
AHCAGB601 Develop export markets for produce560
Assessment Requirements for AHCAGB601 Develop export markets for produce562
AHCAGB602 Manage estate planning.....564
Assessment Requirements for AHCAGB602 Manage estate planning567
AHCAGB603 Manage the production system.....569
Assessment Requirements for AHCAGB603 Manage the production system572
AHCAGB604 Analyse business performance574
Assessment Requirements for AHCAGB604 Analyse business performance576
AHCAGB605 Manage business capital.....578
Assessment Requirements for AHCAGB605 Manage business capital581
AHCAGB606 Manage price risk through trading strategy.....583
Assessment Requirements for AHCAGB606 Manage price risk through trading strategy585
AHCAIS201 Assist with artificial insemination procedures.....587
Assessment Requirements for AHCAIS201 Assist with artificial insemination procedures590

AHCAIS301 Collect semen.....592
 Assessment Requirements for AHCAIS301 Collect semen.....594
 AHCAIS302 Process and store semen.....596
 Assessment Requirements for AHCAIS302 Process and store semen599
 AHCAIS303 Artificially inseminate livestock601
 Assessment Requirements for AHCAIS303 Artificially inseminate livestock.....604
 AHCAIS401 Supervise artificial breeding and embryo transfer programs.....607
 Assessment Requirements for AHCAIS401 Supervise artificial breeding and embryo transfer programs610
 AHCARB201 Apply a range of treatments to trees.....612
 Assessment Requirements for AHCARB201 Apply a range of treatments to trees615
 AHCARB206 Operate and maintain stump grinding machines.....618
 Assessment Requirements for AHCARB206 Operate and maintain stump grinding machines.....622
 AHCARB207 Perform ground based rigging627
 Assessment Requirements for AHCARB207 Perform ground based rigging630
 AHCARB208 Recognise trees.....634
 Assessment Requirements for AHCARB208 Recognise trees.....637
 AHCARB209 Assist with aerial rescue from the ground640
 Assessment Requirements for AHCARB209 Assist with aerial rescue from the ground.643
 AHCARB210 Work effectively in the arboriculture industry647
 Assessment Requirements for AHCARB210 Work effectively in the arboriculture industry651
 AHCARB301 Implement a tree maintenance program.....655
 Assessment Requirements for AHCARB301 Implement a tree maintenance program ...658
 AHCARB302 Inspect trees for access and work661
 Assessment Requirements for AHCARB302 Inspect trees for access and work.....664
 AHCARB303 Perform pruning operations667
 Assessment Requirements for AHCARB303 Perform pruning operations671
 AHCARB305 Dismantle trees.....675
 Assessment Requirements for AHCARB305 Dismantle trees678
 AHCARB306 Undertake aerial rescue.....682
 Assessment Requirements for AHCARB306 Undertake aerial rescue685
 AHCARB307 Use advanced climbing techniques689
 Assessment Requirements for AHCARB307 Use advanced climbing techniques692
 AHCARB308 Install cable and bracing696
 Assessment Requirements for AHCARB308 Install cable and bracing.....699
 AHCARB309 Implement a tree protection program702
 Assessment Requirements for AHCARB309 Implement a tree protection program705
 AHCARB310 Perform aerial rigging.....708
 Assessment Requirements for AHCARB310 Perform aerial rigging712
 AHCARB311 Tie, dress, set and finish arborist knots716
 Assessment Requirements for AHCARB311 Tie, dress, set and finish arborist knots720
 AHCARB312 Use standard climbing techniques to access trees723
 Assessment Requirements for AHCARB312 Use standard climbing techniques to access trees.....726
 AHCARB313 Identify trees730
 Assessment Requirements for AHCARB313 Identify trees.....733
 AHCARB401 Verify pruning specifications.....736
 Assessment Requirements for AHCARB401 Verify pruning specifications740
 AHCARB402 Supervise and audit tree operations745
 Assessment Requirements for AHCARB402 Supervise and audit tree operations748
 AHCARB403 Perform a ground-based tree defect evaluation.....751

Assessment Requirements for AHCARB403 Perform a ground-based tree defect evaluation754

AHCARB404 Conduct a safety audit.....758

Assessment Re quirements for AHCARB404 Conduct a safety audit761

AHCARB405 Perform geospatial data collection.....764

Assessment Re quirements for AHCARB405 Perform geospatial data collection.....767

AHCARB502 Identify, select and specify trees770

Assessment Re quirements for AHCARB502 Identify, select and specify trees.....773

AHCARB504 Develop an arboricultural impact assessment report.....778

Assessment Re quirements for AHCARB504 Develop an arboricultural impact assessment report.....782

AHCARB505 Document and audit tree work786

Assessment Re quirements for AHCARB505 Document and audit tree work.....789

AHCARB506 Prepare arborist reports.....793

Assessment Re quirements for AHCARB506 Prepare arborist reports796

AHCARB507 Generate tree plans using computer-aided design software800

Assessment Re quirements for AHCARB507 Generate tree plans using computer-aided design software803

AHCARB601 Examine and assess trees.....807

Assessment Re quirements for AHCARB601 Examine and assess trees811

AHCARB602 Diagnose tree diseases816

Assessment Re quirements for AHCARB602 Diagnose tree diseases819

AHCARB603 Interpret diagnostic test results823

Assessment Re quirements for AHCARB603 Interpret diagnostic test results.....826

AHCARB604 Measure and improve the performance of urban forests830

Assessment Re quirements for AHCARB604 Measure and improve the performance of urban forests.....833

AHCARB605 Provide consultation in a legal framework836

Assessment Re quirements for AHCARB605 Provide consultation in a legal framework839

AHCARB606 Develop an operational tree management plan842

Assessment Re quirements for AHCARB606 Develop an operational tree management plan.....845

AHCARB607 Review and develop strategic tree policy849

Assessment Re quirements for AHCARB607 Review and develop strategic tree policy...852

AHCARB701 Analyse tree biomechanics855

Assessment Re quirements for AHCARB701 Analyse tree biomechanics859

AHCARB702 Analyse mycology cultures863

Assessment Re quirements for AHCARB702 Analyse mycology cultures867

AHCARB703 Research urban forest performance872

Assessment Re quirements for AHCARB703 Research urban forest performance875

AHCARB704 Conduct an entomology research project878

Assessment Re quirements for AHCARB704 Conduct an entomology research project..881

AHCARB801 Contextualise diagnostic tests885

Assessment Re quirements for AHCARB801 Contextualise diagnostic tests.....888

AHCARB802 Develop an urban forest management framework.....891

Assessment Re quirements for AHCARB802 Develop an urban forest management framework894

AHCARB803 Analyse edaphic interactions of trees and structures897

Assessment Re quirements for AHCARB803 Analyse edaphic interactions of trees and structures.....901

AHCASW301 Protect places of Aboriginal cultural significance906

Assessment Re quirements for AHCASW301 Protect places of Aboriginal cultural significance909

AHCASW302 Relate Aboriginal culture to sites work.....	911
Assessment Requirements for AHCASW302 Relate Aboriginal culture to sites work	914
AHCASW303 Identify and record Aboriginal sites, objects and cultural landscapes.....	916
Assessment Requirements for AHCASW303 Identify and record Aboriginal sites, objects and cultural landscapes.....	919
AHCASW304 Identify Indigenous culturally significant plants.....	921
Assessment Requirements for AHCASW304 Identify Indigenous culturally significant plants	924
AHCASW305 Work with Aboriginal ceremonial secret sacred materials.....	926
Assessment Requirements for AHCASW305 Work with Aboriginal ceremonial secret sacred materials	929
AHCASW306 Use technology in Aboriginal sites work	931
Assessment Requirements for AHCASW306 Use technology in Aboriginal sites work ...	934
AHCASW307 Support the documentation of Aboriginal cultural landscapes	936
Assessment Requirements for AHCASW307 Support the documentation of Aboriginal cultural landscapes	939
AHCASW308 Apply cultural significance to Aboriginal sites and landscapes	941
Assessment Requirements for AHCASW308 Apply cultural significance to Aboriginal sites and landscapes	944
AHCASW309 Interpret Aboriginal cultural landscape	946
Assessment Requirements for AHCASW309 Interpret Aboriginal cultural landscape ...	949
AHCASW310 Move and store Aboriginal cultural material.....	951
Assessment Requirements for AHCASW310 Move and store Aboriginal cultural material	954
AHCASW312 Maintain an Aboriginal cultural site.....	956
Assessment Requirements for AHCASW312 Maintain an Aboriginal cultural site	959
AHCASW313 Apply knowledge of relevant legislation to Aboriginal sites work	961
Assessment Requirements for AHCASW313 Apply knowledge of relevant legislation to Aboriginal sites work.....	964
AHCASW501 Survey and report on Aboriginal cultural sites	966
Assessment Requirements for AHCASW501 Survey and report on Aboriginal cultural sites.....	970
AHCBAC101 Support agricultural crop work	972
Assessment Requirements for AHCBAC101 Support agricultural crop work	975
AHCBAC201 Assist agricultural crop establishment.....	977
Assessment Requirements for AHCBAC201 Assist agricultural crop establishment	979
AHCBAC202 Assist agricultural crop maintenance	981
Assessment Requirements for AHCBAC202 Assist agricultural crop maintenance	983
AHCBAC203 Assist agricultural crop harvesting.....	985
Assessment Requirements for AHCBAC203 Assist agricultural crop harvesting	988
AHCBAC204 Prepare grain storages	990
Assessment Requirements for AHCBAC204 Prepare grain storages.....	993
AHCBAC301 Conserve forage	995
Assessment Requirements for AHCBAC301 Conserve forage	998
AHCBAC302 Establish pastures and crops for livestock production.....	1000
Assessment Requirements for AHCBAC302 Establish pastures and crops for livestock production	1003
AHCBAC303 Prepare to receive grains and seeds.....	1005
Assessment Requirements for AHCBAC303 Prepare to receive grains and seeds.....	1008
AHCBAC304 Test grains and seeds on receipt.....	1010
Assessment Requirements for AHCBAC304 Test grains and seeds on receipt	1013
AHCBAC305 Undertake preparation of land for agricultural crop production	1015
Assessment Requirements for AHCBAC305 Undertake preparation of land for agricultural crop production.....	1018

AHCBA306 Establish agricultural crops	1020
Assessment Requirements for AHCBA306 Establish agricultural crops	1023
AHCBA307 Maintain agricultural crops	1025
Assessment Requirements for AHCBA307 Maintain agricultural crops	1028
AHCBA308 Undertake agricultural crop harvesting activities	1030
Assessment Requirements for AHCBA308 Undertake agricultural crop harvesting activities.....	1033
AHCBA310 Maintain pastures and crops for livestock production.....	1035
Assessment Requirements for AHCBA310 Maintain pastures and crops for livestock production	1038
AHCBA401 Manage pastures for livestock production.....	1040
Assessment Requirements for AHCBA401 Manage pastures for livestock production.....	1043
AHCBA402 Plan a pasture establishment program	1045
Assessment Requirements for AHCBA402 Plan a pasture establishment program	1048
AHCBA403 Supervise agricultural crop establishment.....	1050
Assessment Requirements for AHCBA403 Supervise agricultural crop establishment.....	1053
AHCBA404 Plan and implement agricultural crop maintenance	1055
Assessment Requirements for AHCBA404 Plan and implement agricultural crop maintenance.....	1058
AHCBA405 Supervise agricultural crop harvesting.....	1060
Assessment Requirements for AHCBA405 Supervise agricultural crop harvesting ...	1063
AHCBA406 Maintain grain quality in storage	1065
Assessment Requirements for AHCBA406 Maintain grain quality in storage.....	1068
AHCBA407 Save, prepare and store agricultural seed.....	1070
Assessment Requirements for AHCBA407 Save, prepare and store agricultural seed.....	1073
AHCBA408 Manage agricultural crop production	1075
Assessment Requirements for AHCBA408 Manage agricultural crop production	1078
AHCBA502 Manage forage conservation.....	1080
Assessment Requirements for AHCBA502 Manage forage conservation	1083
AHCBA503 Manage integrated crop and pasture production.....	1085
Assessment Requirements for AHCBA503 Manage integrated crop and pasture production	1088
AHCBA504 Plan and manage a stored grain program	1090
Assessment Requirements for AHCBA504 Plan and manage a stored grain program.....	1094
AHCBA505 Plan and manage long-term weed, pest or disease control in crops.....	1096
Assessment Requirements for AHCBA505 Plan and manage long-term weed, pest or disease control in crops	1099
AHCBA506 Manage the harvest of crops.....	1101
Assessment Requirements for AHCBA506 Manage the harvest of crops	1105
AHCBA507 Develop production plans for crops	1107
Assessment Requirements for AHCBA507 Develop production plans for crops	1110
AHCBA508 Apply plant biology to agronomic practices	1112
Assessment Requirements for AHCBA508 Apply plant biology to agronomic practices.....	1114
AHCBEK201 Support beekeeping work.....	1116
Assessment Requirements for AHCBEK201 Support beekeeping work	1118
AHCBEK202 Use a bee smoker.....	1119
Assessment Requirements for AHCBEK202 Use a bee smoker	1121
AHCBEK203 Open and reassemble a bee hive	1123
Assessment Requirements for AHCBEK203 Open and reassemble a beehive.....	1125
AHCBEK204 Construct and repair beehives.....	1126
Assessment Requirements for AHCBEK204 Construct and repair beehives	1128
AHCBEK301 Manage honey bee swarms	1129
Assessment Requirements for AHCBEK301 Manage honey bee swarms.....	1131

AHCBEK302 Manipulate honey bee brood.....	1133
Assessment Requirements for AHCBEK302 Manipulate honey bee brood.....	1135
AHCBEK303 Re-queen a honey bee colony.....	1137
Assessment Requirements for AHCBEK303 Re-queen a honey bee colony	1140
AHCBEK304 Remove a honey crop from a hive	1142
Assessment Requirements for AHCBEK304 Remove a honey crop from a hive	1145
AHCBEK305 Extract honey.....	1147
Assessment Requirements for AHCBEK305 Extract honey.....	1149
AHCBEK306 Manage pests and disease within a honey bee colony.....	1151
Assessment Requirements for AHCBEK306 Manage pests and disease within a honey bee colony	1153
AHCBEK401 Collect and store propolis.....	1154
Assessment Requirements for AHCBEK401 Collect and store propolis	1156
AHCBEK402 Perform queen bee artificial insemination.....	1158
Assessment Requirements for AHCBEK402 Perform queen bee artificial insemination.....	1160
AHCBEK403 Produce and harvest royal jelly.....	1162
Assessment Requirements for AHCBEK403 Produce and harvest royal jelly.....	1164
AHCBEK404 Provide bee pollination services.....	1166
Assessment Requirements for AHCBEK404 Provide bee pollination services	1168
AHCBEK405 Select and establish an apiary site	1170
Assessment Requirements for AHCBEK405 Select and establish an apiary site	1173
AHCBEK406 Trap and store pollen.....	1175
Assessment Requirements for AHCBEK406 Trap and store pollen.....	1177
AHCBEK407 Rear queen bees	1179
Assessment Requirements for AHCBEK407 Rear queen bees	1181
AHCBER301 Work effectively in an emergency disease or plant pest response.....	1183
Assessment Requirements for AHCBER301 Work effectively in an emergency disease or plant pest response.....	1186
AHCBER303 Carry out emergency disease or plant pest control procedures at infected premises.....	1188
Assessment Requirements for AHCBER303 Carry out emergency disease or plant pest control procedures at infected premises.....	1191
AHCBER304 Carry out movement and security procedures.....	1193
Assessment Requirements for AHCBER304 Carry out movement and security procedures.....	1196
AHCBER401 Plan and supervise control activities on infected premises.....	1198
Assessment Requirements for AHCBER401 Plan and supervise control activities on infected premises	1201
AHCBER402 Carry out field surveillance for a specific emergency disease or plant pest.....	1203
Assessment Requirements for AHCBER402 Carry out field surveillance for a specific emergency disease or plant pest.....	1205
AHCBER501 Manage active operational emergency disease or plant pest sites.....	1207
Assessment Requirements for AHCBER501 Manage active operational emergency disease or plant pest sites	1210
AHCBER502 Manage the implementation of an emergency disease or plant pest control program.....	1212
Assessment Requirements for AHCBER502 Manage the implementation of an emergency disease or plant pest control program.....	1215
AHCBER601 Plan and oversee an emergency disease or plant pest control program.....	1217
Assessment Requirements for AHCBER601 Plan and oversee an emergency disease or plant pest control program	1220
AHC BIO201 Inspect and clean machinery for plant, animal and soil material.....	1222
Assessment Requirements for AHC BIO201 Inspect and clean machinery for plant, animal and soil material	1225

AHCBIO202 Follow site quarantine procedures.....1227
 Assessment Requirements for AHCBIO202 Follow site quarantine procedures1230
 AHCBIO302 Identify and report unusual disease or plant pest signs1232
 Assessment Requirements for AHCBIO302 Identify and report unusual disease or plant pest signs.....1234
 AHCBIO305 Apply biosecurity measures.....1236
 Assessment Requirements for AHCBIO305 Apply biosecurity measures1239
 AHCBIO403 Plan and implement a farm or enterprise biosecurity plan.....1241
 Assessment Requirements for AHCBIO403 Plan and implement a farm or enterprise biosecurity plan1244
 AHCBUS301 Use hand held e-business tools1248
 Assessment Requirements for AHCBUS301 Use hand held e-business tools.....1250
 AHCBUS401 Administer finance, insurance and legal requirements.....1252
 Assessment Requirements for AHCBUS401 Administer finance, insurance and legal requirements.....1254
 AHCBUS402 Cost a project.....1256
 Assessment Requirements for AHCBUS402 Cost a project1258
 AHCBUS404 Operate within a budget framework1260
 Assessment Requirements for AHCBUS404 Operate within a budget framework.....1262
 AHCBUS405 Participate in an e-business supply chain.....1264
 Assessment Requirements for AHCBUS405 Participate in an e-business supply chain.1267
 AHCBUS501 Manage staff1269
 Assessment Requirements for AHCBUS501 Manage staff.....1272
 AHCBUS502 Market products and services1274
 Assessment Requirements for AHCBUS502 Market products and services.....1278
 AHCBUS503 Negotiate and monitor contracts1280
 Assessment Requirements for AHCBUS503 Negotiate and monitor contracts.....1283
 AHCBUS504 Prepare estimates, quotes and tenders1285
 Assessment Requirements for AHCBUS504 Prepare estimates, quotes and tenders1288
 AHCBUS506 Develop and review a business plan1290
 Assessment Requirements for AHCBUS506 Develop and review a business plan1293
 AHCBUS507 Monitor and review business performance1295
 Assessment Requirements for AHCBUS507 Monitor and review business performance 1298
 AHCBUS508 Prepare and monitor budgets and financial reports1300
 Assessment Requirements for AHCBUS508 Prepare and monitor budgets and financial reports1303
 AHCBUS509 Develop and implement business structures and relationships1305
 Assessment Requirements for AHCBUS509 Develop and implement business structures and relationships.....1308
 AHCBUS510 Manage finance, insurance and legal requirements.....1310
 Assessment Requirements for AHCBUS510 Manage finance, insurance and legal requirements.....1313
 AHCBUS601 Manage capital works.....1315
 Assessment Requirements for AHCBUS601 Manage capital works.....1318
 AHCBUS602 Review land management plans and strategies1320
 Assessment Requirements for AHCBUS602 Review land management plans and strategies 1323
 AHCBUS603 Develop and review a strategic plan.....1325
 Assessment Requirements for AHCBUS603 Develop and review a strategic plan.....1327
 AHCBUS604 Design and manage the enterprise quality management system.....1329
 Assessment Requirements for AHCBUS604 Design and manage the enterprise quality management system.....1332
 AHCBUS605 Manage human resources1334
 Assessment Requirements for AHCBUS605 Manage human resources1337

AHCBUS606 Develop a monitoring, evaluation and reporting program1339
Assessment Requirements for AHCBUS606 Develop a monitoring, evaluation and reporting program.....1342
AHCBUS607 Implement a monitoring, evaluation and reporting program.....1344
Assessment Requirements for AHCBUS607 Implement a monitoring, evaluation and reporting program.....1347
AHCBUS608 Manage risk1349
Assessment Requirements for AHCBUS608 Manage risk.....1352
AHCCCF401 Prepare project acquittal.....1354
Assessment Requirements for AHCCCF401 Prepare project acquittal1356
AHCCCF402 Report on project1357
Assessment Requirements for AHCCCF402 Report on project.....1359
AHCCCF403 Obtain and manage sponsorship.....1361
Assessment Requirements for AHCCCF403 Obtain and manage sponsorship1364
AHCCCF404 Contribute to association governance1366
Assessment Requirements for AHCCCF404 Contribute to association governance.....1368
AHCCCF405 Develop community networks.....1370
Assessment Requirements for AHCCCF405 Develop community networks1373
AHCCCF406 Facilitate ongoing group development.....1375
Assessment Requirements for AHCCCF406 Facilitate ongoing group development.....1377
AHCCCF407 Obtain resources from community and groups.....1379
Assessment Requirements for AHCCCF407 Obtain resources from community and groups.....1381
AHCCCF408 Promote community programs1383
Assessment Requirements for AHCCCF408 Promote community programs.....1386
AHCCCF409 Participate in assessments of project submissions.....1388
Assessment Requirements for AHCCCF409 Participate in assessments of project submissions.....1390
AHCCCF410 Support individuals in resource management change processes.....1392
Assessment Requirements for AHCCCF410 Support individuals in resource management change processes.....1394
AHCCCF411 Develop approaches to include cultural and human diversity.....1396
Assessment Requirements for AHCCCF411 Develop approaches to include cultural and human diversity.....1399
AHCCCF412 Coordinate board or committee elections1401
Assessment Requirements for AHCCCF412 Coordinate board or committee elections 1403
AHCCCF413 Service committees1405
Assessment Requirements for AHCCCF413 Service committees.....1407
AHCCCF414 Coordinate fundraising activities.....1409
Assessment Requirements for AHCCCF414 Coordinate fundraising activities1412
AHCCCF415 Coordinate social events to support group purposes.....1414
Assessment Requirements for AHCCCF415 Coordinate social events to support group purposes.....1416
AHCCCF416 Present proposed courses of action to meeting.....1418
Assessment Requirements for AHCCCF416 Present proposed courses of action to meeting 1420
AHCCCF501 Evaluate project submissions.....1421
Assessment Requirements for AHCCCF501 Evaluate project submissions1424
AHCCCF502 Facilitate development of group goals and projects1426
Assessment Requirements for AHCCCF502 Facilitate development of group goals and projects.....1429
AHCCCF503 Promote group formation and development.....1431
Assessment Requirements for AHCCCF503 Promote group formation and development 1434
AHCCCF504 Support group and community changes in resource management.....1436

Assessment Requirements for AHCCCF504 Support group and community changes in resource management1438

AHCCCF505 Contribute to regional planning process.....1439

Assessment Re quirements for AHCCCF505 Contribute to regional planning process..1441

AHCCCF506 Manage the incorporation of a group1443

Assessment Re quirements for AHCCCF506 Manage the incorporation of a group.....1445

AHCCCF601 Coordinate the development of regional plans1447

Assessment Re quirements for AHCCCF601 Coordinate the development of regional plans 1450

AHCCHM101 Follow basic chemical safety rules1452

Assessment Re quirements for AHCCHM101 Follow basic chemical safety rules1455

AHCCHM201 Apply chemicals under supervision.....1457

Assessment Re quirements for AHCCHM201 Apply chemicals under supervision.....1460

AHCCHM301 Use application e quipment to apply fumigant in confined spaces1462

Assessment Re quirements for AHCCHM301 Use application e quipment to apply fumigant in confined spaces1465

AHCCHM302 Fumigate soil.....1467

Assessment Re quirements for AHCCHM302 Fumigate soil1470

AHCCHM303 Pre pare and apply chemicals1472

Assessment Re quirements for AHCCHM303 Pre pare and apply chemicals1475

AHCCHM304 Transport and store chemicals1477

Assessment Re quirements for AHCCHM304 Transport and store chemicals.....1480

AHCCHM305 Conduct manual fumigation of vertebrate and invertebrate pests.....1482

Assessment Re quirements for AHCCHM305 Conduct manual fumigation of vertebrate and invertebrate pests.....1486

AHCCHM306 Pre pare and apply chemicals for hand held application e quipment1488

Assessment Re quirements for AHCCHM306 Pre pare and apply chemicals for hand held application e quipment1491

AHCCHM401 Develop procedures to minimise risks in the use of chemicals1493

Assessment Re quirements for AHCCHM401 Develop procedures to minimise risks in the use of chemicals1496

AHCCHM402 Plan and implement a chemical use program.....1498

Assessment Re quirements for AHCCHM402 Plan and implement a chemical use program1501

AHCCHM403 Pre pare safe operating procedures for calibration of e quipment.....1503

Assessment Re quirements for AHCCHM403 Pre pare safe operating procedures for calibration of e quipment.....1505

AHCCHM501 Develop and manage a chemical use strategy1507

Assessment Re quirements for AHCCHM501 Develop and manage a chemical use strategy1510

AHCCMN101 Adapt to work re quirements in the agrifood industry1513

Assessment Re quirements for AHCCMN101 Adapt to work re quirements in the agrifood industry1516

AHCCMN102 Apply effective work practices1518

Assessment Re quirements for AHCCMN102 Apply effective work practices.....1521

AHCCMN103 Demonstrate care and apply safe practices at work.....1523

Assessment Re quirements for AHCCMN103 Demonstrate care and apply safe practices at work1525

AHCCMN201 Contribute to animal care through work activities1527

Assessment Re quirements for AHCCMN201 Contribute to animal care through work activities.....1530

AHCCMN202 Contribute to work activities to produce food1532

Assessment Re quirements for AHCCMN202 Contribute to work activities to produce food1535

AHCCOM201 Assess and receive raw materials for composting1538

Assessment Re quirements for AHCCOM201 Assess and receive raw materials for composting.....1541

AHCCOM202 Recognise and respond to fire emergencies on a composting site.....1543
Assessment Requirements for AHCCOM202 Recognise and respond to fire emergencies on a composting site1546
AHCCOM203 Recognise raw materials, production processes and products on a composting site1548
Assessment Requirements for AHCCOM203 Recognise raw materials, production processes and products on a composting site.....1551
AHCCOM301 Operate compost processing plant, machinery and equipment.....1553
Assessment Requirements for AHCCOM301 Operate compost processing plant, machinery and equipment1556
AHCCOM302 Dispatch materials and composted product.....1558
Assessment Requirements for AHCCOM302 Dispatch materials and composted product1560
AHCCOM303 Operate a compost bagging process1562
Assessment Requirements for AHCCOM303 Operate a compost bagging process1565
AHCCOM401 Develop a composting recipe1567
Assessment Requirements for AHCCOM401 Develop a composting recipe.....1570
AHCCOM402 Plan and schedule compost production1572
Assessment Requirements for AHCCOM402 Plan and schedule compost production..1574
AHCCOM501 Identify and secure raw materials supply for compost production.....1576
Assessment Requirements for AHCCOM501 Identify and secure raw materials supply for compost production1579
AHCDER401 Handle, store and grade deer velvet1581
Assessment Requirements for AHCDER401 Handle, store and grade deer velvet.....1583
AHCDER501 Comply with deer industry national velvet accreditation requirements..1585
Assessment Requirements for AHCDER501 Comply with deer industry national velvet accreditation requirements1587
AHCDER502 Harvest deer velvet.....1589
Assessment Requirements for AHCDER502 Harvest deer velvet1591
AHCDES501 Design sustainable landscapes.....1593
Assessment Requirements for AHCDES501 Design sustainable landscapes1596
AHCDES502 Prepare a landscape design.....1598
Assessment Requirements for AHCDES502 Prepare a landscape design.....1601
AHCDES503 Assess landscape sites.....1603
Assessment Requirements for AHCDES503 Assess landscape sites1606
AHCDES504 Design for construction of landscape features1608
Assessment Requirements for AHCDES504 Design for construction of landscape features 1610
AHCDRG201 Maintain drainage systems1612
Assessment Requirements for AHCDRG201 Maintain drainage systems1614
AHCDRG301 Install drainage systems1616
Assessment Requirements for AHCDRG301 Install drainage systems.....1619
AHCDRG302 Measure drainage system performance.....1621
Assessment Requirements for AHCDRG302 Measure drainage system performance ..1623
AHCDRG303 Troubleshoot drainage systems1625
Assessment Requirements for AHCDRG303 Troubleshoot drainage systems.....1627
AHCDRG304 Maintain and repair irrigation drainage systems1629
Assessment Requirements for AHCDRG304 Maintain and repair irrigation drainage systems.....1632
AHCDRG401 Coordinate and supervise installation of an irrigation drainage system.1634
Assessment Requirements for AHCDRG401 Coordinate and supervise installation of an irrigation drainage system1637
AHCDRG402 Monitor and control irrigation drainage systems1639
Assessment Requirements for AHCDRG402 Monitor and control irrigation drainage systems.....1642

AHCDRG501 Design drainage systems	1644
Assessment Requirements for AHCDRG501 Design drainage systems	1647
AHCDRY201 Milk livestock.....	1649
Assessment Requirements for AHCDRY201 Milk livestock	1651
AHCDRY301 Coordinate milking operations.....	1653
Assessment Requirements for AHCDRY301 Coordinate milking operations	1656
AHCDRY302 Operate a dairy recycling system	1658
Assessment Requirements for AHCDRY302 Operate a dairy recycling system.....	1661
AHCDRY401 Manage milking shed routines	1663
Assessment Requirements for AHCDRY401 Manage milking shed routines	1666
AHCEXP301 Handle and store explosives.....	1668
Assessment Requirements for AHCEXP301 Handle and store explosives.....	1671
AHCEXP302 Identify and select explosive products.....	1673
Assessment Requirements for AHCEXP302 Identify and select explosive products	1675
AHCFAU201 Recognise fauna.....	1677
Assessment Requirements for AHCFAU201 Recognise fauna	1680
AHCFAU301 Respond to wildlife emergencies	1682
Assessment Requirements for AHCFAU301 Respond to wildlife emergencies.....	1685
AHCFAU501 Manage fauna populations	1687
Assessment Requirements for AHCFAU501 Manage fauna populations	1690
AHCFIR201 Assist with prescribed burning	1692
Assessment Requirements for AHCFIR201 Assist with prescribed burning.....	1694
AHCFIR501 Manage wildfire hazard reduction programs.....	1696
Assessment Requirements for AHCFIR501 Manage wildfire hazard reduction programs	1699
AHCFIR502 Plan prescribed burning for fuel, ecological and cultural resource management	1701
Assessment Requirements for AHCFIR502 Plan prescribed burning for fuel, ecological and cultural resource management.....	1704
AHCHYD301 Implement a maintenance program for hydroponic systems.....	1706
Assessment Requirements for AHCHYD301 Implement a maintenance program for hydroponic systems.....	1708
AHCHYD302 Install hydroponic systems	1710
Assessment Requirements for AHCHYD302 Install hydroponic systems	1712
AHCHYD501 Develop a plan for a hydroponic system.....	1714
Assessment Requirements for AHCHYD501 Develop a plan for a hydroponic system	1717
AHCILM201 Maintain cultural places	1719
Assessment Requirements for AHCILM201 Maintain cultural places.....	1721
AHCILM202 Observe and report plants or animals.....	1723
Assessment Requirements for AHCILM202 Observe and report plants or animals	1726
AHCILM203 Record information about Country	1728
Assessment Requirements for AHCILM203 Record information about Country	1731
AHCILM302 Provide appropriate information on cultural knowledge	1733
Assessment Requirements for AHCILM302 Provide appropriate information on cultural knowledge.....	1736
AHCILM305 Work with an Aboriginal Community or organisation	1738
Assessment Requirements for AHCILM305 Work with an Aboriginal Community or organisation.....	1741
AHCILM306 Follow Aboriginal cultural protocols	1743
Assessment Requirements for AHCILM306 Follow Aboriginal cultural protocols	1747
AHCILM307 Implement Aboriginal cultural burning practices.....	1749
Assessment Requirements for AHCILM307 Implement Aboriginal cultural burning practices.....	1752
AHCILM308 Identify traditional customs and land rights for an Indigenous Community	1754

Assessment Requirements for AHCILM308 Identify traditional customs and land rights for an Indigenous Community	1756
AHCILM401 Protect places of cultural significance	1758
Assessment Requirements for AHCILM401 Protect places of cultural significance	1761
AHCILM402 Report on place of potential cultural significance	1763
Assessment Requirements for AHCILM402 Report on place of potential cultural significance	1766
AHCILM403 Contribute to the proposal for a negotiated outcome for a given area of Country	1768
Assessment Requirements for AHCILM403 Contribute to the proposal for a negotiated outcome for a given area of Country	1771
AHCILM404 Record and document Community history	1773
Assessment Requirements for AHCILM404 Record and document Community history	1776
AHCILM405 Develop work practices to accommodate cultural identity	1778
Assessment Requirements for AHCILM405 Develop work practices to accommodate cultural identity	1781
AHCILM501 Conduct field research into natural and cultural resources	1783
Assessment Requirements for AHCILM501 Conduct field research into natural and cultural resources	1787
AHCILM502 Develop conservation strategies for cultural resources	1789
Assessment Requirements for AHCILM502 Develop conservation strategies for cultural resources	1792
AHCILM503 Manage restoration of cultural places	1794
Assessment Requirements for AHCILM503 Manage restoration of cultural places	1797
AHCILM504 Develop strategies for Indigenous land or sea management	1799
Assessment Requirements for AHCILM504 Develop strategies for Indigenous land or sea management	1802
AHCILM505 Map relationship of business enterprise to culture and Country	1804
Assessment Requirements for AHCILM505 Map relationship of business enterprise to culture and Country	1807
AHCILM506 Operate within Community cultures and goals	1809
Assessment Requirements for AHCILM506 Operate within Community cultures and goals	1811
AHCILM508 Propose a negotiated outcome for a given area of Country	1813
Assessment Requirements for AHCILM508 Propose a negotiated outcome for a given area of Country	1816
AHCILM510 Plan for successful cultural practice at work	1818
Assessment Requirements for AHCILM510 Plan for successful cultural practice at work	1821
AHCILM601 Manage cultural processes in an Indigenous organisation	1823
Assessment Requirements for AHCILM601 Manage cultural processes in an Indigenous organisation	1826
AHCINF201 Carry out basic electric fencing operations	1828
Assessment Requirements for AHCINF201 Carry out basic electric fencing operations	1830
AHCINF202 Install, maintain and repair farm fencing	1832
Assessment Requirements for AHCINF202 Install, maintain and repair farm fencing	1835
AHCINF203 Maintain properties and structures	1837
Assessment Requirements for AHCINF203 Maintain properties and structures	1839
AHCINF204 Fabricate and repair metal or plastic structures	1841
Assessment Requirements for AHCINF204 Fabricate and repair metal or plastic structures	1843
AHCINF301 Implement property improvement, construction and repair	1845
Assessment Requirements for AHCINF301 Implement property improvement, construction and repair	1848

AHCINF302 Plan and construct an electric fence.....	1850
Assessment Requirements for AHCINF302 Plan and construct an electric fence	1853
AHCINF303 Plan and construct conventional fencing.....	1855
Assessment Requirements for AHCINF303 Plan and construct conventional fencing ..	1857
AHCINF304 Install and terminate extra low voltage wiring systems.....	1859
Assessment Requirements for AHCINF304 Install and terminate extra low voltage wiring systems.....	1862
AHCIRG101 Support irrigation work.....	1864
Assessment Requirements for AHCIRG101 Support irrigation work.....	1867
AHCIRG215 Assist with low volume irrigation operations.....	1869
Assessment Requirements for AHCIRG215 Assist with low volume irrigation operations	1872
AHCIRG216 Assist with surface irrigation operations	1874
Assessment Requirements for AHCIRG216 Assist with surface irrigation operations..	1877
AHCIRG217 Assist with pressurised irrigation operations.....	1879
Assessment Requirements for AHCIRG217 Assist with pressurised irrigation operations	1882
AHCIRG218 Assist with pump and flow control device operations	1884
Assessment Requirements for AHCIRG218 Assist with pump and flow control device operations	1886
AHCIRG303 Measure irrigation delivery system performance	1888
Assessment Requirements for AHCIRG303 Measure irrigation delivery system performance	1890
AHCIRG306 Troubleshoot irrigation systems.....	1892
Assessment Requirements for AHCIRG306 Troubleshoot irrigation systems.....	1894
AHCIRG308 Monitor soils under irrigation.....	1895
Assessment Requirements for AHCIRG308 Monitor soils under irrigation.....	1898
AHCIRG309 Install irrigation pumps	1900
Assessment Requirements for AHCIRG309 Install irrigation pumps	1902
AHCIRG310 Operate and maintain irrigation pumping systems	1904
Assessment Requirements for AHCIRG310 Operate and maintain irrigation pumping systems.....	1907
AHCIRG315 Interpret irrigation plans and drawings.....	1909
Assessment Requirements for AHCIRG315 Interpret irrigation plans and drawings...	1911
AHCIRG325 Operate irrigation technology	1913
Assessment Requirements for AHCIRG325 Operate irrigation technology.....	1915
AHCIRG326 Operate irrigation injection equipment.....	1917
Assessment Requirements for AHCIRG326 Operate irrigation injection equipment ...	1920
AHCIRG327 Implement an irrigation schedule.....	1922
Assessment Requirements for AHCIRG327 Implement an irrigation schedule	1925
AHCIRG331 Install pressurised irrigation systems	1927
Assessment Requirements for AHCIRG331 Install pressurised irrigation systems.....	1930
AHCIRG332 Operate pressurised irrigation systems	1932
Assessment Requirements for AHCIRG332 Operate pressurised irrigation systems	1934
AHCIRG333 Maintain pressurised irrigation systems.....	1936
Assessment Requirements for AHCIRG333 Maintain pressurised irrigation systems ..	1939
AHCIRG334 Operate and maintain gravity fed irrigation systems	1941
Assessment Requirements for AHCIRG334 Operate and maintain gravity fed irrigation systems.....	1944
AHCIRG335 Operate and maintain moving irrigation system.....	1946
Assessment Requirements for AHCIRG335 Operate and maintain moving irrigation system.....	1949
AHCIRG402 Determine hydraulic parameters for an irrigation system.....	1951
Assessment Requirements for AHCIRG402 Determine hydraulic parameters for an irrigation system.....	1953

AHCIRG404 Implement an irrigation-related environmental protection program1955
Assessment Requirements for AHCIRG404 Implement an irrigation-related environmental protection program1958
AHCIRG408 Schedule irrigations1959
Assessment Requirements for AHCIRG408 Schedule irrigations1961
AHCIRG410 Select and manage pumping systems for irrigation1963
Assessment Requirements for AHCIRG410 Select and manage pumping systems for irrigation.....1966
AHCIRG415 Interpret and apply irrigation designs.....1968
Assessment Requirements for AHCIRG415 Interpret and apply irrigation designs1971
AHCIRG422 Manage a moving sprinkler irrigation system.....1973
Assessment Requirements for AHCIRG422 Manage a moving sprinkler irrigation system1976
AHCIRG426 Evaluate water supply for irrigation1978
Assessment Requirements for AHCIRG426 Evaluate water supply for irrigation1980
AHCIRG431 Supervise irrigation system installation.....1982
Assessment Requirements for AHCIRG431 Supervise irrigation system installation ...1985
AHCIRG432 Supervise irrigation system maintenance1987
Assessment Requirements for AHCIRG432 Supervise irrigation system maintenance .1990
AHCIRG433 Manage irrigation systems1992
Assessment Requirements for AHCIRG433 Manage irrigation systems1995
AHCIRG434 Manage surface irrigation systems1997
Assessment Requirements for AHCIRG434 Manage surface irrigation systems.....2000
AHCIRG501 Audit irrigation systems2002
Assessment Requirements for AHCIRG501 Audit irrigation systems.....2005
AHCIRG502 Design irrigation system maintenance and monitoring programs2007
Assessment Requirements for AHCIRG502 Design irrigation system maintenance and monitoring programs2010
AHCIRG503 Design irrigation, drainage and water treatment systems.....2012
Assessment Requirements for AHCIRG503 Design irrigation, drainage and water treatment systems2016
AHCIRG504 Develop an irrigation and drainage management plan.....2018
Assessment Requirements for AHCIRG504 Develop an irrigation and drainage management plan.....2021
AHCIRG505 Establish and maintain an irrigation-related environmental protection program.....2023
Assessment Requirements for AHCIRG505 Establish and maintain an irrigation-related environmental protection program2026
AHCLPW301 Supervise park visitor activities2028
Assessment Requirements for AHCLPW301 Supervise park visitor activities.....2030
AHCLPW303 Construct access tracks.....2032
Assessment Requirements for AHCLPW303 Construct access tracks2035
AHCLPW304 Carry out inspection of designated area.....2037
Assessment Requirements for AHCLPW304 Carry out inspection of designated area .2040
AHCLPW305 Perform diving for scientific purposes2042
Assessment Requirements for AHCLPW305 Perform diving for scientific purposes....2045
AHCLPW306 Undertake sampling and testing of water.....2047
Assessment Requirements for AHCLPW306 Undertake sampling and testing of water2050
AHCLPW401 Process applications for changes in land use2052
Assessment Requirements for AHCLPW401 Process applications for changes in land use2055
AHCLPW402 Implement land and sea management practices.....2057
Assessment Requirements for AHCLPW402 Implement land and sea management practices.....2060
AHCLPW403 Inspect and monitor cultural places.....2062

Assessment Requirements for AHCLPW403 Inspect and monitor cultural places2065
AHCLPW404 Produce maps for land management purposes.....2067
Assessment Requirements for AHCLPW404 Produce maps for land management purposes.....2070
AHCLPW405 Monitor biodiversity2072
Assessment Requirements for AHCLPW405 Monitor biodiversity.....2075
AHCLPW501 Develop a management plan for a designated area2077
Assessment Requirements for AHCLPW501 Develop a management plan for a designated area.....2080
AHCLPW503 Assess applications for legislative compliance2082
Assessment Requirements for AHCLPW503 Assess applications for legislative compliance 2084
AHCLPW505 Implement natural and cultural resource management plans2086
Assessment Requirements for AHCLPW505 Implement natural and cultural resource management plans2088
AHCLPW601 Coordinate the preparation of a regional resource management plan ...2090
Assessment Requirements for AHCLPW601 Coordinate the preparation of a regional resource management plan2093
AHCLSC101 Support landscape work2095
Assessment Requirements for AHCLSC101 Support landscape work.....2097
AHCLSC201 Assist with landscape construction work.....2099
Assessment Requirements for AHCLSC201 Assist with landscape construction work .2101
AHCLSC202 Construct low-profile timber or modular retaining walls.....2103
Assessment Requirements for AHCLSC202 Construct low-profile timber or modular retaining walls2106
AHCLSC203 Install aggregate paths2108
Assessment Requirements for AHCLSC203 Install aggregate paths.....2111
AHCLSC204 Lay paving2113
Assessment Requirements for AHCLSC204 Lay paving.....2116
AHCLSC205 Install tree protection devices.....2118
Assessment Requirements for AHCLSC205 Install tree protection devices.....2120
AHCLSC301 Set out site for construction works2122
Assessment Requirements for AHCLSC301 Set out site for construction works.....2124
AHCLSC302 Construct landscape features using concrete.....2125
Assessment Requirements for AHCLSC302 Construct landscape features using concrete 2128
AHCLSC303 Construct brick and block structures and features2130
Assessment Requirements for AHCLSC303 Construct brick and block structures and features2133
AHCLSC304 Erect timber structures and features2134
Assessment Requirements for AHCLSC304 Erect timber structures and features2137
AHCLSC305 Construct stone structures and features.....2139
Assessment Requirements for AHCLSC305 Construct stone structures and features ..2142
AHCLSC306 Implement a paving project.....2144
Assessment Requirements for AHCLSC306 Implement a paving project.....2147
AHCLSC307 Implement a retaining wall project.....2149
Assessment Requirements for AHCLSC307 Implement a retaining wall project.....2152
AHCLSC308 Install metal structures and features.....2154
Assessment Requirements for AHCLSC308 Install metal structures and features2157
AHCLSC309 Install water features2159
Assessment Requirements for AHCLSC309 Install water features2162
AHCLSC310 Implement a tree transplanting program.....2163
Assessment Requirements for AHCLSC310 Implement a tree transplanting program.2166
AHCLSC401 Supervise landscape project works2168
Assessment Requirements for AHCLSC401 Supervise landscape project works2171

AHCLSC501 Survey and establish site levels.....	2173
Assessment Requirements for AHCLSC501 Survey and establish site levels	2175
AHCLSC502 Manage landscape projects	2177
Assessment Requirements for AHCLSC502 Manage landscape projects.....	2180
AHCLSC503 Manage a tree transplanting program	2182
Assessment Requirements for AHCLSC503 Manage a tree transplanting program	2185
AHCLSK101 Support extensive livestock work.....	2187
Assessment Requirements for AHCLSK101 Support extensive livestock work	2190
AHCLSK102 Support intensive livestock work	2192
Assessment Requirements for AHCLSK102 Support intensive livestock work.....	2195
AHCLSK201 Assist with feeding in a production system.....	2197
Assessment Requirements for AHCLSK201 Assist with feeding in a production system.....	2199
AHCLSK202 Care for health and welfare of livestock.....	2201
Assessment Requirements for AHCLSK202 Care for health and welfare of livestock	2204
AHCLSK203 Carry out birthing duties.....	2206
Assessment Requirements for AHCLSK203 Carry out birthing duties	2209
AHCLSK204 Carry out regular livestock observation.....	2211
Assessment Requirements for AHCLSK204 Carry out regular livestock observation	2214
AHCLSK205 Handle livestock using basic techniques.....	2216
Assessment Requirements for AHCLSK205 Handle livestock using basic techniques	2219
AHCLSK206 Identify and mark livestock	2221
Assessment Requirements for AHCLSK206 Identify and mark livestock.....	2224
AHCLSK207 Load and unload livestock	2226
Assessment Requirements for AHCLSK207 Load and unload livestock.....	2229
AHCLSK208 Monitor livestock to parturition	2231
Assessment Requirements for AHCLSK208 Monitor livestock to parturition	2234
AHCLSK209 Monitor water supplies.....	2236
Assessment Requirements for AHCLSK209 Monitor water supplies.....	2238
AHCLSK210 Muster and move livestock	2240
Assessment Requirements for AHCLSK210 Muster and move livestock	2243
AHCLSK211 Provide feed for livestock.....	2245
Assessment Requirements for AHCLSK211 Provide feed for livestock	2248
AHCLSK213 Clean out production sheds.....	2250
Assessment Requirements for AHCLSK213 Clean out production sheds	2253
AHCLSK214 Maintain production growing environments.....	2255
Assessment Requirements for AHCLSK214 Maintain production growing environments.....	2258
AHCLSK215 Carry out alpaca handling and husbandry operations	2260
Assessment Requirements for AHCLSK215 Carry out alpaca handling and husbandry operations	2263
AHCLSK216 Clean and maintain livestock pens	2265
Assessment Requirements for AHCLSK216 Clean and maintain livestock pens	2268
AHCLSK217 Apply animal welfare principles to handling and husbandry of livestock.....	2270
Assessment Requirements for AHCLSK217 Apply animal welfare principles to handling and husbandry of livestock	2272
AHCLSK301 Administer medication to livestock.....	2274
Assessment Requirements for AHCLSK301 Administer medication to livestock.....	2277
AHCLSK302 Mate and monitor reproduction of alpacas	2279
Assessment Requirements for AHCLSK302 Mate and monitor reproduction of alpacas.....	2282
AHCLSK303 Carry out feedlot operations	2284
Assessment Requirements for AHCLSK303 Carry out feedlot operations.....	2287
AHCLSK304 Carry out post-mortem examination of livestock.....	2289
Assessment Requirements for AHCLSK304 Carry out post-mortem examination of livestock.....	2292

AHCLSK305 Maintain livestock water supplies	2294
Assessment Requirements for AHCLSK305 Maintain livestock water supplies	2296
AHCLSK306 Coordinate and monitor production performance	2298
Assessment Requirements for AHCLSK306 Coordinate and monitor production performance	2301
AHCLSK307 Euthanase livestock	2303
Assessment Requirements for AHCLSK307 Euthanase livestock	2306
AHCLSK308 Identify and draft livestock	2308
Assessment Requirements for AHCLSK308 Identify and draft livestock	2310
AHCLSK309 Implement animal health control programs	2312
Assessment Requirements for AHCLSK309 Implement animal health control programs	2315
AHCLSK310 Implement feeding plans for intensive production	2317
Assessment Requirements for AHCLSK310 Implement feeding plans for intensive production	2319
AHCLSK311 Implement feeding plans for livestock	2321
Assessment Requirements for AHCLSK311 Implement feeding plans for livestock	2324
AHCLSK312 Coordinate artificial insemination and fertility management of livestock	2326
Assessment Requirements for AHCLSK312 Coordinate artificial insemination and fertility management of livestock	2329
AHCLSK313 Monitor livestock production growing environments	2331
Assessment Requirements for AHCLSK313 Monitor livestock production growing environments	2333
AHCLSK314 Prepare animals for parturition	2335
Assessment Requirements for AHCLSK314 Prepare animals for parturition	2338
AHCLSK315 Prepare for and implement natural mating of livestock	2340
Assessment Requirements for AHCLSK315 Prepare for and implement natural mating of livestock	2343
AHCLSK316 Prepare livestock for competition	2345
Assessment Requirements for AHCLSK316 Prepare livestock for competition	2348
AHCLSK317 Plan to exhibit livestock	2350
Assessment Requirements for AHCLSK317 Plan to exhibit livestock	2353
AHCLSK318 Rear newborn and young livestock	2355
Assessment Requirements for AHCLSK318 Rear newborn and young livestock	2358
AHCLSK319 Slaughter livestock	2360
Assessment Requirements for AHCLSK319 Slaughter livestock	2362
AHCLSK320 Coordinate and monitor livestock transport	2364
Assessment Requirements for AHCLSK320 Coordinate and monitor livestock transport	2367
AHCLSK321 Service and repair bores and windmills	2369
Assessment Requirements for AHCLSK321 Service and repair bores and windmills	2372
AHCLSK322 Transport farm produce or bulk materials	2374
Assessment Requirements for AHCLSK322 Transport farm produce or bulk materials	2377
AHCLSK323 Maintain and monitor feed stocks	2379
Assessment Requirements for AHCLSK323 Maintain and monitor feed stocks	2382
AHCLSK324 Care for and train working dogs	2384
Assessment Requirements for AHCLSK324 Care for and train working dogs	2387
AHCLSK325 Castrate livestock	2389
Assessment Requirements for AHCLSK325 Castrate livestock	2392
AHCLSK326 Mix and mill standard stockfeed	2394
Assessment Requirements for AHCLSK326 Mix and mill standard stockfeed	2397
AHCLSK327 Collect, store and administer colostrum	2399
Assessment Requirements for AHCLSK327 Collect, store and administer colostrum	2401
AHCLSK328 Remove and facilitate reuse of effluent and manure from an intensive production system	2403

Assessment Requirements for AHCLSK328 Remove and facilitate reuse of effluent and manure from an intensive production system	2406
AHCLSK329 Implement procedures for calving	2408
Assessment Requirements for AHCLSK329 Implement procedures for calving.....	2411
AHCLSK331 Comply with industry animal welfare requirements	2413
Assessment Requirements for AHCLSK331 Comply with industry animal welfare requirements.....	2416
AHCLSK332 Monitor animals in intensive production systems	2418
Assessment Requirements for AHCLSK332 Monitor animals in intensive production systems.....	2421
AHCLSK333 Monitor pen condition and ration suitability	2423
Assessment Requirements for AHCLSK333 Monitor pen condition and ration suitability.....	2426
AHCLSK334 Plan, prepare and conduct mulesing procedures	2428
Assessment Requirements for AHCLSK334 Plan, prepare and conduct mulesing procedures	2432
AHCLSK335 Conduct dropped ovary technique procedures for spaying cattle	2434
Assessment Requirements for AHCLSK335 Conduct dropped ovary technique procedures for spaying cattle.....	2438
AHCLSK401 Develop feeding plans for a production system	2440
Assessment Requirements for AHCLSK401 Develop feeding plans for a production system.....	2443
AHCLSK402 Develop livestock feeding plans.....	2445
Assessment Requirements for AHCLSK402 Develop livestock feeding plans	2448
AHCLSK404 Implement and monitor animal welfare programs.....	2450
Assessment Requirements for AHCLSK404 Implement and monitor animal welfare programs	2453
AHCLSK405 Implement intensive production systems	2455
Assessment Requirements for AHCLSK405 Implement intensive production systems	2459
AHCLSK406 Oversee animal marking operations	2461
Assessment Requirements for AHCLSK406 Oversee animal marking operations	2464
AHCLSK407 Plan and monitor intensive production systems	2466
Assessment Requirements for AHCLSK407 Plan and monitor intensive production systems.....	2469
AHCLSK408 Pregnancy test animals	2471
Assessment Requirements for AHCLSK408 Pregnancy test animals	2474
AHCLSK409 Supervise animal health programs.....	2476
Assessment Requirements for AHCLSK409 Supervise animal health programs	2479
AHCLSK410 Supervise feedlot operations	2481
Assessment Requirements for AHCLSK410 Supervise feedlot operations	2484
AHCLSK411 Supervise natural mating of livestock	2486
Assessment Requirements for AHCLSK411 Supervise natural mating of livestock	2489
AHCLSK412 Arrange livestock purchases	2491
Assessment Requirements for AHCLSK412 Arrange livestock purchases.....	2494
AHCLSK413 Design livestock handling facilities.....	2496
Assessment Requirements for AHCLSK413 Design livestock handling facilities	2499
AHCLSK414 Arrange transport for farm produce or livestock	2501
Assessment Requirements for AHCLSK414 Arrange transport for farm produce or livestock.....	2504
AHCLSK415 Oversee alpaca farm activities	2506
Assessment Requirements for AHCLSK415 Oversee alpaca farm activities	2509
AHCLSK416 Identify and select animals for breeding	2511
Assessment Requirements for AHCLSK416 Identify and select animals for breeding	2513
AHCLSK418 Escort livestock during export	2515
Assessment Requirements for AHCLSK418 Escort livestock during export.....	2519

AHCLSK501 Manage livestock production.....	2521
Assessment Requirements for AHCLSK501 Manage livestock production.....	2525
AHCLSK502 Arrange marketing of livestock	2527
Assessment Requirements for AHCLSK502 Arrange marketing of livestock	2530
AHCLSK503 Develop and implement a breeding strategy	2532
Assessment Requirements for AHCLSK503 Develop and implement a breeding strategy.....	2535
AHCLSK504 Develop livestock health and welfare strategies	2537
Assessment Requirements for AHCLSK504 Develop livestock health and welfare strategies.....	2540
AHCLSK505 Develop production plans for livestock	2542
Assessment Requirements for AHCLSK505 Develop production plans for livestock.....	2545
AHCLSK506 Design livestock effluent systems	2547
Assessment Requirements for AHCLSK506 Design livestock effluent systems	2550
AHCLSK507 Plan, monitor and evaluate strategies to improve livestock through genetics.....	2552
Assessment Requirements for AHCLSK507 Plan, monitor and evaluate strategies to improve livestock through genetics	2555
AHCMER301 Process customer complaints	2557
Assessment Requirements for AHCMER301 Process customer complaints.....	2559
AHCMER302 Provide advice on hardware products	2561
Assessment Requirements for AHCMER302 Provide advice on hardware products	2563
AHCMER303 Sell products and services.....	2565
Assessment Requirements for AHCMER303 Sell products and services	2567
AHCMER304 Recommend irrigation products and services.....	2569
Assessment Requirements for AHCMER304 Recommend irrigation products and services.....	2572
AHCMER401 Coordinate customer service and networking activities.....	2574
Assessment Requirements for AHCMER401 Coordinate customer service and networking activities.....	2577
AHCMER402 Provide advice and sell machinery.....	2579
Assessment Requirements for AHCMER402 Provide advice and sell machinery	2582
AHCMER403 Provide advice and sell farm chemicals	2584
Assessment Requirements for AHCMER403 Provide advice and sell farm chemicals	2587
AHCMER404 Provide advice on agronomic products.....	2589
Assessment Requirements for AHCMER404 Provide advice on agronomic products.....	2591
AHCMER405 Provide advice on livestock products.....	2593
Assessment Requirements for AHCMER405 Provide advice on livestock products.....	2595
AHCMER406 Provide information on fertilisers and soil ameliorants	2597
Assessment Requirements for AHCMER406 Provide information on fertilisers and soil ameliorants	2600
AHCMER407 Provide irrigation sales and service	2602
Assessment Requirements for AHCMER407 Provide irrigation sales and service.....	2605
AHCMER501 Develop a sales strategy for rural products.....	2607
Assessment Requirements for AHCMER501 Develop a sales strategy for rural products.....	2609
AHCMKH301 Carry out minor service of milking equipment	2611
Assessment Requirements for AHCMKH301 Carry out minor service of milking equipment.....	2614
AHCMKH303 Service and repair milking equipment.....	2616
Assessment Requirements for AHCMKH303 Service and repair milking equipment.....	2619
AHCMKH304 Monitor and establish milking machine cleaning	2621
Assessment Requirements for AHCMKH304 Monitor and establish milking machine cleaning.....	2624
AHCMKH305 Mechanically test milking machines.....	2626
Assessment Requirements for AHCMKH305 Mechanically test milking machines	2628
AHCMKH401 Carry out cleaning-time tests of milking machines.....	2630

Assessment Requirements for AHCMKH401 Carry out cleaning-time tests of milking machines.....	2632
AHCMKH402 Design and fabricate milking equipment installations.....	2634
Assessment Requirements for AHCMKH402 Design and fabricate milking equipment installations.....	2637
AHCMKH403 Design and install enterprise milk cooling and storage.....	2639
Assessment Requirements for AHCMKH403 Design and install enterprise milk cooling and storage	2642
AHCMKH404 Install milking equipment.....	2644
Assessment Requirements for AHCMKH404 Install milking equipment.....	2647
AHCMKH405 Performance test milking machines	2649
Assessment Requirements for AHCMKH405 Performance test milking machines	2651
AHCMOM101 Assist with routine maintenance of machinery and equipment.....	2653
Assessment Requirements for AHCMOM101 Assist with routine maintenance of machinery and equipment	2656
AHCMOM201 Operate two wheel motorbikes.....	2658
Assessment Requirements for AHCMOM201 Operate two wheel motorbikes.....	2661
AHCMOM202 Operate tractors	2663
Assessment Requirements for AHCMOM202 Operate tractors	2666
AHCMOM203 Operate basic machinery and equipment.....	2668
Assessment Requirements for AHCMOM203 Operate basic machinery and equipment.....	2670
AHCMOM204 Undertake operational maintenance of machinery.....	2672
Assessment Requirements for AHCMOM204 Undertake operational maintenance of machinery.....	2674
AHCMOM205 Operate vehicles.....	2676
Assessment Requirements for AHCMOM205 Operate vehicles.....	2678
AHCMOM206 Conduct grader operations.....	2680
Assessment Requirements for AHCMOM206 Conduct grader operations	2682
AHCMOM207 Conduct front-end loader operations	2684
Assessment Requirements for AHCMOM207 Conduct front-end loader operations	2687
AHCMOM208 Conduct excavator operations.....	2689
Assessment Requirements for AHCMOM208 Conduct excavator operations.....	2691
AHCMOM209 Conduct dozer operations	2693
Assessment Requirements for AHCMOM209 Conduct dozer operations	2695
AHCMOM210 Conduct scraper operations	2697
Assessment Requirements for AHCMOM210 Conduct scraper operations	2699
AHCMOM211 Operate side by side utility vehicles.....	2701
Assessment Requirements for AHCMOM211 Operate side by side utility vehicles.....	2704
AHCMOM212 Operate quad bikes	2706
Assessment Requirements for AHCMOM212 Operate quad bikes.....	2709
AHCMOM213 Operate and maintain chainsaws.....	2711
Assessment Requirements for AHCMOM213 Operate and maintain chainsaws	2714
AHCMOM214 Operate cane haulage vehicle	2716
Assessment Requirements for AHCMOM214 Operate cane haulage vehicle.....	2719
AHCMOM301 Coordinate machinery and equipment maintenance and repair.....	2721
Assessment Requirements for AHCMOM301 Coordinate machinery and equipment maintenance and repair	2724
AHCMOM302 Perform machinery maintenance	2726
Assessment Requirements for AHCMOM302 Perform machinery maintenance	2729
AHCMOM304 Operate machinery and equipment.....	2731
Assessment Requirements for AHCMOM304 Operate machinery and equipment.....	2733
AHCMOM305 Operate specialised machinery and equipment	2735

Assessment Requirements for AHCMOM305 Operate specialised machinery and equipment.....	2737
AHCMOM306 Ground spread fertiliser and soil ameliorant.....	2739
Assessment Requirements for AHCMOM306 Ground spread fertiliser and soil ameliorant.....	2742
AHCMOM307 Operate a cane harvester.....	2744
Assessment Requirements for AHCMOM307 Operate a cane harvester.....	2747
AHCMOM308 Operate broadacre and row crop harvest machinery and equipment.....	2749
Assessment Requirements for AHCMOM308 Operate broadacre and row crop harvest machinery and equipment	2751
AHCMOM309 Operate broadacre sowing machinery and equipment	2753
Assessment Requirements for AHCMOM309 Operate broadacre sowing machinery and equipment.....	2755
AHCMOM310 Operate land-forming machinery and equipment	2757
Assessment Requirements for AHCMOM310 Operate land-forming machinery and equipment.....	2759
AHCMOM311 Operate precision control technology	2761
Assessment Requirements for AHCMOM311 Operate precision control technology.....	2763
AHCMOM312 Operate row crop planting and seeding machinery and equipment.....	2765
Assessment Requirements for AHCMOM312 Operate row crop planting and seeding machinery and equipment	2767
AHCMOM313 Operate mobile irrigation machinery and equipment.....	2769
Assessment Requirements for AHCMOM313 Operate mobile irrigation machinery and equipment.....	2771
AHCMOM314 Transport machinery	2773
Assessment Requirements for AHCMOM314 Transport machinery	2775
AHCMOM315 Operate chemical application machinery and equipment.....	2777
Assessment Requirements for AHCMOM315 Operate chemical application machinery and equipment.....	2780
AHCMOM316 Refuel machinery or vehicle	2782
Assessment Requirements for AHCMOM316 Refuel machinery or vehicle.....	2785
AHCMOM401 Conduct major repair and overhaul of machinery and equipment.....	2787
Assessment Requirements for AHCMOM401 Conduct major repair and overhaul of machinery and equipment	2790
AHCMOM402 Supervise maintenance of property, machinery and equipment	2792
Assessment Requirements for AHCMOM402 Supervise maintenance of property, machinery and equipment	2795
AHCMOM501 Manage machinery and equipment	2797
Assessment Requirements for AHCMOM501 Manage machinery and equipment.....	2800
AHCMOM502 Implement a machinery management system.....	2802
Assessment Requirements for AHCMOM502 Implement a machinery management system.....	2805
AHCMOM601 Analyse machinery options.....	2807
Assessment Requirements for AHCMOM601 Analyse machinery options	2809
AHCNAR101 Support natural area conservation.....	2811
Assessment Requirements for AHCNAR101 Support natural area conservation	2814
AHCNAR102 Support native seed collection.....	2816
Assessment Requirements for AHCNAR102 Support native seed collection.....	2819
AHCNAR201 Carry out natural area restoration works	2821
Assessment Requirements for AHCNAR201 Carry out natural area restoration works.....	2824
AHCNAR202 Maintain wildlife habitat refuges	2826
Assessment Requirements for AHCNAR202 Maintain wildlife habitat refuges	2829
AHCNAR301 Maintain natural areas.....	2831
Assessment Requirements for AHCNAR301 Maintain natural areas	2834

AHCNAR302 Collect and preserve biological samples	2836
Assessment Requirements for AHCNAR302 Collect and preserve biological samples ..	2839
AHCNAR303 Implement revegetation works	2841
Assessment Requirements for AHCNAR303 Implement revegetation works	2844
AHCNAR304 Undertake direct seeding	2846
Assessment Requirements for AHCNAR304 Undertake direct seeding	2849
AHCNAR305 Collect native seed	2851
Assessment Requirements for AHCNAR305 Collect native seed	2853
AHCNAR306 Conduct photography for fieldwork	2855
Assessment Requirements for AHCNAR306 Conduct photography for fieldwork	2858
AHCNAR307 Read and interpret maps	2860
Assessment Requirements for AHCNAR307 Read and interpret maps	2862
AHCNAR401 Supervise natural area restoration works	2864
Assessment Requirements for AHCNAR401 Supervise natural area restoration works ..	2867
AHCNAR402 Plan the implementation of revegetation works	2869
Assessment Requirements for AHCNAR402 Plan the implementation of revegetation works	2871
AHCNAR501 Manage natural areas on a rural property	2873
Assessment Requirements for AHCNAR501 Manage natural areas on a rural property ..	2876
AHCNAR502 Conduct biological surveys	2878
Assessment Requirements for AHCNAR502 Conduct biological surveys	2881
AHCNAR503 Design a natural area restoration project	2883
Assessment Requirements for AHCNAR503 Design a natural area restoration project ..	2886
AHCNAR504 Manage natural area restoration programs	2888
Assessment Requirements for AHCNAR504 Manage natural area restoration programs ..	2891
AHCNAR505 Plan river restoration works	2893
Assessment Requirements for AHCNAR505 Plan river restoration works	2895
AHCNAR506 Develop and implement sustainable land use strategies	2897
Assessment Requirements for AHCNAR506 Develop and implement sustainable land use strategies	2900
AHCNRM401 Plan and implement a biosecurity program	2902
Assessment Requirements for AHCNRM401 Plan and implement a biosecurity program ..	2906
AHCNRM501 Develop a coastal rehabilitation strategy	2908
Assessment Requirements for AHCNRM501 Develop a coastal rehabilitation strategy ..	2911
AHCNRM502 Develop a water quality monitoring program	2913
Assessment Requirements for AHCNRM502 Develop a water quality monitoring program ..	2916
AHCNRM503 Support the implementation of waterways strategies	2918
Assessment Requirements for AHCNRM503 Support the implementation of waterways strategies	2921
AHCNRM504 Interpret and report on catchment hydrology	2923
Assessment Requirements for AHCNRM504 Interpret and report on catchment hydrology ..	2926
AHCNRM505 Provide technical advice on sustainable catchment management	2928
Assessment Requirements for AHCNRM505 Provide technical advice on sustainable catchment management	2931
AHCNRM506 Plan and monitor works projects in catchments and waterways	2933
Assessment Requirements for AHCNRM506 Plan and monitor works projects in catchments and waterways	2936
AHCNRM507 Manipulate and analyse data within geographic information systems ..	2938
Assessment Requirements for AHCNRM507 Manipulate and analyse data within geographic information systems	2940
AHCNRM508 Investigate suspected breaches of natural resource management legislation ..	2942
Assessment Requirements for AHCNRM508 Investigate suspected breaches of natural resource management legislation	2945

AHCNRM601 Review land management plans and strategies.....	2947
Assessment Requirements for AHCNRM601 Review land management plans and strategies.....	2950
AHCNRM602 Develop a monitoring, evaluation and reporting program.....	2952
Assessment Requirements for AHCNRM602 Develop a monitoring, evaluation and reporting program.....	2955
AHCNRM603 Implement a monitoring, evaluation and reporting program.....	2957
Assessment Requirements for AHCNRM603 Implement a monitoring, evaluation and reporting program.....	2960
AHCNSY101 Support nursery work	2962
Assessment Requirements for AHCNSY101 Support nursery work	2965
AHCNSY201 Pot up plants.....	2967
Assessment Requirements for AHCNSY201 Pot up plants	2969
AHCNSY202 Care for nursery plants	2971
Assessment Requirements for AHCNSY202 Care for nursery plants	2973
AHCNSY203 Undertake propagation activities.....	2975
Assessment Requirements for AHCNSY203 Undertake propagation activities.....	2977
AHCNSY204 Maintain indoor plants	2979
Assessment Requirements for AHCNSY204 Maintain indoor plants	2982
AHCNSY301 Maintain nursery plants	2984
Assessment Requirements for AHCNSY301 Maintain nursery plants	2986
AHCNSY302 Receive and dispatch nursery products.....	2988
Assessment Requirements for AHCNSY302 Receive and dispatch nursery products ...	2991
AHCNSY303 Install and maintain plant displays	2993
Assessment Requirements for AHCNSY303 Install and maintain plant displays.....	2996
AHCNSY304 Deliver and promote sales of plants	2998
Assessment Requirements for AHCNSY304 Deliver and promote sales of plants.....	3001
AHCNSY305 Prepare specialised plants.....	3003
Assessment Requirements for AHCNSY305 Prepare specialised plants	3005
AHCNSY306 Implement a propagation plan.....	3007
Assessment Requirements for AHCNSY306 Implement a propagation plan	3010
AHCNSY307 Operate fertigation equipment.....	3012
Assessment Requirements for AHCNSY307 Operate fertigation equipment	3014
AHCNSY401 Plan a growing-on program.....	3016
Assessment Requirements for AHCNSY401 Plan a growing-on program.....	3019
AHCNSY402 Plan a propagation program.....	3021
Assessment Requirements for AHCNSY402 Plan a propagation program	3023
AHCORG101 Support organic production.....	3025
Assessment Requirements for AHCORG101 Support organic production	3028
AHCORG401 Manage biodynamic production	3030
Assessment Requirements for AHCORG401 Manage biodynamic production.....	3033
AHCORG402 Manage organic livestock production	3035
Assessment Requirements for AHCORG402 Manage organic livestock production.....	3039
AHCORG403 Manage organic soil improvement.....	3041
Assessment Requirements for AHCORG403 Manage organic soil improvement.....	3044
AHCORG404 Arrange selling through community based marketing.....	3046
Assessment Requirements for AHCORG404 Arrange selling through community based marketing	3049
AHCORG405 Implement sustainable practices in the organic farm based business.....	3051
Assessment Requirements for AHCORG405 Implement sustainable practices in the organic farm based business	3054
AHCORG406 Oversee compliance with an organic certification scheme.....	3056

Assessment Requirements for AHCORG406 Oversee compliance with an organic certification scheme	3059
AHCORG407 Manage a landless organic production system.....	3061
Assessment Requirements for AHCORG407 Manage a landless organic production system.....	3064
AHCORG408 Manage on farm composting.....	3066
Assessment Requirements for AHCORG408 Manage on farm composting	3069
AHCORG501 Develop an organic management plan	3071
Assessment Requirements for AHCORG501 Develop an organic management plan....	3075
AHCORG502 Prepare the enterprise for organic certification	3077
Assessment Requirements for AHCORG502 Prepare the enterprise for organic certification.....	3080
AHCORG503 Design and document an organic farm landscape	3082
Assessment Requirements for AHCORG503 Design and document an organic farm landscape	3085
AHCORG504 Develop and manage a community based marketing supply chain.....	3087
Assessment Requirements for AHCORG504 Develop and manage a community based marketing supply chain.....	3090
AHCORG505 Develop and monitor a sustainable production plan	3092
Assessment Requirements for AHCORG505 Develop and monitor a sustainable production plan	3095
AHCORG506 Manage an agroecology production system.....	3097
Assessment Requirements for AHCORG506 Manage an agroecology production system.....	3100
AHCPCM201 Recognise plants	3102
Assessment Requirements for AHCPCM201 Recognise plants	3104
AHCPCM202 Collect, prepare and preserve plant specimens	3106
Assessment Requirements for AHCPCM202 Collect, prepare and preserve plant specimens.....	3108
AHCPCM203 Fell small trees.....	3109
Assessment Requirements for AHCPCM203 Fell small trees	3112
AHCPCM301 Implement a plant nutrition program.....	3114
Assessment Requirements for AHCPCM301 Implement a plant nutrition program	3117
AHCPCM302 Provide information on plants and their culture	3119
Assessment Requirements for AHCPCM302 Provide information on plants and their culture	3121
AHCPCM303 Identify plant specimens	3123
Assessment Requirements for AHCPCM303 Identify plant specimens.....	3126
AHCPCM304 Report on health and condition of trees	3128
Assessment Requirements for AHCPCM304 Report on health and condition of trees..	3130
AHCPCM401 Recommend plants and cultural practices	3132
Assessment Requirements for AHCPCM401 Recommend plants and cultural practices	3134
AHCPCM402 Develop a soil health and plant nutrition program	3136
Assessment Requirements for AHCPCM402 Develop a soil health and plant nutrition program.....	3139
AHCPCM403 Implement an integrated pest management program	3141
Assessment Requirements for AHCPCM403 Implement an integrated pest management program.....	3144
AHCPCM501 Diagnose plant health problems.....	3146
Assessment Requirements for AHCPCM501 Diagnose plant health problems	3149
AHCPCM502 Collect and classify plants.....	3151
Assessment Requirements for AHCPCM502 Collect and classify plants	3154
AHCPCM503 Specify plants for landscapes	3155
Assessment Requirements for AHCPCM503 Specify plants for landscapes.....	3158
AHCPCM504 Design specialised landscape	3160

Assessment Requirements for AHCPM504 Design specialised landscape3163

AHCPM505 Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs.....3165

Assessment Requirements for AHCPM505 Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs3168

AHCPM506 Develop an integrated pest management program.....3170

Assessment Requirements for AHCPM506 Develop an integrated pest management program.....3173

AHCPM601 Develop and implement a plant health management strategy3175

Assessment Requirements for AHCPM601 Develop and implement a plant health management strategy.....3179

AHCPER101 Observe permaculture principles and work practices.....3181

Assessment Requirements for AHCPER101 Observe permaculture principles and work practices.....3184

AHCPER102 Support resource conservation practices3186

Assessment Requirements for AHCPER102 Support resource conservation practices.3188

AHCPER103 Support plant care in a permaculture system3190

Assessment Requirements for AHCPER103 Support plant care in a permaculture system3193

AHCPER104 Support animal care in a permaculture system.....3195

Assessment Requirements for AHCPER104 Support animal care in a permaculture system.....3198

AHCPER105 Assist with maintaining structures in a permaculture system.....3200

Assessment Requirements for AHCPER105 Assist with maintaining structures in a permaculture system.....3202

AHCPER201 Work effectively in permaculture3204

Assessment Requirements for AHCPER201 Work effectively in permaculture3207

AHCPER202 Harvest, treat and store seed.....3209

Assessment Requirements for AHCPER202 Harvest, treat and store seed.....3211

AHCPER203 Record information about the local bioregion.....3213

Assessment Requirements for AHCPER203 Record information about the local bioregion3216

AHCPER204 Check and operate permaculture water systems.....3218

Assessment Requirements for AHCPER204 Check and operate permaculture water systems.....3220

AHCPER205 Prepare and store permaculture products3222

Assessment Requirements for AHCPER205 Prepare and store permaculture products3224

AHCPER206 Plant and maintain permaculture crops.....3226

Assessment Requirements for AHCPER206 Plant and maintain permaculture crops ..3228

AHCPER207 Care for animals in a permaculture system3230

Assessment Requirements for AHCPER207 Care for animals in a permaculture system3233

AHCPER208 Harvest permaculture crops3235

Assessment Requirements for AHCPER208 Harvest permaculture crops.....3237

AHCPER209 Recognise characteristics of integrated plant and animal systems3239

Assessment Requirements for AHCPER209 Recognise characteristics of integrated plant and animal systems3241

AHCPER210 Operate within community projects.....3243

Assessment Requirements for AHCPER210 Operate within community projects3245

AHCPER211 Recognise threats and create opportunities in a permaculture system....3247

Assessment Requirements for AHCPER211 Recognise threats and create opportunities in a permaculture system.....3249

AHCPER212 Use and maintain garden hand tools and equipment3251

Assessment Requirements for AHCPER212 Use and maintain garden hand tools and equipment.....3253

AHCPER213 Assist with basic earth shaping for nutrient capture and storage.....3255

Assessment Requirements for AHCPER213 Assist with basic earth shaping for nutrient capture and storage	3258
AHCPER214 Propagate plants for a permaculture garden system.....	3260
Assessment Requirements for AHCPER214 Propagate plants for a permaculture garden system.....	3263
AHCPER215 Assist with garden soil health and plant nutrition.....	3265
Assessment Requirements for AHCPER215 Assist with garden soil health and plant nutrition.....	3267
AHCPER301 Research and communicate information on permaculture principles and practices.....	3269
Assessment Requirements for AHCPER301 Research and communicate information on permaculture principles and practices.....	3271
AHCPER302 Develop recommendations for integrated plant and animal systems.....	3273
Assessment Requirements for AHCPER302 Develop recommendations for integrated plant and animal systems.....	3275
AHCPER303 Maintain integrated plant and animal systems	3277
Assessment Requirements for AHCPER303 Maintain integrated plant and animal systems.....	3280
AHCPER304 Carry out animal care, maintenance and treatment programs in a permaculture system.....	3282
Assessment Requirements for AHCPER304 Carry out animal care, maintenance and treatment programs in a permaculture system.....	3285
AHCPER305 Implement crop maintenance and harvesting programs for permaculture systems.....	3287
Assessment Requirements for AHCPER305 Implement crop maintenance and harvesting programs for permaculture systems	3290
AHCPER306 Use weedy plants in a permaculture system.....	3292
Assessment Requirements for AHCPER306 Use weedy plants in a permaculture system.....	3295
AHCPER307 Establish a rural permaculture system	3297
Assessment Requirements for AHCPER307 Establish a rural permaculture system.....	3300
AHCPER308 Establish an urban permaculture system.....	3302
Assessment Requirements for AHCPER308 Establish an urban permaculture system.....	3305
AHCPER309 Install and maintain permaculture water systems.....	3308
Assessment Requirements for AHCPER309 Install and maintain permaculture water systems.....	3311
AHCPER310 Install structures for permaculture systems.....	3314
Assessment Requirements for AHCPER310 Install structures for permaculture systems.....	3317
AHCPER311 Kill and dress small livestock for domestic consumption	3319
Assessment Requirements for AHCPER311 Kill and dress small livestock for domestic consumption	3322
AHCPER312 Plan organic garden and orchard systems	3325
Assessment Requirements for AHCPER312 Plan organic garden and orchard systems.....	3327
AHCPER313 Coordinate preparation and storage of permaculture products	3329
Assessment Requirements for AHCPER313 Coordinate preparation and storage of permaculture products	3332
AHCPER314 Read and interpret property maps and plans	3335
Assessment Requirements for AHCPER314 Read and interpret property maps and plans.....	3337
AHCPER315 Coordinate community projects.....	3339
Assessment Requirements for AHCPER315 Coordinate community projects	3342
AHCPER316 Select plant and animal species for permaculture systems	3344
Assessment Requirements for AHCPER316 Select plant and animal species for permaculture systems	3346
AHCPER317 Build with earth, straw and reclaimed materials	3348

Assessment Requirements for AHCPER317 Build with earth, straw and reclaimed materials.....3351

AHCPER318 Plan propagation activities for a permaculture system3354

Assessment Requirements for AHCPER318 Plan propagation activities for a permaculture system.....3357

AHCPER319 Test, improve and maintain healthy soil in a permaculture system.....3359

Assessment Requirements for AHCPER319 Test, improve and maintain healthy soil in a permaculture system.....3362

AHCPER320 Manage plant pests, diseases and disorders in a permaculture system....3364

Assessment Requirements for AHCPER320 Manage plant pests, diseases and disorders in a permaculture system.....3367

AHCPER321 Demonstrate permaculture practices to small groups of learners3369

Assessment Requirements for AHCPER321 Demonstrate permaculture practices to small groups of learners3372

AHCPER401 Provide advice on permaculture principles and practices3374

Assessment Requirements for AHCPER401 Provide advice on permaculture principles and practices.....3377

AHCPER402 Design a rural permaculture system.....3379

Assessment Requirements for AHCPER402 Design a rural permaculture system.....3382

AHCPER403 Design an urban permaculture system.....3385

Assessment Requirements for AHCPER403 Design an urban permaculture system3388

AHCPER404 Plan and implement permaculture works.....3391

Assessment Requirements for AHCPER404 Plan and implement permaculture works3394

AHCPER405 Select appropriate technology for a permaculture system.....3396

Assessment Requirements for AHCPER405 Select appropriate technology for a permaculture system.....3399

AHCPER406 Identify and analyse bioregional characteristics and resources.....3401

Assessment Requirements for AHCPER406 Identify and analyse bioregional characteristics and resources3404

AHCPER407 Design harvesting and storage systems for permaculture products.....3406

Assessment Requirements for AHCPER407 Design harvesting and storage systems for permaculture products3409

AHCPER408 Implement and monitor animal health and welfare programs for a permaculture system.....3412

Assessment Requirements for AHCPER408 Implement and monitor animal health and welfare programs for a permaculture system.....3415

AHCPER409 Manage a permaculture seed bank3418

Assessment Requirements for AHCPER409 Manage a permaculture seed bank.....3421

AHCPER410 Recommend approaches for sustainable community and bioregional development.....3424

Assessment Requirements for AHCPER410 Recommend approaches for sustainable community and bioregional development.....3427

AHCPER411 Operate within a sustainable community and bioregional development program.....3429

Assessment Requirements for AHCPER411 Operate within a sustainable community and bioregional development program3432

AHCPER412 Operate within a permaculture aid and development program3434

Assessment Requirements for AHCPER412 Operate within a permaculture aid and development program.....3437

AHCPER413 Evaluate suitability of species as solutions for permaculture applications3439

Assessment Requirements for AHCPER413 Evaluate suitability of species as solutions for permaculture applications3442

AHCPER501 Carry out permaculture field research3444

Assessment Requirements for AHCPER501 Carry out permaculture field research	3447
AHCPER502 Design an integrated permaculture system.....	3450
Assessment Requirements for AHCPER502 Design an integrated permaculture system.....	3453
AHCPER503 Develop a strategic plan for a permaculture project or enterprise	3456
Assessment Requirements for AHCPER503 Develop a strategic plan for a permaculture project or enterprise	3459
AHCPER504 Manage a permaculture project or enterprise	3463
Assessment Requirements for AHCPER504 Manage a permaculture project or enterprise.....	3466
AHCPER505 Plan and supervise the implementation of permaculture project works..	3469
Assessment Requirements for AHCPER505 Plan and supervise the implementation of permaculture project works.....	3472
AHCPER506 Develop a relocalisation or transition project	3475
Assessment Requirements for AHCPER506 Develop a relocalisation or transition project.....	3478
AHCPER507 Research and interpret requirements for a permaculture project.....	3480
Assessment Requirements for AHCPER507 Research and interpret requirements for a permaculture project.....	3483
AHCPER508 Manage a permaculture aid and development project.....	3485
Assessment Requirements for AHCPER508 Manage a permaculture aid and development project	3488
AHCPER509 Design permaculture structures and features	3491
Assessment Requirements for AHCPER509 Design permaculture structures and features.....	3494
AHCPER510 Prepare a sustainable community and bioregional development strategy.....	3496
Assessment Requirements for AHCPER510 Prepare a sustainable community and bioregional development strategy	3499
AHCPER511 Facilitate participatory planning and learning activities.....	3502
Assessment Requirements for AHCPER511 Facilitate participatory planning and learning activities.....	3505
AHCPER512 Plan community governance and decision-making processes.....	3507
Assessment Requirements for AHCPER512 Plan community governance and decision-making processes	3510
AHCPGD101 Support gardening work	3512
Assessment Requirements for AHCPGD101 Support gardening work.....	3515
AHCPGD201 Plant trees and shrubs.....	3517
Assessment Requirements for AHCPGD201 Plant trees and shrubs.....	3519
AHCPGD202 Prepare and maintain plant displays	3521
Assessment Requirements for AHCPGD202 Prepare and maintain plant displays.....	3523
AHCPGD203 Prune shrubs and small trees	3524
Assessment Requirements for AHCPGD203 Prune shrubs and small trees	3526
AHCPGD204 Transplant small trees.....	3528
Assessment Requirements for AHCPGD204 Transplant small trees	3531
AHCPGD205 Prepare a grave site.....	3533
Assessment Requirements for AHCPGD205 Prepare a grave site	3535
AHCPGD206 Conduct visual inspection of park facilities	3536
Assessment Requirements for AHCPGD206 Conduct visual inspection of park facilities.....	3538
AHCPGD301 Implement a plant establishment program.....	3540
Assessment Requirements for AHCPGD301 Implement a plant establishment program.....	3543
AHCPGD302 Plan and maintain plant displays	3545
Assessment Requirements for AHCPGD302 Plan and maintain plant displays	3548
AHCPGD303 Perform specialist amenity pruning.....	3550
Assessment Requirements for AHCPGD303 Perform specialist amenity pruning	3552
AHCPGD304 Implement a landscape maintenance program	3554
Assessment Requirements for AHCPGD304 Implement a landscape maintenance program.....	3556
AHCPGD305 Conduct operational inspection of park facilities.....	3558

Assessment Requirements for AHCPGD305 Conduct operational inspection of park facilities.....3560

AHCPGD306 Implement a maintenance program for an aquatic environment.....3562

Assessment Requirements for AHCPGD306 Implement a maintenance program for an aquatic environment3565

AHCPGD401 Design plant displays3567

Assessment Requirements for AHCPGD401 Design plant displays3569

AHCPGD402 Plan a plant establishment program.....3571

Assessment Requirements for AHCPGD402 Plan a plant establishment program3574

AHCPGD501 Manage plant cultural practices.....3576

Assessment Requirements for AHCPGD501 Manage plant cultural practices.....3579

AHCPGD502 Plan the restoration of parks and gardens3581

Assessment Requirements for AHCPGD502 Plan the restoration of parks and gardens.....3584

AHCPGD503 Manage parks and reserves3586

Assessment Requirements for AHCPGD503 Manage parks and reserves.....3589

AHCPGD504 Develop and implement a streetscape management plan.....3591

Assessment Requirements for AHCPGD504 Develop and implement a streetscape management plan.....3594

AHCPGD505 Conduct comprehensive inspection of park facilities3596

Assessment Requirements for AHCPGD505 Conduct comprehensive inspection of park facilities.....3599

AHCPHR504 Manage equine nutrition.....3601

Assessment Requirements for AHCPHR504 Manage equine nutrition.....3604

AHCPHT101 Support horticultural production.....3607

Assessment Requirements for AHCPHT101 Support horticultural production.....3609

AHCPHT201 Plant horticultural crops3611

Assessment Requirements for AHCPHT201 Plant horticultural crops3613

AHCPHT202 Carry out canopy maintenance.....3615

Assessment Requirements for AHCPHT202 Carry out canopy maintenance3617

AHCPHT203 Support horticultural crop harvesting.....3619

Assessment Requirements for AHCPHT203 Support horticultural crop harvesting3621

AHCPHT204 Undertake field budding and grafting3623

Assessment Requirements for AHCPHT204 Undertake field budding and grafting3625

AHCPHT205 Carry out post-harvest operations.....3627

Assessment Requirements for AHCPHT205 Carry out post-harvest operations.....3630

AHCPHT206 Handle and move mushroom boxes3632

Assessment Requirements for AHCPHT206 Handle and move mushroom boxes.....3634

AHCPHT207 Perform mushroom substrate process tasks3636

Assessment Requirements for AHCPHT207 Perform mushroom substrate process tasks.....3639

AHCPHT208 Water mushroom crops.....3641

Assessment Requirements for AHCPHT208 Water mushroom crops.....3643

AHCPHT209 Produce trellis dried grapes.....3645

Assessment Requirements for AHCPHT209 Produce trellis dried grapes3648

AHCPHT301A Carry out a crop regulation program3650

AHCPHT303 Implement a post-harvest program3655

Assessment Requirements for AHCPHT303 Implement a post-harvest program.....3658

AHCPHT304 Harvest horticultural crops mechanically.....3660

Assessment Requirements for AHCPHT304 Harvest horticultural crops mechanically.....3662

AHCPHT305 Regulate crops.....3664

Assessment Requirements for AHCPHT305 Regulate crops.....3666

AHCPHT306 Establish horticultural crops3668

Assessment Requirements for AHCPHT306 Establish horticultural crops3670

AHCPHT307 Prepare raw materials and compost feedstock.....3672

Assessment Requirements for AHCPTH307 Prepare raw materials and compost feedstock3675

AHCPTH308 Prepare value added compost-based products.....3677

Assessment Requirements for AHCPTH308 Prepare value added compost-based products3679

AHCPTH309 Supervise mushroom substrate preparation.....3681

Assessment Requirements for AHCPTH309 Supervise mushroom substrate preparation3683

AHCPTH310 Coordinate horticultural crop harvesting.....3685

Assessment Requirements for AHCPTH310 Coordinate horticultural crop harvesting3688

AHCPTH401 Assess olive oil for style and quality.....3690

Assessment Requirements for AHCPTH401 Assess olive oil for style and quality3692

AHCPTH402 Develop a crop regulation program.....3693

Assessment Requirements for AHCPTH402 Develop a crop regulation program.....3696

AHCPTH403 Develop harvesting and processing specifications to produce an olive oil3698

Assessment Requirements for AHCPTH403 Develop harvesting and processing specifications to produce an olive oil.....3700

AHCPTH404 Implement and monitor a horticultural crop harvesting program.....3702

Assessment Requirements for AHCPTH404 Implement and monitor a horticultural crop harvesting program3704

AHCPTH405 Manage mushroom substrate preparation.....3706

Assessment Requirements for AHCPTH405 Manage mushroom substrate preparation3709

AHCPTH406 Control Phase II mushroom substrate process3711

Assessment Requirements for AHCPTH406 Control Phase II mushroom substrate process3713

AHCPTH407 Manage mushroom crop development.....3715

Assessment Requirements for AHCPTH407 Manage mushroom crop development3718

AHCPTH408 Oversee vineyard practices.....3720

Assessment Requirements for AHCPTH408 Oversee vineyard practices.....3722

AHCPTH502 Develop a horticultural production plan.....3724

Assessment Requirements for AHCPTH502 Develop a horticultural production plan .3727

AHCPTH503 Manage a controlled growing environment3729

Assessment Requirements for AHCPTH503 Manage a controlled growing environment3732

AHCPTH504 Develop a grape production plan.....3734

Assessment Requirements for AHCPTH504 Develop a grape production plan.....3737

AHCPTH505 Evaluate wine3739

Assessment Requirements for AHCPTH505 Evaluate wine3742

AHCPTH506 Manage a wine making process3744

Assessment Requirements for AHCPTH506 Manage a wine making process.....3747

AHCPLY201 Collect store and handle eggs from breeder flocks3749

Assessment Requirements for AHCPLY201 Collect store and handle eggs from breeder flocks3752

AHCPLY202 Maintain health and welfare of poultry3754

Assessment Requirements for AHCPLY202 Maintain health and welfare of poultry ...3757

AHCPLY203 Set up shed for placement of day-old chickens.....3759

Assessment Requirements for AHCPLY203 Set up shed for placement of day-old chickens3762

AHCPLY204 Collect and pack eggs for human consumption.....3764

Assessment Requirements for AHCPLY204 Collect and pack eggs for human consumption3767

AHCPLY205 Grade and pack eggs for human consumption.....3769

Assessment Requirements for AHCPLY205 Grade and pack eggs for human consumption3772

AHCPLY206 Catch and load poultry3774

Assessment Requirements for AHCPLY206 Catch and load poultry.....3777

AHCPLY207 Identify and sex poultry.....3779

Assessment Requirements for AHCPLY207 Identify and sex poultry3781

AHCPLY301 Artificially inseminate poultry.....3783

Assessment Requirements for AHCPLY301 Artificially inseminate poultry.....3786

AHCPLY302 Brood poultry	3788
Assessment Requirements for AHCPLY302 Brood poultry	3791
AHCPLY304 Incubate eggs	3793
Assessment Requirements for AHCPLY304 Incubate eggs	3797
AHCPLY305 Beak tip poultry	3799
Assessment Requirements for AHCPLY305 Beak tip poultry	3802
AHCPLY306 Clean and disinfect poultry production sheds	3804
Assessment Requirements for AHCPLY306 Clean and disinfect poultry production sheds	3807
AHCPLY307 Implement and monitor biosecurity measures in poultry production	3809
Assessment Requirements for AHCPLY307 Implement and monitor biosecurity measures in poultry production	3813
AHCPMG201 Treat weeds	3815
Assessment Requirements for AHCPMG201 Treat weeds	3817
AHCPMG202 Treat plant pests, diseases and disorders	3819
Assessment Requirements for AHCPMG202 Treat plant pests, diseases and disorders	3822
AHCPMG203 Work effectively in a pest management environment	3824
Assessment Requirements for AHCPMG203 Work effectively in a pest management environment	3827
AHCPMG301 Control weeds	3829
Assessment Requirements for AHCPMG301 Control weeds	3832
AHCPMG302 Control plant pests, diseases and disorders	3834
Assessment Requirements for AHCPMG302 Control plant pests, diseases and disorders	3837
AHCPMG304 Use fire arms to humanely destroy animals	3839
Assessment Requirements for AHCPMG304 Use fire arms to humanely destroy animals	3842
AHCPMG305 Survey pests	3844
Assessment Requirements for AHCPMG305 Survey pests	3847
AHCPMG306 Determine pest control techniques	3849
Assessment Requirements for AHCPMG306 Determine pest control techniques	3852
AHCPMG307 Apply animal trapping techniques	3854
Assessment Requirements for AHCPMG307 Apply animal trapping techniques	3857
AHCPMG308 Implement pest management strategies	3859
Assessment Requirements for AHCPMG308 Implement pest management strategies	3862
AHCPMG309 Apply pest animal control techniques	3864
Assessment Requirements for AHCPMG309 Apply pest animal control techniques	3867
AHCPMG310 Prepare, monitor and maintain biological agents	3869
Assessment Requirements for AHCPMG310 Prepare, monitor and maintain biological agents	3872
AHCPMG311 Use fire arms for pest control activities from aircraft	3874
Assessment Requirements for AHCPMG311 Use fire arms for pest control activities from aircraft	3877
AHCPMG409 Implement a pest management plan	3879
Assessment Requirements for AHCPMG409 Implement a pest management plan	3882
AHCPMG410 Implement the pest monitoring and evaluation plan	3884
Assessment Requirements for AHCPMG410 Implement the pest monitoring and evaluation plan	3887
AHCPMG411 Ensure compliance with pest legislation	3889
Assessment Requirements for AHCPMG411 Ensure compliance with pest legislation	3891
AHCPMG412 Develop a pest management plan	3893
Assessment Requirements for AHCPMG412 Develop a pest management plan	3896
AHCPMG413 Define the pest problem	3898
Assessment Requirements for AHCPMG413 Define the pest problem	3901
AHCPMG414 Apply predator trapping techniques	3903
Assessment Requirements for AHCPMG414 Apply predator trapping techniques	3907

AHCPMG506 Manage the implementation of legislation3909
Assessment Requirements for AHCPMG506 Manage the implementation of legislation3912
AHCPMG507 Develop a regional pest management plan.....3914
Assessment Requirements for AHCPMG507 Develop a regional pest management plan3917
AHCPMG508 Develop a system to monitor and evaluate the pest management plan...3919
Assessment Requirements for AHCPMG508 Develop a system to monitor and evaluate the
pest management plan3922
AHCPMG509 Investigate a pest control failure3924
Assessment Requirements for AHCPMG509 Investigate a pest control failure3927
AHCPMG510 Develop a pest survey strategy.....3929
Assessment Requirements for AHCPMG510 Develop a pest survey strategy3932
AHCPRK201 Care for health and welfare of pigs3934
Assessment Requirements for AHCPRK201 Care for health and welfare of pigs3937
AHCPRK203 Move and handle pigs.....3939
Assessment Requirements for AHCPRK203 Move and handle pigs3941
AHCPRK204 Care for weaner pigs3943
Assessment Requirements for AHCPRK204 Care for weaner pigs.....3946
AHCPRK205 Care for health and welfare of outdoor pigs3948
Assessment Requirements for AHCPRK205 Care for health and welfare of outdoor pigs3951
AHCPRK206 Conduct outdoor pig operations3953
Assessment Requirements for AHCPRK206 Conduct outdoor pig operations.....3956
AHCPRK301 Pregnancy test pigs.....3958
Assessment Requirements for AHCPRK301 Pregnancy test pigs3960
AHCPRK302 Treat rectal prolapse in pigs3962
Assessment Requirements for AHCPRK302 Treat rectal prolapse in pigs3964
AHCPRK303 Artificially inseminate pigs.....3966
Assessment Requirements for AHCPRK303 Artificially inseminate pigs3968
AHCPRK304 Mate pigs and monitor dry sow performance3970
Assessment Requirements for AHCPRK304 Mate pigs and monitor dry sow performance3972
AHCPRK305 Care for grower and finisher pigs.....3974
Assessment Requirements for AHCPRK305 Care for grower and finisher pigs3977
AHCPRK306 Monitor and maintain outdoor pig production.....3979
Assessment Requirements for AHCPRK306 Monitor and maintain outdoor pig
production3982
AHCPRK401 Implement a feeding strategy for pig production.....3984
Assessment Requirements for AHCPRK401 Implement a feeding strategy for pig
production3987
AHCPRK402 Maintain outdoor pig production environment3989
Assessment Requirements for AHCPRK402 Maintain outdoor pig production
environment.....3992
AHCSAW201 Conduct erosion and sediment control activities3994
Assessment Requirements for AHCSAW201 Conduct erosion and sediment control
activities.....3996
AHCSAW301 Construct conservation earthworks3998
Assessment Requirements for AHCSAW301 Construct conservation earthworks.....4001
AHCSAW302 Implement erosion and sediment control measures4003
Assessment Requirements for AHCSAW302 Implement erosion and sediment control
measures.....4005
AHCSAW401 Set out conservation earthworks4007
Assessment Requirements for AHCSAW401 Set out conservation earthworks4009
AHCSAW403 Supervise implementation of conservation earthworks plans.....4011
Assessment Requirements for AHCSAW403 Supervise implementation of conservation
earthworks plans4014

AHCSAW501 Design control measures and structures	4016
Assessment Requirements for AHCSAW501 Design control measures and structures .	4018
AHCSAW502 Plan erosion and sediment control measures	4020
Assessment Requirements for AHCSAW502 Plan erosion and sediment control measures	4022
AHCSAW503 Plan conservation earthworks.....	4024
Assessment Requirements for AHCSAW503 Plan conservation earthworks	4027
AHCSDP301 Undertake preparation of land for seed crop production.....	4029
Assessment Requirements for AHCSDP301 Undertake preparation of land for seed crop production	4032
AHCSDP302 Establish seed crops	4034
Assessment Requirements for AHCSDP302 Establish seed crops	4036
AHCSDP303 Maintain seed crops	4038
Assessment Requirements for AHCSDP303 Maintain seed crops	4041
AHCSDP304 Harvest seed crops	4043
Assessment Requirements for AHCSDP304 Harvest seed crops	4046
AHCSDP401 Plan a seed crop establishment program	4048
Assessment Requirements for AHCSDP401 Plan a seed crop establishment program..	4050
AHCSDP402 Supervise seed crop establishment	4052
Assessment Requirements for AHCSDP402 Supervise seed crop establishment.....	4055
AHCSDP403 Plan and implement seed crop maintenance.....	4057
Assessment Requirements for AHCSDP403 Plan and implement seed crop maintenance	4059
AHCSDP404 Supervise seed crop harvesting	4061
Assessment Requirements for AHCSDP404 Supervise seed crop harvesting	4064
AHCSDP405 Inspect a seed crop for quality assurance purposes	4066
Assessment Requirements for AHCSDP405 Inspect a seed crop for quality assurance purposes.....	4068
AHCSDT301 Prepare a working sample	4070
Assessment Requirements for AHCSDT301 Prepare a working sample	4072
AHCSDT302 Identify seeds	4074
Assessment Requirements for AHCSDT302 Identify seeds.....	4076
AHCSDT303 Perform a fluorescence test on seeds	4077
Assessment Requirements for AHCSDT303 Perform a fluorescence test on seeds.....	4079
AHCSDT304 Perform a seed purity analysis	4081
Assessment Requirements for AHCSDT304 Perform a seed purity analysis.....	4083
AHCSDT305 Perform a seed moisture test.....	4085
Assessment Requirements for AHCSDT305 Perform a seed moisture test	4088
AHCSDT306 Perform a seed germination test.....	4090
Assessment Requirements for AHCSDT306 Perform a seed germination test.....	4092
AHCSDT307 Perform a 'Determination of Other Seeds by Number' test.....	4094
Assessment Requirements for AHCSDT307 Perform a 'Determination of Other Seeds by Number' test.....	4096
AHCSDT401 Maintain a quarantine approved laboratory.....	4098
Assessment Requirements for AHCSDT401 Maintain a quarantine approved laboratory	4101
AHCSDT402 Prepare and maintain a seed reference collection	4103
Assessment Requirements for AHCSDT402 Prepare and maintain a seed reference collection.....	4106
AHCSDT403 Perform an Anguina test on annual ryegrass seed.....	4108
Assessment Requirements for AHCSDT403 Perform an Anguina test on annual ryegrass seed.....	4110
AHCSDT404 Develop and implement laboratory policy and procedures	4111
Assessment Requirements for AHCSDT404 Develop and implement laboratory policy and procedures	4114
AHCSDT405 Handle and store quarantinable seeds.....	4116

Assessment Requirements for AHCSDT405 Handle and store quarantinable seeds	4118
AHCSDT406 Undertake internal audits in a seed laboratory	4119
Assessment Requirements for AHCSDT406 Undertake internal audits in a seed laboratory	4122
AHCSDT407 Perform an endophytic seed test	4124
Assessment Requirements for AHCSDT407 Perform an endophytic seed test.....	4127
AHCSDT408 Perform an electrophoresis test on a seed sample.....	4128
Assessment Requirements for AHCSDT408 Perform an electrophoresis test on a seed sample.....	4131
AHCSDT409 Perform a tetrazolium test.....	4133
Assessment Requirements for AHCSDT409 Perform a tetrazolium test.....	4136
AHCSDT410 Perform a seed vigour test.....	4138
Assessment Requirements for AHCSDT410 Perform a seed vigour test	4141
AHCSDT411 Perform a 1000 seed weight test.....	4143
Assessment Requirements for AHCSDT411 Perform a 1000 seed weight test.....	4145
AHCSHG201 Crutch sheep.....	4147
Assessment Requirements for AHCSHG201 Crutch sheep.....	4150
AHCSHG202 Assist in preparing for shearing and crutching	4152
Assessment Requirements for AHCSHG202 Assist in preparing for shearing and crutching.....	4154
AHCSHG203 Shear sheep to novice level	4156
Assessment Requirements for AHCSHG203 Shear sheep to novice level.....	4159
AHCSHG204 Shear sheep to improver level.....	4161
Assessment Requirements for AHCSHG204 Shear sheep to improver level.....	4164
AHCSHG205 Grind combs and cutters for machine shearing.....	4166
Assessment Requirements for AHCSHG205 Grind combs and cutters for machine shearing.....	4168
AHCSHG206 Prepare handpiece and downtube for machine shearing	4170
Assessment Requirements for AHCSHG206 Prepare handpiece and downtube for machine shearing	4173
AHCSHG207 Shear goats.....	4175
Assessment Requirements for AHCSHG207 Shear goats	4178
AHCSHG208 Shear alpacas	4180
Assessment Requirements for AHCSHG208 Shear alpacas	4183
AHCSHG209 Support alpaca shearing operations	4185
Assessment Requirements for AHCSHG209 Support alpaca shearing operations	4188
AHCSHG210 Undertake basic shearing and crutching	4190
Assessment Requirements for AHCSHG210 Undertake basic shearing and crutching.....	4192
AHCSHG301 Prepare livestock for shearing.....	4194
Assessment Requirements for AHCSHG301 Prepare livestock for shearing.....	4197
AHCSHG302 Prepare combs and cutters for machine shearing.....	4199
Assessment Requirements for AHCSHG302 Prepare combs and cutters for machine shearing.....	4201
AHCSHG303 Maintain and service shearing handpieces	4203
Assessment Requirements for AHCSHG303 Maintain and service shearing handpieces	4205
AHCSHG304 Shear sheep to professional level	4207
Assessment Requirements for AHCSHG304 Shear sheep to professional level.....	4210
AHCSHG305 Maintain consistent shearing performance.....	4212
Assessment Requirements for AHCSHG305 Maintain consistent shearing performance	4214
AHCSHG306 Carry out post-shearing procedures.....	4216
Assessment Requirements for AHCSHG306 Carry out post-shearing procedures.....	4218
AHCSHG307 Plan and prepare for alpaca shearing.....	4220
Assessment Requirements for AHCSHG307 Plan and prepare for alpaca shearing	4223
AHCSHG401 Apply advanced shearing techniques.....	4225

Assessment Requirements for AHCSHG401 Apply advanced shearing techniques	4228
AHCSHG402 Conduct equipment experting for machine shearing	4230
Assessment Requirements for AHCSHG402 Conduct equipment experting for machine shearing	4232
AHCSHG403 Account for shearing shed supplies	4234
Assessment Requirements for AHCSHG403 Account for shearing shed supplies	4236
AHCSHG405 Arrange employment for shearing operations	4238
Assessment Requirements for AHCSHG405 Arrange employment for shearing operations	4240
AHCSHG406 Prepare shearing team wages	4242
Assessment Requirements for AHCSHG406 Prepare shearing team wages.....	4244
AHCSOL202 Assist with soil or growing media sampling and testing	4246
Assessment Requirements for AHCSOL202 Assist with soil or growing media sampling and testing	4248
AHCSOL301 Prepare growing media.....	4250
Assessment Requirements for AHCSOL301 Prepare growing media	4252
AHCSOL303 Implement soil improvements for garden and turf areas	4254
Assessment Requirements for AHCSOL303 Implement soil improvements for garden and turf areas	4257
AHCSOL401 Sample soils and interpret results	4259
Assessment Requirements for AHCSOL401 Sample soils and interpret results.....	4262
AHCSOL402 Develop a soil use map for a property	4264
Assessment Requirements for AHCSOL402 Develop a soil use map for a property	4267
AHCSOL403 Prepare acid sulphate soil management plans.....	4269
Assessment Requirements for AHCSOL403 Prepare acid sulphate soil management plans	4272
AHCSOL404 Supervise acid sulphate soil remediation and management projects	4274
Assessment Requirements for AHCSOL404 Supervise acid sulphate soil remediation and management projects	4276
AHCSOL501 Monitor and manage soils for production projects	4278
Assessment Requirements for AHCSOL501 Monitor and manage soils for production projects.....	4281
AHCSOL502 Manage soils to enhance sustainability.....	4283
Assessment Requirements for AHCSOL502 Manage soils to enhance sustainability	4286
AHCSOL503 Manage erosion and sediment control.....	4288
Assessment Requirements for AHCSOL503 Manage erosion and sediment control	4291
AHCSOL504 Develop and manage a plan to reclaim land affected by salinity	4293
Assessment Requirements for AHCSOL504 Develop and manage a plan to reclaim land affected by salinity	4296
AHCSPO301 Operate a screen cleaner for seed processing	4298
Assessment Requirements for AHCSPO301 Operate a screen cleaner for seed processing	4300
AHCSPO302 Operate an indent cylinder	4302
Assessment Requirements for AHCSPO302 Operate an indent cylinder.....	4304
AHCSPO303 Operate a gravity table	4306
Assessment Requirements for AHCSPO303 Operate a gravity table	4308
AHCSPO304 Operate seed modification machinery	4310
Assessment Requirements for AHCSPO304 Operate seed modification machinery.....	4312
AHCSPO305 Operate seed treatment machinery	4314
Assessment Requirements for AHCSPO305 Operate seed treatment machinery	4316
AHCSPO306 Operate specialised seed processing machinery.....	4318
Assessment Requirements for AHCSPO306 Operate specialised seed processing machinery.....	4320
AHCSPO307 Handle, package and store commercial quantities of seed.....	4322
Assessment Requirements for AHCSPO307 Handle, package and store commercial quantities of seed.....	4325

AHCSPO308 Sample seed before and after processing.....4327
 Assessment Requirements for AHCSPO308 Sample seed before and after processing .4329
 AHCSUS501 Develop and manage a plan for sustainable supply and use of water on a farm.....4331
 Assessment Requirements for AHCSUS501 Develop and manage a plan for sustainable supply and use of water on a farm4334
 AHCSUS502 Develop and manage a plan to improve biodiversity on a farm4336
 Assessment Requirements for AHCSUS502 Develop and manage a plan to improve biodiversity on a farm4339
 AHCTRF101 Support turf work.....4341
 Assessment Requirements for AHCTRF101 Support turf work4343
 AHCTRF201 Assist with turf construction.....4345
 Assessment Requirements for AHCTRF201 Assist with turf construction.....4347
 AHCTRF202 Prepare turf surfaces for play.....4349
 Assessment Requirements for AHCTRF202 Prepare turf surfaces for play4351
 AHCTRF203 Renovate grassed areas.....4353
 Assessment Requirements for AHCTRF203 Renovate grassed areas4355
 AHCTRF204 Support turf establishment.....4357
 Assessment Requirements for AHCTRF204 Support turf establishment.....4360
 AHCTRF301 Construct turf playing surfaces4361
 Assessment Requirements for AHCTRF301 Construct turf playing surfaces4364
 AHCTRF302 Establish turf.....4366
 Assessment Requirements for AHCTRF302 Establish turf.....4368
 AHCTRF303 Implement a grassed area maintenance program4370
 Assessment Requirements for AHCTRF303 Implement a grassed area maintenance program.....4372
 AHCTRF304 Monitor turf health.....4374
 Assessment Requirements for AHCTRF304 Monitor turf health4376
 AHCTRF305 Renovate sports turf4378
 Assessment Requirements for AHCTRF305 Renovate sports turf.....4380
 AHCTRF401 Develop a sports turf maintenance program.....4382
 Assessment Requirements for AHCTRF401 Develop a sports turf maintenance program4385
 AHCTRF402 Plan and implement sports turf renovation.....4387
 Assessment Requirements for AHCTRF402 Plan and implement sports turf renovation4390
 AHCTRF501 Plan the establishment of sports turf playing surfaces4392
 Assessment Requirements for AHCTRF501 Plan the establishment of sports turf playing surfaces.....4395
 AHCTRF502 Manage sports turf renovation programs4397
 Assessment Requirements for AHCTRF502 Manage sports turf renovation programs 4400
 AHCTRF503 Develop sports turf management programs4402
 Assessment Requirements for AHCTRF503 Develop sports turf management programs 4405
 AHCTRF504 Manage sports turf facility assets.....4407
 Assessment Requirements for AHCTRF504 Manage sports turf facility assets4410
 AHCWAT201 Set up, operate and maintain water delivery systems for compost.....4412
 Assessment Requirements for AHCWAT201 Set up, operate and maintain water delivery systems for compost.....4414
 AHCWAT301 Monitor and operate water treatment processes.....4416
 Assessment Requirements for AHCWAT301 Monitor and operate water treatment processes.....4418
 AHCWAT501 Design water treatment systems4420
 Assessment Requirements for AHCWAT501 Design water treatment systems4423
 AHCWAT502 Manage water systems.....4425
 Assessment Requirements for AHCWAT502 Manage water systems4428

AHCWHS101 Work safely	4430
Assessment Requirements for AHCWHS101 Work safely.....	4432
AHCWHS201 Participate in work health and safety processes.....	4434
Assessment Requirements for AHCWHS201 Participate in work health and safety processes.....	4437
AHCWHS301 Contribute to work health and safety processes.....	4439
Assessment Requirements for AHCWHS301 Contribute to work health and safety processes.....	4442
AHCWHS401 Maintain work health and safety processes	4444
Assessment Requirements for AHCWHS401 Maintain work health and safety processes.....	4447
AHCWHS501 Manage work health and safety processes	4449
Assessment Requirements for AHCWHS501 Manage work health and safety processes.....	4453
AHCWOL101 Support woolshed activities.....	4455
Assessment Requirements for AHCWOL101 Support woolshed activities	4458
AHCWOL201 Pen sheep.....	4460
Assessment Requirements for AHCWOL201 Pen sheep.....	4463
AHCWOL202 Perform board duties	4465
Assessment Requirements for AHCWOL202 Perform board duties.....	4468
AHCWOL203 Carry out wool pressing	4470
Assessment Requirements for AHCWOL203 Carry out wool pressing.....	4473
AHCWOL204 Undertake basic skirting of alpaca fleece	4475
Assessment Requirements for AHCWOL204 Undertake basic skirting of alpaca fleece.....	4478
AHCWOL301 Appraise wool using industry descriptions.....	4480
Assessment Requirements for AHCWOL301 Appraise wool using industry descriptions.....	4482
AHCWOL303 Prepare wool based on its characteristics	4484
Assessment Requirements for AHCWOL303 Prepare wool based on its characteristics.....	4487
AHCWOL304 Prepare fleece wool for classing.....	4489
Assessment Requirements for AHCWOL304 Prepare fleece wool for classing.....	4492
AHCWOL305 Prepare skirtings and oddments.....	4494
Assessment Requirements for AHCWOL305 Prepare skirtings and oddments	4497
AHCWOL306 Supervise clip preparation	4499
Assessment Requirements for AHCWOL306 Supervise clip preparation	4502
AHCWOL307 Document a wool clip.....	4504
Assessment Requirements for AHCWOL307 Document a wool clip.....	4507
AHCWOL308 Prepare facilities for shearing and crutching	4509
Assessment Requirements for AHCWOL308 Prepare facilities for shearing and crutching.....	4512
AHCWOL310 Press wool for a clip	4514
Assessment Requirements for AHCWOL310 Press wool for a clip.....	4517
AHCWOL311 Perform shed duties	4519
Assessment Requirements for AHCWOL311 Perform shed duties	4522
AHCWOL312 Class goat fibre	4524
Assessment Requirements for AHCWOL312 Class goat fibre	4526
AHCWOL313 Class alpaca fleece.....	4528
Assessment Requirements for AHCWOL313 Class alpaca fleece	4531
AHCWOL401 Determine wool classing strategies	4533
Assessment Requirements for AHCWOL401 Determine wool classing strategies.....	4536
AHCWOL402 Use individual fleece measurements to prepare wool for sale	4538
Assessment Requirements for AHCWOL402 Use individual fleece measurements to prepare wool for sale.....	4540
AHCWOL403 Plan, implement and review wool harvesting and clip preparation	4542
Assessment Requirements for AHCWOL403 Plan, implement and review wool harvesting and clip preparation	4545
AHCWOL404 Establish work routines and manage wool harvesting and preparation staff.....	4547

Assessment Requirements for AHCWOL404 Establish work routines and manage wool harvesting and preparation staff	4550
AHCWOL405 Class fleece wool	4552
Assessment Requirements for AHCWOL405 Class fleece wool	4555
AHCWRK101 Maintain the workplace	4557
Assessment Requirements for AHCWRK101 Maintain the workplace	4559
AHCWRK201 Observe and report on weather	4561
Assessment Requirements for AHCWRK201 Observe and report on weather	4564
AHCWRK202 Observe environmental work practices	4566
Assessment Requirements for AHCWRK202 Observe environmental work practices	4568
AHCWRK203 Operate in isolated and remote situations	4570
Assessment Requirements for AHCWRK203 Operate in isolated and remote situations	4573
AHCWRK204 Work effectively in the industry	4575
Assessment Requirements for AHCWRK204 Work effectively in the industry	4578
AHCWRK205 Participate in workplace communications	4580
Assessment Requirements for AHCWRK205 Participate in workplace communications	4583
AHCWRK206 Observe enterprise quality assurance procedures	4585
Assessment Requirements for AHCWRK206 Observe enterprise quality assurance procedures	4587
AHCWRK207 Collect and record production data	4588
Assessment Requirements for AHCWRK207 Collect and record production data	4590
AHCWRK208 Provide information on products and services	4591
Assessment Requirements for AHCWRK208 Provide information on products and services	4593
AHCWRK209 Participate in environmentally sustainable work practices	4595
Assessment Requirements for AHCWRK209 Participate in environmentally sustainable work practices	4597
AHCWRK301 Collect samples for a rural production or horticulture monitoring program	4599
Assessment Requirements for AHCWRK301 Collect samples for a rural production or horticulture monitoring program	4602
AHCWRK302 Monitor weather conditions	4604
Assessment Requirements for AHCWRK302 Monitor weather conditions	4606
AHCWRK303 Respond to emergencies	4608
Assessment Requirements for AHCWRK303 Respond to emergencies	4611
AHCWRK304 Respond to rescue incidents	4613
Assessment Requirements for AHCWRK304 Respond to rescue incidents	4615
AHCWRK305 Coordinate work site activities	4617
Assessment Requirements for AHCWRK305 Coordinate work site activities	4619
AHCWRK306 Comply with industry quality assurance requirements	4621
Assessment Requirements for AHCWRK306 Comply with industry quality assurance requirements	4623
AHCWRK307 Develop and apply fertiliser and soil ameliorant product knowledge	4625
Assessment Requirements for AHCWRK307 Develop and apply fertiliser and soil ameliorant product knowledge	4628
AHCWRK308 Handle bulk materials in storage area	4629
Assessment Requirements for AHCWRK308 Handle bulk materials in storage area	4632
AHCWRK309 Apply environmentally sustainable work practices	4634
Assessment Requirements for AHCWRK309 Apply environmentally sustainable work practices	4637
AHCWRK310 Provide on-job training support	4639
Assessment Requirements for AHCWRK310 Provide on-job training support	4641
AHCWRK311 Conduct site inspections	4643
Assessment Requirements for AHCWRK311 Conduct site inspections	4646

AHCWRK401 Implement and monitor quality assurance procedures	4648
Assessment Requirements for AHCWRK401 Implement and monitor quality assurance procedures	4650
AHCWRK402 Provide information on issues and policies.....	4652
Assessment Requirements for AHCWRK402 Provide information on issues and policies.....	4655
AHCWRK403 Supervise work routines and staff performance.....	4657
Assessment Requirements for AHCWRK403 Supervise work routines and staff performance	4660
AHCWRK405 Implement and monitor environmentally sustainable work practices ...	4662
Assessment Requirements for AHCWRK405 Implement and monitor environmentally sustainable work practices.....	4665
AHCWRK501 Plan, implement and review a quality assurance program.....	4667
Assessment Requirements for AHCWRK501 Plan, implement and review a quality assurance program	4670
AHCWRK502 Collect and manage data.....	4672
Assessment Requirements for AHCWRK502 Collect and manage data	4675
AHCWRK503 Prepare reports.....	4677
Assessment Requirements for AHCWRK503 Prepare reports	4680
AHCWRK504 Assess new industry developments.....	4682
Assessment Requirements for AHCWRK504 Assess new industry developments.....	4685
AHCWRK505 Manage trial and research material.....	4687
Assessment Requirements for AHCWRK505 Manage trial and research material.....	4689
AHCWRK507 Implement professional practice	4691
Assessment Requirements for AHCWRK507 Implement professional practice.....	4694
AHCWRK508 Interpret legislation	4696
Assessment Requirements for AHCWRK508 Interpret legislation	4699
AHCWRK509 Provide specialist advice to clients	4701
Assessment Requirements for AHCWRK509 Provide specialist advice to clients.....	4703
AHCWRK510 Audit site operations.....	4705
Assessment Requirements for AHCWRK510 Audit site operations.....	4708
AHCWRK511 Develop workplace policy and procedures for sustainability.....	4710
Assessment Requirements for AHCWRK511 Develop workplace policy and procedures for sustainability	4713
AHCWRK601 Monitor projects in a program.....	4715
Assessment Requirements for AHCWRK601 Monitor projects in a program	4717
AHCWRK602 Lead and manage community or industry organisations.....	4719
Assessment Requirements for AHCWRK602 Lead and manage community or industry organisations.....	4722
AHCWRK603 Design and conduct a field-based research trial	4724
Assessment Requirements for AHCWRK603 Design and conduct a field-based research trial.....	4727
AMPMGT806 Commercialise research and technology product or idea.....	4729
Assessment Requirements for AMPMGT806 Commercialise research and technology product or idea	4732
BSBADM409 Coordinate business resources.....	4735
Assessment Requirements for BSBADM409 Coordinate business resources	4738
BSBADM504 Plan and implement administrative systems	4740
Assessment Requirements for BSBADM504 Plan and implement administrative systems.....	4744
BSBCMM401 Make a presentation	4746
Assessment Requirements for BSBCMM401 Make a presentation.....	4749
BSBCOM602 Develop and create compliance requirements.....	4751
Assessment Requirements for BSBCOM602 Develop and create compliance requirements.....	4755
BSBCUS301 Deliver and monitor a service to customers.....	4757

Assessment Requirements for BSB CUS301 Deliver and monitor a service to customers	4761
BSB CUS501 Manage quality customer service	4763
Assessment Requirements for BSB CUS501 Manage quality customer service	4766
BSB DES305 Source and apply information on the history and theory of design.....	4768
Assessment Requirements for BSB DES305 Source and apply information on the history and theory of design.....	4771
BSB DES403 Develop and extend design skills and practice	4773
Assessment Requirements for BSB DES403 Develop and extend design skills and practice	4777
BSB DES501 Implement design solutions	4779
Assessment Requirements for BSB DES501 Implement design solutions.....	4782
BSB DES502 Establish, negotiate and refine a design brief	4784
Assessment Requirements for BSB DES502 Establish, negotiate and refine a design brief	4788
BSB FIA301 Maintain financial records.....	4790
Assessment Requirements for BSB FIA301 Maintain financial records.....	4793
BSB FIA302 Process payroll.....	4795
Assessment Requirements for BSB FIA302 Process payroll	4798
BSB FIA402 Report on financial activity.....	4800
Assessment Requirements for BSB FIA402 Report on financial activity	4804
BSB FIM501 Manage budgets and financial plans	4806
Assessment Requirements for BSB FIM501 Manage budgets and financial plans	4809
BSB HRM405 Support the recruitment, selection and induction of staff	4811
Assessment Requirements for BSB HRM405 Support the recruitment, selection and induction of staff.....	4815
BSB HRM506 Manage recruitment selection and induction processes	4817
Assessment Requirements for BSB HRM506 Manage recruitment selection and induction processes.....	4821
BSB INM201 Process and maintain workplace information.....	4823
Assessment Requirements for BSB INM201 Process and maintain workplace information	4826
BSB INM401 Implement workplace information system.....	4828
Assessment Requirements for BSB INM401 Implement workplace information system	4831
BSB ITU203 Communicate electronically.....	4833
Assessment Requirements for BSB ITU203 Communicate electronically	4836
BSB ITU304 Produce spreadsheets.....	4838
Assessment Requirements for BSB ITU304 Produce spreadsheets	4841
BSB ITU306 Design and produce business documents.....	4843
Assessment Requirements for BSB ITU306 Design and produce business documents ...	4846
BSB ITU401 Design and develop complex text documents.....	4848
Assessment Requirements for BSB ITU401 Design and develop complex text documents	4851
BSB ITU404 Produce complex desktop published documents	4853
Assessment Requirements for BSB ITU404 Produce complex desktop published documents	4857
BSB LDR403 Lead team effectiveness	4859
Assessment Requirements for BSB LDR403 Lead team effectiveness.....	4862
BSB LIB502 Manage the development of collections	4864
Assessment Requirements for BSB LIB502 Manage the development of collections	4868
BSB LIB602 Develop and monitor procedures for the movement and storage of collection material	4870
Assessment Requirements for BSB LIB602 Develop and monitor procedures for the movement and storage of collection material	4874
BSB MGT402 Implement operational plan	4876
Assessment Requirements for BSB MGT402 Implement operational plan	4880
BSB MGT616 Develop and implement strategic plans.....	4882
Assessment Requirements for BSB MGT616 Develop and implement strategic plans ...	4886
BSB MGT617 Develop and implement a business plan.....	4888

Assessment Requirements for BSBMGT617 Develop and implement a business plan ..	4892
BSBMGT623 Monitor corporate governance activities	4894
Assessment Requirements for BSBMGT623 Monitor corporate governance activities ..	4897
BSBPMG418 Apply project stakeholder engagement techniques	4899
Assessment Requirements for BSBPMG418 Apply project stakeholder engagement techniques	4902
BSBPRO301 Recommend products and services	4904
Assessment Requirements for BSBPRO301 Recommend products and services.....	4907
BSBREL402 Build client relationships and business networks	4909
Assessment Requirements for BSBREL402 Build client relationships and business networks	4913
BSBRES401 Analyse and present research information	4915
Assessment Requirements for BSBRES401 Analyse and present research information	4919
BSBRES801 Initiate and lead applied research	4921
Assessment Requirements for BSBRES801 Initiate and lead applied research.....	4925
BSBRISK401 Identify risk and apply risk management processes.....	4927
Assessment Requirements for BSBRISK401 Identify risk and apply risk management processes.....	4930
BSBRISK501 Manage risk.....	4932
Assessment Requirements for BSBRISK501 Manage risk	4936
BSBSLS402A Identify sales prospects	4938
BSBSMB401 Establish legal and risk management requirements of small business	4944
Assessment Requirements for BSBSMB401 Establish legal and risk management requirements of small business	4948
BSBSMB402 Plan small business finances	4950
Assessment Requirements for BSBSMB402 Plan small business finances.....	4953
BSBSMB403 Market the small business	4955
Assessment Requirements for BSBSMB403 Market the small business.....	4959
BSBSMB404 Undertake small business planning	4961
Assessment Requirements for BSBSMB404 Undertake small business planning	4965
BSBSMB405 Monitor and manage small business operations	4967
Assessment Requirements for BSBSMB405 Monitor and manage small business operations	4971
BSBSMB406 Manage small business finances	4973
Assessment Requirements for BSBSMB406 Manage small business finances	4976
BSBSMB407 Manage a small team.....	4978
Assessment Requirements for BSBSMB407 Manage a small team	4983
BSBSUS401 Implement and monitor environmentally sustainable work practices.....	4985
Assessment Requirements for BSBSUS401 Implement and monitor environmentally sustainable work practices	4989
BSBWHS302 Apply knowledge of WHS legislation in the workplace	4991
Assessment Requirements for BSBWHS302 Apply knowledge of WHS legislation in the workplace	4994
BSBWHS404 Contribute to WHS hazard identification, risk assessment and risk control	4996
Assessment Requirements for BSBWHS404 Contribute to WHS hazard identification, risk assessment and risk control.....	5000
BSBWHS503 Contribute to the systematic management of WHS risk.....	5002
Assessment Requirements for BSBWHS503 Contribute to the systematic management of WHS risk	5006
BSBWHS508 Manage WHS hazards associated with plant	5009
Assessment Requirements for BSBWHS508 Manage WHS hazards associated with plant	5014
BSBWOR204 Use business technology	5017
Assessment Requirements for BSBWOR204 Use business technology	5020

BSB WOR404 Develop work priorities.....	5022
Assessment Requirements for BSB WOR404 Develop work priorities	5026
BSB WOR501 Manage personal work priorities and professional development.....	5028
Assessment Requirements for BSB WOR501 Manage personal work priorities and professional development.....	5031
CHCCDE002 Develop and implement community programs	5033
Assessment Requirements for CHCCDE002 Develop and implement community programs	5036
CHCCDE010 Develop and lead community engagement strategies to enhance participation	5038
Assessment Requirements for CHCCDE010 Develop and lead community engagement strategies to enhance participation.....	5041
CHCCDE012 Work within organisation and government structures to enable community development outcomes.....	5043
Assessment Requirements for CHCCDE012 Work within organisation and government structures to enable community development outcomes.....	5047
CHCVOL003 Recruit, induct and support volunteers	5049
Assessment Requirements for CHCVOL003 Recruit, induct and support volunteers.....	5052
CPCCCM2010B Work safely at heights	5054
CPCCCM3001C Operate elevated work platforms	5062
CPCCDO3011A Perform dogging	5073
CPCCOHS1001A Work safely in the construction industry	5084
CPCPCM2040A Read plans and calculate plumbing quantities	5095
CPCPCM2043A Carry out WHS requirements.....	5106
CPCPCM2047A Carry out levelling.....	5116
CPCPIG2021A Design domestic urban irrigation systems.....	5124
CPCPWT3027A Connect irrigation systems from drinking water supply	5134
CPPFES2005A Demonstrate first attack firefighting equipment.....	5144
CPPSEC4008A Prepare a detailed tender	5150
CPPWMT5043A Develop and implement an environmental management strategy.....	5161
CPPWMT5045A Develop site safety plans.....	5172
CUAACD302 Produce computer-aided drawings.....	5181
Assessment Requirements for CUAACD302 Produce computer-aided drawings	5185
CUAACD303 Produce technical drawings.....	5187
Assessment Requirements for CUAACD303 Produce technical drawings	5190
CUAATS504 Work with Aboriginal and Torres Strait Islander cultural material	5192
Assessment Requirements for CUAATS504 Work with Aboriginal and Torres Strait Islander cultural material	5196
CUACNM301 Move and store collection material	5198
Assessment Requirements for CUACNM301 Move and store collection material.....	5202
CULMS002B Research and evaluate Aboriginal or Torres Strait Islander cultural material	5204
CULMS010B Contribute to the preservation of cultural material.....	5213
FDFFS1001A Follow work procedures to maintain food safety.....	5220
FDFFS2001A Implement the food safety program and procedures	5228
FDFFS3001A Monitor the implementation of quality and food safety programs.....	5237
FDFGPS2011A Operate a creamed honey manufacture process	5248
FDFOP2003A Clean equipment in place	5257
FDFOP2004A Clean and sanitise equipment.....	5265
FDFOP2012A Maintain food safety when loading, unloading and transporting food.....	5272
FDFOP2013A Apply sampling procedures.....	5279
FDFOP2016A Work in a food handling area for non-food handlers.....	5285
FDFOP2023A Operate a packaging process.....	5291
FDFOP2038A Operate a grinding process.....	5300

FDFTEC3001A Participate in a HACCP team.....	5309
FDFWGG2001A Bench graft vines.....	5317
FDFWGG2002A Carry out potting operations.....	5324
FDFWGG2003A Hand prune vines.....	5332
FDFWGG2005A Maintain callusing environment.....	5338
FDFWGG2006A Obtain and process rootlings.....	5347
FDFWGG2008A Train vines.....	5356
FDFWGG2009A Operate specialised canopy management equipment.....	5362
FDFWGG2010A Field graft vines.....	5370
FDFWGG2015A Support mechanical harvesting operations.....	5377
FDFWGG2016A Install and maintain vine trellis.....	5385
FDFWGG2018A Operate vineyard equipment.....	5392
FDFWGG2020A Carry out hot water treatment.....	5399
FDFWGG2021A Operate nursery cold storage facilities.....	5406
FDFWGG2022A Take and process vine cuttings.....	5413
FDFWGG3002A Coordinate canopy management activities.....	5422
FDFWGG3004A Coordinate nursery activities.....	5430
FDFWGG3005A Perform field nursery activities.....	5437
FDFWGG3006A Coordinate hand pruning activities.....	5444
FDFWGG3008A Operate a mechanical harvester.....	5452
FDFWGG3009A Monitor and maintain nursery plants.....	5460
FDFWGG3010A Implement a soil management program.....	5468
FDFWGG3011A Perform shed nursery activities.....	5475
FDFWGG3013A Operate spreading and seeding equipment.....	5483
FWPCOT2236 Fall trees manually (basic).....	5492
Assessment Requirements for FWPCOT2236 Fall trees manually (basic).....	5496
FWPCOT2237 Maintain chainsaws.....	5501
Assessment Requirements for FWPCOT2237 Maintain chainsaws.....	5504
FWPCOT2239 Trim and cut felled trees.....	5507
Assessment Requirements for FWPCOT2239 Trim and cut felled trees.....	5510
FWPCOT3202 Navigate in remote or trackless areas.....	5514
Assessment Requirements for FWPCOT3202 Navigate in remote or trackless areas.....	5517
FWPCOT3238 Operate a pole saw.....	5520
Assessment Requirements for FWPCOT3238 Operate a pole saw.....	5523
FWPCOT3259 Operate a four wheel drive on unsealed roads.....	5525
Assessment Requirements for FWPCOT3259 Operate a four wheel drive on unsealed roads.....	5529
FWPCOT6204 Use carbon accounting to estimate emissions.....	5534
Assessment Requirements for FWPCOT6204 Use carbon accounting to estimate emissions.....	5538
FWPCOT6205 Prepare an enterprise carbon management report.....	5541
Assessment Requirements for FWPCOT6205 Prepare an enterprise carbon management report.....	5544
FWPCOT6207 Develop forest management systems and processes.....	5547
Assessment Requirements for FWPCOT6207 Develop forest management systems and processes.....	5550
FWPFGM2207 Undertake brushcutting operations.....	5553
Assessment Requirements for FWPFGM2207 Undertake brushcutting operations.....	5556
FWPFGM3201 Manage seed collection.....	5559
Assessment Requirements for FWPFGM3201 Manage seed collection.....	5562
FWPFGM3202 Extract seed.....	5565
Assessment Requirements for FWPFGM3202 Extract seed.....	5568
FWPFGM3212 Fall trees manually (intermediate).....	5570
Assessment Requirements for FWPFGM3212 Fall trees manually (intermediate).....	5574

FWPFGM3213 Fall trees manually (advanced).....	5579
Assessment Requirements for FWPFGM3213 Fall trees manually (advanced).....	5583
FWPFGM6203 Manage sustainable tree inventory	5588
Assessment Requirements for FWPFGM6203 Manage sustainable tree inventory	5591
FWPHAR2206 Operate a mobile chipper/mulcher.....	5595
Assessment Requirements for FWPHAR2206 Operate a mobile chipper/mulcher	5598
HLTAID001 Provide cardiopulmonary resuscitation.....	5601
Assessment Requirements for HLTAID001 Provide cardiopulmonary resuscitation....	5604
HLTAID002 Provide basic emergency life support.....	5607
Assessment Requirements for HLTAID002 Provide basic emergency life support	5610
HLTAID003 Provide first aid.....	5614
Assessment Requirements for HLTAID003 Provide first aid.....	5617
HLTAID005 Provide first aid in remote situations	5621
Assessment Requirements for HLTAID005 Provide first aid in remote situations.....	5624
HLTWHS001 Participate in workplace health and safety.....	5629
Assessment Requirements for HLTWHS001 Participate in workplace health and safety.....	5632
LGACOM404B Establish cooperative arrangements with other organisations	5635
LGACOM502B Devise and conduct community consultations	5640
LGACOMP008A Apply conflict resolution strategies.....	5646
LGAGCM710A Manage contracts and contractors.....	5651
LGALAND504A Undertake effective consultation with Indigenous people on matters of cultural heritage	5657
LGAPLEM508A Manipulate and analyse data within geographic information systems.....	5663
LGAPLEM512A Provide geographic information systems data.....	5667
LGAPLEM612B Protect heritage and cultural assets.....	5673
LGAREGS305A Undertake animal or reptile control duties	5679
LMFGG2002B Apply First Aid.....	5684
MEM05004C Perform routine oxy acetylene welding.....	5691
MEM05007C Perform manual heating and thermal cutting.....	5697
MEM05012C Perform routine manual metal arc welding	5703
MEM05015D Weld using manual metal arc welding process.....	5708
MEM05017D Weld using gas metal arc welding process	5716
MEM05019D Weld using gas tungsten arc welding process.....	5724
MEM05049B Perform routine gas tungsten arc welding	5732
MEM05050B Perform routine gas metal arc welding	5738
MEM18001C Use hand tools	5744
MEM18002B Use power tools/hand held operations.....	5750
MSL904001 Perform standard calibrations.....	5756
Assessment Requirements for MSL904001 Perform standard calibrations	5762
MSL913002 Plan and conduct laboratory/field work.....	5765
Assessment Requirements for MSL913002 Plan and conduct laboratory/field work	5770
MSL922001 Record and present data.....	5773
Assessment Requirements for MSL922001 Record and present data.....	5776
MSL924001 Process and interpret data.....	5779
Assessment Requirements for MSL924001 Process and interpret data.....	5783
MSL924002 Use laboratory application software	5786
Assessment Requirements for MSL924002 Use laboratory application software	5790
MSL933001 Maintain the laboratory/field workplace fit for purpose	5792
Assessment Requirements for MSL933001 Maintain the laboratory/field workplace fit for purpose.....	5799
MSL933004 Perform calibration checks on equipment and assist with its maintenance.....	5802
Assessment Requirements for MSL933004 Perform calibration checks on equipment and assist with its maintenance	5806

MSL934002 Apply quality system and continuous improvement processes	5809
Assessment Requirements for MSL934002 Apply quality system and continuous improvement processes	5815
MSL934003 Maintain and control stocks.....	5818
Assessment Requirements for MSL934003 Maintain and control stocks	5823
MSL973007 Perform microscopic examination	5826
Assessment Requirements for MSL973007 Perform microscopic examination.....	5832
MSL975017 Perform laboratory-based ecological techniques.....	5835
Assessment Requirements for MSL975017 Perform laboratory-based ecological techniques	5841
NWP203B Plan and organise personal work activities.....	5844
NWP209B Use maps, plans, drawings and specifications.....	5849
NWP210B Perform basic water quality tests	5855
NWP215B Install and replace basic volumetric metering equipment.....	5861
NWP410C Coordinate and monitor asset construction and maintenance	5866
NWP513B Develop and review catchment management plan	5874
NWP518B Prepare and report on data related to flood mitigation.....	5880
NWP519B Develop and report flood mitigation.....	5885
NWPGEN005 Coordinate and monitor the application of environmental plans and procedures	5890
Assessment Requirements for NWPGEN005 Coordinate and monitor the application of environmental plans and procedures	5893
NWPIRR002 Operate basic flow control and regulating devices in irrigation systems .	5895
Assessment Requirements for NWPIRR002 Operate basic flow control and regulating devices in irrigation systems.....	5898
NWPIRR012 Construct open earthen channels or drains	5900
Assessment Requirements for NWPIRR012 Construct open earthen channels or drains	5903
NWPIRR013 Construct and install irrigation delivery and stormwater drainage assets	5906
Assessment Requirements for NWPIRR013 Construct and install irrigation delivery and stormwater drainage assets.....	5909
NWPIRR014 Install meters for rural water supplies	5911
Assessment Requirements for NWPIRR014 Install meters for rural water supplies.....	5914
NWPIRR022 Maintain meters for rural water supplies.....	5917
Assessment Requirements for NWPIRR022 Maintain meters for rural water supplies	5920
NWPIRR024 Monitor and conduct maintenance on flow control and metering devices	5922
Assessment Requirements for NWPIRR024 Monitor and conduct maintenance on flow control and metering devices	5925
NWPIRR033 Coordinate and monitor the operation of irrigation delivery systems	5927
Assessment Requirements for NWPIRR033 Coordinate and monitor the operation of irrigation delivery systems	5930
NWPIRR042 Monitor and schedule water deliveries.....	5932
Assessment Requirements for NWPIRR042 Monitor and schedule water deliveries	5935
NWPIRR062 Develop and review irrigation system management plan	5937
Assessment Requirements for NWPIRR062 Develop and review irrigation system management plan.....	5940
NWPIRR063 Develop and review surface water management plan.....	5942
Assessment Requirements for NWPIRR063 Develop and review surface water management plan.....	5945
NWPIRR072 Implement and coordinate surface water management plan.....	5947
Assessment Requirements for NWPIRR072 Implement and coordinate surface water management plan.....	5950
NWPIRR073 Implement and coordinate catchment management plan.....	5952

Assessment Requirements for NWPIRR073 Implement and coordinate catchment management plan.....5955

NWPTRT062 Operate and control reclaimed water irrigation.....5957

Assessment Requirements for NWPTRT062 Operate and control reclaimed water irrigation.....5960

PSPPCY004 Support policy implementation.....5962

Assessment Requirements for PSPPCY004 Support policy implementation.....5964

PSPPCY010 Manage policy implementation.....5966

Assessment Requirements for PSPPCY010 Manage policy implementation.....5969

PSPPM402B Manage simple projects.....5971

PSPPM502B Manage complex projects.....5980

PSPPM503B Close complex projects.....5990

PSPREG003 Apply regulatory powers.....5998

Assessment Requirements for PSPREG003 Apply regulatory powers.....6001

PSPREG008 Act on non-compliance.....6003

Assessment Requirements for PSPREG008 Act on non-compliance.....6006

PUACOM012B Liaise with media at a local level.....6008

PUAEMR026 Treat operational risk.....6013

PUAEMR027 Assess operational risk.....6019

PUAFIR204B Respond to wildfire.....6025

PUAFIR303B Suppress wildfire.....6033

PUAFIR406B Develop prescribed burning plans.....6043

PUAFIR407B Conduct prescribed burning.....6049

PUAFIR601B Develop and administer agency policy, procedures and practices.....6056

PUALAW001B Protect and preserve incident scene.....6061

PUAOPE004B Conduct briefings/debriefings.....6067

PUAOPE005B Manage a multi team response.....6074

PUATEA001B Work in a team.....6084

RIIMPO304D Conduct wheel loader operations.....6089

Assessment Requirements for RIIMPO304D Conduct wheel loader operations.....6092

RIIMPO318E Conduct civil construction skid steer loader operations.....6095

Assessment Requirements for RIIMPO318E Conduct civil construction skid steer loader operations.....6098

RIIMPO319D Conduct backhoe/loader operations.....6102

Assessment Requirements for RIIMPO319D Conduct backhoe/loader operations.....6105

RIIMPO324E Conduct civil construction grader operations.....6109

Assessment Requirements for RIIMPO324E Conduct civil construction grader operations.....6112

RIIWH5202D Enter and work in confined spaces.....6116

Assessment Requirements for RIIWH5202D Enter and work in confined spaces.....6119

RIIWH5204D Work safely at heights.....6122

Assessment Requirements for RIIWH5204D Work safely at heights.....6125

RIIWH5205D Control traffic with stop-slow bat.....6128

Assessment Requirements for RIIWH5205D Control traffic with stop-slow bat.....6130

RIIWH5302D Implement traffic management plan.....6133

Assessment Requirements for RIIWH5302D Implement traffic management plan.....6136

SIRRINV001 Receive and handle retail stock.....6139

Assessment Requirements for SIRRINV001 Receive and handle retail stock.....6142

SIRRINV002 Control stock.....6144

Assessment Requirements for SIRRINV002 Control stock.....6147

SIRRMER001 Produce visual merchandise displays.....6149

Assessment Requirements for SIRRMER001 Produce visual merchandise displays.....6152

SIRRMER003 Coordinate visual merchandising activities.....6154

Assessment Requirements for SIRRMER003 Coordinate visual merchandising activities.....6157

SIRRRTF001 Balance and secure point-of-sale terminal.....	6160
Assessment Requirements for SIRRRTF001 Balance and secure point-of-sale terminal	6162
SIRXADM001A Apply retail office procedures.....	6164
SIRXADM002A Coordinate retail office.....	6170
SIRXCEG001 Engage the customer.....	6177
Assessment Requirements for SIRXCEG001 Engage the customer.....	6179
SIRXCLM402 Manage store facilities.....	6181
SIRXFIN002A Perform retail finance duties.....	6187
SIRXICT001A Operate retail technology.....	6193
SIRXIND002 Organise and maintain the store environment.....	6198
Assessment Requirements for SIRXIND002 Organise and maintain the store environment	6200
SIRXINV004A Buy merchandise.....	6202
SIRXMER004A Manage merchandise and store presentation.....	6213
SIRXMER201 Merchandise products.....	6221
SIRXMER406 Monitor in-store visual merchandising display.....	6227
SIRXMPR001A Profile a retail market.....	6232
SIRXPDK001 Advise on products and services.....	6239
Assessment Requirements for SIRXPDK001 Advise on products and services.....	6241
SIRXPRO007A Improve supply and distribution chains.....	6243
SIRXRSK002 Maintain store security.....	6250
Assessment Requirements for SIRXRSK002 Maintain store security.....	6252
SIRXRSK404 Control store security.....	6255
SIRXSLS001 Sell to the retail customer.....	6261
Assessment Requirements for SIRXSLS001 Sell to the retail customer.....	6264
SIRXSLS002 Follow point-of-sale procedures.....	6267
Assessment Requirements for SIRXSLS002 Follow point-of-sale procedures.....	6270
SIRXSLS303 Build relationships with customers.....	6273
SIRXSLS406 Manage sales and service delivery.....	6281
SISXRES001 Conduct sustainable work practices in open spaces.....	6289
Assessment Requirements for SISXRES001 Conduct sustainable work practices in open spaces.....	6292
SITTGDE001 Interpret aspects of local Australian Indigenous culture.....	6294
Assessment Requirements for SITTGDE001 Interpret aspects of local Australian Indigenous culture.....	6297
SITTGDE002 Work as a guide.....	6299
Assessment Requirements for SITTGDE002 Work as a guide.....	6302
SITTGDE007 Research and share general information on Australian Indigenous cultures.....	6306
Assessment Requirements for SITTGDE007 Research and share general information on Australian Indigenous cultures.....	6309
SITTGDE008 Prepare specialised interpretive content on flora, fauna and landscape.....	6312
Assessment Requirements for SITTGDE008 Prepare specialised interpretive content on flora, fauna and landscape.....	6315
SITTGDE010 Prepare specialised interpretive content on cultural and heritage environments.....	6318
Assessment Requirements for SITTGDE010 Prepare specialised interpretive content on cultural and heritage environments.....	6321
SITTPPD002 Develop interpretive activities.....	6324
Assessment Requirements for SITTPPD002 Develop interpretive activities.....	6327
SITTPPD009 Develop environmentally sustainable tourism operations.....	6330
Assessment Requirements for SITTPPD009 Develop environmentally sustainable tourism operations.....	6333
SITXCCS002 Provide visitor information.....	6336
Assessment Requirements for SITXCCS002 Provide visitor information.....	6339

SITXCOM004 Address protocol requirements.....	6342
Assessment Requirements for SITXCOM004 Address protocol requirements	6345
SRXGOV001B Participate as a member of an effective Board of an organisation.....	6348
SRXGOV004B Work effectively with the Board of an organisation	6364
SRXGRO002A Deal with conflict	6376
TAEASS401 Plan assessment activities and processes	6386
Assessment Requirements for TAEASS401 Plan assessment activities and processes...	6390
TAEASS402 Assess competence	6392
Assessment Requirements for TAEASS402 Assess competence.....	6396
TAEASS403 Participate in assessment validation.....	6398
Assessment Requirements for TAEASS403 Participate in assessment validation	6402
TAEDEL301 Provide work skill instruction.....	6404
Assessment Requirements for TAEDEL301 Provide work skill instruction.....	6408
TAEDEL404 Mentor in the workplace.....	6410
Assessment Requirements for TAEDEL404 Mentor in the workplace.....	6414
TLID1001 Shift materials safely using manual handling methods	6416
Assessment Requirements for TLID1001 Shift materials safely using manual handling methods	6419
TLID2022 Conduct weighbridge operations.....	6422
Assessment Requirements for TLID2022 Conduct weighbridge operations.....	6425
TLID3014 Load and unload vehicles carrying special loads	6428
Assessment Requirements for TLID3014 Load and unload vehicles carrying special loads	6431
TLID3020 Care for livestock in transit.....	6434
Assessment Requirements for TLID3020 Care for livestock in transit.....	6437
TLIE2008 Process workplace documentation.....	6439
Assessment Requirements for TLIE2008 Process workplace documentation.....	6441
TLIE3002 Estimate/calculate mass, area and quantify dimensions.....	6443
Assessment Requirements for TLIE3002 Estimate/calculate mass, area and quantify dimensions	6446
TLIE3004 Prepare workplace documents.....	6448
Assessment Requirements for TLIE3004 Prepare workplace documents	6451
TLIF2010 Apply fatigue management strategies	6453
Assessment Requirements for TLIF2010 Apply fatigue management strategies	6456
TLIH2001 Interpret road maps and navigate pre-determined routes.....	6458
Assessment Requirements for TLIH2001 Interpret road maps and navigate pre-determined routes	6461
TLIH3002 Plan and navigate routes.....	6464
Assessment Requirements for TLIH3002 Plan and navigate routes.....	6467
TLIL5019 Implement and monitor transport logistics.....	6470
Assessment Requirements for TLIL5019 Implement and monitor transport logistics ..	6473
TLILIC2001 Licence to operate a forklift truck	6476
Assessment Requirements for TLILIC2001 Licence to operate a forklift truck.....	6481
TLILIC2001A Licence to operate a forklift truck.....	6486
TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)	6495
Assessment Requirements for TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)	6500
TLIR4002 Source goods/services and evaluate contractors.....	6506
Assessment Requirements for TLIR4002 Source goods/services and evaluate contractors	6509
TLIR4003 Negotiate a contract.....	6511
Assessment Requirements for TLIR4003 Negotiate a contract	6514
UETTDREL14A Working safely near live electrical apparatus as a non-electrical worker	6516
UETTDRRF03B Perform EWP rescue.....	6530

UETTDRRF08B Perform EWP controlled descent escape	6540
AHC Agriculture, Horticulture and Conservation and Land Management Training Package.....	6549
AHCSS00026 Advanced Chemical Spray Application Skill Set.....	6556
AHCSS00027 Agricultural Chemical Skill Set.....	6558
AHCSS00028 Basic Introduction to Beekeeping Skill Set.....	6561
AHCSS00029 Cotton Industry Skill Set.....	6563
AHCSS00030 Farm Business Management Skill Set.....	6565
AHCSS00031 Gravity Fed Irrigation Operator Skill Set.....	6567
AHCSS00032 Identify Plants for Indigenous Land Management Skill Set	6569
AHCSS00033 Irrigation Agronomist Skill Set.....	6571
AHCSS00034 Irrigation Contractor Skill Set.....	6573
AHCSS00035 Irrigation Installer Skill Set.....	6575
AHCSS00036 Irrigation Manager Skill Set.....	6577
AHCSS00037 Irrigation Retailer Skill Set.....	6579
AHCSS00038 Landscape Business Skill Set.....	6581
AHCSS00039 Landscape Design Skill Set.....	6583
AHCSS00040 Landscape Plant Management Skill Set.....	6584
AHCSS00041 Landscape Professional Practice Skill Set	6586
AHCSS00042 Organic Crop Management Skill Set.....	6588
AHCSS00043 Vertebrate Pest Management Planning Skill Set.....	6590
AHCSS00044 Organic Horticulture Management Skill Set.....	6592
AHCSS00045 Spray Operator Skill Set.....	6594
AHCSS00046 Organic Livestock Management Skill Set.....	6596
AHCSS00047 Report on Aboriginal Cultural Sites Skill Set.....	6598
AHCSS00048 Permaculture Demonstrator Skill Set.....	6600
AHCSS00049 Pig Health Supervisor Skill Set.....	6602
AHCSS00050 Pork Industry Euthanasia Skill Set.....	6604
AHCSS00051 Pork Industry Outdoor Pig Production Skill Set.....	6606
AHCSS00052 Pork Industry Stockpersons Skill Set.....	6608
AHCSS00053 Poultry Egg Industry Pullet Rearing Skill Set.....	6610
AHCSS00054 Poultry Egg Industry Stockpersons Skill Set.....	6612
AHCSS00055 Poultry Health Skill Set.....	6614
AHCSS00056 Poultry Husbandry Skill Set.....	6616
AHCSS00057 Poultry Industry Beak Tipping Skill Set.....	6618
AHCSS00058 Poultry Industry Egg Collection and Packing on Farm Skill Set.....	6619
AHCSS00059 Poultry Industry Egg Grading and Packing at Grading Floor Skill Set..	6621
AHCSS00060 Poultry Meat Industry Stockpersons Skill Set.....	6623
AHCSS00061 Prepare For and Manage Organic Farm Certification Skill Set.....	6625
AHCSS00062 Pressurised Irrigation System Operator Skill Set.....	6627
AHCSS00063 Production Horticulture Administration Officer Skill Set.....	6629
AHCSS00064 Production Horticulture Administration Supervisor Skill Set.....	6631
AHCSS00065 Production Horticulture Machinery Skill Set.....	6633
AHCSS00066 Production Horticulture Manager Skill Set.....	6635
AHCSS00067 Production Horticulture Supervisor Skill Set.....	6637
AHCSS00068 Production Horticulture Technology Skill Set.....	6639
AHCSS00069 Recognise Aboriginal Cultural Sites Skill Set.....	6641
AHCSS00070 Recognise Native and Feral Fauna Skill Set	6643
AHCSS00071 Recognise Native Fauna in Indigenous Land Management Skill Set	6645

AHC Agriculture, Horticulture and Conservation and Land Management Training Package

AHC10116 Certificate I in Conservation and Land Management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification is an entry-level qualification aimed at individuals entering conservation and land management industry. It allows individuals to develop basic skills and knowledge to prepare for work. They may undertake a range of simple tasks under close supervision. The range of technical skills and knowledge is limited.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 6

- Core Units = 2
- Elective Units = 4

Core Units

Work health and safety

Unit Code	Unit Title
AHCWHS101	Work safely

Work

Unit Code	Unit Title
AHCWRK101	Maintain the workplace

Elective Units

Select 4 units from the elective list or from the elective lists of Certificates I or II of this or any other endorsed Training Package or Accredited Course.

Selected units must be relevant to job outcomes in conservation and land management and must be chosen to ensure the integrity of the qualification outcome at AQF level 1.

Chemicals

Unit Code	Unit Title
AHCCHM101	Follow basic chemical safety rules

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM101	Assist with routine maintenance of machinery and equipment

Natural area restoration

Unit Code	Unit Title
AHCNAR101	Support natural area conservation
AHCNAR102	Support native seed collection

Nursery

Unit Code	Unit Title
AHCNSY101	Support nursery work

Work

Unit Code	Unit Title
AHCWRK204	Work effectively in the industry

Qualification Mapping Information

This qualification is equivalent to AHC10110 Certificate I in Conservation and Land Management.

AHC10216 Certificate I in AgriFood Operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification is an entry-level qualification aimed at individuals entering the agriculture, horticulture and conservation and land management industries. It allows individuals to develop basic skills and knowledge to prepare for work. They may undertake a range of simple tasks under close supervision. The range of technical skills and knowledge is limited.

The qualification is suited to VET in Schools programs or learners with no previous connection to the agriculture, horticulture or conservation and land management industries or relevant employment history.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 6

- Core Units = 2
- Elective Units = 4

Core Units

Work

Unit Code	Unit Title
AHCWRK101	Maintain the workplace

Work health and safety

Unit Code	Unit Title
AHCWHS101	Work safely

Elective Units

- Select at least 2 units from the elective list
- 2 units may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course. The 2 units selected can be at AQF level 1 or AQF level 2. Selected units must be relevant to job outcomes in AgriFood industries and must be chosen to ensure the integrity of the qualification outcome at AQF level 1

Broadacre cropping

Unit Code	Unit Title
AHCBAC101	Support agricultural crop work

Chemicals

Unit Code	Unit Title
AHCCHM101	Follow basic chemical safety rules

Irrigation

Unit Code	Unit Title
AHCIRG101	Support irrigation work

Landscape

Unit Code	Unit Title
AHCLSC101	Support landscape work

Livestock

Unit Code	Unit Title
AHCLSK101	Support extensive livestock work
AHCLSK102	Support intensive livestock work

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM101	Assist with routine maintenance of machinery and equipment

Nursery

Unit Code	Unit Title
AHCNSY101	Support nursery work

Organic production

Unit Code	Unit Title
AHCORG101	Support organic production

Parks and gardens

Unit Code	Unit Title
AHCPGD101	Support gardening work

Production horticulture

Unit Code	Unit Title
AHCPHT101	Support horticultural production

Tools and equipment

Unit Code	Unit Title
-----------	------------

MEM18001C	Use hand tools
MEM18002B	Use power tools/hand held operations

Turf

Unit Code	Unit Title
AHCTRF101	Support turf work

Wool

Unit Code	Unit Title
AHCWOL101	Support woolshed activities

Qualification Mapping Information

This qualification is not equivalent to AHC10210 Certificate I in Agrifood Operations.

AHC10316 Certificate I in Horticulture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification is an entry-level qualification aimed at individuals entering the horticulture industry. It allows individuals to develop basic skills and knowledge to prepare for work. They may undertake a range of simple tasks under close supervision. The range of technical skills and knowledge is limited.

The qualification is suited to VET in Schools programs or learners with no previous connection to the horticulture industry or relevant employment history.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 6

- Core Units = 1
- Elective Units = 5

Core Units

Unit Code	Unit Title
AHCWHS101	AHCWHS101 Work safely

Elective Units

- Select 3 units from list below
- 2 units may be selected from units aligned to Certificates I or II in the AHC Training Package or from any other currently endorsed training package or accredited course
Selected units must be relevant to job outcomes in horticulture

Unit Code	Unit Title
AHCCHM101	Follow basic chemical safety rules
AHCIRG101	Support irrigation work
AHCLSC101	Support landscape work
AHCMOM101	Assist with routine maintenance of machinery and equipment
AHCNAR101	Support natural area conservation
AHCNSY101	Support nursery work
AHCPGD101	Support gardening work
AHCPHT101	Support horticultural production
AHCTRF101	Support turf work
AHCWRK101	Maintain the workplace

Qualification Mapping Information

No equivalent qualification.

AHC10416 Certificate I in Permaculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification is an entry-level qualification aimed at individuals entering the permaculture industry. It allows individuals to develop basic skills and knowledge to prepare for work. They may undertake a range of simple tasks under close supervision. The range of technical skills and knowledge is limited.

The qualification is suited to VET in Schools programs or learners with no previous connection to permaculture or relevant employment history.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 7

- Core Units = 4
- Elective Units = 3

Core Units

Unit Code	Unit Title
AHCPER101	Observe permaculture principles and practices
AHCPER102	Support resource conservation practices
AHCPER103	Support plant care in a permaculture system

AHCWHS101	Work safely
-----------	-------------

Elective Units

- Select at least 3 units from the elective list
- 1 unit may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected unit must be relevant to job outcomes in Permaculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 1

Unit Code	Unit Title
AHCPER104	Support animal care in a permaculture system
AHCPER105	Assist with maintaining structures in a permaculture system
AHCPER212	Use and maintain garden hand tools and equipment
AHCNAR101	Support natural area conservation
AHCORG101	Support organic production
AHCWRK101	Maintain the workplace

Qualification Mapping Information

No equivalent qualification.

AHC20116 Certificate II in Agriculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides an entry level occupational outcome in agriculture.

The qualification enables individuals to select a livestock production or cropping context as a job focus or, in the case of mixed farming enterprises, both.

Industry expects individuals with this qualification to carry out routine tasks under general supervision and exercise limited autonomy with some accountability for their own work.

This qualification is suitable for an Australian Apprenticeship.

Job roles vary across different industry sectors and may include:

- Assistant animal attendant/stockperson
- Assistant Farm or Station hand
- Assistant Farm or Station worker
- Assistant Farm or Station labourer

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 18

- Core Units = 3
- Elective Units = 15

Core Units

Work

Unit Code	Unit Title
AHCWRK204	Work effectively in the industry
AHCWRK209	Participate in environmentally sustainable work practices

Work health and safety

Unit Code	Unit Title
AHCWHS201	Participate in work health and safety processes

Elective Units

- Select 7 units from Group A
- Select 5 units from Group A or Group B
- 3 units aligned to AQF levels 1, 2, or 3 may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course.
Selected units must be relevant to job outcomes in agriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 2

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Group A

Biosecurity

Unit Code	Unit Title
AHCBIO201	Inspect and clean machinery for plant, animal and soil material
AHCBIO202	Follow site quarantine procedures

Broadacre cropping

Unit Code	Unit Title
AHCBAC201	Assist agricultural crop establishment
AHCBAC202	Assist agricultural crop maintenance

AHCBAC203	Assist agricultural crop harvesting
-----------	-------------------------------------

Chemicals

Unit Code	Unit Title
AHCCHM201	Apply chemicals under supervision

First aid

Unit Code	Unit Title
HLTAID002	Provide basic emergency life support

Infrastructure

Unit Code	Unit Title
AHCINF201	Carry out basic electric fencing operations
AHCINF202	Install, maintain and repair farm fencing
AHCINF203	Maintain properties and structures
AHCINF204	Fabricate and repair metal or plastic structures

Irrigation

Unit Code	Unit Title
AHCIRG216	Assist with surface irrigation operations
AHCIRG217	Assist with pressurised irrigation operations

Livestock

Unit Code	Unit Title
AHCLSK202	Assist with surface irrigation operations
AHCLSK203	Assist with pressurised irrigation operations

AHCLSK204	Carry out regular livestock observation
AHCLSK205	Handle livestock using basic techniques
AHCLSK206	Identify and mark livestock
AHCLSK207	Load and unload livestock
AHCLSK208	Monitor livestock to parturition
AHCLSK209	Monitor water supplies
AHCLSK210	Muster and move livestock
AHCLSK211	Provide feed for livestock

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM201	Operate two wheel motorbikes
AHCMOM202	Operate tractors
AHCMOM203	Operate basic machinery and equipment
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM205	Operate vehicles
AHCMOM212	Operate quad bikes
FWPCOT3259	Operate a four wheel drive on unsealed roads

Pest management

Unit Code	Unit Title
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders

Tools and equipment

Unit Code	Unit Title
-----------	------------

MEM18001C	Use hand tools
MEM18002B	Use power tools/hand held operations

Work

Unit Code	Unit Title
AHCWRK201	Observe and report on weather
AHCWRK203	Operate in isolated and remote situations
AHCWRK205	Participate in workplace communications
AHCWRK206	Observe enterprise quality assurance procedures
AHCWRK207	Collect and record production data
TLID1001	Shift materials safely using manual handling methods

Group B

Artificial insemination

Unit Code	Unit Title
AHCAIS201	Assist with artificial insemination procedures

Beekeeping

Unit Code	Unit Title
AHCBEK201	Support beekeeping work
AHCBEK202	Use a bee smoker
AHCBEK203	Open and reassemble a beehive
AHCBEK204	Construct and repair beehives

Broadacre cropping

Unit Code	Unit Title
AHCBAC204	Prepare grain storages

Dairy

Unit Code	Unit Title
AHCDRY201	Milk livestock

Drainage

Unit Code	Unit Title
AHCDRG201	Maintain drainage systems

Irrigation

Unit Code	Unit Title
AHCIRG215	Assist with low volume irrigation operations

Livestock

Unit Code	Unit Title
AHCLSK201	Assist with feeding in a production system
AHCLSK213	Clean out production sheds
AHCLSK214	Maintain production growing environments
AHCLSK215	Carry out alpaca handling and husbandry operations

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM206	Conduct grader operations
AHCMOM207	Conduct front-end loader operations

AHCMOM208	Conduct excavator operations
AHCMOM209	Conduct dozer operations
AHCMOM210	Conduct scraper operations
AHCMOM214	Operate cane haulage vehicle
TLILIC2001	Licence to operate a forklift truck
TLID2022	Conduct weighbridge operations

Pork production

Unit Code	Unit Title
AHCPRK201	Care for health and welfare of pigs
AHCPRK203	Move and handle pigs
AHCPRK204	Care for weaner pigs
AHCPRK305	Care for grower and finisher pigs

Poultry

Unit Code	Unit Title
AHCPLY201	Collect store and handle eggs from breeder flocks
AHCPLY202	Maintain health and welfare of poultry
AHCPLY203	Set up shed for placement of day-old chickens
AHCPLY204	Collect and pack eggs for human consumption
AHCPLY205	Grade and pack eggs for human consumption

Production horticulture

Unit Code	Unit Title
AHCPHT201	Plant horticultural crops
AHCPHT202	Carry out canopy maintenance

AHCPHT203	Support horticultural crop harvesting
AHCPHT205	Carry out postharvest operations

Resources and Infrastructure

Unit Code	Unit Title
RIIWHS202D	Enter and work in confined spaces
RIIWHS204D	Work safely at heights

Shearing

Unit Code	Unit Title
AHCSHG201	Crutch sheep
AHCSHG202	Assist in preparing for shearing and crutching
AHCSHG203	Shear sheep to novice level
AHCSHG204	Shear sheep to improver level
AHCSHG205	Grind combs and cutters for machine shearing
AHCSHG206	Prepare handpiece and downtube for machine shearing
AHCSHG207	Shear goats
AHCSHG208	Shear alpacas
AHCSHG209	Support alpaca shearing operations

Soil and water conservation

Unit Code	Unit Title
AHCSAW201	Conduct erosion and sediment control activities

Soils and media

Unit Code	Unit Title
-----------	------------

AHCSOL202	Assist with soil or growing media sampling and testing
-----------	--

Pests Management

Unit Code	Unit Title
AHCPMG309	Apply pest animal control techniques

Water

Unit Code	Unit Title
AHCWAT201	Set up, operate and maintain water delivery systems for compost

Wool

Unit Code	Unit Title
AHCWOL201	Pen sheep
AHCWOL202	Perform board duties
AHCWOL203	Carry out wool pressing
AHCWOL204	Undertake basic skirting of alpaca fleece

Qualification Mapping Information

This qualification is not equivalent to AHC20110 Certificate II in Agriculture.

AHC20316 Certificate II in Production Horticulture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

The qualification enables individuals to select a tree cropping, vegetable or berry production, grape growing or mushroom production context as a job focus, or a mixture in the case of mixed enterprises.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 1
- Elective Units = 14

Core Units

Unit Code	Unit Title
AHCWHS201	Participate in work health and safety processes

Elective Units

- Select 4 units from Group A
- Select 7 units from Group A or B

- 3 units may be selected from Group B or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in production horticulture and must be chosen to ensure the integrity of the qualification outcome at AQF level 2

Group A

Unit Code	Unit Title
AHCBIO202	Follow site quarantine procedures
AHCCHM201	Apply chemicals under supervision
AHCMOM203	Operate basic machinery and equipment
AHCPHT201	Plant horticultural crops
AHCPHT203	Support horticultural crop harvesting
AHCPHT205	Carry out post-harvest operations
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders
AHCSOL202	Assist with soil or growing media sampling and testing
AHCWRK209	Participate in environmentally sustainable work practices

Group B

Unit Code	Unit Title
AHCINF203	Maintain properties and structures
AHCIRG215	Assist with low volume irrigation operations
AHCIRG216	Assist with surface irrigation operations
AHCIRG217	Assist with pressurised irrigation operations
AHCIRG218	Assist with pump and flow control device operations
AHCIRG326	Operate irrigation injection equipment
AHCMOM201	Operate two wheel motorbikes

AHCMOM202	Operate tractors
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM205	Operate vehicles
AHCMOM212	Operate quad bikes
AHCNSY202	Care for nursery plants
AHCNSY203	Undertake propagation activities
AHCPHT202	Carry out canopy maintenance
AHCPHT204	Undertake field budding and grafting
AHCPHT206	Handle and move mushroom boxes
AHCPHT207	Perform mushroom substrate process tasks
AHCPHT208	Water mushroom crops
AHCPHT209	Produce trellis dried grapes
AHCWRK201	Observe and report on weather
AHCWRK203	Operate in isolated and remote situations
AHCWRK206	Observe enterprise quality assurance procedures
AHCWRK207	Collect and record production data
AHCWRK208	Provide information on products and services
FDFOP2012A	Maintain food safety when loading, unloading and transporting food
FDFOP2016A	Work in a food handling area for non-food handlers
FDFWGG2001A	Bench graft vines
FDFWGG2002A	Carry out potting operations
FDFWGG2003A	Hand prune vines
FDFWGG2005A	Maintain callusing environment
FDFWGG2006A	Obtain and process rootlings
FDFWGG2008A	Train vines

FDFWGG2009A	Operate specialised canopy management equipment
FDFWGG2010A	Field graft vines
FDFWGG2015A	Support mechanical harvesting operations
FDFWGG2016A	Install and maintain vine trellis
FDFWGG2018A	Operate vineyard equipment
FDFWGG2020A	Carry out hot water treatment
FDFWGG2021A	Operate nursery cold storage facilities
FDFWGG2022A	Take and process vine cuttings
FWPCOT3259	Operate a four wheel drive on unsealed roads
MEM18001C	Use hand tools
MEM18002B	Use power tools/hand held operations
TLID1001	Shift materials safely using manual handling methods
TLID2022	Conduct weighbridge operations
TLILIC2001	Licence to operate a forklift truck

Qualification Mapping Information

This qualification is equivalent to AHC20310 Certificate II in Production Horticulture.

AHC20416 Certificate II in Horticulture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification underpins a range of work functions and job roles that can lead to a horticultural trade qualification.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 5
- Elective Units = 10

Core Units

Unit Code	Unit Title
AHCWHS201	Participate in work health and safety processes
AHCPCM201	Recognise plants
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders
AHCSOL202	Assist with soil or growing media sampling and testing

Elective Units

- Select 8 units from elective list below
 - 2 units may be selected from the elective list below or from this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in horticulture and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Unit Code	Unit Title
AHCARB201	Apply a range of treatments to trees
AHCARB303	Perform pruning operations
AHCARB312	Use standard climbing techniques to access trees
AHCMOM213	Operate and maintain chainsaws
AHCARB206	Operate and maintain stump grinding machines
AHCCHM201	Apply chemicals under supervision
AHCINF203	Maintain properties and structures
AHCINF204	Fabricate and repair metal or plastic structures
AHCIRG215	Assist with low volume irrigation operations
AHCIRG217	Assist with pressurised irrigation operations
AHCLSC201	Assist with landscape construction work
AHCLSC202	Construct low-profile timber or modular retaining walls
AHCLSC203	Install aggregate paths
AHCLSC204	Lay paving
AHCLSC205	Install tree protection devices
AHCMOM202	Operate tractors
AHCMOM203	Operate basic machinery and equipment
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM205	Operate vehicles

AHCMOM211	Operate side by side utility vehicles
AHCMOM212	Operate quad bikes
AHCNSY201	Pot up plants
AHCNSY202	Care for nursery plants
AHCNSY203	Undertake propagation activities
AHCNSY204	Maintain indoor plants
AHCPCM202	Collect, prepare and preserve plant specimens
AHCPCM203	Fell small trees* <i>*prerequisite AHCMOM213 Operate and maintain chainsaws</i>
AHCPGD201	Plant trees and shrubs
AHCPGD202	Prepare and maintain plant displays
AHCPGD203	Prune shrubs and small trees
AHCPGD204	Transplant small trees
AHCPGD205	Prepare a grave site
AHCPGD206	Conduct visual inspection of park facilities
AHCTRF201	Assist with turf construction
AHCTRF202	Prepare turf surfaces for play
AHCTRF203	Renovate grassed areas
AHCTRF204	Support turf establishment
AHCWRK204	Work effectively in the industry
AHCWRK205	Participate in workplace communications
AHCWRK206	Observe enterprise quality assurance procedures
AHCWRK207	Collect and record production data
AHCWRK208	Provide information on products and services
AHCWRK209	Participate in environmentally sustainable work practices

FWPCOT2239	Trim and cut felled trees
FWPCOT2236	Fall trees manually (basic)
FWPFGM3212	Fall trees manually (intermediate)
FWPHAR2206	Operate a mobile chipper/mulcher
FWPFGM2207	Undertake brushcutting operations
MEM18001C	Use hand tools
MEM18002B	Use power tools/hand held operations
SIRXADM001A	Apply retail office procedures
SIRXSLS002	Follow point-of-sale handling procedures
SIRXCEG001	Engage the customer
SIRXIND002	Organise and maintain the store environment
SIRXFIN002A	Perform retail finance duties
SIRRRTF001	Balance and secure point-of-sale terminal
SIRXICT001A	Operate retail technology
SIRRINV002	Control stock
SIRXMER201	Merchandise products
SIRXPDK001	Advise on products and services
SIRXSLS001	Sell to the retail customer
TLID1001	Shift materials safely using manual handling methods

AHC20516 Certificate II in Arboriculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides occupation outcomes with knowledge and skills to undertake a range of ground-based tree work activities and as a pathway for further learning required for tree workers in the arboriculture industry.

This qualification is suitable for an Australian Apprenticeship.

Occupational Licensing, legislative or certification requirements may apply to this qualification in some jurisdictions. Specific determination should be sought through the relevant State or Territory.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 20

- Core Units = 14
- Elective Units = 6

Core Units

Unit Code	Unit Title
CPCCOHS1001A	Work safely in the construction industry
AHCARB207	Perform ground based rigging* <i>AHCARB311 Tie, dress, set and finish arborist knots</i>
AHCARB208	Recognise trees

AHCARB209	Assist with aerial rescue from the ground* <i>HLTAID003 Provide first aid</i> <i>AHCARB207 Perform ground based rigging*</i> <i>AHCARB311 Tie, dress, set and finish arborist knots</i>
AHCARB210	Work effectively in the arboriculture industry
AHCARB303	Perform pruning operations* <i>FWPCOT2237 Maintain chainsaws</i> <i>AND</i> <i>FWPCOT2239 Trim and cut felled trees</i> <i>OR</i> <i>FWPCOT3238 Operate a pole saw</i>
AHCARB311	Tie, dress, set and finish arborist knots
FWPCOT2236	Fall trees manually (basic)
FWPCOT2237	Maintain chainsaws
FWPCOT2239	Trim and cut felled trees
FWPHAR2206	Operate a mobile chipper/mulcher
HLTAID003	Provide first aid
TLID1001	Shift materials safely using manual handling methods
UETTDREL14A	Working safely near live electrical apparatus as a non-electrical worker

Elective Units

- Select at least 4 units from the elective list
- An additional 2 units may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in Arboriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 2

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Unit Code	Unit Title
AHCARB201	Apply a range of treatments to trees* <i>AHCCHM201 Apply chemicals under supervision</i>
AHCARB206	Operate and maintain stump grinding machines* <i>AHCARB210 Work effectively in the arboriculture industry</i> <i>HLTAID003 Provide first aid</i>
AHCBIO201	Inspect and clean machinery for plant, animal and soil material
AHCCHM201	Apply chemicals under supervision
AHCLSC205	Install tree protection devices
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM207	Conduct front-end loader operations
AHCPGD201	Plant trees and shrubs
AHCPMG201	Treat weeds
AHCSOL202	Assist with soil or growing media sampling and testing
AHCWRK209	Participate in environmentally sustainable work practices
FWPCOT3238	Operate a pole saw
FPIFGM3212	Fall trees manually (intermediate)
FWPFGM3213	Fall trees manually (advanced)
RIIWHS205D	Control traffic with stop-slow bat
TLILIC2005	Licence to operate a boom-type elevating work platform (boom length 11 metres or more)
CPCCCM2010B	Work safely at heights
CPCCCM3001C	Operate elevated work platforms up to 11 metres
UETDRRF03B	Perform EWP rescue
UETDRRF08B	Perform EWP controlled descent escape
HLTAID001	Provide cardiopulmonary resuscitation

AHC20616 Certificate II in Parks and Gardens

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides an occupational outcome in parks and gardens. The parks and gardens industry expects this qualification to be achieved to meet job outcomes at this level.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 9
- Elective Units = 6

Core Units

Unit Code	Unit Title
AHCCHM201	Apply chemicals under supervision
AHCIRG217	Assist with pressurised irrigation operations
AHCMOM203	Operate basic machinery and equipment
AHCPGD201	Plant trees and shrubs
AHCPMG201	Treat weeds
AHCPCM201	Recognise plants

AHCSOL202	Assist with soil or growing media sampling and testing
AHCTRF204	Support turf establishment
AHCWHS201	Participate in work health and safety processes

Elective Units

- Select 3 units from elective list below
- 3 units may be selected from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in parks and gardens and must be chosen to ensure the integrity of the qualification outcome at AQF level 2

Unit Code	Unit Title
AHCARB201	Apply a range of treatments to trees
AHCIRG215	Assist with low volume irrigation operations
AHCLSC201	Assist with landscape construction work
AHCMOM204	Undertake operational maintenance of machinery
AHCMOM211	Operate side by side utility vehicles
AHCNSY203	Undertake propagation activities
AHCPGD202	Prepare and maintain plant displays
AHCPGD203	Prune shrubs and small trees
AHCPGD205	Prepare a grave site
AHCPGD206	Conduct visual inspection of park facilities
AHCPMG202	Treat plant pests, diseases and disorders
AHCTRF202	Prepare turf surfaces for play
AHCTRF203	Renovate grassed areas
AHCWRK207	Collect and record production data

Qualification Mapping Information

This qualification is equivalent to AHC20610 Certificate II in Parks and Gardens.

AHC20716 Certificate II in Production Nursery

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides an occupational outcome in production nursery industry. The nursery industry expects this qualification to be achieved to meet job outcomes at this level.

Job roles and titles covered by this qualification may include:

- production nursery assistant

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 16

- Core Units = 9
- Elective Units = 7

Core Units

Unit Code	Unit Title
AHCCHM201	Apply chemicals under supervision
AHCIRG217	Assist with pressurised irrigation operations
AHCNSY201	Pot up plants
AHCNSY202	Care for nursery plants

AHCNSY203	Undertake propagation activities
AHCPCM201	Recognise plants
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders
AHCWHS201	Participate in work health and safety processes

Elective Units

- Select 5 units from list below
- 2 units may be selected from units listed in Certificates II or III of this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in nursery production and must be chosen to ensure the integrity of the qualification outcome at AQF level 2

Unit Code	Unit Title
AHCBIO201	Inspect and clean machinery for plant, animal and soil material
AHCBIO202	Follow site quarantine procedures
AHCDRG201	Maintain drainage systems
AHCINF203	Maintain properties and structures
AHCMOM202	Operate tractors
AHCMOM203	Operate basic machinery and equipment
AHCMOM211	Operate side by side utility vehicles
AHCNSY204	Maintain indoor plants
AHCPGD203	Prune shrubs and small trees
AHCSOL202	Assist with soil or growing media sampling and testing
AHCWRK204	Work effectively in the industry
AHCWRK209	Participate in environmentally sustainable work practices
HLTAID002	Provide basic emergency life support

Qualification Mapping Information

This qualification is equivalent to AHC20710 Certificate II in Production Nursery.

AHC21116 Certificate II in Irrigation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification describes the job roles of supervised entry-level workers in the irrigation industry. It covers the employment areas of irrigation installation and irrigation operations and is suitable for VET in schools programs.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication. However, an individual Unit of Competency may specify relevant licensing, legislative or regulatory requirements. Specific determination should be sought through the relevant State or Territory.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 16

- Core Units = 1
- Elective Units = 15

Core Units

Unit Code	Unit Title
AHCWHS201	Participate in work health and safety processes

Elective Units

- Select 6 units from Group A

- Select 7 units from Group A or B
- 2 units may be selected from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in irrigation and must be chosen to ensure the integrity of the qualification outcome at AQF level 2

Group A

Unit Code	Unit Title
AHCIRG215	Assist with low volume irrigation operations
AHCIRG216	Assist with surface irrigation operations
AHCIRG217	Assist with pressurised irrigation operations
AHCIRG218	Assist with pump and flow control device operations
AHCSOL202	Assist with soil or growing media sampling and testing
NWP210B	Perform basic water quality tests
NWPIRR002	Operate basic flow control and regulating devices in irrigation systems
NWPIRR012	Construct open earthen channels or drains
AHCWRK209	Participate in environmentally sustainable work practices

Group B

Unit Code	Unit Title
AHCDRG201	Maintain drainage systems
AHCMOM203	Operate basic machinery and equipment
AHCWRK204	Work effectively in the industry
AHCWRK205	Participate in workplace communications
AHCWRK208	Provide information on products and services
CPCPCM2047A	Carry out levelling
CPCPCM2043A	Carry out OHS requirements
CPCPCM2040A	Read plans and calculate plumbing quantities

NWP203B	Plan and organise personal work activities
NWP209B	Use maps, plans, drawings and specifications
NWP215B	Install and replace basic volumetric metering equipment
NWPNET002	Prepare and restore work site
NWPIRR013	Construct and install irrigation delivery and stormwater drainage assets
TLID1001	Shift materials safely using manual handling methods

Qualification Mapping Information

This qualification is equivalent to AHC21112 Certificate II in Irrigation.

AHC21216 Certificate II in Rural Operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides an occupational outcome for industries and agencies in rural and regional Australia.

Depending on the units selected individuals can be employed not only in rural industries but also other rural and regional sectors, such as local government, tourism, hospitality, transport, construction, community services, information technology and metals.

Industry expects individuals with this qualification to carry out routine tasks under general supervision and exercise limited autonomy with some accountability for their own work.

This qualification is suitable for an Australian Apprenticeship.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 3
- Elective Units = 12

Core Units

Work

Unit Code	Unit Title
AHCWRK204	Work effectively in the industry

AHCWRK209	Participate in environmentally sustainable work practices
-----------	---

Work health and safety

Unit Code	Unit Title
AHCWHS201	Participate in work health and safety processes

Elective Units

- Select at least 7 units from Certificate II in this Training Package
- 5 units aligned to AQF levels 1, 2, or 3 may be selected from up to 3 other endorsed Training Packages or Accredited Courses
Selected units must be relevant to job outcomes in AgriFood industries and must be chosen to ensure the integrity of the qualification outcome at AQF level 2

Qualification Mapping Information

This qualification is not equivalent to AHC21210 Certificate II in Rural Operations.

AHC21716 Certificate II in Permaculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides an occupational outcome in permaculture. Work would be carried out under general guidance and supervision.

The qualification is suited to VET in Schools, labour market and environmental skills programs. It provides a range of technical skills and knowledge in supporting food growing programs and community programs and is suited to learners with an interest in permaculture as a practical solution for sustainable living.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 6
- Elective Units = 9

Core Units

Unit Code	Unit Title
AHCPER201	Work effectively in permaculture
AHCPER203	Record information about the local bioregion
AHCPER206	Plant and maintain permaculture crops

AHCPER209	Recognise characteristics of plants and animals in a permaculture system
AHCPER212	Use and maintain garden hand tools and equipment
HLTWHS001	Participate in workplace health and safety

Elective Units

- Select 5 units from Group A
 - Select 4 units from Group A or B
 - 1 unit may be selected from Group B or this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in Permaculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 2

Group A

Unit Code	Unit Title
AHCPER202	Harvest, treat and store seed
AHCPER204	Check and operate permaculture water systems
AHCPER205	Prepare and store permaculture products
AHCPER207	Care for animals in a permaculture system
AHCPER208	Harvest permaculture crops
AHCPER210	Operate within community projects
AHCPER211	Recognise threats and create opportunities in a permaculture system
AHCPER213	Assist with basic earth shaping for nutrient capture and storage
AHCPER214	Propagate plants for a permaculture garden system
AHCPER215	Assist with garden soil health and plant nutrition

Group B

Unit Code	Unit Title
AHCILM203	Record information about country

AHCINF203	Maintain properties and structures
AHCMOM203	Operate basic machinery and equipment
AHCNAR201	Carry out natural area restoration works
AHCWRK201	Observe and report on weather
AHCWRK203	Operate in isolated and remote situations
AHCWRK209	Participate in environmentally sustainable work practices

Qualification Mapping Information

No equivalent qualification.

AHC30116 Certificate III in Agriculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides a general vocational outcome in agriculture. The qualification enables individuals to select a livestock production, cropping or livestock context as a job focus or, in the case of mixed farming enterprises, both cropping and livestock.

Industry expects individuals with this qualification to perform tasks involving a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures.

Job roles vary across different industry sectors and may include:

- Farm or station hand
- Farm or station worker
- Livestock transport driver

The testamur issued for this qualification is to be titled AHC30116 Certificate III in Agriculture.

An additional descriptor in brackets after the qualification title e.g. AHC30116 Certificate III in Agriculture (Livestock Transport) may be added by a Registered Training Organisation (RTO).

Any additional descriptor should reflect a minimum selection of at least ten sector specific elective units from Group A unit group.

This qualification is suitable for an Australian Apprenticeship.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 16

- Core Units = 2

- Elective Units = 14

Core Units

Work

Unit Code	Unit Title
AHCWRK309	Apply environmentally sustainable work practices

Work health and safety

Unit Code	Unit Title
AHCWHS301	Contribute to work health and safety processes

Elective Units

- Select 5 units from Group A
- Select 5 units from Group A or Group B
- 4 units aligned to AQF levels 2, 3, or 4 may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in agriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

To achieve the Livestock Transport specialisation, the following units must be selected:

- Select at least 5 units from Group A Livestock sector and at least 5 units from Group A Livestock transport sector.
- Up to 4 units aligned to AQF levels 2, 3, or 4 may be selected from the elective Group A and/or Group B, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in agriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Group A

Agribusiness

Unit Code	Unit Title
AHCAGB301	Keep production records for a primary production business

Biosecurity

Unit Code	Unit Title
AHCBER301	Work effectively in an emergency disease or plant pest response
AHCBER303	Carry out emergency disease or plant pest control procedures at infected premises
AHCBER304	Carry out movement and security procedures
AHCBIO302	Identify and report unusual disease or plant pest signs
AHCBIO305	Apply biosecurity measures

Broadacre cropping

Unit Code	Unit Title
AHCBAC301	Conserve forage
AHCBAC302	Establish pastures and crops for livestock production
AHCBAC303	Prepare to receive grains and seeds
AHCBAC304	Test grains and seeds on receipt
AHCBAC305	Undertake preparation of land for agricultural crop production
AHCBAC306	Establish agricultural crops
AHCBAC307	Maintain agricultural crops
AHCBAC308	Undertake agricultural crop harvesting activities
AHCBAC310	Maintain pastures and crops for livestock production

Business

Unit Code	Unit Title
-----------	------------

AHCBUS301	Use hand held e-business tools
BSBFIA301	Maintain financial records
BSBINM201	Process and maintain workplace information
BSBITU203	Communicate electronically
BSBITU306	Design and produce business documents
BSBWOR204	Use business technology

Chemicals

Unit Code	Unit Title
AHCCHM301	Use application equipment to apply fumigant to confined spaces* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCCHM302	Fumigate soil* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals
AHCCHM305	Conduct manual fumigation of vertebrate and invertebrate pests* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>

First aid

Unit Code	Unit Title
HLTAID003	Provide first aid
HLTAID005	Provide first aid in remote situations

Infrastructure

Unit Code	Unit Title
AHCINF301	Implement property improvement, construction and repair
AHCINF302	Plan and construct an electric fence
AHCINF303	Plan and construct conventional fencing

Irrigation

Unit Code	Unit Title
AHCIRG334	Operate and maintain gravity fed irrigation systems
AHCIRG332	Operate pressurised irrigation systems
AHCIRG306	Troubleshoot irrigation systems

Livestock

Unit Code	Unit Title
AHCLSK301	Administer medication to livestock
AHCLSK305	Maintain livestock water supplies
AHCLSK308	Identify and draft livestock
AHCLSK309	Implement animal health control programs
AHCLSK311	Implement feeding plans for livestock
AHCLSK314	Prepare animals for parturition
AHCLSK318	Rear newborn and young livestock
AHCLSK320	Coordinate and monitor livestock transport
AHCLSK323	Maintain and monitor feed stocks
AHCLSK324	Care for and train working dogs
AHCLSK325	Castrate livestock
AHCLSK331	Comply with industry animal welfare requirements

Livestock Transport

Unit Code	Unit Title
TLID3014	Load and unload vehicle carrying special loads
TLID3020	Care for livestock in transit
TLIE2008	Process workplace documentation
TLIE3002	Estimate/calculate mass, area and quantify dimensions
TLIE3004	Prepare workplace documents
TLIF2010	Apply fatigue management strategies
TLIH2001	Interpret road maps and navigate pre-determined routes
TLIH3002	Plan and navigate routes

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM301	Coordinate machinery and equipment maintenance and repair
AHCMOM302	Perform machinery maintenance
AHCMOM304	Operate machinery and equipment
AHCMOM305	Operate specialised machinery and equipment
AHCMOM306	Ground spread fertiliser and soil ameliorant
AHCMOM308	Operate broadacre and row crop harvest machinery and equipment
AHCMOM309	Operate broadacre sowing machinery and equipment
AHCMOM312	Operate row crop planting and seeding machinery and equipment

Merchandising and sales

Unit Code	Unit Title
AHCMER301	Process customer complaints

Pest management

Unit Code	Unit Title
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders

Work

Unit Code	Unit Title
AHCWRK204	Work effectively in the industry
AHCWRK301	Collect samples for a rural production or horticulture monitoring program
AHCWRK302	Monitor weather conditions
AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
AHCWRK306	Comply with industry quality assurance requirements
AHCWRK308	Handle bulk materials in storage area
AHCWRK311	Conduct site inspections

Group B**Animal care and management**

Unit Code	Unit Title
ACMGAS301A	Maintain and monitor animal health and wellbeing
ACMGAS303A	Plan for and provide nutritional requirements for animals

Artificial insemination

Unit Code	Unit Title
AHCAIS301	Collect semen

AHCAIS302	Process and store semen
AHCAIS303	Artificially inseminate livestock

Drainage

Unit Code	Unit Title
AHCDRG301	Install drainage systems

Fire

Unit Code	Unit Title
CPPFES2005A	Demonstrate first attack firefighting equipment
PUAFIR204B	Respond to wildfire* <i>PUAFIR215 Prevent injury</i>
PUATEA001B	Work in a team

Hydroponics

Unit Code	Unit Title
AHCHYD301	Implement a maintenance program for hydroponic systems
AHCHYD302	Install hydroponic systems

Livestock

Unit Code	Unit Title
AHCLSK302	Mate and monitor reproduction of alpacas
AHCLSK303	Carry out feedlot operations
AHCLSK304	Carry out post-mortem examination of livestock
AHCLSK306	Coordinate and monitor production performance
AHCLSK307	Euthanase livestock

AHCLSK310	Implement feeding plans for intensive production
AHCLSK312	Coordinate artificial insemination and fertility management of livestock
AHCLSK313	Monitor livestock production growing environments
AHCLSK315	Prepare for and implement natural mating of livestock
AHCLSK316	Prepare livestock for competition
AHCLSK317	Plan to exhibit livestock
AHCLSK319	Slaughter livestock
AHCLSK320	Coordinate and monitor livestock transport
AHCLSK321	Service and repair bores and windmills
AHCLSK322	Transport farm produce or bulk materials
AHCLSK326	Mix and mill standard stockfeed
AHCLSK327	Collect, store and administer colostrum
AHCLSK328	Remove and facilitate reuse of effluent and manure from an intensive production system
AHCLSK329	Implement procedures for calving
AHCLSK332	Monitor animals in intensive production systems
AHCLSK333	Monitor pen condition and ration suitability
AHCLSK334	Plan, prepare and conduct mulesing procedures
AHCLSK335	Conduct dropped ovary technique procedures for spaying cattle

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM202	Operate tractors
AHCMOM206	Conduct grader operations
AHCMOM207	Conduct front-end loader operations

AHCMOM211	Operate side by side utility vehicles
AHCMOM212	Operate quad bikes
AHCMOM307	Operate a cane harvester
AHCMOM310	Operate land-forming machinery and equipment
AHCMOM311	Operate precision control technology
AHCMOM313	Operate mobile irrigation machinery and equipment
AHCMOM314	Transport machinery
AHCMOM315	Operate chemical application machinery and equipment
RIIMPO318E	Conduct civil construction skid steer loader operations
RIIMPO319D	Conduct backhoe/loader operations
RIIMPO324E	Conduct civil construction grader operations
TLILIC2001	Licence to operate a forklift truck

Plants

Unit Code	Unit Title
AHCPCM301	Implement a plant nutrition program
AHCPCM302	Provide information on plants and their culture
AHCPCM303	Identify plant specimens
AHCPGD402	Plan a plant establishment program

Production horticulture

Unit Code	Unit Title
AHCPHT303	Implement a post-harvest program
AHCPHT304	Harvest horticultural crops mechanically
AHCPHT305	Regulate crops
AHCPHT306	Establish horticultural crops

AHCPHT310	Coordinate horticultural crop harvesting
-----------	--

Resources and Infrastructure

Unit Code	Unit Title
RIIWHS202D	Enter and work in confined spaces
RIIWHS204D	Work safely at heights

Shearing

Unit Code	Unit Title
AHCSHG301	Prepare livestock for shearing
AHCSHG302	Prepare combs and cutters for machine shearing
AHCSHG306	Carry out post-shearing procedures
AHCSHG307	Plan and prepare for alpaca shearing

Soils and media

Unit Code	Unit Title
AHCSOL401	Sample soils and interpret results

Tools and equipment

Unit Code	Unit Title
AHCINF304	Install and terminate extra low voltage wiring systems
MEM05004C	Perform routine oxy acetylene welding
MEM05007C	Perform manual heating and thermal cutting
MEM05012C	Perform routine manual metal arc welding
MEM05015D	Weld using manual metal arc welding process* <i>MEM05012 Perform routine manual metal arc welding</i>

	<p><i>MEM05051 Select welding processes</i></p> <p><i>MEM05052 Apply safe welding practices</i></p> <p><i>MEM12023 Perform engineering measurements</i></p> <p><i>MEM18001 Use hand tools</i></p> <p><i>MEM18002 Use power tools/hand held operations</i></p>
MEM05017D	<p>Weld using gas metal arc welding process*</p> <p><i>MEM05050 Perform routine gas metal arc welding</i></p> <p><i>MEM05051 Select welding processes</i></p> <p><i>MEM05052 Apply safe welding practices</i></p> <p><i>MEM12023 Perform engineering measurements</i></p> <p><i>MEM18001 Use hand tools</i></p> <p><i>MEM18002 Use power tools/hand held operations</i></p>
MEM05019D	<p>Weld using gas tungsten arc welding process*</p> <p><i>MEM05049 Perform routine gas tungsten arc welding</i></p> <p><i>MEM05051 Select welding processes</i></p> <p><i>MEM05052 Apply safe welding practices</i></p> <p><i>MEM12023 Perform engineering measurements</i></p> <p><i>MEM18001 Use hand tools</i></p> <p><i>MEM18002 Use power tools/hand held operations</i></p>
MEM05049B	Perform routine gas tungsten arc welding
MEM05050B	Perform routine gas metal arc welding

Pest Management

Unit Code	Unit Title
AHCPMG308	Implement pest management strategies

Wool

Unit Code	Unit Title
AHCWOL304	Prepare fleece wool for classing
AHCWOL308	Prepare facilities for shearing and crutching

AHCWOL310	Press wool for a clip
AHCWOL311	Perform shed duties
AHCWOL312	Class goat fibre
AHCWOL313	Class alpaca fleece

Qualification Mapping Information

This qualification is not equivalent to AHC30110 Certificate III in Agriculture.

AHC30216 Certificate III in Agriculture (Dairy Production)

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides an occupational outcome in the dairy industry. The dairy industry expects that graduates from this qualification will be able to perform a range of tasks associated with a person performing the job role of a dairy farmhand.

This qualification is suitable for an Australian Apprenticeship.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 17

- Core Units = 11
- Elective Units = 6

Core Units

Broadacre cropping

AHCBAC302	Establish pastures and crops for livestock production
-----------	---

Chemicals

AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals

Dairy

AHCDRY301	Coordinate milking operations
-----------	-------------------------------

Infrastructure

AHCINF302	Plan and construct an electric fence
-----------	--------------------------------------

Livestock

AHCLSK309	Implement animal health control programs
AHCLSK311	Implement feeding plans for livestock
AHCLSK318	Rear newborn and young livestock
AHCLSK329	Implement procedures for calving

Work

AHCWRK303	Respond to emergencies
-----------	------------------------

Work health and safety

AHCWHS301	Contribute to work health and safety processes
-----------	--

Elective Units

- Select at least 3 units from the elective list
- 3 units aligned to AQF levels 2, 3, or 4 may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in dairying and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Artificial insemination

Unit Code	Unit Title
AHCAIS303	Artificially inseminate livestock

Broadacre cropping

Unit Code	Unit Title
AHCBAC301	Conserve forage
AHCBAC305	Undertake preparation of land for agricultural crop production
AHCBAC306	Establish agricultural crops
AHCBAC307	Maintain agricultural crops
AHCBAC308	Undertake agricultural crop harvesting activities
AHCBAC310	Maintain pastures and crops for livestock production

Dairy

Unit Code	Unit Title
AHCDRY302	Operate a dairy recycling system
Infrastructure	
AHCINF301	Implement property improvement, construction and repair
AHCINF303	Plan and construct conventional fencing

Livestock

Unit Code	Unit Title
AHCLSK301	Administer medication to livestock
AHCLSK305	Maintain livestock water supplies
AHCLSK308	Identify and draft livestock
AHCLSK312	Coordinate artificial insemination and fertility management of livestock
AHCLSK315	Prepare for and implement natural mating of livestock
AHCLSK320	Coordinate and monitor livestock transport
AHCLSK321	Service and repair bores and windmills

AHCLSK322	Transport farm produce or bulk materials
AHCLSK323	Maintain and monitor feed stocks
AHCLSK325	Castrate livestock
AHCLSK326	Mix and mill standard stockfeed
AHCLSK327	Collect, store and administer colostrum
AHCLSK328	Remove and facilitate reuse of effluent and manure from an intensive production system
AHCLSK331	Comply with industry animal welfare requirements

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM305	Operate specialised machinery and equipment

Plants

Unit Code	Unit Title
AHCPCM301	Implement a plant nutrition program

Work

Unit Code	Unit Title
AHCWRK301	Collect samples for a rural production or horticulture monitoring program
AHCWRK302	Monitor weather conditions
AHCWRK305	Coordinate work site activities
AHCWRK306	Comply with industry quality assurance requirements
AHCWRK309	Apply environmentally sustainable work practices
AHCWRK310	Provide on-job training support

Qualification Mapping Information

This qualification is equivalent to AHC30210 Certificate III in Agriculture (Dairy Production).

AHC30616 Certificate III in Production Horticulture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides a vocational outcome in production horticulture. The qualification enables individuals to select a tree cropping, vegetable or berry production, grape growing or mushroom production context as a job focus, or a mixture in the case of mixed enterprises.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 1
- Elective Units = 14

Core Units

Unit Code	Unit Title
AHCWHS301	Contribute to work health and safety processes

Elective Units

- Select 4 units from Group A
- Select 7 units from Group A or B

- 3 units may be selected from Group B or from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in production horticulture and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Group A

Unit Code	Unit Title
AHCBIO302	Identify and report unusual disease or plant pest signs
AHCBIO305	Apply biosecurity measures
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport, handle and store chemicals
AHCIRG332	Operate pressurised irrigation systems
AHCMOM304	Operate machinery and equipment
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCPHT303	Implement a post-harvest program
AHCPHT304	Harvest horticultural crops mechanically
AHCPHT306	Establish horticultural crops
AHCPHT310	Coordinate horticultural crop harvesting
AHCWRK309	Apply environmentally sustainable work practices

Group B

Unit Code	Unit Title
AHCBER301	Work effectively in an emergency disease or plant pest response
AHCBER303	Carry out emergency disease or plant pest control procedures at infected premises
AHCBER304	Carry out movement and security procedures
AHCCHM301	Conduct fumigation in enclosed spaces*

	<i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCCHM302	Fumigate soil using chemicals* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCDRG301	Install drainage systems
AHCDRG302	Measure drainage system performance
AHCDRG303	Troubleshoot drainage systems
AHCHYD301	Implement a maintenance program for hydroponic systems
AHCHYD302	Install hydroponic systems
AHCIRG333	Maintain pressurised irrigation systems
AHCIRG331	Install pressurised irrigation systems
AHCIRG303	Measure irrigation delivery system performance
AHCIRG306	Troubleshoot irrigation systems
AHCMOM301	Coordinate machinery and equipment maintenance and repair
AHCMOM302	Perform machinery maintenance
AHCMOM305	Operate specialised machinery and equipment
AHCMOM315	Operate chemical application machinery and equipment
FDFWGG3008A	Operate a mechanical harvester
FDFWGG3013A	Operate spreading and seeding equipment
FDFWGG3004A	Coordinate nursery activities
FDFWGG3005A	Perform field nursery activities
FDFWGG3009A	Monitor and maintain nursery plants
FDFWGG3011A	Perform shed nursery activities
AHCPMG310	Prepare, monitor and maintain biological agents
AHCPHT305	Regulate crops

AHCPHT307	Prepare raw materials and compost the feedstocks
AHCPHT308	Prepare value added compost-based products
AHCPHT309	Supervise mushroom substrate preparation
FDFWGG3002A	Coordinate canopy management activities
FDFWGG3006A	Coordinate hand pruning activities
AHCWRK302	Monitor weather conditions
AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
AHCWRK306	Comply with industry quality assurance requirements
AHCWRK308	Handle bulk materials in storage area

Qualification Mapping Information

This qualification is equivalent to AHC30610 Certificate III in Production Horticulture.

AHC30716 Certificate III in Horticulture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides a general vocational outcome in amenity horticulture. It is NOT a suitable pathway for horticultural trades.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 16

- Core Units = 5
- Elective Units = 11

Core Units

Unit Code	Unit Title
AHCWHS301	Contribute to work health and safety processes
AHCPCM302	Provide information on plants and their culture
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCSOL303	Implement soil improvements for garden and turf areas

Elective Units

- Select 8 units from elective list below
- 3 units aligned to AQF levels 2, 3 or 4 may be selected from electives below or from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in horticulture and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Unit Code	Unit Title
AHCARB301	Implement a tree maintenance program
AHCPCM304	Report on health and condition of trees
AHCARB303	Perform pruning operations
AHCARB305	Dismantle trees
AHCARB306	Undertake aerial rescue
AHCARB307	Use advanced climbing techniques* <i>AHCARB312 Use standard climbing techniques to access trees**</i> <i>AHCARB311 Tie, dress, set and finish arborist knots</i> <i>HLTAID003 Provide first aid</i>
AHCARB308	Install cable and bracing
AHCARB309	Implement a tree protection program
AHCBER301	Work effectively in an emergency disease or plant pest response
AHCBIO302	Identify and report unusual disease or plant pest signs
AHCBER303	Carry out emergency disease or plant pest control procedures at infected premises
AHCBER304	Carry out movement and security procedures
AHCBIO305	Monitor and review biosecurity measures
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport, handle and store chemicals
AHCIRG303	Measure irrigation delivery system performance

AHCIRG306	Troubleshoot irrigation systems
AHCIRG331	Install pressurised irrigation systems
AHCIRG332	Operate pressurised irrigation systems
AHCIRG333	Maintain pressurised irrigation systems
AHCLSC301	Set out site for construction works
AHCLSC302	Construct landscape features using concrete
AHCLSC303	Construct brick and or block structures and features
AHCLSC304	Erect timber structures and features
AHCLSC305	Construct stone structures and features
AHCLSC306	Implement a paving project
AHCLSC307	Implement a retaining wall project
AHCLSC308	Install metal structures and features
AHCLSC309	Install water features
AHCLSC310	Implement a tree transplanting program
AHCMOM304	Operate machinery and equipment
AHCNSY301	Maintain nursery plants
AHCNSY302	Receive and dispatch nursery products
AHCNSY303	Install and maintain plant displays
AHCNSY304	Deliver and promote sales of plants
AHCNSY305	Prepare specialised plants
AHCNSY306	Implement a propagation plan
AHCNSY307	Operate fertigation equipment
AHCPCM301	Implement a plant nutrition program
AHCPCM303	Identify plant specimens
AHCPGD301	Implement a plant establishment program

AHCPGD302	Plan and maintain plant displays
AHCPGD303	Perform specialist amenity pruning
AHCPGD304	Implement a landscape maintenance program
AHCPGD305	Conduct operational inspection of park facilities
AHCPGD306	Implement a maintenance program for an aquatic environment
AHCSOL301	Prepare growing media
AHCTRF301	Construct turf playing surfaces
AHCTRF302	Establish turf
AHCTRF303	Implement a grassed area maintenance program
AHCTRF304	Monitor turf health
AHCTRF305	Renovate sports turf
AHCWAT301	Monitor and operate water treatment processes
AHCWRK305	Coordinate work site activities
AHCWRK311	Conduct site inspection
AHCWRK309	Apply environmentally sustainable work practices
FWPCOT3238	Operate a pole saw
FWPFGM3213	Fall trees manually (advanced)
RIIWHS302D	Implement traffic management plan

Qualification Mapping Information

This qualification is equivalent to AHC30710 Certificate III in Horticulture.

AHC30816 Certificate III in Arboriculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides occupation outcomes with a range of specialised knowledge and skills to undertake skilled work and as a pathway for further learning required for arborists in the arboriculture industry.

Possible job titles relevant to this qualification include the general title Arborist, and the specialisation titles:

- Climbing Arborist
- EWP Arborist
- Ground-based Arborist

The qualification covers both ground-based workers and those working at heights. This qualification does not require a person to work at heights, however, units that include the skills and knowledge required to work at heights, both from an elevated work platform (EWP) and by climbing trees, are included as elective streams.

The testamur issued for this qualification is to be titled AHC30815 Certificate III in Arboriculture.

An additional descriptor should be added by the RTO to reflect unit selection for a specialisation, for example:

- AHC30815 Certificate III in Arboriculture (Climbing)
- AHC30815 Certificate III in Arboriculture (EWP)
- AHC30815 Certificate III in Arboriculture (Climbing and EWP)

This qualification is suitable for an Australian Apprenticeship.

Occupational Licensing, legislative or certification requirements may apply to this qualification in some jurisdictions. Specific determination should be sought through the relevant State or Territory.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 23

- Core Units = 14
- Elective Units = 9

Core Units

Unit Code	Unit Title
CPCCOHS1001A	Work safely in the construction industry
AHCARB302	Inspect trees for access and work* <i>AHCARB313 Identify trees</i>
AHCARB303	Perform pruning operations* <i>FPICOT2237A Maintain chainsaws</i> <i>AND</i> <i>FPICOT2239A Trim and cut felled trees</i> <i>OR</i> <i>FPICOT3238B Operate a pole saw</i>
AHCARB311	Tie, dress, set and finish arborist knots
AHCARB313	Identify trees
AHCWRK305	Coordinate work site activities
FWPCOT2237	Maintain chainsaws
FWPCOT2239	Trim and cut felled trees
FWPFGM3212	Fall trees manually (intermediate)
FWPCOT3238	Operate a pole saw
HLTAID003	Provide first aid
BSBWOR204	Use business technology
TLID1001	Shift materials safely using manual handling methods
UETTDREL14A	Working safely near live electrical apparatus as a non-electrical worker

Elective Units

Climbing Specialisation

In order to achieve the Climbing specialisation, select all 5 units from Group A.

- Select at least 1 unit from Group D
- An additional 3 units may be selected from Group D, from this or any other endorsed Training Package or Accredited Course
Selected elective units must be relevant to job outcomes in Arboriculture and must be chosen to ensure the integrity of the qualification at AQF level 3

Group A – Climbing

Unit Code	Unit Title
AHCARB305	Dismantle trees* <i>AHCARB310 Perform aerial rigging**</i> <i>AHCARB207 Perform ground based rigging***</i> <i>AHCARB311 Tie, dress, set and finish arborist knots</i> AND <i>AHCARB307 Use advanced climbing techniques**</i> <i>AHCARB312 Use standard climbing techniques to access trees***</i> <i>AHCARB311 Tie, dress, set and finish arborist knots</i> OR <i>TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)</i> <i>FWPFGM3212 Fall trees manually (intermediate)</i>
AHCARB306	Undertake aerial rescue* <i>HLTAID003 Provide first aid</i> <i>AHCARB310 Perform aerial rigging**</i> <i>AHCARB207 Perform ground based rigging***</i> <i>AHCARB311 Tie, dress, set and finish arborist knots</i> AND <i>AHCARB307 Use advanced climbing techniques**</i> <i>AHCARB312 Use standard climbing techniques to access trees***</i>

	<p><i>AHCARB311 Tie, dress, set and finish arborist knots</i></p> <p><i>OR</i></p> <p><i>TLILIC2005 Licence to operate a boom-type elevating work platform (boom length 11 metres or more)</i></p>
AHCARB307	<p>Use advanced climbing techniques*</p> <p><i>AHCARB312 Use standard climbing techniques to access trees**</i></p> <p><i>AHCARB311 Tie, dress, set and finish arborist knots</i></p>

AHCARB310	<p>Perform aerial rigging*</p> <p><i>AHCARB310 Perform aerial rigging**</i></p> <p><i>AHCARB207 Perform ground based rigging***</i></p> <p><i>AHCARB311 Tie, dress, set and finish arborist knots</i></p> <p>AND</p> <p><i>AHCARB307 Use advanced climbing techniques**</i></p> <p><i>Use standard climbing techniques to access trees***</i></p> <p><i>AHCARB311 Tie, dress, set and finish arborist knots</i></p> <p>OR</p>

	<i>TLILIC2005A Licence to operate a boom-type elevating work platform (boom length 11 metres or more)</i>
--	---

Climbing and EWP Specialisation

- In order to achieve the Climbing and EWP specialisation, select all 6 units from Group C
- an additional 3 units may be selected from Group D, from this Training Package or from any other endorsed Training Package or Accredited Course
Selected elective units must be relevant to job outcomes in Arboriculture and must be chosen to ensure the integrity of the qualification at AQF level 3

Group C – Climbing and EWP

Unit Code	Unit Title
TLILIC2005	Licence to operate a boom-type elevating work platform (boom length 11 metres or more)
AHCARB305	Dismantle trees* <i>AHCARB310 Perform aerial rigging**</i> <i>AHCARB207 Perform ground based rigging***</i> <i>AHCARB311 Tie, dress, set and finish arborist knots</i> AND <i>AHCARB307 Use advanced climbing techniques**</i> <i>Use standard climbing techniques to access trees***</i> <i>AHCARB311 Tie, dress, set and finish arborist knots</i> OR <i>TLILIC2005A Licence to operate a boom-type elevating work platform (boom length 11 metres or more)</i> <i>FPIFGM3212 Fall trees manually (intermediate)</i>
AHCARB306	Undertake aerial rescue* <i>HLTAID003 Provide first aid</i> <i>AHCARB310 Perform aerial rigging**</i> <i>AHCARB207 Perform ground based rigging***</i> <i>AHCARB311 Tie, dress, set and finish arborist knots</i> AND <i>AHCARB307 Use advanced climbing techniques***</i>

	<p><i>AHCARB312 Use standard climbing techniques to access trees****</i></p> <p><i>AHCARB311 Tie, dress, set and finish arborist knots</i></p> <p><i>OR</i></p> <p><i>TLILIC2005A Licence to operate a boom-type elevating work platform (boom length 11 metres or more)</i></p>
AHCARB307	<p>Use advanced climbing techniques*</p> <p><i>AHCARB312 Use standard climbing techniques to access trees**</i></p> <p><i>AHCARB311 Tie, dress, set and finish arborist knots</i></p>
AHCARB310	<p>Perform aerial rigging*</p> <p><i>AHCARB207 Perform ground based rigging**</i></p> <p><i>AHCARB311 Tie, dress, set and finish arborist knots</i></p> <p><i>AND</i></p> <p><i>AHCARB307 Use advanced climbing techniques**</i></p> <p><i>Use standard climbing techniques to access trees****</i></p> <p><i>AHCARB311 Tie, dress, set and finish arborist knots</i></p> <p><i>OR</i></p> <p><i>TLILIC2005A Licence to operate a boom-type elevating work platform (boom length 11 metres or more)</i></p>
AHCARB312	<p>Use standard climbing techniques to access trees*</p> <p><i>AHCARB311 Tie, dress, set and finish arborist knots</i></p>

For a ground-based outcome without a working-at-height specialisation:

- select 6 units from Group D
 - an additional 3 units may be selected from this Training Package or from any other endorsed Training Package or Accredited Course
- Selected elective units must be relevant to job outcomes in Arboriculture and must be chosen to ensure the integrity of the qualification at AQF level 3

Group D

Unit Code	Unit Title
AHCARB206	<p>Operate and maintain stump grinding machines*</p> <p><i>AHCARB210 Work effectively in the arboriculture industry</i></p> <p><i>HLTAID003 Provide first aid</i></p>

AHCARB301	Implement a tree maintenance program* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport, handle and store chemicals</i>
AHCARB308	Install cable and bracing
AHCARB309	Implement a tree protection program
AHCLSC310	Implement a tree transplanting program
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals
AHCNAR306	Conduct photography for fieldwork
AHCPMG301	Control weeds
FWPFGM3213	Fall trees manually (advanced)
FWPCOT2236	Fall trees manually (basic)
FWPHAR2206	Operate a mobile chipper/mulcher
RIIWHS205D	Control traffic with stop-slow bat
CPCCDO3011A	Perform dogging
CPCCCM2010B	Work safely at heights
UETTDRRF03B	Perform EWP rescue
UETTDRRF08B	Perform EWP controlled descent escape
HLTAID001	Provide cardiopulmonary resuscitation

Qualification Mapping Information

This qualification is not equivalent to AHC30810 Certificate III in Arboriculture.

AHC30916 Certificate III in Landscape Construction

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides a general vocational outcome in landscape construction. The landscaping industry expects this qualification to be achieved to meet job outcomes at this level.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 11
- Elective Units = 4

Core Units

Unit Code	Unit Title
AHCDRG301	Install drainage systems
AHCLSC301	Set out site for construction works
AHCLSC302	Construct landscape features using concrete
AHCLSC303	Construct brick and/or block structures and features
AHCLSC305	Construct stone structures and features

AHCLSC306	Implement a paving project
AHCLSC307	Implement a retaining wall project
AHCPCM302	Provide information on plants and their culture
AHCPGD301	Implement a plant establishment program
AHCSOL303	Implement soil improvements for garden and turf areas
AHCWHS301	Contribute to work health and safety processes

Elective Units

- 4 units may be selected from units aligned to Certificates II, III or IV in this training package or from any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in landscaping and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Qualification Mapping Information

This qualification is equivalent to AHC30710 Certificate III in Landscape Construction.

AHC31116 Certificate III in Production Nursery

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides a general vocational outcome for a nursery person working in a production nursery. The nursery industry expects this qualification to be achieved to meet job outcomes at this level.

Job roles and titles covered by this qualification may include:

- production nursery tradesperson

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 16

- Core Units = 11
- Elective Units = 5

Core Units

Unit Code	Unit Title
AHCBIO305	Monitor and review biosecurity measures
AHCCHM303	Prepare and apply chemicals

AHCCHM304	Transport and store chemicals
AHCIRG306	Troubleshoot irrigation systems
AHCNSY301	Maintain nursery plants
AHCNSY306	Implement a propagation plan
AHCPCM301	Implement a plant nutrition program
AHCPCM302	Provide information on plants and their culture
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCWHS301	Contribute to work health and safety processes

Elective Units

- Select 3 units from list below
- 2 unit may be selected from may be selected from units aligned to Certificates II, III or IV in this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in nursery production and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Unit Code	Unit Title
AHCBER301	Work effectively in an emergency disease or plant pest response
AHCBIO302	Identify and report unusual disease or plant pest signs
AHCBER303	Carry out emergency disease or plant pest control procedures at infected premises
AHCBER304	Carry out movement and security procedures
AHCBUS404	Operate within a budget framework
AHCCHM302	Fumigate soil <i>AHCCHM303 Prepare and apply chemicals</i>

	<i>AHCCHM304 Transport and store chemicals</i>
AHCHYD301	Implement a maintenance program for hydroponic systems
AHCHYD302	Install hydroponic systems
AHCIRG303	Measure irrigation delivery system performance
AHCIRG331	Install pressurised irrigation systems
AHCIRG332	Operate pressurised irrigation systems
AHCIRG333	Maintain pressurised irrigation systems
AHCMER301	Process customer complaints
AHCMER303	Sell products and services
AHCMOM304	Operate machinery and equipment
AHCNSY302	Receive and dispatch nursery products
AHCNSY303	Install and maintain plant displays
AHCNSY304	Deliver and promote sales of plants
AHCNSY305	Prepare specialised plants
AHCNSY307	Operate fertigation equipment
AHCSOL202	Assist with soil or growing media sampling and testing
AHCSOL301	Prepare growing media
AHCSOL401	Sample soils and interpret results
AHCWAT301	Monitor and operate water treatment processes
AHCWRK303	Respond to emergencies

AHCWRK305	Coordinate work site activities
AHCWRK309	Apply environmentally sustainable work practices
SIRRINV002	Control stock
SIRXMER201	Merchandise products
SIRRMER001	Produce visual merchandise displays
SIRXPDK001	Advise on products and services

Qualification Mapping Information

This qualification is equivalent to AHC31110 Certificate III in Production Nursery.

AHC31216 Certificate III in Retail Nursery

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides a general vocational outcome for a retail nursery or garden centre sales assistant. The nursery industry expects this qualification to be achieved to meet job outcomes at this level.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 9
- Elective Units = 6

Core Units

Unit Code	Unit Title
AHCNSY301	Maintain nursery plants
AHCNSY302	Receive and dispatch nursery products
AHCNSY303	Install and maintain plant displays
AHCPCM302	Provide information on plants and their culture
AHCPCM303	Identify plant specimens

AHCPMG302	Control plant pests, diseases and disorders
AHCWHS301	Contribute to work health and safety processes
SIRXCEG001	Engage the customer
SIRRMER003	Coordinate visual merchandising activities

Elective Units

- Select 3 units from list below
- 3 units may be selected from this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in retail nursery work and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Unit Code	Unit Title
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals
AHCMER301	Process customer complaints
AHCMER302	Provide advice on hardware products
AHCMER303	Sell products and services
BSBCUS301	Deliver and monitor a service to customers
BSBPRO301	Recommend products and services
BSBSLS402A	Identify sales prospects
SIRXADM002A	Coordinate retail office
SIRRINV002	Control stock
SIRXINV004A	Buy merchandise
SIRXMER201	Merchandise products
SIRRMER001	Produce visual merchandise displays
SIRXMER406	Monitor in-store visual merchandising display

SIRXRSK002	Maintain store security
SIRXPDK001	Advise on products and services
SIRXSLS303	Build relationships with customers
AHCNSY304	Deliver and promote sales of plants
AHCPMG301	Control weeds
AHCPCM301	Implement a plant nutrition program
AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
AHCWRK309	Apply environmentally sustainable work practices

Qualification Mapping Information

This qualification is equivalent to AHC31210 Certificate III in Retail Nursery.

AHC31316 Certificate III in Sports Turf Management

Modification History

NoRelease	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides a general vocational outcome in greenkeeping. The sports turf industry expects this qualification to be achieved to meet job outcomes at this level.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 16

- Core Units = 11
- Elective Units = 5

Core Units

Unit Code	Unit Title
AHCIRG331	Install pressurised irrigation systems
AHCMOM304	Operate machinery and equipment
AHCPCM301	Implement a plant nutrition program
AHCPCM302	Provide information on plants and their culture
AHCPMG301	Control weeds

AHCPMG302	Control plant pests, diseases and disorders
AHCTRF301	Construct turf playing surfaces
AHCTRF302	Establish turf
AHCTRF303	Implement a grassed area maintenance program
AHCTRF305	Renovate sports turf
AHCWHS301	Contribute to work health and safety processes

Elective Units

- Select 3 units from the list below
- 2 units may be selected from the list below or from units aligned to AQF levels 2, 3 or 4 from this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in sports turf management and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Unit Code	Unit Title
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals
AHCDRG301	Install drainage systems
AHCIRG306	Troubleshoot irrigation systems
AHCIRG332	Operate pressurised irrigation systems
AHCIRG333	Maintain pressurised irrigation systems
AHCSOL303	Implement soil improvements for garden and turf areas
AHCSOL401	Sample soils and interpret results
AHCWRK305	Coordinate work site activities
AHCWRK309	Apply environmentally sustainable work practices

Qualification Mapping Information

This qualification is equivalent to AHC31310 Certificate III in Sports Turf Management.

AHC31416 Certificate III in Conservation and Land Management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides a general vocational outcome in the conservation and land management industry.

The qualification enables individuals to select an Indigenous land management, lands, parks and wildlife or natural area management context as a job focus or a mix of these.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 16

- Core Units = 2
- Elective Units = 14

Core Units

Work health and safety

Unit Code	Unit Title
AHCWHS301	Contribute to work health and safety processes

Work

Unit Code	Unit Title
-----------	------------

AHCWRK309	Apply environmentally sustainable work practices
-----------	--

Elective Units

- Select at least 4 units from Group A
- Select at least six units from Group A or Group B
- A maximum of 4 units may be selected from the elective lists of Certificates II, III or IV of this or any other endorsed Training Package or Accredited Course.
Selected units must be relevant to job outcomes in conservation and land management and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Group A

Indigenous land management

Unit Code	Unit Title
AHCILM302	Provide appropriate information on cultural knowledge
AHCILM305	Work with an Aboriginal Community or organisation
AHCILM308	Identify traditional customs and land rights for an Indigenous Community
SITTGDE001	Interpret aspects of local Australian Indigenous culture

Natural area restoration

Unit Code	Unit Title
AHCNAR301	Maintain natural areas
AHCNAR302	Collect and preserve biological samples
AHCNAR303	Implement revegetation works
AHCNAR304	Undertake direct seeding
AHCNAR305	Collect native seed

Lands, parks and wildlife

Unit Code	Unit Title
AHCLPW301	Supervise park visitor activities
AHCLPW303	Construct access tracks
AHCLPW304	Carry out inspection of designated area
AHCLPW305	Perform diving for scientific purposes
AHCLPW306	Undertake sampling and testing of water
PUAFIR204B	Respond to wildfire* <i>PUAFIR215 Prevent injury</i>
PUAFIR303B	Suppress wildfire* <i>PUAFIR204B Respond to wildfire</i>
SITTGDE002	Work as a guide

Fauna

Unit Code	Unit Title
AHCFAU301	Respond to wildlife emergencies

Infrastructure

Unit Code	Unit Title
AHCINF303	Plan and construct conventional fencing

Pest management

Unit Code	Unit Title
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCPMG305	Survey pests
AHCPMG306	Determine pest control techniques

AHCPMG307	Apply animal trapping techniques
AHCPMG308	Implement pest management strategies
AHCPMG310	Prepare, monitor and maintain biological agents
AHCPMG311	Use firearms for pest control activities from aircraft

Work

Unit Code	Unit Title
AHCWRK311	Conduct site inspections
FWPCOT3202	Navigate in remote or trackless areas

Group B

Animal care and management

Unit Code	Unit Title
ACMGAS305A	Rescue animals and apply basic first aid

Biosecurity

Unit Code	Unit Title
AHCBIO302	Identify and report unusual disease or plant pest signs

Business

Unit Code	Unit Title
BSBITU306	Design and produce business documents

Chemicals

Unit Code	Unit Title
AHCCHM303	Prepare and apply chemicals

AHCCHM304	Transport and store chemicals
-----------	-------------------------------

Fauna

Unit Code	Unit Title
AHCFAU201	Recognise fauna

Infrastructure

Unit Code	Unit Title
AHCINF301	Implement property improvement, construction and repair

Landscape

Unit Code	Unit Title
AHCLSC301	Set out site for construction works
AHCLSC304	Erect timber structures and features

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM301	Coordinate machinery and equipment maintenance and repair
AHCMOM302	Perform machinery maintenance
AHCMOM304	Operate machinery and equipment
AHCMOM305	Operate specialised machinery and equipment
AHCMOM314	Transport machinery
AHCMOM315	Operate chemical application machinery and equipment

Natural area restoration

Unit Code	Unit Title
-----------	------------

AHCNAR306	Conduct photography for fieldwork
AHCNAR307	Read and interpret maps

Parks and gardens

Unit Code	Unit Title
AHCPGD301	Implement a plant establishment program
AHCPGD304	Implement a landscape maintenance program
AHCPGD305	Conduct operational inspection of park facilities
AHCPGD306	Implement a maintenance program for an aquatic environment

Pest management

Unit Code	Unit Title
AHCPMG411	Ensure compliance with pest legislation

Plants

Unit Code	Unit Title
AHCPCM302	Provide information on plants and their culture
AHCPCM303	Identify plant specimens

Seed processing

Unit Code	Unit Title
AHCSPO308	Sample seed before and after processing

Soil and water conservation

Unit Code	Unit Title
AHCSAW301	Construct conservation earthworks

AHCSAW302	Implement erosion and sediment control measures
-----------	---

Work

Unit Code	Unit Title
AHCWRK203	Operate in isolated and remote situations
AHCWRK303	Respond to emergencies
AHCWRK304	Respond to rescue incidents
AHCWRK305	Coordinate work site activities
AHCWRK310	Provide on-job training support
PUAEMR026	Treat operational risk
PUAEMR027	Assess operational risk

Qualification Mapping Information

This qualification is equivalent to AHC31410 Certificate III in Conservation and Land Management.

AHC32016 Certificate III in Beekeeping

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides a vocational outcome in bee keeping.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 16

- Core Units = 12
- Elective Units = 4

Core Units

Unit Code	Unit Title
AHCWHS301	Contribute to work health and safety processes
AHCBEK301	Manage honey bee swarms
AHCBEK304	Remove a honey crop from a hive
AHCBEK305	Extract honey
AHCWRK306	Comply with industry quality assurance requirements
AHCBEK306	Manage pests and disease within a honey bee colony

AHCBEK202	Use a bee smoker
AHCBEK203	Open and reassemble a beehive
AHBEK204	Construct and repair beehives
AHCBEK302	Manipulate honey bee brood
AHCBEK303	Re-queen a honey colony
AHCBEK405	Select and establish an apiary site

Elective Units

- 2 units must be selected from the list below
- 2 units must come from the list below or any other currently endorsed training package or accredited course. Selected units must be relevant to job outcomes in the beekeeping industry and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Unit Code	Unit Title
AHCBEK201	Support beekeeping work
AHCBEK401	Collect and store propolis
AHCBEK402	Perform queen bee artificial insemination
AHCBEK403	Produce and harvest royal jelly
AHCBEK404	Provide bee pollination services
AHCBEK406	Trap and store pollen
AHCBEK407	Rear queen bees
FDFFS3001A	Monitor the implementation of quality and food safety programs* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFFS2001A	Implement the food safety program and procedures
FDFGPS2011A	Operate a creamed honey manufacture process

FDFOP2013A	Apply sampling procedures
FDFOP2003A	Clean equipment in place
FDFOP2004A	Clean and sanitise equipment
FDFOP2023A	Operate a packaging process
FDFTEC3001A	Participate in a HACCP team* <i>FDFFS2001A Implement the food safety program and procedures</i>
AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
AHCWRK308	Handle bulk materials in storage area
TLILIC2001	Licence to operate a forklift truck

Qualification Mapping Information

This qualification is equivalent to AHC32010 Certificate III in Beekeeping.

AHC32116 Certificate III in Commercial Seed Processing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification reflects the roles of workers in commercial seed cleaning, grading and processing plants.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 9

- Core Units = 5
- Elective Units = 4

Core Units

Unit Code	Unit Title
AHCSPO301	Operate a screen cleaner
AHCSPO302	Operate an indent cylinder
AHCSPO307	Handle, package and store commercial quantities of seed
AHCSPO308	Sample seed before and after processing
AHCWHS301	Contribute to work health and safety processes

Elective Units

- Select 4 units from list below
- 1 unit may be selected from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in commercial seed processing and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Unit Code	Unit Title
AHCAGB301	Keep production records for a primary production business
AHCSPO303	Operate a gravity table
AHCSPO304	Operate seed modification machinery
AHCSPO305	Operate seed treatment machinery
AHCSPO306	Operate specialised seed processing machinery
AHCWRK309	Apply environmentally sustainable work practices
TLILIC2001A	Licence to operate a forklift truck
RIIWHS202D	Enter and work in confined spaces
AHCCHM305	Conduct manual fumigation of vertebrate and invertebrate pests* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>

Qualification Mapping Information

This qualification is equivalent to AHC32113 Certificate III in Commercial Seed Processing.

AHC32316 Certificate III in Conservation Earthworks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification relates to those individuals constructing earthworks on rural properties and rural land. They perform tasks involving a broad range of skilled applications applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 10

- Core Units = 3
- Elective Units = 7

Core Units

Work health and safety

Unit Code	Unit Title
AHCWHS301	Contribute to work health and safety processes

Soil and water conservation

Unit Code	Unit Title
AHCSAW301	Construct conservation earthworks

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM302	Perform machinery maintenance

Elective Units

- Select at least 4 units from the elective list
- 3 units may be selected from the elective list of any Certificate II, III or IV of this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in conservation earthworks and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Lands, parks and wildlife

Unit Code	Unit Title
AHCLPW303	Construct access tracks

Soil and water conservation

Unit Code	Unit Title
AHCSAW302	Implement erosion and sediment control measures

Natural area restoration

Unit Code	Unit Title
AHCNAR303	Implement revegetation works

Machinery operation and maintenance

Unit Code	Unit Title
-----------	------------

AHCMOM304	Operate machinery and equipment
AHCMOM314	Transport machinery

Work

Unit Code	Unit Title
AHCWRK303	Respond to emergencies
AHCWRK304	Respond to rescue incidents
AHCWRK311	Conduct site inspections

Qualification Mapping Information

This qualification is equivalent to AHC32310 Certificate III in Conservation Earthworks.

AHC32416 Certificate III in Irrigation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification reflects the skills and knowledge required to become installation or operations technicians within the irrigation industry.

It applies to skilled workers who carry out installation and operations job roles in the irrigation servicing, horticulture and agriculture industries.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication. However, an individual Unit of Competency may specify relevant licensing, legislative or regulatory requirements. Specific determination should be sought through the relevant State or Territory.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 14

- Core Units = 2
- Elective Units = 12

Core Units

Unit Code	Unit Title
AHCIRG308	Monitor soils under irrigation
AHCWHS301	Contribute to work health and safety processes

Elective Units

- Select 6 units from Group A
- Select 4 units from Group A or B
- 2 units may be selected this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in irrigation and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Group A

Unit Code	Unit Title
AHCIRG306	Troubleshoot irrigation systems
AHCIRG309	Install irrigation pumps
AHCIRG310	Operate and maintain irrigation pumping systems
AHCIRG315	Interpret irrigation plans and drawings
AHCIRG325	Operate irrigation technology
AHCIRG326	Operate irrigation injection equipment
AHCIRG327	Implement an irrigation schedule
AHCIRG331	Install pressurised irrigation systems
AHCIRG332	Operate pressurised irrigation systems
AHCIRG333	Maintain pressurised irrigation systems
AHCIRG335	Operate and maintain moving irrigation system
AHCIRG334	Operate and maintain gravity fed irrigation systems
AHCDRG304	Maintain and repair irrigation drainage systems
AHCDRG301	Install drainage systems
AHCINF304	Install and terminate extra low voltage wiring systems
AHCWRK305	Coordinate worksite activities

Group B

Unit Code	Unit Title
AHCDRG302	Measure drainage system performance
AHCDRG303	Troubleshoot drainage systems
AHCIRG303	Measure irrigation delivery system performance
AHCMER304	Recommend irrigation products and services
AHCLPW306	Undertake sampling and testing of water
AHCWRK405	Implement and monitor environmentally sustainable work practices
CPCPIG2021A	Design domestic urban irrigation systems
CPCPWT3027A	Connect irrigation systems from drinking water supply * <i>CPCPCM2043A Carry out WHS requirements</i>
NWPIRR014	Install meters for rural water supplies
NWPIRR022	Maintain meters for rural water supplies
NWPIRR024	Monitor and conduct maintenance on flow control and metering devices
NWPIRR042	Monitor and schedule water deliveries
NWPTRT062	Operate and control reclaimed water irrigation

Qualification Mapping Information

This qualification is equivalent to AHC32412 Certificate III in Irrigation.

AHC32516 Certificate III in Aboriginal Sites Work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

The qualification enables individuals to undertake work associated with inspecting, documenting and maintaining Aboriginal cultural and heritage sites.

The qualification enables individuals to operate under recognised, appropriate cultural supervision to undertake work associated with inspecting, documenting and maintaining Aboriginal cultural and heritage sites.

There are no entry requirements for this qualification, although it is recommended that participants undertaking this qualification seek the endorsement of their local Aboriginal Community and local Aboriginal leadership when enrolling in this qualification.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 9
- Elective Units = 6

Core Units

Unit Code	Unit Title
AHCASW301	Protect places of Aboriginal cultural significance* <i>AHCILM306 Follow Aboriginal cultural protocols</i>

AHCASW302	Relate Aboriginal culture to sites work* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW303	Identify and record Aboriginal sites, objects and cultural landscapes* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW308	Apply cultural significance to Aboriginal sites and landscapes* <i>AHCASW302 Relate Aboriginal culture to sites work**</i> <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW310	Move and store Aboriginal cultural material* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW312	Maintain an Aboriginal cultural site* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW313	Apply knowledge of relevant legislation to Aboriginal sites work
AHCILM306	Follow Aboriginal cultural protocols
AHCWHS301	Contribute to work health and safety processes

Electives

- Select 4 units from Group A
- Select 2 additional units from Group A or Group B or from the elective list of any Certificate II, III or IV in this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in Aboriginal sites work and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Group A

Unit Code	Unit Title
AHCASW305	Work with Aboriginal ceremonial secret sacred materials* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW306	Use technology in Aboriginal sites work* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW307	Support the documentation of Aboriginal cultural landscapes*

	<i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW309	Interpret Aboriginal cultural landscape* <i>AHCASW302 Relate Aboriginal culture to sites work</i> <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCILM305	Work with an Aboriginal Community or organisation* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCILM307	Implement Aboriginal cultural burning practices* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCILM510	Plan for successful cultural practice at work * <i>AHCILM306 Follow Aboriginal cultural protocols</i>

Group B

Unit Code	Unit Title
AHCASW304	Identify Indigenous culturally significant plants* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCASW501	Survey and report on Aboriginal cultural sites* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals
AHCFAU301	Respond to wildlife emergencies
AHCILM201	Maintain cultural places
AHCILM203	Record information about Country
AHCILM302	Provide appropriate information on cultural knowledge
AHCILM308	Identify traditional customs and land rights for an Indigenous Community
AHCILM404	Record and document Community history
AHCINF301	Implement property improvement, construction and repair
AHCLPW301	Supervise park visitor activities

AHCLPW303	Construct access tracks
AHCLPW304	Carry out inspection of designated area
AHCLPW305	Perform diving for scientific purposes
AHCLPW306	Undertake sampling and testing of water
AHCLSC304	Erect timber structures and features
AHCMOM305	Operate specialised machinery and equipment
AHCMOM315	Operate chemical application machinery and equipment
AHCNAR201	Carry out natural area restoration works
AHCNAR301	Maintain natural areas
AHCNAR303	Implement revegetation works
AHCNAR305	Collect native seed
AHCNAR306	Conduct photography for fieldwork
AHCNAR307	Read and interpret maps
AHCPCM301	Implement a plant nutrition program
AHCPCM302	Provide information on plants and their culture
AHCPCM303	Identify plant specimens
AHCPMG301	Control weeds
AHCPMG302	Control pests and diseases in plants
AHCPMG305	Survey pests
AHCPMG307	Apply animal trapping techniques
AHCPMG308	Implement pest management strategies
AHCWRK303	Respond to emergencies
AHCWRK304	Respond to rescue incidents
AHCWRK305	Coordinate work site activities
BSBITU306	Design and produce business documents

CUAATS504	Work with Aboriginal and Torres Strait Islander cultural material
CUACNM301	Move and store collection material
BSBLIB502	Manage the development of collections
BSBLIB602	Develop and monitor procedures for the movement and storage of collection material
CULMS002B	Research and evaluate Aboriginal or Torres Strait Islander cultural material
CULMS010B	Contribute to the preservation of cultural material
FPICOT3259	Operate a four wheel drive on unsealed roads
FPIFGM3202B	Extract seed
LGAREGS305A	Undertake animal or reptile control duties
PUAFIR204B	Respond to wildfire* <i>PUAFIR215 Prevent injury</i>
PUAFIR303B	Suppress wildfire* <i>PUAFIR204B Respond to wildfire</i>
SITTGDE001	Interpret aspects of local Australian Indigenous culture
SITTGDE002	Work as a guide
SITTGDE007	Research and share general information on Australian Indigenous cultures
SITTGDE008	Prepare specialised interpretive content on flora, fauna and landscape
SITTGDE010	Prepare specialised interpretive content on cultural and heritage environments
SITTPPD002	Develop interpretive activities
SITXCOM004	Address protocol requirements

Qualification Mapping Information

AHC32616 Certificate III in Rural Machinery Operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides a general vocational outcome in the operation and maintenance of agricultural plant.

Industry expects individuals with this qualification to perform tasks involving a broad range of skills applied in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, services or contingency measures.

This qualification is suitable for an Australian Apprenticeship.

Job roles vary across different industry sectors and include:

- Agricultural plant operator/contractor

Some machinery may require licences or tickets to be operated in some states and territories. Specific determination should be sought through the relevant State or Territory.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 16

- Core Units = 6
- Elective Units = 10

Core Units

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM301	Coordinate machinery and equipment maintenance and repair

AHCMOM302	Perform machinery maintenance
AHCMOM304	Operate machinery and equipment
AHCMOM305	Operate specialised machinery and equipment

Work

Unit Code	Unit Title
AHCWRK309	Apply environmentally sustainable work practices

Work health and safety

Unit Code	Unit Title
AHCWHS301	Contribute to work health and safety processes

Elective Units

- Select at least 6 units from the elective list
 - 4 units aligned to AQF levels 2, 3, or 4 may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in machinery operations and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM211	Operate side by side utility vehicles
AHCMOM212	Operate quad bikes
AHCMOM306	Ground spread fertiliser and soil ameliorant
AHCMOM307	Operate a cane harvester
AHCMOM308	Operate broadacre and row crop harvest machinery and equipment
AHCMOM309	Operate broadacre sowing machinery and equipment
AHCMOM310	Operate land-forming machinery and equipment

AHCMOM311	Operate precision control technology
AHCMOM312	Operate row crop planting and seeding machinery and equipment
AHCMOM313	Operate mobile irrigation machinery and equipment
AHCMOM314	Transport machinery

Tools and equipment

Unit Code	Unit Title
MEM05004C	Perform routine oxy acetylene welding

AHCMOM301	Coordinate machinery and equipment maintenance and repair
AHCMOM302	Perform machinery maintenance
AHCMOM304	Operate machinery and equipment
AHCMOM305	Operate specialised machinery and equipment
AHCMOM315	Operate chemical application machinery and equipment
AHCNSY303	Install and maintain plant displays
AHCNSY304	Deliver and promote sales of plants
AHCNSY305	Prepare specialised plants
AHCNSY306	Implement a propagation plan
AHCNSY307	Operate fertigation equipment
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCPMG410	Implement the pest monitoring and evaluation plan
AHCPHT301A	Carry out a crop regulation program
AHCPHT303	Implement a post-harvest program
AHCPHT305	Regulate crops
AHCPHT306	Establish horticultural crops
AHCPHT310	Coordinate horticultural crop harvesting

AHCWAT301	Monitor and operate water treatment processes
AHCWRK302	Monitor weather conditions
AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
AHCWRK306	Comply with industry quality assurance requirements
AHCWRK308	Handle bulk materials in storage area
AHCWRK309	Apply environmentally sustainable work practices

Qualification Mapping Information

This qualification is equivalent to AHC33210 Certificate III in Floriculture.

AHC33316 Certificate III in Feedlot Operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides an occupational outcome in beef cattle feedlot operations. Electives must be chosen to cover a feedlot maintenance, pen riding, or feeding and milling stream.

The testamur issued for this qualification is to be titled AHC33315 Certificate III in Feedlot Operations. An additional descriptor may be added by the RTO to reflect unit selection. This includes:

- AHC33315 Certificate III in Feedlot Operations (Feedlot Maintenance)
- AHC33315 Certificate III in Feedlot Operations (Feeding and Milling)
- AHC33315 Certificate III in Feedlot Operations (Pen Riding)

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 17

- Core Units = 6
- Elective Units = 11

Core Units

Biosecurity

Unit Code	Unit Title
-----------	------------

AHC BIO302	Identify and report unusual disease or plant pest signs
------------	---

Chemicals

Unit Code	Unit Title
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals

Work

Unit Code	Unit Title
AHCWRK209	Participate in environmentally sustainable work practices
AHCWRK306	Comply with industry quality assurance requirements

Work health and safety

Unit Code	Unit Title
AHCWHS301	Contribute to work health and safety processes

Elective Units

- In order to achieve Feedlot Maintenance specialisation, 8 units must be selected from Group A
- In order to achieve Feeding and Milling specialisation, 8 units must be selected from Group B
- In order to achieve Pen Riding specialisation, 8 units must be selected from Group C
- 3 units aligned to AQF levels 2, 3, or 4 may be selected from Groups A, B, C, or D, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in the feedlot industry and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Group A

Infrastructure

Unit Code	Unit Title
AHCINF204	Fabricate and repair metal or plastic structures
AHCINF301	Implement property improvement, construction and repair

Livestock

Unit Code	Unit Title
AHCLSK216	Clean and maintain livestock pens
AHCLSK328	Remove and facilitate reuse of effluent and manure from an intensive production system

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM207	Conduct front-end loader operations
AHCMOM301	Coordinate machinery and equipment maintenance and repair
AHCMOM305	Operate specialised machinery and equipment

Pest management

Unit Code	Unit Title
AHCPMG301	Control weeds

Production Horticulture

Unit Code	Unit Title
AHCPHT307	Prepare raw materials and compost the feedstocks

Resources and Infrastructure

Unit Code	Unit Title
RIIWHS202D	Enter and work in confined spaces

RIIWHS204D	Work safely at heights
------------	------------------------

Work

Unit Code	Unit Title
AHCWRK309	Apply environmentally sustainable work practices

Group B

Broadacre Cropping

Unit Code	Unit Title
AHCBAC204	Prepare grain storages
AHCBAC303	Prepare to receive grains and seeds

Livestock

Unit Code	Unit Title
AHCLSK310	Prepare grain storages
AHCLSK326	Prepare to receive grains and seeds
AHCLSK333	Monitor pen condition and ration suitability
FDFGR3002	Demonstrate knowledge of animal nutrition principles

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM205	Operate vehicles
AHCMOM207	Conduct front-end loader operations
AHCMOM211	Operate side by side utility vehicles
AHCMOM302	Perform machinery maintenance
AHCMOM305	Operate specialised machinery and equipment

FDFOP2038A	Operate a grinding process
------------	----------------------------

Pest management

Unit Code	Unit Title
AHCPMG301	Control weeds

Resources and Infrastructure

Unit Code	Unit Title
RIIWHS202D	Enter and work in confined spaces
RIIWHS204D	Work safely at heights

Work

Unit Code	Unit Title
AHCWRK308	Handle bulk materials in storage area

Group C

Livestock

Unit Code	Unit Title
AHCLSK301	Administer medication to livestock
AHCLSK304	Carry out post-mortem examination of livestock
AHCLSK307	Euthanase livestock
AHCLSK308	Identify and draft livestock
AHCLSK309	Implement animal health control programs
AHCLSK310	Implement feeding plans for intensive production
AHCLSK331	Comply with industry animal welfare requirements
AHCLSK332	Monitor animals in intensive production systems

AHCLSK333	Monitor pen condition and ration suitability
-----------	--

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM205	Operate vehicles
AHCMOM211	Operate side by side utility vehicles

Group D

Infrastructure

Unit Code	Unit Title
AHCINF302	Plan and construct an electric fence
AHCINF303	Plan and construct conventional fencing

Machinery Operation and Maintenance

Unit Code	Unit Title
AHCMOM212	Operate quad bikes

Transport and Logistics

Unit Code	Unit Title
TLILIC2001	Licence to operate a forklift truck

Qualification Mapping Information

This qualification is equivalent to AHC33311 Certificate III in Feedlot Operations.

AHC33416 Certificate III in Seed Production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification reflects the roles of workers on commercial seed production properties who grow crops within strict certification guidelines.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this Qualification.

Packaging Rules

Total number of units = 16

- Core Units = 6
- Elective Units = 10

Core Units

Unit Code	Unit Title
AHCSDP301	Undertake preparation of land for seed crops
AHCSDP302	Establish seed crops
AHCSDP303	Maintain seed crops
AHCSDP304	Harvest seed crops
AHCWRK309	Apply environmentally sustainable work practices
AHCWHS301	Contribute to work health and safety processes

Elective Units

- Select 7 units from the list below
- 3 units may be selected from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in seed production and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Unit Code	Unit Title
AHCAGB301	Keep production records for a primary production business
AHCBER303	Carry out emergency disease or plant pest control procedures at infected premises
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals
AHCINF301	Implement property improvement, construction and repair
AHCINF302	Plan and construct an electric fence
AHCINF303	Plan and construct conventional fencing
AHCIRG303	Measure irrigation delivery system performance
AHCIRG308	Monitor soils under irrigation
AHCIRG327	Implement an irrigation schedule
AHCIRG331	Install pressurised irrigation components
AHCIRG332	Operate pressurised irrigation systems
AHCIRG333	Maintain pressurised irrigation systems
AHCIRG334	Operate and maintain gravity fed irrigation systems
AHCIRG335	Operate and maintain moving irrigation system
AHCMOM202	Operate tractors
AHCMOM301	Coordinate machinery and equipment maintenance and repair

AHCMOM302	Perform machinery maintenance
AHCMOM304	Operate machinery and equipment
AHCMOM305	Operate specialised machinery and equipment
AHCMOM306	Ground spread fertiliser and soil ameliorant
AHCMOM308	Operate broadacre and row crop harvest machinery and equipment
AHCMOM309	Operate broadacre sowing machinery and equipment
AHCMOM312	Operate row crop planting and seeding machinery and equipment
AHCMOM313	Operate mobile irrigation machinery and equipment
AHCMOM314	Transport machinery
AHCMOM315	Operate chemical application machinery and equipment
AHCPCM301	Implement a plant nutrition program
AHCPCM303	Identify plant specimens
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCPMG308	Implement pest management strategies
AHCWRK301	Collect samples for a rural production or horticulture monitoring program
AHCWRK302	Monitor weather conditions
AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
AHCWRK306	Comply with industry quality assurance requirements
AHCWRK308	Handle bulk materials in storage area
FDFWGG3010A	Implement a soil management program
LMFGG2002B	Apply first aid
HLTAID005	Provide first aid in remote situation
MEM05004C	Perform routine oxy acetylene welding

MEM05007C	Perform manual heating and thermal cutting
MEM05012C	Perform routine manual metal arc welding
TLILIC2001	Licence to operate a forklift truck

Qualification Mapping Information

This qualification is equivalent to AHC33412 Certificate III in Seed Production.

AHC33516 Certificate III in Seed Testing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification reflects the roles of workers who perform a range of tests on seed in seed laboratories. Seed analysts work under the supervision of senior seed analysts. There are no entry requirements for this Qualification, however applicants should be working under supervision in a seed testing laboratory.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 18

- Core Units = 9
- Elective Units = 9

Core Units

Unit Code	Unit Title
AHCSDT301	Prepare a working sample
AHCSDT302	Identify seeds
AHCSDT304	Perform a seed purity analysis
AHCSDT305	Perform a seed moisture test

AHCSDT306	Perform a seed germination test
AHCSDT307	Perform a "Determination of Other Seeds by Number" test
AHCWRK306	Comply with industry quality assurance requirements
AHCWRK309	Apply environmentally sustainable work practices
AHCWHS301	Contribute to work health and safety processes

Elective Units

- Select 5 units from list below
 - 4 units may be selected from this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in a seed testing laboratory and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Unit Code	Unit Title
AHCSDT303	Perform a fluorescence test on seeds
AHCSDT405	Handle & store quarantinable seeds
AHCWRK303	Respond to emergencies
AHCWRK305	Coordinate work site activities
MSL922001	Record and present data
MSL933001	Maintain the laboratory/field workplace fit for purpose
MSL933004	Perform calibration checks on equipment and assist with its maintenance
MSL934003	Maintain and control stocks
MSL973007	Perform microscopic examination
TAEDEL301	Provide work skill instruction

Qualification Mapping Information

This qualification is equivalent to AHC33512 Certificate III in Seed Testing.

AHC33616 Certificate III in Pest Management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides occupation outcomes for pest management field officers, vertebrate pest management field officers and spray operators in the pest management industry. The qualification covers those who work in weed management as well as vertebrate pest management in conservation, land management, horticulture and agriculture settings.

Job functions may include:

- participating in strategic invasive species management practices
- preparing for and carrying out management programs, under general direction
- completing and assessing management programs under general direction
- carrying out weed management programs that require chemical spraying
- record keeping

Some job functions covered by this qualification may require occupational licencing or certification. Specific determination should be sought through the relevant State or Territory agency.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 3
- Elective Units =9

Core Units

Unit Code	Unit Title
-----------	------------

AHCWHS301	Contribute to work health and safety processes
AHCPMG308	Implement pest management strategies
AHCPMG203	Work effectively in a pest management environment

Elective Units

- Select at least 5 units from Group A
- Select 4 units from Group A or B

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Group A

Unit Code	Unit Title
AHCCHM303	Prepare and apply chemicals
AHCCHM304	Transport and store chemicals
AHCPMG201	Treat weeds
AHCPMG202	Treat plant pests, diseases and disorders
AHCPMG301	Control weeds
AHCPMG302	Control plant pests, diseases and disorders
AHCPMG305	Survey pests
AHCPMG306	Determine pest control techniques
AHCPMG307	Apply animal trapping techniques
AHCPMG309	Apply pest animal control techniques
AHCPMG304	Use firearms to humanely destroy animals
AHCWRK305	Coordinate work site activities
AHCWRK311	Conduct site inspections

Group B

Biosecurity

Unit Code	Unit Title
AHCBIO201	Inspect and clean machinery for plant, animal and soil material
AHCBIO305	Apply biosecurity measures

Chemicals

Unit Code	Unit Title
AHCCHM305	Conduct manual fumigation of vertebrate and invertebrate pests* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport, handle and store chemicals</i>

Explosives

Unit Code	Unit Title
AHCEXP301	Handle and store explosives

Fauna

Unit Code	Unit Title
AHCFAU201	Recognise fauna

Infrastructure

Unit Code	Unit Title
AHCINF201	Carry out basic electric fencing operations
AHCINF202	Install, maintain and repair farm fencing

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM302	Perform machinery maintenance

AHCMOM304	Operate machinery and equipment
AHCMOM315	Operate chemical application machinery and equipment

Natural Area Restoration

Unit Code	Unit Title
AHCNAR306	Conduct photography for fieldwork
AHCNAR307	Read and interpret maps

Plant care

Unit Code	Unit Title
AHCPCM202	Collect, prepare and preserve plant specimens
AHCPCM303	Identify plant specimens

Pest management

Unit Code	Unit Title
AHCPMG310	Prepare, monitor and maintain biological agents
AHCPMG311	Use firearms for pest control activities from aircraft

Work

Unit Code	Unit Title
AHCWRK203	Operate in isolated and remote situations
AHCWRK302	Monitor weather conditions
AHCWRK303	Respond to emergencies
FWPCOT3259	Operate four wheel drive on unsealed roads
FWPCOT3202	Navigate in trackless or remote areas
HLTAID003	Provide first aid

HLTAID005	Provide first aid in remote situations
-----------	--

AHC33816 Certificate III in Permaculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification relates to those individuals who work either independently or in teams to establish and maintain permaculture systems for private clients, organisations or community entities. They perform tasks involving a broad range of skilled applications in a wide variety of contexts, which may involve application of some discretion and judgement in selecting equipment, elements in a design or contingency measures.

The qualification is suited to learners who wish to work at the skilled tradesman level within permaculture projects and enterprises, and may involve supervision of others and working with people of diverse backgrounds and abilities.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 5
- Elective Units = 10

Core Units

Unit Code	Unit Title
AHCPER301	Research and communicate information on permaculture principles and practices
AHCPER302	Develop recommendations for integrated plant and animal systems

AHCPER303	Maintain integrated plant and animal systems
AHCPER316	Select plant and animal species for permaculture systems
AHCWRK311	Conduct site inspections

Elective Units

- Select 1 unit from Group A
 - Select 6 units from Group B
 - Select 3 units from Group B or C
 - 1 unit may be selected from Group C or this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in Permaculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 3

Group A

Unit Code	Unit Title
AHCPER307	Establish a rural permaculture system
AHCPER308	Establish an urban permaculture system

Group B

Unit Code	Unit Title
AHCPER304	Carry out animal care, maintenance and treatment programs in permaculture systems
AHCPER305	Implement crop maintenance and harvesting programs for permaculture systems
AHCPER306	Use weedy plants in a permaculture system
AHCPER307	Establish a rural permaculture system
AHCPER308	Establish an urban permaculture system
AHCPER309	Install and maintain permaculture water systems
AHCPER310	Install structures for permaculture systems

AHCPER311	Kill and dress small livestock for domestic consumption
AHCPER312	Plan organic garden and orchard systems
AHCPER313	Coordinate preparation and storage of permaculture products
AHCPER314	Read and interpret property maps and plans
AHCPER315	Coordinate community projects
AHCPER317	Build with earth, straw and reclaimed materials
AHCPER318	Plan propagation activities for a permaculture system
AHCPER319	Test, improve and maintain soil in a permaculture system
AHCPER320	Manage plant pests, diseases and disorders in a permaculture system
AHCPER321	Demonstrate permaculture practices to small groups of learners
AHCPER411	Operate within a sustainable community and bioregional development program
AHCPER412	Operate within a permaculture aid and development program

Group C

Unit Code	Unit Title
AHCILM306	Follow Aboriginal cultural protocols
AHCILM303	Work with an Aboriginal Community or organisation
AHCINF301	Implement property improvement, construction and repair
AHCLSK319	Slaughter livestock
AHCNAR301	Maintain natural areas
AHCSAW302	Implement erosion and sediment control measures
AHCWRK302	Monitor weather conditions
TAEDEL301A	Provide work skill instruction

Qualification Mapping Information

No equivalent qualification.

AHC40116 Certificate IV in Agriculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification allows individuals to develop post-trade skills and knowledge to become specialists within the agriculture industry. It is designed to meet the needs of supervisors or team leaders in the agriculture industry.

Industry expects that individuals with this qualification will take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This qualification is suitable for an Australian Apprenticeship.

Job roles vary across different industry sectors and include:

- Farm team leader
- Farm supervisor

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 1
- Elective Units = 11

Core Unit

Work health and safety

Unit Code	Unit Title
-----------	------------

AHCWHS401	Maintain work health and safety processes
-----------	---

Elective Units

- Select 4 units from Group A
- Select 5 units from Group A or Group B
- 2 units aligned to AQF levels 3, 4, or 5 may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in agriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 4

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the unit.

Group A

Broadacre cropping

Unit Code	Unit Title
AHCBAC401	Manage pastures for livestock production
AHCBAC402	Plan a pasture establishment program
AHCBAC403	Supervise agricultural crop establishment
AHCBAC404	Plan and implement agricultural crop maintenance
AHCBAC405	Supervise agricultural crop harvesting
AHCBAC406	Maintain grain quality in storage
AHCBAC407	Save, prepare and store agricultural seed

Chemicals

Unit Code	Unit Title
AHCCHM402	Plan and implement a chemical use program* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>

Dairy

Unit Code	Unit Title
AHCDRY401	Manage milking shed routines

Livestock

Unit Code	Unit Title
AHCLSK312	Coordinate artificial insemination and fertility management of livestock
AHCLSK317	Plan to exhibit livestock
AHCLSK401	Develop feeding plans for a production system
AHCLSK402	Develop livestock feeding plans
AHCLSK404	Implement and monitor animal welfare programs
AHCLSK405	Implement intensive production systems
AHCLSK406	Oversee animal marking operations
AHCLSK407	Plan and monitor intensive production systems
AHCLSK408	Pregnancy test animals
AHCLSK409	Supervise animal health programs
AHCLSK410	Supervise feedlot operations
AHCLSK411	Supervise natural mating of livestock
AHCLSK412	Arrange livestock purchases
AHCLSK413	Design livestock handling facilities
AHCLSK414	Arrange transport for farm produce or livestock
AHCLSK415	Oversee alpaca farm activities
AHCLSK416	Identify and select animals for breeding
AHCLSK418	Escort livestock during export * <i>AHCLSK307 Euthanase livestock</i> <i>AHCLSK331 Comply with industry animal welfare requirements</i>

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM402	Supervise maintenance of property, machinery and equipment

Pest management

Unit Code	Unit Title
AHCPMG412	Develop a pest management plan

Pork production

Unit Code	Unit Title
AHCPRK401	Implement a feeding strategy for pig production

Group B**Agribusiness**

Unit Code	Unit Title
AHCAGB401	Plan and implement property improvement
AHCAGB402	Analyse and interpret production data
BSBRK401	Identify risk and apply risk management processes

Artificial insemination

Unit Code	Unit Title
AHCAIS401	Supervise artificial breeding and embryo transfer programs

Business

Unit Code	Unit Title
AHCBUS401	Administer finance, insurance and legal requirements

AHCBUS402	Cost a project
AHCBUS404	Operate within a budget framework
AHCBUS405	Participate in an e-business supply chain
AHCBUS509	Develop and implement business structures and relationships
BSBCM401	Make a presentation
BSBFIA402	Report on financial activity
BSBHRM405	Support the recruitment, selection and induction of staff
BSBINM401	Implement workplace information system
BSBITU404	Produce complex desktop published documents
BSBLDR403	Lead team effectiveness
BSBSMB405	Monitor and manage small business operations
BSBSMB406	Manage small business finances

Chemicals

Unit Code	Unit Title
AHCCHM401	Develop procedures to minimise risks in the use of chemicals * <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>

Deer

Unit Code	Unit Title
AHCDER401	Handle, store and grade deer velvet
AHCDER501	Comply with deer industry national velvet accreditation requirements
AHCDER502	Harvest deer velvet

Irrigation

Unit Code	Unit Title
AHCIRG431	Supervise irrigation system installation
AHCIRG402	Determine hydraulic parameters for an irrigation system
AHCIRG404	Implement an irrigation-related environmental protection program
AHCIRG415	Interpret and apply irrigation designs
AHCIRG431	Supervise irrigation system installation
AHCIRG408	Schedule irrigations

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM401	Conduct major repair and overhaul of machinery and equipment

Merchandising and sales

Unit Code	Unit Title
AHCMER401	Coordinate customer service and networking activities
AHCMER402	Provide advice and sell machinery
AHCMER403	Provide advice and sell farm chemicals
AHCMER404	Provide advice on agronomic products
AHCMER405	Provide advice on livestock products
AHCMER406	Provide information on fertilisers and soil ameliorants

Milk harvesting

Unit Code	Unit Title
AHCMKH401	Carry out cleaning-time tests of milking machines
AHCMKH402	Design and fabricate milking equipment installations
AHCMKH403	Design and install enterprise milk cooling and storage

AHCMKH404	Install milking equipment
AHCMKH405	Performance test milking machines

Organic production

Unit Code	Unit Title
AHCORG401	Manage biodynamic production
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement

Plants

Unit Code	Unit Title
AHCPCM402	Develop a soil health and plant nutrition program

Shearing

Unit Code	Unit Title
AHCSHG401	Apply advanced shearing techniques
AHCSHG402	Conduct equipment experting for machine shearing
AHCSHG403	Account for shearing shed supplies
AHCSHG405	Arrange employment for shearing operations
AHCSHG406	Prepare shearing team wages

Soils and media

Unit Code	Unit Title
AHCSOL401	Sample soils and interpret results
AHCSOL402	Develop a soil use map for a property
AHCSOL403	Prepare acid sulphate soil management plans

AHCSOL404	Supervise acid sulphate soil remediation and management projects
-----------	--

Wool

Unit Code	Unit Title
AHCWOL401	Determine wool classing strategies
AHCWOL402	Use individual fleece measurements to prepare wool for sale
AHCWOL403	Prepare for, implement and review wool harvesting, clip preparation and classing
AHCWOL404	Establish work routines and manage wool harvesting and preparation staff

Work

Unit Code	Unit Title
AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK402	Provide information on issues and policies
AHCWRK403	Supervise work routines and staff performance
PSPPM402B	Manage simple projects
MSL913002	Plan and conduct laboratory/field work
SRXGRO002A	Deal with conflict
TAEDEL301	Provide work skill instruction

Qualification Mapping Information

This qualification is equivalent to AHC40110 Certificate IV in Agriculture.

AHC40316 Certificate IV in Production Horticulture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification allows individuals to develop post-trade skills and knowledge to become specialists within the production horticulture industry. It is designed to meet the needs of supervisors or team leaders in the production horticulture industry.

The qualification enables individuals to select a tree cropping, vegetable, berry or flower production, grape growing or mushroom production context as a job focus, or a mixture in the case of mixed enterprises.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 1
- Elective Units = 11

Core Units

Unit Code	Unit Title
AHCWHS401	Maintain work health and safety processes

Elective Units

- Select 3 units from Group A
 - Select 5 units from Group A or B
 - 3 units may be selected from Group B or from this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in production horticulture and must be chosen to ensure the integrity of the qualification outcome at AQF level 4

Group A

Unit Code	Unit Title
AHCCHM401	Minimise risks in the use of chemicals* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCCHM402	Plan and implement a chemical use program* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCIRG408	Schedule irrigations
AHCPCM401	Recommend plants and cultural practices
AHCPCM402	Develop a soil health and plant nutrition program
AHCPHT402	Develop a crop regulation program
AHCPHT404	Implement and monitor a horticultural crop harvesting program
AHCNSY401	Plan a growing-on program
AHCNSY402	Plan a propagation program
AHCSOL401	Sample soils and interpret results

Group B

Unit Code	Unit Title
AHCBUS404	Operate within a budget framework
AHCBUS405	Participate in an e-business supply chain

FDFTEC3001A	Participate in a HACCP team* <i>FDFFS2001A Implement the food safety program and procedures</i>
FDFFS2001A	Implement the food safety program and procedures
FDFFS3001A	Monitor the implementation of quality and food safety program* <i>FDFFS2001A Implement the food safety program and procedures</i>
AHCIRG402	Determine hydraulic parameters for an irrigation system
AHCIRG404	Implement an irrigation-related environmental protection program
AHCIRG434	Manage surface irrigation systems
AHCORG401	Manage biodynamic production
AHCORG403	Manage organic soil improvement
AHCPHT401	Assess olive oil for style and quality
AHCPHT403	Develop harvesting and processing specifications to produce an olive oil
AHCPHT405	Manage mushroom substrate preparation
AHCPHT406	Control Phase II mushroom substrate process
AHCPHT407	Manage mushroom crop development
AHCPHT408	Oversee vineyard practices
AHCSOL402	Develop a soil use map for a property
AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK402	Provide information on issues and policies
AHCWRK403	Supervise work routines and staff performance

Qualification Mapping Information

This qualification is equivalent to AHC40310 Certificate IV in Production Horticulture.

AHC41116 Certificate IV in Irrigation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification reflects the technical and supervisory skills and knowledge required to operate as supervisors and specialists within the irrigation industry. It applies to irrigation installation site managers and managers of irrigation systems in the irrigation servicing, horticulture and agriculture industries.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication. However, an individual unit of competency may specify relevant licensing, legislative or regulatory requirements. Specific determination should be sought through the relevant State or Territory.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 1
- Elective Units = 11

Core Units

Unit Code	Unit Title
AHCWHS401	Maintain work health and safety processes

Elective Units

- Select 7 units from Group A
 - Select 2 units from Group A or B
 - 2 units may be selected from Group B or this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in irrigation and must be chosen to ensure the integrity of the qualification outcome at AQF level 4

Group A

Unit Code	Unit Title
AHCIRG402	Determine hydraulic parameters for an irrigation system
AHCIRG404	Implement an irrigation-related environmental protection program
AHCIRG408	Schedule irrigations
AHCIRG410	Select and manage pumping systems for irrigation
AHCIRG415	Interpret and apply irrigations designs
AHCIRG426	Evaluate water supply for irrigation
AHCIRG431	Supervise irrigation system installation
AHCIRG432	Supervise irrigation system maintenance
AHCIRG433	Manage irrigation systems
AHCIRG434	Manage surface irrigation systems
AHCIRG422	Manage a moving sprinkler irrigation system
AHCDRG401	Coordinate and supervise installation of an irrigation drainage system
AHCDRG402	Monitor and control irrigation drainage systems
AHCSOL401	Sample soils and interpret results

Group B

Unit Code	Unit Title
AHCBUS402	Cost a project

AHCBUS404	Operate within a budget framework
AHCINF304	Install and terminate extra low voltage wiring systems
AHCIRG303	Measure irrigation delivery system performance
AHCMER407	Provide irrigation sales and service
AHCPMG409	Implement a pest management plan
AHCWRK401	Implement and monitor quality assurance processes
AHCWRK403	Supervise work routines and staff performance
BSBHRM405	Support the recruitment, selection and induction of staff
BSBLDR403	Lead team effectiveness
BSBMGT402	Implement operational plan
BSBSMB406	Manage small business finances
BSBWOR404	Develop work priorities
NWPTRT062	Operate and control reclaimed water irrigation
NWPGEN005	Coordinate and monitor the application of environmental plans and procedures
NWP410C	Coordinate and monitor asset construction and maintenance
NWPIRR033	Coordinate and monitor the operation of irrigation delivery systems
PSPPM402B	Manage simple projects

Qualification Mapping Information

This qualification is equivalent to AHC41112 Certificate IV in Irrigation.

AHC41316 Certificate IV in Wool Classing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification is a specialist wool classing qualification for wool classers and enables them to apply for registration with AWEX Ltd. as a professional Australian wool classer.

This qualification is suitable for an Australian Apprenticeship.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 14

- Core Units = 14
- Elective Units = 0

Core Units

First Aid

Unit Code	Unit Title
HLTAID003	Provide first aid

Wool

Unit Code	Unit Title
AHCWOL301	Appraise wool using industry descriptions
AHCWOL303	Prepare wool based on its characteristics

AHCWOL304	Prepare fleece wool for classing
AHCWOL305	Prepare skirtings and oddments
AHCWOL307	Document a wool clip
AHCWOL310	Press wool for a clip
AHCWOL311	Perform shed duties
AHCWOL401	Determine wool classing strategies
AHCWOL403	Plan, implement and review wool harvesting and clip preparation
AHCWOL404	Establish work routines and manage wool harvesting and preparation staff
AHCWOL405	Class fleece wool

Work

Unit Code	Unit Title
AHCWRK401	Implement and monitor quality assurance procedures

Work health and safety

Unit Code	Unit Title
AHCWHS401	Maintain work health and safety processes

Qualification Mapping Information

This qualification is not equivalent to AHC41313 Certificate IV in Wool Classing.

AHC41416 Certificate IV in Seed Production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification allows individuals to develop higher level skills and knowledge in the seed production industry. It is designed to meet the needs of supervisors or team leaders in the seed production industry.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 5
- Elective Units = 7

Core Units

Unit Code	Unit Title
AHCSDP401	Plan a seed crop establishment program
AHCSDP402	Supervise seed crop establishment
AHCSDP403	Plan and implement seed crop maintenance
AHCSDP404	Supervise seed crop harvesting
AHCWHS401	Maintain work health and safety processes

Elective Units

- Select 5 units from list below
- 2 units may be selected from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in seed production and must be chosen to ensure the integrity of the qualification outcome at AQF level 4

Unit Code	Unit Title
AHCAGB401	Plan and implement property improvement
AHCAGB402	Analyse and interpret production data
AHCCHM401	Develop procedures to minimise risks in the use of chemicals* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCCHM402A	Plan and implement a chemical use program* AHCCHM303 Prepare and apply chemicals AHCCHM304 Transport and store chemicals
AHCCHM403	Prepare safe operating procedures for calibration of equipment
AHCIRG410	Select and manage pumping systems for irrigation
AHCIRG431	Supervise irrigation system installation
AHCIRG432	Supervise irrigation system maintenance
AHCIRG433	Manage irrigation systems
AHCIRG426	Evaluate water supply for irrigation
AHCMOM401	Conduct major repair and overhaul of machinery and equipment
AHCMOM402	Supervise maintenance of property, machinery and equipment
AHCPMG413	Define the pest problem
AHCPMG507	Develop a regional pest management plan
AHCSOL401	Sample soils and interpret results

AHCSOL402	Develop a soil use map for a property
AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK402	Provide information on issues and policies
AHCWRK403	Supervise work routines and staff performance
BSBRK401	Identify risk and apply risk management processes

Qualification Mapping Information

This qualification is equivalent to AHC41412 Certificate IV in Seed Production.

AHC41516 Certificate IV in Seed Testing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification reflects the roles of senior seed analysts who perform a range of advanced tests on seed in seed laboratories and may supervise the work of seed analysts.

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

Entrants into the Certificate IV in Seed Testing must hold the following units of competency or their equivalent:

- AHCSDT301 Prepare a working sample
- AHCSDT302 Identify seeds
- AHCSDT304 Perform a seed purity analysis
- AHCSDT305 Perform a seed moisture test
- AHCSDT306 Perform a seed germination test
- AHCSDT307 Perform a 'Determination of Other Seeds by Number' test
- AHCWHS301 Contribute to work health and safety processes
- AHCWRK306 Comply with industry quality assurance requirements
- AHCWRK309 Apply environmentally sustainable work practices

Packaging Rules

Total number of units = 18

- Core Units = 9
- Elective Units = 9

Core Units

Unit Code	Unit Title
AHCSDT402	Prepare and maintain a seed reference collection
AHCSDT404	Develop and implement laboratory policy and procedures
AHCSDT406	Undertake internal audits in a seed laboratory
AHCSDT409	Perform a tetrazolium test
AHCSDT410	Perform seed vigour test
AHCSDT411	Perform a 1000 seed weight test
AHCWHS401	Maintain work health and safety processes
AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK403	Supervise work routines and staff performance

Elective Units

- Select 5 units from list below
- 4 units may be selected from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in a seed testing laboratory and must be chosen to ensure the integrity of the qualification outcome at AQF level 4

Unit Code	Unit Title
AHCSDT401	Maintain a quarantine approved laboratory
AHCSDT403	Perform an Anguina test on annual ryegrass seed
AHCSDT405	Handle & store quarantinable seeds
AHCSDT407	Perform an endophytic seed test
AHCSDT408	Perform an electrophoresis test on a seed sample
MSL904001	Perform standard calibrations

MSL924001	Process and interpret data
MSL924002	Use laboratory application software
MSL934002	Apply quality system and continuous improvement processes
MSL934003	Maintain and control stocks

Qualification Mapping Information

This qualification is equivalent to AHC41512 Certificate IV in Seed Testing.

AHC41616 Certificate IV in Organic Farming

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification allows individuals to develop skills and knowledge within the organic farming and general agriculture industry. It is designed to meet the needs of supervisors or team leaders working in the organic agriculture industry.

This qualification is suitable for people currently working or who wish to find employment on an organic farming enterprise.

Job roles and titles will vary. Possible job titles relevant to this Qualification include:

- Organic farm team leader
- Organic farm supervisor
- Organic farmer

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 1
- Elective Units = 11

Core Unit

Work health and safety

Unit Code	Unit Title
-----------	------------

AHCWHS401	Maintain work health and safety processes
-----------	---

Elective Units

- Select 4 units from Group A
- Select 5 units from Group A or Group B
- 2 units aligned to AQF levels 3, 4, or 5 may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in agriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 4

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Group A

Business

Unit Code	Unit Title
BSBSMB405	Monitor and manage small business operations

Organic farming

Unit Code	Unit Title
AHCORG401	Manage biodynamic production
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement
AHCORG404	Arrange selling through community based marketing
AHCORG405	Implement sustainable practices in the organic farm based business
AHCORG406	Oversee compliance with an organic certification scheme
AHCORG407	Manage a landless organic production system
AHCORG408	Manage on-farm composting

Pest Management

Unit Code	Unit Title
AHCPMG410	Implement the pest monitoring and evaluation plan

Group B**Agribusiness**

Unit Code	Unit Title
AHCAGB401	Plan and implement property improvement
AHCAGB402	Analyse and interpret production data

Beekeeping

Unit Code	Unit Title
AHCBEK301	Manage honey bee swarms
AHCBEK306	Manage pests and disease within a honey bee colony

Biosecurity

Unit Code	Unit Title
AHCBIO403	Plan and implement a farm or enterprise biosecurity plan

Broadacre cropping

Unit Code	Unit Title
AHCBAC401	Manage pastures for livestock production
AHCBAC402	Plan a pasture establishment program
AHCBAC403	Supervise agricultural crop establishment
AHCBAC404	Plan and implement agricultural crop maintenance
AHCBAC405	Supervise agricultural crop harvesting

Business

Unit Code	Unit Title
AHCBUS401	Administer finance, insurance and legal requirements
AHCBUS402	Cost a project
AHCBUS404	Operate within a budget framework
AHCBUS405	Participate in an e-business supply chain
BSBRISK401	Identify risk and apply risk management processes
BSBSMB406	Manage small business finances

Chemicals

Unit Code	Unit Title
AHCCHM402	Plan and implement a chemical use program * <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>

Irrigation

Unit Code	Unit Title
AHCIRG402	Determine hydraulic parameters for an irrigation system
AHCIRG404	Implement an irrigation-related environmental protection system
AHCIRG408	Schedule irrigations

Livestock

Unit Code	Unit Title
AHCLSK402	Develop livestock feeding plans
AHCLSK404	Implement and monitor animal welfare programs
AHCLSK405	Implement intensive production systems

AHCLSK406	Oversee animal marking operations
AHCLSK407	Plan and monitor intensive production systems
AHCLSK409	Supervise animal health programs
AHCLSK411	Supervise natural mating of livestock
AHCLSK412	Arrange livestock purchases
AHCLSK414	Arrange transport for farm produce or livestock
AHCLSK416	Identify and select animals for breeding

Nursery

Unit Code	Unit Title
AHCNSY402	Plan a propagation program

Production horticulture

Unit Code	Unit Title
AHCPHT402	Develop a crop regulation program
AHCPHT404	Implement and monitor a horticultural crop harvesting program

Soils and media

Unit Code	Unit Title
AHCSOL401	Sample soils and interpret results
AHCSOL402	Develop a soil use map for a property

Work

Unit Code	Unit Title
AHCWRK401	Implement and monitor quality assurance procedures
AHCWRK403	Supervise work routines and staff performance

Qualification Mapping Information

This qualification is equivalent to AHC41612 Certificate IV in Organic Farming.

AHC41716 Certificate IV in Pest Management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides occupation outcomes for supervisors and senior field officers in the pest management sector. The qualification covers those who work in weed management as well as vertebrate pest management in a range of settings including conservation, land management, agriculture, horticulture and parks and gardens.

Supervisors and senior field officers may undertake the following job functions:

- preparing and carrying out pest management programs
- participating in strategic invasive species management practices
- completing and assessing pest management programs

Some job functions covered by this qualification may require occupational licencing or certification. Specific determination should be sought through the relevant State or Territory agency.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 4
- Elective Units = 8

Core Units

Unit Code	Unit Title
AHCWHS401	Maintain work health and safety processes

AHCPMG409	Implement a pest management plan
AHCPMG412	Develop a pest management plan
AHCPMG413	Define the pest problem

Elective Units

- Select 3 units from Group A
- Select 3 units from Group A or Group B
- A maximum of 2 units may be selected from the elective lists of Certificate III or above of this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in pest management and must be chosen to ensure the integrity of the qualification outcome at AQF level 4

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Group A

Biosecurity

Unit Code	Unit Title
AHCBER402	Carry out field surveillance for a specific emergency disease or plant pest

Chemicals

Unit Code	Unit Title
AHCCHM401	Develop procedures to minimise risks in the use of chemicals* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCCHM402	Plan and implement a chemical use program* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>

Pest Management

Unit Code	Unit Title
BSBPMG418	Apply project stakeholder engagement techniques
AHCPMG410	Implement the pest monitoring and evaluation plan
AHCPMG411	Ensure compliance with pest legislation

Group B

Business

Unit Code	Unit Title
AHCBUS402	Cost a project
AHCBUS404	Operate within a budget framework

Community Coordination and Facilitation

Unit Code	Unit Title
AHCCCF405	Develop community networks
AHCCCF408	Promote community programs

Machinery

Unit Code	Unit Title
AHCMOM402	Supervise maintenance of property machinery and equipment

Plants

Unit Code	Unit Title
AHCPCM502	Collect and classify plants

Pest Management

Unit Code	Unit Title
-----------	------------

AHCPMG306	Determine pest control techniques
AHCPMG307	Apply animal trapping techniques
AHCPMG309	Apply pest animal control techniques
AHCPMG305	Survey pests
AHCNAR306	Conduct photography for fieldwork
AHCPMG414	Apply predator trapping techniques

Work

Unit Code	Unit Title
AHCWRK403	Supervise work routine and staff performance
CHCCDE002	Develop and implement community programs
FWPCOT3259	Operate a four wheel drive on unsealed roads
FWPCOT3202	Navigate in remote or trackless areas
HLTAID003	Provide first aid
HLTAID005	Provide first aid in remote situations
LGACOM404B	Establish cooperative arrangements with other organisations
PSPPM402B	Manage simple projects
PSPREG003	Exercise regulatory powers
PSPREG008	Act on non-compliance
TLIR4002	Source goods/services and evaluate contractors

Qualification Mapping Information

No equivalent qualification.

AHC41916 Certificate IV in Arboriculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides occupation outcomes with a range of specialised knowledge and skills to undertake skilled work and as a pathway for further learning required for supervising arborists in the arboriculture industry.

This qualification is suitable for an Australian Apprenticeship.

Occupational licensing, legislative or certification requirements may apply to this qualification in some jurisdictions. Specific determination should be sought through the relevant State or Territory.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 15

- Core Units = 10
- Elective Units = 5

Core Units

Unit Code	Unit Title
BSBWHS404	Contribute to WHS hazard identification, risk assessment and risk control
AHCARB401	Verify pruning specifications
AHCARB402	Supervise and audit tree operations
AHCARB403	Perform a ground-based tree defect evaluation

AHCARB404	Conduct a safety audit
TAEASS402	Assess competence
BSBITU404	Produce complex desktop published documents
AHCBUS401	Administer finance, insurance and legal requirements
AHCBUS402	Cost a project
AHCPCM402	Develop a soil health and plant nutrition program

Elective Units

- Select at least 3 units from the elective list
- An additional 2 units may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in Arboriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 4

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Unit Code	Unit Title
AHCARB405	Perform geospatial data collection
AHCCHM401	Develop procedures to minimise risks in the use of chemicals* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCCHM402	Plan and implement a chemical use program* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCBUS504	Prepare estimates, quotes and tenders
CPPSEC4008A	Prepare a detailed tender
BSBSMB405	Monitor and manage small business operations
TAEASS401	Plan assessment activities and processes

TAEASS403	Participate in assessment validation
AHCPCM401	Recommend plants and cultural practices
CPCDDO3011A	Perform dogging
AHCARB302	Inspect trees for access and work
AHCARB303	Perform pruning operations* <i>FWPCOT2237 Maintain chainsaws</i> <i>AND</i> <i>FWPCOT2239 Trim and cut felled trees</i> <i>OR</i> <i>FWPCOT3238 Operate a pole saw</i>

AHC42116 Certificate IV in Permaculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification relates to individuals who work as project supervisors and designers for private clients or organisations. They require high level permaculture design skills, and knowledge in a broad range of areas in keeping with permaculture's multi-disciplinary nature. They may be involved in supervising individuals and teams of people on urban and rural work sites and in community projects.

The qualification is suited to learners who wish to work at the supervisory level within permaculture design projects, and may involve the supervision of others and working with people of diverse backgrounds and abilities.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 5
- Elective Units = 7

Core Units

Unit Code	Unit Title
AHCPER401	Provide advice on permaculture principles and practices
AHCPER404	Plan and implement permaculture works

AHCPER405	Select appropriate technology for a permaculture system
AHCPER406	Identify and analyse bioregional characteristics and resources
AHCPER413	Evaluate suitability of species as solutions for permaculture applications

Elective Units

- Select 1 units from Group A
 - Select 4 units from Group B
 - Select 2 units from Group B or C
 - 1 unit may be selected from Group B or this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in Permaculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 4

Group A

Unit Code	Unit Title
AHCPER402	Design a rural permaculture system
AHCPER403	Design an urban permaculture system

Group B

Unit Code	Unit Title
AHCPER402	Design a rural permaculture system
AHCPER403	Design an urban permaculture system
AHCPER407	Design harvesting and storage systems for permaculture products
AHCPER408	Implement and monitor animal health and welfare programs for a permaculture system
AHCPER409	Manage a permaculture seed bank
AHCPER410	Recommend approaches for sustainable community and bioregional development
AHCPER411	Operate within a sustainable community and bioregional development

	program
AHCPER412	Operate within a permaculture aid and development program
AHCPER307	Establish a rural permaculture system
AHCPER308	Establish an urban permaculture system

Group C

Unit Code	Unit Title
AHCBUS402	Cost a project
AHCBUS404	Operate within a budget framework
AHCCCF405	Develop community networks
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement
AHCORG404	Arrange selling through community based selling
AHCSAW401	Set out conservation earthworks
AHCSOL402	Develop a soil use map for a property
TAEDEL301	Provide work skill instruction

Qualification Mapping Information

No equivalent qualification.

AHC42216 Certificate IV in Shearing Contracting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification focuses on the skills and knowledge required to run a shearing contracting business. Industry expects that individuals with this qualification will take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

Job roles and titles will vary. Possible job title relevant to this Qualification include:

- Shearing contractor

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 10
- Elective Units = 2

Core Units

Delivery and facilitation

Unit Code	Unit Title
TAEDEL301	Provide work skill instruction
TAEDEL404	Mentor in the workplace

AHC50116 Diploma of Agriculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification reflects the role of personnel working on farms and stations who manage enterprise production units and employees and sole operators of agribusinesses who provide crop production advice and services to production enterprises.

Industry expects individuals with this qualification will take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

Job roles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Farm production manager
- Production unit manager
- Agronomist
- Station/property manager.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 10

- Core Units = 0
- Elective Units = 10

Elective Units

- Select 5 units from Group A

- Select 3 units from Group A or Group B
- 2 units aligned to AQF level 4 or above may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in agriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 5

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Group A

Agribusiness

Unit Code	Unit Title
AHCAGB501	Develop climate risk management strategies
AHCAGB505	Develop a whole farm plan

Broadacre cropping

Unit Code	Unit Title
AHCBAC408	Manage agricultural crop production
AHCBAC502	Manage forage conservation
AHCBAC503	Manage integrated crop and pasture production
AHCBAC504	Plan and manage a stored grain program
AHCBAC505	Plan and manage long-term weed, pest or disease control in crops
AHCBAC506	Manage the harvest of crops
AHCBAC507	Develop production plans for crops
AHCBAC508	Apply plant biology to agronomic practices

Business

Unit Code	Unit Title
AHCBUS501	Manage staff

AHCBUS502	Market products and services
AHCBUS506	Develop and review a business plan
AHCBUS507	Monitor and review business performance

Livestock

Unit Code	Unit Title
AHCLSK501	Manage livestock production
AHCLSK502	Arrange marketing of livestock
AHCLSK503	Develop and implement a breeding strategy
AHCLSK504	Develop livestock health and welfare strategies
AHCLSK505	Develop production plans for livestock
AHCLSK507	Plan, monitor and evaluate strategies to improve livestock through genetics

Organic production

Unit Code	Unit Title
AHCORG501	Develop an organic management plan
AHCORG502	Prepare the enterprise for organic certification

Soils and media

Unit Code	Unit Title
AHCSOL501	Monitor and manage soils for production
AHCSOL502	Manage soils to enhance sustainability
AHCSOL503	Manage erosion and sediment control
AHCSOL504	Develop and manage a plan to reclaim land affected by salinity

Work health and safety

Unit Code	Unit Title
AHCWHS501	Manage work health and safety processes

Group B

Agribusiness

Unit Code	Unit Title
AHCAGB502	Plan and manage infrastructure requirements
AHCAGB503	Plan and monitor production processes
AHCAGB504	Plan production for the whole business
AHCAGB506	Manage application technology
AHCAGB507	Select and use agricultural technology
AHCAGB508	Improve agricultural sustainability using renewable energy and recycle system/s
AHCAGB509	Select and implement a Geographic Information System (GIS) for sustainable agricultural systems
AHCAGB510	Implement the introduction of biotechnology into the production system
AHCAGB511	Develop and manage a plan for sustainable production reflecting sustainable production principles
BSBWOR501	Manage personal work priorities and professional development

Business

Unit Code	Unit Title
AHCBUS503	Negotiate and monitor contracts
AHCBUS504	Prepare estimates, quotes and tenders
AHCBUS508	Prepare and monitor budgets and financial reports
BSBFIM501	Manage budgets and financial plans
BSBHRM506	Manage recruitment selection and induction processes

BSBRES401	Analyse and present research information
BSBRSK501	Manage risk
TLIL5019	Implement and monitor transport logistics
TLIR4002	Source goods/services and evaluate contractors
TLIR4003	Negotiate a contract

Chemicals

Unit Code	Unit Title
AHCCHM402	Plan and implement a chemical use program* <i>AHCCHM303 Prepare and apply chemicals</i> <i>AHCCHM304 Transport and store chemicals</i>
AHCCHM501	Develop and manage a chemical use strategy

Deer

Unit Code	Unit Title
AHCDER401	Handle, store and grade deer velvet
AHCDER501	Comply with deer industry national velvet accreditation requirements
AHCDER502	Harvest deer velvet

Drainage

Unit Code	Unit Title
AHCDRG501	Design drainage systems

Livestock

Unit Code	Unit Title
AHCLSK506	Design livestock effluent systems

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM501	Manage machinery and equipment
AHCMOM502	Implement a machinery management system

Merchandising and sales

Unit Code	Unit Title
AHCMER501	Develop a sales strategy for rural products

Natural area restoration

Unit Code	Unit Title
AHCNAR506	Develop and implement sustainable land use strategies

Organic production

Unit Code	Unit Title
AHCORG401	Manage biodynamic production
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement

Plants

Unit Code	Unit Title
AHCPCM505	Conduct environmental and food safety risk assessment

Shearing

Unit Code	Unit Title
AHCSHG405	Arrange employment for shearing operations

Sustainability

Unit Code	Unit Title
AHCSUS501	Develop and manage a plan for sustainable supply and use of water on a farm
AHCSUS502	Develop and manage a plan to improve biodiversity on a farm

Water

Unit Code	Unit Title
AHCWAT502	Manage water systems

Work

Unit Code	Unit Title
AHCWRK501	Plan, implement and review a quality assurance program
AHCWRK502	Collect and manage data
AHCWRK504	Assess new industry developments
AHCWRK505	Manage trial and research material
AHCWRK509	Provide specialist advice to clients
AHCWRK511	Develop workplace policy and procedures for sustainability

Qualification Mapping Information

This qualification is equivalent to AHC50110 Diploma of Agriculture.

AHC50216 Diploma of Pork Production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides an occupational outcome for personnel working on piggeries who manage enterprise production units. The pork industry expects that graduates from this qualification will be able to perform a range of tasks associated with a person performing the job role of a piggery manager.

Possible job roles relevant to this qualification include:

- Production unit manager

The pork industry expects that graduates from this qualification will be able to perform tasks involving the analysis and synthesis of information, design and communication of solutions to complex problems, organise the work of self and others, and take broad responsibility for the quality of the work of others (teams).

No occupational licensing, legislative or certification requirements are known to apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 10

- Core Units = 2
- Elective Units = 8

Core Units

Livestock

Unit Code	Unit Title
-----------	------------

AHCLSK504	Develop livestock health and welfare strategies
AHCLSK505	Develop production plans for livestock

Elective Units

- Select at least 6 units from the elective list
- 2 units aligned to AQF level 4 or above may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in pork production and must be chosen to ensure the integrity of the qualification outcome at AQF level 5

Agribusiness

Unit Code	Unit Title
AHCAGB504	Plan production for the whole business
AHCAGB505	Develop a whole farm plan
AHCAGB604	Analyse business performance

Business

Unit Code	Unit Title
AHCBUS501	Manage staff
AHCBUS508	Prepare and monitor budgets and financial reports

Human Resource Management

Unit Code	Unit Title
BSBHRM506	Manage recruitment selection and induction processes

Livestock

Unit Code	Unit Title
AHCLSK405	Implement intensive production systems

AHCLSK416	Identify and select animals for breeding
AHCLSK501	Manage livestock production
AHCLSK503	Develop and implement a breeding strategy

Pork production

Unit Code	Unit Title
AHCPRK401	Implement a feeding strategy for pig production

Work

Unit Code	Unit Title
AHCWRK502	Collect and manage data
AHCWRK503	Prepare reports

Qualification Mapping Information

This qualification is not equivalent to AHC50210 Diploma of Pork Production.

AHC50316 Diploma of Production Horticulture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

The Diploma of Production Horticulture reflects the role of personnel working on production horticulture farms.

The qualification can be contextualised for a tree cropping, vegetable, berry or flower production or mushroom production context as a job focus or, in the case of mixed enterprises, both.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 10

- Core Units = 0
- Elective Units = 10

Elective Units

- Select 3 units from Group A
- Select 5 units from Group A or B
- 2 units aligned to AQF level 4 or above may be selected from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in production horticulture and must be chosen to ensure the integrity of the qualification outcome at AQF level 5

Group A

Unit Code	Unit Title
AHCPCM501	Diagnose plant health problems
AHCPHT502	Develop a horticultural production plan
AHCPHT503	Manage a controlled growing environment
AHCHYD501	Develop a plan for a hydroponic system
AHCSOL501	Monitor and manage soils for production
AHCWHS501	Manage work health and safety processes

Group B

Unit Code	Unit Title
AHCBER501	Manage active operational emergency disease or plant pest sites
AHCBER502	Manage the implementation of an emergency disease or plant pest control program
AHCBUS501	Manage staff
AHCBUS502	Market products and services
AHCBUS503	Negotiate and monitor contracts
AHCBUS506	Develop and review a business plan
AHCBUS507	Monitor and review business performance
AHCBUS508	Prepare and monitor budgets and financial reports
AHCCHM501	Develop and manage a chemical use strategy
AHCDRG501	Design drainage systems
AHCHYD501	Develop a plan for a hydroponic system
AHCIRG502	Design irrigation system maintenance and monitoring programs
AHCIRG503	Design irrigation, drainage and water treatment systems
AHCIRG504	Develop an irrigation and drainage management plan
AHCMOM501	Manage machinery and equipment

AHCMOM502	Implement a machinery management system
AHCORG501	Develop an organic management plan
AHCORG502	Prepare the enterprise for organic certification
AHCPCM505	Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs
AHCWAT501	Design water treatment systems
AHCWAT502	Manage water systems
BSBR501	Manage risk
TLIL5019	Implement and monitor transport logistics
TLIR4002	Source goods/services and evaluate contractors
TLIR4003	Negotiate a contract

Qualification Mapping Information

This qualification is equivalent to AHC50310 Diploma of Production Horticulture.

AHC50416 Diploma of Horticulture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

The Diploma of Horticulture reflects the role of those who manage amenity horticultural enterprises where a range of skills and knowledge across the breadth of the industry is required or personnel working in horticulture at a level requiring higher technical skills.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 10

- Core Units = 0
- Elective Units = 10

Elective Units

- Select 8 units from electives listed below
- 2 units aligned to AQF level 4 or above may be selected from elective units below or from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in horticulture and must be chosen to ensure the integrity of the qualification outcome at AQF level 5

Unit Code	Unit Title
AHCARB601	Examine and assess trees

AHCARB502	Identify, select and specify trees
AHCARB602	Diagnose tree diseases
AHCARB504	Develop a tree protection program
AHCARB505	Document and audit tree work
AHCBUS501	Manage staff
AHCBUS502	Market products and services
AHCBUS503	Negotiate and monitor contracts
AHCBUS504	Prepare estimates, quotes and tenders
AHCBUS508	Prepare and monitor budgets and financial reports
AHCCHM501	Develop and manage a chemical use strategy
AHCDES501	Design sustainable landscapes
AHCDES502	Prepare a landscape project design
AHCDES503	Assess landscape sites
AHCHYD501	Develop a plan for a hydroponic system
AHCIRG501	Audit irrigation systems
AHCIRG502	Design irrigation system maintenance and monitoring programs
AHCIRG503	Design irrigation, drainage and water treatment systems
AHCIRG504	Develop an irrigation and drainage management plan
AHCIRG505	Establish and maintain an irrigation-related environmental protection program
AHCLPW501	Develop a management plan for a designated area
AHCLSC501	Survey and establish site levels
AHCLSC502	Manage landscape projects
AHCLSC503	Manage a tree transplanting program
AHCMOM501	Manage machinery and equipment

AHCMOM502	Implement a machinery management system
AHCPCM501	Diagnose plant health problems
AHCPCM502	Collect and classify plants
AHCPCM505	Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs
AHCPGD501	Manage plant cultural practices
AHCPGD502	Plan the restoration of parks and gardens
AHCPGD503	Manage parks and reserves
AHCPGD504	Develop and implement a streetscape management plan
AHCPGD505	Conduct comprehensive inspection of park facilities
AHCPHT502	Develop a horticultural production plan
AHCPHT503	Manage a controlled growing environment
AHCPMG413	Define the pest problem
AHCPMG507	Develop a regional pest management plan
AHCPMG508	Develop a system to monitor and evaluate the pest management plan
AHCPMG510	Develop a pest survey strategy
AHCSOL501	Monitor and manage soils for production
AHCTRF501	Plan the establishment of sports turf playing surfaces
AHCWAT501	Design water treatment systems
AHCWAT502	Manage water systems
AHCWHS501	Manage work health and safety processes
AHCWRK501	Plan, implement and review a quality assurance program
AHCWRK502	Collect and manage data
AHCWRK503	Prepare reports
AHCWRK504	Assess new industry developments

AHCWRK505	Manage trial and/or research material
AHCWRK507	Implement professional practice
AHCWRK508	Interpret legislation
AHCWRK509	Provide specialist advice to clients
AHCWRK510	Audit site operations
AHCWRK511	Develop workplace policy and procedures for sustainability
BSBFIM501	Manage budgets and financial plans
BSBHRM506	Manage recruitment selection and induction processes
BSBRES401	Analyse and present research information
CPPWMT5043A	Develop and implement an environmental management strategy
CPPWMT5045A	Develop site safety plans
PSPPM502B	Manage complex projects
PSPPM503B	Close complex projects
TLIL5019	Implement and monitor transport logistics
TLIR4002	Source goods/services and evaluate contractors
TLIR4003	Negotiate a contract

Qualification Mapping Information

This qualification is equivalent to AHC50410 Diploma of Horticulture.

AHC50516 Diploma of Arboriculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides occupation outcomes with integrated knowledge and skills for skilled or paraprofessional work and as a pathway for further learning required for consulting arborists in the arboriculture industry.

Occupational licensing, legislative or certification requirements may apply to this qualification in some jurisdictions. Specific determination should be sought through the relevant State or Territory.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 10

- Core Units = 7
- Elective Units = 3

Core Units

Unit Code	Unit Title
AHCARB601	Examine and assess trees* <i>AHCARB403 Perform a ground-based tree defect evaluation*</i> <i>AHCARB302 Inspect trees for access and work*</i> <i>AHCARB313 Identify trees</i>

AHCARB502	Identify, select and specify trees
AHCARB602	Diagnose tree diseases
AHCARB504	Develop an arboricultural impact assessment report* <i>AHCARB502 Identify, select and specify trees</i>
AHCARB505	Document and audit tree work
AHCARB506	Prepare arborist reports
AHCWRK508	Interpret legislation

Elective Units

- Select at least 1 unit from the elective list
- An additional 2 units may be selected from the elective list, or from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in Arboriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 5

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Unit Code	Unit Title
AHCARB403	Perform a ground-based tree defect evaluation* <i>AHCARB302 Inspect trees for access and work**</i> <i>AHCARB313 Identify trees</i>
AHCARB507	Generate tree plans using computer-aided design software
AHCPCM601	Develop and implement a plant health management strategy
AHCNRM507	Manipulate and analyse data within geographic information systems
AHCWRK502	Collect and manage data
AHCWRK504	Assess new industry developments
AHCWRK505	Manage trial and research material
AHCWRK507	Implement professional practice

AHCWRK510	Audit site operations
AHCWRK511	Develop workplace policy and procedures for sustainability
AHCPGD504	Develop and implement a streetscape management plan
AHCBUS504	Prepare estimates, quotes and tenders
BSBCOM602	Develop and create compliance requirements
BSBITU404	Produce complex desktop published documents
LGAPLEM512A	Provide geographic information systems data

Qualification Mapping Information

This qualification is not equivalent to AHC50510 Diploma of Arboriculture.

AHC50616 Diploma of Landscape Design

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This is a specialist qualification for landscape designers.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 4
- Elective Units = 8

Core Units

Unit Code	Unit Title
AHCDES501	Design sustainable landscapes
AHCDES502	Prepare a landscape project design
AHCDES503	Assess landscape sites
AHCDES504	Design for construction of landscape features

Elective Units

- Select 5 units from list below
 - 3 units aligned to AQF level 4 or above may be selected from this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in landscape design and must be chosen to ensure the integrity of the qualification outcome at AQF level 5

Unit Code	Unit Title
AHCARB502	Identify, select and specify trees
AHCBUS503	Negotiate and monitor contracts
AHCBUS504	Prepare estimates, quotes and tenders
BSBDES501	Implement design solutions
BSBDES502	Establish, negotiate and refine a design brief
CUAACD302	Produce computer-aided drawings
AHCPER401	Provide advice on permaculture principles and practices
AHCPER403	Design an urban permaculture system
AHCPER404	Plan and implement permaculture works
AHCPER505	Plan and supervise the implementation of permaculture project works
AHCLSC501	Survey and establish site levels
AHCLSC502	Manage landscape projects
AHCPCM503	Specify plants for landscapes
AHCPCM504	Design a specialised landscape
AHCWRK503	Prepare reports
AHCWRK507	Implement professional practice
AHCWRK508	Interpret legislation
AHCWRK509	Provide specialist advice to clients
AHCWRK510	Audit site operations

Qualification Mapping Information

This qualification is equivalent to AHC50610 Diploma of Landscape Design.

AHC51016 Diploma of Sports Turf Management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

The Diploma of Sports Turf Management applies to curators, golf course superintendents, sports turf managers, senior bowling greenkeepers and turf consultants.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

Entrants must have completed the Certificate III in Sports Turf Management by course work or by Recognition of Prior Learning or an equivalent trade level qualification in green keeping or turf management.

Packaging Rules

Total number of units = 10

- Core Units = 4
- Elective Units = 6

Core Units

Unit Code	Unit Title
AHCCHM501	Develop and manage a chemical use strategy
AHCPCM501	Diagnose plant health problems
AHCSOL501	Monitor and manage soils for production
AHCTRF501	Plan the establishment of sports turf playing surfaces

Elective Units

- Select 4 units from the list below
- 2 units may be selected from the elective units or from units packaged in Certificate IV or above from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in sports turf management and must be chosen to ensure the integrity of the qualification outcome at AQF level 5

Unit Code	Unit Title
AHCBUS501	Manage staff
AHCBUS508	Prepare and monitor budgets and financial reports
AHCDRG501	Design drainage systems
AHCIRG502	Design irrigation system maintenance and monitoring programs
AHCLSC502	Manage landscape projects
AHCMOM501	Manage machinery and equipment
AHCPCM601	Develop and implement a plant health management strategy
AHCPMG508	Develop a system to monitor and evaluate the pest management plan
AHCTRF502	Manage sports turf renovation programs
AHCTRF503	Develop sports turf management programs
AHCTRF504	Manage sports turf facility assets
AHCWHS501	Manage work health and safety processes
AHCWRK505	Manage trial and research material
BSBHRM506	Manage recruitment, selection and induction processes
SRXGOV004B	Work effectively with the Board of an organisation

Qualification Mapping Information

This qualification is equivalent to AHC51010 Diploma of Sports Turf Management.

AHC51116 Diploma of Conservation and Land Management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

The Diploma of Conservation and Land Management reflects the role of personnel working in management positions with technical level skills in conservation and land management roles.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 10

- Core Units = 0
- Elective Units = 10

Elective Units

- Select at least 4 units from Group A
- Select at least 4 units from Group A or Group B
- A maximum of 2 units may be selected from the elective list of a Certificate IV or above of this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in Conservation and Land Management and must be chosen to ensure the integrity of the qualification outcome at AQF level 5

NOTE: Units marked with an asterisk (*) require completion of prerequisite Unit/s which is identified under the Unit.

Group A

Fire

Unit Code	Unit Title
AHCFIR502	Plan prescribed burning for fuel, ecological and cultural resource management

Indigenous land management

Unit Code	Unit Title
AHCASW501	Survey and report on Aboriginal cultural sites* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCILM501	Conduct field research into natural and cultural resources
AHCILM502	Develop conservation strategies for cultural resources
AHCILM503	Manage restoration of cultural places
AHCILM504	Develop strategies for Indigenous land or sea management
AHCILM505	Map relationship of business enterprise to culture and Country
AHCILM506	Operate within Community cultures and goals
AHCILM508	Propose a negotiated outcome for a given area of Country
AHCILM510	Plan for successful cultural practice at work* <i>AHCILM306 Follow Aboriginal cultural protocols</i>
AHCILM601	Manage cultural processes in an Indigenous organisation
SITTGDE001	Interpret aspects of local Australian Indigenous culture

Lands, parks and wildlife

Unit Code	Unit Title
AHCLPW501	Develop a management plan for a designated area
AHCLPW503	Assess applications for legislative compliance
AHCLPW505	Implement natural and cultural resource management plans

AHCLPW601	Coordinate the preparation of a regional resource management plan
CPPWMT5043A	Develop and implement an environmental management strategy
NWPIRR073	Implement and coordinate catchment management plan
NWP513B	Develop and review catchment management plan
NWPIRR072	Implement and coordinate surface water management plan
NWPIRR062	Develop and review irrigation system management plan
NWPIRR063	Develop and review surface water management plan
NWP518B	Prepare and report on data related to flood mitigation
NWP519B	Develop and report flood mitigation
PUAFIR406B	Develop prescribed burning plans * <i>PUAFIR303B Suppress wildfire</i>
SISXRES001	Conduct sustainable work practices in open spaces
LGAPLEM612B	Protect heritage and cultural assets

Natural area restoration

Unit Code	Unit Title
AHCNAR501	Manage natural areas on a rural property
AHCNAR502	Conduct biological surveys
AHCNAR503	Design a natural area restoration project
AHCNAR504	Manage natural area restoration programs
AHCNAR505	Plan river restoration works
AHCNAR506	Develop and implement sustainable land use strategies

Natural Resource Management

Unit Code	Unit Title
AHCNRM508	Investigate suspected breaches of Natural Resource Management

	legislation
AHCNRM602	Develop a monitoring, evaluation and reporting program
AHCNRM603	Implement a monitoring, evaluation and reporting program

Pest management

Unit Code	Unit Title
AHCPMG410	Implement the pest monitoring and evaluation plan
AHCPMG413	Define the pest problem
AHCPMG507	Develop a regional pest management plan
AHCPMG508	Develop a system to monitor and evaluate the pest management plan
AHCPMG506	Manage the implementation of legislation

Plants

Unit Code	Unit Title
AHCPCM502	Collect and classify plants

Soil and water conservation

Unit Code	Unit Title
AHCSAW501	Design control measures and structures
AHCSAW502	Plan erosion and sediment control measures
AHCSAW503	Plan conservation earthworks

Group B

Biosecurity

Unit Code	Unit Title
AHCBER502	Manage the implementation of an emergency disease or plant pest control program

Business

Unit Code	Unit Title
AHCBUS501	Manage staff
AHCBUS503	Negotiate and monitor contracts
AHCBUS504	Prepare estimates, quotes and tenders
AHCBUS508	Prepare and monitor budgets and financial reports
TLIR4003	Negotiate a contract

Fauna

Unit Code	Unit Title
AHCFAU501	Manage fauna populations

Fire

Unit Code	Unit Title
AHCFIR501	Manage wildlife hazard reduction programs

Lands, parks and wildlife

Unit Code	Unit Title
AHCLPW501	Develop a management plan for a designated area

Machinery operation and maintenance

Unit Code	Unit Title
AHCMOM501	Manage machinery and equipment
AHCMOM502	Implement a machinery management system
BSBWHS503	Contribute to the systematic management of WHS risk

BSBWHS508	Manage WHS hazards associated with plant
-----------	--

Workplace health and safety

Unit Code	Unit Title
ACMWHS501A	Manage work health and safety processes

Natural area restoration

Unit Code	Unit Title
SITTPPD002	Develop interpretive activities
SITTPPD009	Develop environmentally sustainable tourism operations

Natural resource management

Unit Code	Unit Title
AHCNRM501	Develop a coastal rehabilitation strategy
AHCNRM502	Develop a water quality monitoring program
AHCNRM503	Support the implementation of waterways strategies
AHCNRM504	Interpret and report on catchment hydrology
AHCNRM505	Provide technical advice on sustainable catchment management
AHCNRM506	Plan and monitor works projects in catchments and waterways
AHCNRM507	Manipulate and analyse data within geographic information systems

Parks and gardens

Unit Code	Unit Title
AHCPGD503	Manage parks and reserves
AHCPGD505	Conduct comprehensive inspection of park facilities

Work

Unit Code	Unit Title
AHCWRK502	Collect and manage data
AHCWRK503	Prepare reports
AHCWRK508	Interpret legislation
AHCWRK509	Provide specialist advice to clients
AHCWRK511	Develop workplace policy and procedures for sustainability
PSPPM502B	Manage complex projects
PSPPM503B	Close complex projects

Qualification Mapping Information

This qualification is equivalent to AHC51110 Diploma of Conservation and Land Management.

AHCORG401	Manage biodynamic production
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement
AHCORG407	Manage a landless organic production system
AHCORG408	Manage on-farm composting
AHCORG501	Develop an organic management plan
AHCORG502	Prepare the enterprise for organic certification
AHCORG503	Design and document an organic farm landscape
AHCORG504	Develop and manage a community based marketing supply chain
AHCORG505	Develop and monitor a sustainable production plan
AHCPER507	Research and interpret requirements for a permaculture project
AHCSOL501	Monitor and manage soils for production projects

Group B

Agribusiness

Unit Code	Unit Title
-----------	------------

AHCAGB501	Develop climate risk management strategies
AHCBUS502	Market products and services
AHCBUS503	Negotiate and monitor contracts
AHCBUS508	Prepare and monitor budgets and financial reports
AHCMER501	Develop a sales strategy for rural products
BSBFIM501	Manage budgets and financial plans

Broadacre cropping

Unit Code	Unit Title
AHCBAC408	Manage agricultural crop production
AHCBAC503	Manage integrated crop and pasture production
AHCBAC505	Plan and manage long-term weed, pest or disease control in crops
AHCBAC506	Manage the harvest of crops
AHCBAC507	Develop production plans for crops

Business

Unit Code	Unit Title
AHCBUS501	Manage staff
AHCBUS506	Develop and review a business plan
AHCBUS507	Monitor and review business performance
BSBR501	Manage risk

Chemicals

Unit Code	Unit Title
AHCCHM402	Plan and implement a chemical use program * <i>AHCCHM303 Prepare and apply chemicals</i>

	<i>AHCCHM304 Transport and store chemicals</i>
--	--

Livestock

Unit Code	Unit Title
AHCLSK501	Manage livestock production
AHCLSK502	Arrange marketing of livestock
AHCLSK503	Develop and implement a breeding strategy
AHCLSK504	Develop livestock health and welfare strategies
AHCLSK505	Develop production plans for livestock
AHCLSK506	Design livestock effluent systems

Natural area restoration

Unit Code	Unit Title
AHCNAR506	Develop and implement sustainable land use strategies

Production horticulture

Unit Code	Unit Title
AHCPCM501	Diagnose plant health problems
AHCPHT502	Develop a horticultural production plan
AHCPHT503	Manage a controlled growing environment

Water

Unit Code	Unit Title
AHCIRG503	Design irrigation, drainage and water treatment systems
AHCWAT502	Manage water systems

Work

Unit Code	Unit Title
AHCWRK501	Plan, implement and review a quality assurance program
AHCWRK502	Collect and manage data
AHCWRK504	Assess new industry developments
AHCWRK511	Develop workplace policy and procedures for sustainability

Work health and safety

Unit Code	Unit Title
AHCWHS501	Manage work health and safety processes

Qualification Mapping Information

This qualification is not equivalent to AHC51812 Diploma of Organic Farming.

AHC52016 Diploma of Landscape Project Management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This is a specialist qualification for landscape project managers.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 10

- Core Units = 3
- Elective Units = 7

Core Units

Unit Code	Unit Title
AHCLSC502	Manage landscape projects
AHCBUS503	Negotiate and monitor contracts
AHCBUS504	Prepare estimates, quotes and tenders

Elective Units

- Select 5 units from Group A or B

- 2 units aligned to AQF level 4 or above may be selected from elective units below or from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in landscape project management and must be chosen to ensure the integrity of the qualification outcome

Unit Code	Unit Title
AHCBUS508	Prepare and monitor budgets and financial reports
AHCDES503	Assess landscape sites
AHCLSC501	Survey and establish site levels
AHCWHS501	Manage work health and safety processes
AHCWRK503	Prepare reports
AHCWRK508	Interpret legislation
AHCWRK509	Provide specialist advice to clients
AHCWRK510	Audit site operations
BSBHRM506	Manage recruitment selection and induction processes
BSBITU401	Design and develop complex text documents
CPPWMT5045A	Develop site safety plans
TLIR4002	Source goods/services and evaluate contractors

Qualification Mapping Information

No equivalent qualification.

AHC52116 Diploma of Permaculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides occupation outcomes for individuals to work in a leadership capacity for organisations, groups or enterprises. They require a whole system approach to planning, designing, managing and implementing integrated permaculture projects and programs, permaculture community programs, and the operation of permaculture enterprises.

The qualification is suited to learners who wish to work within organisations and enterprises where skills in strategic planning and project management, natural system and land use planning, and specialist permaculture design are required. Work is likely to involve working with teams of people at the strategic level as well as working with people of diverse backgrounds and abilities.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 12

- Core Units = 5
- Elective Units = 7

Core Units

Unit Code	Unit Title
AHCPER401	Provide advice on permaculture principles and practices
AHCPER502	Design an integrated permaculture system

AHCPER503	Develop a strategic plan for a permaculture project or enterprise
AHCPER504	Manage a permaculture project
AHCPER507	Research and interpret requirements for a permaculture project

Elective Units

- Select 5 units from Group A
 - Select 4 units from Group A or B
 - 2 units may be selected from Group B or this or any other endorsed Training Package or Accredited Course
- Selected units must be relevant to job outcomes in Permaculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 5

Group A

Unit Code	Unit Title
AHCPER501	Carry out permaculture field research
AHCPER505	Plan and supervise the implementation of permaculture project works
AHCPER506	Manage a localisation or transition project
AHCPER508	Manage a permaculture aid and development project
AHCPER509	Design permaculture structures and features
AHCPER510	Prepare a sustainable community and bioregional development strategy
AHCPER511	Facilitate participatory planning and learning activities
AHCPER512	Plan community governance and decision making processes
AHCPER413	Evaluate suitability of species as solutions for permaculture applications
AHCORG402	Manage organic livestock production
AHCORG403	Manage organic soil improvement

Group B

Unit Code	Unit Title
-----------	------------

AHCAGB501	Develop climate risk management strategies
AHCBUS502	Market products and services
AHCBUS503	Negotiate and monitor contracts
AHCBUS506	Develop and review a business plan
AHCCCF501	Evaluate project submissions
AHCCCF506	Manage the incorporation of a group
AHCILM506	Operate within community cultures and goals
AHCNAR501	Manage natural areas on a rural property
AHCORG501	Develop an organic management plan
AHCORG502	Prepare the enterprise for organic certification
AHCSAW502	Plan erosion and sediment control measures
AHCWRK509	Provide specialist advice to clients
AHCWRK511	Develop workplace policies and procedures for sustainability
CHCCDE012	Work within organisation and government structures to enable community development outcomes
CHCVOL003	Recruit, induct and support volunteers

Qualification Mapping Information

No equivalent qualification.

AHC60216 Advanced Diploma of Horticulture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification reflects the roles of individuals working in management roles in horticulture.

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 8

- Core Units = 0
- Elective Units = 8

Elective Units

- Select 6 units from the elective list below
- 2 units may be selected from this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in horticulture and must be chosen to ensure the integrity of the qualification outcome at AQF level 6

Unit Code	Unit Title
ACHPCM601	Develop and implement a plant health management strategy
AHCAGB501	Develop climate risk management strategies

AHCAGB502	Plan and manage infrastructure requirements
AHCAGB601	Develop export markets for produce
AHCAGB602	Manage estate planning
AHCAGB603	Manage the production system
AHCAGB604	Analyse business performance
AHCAGB605	Manage business capital
AHCAGB606	Manage price risk through trading strategy
AHCBER601	Plan and oversee an emergency disease or plant pest control program
AHCBUS601	Manage capital works
AHCBUS602	Review land management plans and strategies
AHCBUS603	Develop and review a strategic plan
AHCBUS604	Design and manage the enterprise quality management system
AHCBUS605	Manage human resources
AHCBUS606	Develop a monitoring, evaluation and reporting program
AHCBUS607	Implement a monitoring, evaluation and reporting program
AHCBUS608	Manage risk
AHCMER501	Develop a sales strategy for rural products
AHCMOM601	Analyse machinery options
AHCPCM601	Develop and implement a plant health management strategy
AHCWHS501	Manage work health and safety processes
AHCWRK601	Monitor projects in a program
AHCWRK602	Lead and manage community or industry organisations
CPPWMT5045A	Develop site safety plans
PSPPCY004	Support policy implementation
SRXGOV001B	Participate as a member of an effective Board of an organisation

SRXGOV004B	Work effectively with the Board of an organisation
------------	--

Qualification Mapping Information

This qualification is equivalent to AHC60210 Advanced Diploma of Horticulture.

AHC60316 Advanced Diploma of Agribusiness Management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification reflects the roles of individuals working in a range of agribusinesses. The units covered in this qualification are uniquely contextualised for the agribusiness sector and reflect the need for agribusiness specific management expertise in planning and analysis, financial and human resource management together with an emphasis on sustainability.

This qualification is also suited to the needs of individuals who possess significant theoretical agribusiness skills and knowledge that they would like to further develop in order to create further educational or employment opportunities.

Job roles and titles vary across different industry sectors. Possible job titles relevant to this qualification include:

- Rural and regional agribusiness manager (including lending managers, insurance brokers, machinery dealers, chemical resellers, stock agents, grain marketers, real estate agents)
- Agriculture enterprise business manager
- Production horticulture enterprise business manager

No occupational licensing, legislative or certification requirements apply to this qualification at the time of publication.

Entry Requirements

There are no entry requirements for this qualification.

Packaging Rules

Total number of units = 8

- Core Units = 0
- Elective Units = 8

Elective Units

- Select at least 6 units from the elective list
- 2 units aligned to AQF level 5 or above may be selected from the elective list, or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in agribusiness management and must be chosen to ensure the integrity of the qualification outcome at AQF level 6

AHC60516 Advanced Diploma of Arboriculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Qualification Description

This qualification provides occupation outcomes with broad knowledge and skills for paraprofessional/highly skilled work and further learning required for consulting arborists in the arboriculture industry.

Possible job roles relevant to this qualification include:

- Consulting Arborist
- Senior Consulting Arborist
- Senior Arborist

Occupational licensing, legislative or certification requirements may apply to this qualification in some jurisdictions. Specific determination should be sought through the relevant State or Territory.

Entry Requirements

AHC50515 Diploma of Arboriculture.

Packaging Rules

Total number of units = 10

- Core Units = 7
- Elective Units = 3

Core Units

Unit Code	Unit Title
AHCARB601	Examine and assess trees* <i>AHCARB403 Perform a ground-based tree defect evaluation**</i>

	<i>AHCARB302 Inspect trees for access and work***</i> <i>AHCARB313 Identify trees</i>
AHCARB602	Diagnose tree diseases
AHCARB603	Interpret diagnostic test results
AHCARB604	Measure and improve the performance of urban forests
AHCARB605	Provide consultation in a legal framework
AHCARB606	Develop an operational tree management plan
AHCWRK507	Implement professional practice

Elective Units

- Select 1 unit from Group A
- An additional 2 units may be selected from Group A or this or any other endorsed Training Package or Accredited Course
Selected units must be relevant to job outcomes in Arboriculture and must be chosen to ensure the integrity of the qualification outcome at AQF level 6

ACMGAS301A Maintain and monitor animal health and wellbeing

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit of competency covers the process of following animal health management practices to monitor animal health via daily observations of behaviour and condition.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.</p>
------------------------	---

Application of the Unit

Application of the unit	<p>This unit is applicable to those working in animal care industry sectors where it may be necessary to care for a range of animal species and to monitor the wellbeing of healthy, ill or injured animals by observing and measuring indicators of ideal and poor development or response to treatments. These animals may be being kept long term in the workplace or being raised or prepared for sale, rehousing or release to their native habitat.</p> <p>In addition to legal and ethical responsibilities, all units of competency in the ACM10 Animal Care and Management Training Package have the requirement for animals to be handled gently and calmly. The individual is required to exhibit appropriate care for animals so that stress and discomfort is minimised.</p>
--------------------------------	---

Licensing/Regulatory Information

Not applicable.

Pre-Requisites

Prerequisite units	

Employability Skills Information

Employability skills	This unit contains employability skills.
-----------------------------	--

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Follow <i>animal</i> health management practices	<p>1.1. <i>Personal health and hygiene standards</i> are maintained in accordance with <i>occupational health and safety (OHS)</i> and organisation policies and procedures.</p> <p>1.2. <i>Animal diseases</i> and their impact on animals and humans are identified.</p> <p>1.3. Broad categories of <i>parasitic infestations</i> are identified.</p> <p>1.4. <i>Quarantine</i> areas are prepared and maintained in accordance with quarantine protocols</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>1.5. Animals requiring quarantine are identified and isolated.</p> <p>1.6. Quarantine records are maintained in accordance with organisation policies and procedures.</p>
2. Monitor and maintain the physical wellbeing of animals	<p>2.1. Different types of animal's anatomy and physiology are identified, compared and examined to determine physical appearance, particular body structures and observation recording requirements.</p> <p>2.2. Indicators of animal health are regularly monitored and tested in accordance with organisation standard operating procedures and facility demarcation/quarantine requirements involving movement of animals within or between facilities.</p> <p>2.3. The physical environment of animals is assessed for evidence of problems that may affect the physical wellbeing of animals</p> <p>2.4. Animal activity monitoring and health information and records are maintained in accordance with organisation standard operating procedures.</p>
3. Identify and report signs of ill health or injury in animals	<p>3.1. Signs of illness or injury are recognised and reported to supervisor.</p> <p>3.2. Abnormal animal behaviour and conditions are recognised and reported to supervisor.</p> <p>3.3. Samples are collected correctly and recorded as directed in accordance with organisation policies and procedures.</p> <p>3.4. Sick or injured animals are separated from other animals, as required, and cared for in accordance with supervisor or veterinary advice.</p> <p>3.5. Animals that are ill or injured are handled in accordance with OHS and legislative requirements, relevant codes of practice and organisation policies and procedures.</p>
4. Administer and record animal treatments	<p>4.1. Authorised animal treatments are administered under supervision and dosages recorded in accordance with organisation policies and procedures.</p> <p>4.2. Routine preventative health treatments are regularly monitored, administered and recorded in accordance with organisation standard operating procedures.</p> <p>4.3. Appropriate storage of treatments is identified and used in accordance with organisation policies and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>procedures.</p> <p>4.4. Records relating to animal health status, before and after treatment, and to the specific nature of treatment provided are completed in accordance with organisation policies and procedures.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- complete relevant work-related documents
- employ safe and environmentally responsible organisational systems and procedures when handling animals
- maintain the highest standards of personal and workplace hygiene and infection control at all times to reduce the risk of infection and cross-infection
- participate in arrangements for maintaining the health and safety of all people and animals in the workplace
- take and record animals temperature, pulse, respiration and hydration indicators where appropriate
- literacy skills to read and follow organisational policies and procedures, including OHS and animal welfare; follow sequenced written instructions; and record information accurately and legibly
- oral communication skills/language to fulfil the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- numeracy skills to estimate, calculate and record routine workplace measures
- interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities
- problem-solving skills to assess appropriate practices and prioritise daily tasks
- use personal protective clothing and equipment correctly
- use safe manual handling techniques and/or equipment
- use safe waste handling and disposal procedures.

Required knowledge

- anatomical and physiological terminology and glossary of terms
- anatomical and physiological structures and functions related to animal health and wellbeing

REQUIRED SKILLS AND KNOWLEDGE

- broad categories of parasitic infestations
- common diseases, ailments, injuries and other impacts on animal health and wellbeing
- housing, exercise, social and activity needs of animals
- indicators of poor response to treatment or management of young, ill, injured or compromised animals
- indicators of recovery from illness or injury
- methods used to measure, interpret and record animals weight and other objective measures of animal health
- principles of animal welfare and ethics
- relevant OHS and animal welfare legislative requirements and codes of practice
- quarantine protocols
- safe work practices
- terminology used to describe and document health and behavioural signs and symptoms
- workplace hygiene standards, disinfectants, cleaning agents, cleaning techniques and cleaning equipment and materials.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this unit

The evidence required to demonstrate competence in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit. Assessors should ensure that candidates can:

- carry out routine, consistent monitoring of animal health and physical wellbeing
- maintain personal health and a hygienic work environment
- follow quarantine protocols as required
- identify good health, illness, injury and abnormal behaviour in animals and report to supervisor
- administer authorised animal treatments and

EVIDENCE GUIDE	
	<p>implement routine preventative health programs as directed</p> <ul style="list-style-type: none"> maintain accurate animal activity monitoring, health, treatment and quarantine records. <p>The skills and knowledge required to maintain and monitor animal health and wellbeing must be transferable to a range of work environments and contexts and include the ability to deal with unplanned events.</p>
Context of and specific resources for assessment	<p>Assessment of this unit is to be practical in nature and will be most appropriately assessed in an animal care industry sector workplace in which candidates are working or in a situation that reproduces normal work conditions. Workplaces can include pet shops, breeding or boarding kennels and catteries, aviaries, companion animal training, grooming establishments, animal shelters, zoos, wildlife parks, mobile animal facilities and animal technology facilities.</p> <p>There must be access in either situation to a range of animals as well as relevant information, equipment and/or resources to enable one to demonstrate competence. Assessment must be relevant to the industry sector in which candidates are working and must cover a minimum of one species from at least two of the six major animal groups OR at least three breeds from within one of the six major animal groups (mammals, fish, birds, amphibians, reptiles, invertebrates).</p>
Method of assessment	<p>To ensure consistency in one's performance, competency should be demonstrated, to industry defined standards, on more than one occasion over a period of time in order to cover a variety of circumstances over a number of assessment activities.</p> <p>The assessment strategy must include practical skills assessment. Suggested strategies for this unit are:</p> <ul style="list-style-type: none"> written and/or oral assessment of candidate's required knowledge observed, documented and first-hand testimonial evidence of candidate's application of practical tasks

EVIDENCE GUIDE	
	<ul style="list-style-type: none"> • simulation exercises that reproduce normal work conditions • third-party evidence • workplace documentation • portfolio. <p>This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.</p>
Guidance information for assessment	Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<i>Animals</i> may include:	<ul style="list-style-type: none"> • animals commonly encountered within the industry workplace and may cover both native and introduced species • animals from the six major animal groups (mammals, birds, reptiles, amphibians, fish and invertebrates).
<i>Personal health and hygiene standards</i> may include:	<ul style="list-style-type: none"> • appropriate handling reprocessing of reusable equipment • aseptic technique • cover cuts and abrasions with waterproof dressing and change as necessary • maintain personal immunisation/vaccination requirements for working with animals where

RANGE STATEMENT	
	<p>required</p> <ul style="list-style-type: none"> • personal hygiene practices especially washing and drying hands before and after animal contact and/or any activity likely to cause cross-contamination • safe handling and disposal of sharps and other clinical, related and general waste • use of personal protective clothing and equipment and change as appropriate for the intended use.
<i>OHS</i> risks when working with animals may include:	<ul style="list-style-type: none"> • animal bites, envenomation, kicks, scratches and crush injuries • biological hazardous waste and sharps disposal • handling of chemicals and medicines • gas leakage • inhalation of aerosol particles • intraocular contamination • manual handling, including carrying, lifting and shifting • needle pricks and cuts from other sharps • release of infective agents (animal and human) • slippery or uneven work surfaces • zoonoses.
<i>Animal diseases</i> may include:	<ul style="list-style-type: none"> • infectious diseases: <ul style="list-style-type: none"> • bacteria • fungi • internal and external parasites • virus • zoonoses • non-infectious diseases: <ul style="list-style-type: none"> • allergies • chemical toxicities • genetic • metabolic • neoplastic • nutritional • physical traumas.
<i>Parasitic infestations</i> may include:	<ul style="list-style-type: none"> • external parasites: <ul style="list-style-type: none"> • fleas, mites, lice or ticks • flies and midges

RANGE STATEMENT	
	<ul style="list-style-type: none"> • classes of internal parasites: <ul style="list-style-type: none"> • cetoda • nemotoda • trematoda.
<i>Quarantine</i> requirements may include:	<ul style="list-style-type: none"> • procedures and hygiene standards applied • reasons for quarantine • maintaining required records • quarantine periods for various species.
<i>Indicators of animal health</i> monitoring may include:	<ul style="list-style-type: none"> • observing and reporting unusual behaviour for nominated animal: <ul style="list-style-type: none"> • aggression or docility (depending on animal) • disinterest in surroundings, other animals, people or usual stimuli • excessive licking, scratching and rubbing • lethargy • nest building • self mutilation • trembling • vocalising • observing and reporting indicators of illness or injury: <ul style="list-style-type: none"> • bleeding • changes in drinking or eating patterns • lameness or reluctance to move and vocalising when attempting to move • swelling • unusual amounts, colour or texture of faeces.
<i>Physical environment of animals</i> may include:	<ul style="list-style-type: none"> • absence or presence of vermin and pests • ability to maintain appropriate hygiene standards to ensure animal health • ability to maintain enclosure security • access to sunlight, • air flow and draught • construction materials of enclosure, housing, bedding, feed and water containers, behaviour enrichment items and floor surface • location of enclosure and construction materials that may provide for or hinder positive

RANGE STATEMENT	
	<ul style="list-style-type: none"> behavioural stimulation • location of enclosure in regard to other animals, noise and other potentially threatening or challenging stimuli • protection from weather extremes (e.g. heat, cold, precipitation and wind) • temperature range in enclosure and in housing area
<i>Signs of illness or injury</i> may include:	<ul style="list-style-type: none"> • chewing or licking own body excessively • defensive behaviours • drooling and regurgitating food • excessive drinking • excessive rolling • general changes in normal behaviour or routines • lameness • listlessness or disinterest in surroundings • presence of blood, swelling, excessive heat • reluctance or refusal to eat or drink • reluctance to move • sweating • yelping or other vocalising when touched or if animal attempts to move or perform particular tasks or grooming.
<i>Abnormal animal behaviour and conditions</i> may include:	<ul style="list-style-type: none"> • aggression in non-aggressive species • cannibalism • reluctance to eat and drink, socialise or move in relation to the usual patterns for nominated species • repetitive movements or behaviours that prevent the animal from functioning normally or lead to injury.
<i>Samples</i> may include:	<ul style="list-style-type: none"> • blood • faeces • hair • muscle • saliva • semen • skin • uterine secretions.
<i>Authorised animal treatments</i>	<ul style="list-style-type: none"> • treatments used in the routine preventative

RANGE STATEMENT	
may include:	<p>health care of animals that are available over the counter and have been approved by supervisor or are part of the approved animal care plan</p> <ul style="list-style-type: none"> • treatments prescribed by a veterinarian.
<i>Routine preventative health treatments</i> may include:	<ul style="list-style-type: none"> • control of parasites • grooming • immunisation/vaccinations as required • insect control • quarantine • routine health check-up • routine observation of waste elimination and faecal examination.

Co-requisite units

Co-requisite units		

ACMGAS303A Plan for and provide nutritional requirements for animals

Modification History

Not applicable.

Unit Descriptor

Unit descriptor	<p>This unit of competency covers the process of calculating rations based on animal species needs and availability of feedstuffs.</p> <p>No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.</p>
------------------------	--

Application of the Unit

Application of the unit	<p>The unit is applicable to those working in the animal care industry where it may be necessary to plan nutritional requirements for animals in various animal care sectors, including but not restricted to, companion animals in pet shops, boarding kennels and catteries, dog and cat breeding establishments, research technology animals, native and exotic animals in zoos, wildlife parks and animal rescue and rehabilitation facilities.</p> <p>In addition to legal and ethical responsibilities, all units of competency in the ACM10 Animal Care and Management Training Package have the requirement for animals to be handled gently and calmly. The individual is required to exhibit appropriate care for animals so that stress and discomfort is minimised.</p>

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Identify <i>nutritional requirements</i> of animals	<p>1.1. <i>Animals</i> are classified according to natural <i>nutrient sources</i> and types of digestive systems.</p> <p>1.2. Normal feeding behaviours and nutritional requirements of a range of animals in the animal care workplace are aligned with natural diet and controlled environment animal requirements.</p> <p>1.3. <i>Feeding strategies and methods</i> to maximise activity and behavioural enrichment are evaluated.</p> <p>1.4. Characteristics of under or over supply of nutrients are identified and <i>methods used to monitor</i></p>

ELEMENT	PERFORMANCE CRITERIA
	<i>nutritional uptake</i> are evaluated and practised.
2. Evaluate food sources and calculate dietary requirements	<p>2.1. Foodstuffs are classified according to nutrient content.</p> <p>2.2. Foodstuffs are evaluated for shelf life, preparation requirements, availability and cost.</p> <p>2.3. Hazards to animal and human health from food sources are identified and methods used to manage potential risks are implemented.</p> <p>2.4. Feed weight and water requirements are estimated based on animal profiles.</p> <p>2.5. Protein, carbohydrate, vitamin and mineral supplement and fibre needs are estimated based on animal profiles.</p> <p>2.6. Other dietary issues relevant to the animal's profile are identified and factored into dietary calculations.</p> <p>2.7. Diet plans are prepared and documented after supervisor approval.</p>
3. Prepare diets and provide food and water	<p>3.1. Food is prepared in accordance with diet plan and stored safely and hygienically</p> <p>3.2. Food and water is presented in accordance to different species requirements and in compliance with organisation policy and procedures.</p>
4. Monitor feeding and watering practices	<p>4.1. Food and water consumption is monitored and recorded in accordance with organisation policy and procedures.</p> <p>4.2. Abnormal feed intake or feeding behaviour are identified and reported in accordance with organisation policy and procedures.</p> <p>4.3. Animals are monitored for condition, metabolic and behavioural changes.</p> <p>4.4. Reasons for poor response to diet are evaluated and specialist advice sought as required.</p> <p>4.5. Required dietary changes are determined in consultation with supervisor and / or others.</p> <p>4.6. Dietary variations are documented and records updated as required.</p>

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- maintain the highest standards of hygiene and infection control at all times to reduce the risk of infection and cross-infection
- measure, interpret and record animal weight, length and other relevant objective indicators of change in physiological status
- literacy skills to read and follow organisational policies and procedures, including occupational health and safety (OHS) and animal welfare; follow sequenced written instructions; and record information accurately and legibly
- oral communication skills/language to fulfill the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- numeracy skills to estimate, calculate and record routine workplace measures
- interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental abilities
- problem-solving skills to use available resources and prioritise daily tasks
- use personal protective clothing and equipment correctly
- use safe manual handling techniques and/or equipment
- use safe waste handling and disposal procedures.

Required knowledge

- anatomical structures and features affecting feeding and nutrition
- animal classifications that influence dietary needs and styles of eating
- behavioural features related to feeding styles and unsuitable responses to diets
- feedstuffs available and approved in Australia for animals, their availability, cost, shelf life, method of storage, preparation and presentation to animals
- methods used to calculate rations, estimate weight of animals, calculate dry feed weight of food stuffs and other relevant measurements and calculations used for diet planning and food preparation
- nutrition related diseases
- organisational policies and procedures, including OHS and emergency procedures
- protein, carbohydrate, vitamin and mineral supplement and fibre needs for a range of animal groups
- physiological features affecting dietary needs
- potential causes of poor response to diets and tests used to investigate dietary problems
- principles of animal welfare and ethics
- relevant federal and state or territory OHS and animal welfare legislative

REQUIRED SKILLS AND KNOWLEDGE

- requirements and codes of practice
- safe work practices
 - sources of nutrients for particular animal classes and groups
 - workplace hygiene standards, disinfectants, cleaning agents, cleaning techniques and cleaning equipment and materials.

Evidence Guide**EVIDENCE GUIDE**

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment**Critical aspects for assessment and evidence required to demonstrate competency in this unit**

The evidence required to demonstrate competence in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit. Assessors should ensure that candidates can:

- develop diets for animals in consultation with others
- prepare, store and distribute food according to animal needs, workplace protocols and procedures whilst maintaining quality control and hygiene practices
- monitor response to feeding program and modify diets as required in consultation with supervisor.

The skills and knowledge required to plan for and provide nutritional requirements for animals must be transferable to a range of work environments and contexts and include the ability to deal with unplanned events.

Context of and specific resources for assessment

Assessment of this unit is to be practical in nature and will be most appropriately assessed in an animal care industry sector workplace in which candidates are working or in a situation that reproduces normal work conditions. Workplaces can include pet shops, breeding or boarding kennels and catteries, aviaries, companion animal training, grooming establishments, animal shelters, zoos, wildlife parks, mobile animal facilities and

EVIDENCE GUIDE	
	<p>animal technology facilities.</p> <p>There must be access in either situation to a range of animals as well as relevant information, equipment and/or resources to enable one to demonstrate competence. Assessment must be relevant to the industry sector in which candidates are working and must cover a minimum of one species from at least two of the six major animal groups OR at least three breeds from within one of the six major animal groups (mammals, fish, birds, amphibians, reptiles, invertebrates).</p>
Method of assessment	<p>To ensure consistency in one's performance, competency should be demonstrated, to industry defined standards, on more than one occasion over a period of time in order to cover a variety of circumstances and over a number of assessment activities.</p> <p>The assessment strategy must include practical skills assessment. Suggested strategies for this unit are:</p> <ul style="list-style-type: none"> • written and/or oral assessment of candidate's required knowledge • observed, documented and first-hand testimonial evidence of candidate's application of practical tasks • simulation exercises that reproduce normal work conditions • third-party evidence • workplace documentation • portfolio. <p>This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.</p>
Guidance information for assessment	<p>Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).</p>

Range Statement

RANGE STATEMENT

The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.

<p><i>Nutritional requirements</i> may include:</p>	<ul style="list-style-type: none"> • carbohydrate • protein • fat • roughage • vitamin • mineral and trace elements • water.
<p><i>Animals</i> may include:</p>	<ul style="list-style-type: none"> • animals commonly encountered within the industry workplace and may cover both native and introduced species • animals from the six major animal groups (mammals, birds, reptiles, amphibians, fish and invertebrates).
<p><i>Nutrient sources</i> may include:</p>	<ul style="list-style-type: none"> • carnivores: <ul style="list-style-type: none"> • insectivores • piscivores • herbivores: <ul style="list-style-type: none"> • folivores • frugivores • grainivores • mucivores • nectivores • palynivores • xylophages • omnivores.
<p><i>Feeding strategies and methods</i> may include:</p>	<ul style="list-style-type: none"> • locating food sources to ensure adequate supplies throughout the year • modifying diet for younger or special needs animals • providing food at suitable intervals for animal species • presenting food in ways that reflect natural habitat and encourage active foraging or

RANGE STATEMENT	
	<p>hunting</p> <ul style="list-style-type: none"> • preparation and distribution of food to: <ul style="list-style-type: none"> • minimise opportunities for theft by other animals or pests • encourage consumption before food deteriorates or loses nutritional quality • reflect ways that food would be available in the wild where possible • provide the best source of nutrients available within budget and seasonal availability • ensure all animals in enclosure get adequate access • removing stale, contaminated or decomposed food to discourage vermin.
<i>Methods used to monitor nutritional uptake</i> may include:	<ul style="list-style-type: none"> • blood and faecal tests to check nutritional uptake • comparing food distributed and food not eaten • estimating condition scores • weighing animals.
<i>Hazards to animal and human health from food sources</i> may include:	<ul style="list-style-type: none"> • animal movement and handling • contamination of foodstuffs from vermin, bacteria, fungus, virus and other sources • contamination from other animal diet materials that are potentially toxic to some species • manual handling and general food preparation, storage and distribution equipment • organic and other dusts • plants and other materials thrown into animal enclosures by the public • possibility of zoonotic infection • shelf life of foodstuffs.
<i>Animal profiles</i> may include:	<ul style="list-style-type: none"> • species classifications: <ul style="list-style-type: none"> • age • sex • breeding status • other characteristics • seasonal requirements, including hibernating animals • climatic requirements • activity levels

RANGE STATEMENT	
<p><i>Species requirements</i> may include:</p>	<ul style="list-style-type: none"> • food presentation needs: <ul style="list-style-type: none"> • fresh grazing • fresh meat • live food • food sources: <ul style="list-style-type: none"> • catering for animals recovering from illness or injury • highly specific food sources for particular animals such as koalas • seasonal availability • food preparation: <ul style="list-style-type: none"> • dried or semi-dried foodstuffs • stage of decomposition of meat products • stage of development of plants or insects • vitamin, mineral and other supplements • whole items to allow opportunity for animal to prepare • water requirements: <ul style="list-style-type: none"> • running water • water from other food sources.
<p><i>Abnormal feed intake or feeding behaviour</i> may include:</p>	<ul style="list-style-type: none"> • demonstrating signs of stress during eating activities • disinterest in food • drinking excess water • gorging food • not drinking normal amounts of water • reluctance to eat when other animals are nearby • selectively eating.
<p><i>Reasons for poor response to diet</i> may include:</p>	<ul style="list-style-type: none"> • health problems: <ul style="list-style-type: none"> • digestive system disorder • metabolic disorder • parasite load • teeth condition • other underlying illness • food sources: <ul style="list-style-type: none"> • food presented in an inappropriate way for species • food quality • food quantity

RANGE STATEMENT

	<ul style="list-style-type: none"> • food spoilage due to weather and climatic conditions or poor storage • inappropriate food sources for species • environmental and behavioural conditions: <ul style="list-style-type: none"> • dominant animals taking most of food • lack of space for individual animals to feed • distress caused by proximity of other animals nearby.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a unit of competency.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.
---	--

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
1. Assess the situation and plan response	<p>1.1. <i>Risk posed to self, others and animals</i> is assessed.</p> <p>1.2. <i>Options for assisting animals</i> are evaluated and procedures selected with reference to workplace protocols and regulations.</p> <p>1.3. <i>Animals</i> are identified and appropriate <i>equipment</i> is selected for the rescue.</p> <p>1.4. <i>Occupational health and safety (OHS) procedures</i> and <i>personal protective equipment</i> are used at all times when handling animals.</p>
2. Capture and protect animal	<p>2.1. <i>Basic animal care</i> is provided to minimise stress to animals.</p> <p>2.2. Animal is caught and handled <i>safely and humanely</i> to minimise pain and potential injuries.</p> <p>2.3. Animal is reassured in a caring manner and made comfortable using available resources.</p>

ELEMENT	PERFORMANCE CRITERIA
	2.4. Physical condition and vital signs of the animal are assessed.
3. Provide first aid assistance	3.1. Basic first aid is provided in accordance with <i>established animal first aid procedures</i> . 3.2. Treatment is sought from others as appropriate and required. 3.3. <i>Advice and assistance</i> are sought from supervisor or appropriate personnel in respect to future options for animal. 3.4. <i>Information on animal</i> is collected and recorded in accordance with legislative and organisational requirements.

Required Skills and Knowledge

REQUIRED SKILLS AND KNOWLEDGE

This section describes the skills and knowledge required for this unit.

Required skills

- complete relevant work-related documentation and reports
- employ safe and environmentally responsible organisational systems and procedures when handling animals
- evaluate behaviour, signs, symptoms and objective measures that may indicate animal health is at risk
- follow workplace procedures for hazard identification and risk control
- gather and provide information in response to workplace requirements
- maintain the highest standards of hygiene and infection control at all times to reduce the risk of infection and cross-infection
- observe, document and report findings on animal health and behaviour using workplace protocols and procedures
- respond to emergencies in line with practised actions
- literacy skills to read and follow organisational policies and procedures, including OHS
- numeracy skills to estimate, calculate and record routine workplace measures
- oral communication skills/language to fulfill the job role as specified by the organisation, including questioning, active listening, asking for clarification and seeking advice from supervisor
- interpersonal skills to work with others and relate to people from a range of cultural, social and religious backgrounds and with a range of physical and mental

REQUIRED SKILLS AND KNOWLEDGE

abilities

- problem-solving skills to use available resources, prioritise rescue tasks and determine who to contact for assistance
- use personal protective clothing and equipment correctly
- use safe manual handling techniques and/or equipment.

Required knowledge

- anatomical orientation terminology
- animal emergency network, including animal welfare bodies and support facilities
- animal first aid techniques
- animal temperaments and behaviours related to the associated hazards and risks to animals and staff during animal capture, restraint, inspection and treatment
- communication procedures and systems, and technology relevant to the organisation and the individual's work responsibilities
- examination techniques for health status
- first aid casualty management principles
- hazards associated with handling animals and control measures
- methods used to identify animals
- methods used to capture, restrain and examine animals including equipment
- natural animal behaviour relating to the characteristics of the species, age, health status and social needs
- organisation policies and procedures, including OHS and emergency procedures
- personal protective clothing and equipment and when and how it should be used
- physical conditions and vital signs of animals
- principles of animal welfare and ethics
- physiological features of animals
- relevant state or territory legislation and regulations relating to the practice of veterinary science, OHS, animal welfare and waste disposal
- safe animal handling techniques and procedures
- safe work practices
- workplace hygiene standards, disinfectants, cleaning agents, cleaning techniques and cleaning equipment and materials
- zoonotic diseases.

Evidence Guide

EVIDENCE GUIDE

The Evidence Guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment

EVIDENCE GUIDE	
Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this unit	<p>The evidence required to demonstrate competence in this unit must be relevant to workplace operations and satisfy all of the requirements of the performance criteria, required skills and knowledge and the range statement of this unit. Assessors should ensure that candidates can:</p> <ul style="list-style-type: none"> • plan rescue response through situation assessment • communicate effectively with others and follow instructions • carry out rescue procedures and protect animal in accordance with OHS requirements • apply basic animal care and first aid • seek advice and assistance regarding animal care and future options • gather information on animal and maintain records. <p>The skills and knowledge required to rescue animals and apply basic first aid must be transferable to a range of work environments and contexts and include the ability to deal with unplanned events.</p>
Context of and specific resources for assessment	<p>Assessment of this unit is to be practical in nature and will be most appropriately assessed in an animal care workplace or in a situation that reproduces normal work conditions.</p> <p>There must be access to a range of animals as well as relevant information, equipment and/or resources to enable one to demonstrate competence. Assessment must be relevant to the industry sector in which candidates are working and must cover a minimum of one species from at least two of the six major animal groups OR at least three breeds from within one of the six major animal groups (mammals, fish, birds, amphibians, reptiles, invertebrates).</p>
Method of assessment	<p>To ensure consistency in one's performance, competency should be demonstrated, to industry defined standards, on more than one occasion over a period of time in order to cover a variety of circumstances and where possible,</p>

EVIDENCE GUIDE	
	<p>over a number of assessment activities.</p> <p>The assessment strategy must include practical skills assessment. Suggested strategies for this unit are:</p> <ul style="list-style-type: none"> • written and/or oral assessment of candidate's required knowledge • observed, documented and first-hand testimonial evidence of candidate's application of practical tasks • simulation exercises that reproduce normal work conditions • third-party evidence • workplace documentation • portfolio. <p>This unit may be assessed in a holistic way with other units of competency relevant to the industry sector, workplace and job role.</p>
Guidance information for assessment	<p>Assessment methods should reflect workplace demands (e.g. literacy and numeracy demands) and the needs of particular target groups (e.g. people with disabilities, Aboriginal and Torres Strait Islander people, women, people with a language background other than English, youth and people from low socioeconomic backgrounds).</p>

Range Statement

RANGE STATEMENT	
<p>The range statement relates to the unit of competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Risk posed to self, others and animals</i> may include:</p>	<ul style="list-style-type: none"> • to self and others from animals: <ul style="list-style-type: none"> • attack by other animals • bites, kicks and scratches • envenomation

RANGE STATEMENT

	<ul style="list-style-type: none"> • crush injuries • zoonoses and infective agent release • to self and others from humans: <ul style="list-style-type: none"> • injury caused by inexperienced handling capture techniques or by not following protocols • unsuccessful rescue due to: <ul style="list-style-type: none"> • inexperienced assistants using poor techniques • using inadequate or unsuitable equipment • not following agreed protocols • poor communication of procedures to be followed • environmental hazards to self, others and animals: <ul style="list-style-type: none"> • contaminated sites • chemical spillage • electrocution • fire and smoke • flood • potential cave-ins • rocky or unstable terrain • traffic • weather and climatic conditions • to animals: <ul style="list-style-type: none"> • inability to assess extent of injury and needs due to inaccessible or remote location • inability to rescue due to lack of suitable equipment or poor site access • injury as a result of capture methods used • injury as a result of inexperienced handlers or volunteers • injury or death due to the trauma of rescue or capture.
<p><i>Options for assisting animals</i> may include:</p>	<ul style="list-style-type: none"> • animal needs: <ul style="list-style-type: none"> • food, water and shelter • reassurance • restraint to prevent further trauma or injury

Co-requisite units		

ACMWHS401A Maintain workplace health and safety processes

Modification History

Release	TP Version	Comments
1	ACM10v3	Initial release

Unit Descriptor

This Unit of Competency covers the process required by an employee with supervisory responsibilities, to maintain organisation workplace health and safety processes.

Application of the Unit

This Unit is intended to be applied at the level of team leader or supervisor.

NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented Registered Training Organisations are advised to contextualise the unit of competency by referring to the existing State/Territory OHS Legislative requirements as well as any specific workplace risks, hazards and associated safety practices.

In addition to legal and ethical responsibilities, all Units of Competency in the ACM10 Animal Care and Management Training Package have the requirement for animals to be handled gently and calmly. The individual is required to exhibit appropriate care for animals so that stress and discomfort is minimised.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this unit. Therefore, it will be necessary to check with the relevant State or Territory regulators for current licensing, legislative or regulatory requirements before undertaking this unit.

Pre-Requisites

Employability Skills Information

This Unit contains employability skills

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|--|--|
| 1. Provide information to the work group | <p>1.1 Relevant requirements of <i>workplace health and safety legislation, standards, codes of practice/compliance codes, guidance materials</i> and safe working procedures and practices are explained to the work group clearly and accurately.</p> <p>1.2 Information on <i>organisation policies and procedures</i> is provided to the work group in a readily accessible manner and clearly explained.</p> <p>1.3 Roles and responsibilities of health and safety representatives and workplace health and safety committees, supervisors and managers are clearly explained.</p> <p>1.4 Information is provided to the work group, in an accessible and understandable format, on <i>hazards</i>, the outcomes of <i>risk assessments</i>, and required <i>risk controls</i>.</p> |
| 2. Ensure others are able to implement safe work practices | <p>2.1 <i>Personal protective equipment</i> appropriate to the work is available and functional.</p> <p>2.2 Processes are implemented to confirm that others in the work group can identify hazards, assess risks and required risk controls and are following safe work practices, and organisation policies and procedures.</p> <p>2.3 Workplace health and safety training needs are identified and either addressed or these needs are reported to those with control.</p> |
| 3. Implement workplace health and safety participative processes | <p>3.1 The work group is consulted and provided with advice in relation to workplace health and safety matters relevant to their work.</p> <p>3.2 Workplace health and safety issues raised are dealt with</p> |

ELEMENT**PERFORMANCE CRITERIA**

- promptly, and in accordance with organisation procedures and legislative requirements, or referred to appropriate personnel.
- 3.3 Outcomes of consultation regarding workplace health and safety are recorded and promptly communicated to the work group.
4. Monitor compliance with work procedures
- 4.1 **Work procedures** are checked for availability, clarity and completeness, addressing any deficiencies or reporting them to appropriate persons.
- 4.2 Any deviations from procedures are identified and addressed or reported to appropriate persons.
- 4.3 **Hazard identification and reporting processes** are evaluated for effectiveness and any deficiencies are addressed or reported to appropriate persons.
- 4.4 **Workplace health and safety housekeeping practices** are monitored to ensure that workplace standards are maintained, and action is taken to address any deficiencies.
- 4.5 Own behaviour is consistent with organisation safe working procedures and practices.
5. Implement hazard identification, risk assessment and risk control procedures
- 5.1 Hazards are identified, assessed and eliminated with **residual risk** reported according to organisation procedures.
- 5.2 Risk assessments are conducted.
- 5.3 Control measures are developed, taking account of the **hierarchy of risk control**.
- 5.4 Outcomes of risk assessments are implemented and identified risk controls supported.
- 5.5 Deficiencies in workplace health and safety risk controls are identified and addressed and/or reported in accordance with organisation procedures.
- 5.6 Personal professional limitations are identified and **expert advice** is sought as required.
6. Implement organisation procedures for maintaining workplace health and safety records
- 6.1 Feedback is obtained to ensure that work group is aware of organisation reporting requirements.
- 6.2 **Workplace health and safety records** are reviewed to confirm that they are completed in an accurate, thorough and timely manner in accordance with **legislative** and organisation requirements.
- 6.3 Aggregate information and data from records is used to identify hazards and monitor risk controls.
7. Implement emergency procedures
- 7.1 Feedback is obtained to ensure that **emergency** procedures are available and known by the work group.
- 7.2 Processes are implemented to ensure that **emergency**

ELEMENT**PERFORMANCE CRITERIA**

equipment is available and routinely checked for functionality.

7.3 Processes are implemented to ensure that others in the work group are able to respond appropriately to emergencies.

7.4 Investigations are conducted, or contributed to, to identify cause of emergencies.

7.5 Control measures to prevent recurrence and minimise risk of emergencies are identified and implemented or supported.

Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills

Required skills include:

It is critical that the candidate demonstrate the ability to maintain workplace health and safety processes in the work context particularly in relation to the supervision of a small workgroup by:

- addressing their own health and safety
- addressing health and safety of others who may be affected by their actions
- supporting members of the workgroup who may be less experienced in the workplace in regard to workplace health and safety matters
- taking initiative to address hazards and manage risks at a systemic level.

In addition, the candidate must be able to:

- communicate with personnel in the work team, other work teams, managers and experts advisers
- conduct team meetings
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- supervise and direct staff
- take into account, use and promote opportunities to address waste minimisation, environmental responsibility and sustainable practice issues
- use language and literacy skills to interpret workplace health and safety documentation
- use technical skills to access workplace health and safety information.

Required knowledge

Required knowledge includes:

- general duty requirements of the national Work Health and Safety model and relevant

state/territory legislation that influence regulatory requirements relevant to the particular industry/type of worksite

- hazard identification procedures such as workplace inspections and review of workplace data
- knowledge and understanding of guidance material including codes of practice/compliance codes relevant to the particular industry/type of work site
- legislative requirements for record keeping and reporting
- nature of common workplace hazards for example chemicals, noise, manual handling, work postures, underfoot hazards and moving parts of machinery
- personal protective equipment requirements, including use, storage and maintenance
- principles of risk management including the hierarchy of risk control and its application
- relationship between workplace health and safety and sustainability in the workplace, including the importance of maintaining safety in the workplace to establishing and maintaining environmental, economic, workforce and social sustainability
- roles and responsibilities of health and safety representatives and workplace health and safety committees
- roles and responsibilities of workers, officers and Persons Conducting a Business or Undertaking (PCBUs)
- standards and guidelines related to emergency procedures
- sources of workplace health and safety information both internal and external to the workplace, including Safe Work Australia and relevant state/territory regulators
- the difference between hazard and risk
- workplace specific information, including:
 - designated person for raising workplace health and safety issues
 - hazard identification procedures relevant to the hazards in their workplace
 - hazards of the particular work environment
 - organisation procedures related to workplace health and safety including hazard, incident and injury reporting, hazard identification, risk assessment and control, consultation and participation, incident investigation, record keeping
 - potential emergency situations, alarms and signals and required response.
 - risk controls for specific hazards
 - work procedures related to the work of the team/work group, including use of personal protective equipment and emergency response.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.

Overview of assessment

Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>To demonstrate competence in this Unit, a candidate must be able to provide evidence of maintaining workplace health and safety processes in the workplace particularly in relation to the supervision of a small workgroup.</p> <p>Evidence gathered by an assessor to determine competence will include:</p> <ul style="list-style-type: none"> • written or verbal responses to scenarios and case studies • provision of workplace examples • evidence from workplace supervisor reports • portfolio of workplace documentation. <p>Evidence of workplace performance over time must be obtained to inform a judgement of competence.</p>
Context of and specific resources for assessment	<p>Products that could be used as evidence include:</p> <ul style="list-style-type: none"> • verbal and written responses to verbal, written or physical scenarios • completed examples of information provided to work group, risk assessments, risk controls developed, reports to managers, reports on workplace inspections, audits and emergency exercises • reports from work group members and supervisor. <p>Processes that could be used as evidence include:</p> <ul style="list-style-type: none"> • how information transfer was organised and conducted • how risk assessments were conducted • how deviations from workplace procedures were addressed.
Method of assessment	<p>This Unit should be assessed together with other Units of Competence relevant to the function or work role.</p>
Guidance information for assessment	<p>Access and equity considerations:</p> <ul style="list-style-type: none"> • all assessment should be applied with respect to relevant work-related access and equity issues • competence should reflect an ability to work in a culturally diverse environment. • assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities.

Range Statement

<p>The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Workplace health and safety legislation</i></p>	<p>Workplace health and safety legislation varies in different states and will include:</p> <ul style="list-style-type: none"> • National Work Health and Safety Model • current relevant State/Territory workplace health and safety legislation • relevant state/territory Manual Handling Code of Conduct.
<p><i>Standards</i></p>	<p>Standards include documents produced by national bodies, workplace health and safety regulators or industry bodies, that prescribe preventative action to avert occupational deaths, injuries and diseases.</p> <p>Standards are of an advisory nature only, except where a law adopts the standard and thus makes it mandatory.</p> <p>They may be called up as evidence in court or other enforcement action.</p>
<p><i>Codes of practice/compliance codes</i></p>	<p>Codes of practice/compliance codes are documents generally prepared to provide advice to employers and workers, of an acceptable way of achieving standards. They may:</p> <ul style="list-style-type: none"> • be incorporated into regulations • not relate to a standard • be called up as evidence in court or other enforcement action.
<p><i>Guidance material</i></p>	<p>Guidance material is an advisory technical document, providing detailed information for use by unions, employers, management, workplace health and safety committee members and representatives, safety officers and others requiring guidance. It</p> <ul style="list-style-type: none"> • advises on 'what to do' and 'how to do it'. • has no legal standing.

<p><i>Organisation policies and procedures</i></p>	<p>Organisation policies and procedures include policies and procedures underpinning the management of workplace health and safety, including:</p> <ul style="list-style-type: none"> • hazard, incident and injury reporting • hazard identification, risk assessment and control • human resources policies and procedures such as harassment and grievance procedures, inductions programs, team meetings, alcohol and drug policies • consultation and participation • incident investigation • quality system documentation.
<p><i>Hazard</i></p>	<p>A hazard is a source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these.</p> <p>Common workplace hazards (from Safe Work Australia <i>Work Health and Safety Risks - Code of Practice</i>) include:</p> <ul style="list-style-type: none"> • manual tasks - overexertion or repetitive movement can cause muscular strain • gravity - falling objects, falls, slips and trips of people can cause fractures, bruises, lacerations, dislocations, concussion, permanent injuries or death • electricity - potential ignition source. Exposure to live electrical wires can cause shock, burns or death from electrocution • machinery and equipment - being hit by moving vehicles, or being caught by moving parts of machinery can cause fractures, bruises, lacerations, dislocations, permanent injuries or death • hazardous chemicals - chemicals (such as acids, hydrocarbons, heavy metals) and dusts (such as asbestos and silica) can cause respiratory illnesses, cancers or dermatitis • extreme temperatures - heat can cause burns, heat stroke or fatigue. Cold can cause hypothermia or frost bite • noise - exposure to loud noise can cause permanent hearing damage • radiation - ultra violet, welding arc flashes, micro waves and lasers can cause burns, cancer or blindness

	<ul style="list-style-type: none"> • biological - micro-organisms can cause hepatitis, legionnaires' disease, Q fever, HIV/AIDS or allergies • psychosocial hazards - effects of work-related stress, bullying, violence and work-related fatigue. <p>Examples of hazards in an animal care environment may include:</p> <ul style="list-style-type: none"> • animal bites, envenomation, kicks, scratches or crush injuries • biological hazardous waste • bodily fluids • chemicals and medicines • sharps • zoonotic and exotic disease possibilities.
<i>Risk</i>	Risk in relation to any hazard means the probability and consequences of injury, illness or damage resulting from exposure to a hazard.
<i>Risk assessments</i>	<p>Risk assessments involve analysing a hazard to identify factors influencing the risk and the range of potential consequences:</p> <ul style="list-style-type: none"> • effectiveness of existing controls • likelihood of each consequence considering exposure and hazard level <p>And combining these in some way to obtain a level of risk.</p>
<i>Risk controls</i>	Risk controls include the devices and methods to, where practicable, eliminate the hazard or, where this is not practicable, minimise the risk associated with the hazard.
<i>Personal protective equipment</i>	<p>Personal protective equipment includes equipment worn by a person to provide protection from hazards, by providing a physical barrier between the person and the hazard and may include:</p> <ul style="list-style-type: none"> • head protection • face and eye protection • respiratory protection • hearing protection • hand protection • clothing and footwear.
<i>Work procedures</i>	Work procedures include:

	<ul style="list-style-type: none"> • batch specifications • operator or manufacturer manuals • procedures for selecting, fitting, using and maintaining personal protective equipment • standard operating procedures.
<i>Hazard identification</i>	<p>Hazards identification is the process of identifying sources of harm, and may be required:</p> <ul style="list-style-type: none"> • before new forms of work and organisation of work are implemented • before changes are made to workplace, equipment, work processes or work arrangements • as part of planning major tasks or activities, such as equipment shutdowns • following an incident report • when new knowledge becomes available • at regular intervals during normal operations • prior to disposal of equipment, or materials.
<i>Reporting procedures</i>	<p>Reporting procedures include:</p> <ul style="list-style-type: none"> • hazards reports • incident reports • maintenance requests and reports • reports on completion of inspections • reports of non-compliance with work procedures • reporting on progress of action plans.
<i>Workplace health and safety housekeeping practices</i>	<p>Workplace health and safety housekeeping practices address items such as:</p> <ul style="list-style-type: none"> • functioning services, such as lighting, air flow and ventilation, emergency lighting • storage areas, including manual handling issues, storage, personal protective equipment • signage • underfoot conditions • unobstructed walkways and emergency exits • work space around equipment and machinery • workplace cleanliness and tidiness.
<i>Residual risk</i>	<p>Residual risk is the risk which remains after controls have been implemented.</p>
<i>Hierarchy of risk control</i>	<p>Hierarchy of risk control (from Safe Work Australia <i>Work Health and Safety Risks - Code of Practice</i>) includes:</p>

	<ul style="list-style-type: none"> • Level 1 controls <ul style="list-style-type: none"> • eliminate hazards • Level 2 controls <ul style="list-style-type: none"> • substitute the hazard with something safer • isolate the hazard from people • use engineering controls • Level 3 controls <ul style="list-style-type: none"> • use administrative controls • use personal protective equipment (PPE).
<i>Expert advice</i>	<p>Expert advice can be obtained from persons either internal or external to the organisation including:</p> <ul style="list-style-type: none"> • audiologists • ergonomists • employee assistance and workplace counselling services • occupational health professionals • occupational hygienists • health and safety representatives • workplace health and safety committees • safety engineers • safety professionals • toxicologists <p>Expert advice may also be obtained from other persons providing specific technical knowledge or expertise in areas related to workplace health and safety including:</p> <ul style="list-style-type: none"> • engineers (e.g. design, acoustic, mechanical, civil) • health professionals • injury management advisors • legal practitioners with experience in workplace health and safety • maintenance and trade persons • regulatory bodies • risk managers • security and emergency response personnel • workplace trainers and assessors.
<i>Workplace health and safety records</i>	<p>Workplace health and safety records may include:</p> <ul style="list-style-type: none"> • employees handbooks • environmental monitoring records • first aid records

	<ul style="list-style-type: none"> • hazard, incident and investigation reports • health surveillance records • job safety analyses (JSAs), safe work method statements and risk assessments • maintenance and testing reports • material safety data sheets (MSDSs) and registers • minutes of meetings • plant and equipment operation records, including those relevant to registered plant • training records • workplace inspection reports.
<i>Legislative</i>	<p>Legislative requirements for record keeping include those specified under workplace health and safety legislation for:</p> <ul style="list-style-type: none"> • serious incident and injury reporting • registered plant • hazardous substances and dangerous goods • environmental monitoring • health surveillance <p>Privacy legislation.</p>
<i>Emergencies</i>	<p>Emergencies may include any abnormal or sudden event that requires immediate action, such as:</p> <ul style="list-style-type: none"> • serious injury events • events requiring evacuation • explosion and bomb alerts • external emergencies and natural disasters, such as flood, storm and traffic accident impacting on the organisation • fires and explosions • hazardous substance and chemical spills • internal emergencies, such as loss of power or water supply and structural collapse • security emergencies, such as armed robberies, intruders and disturbed persons.
<i>Emergency equipment</i>	<p>Emergency equipment is equipment required as part of the emergency response by the organisation and includes:</p> <ul style="list-style-type: none"> • communication equipment • evacuation alarms • evacuation equipment, especially that for disabled persons

	<ul style="list-style-type: none">• eye wash shower or portable eye washes• fire extinguishers and equipment• first aid equipment• items of clothing, such as coloured hats and vests• torches.

Unit Sector(s)

Workplace health and safety

ACMWHS501A Manage workplace health and safety processes

Modification History

Release	TP Version	Comments
1	ACM10v3	Initial release

Unit Descriptor

This Unit of Competency covers the process required by an individual responsible for ongoing management of workplace health and safety within an area of management responsibility, where the workplace health and safety management processes have been set up by other persons, either internal or external to the organisation.

Application of the Unit

This Unit is intended for application by a manager of a small organisation or several work groups or a larger group within an organisation. Work is likely to have a focus on maintaining already established processes and the Unit assumes that workplace health and safety advice and expertise would be available.

NOTE: The terms Occupational Health and Safety (OHS) and Work Health and Safety (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the National Model WHS Legislation has not been implemented Registered Training Organisations are advised to contextualise the unit of competency by referring to the existing State/Territory OHS Legislative requirements as well as any specific workplace risks, hazards and associated safety practices.

In addition to legal and ethical responsibilities, all Units of Competency in the ACM10 Animal Care and Management Training Package have the requirement for animals to be handled gently and calmly. The individual is required to exhibit appropriate care for animals so that stress and discomfort is minimised.

Licensing/Regulatory Information

Licensing, legislative, regulatory or certification requirements may apply to this unit. Therefore, it will be necessary to check with the relevant State or Territory regulators for current licensing, legislative or regulatory requirements before undertaking this unit.

Pre-Requisites

Nil

Employability Skills Information

This Unit contains employability skills.

Elements and Performance Criteria Pre-Content

Elements describe the essential outcomes of a Unit of Competency.

Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the required skills and knowledge section and the range statement. Assessment of performance is to be consistent with the evidence guide.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

- | | |
|---|---|
| 1. Manage workplace health and safety information and records | <p>1.1 Relevant <i>workplace health and safety legislation, standards, codes of practice/compliance codes, guidance materials</i> and <i>other sources of workplace health and safety information</i> are identified, accessed and evaluated for their relevance to the specific work context.</p> <p>1.2 Information on workplace health and safety requirements, trends and <i>risk controls</i> are collected, collated and provided.</p> <p>1.3 Records and record keeping processes are reviewed to ensure that <i>legal requirements</i> for <i>workplace health and safety record</i> keeping are identified and addressed.</p> <p>1.4 Processes are implemented and monitored to ensure that workplace health and safety records are accurately completed, collected and stored in accordance with legal requirements and workplace procedures.</p> |
| 2. Manage workplace health and safety participative processes | <p>2.1 <i>Participative processes</i> are monitored to ensure compliance with legislative requirements and <i>organisation procedures</i>.</p> <p>2.2 Information provided to employees is evaluated to ensure it is in a readily accessible and understandable format.</p> <p>2.3 Processes are implemented and monitored to ensure that workgroup members have an opportunity, either directly or through their representative, to contribute to decisions that may affect their health and safety.</p> <p>2.4 Processes for addressing workplace health and safety issues</p> |

ELEMENT**PERFORMANCE CRITERIA**

- are evaluated to ensure issues raised through *consultation* are resolved promptly and in line with organisation procedures and legislative requirements.
- 2.5 Information is provided promptly about the outcomes of consultation in a format and medium that is readily accessible to employees.
3. Manage workplace health and safety risk management processes
- 3.1 Processes for *hazard, incident*, and injury reporting and investigation are reviewed to ensure compliance with legislative requirements and to inform future prevention strategies.
- 3.2 Processes are monitored to ensure that *hazard identification* and *risk assessments* occur according to organisation procedures.
- 3.3 Risk controls and hazard specific procedures are checked to ensure consistency with the *hierarchy of risk control* and are monitored to support compliance with legislative and regulatory requirements.
- 3.4 Any workplace health and safety implications of either proposed or implemented changes to the workplace, work processes or organisation of work are identified and addressed.
- 3.5 Limits of own professional expertise are recognised and *expert advisors* are consulted as required.
4. Manage workplace health and safety training program
- 4.1 Workplace health and safety training needs assessment is undertaken for workgroup members that takes account of legislative and regulatory requirements, internal policies and procedures, existing skills of workgroup members and risk control requirements.
- 4.2 Training programs are implemented and monitored to ensure identified workplace health and safety training requirements are addressed.
- 4.3 Processes to ensure that all new employees receive *workplace health and safety induction* are implemented and monitored.
- 4.4 Relevant workplace health and safety and training specialists are accessed and consulted as required, in the development and implementation of the workplace health and safety training program.
5. Manage workplace health and safety continuous improvement process
- 5.1 Input from individuals and workgroup is considered in identifying and implementing workplace health and safety improvement.
- 5.2 Workplace health and safety priorities are determined in consultation with appropriate managers and *stakeholders*.

ELEMENT**PERFORMANCE CRITERIA**

5.3 *Workplace health and safety action plans* are developed taking account of priorities and training needs.

5.4 Achievements against the workplace health and safety plans are monitored and plans updated accordingly.

Required Skills and Knowledge

This section describes the skills and knowledge required for this Unit.

Required skills

Required skills include:

It is critical that the candidate demonstrate the ability to manage workplace health and safety processes for a small organisation or group(s) of persons undertaking a range of work.

In addition, the candidate must be able to:

- apply an action planning process
- assimilate information from a range of sources to evaluate effectiveness of processes
- communicate with supervisors, other managers, staff, workplace health and safety inspectors and expert advisers in a range of contexts, and using a range of media and formats
- conduct effective meetings
- develop solutions to complex workplace health and safety problems, utilising information from a range of sources
- identify and access appropriate external support services
- relate to people from a range of social, cultural and ethnic backgrounds and physical and mental abilities
- take into account and support staff to use opportunities to address waste minimisation, environmental responsibility and sustainable practice issues
- use language and literacy and conceptual skills to analyse and evaluate workplace health and safety information
- use technical skills to access workplace health and safety information.

Required knowledge

Required knowledge includes:

- knowledge and understanding of guidance material including codes of practice/compliance codes relevant to the particular industry/type of work site
- legal and practical requirements for workplace health and safety training
- legal requirements for workplace health and safety record keeping and reporting
- legislative requirements for consultation

- relationship between workplace health and safety and sustainability in the workplace, including the importance of maintaining safety in the workplace to establishing and maintaining environmental, economic, workforce and social sustainability
- risk assessment process including:
 - hazard identification procedures
 - principles of risk assessment
 - the hierarchy of risk control and its application
 - the difference between hazard and risk
- roles and responsibilities of health and safety representatives and workplace health and safety committees
- roles and responsibilities of workers, officers and Persons Conducting a Business or Undertaking (PCBUs)
- sources of workplace health and safety information both internal and external to the workplace, including Safe Work Australia and relevant state/territory regulators
- systems for identifying skill needs, for example:
 - identifying additional training needs of learners
 - performance reviews
 - training needs analysis
- the characteristics and composition of the workforce and how they may impact on the management of workplace health and safety
- the roles and responsibilities of employees, supervisors and managers in the workplace
- understanding of the national Work Health and Safety model and relevant state/territory legislation that influence regulatory requirements relevant to the particular industry/type of work site
- workplace specific information, including:
 - awards and enterprise agreements that impact on the particular workplace
 - designated person for raising workplace health and safety issues
 - hazard identification procedures relevant to the hazards in their workplace
 - hazards of the particular work environment and how they cause harm
 - organisation procedures related to workplace health and safety including hazard, incident and injury reporting, hazard identification, risk assessment and control, consultation and participation, incident investigation, record keeping
 - relevant workplace health and safety training and training providers
 - the characteristics and composition of the workforce and how they may impact on the management of workplace health and safety
 - workplace support services eg. employee assistance providers, workplace counselling and medical services.

Evidence Guide

The evidence guide provides advice on assessment and must be read in conjunction with the

performance criteria, required skills and knowledge, range statement and the Assessment Guidelines for the Training Package.	
Overview of assessment	
Critical aspects for assessment and evidence required to demonstrate competency in this Unit	<p>To demonstrate competence in this Unit, a candidate must be able to provide evidence of managing workplace health and safety processes for a small organisation or a group of persons undertaking a range of work.</p> <p>Evidence gathered by an assessor to determine competence will include:</p> <ul style="list-style-type: none"> • written or verbal responses to scenarios and case studies • provision of workplace examples • reports from persons who have been involved in the management processes • portfolio of workplace documentation. <p>Evidence of workplace performance over time must be obtained to inform a judgement of competence.</p>
Context of and specific resources for assessment	<p>Products that could be used as evidence include:</p> <ul style="list-style-type: none"> • verbal and written responses to verbal, written or physical scenarios • demonstrated action to scenarios, simulations and role plays • completed reports to senior managers • written directions, emails, memos and other information provided to supervisors in area of responsibility • reports from team leaders, senior managers, other managers, specialist advisors.. <p>Processes that could be used as evidence include:</p> <ul style="list-style-type: none"> • how training needs were identified and addressed • how action plans are developed, monitored and updated • how hazard identification and risk assessment occur • how incident investigation occurs.
Method of assessment	This Unit should be assessed together with other Units of Competence relevant to the function or work role.
Guidance information for	Access and equity considerations:

assessment	<ul style="list-style-type: none"> • all assessment should be applied with respect to relevant work-related access and equity issues • competence should reflect an ability to work in a culturally diverse environment. • assessors and trainers must take into account relevant access and equity issues, in particular relating to factors impacting on Aboriginal and/or Torres Strait Islander clients and communities.
------------	---

Range Statement

<p>The range statement relates to the Unit of Competency as a whole. It allows for different work environments and situations that may affect performance. Bold italicised wording, if used in the performance criteria, is detailed below. Essential operating conditions that may be present with training and assessment (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) may also be included.</p>	
<p><i>Workplace health and safety legislation</i></p>	<p>Workplace health and safety legislation varies in different states and will include:</p> <ul style="list-style-type: none"> • National Work Health and Safety Model • current relevant State/Territory workplace health and safety legislation • relevant state/territory Manual Handling Code of Conduct.
<p><i>Standards</i></p>	<p>Standards include documents produced by national bodies, workplace health and safety regulators or industry bodies, that prescribe preventative action to avert occupational deaths, injuries and diseases.</p> <p>Standards are of an advisory nature only, except where a law adopts the standard and thus makes it mandatory.</p> <p>They may be called up as evidence in court or other enforcement action.</p>
<p><i>Codes of practice/compliance codes</i></p>	<p>Codes of practice/compliance codes are documents generally prepared to provide advice to employers and workers, of an acceptable way of achieving standards. They may:</p> <ul style="list-style-type: none"> • be incorporated into regulations • not relate to a standard • be called up as evidence in court or other

	enforcement action.
<i>Guidance material</i>	<p>Guidance material is an advisory technical document, providing detailed information for use by unions, employers, management, health and safety committee members and representatives, safety officers and others requiring guidance. It advises on 'what to do' and 'how to do it'. It has no legal standing.</p>
<i>Other sources of workplace health and safety information</i>	<p>Other sources of workplace health and safety information include persons, organisations and references where knowledge about workplace health and safety may be obtained. These sources may be:</p> <ul style="list-style-type: none"> • internal including: <ul style="list-style-type: none"> • hazard, incident and investigation reports • workplace inspections • incident investigations • minutes of meetings • job safety analyses (JSAs) and risk assessments • organisation data such as insurance records, enforcement notices and actions, workers compensation data, workplace health and safety performance data • reports and audits • material safety data sheets (MSDSs) and registers • employees handbooks • employees including questionnaire results • health and safety representatives • workplace health and safety committees • manufacturers' manuals and specifications • external, including: <ul style="list-style-type: none"> • employee assistance program providers and workplace counselling services • relevant state workplace health and safety Acts, regulations, codes and guidance materials • other relevant legislation • Safe Work Australia • State/territory regulatory bodies • databases, such as national and state injury data • workplace health and safety specialists and consultants

	<ul style="list-style-type: none"> • newspapers and journals, trade/industry publications • internet sites • industry networks and associations, including unions and employer groups • workplace health and safety professional bodies • specialist advisors • research information.
<i>Workplace health and safety information</i>	<p>Workplace health and safety information includes:</p> <ul style="list-style-type: none"> • collated information on hazard incidents and injuries • information on hazards, including MSDSs • investigation and audit reports • outcomes of hazard identifications and workplace inspections • requirements under workplace health and safety legislation, regulations, standards, codes of practice/compliance codes and guidelines • rights and responsibilities • risk assessments • risk controls • training records • workplace health and safety policies and procedures • work procedures.
<i>Risk controls</i>	<p>Risk controls include the devices and methods to, where practicable, eliminate the hazard or, where this is not practicable, minimise the risk associated with the hazard.</p>
<i>Legal requirements</i>	<p>Legal requirements for record keeping include that specified under workplace health and safety legislation and regulations for:</p> <ul style="list-style-type: none"> • serious incident and injury reporting • registered plant • hazardous substances and dangerous goods • environmental monitoring • health surveillance • privacy legislation.
<i>Workplace health and safety records</i>	<p>Workplace health and safety records may include:</p> <ul style="list-style-type: none"> • employees handbooks

	<ul style="list-style-type: none"> • environmental monitoring records • first aid records • hazard, incident and investigation reports • health surveillance records • job safety analyses (JSAs), safe work method statements and risk assessments • maintenance and testing reports • material safety data sheets (MSDSs) and registers • minutes of meetings • plant and equipment operation records, including those relevant to registered plant • training records • workplace inspection reports.
<i>Participative processes</i>	<p>Participative processes include processes that:</p> <ul style="list-style-type: none"> • inform employees and other stakeholders of workplace health and safety matters • seek their input • offer opportunity for stakeholders to participate in decisions that may impact on their health and safety <p>Participative processes may also be referred to as 'consultative processes', however 'participation' implies a higher level of involvement.</p>
<i>Organisation policies and procedures</i>	<p>Organisation policies and procedures include:</p> <ul style="list-style-type: none"> • policies and procedures underpinning the management of workplace health and safety, including: <ul style="list-style-type: none"> • hazard, incident and injury reporting • hazard identification, risk assessment and control • human resources policies and procedures such as harassment and grievance procedures, induction programs, team meetings, alcohol and drug policies • consultation and participation • incident investigation • quality system documentation.
<i>Consultation</i>	<p>Consultation includes processes for seeking information or the opinions from one or more people prior to decision making.</p> <p>Consultation should particularly include those who</p>

	<p>may affect the outcomes or be affected by the decisions made but may also include specialist sources.</p>
<p>Hazard</p>	<p>A hazard is a source or situation with the potential for harm in terms of human injury or ill-health, damage to property, the environment, or a combination of these.</p> <p>Common workplace hazards (from Safe Work Australia <i>Work Health and Safety Risks - Code of Practice</i>) include:</p> <ul style="list-style-type: none"> • Manual tasks - overexertion or repetitive movement can cause muscular strain • Gravity - falling objects, falls, slips and trips of people can cause fractures, bruises, lacerations, dislocations, concussion, permanent injuries or death • Electricity - potential ignition source. Exposure to live electrical wires can cause shock, burns or death from electrocution • Machinery and equipment - being hit by moving vehicles, or being caught by moving parts of machinery can cause fractures, bruises, lacerations, dislocations, permanent injuries or death • Hazardous chemicals - chemicals (such as acids, hydrocarbons, heavy metals) and dusts (such as asbestos and silica) can cause respiratory illnesses, cancers or dermatitis • Extreme temperatures - heat can cause burns, heat stroke or fatigue. Cold can cause hypothermia or frost bite • Noise - exposure to loud noise can cause permanent hearing damage • Radiation - ultra violet, welding arc flashes, micro waves and lasers can cause burns, cancer or blindness • Biological - micro-organisms can cause hepatitis, legionnaires' disease, Q fever, HIV/AIDS or allergies • Psychosocial hazards - effects of work-related stress, bullying, violence and work-related fatigue. <p>Examples of hazards in an animal care environment may include:</p> <ul style="list-style-type: none"> • animal bites, envenomation, kicks, scratches or crush injuries

	<ul style="list-style-type: none"> • biological hazardous waste • bodily fluids • chemicals and medicines • sharps • zoonotic and exotic disease possibilities.
<i>Incident</i>	Incident includes any event that has caused or has the potential for injury, ill-health or damage.
<i>Hazard identification</i>	<p>Hazards identification is the process of identifying sources of harm, and may be required:</p> <ul style="list-style-type: none"> • before new forms of work and organisation of work are implemented • before changes are made to workplace, equipment, work processes or work arrangements • as part of planning major tasks or activities, such as equipment shutdowns • following an incident report • when new knowledge becomes available • at regular intervals during normal operations • prior to disposal of equipment, or materials.
<i>Risk</i>	Risk in relation to any hazard means the probability and consequences of injury, illness or damage resulting from exposure to a hazard.
<i>Risk assessments</i>	<p>Risk assessments involve analysing a hazard to:</p> <ul style="list-style-type: none"> • identify factors influencing the risk and the range of potential consequences: <ul style="list-style-type: none"> • effectiveness of existing controls • likelihood of each consequence considering exposure and hazard level • and combining these in some way to obtain a level of risk.
<i>Hierarchy of risk control</i>	<p>Hierarchy of risk control (from Safe Work Australia <i>Work Health and Safety Risks - Code of Practice</i>) includes:</p> <ul style="list-style-type: none"> • Level 1 controls <ul style="list-style-type: none"> • eliminate hazards • Level 2 controls <ul style="list-style-type: none"> • substitute the hazard with something safer • isolate the hazard from people • use engineering controls • Level 3 controls

	<ul style="list-style-type: none"> • use administrative controls • use personal protective equipment (PPE).
<i>Expert advisors</i>	<p>Expert advisors include persons either internal or external to the organisation including:</p> <ul style="list-style-type: none"> • audiologists • ergonomists • employee assistance and workplace counselling services • occupational health professionals • occupational hygienists • health and safety representatives • workplace health and safety committees • safety engineers • safety professionals • toxicologists <p>Expert advisors may also include other persons providing specific technical knowledge or expertise in areas related to workplace health and safety including:</p> <ul style="list-style-type: none"> • engineers (e.g. design, acoustic, mechanical, civil) • health professionals • injury management advisors • legal practitioners with experience in workplace health and safety • maintenance and trade persons • regulatory bodies • risk managers • security and emergency response personnel • workplace trainers and assessors.
<i>Workplace health and safety induction</i>	<p>Workplace health and safety induction includes the processes by which new employees are introduced to, and acquainted with their job and the new workplace, including familiarisation with:</p> <ul style="list-style-type: none"> • hazards and risks associated with the work, • risk control measures, • welfare facilities and • emergency response procedures.
<i>Stakeholders</i>	<p>Stakeholders are those people or organisations who may be affected by, or perceive themselves to be affected by an activity or decision including:</p> <ul style="list-style-type: none"> • officers • Persons Conducting a Business or Undertaking

	<p>(PCBUs)</p> <ul style="list-style-type: none"> • health and safety representatives • workplace health and safety committees • workers and contractors • the community.
<i>Workplace health and safety action plans</i>	<p>Workplace health and safety action plans include documented plans developed within the workplace to implement a systematic approach to workplace health and safety management and contain:</p> <ul style="list-style-type: none"> • actions that support an integrated strategy to address deficiencies, meet obligations or provide for improved outcomes • allocated responsibilities • timeframes.

Unit Sector(s)

Workplace health and safety

AHCAGB301 Keep production records for a primary production business

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to keep production business records such as paddock and livestock activity in accordance with workplace requirements auditing purposes.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Develop a system to collect and store production records	1.1 Determine physical records and inventories required for the organisation in consultation with the management team 1.2 Identify short-term methods for collecting information that are reliable, timely and efficient 1.3 Identify longer-term methods for sorting and storing information that allow effective analysis 1.4 Identify the most appropriate information collection and storage methods according to business requirements
2. Collect and maintain production records	2.1 Collect and maintain livestock records 2.2 Collect and maintain crop and pasture records 2.3 Collect and maintain records relating to farm vehicle and machinery use and maintenance 2.4 Collect and maintain property maintenance records 2.5 Collect and maintain records relating to stored produce 2.6 Collect and maintain relevant climatic records 2.7 Collect and maintain records relating to input purchases and use 2.8 Collect and maintain records relating to staff activities
3. Organise information for analysis	3.1 Transfer collected information into a manual or computerised recording system 3.2 Organise information into a format suitable for analysis, interpretation and dissemination 3.3 Use and maintain business equipment and technology in accordance with organisational and work health and safety requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCAGB301A Keep records for a primary production business.

Assessment Requirements for AHCAGB301 Keep production records for a primary production business

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate with others to obtain information
- collect information relating to primary production
- organise and store information
- maintain inventory records
- complete a livestock reconciliation
- follow enterprise work health and safety policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the organisation's policies and procedures applying to production records
- relevant legislation and codes, relating to the operation of a business and to the tasks undertaken
- recording processes to meet QA requirements
- the organisation's software and technology used to record and analyse production information.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAGB401 Plan and implement property improvement

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and implement property improvement.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work. They undertake a range of routine and non-routine activities and work in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine the	1.1 Discuss possible improvements for the planning period with the

Element	Performance criteria
improvement to be carried out	relevant people 1.2 Prioritise improvements to be implemented 1.3 Make plans to construct and maintain the improvements in line with medium-term property management and strategic plans 1.4 Make allocations from the available budget for the planned improvements
2. Arrange the design and layout of the property improvement	2.1 Investigate alternative plans and layouts based on how appropriate they are for the management plan and environmental and work health and safety considerations 2.2 Determine the most appropriate location for the improvement 2.3 Determine the most appropriate design for the improvement and calculate dimensions 2.4 Draw up plans for the improvement for the agreed improvement
3. Order materials for property improvement	3.1 Calculate materials required for the construction of the improvement from the drawn plans and discuss with relevant colleagues 3.2 Obtain quotes from suppliers for the materials and select suitable suppliers 3.3 Place orders with the chosen suppliers for the quantities, sizes and types of materials required
4. Prepare site for installation	4.1 Inspect site, and note key features for the planned property improvement 4.2 Inform all relevant people, including neighbours, of the proposed activities 4.3 Measure and peg selected site according to the prepared plans 4.4 Prepare the site to be ready for the improvement and take precautions to ensure that adverse environmental impacts are eliminated or minimised 4.5 Identify and assess work health and safety hazards and take responsible action throughout the site preparation activities
5. Supervise implementation of property improvement	5.1 Obtain all materials required for each work period and ensure they are on site ready for implementation 5.2 Implement property improvement according to the drawn plans and the prepared schedules 5.3 Undertake all work so that adverse environmental impacts are minimised or eliminated 5.4 Identify and assess work health and safety hazards are and take responsible action throughout the work 5.5 Maintain communication between those working at the site 5.6 Check the work regularly to ensure consistency with the drawn

Element	Performance criteria
	plans 5.7 Dispose of any waste material responsibly 5.8 Take corrective action where required
6. Carry out and monitor planned maintenance	6.1 Undertake and monitor planned maintenance to the improvement 6.2 Take precautions throughout the maintenance works to ensure adverse environmental impacts are minimised or eliminated 6.3 Identify and assess work health and safety hazards and take responsible action throughout the maintenance works

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCAGB401A Implement and monitor a property improvement plan.

Assessment Requirements for AHCAGB401 Plan and implement property improvement

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and implement the construction of physical resources
- organise and schedule the maintenance of physical resources
- analyse and assess the costs and benefits of plans and layouts in the light of all considerations including: work health and safety, financial, environmental and animal welfare
- prepare written plans and procedures for implementation by others
- prepare drawn plans or sketches
- estimate and order the materials required
- follow enterprise work health and safety policies
- follow enterprise sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- function and requirements of infrastructure requirements
- sustainable land and water use principles and practices applicable in the region
- environmental controls and codes of practice applicable to the business and to the improvement works
- whole property plan
- legislation, regulations and codes of practice relating to soil and water degradation issues, animal health and welfare, chemical use, building construction and workplace health and safety.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAGB402 Analyse and interpret production data

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to analyse and interpret animal, crop and horticultural production data.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes.

This unit applies to individuals who take responsibility for their own work. They undertake a range of routine and non-routine activities and work in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect and organise production data	1.1 Collect, organise and interpret information in a format suitable for analysis

Element	Performance criteria
	1.2 Determine accuracy and relevance of information held by the production unit 1.3 Ensure methods of collecting data are reliable and make efficient use of resources 1.4 Use business equipment to access, organise and monitor data 1.5 Update, modify, maintain and store information
2. Analyse and interpret data	2.1 Define objectives of analysis clearly 2.2 Ensure methods of data analysis are reliable and consistent 2.3 Ensure assumptions used in analyses are clear, justified and consistent with enterprise objectives 2.4 Ensure conclusions are supported by evidence and contribute to the achievement of business objectives
3. Present data	3.1 Prepare and report data in an appropriate format, style and structure using suitable business technology 3.2 Ensure structure and format of reports are clear and conform to enterprise requirements 3.3 Obtain feedback and comments on suitability and sufficiency of findings

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCAGB402A Analyse and interpret production data.

AHCAGB501 Develop climate risk management strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop climate risk management strategies.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Survey climate and	1.1 Obtain and interpret historical climate data from a range of

Element	Performance criteria
enterprise data	sources 1.2 Identify weather and climate risk factors 1.3 Collect information on normal and significant climate events and their impact on natural and rural systems 1.4 Detail current and historical property and enterprise production 1.5 Review short and long term enterprise goals to ensure they fit within climatic constraints 1.6 Source, present and update climate and enterprise data according to enterprise requirements
2. Climate risks and opportunities are identified and analysed	2.1 Analyse forecasted changes of seasonal climate 2.2 Identify climate risks and opportunities 2.3 Determine impact on production of different weather and climate risk factors according to enterprise requirements 2.4 Identify and develop qualitative and quantitative risk and opportunity factors 2.5 Evaluate importance of climate variability and significant climate events 2.6 Outline tactics to address a range of different climate variability risks and opportunities 2.7 Identify contingency options for enterprises and the business
3. Prepare climate risk management strategies	3.1 Analyse climate variability and seasonal climate forecasts 3.2 Address insurance and other options in business strategies 3.3 Address major climate risk factors in business strategies 3.4 Prepare financial outcomes for all strategies according to enterprise guidelines 3.5 Predict impacts on the environment, property value and equity for the preferred strategies 3.6 Review preferred production, enterprise or alternative strategies and select options according to enterprise requirements 3.7 Present a planned strategy to cope with variable climate and climate risk management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCAGB501 Develop climate risk management strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research, analyse and interpret climate and enterprise data
- prepare risk management strategies
- integrate climate risk with opportunities and management strategies at a business management level
- implement enterprise sustainability policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- current forecasting techniques and phenomena, such as El Nino, ENSO, Southern Oscillation Index (SOI) and Pacific and Indian Ocean SST patterns
- impact of weather and climate on business activities
- causes of general patterns of weather and climate over Australia
- climate variability and climate change
- direct and indirect impacts of climate variability on land management and sustainability
- property and enterprise management decisions affected by the variable climate
- recognition of climate risks and opportunities
- seasonal climate forecasting systems and related indicators
- natural disaster planning
- climate and weather issues pertaining to sustainable agriculture
- potential impacts of greenhouse warming on land and natural resource management
- strategic options and planning in response to climate variability for a range of seasons (normal, drier or wetter than normal), and other risks and opportunities

- calculating financial returns for different strategic options
- computer applications and Internet to access, record and analyse data
- principles of decision-making based on the variable climate and seasonal climate forecasts.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCAGB502 Plan and manage infrastructure requirements

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify infrastructure requirements for the enterprise
- source, construct and modify infrastructure to meet enterprise requirements
- develop an infrastructure maintenance program including scheduling and responsibilities
- establish a recording system for infrastructure purchase, construction and maintenance
- interpret, analyse and extract information from a range of sources
- identify, build and use network and support groups
- recognise potential opportunities to use or install more environmentally efficient systems or equipment
- implement enterprise work health and safety policies
- implement enterprise sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sustainable land use principles and practices
- property planning, financial management and enterprise budgeting systems and procedures
- environmental controls and codes of practice available to the organisation
- sound management practices and processes to minimise noise odours and debris from production processes
- sustainable land use principles and practices applicable in the region
- relevant legislation and regulations relating to infrastructure management.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine production	1.1 Obtain production information for consideration

Element	Performance criteria
process requirements	1.2 Confirm characteristics of the resources under production 1.3 Obtain recent and historical data from organisational records for input to production planning 1.4 Identify potential for improvements or innovations to inform production planning 1.5 Identify production processes required to achieve the targeted production and compare with those that currently exist 1.6 Use production planning information as input to other organisational planning processes 1.7 Establish appropriate biosecurity and Quality Assurance requirements
2. Determine monitoring requirements and systems	2.1 Establish targets for each production unit from the organisational management and strategic plans 2.2 Schedule production taking varying organisational factors into consideration 2.3 Establish and include environmental sustainability controls in the production plan 2.4 Establish monitoring points and performance indicators using target, environmental management and scheduling information 2.5 Develop and use risk management strategies when necessary
3. Monitor and evaluate the effectiveness of production processes	3.1 Ensure that performance indicators, targets and specifications are met and amendments to the process are made where necessary 3.2 Evaluate the effectiveness of the production processes at key points and make adjustments as necessary 3.3 Identify monitor and assess environmental impacts and workplace health and safety hazards throughout the production cycle 3.4 Modify the production process by shifting priorities and results when necessary 3.5 Analyse data, observations and documentation from the production process against the plan
4. Record and manage information	4.1 Prepare recommendations for future plans based on the analysis of production data 4.2 Prepare a report that documents the plan's implementation 4.2 Create, maintain and keep records and documentation as described in the production plan, the work health and safety requirements, and machinery and equipment management programs 4.4 Ensure that required information is available, accessible, meaningful and useful

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCAGB503A Plan and monitor production processes.

Assessment Requirements for AHCAGB503 Plan and monitor production processes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret gathered information on production processes
- interpret, analyse and extract information from a range sources such as professional literature, contracts, discussions and workshops
- identify, build and use network and support groups
- observe, identify and react appropriately to environmental implications and work health and safety hazards
- assess and adopt profitable innovations
- set yield targets and objectives and estimate timelines
- contribute to preparing enterprise budgets and financials
- implement enterprise work health and safety policies
- implement enterprise biosecurity policies
- implement enterprise sustainability policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental controls and codes of practice available to the organisation
- sustainable management practices
- sustainable land use principles and practices applicable in the region
- planning processes
- biosecurity and Quality Assurance requirements
- relevant legislation and regulations relating to production.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAGB504 Plan production for the whole business

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan production for the whole business.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Review and confirm the organisations	1.1 Compare the organisation's business goals and vision against

Element	Performance criteria
business goals and vision	actual business activities 1.2 Compare the values and community expectations of the organisation against actual business activities 1.3 Review the organisation's operating environment to identify potential opportunities and threats 1.4 Analyse the strengths and weaknesses of the organisation to identify potential areas for development 1.5 Access and discuss information on available innovations for use in the organisation with colleagues 1.6 Document the organisation's goals and vision
2. Prepare human resource development plans	2.1 Identify personal values, attributes and skills of the management team 2.2 Identify specific areas of expertise in the business 2.3 Assign specific areas of responsibility based on identified skills and attributes 2.4 Discuss and establish succession planning with management team 2.5 Identify skill development and training requirements 2.6 Obtain commitment to ongoing skill development from the management team 2.7 Establish communication strategies and develop a collaborative environment
3. Prepare a plan to manage land use	3.1 Survey land to identify natural resources, soil characteristics, water resources, and cultural heritage values of the property 3.2 Determine land use capacities from land condition tests and history of yields 3.3 Determine land use for individual paddocks based on land use capacities, products being produced, and the organisations goals and vision 3.4 Develop a plan to improve the management and use of land on the property, based on property resources and the organisation's goals and vision, and incorporate into the production plan 3.5 Develop organisational policy in relation to the environmental management of the land based on land use, prevalent pests and diseases, and the organisation's goals and vision
4. Plan production processes	4.1 Obtain production information for product under consideration 4.2 Confirm characteristics of the land under production and the quality of existing infrastructure 4.3 Obtain recent and historical data from organisational records for input to production planning 4.4 Collect and use information about organisational planning processes and potential for improvements or innovations to

Element	Performance criteria
	inform production planning 4.5 Identify production processes required to achieve the targeted production and compare with those that currently exist 4.6 Use production planning information as input to other organisational planning processes
5. Develop financial goals and risk management strategies	5.1 Identify the key financial performance indicators of each enterprise in the business from analysis of cash flow, profitability and net worth 5.2 Assess the financial performance of each enterprise in the business from analysis of key financial performance indicators and their impacts on business performance 5.3 Identify financial goals for each enterprise in the business from financial performance assessment and the organisation's goals and vision 5.4 Identify areas of risk in the organisation from analysis of the operating environment, production strategies, work health and safety records and staff skills 5.5 Identify and implement risk management strategies
6. Prepare and communicate the organisations vision, goals and plan	6.1 Integrate the organisation's goals and vision, human resource development, land-use, production and financial plans to reflect the decisions taken in each area 6.2 Articulate the organisation's goals, vision and plans to relevant staff 6.3 Establish a program to regularly review the organisations vision, goals and plans

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCAGB504A Plan production for the whole land/farm based business.

Assessment Requirements for AHCAGB504 Plan production for the whole business

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review strategic plans and production goals
- prepare enterprise budgets and calculate financial returns of the business
- develop financial management and marketing plans for the business
- review the natural resource base of the enterprise and incorporating principles of sustainability
- incorporate into production planning the personal aims and priorities of management and, the availability, productivity and training needs of labour
- assess the skills and expertise of self and colleagues
- facilitate group decision making within the business
- plan production processes
- assess environmental impacts and implement impact reduction techniques
- implement enterprise sustainability policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- holistic business planning and benchmarking
- marketplace in which the organisation operates
- land use planning including sustainable land use principles and practices
- soil nutrient cycling potential and limitations
- chemical and biological methods for pest control
- property planning, financial management and enterprise budgeting systems and procedures

- relevant State or Territory legislation, regulations and codes of practice which impact on rural production businesses
- monitoring strategies for financial, production, land use, and human resource development plans
- methods for assessing skills and expertise
- reasons for and methods of succession planning
- value and methods of risk assessment.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAGB506 Manage application technology

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency specifies the outcomes required to provide information or manage application technology in crops or pastures. The technology applies to the application of chemicals such as herbicides, fungicides, insecticide and fertilisers as well as biological and organic agents.

The unit involves the application of a broad knowledge base to identify and apply solutions to a range of problems. This includes plant morphology and physiology, plant protection, nutrition requirements, environmental impacts, the use of information technology and occupational health and safety hazards.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit of competency applies to work in a range of agricultural or support enterprises, such as agronomists and rural merchants. Work will be undertaken without supervision. Responsibility for and organisation of the work of others involved in the program may be required.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Analyse application requirements	1.1 Determine goals for application of agents following a review of enterprise production plans and in consultation with land manager 1.2 Access and review records of previous nutrition, pest, weed and disease management including the application of any agents 1.3 Access and review relevant climate, environmental and geographic data from available information systems and sources 1.4 Access and review yield monitoring data including yield variability 1.5 Access and review relevant soil, plant and water information from tests and records
2. Develop an application plan	2.1 Identify performance targets and indicators in the plan 2.2 Select appropriate agent/s, including adjuvants, method of application and equipment based on site analysis, recommendations, production requirements, environmental conditions and manufacturer's specifications 2.3 Select spray nozzles to achieve the optimum droplet size with minimal variation and deliver the appropriate liquid flow rate for the selected agent in the desired spray distribution pattern 2.4 Determine and monitor measures to control factors influencing the level of spray drift 2.5 Determine procedures to ensure compliance with the range of appropriate federal, state and local government legislation and regulations 2.6 Identify work health and safety hazards, assess risks and implement appropriate controls 2.7 Determine environmental impacts of application and implement appropriate clean up strategies to the area 2.8 Determine scheduling for applications taking the range of seasonal, geographic and resourcing factors into consideration 2.9 Determine the type, format, frequency and detail of record keeping required by legislation and undertaken by manager(s) and operators

Element	Performance criteria
3. Monitor and evaluate the effectiveness of the application plan	3.1 Evaluate the effectiveness of the application at key points and make adjustments as necessary 3.2 Monitor and assess environmental impacts and work health and safety hazards relating to application strategies throughout the implementation process 3.3 Make modifications to the plan as and when necessary for environmental, work health and safety, resourcing or effectiveness reasons 3.4 Analyse data, observations and documentation from the implementation of the application plan against the plan according to enterprise guidelines 3.5 Prepare recommendations for future strategies based on the analysis of the data 3.6 Record details of the implementation including information on any difficulties or issues faced, technical details, environmental and work health and safety impacts, recommendation for future action, results, costs and any available data analysis

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCAGB506 Manage application technology

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret, analyse and extract information from a range of sources
- establish processes, strategies, procedures and controls for the application of chemical and biological agents
- prepare written plans and procedures for implementation by others
- explain and deliver instructions about the plans and scheduling of operations
- identify and react appropriately to environmental implications and work health and safety hazards
- identify and assess weeds, pests, diseases and nutritional and other deficiencies
- formulate efficient, cost effective control programs
- read and interpret manufacturer's instructions and agent labels
- record recommendations and applications.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics of pest, weed and disease species including their life cycles and reproduction capability
- principles of integrated pest and weed management
- range and classes of fertilisers, herbicides, insecticides and fungicides available and their basic chemistry
- growth stages of weeds and plant morphology
- the effects on crops of weeds, pests, diseases and/or lack of soil fertility
- mode of action of chemical or biological control agents and long term effects of these agents with respect to plant back periods and resistance

- range and effect of different nozzles, pressures, spray patterns, droplet sizes and basic physics of droplets and fluids
- work health and safety hazards and controls and environmental impacts
- best management practices and processes to minimise the impact of agents
- federal, state and local government legislation and regulations.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAGB507 Select and use agricultural technology

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the selection and application of modern agricultural technology in production systems. Applications include the recording and reporting of farm activities, mapping, farm and production planning, data collection and analysis and variable rate technology. This unit assists land managers to make informed decisions specific to production systems and applications.

Applications in agricultural science range from spatial information tools to the precision application of production inputs and growth models for the improvement of production.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to persons who have a role in managing or operating a land based production business or providing expert advice such as consultants, industry specialists and extension officers.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Evaluate the need for agricultural technology	1.1 Identify and evaluate organisational tasks and processes that could be supported by technology applications 1.2 Assess opportunities and limitations for operational improvements that may result from adopting specific technology applications 1.3 Evaluate equipment, tool and resource requirements and select the most appropriate options 1.4 Evaluate the cost-benefit of using technology 1.5 Seek independent technical advice and sources of information as required 1.6 Develop a plan to incorporate the use of technology to improve operational efficiency, productivity and sustainability
2. Implement technology to manage production	2.1 Record, analyse and manage production data using technology 2.2 Develop treatment strategies or input requirements using technology 2.3 Collect, store and analyse data across the land based business using technology 2.4 Research information resources, report and communicate production management using technology 2.5 Integrate the use of technology to improve operational efficiency, production, profitability and sustainability
3. Evaluate the use of technology	3.1 Develop and review strategies to ensure the use of technology is cost effective and consistent with operational goals 3.2 Assess the need for additional training and support 3.3 Develop strategies to address barriers to the effective use of technology when necessary 3.4 Evaluate the impact of technology use on production levels, input costs and the cash flow budget 3.5 Develop strategies for monitoring, evaluating and incorporating future developments in technology

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCAGB507 Select and use agricultural technology

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify a range of technologies and how to apply them in an agricultural system
- obtain and process data and information using technology
- assess and review production information for application into farm management
- identify appropriate training and support for staff
- identify and manage issues that may arise in the use of the technology
- complete a cost and benefits analysis
- analytical skills to evaluate opportunities.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic principles of technology used for agricultural applications
- basic principles of cost-benefit analysis
- equipment, tool and resource requirements
- context in which particular organisations operate and how this may impact on the selection and use of technology
- potential barriers to learning, and strategies to address these
- range of technology options available to support organisational activities
- strategies that can be used to evaluate technology use
- training and technical support options available to the organisation to develop skills in the use of technology
- sources of information related to agricultural technology
- trends and developments in technology relevant to agriculture.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAGB508 Improve agricultural sustainability using renewable energy and recycle systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the development of planning strategies to address sustainability issues, using renewable energy sources and opportunities to recycle products, improve the efficiency of the business and reduce off-site impacts from the production system.

It will involve working in a safe manner and applying sustainable renewable energy systems to rural, regional and local conditions. All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to a person who has role in the management of the following land based business:

- Agricultural related industries
- Production Horticulture
- Agro-Forestry

This unit will require the consultation with external experts such as alternative energy consultants and suppliers of alternative energy equipment, planning authorities, State and Federal Government Departments who administer subsidies and provide advice.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify opportunities to reduce greenhouse gas emissions and use recycling	<p>1.1 Identify areas of each enterprise to improve efficient use of energy and cost savings to work practices, using renewable energy resources, recycling products and other ways to reduce greenhouse gas emissions.</p> <p>1.2 Identify available government subsidies for the implementation of strategies using renewable energy or recycling and potential cost savings to the business in the longer term.</p> <p>1.3 Identify the specified standards of quality, licensing, regulatory requirements, government legislation and safety issues for the introduction of any renewable energy resources and recycled products</p> <p>1.4 Identify potential income earnings capabilities to business by on selling energy excesses or recycled products.</p> <p>1.5 Measure improvement outcomes from the introduction of renewable energy sources and recycling products in relation to achieving greater sustainability.</p> <p>1.6 Identify and conduct risk assessment for work health and safety hazards</p>
2. Develop strategies to reduce greenhouse gas emissions and use recycling	<p>2.1 Develop strategies to apply principles of sustainability to address greenhouse gas emissions from using renewable energy resources, recycled products and improved work practices.</p> <p>2.2 Estimate plant, material, labour and other associated costs in consultation with appropriate person(s) or organization(s).</p> <p>2.3 Develop a budget for estimated plant, material, labour and other associated costs</p> <p>2.4 Develop effective work plan strategies for the introduction of renewable energy resources and recycled products.</p> <p>2.5 Investigate sources and availability of materials and human resources needed to complete work plan</p> <p>2.6 Develop risk management strategies including contingencies to maintain supply to contract on time and incorporate into the plan.</p> <p>2.7 Develop work health and safety risk control measures and establish procedures</p>

Element	Performance criteria
3. Implement strategies to reduce greenhouse gas emissions and use recycling	3.1 Implement and monitor the plan for renewable energy and recycling products to ensure on time supply of plant and materials. 3.2 Monitor the progress of strategies to reduce greenhouse gas emissions and recycling against schedule, quality requirements and budget. 3.3 Identify unplanned events and deal with safely and effectively, consistent with regulatory requirements and enterprise policy. 3.4 Review plan against required inputs and make adjustments to rectify any anomalies to meet and supply contractual arrangements on time. 3.5 Monitor work health and safety risk control measures and procedures and implement changes 3.6 Evaluate the improvement outcomes and document appropriate corrective action taken with a view to improvement.

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCAGB508 Improve agricultural sustainability using renewable energy and recycle systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify key parts of the enterprise operation that may be converted to renewable energy sources, reducing greenhouse emissions and recycling opportunities using key principles of sustainability
- establish a budget, organising materials and staff
- develop a plan to use renewable energy and recycling systems in agricultural systems including environmental risk management strategies
- develop workflow plan strategies and monitor progress of the plan during the implementation stages including work health and safety issues
- establish and evaluate improvement outcomes
- identify sustainability issues and implement associated systems for the use of renewable energy and recycling systems
- plan and budget cost efficient savings by implementing renewable energy of project
- monitor the plan and address contingency plans including risk management strategies
- recognise work health and safety hazards and implement control measures on the work site
- recognise environmental safety issues associated with the use of renewable energy
- organise materials, plant and human resources for implementation for the adoption of renewable energy or recycling opportunities
- measure and evaluate improvement outcomes.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- key principles of sustainability associated with using of renewable energy and recycling systems
- government legislation, regulatory requirements, licensing and subsidies
- environmental and work health and safety risk management strategies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify a range of software systems and how to apply them into a production system
- interpret production and land management maps to apply into everyday farming management
- identify erosion, soil management techniques, salinity, farming systems, bio-diversity and weeds by using GIS
- apply solutions to erosion, soil management techniques, salinity, farming systems, bio-diversity and weeds using GIS
- manage and co-ordinate work teams using GIS and associated technology
- complete a cost and benefits analysis
- use a computer, including computer aided drafting
- analysis digital map images
- communicate with staff and other parties on instruction and training in the use of GIS
- use self-diagnosis manuals to identify technical systems faults.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- financial management and strategic planning benefits from the implementation of a GIS
- legal concepts on the gathering of data to be used in GIS applications
- GIS applications and associated technology
- mapping principles of GIS
- computer concepts

- spatial calculations using GIS.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAGB510 Implement the introduction of biotechnology into the production system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the process of evaluating the implications of introducing bio-technology and genetically modified organisms into the current production system. Strategies are developed to implement and monitor the integration of bio-technology products in a sustainable system by preparing strategies for the implementation, monitoring and evaluating the integration bio-technology products into the production plan.

This technology will require producers to identify potential risks and benefits, responsibly manage all aspects of risks to the neighbours, local community, and to the environment, relevant to the existing and new production system.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to persons who have a role in managing a land based production business. This unit is likely to require consultation with external experts, such as extension officers from State Agricultural Departments, Agri-business representatives, agronomists and regulators including insurance agencies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Evaluate benefits and applications of introducing bio-technology in the production system	1.1 Identify information on bio-technology relevant to the enterprise by researching and analysing potential benefits and ramifications to the production system, the environment and others in the district 1.2 Explain how bio-technology can be integrated into the current production system, to improve business profitability and sustainability 1.3 Compare current and historical production data for the production system with potential for increased production 1.4 Investigate potential risks involved in the introduction of bio-technology to the current production system 1.5 Collate information in a clear and concise manner to determine informed decisions 1.6 Evaluate the implications for the integration of bio-technology into current production plan
2. Develop an implementation plan for the introduction of bio-technology into production system	2.1 Select the application of bio-technology suitable to local environment, climate, seasonal conditions, business goals and marketing objectives 2.2 Identify required changes to current production systems and develop suitable strategies for the application of a farm production management plan 2.3 Develop risk management strategies including quality assurance (QA) system principles consistent with production plan requirements and marketing boards 2.4 Identify all relevant legislation, regulatory and product supplier requirements and implement according to the production plan 2.5 Identify key roles and responsibilities of personnel including training requirements 2.6 Develop an implementation production management plan including risk management strategies and QA systems
3. Implement and manage bio-technology into the production system	3.1 Implement production, infrastructure and land management plans 3.2 Implement the risk management strategies for the production plan and record information in QA system 3.3 Manage scheduling of production processes taking organization factors and paddock operation into consideration 3.4 Manage integration of environmental values into the production

Element	Performance criteria
	process 3.5 Monitor risk management strategies plan and identify problems and issues by conducting a risk management audit on property
4. Evaluate management strategies	4.1 Evaluate potential results of threats in terms of natural resources, business assets, infrastructure, environmental and community 4.2 Identify preventative and reactive action and develop further contingency plans to minimise threats and maximise opportunities 4.3 Review risk management strategies plan aimed at ensuring business stability, sustainability and profitability, while protecting and preserving natural resources and business assets 4.4 Evaluate production plan for the introduction of bio-technology into production system

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to VBP154 Implement the introduction of biotechnology into the production system.

Assessment Requirements for AHCAGB510 Implement the introduction of biotechnology into the production system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research implications of introducing bio-technology for business
- identify applications for business and production systems
- develop and implement plans for production systems and risk management strategies
- recognise potential opportunities of introducing bio-technology (business and production)
- assess and adopt profitable innovations from the use of bio-technology products
- interpret, analyse and extract information from a range of sources such as professional literature, legal documents, discussions and workshops
- undertake cost benefit analysis in relation to the introduction of bio-technology
- communicate with industry contacts, colleagues and family regarding the land/farm based business
- design risk management strategies including installing a Total Quality Management System (TQMS)
- conduct a risk management audit before and after the introduction of bio-technology products
- complete and maintain appropriate quality assurance documentation for a TQMS.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- benefits and risks of introducing biotechnology into a production system
- principles of sustainability
- relevant State/Territory legislation, regulations and codes of practice with regards to work health and safety, use and control of hazardous substances and biotechnology in production systems

- financial cost analysis tools and techniques
- methods of risk assessment audits for the production system
- implementing, monitoring and maintenance of a Total Quality Management System (TQMS)
- stewardship to fellow farmers and community when using bio-technology in a production system.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAGB511 Develop and manage a plan for sustainable production reflecting sustainable production principles

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the process of developing a farm plan for a rural enterprise to reflect organic, biodynamic and biological farming principles. It requires the ability to determine the philosophy of the farm business. An audit of the farm and the resources will be undertaken to assess the current status of the property. A management plan is developed to ensure sustainability of the farm business and the natural areas on the property. The plan is to convert the property and the management system to reflect the philosophy and the orderly transition to the new short term and long-term goals. It is also to manage the production system including crops, pasture and livestock within the organic, biodynamic and biological farming system. Records will be kept to maintain the integrity and quality of the product and meet legal requirements for accreditation.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit is applicable to a person who has a role in managing a farm. This unit is likely to require consultation with certification bodies, auditors and producers with similar philosophies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop goals and objectives for an organic, biodynamic or biological enterprise	1.1 Establish long-term direction and purpose of the business by identifying and analysing the values, expectations and personal goals of the people involved 1.2 Identify business and personal strengths, weaknesses, opportunities and threats and strategies to address them 1.3 Investigate sources of information and support for conversion and plan the property conversion over a period of time including time lines and conversion costs
2. Audit the existing and natural resources on the property	2.1 Draw a property map to include land classes using classification terminology, fences and water systems, natural property features and infrastructure 2.2 Conduct a risk assessment of previous land use and an inventory of chemicals applied or evidence of application on the site 2.3 Identify areas at risk of soil degradation and develop strategies to protect the area 2.4 Develop and implement strategies to improve the health and the regeneration of remnant vegetation to support a diversity of living systems 2.5 Assess potential problem pests and weeds and use strategies to implement an eradication program, within the guidelines of the certification body
3. Develop and implement grazing and cropping strategies to improve biodiversity, recycling and sustainability in an organic, biodynamic or biological farm	3.1 Use soil test results to make recommendations for soil improvement with appropriate organic fertilisers and soil conditioners to ensure a mineral-balanced and healthy soil 3.2 Develop and implement an annual grazing program and strategies to optimize pasture growth and animal production 3.3 Develop and implement a strategy for the recycling of farm waste and effluent 3.4 Assess soil biological activity and apply suitable preparations and grazing strategies to improve the soil biota 3.5 Identify appropriate mulching and composting systems 3.6 Design and implement a plan using crop rotations to optimise soil fertility 3.7 Research the principles and application of biodynamic preparations
4. Manage animal health and welfare for	4.1 Plan strategies to preserve animal health including allowable treatments and grazing management in the short term and genetic

Element	Performance criteria
organic, biodynamic or biological production	improvement in the long term 4.2 Maintain livestock records to identify treated animals, including a record of all treatments including homeopathic remedies 4.3 Sustain the animal enterprise with pasture and suitable fodder and maintain consumption records to meet certification protocols
5 Manage customer feedback and satisfaction with organic, biodynamic or biological product quality and integrity	5.1 Develop and implement procedures to obtain, analyse and respond to customer feedback on farm product quality and integrity 5.2 Identify legal requirements to maintain organic, biodynamic or biological certification

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to VBP155 Develop and manage a plan for sustainable production reflecting organic, biodynamic and biological farming principles.

Assessment Requirements for AHCAGB511 Develop and manage a plan for sustainable production reflecting sustainable production principles

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine directions for the organic, biodynamic or biological business
- audit the natural resources on the property
- monitor legal and certification requirements impacting on the management of the property
- develop management strategies to address natural resource management issues
- research information on production changes and methods for the chosen philosophy
- ability to interpret accurate data
- communicate information to people and groups inside and outside the industry sector
- record treatments of parasites and diseases of animals with suitable preparations according to animal welfare and organic, biodynamic and biological farming principles
- assess and sample soils
- interpret and make recommendations regarding outcomes of soil tests
- recognise plants and pasture species
- calculate a feed budget
- document production processes and activities including developing a flow chart for the supply chain
- document a risk assessment
- develop procedures to respond to customer feedback
- analyse benefits to the family and farm from adopting the philosophy.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sustainable land management practices
- property planning process
- water, vegetation, livestock, pasture, soil, fire and wildlife management strategies within the accreditation guidelines
- legal requirements impacting on the whole farm plan
- risk management strategies
- credible sources of information relating to organic, biodynamic and biological farming principles and practices
- supply chain for the organic, biodynamic and biological farming sector and your position in the chain
- permitted/restricted and prohibited inputs and activities for Organic Production
- grazing management including feed budgeting and grazing strategies
- animal health and options for maintaining health based on pathogen life cycles and the use of suitable preparations
- maintaining biodiversity to complement the organic, biodynamic and biological farming philosophy
- principles of sowing according to moon phase and maintaining crops with biodynamic preparations.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAGB601 Develop export markets for produce

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to evaluate and develop a product for export.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities. They work in contexts that are subject to change and adapt a range of fundamental principles accordingly.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Evaluate export	1.1 Identify competitive advantages and disadvantages for the

Element	Performance criteria
potential	<p>proposed product in respect to the products entry to overseas markets</p> <p>1.2 Analyse features of potential markets in respect to cultural factors, quality requirements, government regulations and other economic, political and social factors</p> <p>1.3 Analyse business resources for their appropriateness and capacity to contribute to the marketing effort</p> <p>1.4 Identify available capital and time for the development of the export plan</p>
2. Develop export strategy	<p>2.1 Conduct customer analysis and the market niche defined</p> <p>2.2 Develop operational plan to address the market mix</p> <p>2.3 Prepare budgets to address the investment required in the operational plan</p> <p>2.4 Plan overseas visit to confirm the target market and initiate negotiations</p>
3. Implement export strategy	<p>3.1 Identify and address steps in an export transaction</p> <p>3.2 Identify and prepare documentation requirements for export</p>

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage price risk by developing a trading strategy.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities. They work in contexts that are subject to change and adapt a range of fundamental principles accordingly.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Agribusiness (AGB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Conduct market research	1.1 Collate and evaluate estimates of supply and demand 1.2 Analyse past trends and assess possible future scenarios 1.3 Relate own products to market indicators
2. Determine price required	2.1 Calculate cost of production and determine break-even price 2.2 Calculate overhead costs to be allocated against the enterprise 2.3 Determine margins for profit and risk 2.4 Set forward price objectives to meet cost of production, contribution to overheads and profit required 2.5 Evaluate personal attitude to risk
3. Develop sales plan	3.1 Evaluate cash markets and assess projected price trends 3.2 Obtain and assess forward contract information 3.3 Obtain and assess futures prices 3.4 Evaluate selling options against price objectives and the assessment of price movement risk 3.5 Assess taxation and cash flow implications 3.6 Develop appropriate mix of sale options in a trading strategy 3.7 Develop contingency plans to address possible shifts in price trend
4. Implement trading strategy	4.1 Seek appropriate expertise as required 4.2 Monitor market information and adjust trading strategy according to contingency plans

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCAGB606A Manage price risk through trading strategy.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCAGB606 Manage price risk through trading strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine cost of production
- allocate overhead costs against enterprises
- assess risk to financial returns through market or currency movements
- analyse trends and evaluating forecasts
- monitor and assess price movements
- implement a trading strategy for price risk management.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- supply, demand and price relationships
- price trends and sources of market information/forecasts
- cost of production
- overhead costs
- risk assessment and attitudes to risk
- selling options for the relevant commodity
- operation of futures markets, forward selling arrangements, put options
- foreign exchange rates
- contract law
- cash flow and taxation planning
- contingency planning.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAIS201 Assist with artificial insemination procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with artificial insemination procedures.

This unit applies to those who provide technical support to a registered veterinarian or licensed inseminator.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Artificial Insemination (AIS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assist with preparation of animals for insemination	1.1 Detect animals on heat and record or report information 1.2 Move animals on heat to the insemination area 1.3 Restrain animals using safe and humane techniques in line with enterprise animal welfare policies 1.4 Provide assistance for the appropriate preparation of tools and equipment 1.5 Select, use and maintain suitable personal protective equipment and clothing in line with enterprise work health and safety policies
2. Support insemination procedure	2.1 Sterilise and clean or dispose of insemination equipment 2.2 Identify and prepare recipient animal 2.3 Restrain recipient animal appropriately and assist the insemination procedure to optimise results 2.4 Record details of insemination, identification of the semen used and identifies of the female animals in line with enterprise requirements
3 Clean work area and equipment	3.1 Dispose of waste and debris appropriately in line with enterprise environmental policies 3.2 Clean and maintain work area and equipment appropriately 3.3 Return animals to designated area 3.4 Clean and maintain restraints and harnesses

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCAIS201A Assist with artificial insemination procedures.

Assessment Requirements for AHCAIS201 Assist with artificial insemination procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assist with preparation of animals for insemination
- support insemination procedure
- clean work area and equipment
- follow work health and safety policies
- follow animal welfare practices
- follow enterprise environmental policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- resource and manpower requirements, biosecurity requirements, industry standards, codes of practice and procedures for artificial insemination of the livestock species
- reproductive anatomy and reproductive physiology in the livestock species
- signs of heat, methods for detection of oestrus and management of animals on heat
- techniques and methods for humane handling and restraint of the livestock species
- relevant animal welfare practices for the conduct of artificial insemination in the livestock species
- types, uses, maintenance, servicing and storage of equipment
- methods and procedures for cleaning and sterilisation of equipment used for artificial insemination
- procedures for handling, measurement and usage of cleaning chemicals, disinfectants and sanitisers
- relevant work health and safety requirements
- relevant documentation and records that are required

- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes and debris
- requirements and procedures for cleaning and maintaining work areas.

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAIS301 Collect semen

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to routinely collect semen for artificial insemination of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

Working with entire male animals is an inherently dangerous activity. Individuals who work at this level must be thoroughly competent in all aspects of handling entire male animals.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Artificial Insemination (AIS)

Assessment Requirements for AHCAIS301 Collect semen

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare animals for collecting semen
- prepare for and undertake hygienic collection of semen
- collect semen using industry approved collection techniques
- transfer semen safely to the preparation and storage area
- handle animals in a humane, stress free, and safe manner
- clean up work areas and equipment and record data.
- follow enterprise work health and safety, biosecurity and animal welfare policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, uses and maintenance of personal protective equipment
- resource and manpower requirements, biosecurity and animal welfare requirements, industry standards, codes of practice and procedures for artificial insemination of the livestock species
- types, uses, maintenance, servicing and storage of equipment
- requirements and features of semen collection work areas
- requirements, methods and techniques for processing and storage of semen
- techniques and methods for humane handling and restraint of the livestock species
- relevant animal welfare practices for the conduct of artificial insemination in the livestock species
- methods and procedures for cleaning and sterilisation of equipment used for artificial insemination
- types of diseases transmissible from male to female animals through artificial insemination/semen, and methods of testing, control and prevention

- procedures for handling, measurement and usage of cleaning chemicals, disinfectants and sanitisers
- relevant work health and safety policies
- relevant environmental requirements, and procedures for disposal and management of wastes and debris
- requirements and procedures for cleaning and maintaining work areas
- relevant documentation and records that are required.

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCAIS302 Process and store semen

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to process and store semen collected from livestock for the purpose of artificial insemination.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Artificial Insemination (AIS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare diluent	1.1 Clean containers to be used for preparation of diluent according to enterprise hygiene standards

Element	Performance criteria
	1.2 Calibrate equipment and tools used in processing semen 1.3 Heat distilled water for use in diluent to required temperature 1.4 Add distilled water to powdered diluent in correct proportions 1.5 Store diluent correctly before use
2 Determine number of semen doses	2.1 Determine concentration of the ejaculate using appropriate equipment 2.2 Calculate number of doses according to the concentration determined
3 Assess quality of semen batch	3.1 Examine semen batch and check for contamination 3.2 Assess motility of semen 3.3 Compare quality of semen batch against enterprise benchmarks 3.4 Discard poor quality semen appropriately
4 Check incubator	4.1 Check temperature and other operational parameters of incubator before use 4.2 Report and resolve problems with incubator before operation
5 Prepare semen doses	5.1 Add diluent to semen batch 5.2 Divide diluted semen into doses 5.3 Label each semen dose 5.4 Place doses in incubator 5.5 Assess quality of prepared doses 5.6 Record data in line with enterprise requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCAIS303 Artificially inseminate livestock

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed artificially inseminating livestock.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for insemination
- observe animals on heat to detect correct insemination timing
- prepare equipment and work sites
- correctly select and thaw semen for insemination
- restrain and inseminate animals using recognised methods that reduce stress
- complete documentation and records
- clean work area and equipment
- follow enterprise work health and safety, biosecurity and animal welfare policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- working knowledge of enterprises herd improvement or animal production plan
- basic breeding principles, including the oestrus cycle and its significance
- pregnancy testing
- animal health and abnormalities
- preparation techniques such as puberty stimulation
- semen thawing and storage techniques
- preparation requirements for artificial insemination of animals
- animal movement and behavioural characteristics
- harness and restraint equipment, components and functions

- handling techniques, restraint methods and when to use them
- enterprise and industry identification system for animals
- personal protective equipment and when and how it should be used
- relevant State/Territory legislation, regulations and codes of practice with regard to workplace OHS and animal welfare
- legislative and regulatory controls with regard to artificial insemination
- enterprise and industry policies with regard to artificial insemination and recording and reporting routines.

Assessment Conditions

The candidate must demonstrate knowledge of:

- resource and manpower requirements, biosecurity requirements, industry standards, codes of practice and procedures for artificial insemination of the livestock species
- hygiene procedures for artificial insemination
- requirements, methods and procedures for sourcing, acquiring, transporting and storing semen
- requirements and procedures for preparation of artificial insemination
- types, uses and maintenance of personal protective equipment
- requirements and procedures for selection, preparation and thawing of semen
- methods and procedures for cleaning and sterilisation of equipment used for artificial insemination
- procedures for handling, measurement and usage of cleaning chemicals, disinfectants and sanitisers
- relevant anatomy and physiology of female livestock
- reproductive physiology and behaviour of female livestock
- techniques and methods for humane handling and restraint of the livestock species
- relevant animal welfare practices for the conduct of artificial insemination in the livestock species
- relevant documentation and records that are required
- relationship, cause and effect between herd performance and artificial insemination programs
- criteria and methods for determining conception rates
- requirements, methods and procedures for improving the success of artificial insemination and its impacts on herd performance
- relevant environmental and sustainability requirements, and procedures for disposal and management of wastes and debris
- requirements and procedures for cleaning and maintaining work areas and equipment
- enterprise work health and safety policies

AHCAIS401 Supervise artificial breeding and embryo transfer programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise artificial breeding and embryo transfer programs.

This unit also applies to artificial breeding technicians who provide advice to farmers.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Artificial Insemination (AIS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine breeding method	1.1 Review options for artificial breeding to determine most suitable and affordable method according to breeding objectives 1.2 Select and match artificial breeding option to resources and breeding objectives 1.3 Identify, source and arrange resource implications of breeding programs 1.4 Prepare program schedules according to available resources 1.5 Ensure suitable personal protective equipment for staff and self are available in line with enterprise work health and safety policies
2. Implement breeding method	2.1 Check the disease status of donor and recipient animals in line with enterprise biosecurity policies 2.2 Obtain genetic material from appropriate and reliable source 2.3 Receive, check and store genetic material appropriately 2.4 Handle animals appropriately in line with animal welfare policies 2.5 Ensure females are inseminated at the optimal stage of the oestrus cycle where artificial insemination is the selected option 2.6 Check to ensure intended recipients are prepared and correctly scheduled where embryo transfer (ET) is the selected option 2.7 Provide hormone injections to intended recipients at appropriate stages of transfer programs where ET is the selected option 2.8 Conduct embryo transfers in compliance with relevant codes of practice and industry standards where ET is the selected option
3. Monitor and maintain program	3.1 Monitor the need for return to service of intended recipient 3.2 Monitor health of livestock in the breeding program 3.3 Review adjustments in genetic material transfer practices to enhance success of future programs 3.4 Document and maintain data on genetic material transfer programs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCAIS401A Supervise artificial breeding and/or embryo transfer programs.

Assessment Requirements for AHCAIS401 Supervise artificial breeding and embryo transfer programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine breeding method
- implement breeding method
- monitor and maintain program
- apply work health and safety requirements in the context of own work
- apply biosecurity requirements in the context of own work
- apply animal welfare practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- legislative requirements, biosecurity requirements, codes of practice, industry standards and procedures for artificial insemination and embryo transfer
- resources requirements, types and characteristics of artificial breeding methods and programs
- advantages, disadvantages and cost-benefit analysis of artificial breeding programs for the livestock enterprise
- types, uses and maintenance of personal protective equipment
- requirements, methods and procedures for sourcing, acquiring, transporting and storing genetic material
- relevant anatomy and physiology of female livestock
- reproductive physiology, reproductive behaviour and pregnancy development of female livestock
- requirements and procedures for artificial insemination
- requirements and procedures for embryo transfer

- causes, signs, treatment and management of reproductive diseases and complications in female livestock
- requirements, methods and procedures for improving the success of artificial breeding programs and their impacts on herd performance
- relevant documentation and records that are required
- relevant work health and safety and animal welfare requirements.

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCARB201 Apply a range of treatments to trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to remedy common tree problems by applying treatments including alleviating tree stress and improving soil condition. Treating trees also requires consideration of the environmental implications of treatment methods, techniques and procedures.

This unit applies to individuals who undertake defined activities, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCCHM201 Apply chemicals under supervision

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to apply tree treatments	1.1 Locate trees on streets using maps 1.2 Recognise trees requiring treatment 1.3 Identify site hazards, assess risks and report to supervisor 1.4 Confirm work zone with work crew and monitor site 1.5 Select and use personal protective equipment 1.6 Select, prepare, and carry out pre-operational and safety checks, on tools and equipment 1.7 Confirm first aid and emergency personnel, equipment and procedures 1.8 Communicate with work team during operations using voice, hand and whistle signals 1.9 Read packaging labels to maintain awareness of work hazards 1.10 Clean or sterilise tools and equipment to avoid disease transfer and biosecurity issues 1.11 Record and implement work health, safety, site, environmental and traffic control measures
2. Modify environment to maintain health and vigour of tree	2.1 Remove competing plants to ensure maintenance of adequate space, light, water and nutrient requirements of tree 2.2 Apply nutrient additives at specified rates and locations 2.3 Ameliorate soil structure in relation to aeration and drainage 2.4 Ameliorate soil condition with plant-based mulch application 2.5 Determine benefit and limits of decompaction methods
3. Apply chemical treatment	3.1 Calibrate application equipment 3.2 Apply treatment with due regard for environmental implications 3.3 Apply chemicals under supervision
4. Complete treatment operations	4.1 Maintain awareness of effect on environment of own work practices 4.2 Clean and store personal protective equipment 4.3 Clear and clean site 4.4 Report applications and treatments and update work records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB201A Apply a range of treatments to trees.

Assessment Requirements for AHCARB201 Apply a range of treatments to trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- locating trees on streets using maps
- recognising trees requiring treatment
- identifying site hazards, assessing risks and reporting to supervisor
- confirming work zone with work crew and monitoring site
- selecting and use personal protective equipment
- selecting, preparing, and carrying out pre-operational and safety checks, on tools, equipment and machinery
- confirming first aid personnel, equipment and procedures applicable to tree work
- communicating with work team during operations
- reading packaging labels to maintain awareness of work hazards
- cleaning or sterilising tools and equipment
- avoiding disease transfer and biosecurity issues
- recording and implementing work health, safety, site, environmental and traffic control measures
- removing competing plants to ensure maintenance of adequate space, light, water and nutrient requirements of tree
- applying nutrient additives at specified rates and locations
- amelioration of soil structure in relation to aeration and drainage
- amelioration of soil condition with plant-based mulch application
- determining benefit and limits of decompaction methods
- calibrating application equipment
- applying treatment with due regard for environmental implications
- applying chemicals under supervision

- maintaining awareness of effect on environment of own work practices
- cleaning and storing personal protective equipment
- clearing and cleaning sites
- awareness of work health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- methods of locating trees on streets and maps
- tree recognition
- methods of identifying site hazards, assessing risks and reporting to supervisors
- risk assessment systems
- confirmation of work zones
- how trees react to stress
- personal protective equipment
- pre-operational and safety checks, on tools, equipment and machinery
- first aid
- first aid personnel, equipment, and first aid plan procedures
- communication systems using voice, hand and whistle signals
- application of packaging instructions
- methods of cleaning and sterilising tools and equipment
- methods of disease transfer
- biosecurity principles and practices
- work health, safety, site, environmental and traffic control measures
- plant removal methods
- soil nutrition
- rates of nutrient application
- soil amelioration techniques
- soil structure, aeration and drainage
- mulch
- compaction and decompaction
- correct preparation prior to applying treatment to trees
- calibration techniques of application equipment
- chemical application techniques, usage restrictions and risk controls
- environmental implications of chemical use in own work practices.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - spray application equipment
 - spill kit
 - measuring and weighing equipment
 - signage - chemical use
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage - work zone
 - trees
- materials:
 - tree recognition form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - work communications form
 - chemical and treatment application form
 - tree maintenance form
 - soil assessment form
 - work site operations form
 - work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB206 Operate and maintain stump grinding machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate motorised stump grinding machines to remove tree stumps from the ground.

This unit applies to individuals who undertake defined activities with specialised tools and methods, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures, in accordance with manufacturers recommendations and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards

Pre-requisite Unit

AHCARB210 Work effectively in the arboriculture industry

HLTAID003 Provide first aid

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Prepare for stump removal operations	1.1 Determine site location and details and clarify with supervisor 1.2 Determine the depth below ground of stump grinding works 1.3 Determine and confirm location and depth of above-and-below-ground services 1.4 Unload stump grinder machine 1.5 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk
2. Carry out pre-operational and safety checks	2.1 Check maintenance log is complete and up to date 2.2 Check belts are appropriately tensioned and in good order 2.3 Check teeth are sharp 2.4 Check no teeth are missing or loose 2.5 Check tyre pressure is correct or tracks are appropriately tensioned 2.6 Check levels of oils and fluids 2.7 Check hoses 2.8 Check brakes are operational 2.9 Check cutter head rotates freely and is not obstructed
3. Check stump grinder safety features	3.1 Check guards for belt, power take-off (PTO) and grinder head are in place 3.2 Check kill switch clearly identifiable and working 3.3 Check that dead-man is working if fitted 3.4 Check debris curtain present and in good order 3.5 Check dust suppression system is working if fitted
4. Complete preparations for work	4.1 Select and use appropriate personal protective equipment 4.2 Confirm first aid and emergency personnel, equipment and procedures 4.3 Expose stump surrounds manually and check for and remove foreign bodies 4.4 Moisten surrounds as required 4.5 Record and implement work health, safety, site, environmental and traffic control measures
5. Position stump grinder	5.1 Determine exclusion zone for work operations 5.2 Isolate exclusion zone with barriers and signs 5.3 Position machine level within recommended ranges to avoid rollover 5.4 Avoid holes with machine wheels 5.5 Position machine to minimise impact from flying debris

Element	Performance criteria
	5.6 Position operator in low risk position 5.7 Position operator to provide a clear view of the stump 5.8 Locate safety screens as required
6. Undertake removal operations	6.1 Communicate with work team during operations using voice, hand and whistle signals 6.1 Confirm work zone cleared prior to starting cutter head 6.3 Plan to complete a series of grinds across the stump 6.4 Start cutter head 6.5 Stop work if exclusion zone is breached and disengage cutter head if required 6.6 Position cutter head over stump 6.7 Engage cutter head into stump surface 6.8 Maintain engine speed in revolutions-per-minute (RPM) 6.9 Ensure grinding process is accurate, smooth and ergonomic 6.10 Grind stump to recommended depth of cut on each cutting pass 6.11 Ensure the cut size of each pass is not excessively deep causing the machine to labour excessively or to stall 6.12 Grind stump to predetermined spread and depth 6.13 Operate equipment without damaging underground services and surrounding areas
7. Remove grindings	7.1 Reposition machine away from ground stump 7.2 Disengage cutter head 7.3 Wait and remain clear of cutter head until cutter head stops moving 7.4 Remove build-up of grindings
8. Perform ongoing grinding operations	8.1 Make check in calls at prearranged times 8.2 Inspect grinder as required between stumps and when refuelling 8.3 Shutdown immediately if abnormal vibration or noise develops 8.4 Stop the engine before refuelling and allow engine to cool as required 8.5 Follow Safe Work Method Statement instructions for refuelling 8.6 Replace and secure fuel cap before restarting 8.7 Disengage cutter head and ensure a complete stop before moving to a new stump
9. Complete stump removal operation	9.1 Back-fill stump hole to original ground level 9.2 Maintain clean and safe work area throughout work and upon completion 9.3 Collect waste material and dispose of or recycle in a manner

Element	Performance criteria
	causing minimal environmental damage 9.4 Clean, maintain and store tools and equipment 9.5 Perform basic maintenance, including sharpening grinder and replacing teeth as required 9.6 Load grinder in accordance with Safe Work Method Statement 9.7 Secure grinder for transport 9.8 Update records of operator usage in log record 9.9 Update records of maintenance and replacement items

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCARB206 Operate and maintain stump grinding machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed removing stumps using a motorised stump grinder using low-risk work procedures. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining site location and details and clarifying with supervisor
- determining the depth below ground of stump grinding works
- determining and confirm location and depth of above-and-below-ground services
- unload stump grinder machine
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- checking maintenance log complete and up to date
- checking belts appropriately tensioned and in good order
- checking teeth are sharp
- checking no teeth are missing or loose
- checking tyre pressure is correct or tracks are appropriately tensioned
- checking levels of oils and fluids
- checking hoses
- checking brakes are operational
- checking cutter head rotates freely and is not obstructed
- checking guards for belt, power take-off (PTO) and grinder head are in place
- checking kill switch clearly identifiable and working
- checking that dead-man is working if fitted
- checking debris curtain present and in good order
- checking dust suppression system is working if fitted
- selecting and use appropriate personal protective equipment
- confirming first aid and emergency personnel, equipment and procedures
- exposing stump surrounds manually and check for and remove foreign bodies
- moistening surrounds as required

- recording and implementing work health, safety, site, environmental and traffic control measures
- determining exclusion zone for work operations
- isolating exclusion zone with barriers and signs
- positioning machine level within recommended ranges to avoid rollover
- avoiding holes with machine wheels
- positioning machine to minimise impact from flying debris
- positioning operator in low risk position
- positioning operator to provide a clear view of the stump
- locating safety screens as required
- communicating with work team during operations using voice, hand and whistle signals
- confirming work zone cleared prior to starting cutter head
- planning to complete a series of passes across the stump
- starting cutter head
- stopping work if exclusion zone is breached and disengage cutter head if required
- positioning cutter head over stump
- engaging cutter head into stump surface
- maintaining engine speed in revolutions-per-minute (rpm)
- ensuring grinding process is accurate, smooth and ergonomic
- grinding stump to recommended depth of cut on each cutting pass
- ensuring the cut size of each pass is not excessively deep causing the machine to labour excessively or to stall
- grinding stump to predetermined spread and depth
- operating equipment without damaging underground services and surrounding areas
- repositioning machine away from ground stump
- disengaging cutter head if risk of making unwanted contact
- waiting and remaining clear of cutter head until cutter head stops moving
- removing build-up of grindings
- making check in calls at prearranged times
- inspecting grinder as required between stumps and when refueling
- shutting down immediately if abnormal vibration and/or noise develops
- stopping the engine before refueling and allow engine to cool as required
- following safe work method statement instructions for refueling
- replacing and securing fuel cap before restarting
- disengaging cutter head and ensure a complete stop before moving to a new stump
- back-filling stump hole to original ground level
- maintaining clean and safe work area throughout work and upon completion
- collecting waste material and dispose of or recycle in a manner causing minimal environmental damage
- cleaning, maintaining and storing tools and equipment
- performing basic maintenance, including sharpening grinder and replacing teeth as required
- loading grinder in accordance with safe work method statement

- securing grinder for transport
- updating records of operator usage in log record
- updating records of maintenance and replacement items.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site hazard identification methods
- site risk assessment systems
- control measures for work health, safety, site, environmental and traffic control
- personal protective equipment
- communication systems using voice, hand and whistle signals
- first aid
- emergency procedures
- methods of locating services
- pre-operational checks of stump grinders including:
 - logs
 - belts
 - teeth
 - tyre pressure
 - oils and fluids
 - hoses
 - brakes
 - cutter head
 - guards
- safety checks of stump grinders including:
 - guards for belt, power take-off (PTO) and grinder head
 - kill switch
 - dead man
 - debris curtain
 - dust suppression
- exclusion zones
- operation of stump grinders
- cutter head engagement and disengagement
- positioning of stump grinders and operator
- work zone
- methods of determining spread and depth of cut
- recommended depths of cut
- cutting plan
- engine speed (rpm)
- abnormal vibration

- methods of back-filling
- environmental implications of removal activities
- appropriate methods of collecting waste material and disposal or recycling methods
- basic maintenance of stump grinders
- methods of sharpening stump grinders
- methods of teeth replacement of stump grinders
- records of operator usage in log record
- methods of maintaining records for basic maintenance and replacement items.

Assessment Conditions

It is an industry requirement for competency in this unit that assessment includes a log record, verifying ten (10) hours of operating a stump grinder, and five (5) hours of unloading and loading, setup and pre-operational and safety checks, preparatory work, backfilling and cleaning up, sharpening and basic maintenance, performed by the candidate.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - stump grinder
 - sharpening equipment
 - refuelling kit
 - spill kit
 - emergency communication system
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage – work zone
 - tree stumps
- materials:
 - stump grinder operations form
 - hazard identification and risk control form
 - pre-operational and safety check form
 - emergency preparation form

- work communications form
- work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB207 Perform ground based rigging

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform ground based rigging. This unit does not cover crane operations.

The unit applies to ground based workers who undertake defined activities with specialised tools and methods, work in structured and changing contexts, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assist in preparation of work site	1.1 Determine location of worksite and correct tree from scope of works 1.2 Identify site hazards, assess risks and report to supervisor 1.3 Confirm work zone with work crew and monitor site 1.4 Confirm first aid and emergency personnel, equipment and procedures 1.5 Record and implement work health, safety, site, environmental and traffic control measures
2. Prepare for rigging	2.1 Assist with tree examination by observation of defects 2.2 Discuss rigging method with work crew 2.3 Confirm rigging method supports identified risk controls 2.4 Select appropriate rigging equipment 2.5 Examine, assemble, install rigging equipment and check for defects 2.6 Select and use appropriate personal protective equipment
3. Perform rigging operations	3.1 Communicate with work team during operations using voice, hand and whistle signals 3.2 Tie, dress, set and finish arborist knots as required for rigging task 3.3 Monitor rigging system, work team movements and environmental conditions 3.4 Maintain effective communications specific to the rigging task 3.5 Control load and raise, balance, lower or redirect as communicated 3.6 Adjust rigging as required for mass or dimensions of load 3.7 Disconnect load from rigging system 3.8 Check rigging equipment components 3.9 Return appropriate components to aerial work team member
4. Complete rigging operations	4.1 Remove load from drop zone 4.2 Confirm completed rigging operation 4.3 Clean and check tools, equipment and machinery, and store 4.4 Report and tag faulty or worn tools and equipment 4.5 Clean and store personal protective equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB207A Perform ground based rigging.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCARB207 Perform ground based rigging

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed using ground based rigging to raise, lower, control and redirect a load during tree pruning and tree removal. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of worksite
- determining correct tree from scope of works
- identifying site hazards, assess risks and report to supervisor
- confirming work zone with work crew and monitoring site
- confirming first aid and emergency personnel, equipment and procedures
- recording and implementing work health, safety, site, environmental and traffic control measures
- assisting with tree examination by observation of defects
- discussing rigging method with work crew
- confirming rigging method supports identified risk controls
- selecting appropriate rigging equipment
- examining, assembling, installing and checking rigging equipment for defects
- selecting and using appropriate personal protective equipment
- communicating with work team during operations using voice, hand and whistle signals
- tying, dressing, setting and finishing arborist knots as required for rigging task
- monitoring rigging system, work team movements and environmental conditions
- maintaining effective communications specific to the rigging task
- controlling load and raising, balancing, lowering or redirecting as communicated
- adjusting rigging as required for mass or dimensions of load
- disconnecting load from rigging system
- checking rigging equipment components
- returning appropriate components to aerial work team member

- removing load from drop zone
- confirming completed rigging operation
- cleaning and checking tools, equipment and machinery, and storing
- reporting and tagging faulty or worn tools and equipment
- cleaning and storing personal protective equipment
- use of industry-standard terminology to describe rigging processes and equipment
- applying work health and safety requirements in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- work zone
- first aid, emergency personnel, equipment and procedures
- work health, safety, site, environmental and traffic control measures
- tree examination
- observation of tree defects
- rigging equipment
- rigging methods
- rigging system
- examination of rigging equipment for defects
- examination of rigging equipment
- assembling rigging equipment
- installing rigging equipment
- checking rigging equipment
- personal protective equipment
- voice, hand and whistle signals
- communications specific to the rigging task
- environmental conditions
- tying, dressing, setting and finishing arborist knots
- controlled loads
- load raising
- lowering loads
- redirecting loads
- balancing load on centre of gravity
- rigging adjustments
- mass of load
- dimensions of load
- rigging equipment components
- rigging operation
- tagging faulty or worn tools and equipment.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - rigging equipment
 - static and dynamic rope kit
 - harness
 - lowering and friction devices
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - rescue kit
 - traffic management kit
 - signage – work zone
 - trees
- materials:
 - rigging operations form - ground based
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - site assessment form
 - tree recognition form
 - work communications form
 - work site operations form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB208 Recognise trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise trees and their environmental and social benefits.

This unit applies to individuals who undertake defined activities, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Examine tree features	1.1 Locate trees on streets using maps 1.2 Examine and record form, structures and local environment of tree 1.3 Examine and record shape, colour and size of leaves

Element	Performance criteria
	1.4 Examine and record features of buds, branches and bark 1.5 Examine and record flower type, colour and shape 1.6 Examine and record features of fruit if present 1.7 Use all relevant available senses to assist in tree recognition
2. Examine tree condition	2.1 Examine tree for general condition 2.2 Observe signs and symptoms of diseases, pests and problems that assist in recognition of tree 2.3 Record condition of tree and signs and symptoms of diseases, pests and problems on hazard identification form and report to supervisor
3. Recognise tree	3.1 Use field guides and photographs to assist in tree recognition 3.2 Recognise tree using common name and botanical name where possible 3.3 Request confirmation of tree recognition from work team in common and botanical names as required
4. Recognise tree benefits	4.1 Examine tree for existing habitat use and food source supply 4.2 Recognise environmental benefits provided by tree in current location 4.3 Recognise value of benefits to the client and community
5. Report on results	5.1 Record tree features and observations of tree recognition process 5.2 Note key features observed in the process of tree recognition 5.3 Inform client or organisation as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCARB208 Recognise trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- locating trees on streets using maps
- examining and recording form, structures and local environment of tree
- examining and recording shape, colour and size of leaves
- examining and recording features of buds, branches and bark
- examining and recording flower type, colour and shape
- examining and recording features of fruit if present
- using all relevant available senses to assist in tree recognition
- examining tree for general condition
- observing signs and symptoms of diseases, pests and problems that assist in recognition of tree
- recording condition of tree and signs and symptoms of diseases, pests and problems on hazard identification form and report to supervisor
- using field guides and photographs to assist in tree recognition
- recognising tree using common name and botanical name where possible
- requesting confirmation of tree recognition from work team in common and botanical names as required
- examining tree for existing habitat use and food source supply
- recognising environmental benefits provided by tree in current location
- recognising value of benefits to the client and community
- recording tree features and observations of tree recognition process
- noting key features observed in the process of tree recognition
- informing client or organisation as required.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- methods of locating trees on streets using maps
- form, structures and local environment of tree
- shape, colour and size of leaves
- features of buds, branches and bark
- flower type, colour and shape
- features of fruit if present
- use of sensory methods in tree recognition
- general condition of trees
- signs and symptoms of diseases, pests and problems that assist in recognition of trees
- hazard identification forms
- field guides and photographs that assist in tree recognition
- recognition of common names of trees and botanical name where possible
- tree examination for existing habitat use and food sources
- environmental benefits provided by trees
- recognition of value of tree benefits to the client and community
- methods of recording tree features and observations of tree recognition process
- key features of trees observed in the process of tree recognition
- methods of informing client and organisation of tree recognition.

Assessment Conditions

It is an industry requirement for competency in this unit that assessment requires methods of assessment that focus on the process of recognition, incorporating the use of multiple reference sources and pathways to recognise trees.

Assessment must provide for a minimum of thirty-five (35) different trees local to the region.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - field guides

- camera/phone camera
- trees and tree samples
- materials:
 - tree recognition form
 - disease profile form
 - hazard identification and risk control form
 - work site operations form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB209 Assist with aerial rescue from the ground

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with an aerial rescue where an injured person is in a tree or on an elevated work platform (EWP).

Aerial rescue is likely to be undertaken in emergency situations and involves close, effective team-work to ensure the safety of all personnel and the public during a rescue or the management of an aerial casualty.

The unit applies to ground based workers who undertake defined activities with specialised tools and methods, work in structured and changing contexts, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

HLTAID003 Provide first aid

AHCARB207 Perform ground based rigging*

AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan rescue work	1.1 Identify site hazards, assess risks and report to supervisor 1.2 Confirm emergency communication system is working 1.3 Confirm emergency services contact numbers are documented 1.4 Select, prepare and check first aid equipment and rescue kit 1.5 Position rescue and first aid equipment for easy access 1.6 Clarify own role in rescue situations 1.7 Confirm first aid, rescue personnel, equipment and rescue plan procedures with work team prior to undertaking work 1.8 Select and use personal protective equipment 1.9 Communicate with work team during operations using voice, hand and whistle signals
2. Assist in rescue procedure	2.1 Attempt communication with casualty 2.2 Determine condition of casualty as accurately as possible 2.3 Call emergency services and electricity supply authority as required before assisting with rescue
3. Assist in lowering EWP bucket to the ground	3.1 Determine if the EWP is in contact or closer than 'Safe Approach Distances' with electrical wires and apparatus 3.2 Determine EWP is structurally stable 3.3 Maintain 'Safe Approach Distances' 3.4 Access EWP only if safe to do so 3.5 Access truck-based controls and lower bucket to ground if safe to do so
4. Assist in rescue of climbing worker	4.1 Determine if tree or climber is in contact or closer than 'Safe Approach Distances' with electrical wires and apparatus 4.2 Maintain communications with rescuer and casualty, work team and emergency personnel 4.3 Keep all ropes clear and free 4.4 Observe rescue route and provide feedback to rescuer 4.5 Assist with managing casualty as they approach ground
5. Lower climber needing assistance	5.1 Determine if tree or climber is in contact or closer than 'Safe Approach Distances' with electrical wires and apparatus 5.2 Inform climber of presence of electrical wires 5.3 Provide rescue equipment requested by the climber 5.4 Install or use existing high point as instructed

Element	Performance criteria
	5.5 Inform climber of lowering procedure 5.6 Install or use existing friction device to raise and lower the climber as required to lower the climber to the ground
6. Apply first aid on ground	6.1 Apply necessary first aid once casualty is on ground until medical professionals arrive
7. Complete rescue work	7.1 Secure worksite and control entry until appropriate authorities inspect and release site Follow procedures for reporting accidents 7.2 Isolate equipment involved in accident for potential investigation and prevent re-use until checked 7.3 Remove all rescue equipment in a controlled manner 7.4 Clean and store rescue equipment 7.5 Clean and store personal protective equipment 7.6 Maintain records of aerial rescue in appropriate format

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCARB209 Assist with aerial rescue from the ground

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed assisting in a rescue from an EWP and participating in the rescue of a climber from the ground. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- identifying site hazards, assessing risks and reporting to supervisor
- confirming emergency communication system is working
- confirming emergency services contact numbers are documented
- selecting and checking suitable safety equipment, rescue kit and personal protective equipment
- positioning rescue and first aid equipment for easy access
- clarifying own role in rescue situations
- confirm first aid, rescue personnel, equipment and rescue plan procedures with work team prior to undertaking work
- selecting and using personal protective equipment
- communicating with work team during operations using voice, hand and whistle signals
- attempting communication with casualty
- determining condition of casualty as accurately as possible
- calling emergency services and electricity supply authority as required before assisting with rescue
- determining if the EWP is in contact or closer than 'safe approach distances' with electrical wires and apparatus
- determining EWP is structurally stable
- maintaining 'safe approach distances'
- accessing EWP only if safe to do so
- accessing truck-based controls and lowering bucket to ground if safe to do so
- determining if tree or climber is in contact or closer than 'safe approach distances' with electrical wires and apparatus

- maintaining communications with rescuer and casualty, work team and emergency personnel
- keeping all ropes clear and free
- observing rescue route and provide feedback to rescuer
- assisting with managing casualty as they approach ground
- determining if tree or climber is in contact or closer than 'safe approach distances' with electrical wires and apparatus
- informing climber of presence of electrical wires
- providing rescue equipment requested by the climber
- installing or use existing high point as instructed
- informing climber of lowering procedure
- installing or using existing friction device to raise and lower the climber as required to lowering the climber to the ground
- applying necessary first aid once casualty is on ground until medical professionals arrive
- securing worksite and control entry until appropriate authorities inspect and release site
- follow procedures for reporting accidents
- isolating equipment involved in accident for potential investigation and preventing re-use until checked
- removing all rescue equipment in a controlled manner
- cleaning and storing rescue equipment
- cleaning and storing personal protective equipment
- maintaining records of aerial rescue in appropriate format
- use of industry-standard terminology.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- emergency procedures to assist in ground-based rescues of EWP and climbing workers
- hazard identification methods
- risk assessment systems
- Safe Approach Distances
- recognition of live electrical wires or apparatus
- electrical wires and apparatus safety
- first aid procedures
- contents of a first aid kit
- use of a first aid kit
- emergency services communication systems
- emergency services contact numbers
- emergency plans
- appropriate placement of rescue equipment
- rescue kits
- rescue personnel, equipment and rescue plan procedures
- how to control risk to rescuer, victim and others

- types of reporting required after rescue
- personal protective equipment
- how to deal with an emergency
- lowering mechanisms for an aerial rescue
- work health and safety records with regards to incident reporting.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - rescue kit
 - rescue dummy
 - high decibel whistle
 - rigging equipment
 - static and dynamic rope kit
 - harness
 - lowering and friction devices
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage – work zone
 - trees
- materials:
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - rescue assistance form
 - work communications form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB210 Work effectively in the arboriculture industry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to work effectively in the arboriculture industry.

This unit applies to individuals who undertake defined activities, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply knowledge of	1.1 Identify key industry sectors and occupations in arboriculture

Element	Performance criteria
the arboriculture industry	industry 1.2 Recognise and use tools and equipment common in arboriculture industry 1.3 Recognise and use common names for trees common in the area and their physiology and growth habits 1.4 Recognise and locate trees on streets using maps 1.5 Describe arboriculture-specific risks 1.6 Describe plant attributes, specific handling and growth requirements of trees 1.7 Recognise the benefits of trees and values of those benefits 1.8 Recognise risk of harm to self and others from dust, toxic plant parts, fungi, insects, animals and other substances
2. Manage own work	2.1 Interpret written or verbal work instructions and clarify inconsistencies with supervisor 2.2 Identify deadlines and plan priorities with supervisor 2.3 Report variations and difficulties to supervisor 2.4 Undertake own work, responsibilities and duties 2.5 Apply work health and safety requirements in the context of own work 2.6 Work within team and work environment in accordance with low risk work practices 2.7 Follow organisation's workplace procedures, site standards and requirements 2.8 Demonstrate a positive attitude to cooperation within workplace 2.9 Identify practices relating to sustainability, hygiene and biosecurity relevant to own work
3. Plan and prepare for work	3.1 Identify workplace hazards and report to supervisor 3.2 Select, wear and maintain personal protective equipment (PPE) suitable for work locations and conditions 3.3 Select PPE appropriate to noise levels 3.4 Prepare tools and equipment prior to use and check for faults 3.5 Use low risk operating procedures for a variety of equipment and tools in arboriculture 3.6 Implement requirements and issues with working in various weather conditions 3.7 Tag defective equipment and report faults to supervisor 3.8 Check tools and equipment for bluntness and sharpen if required 3.9 Check guards are fitted, securely attached and functioning where applicable
4. Carry out work	4.1 Move equipment and materials safely using appropriate manual

Element	Performance criteria
activities	handling methods 4.2 Carry out basic mechanical fault finding and basic tests on machinery and equipment 4.3 Test safety and emergency shutoff devices 4.4 Work safely around power sources, services and assets 4.5 Communicate with work team during operations using voice, hand and whistle signals 4.6 Tie, dress, set and finish arborist knots 4.7 Assist with traffic management around worksite 4.8 Assist in emergency and rescue situations 4.9 Confirm first aid and emergency personnel, equipment and procedures 4.10 Manage ropes and other objects in the work zone 4.11 Monitor the movement and whereabouts of other workers 4.12 Maintain and monitor safety and security of equipment while on-site
Complete work activities	5.1 Recycle or dispose of waste materials 5.2 Clean and store tools and equipment and carry out basic servicing where required 5.3 Clean vehicles where required 5.4 Maintain workplace records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCARB210 Work effectively in the arboriculture industry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed working in the arboriculture industry, following instructions from supervisor and meeting industry standards. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- identifying key industry sectors and occupations in arboriculture industry
- recognising and using tools and equipment common in arboriculture industry
- recognising and using common names for trees common in the area and their physiology and growth habits
- recognising and locating trees on streets using maps
- describing arboriculture-specific risks
- describing plant attributes, specific handling and growth requirements of trees
- recognising the benefits of trees and values of those benefits
- recognising risk of harm to self and others from dust, toxic plant parts, fungi, insects, animals and other substances
- interpreting written or verbal work instructions and clarifying inconsistencies with supervisor
- identifying deadlines and planning priorities with supervisor
- reporting variations and difficulties to supervisor
- undertaking own work, responsibilities and duties
- applying work health and safety requirements in the context of own work
- working within team and work environment in accordance with low risk work practices
- following organisation's workplace procedures, site standards and requirements
- demonstrating a positive attitude to cooperation within workplace
- identifying workplace hazards and report to supervisor
- selecting, wearing and maintaining personal protective equipment (PPE) suitable for work locations and conditions
- selecting PPE appropriate to noise levels

- preparing tools and equipment prior to use and check for faults
- using low risk operating procedures for a variety of equipment and tools in arboriculture
- implementing requirements and issues with working in various weather conditions
- tagging defective equipment and report faults to supervisor
- checking tools and equipment for bluntness and sharpen if required
- checking guards are fitted, securely attached and functioning where applicable
- moving equipment and materials safely using appropriate manual handling methods
- carrying out basic mechanical fault finding and basic tests on machinery and equipment
- testing safety and emergency shutoff devices
- working safely around power sources, services and assets
- communicating with work team during operations using voice, hand and whistle signals
- tying, dressing, setting and finishing arborist knots
- assisting with traffic management around worksite
- assisting in emergency and rescue situations
- confirming first aid and emergency personnel, equipment and procedures
- managing ropes and other objects in the work zone
- monitoring the movement and whereabouts of other workers
- maintaining and monitoring safety and security of equipment while on-site
- recycling or disposing of waste materials
- cleaning and storing tools and equipment and carry out basic servicing where required
- clean vehicles where required
- maintaining workplace records.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- key industry sectors and occupations in arboriculture industry
- tools and equipment common in arboriculture industry
- common names for trees common in the area and their physiology and growth habits
- tree recognition
- methods of locating trees on streets using maps
- arboriculture-specific risks
- plant attributes, specific handling and growth requirements of trees
- benefits of trees and values of those benefits
- risk of harm to self and others from dust, toxic plant parts, fungi, insects, animals and other substances
- interpretation written or verbal work instructions
- clarification of inconsistencies
- deadlines and planning priorities
- variations and difficulties
- work responsibilities and duties
- work health and safety in the context of own work

- teamwork and work environment in accordance with low risk work practices
- organisation's workplace procedures, site standards and requirements
- importance of drug and alcohol free worksites
- sustainability practices
- hygiene and biosecurity practices
- identification of workplace hazards
- methods of reporting to supervisors
- selection, wearing and maintenance of PPE suitable for work locations and conditions
- selecting PPE appropriate to noise levels
- preparation and fault-checking of tools and equipment prior to use
- low risk operating procedures for a variety of equipment and tools in arboriculture
- requirements and issues of working in various weather conditions
- tagging defective equipment
- checking tools and equipment for bluntness
- sharpen tools and equipment
- checking guards to ensure they are fitted, securely attached and functioning
- appropriate manual handling methods for moving equipment and materials safely
- basic mechanical fault finding and basic tests on machinery and equipment
- safety and emergency shutoff device testing
- safety around power sources, services and assets
- work team communications during operations
- voice, hand and whistle signals
- tying, dressing, setting and finishing arborist knots
- traffic management around worksite
- emergency and rescue situations
- first aid and emergency personnel, equipment and procedures
- rope management and management of other objects in the work zone
- methods of monitoring the movement and whereabouts of other workers
- safety and security of equipment while on-site
- recycling or disposing of waste materials
- cleaning and storing tools and equipment
- basic servicing of tools and equipment
- vehicle cleaning
- maintenance of workplace records.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - sharpening equipment
 - static and dynamic rope kit
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - rescue kit
 - traffic management kit
 - signage - work zone
 - tree and tree samples
- materials:
 - work effectiveness form
 - tree recognition form
 - tree maintenance form
 - hazard identification and risk control form
 - equipment and PPE check form
 - knot identification form
 - emergency preparation form
 - work communications form
 - work site operations form
 - work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB301 Implement a tree maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a tree maintenance program. It also describes the skills and knowledge required to apply a range of tree maintenance techniques; and monitor and review the maintenance program over the course of a year.

The work requires application of extensive arboricultural knowledge and a broad range of arboricultural skills. This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCCHM303 Prepare and apply chemicals

AHCCHM304 Transport, handle and store chemicals

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Undertake site assessments and collect specimens	1.1 Determine location of above-and-below-ground services 1.2 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.3 Perform site assessment to identify conditions which may impact upon the health of trees on site 1.4 Recognise stress inducing factors in accordance with characteristics of species 1.5 Recognise a wide range of common diseases, pests and nutritional deficiencies in trees 1.6 Recognise abiotic issues affecting health of trees 1.7 Collect specimens of stressed material for testing 1.8 Record and report results of site assessment and tests 1.9 Research health characteristics of tree species
2. Prepare treatment program	2.1 Access and read treatment program and confirm activities with management 2.2 Select appropriate treatment methods 2.3 Select, prepare, and carry out pre-operational and safety checks, on tools, equipment and machinery 2.4 Select and use personal protective equipment 2.5 Identify environmental implications of undertaking treatment program, assess likely outcomes and take appropriate action 2.6 Determine annual maintenance requirements for trees 2.7 Contribute to preparing a comprehensive full-year maintenance program 2.8 Record and implement work health, safety, site, environmental and traffic control measures
3. Undertake treatment program	3.1 Prepare and use treatment equipment 3.2 Apply physical or chemical treatments with due regard for environmental implications 3.3 Maintain growing environment in accordance with species needs 3.4 Monitor and review maintenance program over the course of a season of one year
4. Complete treatment program activities	4.1 Dispose of infected plant material and chemical waste appropriately 4.2 Sterilise equipment

Element	Performance criteria
	4.3 Clean and store personal protective equipment 4.4 Follow up physical or chemical treatments to ensure effectiveness 4.5 Determine timetables for follow up treatments and communicate them to work team 4.6 Maintain records and document the report for that year

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB301A Implement a tree maintenance program

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCARB301 Implement a tree maintenance program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed applying physical and chemical treatments to a range of trees in accordance with a full one-year treatment program. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- performing a site assessment to identify conditions which may impact upon the health of trees on site
- recognising stress inducing factors in accordance with characteristics of species
- recognising a wide range of common diseases, pests and nutritional deficiencies in trees
- assessing abiotic issues affecting health of trees, or impact on growth
- researching species characteristics on tree health
- collecting specimens of stressed material
- recording and report results of site assessment and tests
- accessing and read treatment program and confirm activities with management
- selecting, using and maintaining suitable personal protective equipment
- selecting appropriate treatment methods and equipment
- identifying environmental implications of undertaking treatment program,
- assessing likely outcomes of treatment programs and taking appropriate action
- determining annual maintenance requirements for trees
- contributing to preparation of a comprehensive full-year maintenance program
- recording and implementing work health, safety, site, environmental and traffic control measures
- preparing and using equipment
- applying physical or chemical treatments with due regard for environmental implications
- maintaining growing environment in accordance with species needs

- monitoring and reviewing maintenance program over season of one year
- disposing of infected plant material and chemical waste appropriately
- sterilising equipment
- following up physical or chemical treatments to ensure effectiveness
- determining timetables for follow up treatments and communicating to work team
- maintaining records and documenting a report for that year
- use of appropriate treatment methods and equipment
- communicating within the work team
- complying with relevant Australian Standards
- use of industry standard terminology to describe arboriculture and work environment
- applying work health and safety requirements in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site-specific risk assessment methods
- treatments and treatment methods commonly used on trees
- comprehensive full-year maintenance programs
- recognition of a wide range of common diseases, pests and nutritional deficiencies in trees
- the abiotic issues that could affect the health of tree species
- methods of recording, storing and processing data
- how to interpret a treatment program
- the appropriate personal protective equipment
- methods of collecting and storing specimens for identification
- methods of testing collected specimens of stressed material
- worksite traffic control
- stress inducing factors for a variety of tree species
- methods for treating tree pests and diseases
- methods of analysing nutritional status of trees
- health characteristics of tree species.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - sprayers/application equipment
 - measuring and weighing equipment
 - spill kit
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage - chemical use
 - signage - work zone
 - trees
- materials:
 - tree inspection form
 - tree maintenance form
 - site assessment form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - chemical and treatment application form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCARB302 Inspect trees for access and work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to inspect a tree from the ground for the selection of access and tree work methods.

This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, materials and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Discretion and judgement is required. The work requires the application of extensive arboricultural knowledge. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB313 Identify trees

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare tree inspection requirements	1.1 Prepare forms for recording inspection 1.2 Determine the scope of tree works required in consultation with client and in accordance with stakeholder needs and local regulations 1.3 Determine location of above-and-below-ground services 1.4 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.5 Confirm first aid and emergency personnel, equipment and procedures 1.6 Select, prepare, and carry out pre-operational and safety checks, on tools, equipment and machinery 1.7 Select and use personal protective equipment 1.8 Record and implement work health, safety, site, environmental and traffic control measures
2. Inspect tree	2.1 Record tree type, location and dimensions 2.2 Inspect tree for tree access and tree work methods 2.3 Inspect branches for health, vitality and integrity of attachment 2.4 Inspect tree structure for defects, signs and symptoms of disease, insects and other fauna
3. Determine method of access and work method	3.1 Record findings on hazard identification form 3.2 Undertake load testing, probe cavities and test hollows by sounding if required 3.3 Record result when tree condition requires modified tree access or work method 3.4 Select appropriate method of access and tree work method 3.5 Assess risk of selected method of access and tree work method 3.6 Conduct meeting to communicate and confirm selected method of access and tree work method 3.7 Record work site confirmation of method of access, work method and appropriate risk controls
4. Record result and advise client	4.1 Record result when tree access or tree work method is inappropriate 4.2 Advise client and stakeholders of requirements for further advice or testing 4.3 Seek further advice from consulting arborist or access specialist 4.4 Complete inspection form and submit to client and stakeholders

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB302A Conduct tree inspections.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCARB302 Inspect trees for access and work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed inspecting a range of trees, compiling a complete record of work site and tree risk assessment data to determine the appropriate access method and work method. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- preparing forms for recording inspection
- determining the scope of works
- determining stakeholder needs and local regulations
- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- selecting, preparing, and carrying out pre-operational and safety checks, on tools, equipment and machinery
- selecting and using personal protective equipment
- recording and implementing work health, safety, site, environmental and traffic control measures
- recording tree type, location and dimensions
- inspecting for tree access and tree work methods
- inspecting branches for health, vitality and integrity of attachment
- inspecting tree for defects, signs and symptoms of disease, insects and other fauna
- tree structure and structural defects
- recording findings on hazard identification form
- undertaking load testing
- probing cavities and testing hollows by sounding
- recording result when tree condition requires modified work methods

- selecting appropriate method of access and tree work method
- assessing risk of selected method of access and tree work method
- conducting a meeting and confirming selected method of access and tree work method
- recording work site confirmation of method of access, work method and appropriate risk controls
- recording result when tree access or work is inappropriate
- advising client and stakeholders of requirements for further advice or testing
- seeking further advice from consulting arborist or access specialist
- completing inspection forms and submitting to client and stakeholders.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- tree inspection method/s and principles
- preparation of forms for inspection, hazard identification, environmental conditions and risk control
- determination of location of above-and-below-ground services
- site-specific risk assessments
- pre-operational and safety checks, on tools, equipment and machinery
- personal protective equipment
- work health, safety, site, environmental and traffic control measures
- methods of determining tree types, location and dimensions
- tree access and tree work methods
- branch health, vitality and integrity of attachment
- defects, signs and symptoms of disease, insects and other fauna of trees
- methods of load testing, cavity probing and hollows testing
- methods of tree access and tree work
- modified tree access or work methods
- inappropriate methods of tree access and tree work
- requirements for further advice or testing
- methods of seeking further advice from consulting arborists or access specialists
- completion and submission of forms.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage - work zone
 - trees
- materials:
 - tree inspection form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

Links

Companion Volume implementation guides are found in VETNet -

AHCARB303 Perform pruning operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform corrective and remedial pruning operations. The application of this unit of competency can occur on the ground or in aerial locations, once the candidate is situated in position to perform work. This unit of competency is independent of where the pruning occurs and the method of accessing the work location.

This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, materials and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable current versions of Australian Standards such as AS 4373 Pruning of amenity trees.

Pre-requisite Unit

FPICOT2237A Maintain chainsaws

And

FWPCOT2239A Trim and cut felled trees

Or

FPICOT3238B Operate a pole saw

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for pruning operations	1.1 Determine location of above-and-below-ground services 1.2 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.3 Receive pruning instructions from supervisor and clarify prior to undertaking work 1.4 Confirm first aid, rescue personnel, equipment and procedures 1.5 Communicate with work team during operations using voice, hand and whistle signals
2. Determine requirements of pruning work	2.1 Identify and confirm location of tree to be pruned 2.2 Inspect trees for access and work 2.3 Determine type, extent and limit of pruning work in accordance with specifications, scope of works and client brief 2.4 Maintain awareness of power line proximity, safe approach distances and clearances
3. Select and prepare tools and equipment	3.1 Select appropriate tools and equipment for pruning 3.2 Consider access and impact value of secateurs, handsaws, chainsaws and polesaws 3.3 Carry out pre-operational and safety checks on pruning tools and equipment 3.4 Select and use personal protective equipment 3.5 Sterilise pruning equipment in between individual tree work in accordance with hygiene and biosecurity considerations 3.6 Record and implement work health, safety, site, environmental and traffic control measures
4. Determine tree part to be removed	4.1 Investigate stem bark ridge, old cuts, dead branches and occluded and occluding branches 4.2 Determine separate parts to be a branch or co-dominant stem in relation to tree anatomy and branch attachment 4.3 Determine the part requiring removal to be a branch or co-dominant stem to select the appropriate pruning procedure
5. Carry out branch pruning operations	5.1 Use sharp pruning tools to make clean cuts 5.2 Operate chainsaws and polesaws as required to implement pruning cuts to the standards required by AS 4373 5.3 Apply compartmentalisation of decay in tree (CODIT) principles 5.4 Pre-cut or undercut branches to avoid splitting or tearing

Element	Performance criteria
	5.5 Remove remaining stub with final cut 5.6 Observe final cut procedure for branch removal cutting as close as possible to the branch collar without cutting into the branch collar or leaving a protruding stub. 5.7 Use branch bark ridge to determine angle of cut when removing a branch in the absence of a visible collar 5.8 Ensure bark at edge of all branch pruning cuts remains firmly attached
6. Carry out reduction pruning	6.1 Use branch bark ridge as guide to angle and position of final cut when making reduction cuts 6.2 Ensure lateral branch to which the final cut is made, is at least one third of diameter of branch being reduced at point of final cut.
7. Carry out stem pruning operations	7.1 Use stem bark ridge to determine angle of cut when removing a co-dominant stem 7.2 Be guided to position and angle of final cut, by positions and angles of joins between tissue of declining or dead stems and those of healthy stems elsewhere in tree 7.3 Ensure bark at edge of all stem pruning cuts remains firmly attached
8. Improve pruning quality	8.1 Inspect past pruning cuts to determine tree response 8.2 Use tree response to assess the quality of past pruning cuts 8.3 Seek feedback on pruning from other arborists 8.4 Identify and rectify incorrect pruning cuts 8.5 Modify future pruning cuts based on tree responses and feedback from others
9. Complete pruning operations	9.1 Drop pruning material into designated drop zone 9.2 Clean, maintain and store tools and equipment 9.3 Collect and dispose of, or recycle pruned material in a manner that causes minimal environmental damage 9.4 Maintain workplace records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB303A Implement a tree pruning program.

Assessment Requirements for AHCARB303 Perform pruning operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must perform the remedial and corrective pruning operations involved in branch pruning, reduction pruning and stem pruning. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- receiving pruning instructions from supervisor and clarifying prior to undertaking work
- communicating with work team during operations using voice, hand and whistle signals
- confirming first aid, rescue equipment and rescue procedures applicable to tree work
- identifying location of tree to be pruned
- inspecting trees for access and work
- determining type extent and limit of pruning work in accordance with the specifications, scope of works or client brief
- maintaining awareness of power line proximity, safe approach distances and clearances
- selecting appropriate tools and equipment for pruning
- considering access and impact value of secateurs, handsaws, chainsaws and polesaws
- selecting, preparing, and carrying out pre-operational and safety checks, on tools, equipment and machinery
- selecting and using personal protective equipment
- sterilising pruning equipment in between work on individual trees in accordance with hygiene and biosecurity considerations
- recording and implementing work health, safety, site, environmental and traffic control measures
- investigating stem bark ridge, old cuts, dead branches and occluded and occluding branches

- determining the separate parts to be a branch or co-dominant stem in relation to the tree anatomy and branch attachment
- determining the part requiring removal to be a branch or a co-dominant stem
- using sharp pruning tools to make clean cuts
- operating chainsaws and polesaws
- implementing pruning cuts to the standards required by AS 4373
- applying compartmentalisation of decay in tree (CODIT) principles
- pre-cutting or undercutting branches to avoid splitting or tearing
- removing remaining stub with final cut
- observing final cut procedure for branch removal for cutting as close as possible to the branch collar without cutting into the branch collar or leaving a protruding stub.
- using branch bark ridge to determine angle of cut when removing a branch in the absence of a visible collar
- ensuring bark at edge of all branch pruning cuts remains firmly attached
- using the branch bark ridge as a guide to the angle and position of the final cut when making reduction cuts
- ensuring the lateral branch to which the final cut is made, is at least one third of the diameter of the branch being reduced at the point of the final cut.
- using the stem bark ridge to determine the angle of cut when removing a co-dominant stem
- being guided to the position and angle of the final cut, by positions and angles of joints between tissue of declining or dead stems and those of healthy stems elsewhere in tree
- ensuring bark at edge of all stem pruning cuts remains firmly attached
- inspecting past pruning cuts to determine tree response
- using tree response to assess the quality of past pruning cuts
- seeking feedback on pruning from other arborists
- identifying and rectifying incorrect pruning cuts
- modifying future pruning cuts based on tree responses and feedback from others
- dropping pruning material into designated drop zone
- cleaning, maintaining and storing tools and equipment
- collecting and disposing of, or recycling pruned material in a manner that causes minimal environmental damage
- maintaining workplace records
- use of industry-standard terminology to describe arboriculture and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- risk assessment
- visual tree assessment
- tree health, growth habit, structure, stability and growing environment
- first aid
- operation of chainsaws and polesaws

- tree and branch anatomy and attachments: lateral branch collars, branch bark ridges, stem bark ridges
- pruning cuts to the standards required by AS 4373
- reduction cuts
- tree response to pruning
- correct and incorrect pruning cuts
- rectifying cuts
- pruning hygiene
- biosecurity
- communications using voice, hand and whistle signals
- power line proximity, safe approach distances and clearances
- rescue personnel, equipment and procedures applicable to tree work
- interpreting specifications
- maintaining workplace records
- disposal of plant debris in environmentally aware and sensitive manner
- work health and safety procedures for pruning operations.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment; however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - chainsaws - climbing saw
 - pole saw
 - pruning handsaws
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage - work zone
 - trees and tree parts
- materials:
 - pruning operations form
 - hazard identification and risk control form

- equipment and PPE check form
- emergency preparation form
- work communications form
- work site operations form
- work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB305 Dismantle trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to dismantle trees in confined spaces and in difficult or hazardous circumstances.

This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, materials and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Discretion and judgement is required. The work requires the application of extensive arboricultural knowledge. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB310 Perform aerial rigging*

*AHCARB207 Perform ground based rigging***

AHCARB311 Tie, dress, set and finish arborist knots

AND

*AHCARB307 Use advanced climbing techniques***

*AHCARB312 Use standard climbing techniques to access trees****

AHCARB311 Tie, dress, set and finish arborist knots

OR

TLILIC2005A Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

FPIFGM3212 Fall trees manually (intermediate)

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for tree removal	1.1 Determine access to site and gain approval by owner or site management 1.2 Confirm site preparations, including notification of local residents and authorities where necessary 1.3 Determine location of above-and-below-ground services 1.4 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.5 Protect, relocate and secure assets, property and vegetation related to work zone activities from potential damage during tree removal 1.6 Inspect trees to determine dimensions, appropriate removal methods and to confirm appropriateness of selected risk controls 1.7 Determine drop zone and communicate to all personnel 1.8 Confirm first aid, rescue personnel, equipment and procedures applicable to tree work 1.9 Carry out pre-operational and safety checks on tools, equipment and machinery 1.10 Select and use personal protective equipment 1.11 Record and implement work health, safety, site, environmental and traffic control measures
2. Implement dismantling of trees	2.1 Communicate with work team during operations, as required, verbally, using hand signals and whistles 2.2 Calculate mass of tree section, balance of load and confirm mass does not exceed safe working limit of equipment 2.3 Use dismantling techniques to ensure branches and trunk sections fall or are lowered safely into determined drop zone, with no damage to property and equipment or injury to personnel 2.4 Use and control friction devices as required 2.5 Dismantle branches and trunk sections using the 'cut and drop' method, and cut and lower by ropes and other lowering devices 2.6 Use directional felling techniques to ensure trunk of dismantled tree falls safely into determined drop zone with no damage to property and equipment or injury to personnel 2.7 Use and control elevated work platforms as required

Element	Performance criteria
3. Complete tree removal	3.1 Reduce dismantled tree sections to manoeuvrable lengths 3.2 Remove plant material and debris from site 3.3 Clean and check tools, equipment and machinery, and store 3.4 lean and store personal protective equipment 3.5 Record completion of tree removal and report to owner or site manager

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB305A Remove trees in confined spaces.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCARB305 Dismantle trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed removing a tree in a confined space using directional felling and removing a tree in a confined space using a dismantling process. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- inspecting trees to determine appropriate removal methods
- confirming appropriateness of selected risk controls
- determining access to site and gaining approval by owner or site management
- confirming site preparations, including notification of local residents and authorities where necessary
- recording and implementing work health, safety, site, environmental and traffic control measures
- determining drop zone and communicate to all personnel
- protecting, relocating and securing assets, property and vegetation related to work zone activities from potential damage during tree removal
- selecting, preparing, checking and using tools, equipment and machinery
- selecting and using personal protective equipment
- selecting and using safety equipment
- calculating mass of tree section
- confirming mass of tree section does not exceed the safe working limit of equipment
- dismantling branches and trunk sections using the 'cut and drop' method, and
- cutting and lowering sections by ropes and other lowering devices
- using dismantling techniques to ensure branches and trunk sections fall or are lowered safely into determined drop zone, with no damage to property and equipment or injury to personnel

- using directional felling techniques to ensure trunk of dismantled tree falls safely into determined drop zone with no damage to property and equipment or injury to personnel
- using and controlling friction devices where required
- using and controlling elevated work platforms as required
- reducing dismantled tree section to manoeuvrable lengths without injury to operator
- removing plant material and debris from site
- cleaning and checking tools, equipment and machinery, replacing if faulty or worn, and storing
- recording completion of tree removal and reporting to owner or site manager
- use of advanced rigging techniques
- calculating tree dimensions, mass of tree section and balance of load
- erecting signage, barriers, warning devices and traffic management equipment
- coordinating and sequencing work team activities
- use of industry standard terminology to describe arboriculture and work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site and tree hazards that might be encountered
- selection of low risk tree removal methods
- advanced climbing techniques and rope handling
- selecting and tying, dressing, setting and finishing arborist knots
- operation of lowering devices where required
- types of lowering devices that might be required, including friction devices, and methods for using them
- how to estimate density of tree sections
- the impact of force, breaking strength, safety factors and cycles to failure
- how to identify and evaluate structural defects in trees
- how to determine the density of tree sections
- safe working limits on all relevant rigging and lowering equipment
- methods of estimating mass and balance of load
- first aid and rescue personnel, equipment and procedures applicable to tree work
- methods of minimising environmental impact
- legislation and local regulations governing tree removal.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - rigging equipment
 - single rope technique (SRT) climbing kit
 - static and dynamic rope kit
 - harness
 - lowering and friction devices
 - gaffs/spurs
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - rescue kit
 - traffic management kit
 - signage – work zone
 - trees
- materials:
 - dismantling operations form
 - chainsaw operations form
 - pruning operations form
 - knot identification form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - rescue form - aerial
 - work communications form
 - work site operations form
 - work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB306 Undertake aerial rescue

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform an aerial rescue where an injured or unconscious person is safely brought to the ground from a tree or elevated work platform (EWP).

The unit applies to Arborists preparing and planning for the coordination and execution of rescue operations and the implementation of safety and first aid requirements.

Aerial rescue is likely to be undertaken in emergency situations with little or no supervision. It involves working closely with other members of a team to ensure the safety of all personnel and the public during a rescue operation. This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, materials and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for aerial rescue	1.1 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.2 Confirm emergency communication system is working 1.3 Confirm emergency services contact numbers are documented 1.4 Select, prepare and check first aid equipment and rescue kit 1.5 Position rescue and first aid equipment for easy access 1.6 Clarify own role in rescue situations 1.7 Confirm first aid, rescue personnel, equipment and rescue plan procedures with work team prior to undertaking work 1.8 Select and use personal protective equipment 1.9 Communicate with work team during operations using voice, hand and whistle signals
2. Assess and respond to an aerial emergency situation	2.1 Attempt communication with casualty 2.2 Activate emergency plan and request assistance from work team and public in accordance with rescue plan 2.3 Identify hazards associated with rescue, assess risks and implement suitable controls 2.4 Determine presence of live electrical wires or apparatus that will interfere with ability to access casualty and take appropriate action 2.5 Apply 'Safe Approach Distance' measures to live electrical situations 2.6 Use appropriate access equipment to carry out rescue in accordance with rescue plan 2.7 Maintain communication with casualty
3. Assess nature of injury	3.1 Secure rescuer safely

Element	Performance criteria
	3.2 Secure casualty 3.3 Assess injuries to determine whether or not to move casualty based on first aid procedures and risk assessment 3.4 Apply first aid that can be performed above ground, as required 3.5 Support, but do not move, a casualty with possible neck or spinal injuries and await expert medical treatment 3.6 Maintain communications with ground crew
4. Lower casualty to ground	4.1 Inform casualty of lowering procedure 4.2 Prepare casualty for descent in accordance with first aid, rescue plan and risk assessments 4.3 Descend tree safely in a controlled manner 4.4 Lower casualty safely to ground with support of ground crew
5. Complete rescue operations	5.1 Apply first aid on ground as needed 5.2 Obtain emergency assistance as required 5.3 Isolate equipment involved in accident for potential investigation and prevent reuse until checked 5.4 Remove all equipment in a controlled manner 5.5 Clean and store equipment 5.6 Clean and store personal protective equipment 5.7 Maintain records of aerial rescue in appropriate format

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCARB306 Undertake aerial rescue

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed planning and implementing a rescue operation and undertaking an aerial rescue. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming emergency communication system is working
- confirming emergency services contact numbers are documented
- selecting, preparing and checking first aid equipment and rescue kit
- positioning rescue and first aid equipment for easy access
- clarifying own role in rescue situations
- confirming first aid, rescue personnel, equipment and rescue plan procedures with work team prior to undertaking work
- selecting and using personal protective equipment
- communicating with work team during operations using voice, hand and whistle signals
- attempting communication with casualty
- activating emergency plan and requesting assistance from work team and public in accordance with rescue plan
- identifying hazards associated with rescue, assessing risks and implementing suitable controls
- determining presence of live electrical wires or apparatus that will interfere with ability to access casualty and take appropriate action
- applying 'safe approach distance' measures to live electrical situations
- using appropriate access equipment to carry out rescue in accordance with rescue plan
- maintaining communication with casualty
- securing rescuer safely
- securing casualty

- assessing injuries to determine whether or not to move casualty based on first aid procedures and risk assessment
- applying first aid that can be performed above ground, as required
- supporting, but do not move, a casualty with possible neck or spinal injuries and awaiting expert medical treatment
- maintaining communications with ground crew
- informing casualty of lowering procedure
- preparing casualty for descent in accordance with first aid, rescue plan and risk assessments
- descending tree safely in a controlled manner
- lowering casualty safely to ground with support of ground crew
- applying first aid on ground as needed
- obtaining emergency assistance as required
- isolating equipment involved in accident for potential investigation and prevent reuse until checked
- removing all equipment in a controlled manner
- cleaning and storing equipment
- cleaning and storing personal protective equipment
- maintaining records of aerial rescue in appropriate format
- using industry standard terminology to describe aerial rescues and the work environment.

Knowledge Evidence

candidate must demonstrate knowledge of:

- emergency procedures to assist in ground-based rescues of EWP and climbing workers
- hazard identification methods
- risk assessment systems
- Safe Approach Distances
- recognition of live electrical wires or apparatus
- electrical wires and apparatus safety
- first aid procedures
- contents of a first aid kit
- use of a first aid kit
- emergency services communication systems
- emergency services contact numbers
- emergency plans
- appropriate placement of rescue equipment
- use of rescue kits
- rescue personnel, equipment and rescue plan procedures
- how to control risk to rescuer, victim and others
- types of reporting required after rescue
- personal protective equipment
- how to deal with an emergency

- lowering mechanisms for an aerial rescue
- work health and safety records with regards to incident reporting.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - rescue kit
 - rescue dummy
 - emergency communication system
 - rigging equipment
 - single rope technique (SRT) climbing kit
 - static and dynamic rope kit
 - harnesses
 - lowering and friction devices
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage – work zone
 - trees
- materials:
 - rescue form - aerial
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - knot identification form
 - work communications form
 - work site operations form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB307 Use advanced climbing techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to climb trees with ropes, harnesses and specialist equipment using advanced techniques for the purpose of mobility around the required sections of trees for work positioning.

This unit applies to individuals who have a range of cognitive, technical and communication skills to select and apply a specialised range of methods, ropes, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Discretion and judgement is required. The work requires the application of extensive arboricultural knowledge. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB312 Use standard climbing techniques to access trees*

AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare site and inspect equipment	1.1 Determine appropriate method for accessing tree – climbing or using an elevated work platform (EWP) – through discussion with work team 1.2 Determine location of above-and-below-ground services 1.3 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.4 Confirm first aid and rescue personnel, equipment and procedures 1.5 Ensure work team member present, capable, willing and equipped to assist or perform aerial rescue operations 1.6 Prepare and carry out pre-operational and safety checks, on ropes, harnesses, tools and equipment 1.7 Select and use personal protective equipment 1.8 Record and implement work health, safety, site, environmental and traffic control measures
2. Select climbing equipment	2.1 Select harness and appropriate equipment for climbing 2.2 Inspect tree to determine low risk access route through discussion with work team and seek feedback 2.3 Estimate tree height and load in relation to safe working limits of ropes and equipment 2.4 Determine the hold, release and grip attributes of rope 2.5 Select and use static and dynamic rope as required 2.6 Select and use triple locking carabiners 2.7 Determine limits, relative advantages and disadvantages of friction hitches
3. Prepare to access tree	3.1 Tie, dress, set and finish climbing knots and hitches 3.2 Communicate with work team during operations using voice, hand and whistle signals 3.3 Maintain awareness of power line safe approach distances and vegetation clearances 3.4 Select low risk anchor points in accordance with strength, suitability requirements and branch weight
4. Prepare climbing spurs and gaffs for dismantling operations	4.1 Prepare climbing spurs and gaffs for dismantling operations 4.2 Check all components of climbing spurs for defects and wear 4.3 Check gaff tip profile for correct dimensions using gaff gauge 4.4 Sharpen gaff tip cutting edge with file at defined angle using gaff gauge

Element	Performance criteria
	4.5 Adjust climbing spurs to provide correct operator fit 4.6 Access and perform dismantling work using climbing spurs 4.7 Maintain separation of spurs 4.8 Maintain clearance distance between spurs and ropes
5. Access and ascend tree	5.1 Access and ascend tree using low risk access route with harness and lanyard 5.2 Ascend using single rope, double rope and selected friction hitch as required 5.3 Ascend using uni-ascenders, foot and hand ascenders, and other ascension devices as required 5.4 Use micrograbs, grigris and micro-pulleys as required for mobility and work positioning 5.5 Demonstrate ability to carry out change-overs as required 5.6 Set up redirects and belays using slings and anchors as required 5.7 Select multiple lines to climb trees and tree parts as required 5.8 Select multiple lines to perform tree operations as required
6. Descend from tree	6.1 Descend tree in a controlled manner 6.2 Remove all access equipment in a controlled manner 6.3 Check, clean and store access equipment 6.4 Clean and store personal protective equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCARB307 Use advanced climbing techniques

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed ascending and descending trees using advanced tree climbing practices.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts. The candidate must provide evidence for and demonstrate:

- appropriate method for accessing tree – climbing or using an EWP – through discussion with work team
- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming first aid and rescue personnel, equipment and procedures
- ensuring work team member present, capable, willing and equipped to assist or perform aerial rescue operations
- preparing and carrying out pre-operational and safety checks, on ropes, harnesses, tools and equipment
- selecting and using personal protective equipment and safety equipment
- recording and implementing work health, safety, site, environmental and traffic control measures
- selecting harness and appropriate equipment for climbing
- inspecting tree to determine low risk access route through discussion with work team and seek feedback
- estimating tree height and load in relation to safe working limits of ropes and equipment
- determining the hold, release and grip attributes of rope
- selecting and using static and dynamic rope as required
- selecting and using triple locking carabiners

- determine limits, relative advantages and disadvantages of friction hitches including: Tautline, Blake's, Prussik, Klemheist, Valdetain, French Prussik and specialised variations
- tying, dressing, setting and finishing climbing knots and hitches
- communicating with work team during operations using voice, hand and whistle signals
- maintaining awareness of power line safe approach distances and vegetation clearances
- selecting low risk anchor points in accordance with strength, suitability requirements and branch weight
- accessing and ascending tree using low risk access route with harness and lanyard
- ascending using single rope, double rope and selected friction hitch as required
- ascending using uni-ascenders and foot ascenders as required
- using micrograbs, grigris and micro-pulleys as required for access and tree operations
- demonstrating ability to carry out change-overs
- setting up redirects and belays using slings and anchors
- selecting multiple lines to access trees and tree parts
- selecting multiple lines to perform tree operations
- descending tree in a controlled manner
- removing all access equipment in a controlled manner
- cleaning and storing climbing equipment
- cleaning and storing personal protective equipment
- use of industry standard-terminology to describe climbing and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate method of tree access
- selection of climbing or EWP access
- determination of location of above-and-below-ground services
- site-specific risk assessment
- first aid personnel, equipment and procedures
- rescue personnel, equipment and procedures
- work health, safety, site, environmental and traffic control measures
- pre-operational and safety checks, on ropes, harnesses, tools and equipment
- personal protective equipment
- types of climbing ropes
- dynamic and static ropes
- rope characteristics
- uses of climbing ropes
- safe working limits of ropes
- safe working limits of equipment
- defects in ropes, tools and equipment
- climbing harnesses and lanyards

- climbing equipment
- triple action carabiners
- friction hitches including:
 - Tautline, Blake's, Prussik, Klemheist, Valdetain, French Prussik and specialised variations
- arborist knots
- tying knots
- dressing knots
- setting knots
- checking knots
- finishing knots
- industry voice, hand and whistle signals
- low risk access routes
- estimation of tree height
- estimation of load
- safe working limits
- tree access techniques and equipment
- strength and suitability requirements
- single and double rope techniques
- uni-ascenders and foot ascenders
- micrograbs, grigris, micro-pulleys
- use of climbing spikes of various lengths
- change-overs
- redirects and belays using slings and anchors
- use of multiple lines to access trees and tree parts
- advanced climbing techniques
- low risk anchor points
- maintenance of awareness of power lines
- power line safe approach distances and vegetation clearances
- controlled descent operations
- controlled removal of access equipment
- cleaning of equipment
- storage of equipment.

Assessment Conditions

It is an industry requirement that delivery of training and assessment in this unit provides for the explicit conditions of work team capability for aerial rescue operations. It is an industry requirement for competency in this unit that assessment must include a log record of two hundred (200) hours of advanced climbing.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit. Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - single rope technique (SRT) climbing kit
 - harness
 - chaps
 - climbing friction hitches
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - rescue kit
 - traffic management kit
 - trees
- materials:
 - climbing techniques form - advanced
 - climbing log record – advanced
 - tree inspection form
 - hazard identification and risk control form
 - equipment and PPE check form
 - knot identification form
 - work communications form
 - rescue form - aerial

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB308 Install cable and bracing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install cable and bracing hardware into the structure of a tree.

The work requires the application of extensive arboricultural knowledge. This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems.

Some discretion and judgement may be required to the extent of pruning and cable and bracing required for a particular tree. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work	1.1 Determine cable and bracing requirements from client brief 1.2 Determine materials required for installing cable and bracing 1.3 Determine location of above-and-below-ground services 1.4 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.5 Select appropriate cable and bracing tools and equipment 1.6 Select and use personal protective equipment 1.7 Confirm first aid and emergency personnel, equipment and procedures 1.8 Record and implement work health, safety, site, environmental and traffic control measures
2. Prepare trees for cable and bracing	2.1 Examine structural tree components using visual tree assessment and in accordance with Compartmentalisation of Decay in Trees (CODIT) principles in relation to tree anatomy and physiology 2.2 Examine branches to determine vitality and integrity of attachment ensuring ability to safely implement bracing 2.3 Undertake preliminary pruning in accordance with AS 4373 to aid cable and bracing installation
3. Install cable and bracing	3.1 Discuss planned approach to cable and bracing with other members of work team 3.2 Install cable and bracing 3.3 Determine the requirement for additional pruning to restore tree to its natural habit and form and sustain its growth 3.4 Check and record completed program for quality of work

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB308A Install cable and bracing.

Assessment Requirements for AHCARB308 Install cable and bracing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed installing cable and bracing according to a pruning program.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment
- determining cable and bracing requirements from client brief
- confirming first aid and rescue procedures applicable to tree work
- examining structural tree components
- examining vitality and structural integrity of branch attachments
- identifying work health and safety hazards and assessing risk
- recording and implementing site and traffic control measures
- use of tree climbing techniques or ability to work from an elevated work platform
- installing cable and bracing
- determining requirement for additional pruning
- checking and recording completed program for quality of work
- use of industry standard terminology to describe arboriculture and work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the effect of pruning on tree growth, habit and form
- tree anatomy and tree physiology
- tree pruning techniques appropriate to requirements of species

- visual tree assessment
- selection of appropriate cable and bracing tools and equipment
- selection of suitable personal protective equipment
- the principles and methods of pruning (tree anatomy and physiology)
- identification of work health and safety hazards, risk assessment and risk control application
- quality of pruning work
- cable and bracing techniques appropriate to tree species
- cable and bracing theory
- Compartmentalisation of Decay in Trees (CODIT) principles
- implications of pruning cuts and the way trees respond
- sustainable growth requirements of trees
- natural habit and form of trees
- first aid and rescue personnel, equipment and procedures applicable to tree work
- local government tree protection and preservation regulations
- Australian Standard 4373–2007 relating to tree pruning.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - dynamic and static cable and bracing tools and products
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
 - signage – work zone
 - trees
- materials:
 - cable and bracing operations form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form

- work records form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB309 Implement a tree protection program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a tree protection program.

The work requires the application of a broad range of arboricultural and horticultural skills and knowledge. This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Determine the implementation requirements of the tree protection program	1.1 Determine location of above-and-below-ground services 1.2 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.3 Identify trees to be protected, reasons for protection and types of protection methods from the tree protection plan 1.4 Assess and record the environmental impacts of the program 1.5 Identify resources required to implement the program and confirm availability with relevant personnel or suppliers 1.6 Determine, schedule and allocate implementation tasks and make allowances for contingencies 1.7 Discuss information relating to the implementation of the program with appropriate personnel
2. Make site preparations	2.1 Mark the location of protection areas on the site 2.2 Select, prepare, and carry out pre-operational and safety checks, on tools, equipment and machinery 2.3 Select and use personal protective equipment 2.4 Confirm first aid equipment and emergency procedures 2.5 Record and implement work health, safety, site, environmental and traffic control measures
3. Construct protective devices	3.1 Use tools, equipment and materials appropriate to the task 3.2 Construct or assemble tree protection devices with consideration for any needs specific to the species or individual tree 3.3 Install protection devices 3.4 Inspect completed protection devices for viability and take remedial action where necessary
4. Monitor protection program	4.1 Monitor tree health during program 4.2 Take remedial action to maintain tree health 4.3 Check protection devices periodically for their effectiveness 4.4 Report and repair broken, damaged or ineffective components 4.5 Dismantle and remove protection devices 4.6 Clean, maintain and store tools and equipment 4.7 Maintain records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB309A Implement a tree protection program.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCARB309 Implement a tree protection program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed determining the protection requirements of a tree, setting out a site according to the requirements of the protection program and constructing protective devices appropriate to the needs of the tree.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- identifying trees to be protected, reasons for protection and types of protection methods
- assessing and recording environmental impacts of the program
- determining, scheduling and allocating implementation tasks
- making allowances for contingencies
- marking location of protection areas on the site
- erect safety barriers and signage to ensure public and operator safety
- carrying out pre-operational and safety checks
- recording and implementing work health, safety, site, environmental and traffic control measures
- constructing or assembling tree protection devices appropriate for needs of tree
- installing tree protection devices
- inspecting completed protection devices for viability
- monitoring tree health
- reporting and repairing broken, damaged or ineffective protection devices
- dismantling and removing protection devices
- maintaining records

- recognising healthy, stressed and damaged trees
- use of industry standard terminology to describe arboriculture and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- methods of identifying and protecting trees
- tree protection systems, types and methods of protection
- methods of marking sites
- environmental impact assessment methods
- selection, use and maintenance of suitable personal protective equipment
- application of work health safety and environmental controls
- task scheduling and contingency management
- tree health (tree physiology)
- systems for use installation of safety barriers and signage
- tree protection plans
- techniques for assembling or constructing tree protection devices suitable to the requirements of tree species
- protection requirements of tree species
- remedial actions for tree health
- first aid and rescue personnel, equipment and procedures applicable to tree work
- specifications and construction methods for installing protection devices
- environmental factors affecting trees
- principles, regulations and practices for restricting access and traffic management.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - tree protection devices/equipment
 - construction tools
 - personal protective equipment (PPE)
 - first aid and emergency kit

- traffic management kit
- signage – work zone
- trees
- materials:
 - tree maintenance form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB310 Perform aerial rigging

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform aerial rigging by selecting and using appropriate equipment and methods. This work requires application of extensive arboricultural skills and knowledge, including various rigging techniques for lowering, controlling and redirecting loads during tree pruning and tree removal. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

This unit applies to individuals who have a range of skills to select and apply a specialised range of methods, tools, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Discretion and judgement is required. Elevated work platforms may be involved.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB207 Perform ground based rigging*

AHCARB311 Tie, dress, set and finish arborist knots

AND

AHCARB307 Use advanced climbing techniques*

*AHCARB312 Use standard climbing techniques to access trees***

AHCARB311 Tie, dress, set and finish arborist knots

OR

TLILIC2005A Licence to operate a boom-type elevating work platform (boom length 11 metres or more)

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare work site	1.1 Confirm location of worksite and location of correct tree as identified in scope of works 1.2 Obtain required site permits and licences 1.3 Determine location of above-and-below-ground services 1.4 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.5 Ensure scope of works is within capacity and limits of team and equipment 1.6 Confirm first aid and rescue personnel, equipment and procedures applicable to tree work 1.7 Inspect tree and identify structural defects in relation to tree taxonomy, anatomy and physiology 1.8 Consider impact of wind speed and direction on rigging methods 1.9 Consider 'cycles to failure' of load-bearing equipment 1.10 Select, prepare, and carry out pre-operational and safety checks, on tools, equipment and machinery 1.11 Select and use personal protective equipment 1.12 Discuss and confirm work-zone locations and areas with work team 1.13 Record and implement work health, safety, site, environmental and traffic control measures
2. Design and prepare rigging system	2.1 Determine load limit of rigging system 2.2 Consider mass and dimensions of tree part, centre of gravity, dimensions in relation to working space 2.3 Calculate load and balance 2.4 Consider breaking strength and safety factor of equipment in use 2.5 Select appropriate anchor and attachment points 2.6 Determine impact of force under normal and failure conditions and apply safety factor 2.7 Design rigging system to allow for load and impact of force 2.8 Discuss rigging system with work team 2.9 Select appropriate rigging equipment and inspect for defects

Element	Performance criteria
	2.10 Assemble, reassess and install rigging equipment
3. Perform rigging operations	3.1 Communicate with work team during operations using voice, hand and whistle signals 3.2 Attach rigging and tie, dress, set and finish arborist knots 3.3 Test tensioned load 3.4 Identify problems, unsafe rigging practices and provide alternative rigging solutions 3.5 Monitor and adjust rigging system, taking into account environmental conditions 3.6 Control load and raise, lower or redirect as required and in a manner appropriate to worksite 3.7 Perform tip lowering, butt lowering, horizontal lowering and lifting as required 3.8 Operate lowering and friction devices as required 3.9 Match load frequency and size to processing capacity of ground crew 3.10 Process plant material and debris during rigging operations 3.11 Maintain effective communication with work team during rigging process
4. Complete tree rigging operations	4.1 Check proper completion of rigging operations 4.2 Retrieve appropriate components of rigging system in a controlled manner 4.3 Clean and remove plant material and debris from site 4.4 Clean and check tools, equipment and machinery, and store 4.5 Clean and store personal protective equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB310A Perform aerial rigging.

Assessment Requirements for AHCARB310 Perform aerial rigging

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed demonstrating rigging techniques for lowering, controlling and redirecting loads during tree pruning and tree removal.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- confirming location of worksite and location of correct tree as identified in scope of works
- ensuring scope of works is within capacity and limits of team and equipment
- obtaining required site permits and licenses
- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- inspecting trees and identifying structural defects in relation to taxonomic tree species, tree anatomy, and tree physiology
- considering impact of wind speed and direction on rigging methods
- considering ‘cycles to failure’ of load-bearing equipment
- selecting, preparing, and carrying out pre-operational and safety checks, on tools, equipment and machinery
- selecting and using personal protective equipment
- discussing and confirming work-zones locations and areas with work team
- recording and implementing work health, safety, site, environmental and traffic control measures
- communicating with work team during operations using voice, hand and whistle signals
- determining load limit of rigging system
- selecting appropriate anchor and attachment points

- considering mass and dimensions of tree part, centre of gravity, dimensions in relation to working space
- calculating load and balance
- consider breaking strength and safety factor of equipment in use
- determining impact of force under normal and failure conditions and apply safety factor
- designing rigging system to allow for load and impact of force
- discussing rigging system with work team
- selecting appropriate rigging equipment and inspecting for defects
- assembling and installing rigging equipment
- identifying problems, unsafe rigging practices and provide alternative rigging solutions
- maintaining effective communication with work team during rigging process
- attaching rigging and using appropriate knots as required
- monitoring and adjusting rigging system, taking into account environmental conditions
- testing tensioned load
- controlling load and raise, lowering or redirecting as required and in a manner appropriate to worksite
- operating lowering and friction devices
- performing tip lowering, butt lowering, horizontal lowering and lifting as required
- matching load frequency and size to processing capacity of ground crew
- retrieving appropriate components of rigging system
- checking proper completion of rigging operations
- cleaning and checking tools, equipment and machinery, replacing if faulty or worn, and storing
- use of industry standard terminology to describe arboriculture, equipment and work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site-specific risk assessments
- above-and-below-ground services
- selection, tying methods and purpose of appropriate industry knots
- types and purposes of a range of rigging equipment and devices
- estimation of distances and dimensions of tree parts and equipment
- estimation of centre of gravity for balancing a load
- how to estimate areas for safe work zones
- estimation of breaking strength, safety factor and cycles to failure
- signals and communication systems
- common problems and hazards with rigging and their potential consequences and solutions
- breaking strain, safe working load and 'cycles to failure' for rigging equipment
- anatomy, physiology, and taxonomy of tree species for a range of trees
- how variations in weather such as wind speed and direction affect work

- signs of equipment defects
- structural defects in trees
- operational use of lowering and friction devices
- first aid and rescue personnel, equipment and procedures applicable to tree work.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - rigging equipment
 - single rope technique (SRT) climbing kit
 - static and dynamic rope kit
 - harness
 - lowering and friction devices
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - rescue kit
 - traffic management kit
 - signage – work zone
 - trees
- materials:
 - rigging operations form - aerial
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - rescue form - aerial
 - work communications form
 - knot identification form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB311 Tie, dress, set and finish arborist knots

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to tie, dress, set and finish arborist knots, hitches and bends.

This unit applies to ground based workers undertake defined activities with appropriate methods, tools and information, work in a structured context, apply knowledge and skills to demonstrate limited autonomy and judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assist in preparation of work site	1.1 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.2 Confirm first aid and emergency equipment and procedures applicable to tree work 1.3 Carry out pre-operational and safety checks on ropes and equipment 1.4 Select and use appropriate personal protective equipment 1.5 Record and implement work health, safety, site, environmental and traffic control measures
2. Tie, dress and set arborist knots	2.1 Communicate with work team during operations using voice, hand and whistle signals 2.2 Determine work application for knot for ground-based, aerial, rigging and climbing work tasks 2.3 Determine appropriate knot for locking and non-locking attributes, strength, impact on rope strength, loosening and slippage 2.4 Determine loss of rope strength in using selected knot 2.5 Determine appropriate rope for knot application 2.6 Determine requirements for secondary knots and stopper knots 2.7 Tie rope to form intended knot 2.8 Leave appropriate tail length approximately five times diameter of rope 2.9 Dress knot to align all parts of knot 2.10 Adjust knot to appropriate proportions 2.11 Set knot to 'tighten and load' knot prior to use 2.12 Finish knot with selected stopper knot, tucked tail or suitable tail length
3. Inspect and use knot	3.1 Inspect completed knot 3.2 Check knot for correctness of assembly 3.3 Confirm knot for correct work application 3.4 Maintain effective communication with work team 3.5 Install and use knot in work application 3.6 Untie knot at completion of work task
4. Complete knot operations	4.1 Clean and check ropes 4.2 Report and tag faulty or worn ropes 4.3 Clean and store personal protective equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Ground-based Rigging applications must include knowledge of:

- Alpine butterfly knot
- Bowline on the bight
- Cows hitch with better half
- Clove hitch + two half hitches
- Half hitch pre knot
- Klemheist friction knot
- Marline pre knot
- Marline spike hitch
- Riggers knot + two half hitches
- Running bowline
- Sheet bend
- Slippery sheet bend
- Timber hitch
- Zeppelin bend

Above Ground applications must include knowledge of:

- Scaffold knot
- Double Fishermans Knot/Prusik loop
- Girth Hitch
- English Prusik Knot
- Marlin Spike
- Clove Hitch
- Double Overhand Stopper Knot
- Sheet bend
- Slippery Sheet Bend
- Bowline Knot
- Running Bowline Knot

Aerial Rigging applications must include knowledge of:

- Cows hitch
- Riggers knot + two half hitches
- Clove hitch + two half hitches
- Alpine butterfly knot
- Half hitch pre knot
- Marline pre knot

- Marline spike hitch
- Zeppelin bend
- Running bowline
- Bowline on the bight
- Rolling hitch
- Timber hitch
- Sheet bend
- Slippery sheet bend

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCARB311 Tie, dress, set and finish arborist knots

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming first aid and emergency equipment and procedures applicable to tree work
- selecting and using appropriate personal protective equipment
- recording and implementing work health, safety, site, environmental and traffic control measures
- communicating with work team during operations using voice, hand and whistle signals
- determining work application for:
 - ground-based knots
 - aerial knots
 - rigging knots and
 - climbing knots
- determining appropriate knot for locking and non-locking attributes, strength, impact on rope strength, loosening and slippage
- determining loss of rope strength using selected knot
- determining appropriate rope for knot application
- determining requirements for secondary knots and stopper knots
- determining appropriate rope used for knot application
- tying knot to form intended knot
- leaving appropriate tail length approximately five times diameter of rope
- dressing knot to align all parts of knot
- setting knot to 'tighten and load' knot prior to use
- finishing knot with selected stopper knot as required

- inspecting completed knot
- checking knot for correctness of assembly
- confirming knot for correct work application
- maintaining effective communication with work team
- installing and using knot in work application
- untying knot at completion of work task
- clean and check ropes
- reporting and tagging faulty or worn ropes
- cleaning and storing personal protective equipment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site-specific risk assessment
- first aid and emergency equipment and procedures
- personal protective equipment
- work health, safety, site, environmental and traffic control measures
- voice, hand and whistle signals
- work applications for knots
- knots for ground-based rigging tasks
- knots for aerial rigging tasks
- knots for climbing work tasks
- determination of appropriate knot by evaluation of knot attributes:
 - locking and non-locking attributes
 - impact on rope strength
 - loosening and
 - slippage
- determining loss of rope strength using selected knot
- determination of appropriate rope for knot application
- knot tying
- intended knot
- tail length
- diameter of rope
- alignment of knot parts
- knot setting
- knot tightening and loading
- stopper knot
- knot finishing
- correctness of assembly and use in application
- inspection, installation and use of knots
- effective work team communications
- tagging system

- checking and cleaning ropes.

Assessment Conditions

It is an industry requirement for the assessment of the knots appropriate to the work application as listed in the Range of Conditions section of this unit of competency.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - static and dynamic rope kit
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - traffic management kit
- materials:
 - knot identification form
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - work communications form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB312 Use standard climbing techniques to access trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to climb trees with ropes and harnesses using standard techniques for the purpose of accessing required sections of trees.

This unit applies to workers who have a range of cognitive, technical and communication skills to select and apply a specialised range of methods, ropes, equipment and information to complete routine activities and provide and transmit solutions to predictable and sometimes unpredictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB311 Tie, dress, set and finish arborist knots

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare site and inspect equipment	1.1 Determine appropriate method for accessing tree – climbing or using an elevated work platform (EWP) – through discussion with work team 1.2 Determine location of above-and-below-ground services 1.3 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.4 Confirm first aid and rescue personnel, equipment and procedures 1.5 Ensure work team member present, capable, willing and equipped to assist or perform aerial rescue operations 1.6 Prepare and carry out pre-operational and safety checks, on ropes, harnesses, tools and equipment 1.7 Select and use personal protective equipment 1.8 Record and implement work health, safety, site, environmental and traffic control measures
2. Select climbing equipment	2.1 Select harness and appropriate equipment for climbing 2.2 Inspect tree to determine low risk access route through discussion with work team and seek feedback 2.3 Estimate tree height and load in relation to safe working limits of ropes and equipment 2.4 Determine the hold, release and grip attributes of rope 2.5 Select and use dynamic rope 2.6 Select and use triple locking carabiners
3. Prepare to access tree	3.1 Tie, dress, set and finish climbing knots and hitches 3.2 Communicate with work team during operations using voice, hand and whistle signals 3.3 Maintain awareness of power line clearances 3.4 Select low risk anchor points in accordance with strength, suitability requirements and branch weight
4. Access and ascend tree	4.1 Access and ascend tree using low risk access route with harness and lanyard 4.2 Ascend using double rope with prussik technique 4.3 Ascend using trunk walking technique and foot ascenders as required
5. Descend from tree	5.1 Descend tree in a controlled manner 5.2 Remove all access equipment in a controlled manner 5.3 Clean and store access equipment 5.4 Clean and store personal protective equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB204A Undertake standard climbing techniques.

Assessment Requirements for AHCARB312 Use standard climbing techniques to access trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed climbing trees using standard climbing techniques in a safe manner. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- appropriate method for accessing tree – climbing or using an EWP – through discussion with work team
- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- confirming first aid and rescue personnel, equipment and procedures
- ensuring work team member present, capable, willing and equipped to assist or perform aerial rescue operations
- preparing and carrying out pre-operational and safety checks, on ropes, harnesses, tools and equipment
- selecting and using personal protective equipment and safety equipment
- recording and implementing work health, safety, site, environmental and traffic control measures
- selecting harness and appropriate equipment for climbing
- inspecting tree to determine low risk access route through discussion with work team and seek feedback
- estimating tree height and load in relation to safe working limits of ropes and equipment
- determining the hold, release and grip attributes of rope
- selecting and using dynamic rope
- selecting and using triple locking carabiners
- tying, dressing, setting and finishing climbing knots and hitches
- communicating with work team during operations using voice, hand and whistle signals
- maintaining awareness of power line clearances

- selecting low risk anchor points in accordance with strength, suitability requirements and branch weight
- accessing and ascending tree using low risk access route with harness and lanyard
- ascending using double rope with prussik technique
- ascending using trunk walking technique and foot ascenders as required
- descending tree in a controlled manner
- removing all access equipment in a controlled manner
- cleaning and storing climbing equipment
- cleaning and storing personal protective equipment
- use of industry standard-terminology to describe climbing and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate method of tree access
- selection of climbing or EWP access
- determination of location of above-and-below-ground services
- site-specific risk assessment
- first aid personnel, equipment and procedures
- rescue personnel, equipment and procedures
- work health, safety, site, environmental and traffic control measures
- pre-operational and safety checks, on ropes, harnesses, tools and equipment
- personal protective equipment
- types of climbing ropes
- dynamic ropes
- rope characteristics
- uses of climbing ropes
- safe working limits of ropes
- safe working limits of equipment
- defects in ropes, tools and equipment
- climbing harnesses and lanyards
- climbing equipment
- triple locking carabiners
- arborist knots
- tying knots
- dressing knots
- setting knots
- checking knots
- finishing knots
- industry voice, hand and whistle signals
- low risk access routes
- estimation of tree height

-
- estimation of load
 - safe working limits
 - tree access techniques and equipment
 - strength and suitability requirements
 - double rope with prussik technique
 - trunk walking and foot ascenders
 - standard climbing technique
 - low risk anchor points
 - maintenance of awareness of power lines
 - power line clearances
 - controlled descent operations
 - controlled removal of access equipment
 - cleaning of equipment
 - storage of equipment
 - work health and safety measures relating to own work.

Assessment Conditions

It is an industry requirement that delivery of training and assessment in this unit provides for the explicit conditions of work team capability for aerial rescue operations. It is an industry requirement for competency in this unit that assessment must include a log record of two hundred (200) hours of standard climbing.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - standard climbing kit
 - harness
 - high decibel whistle
 - personal protective equipment (PPE)
 - first aid and emergency kit
 - rescue kit
 - traffic management kit
 - trees

- materials:
 - climbing techniques form- standard
 - climbing log record - standard
 - hazard identification and risk control form
 - equipment and PPE check form
 - emergency preparation form
 - work communications form
 - knot identification form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB313 Identify trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to identify trees and their environmental and social benefits.

This unit applies to individuals who undertake defined activities with appropriate methods, tools and information, work in a structured context, apply knowledge and skills to demonstrate limited autonomy and judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Inspect tree features	1.1 Inspect the form, structures and local environment of tree 1.2 Examine and describe tree morphology in botanical terms 1.3 Describe leaf morphology for shape, colour and size

Element	Performance criteria
	1.4 Examine and record features of buds, petiole, branchlets, branches and bark 1.5 Examine and record flower characteristics 1.6 Examine and record fruit type and characteristics 1.7 Use all relevant available senses to assist in tree identification 1.8 Record useful and key identifying attributes of tree parts
2. Inspect tree condition	2.1 Inspect tree canopy and structures for general health and condition 2.2 Use observations to recognise signs and symptoms of diseases, pests or deficiencies that assist in identification of tree 2.3 Record relevant data and identify tree where possible at this stage
3. Identify tree	3.1 Compare tree samples to images to recognise genus and species where possible 3.2 Select and use research, reference materials and field guides to define closer identification 3.3 Use taxonomic keys to analyse specific characteristics of tree to identify species and cultivar where possible
4. Identify tree benefits	4.1 Examine tree for existing habitat use and food source supply 4.2 Identify environmental benefits provided by tree in current location 4.3 Rate performance of tree in its current condition in terms of environmental and social benefits 4.4 Identify and describe value of benefits to the client and community
5. Report on results	5.1 Record identification achieved 5.2 Highlight key identifying features observed in the process 5.3 Inform the client or organisation of the results of the identification process

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCARB313 Identify trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- inspecting the form, structures and local environment of tree
- examining and describe tree morphology in botanical terms
- describing leaf morphology for shape, colour and size
- examining and record features of buds, petiole, branchlets, branches and bark
- examining and record flower characteristics
- examining and record fruit type and characteristics
- using all relevant available senses to assist in tree identification
- recording useful and key identifying attributes of tree parts
- inspecting tree canopy and structures for general health and condition
- using observations to recognise signs and symptoms of diseases, pests or deficiencies that assisting in identification of tree
- recording relevant data and identify tree where possible at this stage
- comparing tree samples to images to recognise genus and species where possible
- selecting and using research, reference materials and field guides to define closer identification
- using taxonomic keys to analyse specific characteristics of tree to identify species and cultivar where possible
- examining tree for existing habitat use and food source supply
- identifying environmental benefits provided by tree in current location
- rating performance of tree in its current condition in terms of environmental and social benefits
- identifying and describing value of benefits to the client and community
- recording identification achieved
- highlighting key identifying features observed in the process
- informing the client or organisation of the results of the identification process.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- form, structures and local environment of tree
- tree morphology in botanical terms
- leaf morphology for shape, colour and size
- features of buds, petiole, branchlets, branches and bark
- flower characteristics
- fruit type and characteristics
- use of sensory methods in tree identification
- useful and key identifying attributes of tree parts
- tree canopy and structures
- general health and condition of trees
- signs and symptoms of diseases, pests or deficiencies of trees that assist in tree identification
- methods of tree identification
- recording of data
- using tree samples for identification
- comparison of tree samples to images of trees
- recognition of genus and species where possible
- using research, reference materials and field guides
- taxonomy
- using taxonomic keys to identify species and cultivar where possible
- tree examination for existing habitat use and food sources
- environmental benefits provided by trees
- performance rating of tree condition
- identification of value of tree benefits to the client and community
- methods of description of value of tree benefits to the client and community
- methods of recording tree identification
- key identifying features for identification
- methods of informing client and organisation of tree identification.

Assessment Conditions

It is an industry requirement for competency in this unit that assessment requires methods of assessment that focus on the process of identification, incorporating the use of multiple reference sources and pathways to identify trees.

Assessment must provide for a minimum of sixty-five (65) identifications of different trees local to the region.

Assessment must provide for a minimum of ten (10) identifications using a taxonomic key or field guide.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - use of multiple reference sources
 - taxonomic keys
 - field guides
 - camera/phone camera
 - trees and tree specimens
- materials:
 - tree profile and benefits form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

Assessment Requirements for AHCARB401 Verify pruning specifications

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- confirming trees to be pruned and the desired outcomes for pruning works in accordance with client brief
- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- identifying and record tree species using botanical nomenclature and common names
- verifying location of tree using fixed reference points of boundary lines, residential housing and fences
- determining and document dimensions of tree recording the characteristics of the approximate height, canopy, spread and diameter-at-breast-height (DBH)
- recording and implementing work health, safety, site, environmental and traffic control measures
- evaluating tree for pruning
- considering tree's health, growth habit, structure, stability and growing environment
- determining class, code, species application and clause of pruning required in accordance with current Australian Standard 'pruning of amenity trees'
- determining compensatory tree care required to offset losses arising from pruning of live tissue
- determining requirement to meet biosecurity regulations for transmission of diseases by pruning equipment and materials
- verifying smallest diameter of dead branches to be removed.
- determining maximum and average diameter of live branches to be pruned
- verifying for crown thinning operations: maximum diameter of branches; and total percentage of total crown foliage permitted to be cut

- verifying for selective pruning operations: identity and locations of specific branches to be cut
- verifying for formative pruning operations: identify and locations of specific branch
- verifying for reduction pruning operations: an extent of pruning best described as a percentage, and the approximate dimensions and precise nodes
- verifying for crown lifting operations: maximum diameter & location + maximum height (or minimum height)
- verifying for pollarding: dimensions of permanent structure
- verifying for remedial and restorative pruning: any key reference points in the tree and any key measurement and any objectives
- verifying for line clearance: minimum clearance distances
- verifying branch location and identity by identification process starting with closest branch to ground labelled as branch number one
- readying branch pattern from the ground up, select branch required and label branch with number in sequential order
- determining and document direction of branch growth by selecting north, south, east, or west and label branch
- estimating and document height of branch attachment from ground
- describing structural order of branches: first order - directly off the trunk; second order - immediately off first order; third order etc.
- verifying approximation of branch collar diameter at location of pruning point
- using photographs to verify and confirm location of pruning cuts
- recording information on pro-forma documents
- confirming written pruning specifications
- clarifying the terminology used and extent of works with the client
- documenting a written record of contract for the client as required
- providing completed written specification to client and work crew
- assessing pruning work performed against anticipated outcomes and record anomalies
- seeking feedback from client on work performed
- seeking feedback from work crew on clarity of specifications
- recording areas of improvement for future use in specifications
- signing off on specified work and completing required records
- use of industry standard terminology to describe pruning specifications
- awareness of work health and safety in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- site-specific risk assessment
- tree species using botanical nomenclature and common names
- fixed reference points
- dimensions of tree

- characteristics of the approximate height, canopy, spread and diameter-at-breast-height (DBH)
- tree's health, growth habit, structure, stability and growing environment
- tree age class, code, species application and clause of pruning required in accordance with current Australian Standard 'Pruning of amenity trees'
- compensatory tree care
- losses arising from pruning of live tissue
- biosecurity regulations
- transmission of diseases by pruning equipment and materials
- specification for crown thinning operations
- specification for selective pruning operations
- specification for formative pruning operations
- specification for reduction pruning operations
- specification for crown lifting operations
- specification for pollarding
- maximum and average diameter of live branches
- total crown foliage
- identity and locations of specific branches
- extent of pruning best described as a percentage
- approximate dimensions and precise nodes
- maximum height (or minimum height)
- dimensions of permanent structure
- specification for remedial and restorative pruning
- specification for line clearance
- specification for branch location and identity by identification process
- key reference points in the tree
- minimum clearance distances
- branch pattern
- sequential order
- direction of branch growth by selecting north, south, east, or west
- approximation of branch collar diameter
- location of pruning point
- pro-forma documents
- pruning specifications
- terminology
- written record of contract
- specifications
- anticipated outcomes
- anomalies
- specified work.

Assessment Conditions

It is an industry requirement for competency in this unit that assessment includes the assessment of pruning works on each of the maintenance and modification operations:

- crown maintenance pruning
- crown thinning operations
- selective pruning operations
- formative pruning operations
- reduction pruning operations
- crown lifting operations
- pollarding
- remedial and restorative pruning
- line clearance

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - internet connection
 - digital camera/phone camera
 - tree
- materials:
 - site-specific risk assessment form
 - pruning specification form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB402 Supervise and audit tree operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out supervision and auditing of tree operations on arboricultural work sites in accordance with existing tree hazard evaluation and pruning specification documentation.

This unit applies to individuals who supervise others and provide and communicate solutions to a range of predictable and sometimes unpredictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB404 Conduct a safety audit

AHCARB302 Inspect trees for access and work*

AHCARB313 Identify trees

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare site and equipment	1.1 Determine location of above-and-below-ground services 1.2 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.3 Assess site conditions for requirements of equipment, personnel and access 1.4 Determine appropriate pruning tools, equipment and machinery according to pruning specification and site-specific assessment 1.5 Record and implement work health, safety, site, environmental and traffic control measures
2. Supervise and monitor tree operations	2.1 Supervise and confirm site establishment conforms to requirements 2.2 Confirm toolbox meeting participation and documentation 2.3 Confirm tree evaluation from hazard evaluation report provided 2.4 Implement written specification for pruning works 2.5 Communicate written specification to work team and confirm response 2.6 Conduct safety audit of personnel, equipment, machinery and documentation 2.7 Resolve areas of conflict with work team and individuals 2.8 Monitor safety issues arising from drug and alcohol use 2.9 Promote work team-building exercises 2.10 Document areas of improvement in work operations 2.11 Issue verbal and written improvement notices
3. Audit and report tree operations	3.1 Monitor pruning techniques for compliance to the written specifications and AS 4373 3.2 Estimate and record volume of pruning program works 3.3 Audit quality of pruning works 3.4 Document and record additional pruning works required 3.5 Report compliance and audit results

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB402 Supervise and audit tree operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining location of above-and-below-ground services
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- assessing site conditions for requirements of equipment, personnel and access
- determining appropriate pruning tools, equipment and machinery according to pruning specification and site-specific assessment
- recording and implement work health, safety, site, environmental and traffic control measures
- supervising and confirm site establishment conforms to requirements
- confirming toolbox meeting participation and documentation
- confirming tree evaluation from hazard evaluation report provided
- using provided written specification for pruning works
- communicating written specification to work team and confirm response
- conducting safety audit of personnel, equipment, machinery and documentation
- supervising and monitor tree operations
- documenting areas of improvement in work operations
- issuing verbal and written improvement notices
- monitoring pruning techniques for compliance to the written specifications and as 4373
- estimating and record volume of pruning program works
- auditing quality of pruning works
- documenting and record additional pruning works required
- reporting compliance and audit results
- use of industry standard terminology to describe supervision and audit operations.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- location of above-and-below-ground services
- site-specific risk assessment
- work health and safety hazards
- work health, safety, site, environmental and traffic control measures
- site conditions
- appropriate pruning tools, equipment and machinery
- pruning specification
- site establishment
- conformance to requirements
- toolbox meeting
- tree evaluation
- hazard evaluation
- written specification for pruning works
- safety audit of personnel, equipment, machinery and documentation
- verbal and written improvement notices
- compliance to the written specifications
- tree operations
- auditing quality of pruning works
- compliance and audit results
- work health and safety in the context of own work.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - internet connection
 - digital camera/phone camera
 - trees

- materials:
 - site-specific risk assessment form
 - safety audit form
 - safety audit report
 - pruning specification form
 - compliance and audit report form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB403 Perform a ground-based tree defect evaluation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to examine trees from the ground in order to evaluate the increased likelihood of failure of trees or tree parts.

This unit applies to individuals who supervise others and provide and communicate solutions to a range of predictable and sometimes unpredictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, the relevant content of applicable Australian Standards and Safe Australia Code of Practice.

Pre-requisite Unit

AHCARB302 Inspect trees for access and work*

AHCARB313 Identify trees

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Determine evaluation requirements	1.1 Confirm trees to be evaluated in accordance with client brief 1.2 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 1.3 Determine targets that need to be considered 1.4 Determine tree hazard benchmarks appropriate for project 1.5 Record and implement work health, safety, site, environmental and traffic control measures
2. Examine visual tree indicators	2.1 Inspect tree from ground 2.2 Determine tree health 2.3 Examine tree anatomy and morphology for past failures 2.4 Examine tree for outwardly apparent defects 2.5 Examine tree for visual indicators of concealed defects 2.6 Examine tree for visual indicators of disease leading to structural failure 2.7 Examine tree for visual indicators of organisms causing damage leading to structural failure 2.8 Determine if failure is likely to result in target being impacted
3. Undertake basic testing	3.1 Sound for cavities suggested by openings and visual indicators 3.2 Probe any accessible cavities and openings 3.3 Expose root crown where required 3.4 Remove loose bark where appropriate 3.5 Determine whether tree or tree parts are a hazard in accordance with benchmarks
4. Record tree attribute and indicators	4.1 Photograph and record tree species and site of tree 4.2 Record the health and approximate dimensions of the tree 4.3 Record and photograph the defects and visual indicators 4.4 Describe, illustrate and indicate on image or device, the approximate location on the tree 4.5 Record approximate dimensions of affected tree part and defect 4.6 Record results of evaluation
5. Mitigate risk and document actions	5.1 Advise client immediately of evaluation, where a tree poses an imminent threat 5.2 Take action as instructed in accordance with work place policies and client brief 5.3 Isolate the tree or move target as instructed in accordance with work place policies and client brief 5.4 Document immediate actions taken
6. Document and report	6.1 Compile hazard evaluation documentation

Element	Performance criteria
hazards and recommendations	6.2 Recommend further action of including aerial inspection and load testing or seek further advice from a consulting arborist 6.3 Determine and document any tree work required to mitigate risks 6.4 Submit tree hazard evaluation report to client or employer

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB403 Perform a ground-based tree defect evaluation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- confirming trees to be evaluated in accordance with client brief
- undertaking a site-specific risk assessment by identifying work health and safety hazards and assessing risk
- determining targets that need to be considered
- determining tree hazard benchmarks appropriate for project
- recording and implementing work health, safety, site, environmental and traffic control measures
- inspecting tree from ground
- determining tree health
- examining tree for past failures
- examining tree for visual indicators of outwardly apparent defects
- examining tree for visual indicators of concealed defects
- examining tree for visual indicators of disease leading to structural failure
- determining if failure is likely to result in target being impacted
- sounding for cavities suggested by openings and visual indicators
- probing any accessible cavities and openings
- exposing root crown where required
- removing loose bark where appropriate
- determining if tree exceeds tree hazard benchmarks for project
- photographing and recording tree species and site of tree
- recording health and approximate dimensions of the tree
- recording and photographing defects and visual indicators

- describing, illustrating and indicating on image or device, the approximate location on the tree
- recording approximate dimensions of affected tree part and defect
- recording results and advising client of evaluation
- advising client immediately of evaluation where a tree poses an imminent threat
- taking action as instructed in accordance with work place policies and client brief
- isolating the tree or move target as instructed in accordance with work place policies and client brief
- documenting immediate actions taken.
- compiling hazard evaluation documentation
- recommending further action of aerial inspection and load testing or seek further advice from a consulting arborist
- determining and documenting any tree work required to mitigate risks
- submitting tree hazard evaluation report to client or employer
- use of industry standard terminology to describe hazard evaluation.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- client briefs
- site-specific risk assessment
- work health and safety hazards and assessing risk
- targets and the role of targets in tree risk assessment
- tree hazard benchmarks
- work health, safety, site, environmental and traffic control measures
- tree inspections
- tree health
- methods of determining tree health
- tree anatomy and morphology for past failures
- tree examinations for outwardly apparent defects
- tree examinations for visual indicators of concealed defects
- tree examinations for visual indicators of disease leading to structural failure
- tree examinations for visual indicators of organisms causing damage leading to structural failure
- likelihood of target impaction
- cavity sounding and probing techniques
- visual indicators of root crowns and bark
- determination whether tree or tree parts are a hazard in accordance with benchmarks
- photography and recording of tree species, site of tree, approximate location of trees, and defects and visual indicators
- health and approximate dimensions of the tree and affected tree part and defect
- imminent threat
- tree isolation methods

- methods of moving targets
- documentation of hazard evaluation
- risk mitigation
- recommendations of aerial inspection and load testing
- advice from a consulting arborist
- presentation of reports.

Assessment Conditions

It is an industry requirement for competency in this unit that assessment includes a minimum of twenty (20) ground-based tree defect evaluations, and requires a minimum of at least one (1) consultation with a consulting arborist to participate in a ground-based tree defect evaluation. The evaluations are required to cover twenty separate and individual trees, of a minimum of fifteen (15) different tree species, and each of the evaluations is required to be a whole-of-tree investigation.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - trees
 - cross-sectioned tree visual indicators of defects and diseases
- materials:
 - site-specific risk assessment form
 - defect evaluation form
 - tree evaluation report

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB404 Conduct a safety audit

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct safety audits of personnel and equipment involved in tree operations.

This unit applies to individuals who supervise others and provide and communicate solutions to a range of predictable and sometimes unpredictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method documentation.

Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Perform audit planning	1.1 Identify safety audit objectives, scope and focus 1.2 Identify target operations and documentation 1.3 Determine safety audit process and sampling technique 1.4 Determine frequency and random timing of audit event

Element	Performance criteria
	1.5 Prepare audit documentation 1.6 Conduct pre-audit communications with client and relevant stakeholders
2. Undertake safety audit activities	2.1 Undertake a site-specific risk assessment by identifying work health and safety hazards and assessing risk 2.2 Conduct random audit testing of site operations for usage of personal protective equipment 2.3 Conduct regular audit testing of tools, equipment and machinery for defective components 2.4 Conduct random audit inspection of dedicated rescue equipment 2.5 Conduct regular audit testing of operational, start-up and maintenance procedures for tools, equipment and machinery and associated checklist documentation 2.6 Conduct regular audit inspection of hazard identification, risk control and toolbox meeting documentation 2.7 Conduct random audit interviews for quality checking of personal protective equipment and clothing 2.8 Confirm currency and availability of tickets and certifications required by personnel to perform specialised work functions 2.9 Implement safety audits at appropriate frequency
3. Identify and respond to non-conformance	3.1 Identify and record non-conformance 3.2 Identify situations requiring referral 3.3 Issue verbal and written warnings for non-conforming work practices 3.4 Issue verbal and written notices for unsafe work practices 3.5 Tag tools and equipment requiring repairs and label with repair information details 3.6 Tag unsafe tools and equipment with 'Do Not Operate' tags and remove from operational use areas 3.7 Provide advice for improvement and rectification of non-conformance
4. Record, report and present audit results	4.1 Prepare safety audit report 4.2 Make final recommendations on action required 4.3 Obtain responses and finalise audit 4.4 Record safety audit findings 4.5 Conduct post-audit communications with client

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB405 Perform geospatial data collection

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can demonstrate:

- determining technical and business requirements for geospatial data collection
- determining suitability and requirements of using geographical information system (GIS)
- determining suitability of software application for intended purpose
- consider features of remote positioning and satellite shadow reduction
- considering end-to-end capability as required
- determining asset management requirements
- considering functional ease-of-use, mobility and reliability
- evaluate future-proofed solutions and outcomes
- selecting geospatial data collection equipment
- completing relevant start-up procedures
- determining operational data fields
- determining data tables and associated attributes
- configuring fields for operational use
- undertaking functional testing of hand held device for connectivity
- using co-ordinates to locate designated trees
- correcting co-ordinate data at tree site visually as required
- updating and correcting tree attribute data as required
- collecting and entering data
- checking data for accuracy for post-processing
- downloading business data
- processing business data
- analysing data with appropriate techniques
- use of industry standard terminology to describe.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- geospatial data
- collection of geospatial data
- technical and business requirements for geospatial data collection
- suitable software applications for using geospatial data
- remote positioning
- satellite shadow reduction
- end-to-end capability
- asset management
- attributes of functional ease-of-use, mobility and reliability
- geospatial data collection equipment
- configuring data fields
- global positioning system (GPS)
- latitude and longitude co-ordinates
- start-up procedures
- data fields
- data tables
- tree attribute data
- data entry
- data processing.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - GIS data collection equipment
 - computer and software
 - internet connection
- materials:
 - data operations form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB502 Identify, select and specify trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to inspect, identify, select and specify a range of trees for suitability for an intended purpose.

The unit has a wide range of applications in urban and regional areas for local government and legal contexts in the specification of trees in residential, commercial, public open spaces and amenity areas. The unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work, to analyse and synthesise information, and design and communicate solutions for complex problems. The role involves the self-directed application of knowledge with substantial depth in areas such as tree identification, tree selection criteria and tree functionality.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable current versions of Australian Standards such as AS 2303, AS 2223 and AS 3743.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine the suitability of trees	1.1 Consult client, develop a brief and gain agreement 1.2 Undertake site inspection according to the client brief 1.3 Determine legislative requirements, regulatory requirements and requirements of Australian Standards 1.4 Determine functional life expectancy of site and plantings 1.5 Determine tree function for the precise location within the plan 1.6 Confirm that species and cultivar selection is appropriate for the aspect and site dimensions 1.7 Research trees suitable for the intended purpose using multiple reference sources
2. Identify and select trees	2.1 Identify trees suitable for the intended purpose using multiple reference sources and use of taxonomic keys 2.2 Give consideration to tree morphology, physiology and ethnobotany in the identification of suitable trees 2.3 Estimate planting area dimensions for the tree species or cultivar 2.4 Confirm that soil volume is proportioned to the size of tree in consideration and assess soil for suitability as a growth medium 2.5 Consider environmental conditions including site hydrology for the functional characteristics of the tree and apply findings 2.6 Evaluate soils, soil mixes and growing media for density, organic content, nutrient status, and physical and chemical properties 2.7 Appraise a wide range of soils, soil mixes and growing media 2.8 Make recommendations for soil, soil mix and growth medium improvements by determining soil suitability for intended purpose 2.9 Evaluate trees from an extensive range of trees common in the region 2.10 Select trees in accordance with suitability for the intended purpose as quality criterion 2.11 Evaluate and document the rationale for tree selection 2.12 Recommend tree species or cultivars for replacement or new plantings 2.13 Document tree selections, selection criteria and notes on quality expectations as specifications
3. Specify trees	3.1 Incorporate determined criteria for size of stock selection into the specifications 3.2 Match species and cultivars appropriately to the determined

Element	Performance criteria
	<p>selection criteria for species-specific characteristics</p> <p>3.3 Evaluate selection criteria for mature trees against capability for transplanted trees</p> <p>3.4 Assess final selections against the specified soil, site location and client brief and confirm the tree specification</p> <p>3.5 Inspect selected plants on site for structural quality, root health and quantities according to the specifications</p> <p>3.6 Inspect delivered materials, soils and growing media on site for quality assurance in accordance with the specifications</p> <p>3.7 Record quality checks on delivered plants and products</p>
4. Correlate and present a report	<p>4.1 Compile tree selections into a database of tree specimens and characteristics based on tree taxonomy and nomenclature, and suitability characteristics</p> <p>4.2 Produce a report of the identification, selection and specification process and incorporate the correlated records</p> <p>4.3 Present the client or organisation with the report</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

This unit is not equivalent to AHCARB502A Identify, select and specify trees.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCARB502 Identify, select and specify trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must produce a report of the tree identification, selection and specification process that recommends tree species for a site and incorporates the tree selections into a database of tree specimens and characteristics. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- consulting client, developing a brief and gaining agreement
- undertaking site inspection according to the client brief
- determine legislative requirements, regulatory requirements and requirements of Australian Standards including AS 2303, AS 2223 and AS 3743
- determining functional life expectancy of site and plantings
- determining tree function for the precise location within the plan
- confirming that species and cultivar selection is appropriate for the aspect and site dimensions
- researching trees suitable for the intended purpose using multiple reference sources
- identifying trees suitable for the intended purpose using multiple reference sources and use of taxonomic keys
- giving consideration to tree morphology, physiology and ethnobotany in the identification of suitable trees
- estimating planting area dimensions for the tree species or cultivar
- confirming that soil volume is proportioned to the size of tree in consideration and assess soil for suitability as a growth medium
- considering environmental conditions including site hydrology for the functional characteristics of the tree and apply findings
- evaluating soils, soil mixes and growing media for density, organic content, nutrient status, and physical and chemical properties
- appraising a wide range of soils, soil mixes and growing media

- making recommendations for soil, soil mix and growth medium improvements by determining soil suitability for intended purpose
- evaluating trees from an extensive range of trees common in the region
- selecting trees in accordance with suitability for the intended purpose as quality criterion
- evaluating and document the rationale for tree selection
- recommending tree species or cultivars for replacement or new plantings
- documenting tree selections, selection criteria and notes on quality expectations as specifications
- incorporating determined criteria for size of stock selection into the specifications
- matching species and cultivars appropriately to the determined selection criteria for species-specific characteristics
- evaluating selection criteria for mature trees against capability for transplanted trees
- assessing final selections against the specified soil, site location and client brief and confirm the tree specification
- inspecting selected plants on site for structural quality, root health and quantities according to the specifications
- inspecting delivered materials, soils and growing media on site for quality assurance in accordance with the specifications
- recording quality checks on delivered plants and products
- compiling tree selections into a database of tree specimens and characteristics based on tree taxonomy and nomenclature, and suitability characteristics
- producing a report of the identification, selection and specification process and incorporate the correlated records
- presenting the client or organisation with the report.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- client consultation and client brief
- legislative requirements and regulatory requirements
- site inspections
- functional life expectancy of tree and site
- tree functionality for precise locations
- selection of tree species and cultivars
- appropriateness of species and cultivar selection for site aspect and dimensions
- how to research and use multiple sources of reference material
- concept of 'suitability for a purpose'
- trees suitable for an intended purpose
- methods of determining the suitability of a tree for a purpose
- tree identification using multiple reference sources
- tree identification using taxonomic keys
- ethnobotany, morphology, physiology, taxonomy and nomenclature
- tree species-specific characteristics

- environmental conditions for the functional characteristics of the tree
- estimation of planting area dimensions
- soil volume proportions to the size of tree
- site hydrology
- evaluation of soils, soil mixes and growing media for characteristics of density, organic content, nutrient status, and physical and chemical properties
- appraisal of a wide range of soils, soil mixes and growing media
- recommendations for soil, soil mix and growth medium improvements
- soil suitability for intended purpose
- methods of assessment of soil for suitability as a growth medium
- evaluation of trees from an extensive range of trees common in the region
- tree selection methodology using quality criteria of suitability for purpose
- evaluation and documentation of rationale for tree selection
- recommendations of tree species or cultivars for replacement or new plantings
- documentation of tree selections, selection criteria and notes on quality expectations as specifications
- incorporation of criteria for size of stock selection into specifications
- methods of matching species and cultivars appropriately to the determined selection criteria for species-specific characteristics
- selection criteria for mature trees against capability for transplanted trees
- assessment of final selections against the specified soil, site location and client brief and confirmation of the tree specification
- inspection methods for structural quality, root health and quantities of plants on site
- inspection of delivered materials, soils and growing media on site for quality assurance in accordance with the specifications
- methods of quality control and quality assurance
- how to monitor quality and apply quality controls
- tree structural quality
- recording quality checks on delivered plants and products
- methods of data capture
- database construction
- characteristics of taxonomy and nomenclature required for database use
- characteristics of tree 'suitability for a purpose' required for database use
- compilation of tree selections into a database of tree specimens and characteristics based on tree taxonomy and nomenclature, and suitability characteristics
- report production of the identification, selection and specification process.

Assessment Conditions

It is an industry requirement for competency in this unit that assessment includes construction of a database that must contain a minimum of eighty (80) tree species with general characteristics of suitability for the intended purpose and key identifying features, and an additional twenty (20) intensive tree profiles detailing attributes of the location, taxonomic characteristics, edaphic and environmental preferences and limitations of the tree. The database must include woody monocots and gymnosperms.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - internet connection
 - digital camera/phone camera
 - soil testing equipment
 - loupe
 - field guides
 - print and digital taxonomic keys
 - trees
 - soils, soil mixes and growing media
- materials:
 - tree profile and benefits form
 - tree selection and specification form
 - database of tree selections and suitability characteristics
 - report of the identification, selection and specification process

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed

- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB504 Develop an arboricultural impact assessment report

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan for and monitor the protection of trees at sites where there may be threats to the trees.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work, to analyse and synthesise information and design, and to communicate solutions to complex problems. The role involves the self-directed application of knowledge with substantial depth in some areas such as tree assessment techniques, the impact of development on trees and specialist tree protection techniques and reporting methods.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards such as the current AS 4970 Protection of trees on development sites.

essential outcomes.	achievement of the element.
1. Undertake assessment of trees on site	1.1 Identify and research relevant legislation and Australian Standards 1.2 Determine specific requirements of Statutory authorities in relation to trees on development site 1.3 Determine local government planning laws, tree protection and preservation regulations 1.4 Conduct a site assessment and identify conditions that impact tree protection program 1.5 Identify work health and safety hazards that impact safety of staff and public, assess level of risk and apply controls 1.6 Identify hazards, activities and circumstances that have potential to harm trees and assess the level of risk 1.7 Locate and confirm trees plotted on survey plan 1.8 Plot trees not on plan onto survey plan
2. Compile preliminary tree assessment data	2.1 Collect available relevant plans and documentation 2.2 Identify and record tree genus and species by botanical and common name 2.3 Record tree dimensions, height, crown spread and diameter-at-breast-height (DBH) 2.4 Determine age class and estimate life expectancy 2.5 Determine tree health in relation to tree physiology and pathology 2.6 Determine condition of tree structure in relation to tree anatomy 2.7 Consider heritage and cultural issues 2.8 Consider habitat, ecology and other matters relevant to the site 2.9 Consider location relative to existing and past site structures 2.10 Determine the retention value 2.11 Compile all tree assessment data required for report
3. Document preliminary arboricultural report	3.1 Record all trees and groups of trees suitable for retention 3.2 Determine indicative tree protection zone for each tree 3.3 Plot tree identifiers and indicative tree protection zone on survey plan 3.4 Document preliminary arboricultural report
4. Record impact of proposed development on trees	4.1 Interpret existing plans, working drawings, terms and symbols 4.2 Interpret development and design language 4.3 Consider how development can result in mechanical and chemical damage and determine appropriate controls 4.4 Determine impact of proposed development on trees 4.5 Provide preliminary feedback to client on potential areas of

Element	Performance criteria
	improvement
5. Determine indicative and actual tree protection zones	5.1 Assess development requirements for site access and logistics 5.2 Consider indicative tree protection zone 5.3 Determine extent of encroachment into indicative tree protection zone 5.4 Determine whether works will impact on structural root zone 5.5 Determine extent and area of structural root zone 5.6 Determine actual tree protection zone for trees to be retained 5.7 Define and record the actual tree protection zones
6. Demonstrate tree viability to major encroachment	6.1 Determine level of encroachment 6.2 Assess for a major encroachment: location and distribution of roots; potential loss of root mass; species tolerance to root loss; and age, health, size, lean and stability of tree 6.3 Consider impact of major encroachment on health, physiology and structural integrity of tree 6.4 Assess soil characteristics and volume and presence of existing or past structures and design factors 6.5 Consider how site and design factors minimise impact of proposed encroachment on tree 6.6 Demonstrate that the tree would remain viable 6.7 Determine additional remedial measures required
7. Develop protection measures and advise client	7.1 Develop an evidentiary portfolio of tree protection devices, techniques, tree-sensitive design and construction measures and tree responses to development activities 7.2 Specify protection devices, techniques and systems to minimise impact of development 7.3 Determine installation and construction methods for tree protection and produce working drawings for on-site personnel for implementation 7.4 Provide advice on tree removal and tree pruning program to client
8. Document the relevant reports	8.1 Prepare draft arboricultural impact assessment report 8.2 Develop tree protection plan and tree protection plan (drawing) 8.3 Prepare and document tree management and monitoring guidelines with alternative strategies for possible problems 8.4 Consolidate relevant reports, plans and guidelines into final version of arboricultural impact assessment report in digital and print format and present to client

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB504A Develop a tree protection plan.

Assessment Requirements for AHCARB504 Develop an arboricultural impact assessment report

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must compile reports, plans and guidelines into an arboricultural impact assessment report and develop an evidentiary tree protection portfolio.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- identifying and researching relevant legislation and Australian Standards
- determining specific requirements of statutory authorities in relation to trees on development site
- determining local government planning laws, tree protection and preservation regulations
- conducting a site assessment and identify conditions that impact tree protection program
- identifying work health and safety hazards that impact safety of staff and public, assess level of risk and apply controls
- identifying hazards, activities and circumstances that have potential to harm trees and assess the level of risk
- locating and confirming trees plotted on survey plan
- plotting trees not on plan onto survey plan
- collecting available relevant plans and documentation
- identifying and record tree genus and species by botanical and common name
- recording tree dimensions, height, crown spread and diameter-at-breast-height (DBH)
- determining age class and estimate life expectancy
- determining tree health in relation to tree physiology and pathology
- determining condition of tree structure in relation to tree anatomy
- considering heritage and cultural issues
- considering habitat, ecology and other matters relevant to the site
- considering location relative to existing and past site structures

- determining the retention value
- compiling all tree assessment data required for report
- recording all trees and groups of trees suitable for retention
- determining indicative tree protection zone for each tree
- plotting tree identifiers and indicative tree protection zone on survey plan
- documenting preliminary arboricultural report
- interpreting existing plans, working drawings, terms and symbols
- interpreting development and design language
- considering how development can result in mechanical and chemical damage and determine appropriate controls
- determining impact of proposed development on trees
- providing preliminary feedback to client on potential areas of improvement
- assessing development requirements for site access and logistics
- considering indicative tree protection zone
- determining extent of encroachment into indicative tree protection zone
- determining whether works will impact on structural root zone
- determining extent and area of structural root zone
- determining actual tree protection zone for trees to be retained
- defining and recording the actual tree protection zones
- determining level of encroachment
- assessing for a major encroachment: location and distribution of roots; potential loss of root mass; species tolerance to root loss; and age, health, size, lean and stability of tree
- considering impact of major encroachment on health, physiology and structural integrity of tree
- assessing soil characteristics and volume and presence of existing or past structures and design factors
- considering how site and design factors minimise impact of proposed encroachment on tree
- demonstrating that the tree would remain viable
- determining additional remedial measures required
- developing an evidentiary portfolio of tree protection devices, techniques, tree-sensitive design and construction measures and tree responses to development activities
- specifying protection devices, techniques and systems to minimise impact of development
- determining installation and construction methods for tree protection and produce working drawings for on-site personnel for implementation
- providing advice on tree removal and tree pruning program to client
- preparing draft arboricultural impact assessment report
- developing tree protection plan and tree protection plan (drawing)
- preparing and documenting tree management and monitoring guidelines with alternative strategies for possible problems
- consolidating relevant reports, plans and guidelines into final version of arboricultural impact assessment report in digital and print format and presenting to client.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant legislation and Australian Standards
- specific requirements of statutory authorities in relation to trees on development site
- local government tree protection and preservation regulations
- site assessment and conditions that impact tree protection programs
- plotting trees/ tree identifiers onto survey plans
- tree genus and species by botanical and common name
- tree dimensions, height, crown spread and diameter-at-breast-height (DBH)
- age class and estimate life expectancy
- tree health in relation to tree physiology and pathology
- heritage and cultural issues
- habitat, ecology and other matters relevant to the site
- methods of calculation of retention value
- indicative tree protection zones
- preliminary arboricultural reports
- interpretation of existing plans, working drawings, terms and symbols
- development and design language
- principles and methods of mechanical and chemical damage control
- impact of proposed development on trees
- structural root zone
- actual tree protection zones
- level of encroachment
- assessment of a major encroachment: location and distribution of roots; potential loss of root mass; species tolerance to root loss; and age, health, size, lean and stability of tree
- soil assessment of characteristics and volume
- viability of a tree
- evidentiary portfolio of tree protection devices, techniques, tree-sensitive design and construction measures and tree responses to development activities
- principles and techniques of tree protection devices, methods and systems
- installation and construction methods for tree protection
- principles and methods relating to protecting trees from human activities
- working drawings for on-site personnel for implementation
- methods of documentation of tree management and monitoring guidelines
- draft arboricultural impact assessment report
- anatomy, physiology and pathology of trees
- interpretation of plans and working drawings
- tree protection plan and tree protection plan (drawing)
- documentation of tree management and monitoring guidelines
- final version of arboricultural impact assessment report
- digital and print formats.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - internet connection
 - personal protective equipment (PPE)
 - digital camera/phone camera
 - loupe
 - basic diagnostic tools including sounding hammer, trowel, probe, cordless drill
 - basic soil testing equipment
 - trees
- materials:
 - preliminary arboriculture report
 - arboricultural impact assessment report

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB505 Document and audit tree work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to review and audit all aspects of arboricultural operations.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work, to analyse and synthesise information, and design and communicate solutions to complex problems. The role involves the self-directed application of knowledge with substantial depth in areas such as auditing, conformance, tree assessment and an extensive range of tree operations.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify and gather information	1.1 Identify audit objectives, scope and focus 1.2 Identify target operations and documentation 1.3 Determine audit process and sampling technique 1.4 Determine frequency and random timing of audit event 1.5 Prepare audit documentation 1.6 Conduct pre-audit communications with client and relevant stakeholders 1.7 Gather relevant information, sample documentation, codes of practice and Australian Standards
2. Audit tree works	2.1 Organise on-site inspections to conduct the audit process 2.2 Audit the specific tree works operation being undertaken 2.3 Audit any pruning, removal, transplanting, planting, tree protection techniques and arboricultural practices being undertaken 2.4 Inspect and assess arboricultural works that may impact on tree physiology, anatomy, pathology and environment 2.5 Audit works in relation to relevant documentation and legislation 2.6 Determine the extent of work with conformance to relevant documentation and legislation 2.7 Identify and record non-conformance 2.8 Assess extent and manner of non-conformance 2.9 Document findings and relevant field notes
3. Assess impact of non-arboricultural works	3.1 Inspect and assess non-arboricultural works that may impact on the tree or its environment 3.2 Determine impact of non-arboricultural works of clients, contractors and stakeholders 3.3 Provide feedback on non-arboricultural works to clients, contractors and stakeholders
4. Provide feedback to contractors, clients and stakeholders	4.1 Provide feedback on the findings of the inspections to clients, contractors and stakeholders 4.2 Provide advice for improvement, rectification and management of non-conformances 4.3 Prioritise required ongoing management
5. Document and present audit report, notifications and plans	5.1 Document audit report and non-conformance notifications 5.2 Advise statutory authorities where required 5.3 Document an ongoing management plan specifying the tree management techniques and practices required to address the audit findings 5.4 Document a rectification plan specifying the required

Element	Performance criteria
	rectifications of non-conformances 5.5 Present reports and plans to client and relevant stakeholders

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCARB505 Document and audit tree work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must produce a tree work audit report that contains all findings, recommendations, non-conformance, notifications and an ongoing management plan. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- identifying audit objectives, scope and focus
- identifying target operations and documentation
- determining audit process and sampling technique
- determining frequency and random timing of audit event
- preparing audit documentation
- conducting pre-audit communications with client and relevant stakeholders
- gathering relevant information, sample documentation, codes of practice and Australian Standards
- organising on-site inspections to conduct the audit process
- auditing the specific tree works operation being undertaken
- auditing any pruning, removal, transplanting, planting, tree protection techniques and arboricultural practices being undertaken
- inspecting and assessing arboricultural works that may impact on the tree physiology, anatomy, pathology and environment
- auditing works in relation to relevant documentation and legislation
- determining the extent of work with conformance to relevant documentation and legislation
- identifying and recording non-conformance
- assessing extent and manner of non-conformance
- documenting findings and relevant field notes
- inspecting and assessing non-arboricultural works that may impact on the tree or its environment

- determining impact of non-arboricultural works of clients, contractors and stakeholders
- providing feedback on non-arboricultural works to clients, contractors and stakeholders
- providing feedback on the findings of the inspections to clients, contractors and stakeholders
- providing advice for improvement, rectification and management of non-conformances
- prioritising required ongoing management
- documenting audit report and non-conformance notifications
- advising statutory authorities where required
- documenting an ongoing management plan specifying the tree management techniques and practices required to address the audit findings
- documenting a rectification plan specifying the required rectifications of non-conformances
- presenting reports and plans to client and relevant stakeholders.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- audit objectives, scope and focus
- auditing terminology
- audit processes
- audit sampling techniques
- frequency and random timing of audit events
- preparation of audit documentation
- pre-audit communications
- relevant audit information and sample documentation
- relevant codes of practice and Australian Standards
- relevant legislation and documentation
- on-site inspections
- targeting and documentation of specific tree works operations
- auditing of pruning, removal, transplanting, planting, tree protection techniques and arboricultural practices
- tree physiology, anatomy, pathology and environment
- inspection and assessment of tree physiology, anatomy, pathology and environment
- arboricultural works that may impact on the tree physiology, anatomy, pathology and environment
- non-arboricultural works that may impact on the tree or its environment
- determination of impact of non-arboricultural works
- documentation and legislation relevant to auditing works
- determination of extent of works with conformance to documentation and legislation
- identification of non-conformance
- assessment of extent and manner of non-conformance
- provision of feedback and findings of inspections to clients, contractors and stakeholders
- improvement, rectification and management of non-conformances

- notification of non-conformance
- provision of advice of non-conformance
- documentation of audit reports
- specification of tree management techniques and practices required to address audit findings
- methods of advising statutory authorities
- audit reporting methods
- documentation of an ongoing management plan
- specifications for required rectifications of non-conformances
- documentation of a rectification plan
- report and plan production and presentation.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - internet connection
 - digital camera/phone camera
 - trees
- materials:
 - compliance and audit report form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB506 Prepare arborist reports

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare arborist reports with specific arboricultural content at consultant level.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work, to analyse and synthesise information and design and communicate solutions to complex problems. They provide professional services in arboricultural report writing involving tree assessment and risk, tree management, arboricultural impact, tree pathology and structural tree problems.

Preparing arboricultural reports involves the self-directed application of knowledge with substantial depth in some areas such as tree identification, tree assessment techniques and reporting methods.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCARB506 Prepare arborist reports

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must produce a body of work compiling evidentiary data, research material, data, observations and test results into a stylised presentation of custom format using component industry conventions. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining the client brief and manage client expectations
- determining client need for evidentiary data records
- determining statutory requirements for report
- establishing specific focus points within report topic
- establishing report limits and assumptions
- determining arboricultural content required by evaluation of all relevant requirements and limitations
- determining the textual and visual content of report
- researching information about topic and specific focus points
- assessing primary and secondary sources of research material
- inspecting and recording details and observations of site, trees, location and matters relevant to focus points and topic
- recording relevant visual evidence using photographic equipment
- obtaining and recording information from test results
- collating observations, test results, research material and inspection data into a body of evidentiary data
- backing up and storing data for later retrieval
- determining presentation style of report to meet client and statutory outcomes
- determining requirements for specific document content and layout using accepted arboriculture industry conventions
- obtaining necessary permissions for use of tables, diagrams or other copyright information

- utilising appropriate custom document templates, logo, tables, charts, and art required to produce word-processor documents
- inserting required document elements such as title, page numbers, table of contents, footers and headers and watermark
- incorporating collated data, information and evidentiary data into formatted body of the report
- operating computer and software application to edit document for language use, text content, spelling, grammar and punctuation appropriate for consulting arborists
- assessing a body of evidentiary data
- determining value of supporting and contradictory evidence
- using considered viewpoints to make an informed decision
- formulating a conclusive determination
- informing client whether or not determination can meet the client brief
- developing a set of recommendations based on that determination in accordance with the client brief
- preparing a draft document based on brief, method, observation, conclusion and recommendations system
- evaluating the impact of using active and passive voice
- seeking feedback on prepared report
- responding to feedback and editing report based on feedback provided
- drafting final sections of report document
- developing summary of report
- producing final version of arboricultural report
- delivering final report to client and statutory authority
- formulating a glossary of arboricultural terminology and industry jargon.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- client briefs
- management of client expectations
- client need for evidentiary data records
- statutory reporting requirements
- specific focus points within report topics
- limits and assumptions of reports
- required arboricultural content
- textual and visual content of report
- information research
- assessment of primary and secondary sources of research material
- methods of determining information validity and reliability
- site inspections
- photographic equipment for recording of visual evidence

- collation of observations, test results, research material and inspection data into a body of evidentiary data
- data collection, collation, backup, storage and retrieval
- reporting and presentation styles for statutory and client outcomes
- requirements for specific document content and layout using accepted arboriculture industry conventions
- permissions for use of tables, diagrams or other copyright information
- custom document templates, logo, tables, charts, and art required to produce word-processor documents
- document elements such as title, page numbers, table of contents, footers and headers and watermark
- computer and software application to edit documents
- language use, text content, spelling, grammar and punctuation
- consulting arborist terminology
- assessment of a body of evidentiary data
- evaluation of supporting and contradictory evidence
- consideration of different viewpoints in making informed decisions
- decision-making processes
- formulation of conclusive determinations
- draft document preparation
- system of brief, method, observation, conclusion and recommendations
- evaluation of impact of using active and passive voice
- report editing based on feedback provided
- development of a report summary
- final report formulation, formatting and writing
- production of a glossary of arboricultural terminology and industry jargon.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - digital camera/phone camera
 - internet connection

- word processing software
- trees
- materials:
 - arborist report
 - glossary of arboricultural terminology

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

Assessment Requirements for AHCARB507 Generate tree plans using computer-aided design software

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must produce tree protection plan drawing containing tree protection zones (TPZ) and encroachments, and perform area calculations using computer-aided design software (CAD).

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- confirming project requirements for computer-aided design (CAD) drawings
- identifying drawing requirements, purpose and scope and confirm with relevant project personnel
- setting up basic drawing environment
- creating layering strategy as required
- creating arboricultural and architectural library of standard detail and components
- creating text and dimension styles
- creating line types of different thicknesses to provide visual differentiation of plan elements
- creating hatch patterns and types
- setting up title blocks for different drawing sizes
- setting up reference schedules as required
- using 2-D CAD software programs and functions to produce different types of 2-D drawings using appropriate layers as required
- importing digital text and drawing files from other software applications into 2-D CAD drawings
- scanning and save hard copy documents as correct file types to import into 2-d CAD drawings
- deleting or purge elements that are not required from drawings

- adding notations to drawings as required
- adding dimensions and scales to drawings as required
- using editing commands to modify drawing elements and text
- plotting trees with precision
- differentiating visually trees to be retained, removed and transplanted
- calculating areas of tree protection zones (TPZ), encroachments and distances
- undertaking quality control check of drawing
- setting page layout with appropriate scale and lineweights for the drawing file to suit printing requirements
- setting print parameters for the printer
- printing drawings on the correct media
- creating suitable file directories for the drawing project
- saving drawing files for later retrieval and back up to specified drives or directories
- creating drawing files and send to external personnel for use in different software applications
- creating portable document format (PDF) files for relevant personnel to view completed drawings without using CAD software packages.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- project requirements
- types of drawings
- computer-aided design (CAD) drawings
- drawing requirements
- purpose of drawing
- scope of drawing
- project personnel
- drawing environment
- layers and layering strategy
- arboricultural library of standard detail and components
- architectural library of standard detail and components
- text and dimension styles
- line types of different thicknesses
- visual differentiation of plan elements
- hatch patterns and types
- title blocks for different drawing sizes
- reference schedules
- 2-D CAD software programs
- different types of 2-D drawings
- notations
- dimensions and scales

- editing commands
- plotting trees
- trees to be retained, removed and transplanted
- quality control check and document control
- page layout
- scale and lineweights
- drawing file types
- printers and printing requirements
- print parameters
- printing drawings
- correct media
- file directories and drives
- methods of saving files
- file retrieval
- file backup
- calculation of areas
- tree protection zones (TPZ)
- encroachments
- distances
- completed drawings
- portable document format (PDF).

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - CAD software
- materials:
 - tree plan drawings in print and file format

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB601 Examine and assess trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to examine and assess tree health, age, taxonomy, risk, amenity value and significance and compile a tree assessment report.

This unit applies to individuals with broad theoretical and technical knowledge of a specific area or a broad field of work and learning and cognitive, technical and communication skills to demonstrate autonomy, judgement and defined responsibility in undertaking complex work within broad parameters to provide specialist advice and functions.

The role involves the self-directed application of knowledge with substantial depth in areas such as tree identification, pathology and diagnostics, tree assessment and valuation techniques, tree risk assessment and reporting methods.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states & territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant State or Territory. Works involving this unit of competency may be subject to local tree protection and preservation laws, and the relevant content of applicable Australian Standards.

Pre-requisite Unit

AHCARB403 Perform a ground-based tree defect evaluation*

*AHCARB302 Inspect trees for access and work***

AHCARB313 Identify trees

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine tree survey program requirements	1.1 Identify scope of survey in accordance with client needs 1.2 Determine client's risk threshold 1.3 Determine and document procedures for data capture 1.4 Identify, source and record all current data research relevant to survey requirements 1.5 Check equipment for assessing trees and prepare for use 1.6 Select, check and use personal protective equipment
2. Determine the tree dimensions and structure	2.1 Plot tree location on a device, drawing or plan of the site 2.2 Determine and record tree dimensions and structure 2.3 Measure tree height, spread and diameter-at-breast height (DBH) 2.4 Examine and record form of tree 2.5 Assess tree for asymmetry of canopy 2.6 Assess if tree has a lean and calculate the lean 2.7 Assess how form of crown relates to or is responsive to surrounding trees and structures 2.8 Determine the potential impact of wind loading of the tree
3. Record tree taxonomic features	3.1 Inspect tree and record fruit type and characteristics 3.2 Describe leaf morphology for shape, colour and size 3.3 Examine and record buds, branchlets, branches and bark 3.4 Inspect for and describe trichomes on lamina, petiole and branchlets 3.5 Describe and record floral characteristics of structure of inflorescence, location of the flower, flower colour, details of the flower parts present, absent or modified
4. Assess tree health issues	4.1 Examine and record the canopy density and distribution 4.2 Assess recorded leaf colour and size against a healthy specimen 4.3 Assess for the presence of epicormic shoots 4.4 Assess for dead tips or excessive numbers of dead branches 4.5 Examine roots, root crown, stem, branches and canopy for signs of biotic and abiotic disease 4.6 Evaluate and describe symptoms presenting on tree 4.7 Determine how presence of disease might be affecting tree 4.8 Recognise and record wounds to the tree 4.9 Consider size, location and cause of wounds

Element	Performance criteria
5. Assess age of trees and tree parts	5.1 Determine if species is uninodal or multimodal 5.2 Record the dimensions of the tree 5.3 Examine tree for evidence of growth increments including bud scars, sympodial growth and flush marks 5.4 Estimate average annual increase in diameter of sample of xylem stained as required 5.5 Research historic images of tree or trees of same species in similar environments 5.6 Provide a reasoned estimate of age of tree, tree part or wound
6. Assess trees for significance	6.1 Assess tree for indicators of habitat use 6.2 Assess tree for ecological significance 6.3 Assess tree for cultural significance 6.4 Assess tree for historical significance
7. Assess amenity value of trees	7.1 Evaluate amenity tree valuation methods 7.2 Consider strengths and weaknesses of each method 7.3 Determine amenity tree valuation method to be used 7.4 Collect and collate appropriate unit values and data 7.5 Calculate and record the amenity value of individual trees
8. Inspect and assess trees	8.1 Assess trees to determine their structure and stability 8.2 Give consideration to the tree's age, health, condition, habitat, wind loading, distribution of foliage, wound size and the potential impacts of proposed recommendations 8.3 Use testing equipment, where required, to detect decay, disease and scope of tree problems 8.4 Evaluate visual indications and causes of disease and record results
9. Carry out risk assessment	9.1 Use visual tree assessment (VTA) to identify hazards associated with the tree 9.2 Use basic diagnostic tools to confirm the presence and extent of hazards 9.3 Determine level of risk 9.4 Give consideration to qualification and quantification of tree risk 9.5 Compare the risk level against commonly published levels of risk from non-arboricultural activities and items 9.6 Determine controls required to mitigate risks in accordance with the client's pre-determined threshold 9.7 Document risk controls and recommendations for monitoring and review of risks
10. Compile a tree	10.1 Document diagnosis of tree problems with reference to the

Element	Performance criteria
assessment report	anatomy, physiology and pathology of the tree 10.2 Provide and record specific recommendations for remedial action for tree problems 10.3 Produce a tree assessment report that identifies hazardous trees, recommends appropriate remedial action, and determines appropriate risk controls 10.4 Prepare an expert witness statement if required 10.5 Deliver tree assessment report to client

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCARB501A Assess trees.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCARB601 Examine and assess trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed inspecting and assessing a broad range of trees for identification, health, growth habit, structure, stability and indications of disease. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- identifying the scope of survey
- determining the client's risk threshold
- documentation of the data capture procedures
- identifying, sourcing and recording all current data research relevant to survey requirements
- checking equipment for assessing trees and prepare for use
- selecting, checking and using personal protective equipment
- plotting tree locations on a device, drawing or plan of the site
- determining the tree dimensions and structure
- measuring the tree height, spread and diameter-at-breast height (DBH)
- examining and recording form of tree
- assessing tree for asymmetry of canopy
- assessing if tree has a lean and calculate the lean
- assessing how form of crown relates to or is responsive to surrounding trees and structures
- determining the potential impact of wind loading of the tree
- inspecting tree and record fruit type and characteristics
- describing leaf morphology for shape, colour and size
- examining and recording buds, branchlets, branches and bark
- inspecting for and describing trichomes on lamina, petiole and branchlets
- describing and recording floral characteristics of structure of inflorescence, location of the flower, flower colour, details of the flower parts present, absent or modified
- examining and record the canopy density and distribution

- assessing recorded leaf colour and size against a healthy specimen
- assessing for the presence of epicormic shoots
- assessing for dead tips or excessive numbers of dead branches
- examining roots, root crown, stem, branches and canopy for signs of biotic and abiotic disease
- evaluating and describing symptoms presenting on tree
- determining how presence of disease might be affecting tree
- recognising and recording wounds to the tree
- considering size, location and cause of wounds
- determining if species is uninodal or multimodal
- recording the dimensions of the tree
- examining tree for evidence of growth increments including bud scars, sympodial growth and flush marks
- estimating average annual increase in diameter of sample of xylem stained as required
- researching historic images of tree or trees of same species in similar environments
- providing a reasoned estimate of age of tree, tree part or wound
- assessing tree for indicators of habitat use
- assessing tree for ecological significance
- assessing tree for cultural significance
- assessing tree for historical significance
- evaluating various amenity tree valuation methods
- considering strengths and weaknesses of each method
- determining amenity tree valuation method to be used
- collecting and collating appropriate unit values and data
- calculating and recording the amenity value of individual trees
- assessing trees to determine their structure and stability
- consideration of the tree's age, condition, habitat, wind loading, distribution of foliage, wound size and the potential impacts of proposed recommendations
- using testing equipment to detect decay, disease and scope of tree problems
- evaluating visual indications of disease and health issues in trees
- use of visual tree assessment (VTA) method to identify hazards
- use of basic diagnostic tools to confirm the presence and extent of hazards
- determining level of risk
- giving consideration to qualification and quantification of tree risk
- comparing the risk level against commonly published levels of risk from non-arboricultural activities and items
- determining controls required to mitigate risks in accordance with the client's pre-determined threshold
- documenting risk controls and recommendations for monitoring and review of risks
- documenting diagnoses of tree problems with reference to the anatomy, physiology and pathology of the tree
- recording specific recommendations for remedial action for tree problems

- producing a tree assessment report that identifies a hazardous tree and contains recommendations for appropriate remedial actions and risk controls
- preparing an expert witness statement
- use of industry standard terminology to describe arboriculture and the work environment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- risk thresholds
- data capture procedures
- survey requirements
- tree assessment equipment
- plotting methods on devices, drawings and plans
- tree morphology attributes: fruit type and characteristics, leaf morphology for shape, colour and size, trichomes on lamina, petiole and branchlets, floral characteristics of structure of inflorescence, location of the flower, flower colour, details of the flower parts present, absent or modified, buds, branchlets, branches and bark
- canopy density and distribution
- comparison of leaf colour and size against a healthy specimen
- epicormic shoots
- examination of roots, root crown, stem, branches and canopy for signs of biotic and abiotic disease
- disease symptoms
- affect of disease on tree
- tree dimensions and structure
- tree height, spread and diameter-at-breast height (DBH)
- form and morphology of tree
- symmetry and asymmetry of canopy
- calculation of tree lean
- relationship of form of crown to surrounding trees and structures
- responsiveness of form of crown to surrounding trees and structures
- determination the potential impact of wind loading of the tree
- tree wound recognition, size, location and cause
- uninodal and multimodal tree species
- growth increments including bud scars, sympodial growth and flush marks
- estimation average annual increase in tree diameter
- xylem staining
- research of historic images of tree or trees of same species in similar environments
- assessment of tree indicators of habitat use
- assessment of tree ecological significance
- assessment of tree cultural significance
- assessment of tree historical significance
- evaluation of methods of amenity tree valuation

- calculation of amenity tree value of individual trees
- tree structure and stability
- tree assessment attributes: tree's identification, age, health, condition, habitat, wind loading, distribution of foliage, wound size and the potential impacts of proposed recommendations
- testing equipment to detect decay, disease and scope of tree problems
- visual indications and symptoms of disease and health issues
- tree diseases
- visual tree assessment (VTA)
- methods of detecting decay and structural defects in trees
- causes of instability, decay, damage and stress in trees
- use of basic diagnostic tools
- identification and extent of tree hazards
- methods of determination of levels of risk
- quantification and qualification of tree risk
- commonly published levels of risk from non-arboricultural activities and items
- controls required to mitigate risks in accordance with the client's pre-determined threshold
- diagnoses of tree problems
- tree anatomy, physiology and pathology
- remedial action of tree problems
- production of a tree assessment report that identifies hazardous trees, recommends appropriate remedial action, and determines appropriate risk controls
- preparation of an expert witness statement.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - internet connection
 - digital camera with macro
 - personal protective equipment (PPE)
 - diagnostic tools including sounding hammer, trowel, probe, cordless drill

- cross-sectioned defects and diseases
- soil testing equipment
- basic digital dissection microscope 10 -100x
- compound microscope
- microtome, staining and slide mounting equipment
- slides and coverslips
- temporary/permanent mountant
- histochemical stains
- materials:
 - tree assessment report
 - tree profile and benefits form
 - disease profile form

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB602 Diagnose tree diseases

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to diagnose tree diseases including diseases of palms and other woody monocotyledons.

This unit applies to individuals with broad theoretical and technical knowledge of a specific area or a broad field of work and learning and cognitive, technical and communication skills to demonstrate autonomy, judgement and defined responsibility in undertaking complex work within broad parameters to provide specialist advice and functions.

The role involves the self-directed application of specialised knowledge in arboriculture with substantial depth in areas such as with substantial depth in areas such as disease diagnostics and disease classification and management.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assess environmental impact	1.1 Identify the tree and determine its region of origin 1.2 Determine seasonal growth stages of the tree 1.3 Ascertain current and past cultural practices 1.4 Determine characteristics of growing environment affecting growth of specific tree species 1.5 Identify environmental and cultural factors predisposing tree to disease 1.6 Determine and assess relevant physical and chemical properties of the soil or growing media
2. Identify diseased trees	2.1 Determine impact of disease type on tree parts and systems 2.2 Use industry standard terminology to describe disease attributes in relation to tree anatomy, physiology, pathology and taxonomy 2.3 Develop a glossary of disease terminology 2.4 Consider natural defence systems of trees against major disease types 2.5 Determine disease groups according to a disease classification guide 2.6 Interpret signs and symptoms of disease to identify which trees are diseased
3. Diagnose tree disease	3.1 Record symptoms and signs of disease using accepted nomenclature 3.2 Collate samples and evidence into a reference collection 3.3 Determine disease type according to a disease classification guide 3.4 Determine identification of macro biotic disease to family level 3.5 Prepare specimens of microbiotic diseases for microscopic examination 3.6 Collect, package and dispatch specimens for specialist diagnosis or laboratory testing where required
4. Provide a prognosis	4.1 Determine the current health and energy reserves of the tree 4.2 Assess the severity and extent of the disease 4.3 Research the virulence of the disease on the specific host 4.4 Determine the phenology of the host and the disease 4.5 Research and consider the lag time of management options 4.6 Consider influences of environmental conditions on host, disease and management options 4.7 Provide an informed prognosis in writing and verbally
5. Develop, document and monitor the management program	5.1 Research management options such as Integrated Pest management (IPM) and recommend appropriate options 5.2 Develop a disease management program within IPM guidelines

Element	Performance criteria
	5.3 Record and document tree diseases and management programs in a report 5.4 Monitor management plans and modify or refine as needed

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB503 Diagnose tree diseases.

Assessment Requirements for AHCARB602 Diagnose tree diseases

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed diagnosing and recording diseases of trees, and developing, monitoring and documenting a report on a tree disease management plan.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- identifying the tree and determining its region of origin
- determining seasonal growth stages of the tree
- ascertaining current and past cultural practices
- determining characteristics of the growing environment affecting the growth of a specific tree species
- identifying environmental and cultural factors that predispose the tree to disease
- determining and assessing the relevant physical and chemical properties of the soil or growing media
- determining impact of disease type on tree parts and systems
- use of industry standard terminology to describe disease aspects of tree anatomy, physiology, pathology and taxonomy
- developing a glossary of disease terminology
- considering natural defence systems of trees against major disease types
- determining disease groups according to a disease classification guide
- interpreting signs and symptoms of disease to identify which trees are diseased
- recording symptoms and signs of disease using accepted nomenclature
- collating samples and evidence into a reference collection
- determining disease type according to a disease classification guide
- determining identification of macro biotic disease to family level
- preparing specimens for microscopic examination of microbiotic diseases

- collecting, package and dispatch specimens for specialist diagnosis or laboratory testing where required
- determining current health and energy reserves of the tree
- assessing severity and extent of the disease
- researching virulence of the disease on the specific host
- determining phenology of the host and the disease
- researching and considering lag time of management options
- considering influences of environmental conditions on host, disease and management options
- providing an informed prognosis in writing and verbally
- researching management options such as Integrated Pest Management (IPM) and recommending appropriate options
- developing a disease management program within IPM guidelines
- recording and documenting tree diseases and management programs in a report
- monitoring management plans and modifying or refining as needed
- compiling a disease reference collection
- use of industry standard terminology to describe disease aspects of tree anatomy, physiology, pathology and taxonomy.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- disease classification guides
- virulence, phenology, prognosis and disease severity and extent
- critical systems in the tree; physiologically, anatomically and biochemically
- patterns of host – disease interaction for each major disease type
- tree nutrition issues associated with the soil or media
- identification of signs and symptoms of tree health problems
- determination of possible and probable physiological, anatomical and biochemical impacts on the tree
- disease detection methods, taxonomic identification, life cycle stages and characteristics of the specific horticultural trees of the organisation
- natural defence systems of trees
- chemical use, toxicity and compatibility with target trees, soil and environmental characteristics of the horticultural region
- tree anatomy, physiology, pathology and taxonomy
- seasonal growth anatomy of the tree
- primary cellular and anatomical structures of the tree
- preparation of specimens of microbiotic diseases for microscopic examination
- horticultural function, cultural and performance requirements and characteristics of the trees or other woody plants being considered
- chemical, cultural and biological control methods as part of an Integrated Pest Management strategy

- methods of providing a reasoned prognosis
- the growing requirements and characteristics of trees
- the impact of the growing environment on tree health
- how to research information about tree health problems, diagnoses and remedial treatment available
- nomenclature of symptoms and disease signs
- industry standard terminology to describe disease attributes in relation to tree anatomy, physiology, pathology and taxonomy
- applicable legislative requirements.

Assessment Conditions

Performance must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

Assessment Requirements for AHCARB603 Interpret diagnostic test results

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

It is an industry requirement that competency in this unit requires the analysis and critique of a minimum of five different diagnostic tool test results. The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- compiling a portfolio of sample reports of diagnostic test results including: dynamic and static loading, drill resistance measurement device, sap flow measurements, electronic impedance, chlorophyll fluorescence, increment core, sonic tomography, radar imaging system, bulk density, laboratory, soil test and pH tests
- compiling peer reviewed papers on the use of each diagnostic tool
- reviewing the diagnostic tool specifications and user manuals
- researching output ranges for each diagnostic tool
- identifying key thresholds and benchmarks
- determining suitability of tool selection for purpose of test
- identifying and evaluating testing methods used
- assessing relevance, benefits and limitations of methodology used
- determine assumptions used
- determining currency of the equipment, software or system used
- accessing raw data and testing evidence where available
- verifying data relevance and accuracy
- reviewing references cited in the report
- recording non-conforming practices and treatments
- identifying instances of incorrect application of diagnostic tools
- highlighting unsupported statements and factual errors
- detailing significant omissions, errors and ambiguities
- detailing inconsistencies and errors of logic
- identifying variances to specifications

- detailing incorrect use of arboricultural terminology
- assessing the suitability of the testing process as fit for purpose
- analysing the results
- comparing evaluation with original interpretation
- considering and account for anomalies
- determining the validity of outcomes of original report
- develop substantiated positions to inform critical analysis of test results
- determining further testing required to verify or falsify results
- documenting feedback on original results
- compiling the analysis
- reviewing the completeness and accuracy of the analysis
- recording analysis outcomes and rationale
- documenting the analytical processes
- providing alternative analysis and conclusion
- documenting critique in a report
- presenting report in agreed format and within agreed timelines
- use of industry standard terminology to describe diagnostic tools and tests.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- portfolio of sample reports of diagnostic test results
- peer reviewed papers on the use of each diagnostic tool
- diagnostic tool specifications
- user manuals
- output ranges
- key thresholds
- benchmarks
- suitability of tool selection
- purpose of test
- testing methods
- methodology
- raw data
- testing evidence
- cited references
- data relevance
- data accuracy
- non-conforming practices
- non-conforming treatments
- unsupported statements
- factual errors
- significant omissions, errors and ambiguities

- variances to specifications
- incorrect use of arboricultural terminology
- suitability of the testing process
- fit for purpose
- analysis of results
- anomalies
- validity of outcomes
- verification and falsification of results
- alternative analysis
- critiquing.

Assessment Conditions

It is an industry requirement that competency in this unit requires the analysis and critique of a minimum of five different diagnostic tool test results.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - statistical software
 - internet connection
- materials:
 - critique of test results
 - portfolio of sample reports of diagnostic test results

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Research urban forest practices and applications	1.1 Research urban forest case studies and management reports 1.2 Review best management practices in urban forest planning and management 1.3 Research applications and functional tools measuring benefits of urban forests
2. Analyse and report on urban forest benefits	2.1 Analyse social benefits of urban forests 2.2 Analyse psychological benefits of urban forests 2.3 Analyse environmental benefits of urban forests 2.4 Document evidence-based research into a preliminary report on benefits of urban forests
3. Determine values of urban forest benefits	3.1 Conduct sampling analysis of an urban forest 3.2 Determine required sample size to assess total tree population 3.3 Determine accuracy of sample size 3.4 Calculate canopy cover, total carbon storage, annual carbon dioxide sequestration, rainfall interception, air pollution removal, energy savings benefit, environmental benefits and amenity benefits 3.5 Identify base financial value for each functional benefit 3.6 Calculate financial values of functional and environmental benefits of current tree population 3.7 Determine benefits of heat island modification of urban areas 3.8 Document a preliminary report on total asset valuation of an urban forest
4. Analyse and compile results	4.1 Analyse urban forest structure and functions 4.2 Describe urban tree population half-life, vacant planting ratio, species distribution and population diversity 4.3 Estimate life expectancy of tree population 4.4 Compile results of urban forest analysis
5. Document a report on improvement of urban forests	5.1 Identify urban forest issues within tree population sample area 5.2 Determine recommendations for tree species and diversity 5.3 Determine extent of current tree planting and replacement programs 5.4 Determine volume and rate of planting programs required for improvements to urban forest performance 5.5 Determine required modifications to planting practices 5.6 Determine targets for urban forest improvement 5.7 Document a report on urban forest performance that provides recommendations for improvement of urban forests

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB604 Measure and improve the performance of urban forests

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- researching urban forest case studies and management reports
- reviewing best management practices in urban forest planning and management
- researching applications and functional tools measuring benefits of urban forests
- analysing social benefits of urban forests
- analysing psychological benefits of urban forests
- analysing environmental benefits of urban forests
- documenting evidence-based research into a preliminary report on benefits of urban forests
- conducting sampling analysis of an urban forest
- determining required sample size to assess total tree population
- determining accuracy of sample size
- calculating canopy cover, total carbon storage, annual carbon dioxide sequestration, rainfall interception, air pollution removal, energy savings benefit, environmental benefits and amenity benefits
- identifying base financial value for each functional benefit
- calculating financial values of functional and environmental benefits of current tree population
- determining benefits of heat island modification of urban areas
- documenting a preliminary report on total asset valuation of an urban forest
- analysing urban forest structure and functions
- describing urban tree population half-life, vacant planting ratio, species distribution and population diversity
- estimating life expectancy of tree population
- compiling results of urban forest analysis

- identifying urban forest issues within tree population sample area
- determining recommendations for tree species and diversity
- determining extent of current tree planting and replacement programs
- determining volume and rate of planting programs required for improvements to urban forest performance
- determining required modifications to planting practices
- determining targets for urban forest improvement
- documenting a report on urban forest performance that provides recommendations for improvement of urban forests.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- urban forest case studies
- urban forest management reports
- best management practices in urban forest planning and management
- applications and functional tools measuring benefits of urban forests
- social benefits of urban forests
- psychological benefits of urban forests
- environmental benefits of urban forests
- evidence-based research
- analysis of sampling of an urban forest
- requirements of sample sizes to assess total tree populations
- accuracy of sample size
- calculations of canopy cover, total carbon storage, annual carbon dioxide sequestration, rainfall interception, air pollution removal, energy savings benefit, environmental benefits and amenity benefits
- base financial value for functional benefits of urban forests
- calculations of financial values of functional and environmental benefits of tree populations
- benefits of heat island modification of urban areas
- total asset valuation of an urban forest
- urban forest structure and functions
- urban tree population half-life, vacant planting ratio, species distribution and population diversity
- life expectancy of tree population
- urban forest analysis
- identification of urban forest issues within tree population sample areas
- recommendations for tree species and diversity
- tree planting and replacement programs
- volume and rate of planting programs
- modifications to planting practices
- targets for urban forest improvement.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
- computer
- word processing software
- statistical software
- internet connection
- measurement and data collection tools
- materials:
- report on urban forest performance

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB605 Provide consultation in a legal framework

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide consultation in a legal framework within an arboriculture context.

This unit applies to individuals with broad theoretical and technical knowledge of a specific area or a broad field of work and learning and cognitive, technical and communication skills to demonstrate autonomy, judgement and defined responsibility in undertaking complex work within broad parameters to provide specialist advice and functions.

The role involves the self-directed application of specialised knowledge in arboriculture with substantial depth in areas such as legislation, legal systems and processes and expert witness requirements.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Analyse the legal context	1.1 Determine legislation and relevant cases applying to trees within specialist consulting areas of work 1.2 Review and analyse the relevant legislation, statutory regulations, environmental planning instruments in state, territory and federal jurisdictions in relation to entities pertaining to trees and interactions with people, property, environment and the arboriculture industry 1.3 Apply detailed knowledge of legal and ethical standards, processes and practices, responsibilities, constraints and issues relating to own professional practice 1.4 Use common legal terms associated within the consultant's area of practice with a clear understanding of their meaning and implications
2. Analyse precedent cases to determine advice outcomes	2.1 Analyse the jurisdiction of tree matters relevant to specific cases 2.2 Apply knowledge of relevant court systems, common law, statute law, civil law, law of torts, and precedents to strategies and management of client needs 2.3 Seek and review relevant precedents in law and published case studies 2.4 Determine appropriate statutes and supporting precedent cases 2.5 Provide arboricultural information based on the legal context 2.6 Determine alternative courses of action, and legal and non-legal consequences, and discuss with client 2.7 Provide advice within the context of statutes and precedent cases
3. Reviewing developing and applying policy knowledge	3.1 Analyse and review policy documents in light of legislation and relevant cases 3.2 Prepare policy documents based on legislation and relevant cases 3.3 Determine areas of uncertainty in policy documents 3.4 Seek appropriate legal advice
4. Prepare expert report	4.1 Develop expertise and specialised knowledge in arboriculture 4.2 Follow statutory framework to give advice and work as an expert 4.3 Complete mandatory court requirements of specifications for content of expert reports 4.4 Record all observations and test results with precision 4.5 State assumptions underpinning policy documents 4.6 Substantiate all opinions using external authorities where possible 4.7 Prepare and provide a detailed evidentiary expert report
5. Provide expert evidence	5.1 Confirm status as independent and unbiased provider of expert evidence consistent with professional practice 5.2 Read and comply with expert witness code of conduct

Element	Performance criteria
	5.3 Prepare for the particular jurisdiction and matter at hand 5.4 Prepare evidence based on factual data, documented observations and results and complying with the rules of evidence 5.5 Provide oral evidence and documented report as required 5.6 Assist the court impartially on matters relevant to the expert witness's area of expertise 5.7 Seek and provide clarification on areas of uncertainty

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCARB605 Provide consultation in a legal framework

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining legislation and relevant cases applying to trees within specialist consulting areas of work
- reviewing and analysing the relevant legislation, statutory regulations, environmental planning instruments in state, territory and federal jurisdictions in relation to entities pertaining to trees and interactions with people, property, environment and the arboriculture industry
- applying detailed knowledge of legal and ethical standards, processes and practices, responsibilities, constraints and issues relating to own professional practice
- using common legal terms associated within the consultant's area of practice with a clear understanding of their meaning and implications
- analysing the jurisdiction of tree matters relevant to specific cases
- applying knowledge of relevant court systems, common law, statute law, civil law, law of torts, and precedents to strategies and management of client needs
- seeking and reviewing relevant precedents in law and review published case studies
- determining appropriate statutes and supporting precedent cases
- providing arboricultural information based on the legal context
- determining alternative courses of action, and legal and non-legal consequences, and discuss with client
- providing advice within the context of statutes and precedent cases
- analyzing and reviewing policy documents in light of legislation and relevant cases
- preparing policy documents based on legislation and relevant cases
- determining areas of uncertainty in policy documents
- seeking appropriate legal advice
- developing expertise and specialised knowledge in arboriculture

- following statutory framework to give advice as an expert
- confirming status as independent and unbiased provider of expert evidence within witness code of conduct programs
- recording all observations and test results with precision
- stating assumptions underpinning policy documents
- substantiating opinions using external authorities where possible
- preparing and providing a detailed evidentiary report
- preparing for the particular jurisdiction and matter at hand
- preparing evidence based on factual data, documented observations and results and complying with the rules of evidence
- providing oral evidence and respond to questions impartially
- seeking and providing clarification on areas of uncertainty.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant legislation, statutory regulations, environmental planning instruments in state, territory and federal jurisdictions in relation to entities pertaining to trees and interactions with people, property, environment and the arboriculture industry
- court systems, common law, statute law, civil law, law of torts, and precedents to strategies and management of client needs
- detailed knowledge of legal and ethical standards, processes and practices, responsibilities, constraints and issues relating to own professional practice
- relevant precedents in law and published case studies
- arboricultural information based on the legal context
- expertise and specialised knowledge in arboriculture
- common legal terms associated with within the consultants area of practice with a clear understanding of their meaning and implications
- preparation of policy documents based on legislation and relevant cases
- preparation of detailed evidentiary reports.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - internet connection
- materials:
 - expert witness report
 - glossary of legal terminology

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB606 Develop an operational tree management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop an operational tree management plan.

This unit applies to individuals with broad theoretical and technical knowledge of a specific area or a broad field of work and learning and cognitive, technical and communication skills to demonstrate autonomy, judgement and defined responsibility in undertaking complex work within broad parameters to provide specialist advice and functions.

The role involves the self-directed application of specialised knowledge in arboriculture with substantial depth in areas such as tree management, tree policy and statutes and local planning laws.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Determine strategic context	1.1 Determine the specific operational area for management plan 1.2 Determine the objectives, performance targets and intended outcomes of the management plan 1.3 Source policy from tree policy documentation 1.4 Determine the geographical area and other limits of plan 1.5 Determine the history and cultural heritage of the area covered by the plan
2. Determine legislative framework	2.1 Determine land use of the area 2.2 Determine the relevant state and local government acts, zoning and planning controls, development and planning laws noting requirements for disability discrimination and companion animals 2.3 Determine ownership of the area
3. Determine stakeholders	3.1 Determine key stakeholders and community groups 3.2 Determine core objectives for trees and area 3.3 Determine current and permissible usage of area
4. Determine tree resources	4.1 Determine trees for management 4.2 Determine assessments required such as tree health, hazards, site conditions, soils 4.3 Define and collect data required for operational management 4.4 Assess the tree species, type, diversity and distribution at required detail 4.5 Determine position of planting locations 4.6 Determine selection criteria for replacement trees 4.7 Determine tree removal and tree replacement processes 4.8 Establish tree inventory
5. Determine financial resources	5.1 Determine financial resources available 5.2 Determine management requirements of trees 5.3 Estimate cost of works required for operational program 5.4 Determine priority of works incorporating risk into determination 5.5 Determine frequency of pruning cycles required 5.6 Determine personnel, supplies, equipment and other resources required 5.7 Determine existing contractual, leasing and licensing obligations
6. Develop documentation	6.1 Develop operational tree plan documentation 6.2 Develop operational procedures to achieve required objectives 6.3 Develop draft operational tree management plan
7. Incorporate feedback and prepare plan	7.1 Prepare draft plan for public exhibition 7.2 Notify stakeholders and community groups and obtain feedback

Element	Performance criteria
	7.3 Review and evaluate feedback 7.4 Amend draft plan and incorporate feedback 7.5 Prepare final version of operational tree management plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Tree management plans must include knowledge of operational areas of:

- tree inspections and assessments
- tree selection and planting
- tree management
- tree maintenance
- tree protection
- tree removal
- risk identification and mitigation
- infrastructure protection
- habitat protection
- power line clearance
- community and private trees,
- pest and disease control
- significant trees
- trees of a selected geographic area

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCARB606 Develop an operational tree management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining the specific operational area for management plan
- determining the objectives, performance targets and intended outcomes of management plan
- sourcing policy from tree policy documentation
- determining the geographical area and other limits of plan
- determining the history and cultural heritage of the area covered by the plan
- determining land use of the area
- determining the relevant state and local government acts, zoning and planning controls, development and planning laws noting requirements for disability discrimination and companion animals
- determining ownership of the area
- determining key stakeholders and community groups
- determining core objectives for trees and area
- determining current and permissible usage of area
- determining trees for management
- determining assessments required such as tree health, hazards, site conditions, soils
- defining and collect data required for operational management
- assessing the tree species, type, diversity and distribution at required detail
- determining position of planting locations
- determining selection criteria for replacement trees
- determining tree removal and tree replacement processes
- establishing tree inventory
- determining financial resources available

- determining management requirements of trees
- estimating cost of works required for operational program
- determining priority of works incorporating risk into determination
- determining frequency of pruning cycles required
- determining personnel, supplies, equipment and other resources required.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- operational areas for formulating a tree management plan
- objective, performance targets and intended outcomes
- tree management planning
- tree policy documentation
- history and cultural heritage
- land ownership
- land use
- state and local government acts
- zoning and planning controls,
- development & planning laws
- disability discrimination
- companion animals
- value
- maintenance needs
- frequency of pruning cycles
- contractual, leasing and licensing obligations
- infrastructure protection
- data collection
- data collection
- tree inventory
- tree species, type, diversity and distribution
- soils analysis
- planting locations
- selection criteria
- replacement trees
- stakeholders
- community groups
- permissible usage
- tree protection plan
- operational procedures
- tree removal
- tree replacement
- street tree planting

- tree inspections and assessments
- tree pruning operations
- power line clearance
- habitat protection
- pesticide use
- draft and final documents
- print media
- public submissions
- public hearing
- operational tree management plan.

Assessment Conditions

It is an industry requirement for the assessment of the operational plans as listed in the Range of Conditions section of this unit of competency.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - statistical software
 - internet connection
- materials:
 - tree inventory
 - operational tree management plan

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

Assessment Requirements for AHCARB607 Review and develop strategic tree policy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- identifying stakeholders, consult and establish stakeholder needs
- researching historic and current tree policies
- analysing statutory context and policy context of the current or proposed tree policy
- researching current and historic tree management activities
- analysing current industry tree policy models
- evaluating comparative tree methodologies and systems
- researching current policy and strategic information to inform and develop policy
- identifying key management objectives and management metrics
- establishing benchmarks
- analysing existing policies, procedures and systems for compliance with policy planning requirements
- evaluating conflicting stakeholder needs
- determining tree management strategies
- defining policy reflecting strategic objectives of organisation
- defining strategic objectives of the policy
- developing and communicate change management strategies
- making recommendations for policy options
- determining legal parameters, statutes and local planning laws
- determining if policy is included or referred to in statutory documents
- seeking advice about legal implications of policy
- determining parameters of policy
- determining and record localised soil types, rainfall infiltration and runoff
- compiling database of local and indigenous tree species

- compiling database of exotics that perform well
- creating list of preferred and desired species
- determining extent and type of tree data from tree inventory
- setting diversity goals for tree species and tree families
- developing tree policy to meet strategic objectives
- developing and communicating procedures to implement policy
- developing policy determinations for hazard identification and mitigation, significant trees, tree selection, tree replacement, street tree planting, tree removal, tree inspections and assessments, tree pruning operations, power line clearance, habitat protection, infrastructure protection and pest and disease control as required
- developing draft of strategic tree policy
- promoting tree policy and expected outcomes to key stakeholders
- seeking feedback from stakeholders
- reviewing and amending policy
- developing tree policy documentation
- developing compliance programs in policy documentation
- implementing strategies for continuous improvement
- use of industry standard terminology to describe tree policy.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- current and historic tree management activities
- historic and current tree policies
- tree policy models
- benchmarks
- management objectives
- management metrics
- strategic objectives
- key stakeholders
- tree management strategies
- legal parameters, statutes and local planning laws
- compliance with policy planning requirements
- legal implications of policy
- localised soil types, rainfall infiltration and runoff
- databases
- tree inventory
- policy determinations for hazard identification and mitigation, significant trees, tree selection, tree replacement, street tree planting, tree removal, tree inspections and assessments, tree pruning operations, power line clearance, habitat protection, infrastructure protection and pest and disease control
- development of draft and final documents.

Assessment Conditions

It is an industry requirement for competency in this unit that assessment includes construction of a database that must contain a minimum of twenty (20) trees that are the preferred and desired species highly suitable for local use, and incorporating intensive tree profiles detailing attributes of the location, taxonomic characteristics, edaphic and environmental preferences and limitations of the tree. The database must include local, indigenous and exotic tree species.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - statistical software
 - internet connection
- materials:
 - tree policy documentation
 - tree profile and benefits form
 - database of local, indigenous and exotic tree species

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB701 Analyse tree biomechanics

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to identify and analyse aspects of tree biomechanics that affect the physical loads and strengths of trees, branches and anchorage in the ground; understand the assessment of tree strength and the loads that occur; and assess factors that can weaken the tree and are likely to increase the chance of failure.

This unit applies to individuals with broad and coherent theoretical and technical knowledge with depth in one or more disciplines or areas of practice and cognitive, technical and communication skills to demonstrate autonomy, well developed judgement and responsibility in undertaking complex self-directed work and learning to provide specialist advice and functions.

The role involves the self-directed application of specialised knowledge in arboriculture with substantial depth in areas such as with substantial depth in areas such as tree statics, dynamics, wind loading and structural failure.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine existing physical loads and strengths of trees, branches and anchorage	1.1 Determine existing physical loads affecting trees 1.2 Identify areas of high stress on trees and the factors that affect these areas of high stress 1.3 Assess root plate environment including depth and consistency of soil, spatial limitations and history of site excavations 1.4 Assess prior tree pruning operations to branches and roots 1.5 Determine extent of decay and damage of trunk and root system 1.6 Assess strength and material properties of structural wood, particularly in areas of high stress
2. Determine wind load	2.1 Determine wind environment of tree 2.2 Determine surface area of structure exposed to wind 2.3 Determine crown surface area exposed to wind 2.4 Assess aerodynamic drag factor of tree crown in relation to trunk diameter and extent of hollowness 2.5 Estimate primary loads occurring in seasonal climatic events 2.6 Determine wind-load of prevailing storms 2.7 Determine load associated with saturated foliage 2.8 Consider additional drag associated with saturated foliage
3. Determine structural integrity by static load testing	3.1 Determine appropriate static load on trees for structural integrity testing as an estimate of a wind-equivalent load 3.2 Calibrate static load testing instruments so loads are accurately applied and maintained within limits of structural safety during a static test 3.3 Carry out a static test that loads the tree, measures the trunk strength and assesses root plate anchorage in the ground 3.4 Monitor loads and forces electronically 3.5 Monitor tree to ensure loads are kept within safe limits and damage is avoided to tree 3.6 Maintain accurate records of all data from static test. 3.7 Compare data with benchmarks obtained from stable tree populations 3.8 Document a report on structural integrity testing of tree from the static load test
4. Determine tree dynamic response	4.1 Research tree biomechanics studies using dynamic methods of analysis

Element	Performance criteria
	4.2 Understand simple models of tree dynamics 4.3 Review complex models and finite element analyses that provide multimodal approaches representing dynamics of branches on trees 4.4 Calculate existing mass of branches 4.5 Determine degree of open-grown form of tree by calculation of the of branch mass 4.6 Calculate vector of force on the tree 4.7 Determine the tree dynamic response in defined wind velocity and direction 4.8 Document a report on structural integrity testing of tree from the dynamic load analysis
5. Document a structural integrity report	5.1 Research level of contribution of material properties in tree dynamics 5.2 Research dynamic effect of branches on frequency and damping 5.3 Determine level of contribution of form and morphology in tree dynamics 5.4 Review suitability of invasive and non-invasive methods of testing 5.5 Evaluate and determine likelihood of structural failure 5.6 Confirm level of anchoring potential of root system and stability of tree 5.7 Document a structural integrity report and provide to client

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCARB701 Analyse tree biomechanics

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- determining existing physical loads affecting trees
- identifying areas of high stress on trees and the factors that affect these areas of high stress
- assessing root plate environment including depth and consistency of soil, spatial limitations and history of site excavations
- assessing prior tree pruning operations to branches and roots
- determining extent of decay and damage of trunk and root system
- assessing strength and material properties of structural wood, particularly in areas of high stress
- determining wind environment of tree
- determining surface area of structure exposed to wind
- determining crown surface area exposed to wind
- assessing aerodynamic drag factor of tree crown in relation to trunk diameter and extent of hollowness
- estimating primary loads occurring in seasonal climatic events
- determining wind-load of prevailing storms
- determining load associated with saturated foliage
- considering additional drag associated with saturated foliage
- determining appropriate static load on trees for structural integrity testing as an estimate of a wind equivalent load
- calibrating static load testing instruments so loads are accurately applied and maintained within limits of structural safety during a static test
- carrying out a static test that loads the tree, measures the trunk strength and assesses root plate anchorage in the ground
- monitoring loads and forces electronically

- monitoring tree to ensure loads are kept within safe limits and damage is avoided to tree
- maintaining accurate records of all data from static test.
- comparing data with benchmarks obtained from stable tree populations
- documenting a report on structural integrity testing of tree from the static load test.
- researching tree biomechanics studies using dynamic methods of analysis
- understanding simple models of tree dynamics
- reviewing complex models and finite element analyses that provide multimodal approaches representing dynamics of branches on trees
- calculating the existing mass of branches
- determining degree of open-grown form of tree by calculation the of branch mass
- calculating the vector of force on the tree
- determining the tree dynamic response in defined wind velocity and direction
- researching the level of contribution of material properties in tree dynamics
- researching the dynamic effect of branches on frequency and damping
- determining the level of contribution of form and morphology in tree dynamics
- reviewing suitability of invasive and non-invasive methods of testing
- evaluating and determining likelihood of structural failure
- confirming level of anchoring potential of root system and stability of tree
- documenting a structural integrity report and provide to client.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- physical loads affecting trees
- areas of high stress on trees
- root plate environment including depth and consistency of soil, spatial limitations and history of site excavations
- prior tree pruning operations to branches and roots
- extent of decay and damage of trunk and root system
- assessment of strength and material properties of structural wood
- wind environment of tree
- surface area of structure exposed to wind
- crown surface area exposed to wind
- aerodynamic drag factor of tree crown in relation to trunk diameter and extent of hollowness
- estimation of primary loads occurring in seasonal climatic events
- wind-load of prevailing storms
- load associated with saturated foliage
- additional drag associated with saturated foliage
- static load
- static load test
- appropriateness of a static load on trees for structural integrity testing as an estimate of a wind equivalent load

- calibrating static load testing instruments
- limits of structural safety during a static test
- measurement of trunk strength
- assessment of root plate anchorage in the ground
- monitoring loads and forces electronically
- monitoring of tree to ensure loads are kept within safe limits
- avoidance of damage to tree
- maintenance of accurate records of all data from static test
- benchmarks obtained from stable tree populations
- reporting on structural integrity testing of tree
- researching tree biomechanics studies using dynamic methods of analysis
- simple models of tree dynamics
- complex models and finite element analyses
- multimodal approaches representing dynamics of branches on trees
- calculations of existing mass of branches
- open-grown form of tree
- vector of force on trees
- tree dynamic response
- wind velocity and direction
- material properties in tree dynamics
- dynamic effect of branches on frequency and damping
- form and morphology in tree dynamics
- of invasive and non-invasive methods of testing
- likelihood of structural failure
- level of anchoring potential of root system
- stability of tree
- structural integrity reporting.

Assessment Conditions

It is an industry requirement that competency in this unit requires the assessment of:

- five (5) static load tests, and
- five (5) dynamic load analyses.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - internet connection
 - wind environment statistics
 - static load equipment
 - models of tree dynamics
- materials:
 - structural integrity report

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- tree biomechanics vocational competencies at least to the level being assessed
- current tree biomechanics skills directly relevant to the unit of competency being assessed

AHCARB702 Analyse mycology cultures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to safely work within a laboratory environment, collect and identify wood decay fungi specimens, prepare in vitro cultures, and carry out primary experiments.

This unit applies to individuals with advanced theoretical and technical knowledge and skills for professional or highly skilled work and/or further learning in one or more disciplines or areas of practice. This unit applies to individuals with advanced cognitive, technical and communication skills to provide specialist advice, analyse, generate and transmit solutions to complex problems, and to demonstrate autonomy, well-developed judgement, adaptability and responsibility as a practitioner or learner.

The role involves the self-directed application of specialised knowledge in arboriculture with substantial depth in areas of tree pathology and mycology.

Work is performed under standard laboratory procedures of hygiene and safety for sampling, and use, sterilisation and cleaning of standard laboratory equipment and instruments.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research pathogenic and saprophytic wood decay fungi species	1.1 Research the role of fungi in biodiversity, tree nutrition, forest health, environmental biochemistry and pathology 1.2 Research the role and contribution of wood decay fungi to forest health, the influence of environmental stresses and physiological tree responses 1.3 Examine the taxonomy and evolutionary relationships of corticoid and polypore wood decay fungi 1.4 Investigate the role of fungal species on various hosts 1.5 Conduct analysis of lifecycle, biology, ecology and effects of pathogenic wood decay fungi species 1.6 Conduct analysis of lifecycle, biology, ecology and effects of saprophytic wood decay fungi species 1.7 Examine the relationships of fungal species with branch and tree failures 1.8 Analyse biosecurity implications of known and threat fungal species 1.9 Review PLANTPLAN biosecurity plans and procedures
2. Evaluate decay and identify fungi	2.1 Perform visual evaluation of the signs and symptoms of fungi and decay, including: visual symptoms such as dieback, reduced growth rate and chlorosis, presence of basidiocarps, decayed wounds, hollows and cavities 2.2 Perform field identification of wood decay species of fungi to generic level 2.3 Perform field identification of non-pathogenic fungi species to generic level 2.4 Document location, size, and condition of wood decay fungi, presence of mycoparasites, and size, condition and extent of hollows and cavities 2.5 Document details of environmental characteristics of fungal affected trees: site characteristics, site history, soil conditions, climate and microclimatic variables, proximity of adjacent trees and vegetation, movement of people and vehicles, and potential impacts to assets, property and landscape 2.6 Determine methods of introduction, establishment, spread, and susceptibility of adjacent trees and vegetation 2.7 Perform field sampling techniques of wood decay fungi and mycoparasites suitable for in-vitro culture and identification

Element	Performance criteria
3. Prepare in-vitro media, cultures	3.1 Decant and prepare standard laboratory chemicals and materials 3.2 Create selective culturing media to grow and isolate field samples 3.3 Prepare field samples for culturing on media 3.4 Take samples from field samples and apply to growth media 3.5 Isolate clean cultures from primary field cultures, and repeat until clean sample is obtained 3.6 Prepare cultured samples for further testing such as deoxyribonucleic (DNA) based assay techniques 3.7 Document records and store securely digital and physical evidence: field samples, slides, growth media, DNA and cultured samples, following chain of evidence protocols
4. Conduct laboratory identification and assays	4.1 Prepare microscope slides of isolated cultures 4.2 Examine and identify cultured fungal samples 4.3 Perform laboratory identification of wood decay fungi to generic level 4.4 Record digital images of identified fungi 4.5 Perform laboratory assay tests for growth rate, temperature range, pathogenicity, and mycoparasitism to evaluate fungal characteristics 4.6 Document experimental assay test results 4.7 Develop and maintain a culture collection for identification of fungi and submission to relevant government databases and culture collections 4.8 Document a diagnostic report on a suspected emergency plant pest (EPP) following PLANTPLAN guidelines

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB702 Analyse mycology cultures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- researching the role of fungi in biodiversity, tree nutrition, forest health, environmental biochemistry and pathology
- researching the role and contribution of wood decay fungi to forest health, the influence of environmental stresses and physiological tree responses
- examining the taxonomy and evolutionary relationships of corticoid and polypore wood decay fungi
- investigating the role of fungal species on various hosts
- conducting analysis of lifecycle, biology, ecology and effects of pathogenic wood decay fungi species
- conducting analysis of lifecycle, biology, ecology and effects of saprophytic wood decay fungi species
- examining the relationships of fungal species with branch and tree failures
- analysing biosecurity implications of known and threat fungal species
- reviewing PLANTPLAN biosecurity plans and procedures
- performing visual evaluation of the signs and symptoms of fungi and decay, including: visual symptoms such as dieback, reduced growth rate and chlorosis, presence of basidiocarps, decayed wounds, hollows and cavities
- performing field identification of wood decay species of fungi to generic level
- performing field identification of non-pathogenic fungi species to generic level
- documenting location, size, and condition of wood decay fungi, presence of mycoparasites, and size, condition and extent of hollows and cavities

- documenting details of environmental characteristics of fungal affected trees: site characteristics, site history, soil conditions, climate and microclimatic variables, proximity of adjacent trees and vegetation, movement of people and vehicles, and potential impacts to assets, property and landscape
- determining methods of introduction, establishment, spread, and susceptibility of adjacent trees and vegetation
- performing field sampling techniques of wood decay fungi and mycoparasites suitable for in-vitro culture and identification
- decanting and preparing standard laboratory chemicals and materials
- creating selective culturing media to grow and isolate field samples
- preparing field samples for culturing on media
- taking samples from field samples and apply to growth media
- isolating clean cultures from primary field cultures, and repeating until clean sample is obtained
- preparing cultured samples for further testing such as deoxyribonucleic (DNA) based assay techniques
- documenting records and storing securely digital and physical evidence: field samples, slides, growth media, DNA and cultured samples, following chain of evidence protocols
- preparing microscope slides of isolated cultures
- examining and identify cultured fungal samples
- performing laboratory identification of wood decay fungi to generic level
- recording digital images of identified fungi
- performing laboratory assay tests for growth rate, temperature range, pathogenicity, and mycoparasitism to evaluate fungal characteristics
- documenting experimental assay test results
- developing and maintaining a culture collection for identification of fungi and submission to relevant government databases and culture collections
- documenting a diagnostic report on a suspected emergency plant pest (EPP) following PLANTPLAN guidelines.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the role of fungi in biodiversity, tree nutrition, forest health, environmental biochemistry and pathology
- the role and contribution of wood decay fungi to forest health, the influence of environmental stresses and physiological tree responses
- taxonomy and evolutionary relationships of corticoid and polypore wood decay fungi
- the role of fungal species on various hosts
- lifecycles, biology, ecology and effects of pathogenic wood decay fungi species
- lifecycle, biology, ecology and effects of saprophytic wood decay fungi species
- relationships of fungal species with branch and tree failures
- biosecurity implications of known and threat fungal species
- PLANTPLAN biosecurity plans and procedures

- visual evaluation of the signs and symptoms of fungi and decay, including: visual symptoms such as dieback, reduced growth rate and chlorosis, presence of basidiocarps, decayed wounds, hollows and cavities
- field identification of wood decay species of fungi to generic level
- field identification of non-pathogenic fungi species to generic level
- location, size, and condition of wood decay fungi, presence of mycoparasites, and size, condition and extent of hollows and cavities
- environmental characteristics of fungal affected trees: site characteristics, site history, soil conditions, climate and microclimatic variables, proximity of adjacent trees and vegetation, movement of people and vehicles, and potential impacts to assets, property and landscape
- methods of introduction, establishment, spread, and susceptibility of adjacent trees and vegetation
- field sampling techniques of wood decay fungi and mycoparasites
- in-vitro culture of wood decay fungi and mycoparasites
- identification of wood decay fungi and mycoparasites
- methods of decanting and preparing standard laboratory chemicals and materials
- creation of selective culturing media to grow and isolate field samples
- preparation of field samples for culturing on media
- methods of sampling from field samples
- methods of application of samples to growth media
- isolation of clean cultures from primary field cultures
- methods of obtaining clean samples
- preparation of cultured samples
- deoxyribonucleic (DNA) based assay techniques
- documentation of records
- secure storage of digital and physical evidence: field samples, slides, growth media, DNA and cultured samples
- chain of evidence protocols
- preparation of microscope slides of isolated cultures
- identification of cultured fungal samples
- laboratory identification of wood decay fungi to generic level
- digital imaging of identified fungi
- laboratory assay tests for growth rate, temperature range, pathogenicity, and mycoparasitism to evaluate fungal characteristics
- documentation of experimental assay test results
- development and maintenance of culture collections
- methods of submission to relevant government databases and culture collections
- documentation of diagnostic reports
- emergency plant pest (EPP)
- PLANTPLAN guidelines.

Assessment Conditions

It is an industry requirement that competency in this unit requires the:

- field identification of a minimum of ten (10) wood decay fungi to generic level
- field identification of a minimum of ten (10) non-pathogenic fungi to generic level
- analysis of the lifecycle, biology, ecology and effects of a minimum of ten (10) saprophytic wood decay fungi species
- analysis of the lifecycle, biology, ecology and effects of a minimum of ten (10) pathogenic wood decay fungi species
- laboratory identification of a minimum of five (5) wood decay fungi to generic level.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - digital camera with macro
 - diagnostic tools including sounding hammer, trowel, probe, cordless drill
 - soil testing equipment
 - digital dissection microscope 10 -100x
 - compound microscope
 - microtome, staining and slide mounting equipment
 - slides and coverslips
 - temporary/permanent mountant
 - histochemical stains
 - laboratory equipment to perform aseptic techniques in a sterile environment
- materials:
 - emergency plant pest diagnostic report

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- mycology vocational competencies at least to the level being assessed
- current mycology skills directly relevant to the unit of competency being assessed

AHCARB703 Research urban forest performance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to research urban forest performance.

This unit applies to individuals with broad and coherent theoretical and technical knowledge with depth in one or more disciplines or areas of practice and cognitive, technical and communication skills to demonstrate autonomy, well developed judgement and responsibility in undertaking complex self-directed work and learning to provide specialist advice and functions.

The role involves the self-directed application of specialised knowledge in arboriculture with substantial depth in areas of urban forestry and climate change.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Research urban forest processes	1.1 Research and define elemental components of urban forests 1.2 Research role of urban forests as a primary component of urban ecosystems 1.3 Research threats to and resilience of urban forests in cities 1.4 Research regulation of hydrological processes, retention of precipitation, mitigation of salinity and effects of trees on water quality 1.5 Research relationship of soil biological network, soil chemistry, soil structure and trees to soil structure stabilisation and erosion potential 1.6 Determine contribution of trees towards rhizosphere biodiversity, bioremediation and soil health
2. Evaluate benefits of urban forests	2.1 Research energy conservation and micro-climate modification systems of trees and urban forests 2.2 Research heat island analyses of an urban area 2.3 Evaluate health, social and psychological benefits of urban forests 2.4 Document evidence-based research into a preliminary report on benefits of urban forests
3. Analyse methods and document report	3.1 Research current methods and technologies for spatial mapping of urban forests 3.2 Analyse process of carbon sequestration in urban forests 3.3 Analyse methods for sampling urban forests 3.4 Evaluate urban forest valuation methodologies 3.5 Document a preliminary report on methods of valuation of an urban forest
4. Examine climate change mitigation	4.1 Research contribution of urban forest to carbon cycles 4.2 Determine local climate, soil factors and management factors affecting forest growth and sequestration 4.3 Research contribution of forest carbon sequestration to mitigation of climate change 4.4 Document an evaluation of forest mitigation on climate change
5. Compile and document reports	5.1 Document a report on the social, environmental, economic and climatic values of urban forests 5.2 Determine challenges of increased urbanisation and urban densification on urban forests 5.3 Determine potential benefit of urban forest to mitigate climate change 5.4 Compile preliminary reports and document a report describing multi-disciplinary solutions to challenges of urbanisation on urban forests

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB703 Research urban forest performance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- researching and define elemental components of urban forests
- researching role of urban forests as a primary component of urban ecosystems
- researching threats to and resilience of urban forests in cities
- researching regulation of hydrological processes, retention of precipitation, mitigation of salinity, and effects of trees on water quality
- researching relationship of soil biological network, soil chemistry, soil structure and trees to soil structure stabilisation and erosion potential
- determining contribution of trees towards rhizosphere biodiversity, bioremediation and soil health
- researching energy conservation and micro-climate modification systems of trees and urban forests
- researching heat island analyses of an urban area
- evaluating health, social and psychological benefits of urban forests
- documenting evidence-based research into a preliminary report on benefits of urban forests
- researching current methods and technologies for spatial mapping of urban forests
- analysing process of carbon sequestration in urban forests
- analysing methods for sampling urban forests
- evaluating urban forest valuation methodologies
- documenting a preliminary report on valuation of an urban forest
- researching contribution of urban forest to carbon cycles
- determining local climate, soil factors and management factors affecting forest growth and sequestration
- researching contribution of forest carbon sequestration to mitigation of climate change

- documenting an evaluation of forest mitigation on climate change
- documenting a report on the social, environmental, economic and climatic values of urban forests
- determining challenges of increased urbanisation and urban densification on urban forests
- determining potential benefit of urban forest to mitigate climate change
- compiling preliminary reports and documenting a report describing multi-disciplinary solutions to challenges of urbanisation on urban forests.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- elemental components of urban forests
- role of urban forests as a primary component of urban ecosystems
- threats to and resilience of urban forests in cities
- regulation of hydrological processes, retention of precipitation, mitigation of salinity, and effects of trees on water quality
- relationship of soil biological network, soil chemistry, soil structure and trees to soil structure stabilisation and erosion potential
- contribution of trees towards rhizosphere biodiversity, bioremediation and soil health
- energy conservation and micro-climate modification systems of trees and urban forests
- heat island analyses of an urban area
- health, social and psychological benefits of urban forests
- current methods and technologies for spatial mapping of urban forests
- process of carbon sequestration in urban forests
- methods for sampling urban forests
- urban forest valuation methodologies
- contribution of urban forest to carbon cycles
- local climate, soil factors and management factors affecting forest growth and sequestration
- contribution of forest carbon sequestration to mitigation of climate change
- evaluation of forest mitigation on climate change
- social, environmental, economic and climatic values of urban forests
- challenges of increased urbanisation and urban densification on urban forests
- potential benefit of urban forest to mitigate climate change
- multi-disciplinary solutions to challenges of urbanisation on urban forests.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - statistical software
 - internet connection
 - measurement and data collection tools
- materials:
 - urban forest report

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- urban forestry vocational competencies at least to the level being assessed
- current urban forestry skills directly relevant to the unit of competency being assessed

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Research Insects	1.1 Describe and identify anatomical, morphological and taxonomical features of insect specimens 1.2 Examine and describe the behaviour, ecology and nutrition of insect interaction with trees 1.3 Research annualised population and generational behaviour of insects
2. Construct professional resource collections	2.1 Develop and document an insect collection 2.2 Construct database of tree pests and vectors 2.3 Compile host, climatic and geographic distribution data 2.4 Record and compile generational phenology
3. Research and assess tree-pest and vector interactions	3.1 Research and identify natural antagonists, predators and parasitoids of insects 3.2 Identify phytophagous and damaging insect-tree dynamics 3.3 Identify symbiotic/beneficial and insect-tree dynamics 3.4 Research physiology of tree resistance to insects 3.5 Research host-pathogen and pathogen-vector interactions 3.6 Evaluate conditions associated with the selection of host trees by subcortical feeding insects and the factors associated with successful attack 3.7 Research and assess insect transmission of disease 3.8 Evaluate multi-trophic interactions between host plant-pest-pathogen/parasitoids from a systems approach
4. Evaluate control systems	4.1 Determine economic costs of insects 4.2 Evaluate insects as environmental indicators 4.3 Determine insect biological hazards 4.4 Investigate direct and indirect impact and effects of chemical pesticides or biocontrol agents on target and non-target organisms 4.5 Research insect resistance to pesticides 4.6 Investigate fungi as biological control agents of tree pests 4.7 Evaluate biological control methods of Integrated Pest Management (IPM) 4.8 Research and evaluate plant health management options to offset the effects of insect damage
5. Present results	5.1 Collect, tabulate, and statistically analyse data for publications 5.2 Determine the relevance of the results to arboriculture 5.3 Compile and communicate research and test results in a research paper 5.4 Submit research paper to a professional technical peer-reviewed journal

Element	Performance criteria
	5.5 Review feedback and amend where appropriate 5.6 Communicate key facts and conclusions to industry in an article published in a non-technical industry publication or via presentation to an industry training event

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCARB704 Conduct an entomology research project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- describing and identifying anatomical, morphological and taxonomical features of insect specimens
- examining and describe the behaviour, ecology and nutrition of insect interaction with trees
- researching annualised population and generational behaviour of insects
- constructing a database of tree pests and vectors
- developing and documenting an insect collection
- compiling host climatic and geographic distribution data
- researching and identifying natural antagonists, predators and parasitoids of insects
- identifying phytophagous and damaging insect-tree dynamics
- identifying symbiotic/beneficial and insect-tree dynamics
- researching physiology of tree resistance to insects
- researching host-pathogen and pathogen-vector interactions
- evaluating conditions associated with the selection of host trees by subcortical feeding insects and the factors associated with successful attack
- researching and assess insect transmission of disease
- evaluating multi-trophic interactions between host plant-pest-pathogen/parasitoids from a systems approach
- determining economic costs of insects
- evaluating insects as environmental indicators
- determining insect biological hazards
- investigating direct and indirect impact and effects of chemical pesticides or biocontrol agents on target and non-target organisms
- researching insect resistance to pesticides

- investigating fungi as biological control agents of tree pests
- evaluating biological control methods of integrated pest management (IPM)
- researching and evaluating plant health management options to offset the effects of insect damage
- collecting, tabulating, and statistically analysing data for publications
- determining the relevance of the results to arboriculture
- compiling and communicate research and test results in a research paper
- submitting research paper to a professional technical peer-reviewed journal
- reviewing feedback and amend where appropriate
- communicating key facts and conclusions to industry in an article published in a non-technical industry publication or via presentation to an industry training event.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- anatomical, morphological and taxonomical features of insect specimens
- behaviour, ecology and nutrition of insect interaction with trees
- annualised population and generational behaviour of insects
- database construction of tree pests and vectors
- annualised population of insects
- generational behaviour of insects
- insect collections
- generational phenology
- host, climatic and geographic distribution data
- natural antagonists, predators and parasitoids of insects
- phytophagous and damaging insect-tree dynamics
- symbiotic/beneficial and insect-tree dynamics
- physiology of tree resistance to insects
- host-pathogen and pathogen-vector interactions
- conditions associated with the selection of host trees by subcortical feeding insects
- factors associated with successful attack
- insect transmission of disease
- multi-trophic interactions between host plant-pest-pathogen/parasitoids from a systems approach
- economic costs of insects
- insects as environmental indicators
- insect biological hazards
- direct and indirect impact and effects of chemical pesticides or biocontrol agents
- target and non-target organisms
- insect resistance to pesticides
- fungi as biological control agents of tree pests
- biological control methods of Integrated Pest Management (IPM)

- plant health management options to offset the effects of insect damage
- collection, tabulation, and statistical analysis of data for publications
- compilation and communication of research and test results in a research paper
- professional technical peer-reviewed journal
- methods of reviewing and amending feedback
- methods of communicating key facts and conclusions in articles and presentations
- publishing in non-technical industry publications.

Assessment Conditions

It is an industry requirement that competency in this unit requires the identification by anatomical, morphological and taxonomical features of insect specimens, compiled into a collection of a minimum of one hundred (100) specimens of arboricultural concern or benefit from at least four (4) orders of insects. The collection may be digital and/or physical, correctly labelled and containing information on:

- date of collection
- location of collection
- host where applicable
- insect genus, and
- species where possible.

It is an industry requirement that research projects and management strategies include two or more of the following inter-disciplinary programs, and must focus on a specified insect or closely related insect species:

- Conceive, design, and implement safe and efficacious control strategies
- Research and develop alternative management strategies
- Investigate the longevity, infectivity, and virulence
- Monitor and assess infestation levels of outbreaks
- Design and implement biocontrol strategies using predators, parasitoids, and entomopathogenic fungi
- Design and implement methods for monitoring and assessment of population dynamics and distribution of tree pest species
- Conduct and evaluate a comparative ecological field study investigating efficacy and compatibility
- Trial and research a management plan for a phytophagous insect
- Trial and research a breeding program for a beneficial insect
- Conduct research of three model systems to examine tritrophic effects of susceptibility
- Design, implement, investigate, evaluate and report on tritrophic interactions
- Investigate preference and survivability
- Design projects investigating the subsequent risk analysis and tests required
- Develop a tree pest survey strategy
- Research and report on geographical or climatic distribution
- Coordinate an international and domestic multidisciplinary collaborative research initiative

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - internet connection
 - digital camera with macro
 - diagnostic tools including sounding hammer, trowel, probe, cordless drill
 - soil testing equipment
 - digital dissection microscope 10 -100x
 - compound microscope
 - microtome, staining and slide mounting equipment
 - slides and coverslips
 - temporary/permanent mountant
 - histochemical stains
- materials:
 - entomology research paper
 - insect collection/database of pests and vectors

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- entomology vocational competencies at least to the level being assessed
- current entomology skills directly relevant to the unit of competency being assessed

AHCARB801 Contextualise diagnostic tests

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to contextualise diagnostic testing and execute a diagnostic test project.

This unit applies to individuals with advanced theoretical and technical knowledge and skills for professional or highly skilled work and/or further learning in one or more disciplines or areas of practice. This unit applies to individuals with advanced cognitive, technical and communication skills to provide specialist advice, analyse, generate and transmit solutions to complex problems, and to demonstrate autonomy, well-developed judgement, adaptability and responsibility as a practitioner or learner.

The role involves the self-directed application of knowledge in tree anatomy, physiology, pathology, tree dynamics and the edaphic environment with substantial depth in areas such as diagnostic tool application methods and analysis of diagnostic test results.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research diagnostic testing principles and processes	1.1 Research peer-reviewed documentation and relevant case studies 1.2 Develop competency in correct and functional operation of diagnostic testing equipment 1.3 Interpret underpinning scientific principles of test processes 1.4 Determine diagnostic assumptions and limitations of testing process for selected diagnostic tool
2. Analyse requirements and calibrate processes	2.1 Analyse quantification, variance and tolerance requirements for selected diagnostic tool 2.2 Research calibration baselines and seek verification where required 2.3 Verify appropriate calibration processes have been performed
3. Determine project parameters and execute a diagnostic test project	3.1 Select one or more appropriate testing processes for each of the primary domains: tree anatomy, physiology, pathology, tree dynamics and the edaphic environment 3.2 Contextualise testing for each domain with appropriate selection of diagnostic tools 3.3 Define scientific research method using a basis of hypothesis testing, measurement of functional relationships, and observational research as required 3.4 Investigate scientific literature resources referenced by current science of each primary domain 3.5 Describe efficacy of test in terms of primary domain 3.6 Conceive and execute a diagnostic test project
4. Interpret testing results	4.1 Express testing results in performance metrics for each of the selected diagnostic tools 4.2 Interpret results against normal and anticipated ranges 4.3 Confirm predictive responses in terms of pre treatment results to projected post treatment outcomes 4.4 Articulate meaning of results within context of primary domain
5. Provide prognosis and document management plans	5.1 Provide an informed prognosis 5.2 Research management options and lag time 5.3 Formulate a report that documents management plans

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCARB801 Contextualise diagnostic tests

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

It is an industry requirement that competency in this unit requires the analysis of five different diagnostic test results.

The candidate must provide evidence for and demonstrate:

- researching peer reviewed documentation and relevant case studies
- developing competency in correct, functional operation of diagnostic testing equipment
- interpreting the underpinning scientific principles of test processes
- describing the physical and other limits of the testing process
- determining the diagnostic assumptions and limitations of the testing process for the selected diagnostic tool
- analysing quantification, variance and tolerance requirements
- researching calibration baselines and seek verification where required
- verifying appropriate calibration processes have been performed
- selecting one or more appropriate testing processes for each of the primary domains of tree anatomy, physiology, pathology, tree dynamics and the edaphic environment
- contextualising testing for each domain with appropriate selection of diagnostic tools
- defining scientific research method using a basis of hypothesis testing, the measurement of functional relationships, and observational research.
- investigating and determine scientific literature resources referenced by the science of each primary domain
- describing the efficacy of the test in terms of the primary domain
- conceiving and executing a diagnostic test project
- expressing results in performance metrics of selected diagnostic tools
- interpreting results against normal and anticipated ranges

- confirming predictive responses in terms of post treatment to pre treatment results
- articulating meaning of results within context of primary domain
- providing an informed prognosis
- researching management options and lag time
- documenting management plans into report
- monitoring management plans and modify or refine as needed
- use of industry standard terminology to describe arboricultural diagnostic testing processes.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- peer reviewed documentation and case studies
- correct, functional operation of diagnostic testing equipment
- underpinning scientific principles behind the test processes
- physical and other limits of the testing process
- diagnostic assumptions and limitations of tools
- quantification
- baselines
- calibration processes
- tree anatomy
- tree physiology
- tree dynamics
- the edaphic environment of trees
- research methods
- hypothesis testing
- measurement of functional relationships
- verifying efficacy of a test
- performance metrics
- normal anticipated ranges of test result
- scientific research methods
- scientific literature
- diagnostic test projects and processes
- the contextual meaning of tests results
- prognostics
- management of diagnostic outcomes
- management plans
- monitoring management plans.

Assessment Conditions

It is an industry requirement that competency in this unit requires the analysis of a minimum of five different diagnostic test results, one in each of the primary domains of tree anatomy, physiology, pathology, tree dynamics and the edaphic environment.

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - statistical software
 - internet connection
 - diagnostic tools selected for testing
- materials:
 - diagnostic test project
 - diagnostic test project management plan

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- arboriculture vocational competencies at least to the level being assessed
- current arboriculture industry skills directly relevant to the unit of competency being assessed

AHCARB802 Develop an urban forest management framework

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop an urban forest management framework incorporating the policy documentation and urban forest management planning.

This unit applies to individuals with advanced theoretical and technical knowledge and skills for professional or highly skilled work and/or further learning in one or more disciplines or areas of practice. This unit applies to individuals with advanced cognitive, technical and communication skills to provide specialist advice, analyse, generate and transmit solutions to complex problems, and to demonstrate autonomy, well-developed judgement, adaptability and responsibility as a practitioner or learner.

The role involves the self-directed application of knowledge in tree anatomy, physiology, pathology, tree dynamics and the edaphic environment with substantial depth in areas such as forest asset management, tree inventory and data analysis.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCARB703 Research urban forest performance

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish performance metrics and analyse resources	1.1 Research models of urban forest management 1.2 Establish the key performance metrics and outcomes to be assessed incorporating specific parameters from the client brief 1.3 Determine the data sets to be collected required for objectives of managing the resources and needs of stakeholders 1.4 Analyse urban forest resources 1.5 Determine agents and conditions affecting urban forest health 1.6 Analyse species spatially in target geographic areas using geographical information systems (GIS) as required 1.7 Determine canopy density targets
2. Determine urban forest asset value	2.1 Determine outcomes in social, environmental, public health, economic, and aesthetic terms 2.2 Determine asset value of single tree and forest based on value criteria of client and relevant benchmarks 2.3 Perform cost-benefit analysis of forest assets 2.4 Analyse variation in asset value within relevant variables
3. Review policy documentation	3.1 Analyse and review relevant policy documents for meeting performance metrics and desired outcomes 3.2 Determine statutory, liability and risk issues requiring consideration 3.3 Identify stakeholder requirements and perceptions 3.4 Evaluate the extent of impact and outcomes of proposed policy documents 3.5 Create policy determinations on tree assets and record as reports 3.6 Create and document urban forest management policy
4. Develop and document management plan	4.1 Develop appropriate conceptual framework for urban forest management 4.2 Develop street tree master plans as required 4.3 Set vision and objective statements 4.4 Determine quantifiable goals 4.5 Use tree inventory and mapping data management software as required 4.6 Establish and maintain inventories and databases 4.7 Develop implementation and operational plans 4.8 Develop and document an urban forest management plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit. No equivalent unit.

Assessment Requirements for AHCARB802 Develop an urban forest management framework

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- researching models of urban forest management
- establishing the key performance metrics and outcomes to be assessed incorporating specific parameters from the client brief
- determining the data sets to be collected required for objectives of managing the resources and needs of stakeholders
- analysing urban forest for resources
- determining agents and conditions affecting urban forest health
- analysing species spatially in target geographic areas using geographical information systems (GIS)
- determining canopy density targets
- determining outcomes in social, environmental, public health, economic, and aesthetic terms
- determining asset value of single tree and forest based on value criteria of client and relevant benchmarks
- performing cost-benefit analysis of forest assets
- analysing variation in asset value within relevant variables
- analysing and reviewing relevant policy documents for meeting performance metrics and desired outcomes
- determining statutory, liability and risk issues requiring consideration
- identifying stakeholder requirements and perceptions
- evaluating the extent of impact and outcomes of proposed policy documents
- creating policy determinations on tree assets and record as reports
- creating and document urban forest management policy
- developing appropriate conceptual framework for urban forest management

- determining the requirement for street tree master plans
- setting vision and objective statements
- determining quantifiable goals
- using tree inventory and mapping data management software as required
- establishing and maintain inventories and databases
- developing implementation and operational plans
- developing and document an urban forest management plan
- use of industry standard terminology to describe urban forest management.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- models of urban forest management
- key performance metrics
- data sets
- urban forest resources analysis
- tree assets
- urban forest health
- spatial analysis of trees
- geographical information systems (GIS)
- canopy density targets
- outcomes in social, environmental, public health, economic, and aesthetic terms
- asset value of single tree
- asset value of forest
- value criteria
- relevant benchmarks
- cost-benefit analysis
- forest assets
- variation in asset value
- variables
- performance metrics
- stakeholder requirements and perceptions
- policy determinations
- urban forest management policy
- conceptual framework
- urban forest management
- street tree master plans
- vision statements
- statement of objectives
- quantifiable goals
- tree inventory
- mapping data

- mapping data management
- mapping data management software
- inventories and databases
- implementation plans
- operational plans
- urban forest management plans.

Assessment Conditions

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - statistical software
 - internet connection
- materials:
 - urban forest management plan

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- urban forestry vocational competencies at least to the level being assessed
- current urban forestry skills directly relevant to the unit of competency being assessed

AHCARB803 Analyse edaphic interactions of trees and structures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to analyse the edaphic interactions of trees and structures.

This unit applies to individuals with advanced theoretical and technical knowledge and skills for professional or highly skilled work and/or further learning in one or more disciplines or areas of practice. This unit applies to individuals with advanced cognitive, technical and communication skills to provide specialist advice, analyse, generate and transmit solutions to complex problems, and to demonstrate autonomy, well-developed judgement, adaptability and responsibility as a practitioner or learner.

The role involves the self-directed application of knowledge in tree anatomy, physiology and the edaphic environment with substantial depth in areas such as tree failures and biomechanics in the built environment.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCARB701 Analyse tree biomechanics

Unit Sector

Arboriculture (ARB)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine soil attributes	1.1 Research repose angle of soil materials 1.2 Research soil plasticity 1.3 Measure soil moisture content and field capacity of soil 1.4 Research the effects of soil moisture on soil cohesion and plasticity 1.5 Research modes of soil liquefaction 1.6 Determine soil texture 1.7 Assess level of soil cohesion 1.8 Determine shear strength of the soil of concern 1.9 Research load bearing capacity of soil of concern 1.10 Determine mass of the soil plate
2. Determine root attributes	2.1 Determine root morphology, division and distribution 2.2 Determine amount of buttressing of tree 2.3 Determine species development of tap root system 2.4 Research identifying anatomical features of tree roots 2.5 Identify tree roots based on anatomical features
3. Calculate forces from roots	3.1 Research, experimentally model or demonstrate forces and pressures exerted into or through the soil, directly and indirectly by trees 3.2 Estimate and measure dimensions of roots exerting a force on a structure of concern 3.3 Calculate total surface area of the roots exerting a force on a structure of concern 3.4 Calculate force exerted by roots per unit of surface area of structure 3.5 Calculate total force exerted by roots of a given surface area
4. Determine structure attributes	4.1 Measure and determine volume of structure of concern 4.2 Research and calculate mass of the structure and adjacent structures 4.3 Consider the impact of gravity on mass 4.4 Determine affect of leverage on the forces exerted by tree roots onto structure of concern
5. Define the root-soil matrix factors for root/soil breakage	5.1 Determine factors of root-soil matrix interactions 5.2 Consider area of contact between root and soil

Element	Performance criteria
	5.3 Consider elasticity, tensile strength and breaking stress of roots 5.4 Investigate root cross-sectional morphology 5.5 Assess extent of root plate damage, deficiencies or defects 5.6 Estimate impact of static and dynamic testing for root plate stability 5.7 Evaluate the likelihood of root failure by root breakage 5.8 Evaluate the likelihood of anchorage failure by soil breakage or slippage
6. Research structural engineering solutions	6.1 Research and consider effects of increasing mass 6.2 Research and consider methods for, and effects of, increasing the modulus of rupture 6.3 Research and consider effects of use of curved structures 6.4 Research and consider effects of soil mass and friction 6.5 Research and consider effects of use of anchors, braces and props 6.6 Compile a portfolio of above research including personal annotations and calculations
7. Prepare stability and expert witness reports	7.1 Prepare report on likelihood of tree causing damage to structure of concern including all test results, assumptions and calculations 7.2 Provide design suggestions to mitigate likelihood of damage to a similar replacement structure 7.3 Prepare report on relative stability of tree as a result of a defective or damaged root plate 7.4 Provide design suggestions to mitigate likelihood of whole tree failure as a result of defective or damaged root plate 7.5 Prepare expert witness report on harm by roots on structures; or on stability of tree with a defective or damaged root plate, as required
8. Facilitate teamwork	8.1 Review construction and engineering language terminology 8.2 Discuss installation and protection measures to non-arboricultural project personnel 8.3 Resolve issues in construction and engineering terminology 8.4 Communicate in the language, concepts, basic science and technology of construction, architecture and engineering allied professions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCARB803 Analyse edaphic interactions of trees and structures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence for and demonstrate:

- researching repose angle of soil materials
- researching soil plasticity
- measuring soil moisture content and field capacity of soil
- researching the effects of soil moisture on soil cohesion and plasticity
- researching modes of soil liquefaction
- determining soil texture
- assessing level of soil cohesion
- determining shear strength of the soil of concern
- researching load bearing capacity of soil of concern
- determining mass of the soil plate
- determining root morphology, division and distribution
- determining amount of buttressing of tree
- determining species development of tap root system
- researching identifying anatomical features of tree roots
- identifying tree roots based on anatomical features
- researching, experimentally modelling or demonstrating forces and pressures exerted into or through the soil, directly and indirectly by trees
- estimating and measuring dimensions of roots exerting a force on a structure of concern
- calculating total surface area of the roots exerting a force on a structure of concern
- calculating force exerted by roots per unit of surface area of structure
- calculating total force exerted by roots of a given surface area
- measuring and determine volume of structure of concern
- researching and calculate mass of the structure and adjacent structures

- considering the impact of gravity on mass
- determining affect of leverage on the forces exerted by tree roots onto structure of concern
- determining factors of root–soil matrix interactions
- considering area of contact between root and soil
- considering elasticity, tensile strength and breaking stress of roots
- investigating root cross-sectional morphology
- assessing extent of root plate damage, deficiencies or defects
- estimating impact of static and dynamic testing for root plate stability
- evaluating the likelihood of root failure by root breakage
- evaluating the likelihood of anchorage failure by soil breakage or slippage
- researching and considering effects of increasing mass
- researching and considering methods for, and effects of, increasing the modulus of rupture
- researching and considering effects of use of curved structures
- researching and considering effects of soil mass and friction
- researching and considering effects of use of anchors, braces and props
- compiling a portfolio of above research including personal annotations and calculations
- preparing report on likelihood of tree causing damage to structure of concern including all test results, assumptions and calculations
- providing design suggestions to mitigate likelihood of damage to a similar replacement structure
- preparing report on relative stability of tree as a result of a defective or damaged root plate
- providing design suggestions to mitigate likelihood of whole tree failure as a result of defective or damaged root plate
- preparing expert witness report on harm by roots on structures; or on stability of tree with a defective or damaged root plate, as required
- reviewing construction and engineering language terminology
- discussing installation and protection measures to non-arboricultural team members
- resolving issues in construction and engineering terminology
- communicating in the language, concepts, basic science and technology of construction, architecture and engineering allied professions.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- repose angle of soil materials
- soil plasticity
- soil moisture content
- field capacity of soil
- effects of soil moisture on soil cohesion and plasticity
- modes of soil liquefaction
- soil texture
- soil cohesion
- shear strength of the soil

- load bearing capacity
- mass of soil plate
- root morphology
- root division
- root distribution
- buttressing
- species development of tap root systems
- anatomical features of tree roots
- identification of tree roots based on anatomical features
- research, experimental modelling and demonstration methods
- forces and pressures exerted into or through the soil, directly and indirectly by trees
- estimation and measurement of dimensions of roots exerting a force on a structure
- calculation of the total surface area of the roots exerting a force on a structure
- calculation of the force exerted by roots per unit of surface area of structure
- calculation of the total force exerted by roots of a given surface area
- measurement of volume of structures
- calculation of the mass of structures
- impact of gravity on mass
- affect of leverage on the forces exerted by tree roots onto structure
- factors of root–soil matrix interactions
- area of contact between root and soil
- elasticity of roots
- tensile strength of roots
- breaking stress of roots
- root cross-sectional morphology
- extent of root plate damage
- extent of root plate deficiencies
- extent of root plate defects
- impact of static and dynamic testing for root plate stability
- likelihood of root failure by root breakage
- likelihood of anchorage failure by soil breakage or slippage
- effects of increasing mass
- effects of use of curved structures
- effects of soil mass and friction
- effects of, increasing the modulus of rupture
- effects of use of anchors, braces and props
- portfolio of research
- personal annotations and calculations
- report preparation
- test results and assumptions
- relative stability of tree
- whole tree failure

- design suggestions for mitigation of damage and whole tree failure
- harm by roots on structures
- expert witness reports
- expert witness report on harm by roots on structures
- construction language terminology
- engineering language terminology
- installation and protection measures
- concepts, basic science and technology of structural engineering
- concepts, basic science and technology of construction
- concepts, basic science and technology of architecture.

Assessment Conditions

It is an industry requirement that competency in this unit requires the preparation of a minimum of two (2) different reports:

- a report on harm by roots on structures
- a report on stability of tree with a defective or damaged root plate

Assessment must be demonstrated consistently over time in a suitable range of contexts and have a productivity-based outcome. No single assessment event or report is sufficient to achieve competency in this unit.

Assessment may be conducted in a simulated or real work environment, however determination of competency requires the application of work practices under work conditions.

The mandatory equipment and materials used to gather evidence for assessment include:

- equipment:
 - computer
 - word processing software
 - internet connection
 - digital camera with macro
 - diagnostic tools including sounding hammer, trowel, probe, cordless drill
 - soil testing equipment
 - digital dissection microscope 10 -100x
 - compound microscope
 - microtome, staining and slide mounting equipment
 - slides and coverslips
 - temporary/permanent mountant
 - histochemical stains
- materials:

- structural damage and stability report
- glossary of construction, architecture and engineering terminology

Assessors must satisfy current standards for RTOs in the assessment of arboriculture units of competency.

Assessment must be conducted only by persons who have:

- tree biomechanics vocational competencies at least to the level being assessed
- current tree biomechanics skills directly relevant to the unit of competency being assessed

AHCASW301 Protect places of Aboriginal cultural significance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to protect places of cultural significance to Aboriginal people. It requires following Aboriginal cultural protocols and details the specific cultural, gender and kinship sensitivities of working in Aboriginal communities and on Country with diverse cultural requirements.

This unit applies to those whose work on Country and in cultural keeping places and includes protecting cultural places, sites and objects often in co-operation with a range of stakeholders and with reference to Aboriginal communities and/or line management. The unit involves and requires a high level of awareness and experience with Aboriginal culture and communities and the need to observe Aboriginal cultural protocols. This unit is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit, due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and communicate with key stakeholders	1.1 Identify appropriate persons within communities who hold cultural knowledge relevant to determining the cultural significance of Aboriginal places and heritage 1.2 Develop working relationships with key stakeholders that assist in the management of culturally significant places 1.3 Develop communication approaches that place Aboriginal cultural protocols and values at the forefront and accommodate stakeholder concerns and interests 1.4 Seek and obtain views on the way in which the cultural significance and resource can be conserved and used 1.5 Report feedback to management for operational planning processes
2. Define cultural significance	2.1 Ensure cultural knowledge holders inform the decision-making process to determine the cultural significance of places 2.2 Acknowledge and respect traditional Aboriginal knowledge, practices, rights and responsibilities in managing Country and environment 2.3 Determine the Aboriginal beliefs embedded in a place of cultural significance 2.4 Recognise the embodiment of cultural significance in the place itself, its fabric, natural resources, setting, use, associations, meanings, records, related places and related objects 2.5 Assess cultural significance 2.6 Document cultural significance in accordance with Community permissions
3. Identify threats to Aboriginal cultural places	3.1 Identify threats to culturally significant places, both external and internal to the area under consideration 3.2 Observe, describe and record details of evidence of land degradation using standard industry and Indigenous terminology and according to Community permissions 3.3 Participate in a risk assessment of all threats to determine potential impact on sites and associated cultural landscape 3.4 Identify appropriate protection or conservation measures to control potential and actual threats
4. Conserve significance	4.1 Use conservation policies and plans along with stakeholder views to participate in planning for ongoing conservation actions 4.2 Implement conservation activities in culturally sensitive ways,

Element	Performance criteria
	<p>and in accordance with Burra Charter guidelines and enterprise, Community and legislative requirements</p> <p>4.3 Apply safe and environmentally sustainable work practices</p> <p>4.4 Obtain resources for conservation and restoration activities, along with any associated ceremonial or cultural activity</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCASW301A Protect places of Aboriginal cultural significance.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCASW301 Protect places of Aboriginal cultural significance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate cultural authorities for a Community, place or for a site
- develop working relationships with Aboriginal and non-Aboriginal stakeholders in cultural sites
- canvass views in determining the cultural significance and heritage value and preservation issues of an Aboriginal cultural site
- contribute to planning for the protection of an Aboriginal cultural site including identifying resources required and submissions to be completed
- observe Aboriginal cultural protocols when working with stakeholders and land managers
- identify threats to Aboriginal site and measures to mitigate and manage the risk of damaging incidents or loss of cultural integrity
- identify natural resources and how they relate to cultural protocol, spirituality, art, environment, values, beliefs and lore/law
- identify cultural rights and responsibilities when using Community knowledge, information and material
- identify groups to be consulted in relation to owners or custodians of cultural and Community knowledge, information and material
- use Aboriginal names and standard industry terminology appropriate to the task
- apply work health and safety practices in the context of own work
- apply appropriate sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

-
- Community's history, cultural values and interpersonal and Community protocols related to the place
 - authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
 - industry, organisational and enterprise policies and procedures for conservation of places of cultural significance
 - key concepts of Burra Charter and Guidelines
 - key concepts of Cultural and Heritage Legislation and National Parks and Wildlife Service (NPWS) legislation relevant to the protection of Aboriginal significant places.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCASW302 Relate Aboriginal culture to sites work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to understand cultural landscapes from Aboriginal perspectives. The unit introduces overarching belief systems that operate where Aboriginal sites work takes place. It provides a conceptual foundation for understanding Aboriginal cultural protocols, cultural customs and cultural practices that the Aboriginal sites worker is likely to encounter in daily work routines.

This unit applies to Aboriginal worldviews and beliefs as they impact and affect Aboriginal sites work on Country. The unit applies to working either as an autonomous sites worker or under the supervision and cultural authority of Traditional owners or Elders for specific Country and is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply understanding of traditional cultural frameworks when working with Aboriginal people	1.1 Integrate the relationship to the land into daily work routines 1.2 Determine relationships of Aboriginal objects, features and cultural landscapes to Aboriginal beliefs 1.3 Determine the interrelationship of discrete Aboriginal sites to cultural frameworks 1.4 Acknowledge and respect traditional knowledge, belief systems, customs and cultural practices in managing Country
2. Recognise traditional Aboriginal social frameworks	2.1 Recognise different language groups and general lore/laws and customs 2.2 Identify extended family structures and clans in physical and geographical locations 2.3 Relate totemic structures and associated stories about ancestral beings from the Creation Period to landscape features and sites 2.4 Identify social structures that define the social positions, behaviours and obligations in kinship names, sections and networks 2.5 Identify the kinship system for determining roles and responsibilities, marriage unions, ceremonial relationships, funeral roles and behaviour patterns with other kin 2.6 Determine marriage relationships resulting from the union of two moieties or skin names 2.7 Recognise and respect gender roles
3. Relate Aboriginal spirituality to the landscape	3.1 Acknowledge and record Aboriginal beliefs that determine Aboriginal cultural protocols 3.2 Define the connection between spirituality and the land in local and trans-local terms of identity, culture and food 3.3 Relate the historical and present living environments to Dreaming stories and cultural knowledge 3.4 Recount cultural language and customs embedded in the relationship to the land and Aboriginal sites 3.5 Define the relationships of Creation stories, oral histories, kinship and totems to the cultural landscape 3.6 Recount the sense of belonging to the land and culture embedded in landscape in culturally appropriate ways 3.7 Express elements of spirituality in ceremony, rituals, stories, dance, song, art and language
4. Relate the interactions	4.1 Record the effects of cultural disconnection with the land,

Element	Performance criteria
between Dreaming, traditional beliefs and ceremonies to Aboriginal sites work	spirituality and ceremonial expressions of culture 4.2 Record impacts of disintegration and disconnection on Aboriginal sites 4.3 Acknowledge and respect the evolving nature of Dreaming 4.4 Identify and document current trends in mainstream culture and heritage and opportunities and threats to the Aboriginal sites work sector

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCASW302A Relate Aboriginal culture to sites work.

Assessment Requirements for AHCASW302 Relate Aboriginal culture to sites work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- explain traditional Aboriginal belief systems of the Community
- identify examples and impacts of disintegration and disconnection with Aboriginal culture
- describe the relationship between the land and environment and Aboriginal peoples in culturally relevant ways
- explain the relationship between Dreaming, traditional beliefs, Ceremony and sites
- use Aboriginal names and standard industry terminology appropriate to the task.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to source appropriate cultural and lore/law authority for specific Country and/or sites
- protocols and customs relating to disclosure of knowledge about Country
- Aboriginal cultural and social frameworks
- Community's ancestral beliefs
- kinship names, sections and networks
- totems, moieties, skin names
- relationship of Community's Dreaming to the site and how it is evolving
- rules and limitations to access to cultural knowledge
- different social structures of various Indigenous Communities
- Indigenous cultural customs and heritage of the Community
- recording and documentation procedures used by organisation.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCASW303 Identify and record Aboriginal sites, objects and cultural landscapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to record information and knowledge on Country from both an Aboriginal and non-Aboriginal perspective.

This unit applies to the identification and recording of Aboriginal sites, objects and cultural landscapes on Country. The unit applies to working with lore/law men and women either as an autonomous sites worker or under the supervision and cultural authority of Traditional Owners or Elders for specific Country and is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify Aboriginal sites, objects and materials and cultural landscapes on Country	1.1 Identify and consult appropriate cultural authorities 1.2 Obtain approval to be on Country and perform identification and recording work 1.3 Determine boundaries and extent of Country according to Community guidelines and Aboriginal cultural protocols 1.4 Determine details of land management and maintenance practices 1.5 Identify Aboriginal materials and objects accurately 1.6 Identify Aboriginal cultural landscapes and Aboriginal sites accurately 1.7 Determine the interrelationship of discrete Aboriginal sites to cultural landscapes and Indigenous land management 1.8 Carry out work on and off Country in accordance with work health and safety policies and procedures
2. Use the relevant Information Management System (IMS)	2.1 Determine the relevant government jurisdiction 2.2 Research and determine the relevant information management system (IMS) in operation and the organisation responsible for maintaining the system 2.3 Apply access restrictions to the IMS and confidentiality measures for recording secret, sacred materials 2.4 Access the IMS and select relevant options 2.5 Initiate and maintain, transfer of site, features and/or cultural landscape information
3. Record information on Aboriginal sites, objects and cultural landscapes	3.1 Use information and data collected about the Aboriginal site, objects, features or landscape according to Community guidelines and Aboriginal cultural protocols 3.2 Acknowledge and avoid practices which could damage the level of trust and respect between stakeholders, negotiating parties and the Community 3.3 Categorise and record site context, location and information data 3.4 Categorise and record feature data 3.5 Record Aboriginal Community interpretations, related history and culture and recommendations 3.6 Use standard industry terminology and Aboriginal names for recording and documenting information, where appropriate

Assessment Requirements for AHCASW303 Identify and record Aboriginal sites, objects and cultural landscapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can record information and knowledge on Country from both an Aboriginal and non-Aboriginal perspective.

The candidate must provide evidence that they can:

- record details of Aboriginal sites, objects and cultural landscapes consistent with the requirements of the relevant Information Management System
- record and collate information on Aboriginal culture and history for Country whilst following Aboriginal cultural protocols
- follow Community guidelines and Aboriginal cultural protocols regarding the use of information on sites, objects and cultural landscapes
- identify appropriate cultural authorities for a Community, site, story or Ceremony
- apply Community protocols and permissions to determine cultural information, material and cultural expression that is appropriate to be shared
- identify groups to be consulted in relation to owners and custodians of cultural and Community knowledge, information or material
- use Aboriginal names and standard industry terminology appropriate to the task
- apply work health and safety practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Community Aboriginal history, cultural values and interpersonal and Community protocols related to the site
- cultural rights and responsibilities when using Community knowledge, information and material

- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- designated cultural areas and features, boundaries and extent of Country
- protocols and customs relating to disclosure of knowledge about Country.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCASW304 Identify Indigenous culturally significant plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to observe, record and report on the presence of plants of Indigenous cultural significance against criteria provided by a supervisor or as required under legislation, regulations, and or community protocols.

This unit involves the recognition of plants of Indigenous significance that are commonly encountered in land management situations and covers knowledge of Indigenous plant identification techniques, Indigenous plant names, community and organisational procedures for obtaining and supplying advice and information about Indigenous plants, and community or organisational expectations about the range and number of Indigenous plants to be recognised.

This unit has a particular focus on culturally significant Indigenous plants, management and conservation.

This unit applies to the identification and recording of Indigenous plants, local bushland and bush foods on Country. The unit applies to working with lore/law men and women either as an autonomous worker or under the supervision and cultural authority of Traditional Owners or Elders for specific Country.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for plant recognition	1.1 Identify range of Indigenous plants and plant species according to pre-determined criteria, and job or client needs 1.2 Identify and locate resources required for use in recognition activity 1.3 Identify, select and prepare processes for Indigenous plant recognition including consultation and seeking approval from relevant cultural authorities to be on specific Country 1.4 Identify safety hazards and apply work health and safety procedures
2. Identify specified Indigenous plants	2.1 Name specified Indigenous plants according to their identifiable characteristics and by their Indigenous name 2.2 Determine plant habits, characteristics and significant features according to enterprise requirements 2.3 Seek advice from cultural authorities or supervisors when necessary and where appropriate in the recognition activity
3. Survey and record identification of Indigenous plants in a specified area	3.1 Identify survey site and record location of plants using maps and grid references 3.2 Determine and record cultural uses and significance of specified Indigenous plants 3.3 Document information about Indigenous plants and add to reference collection according to organisational requirements 3.4 Update reference collection if new Indigenous plants are recognised 3.5 Identify rare or endangered plant species in location 3.6 Determine disposal techniques for plant debris if specimen collection is necessary 3.7 Apply environmentally sustainable practices for carrying out observation activities to minimise degradation and disturbance 3.8 Follow work health and safety policies and procedures for

Element	Performance criteria
	carrying out survey activities
4. Identify local bushland and/or bush foods and their uses	4.1 Determine the relationship between local foods, general health and the land in Aboriginal culture 4.2 Locate and gather information from a range of sources about access to bush foods 4.3 Identify local Indigenous plants using their common, scientific and cultural names 4.4 Identify Indigenous cultural uses of available bush resources for food and medicine 4.5 Identify land management practices and conservation of Indigenous species

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCASW304 Identify Indigenous culturally significant plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify Indigenous culturally significant plants
- observe and accurately identify species of Indigenous plants
- document observations in required format, according to Community and organisational needs
- apply environmentally sustainable practices to carry out survey activities in a natural area in order to minimise disruption to the environment
- explain and/or demonstrate uses of plants for food and medicine
- utilise available resources and equipment to identify Indigenous plants accurately
- read map and grid references to identify locations of plants
- use standard industry terminology and local Community names for Indigenous plants
- apply work health and safety practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- criteria used to categorise plant species
- common and scientific names of Indigenous plants
- biological species occurring in the study area
- the importance, value or potential impact of the species in a designated area
- rare and endangered species
- plant identification techniques and plant names used by enterprise
- organisational expectations relating to the range and number of Indigenous plants to be recognised in the survey

- cultural protocols for obtaining and utilising information about Indigenous plants
- nutritional and medicinal purposes of bushland and/or bush foods
- land management and conservation techniques applicable to Aboriginal sites work.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCASW305 Work with Aboriginal ceremonial secret sacred materials

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop an awareness of the protocols involved in Aboriginal culture as they relate to individuals and communities, specifically in relation to materials with restrictions on access for cultural reasons.

The unit covers Community cultural processes including the need to identify the appropriate persons when approaching a Community and the cultural and social rules associated with that task.

This unit applies to following Aboriginal cultural protocols when coming into contact and working with cultural materials defined as Aboriginal ceremonial secret sacred objects. The unit applies to working with this material on Country and off Country where rules apply to limited access to the material for cultural and ceremonial reasons. This unit is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AHCASW305 Work with Aboriginal ceremonial secret sacred materials

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify cultural authority for ceremony in a particular area or site
- consult effectively with Traditional Owners and relevant Community representatives about the handling, access to and display of cultural material
- observe Aboriginal cultural protocols and follow collection management practices and industry cultural requirements when moving, storing, displaying and maintaining cultural material
- select and use handling, storage and transport systems in accordance with Aboriginal cultural protocols
- create, maintain and store records of the process, guidelines and timeframes for handover of ownership, control and access to secret sacred materials
- use standard industry terminology and Aboriginal names for sites and materials, as appropriate
- apply work health and safety practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- issues that frame the development of cultural protocols
- Community Aboriginal history, cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- ownership relationships for secret, sacred material

- content of contracts and confidentiality agreements applicable to working with ceremonial secret sacred materials
- organisational procedures and guidelines for working with ceremonial secret sacred materials
- Burra Charter guidelines appropriate to working with Aboriginal secret sacred materials
- key concepts of Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to working with ceremonial secret sacred materials.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCASW307 Support the documentation of Aboriginal cultural landscapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to identify and assist with the documentation of an Aboriginal cultural landscape on Country from an Aboriginal perspective.

This unit applies to Aboriginal sites workers who are working with experts to identify and record Aboriginal cultural landscapes on and off Country.

The unit applies to working with lore/law men and women either as an autonomous Sites worker or under the supervision and cultural authority of Traditional Owners and Elders for specific Country and is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify the characteristics of Aboriginal cultural landscapes on Country	1.1 Identify Aboriginal cultural landscapes and associated sites and features of cultural significance 1.2 Determine boundaries and extent of Country 1.3 Apply the concept of lore/law in the land 1.4 Describe Aboriginal cultural landscapes in ecological and archaeological terms, Aboriginal cultural language and spiritual terms, and traditional Aboriginal economic terms 1.5 Identify archaeological evidence of landforms
2. Participate in investigations of cultural and historical records of an Aboriginal cultural landscape	2.1 Identify from relevant databases or websites whether any historical records or previous research is available for the site 2.2 Participate in research activities to determine traditional understanding of the cycle of the seasons and meteorological phenomena, and of landform and vegetation community types in a cultural landscape 2.3 Determine environmental cultural knowledge, cultural connections and relationships with the landscape that are passed down generationally 2.4 Carry out investigations on Country in accordance with safe work policies and procedures, enterprise requirements and Burra Charter guidelines
3. Identify Aboriginal cultural value links to cultural landscapes	3.1 Identify cultural landscapes and determine links with Aboriginal cultural and Community knowledge 3.2 Describe relationships between Creation stories, oral histories, kinship and totemic to the cultural landscape 3.3 Identify gender access, roles and usage as this relates to the cultural landscape 3.4 Identify Aboriginal cultural values in cultural landscapes 3.5 Identify links between archaeological evidence and cultural landscapes 3.6 Identify indicators in the landscape that reveal traditional Aboriginal land management practices

Element	Performance criteria
4. Describe Aboriginal cultural practices and beliefs which maintain cultural connections to cultural landscapes	4.1 Identify appropriate persons within Communities who hold cultural knowledge 4.2 Identify appropriate Cultural Knowledge holders and/or Cultural Manager for an Aboriginal cultural landscape 4.3 Recount the range and interrelationship of Aboriginal beliefs and Aboriginal cultural and ceremonial practices that maintain connection with the cultural landscape 4.4 Document the associations of connection to Country through language, stories, song, dance and art if appropriate according to Community protocols and customs relating to disclosure of knowledge, using archaeological and Aboriginal terminology

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

The candidate must provide evidence that they can:

- discuss Aboriginal cultural landscapes in ecological and archaeological terms, Aboriginal cultural, language and spiritual terms and traditional Aboriginal economic terms
- relate Creation stories, oral histories, kinship and totemic relationships to the cultural landscape
- follow Community guidelines and Aboriginal cultural protocols when using information on sites, objects and cultural landscapes
- identify appropriate cultural authorities for a Community, site, story or Ceremony
- describe the range and interrelationship of Aboriginal cultural and ceremonial practices undertaken to maintain connection with the culture
- use Aboriginal names and archaeological terminology to describe landscapes and cultural connections.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the Community's Aboriginal history and cultural values
- Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- designated cultural areas and features of Country, boundaries and extent of Country
- Aboriginal cultural values of landform types
- archaeological evidence of landform types
- types of land features that have high possibility of cultural heritage being present
- creation stories, oral histories, kinship and totemic relationships to the cultural landscape

- key principles, values and practices of Aboriginal cultural knowledge
- lore/laws, customs and speaking rights
- connection to Country through stories, song, dance and art
- protocols and customs relating to disclosure of knowledge about Country
- key concepts of Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to own role
- key concepts of the Burra Charter.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy the current standards for RTOs.

AHCASW308 Apply cultural significance to Aboriginal sites and landscapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to determine theoretical and practical concepts of cultural significance in relation to Aboriginal cultural sites and landscapes. It uses the Burra Charter as the industry benchmark in assessing significance for culture and heritage work.

This unit applies to those who are working on Country finding Aboriginal sites and working to assess significance in landscapes on Country. The unit applies to working with lore/law men and women either as an autonomous Sites worker or under the supervision and cultural authority of Traditional Owners and Elders for specific Country. This unit is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal-sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCASW302 Relate Aboriginal culture to sites work*

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine cultural significance	1.1 Ensure cultural knowledge holders inform the decision-making process to determine the cultural significance of Aboriginal sites and places 1.2 Acknowledge the determination of Aboriginal people as the primary source, and owners of information about the cultural significance of an Aboriginal site and landscape 1.3 Seek permission from cultural Authority to collect and share cultural knowledge 1.4 Acknowledge and respect traditional knowledge and practices in managing Country and environment 1.5 Determine Aboriginal history and beliefs embedded in a place of cultural significance 1.6 Recognise the embodiment of cultural significance in the place itself, the geographical and geological features, its fabric, artefacts and stone objects, setting, use, associations, meanings, records, related places and related objects
2. Conduct a significance assessment on an Aboriginal site	2.1 Determine the difference between an assessment of cultural significance and a statement of cultural significance 2.2 Consult with colleagues and experts to identify factors that may impact on the assessment and incorporate them into planning work 2.3 Collect information relevant to the assessment of cultural significance in collaboration with relevant experts 2.4 Assess the cultural significance of the site in accordance with the Burra Charter guidelines and legislative requirements 2.5 Prepare a statement of cultural significance consistent with the assessment of cultural significance findings, in collaboration with relevant experts to Community and legislative requirements 2.6 Seek feedback from colleagues on statement of significance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCASW308A Apply cultural significance to Aboriginal-sites and landscapes.

Assessment Requirements for AHCASW308 Apply cultural significance to Aboriginal sites and landscapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate that they can:

- determine theoretical and practical concepts of cultural significance in relation to Aboriginal cultural sites and landscapes
- identify appropriate cultural authorities for a Community, place or for a site
- collaborate with relevant experts to complete an assessment of cultural significance
- adhere to Burra Charter process and guidelines
- identify cultural information, material and expression appropriate to be shared
- identify groups and individuals to be consulted in relation to owners or custodians of cultural and Community knowledge, information and material
- recognise factors that may impact on the assessment, including artefacts and stone objects on site and geological and geographical features of the landscape.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- the role and prominence of the Burra Charter in the culture and heritage sector in Australia
- the Burra Charter definition of significance
- geographic and geological identification features of the cultural landscape
- artefacts and stone objects identification
- key concepts of Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to own role.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy the current standards for RTOs.

AHCASW309 Interpret Aboriginal cultural landscape

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to interpret cultural landscapes from an Aboriginal cultural and spiritual perspective. The unit also covers if and how this knowledge may be collected and provided to others.

This unit applies to individuals who are required to interpret cultural landscapes on Country. The unit applies to working with lore/law men and women either as an autonomous sites worker or under the supervision and cultural authority of Traditional Owners and Elders for specific Country. This unit is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCASW302 Relate Aboriginal culture to sites work

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Investigate cultural knowledge	1.1 Acknowledge the determination of Aboriginal people as the primary source of information about cultural knowledge 1.2 Work with cultural authorities to identify appropriate persons within communities who hold cultural knowledge 1.3 Access cultural knowledge through reference to the appropriate Knowledge Holders or Cultural Manager 1.4 Consult appropriate cultural authorities to obtain approval to be on Country 1.5 Determine boundaries and extent of Country 1.6 Establish ownership rights and intellectual property rights to Aboriginal cultural knowledge 1.7 Establish parameters for access and access restrictions in transferring cultural knowledge and information 1.8 Determine and record key principles, values and practices of Aboriginal cultural knowledge 1.9 Define relationships between cultural knowledge and Country according to Aboriginal cultural protocols 1.10 Determine and record the history of dispossession from Community sources and available resources 1.11 Recount lost connections to Country due to colonisation
2. Acquire information	2.1 Manage movement through Country/park/reserve to minimise disturbance and degradation to the park/reserve and surrounding environments 2.2 Determine the relationships between Aboriginal beliefs, Aboriginal sites, land features, seasons, artefacts, objects and spirituality 2.3 Identify landscape features and sites on Country in accordance with their place and role in Dreaming, Aboriginal spirituality and local cultural practices and ceremony 2.4 Make the association of connection to Country through language, stories, song, dance and art 2.5 Determine the role of lore and customs in matters of land, family, marriage, kinship, totem, clan and obligation 2.6 Use Aboriginal and common names to identify fauna and flora used for food and medicine 2.7 Investigate knowledge of relationships between plants and animals from Aboriginal beliefs, land management and cultural

Element	Performance criteria
	<p>perspectives</p> <p>2.8 Define simple bush tucker food chains relevant to Country and determine relationships to the cultural landscape</p> <p>2.9 Carry out investigations in accordance with work health and safety and environmental sustainability policies and procedures</p> <p>2.10 Document investigation in accordance with Community protocols and permissions, to enterprise standards</p>
3. Relate information on cultural knowledge to others	<p>3.1 Seek permissions from cultural authorities, relevant individuals and organisations for access, use and documentation of Aboriginal cultural information and material</p> <p>3.2 Provide information on Aboriginal cultural knowledge to those who are authorised to possess that knowledge according to Community guidelines and Aboriginal cultural protocols</p> <p>3.3 Relate information on cultural knowledge in an appropriate format and medium according to Community guidelines and cultural protocols</p> <p>3.4 Refer requests for disclosure of information on Aboriginal cultural sites, landscapes and cultural material that infringes intellectual property rights of a group or Community to appropriate persons</p> <p>3.5 Decline requests for disclosure of information on aspects of cultural knowledge by unauthorised individuals</p>

Assessment Requirements for AHCASW309 Interpret Aboriginal cultural landscape

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret cultural landscapes from an Aboriginal cultural and spiritual perspective
- identify details of plant and animal species on Country, their Aboriginal names and their roles and place in the cultural landscape
- collate information on Aboriginal culture and history for Country in culturally appropriate ways
- collect and use information according to Community guidelines and cultural protocols
- follow community lore/laws, customs on accessing and sharing cultural knowledge
- identify landscape features and sites on Country in accordance with their place and role in Dreaming, Aboriginal spirituality and local cultural practices and ceremony
- use Aboriginal names and standard industry terminology appropriate to the task
- apply work health and safety practices in the context of own work
- apply appropriate sustainability practices to minimise disturbance and degradation to park or reserve and surrounding environments.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Aboriginal history, cultural values and interpersonal and Community protocols associated with area
- Aboriginal cultural customs and heritage related to area
- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- designated cultural areas and features of Country, boundaries and extent of Country
- key principles, values and practices of Aboriginal cultural knowledge

- connection to Country through stories, song, dance and art
- role of Community lore and customs in matters of land, family, marriage, kinship, totem, clan and obligation
- protocols and customs relating to disclosure of knowledge about Country
- when and how to relate and document information and when it is not appropriate according to cultural protocols
- Aboriginal names for plants, animals and landscape features
- cultural knowledge about plant and animals relating to a particular Community, group or region
- role and rights of Indigenous people in maintaining and controlling cultural knowledge
- individuals who are authorised to possess cultural knowledge.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

AHCASW310 Move and store Aboriginal cultural material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to handle, pack and unpack Aboriginal cultural material for movement and storage.

This unit applies particularly to working around and with Aboriginal cultural materials and objects and focuses on the specific cultural and consultative requirements for sourcing, handling, and possibly interpreting Aboriginal cultural material. This unit is also applicable to the work of repatriation workers and anthropologists.

This unit applies to all Aboriginal sites workers. However, cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source Aboriginal cultural material	1.1 Confirm traditional ownership of cultural material 1.2 Consult with the appropriate traditional custodians and Community to determine suitable keeping places for cultural materials 1.3 Work with cultural authorities to identify appropriate persons within Community who hold cultural knowledge relevant to establishing any restrictions on access to materials 1.4 Seek permission and advice for being on site and using cultural material according to Aboriginal cultural protocols 1.5 Locate and identify cultural material and objects and assess material's suitability for moving 1.6 Complete records according to cultural protocols 1.7 Identify issues and follow protocols in relation to the return of cultural material to local Aboriginal Community
2. Determine movement and storage requirements	2.1 Implement legislative and work health and safety requirements 2.2 Assess and document the scope of work required for movement and storage of cultural material 2.3 Identify and confirm organisational procedures and guidelines and specific requirements for moving and storing cultural material with relevant personnel 2.4 Determine future storage requirements with relevant personnel 2.5 Assess and arrange the need for specialist expertise
3. Handle and transfer Aboriginal cultural material	3.1 Identify, move, store, maintain and return cultural material according to Aboriginal cultural requirements 3.2 Record details of material requiring repair or attention and take action within scope of own job role or refer to relevant personnel as required 3.3 Communicate specific Aboriginal cultural requirements to colleagues 3.4 Select and use appropriate handling and moving equipment 3.5 Handle cultural material in a manner that protects individual items and assists efficient loading and unloading processes 3.6 Prepare transportation documentation 3.7 Transfer Aboriginal cultural material to approved location 3.8 Use techniques for moving material that minimise environmental disturbance and degradation, where appropriate

Element	Performance criteria
4. Store cultural material according to Aboriginal cultural requirements	4.1 Install, position or store cultural material as required 4.2 Ensure specific storage needs of cultural material are based on knowledge of requirements for different types of materials 4.3 Clear and clean work areas according to organisational procedures 4.4 Maintain storage records according to organisational policies and procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCASW310 Move and store Aboriginal cultural material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate cultural authorities for a Community, place or site
- consult effectively with Traditional Owners, Cultural Managers and relevant Community representatives about the handling, access to and display of cultural material
- handle, move and store cultural materials according to cultural protocols
- seek permissions from cultural authorities for being on site and handling, moving, storing and recording cultural material, according to Community protocols
- observe Aboriginal cultural protocols, follow collection management practices and industry requirements when moving, storing, displaying and maintaining cultural material
- record details of transporting and storing of cultural material
- report damage or faults with cultural material to appropriate persons
- select and use handling, storage and transport equipment
- apply work health and safety practices in the context of own work
- apply appropriate sustainability practices to minimise environmental disturbance and degradation when moving cultural objects from Aboriginal sites.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- cultural authority for ceremony on the site
- ownership relationships for secret, sacred material
- record-keeping techniques
- organisational procedures and guidelines.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy the current standards for RTOs.

Assessment Requirements for AHCASW312 Maintain an Aboriginal cultural site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate cultural authorities for a Community, place or for a cultural site
- consult with appropriate cultural authorities and obtain informed approval for works and access of specific persons
- assess the level of work required to maintain the cultural place
- carry out maintenance activities in accordance with organisational, environmental sustainability and Aboriginal cultural requirements
- report deterioration or damage to place according to Community protocols and requirements
- report incidents of breaches of legislation including vandalism
- determine the cultural rights and responsibilities when using Community knowledge, information and material
- apply work health and safety practices in the context of own work
- ensure sustainability practices are applied by all workers and contractors on site to minimise environmental degradation and deterioration of site.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- workplace health and safety requirements and responsibilities of own role
- sustainable environmental practices applicable to maintaining site
- traditional and Western modern techniques of site protection appropriate to the site
- range of maintenance works undertaken on cultural sites
- enterprise procedures for reporting deterioration or damage to place or reporting incidents
- site recording systems used by the enterprise or Community

- relevant archaeological practices and procedures
- Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to maintenance of an Aboriginal site.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy the current standards for RTOs.

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Aboriginal Sites Work (ASW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify, communicate and consult with key stakeholders	<p>1.1 Work with cultural authorities to identify appropriate persons within Communities who hold cultural knowledge relevant to determining the cultural significance of Aboriginal places and heritage</p> <p>1.2 Develop and implement communication and consultation systems that place Aboriginal cultural protocols and values at the forefront and accommodate stakeholder concerns and interests</p> <p>1.3 Confirm traditional ownership of Aboriginal sites, cultural material, and objects</p> <p>1.4 Ensure approval and permissions are obtained from relevant Traditional Owners and Cultural managers for work to be carried out and for access to the Aboriginal site for the specific persons who will conduct work</p> <p>1.5 Complete any necessary submissions for conducting Aboriginal cultural sites surveys</p> <p>1.6 Develop working relationships with key stakeholders that assist in the management of culturally significant places</p> <p>1.7 Scope and document client needs for deliverables required in a formal sites survey report</p> <p>1.8 Manage planning and assessment processes, ensuring they are in accordance with the Burra Charter process and other existing industry guidelines and legislation</p>
2. Manage collection of initial site data	<p>2.1 Source and verify site plans and maps including topographical maps</p> <p>2.2 Identify and acquire required resources</p> <p>2.3 Prepare a base plan of the site</p> <p>2.4 Undertake site orientation and define and verify location, geographic and operational boundaries</p> <p>2.5 Identify and record current land use and environmental problems and threats</p> <p>2.6 Identify and record covenants that could affect the site or report</p> <p>2.7 Ascertain climate and weather conditions from historical data</p>
3. Compile a site inventory	<p>3.1 Categorise and record site context, location and site information data</p> <p>3.2 Categorise and record features data</p> <p>3.3 Identify and record cultural material, objects, properties and relevant physical characteristics on site inventory according to</p>

Element	Performance criteria
	<p>archaeological or scientific protocols</p> <p>3.4 Undertake relevant field research in accordance with safe work policies and procedures</p> <p>3.5 Implement appropriate techniques and tools and relevant archaeological practices and procedures</p> <p>3.6 Locate structural elements and confirm existing services and facilities</p> <p>3.7 Record the presence, location and/or extent of other relevant site constraints</p> <p>3.8 Develop limits of acceptable change in the forms of deterioration and damage to the places of cultural significance to legislative and enterprise requirements</p>
4. Review, assess and record the site data	<p>4.1 Engage relevant expertise and consultant services when required</p> <p>4.2 Conduct an assessment of cultural significance</p> <p>4.3 Document a statement of cultural significance</p>
5. Determine the impact of threats to the site	<p>5.1 Identify threats to culturally significant places, both external and internal to the area under consideration</p> <p>5.2 Undertake a risk assessment of all threats to determine potential impact on sites and associated cultural landscape</p> <p>5.3 Develop and implement risk management strategies and protection/conservation measures to control risks</p> <p>5.4 Develop and document a risk management report that incorporates an impact analysis</p> <p>5.5 Document policy changes required to address the threats</p>
6. Document a site survey report	<p>6.1 Document site information into a site assessment report or site survey report</p> <p>6.2 Incorporate all relevant data from the site assessment into assessment report in line with client needs and the requirements of relevant legislation and regulations</p> <p>6.3 Provide and record specific recommendations for remedial action of site conservation and mitigation of site problems</p> <p>6.4 Formulate and document recommendations for appropriate risk controls of site hazards</p> <p>6.5 Store and maintain survey and assessment data as part of professional practice</p> <p>6.6 Inform and advise client-stakeholder of the content and implications of the report and present a copy</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCASW501A Survey and report on Aboriginal cultural sites.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCASW501 Survey and report on Aboriginal cultural sites

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate Aboriginal cultural authorities for a Community, place or site
- identify key stakeholders to be consulted in relation to owners and custodians of cultural and Community knowledge, information or material and cultural significance
- develop and implement consultation processes
- survey and assess Aboriginal cultural sites using appropriate techniques, tools and relevant archaeological practices
- incorporate the cultural significance, heritage values and conservation issues of an Aboriginal cultural site into report documentation
- identify threats and develop controls to mitigate and manage the risk of deterioration, damaging incidents or loss of cultural integrity
- prepare a site survey report to meet Community and enterprise needs
- complete submissions required to carry out a site survey
- observe Aboriginal cultural protocols in dealing with stakeholders and land managers.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- authentic and authoritative sources for Aboriginal cultural information, material and expression able to be accessed and shared
- site survey techniques, procedures and processes
- archaeological and scientific research techniques relevant to survey Aboriginal cultural site
- monitoring of site including fabric deterioration, damage and likely causes of deterioration and damage

- cultural rights and responsibilities when using Community knowledge, information and material
- general understanding of impacts of natural resources, such as geological settings, ecological processes, and interaction between natural and cultural processes
- provisions in the Australian Natural Heritage Charter and the Burra Charter and Guidelines and how they relate to surveying and reporting on Aboriginal sites
- design and methodology of consultation processes
- policy analysis and development of impact statements
- the range of conservation strategies for cultural areas
- data submission systems and reporting requirements
- components of Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to surveying Aboriginal cultural sites.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy the current standards for RTOs.

AHCBAC101 Support agricultural crop work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide support to others undertaking agricultural cropping activities.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work alongside a supervisor and undertake defined routine activities. They exercise limited autonomy and identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for	1.1 Identify the materials, tools and equipment required according to

Element	Performance criteria
agricultural crop work	lists provided or supervisor's instructions 1.2 Conduct checks on all materials, tools and equipment and report any insufficient or faulty items to the supervisor 1.3 Load and unload materials using correct manual handling techniques to minimise damage to the load and the vehicle 1.4 Select and check suitable personal protective equipment 1.5 Identify hazards in agricultural crop work and report to the supervisor 1.6 Apply enterprise work health and safety policies to crop work
2. Undertake agricultural crop work as directed	2.1 Follow instructions and directions provided by supervisor and seek clarification when necessary 2.2 Perform cropping work in a safe and environmentally appropriate manner according to enterprise guidelines 2.3 Communicate with other staff and customers in a positive and professional manner 2.4 Report problems or difficulties in completing work to required standards or timelines to supervisor
3. Handle materials and equipment	3.1 Follow supervisor's instructions to store waste material produced during cropping work in a designated area 3.2 Handle and transport materials, equipment and machinery appropriately 3.3 Maintain a clean and safe work site
4. Clean up on completion of cropping work	4.1 Store or dispose of materials according to supervisor's instructions 4.2 Clean, maintain and store tools and equipment according to manufacturer's specifications and supervisor's instructions 4.3 Apply enterprise biosecurity policies 4.4 Report work outcomes to the supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBC101A Support agricultural crop work.

Assessment Requirements for AHCBAC101 Support agricultural crop work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare tools and equipment
- demonstrate crop support activities
- handle basic materials and equipment
- follow work instructions
- clean up after work activities
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work
- follow enterprise sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- safety procedures
- materials, tools and equipment for cropping work
- undertaking of work as directed
- handling of materials and equipment
- procedures for cleaning up on completion of work.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBC201 Assist agricultural crop establishment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate with supervisor and team members
- carry out ground preparation of the area for planting
- read and follow planting plan
- apply pre-planting soil treatments
- calibrate the planting equipment
- treat and plant seed
- apply fertiliser with seed at sowing or as a separate operation
- apply herbicides under supervision
- record all details of sowing
- operate a range of crop establishment machinery
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- importance of correct timing and procedures for crop planting
- field hygiene and quality control in regard to crop establishment
- a range of pre-planting soil treatments and their importance
- methods of waste disposal causing minimal impact on the environment
- hazards and follow safety directions
- communication with team members and supervisor
- equipment calibration

- measurement of quantities of treatment
- determination of spacing's and planting patterns
- machinery operation to manufacturers specifications and enterprise procedures
- safe application of appropriate agricultural chemicals
- enterprise work health and safety and biosecurity polices.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBC202 Assist agricultural crop maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare machinery, equipment and tools to maintain crops
- conduct scheduled routine checks on machinery and vehicles for oil levels, tyre pressures, water levels and greasing points
- assist with cropping duties including weed control, pest and disease control, crop nutrition and paddock maintenance
- report the presence of weeds, pests and disease in crops
- record the details of crop maintenance
- identify hazards and follow safety directions at work
- read and interpret a range of workplace information
- calibrate equipment
- measure quantities of treatment
- operate machinery to manufacturer's specifications and enterprise procedures
- safely apply under supervision appropriate agricultural chemicals in weed and pest control programs
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- operations of a range of cropping machinery
- importance of correct timing and procedures for crop maintenance
- weed control in crops

- pest and disease control
- crop nutrition
- methods of waste disposal causing minimal impact on the environment
- enterprise work health and safety and biosecurity policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBC203 Assist agricultural crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- communicate with supervisor
- calibrate equipment
- measure quantities of treatment
- operate machinery to manufacturer's specifications and enterprise procedures
- prepare harvesting machinery and equipment to harvest crops
- operate vehicles and machinery safely and as directed to support the harvesting team
- carry out routine checks and refuelling of harvesting vehicles and machinery
- dispose of waste liquids and harvest debris according to environmental procedures
- record information as requested
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- harvesting machinery operation and equipment basic maintenance
- harvesting machinery and equipment servicing
- hazard identification and safe work practices in harvesting
- types of crops and their characteristics
- crop hygiene requirements
- enterprise work health and safety and biosecurity policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBC204 Prepare grain storages

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to safely prepare storages, surrounding areas and equipment in readiness for receiving grain at an acceptable level of hygiene. This unit applies to workers in specialist grain storages or on grain farms.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all work in confined spaces must comply with state and federal legislation requirements.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to work in bulk material storage area	1.1 Follow the work program and clarify with supervisor 1.2 Identify work health and safety hazards in grain storage and report to supervisor and implement suitable controls 1.3 Select, use and maintain suitable personal protective equipment 1.4 Select, prepare and maintain appropriate equipment and tools
2. Prepare storage area	2.1 Clean the storage site of weeds, dust and spillage appropriately 2.2 Dispose refuse appropriately 2.3 Prepare and maintain the storage site appropriately
3. Prepare storages	3.1 Clean bulk material storages appropriately of all residues 3.2 Check bulk material storages for structural safety, damage or deterioration, and repaired or reported appropriately 3.3 Prepare and erect temporary storages appropriately
4. Prepare bulk material handling machinery	4.1 Clean bulk material handling machinery appropriately to be free of contamination and residues 4.2 Assist in the adjustment and setting bulk material handling equipment appropriately 4.3 Prepare bulk material handling equipment according to manufacturer's instructions and enterprise requirements
5. Complete maintenance operation	5.1 Record workplace information 5.2 Dispose of all waste and debris according to enterprise policies and minimising the impact on the environment 5.3 Clean and store tools and equipment appropriately 5.4 Apply enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBC204A Prepare grain storages.

Assessment Requirements for AHCBC204 Prepare grain storages

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe work procedures
- erect simple temporary bulk material storages
- check equipment and storage facilities, and identify current or impending faults
- perform pre-operational checks and routine safety, service and maintenance procedures on tools, equipment and machinery
- operate hand and independently powered tools and cleaning equipment to industry standards
- clean, secure and store machinery and equipment
- handle hazardous substances (fuels) safely
- read and interpret manufacturer's specifications, work and maintenance programs, and Safety Data Sheets (SDS)
- prepare the storage area for access by grain carriers
- prepare grain storages by removing all residues and checking structure
- work in confined spaces in accordance with State/Territory legislation, where required
- prepare and test grain handling machinery
- communicate with supervisor
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- range of construction methods, potential hazards, safety and structural requirements for storage

- erection and dismantling for types of temporary storage used by organisation
- organisation and commodity quality requirements for grain storage
- grain storage hygiene requirements
- typical signs of structural damage to be documented and reported
- pre-operational and safety checks, servicing and maintenance procedures for tools and equipment
- machinery maintenance procedures and operating principles
- machinery and equipment cleaning, storage and protection methods
- appropriate action in contingency situations
- organisation requirements for protective equipment and safe practices in relation to work health and safety
- State/Territory legislation in respect to working in confined spaces
- potential hazards associated with the operation of basic tools and equipment
- regulations and codes of practice with regard to work health and safety, environment and the use and control of machinery and equipment
- personal protective clothing and equipment and when and how it should be used
- organisational recording and reporting procedures.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBC301 Conserve forage

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conserve forage. This includes controlling risks associated with conservation of forage activities such as risk of fire from moisture content creating excessive temperature of hay stacks, potential contact with overhead power lines and exposure to noise and dust.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices. All machinery is operated to manufacturer's specifications.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria

Assessment Requirements for AHCBC301 Conserve forage

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare paddocks for forage conservation
- apply forage conservation methods
- harvest, prepare and store forage
- record work activities
- interpret and implement forage conservation requirements
- operate and maintain forage harvesting equipment
- assess risks and implement work health and safety procedures for forage conservation
- correct use of technology to improve efficiency
- perform harvesting operations
- follow enterprise workplace health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work
- follow enterprise sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- silage and hay conservation systems and methods
- factors affecting the quality of silage and hay
- dry matter content, quality and hygiene requirements
- range and functions of silage and haymaking machinery and equipment
- common weeds, pests and diseases associated with crops and pastures
- role of technology in improving efficiency
- types and application of personal protective equipment

- legislation and regulations including licensing requirements in relation to forage operations
- risks associated with conservation of forage activities including risk of fire from moisture content creating excessive temperature of hay stacks; potential contact with overhead power lines; and exposure to noise and dust
- risk factors including animal health and weather
- environmental risks and impacts of forage conservation.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBC302 Establish pastures and crops for livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish pastures and crops for livestock production.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for pasture and crop establishment	1.1 Confirm the pasture and crop establishment program with supervisor 1.2 Conduct pre-treatment (including inoculation) of seed prior to sowing where required 1.3 Select appropriate sowing methods for crop and pasture species 1.4 Apply appropriate fertilisers 1.5 Select and operate machinery and equipment appropriately 1.6 Identify work health and safety hazards in crop and pasture establishment and assess risks
2. Implement pasture and crop establishment program	2.1 Implement work health and safety controls for crop and pasture establishment 2.2 Prepare machinery and equipment for sowing 2.3 Calibrate seeding and fertilising equipment 2.4 Conduct pasture and crop sowing appropriately 2.5 Ensure efficient performance of sowing operations including the use of technology where appropriate 2.6 Apply appropriate fertilisers and pesticides
3. Implement grazing strategies during establishment	3.1 Use livestock to conduct stubble and fallow weed control as part of an integrated pest management program where appropriate. 3.2 Use livestock to conduct stubble, ground cover, competition or weed control during establishment. 3.3 Implement appropriate controlled grazing of crops and pastures during pasture and crop establishment 3.4 Implement appropriate grazing management according to sustainable land management practices

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBC302A Establish pastures and crops for livestock production

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCBC302 Establish pastures and crops for livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- operate machinery and equipment
- calibrate boom spray and drill and fertiliser spreader
- identify pests and diseases
- identify pasture and crop species (both seed and seedlings)
- identify and control weeds
- handle chemicals safely
- mix and inoculate seed
- interpret and implement crop and pasture production plans
- assess existing pastures and crops to maximise livestock production
- sow and monitor new pastures and crops
- select pasture species, sowing method and application appropriate for optimal yield
- manage grazing systems including weed and stubble control
- control pests and weeds without damage to the crop or pasture
- demonstrate correct use of technology to improve efficiency
- follow enterprise work health and safety policies
- follow enterprise sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of grasses, legumes and crops
- types of seed inoculants and fertilizers
- seed and fertilizer placement for optimal germination and growth

- integrated weed control including chemical application, cultural practices and grazing management
- safe use of chemicals and machinery
- role of technology in improving efficiency
- advantages and disadvantages of pasture and crop establishment programs
- timing of pasture and crop establishment
- enterprise work health and safety policies
- procedures for minimising environmental impacts.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCBA303 Prepare to receive grains and seeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare to test grains and seeds at receival facilities.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to work	1.1 Identify and report on work health and safety hazards and risks in grain handling to supervisor 1.2 Select and use appropriate personal protective equipment 1.3 Follow enterprise work health and safety policies
2. Maintain hygiene in receival storage facilities	2.1 Clean and inspect receival and storage areas 2.2 Ensure receival area is free from potential contaminants 2.3 Inspect facilities and identify and report items that require maintenance or repair
3. Prepare testing equipment for use	3.1 Assemble testing equipment manufacturers instructions 3.2 Check equipment calibration and arrange for recalibration if required 3.3 Inspect testing equipment and identify and report items requiring maintenance or repair 3.4 Clean testing equipment and ensure it is free from residue
4. Prepare to provide service to growers or suppliers	4.1 Collate all documentation and information including conflict and dispute resolution procedures 4.2 Record information on receival and store all documents and data appropriately
5. Prepare for storage of grains and seed	5.1 Confirm arrangements for appropriate segregation of grain and seed 5.2 Confirm site transfer arrangements 5.3 Inspect conveying equipment and identify and report any items requiring maintenance or repair 5.4 Apply enterprise biosecurity policies as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBC303A Prepare to receive grains/seeds.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCBA303 Prepare to receive grains and seeds

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and assess risks in grain/seed receival area
- operate and maintain of grain/seed testing equipment
- inspect and clean receival and storage areas and equipment
- source grower/supplier information
- identify grain/seed types
- use personal protective equipment
- identify defects such as split grains/seeds, undersize, chaff, weed seeds
- prepare the site and maintain hygiene
- prepare testing equipment
- liaise with growers and/or contractors
- maintain segregation of grains/seeds and arrange storage
- follow work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- grain/seed receival processes and industry practice
- calibration requirements for testing equipment
- types of testing equipment such as protein, oil content, moisture etc
- requirements for segregation, traceability and hygiene
- impact of residues including chemical
- seed and grain industry grains receival standards and quality assurance requirements

- legislation, regulations and policies for Work Health and Safety and biosecurity
- segregation strategies/methods
- conflict and dispute resolution.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA304 Test grains and seeds on receipt

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to test grains and seeds on receipt.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare sampling and testing equipment for	1.1 Clean, maintain, test and calibrate testing and sampling

Element	Performance criteria
use	instruments appropriately 1.2 Identify and report repairs and maintenance of sampling and testing equipment 1.3 Identify work health and safety hazards in grain testing and assess risks
2 Identify grains on receipt	2.1 Inspect load to confirm commodity type and determine presence of contaminants 2.2 Record supplier information
3. Collect grains samples for testing	3.1 Follow sampling protocols and conduct appropriate sampling 3.2 Apply appropriate processes to prevent mixing or contamination of samples 3.3 Prepare samples for testing 3.4 Collect and maintain appropriate sample information records
4 Perform initial tests on samples	4.1 Follow handling procedures to prevent mixing or contamination of samples 4.2 Operate testing equipment to perform required tests in accordance with manufacturer's instructions, enterprise and industry practice 4.3 Record results of initial testing appropriately 4.4 Use visual recognition and industry reference material to determine the level of defects and contaminants 4.5 Compare test results with specifications to determine the grade or reject the sample 4.6 Observe appropriate policies and procedures with regard to rejection of product
5 Despatch samples to testing facilities	5.1 Pack and label samples appropriately 5.2 Prepare appropriate records of testing requirements 5.3 Despatch samples to testing facility
6. Prepare for storage of grains and seed	6.1 Conduct appropriate segregation arrangements of grain and seed 6.2 Complete required site transfer arrangements 6.3 Inspect conveying equipment and identify and report items requiring maintenance or repair 6.4 Apply enterprise biosecurity policies as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA304A Test grains and seeds on receipt.

Assessment Requirements for AHCBA304 Test grains and seeds on receipt

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and implement safe operating procedures
- identify grain and seed types
- take consistent samples
- identify defects such as split grains and seeds, undersize, chaff, weed seeds, damage
- read and interpret commodity standards
- store and dispatch grains and seeds samples and maintain hygiene
- conduct sampling and initial testing
- operate electronic and non-electronic testing equipment
- record samples for further testing
- communicate with customers and maintain records
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- safe operating procedures for handling and storing grain
- grain/seed testing processes
- industry standards and codes of practice
- testing parameters for grains such as protein, weight, oil content, moisture, defects, sprouts etc
- testing parameters for seed such as genetic purity, cultivar, dead, abnormal and hard seed, germination potential, foreign matter

- analysis and consequence of test result
- segregation strategies/methods, traceability and hygiene
- impact of residues including chemical
- industry practice, standards and quality assurance requirements in relation to grains sampling and testing
- workplace health and safety, company, industry and regulatory requirements
- sampling and testing protocols
- enterprise biosecurity policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBC305 Undertake preparation of land for agricultural crop production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare land for agricultural crop production.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for cultivation	1.1 Confirm work requirements from the planting plan with supervisor 1.2 Confirm the identified method and order of cultivation from the planting plan with supervisor 1.3 Identify work health and safety hazards in land preparation and assess risks implement suitable controls 1.4 Select, use and maintain appropriate personal protective equipment
2. Prepare the cultivating equipment	2.1 Confirm appropriate vehicles and equipment required for site cultivation with supervisor and select according to the planting plan 2.2 Confirm that vehicles and equipment are serviced and check that worn parts are replaced and vehicles are adjusted for the conditions 2.3 Dispose of all containers, leftover fluids, waste and debris from the maintenance and servicing work appropriately 2.4 Record all maintenance and servicing appropriately
3. Cultivate soil	3.1 Implement appropriate work health and safety controls 3.2 Carry out removal of previous crop or land clearance debris and incorporate or burn appropriately 3.3 Follow the cultivation plan and complete for each paddock 3.4 Select, use and maintain appropriate personal protective equipment 3.5 Operate vehicles and equipment appropriately 3.6 Apply technology to ensure most efficient performance of operations 3.7 Check and adjust vehicles and equipment regularly 3.8 Confirm the timelines, resource and quality requirements of the planting plan
4. Prepare site for planting	4.1 Complete the planting layout and soil profiles to the planting plan 4.2 Conduct identified weed and pest control measures 4.3 Apply fertilisers, ameliorants, or other pre-planting treatments appropriately 4.4 Confirm the environmental implications of site preparation with supervisor and take identified action
5. Complete land preparation operations	5.1 Clean and store vehicles and equipment appropriately 5.2 Dispose of all containers, leftover fluids, waste and debris according to enterprise policies and minimising the impact on the environment 5.3 Complete all required records and documentation organisational

Element	Performance criteria
	requirements 5.4 Apply enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBC305A Undertake preparation of land for agricultural crop production.

Assessment Requirements for AHCBC305 Undertake preparation of land for agricultural crop production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret production and planting plans, produce standards, quality specifications and work procedure documents
- measure materials and site plan specifications
- operate, adjust and calibrate cultivation equipment safely
- complete pre- and post-operational checks on tools, vehicles and equipment
- perform routine safety, service and maintenance procedures on tools, cultivator and equipment
- demonstrate correct use of technology to improve efficiency
- read and interpret manufacturer specifications, work and maintenance plans, and Safety Data Sheets (SDS)
- communicate effectively with supervisor
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work
- follow enterprise sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- methods of cultivating a range of soil types
- environmental issues of cultivating soil for planting, such as drainage and irrigation systems, soil amelioration and waste disposal procedures
- a range of pre-planting treatments, their purpose and method of application
- operation and maintenance of planting equipment
- role of technology in improving efficiency

- work health and safety guidelines, procedures and principles, including manual handling and exposure to hazardous substances
- enterprise biosecurity and sustainability policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBAC306 Establish agricultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish agricultural crops.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

Operating machinery carries risk and candidates should observe all enterprise and manufacturer's requirements.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare machinery and equipment for use	1.1 Select and prepare appropriate machinery and equipment for the work plan 1.2 Attached and calibrate equipment appropriately 1.3 Identify work health and safety hazards in crop establishment, assess risks and implement controls in line with enterprise policies
2. Prepare for agricultural crop establishment	2.1 Monitor soil and weather conditions 2.2 Follow soil conservation and sustainable land management practices and procedures 2.3 Confirm soil test results and identify appropriate soil amendments 2.4 Confirm seeding, fertiliser, and pest and weed control requirements against the work plan and prepare appropriately 2.5 Prepare contingency plans for unusual seasonal conditions
3. Sow the crop	3.1 Implement work health and safety controls for crop establishment 3.2 Follow the work plan to conduct seeding and fertiliser applications 3.3 Apply technology to ensure most efficient performance of operations 3.4 Coordinate pest and weed control treatment with seeding and fertiliser applications as required 3.5 Identify environmental implications associated with sowing operations, assess impacts and implement appropriate procedures
4. Complete seeding operations	4.1 Maintain seeding, machinery and equipment operation records appropriately 4.2 Report machinery and equipment damage, malfunctions or irregular performance appropriately 4.3 Clean, secure and store machinery and equipment in line with manufacturer specifications and enterprise requirements 4.4 Apply enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBAC306A Establish agricultural crops

Assessment Requirements for AHCBA306 Establish agricultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- sow seed and apply fertiliser at the required placement and rate
- identify types of weeds and insects harmful to crop establishment
- perform pre-operational and safety checks, servicing and maintenance on machinery and equipment
- calibrate, operate machinery and attach/detach equipment
- demonstrate emergency operating procedures in normal and adverse conditions
- recognise and report machinery damage, faults or malfunctions and perform minor repairs
- demonstrate safe, environmentally responsible and sustainable land management practices
- monitor and minimise impacts to the environment associated with sowing operations
- correct use of technology to improve efficiency
- read and interpret manufacturer specifications, work and maintenance plans, and MSDS
- obtain relevant licences and permits
- clean, secure and store machinery and equipment
- record and report equipment faults, workplace hazards and accidents
- assess and calculate the application of fertiliser/pesticide requirements and application rates
- calibrate equipment and calculate volumes, consumption and servicing requirements
- prepare and service machinery and equipment
- carry out tillage and apply pre-planting treatments
- carry out sowing operation and fertiliser application
- monitor the environmental impacts of establishing the crop
- clean, secure and store machinery and equipment

- keep records of the sowing operation
- follow enterprise work health and safety policies in the context of own work
- follow sustainability practices in the context of own work
- follow enterprise biosecurity policies in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- crop types, preparation of seeds, seeding methods and application techniques
- fertiliser types, rates of application and crop nutrient requirements
- effects of weather conditions (normal and adverse) on seeding and fertilising applications
- operating principles and operating methods for machinery and equipment
- pre-operational and safety checks, servicing and maintenance procedures for seeding machinery and equipment
- principles of weight distribution with regard to load shifting and vehicle movement
- role of technology in improving efficiency
- sustainable land management and soil conservation techniques
- positive environmental practices, negative environmental impacts and minimisation measures associated with seeding operations
- procedures for cleaning, securing and storing machinery, equipment and materials
- enterprise policies with regard to seeding operations, and recording and reporting routines
- relevant state/territory legislation, regulations and codes of practice with regard to workplace health and safety and the use and control of pesticides and fertilizers
- Personal Protective Equipment and when and how it should be used
- relevant state/territory legislation and regulations with regard to licensing requirements and the use and control of machinery and equipment
- enterprise biosecurity and sustainability policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBAC307 Maintain agricultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain agricultural crops.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

Operating machinery carries risk and candidates should observe all enterprise and manufacturer's requirements.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor & assess agricultural crop condition, growth and requirements	1.1 Monitor crop health regularly and record observations 1.2 Report deviation from expected growth and vigour 1.3 Identify, monitor and report weeds, pests and diseases 1.4 Follow directions to establish sites for regular measurement of soil moisture 1.5 Measure moisture levels and calculate soil water percentage using soil probe 1.6 Report observations of crop ripening to manager to determine the timing of harvest
2. Undertake crop health operations	2.1 Identify hazards and implement appropriate controls 2.2 Select, use and maintain appropriate personal protective equipment 2.3 Follow label instructions and any specialist advice 2.4 Apply specialist sprays appropriately for growth stages 2.5 Apply technology to ensure most efficient performance of operations 2.6 Conduct any required chipping or spot spraying 2.7 Assess, record and report crop growth stages and keys 2.8 Apply water as required 2.9 Consider adverse environmental impacts when performing all applications
3. Complete cleaning and hygiene operations	3.1 Clean and maintain equipment appropriately 3.2 Dispose of all containers, leftover fluids, waste and debris from the maintenance and servicing work according to enterprise policies and minimising the impact on the environment 3.3 Complete all required records and documentation appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA307A Maintain agricultural crops.

Links

Assessment Requirements for AHCBA307 Maintain agricultural crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- detect differences and variations in crop growth
- report/communicate such differences to the supervisor/farm owner
- observe and report on health and growth of the crop
- monitor pests and disease in crops
- assess crop maturity
- apply sprays and fertilizers as directed
- measure soil moisture and relate data to crop requirements
- apply technology to ensure most efficient performance of operations
- follow enterprise work health and safety policies in the context of own work
- follow sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate legislative requirements, manufacturer's instructions and organisation procedures/instructions
- potential hazards associated with the operation of basic tools and equipment
- general machine maintenance procedures
- machinery operating principles and safe operating methods
- environmental impacts associated with the operation of machinery and equipment in a harvesting context
- organisation recording and reporting procedures
- symptoms of crop lacking health and vigour

- signs of pest and disease infestation, moisture stress and nutrient deficiencies
- hygiene requirements for agricultural crops and equipment that comes into contact with the crop
- types and uses of herbicides, insecticides and other pesticides and alternative pest control methods (non-chemical)
- role of technology in improving efficiency
- work health and safety and pesticides legislative and enterprise policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA308 Undertake agricultural crop harvesting activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to undertake agricultural crop harvesting activities.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

Operating machinery carries risk and candidates should observe all enterprise and manufacturer's requirements.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to harvest agricultural crops	1.1 Determine requirements for the work to be undertaken, method and order of harvesting from the harvest strategy and confirm with supervisor 1.2 Identify work health and safety hazards in crop harvesting and assess risks 1.3 Select and maintain appropriate personal protective equipment 1.4 Identify environmental impacts of harvesting the crop and take required action 1.5 Complete windrowing or swathing appropriately 1.6 Sample crop for moisture content and report to supervisor to assess timing of harvest 1.7 Identify hygiene standards for the crop and the paddock from the harvest strategy or the crop storage plan
2. Prepare the harvesting equipment	2.1 Clean harvesting machinery and other equipment appropriately 2.2 Assess and service all machinery and equipment, replace required parts and adjust for harvesting conditions 2.3 Dispose of all containers, leftover fluids, waste and debris from the maintenance and servicing work appropriately 2.4 Record all maintenance and servicing activities appropriately
3. Harvest crops	3.1 Implement work health and safety controls for crop harvesting 3.2 Follow and complete the harvest strategy for each paddock, including implementing fire prevention measures 3.3 Operate harvesting machinery and ancillary equipment appropriately and to suit crop conditions 3.4 Apply technology to ensure most efficient performance of operations 3.5 Maintain the hygiene of all surfaces that come into contact with the crop 3.6 Check regularly and adjust harvester and ancillary equipment where required
4. Complete harvesting operations	4.1 Clean and store equipment, attachments and other ancillary equipment appropriately 4.2 Apply any required insecticides appropriately 4.3 Dispose of all containers, leftover fluids, waste and debris according to enterprise policies and minimising the impact on the environment

Element	Performance criteria
	4.4 Move harvesting equipment is moved between sites and on public roads appropriately 4.5 Complete all required records and documentation appropriately 4.6 Apply enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA308A Undertake agricultural crop harvesting activities.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBA308 Undertake agricultural crop harvesting activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle and manoeuvre harvesting equipment
- operate crop harvesting machinery and equipment
- implement correct use of technology to improve efficiency
- implement procedures for seed handling and hygiene
- identify hazards and implement work health and safety procedures for all harvest tasks
- complete pre- and post-operational checks on tools, harvesting machinery and equipment
- perform routine, service and maintenance procedures on tools, harvesting machinery and equipment
- sample crops to assess moisture content and maturity/ripeness of the crop
- monitor efficiency of harvesting equipment and make adjustments to height and other settings
- transport, clean and store harvesting equipment
- use of industry standard terminology to describe agricultural harvesting activities
- follow work health and safety policies in the context of own work
- follow biosecurity policies in the context of own work
- follow sustainability practices in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- handling and manoeuvring of harvesting equipment
- operation of crop harvesting machinery and equipment
- role of technology in improving efficiency

- procedures for seed handling and hygiene
- hazards and work health and safety procedures for all harvest tasks
- pre- and post-operational checks on tools, harvesting machinery and equipment
- routine, service and maintenance procedures on tools, harvesting machinery and equipment
- enterprise biosecurity policies and sustainability practices.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBC310 Maintain pastures and crops for livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain pastures and crops for livestock production.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

Operating machinery carries risk and candidates should observe all enterprise and manufacturer's requirements.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor & assess agricultural pasture and crop condition, growth and requirements	1.1 Monitor pasture and crop growth, nutrient status and health regularly and record observations 1.2 Report deviation from expected growth and vigour 1.3 Identify, monitor and report weeds, pests and diseases 1.4 Monitor soil fertility and plant nutrition where required 1.5 Follow directions to establish sites for regular measurement of soil moisture where required. 1.6 Measure moisture levels and calculate soil water percentage using soil probe or other measuring tools 1.7 Report observations of pasture and crop ripening to manager to determine the timing of harvest
2. Undertake pasture and crop health operations	2.1 Identify work health and safety hazards and implement appropriate controls 2.2 Select, use and maintain appropriate personal protective equipment 2.3 Contribute to an Integrated pest and plant health strategy to address pasture / crop health and growth issues 2.4 Select and use equipment to apply treatments where required 2.5 Follow label instructions and any specialist advice 2.6 Apply specialist sprays appropriately for growth stages 2.7 Apply technology to ensure most efficient performance of operations 2.8 Conduct any required chipping or spot spraying 2.9 Assess, record and report pasture and crop growth stages and keys 2.10 Apply water as required in irrigated situations 2.11 Consider adverse environmental impacts when performing all applications
3. Complete cleaning and hygiene operations	3.1 Clean and maintain equipment appropriately 3.2 Dispose of all containers, leftover fluids, waste and debris from the maintenance and servicing work appropriately 3.3 Follow enterprise biosecurity procedures 3.4 Complete all required records and documentation appropriately
4. Implement grazing strategies	4.1 Contribute to an integrated pest management program using livestock to conduct stubble and fallow weed control 4.2 Implement appropriate grazing program to maintain pasture and

Element	Performance criteria
	crop production for grazing 4.3 Respond to changes in quantity and quality of available pasture and crop with appropriate grazing management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCBC310 Maintain pastures and crops for livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- detect differences and variations in pasture and crop growth
- report/communicate such differences to the supervisor/farm owner
- observe and report on health, nutrition and growth of the pasture and crop
- monitor pests and disease in pastures and crops
- assess pastures and crop maturity
- apply sprays and fertilizers as directed
- measure soil moisture and relate data to crop requirements
- apply technology to ensure most efficient performance of operations
- monitor the productivity and feed intake of grazing livestock
- assess the impact of grazing on pasture and crop productivity
- follow enterprise work health and safety and animal welfare policies and procedures.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- potential hazards associated with the operation of basic tools, equipment and machinery
- general machine maintenance procedures
- machinery operating principles and safe operating methods
- role of technology in improving efficiency
- environmental impacts associated with the operation of machinery and equipment
- organisation recording and reporting procedures
- symptoms of pasture and crop lacking health and vigour
- signs of pest and disease infestation, moisture stress and nutrient deficiencies

- hygiene requirements for equipment that comes into contact with the pastures and crops
- types and uses of herbicides, insecticides and other pesticides and alternative pest control methods (non-chemical)
- work health and safety and pesticides, legislation
- different livestock grazing habits
- enterprise sustainability practices.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBAC401 Manage pastures for livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage pastures for livestock production.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a pasture	1.1 Assess pasture types on property and seasonal production

Element	Performance criteria
management program	<p>potential and limitations</p> <p>1.2 Confirm or modify livestock production and enterprise objectives to develop production targets achievable by each pasture type</p> <p>1.3 Assess grazing and rest period requirements of pasture types for pasture quality, quantity and persistence considerations</p> <p>1.4 Assess nutrient requirements for pastures to determine appropriate fertiliser and soil ameliorant program</p> <p>1.5 On properties / paddocks with irrigation, determine appropriate irrigation schedules for each soil and pasture type using assessed water requirements, rainfall, Readily Available Water and evapo-transpiration data</p> <p>1.6 Identify and plan grazing and fodder conservation strategies</p> <p>1.7 Determine infrastructure and resources required to support grazing management</p> <p>1.8 Identify and account for budgetary constraints appropriately</p> <p>1.9 Develop appropriate pasture management program</p> <p>1.10 Identify hazards in pasture management and assess risks</p>
2. Implement pasture management program	<p>1.1 Identify work health and safety hazards and implement controls</p> <p>1.2 Monitor pasture capacity appropriately</p> <p>1.3 Implement planned strategic grazing to reduce or eradicate areas of weed infestation and maintain ground cover</p> <p>1.4 Determine fertiliser and soil ameliorant applications and rates appropriate to pasture type, soil analysis and production targets, and applied accordingly</p> <p>1.5 On properties / paddocks with irrigation, monitor soil moisture and schedule watering</p> <p>1.6 Apply technology to ensure most efficient performance of operations</p> <p>1.7 Develop and implement appropriate processes to minimise waste, soil degradation and environmental impacts</p>
3. Monitor pasture growth and fodder production	<p>3.1 Determine longer term trends in weed, pest and disease incidence and implement any identified changes to control measures</p> <p>3.2 Monitor soil structure and risks of erosion, determine changes to cultural practices, grazing management and drainage to improve soil quality</p> <p>3.3 On properties with irrigation, check and maintain irrigation and drainage systems</p> <p>3.4 Monitor grazing management to ensure sustainable pasture and optimal livestock production levels</p> <p>3.5 Identify feed surpluses and deficiencies and rectify appropriately</p> <p>3.6 Monitor pasture maturity and conduct seed harvesting to meet any</p>

Element	Performance criteria
	marketing and production targets
4. Review production level	4.1 Monitor pasture yields and evaluate against forecast production levels 4.2 Evaluate grazing programs for sustainability of the land and pasture resource, and livestock profitability 4.3 Collect and maintain physical and financial records of production for analysis and evaluation of production performance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBC401A Manage pastures for livestock production.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBC401 Manage pastures for livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine fertiliser, soil ameliorants and biological inputs required to support production
- set objectives and milestones for pasture production
- calculate costs
- determine soil quality and land use capability
- monitor the productivity and feed intake of grazing livestock
- develop grazing strategies and plan infrastructure required
- assess the impact of grazing on pasture productivity and resilience
- identify pasture species and estimate dry matter production of pasture
- assess options to control weed infestation
- identify strategies for pest and disease control
- establish production targets for each pasture type in an enterprise
- develop a pasture management program to meet production targets and enterprise objectives
- carry out strategic grazing to reduce or eradicate areas of weed infestation
- monitor soil health and grazing management to ensure sustainable pasture and optimal livestock production levels
- monitor pasture yields and evaluate against forecast production levels
- correct use of technology to improve efficiency
- maintain relevant physical and financial records for pasture and livestock production
- implement work health and safety policies and procedures
- implement enterprise environmental management and sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- land and soil conditions
- pasture species and growing requirements
- pasture grazing strategies
- nutrient requirements and soil fertility
- environmental management strategies in land use
- safe handling processes for fertilisers
- infestation patterns for different types of weed
- role of technology in improving efficiency
- work health and safety legislative and enterprise requirements
- relevant environmental codes of practice, legislation and regulations relating to farm production.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA402 Plan a pasture establishment program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan a pasture establishment program.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine requirements of the	1.1 Assess existing pasture for retention or removal

Element	Performance criteria
pasture establishment program	1.2 Identify appropriate pasture species and cultivars that are best suited to soil, climate, seasonal conditions and livestock goals and calculate, cost and confirm availability with suppliers 1.3 Select appropriate pasture establishment procedures that are consistent with seasonal factors, site and soil characteristics, production plans and the resources and equipment available 1.4 Assess technology to ensure most efficient performance of operations 1.5 Plan post-planting care according to production needs, enterprise standards and site capabilities. 1.6 Identify and plan for plant germination and nutrient requirements, taking into account soil characteristics 1.7 Identify, cost and confirm availability of resources, tools, equipment and machinery required for planting and post-planting care with suppliers, contractors and appropriate personnel 1.8 Identify work health and safety hazards associated with the pasture establishment program, assess risks and develop appropriate controls
Prepare and document the pasture establishment program	2.1 Prepare detailed plans based on the requirements of the pasture establishment program and production requirements 2.2 Produce plan which can be readily interpreted and understood by on-site personnel appropriately 2.3 Develop on-site planting procedures and schedules and post-planting care of pasture and communicate to staff 2.4 Plan for contingencies and identify applicable alternative strategies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA402A Plan a pasture establishment program.

Assessment Requirements for AHCBC402 Plan a pasture establishment program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine requirements of the pasture establishment program
- research suitable pasture species for the site and proposed land use
- prepare and document the pasture establishment program
- develop strategies for weed, pest and disease control
- assess pastures for production potential
- assess site factors
- select suitable pasture species and cultivars
- identify threats to pasture establishment including weeds, pests and diseases
- determine resources and equipment for planting and post-planting care
- prepare pasture establishment plans to meet livestock production plans and schedules
- demonstrate correct use of technology to improve efficiency
- implement enterprise work health and safety policies in the context of the work team
- implement sustainability practices in the context of the work team.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- pasture varieties and their characteristics, requirements and production potential
- establishment techniques of specific pasture species and cultivars
- advantages and disadvantages of a range of pasture establishment procedures
- maintenance requirements and practices for specific pasture species and cultivars after initial establishment
- livestock production systems and their integration with pasture production

- planning process, including costing and scheduling of works
- plant identification of pasture and weed species
- role of pasture in sustainable land use
- role of technology in improving efficiency
- environmental impacts of pasture establishment.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA403 Supervise agricultural crop establishment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise agricultural crop establishment, including planning and scheduling plantings based on the planting plan.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source information for input to planting plan	1.1 Identify and obtain documents relating to crop production 1.2 Identify competing demands on human and physical resources

Element	Performance criteria
	<p>that may affect planting</p> <p>1.3 Identify the specific target area, or paddock, for planting from the production or management plan</p> <p>1.4 Obtain paddock history to identify crop and pasture rotation, and potential weed, pest & disease issues</p> <p>1.5 Obtain and evaluate soil test results to determine appropriate soil treatments</p> <p>1.6 Assess and account for trash levels and seedbed conditions</p>
2. Prepare planting plan	<p>2.1 Determine the agricultural crop and method(s) of planting to be used from the organisations production or management plan and availability</p> <p>2.2 Assess and calculate the resources required for the planting operations from the area to be sown, the method of planting to be used, and the available timelines</p> <p>2.3 Assess technology to ensure most efficient performance of operations</p> <p>2.4 Set target dates for planting, including the sequencing for planting across paddocks or crop areas, in line with the overall production or management plan</p> <p>2.5 Select the chemical applications that are required prior to and post planting and organise to occur appropriately</p> <p>2.6 Prepare the plan to ensure that any potential detrimental environmental impacts are minimised or eliminated, including the proper disposal of containers, drums and other waste</p> <p>2.7 Identify and assess hazards, and safe work practices for planting are implemented and overseen with staff</p> <p>2.8 Identify, arrange and obtain required approvals for the planting operations</p> <p>2.9 Determine measurable indicators, specifications and targets, based on the production or management plan and the method, resources and seed to be used</p>
3. Determine scheduling and key responsibilities	<p>3.1 Determine appropriate planting schedule</p> <p>3.2 Determine key responsibilities for required specific preparatory processes</p> <p>3.3 Determine key responsibilities for specific implementation processes</p> <p>3.4 Determine and implement appropriate recordkeeping processes, including the type, format, frequency and detail of any reporting required by both managers and operators</p> <p>3.5 Document the plan, including scheduling and key responsibilities</p>
4. Monitor and adjust the	4.1 Ensure adherence to monitoring points outlined in the

Element	Performance criteria
planting plan	implementation plan 4.2 Conduct checks to ensure that work health and safety procedures and site environmental requirements are being observed and followed 4.3 Communicate with operational staff and any contractors 4.4 Conduct checks to ensure that the required documentation is completed clearly and accurately during the progress of the planting process 4.5 Determine and implement any required corrective action or amendment to the planting plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA403A Supervise agricultural crop establishment.

Assessment Requirements for AHCBA403 Supervise agricultural crop establishment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and oversee safe operating procedures
- identify the seasonal conditions which affect crop establishment
- plan and schedule planting including amending plans during the operations
- recognise poor growth and lack of vigour caused by nutrient deficiency and incorrect planting depth
- observe, identify and react appropriately to environmental implications and work health and safety hazards
- plan the planting operation including timing and resources required
- correct use of technology to improve efficiency
- carry out pest, weed and disease control either pre or post planting if required
- supervise staff and monitor the planting operation
- implement work health and safety policies in the context of the work team.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- equipment that is required for a range of tillage methods, and pest and weed control prior to planting
- crop establishment requirements
- equipment servicing requirements
- role of technology in improving efficiency
- integrated pest and weed management techniques
- environmental controls and codes of practice applicable to the enterprise

- legislation, codes of practice and enterprise procedures for work health and safety and environmental management
- management practices and processes to minimise environmental impacts such as noise, soil degradation, and debris from planting operations.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA404 Plan and implement agricultural crop maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and implement agricultural crop maintenance.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine condition of	1.1 Measure and assess soil moisture and calculate soil water

Element	Performance criteria
agricultural crops	percentage 1.2 Calculate water requirements to soil analysis data, standing crop, and forecast weather conditions 1.3 Assess nutrient requirements and availability for crops and identify deficiencies 1.4 Identify factors affecting crop capacity 1.5 Assess technology to ensure most efficient performance of operations 1.6 Identify work health and safety hazards in crop maintenance and assess risks
2. Determine pest control	2.1 Assess evidence of pests and disease and determine appropriate integrated control measures 2.2 Locate and identify areas of weed infestation for reduction or eradication 2.3 Select appropriate integrated control methods 2.4 Schedule suitable control methods appropriately 2.5 Maintain records on severity of infestations and treatments used
3. Manage crop health	3.1 Implement work health and safety controls 3.2 Monitor crop to maintain water and nutritional requirements for optimal production 3.3 Implement sustainable land management practices appropriately 3.4 Monitor weed and pest levels and modify the control program as required 3.5 Assess, document and analyse benefits from soil and plant inputs and treatments 3.6 Monitor and document cropping programs 3.7 Document and record relevant data for continual analysis and effective crop management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA404A Plan and implement agricultural crop maintenance.

Assessment Requirements for AHCBA404 Plan and implement agricultural crop maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- refer to records of, and assess, soil health and nutrient status
- dispatch soil samples to laboratories
- carry out a soil health appraisal
- identify likely threats to crop from pests, weeds and diseases
- recognise damage to crop caused by weeds, pests or diseases
- recognise poor growth and lack of vigour in crop caused by nutrient deficiency
- record monitoring results
- plan and implement integrated control strategies to address nutrient deficiencies, disease outbreaks, pest and weed infestations
- accurately measure soil moisture and estimate irrigation needs if required
- apply pesticides or fertility treatments as required
- apply correct use of technology to improve efficiency
- communicate with industry, suppliers and other personnel
- read and interpret Safety Data Sheets (SDSs), production plans and analysis results
- estimate and measure pest control treatments
- assess crop needs accurately
- carry out crop cultural practices and treatments
- monitor and assess crop maturity
- ascertain water requirements from survey advice and weather forecasts
- measure soil moisture and interpret data accurately
- determine time of harvest with specialist advice
- implement work health and safety policies in the context of the work team
- implement enterprise sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- crop growth stages and keys
- crop growth requirements compared to soil nutrient status
- fertiliser and soil ameliorant types and application times, methods and rates
- chemical use if applicable
- factors leading to development of chemical resistance
- role of technology in improving efficiency
- integrated pest management strategies
- life-cycles of pest, diseases and weeds
- work health and safety legislative requirements
- relevant codes of practice with regard to the use and control of agricultural chemicals
- legislation and codes of practice with regard to environmental protection.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA405 Supervise agricultural crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise agricultural crop harvesting.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for harvesting	1.1 Assess crop maturity and quality in readiness for harvesting

Element	Performance criteria
	1.2 Determine pre-harvest treatments for the control and eradication of pests and implement appropriately 1.3 Identify and comply with licence or permit requirements 1.4 Assess insurance requirements and plan and implement required risk management strategies 1.5 Identify work health and safety hazards and assess risks in crop harvesting
2. Determine harvest strategy	2.1 Estimate and calculate optimum timing to carry out harvest according to crop maturity assessment 2.2 Assess resource requirements appropriate to the size of the crop and estimated timing of harvest 2.3 Assess technology to ensure most efficient performance of operations 2.4 Arrange and confirm required labour and equipment to carry out harvesting operations within budgetary constraints 2.5 Identify and arrange appropriate requirements for fire prevention and control
3. Coordinate the harvest strategy	3.1 Implement work health and safety controls 3.2 Implement appropriate communication strategies 3.3 Implement harvesting operations and adjust as required according to weather, equipment and staff requirements 3.4 Coordinate and monitor equipment operation 3.5 Identify and control existing and potential biosecurity hazards appropriately
4. Complete harvest operation	4.1 Identify appropriate storage resources and strategies for drying grain 4.2 Segregate grain quality of grain to marketing grades and monitor for moisture content according to classification standards 4.3 Evaluate harvesting operations and outcomes against harvest strategy 4.4 Document and record information for continual analysis and effective planning management

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCBAAC405 Supervise agricultural crop harvesting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- organise and schedule the maintenance of plant and equipment
- establish strategies, procedures and controls for crop harvesting
- negotiate and arrange contracts and agreements
- implement safe workplace and positive environmental practices
- deal with weather and other contingencies
- establish strategies, procedures and controls for crop harvesting, including fire prevention and control plans
- correct use of technology to improve efficiency
- negotiate and arrange contracts and agreements
- estimate crop yields
- maintain budgetary controls
- assess crop maturity and quality in readiness for harvesting
- arrange storage and delivery requirements
- segregate grain for quality and monitor for moisture content
- implement work health and safety policies in the context of the work team
- implement biosecurity policies in the context of the work team.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- crop maturity and yield potential
- grain or seed quality
- functions and limitations of harvesting equipment

- role of technology in improving efficiency
- crop measurement techniques and parameters
- grain market information and sources
- location and relative skills and abilities of available contractors
- weather conditions which may affect the harvest
- relevant legislation, codes of practice and enterprise requirements for Work Health and Safety, contractor engagement, environment and pesticides
- environmental controls and codes of practice applicable to harvesting operations
- enterprise biosecurity policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA406 Maintain grain quality in storage

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain grain quality in storage and includes assessing and maintaining hygiene in grain storage areas, as well as monitoring the grain for deterioration or pests and contaminants.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

Participants must check state and federal training requirements before using fumigants in grain storages.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Maintain hygiene in storage areas	1.1 Test storage conditions and facilities to maintain the standard of hygiene in stored grain 1.2 Identify, report and carry out repairs and maintenance 1.3 Apply treatments to storage facilities to maintain hygiene standards and in line with the grain storage program 1.4 Implement enterprise biosecurity policies 1.5 Record application of all treatments appropriately
2. Monitor grain from arrival to dispatch	2.1 Take samples and refer for testing before storing grain 2.2 Take regular samples to ensure purity standards of the grain 2.3 Check the grain quality at dispatch against the records taken at the point of storage 2.4 Take, prepare and forward test samples for analysis according to prescribed guidelines 2.5 Maintain and store records of grain movements in and out of storage as prescribed in the grain storage program 2.6 Research and recommend new technology, systems or practices that will improve or maintain grain quality in storage 2.7 Implement work health and safety policies for activities around the grain storage facilities
3. Monitor and maintain grain condition in storage	3.1 Conduct regular checks of grain in storage to maintain continued freedom from contaminants and deterioration 3.2 Conduct appropriate periodical checks of grain in long-term storage for quality factors and viability 3.3 Take, prepare and send samples of grain for testing in a laboratory setting appropriate to industry quality assurance and laboratory requirements 3.4 Create, maintain and keep records of grain tests and inspections appropriate to the grain storage program. 3.5 Use the schedule and methods outlined in the grain storage program to monitor condition of storage facilities 3.6 Take appropriate corrective action to maintain grain quality 3.7 Ensure that all activities around the grain storage facilities are undertaken appropriate to the grain storage program
4. Control weeds and pests in storage area	4.1 Monitor grain according to the monitoring points, targets and methods outlined in the grain storage program 4.2 Take samples the grain to test for pest infestation

Element	Performance criteria
	4.3 Prepare and forward sample for analysis appropriately 4.4 Control pests in storage to the grain storage program 4.5 Fumigate enclosed grain storage area clean the surrounding environment appropriately to the integrated pest management strategy in the grain storage program 4.6 Identify and control sources of any infestations appropriately to the integrated pest management strategy in the grain storage program 4.7 Ensure all pest control activities are undertaken appropriately to the grain storage program 4.8 Create, maintain and store records of treatments to the grain and storage facilities appropriately to the grain storage program 4.9 Create, maintain and store records of all chemical use in the storage facility, and the applicable withholding periods appropriately to the grain storage program

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA406A Maintain grain quality in storage.

Assessment Requirements for AHCBAC406 Maintain grain quality in storage

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- setup and operate fumigation and pesticide application equipment
- sample loads and grain in storage, and conduct a simple analysis
- create, maintain, use and keep clear and trackable records
- use a range of communication equipment, including in emergency situations
- inspect and test silos
- identify insects, pests and other factors that affect grain quality
- set up and operate inert atmosphere equipment
- handle and mix chemicals for baiting, fumigation, spraying, and other forms of application
- interpret monitored information on pests
- plan and schedule weed, pest and disease control including amending plans during the operations
- calculate mass and volumes of grain and grain storages
- implement pre-determined integrated pest management strategies
- monitor and maintain hygiene
- monitor and control pests and contaminants
- investigate and recommend options for technology, systems or practices that will improve grain quality
- implement work health and safety policies in the context of the work team
- implement enterprise biosecurity policies in the context of the work team.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, levels and control methods for a range of pests and contaminants
- silo and temporary storage configuration and operation
- chemical handling and dangerous goods requirements
- range of applicable pesticides, their uses, application methods and handling requirements
- grain commodity types, varieties and grades, marketing requirements and options for grain growers
- handling requirements for gas cylinders
- insect life cycles and optimum conditions for development
- Integrated Pest Management (IPM) principles and the procedures used within the organisation
- legislative requirements, codes of practice and enterprise procedures relating to the purchase, transport, storage, use and disposal of pesticides and fumigants, work health and safety and environment
- client's sampling and classification requirements
- common grain pests and their general control methods
- equipment used in grain storage facilities
- site hazards and sound management practices and processes to minimise noise, odours, and debris from grain storage operations
- chemical handling and dangerous goods requirements
- developments and options available for maintaining or improving the quality of grain during storage
- enterprise biosecurity policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA407 Save, prepare and store agricultural seed

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to save, prepare and store agricultural seed.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select seed from	1.1 Calculate the quantity of seed required to sow the following

Element	Performance criteria
agricultural crops	season's crop 1.2 Calculate the area of crop needed to produce the required quantity of seed for the following season's crop 1.3 Select a portion of the crop to be used as seed, based on the calculated requirements and its health, vigour, and grain size 1.4 Record the soil type in the selected portion of the crop 1.5 Implement measures to improve seed and plant health, vigour and uniformity within the selected area 1.6 Identify application of any chemicals to the crop and consider detrimental environmental impacts 1.7 Implement enterprise work health and safety policies
2. Evaluate and grade seed	2.1 Assess grain variety for its suitability for the location, the soil, and the organisation's current marketing requirements after harvest 2.2 Research information regarding new varieties or trial results and progress for input to management decision-making 2.3 Grade the seed to the required size either on or off-site 2.4 Apply fungicidal and insecticidal dressings to the seed appropriately 2.5 Collect, prepare and forward test samples to the analysing body, according to the guidelines of that body 2.6 Collect, maintain and store records of observations, information gathered, and results of tests and grading appropriately 2.7 Refer records to the appropriate person for analysis and decision-making
3 Store seed	3.1 Select and hygienically prepare storage facilities 3.2 Transfer seed to the storage facility appropriately 3.3 Ensure seed is stored under conditions that maintain its quality and germination capacity 3.4 Conduct appropriate periodical checks of seed in long-term storage for quality factors and viability 3.5 Collect, prepare and forward seed samples for laboratory testing and analysis according to prescribed guidelines 3.6 Create, maintain and store records of seed storage, tests and inspections appropriately to the seed storage program 3.7 Monitor the condition of storage facilities using the schedule and methods outlined in the seed storage program and take appropriate corrective action to maintain seed quality 3.8 Ensure activities around the seed storage facilities are undertaken appropriately to the grain storage program
4. Collect and deliver	4.1 Establish delivery or supply terms and apply when collecting or

Element	Performance criteria
seed	delivering seed 4.2 Ensure seed sold or purchased conforms to local State and Federal legislation and regulations 4.3 Observe regulations relating to the interstate movement of seeds 4.4 Implement enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA407A Save, prepare and store agricultural seed.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBC407 Save, prepare and store agricultural seed

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select appropriate seed tests
- apply pre and post-harvest treatments for seed
- identify varieties from growth patterns
- identify weed seeds and contaminants
- identify pests in stored grain and initiate control measures
- calculate volumes, capacities, areas, ratios for seed, storages, and chemicals
- keep, update and maintain records relating to test results, provenance, varieties, pest control measures, and other relevant information about the seed
- calculate the quantity of seed required for the following season
- grade and test seed and interpret the results
- store the seed for use in the following season
- maintain grain in storage to ensure maximum quality and yield when used
- implement work health and safety policies in the context of the work team
- implement enterprise biosecurity policies in the context of the work team
- implement enterprise environmental sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- identification of varieties
- seed treatment and cleaning measures
- sources of purchased seed
- inoculation treatments and seed dressings used within the organisation

- records and documentation required for tracking and handling of seed
- storage techniques and requirements for seed and grain
- environmental controls and codes of practice applicable to the enterprise
- relevant legislation and regulations relating to WHS, contractor engagement, chemical use and application, vehicle and plant use, and to the use, handling and sale of seed
- sound management practices and processes to minimise noise, odours, and debris from sowing operations
- enterprise biosecurity policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA408 Manage agricultural crop production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage agricultural crop production.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine	1.1 Select plant varieties that are best suited to soil, climate, seasonal

Element	Performance criteria
requirements for an agricultural crop establishment program	<p>conditions and marketing goals</p> <p>1.2 Determine required irrigation schedules where required for each soil and crop type based on assessed water requirements, rainfall and evapo-transpiration data</p> <p>1.3 Assess nutrient requirements for crops to determine appropriate fertiliser program</p> <p>1.4 Assess technology to ensure most efficient performance of operations</p> <p>1.5 Identify and maintain budgetary constraints</p> <p>1.6 Develop a crop establishment program appropriate to the crop production plan</p> <p>1.7 Identify work health and safety hazards and develop control strategies in establishing agricultural crops</p>
2. Implement crop maintenance	<p>2.1 Implement strategic grazing to reduce or eradicate areas of weed infestation</p> <p>2.2 Determine fertiliser applications and rates appropriate to crop type and applied accordingly</p> <p>2.3 Determine crop nutrient requirements to ensure sustainability and achievement of yield</p> <p>2.4 Monitor soil moisture and adjust watering schedule if appropriate</p> <p>2.5 Determine and implement processes to minimise waste and soil degradation appropriately</p>
3. Monitor an agricultural crop through to harvest	<p>3.1 Determine longer term trends in weed, pest and disease incidence, and implement any necessary changes to control measures</p> <p>3.2 Monitor soil structure and erosion and determine necessary changes to cultural practices, grazing management and drainage</p> <p>3.3 Check and maintain irrigation and drainage systems</p> <p>3.4 Monitor grazing management to ensure crop production levels</p> <p>3.5 Monitor crop maturity and undertake harvesting to meet marketing and production targets</p>
4. Implement the harvest strategy	<p>4.1 Follow the harvesting plan to apply pre-harvest pest control treatments where weather patterns permit</p> <p>4.2 Ensure adherence to all work health and safety and environmental requirements throughout the application of pre-harvest treatments and throughout the harvest</p> <p>4.3 Ensure that all required labour and equipment is ready and available at the scheduled place and time</p> <p>4.4 Commence the harvest at the scheduled time</p> <p>4.5 Follow the order of the harvest described in the harvesting plan</p> <p>4.6 Monitor harvesting operations and adjust to allow for weather,</p>

Element	Performance criteria
	contracting and equipment maintenance needs 4.7 Instruct truck, tractor and harvester operators on procedures to deliver each crop load at maximum quality
5. Record production	5.1 Maintain appropriate records of production for analysis and evaluation of production performance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCBA408 Manage agricultural crop production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply environmental protection strategies in land use
- set objectives and milestones for a cropping program
- determine soil quality and land use capability
- determine crop nutrient requirements and fertiliser requirements
- measure and assess quantities of fertiliser to meet plant requirements
- predict patterns of weed infestation
- manage irrigation processes to avoid soil degradation if applicable
- demonstrate use of technology to improve efficiency
- prepare budgets
- develop a cropping program for an enterprise
- plan for crop establishment
- monitor growing crops, provide inputs and carry out cultural practices as required
- develop a plan for the crop harvest
- monitor crop yields and evaluate production performance
- implement work health and safety policies in the context of the work team
- implement enterprise environmental sustainability practices in the context of the work team.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- land and soil conditions
- effects of soil characteristics on nutrient availability

- role of technology in improving efficiency
- budgeting and financial analysis techniques
- environmental protection strategies
- cultivation requirements for different types of crop
- safe handling processes for fertilisers
- infestation patterns for different types of weed
- integrated strategies for the management of pests, weeds and diseases
- work health and safety legislative requirements
- environmental legislation and codes of practice, relating to farm production.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA502 Manage forage conservation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage forage conservation.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for forage	1.1 Determine the resource needs and end use requirements of forage

Element	Performance criteria
conservation	<p>conservation in the farm production system</p> <p>1.2 Define forage conservation options and cost benefit</p> <p>1.3 Select appropriate paddocks for forage conservation with regard to species selection and target growth stage</p> <p>1.4 Select appropriate forage conservation machinery, equipment and personal protective equipment in accordance with manufacturer's specifications, work health and safety requirements and industry practice</p> <p>1.5 Assess technology to ensure most efficient performance of operations</p> <p>1.6 Ensure safe access to paddocks for harvesting and transport machinery</p> <p>1.7 Plan and prepare storage facility or system for selected forage conservation method</p> <p>1.8 Identify and minimise potential environmental impacts of forage conservation activities</p> <p>1.9 Negotiate contracts and costs including crop inputs, machinery, harvest area and storage sites where applicable</p> <p>1.10 Communicate details of work activities with workers or contractors where applicable</p> <p>1.11 Identify work health and safety hazards and risks in forage conservation and develop control strategies</p>
2. Prepare paddocks for forage conservation	<p>2.1 Identify need for fertiliser, irrigation, weed control and grazing or slashing before closing paddock to stock at appropriate time</p> <p>2.2 Identify optimum time for harvest of key species</p> <p>2.3 Monitor and control weeds, pests and diseases</p>
3. Oversee forage harvesting operations	<p>3.1 Establish dry matter targets for the selected method of forage conservation</p> <p>3.2 Monitor seasonal and current weather conditions to determine optimum time for harvest and to ensure quality</p> <p>3.3 Assess condition and dry matter content of the crop throughout the harvesting operation</p> <p>3.4 Select harvesting and conditioning machinery based on weather conditions and forage drying targets</p> <p>3.5 Ensure that harvesting activities are conducted in a safe, controlled and efficient manner</p> <p>3.6 Ensure that baling, wrapping, compacting, sealing or storage of forage is in accordance with storage plan</p> <p>3.7 Ensure that forage is safely loaded, transported and stored in accordance with work health and safety and quality requirements and to minimise spoilage and the risk of combustion</p>

Element	Performance criteria
4. Complete operation	4.1 Complete records in accordance with quality assurance requirements and industry practice 4.2 Ensure waste and debris is disposed of to minimise environmental impact 4.3 Ensure that machinery and ancillary equipment is cleaned and serviced in accordance with manufacturer's specifications, work health and safety requirements and industry practice 4.4 Conduct quality checks on stored forage 4.5 Monitor and minimise environmental impacts of forage conservation activities including concentration of nutrients at field out areas and effluent run-off 4.6 Implement enterprise biosecurity policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBC502A Manage forage conservation.

Assessment Requirements for AHCBA502 Manage forage conservation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the need for and implications of forage conservation in the farming system
- select and implement a forage conservation system
- perform harvesting operations
- assess cost benefit and forage conservation options
- select appropriate forage conservation method
- select suitable forage conservation machinery
- apply correct use of technology to improve efficiency
- oversee harvest, forage preparation and storage
- record work activities
- implement work health and safety policies in the context of the work team
- implement enterprise biosecurity policies in the context of the work team
- implement enterprise environmentally sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- forage conservation options and cost benefit economic analysis
- silage and hay conservation systems
- factors affecting the quality of silage and hay
- dry matter content, quality and hygiene requirements
- range and functions of silage and haymaking machinery and equipment
- role of technology in improving efficiency
- common weeds, pests and diseases associated with crops and pastures

- types and application of personal protective equipment
- work health and safety legislation and regulations including licensing requirements in relation to forage operations
- risk factors including human and animal health, weather, harvesting and environmental
- enterprise biosecurity policies and environmental sustainability practices.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBAC503 Manage integrated crop and pasture production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage integrated crop and pasture production.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a pasture and	1.1 Establish production targets for each crop and pasture type

Element	Performance criteria
crop program	<p>consistent with marketing and enterprise objectives</p> <p>1.2 Select plant varieties that are best suited to soil, climate, seasonal conditions and marketing goals</p> <p>1.3 Determine irrigation schedules, where required, for each soil and crop or pasture type based on assessed water requirements, rainfall and evapo-transpiration data</p> <p>1.4 Assess nutrient requirements for crops and pastures to determine appropriate fertiliser program</p> <p>1.5 Assess technology to ensure most efficient performance of operations</p> <p>1.6 Identify and maintain budgetary constraints appropriately</p> <p>1.7 Develop a pasture and crop program to meet production targets and enterprise objectives</p> <p>1.8 Identify work health and safety hazards in crop & pasture management and develop control strategies</p>
2. Implement pasture and crop management program	<p>2.1 Implement pasture and crop program and monitor pasture capacity appropriately</p> <p>2.2 Implement planned strategic grazing, where necessary, to reduce or eradicate areas of weed infestation</p> <p>2.3 Determine and conduct fertiliser applications and rates appropriate to crop or pasture type</p> <p>2.4 Apply crop and pasture nutrient requirements to ensure achievement of yield and sustainability of pasture</p> <p>2.5 Monitor soil moisture schedule watering, and adjust as required</p> <p>2.6 Determine and implement appropriate processes to minimise waste, soil degradation and environmental standards</p>
3. Monitor crop or pasture growth and fodder production	<p>3.1 Determine longer term trends in weed, pest and disease incidence and implement any necessary control measures changes</p> <p>3.2 Monitor soil structure and erosion, determine and implement any necessary changes to cultural practices, grazing management and drainage</p> <p>3.3 Check and maintain irrigation and drainage systems</p> <p>3.4 Monitor grazing management</p> <p>3.5 Integrate livestock into the cropping cycle through grazing of pastures returning to crop, stubbles and crop residues, and dual purpose crops</p> <p>3.6 Identify feed surpluses and deficiencies and take appropriate action</p> <p>3.7 Monitor crop or pasture maturity is monitored and conduct harvesting to meet marketing and production targets</p>
4. Review production	4.1 Monitor pasture and crop yields and evaluate against forecast

Element	Performance criteria
level	production levels 4.2 Evaluate efficiency and effectiveness of grazing and cropping programs and document for future best practice 4.3 Evaluate production performance of each enterprise and document for management program review 4.4 Maintain appropriate production records for production performance analysis and evaluation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCBA503 Manage integrated crop and pasture production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- measure and assess quantities of fertiliser
- apply environmental protection strategies in land use
- set objectives and milestones
- determine soil quality and land use capability
- predict patterns of weed infestation
- design irrigation processes to avoid soil degradation
- apply correct use of technology to improve efficiency
- assess financial strategies and prepare budgets
- develop a pasture and crop program to meet production targets and enterprise objectives
- maintain the productivity of crops and pastures in a farming system
- monitor soil structure and erosion and make required changes to cultural practices and grazing management
- implement grazing strategies to optimise pasture and livestock production levels and support the cropping program
- evaluate grazing and cropping programs for efficiency and effectiveness
- use physical and financial records of production to evaluate production performance
- implement work health and safety policies in the context of the work team.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- land and soil conditions
- effects of nutrients of soil types

- crop and pasture production financial analysis techniques
- environmental standards
- cultivation requirements for different types of crop
- safe handling processes for fertilisers
- role of technology in improving efficiency
- infestation patterns for different types of weed
- work health and safety legislation codes of practice and enterprise procedures.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBC504 Plan and manage a stored grain program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and manage a stored grain program.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan grain storage	1.1 Collect and analyse organisational documentation and financial

Element	Performance criteria
program	information to develop the storage program 1.2 Identify, record and assess available storage facilities for suitability and capacity 1.3 Calculate and analyse projected grain production and delivery quantities, types and timeframes against storage capacity 1.4 Arrange any required temporary storage 1.5 Estimate timeframes and scheduling for delivery of grain to storage facilities on- and off-site 1.6 Prepare program to include plans for annual, seasonal and short-term periods, appropriate to achieve organisational goals and objectives 1.7 Document program, including scheduling and key responsibilities, and reporting type, format, frequency and detail required by managers and operators
2. Plan integrated pest control for the storage area	2.1 Organise grain testing and sampling for pest infestation 2.2 Record and analyse results of samples and tests for pest infestation 2.3 Develop and implement an integrated pest management program to control grain insects and other pests in storage 2.4 Determine monitoring points, targets and methods to identify possible development of resistance in insects 2.5 Ensure the selected pest control strategies relate to the requirements of the end use and to customers' expectations 2.6 Determine appropriate record keeping requirements and procedures to ensure compliance with the range of applicable regulations 2.7 Document the program, including scheduling and key responsibilities, including the type, format, frequency and detail of any reporting required by both managers and operators
3. Implement work health and safety program for grain storage area	3.1 Identify hazards within and surrounding the grain storage area(s) 3.2 Develop, document and implement procedures to minimise risks 3.3 Communicate work health and safety and risk minimisation procedures 3.4 Ensure the program describes the personal protective equipment and safety gear required to be used around the storage facilities 3.5 Determine record keeping requirements and implement procedures appropriately 3.6 Ensure the program includes the type, format, frequency and detail of any reporting required by both managers and operators
4. Manage the grain storage program	4.1 Implement the grain storage program 4.2 Schedule and organise activities for efficient transport and storage

Element	Performance criteria
	<p>of the grain</p> <p>4.3 Implement pest control strategies according to the integrated pest management program</p> <p>4.4 Ensure personal protective equipment and safety gear is provided to all people operating around the storage facilities</p> <p>4.5 Ensure that all work health and safety procedures are implemented by operational personnel</p> <p>4.6 Conduct checks to ensure that the performance indicators, targets and specifications are being met and make amendments to the program, where necessary</p> <p>4.7 Communicate regularly with operational personnel throughout the storage, transport, sampling and chemical application operations to ensure efficient and safe operation and progress</p> <p>4.8 Assess the impact and risk of existing and potential problems</p> <p>4.9 Identify potential problems and investigate likely causes</p> <p>4.10 Consider, analyse, review and recommend alternative solutions to appropriate personnel for a decision</p>
5. Maintain records of stored grain movement	<p>5.1 Create, maintain and store records and documentation as described in the grain storage program, the integrated pest management program, and work health and safety requirements</p> <p>5.2 Complete appropriate records and documentation throughout the storage program</p> <p>5.3 Ensure that the record keeping system is appropriate</p> <p>5.4 Implement enterprise biosecurity policies</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA504A Plan and manage a stored grain program.

Assessment Requirements for AHCBA504 Plan and manage a stored grain program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- cost benefit analysis of grain storage
- establish procedures and controls for implementation by others
- plan, schedule, monitor and amend plans for operations
- administer and co-ordinate operations on a site
- explain, and deliver instructions about the plans and scheduling of the grain storage operations to both staff and contractors
- observe, identify and react appropriately to environmental implications and work health and safety hazards
- plan for storage needs based on grain production estimates
- implement an integrated pest management (IPM) program for grain storage
- supervise procedures to manage work health and safety risk for the storage site
- schedule the storage and transport of grain
- supervise staff to monitor transport, storage, sampling and pest control procedures
- maintain records of grain storage to meet quality requirements
- implement work health and safety policies
- implement enterprise biosecurity policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- silo layout and operations, configuration, and maintenance procedures
- safe working practices, especially in confined spaces and at heights

- organisational priorities and policies in relation to production planning, work health and safety and chemical use
- organisational priorities and policies in relation to quality, personnel and operations
- pest control principles
- reporting and recording requirements within the organisation and as required by external authorities
- grain marketing and commodity prices
- use of technology in grain storage operations
- integrated pest and weed management techniques
- relevant legislation and regulations relating to work health and safety, contractor engagement, chemical use and application, site management, and vehicle and plant use
- sound management practices and processes to minimise noise, odours, and debris from grain storage operations
- enterprise biosecurity policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBC505 Plan and manage long-term weed, pest or disease control in crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and manage long-term weed, pest or disease control in crops.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Source information for input to weed, pest or disease control planning	1.1 Identify and access historical data, including recent data from organisational records for input to weed, pest or disease control planning 1.2 Research and collate information from other enterprises within the district 1.3 Use information regarding the characteristics of the crop(s) planned for, or under production 1.4 Research and collate information regarding the local geography, soil and climatic conditions 1.5 Consider and document the environmental implications of pesticide or herbicide use, alternative methods and non-chemical preventative methods 1.6 Assess technology to ensure most efficient performance of operations 1.7 Assess information and determine potential key information for input to planning decisions
2. Determine long-term weed, pest or disease control strategies	2.1 Analyse information gathered for suitable methods 2.2 Consider methods of control, including their impacts 2.3 Determine strategies for weed, pest or disease control to integrate the most suitable control methods with the proposed crops and the existing geography 2.4 Establish environmental controls and include in the plan 2.5 Identify work health and safety hazards, assess risks and incorporate suitable controls into the plan
3. Provide input to other planning processes	3.1 Incorporate selected weed, pest or disease control strategies into other organisational planning processes 3.2 Collect and use information regarding other planning processes in the weed, pest or disease control plan 3.3 Communicate information appropriately about the range of planning processes
4. Determine scheduling and key responsibilities	4.1 Determine appropriate scheduling for weed, pest or disease control 4.2 Determine key responsibilities for specific implementation processes 4.3 Determine record keeping requirements are determined and implement appropriate procedures 4.4 Document the plan, including scheduling and key responsibilities and ensure it includes the type, format, frequency and detail of any reporting required by both managers and operators
5. Monitor and adjust weed, pest or disease	5.1 Evaluate the effectiveness of the weed, pest or disease control

Element	Performance criteria
control strategies	strategies at key points, and implement any necessary adjustments 5.2 Identify, monitor and assess environmental impacts and work health and safety hazards relating to weed, pest or disease control throughout the implementation process 5.3 Identify and implement necessary modifications to the strategy 5.4 Implement enterprise biosecurity policies
6. Evaluate weed, pest or disease control strategies and record result	6.1 Analyse data, observations, and documentation from the implementation against the plan appropriately 6.2 Prepare recommendations for future strategies 6.3 Prepare a report that documents the implementation of the strategies and includes any difficulties or issues faced, the methods used for treatment, impacts on environmental and work health and safety, any recommendations for future work, results, costs and any available data analysis

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBAC505A Plan and manage long-term weed, pest or disease control in crops.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBA505 Plan and manage long-term weed, pest or disease control in crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret monitored information on pest and weed numbers, density and control
- interpret, analyse and extract information from a range of sources and discussions
- plan and manage long-term weed, pest or disease control including amending plans during the operations
- plan land use incorporating appropriate weed, pest or disease control measures
- establish processes or strategies, procedures and controls for long-term weed, pest or disease control
- demonstrate correct use of technology to improve efficiency
- negotiate and arrange contracts and agreements
- explain, and deliver instructions about the plans and scheduling of the weed, pest or disease control operations to both staff and contractors, as well as suppliers, customers, and neighbours
- recognise poor growth and lack of vigour caused by weeds, pests or disease rather than nutrient deficiency
- observe, identify and react appropriately to environmental implications and work health and safety hazards
- interpret information on pest and weed numbers, density and control
- establish processes or strategies, procedures and controls for long-term weed, pest or disease control
- implement and monitor long-term weed, pest or disease control strategies
- use records and observations to evaluate weed, pest or disease control strategies
- plan land use incorporating long term weed, pest or disease control strategies
- implement work health and safety policies
- implement enterprise biosecurity policies.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- pest and weed species, including their life cycles and reproduction or multiplication capability
- integrated pest and weed management
- effects on crops of weeds, pests or diseases including competitive effects on crop yield; threshold levels; and the effects of alternative methods of control
- role of technology in improving efficiency
- environmental controls and codes of practice applicable to the enterprise
- relevant legislation and regulations relating to work health and safety, contractor engagement, chemical use and application, and vehicle and plant use
- environmental controls and codes of practice applicable to the business, and to the weed, pest or disease control operations
- sound management practices and processes to minimise noise, odours, and debris from weed, pest or disease control operations
- enterprise biosecurity policies.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA506 Manage the harvest of crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage the harvest of crops.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

Harvesting crops carries risk of fire. All harvesting activities shall be conducted appropriate to relevant regulations, legislation and guidelines as determined by the relevant fire authority.

This unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine crop quality	1.1 Assess the potential crop yield using measurements made in the field 1.2 Test and assess the potential quality of the crop using quality parameters before harvest 1.3 Estimate the value of each crop using the measurements taken and assessments made before harvest
2. Determine crop readiness	2.1 Refer pre-harvest samples to the laboratory or marketing agent to determine the potential quality of the crop 2.2 Monitor weather patterns estimate the rate of ripening 2.3 Monitor crop maturity and estimate when the crop will be at its optimum and harvest commencement 2.4 Assess the incidence of pests and determine the requirement for, and the type of, pre-harvest treatment 2.5 Select pre-harvest treatments to ensure that the crop meets market requirements 2.6 Ensure adherence to all work health and safety and environmental requirements throughout the application of pre-harvest treatments
3. Assess the need for insurance	3.1 Confirm any commitments to insure the crop 3.2 Estimate the crop value 3.3 Insure the crop, if appropriate 3.4 Analyse, assess and implement appropriate strategies to manage financial risk
4. Plan harvest strategy	4.1 Estimate the appropriate harvest commencement date and the time span 4.2 Calculate equipment and labour resources required for harvest from the size of the crop and harvest time limitations 4.3 Analyse equipment and labour resources required against those available within the enterprise, and determine the amount of labour and equipment to be contracted 4.4 Assess technology to ensure most efficient performance of operations 4.5 Plan for and order any equipment preparation required prior to harvest 4.6 Plan application of required pre-harvest pest control treatments appropriately 4.7 Determine and arrange required licenses, permits and notifications

Element	Performance criteria
	4.8 Determine and describe the order of the harvest in the plan
5. Plan for work health and safety hazard management	5.1 Communicate with all harvesting personnel and ensure awareness of work health and safety hazards that may be present, their responsibilities for action, and the systems that are in place to deal with such hazards 5.2 Implement suitable controls to reduce work health and safety hazard risks 5.3 Monitor, identify and assess work health and safety hazards at each stage of the harvesting process
6. Plan for fire prevention and control	6.1 Evaluate the property and identify fire risks and hazards 6.2 Develop a fire prevention and control strategy that addresses the identified risks and hazards, including measures to be taken 6.3 Assess the fire prevention and control strategy, and the specific measures to be taken 6.4 Prepare appropriate fire breaks as identified in the strategy 6.5 Ensure that sufficient firefighting equipment meets appropriate fire authority standards or guidelines is available as prescribed in the strategy 6.6 Implement appropriate community fire control practices
7. Decide on storage and delivery requirements	7.1 Allocate crop storage facilities, and plan and arrange for immediate delivery of the crop to packing sheds, the bulk handling system, or other purchasers 7.2 Ensure that silos, storage bins and other containers are located to enable efficient harvesting and transport operations 7.3 Identify any work health and safety hazards from silo operation and implement risk minimisation practices 7.4 Plan storage for flexible marketing and distribution initiatives 7.5 Evaluate resources required for crop transport, engage contractors where required 7.6 Identify strategies and resources to dry crops appropriately
8. Manage harvest operations	8.1 Ensure harvest plan is adhered to 8.2 Ensure adherence to all work health and safety and environmental requirements 8.3 Monitor harvest operations to ensure efficient and timely completion 8.4 Monitor crop quality against the harvesting plan as the crop is harvested and segregate into the various marketing grades 8.5 Store each crop grade as determined by the harvesting plan 8.6 Implement enterprise biosecurity policies
9. Record production	9.1 Maintain appropriate records of production for analysis and

Element	Performance criteria
level and review cropping strategies	evaluation of production performance 9.2 Monitor and evaluate crop yields against forecast production levels

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA506A Manage the harvest of crops.

Links

Assessment Requirements for AHCBA506 Manage the harvest of crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and implement harvesting operations, including amendment of these during the operation itself
- organise and schedule the maintenance of plant and equipment
- establish processes or strategies, procedures and controls for crop harvesting
- demonstrate correct use of technology to improve efficiency
- interpret, analyse and extract information from a range of sources and discussions
- assess potential yields
- negotiate and arrange contracts and agreements
- explain, and deliver instructions about the plans and scheduling of the harvest operations to both staff and contractors, as well as suppliers, customers, and neighbours
- observe, identify and react appropriately to environmental implications and work health and safety hazards
- estimate crop yield and value and monitor for harvest readiness
- plan for the resources that will be required for harvest
- negotiate insurance and equipment supply contracts
- develop risk management procedures for work health and safety, climate and fire risk
- organise for the logistics of the harvesting operation including harvesting, storage and delivery
- keep grain batches separate and monitor for pests or spoilage
- implement work health and safety policies in the context of the work team
- implement enterprise biosecurity policies
- implement enterprise environmental sustainability practices.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- capability and use of harvesting equipment
- role of technology in improving efficiency
- crop measurement techniques and parameters
- market information and sources
- contracting requirements for crop insurance
- management of the moisture content of crops, including drying and aeration
- storage options and local storage availability
- bushfire prevention and control legislation
- bushfire prevention and control strategies and equipment
- contact details for local fire services
- weather conditions which may affect the harvest
- relevant legislation and regulations relating to WHS, contractor engagement, chemical use and application, and vehicle and plant use
- environmental controls and codes of practice applicable to the business and to the harvesting operations
- sound management practices and processes to minimise noise, odours, and debris from the harvesting operations
- enterprise biosecurity policies and environmental sustainability practices.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBAC507 Develop production plans for crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop production plans for agricultural and horticultural crops.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who demonstrate deep knowledge in a specific technical area, take personal responsibility and exercise autonomy in undertaking complex work. They organise the work of self and others and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select crop species and	1.1 Establish production targets for each crop type, consistent with

Element	Performance criteria
variety	<p>marketing and enterprise objectives</p> <p>1.2 Assess and select crop types and varieties for their market potential and gross margin returns for the farm environment</p> <p>1.3 Select most profitable cultural practices and rotations, consistent with disease and pest management strategies, available machinery resources, and management for sustainability of resources</p> <p>1.4 Assess technology to ensure most efficient performance of operations</p> <p>1.5 Identify production risks for each crop and determine strategies to address these</p> <p>1.6 Identify environmental risks and develop appropriate strategies</p>
2. Establish yield potential and quality specification for crop	<p>2.1 Source relevant benchmark yields, where available, to assist setting target yields</p> <p>2.2 Analyse past production records and determine the key determinants of yield</p> <p>2.3 Use appropriate available models for calculating water use efficiency or other key determinants of yield to assist in setting target yields</p> <p>2.4 Establish quality specifications and target yields for all crops</p>
3. Prepare crop program	<p>3.1 Assess proposed crop land areas for nutrient, pest and disease status, water reserves, tillage requirements, and other factors before selecting crop variety</p> <p>3.2 Use records of chemical use for planning to reduce chemical resistance</p> <p>3.3 Select crop variety and plan paddock preparation, planting, fertilising and other treatments</p> <p>3.4 Determine optimum timing of planting, applications and treatments and prepare calendar of operations</p> <p>3.5 Determine cash flow budget for the cropping program</p>
4. Review production plan	<p>4.1 Plan logistical arrangements related to harvesting, transportation, marketing and other key production cycle operations</p> <p>4.2 Plan and check machinery and equipment requirements for the crop production cycle</p> <p>4.3 Assess work health and safety requirements of the production plan</p> <p>4.4 Identify and plan labour requirements for the crop production cycle</p> <p>4.5 Identify seed, fertiliser, pest and disease treatments and other input requirements</p> <p>4.6 Establish record keeping system provide data for the analysis of crop performance, and to meet other statutory requirements including records of chemical use</p>

Element	Performance criteria
	4.7 Review and amend production plan and documented as a final plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBA507A Develop production plans for crops.

Assessment Requirements for AHCBA507 Develop production plans for crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare budgets and gross margins
- source and interpret relevant benchmark information from consultants or peers
- assess proposed crop land areas for nutrient status by sampling and testing soils and plant tissue
- analyse past production records
- select crop species and variety
- source and interpret relevant benchmark information
- select crop species and variety and determine yield potential for crop
- demonstrate correct use of technology to improve efficiency
- prepare crop programs
- review, amend and document the production plan
- prepare budgets and gross margins
- source and interpret relevant benchmark information
- prepare individual paddock plans and a whole farm cropping plan
- assess work health and safety implications of the plan.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- determinants of crop yield
- cultural practices related to cropping
- role of technology in improving efficiency
- market prices, gross margins, cash flow budgets

- benchmark performance indicators
- disease and pest management for relevant crops
- machinery and equipment requirements for cropping
- record keeping systems.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBA508 Apply plant biology to agronomic practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the application of introductory plant biology (plant taxonomy, plant morphology and plant physiology) to a wide range of agronomic practices including crop/pasture establishment, fertiliser use, irrigation, Integrated Pest Management (IPM), crop harvesting, grazing management and the provision of specialist agronomic advice.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit applies to work as an agronomist. Work is normally undertaken without supervision.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Broad acre cropping (BAC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply plant taxonomy	1.1 Identify botanical terminology of plant taxonomy (plant kingdom

Element	Performance criteria
to agronomic practices	divisions, major plant families and genera) for plant classification 1.2 Apply the rules of plant nomenclature when naming plants 1.3 Describe the external features of plants – leaves, stems, flowers and fruits using botanical terminology 1.4 Identify a range of plants used in agronomy to species level, using plant keys and/or other references where required 1.5 Use correct botanical terminology to discuss plant taxonomy in agronomic practices
2. Identify plant functions and their impact on growth	2.1 Investigate and identify plant cell structures, their functions and the organisation of cells into primary tissues 2.2 Research the structure and functions of leaves, stems, root and flowers in relation to agronomic practices 2.3 Describe the processes and outcomes of photosynthesis, respiration and transpiration
3. Apply plant morphology to agronomic practices	3.1 Research, analyse and document specialist botanical knowledge of plant morphology (leaf, root, stem, flower and seed characteristics from development to maturity) for crop and pasture management 3.2 Use correct botanical terminology when discussing plant morphology and identifying growth stages of plants 3.3 Identify critical growth stages for crop/pasture monitoring, nutrient assessment and spray applications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to VU21630 Apply plant biology to agronomic practices.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBA508 Apply plant biology to agronomic practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use appropriate authoritative references and resources for plant classification
- apply scientific concepts of plant biology to agronomic practices
- identify plants according to accepted taxonomic classifications.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- plant morphology
- plant taxonomy
- plant physiology
- plant nomenclature according to the rules and recommendations of the International Code of Botanical Nomenclature (ICBN) and the International Code of Nomenclature for Cultivated Plants (ICNCP)
- broad knowledge of agronomic practices.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBEK201 Support beekeeping work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with routine beekeeping activities.

This unit applies to beekeepers who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for beekeeping work	1.1 Identify required materials, tools and equipment according to lists provided 1.2 Carry out checks on all materials, tools and equipment and report insufficient or faulty items 1.3 Use correct manual handling techniques when loading and

Element	Performance criteria
	unloading materials 1.4 Select personal protective equipment and check before use 1.5 Confirm the activity to be undertaken and take steps to control hazards and risks 1.6 Clarify instructions from supervisor where necessary
2. Undertake beekeeping work as directed	2.1 Carry out interactions with other staff, apiary site owners and customers in a professional manner 2.2 Follow supervisor's instructions with regards to handling and disposing materials 2.3 Use appropriate bee-handling techniques as required 2.4 Tell the supervisor if there are any problems or difficulties in completing work to required standards or timelines
3. Handle materials and equipment	3.1 Handle and transport materials, tools and equipment 3.2 Handle waste material produced during work 3.3 Maintain a clean and safe work site
4. Clean up on completion of work	4.1 Return materials to store or dispose of 4.2 Clean, maintain and store tools and equipment 4.3 Report work outcomes, seek feedback on performance and note any required improvements for future action

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK201A Support beekeeping work.

AHCBEK202 Use a bee smoker

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use a bee smoker when undertaking bee husbandry tasks.

This unit applies to beekeepers who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare bee smoker for use	1.1 Confirm the activity to undertake with supervisor 1.2 Confirm that climatic and other conditions permit the use of a bee smoker and adjust planned activities where required 1.3 Check bee smoker and components to ensure that they are in good repair and serviceable, and any faults are addressed

Element	Performance criteria
	1.4 Check personal protective equipment for serviceability and ensure correct fit 1.5 Identify hazards associated with the use of a bee smoker and take appropriate steps to minimise risks to self and others 1.6 Make sure there is an adequate water supply and tools available for fire control 1.7 Assess weather conditions, nectar flow and strain of bee to interpret defensive behaviour of colony 1.8 Add suitable fuel to bee smoker and light it 1.9 Operate bee smoker bellows to produce and maintain a steady and dense stream of cool smoke
2. Use bee smoker to manage bees	2.1 Blow smoke into entrance of hive and allow sufficient time before hive is opened 2.2 Puff additional smoke over frames and supers after hive is opened and direct smoke at bees 2.3 Ensure bees remain under control while working on hives by placing smoker within easy reach, keeping it alight and producing cool smoke until operations are complete 2.4 Place bee smoker in a cleared spot when not in use and have fire extinguishment materials and equipment on hand

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK202A Use a bee smoker.

Links

Assessment Requirements for AHCBEK202 Use a bee smoker

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and use safe work practices
- anticipate defensive behaviour of colony
- select suitable fuel
- keep a bee smoker alight and functioning while carrying out bee husbandry tasks
- monitor the effects of smoke on bees, including the wearing off of effects
- make bee smoker safe after completing operations according to fire and biosecurity procedures.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of smoking bees
- effects of smoke on bees and hive products
- suitable fuel for bee smokers
- when to use a bee smoker and why
- current fire regulations.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK203 Open and reassemble a beehive

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to open and reassemble a beehive to carry out routine bee husbandry and related tasks.

This unit applies to beekeepers who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

Where work requires the use of load-shifting equipment, appropriate training and certification must be provided according to state and territory safety and licensing requirements.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to open a beehive	1.1 Select, check and use personal protective equipment (PPE) 1.2 Identify work health and safety hazards and take action as directed 1.3 Identify tools and equipment required for the work 1.4 Conduct checks on tools and equipment and report insufficient or

Element	Performance criteria
	faulty items 1.5 Assess weather conditions and nectar availability and adjust planned activities to minimise risk of robbing and hive stress 1.6 Follow site quarantine and biosecurity protocols where in effect 1.7 Use appropriate manual or mechanical handling techniques and minimise damage to beehive
2. Open the beehive	2.1 Control bees throughout the opening process by using smoke 2.2 Carry out work from a safe position in relation to beehive 2.3 Raise beehive lid using hive tool and remove queen excluder, frames and supers as required 2.4 Place all removed frames and supers on upside down lid to ensure they remain dirt free
3. Reassemble the beehive	3.1 Place brood frames back into hive in the same position from which they were removed unless manipulation is being undertaken 3.2 Replace all frames in appropriate boxes and replace queen excluders and supers 3.3 Replace beehive lid and where used, secure with hive fastener

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK203A Open and reassemble a beehive.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBEK203 Open and reassemble a beehive

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- correctly wear appropriate personal protective equipment (PPE)
- minimise the risk of robbing and hive stress
- raise a beehive lid using a hive tool and bee smoker
- reassemble the beehive
- work safely around bees.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of opening and reassembling beehives
- bee behaviour, particularly when a beehive is disturbed
- components of a beehive.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCBEK204 Construct and repair beehives

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to construct and repair beehives.

This unit applies to beekeepers who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to construct or repair beehives	1.1 Identify required materials and equipment 1.2 Check beehive components are suitable for use 1.3 Return faulty components to storeroom and replace, repair or dispose of 1.4 Select, check and use suitable personal protective equipment

Element	Performance criteria
	1.5 Identify and report work health and safety hazards
2. Construct or repair beehives	2.1 Inspect beehives requiring repair to identify scope of job and materials and tools required 2.2 Burn or send beehives for irradiation where visual inspection or testing indicates presence of American foulbrood disease 2.3 Assemble or repair beehive components using replacement parts, nails, joins, glues and construction techniques 2.4 Apply appropriate timber treatments to beehive 2.5 Mark constructed or repaired beehive components clearly in accordance with State or Territory legislation 2.6 Report problems or difficulties in completing work to required standards or timelines 2.7 Maintain a clean and safe work site while working
3. Clean up on completion of work	3.1 Return, store or dispose of materials 3.2 Clean, maintain and store equipment 3.3 Report work outcomes or note in organisational records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK204A Construct and repair beehives.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBEK204 Construct and repair beehives

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assemble construction materials and check that they present no risk of contamination to the environment or apiculture products
- select and use tools appropriate to the task
- construct and repair beehives
- mark beehives as they are constructed or repaired
- clean and maintain equipment after completion of work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of beehive construction and repair
- construction and health standards that have to be maintained for beehives in broad terms
- hive components and the materials required to construct or repair them.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK301 Manage honey bee swarms

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect bee swarms and manage the swarming behaviour of bees.

This unit applies to beekeepers who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to catch a swarm of honey bees	1.1 Obtain equipment required to collect a swarm of honey bees and confirm it is in good repair and serviceable for use 1.2 Check personal protective equipment (PPE) for serviceability and use and wear correctly 1.3 Identify work health and safety hazards associated with collecting

Element	Performance criteria
	bee swarms and take action to deal with them effectively 1.4 Observe site quarantine or other biosecurity protocols 1.5 Identify risks associated with collecting a swarm of honey bees and take actions to minimise likelihood and consequences of risks
2. Collect a swarm of honey bees	2.1 Place dry drawn frames in hive box for collected swarm to ensure it remains in new hive box 2.2 Catch swarm by shaking it into an empty box 2.3 Move boxed swarm to new location after confirming that whole swarm has been collected 2.4 Keep swarm separate from other hives to monitor hive health and disease-free status 2.5 Re-queen a swarm
3. Manage swarming behaviour in a honey bee colony	3.1 Monitor honey bee colony for signs that swarming may occur 3.2 Consider a range of control options if swarming appears likely to occur, and select and implement the best option 3.3 Monitor colony to ensure that swarming behaviour has been controlled and if necessary, implement further control options

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK301A Manage honey bee swarms.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBEK301 Manage honey bee swarms

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- correctly wear appropriate personal protective equipment (PPE)
- communicate with members of the public and/or owners or managers of the property/area from which a swarm is being collected
- collect a swarm of honey bees
- implement a range of control options to manage swarming behaviour in honey bees
- interpret bee behaviour and handling bees
- use specialist equipment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of managing swarms
- why and when honey bees swarm
- why swarms are collected
- signs that a colony is about to swarm
- management techniques that can be used to manage a colony that is showing signs it is about to swarm
- biosecurity protocols
- diseases that occur in honey bees
- signs of brood disease and wax moth infestation in a swarm once it has been placed in a hive
- when and how to requeen a swarm that has been collected.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK302 Manipulate honey bee brood

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manipulate a honey bee brood to achieve desired outcomes.

This unit applies to beekeepers who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to manipulate brood combs	1.1 Clarify reason for manipulating brood and plan appropriate sequence of actions 1.2 Select tools and equipment required to manipulate brood and check prior to use 1.3 Identify work health and safety hazards associated with

Element	Performance criteria
	manipulating brood and take actions to minimise risk to self and others 1.4 Select and use suitable personal protective equipment (PPE) and check prior to use 1.5 Observe site quarantine or other biosecurity protocols in force 1.6 Identify risks to colony, including to brood and queen bee, and take actions to minimise likelihood and consequences of risks
2. Manipulate brood	2.1 Open hive and remove combs in planned sequence and place in suitable position 2.2 Replace frames in same or new sequence and position, or remove to another hive according to purposes for which brood is being manipulated 2.3 Monitor hive and colony after the manipulation process and take appropriate action if needed to minimise any disturbance to brood 2.4 Dispose of waste materials appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK302A Manipulate honey bee brood.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBEK302 Manipulate honey bee brood

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- correctly wear appropriate personal protective equipment (PPE)
- determine when and how a honey bee brood should be manipulated to achieve a desired outcome
- identify hazards and implement safe work procedures handling bees
- handle materials and equipment
- use a bee smoker
- open hives and remove and reposition frames safely with minimal damage or unintended disturbance to brood
- clean up on completion of work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of brood manipulation
- biosecurity involved when moving bees
- bee behaviour
- bee handling techniques
- different types of manipulation that may be used to achieve desired result
- fire risk level
- purposes for which brood may be manipulate.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK303 Re-queen a honey bee colony

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to re-queen a honey bee colony with a replacement queen.

This unit applies to beekeepers who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify requirement to re-queen a colony	1.1 Assess the vigour of the current queen 1.2 Monitor colony for signs that indicate queen replacement is necessary
2. Prepare to re-queen a colony	2.1 Check personal protective equipment (PPE) for serviceability and use and wear correctly

Element	Performance criteria
	2.2 Identify work health and safety hazards associated with task and take action to deal with them effectively 2.3 Obtain replacement queen that meet enterprise criteria from a commercial supplier or from own breeding stock 2.4 Store replacement queen and any escort worker bees in appropriate conditions and monitor until re-queening is undertaken 2.5 Monitor hive to ensure re-queening occurs under optimum conditions 2.6 Confirm replacement queen as being healthy and free from pests and diseases
3. Introduce replacement queen bee	3.1 Find old queen bee in the hive and remove 3.2 If replacing queen bee with a nucleus colony, place nucleus colony on top of colony to be re-queened with the two colonies separated by a single layer of paper 3.3 If replacing the queen bee with a caged queen bee, remove cork from candy end (if in place) and introduce into the hive using a suitable, proven introduction method 3.4 Leave hive undisturbed for a period of ten days
4. Monitor progress of a replacement queen bee	4.1 After ten days, monitor the hive for acceptance of replacement queen bee by colony 4.2 Monitor replacement queen bee for evidence of egg laying and adequate levels of hatching

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK303A Re-queen a honey bee colony.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBEK303 Re-queen a honey bee colony

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- wear suitable personal protective equipment (PPE) correctly
- identify hazards and implement safe work practices
- identify the need to re-queen
- assess suitability of conditions for re-queening
- identify disease status of parent colonies
- install replacement queen bee
- monitor activity of new queen bee and the threat of competition.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of re-queening
- conditions required for re-queening
- factors that may affect brood production
- factors to consider when identifying and removing old queen and introducing new queen
- queen bee behaviour and brood pattern
- selection criteria for new queen bee
- storage requirements of queen bees before being introduced into the colony.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK304 Remove a honey crop from a hive

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to remove a honey crop from a hive by removing bees and combs from the hive and removing filled combs from the hive to other boxes for transport to the extracting facility.

This unit applies to beekeepers who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to remove honey	1.1 Obtain tools and equipment and confirm they are in good repair and serviceable for use 1.2 Check personal protective equipment (PPE) for serviceability and wear and use correctly

Element	Performance criteria
	1.3 Identify work health and safety hazards, assess risks and implement control measures 1.4 Identify and meet food safety requirements 1.5 Observe site quarantine or other biosecurity protocols 1.6 Determine ripeness of honey to ensure it is mature enough to be harvested 1.7 Observe any withholding periods for honey bee medications and treatments 1.8 Take into account potential contaminants, impact on the colony and quality and type of honey to be obtained when planning the time and location of the honey removal 1.9 Identify factors affecting the quantity of honey to be removed from hive and take these into consideration when removing honey
2. Remove honey from the hive	2.1 Consider a range of suitable methods for removing bees from honey-filled combs and select and implement the best option or combination of options 2.2 Consider a range of suitable methods for removing the honey crop in the frames from the hive and implement the best option or combination of options 2.3 Monitor the quality of the honey during removal process and, if required, modify removal methods to ensure that desired quality standards are achieved and maintained 2.4 Transport honey-filled frames to extracting facility

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK304A Remove a honey crop from a hive.

Links

Assessment Requirements for AHCBEK304 Remove a honey crop from a hive

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- wear appropriate personal protective equipment (PPE) correctly
- work safely with and around bees
- determine the ripeness of honey and filling of comb cells
- handle frames and combs filled with honey so that they are not contaminated with dust, dirt or water
- select and use the most suitable methods for removing bees and honey-filled frames from hive
- use safe manual and/or mechanical handling techniques.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of honey removal
- food safety requirements
- methods to remove bees from hives
- the indicators of ripe honey and adequately filled cells
- the withholding periods of medications and/or treatments.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK305 Extract honey

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate honey extraction equipment safely to extract honey fit for human consumption. The work may be carried out in a mobile processing facility or a purpose built fixed facility.

This unit applies to beekeepers who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to extract honey	1.1 Select, check and use suitable personal protective equipment (PPE) 1.2 Identify work health and safety hazards and take action to

Element	Performance criteria
	minimise risks to self and others 1.3 Check all equipment is clean, dry, sanitised and serviceable 1.4 Observe personal hygiene requirements including washed hands and wearing of clean clothing
2. Extract honey	2.1 Comply with Quality Assurance (QA) and food safety requirements throughout the process of extracting honey 2.2 Inspect frames visually for areas of brood and, if found, uncap frames by hand to avoid brood 2.3 Warm combs where required to assist the extraction process 2.4 Uncap cells using a hand knife or machine, avoiding damage to cells and frames 2.5 Place frames in the extraction unit and operate the unit
3. Handle extracted honey	3.1 Heat the extracted honey up to 30°C, if necessary, to assist in removing wax, air bubbles, pollen and bees 3.2 Check moisture content of honey and take action to maintain appropriate moisture as required 3.3 Take action to reduce risk of fermentation of honey
4. Store honey	4.1 Store cleaned honey in containers to meet health regulations and customer requirements 4.2 Take a reference sample of honey, label and store 4.3 Clean, dry and sanitise all equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK305A Extract honey.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBEK305 Extract honey

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- correctly wear appropriate personal protective equipment (PPE)
- Identify hazards and use equipment safely
- distinguish between honey cells and brood cells
- extract honey in compliance with Quality Assurance (QA) and food safety requirements
- sample honey to meet Quality Assurance and food safety requirements
- store extracted honey to reduce the risk of spoilage.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of honey extraction
- biosecurity protocols for honey extraction and movement
- equipment and its maintenance requirements
- food safety systems and requirements
- quality assurance requirements designed for the honey industry
- the effect of heat and extraction processes on honey.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK306 Manage pests and disease within a honey bee colony

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to inspect a honey bee colony for indicators of disease or evidence of pests, and take appropriate follow-up action.

This unit applies to beekeepers who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

All work is carried out to comply with notifiable disease legislation and relevant industry standards and protocols.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to check brood	1.1 Use suitable personal protective equipment (PPE)

Element	Performance criteria
	1.2 Use tools and equipment to open a hive 1.3 Identify work health and safety hazards associated with opening a hive and take actions to minimise risk to self and others
2. Assess health and condition of brood	2.1 Inspect hive for signs of diseased brood being ejected from hive at entrance or bottom board 2.2 Inspect brood for signs and evidence of pests and disease and, where pests or notifiable disease is observed, notify authorities and take action 2.3 Identify signs of disease or pests, collect samples for testing and gather evidence to support a diagnosis
3. Assess health and condition of adult bees	3.1 Observe flight paths around hive entrance for signs of poor or irregular flight patterns and for dead or dying bees at hive entrance 3.2 Observe adult bees and brood combs for signs of disease and, if notifiable disease is present, notify authorities and take action 3.3 Identify signs of disease or pest, collect samples for testing and gather evidence to support a diagnosis 3.4 Implement biosecurity measures 3.5 Record results of inspections and any remedial action taken and use as the basis of future beekeeping operations

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK306A Manage pests and disease within a honey bee colony.

Assessment Requirements for AHCBEK306 Manage pests and disease within a honey bee colony

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- identify key signs and symptoms of disease and pests that may affect brood or adult honey bees
- work safely around bees
- report signs of notifiable diseases
- take samples
- take appropriate actions to eliminate or manage pests and diseases.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of disease management within a honey bee colony
- how pests and diseases are spread and level of risk to beekeeping
- the signs of endemic and exotic disease and pests of honey bees and treatments.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK401 Collect and store propolis

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect and store propolis. It applies to those involved in the specialist production of propolis in line with food safety and quality assurance requirements.

This unit applies to beekeepers who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to collect propolis	1.1 Select or acquire suitable colony 1.2 Clean and sanitise equipment to be used in collection of propolis 1.3 Select and check suitable personal protective equipment (PPE)

Element	Performance criteria
	before use 1.4 Identify work health and safety hazards and take action to minimise risks to self and others 1.5 Construct and install suitable propolis trap or create cracks for bees to place propolis 1.6 Stimulate propolis production by manipulation of environmental conditions
2. Collect and store propolis	2.1 Remove propolis from hive frames, lids, boxes or propolis trap 2.2 Comply with quality assurance and food safety requirements throughout collection and storage of propolis 2.3 Observe personal hygiene requirements including washing hands and wearing clean clothing 2.4 Select appropriate extraction method and extract propolis 2.5 Store extracted propolis in appropriate clean and dry conditions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK401A Collect and store propolis.

Assessment Requirements for AHCBEK401 Collect and store propolis

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- correctly use appropriate personal protective clothing (PPE)
- apply quality assurance and food safety procedures
- handle bees and work safely around them
- judge the suitability of a colony for propolis collection
- remove propolis from hive frames, lids, boxes or propolis traps
- maintain a healthy hive and colony
- recognise propolis and distinguish it from other substances collected by bees
- recognise suitable flora for propolis production.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics of bees and their behaviour
- food safety requirements
- quality assurance requirements designed for the honey industry
- suitable conditions and constraints on collecting propolis.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK402 Perform queen bee artificial insemination

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect semen from drone honey bees and inseminate a queen bee.

This unit applies to beekeepers who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Determine breeding method	1.1 Review options for artificial breeding to determine the most suitable and affordable method in line with breeding objectives 1.2 Select an artificial breeding option in line with the organisation's breeding program and queen and drone management program and

Element	Performance criteria
	match to resources 1.3 Identify, source and arrange resource requirements 1.4 Prepare program schedules based on available resources 1.5 Confirm that suitable personal protective equipment for self and breeding support staff is available and in good condition
2. Implement breeding method	2.1 Obtain genetic material from reliable and legitimate sources 2.2 Receive, check and store genetic material to ensure maximum viability and program outcomes 2.3 Manage rearing times so that queen bees and drones are of appropriate age and condition when artificial insemination is scheduled to occur 2.4 Collect semen from drones, prepare queens and inseminate using hygienic techniques to minimise risk of contamination 2.5 After insemination, place queen in a colony of suitable strength and monitor.
3. Monitor and maintain program	3.1 Review adjustments in genetic material transfer practices to enhance success of future programs 3.2 Document data on genetic material transfer programs 3.3 Calculate and use success rates from breeding objectives to determine success of artificial insemination program 3.4 Identify and record modifications to queen and drone management program to assist continuous improvement processes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK402A Perform queen bee artificial insemination.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBEK402 Perform queen bee artificial insemination

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- schedule and obtain resources for insemination activities
- determine artificial insemination timing
- match queen and drone cycles
- prepare queen and drone honey bees for artificial insemination
- use appropriate artificial insemination techniques
- keep records in relation to an artificial insemination program
- maintain required hygiene standards
- manage queen bees after insemination
- identify that an inseminated queen bee is laying fertilised eggs.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of artificial insemination of queen bees
- anatomy and physiology of reproductive organs and reproductive process in queen and drone honey bees
- genetics and inheritance of bee characteristics
- artificial breeding methods and the benefits and limitations of methods used
- honey bee health and abnormalities
- identification systems for queen and drone honey bees and semen
- physical resource requirements and how to safely handle and transport bees
- artificial insemination policies and recording and reporting requirements
- preparation requirements for artificial insemination

- semen collection and homogenising processes
- organisational breeding programs.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK403 Produce and harvest royal jelly

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to produce and harvest royal jelly.

This unit applies to beekeepers who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to produce and harvest royal jelly	1.1 Select and use personal protective equipment (PPE) 1.2 Identify work health and safety hazards associated with working with bees and take appropriate action to minimise risks to self and others

Element	Performance criteria
	1.3 Assess hive for suitability for production of royal jelly 1.4 Prepare hive and put in artificial queen bee cells 1.5 Graft bee larvae 1.6 Stimulate production of royal jelly 1.7 Ensure production equipment is clean and sanitised
2. Collect and store royal jelly	2.1 Adhere to personal hygiene requirements, including washed hands and wearing clean clothing 2.2 Ensure collection and storage equipment is clean and sanitised 2.3 Remove larvae carefully from cell with a grafting tool so as not to contaminate jelly, and discard larvae 2.4 Remove royal jelly from each cell 2.5 Filter royal jelly through fine nylon net to remove traces of wax or larvae 2.6 Place harvested royal jelly into appropriate hygienic containers, avoiding excessive exposure to air, and refrigerate immediately
3. Finalise tasks	3.1 Check and clean equipment and return to store area 3.2 Keep and maintain records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK403A Produce and harvest royal jelly.

Assessment Requirements for AHCBEK403 Produce and harvest royal jelly

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare hives for royal jelly collection
- handle bees
- graft larvae and stimulating royal jelly production
- remove larvae
- collect and store royal jelly
- keep records of royal jelly production for food safety and quality assurance requirements.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- correct cleaning and sanitation methods
- food safety requirements
- quality assurance requirements designed for the honey industry
- the role of nurse bees in royal jelly production
- bee biology.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK404 Provide bee pollination services

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide bee pollination services. This unit applies to beekeepers who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area.

They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess pollination service requirement	1.1 confirm with client the pollination services to be provided 1.2 Determine number and types of colonies required for crop 1.3 Assess strength and condition of bee colonies for their suitability for use as crop pollinators

Element	Performance criteria
	1.4 Assess risk of pollination problems with client and agree and establish process to monitor risk 1.5 Provide technical information to client
2. Price and formalise agreement for pollination services	2.1 Identify and calculate costs in providing pollination services 2.2 Confirm with client the price for pollination services 2.3 Make and document formal agreement with client
3. Monitor pollination performance of bee colonies	3.1 Liaise with client on spraying programmes 3.2 Monitor crop within appropriate timeframe for evidence of bee foraging and pollination efficiency 3.3 Take remedial action where required 3.4 Demonstrate hive strength and condition to client 3.5 Maintain swarm control 3.6 Carry out bee husbandry practices
4. Comply with industry and legislative requirement	4.1 Obtain appropriate health certificates and permits where bees are to be moved across state borders 4.2 Follow appropriate pollination code of practice 4.3 Comply with all Apiary Acts and other relevant Acts and regulations and local government regulations affecting beekeeping

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK404A Provide bee pollination services.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBEK404 Provide bee pollination services

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess hive condition and suitability for pollination
- calculate strength and numbers of bee colonies required to pollinate crop
- identify suitable locations within crop or site for hive placement
- manage the pollination process by honey bee colonies
- monitor chemical use near hives
- monitor climate and weather
- monitor hive activity on target crop
- negotiate a price for pollination with a customer.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- chemicals used on crops to be pollinated and available alternatives
- environmental and climatic factors affecting bee foraging behaviour and pollination
- essential elements of a valid contract
- how to manage the health and performance of bee colonies
- pollination requirements of major crops in locality of operation, including nearby crops and plants that may be more attractive to foraging bees
- the nutrition and water requirements of bees
- where to locate colonies to maximise pollination
- how to negotiate a price and formalise an agreement for pollination services.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK405 Select and establish an apiary site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit describes the skills and knowledge required to select, establish and evaluate an apiary site.

This unit applies to beekeepers who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan to select and establish an apiary site	1.1 Establish criteria for selecting a site 1.2 Identify suitable locality in which to search for site 1.3 Gather and analyse information about potential sites in selected locality

Element	Performance criteria
	1.4 Identify criteria to assess the suitability of the site 1.5 Select suitable site
2. Select the apiary site	2.1 Determine capacity of available flora to support desired number of hives at site 2.2 Prepare a plan to establish an apiary at the selected site 2.3 Select precise areas to establish an apiary within the site, taking into account relevant planning and land use regulations, proximity to flora, water, general public, animals, gates, stockyards and movement of the sun, accessibility of the site, nearby land use, and protection from extreme environmental conditions 2.4 Obtain permission (where necessary) to locate beehives at sites from land/site owner, manager, landlord or body corporate.
3. Establish the apiary at the selected site	3.1 Select suitable personal protective equipment (PPE) to establish an apiary site and check before use 3.2 Select tools and equipment required and check before use 3.3 Identify work health and safety hazards and take actions to minimise risk to self and others 3.4 Load and unload beehives at site 3.5 Observe and record the access of bees to floral sources and water, of colony strength and honey production 3.6 Monitor the suitability of the site and reposition hives as required or seek a new site 3.7 Record results of inspections and any remedial action taken and use as basis for future beekeeping operations

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK405A Select and establish an apiary site.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCBEK405 Select and establish an apiary site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine an apiary location to meet the nutritional requirements of a colony
- determine site selection criteria
- identify and assess hazards
- establish an apiary at a selected site
- identify and assess flora for their pollen and nectar flow productivity
- load and unload beehives.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional and other requirements of a bee colony
- sources of information about potential sites
- criteria for selecting a site including relevant planning and land use regulations
- personal protective equipment (PPE) and tools and equipment for handling bees and beehives.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

AHCBEK406 Trap and store pollen

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to construct and install a suitable pollen trapping mechanism and store pollen appropriately according to its intended use.

This unit applies to beekeepers who analyse information and exercise judgement to complete a range of advanced skilled activities and who demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to trap and store pollen	1.1 Select suitable floral resources 1.2 Assess colony for suitability for pollen collection 1.3 Select and use personal protective equipment (PPE)

Element	Performance criteria
	1.4 Identify work health and safety hazards and take appropriate action to minimise risks to self and others 1.5 Ensure equipment to be used in the process of collecting pollen is clean and sanitised according to food safety requirements
2. Collect pollen	2.1 Construct suitable pollen trapping mechanism and install in hive 2.2 Adhere to personal hygiene requirements including washed hands and wearing clean clothing 2.3 Collect pollen at appropriate frequency 2.4 Assess risk of theft by ants and take steps to reduce likelihood of this occurring 2.5 Assess risk of contamination by moth larvae and take steps to reduce likelihood of this occurring 2.6 Assess risk of colony decline and stop pollen collection if necessary 2.7 Store pollen temporarily in a suitable container to be transported to processing facilities
3. Process pollen	3.1 Clean pollen to remove all foreign material 3.2 Dry pollen until moisture content is appropriate to prevent fermentation and deterioration and store appropriately 3.3 If not dried, freeze immediately to prevent fermentation and deterioration

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK406A Trap and store pollen.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBEK406 Trap and store pollen

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- build or purchase a suitable pollen trap
- assess suitability of colonies for pollen collection
- correctly wear appropriate personal protective equipment (PPE)
- collect and process pollen
- manage the hive
- maintain records
- handle bees
- clean and sanitise equipment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of trapping and storing pollen
- bee colony pollen requirements
- bee handling techniques
- floral sources of pollen production
- quality assurance requirements designed for the honey industry
- requirements for commercial processing.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBEK407 Rear queen bees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to rear high quality queen bees and queen cells through the application of good management practices.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Beekeeping (BEK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish conditions and obtain requirements for queen bee rearing	1.1 Select breeding stock from productive healthy stock or purchase breeder queen bee 1.2 Obtain all tools and equipment needed to rear queen bees 1.3 Select and use personal protective equipment 1.4 Identify work health and safety hazards and take action to minimise them 1.5 Observe site quarantine or other biosecurity protocols in force 1.6 Confirm all hives and colonies used for queen bee and drone production are in a clean and healthy condition

Element	Performance criteria
	1.7 Select day-old larvae from the breeder queen bee for grafting and transfer from worker cells into queen cell cups 1.8 Confirm an adequate number of nurse bees are present in cell raising colonies 1.9 Use a suitable method for cell production
2. Establish and monitor the queen mating process	2.1 Transfer ripe queen cells into the nucleus 10 to 11 days after grafting 2.2 Provide an adequate number of mature, well-nourished and genetically suitable drones during mating period 2.3 Record details of grafting and subsequent placement of cells into nucleus colonies 2.4 Record the age of the queen removed from mating colony

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBEK407A Rear queen bees.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBEK407 Rear queen bees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- select breeding stock or purchase breeder queen bee according to established breeding program criteria
- graft larvae of a suitable age
- assess and maintain nutrition and health of larvae and drones
- manage the hive
- handle bees
- appropriately monitor the queen mating process
- recognise diseases, pests and disorders and take appropriate action.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of rearing queen bees
- signs of brood and adult bee ill health sufficient to recognise diseases, pests and disorders and take appropriate action
- storage requirements of queen bees
- techniques and timing for queen cell production
- optimum conditions are for re-queening
- bee biology.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBER301 Work effectively in an emergency disease or plant pest response

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to work effectively within own area of responsibility while responding to an emergency disease or plant pest incursion.

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Emergency Response (BER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify information required	1.1 Access information about emergency disease or plant pest and appropriate response to apply during an emergency response 1.2 Use information to address specific work needs and identify further information requirements 1.3 Identify and access information and resources required from stakeholders
2. Carry out work	2.1 Communicate with stakeholders according to organisational procedures 2.2 Carry out work activities to conform to relevant legislation, regulations, procedures and codes of practice appropriate to work area and level of responsibility 2.3 Identify hazards and risks relevant to specific work being undertaken and respond as required
3. Manage own work	3.1 Interpret work instructions and seek clarification if inconsistencies are noted 3.2 Assess workload and prioritise competing demands to achieve personal, team and organisational goals and objectives 3.3 Communicate the need for physical and human resources clearly to appropriate person 3.4 Perform own role, responsibilities and duties in a positive manner to promote cooperation within the workplace 3.5 Respect the importance of own and others' roles in achieving organisational goals 3.6 Recognise personal symptoms of stress and its potential to impact on performance and take action to minimise negative effects 3.7 Report undue personal stress to appropriate person
4. Comply with biosecurity requirements	4.1 Identify biosecurity procedures relevant to own work area 4.2 Maintain personal protective equipment and fomites according to biosecurity procedures 4.3 Report biosecurity breaches immediately to appropriate person 4.4 Complete biosecurity records according to work area requirements
5. Adapt to change as required	5.1 Identify and assess any need for change in own work practices to reflect critical emergency issues or emerging trends 5.2 Discuss and seek agreement with senior staff if changes are required 5.3 Change own work practices where required and according to agreed arrangements 5.4 Apply a flexible approach that takes account of changing priorities and circumstances when implementing instructions for

Element	Performance criteria
	changes to work practices 5.5 Monitor change to determine the effectiveness of revised work practices and advise senior staff members of findings

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO301A Work effectively in an emergency disease or plant pest response.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBER301 Work effectively in an emergency disease or plant pest response

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and use information to determine appropriate response, work needs, and information and resources to be accessed from stakeholders
- carry out work activities to conform with national plan
- communicate with stakeholders
- identify hazards and risks
- manage own work load and priorities
- interpret work instructions and seek clarification as needed
- recognise and respond to personal stress
- promote cooperation and respect within work team
- communicate the need for physical and human resources
- comply with biosecurity requirements for personal protective equipment and fomites, reporting biosecurity breaches and completing records
- adapt to and monitor change
- complete biosecurity records.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP) relating to an emergency disease or plant pest incursion response
- organisational procedures for communication in an emergency response
- common physical and human resources needed in an emergency response
- common work health and safety, and biosecurity hazards in an emergency response

- personal protective equipment, and fomites relevant to emergency response
- signs of personal stress and potential impact on response
- techniques for prioritising work activities and time management
- techniques for managing own responses to change, and to personal stress
- communication principles for working effectively in teams, and reporting information
- records required to be kept during an emergency response.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBER303 Carry out emergency disease or plant pest control procedures at infected premises

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out emergency disease or plant pest control activities at a site affected by an emergency disease outbreak or plant pest incursion.

The unit applies to personnel who undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Emergency Response (BER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for emergency disease or plant pest control activities	1.1 Clarify work instructions received from infected premises (IP) site supervisor in preparation for carrying out control procedures 1.2 Select and prepare appropriate equipment and materials to undertake control activities in line with IP site supervisor's work instructions and associated safety requirements 1.3 Select and prepare personal protective equipment (PPE) 1.4 Identify animal welfare considerations if dealing with an emergency disease
2. Carry out emergency disease or plant pest control activities	2.1 Implement control activities in line with work instructions, work health and safety requirements and standards and protocols 2.2 Maintain a log of activities carried out on the IP in accordance with instructions from IP site supervisor 2.3 Use PPE as instructed by IP site supervisor 2.4 Give and receive work instructions within own area of responsibility
3. Check and adjust emergency disease or plant pest control activities	3.1 Check control activities within own area of responsibility regularly to ensure compliance with work instructions, work health and safety requirements and standards and protocols 3.2 Provide reports to IP site supervisor as required 3.3 Report any variations from work instructions and standards and protocols, or failure to achieve objectives to IP site supervisor and undertake remedial action within own scope of authority 3.4 Communicate any recommendations for adjusting work instructions to IP site supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO303A Carry out emergency disease or plant pest control procedures at infected premises.

Assessment Requirements for AHCBER303 Carry out emergency disease or plant pest control procedures at infected premises

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for control activities
- follow infected premises (IP) site supervisor instructions
- identify animal welfare concerns
- select, prepare and use personal protective equipment (PPE)
- apply biosecurity principles and work health and safety practices in implementing, monitoring and reporting on variations to control activities
- implement control activities
- monitor, review and report on control activities within area of own responsibility, for compliance and effectiveness
- undertake remedial action within own scope of authority
- provide reports to IP site supervisor on variations to activities, failure to meet objectives and recommendations for adjustments to work instructions
- communicate effectively with IP site supervisor and when giving and receiving work instructions to others
- maintain log of activities as required.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- common control activities associated with emergency disease and plant pest control procedures at infected premises (IP)
- objectives and work instructions commonly associated with IP control responses
- own work role and responsibilities within an IP control response

- animal welfare guidelines relevant to the species, disease and IP environment if animals are under control procedures
- PPE gear commonly used in IP control response
- biosecurity principles commonly associated with an IP control response
- safe work practices applicable to work role and responsibilities in an IP environment
- reporting templates and requirements for logging control activities
- communication principles used in giving, receiving and clarifying instructions, and reporting on control activities.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBER304 Carry out movement and security procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement appropriate procedures to restrict the movement of vehicles, personnel, products, livestock and plant material in relation to managing an emergency disease or plant pest incursion.

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Emergency Response (BER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to carry out	1.1 Identify specific movement and security procedures to be carried

Element	Performance criteria
movement and security procedures	<p>out, including times and locations of operations from work instructions</p> <p>1.2 Obtain personal protective equipment required for particular procedures to be carried out and check for serviceability and use</p> <p>1.3 Obtain documentation required to carry out specific procedures</p> <p>1.4 Obtain resources required to carry out specific procedures and check for serviceability and use</p>
2. Carry out movement and security procedures	<p>2.1 Establish a traffic check point according to work instructions</p> <p>2.2 Monitor movement of vehicles, personnel, products, livestock or plant material through declared areas in line with requirements</p> <p>2.3 Issue and check permits according to standards and protocols</p> <p>2.4 Take action in accordance with standards and protocols where vehicles are determined to be carrying personnel, products, livestock or plant material without a valid permit</p> <p>2.5 Maintain close liaison with external security providers as required</p> <p>2.6 Use personal protective equipment where required</p> <p>2.7 Decontaminate resources appropriately where required</p>
3. Check and adjust movement and security procedures	<p>3.1 Check application of movement and security procedures regularly within own area of responsibility to ensure consistency, currency and ongoing effectiveness</p> <p>3.2 Report any variations in consistency, currency and ongoing effectiveness or failure to achieve objectives to appropriate authorities and undertake remedial action within own scope of authority</p> <p>3.3 Communicate any recommendations for adjusting movement and security procedures to supervisor and appropriate authorities</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO304A Carry out movement and security procedures.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCBER304 Carry out movement and security procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must undertake movement and security procedures including establishing a traffic check point and monitoring the movement of vehicles and issuing permits.

The candidate must demonstrate that they can:

- determine logistics and required documentation applicable to specific movement and security operations
- obtain and check any resources and personal protective equipment (PPE)
- establish and operate traffic checkpoint
- issue and check permits
- respond to vehicles without valid permit for load being transported as appropriate to standards and protocols
- liaise with external security providers
- use PPE and decontaminate resources as required
- monitor, review and report on application of movement and security procedures within area of own responsibility
- undertake remedial action within own scope of authority
- provide reports on variations to appropriate authorities in consistency, currency and ongoing effectiveness or failure to achieve objectives
- communicate recommendations on adjusting movement and security procedures to supervisor and appropriate authorities.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- movement and security procedures commonly associated with movement and security controls during a disease or plant pest incursion
- AUSVETPLAN or PLANTPLAN, and other relevant standards and protocols to determine:

- permits and documentation associated with implementing movement and security procedures
- action required for any vehicle without a valid permit
- biosecurity principles associated with movement and security procedures, use of PPE gear, and need for decontamination
- safe work practices
- objectives and work instructions associated with movement and security procedures
- own work role, responsibilities and scope of authority in implementing movement and security procedures
- decontamination procedures for PPE and resources
- reporting templates
- communication principles used in operating a traffic control point, issuing permits and documentation, and reporting to supervisor and appropriate authorities.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBER401 Plan and supervise control activities on infected premises

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise others in the range of activities required on infected premises (IP).

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response. Work is generally carried out under general instructions from the IP operations manager.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Emergency Response (BER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
<p>1. Plan emergency disease or plant pest control activities on an IP</p>	<p>1.1 Plan emergency disease or plant pest control activities under direction from IP operations manager and in consultation with property owner or manager and taking into consideration environmental values that need to be protected</p> <p>1.2 Confirm all IP procedures with IP operations manager and communicate to property owner or manager</p> <p>1.3 Develop a schedule for implementation of emergency disease or plant pest control activities and request resources required for planned activities</p> <p>1.4 Establish reporting processes</p> <p>1.5 Establish staff rosters to support activities in a cost-effective manner and with minimal stress on personnel</p>
<p>2. Supervise emergency disease or plant pest control activities</p>	<p>2.1 Assign personnel to team leader and worker positions required by IP operations functions to be performed and give directions for tasks to be performed</p> <p>2.2 Conduct emergency disease or plant pest control activities with ongoing consultation with IP operations manager and property owner or manager</p> <p>2.3 Supervise emergency disease or plant pest control activities to ensure that they are cost-effective, make effective use of resources and avoid unnecessary property damage and livestock or crop destruction</p> <p>2.4 Monitor valuations of materials requiring destruction, use of plant, equipment and materials and all IP service provision to ensure they adhere to relevant standards, national plans, protocols and contract requirements</p> <p>2.5 Monitor supplies of materials and resources to ensure that they are adequate to meet needs of control activities</p> <p>2.6 Maintain an incident log that includes details of all activities undertaken as well as contractors' hours and performance</p> <p>2.7 Supervise and motivate personnel to carry out specific emergency disease or plant pest control activities to the standard required</p>
<p>3. Check effectiveness of emergency disease or plant pest control activities</p>	<p>3.1 Monitor effectiveness and progress of control activities and compare with planned objectives</p> <p>3.2 Carry out inspections of teams on site with sufficient regularity to ensure that standards are applied in line with required standards and protocols</p> <p>3.3 Provide progress reports to IP operations manager according to agreed reporting schedule and format</p> <p>3.4 Keep records as required by standards and protocols</p>
<p>4.1 Revise site-specific emergency disease or</p>	<p>4.1 Revise control activities as required to address relevant protocols, maintain cost-effectiveness including appropriate resource</p>

Element	Performance criteria
plant pest control activities	allocation and to contain wider impacts 4.2 Communicate revisions to activities promptly To Local Control Centre (LCC)

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO401A Supervise activities on infected premises.

Assessment Requirements for AHCBER401 Plan and supervise control activities on infected premises

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- consult with infected premises (IP) manager and property owner or manager on planning and implementation matters
- plan control activities for emergency disease or plant pest control response:
- schedule implementation of control activities
- identify IP procedures required, and confirm with IP manager
- request resources required for planned activities
- establish reporting processes
- establish staff rosters
- communicate with property owner or manager on IP procedures
- supervise and motivate personnel to carry out control activities to standards and protocols required, and confirm with on-site inspections of teams
- monitor supplies of materials and resources and maintain to meet needs of control activities
- monitor all IP service provision for adherence to standards, protocols and contractual arrangements
- maintain incident log, and records of control activities
- monitor control activities for value for money, and minimal impact on property, effectiveness and progress against planned objectives
- report on progress of control activities against plan to IP operations manager
- revise control activities as required to address relevant protocols whilst maintaining cost effectiveness and wider impacts
- communicate revisions to control activities to Local Control Centre (LCC).

Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP) that guide development and implementation of IP control plan, contractual arrangements and control procedures
- planning processes
- communication principles used for consultation, providing information, reporting, and in interacting with personnel
- supervisory and monitoring practices used with personnel
- techniques for motivating personnel
- contractual arrangements
- reporting requirements
- processes for planning, scheduling, monitoring progress and costs.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBER402 Carry out field surveillance for a specific emergency disease or plant pest

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out field surveillance for a specific emergency disease or plant pest.

The unit applies to personnel who have been appointed or engaged as part of a field surveillance team to undertake a role within an emergency disease or plant pest incursion response. Field surveillance teams work under instructions from the control centre.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Emergency Response (BER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Look for signs of a specific emergency disease or plant pest	1.1 Receive and confirm work instructions from surveillance coordinator or other appropriate authority 1.2 Identify signs of an emergency disease or plant pest, collect appropriate samples for testing, and gather evidence to support a diagnosis according to relevant standards and protocols 1.3 Access appropriate available expertise to assist in diagnosis 1.4 Collect, handle, package and dispatch diagnostic samples according to relevant standards and protocols
2. Respond to an emergency disease or plant pest	2.1 Alert surveillance coordinator when signs of an emergency disease or plant pest are found 2.2 Take appropriate measures to immediately contain emergency disease or plant pest according to instructions from control centre and relevant guidelines 2.3 Collect information relevant to management of emergency disease or plant pest outbreak and report to surveillance coordinator 2.4 Give directions and warnings to property owners or persons in charge about suspected emergency disease or plant pest 2.5 Conduct personal decontamination and, where appropriate, equipment and vehicle decontamination according to relevant standards and protocols for emergency disease or plant pest

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO402A Carry out field surveillance for a specific emergency disease or plant pest.

Assessment Requirements for AHCBER402 Carry out field surveillance for a specific emergency disease or plant pest

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- undertake field surveillance for specific disease or plant pest as directed
- report findings of specific disease or plant pest along with samples and evidence to support find
- follow relevant standards and protocols to identify and report findings
- use appropriate available expertise to assist in identification and diagnosis
- follow relevant standards and protocols in collection, handling, packaging and despatch of samples
- contain emergency disease of plant pest as directed by control centre and relevant guidelines
- collect and report information relevant to management of outbreak to surveillance coordinator
- give directions and warnings to property owners or person in charge re the suspected presence of emergency disease or plant pest
- decontaminate self and where appropriate equipment and vehicles.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- standards, guidelines and protocols for the emergency disease or plant pest
- signs of specific disease or plant pest which is the subject to surveillance
- emergency disease or plant pest surveillance procedures for:
 - collecting and handling samples and supporting evidence of diagnosis
 - reporting findings and information that may help in control response
 - containment of outbreak

- personal and general decontamination
- process for locating expertise
- communication principles for providing direction and warnings to property owners and managers, liaising with disease or plant pest experts, and reporting to surveillance coordinator.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBER501 Manage active operational emergency disease or plant pest sites

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage active operational emergency disease or plant pest sites.

The unit applies to personnel who have been appointed or engaged to undertake a role within an emergency disease or plant pest incursion response.

This unit applies to individuals who take personal responsibility for their own work and exercise autonomy in undertaking complex work. They analyse information and demonstrate deep knowledge in a specific technical area. They analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Emergency Response (BER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Plan control procedures across the declared area	1.1 Conduct planning and consultation with stakeholders and field personnel 1.2 Conduct planning in line with relevant standards, protocols and guidelines, and according to instructions from operations director 1.3 Identify, obtain, schedule, prioritise and deploy required resources 1.4 Identify work health and safety requirements and hazards associated with implementing control procedures and ensure appropriate action is taken to minimise risks to self and others 1.5 Identify criteria for implementing control procedures which satisfy relevant standards and protocols with minimal livestock or crop destruction and property damage 1.6 Prepare contingency plans for effective control of emergency disease or plant pest
2. Manage the implementation of control procedures	2.1 Coordinate control procedures to achieve effective emergency disease or plant pest control outcomes 2.2 Maintain ongoing consultation and communication links with all stakeholders, field staff, property owners or managers and others in control centre 2.3 Implement control procedures and services supplied under contract 2.4 Prepare and submit written and verbal reports as required
3. Monitor and review the effectiveness of control procedures	3.1 Monitor personnel to ensure that they are achieving specified objectives 3.2 Monitor supply of resources for appropriateness and availability 3.3 Monitor implementation of control procedures to ensure cost-effective compliance with relevant standards and protocols 3.4 Review priorities for emergency disease or plant pest control operations, and confirm or revise as appropriate
4. Implement review findings	4.1 Revise control activities as required 4.2 Advise relevant stakeholders and personnel of revisions to control activities promptly for implementation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO501A Manage active operational emergency disease or plant pest sites.

Assessment Requirements for AHCBER501 Manage active operational emergency disease or plant pest sites

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply standards, guidelines, protocols and legislation in:
 - planning control procedures
 - resourcing the control plan
 - addressing work health and safety requirements
 - determining criteria for implementing control procedures
 - contracting services
 - monitoring implementation of control procedures for cost effectiveness
 - monitoring, reviewing control operations and revising priorities as part of managing active emergency disease or plant pest sites
- plan and resource control procedures, and contingency plans
- engage with stakeholders and field personnel in planning process
- engage with stakeholders, field staff, property owners/managers and others in control centre throughout the control period
- manage and monitor implementation of control procedures
- monitor personnel against specified objectives
- monitor supply of resources
- review priorities and revise as appropriate after consultation
- review control activities as required and communicate to stakeholders and personnel.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, and relevant standards, guidelines and protocols, and Nationally Agreed Standard Operating Procedures (NASOP)
- incident control management procedures
- the requirements of relevant commonwealth, state and territory legislation
- relevant public sector policies, practices and constraints in relation to emergency disease or plant pest management
- techniques for monitoring and reviewing control procedures, and resource expenditure
- advanced communication principles to consult and communicate with a range of stakeholders and the control centre
- project management principles.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBER601 Plan and oversee an emergency disease or plant pest control program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in an emergency disease or plant pest setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply standards, guidelines, protocols, and legislation in:
 - planning and amending a control program
 - recording information and disseminating
 - disseminating reports
 - identifying appropriate personnel along lines of communication as part of planning and overseeing an emergency disease or plant pest control program
- plan a control program around identified strategies with input of experts and submit to for approval
- identify declared areas that are within the jurisdiction of the control program
- brief appropriate personnel and organisations/agencies on developments and consequences of emergency disease or plant pest outbreak, and its ongoing management
- implement and monitor control plans utilising information management system and reporting as set out in standards and protocols
- monitor control strategies in use against the intended outcomes, and amend control plans as appropriate
- monitor resource requirements are sufficient to ensure strategies are achieved
- communicate revisions to control strategies and/or plans to appropriate personnel.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- AUSVETPLAN or PLANTPLAN, and other Nationally Agreed Standard Operating Procedures (NASOP), relevant standards, guidelines and protocols and associated manuals
- incident management functions

- phases of a response
- the requirements of relevant commonwealth, state and territory legislation
- strategies for controlling emergency disease or plant pest situations
- support agencies and sources of expertise
- control procedures relevant to the emergency disease or plant pest situation
- project management principles
- consequences and impacts of the outbreak and management controls
- information management system
- processes for monitoring and reviewing control plans, and resource expenditure
- human and physical resources required to implement the control plan
- methods of communicating with stakeholders.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC BIO201 Inspect and clean machinery for plant, animal and soil material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to inspect and clean machinery of material that may contribute to the spread of weeds, pests or diseases.

The unit applies to individuals responsible for the inspection and cleaning of machinery that is being moved from one location to another to ensure that soil borne pathogens and weeds are not relocated to new sites.

This unit applies to individuals who work under general supervision and exercise limited autonomy. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to work	1.1 Select and use appropriate personal protective equipment 1.2 Identify hazards and report to supervisor 1.3 Identify and check tools and materials required for the task
2. Inspect machinery and support vehicles	2.1 Make machinery and support vehicle safe before inspection and ensure free moving parts pinned or supported as required 2.2 Inspect machinery and equipment for contamination according to organisational biosecurity procedures and legislative requirements 2.3 Remove covers and guards safely 2.4 Recognise all points identified in legislation or operating procedures and inspect for contamination
3. Clean machinery, equipment and support vehicles	3.1 Select correct equipment and location of site for cleaning 3.2 Clean and check all points listed in appropriate regulations, checklists or organisational biosecurity procedures 3.3 Replace guards and covers safely
4. Complete cleaning work	4.1 Dispose of waste materials according to organisational procedures and relevant legislative requirements 4.2 Record cleaning history on appropriate forms according to organisational procedures
5. Report inspection results	5.1 Record inspection results on appropriate forms according to organisational procedures 5.2 Deliver inspection reports to appropriate person in the organisation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHC BIO201A Inspect and clean machinery for plant, animal and soil material.

Assessment Requirements for AHC BIO201 Inspect and clean machinery for plant, animal and soil material

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select the equipment and personal protective equipment (PPE), and location of site for cleaning
- prepare to inspect and clean machinery and vehicles
- apply safe work practices in the context of own work
- inspect machinery for plant, animal and soil material and taking samples of contamination
- clean machinery, equipment and vehicles
- use PPE
- dispose of waste materials
- record cleaning history and inspection results
- deliver inspection reports to appropriate person
- apply biosecurity protocols in the context of own work.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- biosecurity protocols for particular contaminants relevant to industry and location
- types of contamination
- ways in which weeds, pests and soil borne diseases can be spread by machinery and equipment
- cleaning techniques appropriate to machinery, vehicles and types of contaminant
- machinery and equipment operating features important to know for inspection and cleaning
- safe work practices associated with inspecting and cleaning machinery

- methods of disposing of solid and liquid waste
- procedures for completing forms and delivery of reports.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC BIO202 Follow site quarantine procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to follow the organisation's procedures that reduce the likelihood of pathogenic organisms entering a quarantine site.

It applies to any personnel entering and leaving the quarantine area.

This unit applies to individuals who work under general supervision and exercise limited autonomy. They undertake defined activities and work in a structured context.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some states and territories in relation to use of farm chemicals in quarantine situations, national vendor declarations, and movement of livestock and plant material. Therefore, it will be necessary to check with the relevant state or territory regulators for current licensing, legislative or regulatory requirements before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to work in quarantine site	1.1 Check with supervisor on quarantine procedures and biosecurity protocols relevant to the site 1.2 Check all vehicles are decontaminated before entering the quarantine site, and if required leaving the site 1.3 Report contact with potential contaminants either within the site, or externally 1.4 Shower and change into work clothes if required 1.5 Select and apply appropriate personal protective equipment including footwear before commencing work 1.6 Store street clothing securely away from livestock, feed or other products 1.7 Wash hands before and after livestock, feed, plant stock or other products are handled 1.8 Check disinfectant levels in footbaths and use rigorously before entering quarantine site and before exiting site 1.9 Follow site exit procedures for decontaminating self, work clothing and personal protective equipment
2. Work in quarantine site	2.1 Handle and store chemicals and medications in accordance with site procedures 2.2 Store different feed mixes, soils, growing media and other products separately and mark appropriately 2.3 Identify cases of disease or pest infestation and report to supervisor 2.4 Identify breaches of quarantine procedures and report to supervisor 2.5 Identify work health and safety hazards and report to supervisor 2.6 Dispose of all waste products appropriately 2.7 Dispose of all deceased livestock, unwanted biological material or damaged or infected plant stock as instructed by supervisor 2.8 Record information relating to work in quarantine site
3. Assist in maintaining site quarantine procedures	3.1 Inform all visitors of the quarantine procedures and provide them with appropriate clothing and footwear if required 3.2 Check that visitors are signed in, have stated their recent activities and exposures and have washed or showered if required 3.3 Check that visitors sign out and follow site exit procedures 3.4 Note and report any observed breaches of quarantine procedures by visitors to supervisor 3.5 Keep gates and doors locked where required 3.6 Maintain security fencing according to supervisor's instructions 3.7 Check deliveries to site to ensure that established procedures for

Element	Performance criteria
	vehicle decontamination, unloading and receipt and holding or storage of stock and supplies are followed
4. Respond to site quarantine breach or problem	4.1 Identify and report a site quarantine breach or problem and report the location to supervisor 4.2 Secure any site quarantine breaches or problems 4.3 Clean and disinfect any quarantine breach sites as required according to the specific nature of the breach 4.4 Isolate livestock, plant stock or other items suspected of being exposed to contaminants and monitor for evidence of contamination 4.5 Treat or dispose of all contaminated stock and materials 4.6 Record information about the breach or problem

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO202A Follow site quarantine procedures.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHC BIO202 Follow site quarantine procedures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- meet site security and entry/exit requirements for vehicles, apparel and personal hygiene and safety
- follow procedures and biosecurity protocols for handling and storing chemicals, medications, feed mixes, soils, growing media and other products
- report disease/pest infestation, breaches of quarantine procedures and work health and safety hazards to supervisor
- dispose of waste products, deceased livestock, unwanted biological material, damaged or infected plant stock, contaminated stock and contaminated material as instructed
- record information related to work in quarantine area, including any breach or problem
- maintain security of quarantine site, any site identified as a quarantine breach and any site considered a problem area
- direct visitors in their obligations to follow quarantine procedures
- control site deliveries to ensure quarantine procedures are followed
- follow quarantine procedure and biosecurity protocols in responding to a site quarantine breach or problem
- clean and disinfect any quarantine breach sites
- isolate and monitor livestock, plant stock or other items suspected of being exposed to contaminants.

Knowledge Evidence

The participant must demonstrate knowledge of:

- site quarantine procedures and biosecurity protocols for:

- disposal of waste products, diseased livestock, unwanted biological material, damaged or infected plant stock, contaminated stock or contaminated material
- directing visitors at the quarantine site
- reporting diseases and pest infestations problem, work health and safety hazards
- handling and storing chemicals, medications, feed mixes, soil, growing media
- controlling entry of deliveries to a quarantine site
- isolating livestock and monitoring livestock
- cleaning and disinfecting quarantine area
- maintaining security for the quarantine site
- recording information about own work and any quarantine breaches
- personal protective equipment appropriate to site quarantine procedures and biosecurity protocols
- work health and safety hazards
- methods for cleaning and disinfecting quarantine site or area of quarantine breach
- biosecurity protocols and how they apply to the work site, industry and in the context of a work role.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC BIO302 Identify and report unusual disease or plant pest signs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise unusual disease or plant pest signs during day-to-day work and take appropriate reporting action.

The unit is typically performed by those who have daily contact with plants, birds, animals or fish. It would usually be carried out in conjunction with routine animal or plant husbandry tasks.

This unit applied to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify signs of unusual disease or a plant pest	1.1 Identify signs of disease or a plant pest 1.2 Compare signs of disease or a plant pest with own experience of common endemic disease or a plant pest in the species 1.3 Assess severity and extent of the problem in the species where signs indicate an unusual disease or a plant pest 1.4 Seek immediate advice from supervisors, professionals or appropriate authorities when signs indicate an unusual disease or a plant pest
2. Report signs of unusual disease or a plant pest	2.1 Report signs of unusual disease or a plant pest to appropriate authorities immediately 2.2 Implement biosecurity measures according to enterprise biosecurity plans and instructions from appropriate authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC BIO302A Identify and report unusual disease or plant pest signs.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHC BIO302 Identify and report unusual disease or plant pest signs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify unusual disease or pest signs
- assess the severity and extent of problem in the disease or pest species
- seek advice from supervisors or professionals
- notify appropriate authorities
- implement appropriate biosecurity measures.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- signs of common endemic diseases or plant pests in the species
- signs indicating unusual disease or plant pests
- methods for assessing severity and extent of problem
- biosecurity measures associated with enterprise biosecurity plans
- the process of reporting any unusual findings to appropriate authorities.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC BIO305 Apply biosecurity measures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply control measures as set out in a farm/enterprise biosecurity plan. Farm biosecurity is a set of measures designed to protect a property from the entry and spread of pests and diseases.

All aspects of the unit must be undertaken in line with legislative requirements, workplace policies and procedures and accepted safe practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They provide and communicate solutions to a range of predictable problems.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some states and territories in relation to use of farm chemicals in quarantine situations, national vendor declarations, and movement of livestock and plant material. Therefore, it will be necessary to check with the relevant state or territory regulators for current licensing, legislative or regulatory requirements before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify biosecurity control measures applicable to enterprise	1.1 Access enterprise biosecurity plan 1.2 Identify animal/plant diseases or pests that are considered biosecurity threats to the enterprise from the plan and other sources of information 1.3 Identify control measures to minimise the risk of identified animal/plant diseases or pests entering the property 1.4 Confirm your responsibility for applying control measures in regular work routines, with supervisor
2. Apply control measures to farm inputs	2.1 Apply control measures identified in the property biosecurity plan as applicable for farm inputs 2.2 Incorporate the property control measures into work routines seeking clarification from supervisor as needed
3. Apply control measures to support farm outputs	3.1 Apply control measures identified in the property biosecurity plan as applicable to farm outputs 3.2 Incorporate control measures into work routines seeking clarification from supervisor as needed
4. Apply control measures to movement of people, animals, vehicles and equipment	4.1 Apply control measures identified in the property biosecurity plan as applicable to the movement of people, animals, vehicles and equipment 4.2 Incorporate control measures into work routines seeking clarification from supervisor as needed
5. Apply control measures to production practices	5.1 Apply control measures identified in the property biosecurity plan as applicable to farm production practices 5.2 Incorporate control measures into work routines seeking clarification from supervisor as needed
6. Apply control measures to control wild and feral animals, plant pests and weeds	6.1 Identify control measures identified in the property biosecurity plan as applicable for wild and feral animals, animal and plant pests and weeds 6.2 Incorporate control measures into work routines seeking clarification from supervisor as needed
7. Maintain records related to biosecurity	7.1 Keep records for sales and purchases for traceability of farm inputs and farm outputs (both trace back and trace forward) 7.2 Request and retain vendor declarations or statements for the statutory period, and as required by state and territory legislation 7.3 Retain monitoring and surveillance data
8. Monitor biosecurity	8.1 Monitor effectiveness of control measures in addressing risks

Element	Performance criteria
procedures	8.2 Monitor work duties of self and others to ensure biosecurity control measures are applied appropriately 8.3 Report issues and concerns with biosecurity to management 8.4 Participate in biosecurity training when opportunities arise

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHC BIO305 Apply biosecurity measures

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- locate information from the farm/enterprise biosecurity plan and government and industry biosecurity websites, on:
 - animal/plant diseases and pests that are potential biosecurity threats to enterprise
 - control measures that can minimise the risk of diseases or plant pests entering or spreading from the property
- apply control measures in work routines for:
 - farm inputs
 - farm outputs
 - movement of people
 - movement of animals
 - vehicles and equipment
 - production practices
 - controlling feral and wild animals, pests and weeds
- maintain records for traceability of farm inputs and farm outputs, and monitoring and surveillance data
- monitor control measures for effectiveness in addressing risks
- monitor work of self and others for compliance with control measures
- report biosecurity issues and concerns to management
- participate in biosecurity training.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- government and industry biosecurity websites relevant to farm biosecurity plan
- diseases or plant pests that pose a biosecurity threat to enterprise
- biosecurity control measures relevant to enterprise for:
 - farm inputs
 - farm outputs
 - movement of people
 - movement of animals
 - vehicles and equipment
 - production practices
 - feral and wild animals, pests and weeds
- record keeping for traceability (both trace back and trace forward) of farm inputs and outputs
- record keeping for retention of monitoring and surveillance data
- processes for monitoring effectiveness of control measures
- process for reporting biosecurity concerns and issues
- sources of information on biosecurity training.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -

AHC BIO403 Plan and implement a farm or enterprise biosecurity plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and implement a farm or enterprise biosecurity plan which includes a set of measures designed to protect a property from the entry and spread of pests and diseases.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

Licensing, legislative, regulatory or certification requirements may apply to this unit in some states and territories in relation to use of farm chemicals in quarantine situations, national vendor declarations, and movement of livestock and plant material. Therefore, it will be necessary to check with the relevant state or territory regulators for current licensing, legislative or regulatory requirements before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Biosecurity (BIO)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify relevant information for developing a biosecurity plan	1.1 Interpret biosecurity guidance in industry standards and protocols relevant to enterprise 1.2 Identify known disease, pest and weed seed threats relevant to enterprise 1.3 Identify current access points on the property through which staff, visitors, machinery, equipment, vehicles, farm inputs and farm outputs pass
2. Develop control measures and procedures for controlling farm inputs	2.1 Research farm inputs relevant to the enterprise and identify practices to minimise risk of introducing and spreading disease, pests and weeds 2.2 Establish control measures and procedures as required for controlling farm inputs 2.3 Seek vendor declarations or animal health statements
3. Develop control measures to support biosecurity for farm outputs	3.1 Research farm outputs relevant to the enterprise and identify practices to minimise risk of spreading disease, pests and weeds 3.2 Establish control measures as required to support biosecurity for farm outputs 3.3 Provide and retain supporting documentation
4. Develop control measures for movement of people	4.1 Research the movement of people relevant to the enterprise and identify practices to minimise risk of spreading disease, pests and weeds 4.2 Establish control measures as required for movement of people 4.3 Arrange appropriate signage to support established control measures
5. Develop control measures for vehicles and equipment	5.1 Research the role of vehicles and equipment relevant to the enterprise and identify practices to minimise risk of spreading disease, pests and weeds 5.2 Establish control measures as required for vehicles and equipment as required
6. Develop control measures for production practices	6.1 Research production practices relevant to the enterprise and identify practices to minimise risk of spreading disease, pests and weeds 6.2 Establish control measures as required for production practices
7. Develop control measures for control of feral animals, plant pests and weeds	7.1 Identify feral animals, plant pests and weeds relevant to the enterprise and determine options for their control 7.2 Establish and document control measures as required for control of feral animals, plant pests and weeds
8. Develop control measures for training staff and keeping	8.1 Identify and document staff training required to implement control measures 8.2 Establish recording requirements in accordance with industry best

Element	Performance criteria
records	practice
9. Implement, monitor and review biosecurity plan	9.1 Conduct a property risk assessment and identify risk factors for pest and disease spread 9.2 Identify appropriate control measures 9.3 Document control measures in the form of a property biosecurity plan 9.4 Develop a biosecurity plan that is achievable and cost effective with short and long term goals 9.5 Induct and train staff in control measures relevant to their role and responsibility 9.6 Monitor staff performance in adhering to control measures 9.7 Monitor effectiveness of control measures and progress against the program timelines, and identify improvements that can be made 9.8 Monitor industry standards and protocols relevant to biosecurity and incorporate into the on farm biosecurity plan 9.9 Revise and amend risk assessment and control measures 9.10 Review staff training and induction records to ensure staff are able to implement biosecurity control measures appropriate to their position

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHC BIO403A Plan and implement a biosecurity program.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHC BIO403 Plan and implement a farm or enterprise biosecurity plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine biosecurity threats to farm or enterprise and control measures using standards and protocols
- identify sources of current biosecurity best practice
- identify current access points to property
- establish control measures and procedures for:
 - controlling farm inputs including:
 - new plants or animals
 - the quality of water sources
 - bee hives coming onto the property
 - bedding material
 - records of source, and use of organic and inorganic fertiliser
 - measures to support biosecurity for farm outputs including:
 - harvest bins
 - packaging operations
 - transport and movement of plants, produce, livestock and livestock products, and plant waste
 - intensive rearing of young animals
 - animal breeding facilities
 - animal milking facilities
 - maintaining records
 - movement of people including:
 - controlled access points and production areas

- visitors, their vehicles, and risk profile
- general hygiene
- vehicles and equipment including:
 - equipment hygiene
 - dedicated equipment use
 - storage areas
 - vehicle entry points
 - vehicle movement and parking
 - vehicle hygiene and washes
 - run off from wash areas
 - roads and tracks
- production practices including:
 - water management
 - plant byproducts and waste
 - animal manure and waste effluent
 - feed storage, feed spills and disposal of unwanted feed
 - feed and water troughs
 - product storage
 - resistance to chemicals
 - animal disease control
 - monitoring and surveillance
 - monitoring frequency
 - fencing
- control of feral animals, plant pests and weeds including:
 - wild and feral animals
 - boundary fences
 - property cleanliness
 - weeds
 - volunteer plants
 - straying animals
 - agisted or other visiting animals
 - property and land destruction
- training staff and keeping records including:
 - staff training
 - traceability (both trace back and trace forward)
 - animal health assurance
 - vendor declarations and animal health and product statements
 - monitoring and surveillance data
- seek vendor declarations or animal health statements for:

- quality and disease free assurance status of animals, animal feed and compliance with national, state and territory standards and regulations and industry health assurance programs
- disease and weed free status of organic fertilisers and compliance with Industry Purchasing Code of Practice or equivalent quality controls
- purchased animal bedding material being fit for purpose
- provide and retain supporting documentation for:
 - moving plants, or animals on and off the property
 - appropriate chemical usage and storage in accordance with industry best practice
- develop, document, and induct and train staff in control measures for:
 - controlling farm inputs
 - biosecurity for farm outputs
 - movement of people
 - vehicles and equipment
 - production practices
 - control of feral animals, plant pests and weeds
 - training staff
 - keeping records
- develop a plan for implementing biosecurity
- monitor staff performance
- monitor effectiveness of control measures, and identify improvements
- revise and amend control measures as needed
- review staff training and induction records.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- national industry standards and guidelines relevant to farm or enterprise biosecurity
- Nationally Agreed Standard Operating Procedures (NASOP) relevant to farm or enterprise biosecurity plan
- diseases, pests and weeds that pose a threat and potential causes of spread
- principles of risk management applied to biosecurity
- biosecurity practices for:
 - farm inputs
 - farm outputs
 - people, vehicles and equipment
 - production
 - feral animals, pests and weeds
 - training staff, biosecurity planning, and maintaining records
- planning processes for costing, allocating resources and establishing timelines
- processes for improving staff performance.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCBUS301 Use hand held e-business tools

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use hand held e-business tools including computers, personal data assistants, (PDAs), radio frequency (RF) scanners, microchip scanners, mobile phone enabled email and SMS, data recording devices, barcoding equipment.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes and in consultation with the management team.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They must use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Business (BUS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare hand held e-business tools for use	1.1 Select e-business tools 1.2 Complete relevant start-up procedures 1.3 Configure tools with business data 1.4 Test connectivity
2. Use hand held e-business tools	2.1 Use e-business tools 2.2 Address equipment faults 2.3 Check data for accuracy and address errors
3. Process business data	3.1 Generate and compile business data 3.2 Process business data 3.3 Maintain the integrity of data and data security 3.4 Review performance of hand held e-business tools and make recommendations for improvements to hardware, software or their use in accordance with e-business strategy and budget

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBUS301A Use hand held e-business tools.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCBUS301 Use hand held e-business tools

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare hand held e-business technology
- use relevant technology such as computers, handheld scanners, and barcoding equipment
- enter and process data according to technical and business requirements
- generate data in the format required by the e-business supply chain.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- features and operating procedures of relevant business tools
- relevant protocols for electronic data interchange
- personal identification and password for online access between businesses for access to inventory data and purchasing, payment or supply processes.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret financial reports and farm business data
- maintain basic accounts
- administer the legal requirements of the business
- process and maintain the insurance requirements for the business
- identify sources, types and cost of finance
- prepare an application for finance or investment.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- business processes and legal requirements
- insurance processes and legal requirements
- finance processes and legal requirements
- taxation and account keeping requirements.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBUS402 Cost a project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to cost a project.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes, sustainability practices and in consultation with the management team.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Business (BUS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine resources required for the project	1.1 Identify and interpret project objectives, required work activities and available finance in line with enterprise guidelines and

Element	Performance criteria
	legislative requirements where required 1.2 Identify resources required for project works 1.3 Identify factors affecting resource costs using available information 1.4 Select and use appropriate tools, equipment and technology for the calculation and documentation of project costs
2. Calculate individual itemised costs of the project	2.1 Calculate unit and total cost for each resource item 2.2 Evaluate total itemised resource costs against the financial schedule for the project 2.3 Make adjustments where required to reconcile resource costs with project schedules 2.4 Identify and determine costs for peripheral works arising from the project
3. Prepare a summary of the cost of the project	3.1 Collate and schedule resource costs 3.2 Calculate and record total project costs 3.3 Submit financial summary for approval

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBUS402A Cost a project.

Assessment Requirements for AHCBUS405 Participate in an e-business supply chain

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use relevant technology such as computers, internet and email
- prepare production data in the required format
- meet timelines required by the e-business supply chain
- define the business model and how it can use e-business
- develop procedures and systems for e-business
- implement an e-business supply chain
- monitor and review e-business systems.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- entire supply chain from raw materials to producers, component suppliers, manufacturers, wholesalers, third party service providers, retailers, customers and recyclers, plus freight, distribution and cash flow
- technology hardware and software requirements of the e-business supply chain
- protocols for electronic data access and interchange
- protocols for electronic funds transfer
- protocols for e-business legal and security issues.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBUS506 Develop and review a business plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- set strategic goals, targets and directions for the enterprise
- determine clear and measurable indicators of operational performance
- identify and design risk management and mitigation strategies
- develop appropriate operational plans
- document the business plan
- monitor the business plan to identify strengths, weaknesses and areas for improvement
- analyse information and results.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- budgeting
- business forecasting
- relevant industrial awards and agreements
- communication techniques
- risk management factors and priorities
- marketing strategies
- indicators of operational performance
- financial and operational systems and resource considerations relevant to business planning
- logical and analytic methods
- profit and loss and cash flow systems

- industrial relations, taxation, corporate and industry legislation, environmental and work health and safety legislation as they relate to the enterprise
- capital investment analysis.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBUS507 Monitor and review business performance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and review business performance.

All work must be carried out to comply with organisational requirements, work health and safety legislation, sustainability practices and codes and in consultation with the management team.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Business (BUS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify performance	1.1 Develop realistic performance indicators within available

Element	Performance criteria
requirements	timeframes and resources 1.2 Identify and minimise factors inhibiting performance against objectives 1.3 Identify and assess market conditions based on relevant data and transferable and justifiable assumptions 1.4 Identify capacity to promote the sustainability of operations and incorporate into enterprise procedures
2. Evaluate enterprise performance	2.1 Gather and analyse data relating to enterprise production and financial performance to identify historical and current performance 2.2 Review and analyse operational structures to determine the suitability of organisational processes to enterprise objectives 2.3 Evaluate enterprise strengths and weaknesses against market conditions to determine current and future capacities 2.4 Monitor impact of natural conditions on enterprise performance 2.5 Assess sustainability of resource use 2.6 Evaluate performance against enterprise objectives to identify variations and scope for future development
3. Review business performance	3.1 Review business operations to identify opportunities for improvements in performance 3.2 Review business financial performance to identify opportunities for improvement 3.3 Review business marketing performance to identify opportunities for improvement 3.4 Review business risk management performance to identify opportunities for improvement

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCBUS602 Review land management plans and strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to review and assess effectiveness of land use and management plans and strategies.

All work must be carried out to comply with organisational requirements, work health and safety legislation and codes, sustainability practices and in consultation with the management team.

This unit applies to individuals who take personal responsibility for their own work and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities. They analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Business (BUS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Determine mechanisms and criteria for reviewing land use and management plans and strategies	1.1 Clearly establish reasons for reviewing land use and management plans and strategies 1.2 Carry out analysis of data to recognise internal policy and procedural influences impacting on land use and management plans and strategies 1.3 Interpret trends to identify changes occurring in the land use and management plans and strategies beyond normal variations 1.4 Regularly review industry information to establish the need for reviewing land use and management plans and strategies within the organisation 1.5 Determine realistic timeframes for review process
2. Analyse existing land use and management plans and strategies	2.1 Assess trends and threats against the objectives of the land use and management plans and strategies 2.2 Identify and assess existing land use and management plans and strategies relevant to the issue under consideration for their effectiveness, relevance, and impact on resource management 2.3 Identify and prioritise gaps in land use and management plans and strategies 2.4 Analyse land use and management plans and strategies, taking account of the relevant historical, social, cultural, political, ecological, biodiversity and economic contexts in which they apply 2.5 Fully inform persons contributing to review of land use and management plans and strategies, regarding relevant enterprise requirements 2.6 Undertake consultation with stakeholders to ensure support for implementation of adjusted land use and management plans and strategies 2.7 Clearly identify and resolve problems taking into consideration the views of stakeholders
3. Modify land use and management plans and strategies	3.1 Evaluate feedback from employees on existing land use and management plans and strategies 3.2 Prepare modified land use and management plans and strategies covering required aspects and using clear and concise language in a standardised format 3.3 Develop modified land use and management plans and strategies that are consistent with business plan and identified needs 3.4 Instruct and train staff in changes to land use and management strategies and monitoring recording processes 3.5 Submit proposed changes to land use and management plans and strategies for approval according to enterprise procedures 3.6 Incorporate outcomes of the consultative process in amended land

Element	Performance criteria
	use and management plans and strategies, and seek agreement from stakeholders where appropriate 3.7 Ensure modified land use and management plans and strategies comply with relevant legislation
4. Implement modified land use and management plans and strategies	4.1 Modify operational processes to obtain additional key data and monitor changes to conservation strategies and plans 4.2 Provide education and training to employees to ensure effective implementation 4.3 Provide education and training to stakeholders to promote implementation 4.4 Implement modifications in a timely manner to reflect the need for changes confirmed through the review process

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCBUS602 Review land management plans and strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine mechanisms and criteria for reviewing management plans and strategies
- analyse existing management plans and strategies
- modify management plans and strategies
- implement modified management plans and strategies
- support stakeholders and staff to implement modifications.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- ecosystems including the interrelationship of geophysical, hydrological, biological and meteorological factors
- biodiversity
- knowledge of the monitoring parameters and techniques utilised in biological monitoring
- threats, both natural and from human activity, to places of natural significance
- international, national and local standards and codes of practice for land management
- land management assessment and monitoring processes
- land degradation and pollution
- scientific processes for evaluating land management
- general understanding of range of cultural issues
- legislation under which enterprise operates.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCBUS604 Design and manage the enterprise quality management system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- compare enterprise systems and processes with industry benchmarks
- analyse systems and strategies against best practice
- identify areas for improvement within the enterprise
- document procedures to mitigate risks to quality and address areas for improvement
- undertake continuous monitoring of systems and processes.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Quality Management (QM) objectives
- leadership strategies to establish QM business culture
- analysis skills related to the product market, Quality Assurance programs
- performance measurement
- benchmarking strategies for analysing production and financial performance
- environmental standards and monitoring processes
- codes of practice
- strategic planning processes
- scanning techniques for strengths, weaknesses, opportunities and threats
- techniques and formats for establishing measurable performance targets
- recording and reporting systems
- human resource management and training practices/systems related to continuous improvement standards.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCBUS605 Manage human resources

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage human resources in an agricultural, horticultural or land management enterprise.

All work must be carried out to comply with organisational requirements, Work Health and Safety legislation and codes, sustainability practices and in consultation with the management team.

This unit applies to individuals who take personal responsibility for their own work and exercise autonomy in undertaking complex work. They must analyse information and exercise judgement to complete a range of advanced skilled activities. They analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Business (BUS)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Implement strategies for personal development and appropriate self-management	1.1 Audit own management strengths and weaknesses and address through training and professional support 1.2 Determine priorities in management and operations and allocate time to achieve effective outcomes 1.3 Implement strategies for managing conflicting demands and pressure
2. Identify skill requirements and prepare task descriptions	2.1 Identify and describe tasks along with the range of conditions under which performance may need to occur 2.2 Determine most appropriate employment arrangements based on employer and employee needs, responsibilities and rights 2.3 Prepare task descriptions with due regard to Equal Opportunity Employment Legislation, work health and safety and work based harassment regulations 2.4 Explore and use opportunities to use government-supported employment and training programs
3. Arrange employment of workforce members	3.1 Assess options for filling job vacancies 3.2 Prepare resources and materials for recruitment and place with media and employment agencies 3.3 Determine criteria for assessing job applicants and prepare applicant evaluation processes and procedures 3.4 Assess applicants against the criteria and finalise selection decision 3.5 Advise all applicants 3.6 Negotiate terms of employment to ensure adherence to relevant award conditions
4. Manage workforce performance	4.1 Design induction programs for each employee consistent with legislative requirements and effective management 4.2 Establish terms of engagement for consultants and contractors 4.3 Conduct induction programs for new internal and external appointees and establish appropriate records 4.4 Develop work plans with all members of the workforce 4.5 Design and implement strategies for communicating with workers 4.6 Design and implement performance management strategies 4.7 Follow processes for terminating non-performing staff
5. Support personal development, training and career development of workers	5.1 Design and implement strategies to identify skill and knowledge gaps with workers 5.2 Provide on-job training to optimise worker performance and to ensure safety and fairness in the workplace 5.3 Identify off-job training requirements and source and support training

Element	Performance criteria
	5.4 Identify and provide opportunities for career development and design and implement strategies for succession 5.5 Recognise and reward prior learning, experience and training
6. Manage administrative support	6.1 Design and implement processes and procedures for the administration of staff records 6.2 Design and implement administrative procedures and processes to meet legislated requirements 6.3 Monitor adherence to awards, enterprise agreements and contracts of employment, and resolve disputes and conflicts
7. Implement work health and safety priorities and procedures	7.1 Develop and communicate safety policies 7.2 Identify and design safe work practices for all aspects of the operation of the enterprise 7.3 Communicate and enforce safe work practices among all members of the workforce
8. Review labour productivity	8.1 Establish strategies for monitoring labour costs 8.2 Review the performance of the enterprise using labour productivity benchmarks 8.3 Establish opportunities to develop more efficient work practices by consulting peers, staff and consultants 8.4 Implement strategies for improving labour productivity

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCBUS608 Manage risk

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the scope for risk management
- identify potential risks associated with climate, resource (natural, physical, financial and human) availability and capacity, enterprise production systems, theft and vandalism of assets, scientific and technological development, marketing, and external political and social factors
- implement strategies to minimise the impact of risk.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the wide range of risks faced by a primary production business
- legislation, codes of practice and national standards, including:
 - duty of care
 - company law
 - contract law
 - environmental law
 - freedom of information
 - industrial relations law
 - privacy and confidentiality
- legislation relevant to organisation's operations
- legislation relevant to equal opportunity
- legislation relevant to operation as a business entity
- organisational policies and procedures, including:
 - risk management strategy
 - policies and procedures for risk management

- overall operations of organisation
- risk insurance and insurance providers.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCCF401 Prepare project acquittal

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to review project documentation and prepare an acquittal statement for approval and auditing.

It applies to community program managers who have to prepare project acquittal statements. This includes taking responsibility for own work and providing and communicating solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish acquittal records	1.1 Review program or project plans, guidelines or contracts and financial reporting requirements 1.2 Collect financial information for acquittal report 1.3 Establish records of materials, equipment and labour provided before start of project for acquittal report

Element	Performance criteria
2. Identify transactions and reports relating to project	2.1 Identify project-related accounting transactions and reports in group accounts for use in acquittal 2.2 Determine need for separate statements based on different funding sources 2.3 Estimate financial values of in-kind donations of materials, loan of equipment and labour
3. Prepare acquittal in required format	3.1 Prepare acquittal from accounting and other information to program and contract requirements 3.2 Report program funds and expenditure on operations separately from group contributions to project 3.3 Report group contributions to project to contract requirements 3.4 Consolidate report for approval and auditing
4. Arrange audit of acquittal and transaction	4.1 Arrange audit of report to program and contract requirements 4.2 Arrange approval of report to group, program and contract requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF401A Prepare project acquittal.

AHCCCF403 Obtain and manage sponsorship

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to obtain program sponsorship and manage sponsorship commitments.

It applies to those who plan and obtain sponsorship for a community program such as Landcare. It includes taking responsibility for own work and providing and communicating solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify sponsorship opportunities	1.1 Target appropriate partners to the program as potential sponsors 1.2 Develop a rationale for sponsoring the program or activities which achieves a balance between the sponsors' requirements and the program goals, and benefits to the sponsor and program 1.3 Confirm feasibility of sponsorship opportunities through research

Element	Performance criteria
	and analysis 1.4 Itemise mutual benefits and develop list of targets 1.5 Consider community, cultural and equity requirements in the group operations in developing list of target sponsor companies
2. Prepare and deliver sponsorship pitch	2.1 Make contact with potential sponsor 2.2 Maintain the best interests of the program, group and agency in sponsorship approach 2.3 Prepare presentation support materials with appropriate accuracy, style and degree of information 2.4 Ensure presentation and approach demonstrates an understanding of and respect for sponsors' business and shows how sponsorship will be mutually beneficial 2.5 Include outcomes of any prior sponsorship arrangements in pitch and negotiations 2.6 Follow up presentation in a manner that preserves the integrity of the negotiations
3. Successfully negotiate sponsorship deal	3.1 Agree on terms which satisfy both the sponsor and the program and the associated agency 3.2 Express nature of sponsorship and the benefits to the sponsor in explicit terms, ensuring they are understood by both parties 3.3 Identify commitments under the sponsorship arrangements to assist maintenance of relationship 3.4 Prepare a sponsorship agreement, contract or memorandum of understanding in accordance with enterprise, sponsor and legal requirements
4. Maintain sponsorship deal	4.1 Meet legal, financial, cultural, ethical, equity and other requirements throughout the sponsorship period 4.2 Meet commitments under the sponsorship arrangements promptly and deliver benefits to the sponsor as agreed 4.3 Recognise the support of sponsor for program or project in literature, reports and on-site 4.4 Identify timing for the start of discussions to extend or complete the sponsorship

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCCCF403 Obtain and manage sponsorship

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify sponsorship opportunities with companies that have common values to the program
- identify the mutual benefits the sponsorship arrangement could provide to both organisations
- develop and present a sponsorship pitch that creates a professional and honest image
- negotiate an appropriate sponsorship arrangement to support a project
- document a sponsorship arrangement, detailing all agreements and responsibilities
- meet legal, financial, cultural, ethical, equity and other requirements for the duration of the sponsorship arrangement
- review a sponsorship arrangement and plan its renegotiation.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- strategy, goals, ethics, program and activities of community group or agency
- effective marketing techniques
- acts, policies and guidelines governing programs and activities
- sources of legal and financial advice
- operation of contracts and agreements.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCCF404 Contribute to association governance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor association activities and contribute to association governance.

It applies to individuals who take responsibility for others and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor association activities	1.1 Monitor activities undertaken by group to ensure: <ul style="list-style-type: none"> • association objectives are being adhered to • resolutions of meetings are being followed • finances are properly managed • employees are managed and volunteers are appropriately supervised • legislative requirements are being met

Element	Performance criteria
	<ul style="list-style-type: none"> • ethical requirements are being met • group operations and approaches are sensitive to and inclusive of community and sections within the community 1.2 Note variations from expected standards and take immediate routine action
2. Identify opportunities, threats and risks	2.1 Identify and recommend opportunities for the group to commence new projects or activities to the committee 2.2 Identify and raise threats to the ongoing operation of the group at committee meetings 2.3 Identify risks associated with the group's activities and ongoing operation 2.4 Submit risks and proposed risk control measures to the committee
3. Participate in board/committee meeting	3.1 Review agendas before meetings 3.2 Submit agenda items and reports as required 3.3 Attend meetings and discuss issues on the agenda 3.4 Establish and maintain communications with other members to ensure competent management of group affairs 3.5 Raise personal observations and concerns at committee meetings including opportunities, threats and risks 3.6 Take actions and report on commitments made at meeting

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF404A Contribute to association governance.

Assessment Requirements for AHCCCF404 Contribute to association governance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- contribute to association governance
- monitor association governance by reviewing or monitoring meeting procedures, finances, staff management, legislative compliance, ethical conduct and community consultation
- conduct a Strengths, Weaknesses, Opportunities and Threats (SWOT) analysis for the association's operations
- participate in board or committee meetings.

Knowledge Evidence

The candidate must demonstrate knowledge of:

- requirements of relevant legislation
- interpretation of basic financial statements
- aims and activities of programs
- committee meeting and members' meeting procedures
- objectives and rules of association
- basic management practice including practices
- community goals and plans
- corporate governance legislation and codes of practice.

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCCF405 Develop community networks

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to liaise with stakeholders in a community and develop community networks.

It applies to those who develop relationships that support the establishment and development of a community group and provide support from within the community for the group.

This unit applies to individuals who take responsibility for others and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Make contacts within community	1.1 Make connections through business, social and personal contacts and programs to the community

Element	Performance criteria
	1.2 Identify connections for their potential in regard to a community group program or activity 1.3 Formulate plans for developing relationships together with relevant community members and leaders 1.4 Respect equity requirements and cultural backgrounds of people being contacted 1.5 Observe cultural protocols to establish positive contacts 1.6 Follow appropriate mechanisms to establish contacts with Indigenous communities 1.7 Address community requests for information on or participation in programs or activities to promote the community group and program
2. Form and create links	2.1 Develop contact through promotional activities, programs and activities of mutual interest to community members and other groups 2.2 Structure activities, programs and personal contact to allow trust and understanding to develop within the group and community 2.3 Develop working relationships in areas of common interest and goals to bring benefit to all parties 2.4 Seek feedback on programs and community group activities from participants and community and use to modify their application 2.5 Develop appropriate records to maintain ongoing contracts and relationships
3. Build networks	3.1 Use individual contacts and contacts with other groups to establish networks of common interest 3.2 Review programs and activities to incorporate networks and the network resources in areas of common interest and goals 3.3 Evaluate progress in establishing links and networks and identify opportunities for further action 3.4 Manage relationships and networks to ensure compliance with cultural protocols and agency procedures and guidelines
4. Report on community liaison	4.1 Evaluate community liaison activities in terms of their costs, benefits to the group program and contribution to the community 4.2 Prepare and submit reports on community liaison activities

AHCCCF408 Promote community programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to promote community programs to target markets with a view to encouraging participation.

It applies to individuals who work in known and changing contexts, take responsibility for own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF).

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify target markets	1.1 Identify potential of program to appeal to sections of community or industry in terms of benefits and costs 1.2 Identify sectors of community and industry that are potential users, customers and audiences of program 1.3 Develop a plan to promote program or local projects or group

Element	Performance criteria
	activities with other communication activities
2. Develop promotional materials	2.1 Determine range of promotional channels to reach target sectors 2.2 Source or develop promotional materials to suit promotional channels and target sectors 2.3 Test impact of promotional materials with group or community members 2.4 Obtain specialist marketing support to address specific marketing issues within budget and program and agency guidelines
3. Promote program to potential users	3.1 Approach potential users of program and services through promotional channels and directly 3.2 Assess impact of promotional activities to determine changes required 3.3 Adjust promotional plan and activities to achieve an improved impact
4. Obtain commitment to use program services	4.1 Present proposals for delivery of program services to interested potential users in terms of benefits, costs and other factors 4.2 Address issues raised by potential users to overcome objections 4.3 Obtain commitments to use program services or support program
5. Respond to enquiries	5.1 Address enquiries by members of community, industry and program in terms of good customer service 5.2 Keep records of contacts, enquiries and presentations for reporting and follow-up 5.3 Follow up enquiries and presentations to obtain commitments to program services and objectives

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCCCF413 Service committees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide support services to committees.

This unit applies to community program leaders who organise meetings for committees and sub-committees at the group and regional levels to support the operation of community groups. These individuals take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise meetings	1.1 Clarify purpose of meeting with the chair, secretary or coordinator 1.2 Prepare and maintain schedule of meetings in line with program, group, regional or agency requirements

Element	Performance criteria
	1.3 Organise venue and date of meeting according to meeting schedule, group requirements and within any budget constraints 1.4 Advise participants of any changes to original meeting details 1.5 Advise all appropriate individuals of details of meetings and follow up for confirmation of attendance 1.6 Accept and record any apologies 1.7 Set up meeting room in a timely manner to suit arrangements
2. Prepare business papers for meetings	2.1 Prepare notice of meeting and agenda and provide details 2.2 Prepare reports for meeting 2.3 Distribute business papers to appropriate individuals following established guidelines
3. Record and produce minutes of meeting	3.1 Take notes of meeting activities and decisions to ensure an accurate record of meeting 3.2 Produce minutes of the meeting in required format to provide an accurate account of meeting 3.3 Check minutes for accuracy, get approval and distribute
4. Follow up after meetings	4.1 Prepare action lists on work following from meetings 4.2 Deal with requests for information promptly and accurately 4.3 Deal with correspondence in a timely manner

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF413A Service committees.

Assessment Requirements for AHCCCF413 Service committees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- organise formal meetings and advise members of details within agreed timeframes
- prepare business papers and additional information for meetings
- take meeting notes to meet enterprise requirements
- carry out follow up actions within agreed timeframes
- prepare minutes according to committee, organisational and legislative requirements
- distribute meeting minutes within agreed timeframes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- meeting procedures, both formal and informal
- agency guidelines or instructions where applicable
- relevant program and incorporation requirements for group where applicable
- local facilities for meetings
- local arrangements for authorising expenditure
- office and related business procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCCF414 Coordinate fundraising activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop fundraising ideas and coordinate fundraising activities.

This unit applies to community program leaders who coordinate fundraising activities for local Landcare community groups or programs. These individuals take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Seek fundraising ideas	1.1 Identify requirements for funds to determine extent of fundraising required 1.2 Identify successful fundraising activities used by this or other groups for further investigation

Element	Performance criteria
	1.3 Compare potential new fundraising activities to existing methods to determine preferred fundraising activities 1.4 Review, with other leaders, potential fundraising ideas to select preferred fundraising activity 1.5 Consider views of individuals in groups in determining preferred fundraising activities
2. Select and develop ideas	2.1 Estimate costs, required resources and potential net income 2.2 Present selected fundraising activities to group to obtain agreement 2.3 Conduct risk assessment of fund raising activities 2.4 Seek any permissions or permits required for undertaking fund raising activities 2.5 Confirm insurance requirements and coverage for fund raising activity
3. Conduct fund raising	3.1 Seek volunteers to manage or support activities in fundraising program and negotiate duties 3.2 Manage budget for fundraising activities 3.3 Organise volunteers into committees or teams 3.4 Ensure fundraising activities comply with public safety, work health and safety and other requirements 3.5 Supervise fundraising activities to ensure optimum return with available resources and to present a positive image of the group 3.6 Ensure security of money collected 3.7 Check activity sites to ensure they are tidy 3.8 Record results from fundraising activities
4. Review results	4.1 Calculate the results of the fundraising 4.2 Evaluate the fundraising activity 4.3 Coordinate discussion on relative value of fundraising activities and potential suitability for future 4.4 Report results and evaluation to management committee with recommendations or lessons for future activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF414A Coordinate fund-raising activities.

Assessment Requirements for AHCCCF414 Coordinate fundraising activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- coordinate fundraising activities according to enterprise and legal requirements
- develop fundraising ideas that are appropriate to the group or program goals and values
- present ideas for fundraising at meetings according to meeting protocols
- approach and enlist support of volunteers
- coordinate committees or teams and the sites and resources required for fundraising
- coordinate activities and manage risks
- evaluate past and current fundraising activities
- report outcomes according to group requirements
- manage finances including preparing budgets, handling money and recording incoming and outgoing funds

Knowledge Evidence

The candidate must demonstrate knowledge of:

- scope of acceptable activities within various cultures/groups in the community
- basic cash handling procedures
- insurance relating to fund-raising activities
- basic financial statements
- public safety requirements and legislation
- relevant local government by-laws
- permits required for some fundraising activities

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCCF415 Coordinate social events to support group purposes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate events that support group purposes.

This unit applies to community program leaders who coordinate events in the context of a workplace or a community group as a method of creating community interest in a Landcare program.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan events	1.1 Identify relevance of events within group's activities to ensure

Element	Performance criteria
	contribution to group goals 1.2 Canvass group members' preferences for types and frequency of activities 1.3 Develop concept, timing and resources for event to meet group's needs and support any community involvement 1.4 Manage risks of events, including group and public safety, and group image 1.5 Promote event to members and section of the community 1.6 Determine availability of personnel and resources for event 1.7 Support group to plan event within budget
2. Coordinate activities	2.1 Prepare location of event to cater for activity and people 2.2 Check availability of resources to ensure event will occur as planned 2.3 Coordinate people assisting in the event to provide an environment consistent with purpose of activity 2.4 Manage shortages in personnel and resources to minimise impact 2.5 Welcome and liaise with visitors and members to develop positive social environment
3. Close event	3.1 Clean and restore event site on completion of activity 3.2 Conduct evaluation of events including feedback from members

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF415A Coordinate social events to support group purposes.

AHCCCF501 Evaluate project submissions

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and apply evaluation criteria and processes to project submissions.

This unit applies to those who typically work as part of a team process to decide on government funding for community-based projects at regional and State/Territory levels.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Review previously planned project	1.1 Identify updates to proposed project outcomes and evaluation

Element	Performance criteria
outcomes	processes 1.2 Conduct consultations with community group leaders, coordinators and facilitators to identify any changes to original plan, timelines, outcomes, and to evaluation 1.3 Identify availability of data and suitable range of methods to evaluate project progress
2. Develop evaluation approach for project submissions	2.1 Develop criteria for evaluation of project applications or submissions 2.2 Develop decision making process for evaluating and accepting or rejecting project submissions 2.3 Consult with stakeholders on proposed criteria and decision making process 2.4 Review process based on stakeholder feedback and organisational requirements 2.5 Develop review panel for evaluation of project submissions 2.6 Communicate decision making process and selection criteria to review panel, project applicants and other key stakeholders
3. Evaluate project submissions	3.1 Acknowledge receipt of all project submissions 3.2 Use agreed processes and criteria to evaluate project submissions 3.3 Review decisions with other panellists to determine outcomes
4. Communicate decisions	4.1 Communicate decisions of panel to project applicants 4.2 Provide feedback on submissions and reasons for decisions 4.3 Publish outcomes according to organisational policies and procedures
5. Report on and implement conclusions	5.1 Prepare report to program, agency and project requirements 5.2 Check analysis and report conclusions with key stakeholders to identify any deficiencies to be removed or additional information that should be included 5.3 Ensure report meets required program and agency standards in terms of layout, format, style and process 5.4 Ensure data collection, analysis and reporting are timely to project agency requirements 5.5 Submit report according to project, program and agency requirements 5.6 Implement report conclusions to project, program and agency requirements and within the scope of the group resources and authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF501A Evaluate project submissions.

AHCCCF505 Contribute to regional planning process

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to contribute to a regional planning process.

This unit applies to those whose job role requires them to contribute to and assist in the regional planning process under the broad direction of technical specialists, facilitator and/or group and panels. These individuals take personal responsibility and exercise autonomy in managing and undertaking complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Participate in panels and group discussion on the planning	1.1 Submit natural resource management issues, economic and social factors, and potential solutions or directions to groups for discussion

Element	Performance criteria
process	1.2 Ensure contributions are positive to assist group to develop course of action and recommendations 1.3 Structure contributions to discussions and panels and groups to comply with legislative, program and agency requirements
2. Collect data and background information	2.1 Collect information on local natural resource management issues and survey local groups, projects and programs 2.2 Make arrangements for additional data to be collected for input into analysis and the planning process
3. Contribute to the plan	3.1 Highlight local natural resource management issues to the planning team for inclusion in planning considerations 3.2 Explore relationship between local and wider issues to submit views on natural resource management priorities and solutions 3.3 Review draft plans in terms of impact on the local and wider region to identify deficiencies and propose solutions 3.4 Ensure participation in community consultation assists the regional planner to obtain feedback on the draft plan 3.5 Base proposals for improvement to draft plans on natural resource management within relevant contexts

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF505A Contribute to regional planning process.

Assessment Requirements for AHCCCF505 Contribute to regional planning process

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- participate in panels and group discussion on the planning process
- collect information on local land management issues and relate to economic, industry and social factors
- submit views on natural resource management priorities and solutions
- review draft plans in terms of impact on the local and wider region to identify deficiencies and propose solutions
- participate in community consultation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- local community issues including economic, industry and social factors
- natural resource management issues for local area or region
- legislative, program and other requirements for regional plans and the planning process
- regional planning concepts
- natural resource management processes
- consultation approaches

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCCF506 Manage the incorporation of a group

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage the incorporation of a group, including identifying association requirements, seeking incorporation approvals, and executing incorporation requirements.

This unit applies to individuals who take personal responsibility and exercise autonomy and management in undertaking complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify association requirements	1.1 Obtain legislative requirements for incorporation from relevant authorities 1.2 Assess readiness of group to proceed with incorporation against program and legislative requirements

Element	Performance criteria
	1.3 Seek appropriate government agency and legal advice during incorporation procedures 1.4 Document changes required in group structure, membership and operating processes for presentation to the group
2. Seek incorporation approvals	2.1 Obtain consents from members and committee at the various stages of incorporation in accordance with legislative requirements 2.2 Elect or appoint committee, public officer, treasurer, auditor and other officers in accordance with proposed association rules 2.3 Obtain consent from membership to apply for incorporation and to advertise group's intention, in accordance with legislative requirements
3. Execute incorporation requirement	3.1 Define group's objectives and operating rules in accordance with the legislation and program guidelines 3.2 Select and reserve group name in accordance with legislative requirements 3.3 Provide appropriate notice of incorporation in accordance with legislative requirements 3.4 Submit appropriate forms and pay required fees to implement incorporation according to legislative requirements 3.5 Implement changes in association documents and processes in accordance with legislative requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF506A Manage the incorporation of a group.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCCCF506 Manage the incorporation of a group

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- document changes required to group structure, membership and operating processes according to incorporation procedures
- seek and interpret government and legal advice for the incorporation of group
- give instructions for preparation of documents to legal and enterprise standards
- use negotiation and facilitation skills to resolve conflict
- prepare and present reports to legal requirements
- identify assessment requirements
- seek incorporation approvals
- execute incorporation requirements

Knowledge Evidence

The candidate must explain:

- required legal processes and related legislation for incorporating a group
- reporting procedures for incorporated groups and for groups in programs
- group organisational structures and processes
- required financial processes
- incorporation principles and local legislation
- incorporation and reporting requirements of program
- establishment of groups and operating procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCCF601 Coordinate the development of regional plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate the development of regional plans in the context of natural resource management.

This unit applies to individuals who take responsibility for teams and exercise autonomy in undertaking complex work and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Community Coordination and Facilitation (CCF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Scope requirements	1.1 Determine reasons for development of a regional plan to identify broad goals and legislative requirements 1.2 Identify prior regional planning work as input to proposed regional planning process
2. Determine regional	2.1 Determine regional boundaries from economic, environmental

Element	Performance criteria
boundaries	<p>and social factors, that will produce a coherent plan</p> <p>2.2 Identify economic, environmental and social factors that overlap the proposed regional boundaries to develop a scope and weighting of the factors</p> <p>2.3 Review previous plans and reports to verify the suitability of the proposed regional boundaries</p> <p>2.4 Meet program requirements for the development of regional plans in the identification of regional boundaries</p>
3. Identify regional resource management issues	<p>3.1 Research regional natural resource issues from past documentation and from stakeholder views</p> <p>3.2 Research and assess current and potential impacts of government, economic, industry, environmental and social factors on natural resource management issues</p> <p>3.3 Estimate the likely depth of research required to obtain sufficient information on issues for planning purposes</p>
4. Scope stakeholders in regional resource management planning process	<p>4.1 Scope economic, industry, social and government activities to identify influential organisations, groups and people and their particular interests</p> <p>4.2 Approach organisations and groups to determine their interests, viewpoints on natural resource management issues, and willingness to participate in regional planning process</p> <p>4.3 Identify nature of community involvement in planning process from understanding of issues and community</p>
5. Develop proposal for regional plan	<p>5.1 Review the objectives of the plan after scoping to determine feasibility of proposed processes</p> <p>5.2 Develop proposal for a new or revised plan to obtain funding</p> <p>5.3 Make estimates of time to complete tasks including time for consultations and approvals and any discussion with Indigenous communities and groups</p> <p>5.4 Identify costs associated with development of regional plan from preliminary research</p> <p>5.5 Prepare proposal to address the requirements of program and relevant legislation and agency policies and processes</p> <p>5.6 Submit proposal for regional plan for approval and funding according to agency and program procedures</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCCF601A Map regional issues and stakeholders.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCCCF601 Coordinate the development of regional plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review existing planning documents and sources of information to inform the plan
- identify land management issues and potential solutions
- identify stakeholders to form discussion groups and seek individual input to planning
- organise for the collection and analysis of data to inform planning and monitor progress
- work with stakeholders and technical advisers to develop goals and performance criteria
- develop a draft plan for widespread consultation and feedback
- finalise the regional resource management plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- broad geographic indicators with particular emphasis on the region
- regional and rural planning concepts from town planning, rural industry planning, and natural resource planning perspectives
- impact of government processes and industry activities in social and economic terms
- consultative techniques
- National, State and Local policies, procedures and legislation that applies to regional planning
- natural resource management and issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCHM101 Follow basic chemical safety rules

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to perform a work role that uses chemicals and requires awareness of their use.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes.

This unit applies to individuals who undertake defined routine activities alongside a supervisor in most situations. They exercise limited autonomy within established and well known parameters and identify and seek help with simple problems.

The skills and knowledge described in this unit underpin a broad range of activities applicable to various job roles at various levels.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work with chemicals	1.1 Confirm the activity to be undertaken with the supervisor 1.2 Take steps to control risks as directed 1.3 Confirm tools and equipment to be used with supervisor 1.4 Wear appropriate personal protective equipment and ensure correct fit as directed by supervisor
2. Identify risks associated with chemicals	2.1 Identify functions of chemicals in the workplace 2.2 Identify chemical labels, safety signs and symbols, Safety Data Sheets (SDS) 2.3 Report safety hazards to supervisor 2.4 Identify and locate chemical storage locations 2.5 Recognise and observe instructions for transport, handling and storage of chemicals 2.6 Recognise and observe instructions for maintenance and storage of personal protective equipment and application equipment
3. Follow chemical handling and storage rules	3.1 Follow chemical handling and storage instructions as per labels 3.2 Follow safety rules when working in areas where chemicals are stored 3.3 Follow emergency procedures in the event of an accident or spillage 3.4 Record information as directed by supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCHM101A Follow basic chemical safety rules.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCCHM101 Follow basic chemical safety rules

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- locate and follow safety information on chemical labels and relevant Safety Data Sheets (SDS)
- recognise caution or hazard signs and symbols
- recognise hazards and risks associated with chemical handling and use
- use appropriate personal protective equipment
- follow emergency procedures during an accident or spillage
- communicate effectively with supervisor such as raising issues of concern
- record information accurately
- apply enterprise work health and safety procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- occupational health and safety rules required to work near and around chemicals
- level of hazard and Poisons Schedule in the relevant State or Territory
- types of chemicals used for the control of pests, weeds and diseases
- personal protection equipment and when and how it should be used, stored and maintained
- environmental impacts of chemical use
- roles and responsibilities for using and managing pesticides within the workplace
- relevant work health and safety, pesticide and environmental legislation

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM201 Apply chemicals under supervision

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply chemicals using workplace specific application equipment under supervision.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes.

This unit applies to individuals who undertake defined routine activities alongside a supervisor in most situations. They exercise limited autonomy within established and well known parameters and identify and seek help with simple problems.

The skills and knowledge described in this unit underpin a broad range of activities applicable to various job roles at various levels.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Confirm the activity to be undertaken with supervisor, including identifying potential hazards and risks 1.2 Take steps to control risks as directed 1.3 Confirm tools and equipment to be used with supervisor 1.4 Wear appropriate personal protective equipment as per label instructions and ensure correct fit
2. Check application equipment	2.1 Carry out pre-operational checks of application equipment and identify and replace any damaged or worn components or report to supervisor 2.2 Prepare application equipment for use
3. Prepare application equipment	3.1 Follow all label instructions for the chemical or substance being used 3.2 Use appropriate mixing equipment 3.3 Check that output of application equipment is correct 3.4 Measure, mix and load chemical mix or substances 3.5 Confirm instructions from chemical label and supervisor in the event of a spill 3.6 Check that output of application equipment is correct and in accordance with application/spray plan.
4. Apply chemicals	4.1 Assess and record meteorological conditions and forecasts prior to and during application where relevant 4.2 Cease application if conditions become unsuitable 4.3 Apply chemical ensuring minimal risk to others and the environment 4.4 Minimise risks to others, product integrity and the environment prior to and during application
5. Transport and handle chemicals	5.1 Confirm precautions for the transport and handling of chemicals with supervisor 5.2 Transport and handle chemicals in accordance with relevant commonwealth, state and territory chemical legislation
6. Finalise work	6.1 Clean and store personal protective equipment and application equipment in accordance with manufacturers and work health and safety requirements 6.2 Dispose of excess chemicals and clean containers in accordance with label instructions and regulatory requirements 6.3 Complete incident reports as required

Element	Performance criteria
	6.4 Complete application records 6.5 Store unused chemical and products in appropriate location 6.6 Adhere to all re-entry requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCCHM201A Apply chemicals under supervision.

Assessment Requirements for AHCCHM201 Apply chemicals under supervision

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and adopt safe work practices
- follow directions on chemical labels and relevant Safety Data Sheets SDS
- carry out pre-operational checks of application equipment
- measure, mix and load chemical mixes
- safely apply chemical under supervision
- report spillages, accidents or deficiencies in procedures and practices to supervisor
- use appropriate personal protective equipment
- follow emergency procedures during an accident or spillage
- follow enterprise work health and safety procedures
- safely dispose of chemicals
- record relevant information, including amount of chemical applied as per commonwealth, state and territory chemical legislation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant commonwealth, state and territory legislation
- various transport and handling techniques and requirements
- layout and information contained in chemical labels and SDS
- features and functions of a range of application equipment relevant to the role
- risk factors to be taken into account such as human and animal health, spillage and environmental

- different broad chemical types such as insecticides, herbicides and fungicides and their mode of action symbols on the label
- paths of entry of poisons into the body and the methods of limiting exposure
- how to assess if weather conditions increase risks and when it becomes unsuitable for application to continue
- relevant applied principles of Integrated Pest and Resistance Management
- relevant parts of the workplace spray plan

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM301 Use application equipment to apply fumigant in confined spaces

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use application equipment to fumigate grain, seed, crops and plants in confined spaces.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes.

All work is carried out to comply with Safety Data Sheets and chemical label directions.

This unit does not cover individuals physically entering and working within an enclosed or confined space.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Pre-requisite Unit

AHCCHM303 Prepare and apply chemicals

AHCCHM304 Transport and store chemicals

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan fumigation	1.1 Determine the need for fumigation as an option within an Integrated Pest Management (IPM) and Integrated Resource Management (IRM) strategy 1.2 Determine type of fumigant and application rate 1.3 Select method of fumigant application to suit type of pest, facility and grain or plant type 1.4 Assess appropriateness of facility and conditions for selected fumigation method 1.5 Select and use appropriate personal protective equipment as per label instructions.
2. Prepare storage facility for fumigation, application equipment and fumigants	2.1 Identify hazards, assess risks and implement control measures in relation to the use of fumigants in enclosed spaces 2.2 Establish security measures to control access during fumigation and prescribed re-entry periods 2.3 Erect signage and barriers to control risk of inadvertent entry to facility 2.4 Check seal, calculate volume of storage facility, and take appropriate measurement to ensure the required concentration of fumigant is retained 2.5 Check operational effectiveness of equipment 2.6 Calibrate fumigation equipment to deliver the correct application rate 2.7 Transport and store fumigants 2.8 Prepare fumigant in accordance with label instructions
3. Conduct and monitor fumigation	3.1 Apply fumigation using appropriate equipment, fumigation methods and sealing methods 3.2 Respond to emergency situations using emergency response procedures 3.3 Monitor fumigation site during exposure time and ventilation to prevent unauthorised access 3.4 Maintain integrity of seals throughout the active fumigation period
4. Ventilate storage facility	4.1 Establish ventilation and re-entry times and control risks 4.2 Ventilate facility to remove fumigant in a safe and controlled manner

Element	Performance criteria
	4.3 Test for evidence of residual gas using appropriate equipment 4.4 Notify appropriate personnel of any further risk control measures required
5. Restore storage facility	5.1 Collect and remove all equipment, fumigants and waste 5.2 Remove signage and barriers when facility is available for re-use 5.3 Restore storage facility
6. Clean, safety-check and store equipment and fumigants	6.1 Clean, check, decontaminate and store equipment and personal protective equipment in appropriate location 6.2 Dispose of all waste as per label instructions
7. Record fumigation details	7.1 Record details of fumigant applications 7.2 Record and report gas escapes, safety incidents or poisoning to the appropriate person or authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCCHM301A Conduct fumigation in enclosed spaces.

Assessment Requirements for AHCCHM301 Use application equipment to apply fumigant in confined spaces

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the need for fumigation as an option within an Integrated Pest Management (IPM) and IRM strategy
- select the appropriate fumigant and application method
- prepare fumigants
- set up and calibrate fumigation equipment
- prepare and monitor the facility and equipment
- seal the facility
- conduct fumigation
- check for residual fumigant gas
- restore the facility and cleaning the equipment
- record work activities
- use appropriate personal protective equipment
- follow emergency procedures during an accident or spillage
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- primary and secondary pests relevant to grain, seed, crops or plants to be treated
- fumigant free options for pest control including Integrated Pest/Resistance Management principles
- fumigant labels and SDS used in the workplace
- how to interpret and apply fumigant label requirements

- factors and considerations in relation to fumigation of relevant grain, seed, crops and plants
- range of techniques to seal a facility
- different personal protective equipment and their uses
- legislation, regulations and licensing requirements in relation to fumigant use
- confined space regulations including signage, gas detection and entry procedures
- features, functions, calibration and set up of fumigation equipment
- risk factors including human and animal health, leakage, spillage and environmental
- how to assess for residual gas and safe re-entry periods
- consequence of fumigant residues and Maximum Residue Limits (MRLs)
- ventilation processes
- requirements for disposal of excess fumigants, clearing spillages and equipment clean up

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Assessment Requirements for AHCCHM302 Fumigate soil

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the need for fumigation
- select appropriate fumigant and application method
- conduct pre-operational checks on equipment and personal protective equipment
- prepare site for fumigation
- set up and calibrating fumigation equipment
- fumigate soils safely in accordance with chemical label
- aerate soils and check for residual fumigant gas
- ventilate fumigation enclosure if fumigation is performed in glasshouse or similar
- clean and store fumigation equipment and personal protective equipment after completing work
- use appropriate personal protective equipment
- follow emergency procedures during an accident or spillage
- complete fumigation records follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- primary and secondary soil/media pests
- threshold pest levels and cost benefit
- fumigant free options for pest control including Integrated Pest/Resistance Management principles
- how to interpret fumigant label and SDS requirements
- soil, media type, moisture and temperature factors in relation to fumigation
- features, functions, calibration and set up of fumigation equipment

- legislation, regulations and licensing requirements in relation to fumigant use
- risk factors including human and animal health, weather, leakage, spillage and environmental
- requirements for disposal of excess fumigants, clearing spillages and equipment clean up
- a variety of primary and secondary soil and media pests
- a variety of fumigant labels and SDS used in the workplace
- types and application of personal protective equipment

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM303 Prepare and apply chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare and apply chemicals for the control of pests across a range of industry sectors.

This unit covers the use of general application equipment used across a variety of industries including; boom sprays, orchard air-blast sprayers, handheld spray equipment, wipers, dry chemical applicators, dips, pour-on, spot-on, vaccination and drenching equipment.

All work must be carried out to comply with workplace procedures, work hand safety and pesticide legislation and codes.

All work must be carried out to comply with chemical label instructions, Safety Data Sheets (SDS's), the organisation's application plan and relevant legislation.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

This unit may be deemed to have a time limit when used as part of an accreditation or licence process.

Chemicals (CHM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine the need for chemical use and prepare a application plan	1.1 Identify the nature and level of the pest, weed infestation or disease, assess the need for control 1.2 Assess the requirement for chemical use as an option within an integrated pest management strategy 1.3 Undertake a hazard and risk analysis of different chemical options 1.4 Confirm requirement for chemical application 1.5 Assess the spray drift risk of various application options 1.6 Assess the risk to sensitive areas and environmentally sensitive organisms 1.7 Prepare application/spray plan where required
2. Prepare chemical mixes	2.1 Access the workplace application or spray plan to determine chemical and target, application rate or dose, type of application equipment, set-up requirements and amount to be applied as per the label instructions 2.2 Identify potential hazards, assess risks and implement control measures 2.3 Interpret and apply requirements from chemical labels 2.4 Select appropriate personal protective equipment (PPE) for each stage of work and ensure correct fit 2.5 Select appropriate mixing equipment and a suitable location for mixing and loading 2.6 Mix chemicals in accordance with registered use and clean equipment when finished task 2.7 Follow label instructions in the event of a spill 2.8 Confirm that neighbours have been notified of chemical application as appropriate
3. Calibrate application equipment	3.1 Select application equipment to be used to minimise spray drift risk and maximise efficacy 3.2 Carry out pre-operational checks of application equipment 3.3 Calibrate equipment in accordance with manufacturers' specifications and application/spray plan. 3.4 Safely load chemical mix wearing appropriate Personal Protective

Element	Performance criteria
	Equipment (PPE) and controlling risks to human health and the environment
4. Apply chemicals	4.1 Monitor meteorological conditions and forecasts prior to and during application to minimise spray drift and other off target movement of chemicals 4.2 Select and use appropriate PPE in accordance with chemical label and SDS's 4.3 Apply chemical in accordance with the label and application/spray plan 4.4 Assess and minimise risks to others, product integrity and the environment 4.5 Follow chemical spill or accident procedures in the event of a spill
5. Clean up equipment and complete records	5.1 Dispose of excess chemicals and containers as per label and SDS instructions 5.2 Clean and decontaminate application equipment in appropriate location 5.3 Clean and store personal protective equipment in appropriate location 5.4 Report incidents 5.5 Complete all records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is not equivalent to AHCCHM303A Prepare and apply chemicals.

Assessment Requirements for AHCCHM303 Prepare and apply chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the need for chemical application
- develop a application/spray plan
- identify hazards and implement risk control procedures to ensure a safe workplace
- interpret and apply chemical label requirements included in the application or spray plan
- identify weather conditions that impact on spray drift risk and implement control measures
- conduct pre-operational checks of application equipment
- calibrate handheld and/or powered application equipment relevant to the industry sector
- mix and load chemicals in accordance with label requirements
- measure and record weather conditions before and during and after application
- apply chemicals safely in compliance with labels, legislation and codes of practice
- dispose of surplus chemicals and empty containers
- record relevant information including amount of chemical applied
- use appropriate personal protective equipment
- follow emergency procedures during an accident or spillage

Knowledge Evidence

The candidate must demonstrate knowledge of:

- options for pest control based on the Integrated Pest and Resistance Management Plan
- pest and/or disease resistance management
- various chemical labels and SDS formats
- impact of meteorological factors on the safe and effective application of chemicals

- factors that determine spray drift risk including droplet size, wind speed, temperature and temperature inversions and approaches to controlling spray drift risk
- risk factors including human and animal health, weather prior to, during and after application, spillage, residues in plants and animals consumed as food and environmental
- how to mix chemicals including mixing order, adjuvants and water quality
- requirements for disposal of excess chemicals, clearing spillages and equipment clean up
- how to select, operate and use a variety of application equipment including boom sprays
- features, functions and calibration techniques for a range of powered and hand held application equipment relevant to the industry sector
- spray nozzle identification, selection, operation and use
- pests, weeds and/or diseases relevant to the industry sector
- legislation, regulations and licensing requirements in relation to chemical use
- APVMA policy on spray drift management

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

The candidate must be assessed at least once calibrating application equipment.

Assessors must satisfy current standards for RTOs.

AHCCHM304 Transport and store chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to safely transport, handle and store liquid and dry chemical formulations across a broad range of industry sectors.

This unit does not cover operation of specialised chemical application equipment and machinery or application of chemicals.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes. All work is carried out to comply with Safety Data Sheets, chemical label directions and relevant legislative requirements.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Confirm the regulatory requirements that apply in the relevant State or Territory.

This unit may be deemed to have a time limit when used as part of an accreditation or licencing process.

Pre-requisite Unit

Nil.

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to transport and handle chemicals	1.1 Identify hazards, assess risks and implement control measures 1.2 Confirm contact phone numbers of emergency services are carried in vehicle in case of accident, spill or fire 1.3 Confirm chemicals will be transported in a vehicle that is compliant with the relevant legislation. 1.4 Confirm containers are secured in the tray, protected from the weather and in a sound condition to transport 1.5 Confirm appropriate first aid kit is carried in the vehicle in case of accident, spill or fire 1.6 Confirm transport arrangements meet legislative and regulatory requirements for the transport of hazardous substances and dangerous goods. 1.7 Obtain current Safety Data Sheets (SDS) from reseller or manufacturer for all chemicals to be transported
2. Transport and handle chemicals	2.1 Follow instructions from chemical SDS, to comply with transport requirements 2.2 Follow instructions from chemical label and SDS in the event of a spill or accident 2.3 Report transport incidents as required
3. Store chemicals in the workplace	3.1 Select and use appropriate personal protective equipment and ensure correct fit 3.2 Use appropriate storage methods as per label and Safety Data Sheet requirements and work health and safety standards 3.3 Maintain storage area according to legislative and regulatory requirements, including work health and safety and environmental protection. 3.4 Retain products in original containers with labels intact 3.5 Utilise storage methods to prevent contact with people or animals and contamination of produce or the environment 3.6 Apply correct disposal procedures for used chemical drums and storage containers as per the label and industry programs 3.7 Dispose of unwanted and out-of-date chemicals in the appropriate manner according to legislative and regulatory requirements and industry programs
4. Record storage details	4.1 Maintain chemical storage inventory and records according to legislative requirements

Element	Performance criteria
	4.2 Report storage incidents according to legislative requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCCHM304 Transport and store chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow legislative requirements for the safe transport of chemicals
- follow emergency procedures for chemical spillage
- handle, transport and store chemical safely
- maintain a chemical storage area and chemical manifest, including copies of SDS for each product
- follow chemical label directions and SDS requirements for handling, transporting and storage
- maintain storage records
- follow enterprise work health and safety policies
- follow enterprise environmental protection policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to read a chemical label and SDS and translate that information into actions
- appropriate legislation and regulations that apply to transporting and storing chemicals
- risk factors including human and animal health and environmental associated with transporting, handling and storing chemicals
- requirements for disposal of excess, unwanted and out-of-date chemicals and used chemical containers
- processes to clear spillages and clean up
- types of placarding required for storage of hazardous chemicals and dangerous goods
- types of emergency information that must be carried in the vehicle when transporting dangerous goods

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM305 Conduct manual fumigation of vertebrate and invertebrate pests

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to control vertebrate and invertebrate pests by means of manual fumigation.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes.

All work must be carried out to comply with Safety Data Sheets, chemical label directions and the Integrated Pest Management strategy.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources. Work is carried out to industry standards.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

This unit may be deemed to have a time limit when used as part of an accreditation or licence process.

Pre-requisite Unit

AHCCHM303 Prepare and apply chemicals

AHCCHM304 Transport and store chemicals

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine type and method of fumigation	1.1 Identify the nature and level of pest presence 1.2 Determine need for fumigant use within an Integrated Pest Management (IPM) strategy 1.3 Determine type of fumigant and application rate 1.4 Select method of fumigant application to suit type of pests and site 1.5 Determine volume to be fumigated to ensure fumigation conditions are met as per label instructions 1.6 Conduct and record work health and safety risk assessment for both fumigation and post fumigation re-entry
2. Prepare to use fumigant according to label and SDS	2.1 Select appropriate personal protective equipment (PPE) as per label requirements and check for effectiveness 2.2 Define and calculate application/dosage rates 2.3 Erect prominent signage notifying passers-by of fumigation operation in progress 2.4 Identify hazards, assess risks and implement control measures 2.5 Prepare fumigation site to control inadvertent entry or exposure 2.6 Implement emergency procedures as required
3. Conduct fumigation	3.1 Confirm first aid equipment is available onsite 3.2 Assess weather conditions and forecasts prior to and during application 3.3 Create airtight seal in fumigation area to ensure maximum effectiveness of fumigation 3.4 Signpost and barricade fumigation site where required to prevent access 3.5 Apply fumigant safely and effectively in accordance with label requirements 3.6 Control site until area is suitable for re-use 3.7 Transport and store fumigants as required
4. Monitor fumigation	4.1 Monitor fumigation site to control access and maintain safe conditions during active period for the time specified on the label

Element	Performance criteria
	4.2 Monitor fumigation site for pest activity 4.3 Assess fumigant escape safety implications and take immediate action if required
5. Ventilate fumigated area	5.1 Follow label direction to determine when conditions are suitable for ventilation to minimise risk to health and safety 5.2 Calculate time required for ventilation 5.3 Ventilate site in accordance with registered label, SDS, Code of Practice and enterprise standards
6. Clean up following fumigation	6.1 Remove barriers, signs and locks and store for future use in appropriate location 6.2 Clean, decontaminate, check and store equipment and personal protective equipment in appropriate location 6.3 Transport and store fumigants in accordance with label, legislative and industry practice 6.4 Dispose of all waste as per label instructions
7. Record application details	7.1 Record details of fumigant applications 7.2 Record details of fumigant used in the chemical inventory or register 7.3 Maintain inventory of personal protective equipment 7.4 Follow procedures and requirements for reporting fumigation details to management/employer 7.5 Record and report safety incidents or poisoning to the appropriate person or authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCHM305A Conduct manual fumigation of vertebrate and invertebrate pests.

Assessment Requirements for AHCCHM305 Conduct manual fumigation of vertebrate and invertebrate pests

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select the appropriate fumigant for the identified pest
- interpret fumigant labels and SDS
- prepare fumigants according to chemical label instructions
- store and disposing of spent fumigants
- prepare a site for fumigation and erecting appropriate signage
- seal the facility
- apply fumigant, monitor and ventilate sites
- check for residual fumigant gas
- restore the facility and cleaning the equipment
- record work activities
- use appropriate personal protective equipment
- follow emergency procedures during an accident or spillage
- follow enterprise work, health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- fumigant labels and SDS used in the workplace
- a range of techniques to seal a site
- primary vertebrate and invertebrate pests that can be controlled by manual fumigation methods
- best fumigants to use for specific pests
- site factors in relation to fumigation

- relevant legislation and licencing requirements in relation to fumigant use
- risk factors including human and animal health, weather, leakage, spillage and environmental
- requirements for disposal of spent fumigant, clearing spillages and equipment clean up

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM401 Develop procedures to minimise risks in the use of chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assess and mitigate risks associated with the use of chemicals across a range of industry sectors.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes,

This unit applies to individuals who take responsibility for their own work and may provide direction to others. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems. Work is carried out to industry standards.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit. Competency in this unit may be deemed to have a time limit when used as part of an accreditation or licence process.

Pre-requisite Unit

Assessment Requirements for AHCCHM402 Plan and implement a chemical use program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- evaluate implementation of procedures
- identify hazards, assessment of risks and implementation and monitoring of control measures
- develop a continuous improvement strategy to minimise risk
- communicate critical chemical information to staff and ensuring understanding
- direct staff to perform tasks
- keep records
- implement enterprise work health and safety policies and procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- where to source legislation, Codes of Practice and industry requirements relating to chemical use
- hazard identification and risk assessment strategies
- risk factors including human and animal health, product integrity, weather prior, during and after application, spillage and environmental
- principles of transport, handling and storing chemicals
- requirements for the disposal of excess chemicals, clearing spillages and equipment clean up
- chemical application equipment capabilities and limitations
- life cycle of a variety of pests and the target stages
- implications of pest resistance to chemicals
- maximum residue limits

- how to calibrate equipment
- first aid and emergency procedures that may be required
- signs of pest damage and signs of beneficial organisms

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM403 Prepare safe operating procedures for calibration of equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare workplace procedures for the calibration of equipment used in the application of pest, weed and fungi control chemicals and bio-agents.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes.

This unit applies to individuals who take responsibility for their own work and may provide direction to others. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Identify needs	1.1 Identify equipment requiring calibration procedures 1.2 Assess the skill levels of operators relating to calibration in consultation with operators and supervisors where appropriate 1.3 Gather information required for procedures from appropriate sources
2. Prepare procedure	2.1 Confirm that information in procedures complies with relevant regulatory requirements, manufacturers' instructions and industry practice as applicable 2.2 Carry out a risk assessment of the calibration task and incorporate risk controls into the safe operating procedure 2.3 Confirm that procedures are in a form clearly understandable to the intended users 2.4 Highlight work health and safety issues relevant to the activities in the procedures to the users

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is no equivalent to AHCCHM403A Prepare safe operating procedures for calibration of equipment.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCCHM403 Prepare safe operating procedures for calibration of equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify needs for calibration
- analyse tasks involved in calibration
- carry out a risk assessment of the calibration task and incorporate risk controls into the safe operating procedure
- prepare procedures for calibration clearly and accurately in a manner suited to the users
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, pesticides and environmental legislation, codes of practice and enterprise procedures
- chemical handling and application
- work health and safety issues involved in calibration
- mechanical and electronic controls on application equipment

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCHM501 Develop and manage a chemical use strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and manage a chemical use strategy, including assessment of the risk of chemical transport, storage and handling.

All work must be carried out to comply with workplace procedures, work health and safety and pesticide legislation and codes of practice.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They demonstrate deep knowledge in a specific technical area.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Chemicals (CHM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and evaluate	1.1 Interpret the Integrated Pest Management (IPM), the Integrated

Element	Performance criteria
need for chemical use	Resistance Management (IRM) strategies and the organisational chemical requirements 1.2 Identify external requirements for chemical use and obtain and interpret relevant information 1.3 Document requirements for chemical use 1.4 Identify chemicals available to meet requirements and review information concerning their application
2. Develop a chemical use risk management strategy	2.1 Identify and assess hazards in the transportation, storage and handling of chemicals 2.2 Identify and document risk factors associated with the use of chemicals 2.3 Identify risk control measures and develop in accordance with regulatory requirements 2.4 Develop a risk management strategy for chemical use in accordance with legislation and IPM, IRM, and Integrated Animal Health Management principles 2.5 Research and document appropriate insurance policies covering intended chemical use according to workplace guidelines
3. Develop and implement procedures for chemical management and use	3.1 Develop procedures for management and use of chemicals in accordance with directions and standards 3.2 Document required precautions and risk control measures 3.3 Develop procedures for communicating and negotiating with the community 3.4 Distribute information on procedures and precautions in the management and use of chemicals to relevant staff
4. Identify training and supervision needs and solutions for chemical use in the workplace	4.1 Develop an appropriate strategy for the training, assessment and supervision of staff involved in chemical use including correct use and fit of personal protective equipment 4.2 Organise and provide suitable internal on-the-job training and monitoring of performance in the implementation of the chemical use strategy 4.3 Organise appropriate external training and assessment in the management and use of chemicals
5. Monitor and evaluate the implementation of a chemical use strategy	5.1 Monitor the implementation of the established chemical use strategy in terms of regulatory requirements and established criteria 5.2 Evaluate the effectiveness of the established chemical use strategy 5.3 Initiate appropriate action where there are identified problems or where required procedures and precautions are not being correctly followed

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCHM501A Develop and manage a chemical use strategy.

Assessment Requirements for AHCCHM501 Develop and manage a chemical use strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- incorporate into enterprise procedures relevant legislation, codes of practice and industry requirements covering work health and safety, hazardous substances, environment and food safety requirements related to the use of chemicals
- convey the role of chemical labels and Safety Data Sheets (SDS) in determining chemical transport, storage, handling, application and disposal procedures and practices to all staff
- ensure all staff have access to SDS for all agricultural chemicals used in the workplace
- put procedures in place to assess the risk to human health, environment, fauna and flora and market acceptability of produce from chemical transport, storage, handling, application and disposal
- develop a communication strategy to:
 - remind relevant staff of their responsibilities in chemical use
 - inform all staff exposed to agricultural chemicals of the need to minimise exposure and how to act in an emergency
 - inform neighbours when chemical spraying is planned to take place as appropriate
 - make agencies aware when a chemical spill has occurred
- develop an induction program that covers the work health and safety requirements and the responsibilities of all staff within that system
- record the training needs and completion of the training for all staff members
- monitor the health of all staff exposed to chemicals according to regulatory requirements
- ensure the need for chemical application and selection of chemicals for a purpose is in line with the enterprises documented IPM and IRM strategies
- select application techniques based on spray drift management principles, accurate placement of chemicals and the correct use of personal protective equipment

- make an application to authorities in the case of off label use and ensuring all conditions and requirements on permits have been implemented
- ensure chemical application is carried out by trained staff as required by trained staff
- ensure all withholding periods and requirements to limit access to sprayed areas have been met and can be supported by the workplace's recording system
- ensure chemical storage systems meet industry and legislative requirements and access to storage areas is covered by workplace procedures
- document and display chemical emergency procedures and conveying information to staff
- ensure all requirements for chemical signage have been met for the transport and storage of chemicals and for areas affected by chemical application
- monitor chemical persistence in vegetation, soil and water in managing environmental risk
- develop and maintain recording procedures that cover all aspects of the transport, storage, handling, application and disposal of chemicals in the workplace
- conduct periodical reviews of chemical procedures based on workplace records and where issues have emerged, necessary changes made and communicated to staff

Knowledge Evidence

The candidate must demonstrate knowledge of:

- hazards to human health, agricultural produce, and all aspects of the environment and non-target species of flora and fauna associated with the transport, storage, handling, application and disposal of chemicals
- factors that contribute to spray drift, measures to assess the potential for spray drift and prevent or control its occurrence, and the elements of a spray drift management strategy
- calibration of a range of application equipment
- routes of entry of chemicals into the body and the implications of this on chemical use management strategies
- safety procedures including the maintenance, use, fit and decontamination of personal protective clothing and equipment
- influence of meteorological factors (temperature, humidity, rain) on quality of chemical application, drift potential, effectiveness and efficacy of use
- precautions and risk control measures that may be used to minimise risks and hazards associated with the use of chemicals
- principles of IPM, IRM, IAM and their benefits in terms of chemical use risk management
- emergency procedures for safety incidents involving chemicals
- requirements and options for the keeping of records on chemical use and equipment maintenance and repair
- principles of residue effects and their management including persistence in soil and water, accumulation in agricultural produce, rate of breakdown of residues in produce and in the environment, withholding periods, and ways in which residues can occur
- movement of and persistence and degradation of different types of chemicals in various areas of the environment such as soil, air and water
- industry waste agreements, including drum MUSTER, and ChemClear
- relevant work health and safety legislative requirements and Codes of Practice

- relevant Federal/State and Territory pesticide legislation
- appropriate insurances covering chemical use, transportation and storage
- use of chemicals as part of a comprehensive Quality Assurance (QA) system, Industry QA programs and performance standards

Assessment Conditions

Competency is to be assessed in the workplace OR simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCCMN101 Adapt to work requirements in the agrifood industry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to take up employment within a specified sector of the agrifood industry.

It includes the application of industry and workplace guidelines and procedures in a day to day work context as well as appropriate work behaviour.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Common (CMN)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Manage one's own learning	1.1 Consider and articulate personal goals or vision 1.2 Identify opportunities for learning new ideas and techniques in relation to personal goals 1.3 Recognise personal learning needs and skill gaps

Element	Performance criteria
	1.4 Identify opportunities for skill development activities in consultation with relevant persons 1.5 Access and apply learning tools and practices to job 1.6 Take advantage of on-job and off-job learning opportunities
2. Adapt to and demonstrate appropriate work practices	2.1 Identify and interpret work requirements with advice from appropriate persons 2.2 Follow enterprise work health and safety policies 2.3 Observe appropriate dress and behaviour 2.4 Identify and achieve a work and personal priorities balance 2.5 Apply time management strategies to work duties 2.6 Tailor interaction with others to take into account different backgrounds, cultures and languages
3. Work within organisational requirements	3.1 Identify organisational requirements and key activities of the workplace 3.2 Identify and apply relevant workplace policies and guidelines to work undertaken 3.3 Interpret organisational values and cultural norms 3.4 Discuss and clarify uncertainties with key personnel
4. Identify sectors of the industry	4.1 Identify main sectors of the targeted industry, their key activities and the way in which they interrelate 4.2 Clarify roles and responsibilities of targeted industry 4.3 Identify key organisations representing industry and their roles 4.4 Identify current issues or events affecting the industry
5. Identify industry sector products and services	5.1 Identify products provided by the industry sector 5.2 Identify services provided by the industry sector 5.3 Identify service standards in the industry sector 5.4 Clarify industry quality standards for products and services

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AGFCMN101A Adapt to work requirements in agri-food industry.

Assessment Requirements for AHCCMN101 Adapt to work requirements in the agrifood industry

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify learning opportunities which support personal goals or vision
- recognise and take advantage of learning opportunities in the workplace
- adapt to and apply workplace procedures and practices
- complete work tasks according to workplace requirements, standards and applicable regulations
- identify and interpret information on sectors in the targeted industry
- identify and interpret information on the range of products and services produced by the targeted industry
- recognise and adapt to cultural differences in the workplace
- discuss work concerns and questions with supervisor or key personnel
- complete work with required attention to detail without damage to goods, equipment or personnel
- follow industry and enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- current events, activities, products and services of the targeted industry
- workplace policies, procedures and guidelines
- time-management strategies
- appropriate workplace protocols
- workplace equipment, tools and other technologies used in the targeted industry, and where and how to obtain information and instructions on their safe use and basic care and servicing

- sources of information on the industry sector and skills development activities

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCMN102 Apply effective work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and complete tasks effectively within a workplace environment, including working with others, using technologies and solving simple work problems.

This unit is designed for use in a Pathway qualification or skills set. It should not be used in a qualification that has a direct job outcome.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Common (CMN)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan, organise and complete daily work	1.1 Identify and interpret work instructions and priorities in consultation with supervisor 1.2 Determine and map out appropriate work plan or daily routine 1.3 Determine, collect and organise materials, resources and information needed to complete work

Element	Performance criteria
	1.4 Complete work tasks within designated timelines and in line with quality standards and instructions 1.5 Follow work health and safety policies 1.6 Deal with problems that arise in a practical, timely and appropriate manner and seek assistance when required 1.7 Seek feedback on work performance and make improvements as required
2. Communicate effectively	2.1 Identify appropriate lines of communication with supervisors, colleagues and customers 2.2 Use effective communication skills as well as literacy and numeracy skills, to gather and convey information 2.3 Demonstrate appropriate non-verbal behaviour
3. Work with others	3.1 Identify work roles of self and others in the workplace 3.2 Contribute to team outcomes in a manner that fulfils own work responsibilities and promotes cooperation and good relationships 3.3 Interact respectfully with customers and colleagues from diverse backgrounds
4. Use workplace technology	4.1 Select appropriate workplace technology to complete work tasks and use according to workplace and manufacturer guidelines and instructions 4.2 Inspect workplace technology to ensure it is working properly and take precautions to reduce risks to technology and self 4.3 Take appropriate action to address or report problems with workplace technology 4.4 Care for workplace technology according to workplace and manufacturer guidelines and instructions
5. Solve work problems	5.1 Identify problems and determine practical or creative solutions within scope of individual responsibility 5.2 Seek assistance from key personnel when required 5.3 Report workplace problems as required using workplace procedures
6. Adapt to change	6.1 Identify, clarify and accommodate new work requirements or situations 6.2 Identify possible practical or creative options to deal with workplace challenges, and discuss with supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AGFCMN102A Apply effective work practices.

Assessment Requirements for AHCCMN102 Apply effective work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret responsibilities and plan own work activities
- follow work health and safety policies
- apply relevant ethical practices and codes of practice in the course of work activities
- recognise simple numerical information relating to work activity
- communicate effectively in the course of work activities
- complete work activities in collaboration with others according to instructions, procedures and applicable regulations
- identify, report and address problems according to workplace procedures
- complete work activities with required attention to detail and without damage to goods, equipment or personnel
- use a range of workplace technologies
- use industry standard terminology

Knowledge Evidence

The candidate must demonstrate knowledge of:

- procedures for identifying and using relevant workplace technology
- systems and equipment used in the workplace and instructions, processes and precautions for their use
- typical problems in the workplace and appropriate action and solutions
- workplace procedures, policies and instructions
- workplace structures and roles and responsibilities of individuals, and team and group members
- basic principles of teamwork in the workplace

- verbal and non verbal communication techniques appropriate to receive and convey workplace information
- basic concepts of time management to meet daily planning and scheduled timelines
- industry and enterprise work health and safety policies

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCCMN103 Demonstrate care and apply safe practices at work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate effectively with others as required when following safety procedures
- identify and apply work health and safety requirements applicable to own work
- interpret the meaning of safety signs and symbols
- recognise workplace hazards
- identify control measures used in the workplace
- apply procedures for reporting workplace hazards, incidents and injuries
- follow emergency procedures
- conduct housekeeping in work area
- use personal protective equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- appropriate housekeeping and safety standards
- personal protective clothing and equipment relevant to job and job context
- procedures related to work health and safety to be followed in work area
- workplace equipment, materials and housekeeping equipment, and processes and precautions for their use
- basic principles of risk management
- common known workplace hazards and measures for controlling risks
- potential consequences of failing to follow safe work practices
- common workplace safety signage and their meanings
- procedures for responding to hazards, incidents and injuries

- workplace emergency response and evacuation procedures
- work health and safety reporting procedures
- roles and responsibilities of work health and safety personnel

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCMN201 Contribute to animal care through work activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to identify what 'animal care' means in a workplace and how one's own individual responsibilities contribute to animal care as a whole within a specific workplace or industry.

It may or may not include hands-on animal care but more importantly includes being part of a whole system that supports and contributes to animal care.

The unit also includes contributing to animal care through the use of an appropriate mix of technical skills, handling unexpected contingencies in relation to animal care, and reflecting on animal care procedures in order to make improvements to one's own work. All activities are carried out under supervision.

This unit is designed for use in a Pathway qualification or skills set. It should not be used in a qualification that has a direct job outcome.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Common (CMN)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and plan appropriate animal care approach	1.1 Identify workplace approach to working with animals, and describe in relation to work activity 1.2 Identify individual responsibilities in contributing to animal care 1.3 Identify workplace products, services, operations and customers 1.4 Identify safe work practices relevant to work activity 1.5 Identify appropriate capture and restraint requirements and equipment, where required 1.6 Map out animal care strategy based on workplace requirements and individual responsibility, and apply to work activity
2. Contribute to animal care using a mix of technical skills	2.1 Organise food preparation equipment according to task needs 2.2 Recognise common animal behaviours for the species and take appropriate action 2.3 Care for animals and feed and water according to animal welfare standards and health and safety procedures and standards 2.4 Identify tools and equipment and use safely and according to enterprise requirements 2.5 Accurately count stock levels as required 2.6 Groom animals according to enterprise and animal welfare policy as required
3. Work with others and handle unexpected contingencies	3.1 Respond to requests that effect work activity and animal care courteously, clearly, professionally and efficiently 3.2 Seek assistance with issues relating to animal care from other staff when required and in a timely manner 3.3 Keep key personnel informed of progress of animal care activity and provide clear explanations regarding issues in regards to animal care 3.4 Identify and report on physical and behavioural hazards
4. Reflect on animal care procedures	4.1 Reflect on personal performance in relation to working with animals and discuss possible improvements with supervisor 4.2 Apply improvements to work practice 4.3 Identify possible improvements to animal care procedures and discuss with key personnel

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AGFCMN201A Contribute to animal care through work activities.

Assessment Requirements for AHCCMN201 Contribute to animal care through work activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply basic principles of animal ethics and welfare
- adapt and modify activities depending on differing workplace contexts and environment
- apply animal-observation skills
- apply relevant industrial or legislative requirements
- identify and use equipment, tools and other technology required to complete workplace tasks
- follow relevant work health and safety and environmental protection procedures and requirements
- identify species using common names
- interpret and follow a designated work plan or set of instructions for a job
- keep required records of workplace activities
- plan a daily routine to complete required workplace tasks
- applying technical skills in animal care including:
 - preparing and providing food and water
 - grooming
 - counting stock
- recognising common animal behaviours and determining required response
- recognise and adapt appropriately to cultural differences in the workplace, including modes of behaviour and interaction with staff and others
- recognise limitations, ask for help and seek clarification or information about work requirements and procedures
- demonstrate appropriate initiative to deal with problems or refer them where appropriate to relevant person, and complete tasks
- apply time-management skills

- use basic interpersonal and communication skills, including listening, questioning and receiving feedback
- use routine capture and restraint procedures
- work cooperatively and collaboratively with others to complete tasks

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic principles of animal ethics and welfare
- codes of practice relating to work requirements
- diseases and pests, disease prevention and routine health care
- feeding and watering procedures
- hazards in the workplace
- health and safety requirements relating to care of animals
- capture and restraint procedures
- techniques for grooming animals
- common animal behaviours and appropriate responses
- quarantine requirements
- terminology relevant to animal care

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCMN202 Contribute to work activities to produce food

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit covers the skills and knowledge needed to contribute to work activities that help to produce food. Food in this context refers to product from animal, seafood and plant sources. Producing food may involve hands-on activities, such as seeding, weeding, hoeing and feeding stock (fish or animals), as well as post-harvest activities. It includes being part of a whole system that supports and contributes to producing food.

This unit is designed for use in a Pathway qualification or skills set. It should not be used in a qualification that has a direct job outcome.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Common (CMN)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and plan appropriate activities	1.1 Identify workplace approach to producing food and describe in relation to work activity 1.2 Identify individual responsibilities in contributing to producing

Element	Performance criteria
	food 1.3 Identify workplace products, services, operations and customers 1.4 Identify safe work practices relevant to work activity 1.5 Plan and implement activities to meet workplace requirements
2. Use an appropriate mix of technical skills	2.1 Prepare machinery, equipment and tools required to conduct work, and use safely and in accordance with work procedures 2.2 Apply technical skills to support food production and supply 2.3 Handle produce in a way that minimises damage 2.4 Maintain temperature of produce at appropriate levels 2.5 Clean, maintain and sort machine and equipment according to manufacturer or workplace specifications 2.6 Apply safe work practices to food production activities 2.7 Conduct housekeeping in work area 2.8 Complete workplace documentation
3. Contribute to postharvest treatment of produce where required	3.1 Apply post-harvest treatments where relevant 3.2 Grade and label produce where relevant 3.3 Deal with waste material produced during post-harvest handling process, according to supervisor instructions
4. Handle unexpected contingencies	4.1 Respond to requests that effect work activity courteously, clearly, professionally and efficiently 4.2 Seek assistance with issues relating to work from other staff when required and in a timely manner 4.3 Keep key personnel informed of work progress and provide clear explanations regarding issues 4.4 Identify and report on physical and behavioural hazards
5. Reflect on procedures used to produce food or plants	5.1 Reflect on personal performance and discuss possible improvements with supervisor 5.2 Apply improvements to work practice 5.3 Identify possible improvements to food production procedures and discuss with key personnel

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCCMN202 Contribute to work activities to produce food

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- adapt and modify activities depending on differing workplace contexts and environments
- apply relevant industrial or legislative requirements
- apply technical skills to support food production, including one or more of:
 - seeding
 - weeding
 - hoeing
 - feeding stock (fish or animals)
 - packing produce
- handle produce safely and according to workplace requirements
- follow enterprise requirements for market specification of products
- follow relevant food safety, work health and safety and environmental protection procedures and requirements
- grade, label and treat produce according to enterprise and customer specifications
- identify and use equipment, tools and other technology required to complete workplace tasks
- interpret and follow a designated work plan or set of instructions for a job
- maintain required records of workplace activities
- maintain work area housekeeping standards
- monitor environment of storage facility
- plan a daily routine to complete required workplace tasks
- recognise and adapt appropriately to cultural differences in the workplace, including modes of behaviour and interaction with staff and others

- recognise limitations, ask for help and seek clarification or information about work requirements and procedures
- demonstrate appropriate initiative to deal with problems or refer them where appropriate to relevant person
- use appropriate techniques to solve or report problems identified when completing work tasks
- use basic interpersonal and communication skills, such as listening, questioning and receiving feedback
- use required machinery and equipment appropriately
- work cooperatively and collaboratively with others to complete tasks

Knowledge Evidence

The candidate must demonstrate knowledge of:

- handling requirements for produce
- enterprise storage facilities and their maintenance
- enterprise quality procedures
- food safety regulations
- humidity levels and their effect on quality of produce
- hygiene issues in handling and storing horticultural, agricultural and seafood products intended for human consumption
- industry standards for grading and labelling
- post-harvest treatments for various horticultural, agricultural and seafood products
- temperature settings within storage facilities
- relevant storage methods
- correct storage temperatures for a range of produce
- safe work practices relevant to work activities
- housekeeping standards and practices
- procedures for one or more of:
 - seeding
 - weeding
 - hoeing
 - feeding stock (fish or animals)
 - packing produce
- operating and cleaning procedures for required machinery, equipment and tools

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCOM201 Assess and receive raw materials for composting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to receive green waste for processing at a compost facility, including measuring quantity for billing and assessing material quality for acceptability against specified enterprise requirements.

It applies to an employee of an enterprise engaged in commercial-scale composting operations.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Composting (COM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Organise for work	1.1 Confirm specifications for raw materials 1.2 Select hand tools and check for serviceability 1.3 Identify, assess and report existing and potential hazards to health and safety 1.4 Use, maintain and store suitable personal protective equipment
2. Receive raw materials	2.1 Recognise and assess raw materials against acceptance criteria 2.2 Reject non-conforming materials 2.3 Note and report non-conformances 2.4 Estimate and record raw materials quantity 2.5 Calculate fee and charge to customer based on raw material type and quantity 2.6 Record fee payment and provide receipt
3. Unload raw materials	3.1 Give drivers directions for unloading at a specific location 3.2 Provide unloading assistance as required 3.3 Inspect and assess raw materials against specified acceptance criteria 3.4 Reject unacceptable materials 3.5 Note and report unacceptable materials 3.6 Identify and monitor designated unloading areas to ensure compliance with unloading instructions, containment and segregation of materials and availability of storage capacity
4. Remove contaminants and stockpile acceptable raw material	4.1 Remove physical unacceptable materials from raw materials 4.2 Segregate, stockpile and contain or otherwise manage raw materials in appropriate areas 4.3 Monitor raw material stockpiles to ensure adequate available storage capacity and containment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCOM201A Assess and receive raw materials for composting.

Links

Assessment Requirements for AHCCOM201 Assess and receive raw materials for composting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- inspect raw materials for contamination and acceptability against established criteria
- measure quantity for billing
- operate a weighbridge
- provide clear directions to drivers entering site
- receive raw material for processing at a compost facility
- record raw material quantity and calculate fee

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of composting raw material assessment
- characteristics of a range of raw green waste
- enterprise policies and procedures including workplace health and safety procedures
- safety risks to self and product posed by contaminants in raw materials and products
- standard risk control measures used in the industry to minimise risk associated with handling raw materials and products

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCOM202 Recognise and respond to fire emergencies on a composting site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prevent, recognise and provide first response to fire in material or compost piles.

This unit applies to a yard or general hand under supervision of an operations team leader or site foreman and fire brigade personnel.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Composting (COM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Recognise a fire risk and undertake preventative actions	1.1 Obtain and clarify procedures for first response to fire 1.2 Identify location of firefighting equipment and check to ensure all equipment is available and ready for use 1.3 Recognise and report conditions that lead to fire and signs of fire 1.4 Observe enterprise procedures for emergencies 1.5 Implement temperature and moisture management procedures
2. Recognise and initiate response to fire	2.1 Identify nature and extent of fire 2.2 Report fire details and raise alarm 2.3 Implement preparations for water availability for fire brigade attendance 2.4 Identify hazards associated with fire emergency and take action to minimise risks to self, others and property 2.5 Secure immediate area of the emergency 2.6 Remove machinery and equipment from area where safe to do so 2.7 Select and set up firefighting equipment as directed by fire brigade personnel
3. Attack fire under direction of fire brigade	3.1 Apply appropriate firefighting and containment media in a safe and coordinated manner 3.2 Use firefighting methods and tactics as directed 3.3 Report and act upon potential for change in fire behaviour to fire brigade and supervisor 3.4 Identify and maintain clear line of retreat at all times 3.5 Observe conditions at fire and report their effects on fire development 3.6 Report significant changes to status of fire to supervisor and fire brigade
4. Carry out post-fire activities	4.1 Identify and control smouldering fire residuals according to fire brigade directions 4.2 Undertake break-up of windrows, buildings or structures 4.3 Remove spent fuel or burnt compost and debris 4.4 Undertake activities to complement post-fire operations and prevent further damage 4.5 Clear and clean site and equipment 4.6 Provide assistance to fire brigade to complete and record appropriate incident information 4.7 Report effectiveness of tactics employed 4.8 Seek feedback on performance and note improvements for future action

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCOM202A Recognise and respond to fire emergencies on a composting site.

Assessment Requirements for AHCCOM202 Recognise and respond to fire emergencies on a composting site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow emergency procedures
- operate pumps and set up water delivery system
- read and interpret site operation plans or maps
- recognise and report fire risks and incidents

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for recognising fire emergencies
- characteristics and operation of joints, hoses, valves and sprinkler components
- work health and safety and emergency management plans as part of enterprise operating procedures
- fire behaviour, extinguishing media and operating firefighting equipment
- fire control tactics and techniques, fire hazards and safety techniques
- operation of pumps
- pile size, moisture and porosity as causes of combustion
- procedures for safely using power and hand tools
- standard risk control measures used in the industry to minimise risk associated with fire response

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCOM203 Recognise raw materials, production processes and products on a composting site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise raw materials and products. It applies to the employee of an enterprise engaged in commercial-scale composting operations.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Composting (COM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Recognise, handle and locate raw materials on site	1.1 Recognise composting potential of raw materials 1.2 Compare characteristics of raw materials with site operating guidelines

Element	Performance criteria
	1.3 Recognise potential hazards handling raw materials 1.4 Confirm initial handling requirements, stockpiling location and arrangement from site operating guidelines 1.5 Identify and record contaminants in raw materials 1.6 Confirm physical contaminant handling, stockpiling location and arrangement from site operating guidelines
2. Recognise and locate key processes and technologies	2.1 Confirm composting technologies and methods, key process control steps and locations from site map 2.2 Identify windrows or vessels by batch or code numbers 2.3 Confirm machinery, plant and equipment from site operating guidelines
3. Recognise, handle and locate compost and other products on site	3.1 Describe intended use of compost and or products 3.2 Compare site operating guidelines with the handling risks and potential or common contaminants that characterise different products 3.3 Recognise potential hazards in handling products 3.4 Confirm handling requirements, stockpiling location and arrangement from site operating guidelines 3.5 Recognise and avoid potential for contamination of products 3.6 Match batching sheets or other product formulas to end product 3.7 Identify and report contaminants present in products 3.8 Identify physical contaminant handling, stockpiling location and arrangement on site
4. Identify and carry out site maintenance requirement	4.1 Identify and undertake site maintenance requirements 4.2 Identify traffic access routes and traffic and pedestrian safety rules from site operating plan 4.3 Maintain vehicle access routes 4.4 Identify and maintain machinery and site security requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCOM203A Recognise raw materials, production processes and products on a composting site.

Assessment Requirements for AHCCOM203 Recognise raw materials, production processes and products on a composting site

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify, confirm, locate, handle and maintain raw materials, products and physical contaminants on site
- implement site machinery and traffic management plans
- maintain site and machinery security requirements
- maintain site arrangement and segregation of materials and products to avoid contamination
- read and follow batch numbers and codes, and site operating plan
- recognise and locate key process control stages of production cycle and associated machinery on site

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for raw material recognition
- characteristics of a range of raw materials
- company policies and procedures, including workplace health and safety requirements
- key process control stages critical to consistent quality in compost production
- overview of systems and technologies used in compost production, particularly as relevant to workplace
- range and characteristics of products
- safety risks associated with vehicles and machinery movement on site
- safety risks to self and product posed by contaminants in raw materials and products
- standard operating procedures to minimise risk associated with handling raw materials and products

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCOM301 Operate compost processing plant, machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate compost processing plant, machinery and equipment to prepare raw materials to produce compost products.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Composting (COM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise plant, machinery and equipment operations	1.1 Review job sheet or work order to identify operating requirements 1.2 Organise equipment, materials and personnel requirements 1.3 Select, use, maintain and store personal protective equipment

Element	Performance criteria
	(PPE)
2. Prepare plant, machinery and equipment for use	2.1 Check service log to ensure service requirements have been maintained 2.2 Check communication equipment, safety devices, lighting and alarm systems for correct operation 2.3 Carry out routine pre-operational checks 2.4 Check and calibrate operational systems for correct operation 2.5 Identify and safety tag faulty plant, machinery or equipment safety 2.6 Identify and risk assess hazards associated with plant, machinery and equipment operation
3. Start and operate plant, machinery and equipment	3.1 Check operational area and inform personnel of start of operation 3.2 Operate plant, machinery and equipment in a safe and controlled manner 3.3 Monitor input materials and identify non-conformances 3.4 Monitor processing outputs and adjust plant operation to meet job specifications 3.5 Identify, rectify and report out-of-specification product or process outcomes to maintain the process within specification
4. Shut down plant, machinery and equipment	4.1 Shut down plant, machinery and equipment 4.2 Remove debris and contaminants from plant, machinery and equipment to ensure safe and efficient operation 4.3 Clean, secure and store plant, machinery and equipment 4.4 Tag or lock unsafe plant, machinery or equipment
5. Maintain records	5.1 Maintain plant, machinery and equipment operational records 5.2 Record maintenance, damage, malfunctions or irregular performance, and unsafe plant, machinery or equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCOM301A Operate compost processing plant, machinery and equipment.

Assessment Requirements for AHCCOM301 Operate compost processing plant, machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine appropriate operating methods
- implement work and equipment maintenance plans
- monitor input materials and report non-conformances
- monitor outputs and report out-of-specification product
- perform shutdown procedures and maintain records
- select and use a range of compost processing plant, machinery and equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for operating compost processing plant
- enterprise guidelines associated with operation of plant, machinery and equipment
- environmental licenses, impacts and procedures identification of contaminants
- legislation, regulations and codes of practice with regard to operator licensing, roads and traffic requirements
- legislation, regulations and codes of practice with regard to workplace health and safety and the use and control of hazardous substances, such as fuel and recipe inputs
- lock-out and tag-out procedures for plant, machinery and equipment
- manufacturer specifications for servicing of plant, machinery and equipment
- operating principles and operating methods for plant, machinery and equipment
- potential risks and hazards associated with operation of plant, machinery and equipment
- principles of weight distribution with regard to load-shifting and machinery movement
- procedures for cleaning, securing and storing machinery, equipment and materials

- product types and characteristics
- raw material types and characteristics
- workplace health and safety legislation, codes of practice and specific hazards such as hazardous substances and exposure to organic micro particles

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCCOM303 Operate a compost bagging process

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out routine maintenance on plant and equipment
- organise bagging operations
- prepare, start, operate and shut down a bagging plant
- monitor compost inputs
- monitor compost production against compost specifications
- monitor the temperature of bagged compost
- select and use various features and controls of a range of bagging plant
- ensure product readiness for distribution

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for operating a bagging process
- characteristics of product that is fit for bagging
- effect of variation in inputs which may include ingredient quality and condition, packaging components and consumables, and/or services on process performance
- emergency and routine shutdowns and procedures to follow in the event of a power outage
- environmental legislative and enterprise requirements
- equipment cleaning requirements
- flow of this process and effect on downstream processes
- hazards and controls
- inspection or test points in the process and related procedures and recording requirements
- lock-out and tag-out procedures and responsibilities

- methods used to monitor the process
- operating principles of the equipment which may include:
- operational understanding of main equipment components, status and purpose of guards, equipment operating capacities and applications
- packaging quality and seal integrity
- principles of the bagging process
- product and batch changeover procedures
- product quality and hygiene
- purpose and location of sensors and related feedback instrumentation
- purpose of packaging, coding requirements and related legal requirements, including product weight

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCOM401 Develop a composting recipe

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare and mix raw materials of known characteristics in specified proportions for composting.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Composting (COM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and characterise raw materials	1.1 Identify raw materials against established enterprise criteria 1.2 Enter raw material characteristics into compost recipe calculator to achieve a balanced recipe 1.3 Take samples of material for analysis where raw material identity

Element	Performance criteria
	<p>or characteristics are uncertain</p> <p>1.4 Determine receivable and handling requirements of raw materials</p>
2. Establish production objectives	<p>2.1 Develop product specifications for identified markets using product performance data and enterprise records</p> <p>2.2 Identify raw material combinations that meet market requirements</p>
3. Calculate compost recipe	<p>3.1 Record raw material characteristics in compost recipe</p> <p>3.2 Specify raw material ratios by weight in resulting compost recipe</p> <p>3.3 Determine raw material pre-processing requirements, volumes of compost upon formation and compost production plan</p> <p>3.4 Review composting batch management procedures and document variations to management procedures as a new procedure</p> <p>3.5 Estimate and document compost production schedule</p> <p>3.6 Confirm compatibility of compost recipe and production schedule against documented customer requirements</p> <p>3.7 Quantify density of pre-processed raw materials and translate weight-based recipe into volume-based recipe for production</p> <p>3.8 Record volumetric compost recipe and production procedures as operational batch or bucket recipe and procedures</p>
4. Validate compost recipe	<p>4.1 Prepare and mix raw materials to form feedstock for composting</p> <p>4.2 Manage composting batch according to enterprise procedure</p> <p>4.3 Monitor composting process for efficiency in relation to estimated production schedule and enterprise requirements</p> <p>4.4 Monitor environmental and health and safety aspects and impacts</p> <p>4.5 Identify faults, variations or problems carry out remedial action</p> <p>4.6 Sample and test material to determine completion of process</p> <p>4.7 Evaluate end product quality against product specifications</p> <p>4.8 Revise compost recipe, production schedule and procedures</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate a compost recipe that is consistent with the technology and method available from combinations of raw materials
- document compost production plan consistent with plant capabilities and site constraints
- produce a compost recipe that will achieve defined product specifications

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of compost recipes
- control of hazards in handling raw materials and composting materials
- processing duration required for various raw materials
- range of commercial compost-based products
- raw materials and their characteristics
- relationship between key compost recipe variables and compost production
- systems, technologies and methods in compost production

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCCOM402 Plan and schedule compost production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and schedule compost production. This unit applies to product managers at a commercial-scale composting facility.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Composting (COM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish production requirements	1.1 Quantify production requirements from raw material supply contracts and receipt data, sales and market trend information, and corporate marketing plan and strategy

Element	Performance criteria
	1.2 Identify conditions that affect production requirements with management, sales and marketing personnel 1.3 Estimate production requirements to meet customer requirements and site and equipment capacity in consultation with management, sales and marketing personnel 1.4 Monitor environmental and work health and safety impacts for compliance with enterprise plan and licence conditions 1.5 Document and submit production plan for management approval 1.6 Confirm availability of personnel, machinery and equipment for compost production 1.7 Develop contingency plan for oversupply or undersupply of raw material or product
2. Schedule production to meet requirement	2.1 Calculate batch types and volumes of compost-based products 2.2 Obtain laboratory and field test data of compost materials during and after production 2.3 Monitor and adjust production schedule according to field and laboratory test results 2.4 Make product available to customer in required quantities, to required quality and at required time

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCOM402A Plan and schedule compost production.

Assessment Requirements for AHCCOM402 Plan and schedule compost production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and document contingency plans for compost production
- document a compost production plan consistent with enterprise capabilities and constraints
- identify and interpret relevant information and conditions that could influence compost production
- make product available to customers as required
- produce and document a compost production schedule

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of compost production scheduling
- control of hazards in handling raw materials and product
- processing duration for various raw materials
- raw materials and their characteristics
- relationship between key compost recipe variables and compost production
- systems, technologies and methods in compost production

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Composting (COM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine characteristics of raw	1.1 Identify commercial objectives, product range and specifications, compliance requirements and enterprise constraints

Element	Performance criteria
materials required	1.2 Review raw material supplies for suitability for compost products 1.3 Identify complementary raw material characteristics and quantities to manufacture defined products 1.4 Specify and document characteristics and quantities of additional complementary raw materials 1.5 Identify complementary or substitute raw material types consistent with requirements
2. Identify and prioritise raw materials required for production	2.1 Identify and assess raw material options to determine priority according to product range and specifications 2.2 Obtain samples of raw materials from sources of supply and evaluate and confirm risks 2.3 Submit changes to raw materials and product specifications for incorporation into business and marketing plan and strategy
3. Secure and maintain access to raw materials	3.1 Gain management approval for securing preferred raw materials 3.2 Document specifications for raw material characteristics and acceptability criteria for receipt for inclusion in supply contract 3.3 Determine preferred suppliers of raw materials 3.4 Negotiate and secure supply contracts 3.5 Maintain communication with suppliers to support reliable and secure supply of consistent quality raw materials
4. Prepare for receipt and processing of raw materials	4.1 Document and include receipt, containment, handling and management requirements into procedures and training 4.2 Confirm availability of site infrastructure, plant and equipment requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCCOM501A Identify and secure raw materials supply for compost production.

Assessment Requirements for AHCCOM501 Identify and secure raw materials supply for compost production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess characteristics of different raw materials as relevant to manufacture of particular products according to compliance requirements
- define raw material specifications and acceptance criteria
- Identify raw materials and product specifications to incorporate into business and marketing plans and strategies
- develop criteria and identify raw material requirements from corporate documents
- draft a supply contract with inclusions as negotiated
- support reliable and secure supply of consistent quality raw materials
- review processes, plant and site capabilities against requirements for receiving and processing raw materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for securing raw materials
- capabilities and limitations of site and plant
- environmental and site licenses and associated risks and restrictions
- potential risks and hazards related to various raw materials
- raw material assessment and characterisation
- raw materials used in compost production
- regulations and standards governing raw materials
- standard forms of supply contracts
- technical and industry literacy to source and interpret test data

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC DER401 Handle, store and grade deer velvet

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to handle store and grade velvet

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to activities performed by velvet producers or their staff in accordance with the requirements of the National Velvet Accreditation Scheme (NVAS).

Pre-requisite Unit

Nil.

Unit Sector

Deer (DER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Handle and store velvet	1.1 Check equipment required for handling, storing and grading velvet is serviceable and functioning correctly 1.2 Handle harvested velvet according to food safety and NVAS requirements 1.3 Clean, weigh and store individual pieces of velvet according to industry quality assurance procedures and NVAS criteria

Element	Performance criteria
	1.4 Identify velvet by using NVAS tags or NVAS Statutory Declaration Forms 1.5 Implement enterprise work health and safety and biosecurity policies
2. Grade and sell velvet	2.1 Identify and apply factors affecting the grade of velvet in grading process 2.2 Use industry-accepted grading specifications 2.3 Transport frozen velvet according to industry quality assurance procedures 2.4 Sell velvet through national pool or to private clients 2.5 Review sales and personal grading assessments and compare with grades and feedback provided by professional graders

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC DER401A Handle, store and grade deer velvet.

Assessment Requirements for AHCDER401 Handle, store and grade deer velvet

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle and store velvet carefully according to food safety legislation
- accurately and consistently grade velvet using industry grading specifications and record grading results
- sell velvet and review the grading and marketing of the product
- implement enterprise work health and safety and biosecurity policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- National Velvet Accreditation Scheme (NVAS)
- food safety requirements for velvet
- grading specifications
- requirements for handling and storing velvet to maximise quality
- enterprise work health and safety and biosecurity policies

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCDER501 Comply with deer industry national velvet accreditation requirements

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement the National Velvet Accreditation Scheme (NVAS) to an enterprise.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes.

This unit applies to activities performed by velvet producers or their staff in accordance with the requirements of the National Velvet Accreditation Scheme.

Pre-requisite Unit

Nil.

Unit Sector

Deer (DER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Demonstrate knowledge of deer velvet industry requirements	1.1 Identify and apply relevant legislation and codes of practice to deer farm activities and in particular to deer velveting 1.2 Identify and implement industry accreditation and quality assurance schemes

Element	Performance criteria
	1.3 Establish and maintain relationships with external parties 1.4 Establish and maintain a bona fide legal relationship with a registered veterinarian 1.5 Establish and maintain record keeping system
2 Apply knowledge of industry-accredited deer velveting process	2.1 Handle animals according to work health and safety, biosecurity and animal welfare requirements 2.2 Select and use restraint facilities and equipment suitable for handling animals for velvet harvesting 2.3 Establish and follow stag and buck management process before and after velveting 2.4 Determine deer antler growth rates and optimum time for cutting 2.5 Identify drugs and equipment used in velveting and calculate dosage rates 2.6 Ensure velvet for sale or export are identified using NVAS tags or NVAS Statutory Declaration Forms 2.7 Establish human emergency response procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency. Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDER501A Comply with deer industry national velvet accreditation requirements.

Assessment Requirements for AHCDER501 Comply with deer industry national velvet accreditation requirements

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply the NVAS to own enterprise
- establish and maintain a bona fide client-veterinarian relationship
- apply relevant state and territory legislation and industry codes of practice as they relate to own enterprise
- demonstrate knowledge of legal aspects of possession and use of approved drugs
- establish systems to satisfy the Deer Industry Association of Australia's (DIAA's) quality assurance program
- implement enterprise work health and safety, biosecurity and animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- animal welfare issues and legislation relating to velvet antler harvesting
- basic and applied principles of anatomy, physiology, pain control and pharmacology relevant to velvet harvesting
- DIAA's NVAS and quality assurance program
- definitions and requirements with respect to veterinary supervision and legal responsibilities of deer producers and veterinarians
- drug withholding periods and tissue residues
- management of deer before and after velveting
- nature of a bona fide legal relationship
- principles and process of velveting, including potential complications
- relevant action of drugs used for velveting on body function, and detrimental results of drug administration

- relevant legislation relating to restricted drugs
- work health and safety legislation, codes of practice and enterprise requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHC DER502 Harvest deer velvet

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to harvest deer velvet.

This unit applies to people who harvest deer velvet. All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

All work is carried out under the supervision of an attending veterinarian following National Velvet Accreditation Scheme (NVAS) procedures for harvesting deer antler.

Pre-requisite Unit

Nil.

Unit Sector

Deer (DER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for velveting	1.1 Check facilities, materials and equipment are available, serviceable and functioning and contribute to a safe, hygienic and stress free environment for animals and operators 1.2 Arrange veterinary supervision and drugs, equipment, emergency equipment and personal protective equipment are ready for use 1.3 Draft and restrain animals selected for velveting according to

Element	Performance criteria
	animal welfare and work health and safety policies
2. Harvest velvet	2.1 Determine volume of analgesic or anaesthetic drug for each animal and administer under supervision of attending veterinarian 2.2 Remove antler using hygienic techniques and appropriate standards 2.3 Ensure human and animal emergency procedures are ready for implementation 2.4 Collect information during harvesting process for annual return/audit 2.5 Tag velvet for identification using NVAS tags or NVAS Statutory Declaration Forms, and cross-reference to the animal velveted to allow for full trace back
3. Complete harvesting process	3.1 Release animal into recovery area and monitor for adverse reactions and take appropriate action as required 3.2 Clean velveting area and equipment and dispose of waste in line with enterprise biosecurity and environmental policies 3.3 Dispose of hazardous substances and used equipment according to legislative requirements and codes of practice 3.4 Store equipment, record drug usage and place remaining drugs in a secure facility 3.5 Follow industry procedures in the event of post-velveting death

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC DER502A Harvest deer velvet.

Assessment Requirements for AHCDER502 Harvest deer velvet

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- safely handle and restrain deer including dealing with aggressive or difficult animals
- administer drugs to deer under supervision of a registered veterinarian
- velvet unassisted a minimum of three deer under supervision of a registered veterinarian
- comply with the National Velvet Accreditation Scheme (NVAS) and quality assurance program of the Deer Industry Association of Australia (DIAA)
- manage deer effectively before, during and after velveting
- implement emergency response procedures when required
- develop and maintain effective working relationships with a range of organisations operating in the deer industry
- communicate with work team using industry standard terminology
- implement enterprise work health and safety, biosecurity and animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- animal welfare legislation and issues
- definitions of, and requirements with respect to, veterinary supervision and legal responsibilities of deer producers and veterinarians
- drug legislation relating to deer velvet harvesting
- food safety requirements relating to drug residues and withholding periods, and the hygienic handling of velvet
- management of deer before and after velveting
- surgical velveting procedures
- NVAS and quality assurance program of the Deer Industry Association of Australia (DIAA)

- enterprise work health and safety, biosecurity and animal welfare policies

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCDES501 Design sustainable landscapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design for improvement of long-term ecological sustainability of landscapes, land under production, land areas in business use, natural resource areas and recreational amenity spaces essential for long-term economic and cultural viability.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Design (DES)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess requirements	1.1 Consult client to establish a brief for the design

Element	Performance criteria
for sustainable land use	<p>1.2 Research and identify legislative and regulatory requirements and document in the improvement plan</p> <p>1.3 Identify specific requirements for sustainability from the brief, business plan, management plan or policy documentation</p> <p>1.4 Assess the land area for its biophysical factors, biodiversity, historical and cultural attributes, services, site modifications and threats to sustainability</p> <p>1.5 Identify environmental implications of the planned works and, if necessary, report to relevant personnel for further research and recommendations</p>
2. Prepare an integrated design to improve land use	<p>2.1 Develop a concept plan for improvement that reflects client preferences and requirements and takes into account heritage issues, site factors and any identified environmental requirements</p> <p>2.2 Present concept plan to the client or land owner for discussion and approval</p> <p>2.3 Consult other professionals to assist in research and planning of works in areas of specific technical expertise, energy efficiency and use, current and developing technologies and legislative and enterprise requirements</p> <p>2.4 Consider design of products, materials and finishes that are efficient, low risk and cyclic and confirm availability from a local source</p> <p>2.5 Evaluate resources, materials, equipment and machinery required for the works for their impact on the sustainable use of the site</p> <p>2.6 Select plants and soils for their integrated roles for the designed outcomes in the specific site conditions, system of irrigation and environmental parameters</p> <p>2.7 Review environmental conditions for a functional analysis of the site and the planned design</p> <p>2.8 Prepare a detailed plan or design</p> <p>2.9 Present plan or design to the client or land owner for acceptance</p>
3. Plan the implementation into the design	<p>3.1 Outline staged implementation and development with appropriate access for future works</p> <p>3.2 Incorporate timelines for development, taking into account the needs of the implementation plan and principles of sustainability</p> <p>3.3 Determine schedules for planting and post-planting care in accordance with the requirements of the plant species, site conditions and any other planning requirements</p> <p>3.4 Integrate protection of water resources, riparian zones, specified trees and existing vegetation into the design plan</p> <p>3.5 Review chemical, non-chemical, ameliorant application and waste disposal procedures and processes to select designs of minimal</p>

Element	Performance criteria
	environmental consequence and potential contamination of soils and ground water 3.6 Review implementation outline for integration of approach to land and water management
4. Audit the implementation for sustainability of use	4.1 Ensure that all work materials, waste and debris from site works have low risk and energy sustainable methods 4.2 Sample and test soil and ground water quality and implement recommendations 4.3 Confirm soil conservation measures and erosion sediment controls 4.4 Verify protection measures for specified trees, protected flora and fauna and areas and objects of cultural significance 4.5 Maintain or improve biodiversity, heritage, cultural and historical attributes, soil and water quality 4.6 Provide client with a report according to the brief or contractual requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDES501A Design sustainable landscapes.

Assessment Requirements for AHCDES501 Design sustainable landscapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess a land area for sustainable use
- conduct soil and water quality tests
- design for the health and sustainability of soils and plants
- implement sustainable practices
- interpret specifications and plans
- outline an integrated approach to land and water management
- prepare a detailed plan or design, specifications and where appropriate a proposal or quotation for sustainable land improvement
- consult with clients
- protect water resources, riparian zones and vegetation in a development area
- research, interpret and apply appropriate legislation and regulations
- select plants and soils for their integrated functional roles
- use a range of graphic techniques for illustrating landscape design components

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of designing sustainable landscapes
 - assessment techniques
 - environmental controls and codes of practice applicable to the business and to the improvement works
 - botany, plant physiology, taxonomy and nomenclature
 - identification and selection of soils, growing media, plants, shrubs and trees

- irrigation practices
- legislation and regulations relating to soil and water degradation issues and construction
- specific legislation and regulations for landscape design and development
- specific requirements for sustainability
- surface hydrology
- sustainable land and water use principles and practices applicable in the region
- types, properties and characteristics of a wide range of soils and growing media
- workplace health and safety legislation and regulations

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCDES502 Prepare a landscape design

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare a landscape design for a large project on residential, commercial or public open spaces.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Design (DES)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a design brief	1.1 Consult with client to establish the purpose and requirements of design 1.2 Interpret and incorporate relevant architectural designs, styles and

Element	Performance criteria
	details 1.3 Develop an agreed client brief 1.4 Negotiate cost structures and timelines with the client
2. Assess the project site	2.1 Inspect the site of the landscape project 2.2 Record physical elements and features of the site on a base plan 2.3 Assess soil conditions, topography, aspect, existing vegetation and climatic factors and record on a site analysis 2.4 Complete functional analysis of the existing site and record on the base plan 2.5 Assess any other relevant information and record on a base plan 2.6 Assess opportunities and constraints on development including local council and other potential legal requirements
3. Prepare a concept design	3.1 Prepare concept to illustrate location and layout of proposed landscape works according to the design brief 3.2 Consult with the client to establish agreement on options and approaches for design development 3.3 Specify hard landscaping requirements, including irrigation, demolition and removal of existing features and installation of new works 3.4 Compile planting schedules for incorporation into the design plan 3.5 Apply industry standards and consistent graphic styles to the concept design
4. Produce a final design	4.1 Include specifications and notes on the design to assist in interpretation 4.2 Research and apply appropriate landscape construction principles to landscape design according to industry standards 4.3 Finalise and document a detailed design plan according to the design brief, concept design and client consultations using industry standard graphic, text and layout styles

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCDES502 Prepare a landscape design

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess landscape sites
- consult with clients
- design scaled concept drawing and construction plans
- determine survey levels and site grading
- identify and select plants, shrubs and trees
- identify dimensions and qualities of materials
- implement professional practices
- interpret architectural designs and details
- operate Computer-Aided Design (CAD) software and/or draft plans by hand
- specify hard landscaping requirements
- use graphic techniques to industry standards for illustrating landscape design components

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of preparing a landscape project design
 - establishment of site levels
 - landscape construction and engineering principles
 - drafting techniques
 - environmental implications of landscape project works
 - botany, plant physiology, taxonomy and nomenclature
 - how to identify and treat soils
 - plant identification, selection and culture

- work health and safety risk in office and outdoor environments

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Unit Sector

Design (DES)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect and collate initial information	1.1 Consult client and confirm objectives of assessment 1.2 Source and verify site plans and maps 1.3 Identify and acquire required resources

Element	Performance criteria
	1.4 Prepare base plan of the site and relevant surrounds 1.5 Verify location, ownership and site boundaries 1.6 Identify and record current land use and environmental threats and problems 1.7 Identify and record covenants that could affect the project, design or report 1.8 Determine climate and weather conditions from historical data
2. Undertake initial site visit	2.1 Meet site entry conditions and obtain approval if required 2.2 Identify site hazards and assess risks for current visit 2.3 Undertake site orientation 2.4 Identify and record existing on-site and adjacent site features that may impact upon the project, plan or report objectives 2.5 Identify, and measure and record or confirm site dimensions, levels and gradients
3. Compile a site inventory	3.1 Identify soil and growing media types, properties and relevant physical characteristics and record on-site inventory 3.2 Record the species, health, age and location of vegetation 3.3 Locate structural elements and confirm existing services and facilities 3.4 Record the presence, location and extent of other relevant site constraints 3.5 Sample areas of homogeneous soils and growing media to send for testing and analysis of soil content and contamination as requested by client or as required in the brief provided
4. Determine the impact of development for trees on site	4.1 Obtain the consulting arborist report to assess trees on site 4.2 Determine and record tree protection zones 4.3 Document the impact of proposed development on each tree 4.4 Identify trees that are exempt from approval requirements 4.5 Identify and locate on the site plan trees impacted by development, according to regulations applying in the local jurisdiction 4.6 Include trees identified by the consulting arborist report as requiring pruning or removal in a development application
5. Document a site assessment report	5.1 Interpret soil and growing media tests results and analyse for further testing requirements 5.2 Record specific recommendations of remedial action for site problems 5.3 Formulate recommendations for appropriate risk controls of site hazards 5.4 Store and maintain survey and assessment data

Element	Performance criteria
	5.5 Document site information 5.6 Incorporate all relevant data into the assessment report in accordance with client needs and the requirements of relevant legislation and regulations 5.7 Deliver a copy of the report to the client and advise the client of content and implications of the report

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDES503A Assess landscape sites.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCDES503 Assess landscape sites

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and collate information on site features
- consult with and advise clients
- document assessment and recommendations in a site plan and assessment report
- identify vegetation and soils
- interpret and produce plans
- maintain assessment data records
- sample soils and growing media
- verify existing site details

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of assessing landscape sites
 - current land use and environmental threats to and problems with site
 - interpretation of results from assessment and testing
 - local, state and federal regulations
 - measurement and surveying techniques
 - plant nutrition
 - protocols of site access
 - soil and growing media types, structure, texture and soil pH
 - soil chemical and physical properties
 - soil field tests and soil sampling techniques
 - techniques to ameliorate soil properties

- vegetation common within the region, using botanical and regionally accepted common names, age, health and conditions of vegetation

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCDES504 Design for construction of landscape features

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design for the construction of landscape features and to develop a final project report.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Design (DES)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret detail architectural and landscape design	1.1 Interpret detail architectural and landscape design drawings for construction features 1.2 Define survey levels and record any site gradients

Element	Performance criteria
drawings	1.3 Construct a small scale model from detail drawings 1.4 Draw detail plans from pre-constructed landscape features, including elevations 1.5 Draw drainage plans for a green site and a developed site to construction standards
2. Design aspects of construction for landscape features in a range of materials	2.1 Develop a concept design for the construction of the selected landscape feature 2.2 Illustrate construction details for landscape features 2.3 Incorporate a range of materials used in the construction of landscape features into the design
3. Specify dimensions, footings and qualities of materials	3.1 Determine the difference in quality of available materials and specify quality criterion in the design 3.2 Specify dimensions, footings and qualities of materials selected 3.3 Determine the consequences and costs involved in using poor quality materials 3.4 Specify the construction standards in the design
4. Develop a design and project report	4.1 Develop a site strategy for the design project 4.2 Identify and document timelines for the project 4.3 Determine and record project costs 4.4 Work with contractors on site to resolve any issues arising 4.5 Develop and document a final design and project report

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDES504A Design for construction of landscape features.

Assessment Requirements for AHCDES504 Design for construction of landscape features

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate project costs
- develop a final design and project report
- draw plans to construction standards
- identify and document project timelines
- interpret detail architectural and landscape design drawings
- liaise with stakeholders, staff and contractors
- select appropriate materials and plants
- specify dimensions, footings and qualities of materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of designing for construction of landscape features
 - construction standards
 - drainage issues and the available resources to resolve problems
 - how to select appropriate plants and materials
 - materials available in the marketplace
 - plant specifications for a range of plants appropriate to the design
 - principles of surveying
 - site services, including electrical and water provision
 - stone walling, including gabions
 - the essentials of retaining walls

- the paving process

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCDRG201 Maintain drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out routine cleaning and maintenance of draining systems.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Drainage (DRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Inspect drainage systems	1.1 Confirm the work to be undertaken 1.2 Check personal protective equipment for serviceability and correct fit 1.3 Identify work health and safety hazards associated with the activity and take appropriate steps to minimise risks to self and

Element	Performance criteria
	others 1.4 Inspect drainage system visually for blockages, leaks and operating faults
2. Maintain system components	2.1 Inspect components for wear or blockage 2.2 Service mechanical equipment 2.3 Replace simple components
3. Remove silt and weed growth	3.1 Clean silt from channels, drains, sumps and crossings 3.2 Remove weed growth 3.3 Flush drainage system 3.4 Observe water flow through channels and from outlets to confirm it is unobstructed
4. Record and report maintenance activities	4.1 Record blockage or leakage by type and location of the section of the system affected 4.2 Record and report damaged or faulty equipment 4.3 Record and report all routine maintenance activities 4.4 Check drainage system regularly

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDRG201A Maintain drainage systems.

Assessment Requirements for AHCDRG201 Maintain drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- inspect and maintain simple drainage system components
- inspect components for wear
- monitor and control weeds and silt build up
- record and report damage, blockages and leakages

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of drainage system maintenance:
 - disposal procedures for chemical containers and residues, oils, grease and used parts
 - drainage system cleaning procedures
 - environmental impacts of drainage system maintenance
 - equipment used to clean and maintain drainage systems
 - manual, mechanical and chemical weed control methods
 - types of drainage systems

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCDRG301 Install drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install surface and subsurface drainage systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Drainage (DRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for drainage system installation activities	1.1 Identify the construction site for the drainage system 1.2 Select materials, tools, equipment and machinery and carry out pre-operational and safety checks 1.3 Identify work health and safety hazards, assess risks and implement controls

Element	Performance criteria
	1.4 Select, use and maintain suitable personal protective equipment
2. Co-ordinate installation work	2.1 Coordinate work tasks in a sequential, timely and effective manner 2.2 Install the drainage system with due consideration of the environmental implications 2.3 Maintain a clean and safe work area throughout work
3. Prepare the site for installation of drainage system	3.1 Interpret symbols and terminology to ensure the concept of the drainage system plan is clearly understood 3.2 Identify layout of services, check depths and report discrepancies 3.3 Complete survey, measurement and marking out of site and confirm soil characteristics relevant to the system
4. Undertake installation of drainage system	4.1 Complete excavations without damage to services, facilities, features and established plants 4.2 Install the drainage system 4.3 Test the drainage system for configuration, flow rates and capacity 4.4 Confirm remedial action to be taken when the drainage system operation does not meet the plan specifications
5. Complete installation of drainage system	5.1 Finish earthworks 5.2 Restore the site and remove and dispose of waste material 5.3 Clean, maintain and store tools, equipment and machinery 5.4 Record work outcomes and report the works as per the executed drawings, including adjustments

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDRG301A Install drainage systems.

Assessment Requirements for AHCDRG301 Install drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- install drainage system works
- interpret drainage system plans and drawings
- interpret site specifications, soil types and drainage system plans
- level and align earthworks
- measure materials required to install drainage systems
- prepare for installation activities
- set out drainage system works
- set out, survey, test and excavate the installation site
- test the drainage system
- use equipment, tools and machinery appropriate to the scope of works

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of drainage installation
- drain types, components and installation techniques
- soil characteristics and their impact on drainage systems
- purposes of drainage systems and the application of drainage system plans to the physical situation
- work health and safety

Assessment Conditions

Assessors must satisfy current standards for RTOs.
