Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCDRG302 Measure drainage system performance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify adverse environmental impacts of drainage systems
- identify and apply appropriate remedial action
- identify and correct system problems
- identify hazards and implement safe work procedures
- use technology to record and report drainage system data

Knowledge Evidence

The candidate must demonstrate knowledge of:

- how to measure a water table and salinity
- measuring and monitoring procedures for factors contributing to drainage system performance
- positive and negative environmental impacts of drainage systems
- soil moisture measurement procedures
- the environmental role of drainage systems
- water quality monitoring methods and techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCDRG303 Troubleshoot drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to troubleshoot issues in drainage systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Drainage (DRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work	1.1 Identify drainage system issues and develop plans to rectify them 1.2 Locate the affected section of drainage system 1.3 Determine work requirements and responsibility for repair 1.4 Select materials, tools, equipment and machinery 1.5 Carry out pre-operational and safety checks on tools, equipment

Element	Performance criteria
	and machinery 1.6 Identify work health and safety hazards, assess risks and implement controls 1.7 Select, use and maintain suitable personal protective equipment
2. Determine access to drainage system	2.1 Access plan of drainage system and locate access points 2.2 Carry out digging without unnecessary damage to buildings, site, environment or existing fixtures and fittings
3. Carry out work	3.1 Use safe manual lifting and handling techniques 3.2 Access drainage system and rectify identified issue 3.3 Test drainage system to confirm issue has been rectified 3.4 Repair or reseal drainage system to permit normal use 3.5 Advise relevant personnel that repairs have been completed and the drainage system has been commissioned for use
4. Complete work	4.1 Clean work area and dispose of debris and waste 4.2 Clean and maintain tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDRG303A Troubleshoot drainage systems.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCDRG303 Troubleshoot drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- complete a range of rectification works
- identify a range of drainage system issues relevant to their industry, including surface and sub-surface issues
- inspect the site to determine access to drainage system
- plan and prepare for the work
- test the system and clean up after rectifying the identified issues

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of drainage system troubleshooting
 - components used in drainage systems
 - environmental impacts of drainage systems
 - isolation processes and procedures
 - types and operational parameters of drainage systems
 - types of drainage systems common to their industry and their possible issues
 - work plans and processes

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCDRG304 Maintain and repair irrigation drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and repair irrigation drainage systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Drainage (DRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to carry out irrigation drainage system maintenance	1.1 Inspect site and assess drainage 1.2 Confirm the necessity for repair and notify appropriate people of the intention to commence work 1.3 Determine work requirements from plans, drawings, specifications or instructions and identify hazards, assess risks

Element	Performance criteria
	and implement control measures 1.4 Select required tools and equipment and check for safe operation 1.5 Select and use suitable personal protective equipment 1.6 Confirm that excavation methods meet the safety requirements of the task and site 1.7 Make appropriate drainage and inflow diversion arrangements without damage to environment
2. Access to drainage lines	2.1 Access plan of irrigation system and locate access points 2.2 Gain access to drainage lines to allow blockage to be cleared 2.3 Carry out digging without unnecessary damage to buildings, site, environment or existing fixtures and fittings
3. Carry out repairs on an irrigation drainage system	3.1 Conduct routine inspections of designated work areas 3.2 Identify system faults and take corrective actions with consideration of structure type, location and specifications 3.3 Use mechanical equipment to open and close drains 3.4 Repair or replace components and associated fittings as required 3.5 Construct cast in situ components
4. Clear blockages in an irrigation drainage system	4.1 Clear blockages 4.2 Test drainage lines to confirm blockages have been cleared from pipe system 4.3 Repair and reseal drainage lines to permit normal use 4.4 Clean and align work area and dispose of debris and waste
5. Maintain drainage earthworks and equipment	5.1 Confirm that earthworks and embankments meet system requirements 5.2 Manage and maintain drainage area vegetation 5.3 Control weeds are controlled 5.4 Implement and record a maintenance program for drainage equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG320A Maintain and repair irrigation drainage systems.

Assessment Requirements for AHCDRG304 Maintain and repair irrigation drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- isolate appliances, fixtures, fittings and related assemblies
- gain access and carry out repairs
- level and align the site
- repair or remove blockages
- use manual and mechanical drain clearing equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for maintaining drainage systems
 - components used in irrigation drainage systems
 - environmental impacts of drainage systems
 - isolation processes and procedures
 - levelling and alignment processes
 - types and operational parameters of irrigation drains

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCDRG401 Coordinate and supervise installation of an irrigation drainage system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate and supervise the installation of an irrigation drainage system.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Drainage (DRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop and implement construction	1.1 Develop employment and contract management procedures 1.2 Develop procedures for controlling and recording site deliveries

Element	Performance criteria
procedures	1.3 Develop procedures for recording the hire of plant and equipment 1.4 Determine work health and safety procedures, including risk assessment 1.5 Notify client, authorities and agencies of the schedule of works 1.6 Develop procedures for dealing with environmental issues associated with construction work
2. Organise resource requirements	2.1 Nominate tasks and timelines, including the required resources for each 2.2 Organise labour requirements 2.3 Verify the correct parts and equipment have been delivered to the site and checked 2.4 Select and maintain equipment and machinery 2.5 Allocate jobs and tasks to the work team 2.6 Carry out safety induction for the task and site
3. Interpret the irrigation drainage system design for the site	3.1 Determine the purpose, scale and required output of the irrigation system 3.2 Assess the landscape of the site 3.3 Determine construction requirements and verify with the designer 3.4 Select components to meet design specifications and site requirements
4. Supervise preparatory work	4.1 Interpret plan and supervise preparatory work 4.2 Take levels and plan earth works 4.3 Confirm site is cleaned and marked out 4.4 Confirm drainage structures are pegged out
5. Supervise construction of the drainage system	5.1 Interpret plan and supervise construction work 5.2 Confirm trenches are excavated to specification 5.3 Confirm earth works are carried out appropriately 5.4 Confirm construction of drainage structures are to specifications 5.5 Inspect the lay out and joining of pipes 5.6 Check the fitting and adjustment of fittings and valves and confirm all joints are secured 5.7 Supervise the installation and testing of the pumping system
6. Commission the irrigation drainage system	6.1 Start the system up 6.2 Identify operating faults and take corrective actions as required 6.3 Use testing and monitoring equipment to monitor system efficacy 6.4 Make adjustments as required
7. Supervise the rehabilitation of the	7.1 Monitor the resurfacing and sealing earthworks 7.2 Confirm the planting and maintenance of vegetation areas have

Element	Performance criteria
works area	been carried out 7.3 Confirm the disposal of waste and surplus materials has been carried out in an environmentally sound manner

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG424A Construct and install an irrigation drainage system.

Assessment Requirements for AHCDRG401 Coordinate and supervise installation of an irrigation drainage system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct a work health and safety risk assessment
- develop operational procedures
- document requirements for structures
- estimate quantities and volumes of soil to be moved
- implement employment procedures
- interpret irrigation designs
- supervise workers in:
 - earth moving and construction procedures
 - power and pumping plant installation
 - pump and gated pipe installation
 - construction of canals, channels, head ditches, beds, check structures, tailwater holding ponds

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation drainage system installation
 - components used in drainage systems
 - drainage appliances, fixtures and fittings
 - environmental impacts of drainage systems
 - environmental role of drainage systems
 - isolation processes and procedures
 - level and align site

- levelling and alignment processes
- measuring and monitoring procedures for factors contributing to drainage system performance
- positive and negative environmental impacts of drainage systems
- regulatory requirements, codes of practice and relevant enterprise service standards relating to blockage removal, disconnection and reconnection activities
- soil moisture measurement procedures
- types and operational parameters of drains
- water authority standards and procedures
- water quality monitoring methods and techniques
- water table and salinity measures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCDRG402 Monitor and control irrigation drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and control irrigation drainage systems.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Drainage (DRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess irrigation drainage and collection systems	1.1 Measure drainage performance 1.2 Measure drainage and tail water quality 1.3 Measure water table depth where required 1.4 Measure soil salinity where required

Element	Performance criteria
	1.5 Identify and record factors external to the system which may cause interference 1.6 Analyse drainage system data and compare to the performance specified in the irrigation drainage plan
2. Regulate flows	2.1 Inspect flow regulating systems and apply adjustments necessary to achieve discharge requirements specified 2.2 Monitor discharge flows and apply diversions to facilitate repair or emergency
3. Control and operate drainage system structures and processes	3.1 Control processes to maintain specified performance 3.2 Develop and implement maintenance procedures 3.3 Identify, address and report operational conditions of the drainage system 3.4 Integrate processes to improve drainage network performance
4. Troubleshoot drainage problems	4.1 Conduct a visual inspection to determine damaged or broken components and record results 4.2 Inspect areas being drained for signs of water pooling and record problems 4.3 Access drainage lines to allow blockage to be cleared 4.4 Clear blockage or replace blocked section 4.5 Test drainage line to confirm blockage is cleared from pipe system 4.6 Repair or reseal drainage line to permit normal use 4.7 Rehabilitate the drainage site
5. Record and report system performance status	5.1 Record water quality 5.2 Record water table depth, soil moisture and salinity 5.3 Document strategies that minimise negative environmental impacts and maximise positive impacts of the drainage system

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCDRG402 Monitor and control irrigation drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply soil moisture testing techniques
- calculate water volumes from rate and depth
- clear and refill drainage lines
- clear blockages from drainage systems
- identify hazards and implement safe work procedures
- isolate drainage lines
- measure water table depth, soil moisture and salinity

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for monitoring irrigation drainage systems
 - components used in drainage systems
 - environmental impacts of drainage systems
 - isolation processes and procedures
 - levelling and alignment processes
 - measuring and monitoring procedures for factors contributing to drainage system performance
 - soil moisture measurement procedures
 - types and operational parameters of drains
 - water quality monitoring methods and techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCDRG501 Design drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to identify design requirements, determining the specifications for drainage systems and designing the drainage system.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Drainage (DRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine design requirements	1.1 Determine water transfer, recharge, reuse and harvesting system needs 1.2 Describe processes of collecting, disposing and storing drainage

Element	Performance criteria
	<p>water to avoid degrading water quality</p> <p>1.3 Investigate regional geology and geography to predict drainage parameters</p> <p>1.4 Apply hydrological calculations to predict volumes and rates of surface run-off</p> <p>1.5 Conduct site investigations to assess depth of clay, depth of ground water, soil and water salinity, and structural or chemical impediments so as to determine the most cost effective drainage system</p> <p>1.6 Document predictions of leaching fractions and salt movements, and develop soil amelioration and drainage management plans</p> <p>1.7 Determine the need for leachate interception and dewatering system and if required prepare construction specification for interception and collection, disposal, reuse or recycle</p> <p>1.8 Confirm drains and structures are capable of carrying the design water volumes and intensities according to enterprise standards</p> <p>1.9 Identify construction specifications required to make drainage systems in accordance with environmental and work health and safety requirements</p> <p>1.10 Identify and protect environmentally sensitive areas according to local, state and federal legislation and regulations</p>
2. Design a drainage system	<p>2.1 Select systems, including relevant equipment, to move water efficiently to water storage or treatment and at the flow and pressure required in design specifications</p> <p>2.2 Select system combinations that are efficient, reliable, functional, serviceable and flexible for the intended application</p> <p>2.3 Determine energy requirements and check layout of electricity lines with local authority if electrical pumps and motors are used in the system</p> <p>2.4 Select structures, pipes, valves and accessories and integrate into a functional system that can be monitored and maintained</p> <p>2.5 Define the work required to make suitable drainage systems available to the enterprise in the design specifications</p> <p>2.6 Confirm power supply design specification with power authorities if electrical pumps and motors are used in the system</p> <p>2.7 Minimise damage from drainage system issues</p> <p>2.8 Design output is checked by an appropriately experienced and qualified person</p>
3. Determine capital expense budget	<p>3.1 Estimate materials required from plans and specifications</p> <p>3.2 Estimate labour requirements based on documented work schedule with reasonable allowance for variances in work</p>

Element	Performance criteria
	schedules 3.3 Base costing for each component on quoted information from suppliers, or sound analysis of individual elements 3.4 Document design calculations, performance indicators and decisions and relevant information in plans, specifications and manuals 3.5 Budget output is checked by an appropriately experienced and qualified person
4. Determine operating expense budget	4.1 Optimise the relationship between capital and operational costs including a comparison of energy sources 4.2 Collate all operating expense applicable to the completed drainage system and calculate an operating expense budget

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDRG501A Design drainage systems.

Assessment Requirements for AHCDRG501 Design drainage systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the requirements for pumping capacity in a drainage system and power requirements
- complete hydrological calculations
- develop budgets
- develop specifications for water transfer, recharge, reuse and harvesting systems
- identify adverse environmental impacts of drainage and appropriate remedial action
- identify design requirements
- identify performance indicators for the drainage system
- predict volumes and rates of surface run-off and system leakage

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of drainage design
 - budgeting, contractual development and obligations
 - developments in drainage technology
 - cost/benefit analysis
 - leachate interception and dewatering systems
 - leaching fractions and salt movements prediction
 - monitoring systems
 - the design processes
 - water transfer, recharge, reuse and harvesting systems
 - workplace health and safety and environmental protection legislation

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCDRY201 Milk livestock

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to milk livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Dairy (DRY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for milking	1.1 Prepare dairy sheds, yards and equipment for milking operations 1.2 Prepare teat sprays

Element	Performance criteria
	1.3 Move and yard livestock in readiness for milking operations 1.4 Follow appropriate work health and safety practices
2. Carry out milking	2.1 Move livestock into position and check and prepare for milking 2.2 Segregate and report livestock producing milk unsuitable for bulk sales where required 2.3 Conduct milking hygienically and monitor progress to prevent over-milking 2.4 Identify and isolate unsuitable milk from bulk supplies 2.5 Identify and report livestock health problems to supervisor for treatment 2.6 Report livestock on heat where required 2.7 Handle livestock in line with enterprise animal welfare policies
3. Complete milking operation	3.1 Return livestock to paddocks without causing stress or injury 3.2 Select suitable detergents and cleaning supplies 3.3 Carry out cleaning procedures to maintain hygiene standards of dairy facilities 3.4 Identify and report machinery and equipment malfunctions for repair or replacement

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDRY201A Milk livestock.

Assessment Requirements for AHCDRY201 Milk livestock

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare dairy facilities and equipment to industry safety and hygiene standards
- operate milking equipment to carry out milking in an effective and efficient manner
- complete milking operation and return livestock to paddocks
- clean dairy facilities and equipment to industry standards
- recognise and isolate unsuitable milk
- identify sickness or abnormal behaviour in livestock
- communicate with supervisor and staff
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning and maintenance of milking facilities, machinery and equipment such as sheds, yards, milking machines and teat sprays
- anatomy, physiology, reproduction cycle, lactation and behaviour of the animal species applicable to milking operations
- relevant work health and safety requirements
- relevant animal welfare practices and requirements such as handling and moving livestock
- work routines, procedures and impacts of bad practices for milking operations
- criteria and methods for determining milk quality
- types, characteristics, signs of ill health, prevention and treatment of relevant diseases in the livestock species
- types, handling, use and disposal of detergents and cleaning agents, work health and safety and environmental practices for these agents

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCDRY301 Coordinate milking operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate the milking operations of an enterprise.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Dairy (DRY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine requirements for	1.1 Identify and clarify production requirements according to

Element	Performance criteria
milking operations	enterprise objectives 1.2 Identify and comply with requirements for the maintenance of milk quality 1.3 Determine and maintain resources and equipment requirements 1.4 Identify work health and safety hazards, assess risks and implement control measures
2. Determine milking procedures	2.1 Determine milking routines and procedures for milking operations, with consideration to the range of variable conditions 2.2 Check water supplies for availability and check and adjust milking equipment to ensure good operational condition 2.3 Implement milking procedures with minimum stress to livestock and maximum yield within reasonable timeframes 2.4 Rectify minor malfunctions of equipment or milking systems to manufacturer's specifications and report more complex repairs for specialist attention
3. Implement livestock health treatment program	3.1 Monitor livestock health and condition 3.2 Carry out livestock testing according to enterprise plan and seek advice from supervisors and experts for potential health issues 3.3 Carry out livestock health treatments during drying off with minimal stress and weight loss according to veterinary or expert advice 3.4 Implement hygiene practices to prevent cross-infection during milking operations 3.5 Take milk samples and label appropriately 3.6 Complete and maintain livestock health records 3.7 Carry out all livestock handling and husbandry in line with enterprise animal welfare policies
4. Coordinate and monitor milking operations	4.1 Monitor milking procedures for efficiency, effectiveness and compliance with relevant requirements 4.2 Monitor and maintain milk quality 4.3 Monitor costs to ensure operations are completed and maintained within budget 4.4 Clean work areas and equipment, and dispose of organic and non-organic waste in an environmentally responsible manner 4.5 Complete documentation and records accurately and promptly

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDRY301A Coordinate milking operations.

Assessment Requirements for AHCDRY301 Coordinate milking operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- determine requirements for milking operations
- schedule, coordinate and monitor milking operations
- implement livestock health treatment program
- conduct milk sampling and testing
- implement drying off programs according to livestock health strategy
- recognise and rectify machinery malfunctions
- participate in livestock recording programs
- clean work areas and milking equipment.
- apply enterprise work health and safety policies
- apply enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning, monitoring and maintenance of milking facilities, machinery and equipment
- enterprise and industry requirements for milking operations such as production targets, finances, required resources, manpower and equipment
- criteria, methods and industry standards for determining milk quality
- factors affecting milk quality, and their effects and impacts on enterprise production targets and enterprise viability
- work routines, procedures and impacts of bad practices for milking operations

- anatomy, physiology, reproduction cycle, lactation and behaviour of the animal species applicable to milking operations
- relevant hygiene and biosecurity practices and requirements for milking operations
- relevant animal welfare practices and requirements for milking operations
- relevant livestock testing, health treatment and preventive medicine applicable to milking operations
- types, characteristics, signs of ill health, prevention and treatment of relevant diseases in the livestock species
- types and maintenance of required documentation and records
- types, handling, use and disposal of detergents and cleaning agents, Work Health and Safety and environmental practices for these agents
- relevant requirements, methods and methods for waste and debris storage and disposal
- relevant work health and safety legislation, regulations and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCDRY302 Operate a dairy recycling system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate a dairy recycling system.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Dairy (DRY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for dairy waste disposal operations	1.1 Confirm work to be undertaken from the work program 1.2 Hold discussions with other workers who may be affected by the

Element	Performance criteria
	maintenance activities 1.3 Identify work health and safety hazards, assess risks and implement suitable controls 1.4 Select, use and maintain personal protective equipment (PPE) 1.5 Select, check and maintain tools and equipment for the work to be undertaken
2. Maintain and operate a dairy waste storage and disposal system	2.1 Service and maintain dairy waste removal and disposal equipment 2.2 Use dairy waste disposal systems according to system design and in compliance with approval granted by local government and the State environment protection authority 2.3 Carry out recognised techniques for irrigation from dairy waste storages 2.4 Flush and drain in-shed dairy waste pits
3. Monitor dairy waste disposal system	3.1 Check flow rates, pit levels and equipment regularly to maintain effective operation of the system 3.2 Carry out cleaning procedures and hygiene practices 3.3 Identify environmental impacts of dairy waste disposal, assess likely outcomes and if necessary, take responsive action in line with enterprise environmental policies
4. Conduct hygiene and administration activities	4.1 Clean equipment according to manufacturer's specifications 4.2 Clean and store attachments and other ancillary equipment appropriately 4.3 Dispose of all containers, leftover fluids, waste and debris from the operations safely and appropriately 4.4 Complete all required records and documentation accurately and promptly

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDRY302A Operate a dairy recycling system.

Assessment Requirements for AHCDRY302 Operate a dairy recycling system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- make preparations for dairy waste disposal operations
- maintain and operate a dairy waste storage and disposal system in accordance with work health and safety and environmental legislation, regulations and codes of practice
- monitor dairy waste disposal system
- carry out irrigation from dairy waste storages.
- observe, identify and react appropriately to environmental implications and work health and safety hazards associated with the dairy recycling system
- conduct hygiene and administration activities
- apply enterprise work health and safety policies
- apply enterprise environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise work program and program requirements for dairy waste disposal operations
- relevant work health and safety requirements
- tools, equipment and systems used for dairy waste disposal operations (dairy waste handling, removal and disposal) and their functions, cleaning, maintenance, servicing and storage of such tools, equipment and systems
- relevant local government, State and Commonwealth regulations and industry requirements for dairy waste disposal operations
- environmental impacts of dairy waste disposal operations and dairy waste irrigation, and strategies to mitigate such impacts
- irrigation techniques for dairy waste
- functions, maintenance and service of effluent pits

- methods for safe and appropriate disposal of containers, leftover fluids, waste and debris from effluent operations
- documentation and type of records that need to be completed for effluent operations
- relevant biosecurity requirements and environmental sustainability practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCDRY401 Manage milking shed routines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage milking shed routines.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication

Pre-requisite Unit

Nil.

Unit Sector

Dairy (DRY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Manage routine maintenance	1.1 Plan maintenance schedules in accordance with manufacturer's recommendations and industry standards

Element	Performance criteria
	1.2 Implement programmed replacement of consumables in line with recorded usage and replacement schedule 1.3 Identify and replace worn or unsafe components 1.4 Identify and rectify milking equipment maintenance problems 1.5 Engage specialist services for non-routine service and repairs
2. Manage shed milking routines	2.1 Determine milking shed routines and schedules with available labour and resources 2.2 Allocate and communicate staff responsibilities 2.3 Establish and implement milk production recording procedures 2.4 Implement industry or supplier quality assurance practices and procedures in programmed shed routines 2.5 Implement enterprise work health and safety policies 2.6 Implement enterprise animal welfare policies
3. Manage unsuitable milk from at risk cows	3.1 Establish shed procedures for the identification of cow herd health problems 3.2 Isolate milk from at risk cows to maintain overall milk quality 3.3 Select and administer appropriate treatments according to veterinary or expert advice 3.4 Determine strategies for the isolation or drying off of at risk or mastitis affected cows in accordance with appropriate advice
4. Maintain enterprise practices for milk quality	4.1 Develop in shed hygiene routines according to industry best practice and standards 4.2 Implement hygiene procedures to prevent cross infection and teat or udder damage 4.3 Monitor milk quality to comply with specified supplier standards 4.4 Monitor milk cooling equipment and storage to maximise milk quality 4.5 Identify environmental impacts of milking operations, assess likely outcomes and take action to minimise adverse effects in line with enterprise environmental policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCDRY401A Manage milking shed routines.

Assessment Requirements for AHCDRY401 Manage milking shed routines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- oversee the routine maintenance and service of milking equipment and replacement of consumables
- oversee the conduct of milking operations
- identify possible causes of decline in milk quality including animal infection and teat damage identify faults in milking equipment and rectify
- oversee cleaning and disinfection of milk area and equipment after milking
- maintain records of the milking operation
- manage unsuitable milk from at risk cows
- maintain enterprise practices for milk quality in co-operation with dairy factory personnel
- implement enterprise work health and safety policies
- implement enterprise animal welfare and environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning, monitoring and maintenance of milking facilities, machinery, equipment and consumables
- enterprise and industry requirements for milking operations such as production targets, finances, required resources, manpower and equipment
- work routines, procedures and impacts of bad practices for milking operations
- relevant industry standards, guidelines, codes of practice and programmes for milking operations, milk quality assurance and milking shed routines
- types, characteristics, signs of ill health, prevention and treatment of relevant diseases in the livestock species and their impact on milking operations and milk quality

- criteria, methods and industry standards for determining milk quality
- factors affecting milk quality, and their effects and impacts on enterprise production targets and enterprise viability
- anatomy, physiology, reproduction cycle, lactation and behaviour of the animal species applicable to milking operations
- relevant hygiene and biosecurity practices and requirements for milking operations
- relevant livestock testing, health treatment and preventive medicine applicable to milking operations
- types, handling, use and disposal of detergents and cleaning agents, work health and safety and environmental practices for these agents
- environmental impacts of milking operations and strategies to mitigate such impacts
- relevant work health and safety requirements
- relevant animal welfare practices and requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCEXP301 Handle and store explosives

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to handle, store, load and transport explosives in line with established industry standards.

This unit applies to individuals who work under broad direction and take responsibility for their own work. This includes using discretion and judgement in the selection and use of available resources.

Licensing conditions apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Explosives (EXP)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for the handling of explosives	1.1 Identify and action work health and safety policies and procedures and legislative requirements for the handling, storage and transport of specified quantities of explosives 1.2 Check for damaged or defective explosives and take action according to enterprise procedures

Element	Performance criteria
	1.3 Conduct risk assessment for handling explosives that addresses local conditions and factors, and implement safety procedures 1.4 Prepare and display signage and placarding on vehicles or storage facilities for explosives as directed by legislative requirements 1.5 Identify and implement, where necessary, emergency procedures for the transportation, handling and storage of explosives 1.6 Establish monitoring and recording systems for authorisation to handle, store and transport explosives that comply with the Australian Explosives code and other legislative requirements
2. Transport explosives	2.1 Establish arrangements to maintain the integrity and security of transported explosives in line with enterprise requirements 2.2 Institute security procedures to ensure explosives arrive at the destination in tact according to specified time and condition 2.3 Implement workplace strategies to carry out emergency procedures as required in compliance with legislative requirements 2.4 Load and transport explosives safely and in accordance with legislative and individual enterprise requirements
3. Store explosives	3.1 Define and action the requirements for the safe and secure storage of explosives in accordance with legislative requirements 3.2 Define requirements for personnel authorised to gain access to explosives 3.3 Assess storage conditions to ensure they meet requirements for safe storage of explosives 3.4 Monitor and maintain security in accordance with legislative requirements 3.5 Accurately implement and maintain recording systems for the handling and storage of explosives in accordance with legislative requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCEXP301A Handle and store explosives.

Assessment Requirements for AHCEXP301 Handle and store explosives

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle, transport and store explosives safely and in accordance with legislative and enterprise requirements
- conduct risk assessment and implement safe work procedures
- correctly and safely load and transport components of explosives in accordance with regulatory and enterprise requirements
- establish monitoring and recording systems for handling, storing and transporting explosives according to legislative requirements
- display placards on vehicles transporting explosives
- implement security procedures for all explosives on hand
- follow procedures for dealing with an emergency with transported or stored explosives
- use standard industry terminology
- apply work health and safety policies and procedures when handling, transporting and storing explosives
- apply policies and procedures to ensure the safety of the public

Knowledge Evidence

The candidate must demonstrate knowledge of:

- local conditions and factors in the handling, transporting and storage of explosives
- care and preventive measures required to eliminate risk of fire and deterioration of stored materials
- procedures for buying commercial explosives and blasting agents from licensed dealers and Government agencies
- how to comply with Australian Explosives Code

- identification of defective or damaged explosives
- environmental conditions required for safe storage

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCEXP302 Identify and select explosive products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to identify and select explosive products and suitable mixtures that can be used for blasting for agricultural or land management purposes.

This unit applies to individuals who work under broad direction and take responsibility for their own work. This includes using discretion and judgement in the selection and use of available resources.

Licensing conditions apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Explosives (EXP)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify explosives applications	1.1 Identify the job application requiring the use of explosives in consultation with the field manager or supervisor 1.2 Identify the site for blasting and check the surrounding area to confirm that all aspects of safety have been considered and

Element	Performance criteria
	<p>actioned</p> <p>1.3 Identify risks and potential side effects of the blast after consideration of all site characteristics and use information in the planning of blasting operations</p> <p>1.4 Consider environmental implications of the intended explosives usage when planning blasting activities</p> <p>1.5 Consider and utilise alternatives to the use of explosives when planning the application, as appropriate</p> <p>1.6 Follow work health and safety policies and procedures when handling or using explosives to maintain own, fellow workers' and public safety</p>
2. Select explosives components	<p>2.1 Select explosive products to match the application, site and identified hazards at the blasting site</p> <p>2.2 Make sure explosives or components are not damaged or defective before use</p> <p>2.3 Establish the quantity of explosive energy required in line with the site characteristics and the designated application</p> <p>2.4 Ensure initiator device selection reflects industry best practice and matches explosives selection</p> <p>2.5 Utilise safety fuses as required to suit the application</p> <p>2.6 Make sure the use of explosives complies with relevant legislative requirements and Australian Standards</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCEXP302A Identify and select explosive products.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCEXP302 Identify and select explosive products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate that they can identify and select appropriate explosive products for the task.

The candidate must provide evidence that they can that they can:

- establish the need to use explosives
- identify the risks and environmental implications of using explosives
- select explosives and initiator devices to match the application, site and identified hazards at the blasting site
- utilise safety fuses as required
- identify various components of explosive products
- estimate the likely effect of explosives on structures, personnel and livestock in the site vicinity
- apply work health and safety policies and procedures when working with explosives
- apply policies and procedures to ensure the safety of the public

Knowledge Evidence

The candidate must demonstrate knowledge of:

- uses of various explosive products
- performance of each explosive product used by the enterprise
- the behaviour of the substrate material when subject to blasting
- jobs that require the use of explosives in the context of own conservation and land management work

- particular properties of explosives/blasting agents and their suitability for particular purposes
- features that identify defective or damaged explosives
- key concepts of the Australian standards relating to the storage, transportation and use of explosives as they apply to own work role
- relevant State and Territory legislation

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCFAU201 Recognise fauna

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise and record fauna that are commonly encountered when undertaking agricultural, horticultural and land management activities.

This unit applies to supervised workers in land management projects.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Fauna (FAU)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for fauna	1.1 Identify range of fauna requiring recognition according to

Element	Performance criteria
recognition	supervisor needs 1.2 Locate and identify resources and equipment for use in recognition activity 1.3 Identify and select appropriate processes for fauna recognition 1.4 Determine appropriate location for observations 1.5 Prepare for fauna recognition process 1.6 Move in and around location carefully to allow greater opportunity for fauna sightings and to reduce environmental impact of the activity 1.7 Follow work health and safety policies and procedures for fieldwork
2. Recognise specified fauna	2.1 Recognise and name fauna according to their identifiable characteristics 2.2 Record brief descriptions of fauna habits, characteristics and significant features 2.3 Seek advice from supervisors in the identification activity 2.4 Follow procedures to ensure all observation activities comply with animal welfare codes of practice
3. Complete identification of fauna	3.1 Record information about identified fauna and add to the reference collection 3.2 Update field notes as new fauna are recognised 3.3 Report rare, uncommon or notifiable pest fauna to supervisor according to enterprise guidelines

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCFAU201A Recognise fauna.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCFAU201 Recognise fauna

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must be observed in the field recognising and recording details of fauna sightings.

The candidate must provide evidence that they can:

- move through a nominated natural area in a manner suitable for fauna observation, causing minimal disruption and damage to the environment and fauna that inhabit it
- select sites and situations where fauna are likely to be present
- observe and record the details of observations according to enterprise requirements
- recognise fauna according to detailed characteristics
- follow workplace procedures and supervisor instructions for recognising and recording fauna
- apply work health and safety policies and procedures to fauna observation activities
- apply animal welfare practices in all observation activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- fauna identification techniques
- fauna behaviour
- fauna habitats
- fauna tracks and traces
- names and characteristics of fauna in target location
- techniques for observing, identifying and reporting fauna
- enterprise expectations about the range and number of fauna to be recognised
- workplace health and safety policies and procedures

- procedures for reporting rare, uncommon or notifiable pest fauna
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -

AHCFAU301 Respond to wildlife emergencies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to evaluate and coordinate a response to natural resource emergencies involving fauna.

This unit applies to working within own area of responsibility in a response to a wildlife emergency. These individuals are required to take responsibility for their own work and take limited responsibility for other workers and possibly volunteers.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Fauna (FAU)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Evaluate wildlife	1.1 Investigate nature of emergency from eyewitness reports or own

Element	Performance criteria
emergency	inspection 1.2 Make assessment of key factors that may impact on an appropriate response, including public and personal health and safety, animal care, biosecurity and environmental factors 1.3 Notify authorities of incident according to enterprise procedures 1.4 Implement interim care of animals pending instructions from authorities 1.5 Delegate appropriate staff to provide interim care for animals 1.6 Ensure personnel assisting in interim care are equipped and briefed 1.7 Implement care instructions provided by authorities or veterinarians 1.8 Collect information to determine further action 1.9 Interview informants to obtain details of the situation
2. Implement response to emergency	2.1 Establish communications necessary to manage situation 2.2 Transport resources and personnel to site 2.3 Establish site procedures and implement emergency plans according to legislative requirements and enterprise procedures 2.4 Move live fauna 2.5 Remove dead fauna from site and dispose of biological matter in accordance with enterprise procedures and health and safety requirements 2.6 Clean site in accordance with enterprise procedures to maintain public and environmental health and safety 2.7 Implement measures that minimise risk to significant places, area, habitats, species and communities
3. Coordinate response	3.1 Inform general public and media of the nature of the incident and agency decisions 3.2 Brief volunteers and staff on workplace health and safety hazards, preventive measures and reporting requirements 3.3 Coordinate and deploy volunteers according to their skills and available personal protective equipment 3.4 Establish physical barriers to keep public away from animals to minimise their distress and to protect the public 3.5 Manage media until authorities provide instructions 3.6 Use media according to enterprise procedures
4. Care for affected animals	4.1 Assign teams to animals according to incident assessment, care instructions and skills within teams 4.2 Apply animal first aid 4.3 Perform role in wildlife operations team according to the

Element	Performance criteria
	command structure and procedures of the management plan 4.4 Care for animals using a range of skills and according to veterinary instructions and enterprise procedures
5. Determine management options	5.1 Seek veterinary advice where appropriate 5.2 Collect biological and incident data on animals 5.3 Evaluate management options according to advice, condition of animal and risk assessment 5.4 Band or tag released animals where required for scientific purposes 5.5 Source equipment and staff for returning animal to wild or temporary captive management
6. Remove carcass	6.1 Develop inter-agency agreement with local authority for removal of carcasses 6.2 Dispose of carcasses according to authority instructions 6.3 Source equipment and staff for disposal
7. Complete debrief and report	7.1 Follow incident management processes for debrief and wash-up 7.2 Provide report to management to determine what procedures should be implemented

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCFAU301A Respond to wildlife emergencies.

Links

Assessment Requirements for AHCFAU301 Respond to wildlife emergencies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- evaluate natural resource emergency
- implement and coordinate response to emergency in accordance with enterprise procedures and health and safety requirements
- follow enterprise procedures to ensure the safety of self, other personnel, the general public and the wildlife
- determine management options including returning animal to wild or temporary captive management, according to authority and enterprise policies and procedures
- follow instructions from veterinarians or authorities to care for animal
- remove and dispose of animal carcasses in accordance with authority instructions
- complete debrief and prepare reports to enterprise standards
- apply workplace health and safety policies and procedures when implementing emergency plans
- apply appropriate animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- health risks associated with animals
- public relations and media management
- incident management systems
- State/Territory and local wildlife emergency authorities and organisations
- local authorities for wildlife emergencies
- potential biosecurity risks associated with wildlife rescue operations

- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCFAU501 Manage fauna populations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare a fauna management plan including controlling or maintaining fauna populations.

This unit applies to managers of natural areas and technical specialists who manage and provide advice on fauna populations.

Firearms licensing conditions may apply to this unit. Specific determination should be sought through the relevant State or Territory.

Scientific licenses may be required if the management plan involves endangered or threatened species or critical habitats. Specific determination should be sought through the relevant State or Territory.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Fauna (FAU)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess fauna populations	1.1 Conduct surveys for distribution, ecology, viability, genetic diversity and threats 1.2 Determine increase or decrease in species population size and range 1.3 Assess desirability of the population change in terms of impact on immediate environment 1.4 Assess condition of the environment and habitats for ongoing support of the species 1.5 Research species numbers in other locations to determine significance of local population 1.6 Assess attitudes of stakeholders to the species to determine acceptable range of population management options 1.7 Complete a cost/benefit analysis of population management options
2. Prepare management plan	2.1 Develop plan of management from assessment 2.2 Prepare submissions for funding to implement the management plan 2.3 Assess plan of management in terms of costs and available funds, according to enterprise procedures
3. Control or maintain fauna population	3.1 Develop plan to control or maintain species into a series of intervention measures in accordance with resource constraints and legislative requirements 3.2 Implement measures to manage population according to legislative requirements 3.3 Obtain permits for population management according to legislative requirements 3.4 Inform stakeholders and staff about population management measures, according to enterprise procedures 3.5 Ensure management measures comply with work health and safety, animal welfare, biosecurity and environmental sustainability policies and procedures 3.6 Ensure staff are trained and, where required, licensed to manage population 3.7 Manage incidents with species according to legislative, enterprise, work health and safety and public safety requirements 3.8 Monitor and adjust management plan and record results in accordance with legislative and enterprise requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCFAU501A Manage fauna populations.

Assessment Requirements for AHCFAU501 Manage fauna populations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess fauna populations and their habitat
- assess the impact of fauna population on the environment
- determine the stability and importance of fauna populations for their species
- plan intervention measures to improve species distribution, habitat and survivability
- prepare a fauna management plan in accordance with legislative requirements and enterprise procedures, including informing staff and stakeholders
- implement plan to control or maintain fauna populations
- develop workplace health and safety procedures within the management plan
- incorporate biosecurity procedures in the management plan
- apply animal welfare practices when managing fauna populations
- apply appropriate sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- legislative and enterprise requirements
- ecology of species, habitats, predators, competitors
- survey and assessment techniques
- key anatomical and behavioural characteristics and reproduction patterns of species
- signs and symptoms of health issues in the species
- management planning
- requirements of licences for scientific, educational and conservation activities

- requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC FIR201 Assist with prescribed burning

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with prescribed burning for agricultural or natural resource management purposes.

This unit applies to personnel participating in lighting and conducting prescribed burns under direct supervision.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Fire (FIR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assist with preparations for the burn	1.1 Prepare machinery and equipment for use in the burn 1.2 Check and prepare safety equipment and personal protective equipment 1.3 Read or listen to information about contingency plans and seek

Element	Performance criteria
	clarification where required 1.4 Recognise and note assets requiring protection during the burn 1.5 Check personal role and activities during the burn 1.6 Discuss and clarify location and extent of the burn
2. Support conduct of burn	2.1 Provide assistance with pre-burn checks 2.2 Wear personal protective equipment throughout the burn 2.3 Follow work health and safety policies and procedures and enterprise operating procedures throughout the burn 2.4 Identify and maintain a safe escape route at all times 2.5 Raise problems or concerns during the burn with the supervisor 2.6 Maintain communication at all times 2.7 Observe conditions at the fire and note and report their effect on fire behaviour and development 2.8 Observe and report weather conditions and changes to fire behaviour 2.9 Use a fire extinguisher to extinguish fires according to enterprise requirements
3. Participate in clean-up activities	3.1 Carry out cleaning-up activities 3.2 Clean and store personal protective equipment, machinery and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC FIR201A Assist with prescribed burning.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHC FIR201 Assist with prescribed burning

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated on at least one occasion.

The candidate must provide evidence that they can:

- prepare machinery and equipment to enterprise requirements before burning
- continually monitor weather conditions throughout the burn
- use personal protective equipment as required and check, clean and store on completion of the burn
- identify appropriate safe escape routes throughout the burn
- maintain communication with supervisor and other staff at all times throughout the burn
- carry out clean up operations according to supervisor instructions to enterprise standards
- apply work health and safety procedures throughout the burn

Knowledge Evidence

The candidate must demonstrate knowledge of:

- fire behaviour
- extinguishing media and equipment
- communication equipment and procedures
- burning tactics and techniques
- assets that need protecting throughout the burn
- fire hazards, safety techniques
- organisation's operating procedures for prescribed burn
- contingency plans and emergency procedures for the burn
- purpose and use of personal protective equipment
- work health and safety policies and procedures relevant to prescribed burning

- key concepts of work health and safety and environmental legislative and enterprise requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHC FIR501 Manage wildfire hazard reduction programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage wildfire hazard reduction programs.

This unit applies to those whose job role includes managing wildfire hazard reduction programs through planning, advising and monitoring the performance of operational personnel undertaking fire prevention activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Fire (FIR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop wildfire prevention strategies	1.1 Rate potential wildfire hazards according to fuel loads, climate, location, accessibility, ecology and organisational priorities 1.2 Rate risks to buildings, structures and cultural sites from wildfires

Element	Performance criteria
	<p>according to adjacent fuel loads, climate, location, accessibility and organisational priorities</p> <p>1.3 Ensure wildfire hazard reduction strategies take into account the local fire history, fuel loads, climate, location, accessibility, geophysical systems, ecology, environmental sustainability practices, biosecurity, organisational procedures and priorities, work health and safety, local fire agencies and legislative requirements</p> <p>1.4 Gain local community support for proposed wildfire hazard reduction strategy</p> <p>1.5 Develop strategies for proposed wildfire hazard reduction in accordance with organisational priorities, local fire agencies and legislative requirements</p> <p>1.6 Ensure strategies comply with work health and safety, public health and safety and animal welfare regulatory requirements and enterprise guidelines</p>
2. Implement and monitor wildfire hazard reduction	<p>2.1 Determine equipment, chemicals and bioagents required for hazard reduction activities</p> <p>2.2 Implement hazard reduction strategies that are appropriate to the enterprise's objectives, the nature of the site, location, available resources and equipment, and environmental conditions</p> <p>2.3 Undertake hazard reduction in accordance with organisational plans and procedures, work health and safety policies and local fire agency and legislative requirements</p> <p>2.4 Incorporate biosecurity and environmentally sustainable practices in hazard reduction plans</p> <p>2.5 Coordinate hazard reduction activities with relevant agencies and other land users</p> <p>2.6 Monitor progress of hazard reduction activities</p> <p>2.7 Review hazard reduction plans, strategies and operational procedures and process recommendations for change</p>
3. Process records	<p>3.1 Report suggested or required changes to plans and strategies</p> <p>3.2 Ensure records document quantities and type of chemicals or biological agents used and where they were applied</p> <p>3.3 Ensure records document how, when and where hazard reduction actions taken</p> <p>3.4 Process incident report</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC FIR501A Manage wildfire hazard reduction programs.

Assessment Requirements for AHC FIR501 Manage wildfire hazard reduction programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and manage wildfire hazard reduction programs in accordance with enterprise procedures, local fire agencies, work health and safety policies and legislative requirements
- rate wildfire risks to the environment, buildings, structures and cultural sites according to fuel loads, climate, location, accessibility and ecology
- develop effective strategies for wildfire hazard reduction that comply with local fire agency and regulatory requirements
- plan wildfire hazard reduction programs that take into account local fire history, climate fuel loads, location and accessibility
- review hazard reduction plans, strategies and operational procedures with other agencies to enterprise and regulatory requirements
- maintain records of pesticides and chemical agents used, hazard reduction and fire incidents according to enterprise procedures
- manage consultation with local community to ensure their support for program
- use industry standard terminology
- apply work health and safety policies and procedures in the planning and implementation of wildfire hazard reduction strategies
- apply biosecurity measures to wildfire hazard reduction planning
- incorporate appropriate sustainability practices in wildfire hazard reduction planning

Knowledge Evidence

The candidate must demonstrate knowledge of:

- wildfire prevention strategies

- contact details for local fire agencies in the case of an emergency
- local authorities, agencies and other land users
- hazards associated with wildfire prevention strategies
- fire behaviour in a rural/bush environment in known climatic conditions of the specified area
- range of equipment applicable to wildfire hazard reduction
- approved, safe use of equipment
- environmental, public health and safety issues
- types of chemical and biological hazards and how they should be handled
- the local fire history, fuel loads, climate, location, accessibility
- geophysical systems and ecology of the area
- organisational procedures and priorities for wildfire hazard reduction programs
- work health and safety, local fire agencies and legislative requirements that apply to prescribed burns

Assessment Conditions

Assessment must take place in a simulated environment.

Assessors must satisfy current standards for RTOs.

AHCFIR502 Plan prescribed burning for fuel, ecological and cultural resource management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and monitor plans for prescribed burning in areas associated with fuel management and for the conservation of ecological and cultural assets.

The unit includes the identification of advantages and risks in burning for fuel management, identification of ecological and cultural assets and values and the conducting, monitoring and evaluation of a prescribed burn.

This unit applies to individuals whose job roles include preparing and monitoring plans for prescribed burning for fuel management taking into consideration the ecological and cultural assets and values of the target area. Work is undertaken without supervision. They may also have responsibility for the work of others involved in the program.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

PUAFIR303B Suppress wildfire*

PUAFIR204B Respond to wildfire

Unit Sector

Fire (FIR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess a designated site/area for prescribed burning	1.1 Locate, assess and record accumulated fuel, cultural heritage and environmental assets 1.2 Locate, assess and record reference areas, experimental plots, populations of flora and fauna that may be affected by fire 1.3 Assess and record potential impacts on natural and cultural heritage assets from prescribed burn preparation and burning activities 1.4 Assess potential risks and hazards 1.5 Identify the history of previous burns on the site, including frequency, season, intensity and extent 1.6 Take into account legislation, regulations and codes of practice relating to prescribed burn preparation and burning activities 1.7 Assess the suitability of a site or area for fuel reduction using prescribed burning and identify alternative strategies where necessary 1.8 Determine resources and equipment required to implement the plan
2. Plan for prescribed burning	2.1 Conduct site assessment to confirm targeted selection of sites or areas for prescribed burning 2.2 Establish objectives for fuel reduction, ecological and cultural heritage protection 2.3 Select strategies and tactics suitable for the area and consistent with the burn objectives 2.4 Assess wildfire hazards and risks of selected strategies and tactics 2.5 Conduct consultation and ongoing liaison with stakeholders 2.6 Ensure plan addresses work health and safety, protection of life, property, assets and the environment and is in accordance with legislative requirements 2.7 Ensure required resources and the optimum timing to reduce risk are included in the plan
3. Conduct post burn monitoring and evaluation	3.1 Develop and record post burn monitoring and evaluation activities 3.2 Assess outcomes of the prescribed burn against established objectives for fuel management and protection of ecological and cultural heritage assets 3.3 Develop recommendations based on information from monitoring and evaluation activities that are consistent with relevant legislation, regulations and codes of practice and organisational

Element	Performance criteria
	obligations 3.4 Document and report monitoring and evaluation findings

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Maps to AHCILM509A Plan burning activities for natural and cultural resource management. NOT equivalent - Code and Title changed to reflect outcomes. Significant changes to unit content and outcomes.

Assessment Requirements for AHC FIR502 Plan prescribed burning for fuel, ecological and cultural resource management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan, monitor, evaluate and report prescribed burning according to organisational procedures and legislative requirements
- identify wildfire hazards and risks of wildfire impacts
- identify ecological and cultural assets that may be affected by burning and preparation for burning activities
- develop and meet objectives for prescribed burn strategies, tactics and outcomes
- minimise environmental impact
- minimise impact on cultural assets
- recognise and consult with stakeholders
- research and apply lessons of history of burns in the area or site
- apply work health and safety legislative requirements to prescribed burn plans

Knowledge Evidence

The candidate must demonstrate knowledge of:

- wildfire hazards and risk management strategies
- prescribed burning strategies
- basic wildfire behaviour
- legislation relevant to wildfire hazard reduction, cultural heritage and protection of flora and fauna
- effects of fire on vegetation, fauna and fuel accumulation
- effects of fire on areas and places of cultural significance
- resource requirements to conduct burning activities

- risks in burning for fuel management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCHYD301 Implement a maintenance program for hydroponic systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a maintenance program for hydroponic growing systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Hydroponics (HYD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor plant health	1.1 Interpret and clarify workplace information about the existing hydroponic system 1.2 Assess growth rate of plants against targets set in the production plan

Element	Performance criteria
	1.3 Assess plants for overall health 1.4 Assess plant for onset of fruit according to production plan
2. Monitor the hydroponic environment	2.1 Monitor environmental parameters according to the production plan and make adjustments as required 2.2 Collect samples and send off for analysis to identify potential sources of contamination 2.3 Monitor and adjust hygiene procedures 2.4 Monitor disposal of materials to ensure it follows enterprise guidelines
3. Monitor nutrient solution	3.1 Identify ingredients of the hydroponic nutrient solution 3.2 Take samples for testing and analysis 3.3 Interpret and discuss results 3.4 Modify nutrient solution to ensure correct balance of ingredients
4. Perform routine maintenance checks	4.1 Inspect all buildings and structures for wear and tear 4.2 Check equipment for delivering the nutrient solution 4.3 Check equipment controlling the atmospheric and root zone environments
5. Complete monitoring activities	5.1 Report problems to the manager 5.2 Record all checks

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCHYD301A Implement a maintenance program for hydroponic systems.

Assessment Requirements for AHCHYD301 Implement a maintenance program for hydroponic systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor and assess plant health
- administer nutrients to a hydroponic system as instructed
- assist in performing nutrient measurement tests
- read nutrient analysis information
- undertake hydroponic system maintenance and repairs
- monitor hydroponic maintenance programs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for implementing a hydroponic maintenance program
- characteristics of healthy and unhealthy plants
- environmental implications of the disposal of chemicals or chemical containers and the drainage of high nutrient effluent
- equipment used in hydroponic systems
- plant growing media choices and their properties
- potential problems associated with a range of crops grown in a hydroponic environment
- properties of a nutrient solution
- recirculated and non-recirculated systems
- testing methods for a hydroponic nutrient solution
- testing methods for the gauging of environmental parameters

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCHYD501 Develop a plan for a hydroponic system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design a hydroponic system. It applies to those who design systems for hydroponic production of horticultural crops.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Hydroponics (HYD)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out preliminary research	1.1 Research type of crop to be grown based on sound marketing principles

Element	Performance criteria
	1.2 Research the growing requirements of the crop based on sound horticultural practices 1.3 Establish the associated risks of growing a particular crop based on sound horticultural practices 1.4 Calculate estimated yield and crop turnover time from historical data and research statistics 1.5 Determine quantity of the plants to be grown based on a cost benefit analysis
2. Assess the suitability of a site	2.1 Assess the physical characteristics of the site 2.2 Ascertain and assess the proximity of the site to markets 2.3 Identify legal requirements in relation to the site and the development of a hydroponic farm 2.4 Identify and consider the environmental implications of developing a hydroponic farm on the site
3. Select the required system	3.1 Research main types of hydroponic systems 3.2 Carry out analysis on each type of system for the chosen crops 3.3 Carry out a cost/benefit analysis on each system for each type of crop 3.4 Determine the type of hydroponic system to be installed
4. Design the hydroponic system	4.1 Select and document the water collection and storage system on the plan 4.2 Select the irrigation system and its components according to the required volume of water and flow rate 4.3 Select and document the fertigation system 4.4 Determine the dimensions of the controlled environment structure following full consideration of the relevant factors 4.5 Determine the environmental control system and document specifications on the plan
5. Prepare and document the design	5.1 Develop a design plan 5.2 Determine specifications and detailed costings with the help of experts, if required 5.3 Develop and document detailed production procedures and schedules 5.4 Present documentation to the client for final approval

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCHYD501A Develop a plan for a hydroponic system.

Assessment Requirements for AHCHYD501 Develop a plan for a hydroponic system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research the growing requirements, risks and returns of the proposed crop
- select, design or customise a system for the site and purpose
- survey the site for suitability and environmental impacts, and gain approvals
- develop a design plan
- present a design plan to clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for developing a hydroponic system plan
- advantages and disadvantages of the different equipment used in hydroponic systems
- environmental implications of the disposal of chemicals or chemical containers and the drainage of high nutrient effluent
- legislation and regulations relating to the establishment of a hydroponic system
- plant growing media choices, their properties and enterprise specifications
- technical requirements and operating parameters of recirculated and non-recirculated systems

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCILM201 Maintain cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain Indigenous cultural places according to Community guidelines and cultural protocols.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. This includes undertaking defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess maintenance work required	1.1 Identify works required under the management plan and enterprise procedures 1.2 Identify machine, equipment and materials necessary to carry out maintenance works 1.3 Estimate materials required for maintenance work

Element	Performance criteria
2. Prepare for maintenance	2.1 Organise machine, equipment and materials to carry out maintenance works 2.2 Prepare and assemble safety equipment and materials
3. Maintain condition of place	3.1 Undertake maintenance work according to work programs and work health and safety policies and procedures 3.2 Report presence of threats 3.3 Report evidence of deterioration and wear 3.4 Clean up site on completion of maintenance works
4. Protect cultural place	4.1 Report any evidence of damage to place to supervisor 4.2 Report any breach of legislation or enterprise regulations to supervisor 4.3 Maintain protective barriers and signs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM201A Maintain cultural places.

Assessment Requirements for AHCILM201 Maintain cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the level of work required to maintain the cultural place
- prepare for and carry out maintenance activities in accordance with organisational, cultural and environmental requirements
- report deterioration or damage to place to supervisor
- report incidents of breaches of legislation including vandalism
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- potential threats to area
- techniques of site maintenance and protection
- range of maintenance works undertaken on cultural sites
- enterprise procedures relating to the reporting of deterioration or damage to place or reporting of incidents

Assessment Conditions

Assessment must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM202 Observe and report plants or animals

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to observe, record and report on the presence of plants or animals against criteria provided by a supervisor or as required under legislation or regulations.

All work is performed according to Community guidelines and cultural protocols.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. This includes undertaking defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and organise observations	1.1 Prepare a defined process for observation and seek agreement from supervisor 1.2 Obtain equipment for observation 1.3 Note requirements of legislation, protection agreements and enterprise procedures for species
2. Collect and record information	2.1 Identify and record presence of plants or animals, according to enterprise requirements 2.2 Collect plants or animal samples according to enterprise requirements and animal welfare codes of practice, where applicable 2.3 Follow protection and quarantine requirements under legislation, protection agreements and enterprise procedures for biosecurity 2.4 Make sure observation activities minimise degradation and disturbance to the environment, plants and animals 2.5 Carry out observation activities in accordance with work health and safety policies and procedures
3. Report data	3.1 Record and organise information on observed plants or animals according to enterprise recording and database arrangements 3.2 Communicate information to supervisors 3.3 Plot and describe locations of an organism using maps, Global Positioning System (GPS) and grid references

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM202A Observe and report plants and/or animals.

Assessment Requirements for AHCILM202 Observe and report plants or animals

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- observe and accurately identify species of animals or plants in a natural area
- record and report observations in required format
- carry out a survey of plants and animals in a natural area in a manner that minimises disruption or degradation to the environment
- apply work health and safety practices in the context of own work
- use maps or GPS to accurately plot or describe locations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- criteria used to group species
- common, Indigenous and scientific names of plants or animals
- biological species occurring in the study area
- undesirable plants (weeds) and animals
- the basic requirements for ensuring the welfare of animals included in the observation activity described in the relevant Codes of Practice, if animals are being observed

Assessment Conditions

Assessment must comply with community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for assessment.

AHCILM203 Record information about Country

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to record information and knowledge on Country from both an Indigenous and non-Indigenous perspective according to Community guidelines and cultural protocols.

This unit applies to working individually and also within a hierarchy of management and with others in a culturally appropriate way.

Individuals undertake defined activities and work in a structured context exercising limited autonomy with some accountability for own work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect information	1.1 Determine boundaries and extent of Country

Element	Performance criteria
	1.2 Identify and record plant and animal species by Indigenous or common name 1.3 Identify and record special features and sites of Country 1.4 Determine relationships of plants and animals from Indigenous land and sea management and cultural perspectives 1.5 Collect information on relevant management practices for Country 1.6 Determine history of dispossession from Community sources and available literature 1.7 Determine simple food chains relevant to Country 1.8 Follow work health and safety policies and procedures when collecting information on Country
2. Review changes	2.1 Identify environmental changes since dispossession and the impacts of these changes on plant and animal communities 2.2 Document environmental trends and the impacts to Country 2.3 Record land and sea management practices that address environmental change
3. Document information	3.1 Record historical and cultural information about Country 3.2 Provide access to information to those who are authorised according to Community guidelines and protocols 3.3 Recognise and record ownership of information 3.4 Document conditions and parameters for using information

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM203A Record information about country.

Assessment Requirements for AHCILM203 Record information about Country

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- record details of plant and animal species according to enterprise procedures
- record information on Indigenous culture and history for Country
- document environmental changes and trends according to enterprise procedures
- collect and use information according to Community guidelines and protocols
- complete all documentation to enterprise standards, using Indigenous names or standard industry terminology, where appropriate
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- designated areas and features of Country
- local Indigenous or common names for plants and animals
- relationships between plants and animals and Indigenous culture
- protocols and customs relating to disclosure of knowledge about Country

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM306 Follow Aboriginal cultural protocols

Modification History

Release Number	TP Version	Comments
1	RGRv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop awareness of, and apply the protocols of Aboriginal culture, including the need to identify the appropriate persons when approaching a Community and the cultural and social protocols associated with that task.

This unit applies to following cultural protocols and details the specific cultural, gender and kinship sensitivities of working in Aboriginal Communities and on Country with diverse cultural requirements.

The unit applies to individuals working with lore/law men and women either autonomously or under the supervision and cultural authority of Traditional Owners or Elders for specific Country. They work under broad direction and use discretion and judgement in the selection and use of available resources.

This unit is also applicable to the work of repatriation workers and anthropologists. However, cultural beliefs and practices vary across locations and communities however and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify Aboriginal beliefs and associated cultural protocols for different Country	1.1 Identify and document the importance of Aboriginal beliefs and the relationship of these beliefs with cultural landscapes 1.2 Recognise and respect gender roles 1.3 Respect language groups and kinship networks within specific Country that inform the basis of social relationships and Community roles 1.4 Recognise and respect cultural taboos, factions and avoidance relationships 1.5 Acknowledge the rights of individuals within Communities and on Country to hold specific knowledge and ceremony 1.6 Acknowledge the rights of individuals within Communities and on Country to hold responsibility for Aboriginal sites and the cultural rules associated with sharing that knowledge 1.7 Respect and affirm the inherent diversity that exists within cultures and Communities
2. Identify Aboriginal cultural authorities for specific Country in culturally appropriate ways	2.1 Apply various approaches and resources to identify cultural authorities for specific Country 2.2 Research difficulties in identifying cultural authorities in various states and territories 2.3 Identify and consult appropriate cultural authorities 2.4 Apply the identification by cultural authorities of appropriate persons within Communities who hold cultural knowledge relevant to determining the cultural significance of Aboriginal objects and places 2.5 Respect and implement the provision of advice by cultural authorities 2.6 Respect and implement rights and responsibilities associated with cultural knowledge, story, song, site and ceremony 2.7 Support cultural knowledge holders to inform the decision-making process to determine the cultural significance of objects and places 2.8 Acknowledge and respect traditional knowledge and practices in managing Country and environment

Element	Performance criteria
3. Relate Aboriginal cultural protocols to Community consultation	3.1 Identify and record key protocols required for Aboriginal Community consultation 3.2 Acknowledge determination of Aboriginal people as the primary source of cultural information 3.3 Select participants for and methods of consultation in accordance with decisions made by Aboriginal cultural authorities 3.4 Use communication approaches that place Aboriginal cultural protocols and values as a principal concern 3.5 Undertake participation in Community consultation following appropriate cultural protocols for that Country and Community
4. Recognise and administer Aboriginal ownership and intellectual property rights	4.1 Establish ownership rights and intellectual property rights of Aboriginal cultural information and material 4.2 Recognise rights to control cultural heritage by Aboriginal people as custodians of Aboriginal culture 4.3 Apply access restrictions to cultural knowledge, information and material 4.4 Follow confidentiality measures for recording secret, sacred materials 4.5 Determine and administer the ownership of cultural knowledge, information and material 4.6 Report any identified infringement of copyright
5. Access, transfer and use cultural information and material	5.1 Seek permissions from cultural authorities, relevant individuals and organisations for access and use of Aboriginal cultural information and material 5.2 Abide by decisions from cultural authorities, relevant individuals and organisations to deny permission for access and use of Aboriginal cultural information and material 5.3 Establish and implement parameters for processes of transfer of cultural knowledge 5.4 Observe cultural restrictions on Aboriginal cultural information and Aboriginal material 5.5 Acknowledge and observe copyright and licensing issues related to access and use of Aboriginal cultural material and cultural information 5.6 Follow Aboriginal cultural requirements for communications about, and display, access and handling of Aboriginal cultural information and material 5.7 Acknowledge and agree to the implications of consent for accessing, transferring and using cultural information and materials
6. Use appropriate	6.1 Observe appropriate use of personal protocols for addressing and

AHCILM307 Implement Aboriginal cultural burning practices

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use traditional Aboriginal controlled burning practices on Country to manage natural and cultural resources.

This unit applies to Aboriginal sites workers and Land Managers who carry out burns on Country as part of their job role. They work under broad direction and use discretion and judgement in the selection and use of available resources.

The unit involves and requires a high level of awareness and experience with Aboriginal culture and communities and the need to observe Aboriginal cultural protocols. It is expected that this work will be undertaken as part of a team working under supervision in most cases.

Cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge and/or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan burn activities	1.1 Develop working relationships that will assist in the planning and implementation of traditional Aboriginal cultural burning on Country with stakeholders 1.2 Identify and consult appropriate cultural authorities and obtain approval to be on Country 1.3 Obtain cultural knowledge through the appropriate knowledge holder or Cultural Manager 1.4 Identify ceremonial requirements for fire practices necessary for inclusion in burn plan 1.5 Develop a burning plan and schedule for the target area based on traditional cultural knowledge of seasonal conditions, historical information on burns, Aboriginal ceremonial requirements, legislative requirements, environmental sustainability, biosecurity and work health and safety considerations and safety concerns 1.6 Advise local fire services and agencies of proposed burn plan
2. Protect life, property and conserve fauna and flora species in burn area	2.1 Implement burn according to Aboriginal cultural burning techniques and consistent with the burn plan and schedule 2.2 Exclude visitors from target areas, entertainment areas and areas possibly affected by smoke or risk from escaping fire 2.3 Advise neighbours and agencies of the intention to burn to ensure safety and maintain client relations 2.4 Protect Aboriginal sites, assets and entertainment areas according to Aboriginal cultural protocols and fire industry practices 2.5 Apply fire breaks to the area to maintain control of the fire and burn intensity 2.6 Remove animals in danger in the burn area before starting the controlled cultural burn, where possible 2.7 Assess flora for impact on fire-sensitive communities and species
3. Burn defined areas	3.1 Maintain radio communication with other workers in the area throughout the burn 3.2 Use appropriate personal protective equipment and follow work health and safety policies and procedures during the burn 3.3 Assess weather forecasts and current weather conditions to determine appropriate conditions and timing for burn 3.4 Use appropriate ignition techniques, patterns, fire control and safety procedures to conduct the burn

Element	Performance criteria
	3.5 Apply fire to targeted areas according to Aboriginal cultural burning techniques, traditional frequency and organisation requirements 3.6 Identify targeted areas defined by burn specification or limiting factors 3.7 Check area to ensure all sections have received required burn in accordance with the burning plan 3.8 Complete and record assessment of burn 3.9 Monitor burning area to avoid wildfire outbreaks 3.10 Assess seasonal conditions and life cycles of flora and fauna for the end of fire practices

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM307A Implement Aboriginal cultural burning practices.

Assessment Requirements for AHCILM307 Implement Aboriginal cultural burning practices

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated on at least one occasion.

The candidate must provide evidence that they can:

- identify appropriate cultural authorities for a Community, place or for a site
- develop working relationships with Aboriginal and non-Aboriginal stakeholders
- apply traditional Aboriginal cultural burning techniques
- follow burn plans and control burning operations according to enterprise procedures to:
- protect Aboriginal sites, assets and entertainment areas to Community protocols and requirements
- protect life, property and conserve fauna and flora species during burning
- achieve the correct intensity of burn
- maintain biosecurity
- meet environmental sustainability requirements
- adhere to organisational safety and environmental protection policies and procedures
- select existing, and construct additional fire breaks according to enterprise requirements to maintain control of fire
- ignite fires according to burn plan and enterprise procedures
- use radio communication according to enterprise procedures
- apply appropriate animal welfare practices when handling and moving animals in preparation for the burn
- follow work health and safety policies and procedures throughout the burn process to protect self and others

Knowledge Evidence

The candidate must demonstrate knowledge of:

- cultural Authorities within the Community
- traditional Aboriginal rationale and techniques for cultural burning
- the life cycles of flora and fauna of forests/plantations and effect of burning operations
- required intensity and appropriate frequency of fire
- sequence, location and pattern of recent and historical fire burns
- Aboriginal ceremonial requirements for fire practices
- seasonal cycle of weather patterns
- work health and safety policies and procedures
- emergency procedures
- ignition techniques and patterns
- fire control techniques
- emergency fire services
- organisational and enterprise policies and procedures for conservation of places of cultural significance
- key concepts of Cultural and Heritage Legislation or National Parks and Wildlife Service (NPWS) legislation relevant to own prescribed burns
- sustainable environmental practices
- safety procedures for conducting fire operations
- enterprise work health and safety policies and procedures for carrying out controlled burning
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

stakeholders	management of culturally significant places 1.2 Develop communication approaches that accommodate cultural views and observe cultural protocols 1.3 Obtain views on the way in which the cultural significance and resources can be conserved and used 1.4 Convey views obtained into enterprise and park or reserve planning process
2. Conserve significance	2.1 Use enterprise conservation policies and plans with stakeholder views to plan ongoing conservation actions 2.2 Develop and implement operational activities to implement the conservation strategies and plans in a culturally sensitive manner 2.3 Organise staff to implement conservation actions that minimise deterioration and damage 2.4 Supervise staff during restoration projects 2.5 Obtain resources for conservation and restoration activities 2.6 Make submissions to the enterprise budget process for funds to implement the conservation and restoration activities
3. Manage incident	3.1 Develop operational plans to manage incidents consistent with plan of management and risk management analysis 3.2 Assign staff responsibilities to manage types of incidents 3.3 Obtain and maintain equipment and supplies to enable effective response to incidents 3.4 Train staff in the management of the types of incidents for which they have an involvement, including related work health and safety and environmental sustainability policies and procedures 3.5 Make submissions to the enterprise budget process for funds to support the incident management activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM401A Protect places of cultural significance.

Assessment Requirements for AHCILM401 Protect places of cultural significance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop working relationships with stakeholders in cultural sites
- canvass views in a culturally sensitive way to determine the heritage value and preservation issues of a cultural site
- observe cultural protocols in dealing with stakeholders and land managers
- develop action and emergency plans to mitigate and manage the risk of damaging incidents or loss of heritage value
- document the submissions to implement conservation and restoration activities and support the incident management activities
- supervise staff in performing restoration and conservation activities
- include work health and safety procedures in operational plans and training to manage incidents
- ensure plans include environmentally sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise policies and procedures for conservation of places of cultural significance
- operational activities engaged for conservation, restoration and risk management
- Indigenous protocols, consultation processes and networks
- budgetary and financial approval processes

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM402 Report on place of potential cultural significance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to report on place of potential cultural significance.

This unit applies to those whose job role includes investigating and reporting on places of potential cultural significance in consultation with stakeholders and Traditional Owners. A high level of cultural awareness and the need to observe cultural protocols are important parts of the process.

This unit applies to individuals who demonstrate autonomy, judgement and limited responsibility for others in known or changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Investigate evidence of	1.1 Manage movement through park or reserve to minimise

Element	Performance criteria
past activities	<p>disturbance and degradation to the park or reserve and surrounding environments, especially in relation to known and potential places of significance, and to comply with Community protocols, legislative requirements, Codes of Practice and the park or reserve management strategy and plan</p> <p>1.2 Survey an area for land forms including caves and potential sites for rock art, flora, fauna and settings to identify potential places of previous human activity which could have cultural or natural significance</p> <p>1.3 Assess and document signs of previous human activity</p> <p>1.4 Review park or reserve activities in light of potential significance and maintain, modify or halt activities to maintain significance</p> <p>1.5 Where activities have affected or may affect the potential significance, record the original state of the non-Indigenous activities at the place, or for Indigenous activities, seek directions from Indigenous stakeholders or cultural reference group</p> <p>1.6 Where potential places of significance are identified, take field notes of location in terms of other park or reserve features, survey markers or global positioning</p> <p>1.7 Record reasons for identifying potential significance</p> <p>1.8 Refer location to Indigenous stakeholders or cultural reference group for further directions</p> <p>1.9 Follow work health and safety policies and procedures when working on site</p>
2. Implement interim protection measures	<p>2.1 Identify immediate and longer-term threats or risks associated with the conservation of the place according to enterprise guidelines, relevant charters and Codes of Practice</p> <p>2.2 Take interim protective measures to avoid degradation, disturbance, and deterioration and any action which may break cultural protocols</p> <p>2.3 Modify existing activities of personnel and visitors to reduce or eliminate risks to the significance of the place</p>
3. Report observation	<p>3.1 Collate and record field notes on location</p> <p>3.2 Review enterprise records to reveal any existing information about the non-Indigenous significance of the place</p> <p>3.3 Report finding and interim protective measures to colleagues</p> <p>3.4 Seek advice on the potential cultural and natural significance of the place and any additional required protective measures from Indigenous stakeholders or cultural reference group, from specialists in or external to the enterprise</p> <p>3.5 Document and report interim assessment of place according to legislative requirements, best practice guidelines and Codes of</p>

Element	Performance criteria
	Practice

Assessment Requirements for AHCILM402 Report on place of potential cultural significance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- survey an area for landforms and sites that may hold cultural significance
- assess any physical signs, and source local information on human activity in the area, to indicate culturally significant sites
- ensure cultural protocols are followed
- maintain field notes on the location and details of sites in accordance with enterprise procedures or guidelines
- implement protection measures pending further investigation
- develop and document an assessment report for places of cultural significance according to enterprise and legislative standards
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of cultural places in land based, coastal zones and marine parks or reserves
- threats to cultural places from both natural causes and human activity
- application of State or Territory and Commonwealth legislation relevant to Indigenous land management
- enterprise procedures for reporting places of potential significance
- relevant protection measures for significant sites
- methods of locating position of site

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM403 Contribute to the proposal for a negotiated outcome for a given area of Country

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to contribute to the proposal for a negotiated outcome for a given area of Country.

This unit applies to those whose job role includes supporting and contributing to development proposals that relate to a given area of Country. It applies to individuals who demonstrate autonomy, judgement and limited responsibility for others in known or changing contexts.

All work is undertaken according to Community protocols.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Gather information to	1.1 Identify, gather, record and store information required to support

Element	Performance criteria
<p>support the proposal for a negotiated outcome for a given area of land</p>	<p>the proposal development</p> <p>1.2 Review legislation and government policies and plans of management relevant to the proposal</p> <p>1.3 Undertake consultation about the proposal with stakeholders, including Traditional Owners or custodians, community groups and other organisations involved in land and sea management in the specified area</p> <p>1.4 Identify areas of conflict between the different legislation and traditional customs and notify the proposal developer</p> <p>1.5 Define the scope of available alternatives for management and/or resolution of land, rivers, lakes and sea use issues</p> <p>1.6 Outline a description of the types of circumstances under which different alternatives can be applied</p> <p>1.7 Define processes that can be used to implement alternatives and relate to both mainstream ideas and culturally appropriate approaches for the area</p>
<p>2. Contribute to the development of the proposal</p>	<p>2.1 Identify, gather, record, store and analyse information relating to the expected outcomes of the proposal</p> <p>2.2 Identify, gather, record, store and analyse information relating to the proposal development</p> <p>2.3 Relate information about the expected outcomes of the proposal to stakeholders during proposal development process</p> <p>2.4 Identify main characteristics of any relevant State or Territory and Commonwealth Native Title Legislation and Lands Acts that apply to given area of Country</p> <p>2.5 Detail the implications of Native Title on given area of Country using appropriate formats</p>
<p>3. Provide feedback on the development of proposal</p>	<p>3.1 Provide oral or written feedback on the proposal to the proposal developer according to enterprise requirements</p> <p>3.2 Explain the proposal to key stakeholders using appropriate formats according to Community protocols</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM403A Contribute to the proposal for a negotiated outcome for a given area of country.

AHCILM404 Record and document Community history

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to record and document Community history.

All work is done according to enterprise procedures and cultural protocols.

This unit applies to individuals who demonstrate autonomy, judgement and limited responsibility for others in known or changing contexts.

Cultural beliefs and practices vary across locations and communities and in some situations non-Aboriginal learners may not be able to access the cultural knowledge or materials required to achieve competency in this unit due to restrictions that are applied to non-Aboriginal people gaining access to cultural knowledge, material or sites. In these situations the Registered Training Organisation will be required to make alternative arrangements for learners that are still consistent with the delivery and assessment requirements for this unit.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for interviews with Community members	1.1 Determine purpose and objectives of interviews 1.2 Research background to topic and events 1.3 Identify people (narrators) who may be able to provide information on topic and events 1.4 Develop process for individual or group sessions with narrators according to topic and events to be covered 1.5 Develop and check basic questions for interviews with narrators 1.6 Obtain and check equipment, locations and other resources 1.7 Obtain permissions from Cultural Authority to conduct interviews about Community history and culture 1.8 Invite selected narrators
2. Conduct interviews with Community members	2.1 Explain oral history process to narrators to obtain their consent to record and use information provided 2.2 Set up and test recording equipment for operation 2.3 Identify recording media for later reference 2.4 Follow cultural protocols and use appropriate language 2.5 Use basic questions to initiate the interview 2.6 Take notes to identify supplementary questions and to support recording media 2.7 Manage interview process to obtain expected and unexpected information, including memories of incidents 2.8 Support narrator to express memories and opinions in an uncritical and positive setting 2.9 Provide positive feedback on the narrator's assistance 2.10 Manage the environment and distractions to maintain a positive response from the narrator 2.11 Manage session lengths to avoid tiring narrators and interviewer
3. Transcribe and edit information	3.1 Handle recorded media and transcripts to maintain recording quality and accuracy and security and privacy requirements 3.2 Transcribe interviews according to agreements with narrators 3.3 Provide draft written or oral transcripts to narrators for editing according to agreement with narrators 3.4 Complete editing according to narrator's wishes 3.5 Record and manage information on narrator's doubts or hesitancy on certain facts, and conflicting information between interviews

Element	Performance criteria
	separately from transcripts
4. Store records	4.1 Store recorded media and transcripts to maintain recording quality, accuracy, security and privacy requirements 4.2 Control access to records according to the narrator's wishes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM404A Record and document community history.

Assessment Requirements for AHCILM404 Record and document Community history

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- record and document Community history in accordance with Community protocols and permissions
- prepare for interviews by identifying topics, people to be interviewed, questions and interview processes and checking equipment
- identify appropriate individuals or groups for interviews and obtain necessary permissions
- use communication skills and language appropriate to the interviewee
- set up all recording equipment according to enterprise procedures and needs of interview processes
- conduct either individual or group interviews to elicit a wide range of information
- take detailed notes of conversations for further reference and to help source supporting information
- transcribe and edit information, using supporting documentation where possible
- store recorded media and transcripts to maintain recording quality and accuracy and security and privacy requirements according to enterprise procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- background and context of subject areas covered in the interviews/sessions
- objectives of the natural and/or cultural resource research
- range of communication approaches
- relevant cultural protocols
- enterprise procedures relating to the recording, management and storage of oral and community information

- recording techniques and media
- set-up and use of microphones and video cameras
- use of still cameras
- Community protocols, customs and Cultural Authorities for recording cultural knowledge and history

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current Standards for RTOs.

AHCILM405 Develop work practices to accommodate cultural identity

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop work practices to accommodate cultural identity.

This unit applies to individuals who demonstrate autonomy, judgement and limited responsibility in known or changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Investigate government policies and practices relating to Indigenous peoples since European settlement	1.1 Outline the intentions of government policies and practices since European settlement 1.2 Summarise the effects of these policies and practices on Aboriginal and Torres Strait Islander Communities 1.3 Outline how these policies and practices affected Community or

Element	Performance criteria
	family
2. Identify changes that have occurred in Indigenous societies	2.1 Summarise and document government policies operating since European settlement 2.2 Outline the changes that have occurred to Aboriginal and Torres Strait Islander societies as a result of policies and practices, the responses and the views of Indigenous groups 2.3 Describe the impacts of these changes on the Indigenous Community or family
3. Outline effects of current work related issues on Indigenous societies	3.1 Define key work related issues that impact on Aboriginal and Torres Strait Islander societies today 3.2 Describe and record the people involved in key issues 3.3 Summarise and record Community views on issues 3.4 Identify methods of addressing the keys issues 3.5 Predict the future outcomes or resolutions for these issues
4. Determine the impacts of competing factors on self-esteem and identity	4.1 Describe events and occurrences in everyday life that give rise to feelings of both positive and negative self-esteem for Indigenous personnel 4.2 Identify elements which affect self-esteem 4.3 Describe and record how these elements impact on self-esteem 4.4 Develop positive strategies for dealing with impacts on self-esteem and identity
5. Design work practices to accommodate cultural identity	5.1 Define and implement work practices which enhance individual's morale 5.2 Incorporate elements which affect self-esteem in work environments into the work practices 5.3 Consult staff in the preparation and design of these work practices according to Community and organisational protocols and guidelines 5.4 Develop positive strategies for dealing with work practices that impact on self-esteem and identity

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM405A Develop work practices to accommodate cultural identity.

Assessment Requirements for AHCILM405 Develop work practices to accommodate cultural identity

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- outline effects of current work related issues for Indigenous Communities and individuals
- determine the impacts of competing factors on self-esteem and identity
- design work practices to accommodate cultural identity
- incorporate elements to boost self-esteem of Indigenous workers
- respond to workplace issues where work practices are poorly aligned to cultural identity

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Indigenous Communities with whom the organisation works, and their protocols
- cultural customs and heritage
- connections between self-esteem, identity, Community and work
- Indigenous history of particular Communities
- legislation and policies impacting on Indigenous Communities and organisations
- strategies to support development of workers' self-esteem and identity

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM501 Conduct field research into natural and cultural resources

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct field research into natural resource and cultural areas for resource management and related purposes.

This unit applies to individuals who work autonomously and apply judgement and defined responsibility in known or changing contexts and within broad but established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Review existing knowledge	1.1 Examine existing information gathered through investigation and enterprise recording processes to determine key features 1.2 Review oral evidence, where it exists 1.3 Inspect sites to assess condition and availability of further information 1.4 Identify information, records and places previously destroyed or damaged or under threat as factors to be incorporated in the assessment process, strategies and plans 1.5 Assess scope of information for adequacy against the requirements of legislation, Codes of Practice, Burra Charter guidelines and protocols 1.6 Identify appropriate database, geographic information system and other electronic and manual recording systems for data collection 1.7 Identify and access sources of expertise in research environments, identification of pollution, degradation and disturbance, and national and international issues and agreements within and external to the enterprise 1.8 Identify and record areas of inadequate information
2. Identify stakeholders	2.1 Identify stakeholders in conjunction with local Communities and groups, and government documentation and interviews under the direction of a relevant cultural reference group 2.2 Investigate and record the current and relevant past land tenure for the place/area 2.3 Determine Indigenous interests through culturally appropriate approaches to regional and Community organisations and individuals 2.4 Apply proper protocols and conduct key consultations approaches to regional and Community organisations and individuals 2.5 Comply with privacy requirements according to the directions of stakeholders and legislative and enterprise requirements
3. Develop research approach	3.1 Determine objectives of the field research in conjunction with those commissioning the research 3.2 Use objectives to identify specific types of investigation, techniques to be used, and physical areas of investigation 3.3 Assess the types of investigation and techniques selected for hazards and risks in designated environment, including the work health and safety requirements, access issues, and management of the research in a range of weather and area conditions 3.4 Review existing information and data records to determine the starting points for the fieldwork 3.5 Ensure research methodology is consistent with the research objectives and in accordance with established natural resource

Element	Performance criteria
	<p>management practice</p> <p>3.6 Identify required resources to establish and maintain the research program within the required time schedules and ensure they are appropriate to the environments that will be encountered</p> <p>3.7 Select personnel for their competency in research techniques and safe operation in the expected environmental and cultural conditions</p> <p>3.8 Identify stakeholders to be included in the consultation process</p> <p>3.9 Estimate and submit costs of field research for approval</p> <p>3.10 Establish sampling and recording processes for research information according to best practice and scientific standards</p> <p>3.11 Ensure investigations comply with Burra Charter guidelines and other legislative requirements.</p>
4. Conduct field investigations	<p>4.1 Undertake consultation and fieldwork to obtain information required to meet investigation objectives</p> <p>4.2 Follow work health and safety, environmental sustainability and biosecurity policies and procedures when working in field</p> <p>4.3 Adjust previously determined methodology in light of progressive results and stakeholder feedback</p> <p>4.4 Coordinate observations, records and monitoring in accordance with scientific practice and to meet research objectives</p> <p>4.5 Determine ecological, biological and geological, microbiological and entomological diversity within specified area</p> <p>4.6 Identify and record evidence of cultural resources in area</p> <p>4.7 Identify impacts from areas external to natural and cultural resources in area under investigation</p> <p>4.8 Deploy equipment, techniques and people to carry out investigations</p> <p>4.9 Document and approve each field operation according to legislative and enterprise requirements for work in the research environment</p> <p>4.10 Source appropriate equipment and skills for the capture, management and sampling of animal species</p> <p>4.11 Analyse information for impact on previously held hypothesis and other resources</p>
5. Develop process for involving decision-makers	<p>5.1 Use information on stakeholders to determine interests held by organisations, groups and individuals and cultural dimensions</p> <p>5.2 Define issues to be addressed with interest groups</p> <p>5.3 Develop consultation and decision-making process to address the issues with individuals, groups and organisations in a culturally appropriate manner</p>

Element	Performance criteria
	5.4 Provide appropriate time for consultative processes within groups and between individuals to occur and to obtain feedback on issues 5.5 Form a decision-making group, such as cultural reference groups and other groups, where assistance is required to direct investigation, access information to address issues or review the significance of place or area
6. Report on the field investigation	6.1 Consult stakeholders on draft findings 6.2 Document the basis for the determination of outcomes to legislative requirements, the organisation's policies and practices, and international and national processes 6.3 Submit the determination of significance report to the organisation and its external review processes as required by legislation and Codes of Practice

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM501A Conduct field research into natural and cultural resources.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCILM501 Conduct field research into natural and cultural resources

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use a range of electronic and manual recording systems to support research
- identify stakeholders including current tenure, Indigenous history and community interest
- review existing knowledge of national and cultural resources and sites using literature reviews, site inspections, consultation and expert advice
- develop research objectives and research design
- coordinate staff and resources for research project
- conduct field investigations to investigate impacts on fauna, flora and natural resources of the site
- facilitate a consultation and decision-making process
- report on the field investigation to enterprise and legislative requirements
- apply work health and safety practices in field investigations
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- application of conservation legislation, charters, Codes of Practice relating to natural and cultural resource areas
- systems and processes for assessing significance
- ecology and biological diversity of the area under assessment, including aspects of living organisms, habitats and communities, and interactions between species
- geological diversity including aspects of stratigraphy, palaeontology, paedology, and soil classification of the area under assessment

- microbiology including entomology for the area under assessment
- accepted scientific processes, including conservation processes and charters
- major impacts on natural resources, such as geological settings, ecological processes, and interaction between natural and cultural processes
- monitoring requirements including fabric deterioration, damage and likely causes of deterioration and damage
- relevant legislation and agreements that apply to area, including a good understanding of the concepts and potential operation of the Burra Charter
- legislation under which enterprise operates and research is commissioned

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM502 Develop conservation strategies for cultural resources

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop conservation strategies for cultural resources.

This unit applies to those who develop conservation strategies and management policies for cultural resources as part of the overall park management and planning process. These individuals take responsibility for their own work and who provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Define components of cultural heritage significance	1.1 Define geographic and operational boundaries for conservation policy 1.2 Review and collate results of studies of cultural significance for

Element	Performance criteria
	<p>places and areas within the boundaries to develop park, reserve or region significance</p> <p>1.3 Develop limits of acceptable change in the forms of deterioration and damage to the places of cultural significance to legislative and enterprise requirements</p>
2. Review past strategies, plans and activities	<p>2.1 Compare previous strategies and plans with collated assessment of significance to determine compatibility</p> <p>2.2 Review current activities in the area to assess their compatibility with the collated assessment of significance</p> <p>2.3 Document areas of incompatibility</p>
3. Review current and potential resource uses	<p>3.1 Assess impact of current uses of the cultural resources against the set limits of acceptable change to determine success of conservation approach</p> <p>3.2 Assess feasible uses of resources against client requirements</p> <p>3.3 Develop possible changes to resource use to ensure sustainability of cultural values and environment</p>
4. Identify threats to cultural places	<p>4.1 Identify threats to cultural significance and the environment both external and internal to the area under consideration</p> <p>4.2 Make a risk assessment of all threats to determine potential impact on strategies</p> <p>4.3 Document policy changes required to address the threats</p>
5. Develop strategies for management of cultural resource	<p>5.1 Develop draft policy to address the cultural significance that meets any shortfalls in previous strategies, allows for compatible resource uses and addresses risks associated with any threats to the cultural values of the area</p> <p>5.2 Review policy to ensure compliance with Burra Charter guidelines</p> <p>5.3 Conduct consultations with stakeholders on draft policy in accordance with legislative, enterprise and good practice requirements</p> <p>5.4 Ensure consultations comply with cultural protocols and enterprise approaches to stakeholders</p> <p>5.5 Finalise management strategies to reflect stakeholder views as required in legislation, government policies, enterprise strategies and procedures, and environmental sustainability requirements</p> <p>5.6 Submit strategies for approval to legislative and enterprise requirements</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM502A Develop conservation strategies for cultural resources.

Assessment Requirements for AHCILM502 Develop conservation strategies for cultural resources

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review the cultural resources in the area and level of deterioration
- assess the compatibility of current utilisation with cultural and heritage values
- investigate feasible land uses that maintain the cultural integrity of the site
- carry out a risk assessment for damage/deterioration to cultural sites
- consult with stakeholders according to cultural protocols
- develop strategies for management of cultural resources that take into account cultural and environmental requirements
- apply cultural protocols to investigation and development of policies
- apply enterprise policies and procedures to undertake assessment of resources, consultation with stakeholders and development of new policies
- apply appropriate sustainability practices to management strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the range of conservation strategies for cultural areas
- policies from all levels of government and within the specific region, including those under catchment plans that apply to land management practices
- the application and interpretation of Australian Natural Heritage Charter and the Burra Charter and the interpretation of the charters as they apply to use of cultural resources
- enterprise policies and procedures for carrying out investigations, consultations and development of policies
- design and implementation of consultation processes
- policy analysis and impact statements

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM503 Manage restoration of cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage the restoration of cultural places.

This unit applies to individuals who work autonomously and apply judgement and defined responsibility in known or changing contexts and within broad but established parameters. Individuals are required to manage large teams and projects.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan required restoration measures	1.1 Access prior assessment of cultural significance of place to determine range of actions 1.2 Develop short term plan of management and conservation from area strategies and plans according to legislative requirements, enterprise procedures and national and international charters

Element	Performance criteria
	1.3 Research traditional building techniques, materials and material availability to plan maintenance of fabric in traditional styles 1.4 Identify any prior works not in keeping with significance to determine appropriate maintenance actions 1.5 Determine any necessary structural engineering maintenance with experts to incorporate actions into maintenance schedule 1.6 Develop maintenance schedule to meet plan of management and conservation 1.7 Make submissions to obtain appropriate funds to complete works 1.8 Plan restoration work 1.9 Review plans to ensure compliance with Burra Charter guidelines and other legislative requirements
2. Manage restoration works	2.1 Obtain expert advice on specific maintenance works and contracts to meet requirements of management and conservation plans 2.2 Specify special building and conservation requirements in maintenance documentation to maintain significance, and use traditional building techniques, where appropriate 2.3 Supervise workers and contractors to ensure risk assessment is undertaken and work health and safety policies and procedures are followed 2.4 Inform and supervise workers to ensure significance of place is maintained and no damage or degradation is caused to environment
3. Clean-up after work	3.1 Supervise workers to ensure no damage is caused to surrounds, environment, fabric or building 3.2 Supervise workers to ensure work health and safety policies and procedures are followed 3.3 Supervise workers to remove materials, equipment and tools from place on completion of work

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM503A Manage restoration of cultural places.

Assessment Requirements for AHCILM503 Manage restoration of cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- incorporate the prior assessment of significance into an operational plan
- research traditional building techniques to carry out repairs and maintenance
- seek expert advice to meet special building and conservation requirements from the plan of management
- maintain the cultural and environmental integrity of the site and surrounds during and on completion of building
- supervise the work of others to ensure compliance with restoration plan and requirements
- apply work health and safety practices in the context of own work and the work of others
- apply environmentally sustainable practices in maintenance and restoration works

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant concepts of the Burra Charter, heritage and building acts, and other relevant legislation
- conservation architecture techniques applicable to the restoration of cultural places
- interpretation of archaeological reports or assessments of Aboriginal cultural sites and artefacts
- traditional and current building practices
- project management processes
- building or maintenance requirements and specifications
- work health and safety requirements and risk management practices

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCILM504 Develop strategies for Indigenous land or sea management

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop strategies for contemporary land or sea management from an Indigenous perspective.

All work is undertaken according to Community guidelines and cultural protocols.

This unit applies to individuals who work autonomously and apply judgement and defined responsibility in known or changing contexts and within broad but established parameters.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research contemporary	1.1 Outline relevant contemporary Indigenous land and sea management practices

Element	Performance criteria
Indigenous land and sea management practices	1.2 Define relevant issues connected with this practice 1.3 Consult relevant and appropriate people 1.4 Identify associated issues related to contemporary Indigenous land and sea management practices 1.5 Document details of consultation and research
2. Develop management strategies for a specified area	2.1 Base strategies on contemporary Indigenous land and sea management practices, incorporating biosecurity measures, and environmentally sustainable practices 2.2 Identify priorities for management according to level of importance or threats to area 2.3 Develop new approaches to management to address priorities within the context of legislation, cultural protocols and Community needs 2.4 Develop timelines and steps for implementation of strategies 2.5 Define costs of resources, labour and materials required to action management strategies 2.6 Complete preliminary project design to identify project steps and funding requirements 2.7 Make arrangements for project implementation to enterprise requirements and legislation
3. Source and apply for funds	3.1 Identify appropriate funding sources 3.2 Make applications for funds according to legislative, Community and enterprise requirements 3.3 Ensure applications are endorsed by appropriate persons before submission
4. Consult with others on strategies, priorities and project work	4.1 Brief authorised persons on the strategies, priorities and actions planned 4.2 Train staff in new procedures developed to address strategies 4.3 Implement work health and safety policies and procedures to ensure the safety of self and staff 4.4 Develop project implementation plan in consultation with staff, appropriate persons and communities 4.5 Obtain endorsement from appropriate persons, groups and communities, and relevant government stakeholders before works start

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCILM504A Develop strategies for Indigenous land or sea management.

AHCILM510 Plan for successful cultural practice at work

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan for culturally appropriate work practices that enable Aboriginal and non-Aboriginal practitioners to be successful in their chosen field of work or vocation.

This unit applies to individuals who manage an organisation's cultural diversity plans and directions.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCILM306 Follow Aboriginal cultural protocols

Unit Sector

Indigenous Land Management (ILM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Analyse essential features of Aboriginal families and cultures	1.1 Access and review information about Australian Aboriginal history up to the present time 1.2 Research concepts such as Dreaming, connection to Country and other Aboriginal beliefs 1.3 Identify traditional and contemporary social structures of

Element	Performance criteria
	Aboriginal families and societies 1.4 Research elements of Aboriginal societies and use to inform interactions with Aboriginal people
2. Review changes to Aboriginal societies since European settlement	2.1 Research and document colonisation and the impacts on Aboriginal peoples 2.2 Identify racist behaviours and the impact that these have had on Aboriginal peoples 2.3 Analyse personal responses to information about the positive and negative effects of colonisation 2.4 Conduct and analyse research into the impacts of colonisation, settlement and government policies on Aboriginal cultural practices
3. Identify government efforts to address continuing effects of colonisation	3.1 Investigate and analyse various policies implemented by governments in Aboriginal affairs 3.2 Identify the processes involved in government consultation with Aboriginal people, Communities and organisations 3.3 Evaluate effects of government policies in Aboriginal affairs and their implementation processes on Communities 3.4 Investigate and evaluate effectiveness of a chosen government policy through Community consultation 3.5 Develop strategies for addressing any public perception of 'special treatment' for Indigenous peoples in relation to the chosen policy in consultation with Community
4. Apply understanding of Aboriginal cultural protocols and identity to daily work routines	4.1 Identify features of Aboriginal identity and personal cultural maintenance 4.2 Analyse and use how these features are expressed in daily work life to inform workplace relationships and interactions 4.3 Identify and analyse the obligations of cultural maintenance in relation to a work issue 4.4 Apply allowances for absences due to family/seasonal cultural practices and bereavement 4.5 Work through and deal with workplace conflicts in culturally appropriate ways 4.6 Develop possible strategies for cultural maintenance in work and the workplace
5. Plan culturally appropriate work practices	5.1 Develop a vision and workplace goals for own work 5.2 Identify and discuss common culturally inappropriate work practices 5.3 Develop strategies to change these practices collaboratively 5.4 Develop an implementation and evaluation plan for the strategies

Element	Performance criteria
	5.5 Propose ways in which Aboriginal practitioners can effect change to create greater cultural awareness in the workplace

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- define and apply cultural processes within an Indigenous organisation according to Community and organisational guidelines and best practice procedures
- recognise differences between Indigenous and non-Indigenous management processes
- identify the accommodation required to meet non-Indigenous business requirements through Indigenous management processes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- contemporary management practices and styles
- Indigenous management practices and styles
- business planning and strategic planning practices
- Candidates must demonstrate an in depth knowledge of legislation and regulations that apply to management of an organisation.

Assessment Conditions

Assessment must comply with Community protocols and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCINF201 Carry out basic electric fencing operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install and maintain electric fences.

All work is carried out to comply with workplace procedures, work health and safety legislation and codes, manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Infrastructure (INF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for fencing	1.1 Confirm work instructions with supervisor

Element	Performance criteria
operations	1.2 Identify hazards and report to supervisor 1.3 Select tools and equipment appropriate to meet job requirements 1.4 Carry out routine pre-operational checks of tools 1.5 Identify faulty or unsafe tools and segregate for repair or replacement 1.6 Select and fit appropriate personal protective equipment
2. Carry out fencing operations	2.1 Dismantle old fencing and recover re-useable materials 2.2 Identify and carry out repair requirements 2.3 Calculate fencing wire requirements 2.4 Erect electric fences to contour 2.5 Install electric fence components
3. Complete fencing operation	3.1 Fill post holes to remove potential hazards and minimise environmental impact 3.2 Clear and tidy work site and dispose of all non-reusable materials in an environmentally responsible manner 3.3 Transport and store tools and re-usable materials 3.4 Report on further work or repair requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCINF201A Carry out basic electric fencing operations.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCINF201 Carry out basic electric fencing operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and report to supervisor
- read and interpret work plans
- calculate and measure fencing wire requirements
- erect electric fencing and install electric fencing components
- minimise environmental impact
- complete work efficiently within timeframes
- communicate with work team and supervisor
- dismantle old fencing as required
- clean up after fencing
- dismantle and transport portable electric fences
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- uses and structures of a range of electric fence types
- uses and types of standard fencing tools and materials
- common electric fencing hazards and safety precautions
- the difference between portable and mains power
- relevant legislative requirements associated with electric fencing
- enterprise work health and safety policies

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCINF202 Install, maintain and repair farm fencing

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and following safe work practices
- select the appropriate materials and tools
- assess the fencing site for environmental impacts of the fence
- install fence posts and stays erect fences, tension fencing wire and netting, install gates and components
- undertake repairs
- record work activities
- clean up the fencing site and remove and dispose of, or recycle, waste
- use hand tools and powered fencing machinery in a safe, efficient and controlled manner

Knowledge Evidence

The candidate must demonstrate knowledge of:

- designs and purpose of a range of conventional fencing
- wire types, knots, tensions applications and limitations
- common hazards involved in fencing installation, maintenance and repair
- uses and types of fencing tools and equipment
- fencing materials manufacturers specifications and guidelines
- relevant work health and safety and environmental legislation, codes of practice and enterprise procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCINF203 Maintain properties and structures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and repair properties and structures in situations that don't require the specialist skills of another trade.

All work is carried out to comply with workplace procedures, work health and safety legislation and codes, manufacturer's specifications and sustainability practices

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Infrastructure (INF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and confirm maintenance	1.1 Confirm work instructions with supervisor

Element	Performance criteria
requirements	1.2 Identify hazards and report to supervisor 1.3 Select and fit appropriate personal protective equipment 1.4 Inspect structures and facilities to locate and evaluate defects, deterioration and impending defects 1.5 Check property infrastructure and resources for correct operation, minor maintenance needs and damage 1.6 Confirm maintenance plan
2. Select and prepare tools, equipment and materials	2.1 Select and check tools, equipment and materials for serviceability 2.2 Identify and segregate for repair or replacement faulty or unsafe tools 2.3 Identify, assess and report existing and potential hazards to health and safety 2.4 Select and fit personal protective equipment
3. Carry out routine maintenance	3.1 Carry out routine maintenance to infrastructure, structures and facilities 3.2 Carry out minor repairs to building cladding and paint
4. Complete maintenance activities	4.1 Clean, maintain and store worksite, tools and materials 4.2 Collect, treat and dispose of or recycle unwanted materials and waste from maintenance activities 4.3 Complete workplace records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCINF203A Maintain properties and structures.

Assessment Requirements for AHCINF203 Maintain properties and structures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed and repairing properties and structures, in a situation that does not require the specialist skills of another trade.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and following safe work practices
- interpret and apply task instructions
- communicate with work team and supervisor
- select, prepare and safely use of a broad range of tools
- carry out routine maintenance to infrastructure, structures and facilities
- store or dispose of unused or waste materials

Knowledge Evidence

The candidate must demonstrate knowledge of:

- characteristics, capabilities and limitations of materials, equipment and tools
- operation of water taps and reticulation systems
- types of building cladding and finishes, purpose and use
- identification of defects and appropriate repair methods
- appropriate selection of repair materials
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice and procedures with regard to protection of the environment

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCINF204 Fabricate and repair metal or plastic structures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to undertake minor fabrication and repair of metal or plastic structures where the services of a specialist trades person is not necessary.

All work is carried out to comply with workplace procedures, work health and safety legislation and codes, industry practice, manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCINF204 Fabricate and repair metal or plastic structures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed undertaking minor fabrication and repair of metal or plastic structures where the services of a specialist trades person is not necessary.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify job requirements and select materials, tools and equipment
- identify hazards apply safe work practices including use of personal protective equipment
- identify and use jointing methods and safe repair and fabrication techniques
- use welding and thermal cutting equipment safely
- clean up after operations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of fabrication materials and their various applications
- range of metals and non-metal materials that may be used in fabrication and repair
- industry joining and welding techniques and fabrication and repair methods
- work health and safety requirements
- environmental codes of practice with regard to equipment operation and maintenance activities
- operating principles and operating methods for equipment
- various types of welders and respective functions
- environmental impacts and minimisation measures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCINF301 Implement property improvement, construction and repair

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out maintenance and construction of improvements to properties.

All work is carried out to comply with workplace procedures, work health and safety legislation and codes, manufacturer's specifications and sustainability practices

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Infrastructure (INF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assess property condition	1.1 Confirm work plan and priorities with enterprise supervisor or manager 1.2 Assess property structures for soundness 1.3 Identify and determine property improvements and maintenance requirements 1.4 Confirm any planning and permissions have been obtained where required
2. Prepare tools and equipment	2.1 Identify and arrange tools, equipment and materials for the task 2.2 Check tools and equipment for serviceability 2.3 Identify faulty or unsafe tools and equipment and segregate them for repair or replacement 2.4 Identify, assess and report hazards to health and safety 2.5 Select, use and maintain and store suitable personal protective equipment
3. Carry out property improvements	3.1 Construct, repair or dismantle property structures 3.2 Carry out basic concrete, masonry or metal repairs 3.3 Determine and carry out maintenance to roads and tracks 3.4 Comply with planning or building requirements or restrictions
4. Complete maintenance and improvement activities	4.1 Monitor, maintain and improve property structures and surrounds 4.2 Clean, maintain and store worksite, tools and equipment 4.3 Collect, treat and dispose of or recycle unwanted materials and waste from maintenance activities according to enterprise environmental requirements 4.4 Complete workplace records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCINF301A Implement property improvement, construction and repair.

Assessment Requirements for AHCINF301 Implement property improvement, construction and repair

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a range of contexts.

The candidate must provide evidence that they can:

- identify and report hazards and use safe work practices
- confirm work plan and priorities with enterprise supervisor or manager
- assess the nature of required repairs and maintenance
- read and interpret maps, plans, site drawings and simple technical drawings
- carry out building or construction work efficiently and safely
- confirm that the completed or repaired structure meets the standard specified
- operate a broad range of tools and equipment
- complete minor earthworks to specifications
- minimise environmental impacts and dispose of waste appropriately
- estimate and calculate volumes, usage and measurements
- apply enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- machinery and equipment required to carry out property improvements, construction and repairs
- types of building materials required to carry out property improvements, construction and repairs
- concreting procedures and techniques
- wood and steel fabrication procedures
- drainage requirements around structures, tracks and roads
- legislative requirements with regard to construction and structural improvements

- types of building cladding and finishes, purpose and use
- relevant Codes of Practice with regard to protection of the environment
- work health and safety and environmental legislative and enterprise procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCINF302 Plan and construct an electric fence

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan, construct and maintain an electric fence.

All work is carried out to comply with workplace procedures, work health and safety legislation and codes, manufacturer's specifications and sustainability practices

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Infrastructure (INF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine electric	1.1 Access property maps and assess fencing requirements according

Element	Performance criteria
fencing requirements	to enterprise objectives and legislative requirements 1.2 Determine equipment, materials and labour requirements and ensure estimated costings are within budgetary constraints 1.3 Compare alternative electric fencing options to ensure cost-effectiveness 1.4 Prepare fencing plan giving consideration to siting fences in relation to natural features and proposed uses
2. Prepare for construction	2.1 Seek clarification of work plan 2.2 Organise and transport tools and equipment to the work site 2.3 Confirm and arrange labour requirements if required 2.4 Assess risk and minimise potential and existing hazards appropriately
3. Construct electric fence	3.1 Select, use and maintain suitable personal protective equipment 3.2 Construct electric fence according to work plan 3.3 Attach and position gates for correct operation and function 3.4 Install energiser according to manufacturer's specifications.
4. Complete fencing operations	4.1 Check fencing for correct installation and performance 4.2 Identify and fix electric fence faults 4.3 Clear and tidy work site and dispose of all waste in an environmentally responsible manner 4.4 Transport tools and fencing equipment from the work site and check and store 4.5 Record and maintain relevant information

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCINF302A Plan and construct an electric fence.

Assessment Requirements for AHCINF302 Plan and construct an electric fence

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop an electric fencing plan for the enterprise
- identify hazards and implement safe operating procedures
- calculate and measure fencing requirements and calculate costings off the fencing plan
- read and interpret plans and site maps and mark out fence lines
- construct an electric fence that meets specifications and the needs of the enterprise
- operate fencing tools and construction equipment
- test and monitor the electric fence for earthing and current flow, resistance and leakage
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic operation of electric fences including earthing and current flow, resistance and leakage
- differences between portable and mains power
- issues affecting electric fencing in relation to the whole property plan
- range of electric fencing designs, construction methods and materials
- dangers posed by electricity to personnel and livestock
- conditions under which electric fences may cause fire
- safe methods for diagnosing routine faults
- common electric fencing hazards and safety precautions
- relevant State/Territory legislation and regulations regarding electric fences
- work health and safety legislative requirements

- relevant codes of practice with regard to protection of the environment

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCINF303 Plan and construct conventional fencing

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a range of contexts.

The candidate must provide evidence that they can:

- site the fence line according to property or land management plan
- estimate, cost and source fencing materials and arrange delivery
- identify hazards and implement safe work practices
- carry out fencing operations safely and efficiently
- construct a fence that meets specifications in plan or contract and is within tolerances for materials
- construct gate assemblies and swing gates
- string and strain wires to manufacturer's recommended tension
- use and maintain fencing machinery and equipment
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- issues affecting property fence planning and construction
- procedures for planning fencing in relation to the whole property plan
- range of fencing designs, construction methods and materials
- types of fencing construction tools and equipment
- fencing materials and costings
- common fencing hazards and safety precautions
- work health and safety legislative requirements and Codes of Practice
- relevant Codes of Practice with regard to the protection of the environment
- hazard identification, assessment and control

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCINF304 Install and terminate extra low voltage wiring systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install wiring enclosures, cable support systems, cables and accessories in electrical systems of 36 volts or less.

All work must be carried out to comply with workplace procedures, work health and safety requirements, relevant legislation and codes and manufacturer's specifications.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

Licensing, legislative, regulatory or certification requirements may apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Infrastructure (INF)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Plan and prepare for installation of extra low voltage wiring	1.1 Plan and prepare installation to ensure policies and procedures are followed, and the work is appropriately sequenced according to requirements 1.2 Consult with appropriate personnel to ensure the work is co-ordinated effectively with others on the work site 1.3 Size cables and wires to suit calculated load 1.4 Check wiring system components against job requirements 1.5 Source accessories according to established procedures and to comply with organisational and task requirements 1.6 Determine location in which specific items of accessories, apparatus and circuits are to be installed from job requirements 1.7 Obtain materials necessary to complete the work according to established procedures and checked against the job requirement 1.8 Source tools, equipment and testing devices needed to carry out the installation work, checked for correct operation and safety 1.9 Check preparatory work to ensure that it complies with requirements and no unnecessary damage has occurred
2. Install wiring systems	2.1. Follow work health and safety policies and procedures for installing electrical wiring systems 2.2. Install wiring systems to meet requirements without damage or distortion to the surrounding environment or services 2.3. Terminate accessories and connect wire as required to solenoids and controllers, according to manufacturer and enterprise requirements 2.4. Respond to unplanned events or conditions using established procedures 2.5. Obtain approval from appropriate personnel according to established procedures before any contingencies are implemented 2.6. Undertake on-going checks of the quality of the work according to established procedures
3. Check and notify completion of work	3.1. Undertake final checks to ensure the installed wiring systems conform to requirements 3.2. Test system is to ensure that it works 3.3. Notify work completion according to established procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCTEQ301A Install and terminate extra low voltage wiring systems.

Links

Assessment Requirements for AHCINF304 Install and terminate extra low voltage wiring systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe systems of work
- read labels and signage to differentiate between extra low voltage and other electrical systems
- read and follow manufactures manuals and enterprise procedures for extra low voltage wiring
- size cables and wires to suit calculated load
- install wiring systems
- check and notify completed installation activities
- follow enterprise work health and safety procedures and safely work with extra low voltage systems

Knowledge Evidence

The candidate must demonstrate knowledge of:

- basic electricity and electrical principles relating to extra low voltage wiring
- applications, materials and techniques relevant to the industry sector
- isolation and tagging procedures
- computerised controller systems
- enterprise policies and procedures
- testing equipment and procedures
- relevant legislation and guidelines for installing extra low voltage wiring.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCIRG101 Support irrigation work

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to provide support to others undertaking irrigation works in public, commercial and domestic situations

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for irrigation work	1.1 Identify the required materials, tools and equipment according to lists provided or supervisor's instructions 1.2 Conduct checks on materials, tools and equipment with insufficient or faulty items reported to the supervisor 1.3 Demonstrate correct manual handling techniques when loading and unloading materials 1.4 Select and check suitable personal protective equipment (PPE) 1.5 Provide landscaping support according to work health and safety requirements and workplace information

Element	Performance criteria
	1.6 Identify and report workplace hazards to the supervisor
2. Undertake irrigation work as directed	2.1 Follow instructions and directions provided by supervisor and seek clarification when necessary 2.2 Undertake irrigation work in a safe and environmentally appropriate manner 2.3 Carry out interactions with other staff and customers in a positive manner 2.4 Follow enterprise policy and procedures in relation to workplace practices, handling and disposal of materials 2.5 Report problems or difficulties in completing work to required standards or timelines to supervisor
3. Handle materials and equipment	3.1 Store waste material and debris produced during irrigation work in a designated area according to supervisor's instructions 3.2 Handle and transport materials, equipment and machinery according to supervisor's instructions and enterprise guidelines 3.3 Maintain a clean and safe work site while undertaking landscaping activities
4. Clean up on completion of landscaping work	4.1 Return materials to store or dispose of according to supervisor's instructions 4.2 Clean, maintain and store tools and equipment according to manufacturer's specifications and supervisor's instructions 4.3 Make good the site according to supervisor's instructions Report work outcomes to the supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC101A Support irrigation work.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG101 Support irrigation work

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply safe work practices
- clean up on completion of work
- prepare materials, tools and equipment for irrigation work
- undertake irrigation work as directed

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for supporting irrigation work
- safe work practices
- preparing for irrigation work and cleaning up on project completion
- basic construction techniques
- irrigation tools and equipment
- repair and maintenance of irrigation fittings
- work health and safety and safe work practices

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCIRG215 Assist with low volume irrigation operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to assist with installing, operating and maintaining low volume irrigation systems. These systems use emitters such as drippers and generally use poly pipe.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work	1.1 Confirm work instructions with supervisor 1.2 Select appropriate materials, tools, equipment and machinery 1.3 Select personal protective equipment and clothing and ensure correct fit

Element	Performance criteria
	1.4 Identify manual handling and other workplace health and safety hazards 1.5 Identify the site for installation of the irrigation system
2. Install irrigation components	2.1 Prepare the site for installation works 2.2 Assemble and connect system components and test joints 2.3 Connect system to water supply 2.4 Flush and commission system 2.5 Identify and report operating and take corrective actions as directed 2.6 Maintain a clean and safe work area
3. Complete installation work	3.1 Remove waste material from the site and dispose of 3.2 Clean, maintain and store tools, equipment and machinery 3.3 Flush and commission system
4. Carry out start up and shutdown procedures as directed	4.1 Follow start-up sequence 4.2 Shut down system components in sequence 4.3 Drain system 4.4 Record irrigation activity
5. Assist with system maintenance	5.1 Check emitters for serviceability and output 5.2 Maintain delivery components 5.3 Check water supply and pumping system periodically, where required 5.4 Keep maintenance records up to date

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCIRG215 Assist with low volume irrigation operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assemble and join irrigation system components
- carry out basic maintenance tasks
- carry out low volume irrigation operating tasks
- complete installation work
- fix identified faults
- follow directions to operate pumps, filters and valves
- install irrigation components
- look for leaks and faulty emitters
- prepare materials, tools and equipment
- recognise and report faults
- undertake site preparation tasks as directed

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practice of low volume irrigation operation
- characteristics and operation of joints, valves and emitter components
- components in low volume irrigation systems
- emitter spacing, coverage and pressure
- indicators of over and under watering
- installation techniques and procedures
- irrigation controllers
- irrigation pipes, types and sizes

- irrigation times to deliver sufficient volume without over watering
- methods and techniques of low volume irrigation installation
- operation of low volume irrigation system
- set out procedures
- system malfunctions and their likely causes
- use of recycled water and colour coding of pipes
- water requirements of relevant plants

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG216 Assist with surface irrigation operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to assist with installing, operating and maintaining surface irrigation operations.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for work	1.1 Read and confirm work instructions 1.2 Prepare tools and equipment 1.3 Select personal protective equipment and clothing and ensure correct fit 1.4 Identify manual handling and other work health and safety

Element	Performance criteria
	hazards
2. Set up field for surface irrigation systems	2.1 Check rotobuck area for irrigation set up 2.2 Check pumps, bores and other water delivery mechanisms for irrigation set up 2.3 Position and secure tarpaulins or other water control devices as directed
3. Carry out routine maintenance activities on irrigation delivery systems	3.1 Service mechanical equipment 3.2 Flush and clean supply and distribution system 3.3 Maintain system inlets, outlets, structures and fittings 3.4 Check system is running smoothly and is free of damage, leaks and blockages in channels, drains and outlets 3.5 Clean irrigation system and ensure there is no disruption to the system
4. Undertake surface irrigation work as directed	4.1 Open and shut gates and valves 4.2 Ensure required head and water levels in head ditch are achieved and maintained to ensure sufficient water flow and availability to crops 4.3 Start or open the required number of siphons 4.4 Monitor progress of water flow in furrows 4.5 Lift siphons where irrigation is complete 4.6 Carry out irrigation change and mark 4.7 Move irrigation equipment
5. Record and report maintenance activities	5.1 Record damage and blockage caused by pests and vermin by damage type, location and the section of the system affected 5.2 Record and report damage or faulty pumps, valves, electrical components and computer systems and carry out necessary repairs 5.3 Record and report routine maintenance activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCIRG216 Assist with surface irrigation operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out surface irrigation operating tasks as directed
- check siphons for even water flow
- look for uneven water distribution or drainage
- monitor required head and water levels in head ditch
- open and close check valves
- record and report maintenance activities and faults
- start and pull siphons
- use mechanical equipment to build and repair banks and for weed removal

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of surface irrigation
- channels, furrows, borders, fittings and outlets
- damage and problems that occur with gravity-fed irrigation systems
- environmental impacts of irrigation using water from any ground or underground source
- identification, characteristics and operation of surface irrigation structures and components
- signs of stress in plants as well as the signs of over and under-watering
- system cleaning procedures
- system malfunctions and their likely causes
- purpose and principles of surface irrigation
- weed types encountered in gravity fed irrigation systems and their control

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG217 Assist with pressurised irrigation operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to assist installing, operating and maintaining pressurised irrigation systems. These systems use sprinklers and generally use glued PVC pipe.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work	1.1 Confirm work instructions with supervisor 1.2 Select appropriate materials, tools, equipment and machinery 1.3 Select personal protective equipment and clothing and ensure correct fit

Element	Performance criteria
	1.4 Identify manual handling and other work health and safety hazards 1.5 Identify the site for installation of the irrigation system
2. Install irrigation components	2.1 Prepare the site for installation works 2.2 Lay irrigation components out 2.3 Dig or tidy trenches where required 2.4 Add or insert system components 2.5 Position and secure lines 2.6 Assist with fitting pumps and valves
3. Complete installation activities	3.1 Check the irrigation system for leaks or blockages 3.2 Identify and report problems and anomalies 3.3 Clean and store equipment, tools and materials 3.4 Collect waste and dispose of or recycle 3.5 Record workplace information in the appropriate format
4. Carry out start up and shutdown procedures as directed	4.1 Follow start-up sequence 4.2 Shut down system components in sequence 4.3 Drain system 4.4 Record irrigation activity
5. Assist with system maintenance	5.1 Check sprinklers for serviceability and output 5.2 Maintain delivery components 5.3 Check water supply and pumping system periodically, where required 5.4 Keep maintenance records up to date

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCIRG218 Assist with pump and flow control device operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with the installation and maintenance of pumps and flow control devices for irrigation.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for work on pumping and flow control systems	1.1 Read work instructions relating to work activity and confirm with the supervisor 1.2 Prepare tools and equipment and use according to the supervisor's instructions 1.3 Select personal protective equipment and clothing and ensure

Element	Performance criteria
	correct fit 1.4 Identify manual handling and other work health and safety hazards and tell supervisor
2. Carry out installation and maintenance tasks for pumps and flow control devices	2.1 Carry out installation tasks as directed for pumps and flow control devices 2.2 Carry out routine inspections of flow control and metering facilities in irrigation systems 2.3 Carry out preventative maintenance and service of equipment and facilities
3. Review, record and report activities	3.1 Check, maintain and store equipment, tools and materials 3.2 Restore work site to meet environmental and workplace requirements 3.3 Record and report installation and maintenance activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG208A Assist with the installation and maintenance of pumps and flow control devices for irrigation.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG218 Assist with pump and flow control device operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret plans, charts and instructions
- perform work-related calculations
- organise equipment and materials for installation work
- use power tools and hand tools
- handle materials safely
- identify and respond to predictable operational problems

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of pump and control flow devices
- basic principles of hydraulics and the operation of flows
- capacity and limitations of equipment used on the site
- flow measurement principles and procedures
- function of control systems
- layout and performance of pipes and fittings
- lock-out procedures for mechanical and electrical installations
- types of flow control devices and their purpose
- types of pumps and their function and use

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG303 Measure irrigation delivery system performance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to measure pressure, flow and distribution uniformity of an irrigation system.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Measure irrigation system performance	1.1 Measure and record system pressures, water flow rates and pump performance parameters 1.2 Measure variations in system pressures, water flow rates and pump performance parameters where relevant and record 1.3 Inspect distribution and delivery systems and identify and fix

Element	Performance criteria
	malfunctions in system and record actions 1.4 Identify and record factors external to the system that may cause interference
2. Monitor supply of equipment and spare parts	2.1 Record supply and part usage 2.2 Monitor spare parts to ensure the supply meets demands 2.3 Make purchases within budget constraints 2.4 Report parts requirements outside of budget constraints 2.5 Record purchases and orders
3. Record and report system performance status	3.1 Record system pressures and variations 3.2 Record system flow rates and variations 3.3 Calculate and record distribution uniformity and mean application rates 3.4 Determine and record watering depth

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG303A Measure irrigation delivery system performance.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG303 Measure irrigation delivery system performance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and prepare data records for both print-based and computer-based data
- apply measuring and testing techniques
- calculate pressure differentials, flow rates, crop yields, estimated water usage and actual water usage
- identify adverse environmental impacts of irrigation activities and take appropriate remedial action
- use computers to record and report data

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental impacts of irrigation, using water from any ground or underground source
- measuring and monitoring procedures for factors contributing to irrigation system delivery
- soil water retention testing techniques
- water authority standards and procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG306 Troubleshoot irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to troubleshoot faults and blockages in irrigation systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Locate and identify faulty components and blockages	1.1 Determine irrigation system and component function 1.2 Check and review monitoring and maintenance records 1.3 Carry out operational tests 1.4 Identify and document faulty components and blockages

Element	Performance criteria
2. Shut down and isolate component	2.1 Apply shut down sequence and isolation procedures 2.2 Verify safe shutdown or isolation 2.3 Install safety or security lock off devices and signage
3. Replace faulty components and clear blockages	3.1 Organise access to faulty components and blockages 3.2 Remove faulty components and repair or dispose of 3.3 Select and install replacement components 3.4 Replace faulty components and clear blockages 3.5 Clear blockages or replace blocked sections
4. Return system to normal operating status	4.1 Return isolated or shutdown components to service 4.2 Carry out operational tests 4.3 Return system to normal operational set-up 4.4 Report and record repair activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG306A Troubleshoot irrigation systems.

AHCIRG308 Monitor soils under irrigation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor the impact of irrigation on the soil plant growing environment.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess the physical properties of an irrigated soil	1.1 Describe the profile of an irrigated soil 1.2 Determine soil texture and structure within the soil layers 1.3 Interpret tests for organic matter level in a soil 1.4 Test for slaking and dispersion in an irrigated soil

Element	Performance criteria
	1.5 Assess the infiltration rate for an irrigated soil 1.6 Measure soil moisture levels 1.7 Describe the impacts of cultivation and watering practices on the physical properties of a soil
2. Define soil moisture properties	2.1 Describe soil moisture tension and its role in determining water availability to plants 2.2 Assess the field capacity of an irrigated soil 2.3 Observe the wilting point for a plant species in an irrigated soil 2.4 Calculate the readily available water (RAW) in an irrigated soil
3. Monitor soil chemical properties	3.1 Interpret soil test results for salinity and sodicity levels in an irrigated soil 3.2 Interpret pH tests and the potential impact of pH on soil structure and nutrient availability
4. Assess soil health and plant growth under irrigation	4.1 Assess the risk of erosion in an irrigated soil 4.2 Assess soil biology in an irrigated soil 4.3 Establish the growing requirements for a plant species
5. Implement strategies to optimise the irrigation growing environment for plants	5.1 Carry out soil husbandry practices to reduce risks of compaction and erosion 5.2 Implement and monitor a watering schedule 5.3 Adjust the frequency of watering based on available moisture, soil properties and plant response 5.4 Report soil and plant moisture status and irrigation requirement

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG308A Monitor soils under irrigation.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG308 Monitor soils under irrigation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- adjust watering practices to meet plant needs
- apply the results of soil testing to assessing soil properties
- assess the erosion potential of an irrigated soil
- assess the health of an irrigated soil
- calculate moisture holding capacity of plants, including RAW
- conduct soil structure and texture assessment
- use soil moisture monitoring equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- adverse environmental impacts of irrigated plant production
- calculations for readily available water
- critical measures for moisture availability
- effect of dispersible soils under irrigation
- field capacity
- interpreting salinity, sodicity and pH tests
- signs moisture stress & nutrient deficiency in plants
- soil biology
- soil moisture definitions and calculations
- soil moisture monitoring procedures
- soil structure and texture
- types of erosion
- wilting point

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG309 Install irrigation pumps

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install and commission irrigation pumps.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and sequence installation tasks from instructions	1.1 Obtain drawings and specifications 1.2 Plan and sequence tasks 1.3 Select tools and equipment and check for serviceability
2. Source irrigation	2.1 Determine location of pump

Element	Performance criteria
system requirements	2.2 Identify pump base requirements 2.3 Identify, order and collect materials and equipment 2.4 Check materials and equipment for acceptable condition and compliance
3. Install and commission pumping and flow control components	3.1 Set out and construct pump base 3.2 Install pump and pump controls 3.3 Connect suction and discharge lines and flow control devices 3.4 Connect delivery and distribution components to pump 3.5 Conduct pressure testing of pumping system 3.6 Test pump
4. Complete work	4.1 Clear work area and dispose of, reuse or recycle materials 4.2 Clean, check, maintain and store tools and equipment 4.3 Restore work site to meet environmental requirements 4.4 Complete documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG309A Interpret and apply instructions to install pumps.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG309 Install irrigation pumps

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- follow plans, charts and instructions
- handle materials safely
- identify and respond to operational problems
- match pump output and flow rate to pipe diameter
- monitor the performance of valves
- open and close valves
- organise equipment and materials for installation work
- perform work-related calculations
- position pumps and valves
- prime and operate pumps
- set out and prepare the site
- use power tools and hand tools
- weld in both poly and steel

Knowledge Evidence

The candidate must explain:

- advantages and disadvantages of each pump type
- automatic pump switches including timers, pressure switches, irrigation controllers and flow switches
- basic principles of hydraulics (flow vs. pressure), energy loss due to friction
- characteristics and application of different valves, pipes and fittings including fixing and joining techniques and methods
- discharge and flow rates

- impellers, rotors, stators
- installation procedures for irrigation pumps
- properties of water including pressure and flow rates
- pump components and their principles of operation
- pump gauges and controls
- pump performance and pressure testing
- servicing requirements for pumps
- types of pumps and their application in irrigation, such as centrifugal, vertical turbine, submersible and propeller
- types of valves
- types suitable as booster and floating pumps

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG310 Operate and maintain irrigation pumping systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate an irrigation pumping system and maintain pumps and pumping equipment.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to maintain pumps	1.1 Obtain and interpret work requirements for the satisfactory completion of operations 1.2 Select and use materials, tools, equipment and machinery as required by the work activity 1.3 Identify work health and safety hazards, assess risks and

Element	Performance criteria
	implement suitable controls 1.4 Select, use and maintain suitable safety and personal protective equipment 1.5 Identify and arrange support required for the safe completion of the servicing and maintenance tasks 1.6 Carry out isolation and lock-out of all equipment necessary for the safe execution of tasks
2. Carry out pump maintenance	2.1 Inspect pumps and report any faults 2.2 Service and maintain pumps 2.3 Dispose of used oil, lubricant and other waste 2.4 Maintain servicing and maintenance records
3. Prepare the pumping system	3.1 Check operation and function of pump and driver 3.2 Conduct pre-start-up checks on the pumping system to ensure valves are correctly sequenced and filters are clear before commencing pumping operations, and that all safety requirements are met
4. Start up and shutdown pumping system	4.1 Operate ancillary equipment 4.2 Start up and shut down pump 4.3 Implement emergency shutdown procedures when required
5. Operate and monitor pumping and ancillary systems	5.1 Check and maintain flanges, gaskets and seals within stated operational tolerances and to avoid environmental damage 5.2 Monitor pump pressures and flows for conformance 5.3 Use amperage testing equipment to monitor and identify variations in the operating conditions of the pumping systems and equipment 5.4 Monitor pumping systems and equipment performance as well as all components to identify any signs of excessive wear and a reduction of performance 5.5 Check operational valves and valve assemblies for possible leakages 5.6 Check filter systems periodically and clean to remove any potential blockages or impurities entering the pumping system and equipment which may cause it to cavitate or malfunction during operation 5.7 Inspect and sample lubrication oil to check that operating levels are correct and to determine if any contamination has taken place which may affect the operational capacity of the pumping system and equipment 5.8 Take appropriate action resulting from checks and monitoring
6. Shut down the	6.1 Shut down injection equipment and pump

Element	Performance criteria
pumping system	6.2 Clean pumping equipment 6.3 Collect, treat and dispose of or recycle waste generated by both the pumping process and cleaning procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG310A Operate and maintain irrigation pumping systems.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG310 Operate and maintain irrigation pumping systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- adjust pump settings
- check and clear or replace filters
- check and top-up fluids, including coolants, lubricants and hydraulic oils
- check oil quality and levels
- clear blockages
- inspect and clean pumps
- lubricate pumps
- monitor pressures and flows
- prime a pump
- replace belts
- replace worn components, including pump seals, liners and impellers
- set valves and check for wear and leakages
- tension fasteners and y-belts
- use amperage testing equipment

Knowledge Evidence

The candidate must explain:

- advantages and disadvantages of each pump type
- automatic pump switches including timers, pressure switches, irrigation controllers and flow switches
- basic principles of hydraulics (flow vs. pressure)
- discharge and flow rates
- impellers, rotors and stators

- properties of water including pressure and flow rates
- pump components and their principles of operation
- pump performance and fault finding
- pumps and their application in irrigation, such as centrifugal, vertical turbine, submersible and propeller
- pumps that are suitable as booster and floating pumps
- reading pump gauges and controls
- service requirements of pumps
- valves and their uses
- workplace and equipment safety requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG315 Interpret irrigation plans and drawings

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to read and interpret plans and drawings applicable to installing irrigation systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Apply commonly used symbols and abbreviations	1.1 Identify, understand and apply commonly used symbols and abbreviations on plans 1.2 Identify, understand and apply common irrigation terms used on plans 1.3 Identify key features of irrigation plans, elevations and sections

Element	Performance criteria
	1.4 Identify scale, elevations and sections from drawings
2. Locate and identify key features on a site plan	2.1 Identify irrigation site from location drawings 2.2 Identify true north and system orientation from details provided on site plan 2.3 Identify key features of site plan
3. Mark out and peg the site from a plan	3.1 Mark boundaries of the site 3.2 Identify existing irrigation infrastructure on the site 3.3 Identify electricity and communications infrastructure on the site plan, mark out and implement safety procedures 3.4 Peg out pipelines and earthworks identified on the plan
4. Identify required components for installation	4.1 Annotate required pipeline components from plans and drawings 4.2 Annotate water supply, distribution and delivery components from plans and drawings 4.3 Make provision for receipt and storage of materials on site 4.4 Confirm installation requirements and details of plans and drawings with supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG315A Interpret irrigation plans and drawings.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG315 Interpret irrigation plans and drawings

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret scale and specifications from plans and drawings
- interpret symbols and abbreviations used on plans
- mark out boundaries and infrastructure position from a plan
- recognise and mark out features on a site from a plan
- translate documented requirements into on-site activities and site and structural features from two-dimensional to three-dimensional formats
- use basic industry calculations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plan and drawing interpretation
- commonly used scales, symbols and abbreviations
- drawings and specifications relevant to the irrigation industry
- measurements, calculations and quantities
- tools, equipment and materials required from the drawings and specifications

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG325 Operate irrigation technology

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate irrigation technology as part of irrigation installation, construction and operation.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Determine work requirements and identify hazards, assess risks and implement control measures 1.2 Select required tools and equipment and check for safe operation and accuracy 1.3 Select and use suitable personal protective equipment

Element	Performance criteria
2. Operate equipment	2.1 Identify sampling points 2.2 Collect samples 2.3 Record and interpret readings and observations
3. Operate irrigation controllers and sensors	3.1 Link sensors to controllers by wiring or radio signals 3.2 Program controllers 3.3 Monitor accuracy and reliability of electronic flow control equipment and calibrate where necessary 3.4 Report discrepancies or malfunctions to management 3.5 Transport and store equipment appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG325A Operate irrigation technology.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCIRG325 Operate irrigation technology

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- check accuracy of and calibrate equipment
- maintain and check irrigation equipment for accuracy
- operate irrigation controllers and sensors
- operate pressure testing equipment
- operate soil moisture testing equipment
- operate technology to measure and monitor the irrigation system or the growing environment
- operate water metering equipment
- operate water testing equipment
- record observations and data
- record the results of testing
- take representative samples for measurement
- take samples for testing

Knowledge Evidence

The candidate must demonstrate knowledge of:

- data recording procedures
- environmental procedures for use, storage and recycling of electronic equipment and batteries
- equipment maintenance and operation
- irrigation controllers and sensors
- measurement procedures
- operational procedures

- pressure testing equipment
- safe work practices including working with low voltage wiring
- sampling techniques
- soil moisture testing equipment
- water metering equipment
- water testing equipment

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG326 Operate irrigation injection equipment

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- complete relevant calculations such as dilution rates
- handle hazardous chemicals safely
- identify injection requirements
- implement routine maintenance and minor repairs of the system
- implement routine system cleaning requirements
- monitor usage and dilution rates
- report and record corrective action
- select and prepare injection materials
- shut down equipment in response to an emergency situation
- shut down equipment in response to routine shutdown requirements
- take corrective action in response to out-of-specification results or non-compliance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- backflow prevention
- basic operating principles and process control systems where relevant
- chemicals, cleaning agents and fertilisers used for injection and their purpose
- cleaning procedures
- cleaning requirements of system
- common causes of variation and corrective action required
- control points and significance and methods of monitoring
- correct chemical handling techniques
- environmental issues and controls

- label Material Data Safety (MDS) information for substances to be injected
- lock-out and tag-out procedures
- maintenance requirements of system
- procedures for prevention of backflow
- process specifications, procedures and operating parameters
- purpose and operation of equipment and instrumentation components
- recording requirements and procedures
- services required
- shutdown sequence

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG327 Implement an irrigation schedule

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement an irrigation schedule.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Interpret the irrigation schedule	1.1 Determine work requirements and identify hazards, assess risks and implement control measures 1.2 Select required tools and equipment and check for safe operation 1.3 Select and use suitable personal protective equipment 1.4 Access information on plant growing requirements

Element	Performance criteria
	1.5 Interpret moisture requirement throughout the growing season 1.6 Read the predicted seasonal moisture deficit and watering requirements and check with management 1.7 Record parameters for the irrigation system
2. Determine irrigation shifts	2.1 Subdivide the irrigated area into the smallest units capable of individual irrigation and note area and irrigation equipment characteristics for each 2.2 Define each unit for its soil irrigation capability 2.3 Define the crop and plant water requirement for each unit 2.4 Combine units requiring similar irrigation to form a shift that does not exceed the water delivery capacity of the property irrigation infrastructure 2.5 Determine the water volume required to meet irrigation needs over specified period
3. Implement irrigation schedule	3.1 Coordinate resources and brief personnel to deliver requirements 3.2 Implement watering program
4. Monitor irrigation	4.1 Inspect plants and crops for growth rate and signs of stress 4.2 Record frequency of irrigation 4.3 Measure and record water usage and confirm water allocation is not exceeded for a given period 4.4 Calculate the differences between estimated water use and actual water used 4.5 Measure water quality 4.6 Assess plant and crop growth and water use efficiency 4.7 Measure soil for readily available water 4.8 Record climate and weather conditions 4.9 Adjust watering program in response to rainfall events and changes to evapotranspiration rates
5. Record irrigation information and activities	5.1 Record plant or crop environment data 5.2 Record water usage 5.3 Record irrigation shifts 5.4 Record system process data

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG327A Implement an irrigation schedule.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCIRG327 Implement an irrigation schedule

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and interpret the information in an irrigation schedule
- apply sampling techniques
- compare plant health and growth to benchmark requirements
- conduct soil moisture tests
- consult with appropriate senior personnel or consultants
- identify irrigation requirements throughout the growing season by monitoring:
 - climatic conditions
 - crop stage and requirements if applicable
 - effective root depth
 - frost risk
 - plant varietal characteristics and requirements
 - signs of plant nutrient deficiencies
 - soil moisture levels
 - soil type and depth
 - symptoms of water stress
 - water quality
 - water table level
- identify, rectify and report environmental non-compliance
- instruct irrigation system operators
- implement the irrigation schedule including consideration of:
 - application rates
 - interaction between different irrigation employees or shifts
 - maintenance programs and supplies

- materials, chemicals, services
- resources, including operators with appropriate skills
- timing and length
- liaise with other work areas
- monitor irrigation activities including:
 - environmental impact of irrigation activities
 - identifying emitter output consistency
 - identifying soil moisture content and depth to which water will reach
 - report and record problems and corrective action taken
 - take corrective action in response to out-of-specification results or non-compliance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- consultation requirements and procedures
- effect of irrigation techniques on plant growth
- environmental impacts, hazards and controls for irrigation
- interpretation of routine soil moisture tests
- irrigation strategies
- principles of soil moisture monitoring including volumetric soil moisture content, percentage compared to soil moisture tension
- procedures and responsibility for reporting problems
- recording requirements and procedures
- resource requirements and availability
- sampling techniques and procedures
- testing techniques and procedures
- visual symptoms of plant nutrient deficiencies, water stress and frost
- water budgeting tools
- workplace hazards and controls

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG331 Install pressurised irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to install low and sprinkler volume irrigation systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise resources for installation work	1.1 Select and use materials, tools, equipment and machinery 1.2 Check that parts and equipment match system drawings and specifications 1.3 Carry out pre-operational and safety checks on tools, equipment and machinery

Element	Performance criteria
	1.4 Identify work health and safety hazards, assess risks and implement suitable controls 1.5 Select, use and maintain suitable safety and personal protective equipment 1.6 Identify environmental considerations of irrigation installation activities 1.7 Check water supply to ensure that it is compatible with system specifications
2. Set out and prepare site	2.1 Measure and mark out irrigation lines 2.2 Confirm trenches are at the specified depth without damage to services, facilities, features and established plants 2.3 Observe regulations relevant to the situation 2.4 Use work practices that reflect sustainable horticulture principles and respond to local community requirements
3. Install irrigation components	3.1 Interpret the irrigation system plan and, where applicable, supervise contractors and monitor work to ensure it conforms to the plan 3.2 Assemble and connect components and complete and test joints 3.3 Fit and adjust fittings and valves and secure all joints 3.4 Maintain a clean and safe work area while installation work is carried out
4. Commission irrigation system	4.1 Calibrate testing and monitoring equipment 4.2 Confirm the start-up sequence is in accordance with the operations manual 4.3 Flush system as required 4.4 Identify operating faults and take corrective where required 4.5 Record work outcomes and report to supervisor
5. Complete installation work	5.1 Finish off earthworks 5.2 Confirm the system configuration and capacity matches the installation plan 5.3 Restore site and clear materials and equipment from the site on completion of maintenance works 5.4 Clean and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCIRG331 Install pressurised irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calibrate testing and monitoring equipment
- commission irrigation system
- complete installation work
- organise resources for installation work
- set out and prepare the site

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of
- behaviour of water on varying terrain and soil types
- calculations for installing irrigation systems
- characteristics and operation of joints, valves and sprinkler components
- components of an irrigation system
- methods and techniques of installing irrigation
- operation of pumps and water flow rates
- soil characteristics
- soil water retention testing techniques
- water quality and water filtration techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCIRG332 Operate pressurised irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess soil moisture levels
- carry out measurements for output and distribution
- measure and interpret flow rates and pressures
- monitor system effectiveness including:
 - application rates
 - depth of irrigation
 - emitter output
 - irrigation times
- pressure variations and blockages
- salinity levels and water quality
- perform shut down procedures
- read and follow operations manual and procedures
- record data
- start up the system and carrying out operational checks

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of pressurised irrigation system operation
- critical measures for moisture availability including:
 - evapotranspiration
 - field capacity
 - infiltration rates

- readily available water
- water holding capacity
- wilting point
- electrical hazards including:
 - contact with pumps, motors, other live components
 - short circuits
 - standing laterals to remove blockages
 - water spray onto power lines
- energy efficiency indicators and benchmarks for low volume irrigation
- environmental impacts of irrigation using water from any ground or underground source
- general irrigation methods for low volume systems
- main components of low volume and sprinkler irrigation systems
- principles of irrigation and the water cycle
- pump types used in irrigation systems and their operation
- shutdown sequence and flushing procedures
- soil characteristics
- soil, plant and water relationships
- water requirements of plants and crops consistent with sound environmental management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG333 Maintain pressurised irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to implement a low volume or sprinkler irrigation maintenance program.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Interpret a low volume irrigation maintenance program	1.1 Determine the scope of maintenance 1.2 Determine the frequency of maintenance works 1.3 Establish irrigation maintenance standards 1.4 Plan and prepare maintenance works 1.5 Identify work health and safety hazards, assess risks and implement suitable controls 1.6 Identify environmental considerations of irrigation maintenance activities 1.7 Select and use suitable personal protective equipment
2. Inspect an irrigation system	2.1 Create an inspection checklist and inspect the system regularly 2.2 Identify remedial action required and undertake repairs to restore system to full effectiveness 2.3 Undertake servicing of mechanical equipment 2.4 Assess the results of maintenance works and record to ensure repairs or maintenance standards have been achieved
3. Carry out periodic system maintenance	3.1 Record damage and blockages with contaminants by damage type, location and the section of the system affected 3.2 Record and report damaged or faulty components and computer control systems and take action to effect repairs 3.3 Implement end of season maintenance procedures 3.4 Implement routine and preventative maintenance procedures
4. Record and report maintenance activities	4.1 Restore site and clear materials and equipment from the site on completion of maintenance works 4.2 Complete maintenance and servicing records 4.3 Record parts removed or replaced 4.4 Record or report faults and breakages

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCIRG333 Maintain pressurised irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check connections and controllers
- check sprinkler/emitter output and function
- confirm operational pressures
- ensure proper operation of automatic flush valves
- interpret and apply maintenance procedures
- remove, service and replace valves and filters
- test irrigation equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation system maintenance
- characteristics and operation of pipes, joints, valves, emitters
- common operational and maintenance problems
- components of an irrigation system
- operation of pumps and water flow rates
- sprinkler/low volume irrigation system components

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG334 Operate and maintain gravity fed irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to install, operate and maintain surface irrigation structures and components.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Install surface irrigation systems	1.1 Check water supply is compatible with system specifications 1.2 Interpret plan, mark out structures and peg earthworks 1.3 Prepare and maintain beds, diversion and conveyancing structures 1.4 Install diversion and conveyancing structures, channels and beds

Element	Performance criteria
	1.5 Prepare bed surface with roto-buck 1.6 Test structures for configuration, flow rates and capacity
2. Complete water measurement and tail-water works	2.1 Install water measurement structures 2.2 Install channels and tail water storages 2.3 Install pumping equipment, lines and filters 2.4 Confirm that the system configuration and capacity matches the installation plan 2.5 Finish off earthworks and structures
3. Operate pumps and siphons	3.1 Prime pumps and open or close valves and controls 3.2 Position and set up pipes, system equipment and outlets 3.3 Prime and start siphons and other delivery mechanisms 3.4 Implement start up sequence and slowly build up water levels and pressure 3.5 Check pressure at the head-works and control valves 3.6 Distribute water evenly to the targeted areas with minimal wastage and run-off 3.7 Irrigate area and observe time lag between shut down and end of watering to minimise run-off and deep percolation
4. Measure and interpret water levels, flow rates and volume of water used	4.1 Monitor and maintain head water levels 4.2 Confirm that all water outlets are operating correctly 4.3 Replace or clear blocked inlets and outlets 4.4 Measure and record flow rates and water usage 4.5 Implement irrigation changes as required
5. Monitor drainage and tail-water systems	5.1 Monitor water intake, conveyance and distribution, drainage and tail-water 5.2 Check water reuse systems for clearance and freedom from weeds 5.3 Monitor pumps, if used, during operation, clear rubbish from outlets and backflush pump
6. Inspect and maintain a surface irrigation system	6.1 Record damage and blockages with contaminants by damage type, location and the section of the system affected 6.2 Record and report damaged or faulty pumps, valves, electrical components and computer control systems and take action to effect repairs 6.3 Service water measuring, diversion and conveyancing, and distribution structures 6.4 Carry out vegetation control to keep all system components clear 6.5 Undertake servicing and repair of mechanical equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCIRG334 Operate and maintain gravity fed irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- adjust and monitor check valves
- build and maintain irrigation structures, channels and beds
- carry out running repairs on irrigation delivery and drainage systems
- carry out shut down procedures, clean equipment and dispose of waste
- check pressure at the head works and control valves
- check the serviceability of siphons
- identify variations in water flow and distribution
- inspect irrigation systems
- install pumps and pipelines
- measure water usage
- perform system commissioning tasks
- prepare irrigation beds
- remove and replace gates, slides and doors
- remove and replace valves and filters
- start and move siphons and spiles and check flow
- start up the system
- undertake minor repairs of equipment
- use roto-buck for bed preparation

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of surface irrigation

- behaviour of water on varying terrain and soil types
- calculations for installing surface irrigation systems
- characteristics and operation of components
- components of a surface irrigation system
- environmental impacts of surface irrigation installation
- soil characteristics
- soil water retention testing techniques
- water quality and water filtration techniques
- common operational and maintenance problems
- common operational problems
- environmental impacts of irrigation maintenance
- maintenance requirements – routine and end of season
- surface irrigation system components
- weed control methods

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG335 Operate and maintain moving irrigation system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to install, operate and maintain movable irrigation systems.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Install a moving sprinkler irrigation system	1.1 Select required materials, tools, equipment and machinery 1.2 Join span pipes with correctly tensioned bolts 1.3 Connect V-jack trusses in sequence to bow the span 1.4 Connect goose necks and hose connectors

Element	Performance criteria
	1.5 Fit pre-cut drop hoses and connect sprinklers
2. Complete assembly of moving sprinkler components	2.1 Assemble sprinklers, pressure regulators and hose directors 2.2 Fit gear box and control panel 2.3 Fit and tension wheels
3. Assist in commissioning a moving sprinkler irrigation system	3.1 Connect and start pumping system and flush as required 3.2 Calibrate testing and monitoring equipment to manufacturer specifications
4. Operate the system	4.1 Prime pumps, open or close valves and controls and begin the start-up sequence 4.2 Check emitter spacing 4.3 Monitor and service the transport mechanism 4.4 Check the irrigation controller for programming and efficiency 4.5 Correct or repair all malfunctions, leaks and blockages
5. Monitor the irrigation operation	5.1 Implement the irrigation schedule and monitor soil profile for wetting 5.2 Measure sprinkler performance using catch cans 5.3 Measure flow rates using containers of known volume 5.4 Measure operating pressures using pressure gauges 5.5 Check the irrigated area for wheel ruts and other signs of waterlogging
6. Carry out system maintenance	6.1 Record damage and blockages with contaminants by damage type, location and the section of the system affected 6.2 Record and report damaged or faulty pumps, valves, sprinklers, electrical components and computer control systems and take action to effect repairs 6.3 Measure outlet pressure, flow rate and energy use and record on a regular basis 6.4 Inspect and maintain drive mechanism, frames and trusses 6.5 Implement end of season maintenance procedures 6.6 Implement routine and preventative maintenance procedures 6.7 Implement storage procedures for irrigation components
7. Shut down the system in response to irrigation indicators	7.1 Apply water for sufficient time to achieve required soil moisture levels and allowing for weather conditions 7.2 Shut down system components and drain 7.3 Check drainage and treatment systems 7.4 Record and report irrigation activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCIRG335 Operate and maintain moving irrigation system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- change engine oil and filter
- check all bolts for correct torques
- check for malfunctioning sprinklers
- check injection pump and safety equipment operation
- complete regular and end of season maintenance tasks
- fit control panel and wheels
- grease drive shafts on pump and motor
- inspect lift base and arms for any stress marks or cracks
- measure and interpret flow rates and pressures
- monitor system effectiveness
- operate pressure and flow testing equipment
- read and follow operations manuals and irrigation schedules
- shut down, clean equipment and dispose of waste
- start-up system and carry out operational checks
- take and record measurements of output and efficiency
- tension span pipes with V-jack trusses
- use control systems

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of moving irrigation system installation, operation and maintenance

- behaviour of water on varying terrain and soil types
- calculations used when installing irrigation systems
- common operational and maintenance problems
- components of a moving sprinkler irrigation system and their maintenance requirements
- installing a moving sprinkler irrigation
- irrigation methods for moving sprinkler systems
- maintenance requirements for moving sprinkler systems
- monitoring soil compaction and drainage
- moving sprinkler irrigation maintenance
- pump used in moving sprinkler irrigation systems and their operation
- shutdown sequence
- soil water retention testing techniques
- soil, plant and water relationships
- water quality and water filtration techniques
- water requirements of plants and crops consistent with sound environmental management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG402 Determine hydraulic parameters for an irrigation system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to determine hydraulic parameters for an irrigation system.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Confirm water delivery specifications for irrigation system	1.1 Confirm soil characteristics and determine hydraulic properties 1.2 Determine plant and crop water requirements for various stages of growth 1.3 Calculate peak water requirements for each area to be irrigated
2. Determine pressures required to deliver required amount of water over specified area	2.1 Determine static pressures between water source and delivery points 2.2 Calculate dynamic pressure necessary to achieve required water volume
3. Analyse technical drawings to determine pressure losses through system	3.1 Calculate losses resulting from fittings, laterals and elevation differences 3.2 Determine losses resulting from flow through canals, culverts and pipes of varying sizes and diameters within a system 3.3 Calculate total friction loss 3.4 Determine hydraulic parameters for system
4. Select system components to deliver water efficiently	4.1 Select water delivery components to achieve the most efficient delivery rate and pressure 4.2 Select compatible flow direction and control components with pipes that will achieve minimal friction losses

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG402A Determine hydraulic parameters for an irrigation system.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG402 Determine hydraulic parameters for an irrigation system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- apply hydraulic principles to manual and computerised irrigation systems
- calculate pressures, flows, velocities and friction losses
- determine efficiency of the system with varying system components
- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- read contour maps and interpret elevations and distances

Knowledge Evidence

The candidate must demonstrate knowledge of:

- calculate pressure loss due to irrigation components
- calculate pumping requirements
- hydraulic principles such as static and dynamic pressure, pressure loss, friction loss, flow rate and velocity, effect of gradient on flow rate, contact time and drainage
- irrigation system components
- types and pressure ratings for pipes, fittings and outlets

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG404 Implement an irrigation-related environmental protection program

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement an irrigation related environmental protection program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Provide information to workers involved in	1.1 Provide information on the irrigation and drainage environmental plan to all workers and explained in detail

Element	Performance criteria
irrigation and related work	1.2 Explain the relevant codes of practice, legislation and regulations and their application to all workers 1.3 Explain and demonstrate information about known risks to the environment and work practices associated with irrigation practices and related activities 1.4 Explain and demonstrate the organisation’s environmental record systems and procedures 1.5 Identify environmental protection induction and training needs and make arrangements to fulfil those needs
2. Implement and monitor procedures for identifying risks to the environment and maintaining effective control measures	2.1 Identify and report risks to the environment so that adequate risk assessment and control measures can be implemented 2.2 Implement work procedures to control risks to the environment and carry out regular monitoring to ensure ongoing adherence and effectiveness of risk control 2.3 Identify inadequacies in existing risk control measures and raise measures to reduce exposure to environmental pollution events through improved work processes and procedures with the owner or manager 2.4 Identify and report inadequacies in allocation of resources to ensure environmental protection
3. Implement procedures for responding to potential and actual environmental pollution events	3.1 Implement procedures for responding to potential and actual pollution events to ensure that prompt and effective control action is taken 3.2 Investigate and report pollution events 3.3 Calculate stormwater control requirements 3.4 Discuss suitable measures to prevent recurrence and minimise risk of pollution events with the owner or manager, and implement revised procedures where necessary
4. Implement and monitor procedures for maintaining environmental protection record	4.1 Identify gaps in record keeping systems and rectify 4.2 Maintain environmental protection records 4.3 Monitor record keeping systems to ensure compliance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG404A Implement an irrigation-related environmental protection program.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG404 Implement an irrigation-related environmental protection program

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply and comply with environmental requirements
- calculate stormwater control requirements
- explain and demonstrate the organisation's environmental record systems and procedures
- identify adverse environmental impacts of irrigation activities and taking appropriate remedial action
- provide and explain information on the irrigation and drainage environmental plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental impacts of irrigation, using water from any ground or underground source
- environmental legislation, regulations and guidelines
- work health and safety procedures relating to investigation of irrigation-related hazards and implementation of an environmental protection program

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG408 Schedule irrigations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to determine the timing and amount of each irrigation to meet crop or plant needs and environmental requirements.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor crop and plant water use	1.1 Estimate or measure water use from one or more systems 1.2 Accumulate water as a soil water deficit in the root zone
2. Apply a measured	2.1 Predict a pre-determined deficit using a scheduling system

Element	Performance criteria
amount of water	2.2 Apply irrigation to partly or fully replace the deficit 2.3 Increase water quantities where appropriate to ensure dilution and transport of toxic solutes below the root zone
3. Assess efficacy of irrigation and repeat cycles of irrigation	3.1 Measure the effectiveness of irrigation application with in-field equipment 3.2 Adjust the estimated soil moisture level in scheduling system to match that measured 3.3 Recalibrate the scheduling system where necessary 3.4 Repeat cycles of irrigation until schedule is correctly established
4. Record irrigation and scheduling parameters	4.1 Record each irrigation and significant rainfall event, plus other appropriate parameters used in scheduling system 4.2 Estimate and record drainage amount below root zone at each irrigation 4.3 Record system performance data
5. Plan for extremes of weather	5.1 Modify estimated deficits to cater for any prolonged saturation following heavy rainfall 5.2 Alter shift areas, and where applicable, application rates, to suit appropriate irrigation schedules that minimise frost damage 5.3 Implement strategies involving prioritising of plants and crops and intermittent irrigation at times of extreme heat

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG408A Schedule irrigations.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG408 Schedule irrigations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply a measured amount of water
- assess the efficacy of irrigation and repeat cycles of irrigation
- incorporate data from in-field equipment and remote monitoring sources into scheduling systems that compute irrigation requirement
- monitor crop and plant water use
- plan for extremes of weather
- record irrigation and scheduling parameters
- use and maintain in-field equipment that monitors the plant environment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- in-field irrigation reticulation performance and its capacity limits
- inter-relationship between plant, soil and the aerial environments in the determination of water budgets
- physical soil characteristics such as infiltration rate, water holding capacity and wetted volume in the root zone
- plant and crop response to moisture stress at different stages of growth
- possible adverse impacts on the crop and environment from inefficient scheduling or unpredictable weather effects
- recognition of moisture stress effects (sometimes desired) on plants
- relevant environmental policies and procedures
- water authority standards and procedures
- water quality monitoring methods and acceptable quality limits

- weather forecasting of extreme weather events such as heat waves, frosts and storms, and appropriate contingency tactics to minimise impacts

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG410 Select and manage pumping systems for irrigation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate and maintain irrigation pumping systems.

High voltage electrical work must be carried out by a qualified electrician.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify irrigation system requirements from the irrigation design	1.1 Identify the components of an irrigation pumping system 1.2 Determine the water source and height of pull for water into the system 1.3 Determine the water output for irrigation 1.4 Calculate the total friction loss of irrigation components
2. Select pump according to type, installation, range of flow rates, operating head and delivery distance	2.1 Select the basic type of pump based on the pump task and placement and the power source 2.2 Calculate the total operating head required 2.3 Calculate the required discharge for the pump based on the irrigation output required and friction losses in the system 2.4 Determine the speed and power requirements of the pump motor 2.5 Determine the limiting suction lift of the pump 2.6 Interpret pump performance curves when selecting an efficient irrigation pump 2.7 Determine the size of the impeller from the pump curve
3. Supervise installation of pumps	3.1 Ensure pump is sited as close as possible to water source and is level 3.2 Verify pump is properly anchored and connections are airtight 3.3 Confirm pump and motor connection are correctly aligned and motor is ventilated 3.4 Verify filters and valves are correctly fitted and orientated 3.5 Check pump is connected to the irrigation controller if required
4. Oversee commissioning and testing of pumping system	4.1 Develop pre-start and start up procedures 4.2 Check delivery performance and verify power usage and water output against requirements and pump specifications 4.3 Ensure pumping system is checked for leakages and cavitation 4.4 Determine that pumping system is operating effectively
5. Develop maintenance procedures for the pumping system	5.1 Develop routine maintenance procedures to rectify the effects of normal wear 5.2 Develop periodic inspection checklists to assist in maintenance scheduling 5.3 Carry out pump overhaul or repairs 5.4 Keep pump maintenance records, including details of the pump and all pumping system components for ordering
6. Carry out troubleshooting on pumping systems	6.1 Investigate lack of discharge or pressure and change settings or components 6.2 Investigate loss of water suction and make alterations to placement or fix leakages 6.3 Investigate cavitation in pumps and change settings or

Element	Performance criteria
	components 6.4 Investigate excessive power consumption and review design and pump selection and check for mechanical defects

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG410A Select and manage pumping systems for irrigation.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG410 Select and manage pumping systems for irrigation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can:

- identify irrigation system requirements from the irrigation design
- select pump according to type, installation, range of flow rates, operating head and delivery distance
- supervise installation of pumps
- develop maintenance procedures for the pumping system
- monitor the performance of pumps, valves and filters
- carry out troubleshooting on pumping systems
- calculate pumping requirements and pressure loss due to irrigation components
- identify adverse environmental impacts of irrigation pumping activities and take appropriate remedial action

Knowledge Evidence

The candidate must demonstrate knowledge of:

- advantages and disadvantages of each pump type
- application of mechanical, hydraulic and electrical principles
- automatic pump switches including:
 - flow switches
 - irrigation controllers
 - pressure switches
 - timers
- cavitation - cause and effect
- discharge and flow rates
- environmental procedures for installing and maintaining irrigation pumping systems

- installation factors including:
- adequate space, head room, ventilation and lighting
- correct alignment procedures of pump and motor shafts with direct coupled units
- provision for adjustment and ease of dismantling
- levelling and alignment processes
- overhaul or repair operations
- properties of water including pressure and flow rates
- pump components and their principles of operation
- pump efficiency, performance and pressure testing
- pump positioning (driver alignment and suction length)
- routine preventative maintenance
- selection factors for pumps including:
- source of water and lift
- the required pumping flow rate and pressure
- the total dynamic head
- the total suction head
- sources of information and the processes for the calculation of material requirements and flow rates
- statutory and authority requirements related to the installation of commissioning of irrigation pumping systems
- types of impellers and their use
- types of pumps and application in irrigation including:
- centrifugal
- propeller
- submersible
- vertical turbine
- types of pumps suitable as booster and floating pumps
- types of valves
- work health and safety legislation

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG415 Interpret and apply irrigation designs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to interpret the irrigation design for an installation site.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify the key features on an irrigation design	1.1 Identify and apply commonly used symbols and abbreviations on plans 1.2 Identify and apply common irrigation terms used on plans 1.3 Identify key features of irrigation plans, elevations and sections

Element	Performance criteria
	1.4 Identify scale, elevations and sections from drawings
2. Define the placement and function of the irrigation system	2.1 Interpret the plans, drawings and specifications for an irrigation design 2.2 Identify the proposed purpose and capacity of the irrigation system 2.3 Position the designed system in relation to the landscape of the site 2.4 Identify environmental impacts of the irrigation system, and its installation 2.5 Prepare 'as constructed' drawings
3. Mark out structures	3.1 Mark the boundaries of the site 3.2 Identify existing irrigation infrastructure on the site 3.3 Identify electricity and communications infrastructure on the site plan, mark out and develop safety procedures 3.4 Mark out remnant vegetation to be retained 3.5 Identify and peg out proposed pipelines 3.6 Identify and peg out proposed irrigation structures
4. Estimate earth moving requirements for construction	4.1 Interpret earthworks drawings and take levels 4.2 Estimate the amount of earth to be relocated or removed from the site 4.3 Confirm the sequence of earthworks and communicate to relevant staff 4.4 List and quantify materials required for irrigation structures 4.5 Verify construction requirements with designer
5. Select pumps and system components	5.1 Interpret design specifications for water volume, pressure and delivery pattern required 5.2 Select pumping system 5.3 Select irrigation system components 5.4 Verify component selection with designer
6. Mark out locations of all components	6.1 Define the sequence of operations for installation 6.2 Identify the delivery and storage area for components 6.3 Identify the placement of all components
7. Develop instructions for staff	7.1 Include environmental hazards and strategies in instructions 7.2 Document the sequence of activities and work duties 7.3 Discuss work health and safety hazards and risk controls with staff 7.4 Provide a construction schedule to staff

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG415A Interpret and apply irrigation designs.

Assessment Requirements for AHCIRG415 Interpret and apply irrigation designs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read contour maps and interpret elevations and distances
- mark out procedures
- interpret technical drawings and site plans
- calculate pressures, flows, velocities and friction losses
- determine efficiency of the system with varying system components

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation design interpretation
- erosion control and design principles
- how to interpret plans and general and technical specifications
- hydraulic calculations
- levels and levelling
- principles of native topsoil conservation and protection
- pumps and pumping system components
- relevant work health and safety and environmental requirements
- selection of water pumping and distribution components delivery based on specifications and requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG422 Manage a moving sprinkler irrigation system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a moving irrigation system.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Ensure the moving sprinkler irrigation system is prepared for operation	1.1 Assess staff training needs for carrying out pre-start checks and routine servicing and arrange training for those that require it 1.2 Program or adjust the irrigation controller to meet the required schedule

Element	Performance criteria
	1.3 Develop procedures for adjusting valves and checking filters and emitters
2. Develop and implement start-up and shutdown procedures	2.1 Develop start-up procedures for a low volume irrigation system 2.2 Develop shut down sequence and isolation procedures 2.3 Install safety or security lock off devices and signage 2.4 Provide instructions for flushing the system as required
3. Carry out trouble shooting for faults and blockages	3.1 Arrange access to faulty components and blockages 3.2 Remove faulty components from the system and repair or dispose of in an environmentally responsible way 3.3 Select appropriate replaceable components and install
4. Measure performance of a moving sprinkler irrigation system	4.1 Identify and record variations in pressures 4.2 Measure and record water flow rates 4.3 Identify and record variations in water flow and distribution 4.4 Measure and record pump performance parameters as necessary 4.5 Measure and record variations in pump performance parameters where relevant 4.6 Inspect distribution and delivery systems and identify and fix malfunctions in system and record actions 4.7 Identify and record factors external to the system that may cause interference
5. Review system performance status	5.1 Record system pressures and variations 5.2 Record system flow rates and variations 5.3 Calculate and record distribution uniformity and mean application rates 5.4 Determine and record watering depth 5.5 Calculate energy use and water efficiency and compare to industry benchmarks

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG422A Manage a moving sprinkler irrigation system.

Assessment Requirements for AHCIRG422 Manage a moving sprinkler irrigation system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and supervise procedures for starting up, carrying out operational checks and shutting down
- measure, interpret and adjust flow rates and pressures
- measure output and efficiency of an irrigation system
- monitor system effectiveness:
 - application rates
 - depth of irrigation
 - infiltration and runoff
 - irrigation times
 - pressure variations and blockages
 - salinity levels and water quality
 - soil moisture levels
 - sprinkler coverage and output
- use records to review an irrigation system

Knowledge Evidence

The candidate must demonstrate knowledge of:

- best practices for reducing environmental impacts of irrigation
- component specifications
- critical measures for moisture availability:
 - field capacity
 - readily available water

- wilting point
- energy efficiency indicators/ benchmarks for moving sprinkler irrigation:
- Application Efficiency
- Average Application Rate
- Instantaneous Application Rate
- environmental hazards of runoff and compaction
- environmental impacts of irrigation using water from any ground or underground source
- general irrigation methods for moving sprinkler systems
- irrigation schedules
- main components of moving sprinkler irrigation systems
- monitoring soil compaction and drainage
- moving sprinkler irrigation technologies
- physical soil characteristics such as infiltration rate, water holding capacity and wetted volume in the root zone
- pump types used in moving sprinkler irrigation systems and their output and efficiency ratings
- pump types used in moving sprinkler irrigation systems and their operation
- servicing and maintenance of travelling mechanism
- soil moisture testing techniques
- soil, plant and water relationships
- water requirements of plants/crops consistent with sound environmental management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG426 Evaluate water supply for irrigation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to evaluate a water supply for irrigation.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine water needs for irrigation	1.1 Determine the water needs of plants to be irrigated 1.2 Calculate the permeability of the soil and deep drainage losses 1.3 Calculate evapotranspiration rates through the growing season

Element	Performance criteria
	1.4 Calculate soil water deficits throughout the season based on expected rainfall 1.5 Calculate the amount of irrigation water required through the growing season
2. Assess a water source for water quality	2.1 Test water source for electrical conductivity and analyse results 2.2 Test water source for ionic composition and analyse results 2.3 Test water source for biological composition and analyse results
3. Determine cost and availability of alternative water sources	3.1 Evaluate water availability and access requirements for water sources 3.2 Cost capital expenditure requirements 3.3 Cost operating expenditure requirements 3.4 Investigate regulatory requirements for purchasing irrigation water and incorporate into business planning
4. Complete water sourcing or acquisition arrangements	4.1 Make contractual arrangements for purchase or sourcing of water 4.2 Plan for short term purchasing or selling of water depending on seasonal conditions if necessary

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG426A Evaluate water supply for irrigation.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCIRG426 Evaluate water supply for irrigation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse results for electrical conductivity and ionic composition of irrigation water
- apply principles of hydraulics to the selection of irrigation systems, legal access and structures
- calculate capital and operating expenditure for a water supply system
- calculate water losses in an irrigation system
- compare costs for different water sources
- estimate the irrigation requirements of plants
- take water samples

Knowledge Evidence

The candidate must demonstrate knowledge of:

- capital and operating expenditure calculations to source water
- climatic factors in irrigation development, rainfall, evaporation, evapotranspiration and hydrology
- conveyance and disposal of drained effluent
- cost benefit analysis
- efficiency of irrigation systems and long-term viability
- environmental and energy-use implications of resource utilisation and development
- irrigation drainage, seepage, surface and subsurface drainage systems
- irrigation scheduling, soil moisture measurement
- management planning and operation of water allocations
- operations and maintenance requirements

- plant physiology and plant water use, transpiration crop water requirements in terms of water quality and quantity
- plant water requirements in terms of water quality and frequency of supply
- re-use systems, management of irrigation systems
- salinity and ionic composition impacts on soil structure and plant growth
- selection of irrigation systems
- soils and water, soil moisture retention and movement, plant root zones and development, infiltration and leaching
- types of irrigation systems
- water legislation
- water supply potential for the development of irrigation systems

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG431 Supervise irrigation system installation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to coordinate and supervise the construction and installation of a range of irrigation systems.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop and implement construction procedures	1.1 Develop employment and contract management procedures 1.2 Develop procedures for controlling and recording site deliveries 1.3 Develop procedures for recording the hire of plant and equipment 1.4 Determine work health and safety procedures, including risk

Element	Performance criteria
	assessment 1.5 Notify client, authorities and agencies of the schedule of works 1.6 Develop procedures for dealing with environmental issues associated with construction work
2. Interpret the irrigation system design for the site	2.1 Determine the purpose, scale and required output of the irrigation system 2.2 Assess the landscape of the site 2.3 Determine construction requirements and verify with the designer 2.4 Select components to meet design specifications and site requirements
3. Organise resource requirements	3.1 Nominate tasks and timelines and the required resources for each 3.2 Organise labour requirements 3.3 Verify and check parts and equipment delivered to the site 3.4 Select and maintain equipment and machinery 3.5 Allocate jobs and tasks to the work team 3.6 Carry out safety induction for the task and site
4. Supervise construction work	4.1 Interpret plan and supervise construction work 4.2 Confirm site is prepared and set out appropriately 4.3 Confirm the correct lay out of the main lateral line 4.4 Supervise the insertion of sub-mains and flushing manifold 4.5 Supervise the installation of risers, emitters and other components
5. Complete installation work and test components	5.1 Connect water supply 5.2 Check emitters for optimal coverage and efficiency 5.3 Set valves to allow water to targeted areas 5.4 Start up and flush the system 5.5 Attach measuring devices and controllers to the system
6. Commission system	6.1 Identify operating faults and take corrective action to meet design specifications 6.2 Calibrate testing and monitoring equipment 6.3 Carry out testing procedures and record 6.4 Hand over system in operating order

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - no equivalent.

Assessment Requirements for AHCIRG431 Supervise irrigation system installation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct work health and safety risk assessment
- develop operational procedures
- implement employment procedures
- interpret irrigation designs
- supervise installation tasks such as:
 - assembling sprinklers, pressure regulators and hose directors
 - checking operating specifications for pressures and flow rates
 - completing installation work and testing components
 - installing irrigation components
 - installing power and pumping plant
 - laying and joining sprinkler lateral pipelines
 - laying and joining supply and distribution pipeline
 - pressure testing the system
 - setting out and preparing site
 - setting up irrigation controllers
 - undertaking start-up procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation system installation supervision
- behaviour of water on varying terrain and soil types
- calculations for installing low volume irrigation systems

- characteristics and operation of joints, valves and sprinkler components
- commissioning procedures
- design interpretation
- distribution uniformity
- employment procedures
- licensing requirements for electrical work
- operating specifications for pressures and flow rates
- project management principles
- pump capacity
- safe work practices for construction
- setting up fertigation equipment
- setting up irrigation controllers
- soil water retention testing techniques
- start-up procedures
- types of pumps and water flow rates
- volume and pressure requirements
- water quality and water filtration techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG432 Supervise irrigation system maintenance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to supervise irrigation maintenance work.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a maintenance program for an irrigation system	1.1 Establish the maintenance requirements for irrigation components and structures 1.2 Establish the maintenance requirements for the irrigation site 1.3 Determine the frequency of maintenance activities required and

Element	Performance criteria
	develop a schedule 1.4 Calculate the costs of maintenance activities in terms of required staff, materials and equipment 1.5 Assess the work health and safety risks associated with the maintenance program and implement suitable controls 1.6 Minimise the environmental impacts of maintenance activities 1.7 Develop a system for reporting maintenance activities
2. Supervise maintenance of irrigation components	2.1 Develop maintenance checklists for irrigation components 2.2 Monitor component operation, identify operating faults and take appropriate action 2.3 Identify and investigate abnormal operation or frequent and recurring breakdowns and organise maintenance as required 2.4 Identify situations requiring expert advice seek and specialist assistance 2.5 Review equipment condition routinely to ensure and maintain efficient operations
3. Carry out maintenance of testing equipment	3.1 Perform preventative maintenance 3.2 Identify and report equipment wear and faults 3.3 Perform minor repairs within limits of authorisation 3.4 Replace defective parts and make adjustments 3.5 Seek expert help where difficulties are encountered 3.6 Update maintenance and calibration records
4. Supervise pest and weed control in an irrigated area	4.1 Assess evidence of pests and determine species of infestation 4.2 Locate areas of weed infestation, which may be reduced or eradicated and identify species 4.3 Select integrated control methods for pests and weeds 4.4 Schedule control methods at the optimum time that will have minimal damage to the crop 4.5 Maintain records of the severity of infestations and treatments
5. Complete records of irrigation system maintenance	5.1 Maintain records of maintenance activities 5.2 Assess the results of maintenance works against the maintenance program

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCIRG432 Supervise irrigation system maintenance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out visual checks for blockages or signs of wear in components
- check connections and controllers
- check sprinkler output and function
- confirm operational pressures
- develop enterprise procedures for maintenance
- ensure proper operation of automatic flush valves
- inspect irrigation systems
- maintain testing equipment
- pressure testing systems
- service irrigation equipment
- test emitter output and function
- test irrigation equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation system maintenance supervision
- develop enterprise procedures for pre-season, irrigation and post-season maintenance
- drainage systems
- environmental impacts of irrigation maintenance
- equipment testing
- system components
- system inspection

- operating pressures and output
- operational and maintenance requirements
- pre and post-season maintenance covering
- pressure testing as per procedures
- pumping and distribution systems
- distribution uniformity
- visual checks for blockages or signs of wear in components
- work health and safety hazards and safe work procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCIRG433 Manage irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and prepare data records for both print-based and computer-based data
- apply measuring and testing techniques
- calculate pressure differentials, flow rates, crop yields, estimated water usage/actual water usage
- develop and supervise procedures for starting up, carrying out operational checks and shutting down
- identify adverse environmental impacts of irrigation activities and appropriate remedial action
- measure output and efficiency of an irrigation system
- measure, interpret and adjust flow rates and pressures
- monitor system effectiveness

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation system management
- best practices for reducing environmental impacts of irrigation
- component specifications
- environmental impacts of irrigation using water from any ground or underground source
- irrigation schedules
- pump types used in irrigation systems and their output and efficiency ratings
- soil moisture testing techniques
- irrigation technologies
- using records to review an irrigation system

- water in soils and plants
- water requirements of plants/crops consistent with sound environmental management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG434 Manage surface irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to manage a surface irrigation system.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Ensure the surface irrigation system is prepared for operation	1.1 Assess staff training needs for carrying out pre-start checks and routine servicing and arrange training for those that require it 1.2 Program or adjust the irrigation controller to meet the required

Element	Performance criteria
	schedule 1.3 Develop procedures for adjusting valves and checking filters and emitters
2. Develop and implement start-up and shutdown procedures for a surface irrigation system	2.1 Develop start-up procedures for the system 2.2 Provide training in priming pumps and setting gates to commence irrigating 2.3 Develop shut down sequence and isolation procedures 2.4 Specify soil conditions for operation and maintain tracks to reduce compaction
3. Measure performance of a surface irrigation system	3.1 Record variations in pressures at the head works and control valves 3.2 Water flow rates are measured and recorded in accordance with enterprise policy and procedures 3.3 Measure and record water flow rates 3.4 Identify and record variations in water flow and distribution 3.5 Measure and record pump performance parameters as necessary 3.6 Measure and record variations in pump performance parameters where relevant 3.7 Inspect distribution, drainage and water measurement systems and identify and fix malfunctions in system and record actions 3.8 Identify and record factors external to the system that may cause interference
4. Review system performance status	4.1 Record system pressures and variations 4.2 Record system flow rates and variations 4.3 Calculate and record distribution uniformity and mean application rates 4.4 Determine and record watering depth 4.5 Measure quantity and quality of tail water, and amount of water reused 4.6 Calculate energy use and water efficiency and compare to industry benchmarks

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCIRG434 Manage surface irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop procedures and providing training to staff to:
- carry out running repairs on irrigation delivery and drainage systems
- carry out shut down procedures
- check pressure at the head works and control valves
- set up pipes, system equipment and outlets
- use siphons
- develop procedures for starting up, carrying out operational checks and shutting down
- identify and record variations in water flow and distribution
- identify adverse environmental impacts of irrigation activities and take appropriate remedial action
- implement and follow workplace health and safety and environmental requirements
- measure and recording water flow rates
- provide supervision and training

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of surface irrigation management
- calculating irrigation efficiency using records to review an irrigation system
- critical measures for moisture availability:
- evapotranspiration
- field capacity
- infiltration rates

- readily available water
- water holding capacity
- wilting point
- environmental impacts of irrigation using water from any ground or underground source
- main components of surface irrigation systems
- physical soil characteristics such as infiltration rate, water holding capacity and wetted volume in the root zone
- pump types used in surface irrigation systems and their operating requirements
- pump types used in surface irrigation systems and their operation
- set up of headwater, tail water, channels and beds
- soil moisture testing techniques
- water in soils and plants
- water requirements of plants and crops consistent with sound environmental management

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG501 Audit irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to audit an irrigation system.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect and collate all available data	1.1 Collate data on system performance 1.2 Collate data on environmental and workplace health and safety issues 1.3 Collate data on equipment supply and usage

Element	Performance criteria
	1.4 Collate data on crop production 1.5 Collate data on water use and quality 1.6 Collate data on climatic trends 1.7 Collate data on physical and chemical properties of soil
2. Assess actual data against benchmarks, specifications and predictions	2.1 Analyse system performance and compare with system specifications and performance predictions 2.2 Analyse supply and stock use and compare with previous and estimated usage and costs 2.3 Analyse crop production and compare with previous and predicted production 2.4 Analyse water usage and quality and compare with past and predicted usage and quality 2.5 Analyse climatic information and compare with predicted trends 2.6 Analyse soil properties and compare with previous and predicted properties 2.7 Analyse production costs related to irrigation system and compare with previous and predicted costs 2.8 Analyse net profits and compare with past and predicted profits
3. Compile a report of system evaluation	3.1 Examine indicators of good performance 3.2 Examine indicators of poor performance 3.3 Examine causes of deviations from performance specifications and requirements 3.4 Prepare a report that includes discussion of results of data analysis and conclusions reached on irrigation system performance in relation to crop production and business performance
4. Recommend alterations to achieve performance improvement	4.1 Make recommendations to modify or eliminate causes of poor performance, or to enhance current performance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG501A Audit irrigation systems.

Assessment Requirements for AHCIRG501 Audit irrigation systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse and organise data
- identify adverse environmental impacts of irrigation system activities and recommend appropriate remedial action
- recommend relevant work health and safety and environmental procedures
- solve performance problems and recommend solutions
- use computer software for irrigation auditing

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental impacts of irrigation systems using water from any ground or underground source
- evaluation procedures
- irrigation system performance indicators
- relevant workplace health and safety legislation, codes of practice and enterprise requirements
- statistical data analysis procedures or software

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG502 Design irrigation system maintenance and monitoring programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design irrigation system maintenance and monitoring programs.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Design an irrigation system maintenance program	1.1 Specify the resources needed to perform maintenance tasks 1.2 Specify repairs, replacements and servicing requirements for all equipment and machinery

Element	Performance criteria
	1.3 Specify activities required to maintain the irrigation site, system hardware and water quality 1.4 Analyse manufacturer's operating manuals and use as guidance to specify maintenance activities, schedule and skills required 1.5 Take into account water supply authority constraints and requirements for water and maintenance when scheduling system maintenance program activities 1.6 Determine labour and work health and safety requirements for each activity and record 1.7 Ensure weed control, water storage and treatment maintenance form an integral part of the system maintenance program 1.8 Specify strategies to ensure that negative impacts of irrigation, drainage and water treatment systems are minimised, and positive impacts are maximised
2. Design a monitoring and scheduling program	2.1 Integrate procedures for monitoring and recording system hardware use and performance into the monitoring and scheduling program 2.2 Integrate procedures for scheduling, monitoring and recording water use 2.3 Include procedures for monitoring and recording operating costs 2.4 Develop contingency plans in the event of water restrictions being imposed

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG502A Design irrigation system maintenance and monitoring programs.

Assessment Requirements for AHCIRG502 Design irrigation system maintenance and monitoring programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse and organising information
- design scheduling and recording procedures
- develop and include relevant work health and safety and environmental procedures
- identify adverse environmental impacts of irrigation, drainage and water treatment activities and taking appropriate remedial action
- identify and scheduling activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- drainage and water treatment using water from any ground or underground source
- environmental impacts of irrigation
- irrigation, drainage and water treatment maintenance activities
- maintenance and monitoring design requirements
- water quality guidelines for fresh and marine water including but not limited to ANZECC 1999
- water supply authority constraints
- work health and safety and environmental protection legislation, codes of practice and enterprise requirements for monitoring and maintenance programs

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG503 Design irrigation, drainage and water treatment systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design irrigation, draining and water treatment systems.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine design requirements	1.1 Analyse water quantity and quality needs for a particular crop or situation so that an estimation can be made for sufficiency and timeliness

Element	Performance criteria
	<p>1.2 Evaluate water transfer, recharge, reuse and harvesting systems</p> <p>1.3 Determine water collecting and storing processes that do not degrade the water quality</p> <p>1.4 Determine construction specifications that satisfy organisational and regulatory requirements</p> <p>1.5 Identify and protect environmentally sensitive areas as required by local, State and National legislation</p> <p>1.6 Investigate regional geology and geography so that a prediction can be made on the sustainability of irrigation, drainage, storage and treatment system</p> <p>1.7 Conduct a site investigation to assess type of soil, depth of soil, depth of ground water, water salinity, and structural or chemical impediments and to determine the most cost effective irrigation, drainage, treatment and storage systems</p> <p>1.8 Document design calculations and decisions</p>
2. Define pumping and power systems	<p>2.1 Identify pumps that can deliver water efficiently when needed, from the water storage at the flow and at the pressure required to operate the distribution system to the design specifications</p> <p>2.2 Select pump motor combinations that are efficient, reliable, functional, serviceable and flexible for the intended application</p> <p>2.3 Determine energy requirements and layout of electricity lines and check with local authorities</p> <p>2.4 Optimise the relationship between capital and operational costs including a comparison of energy sources</p> <p>2.5 Document performance indicators, design calculations and decisions</p> <p>2.6 Design construction specifications that define work required to make suitable pumping and power systems available</p>
3. Design an irrigation distribution system	<p>3.1 Investigate regional geology and geography so that a prediction can be made on the sustainability of irrigation</p> <p>3.2 Evaluate distribution systems and design with respect to a range of key variables</p> <p>3.3 Size pipes, valves and fittings according to design system specifications so that capital cost is balanced against operation costs over the anticipated system life</p> <p>3.4 Calculate and document flows, water levels and pressures so that they are within the acceptable tolerances for optimum performance</p> <p>3.5 Include mechanisms for controlling and adjusting pressure and confirm isolation valves to direct water to areas with different irrigation schedules</p> <p>3.6 Design distribution and monitoring systems to meet industry</p>

Element	Performance criteria
	<p>recommendations and calculate distribution system flow and velocity</p> <p>3.7 Design construction plans and specifications that define the work required to achieve the required standards of uniformity and efficiency of water application</p>
4. Design a drainage, storage and treatment system	<p>4.1 Document predictions of leaching fractions and salt movements and develop soil amelioration and drainage management plans</p> <p>4.2 Determine the need for leachate interception and dewatering system, and if required, prepare construction specifications for interception and collection, water treatment, disposal and reuse or recycle</p> <p>4.3 Design drainage, storage and treatment systems to meet industry recommendations and calculate distribution system flow and velocity</p> <p>4.4 Produce construction plans and specifications that define the work required to achieve standards of uniformity and efficiency of the drainage, storage and treatment systems</p> <p>4.5 Determine if drains and structures are capable of carrying the design water volumes and intensities</p> <p>4.6 Minimise damage from drainage, storage and treatment system issues</p> <p>4.7 Use hydrological calculations to predict volumes and rates of surface run-off</p>
5. Determine capital expense budget	<p>5.1 Document design calculations and decisions and communicate relevant information through plans, specifications and manuals</p> <p>5.2 Determine and document materials requirements from plans and specifications</p> <p>5.3 Estimate labour requirements based upon documented work schedule with reasonable allowance for variances in work schedules</p> <p>5.4 Base costing attributed to each component on quoted information from suppliers, or sound analysis of individual elements</p> <p>5.5 Confirm budget output by checking with an appropriately experienced and qualified person</p>
6. Determine operating expense budget	6.1 Determine an operating expense budget that includes all expenses applicable to the completed irrigation, drainage, storage and treatment systems

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG503A Design irrigation, drainage and water treatment systems.

Assessment Requirements for AHCIRG503 Design irrigation, drainage and water treatment systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and analyse information
- compare costings
- develop budgets
- develop system specifications
- document outcomes
- identify adverse environmental impacts of irrigation, drainage, water treatment and storage activities and take appropriate remedial action
- identify system design requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- contractual development and obligations
- control and monitoring systems
- cost/benefit analysis
- design processes
- developments in irrigation, drainage, storage and treatment technology
- environmental impacts of irrigation, drainage and water treatment
- soil types and their impact on the systems
- work health and safety and environmental protection legislation and regulations, codes of practice and enterprise policies and procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG504 Develop an irrigation and drainage management plan

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop an irrigation and drainage management plan.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Compile property background	1.1 Identify ownership details 1.2 Compile irrigation history

Element	Performance criteria
information	1.3 Identify locality and property details 1.4 Identify agreements and easements with surrounding properties 1.5 Develop property maps to illustrate locality and property boundaries
2. Compile information on infrastructure and topography	2.1 Define significant topographical and infrastructure features 2.2 Identify opportunities and strengths of the property 2.3 Identify limitations and weaknesses of the property 2.4 Identify local planning issues that may affect the irrigation development 2.5 Develop a map overlay to illustrate topography and infrastructure
3. Compile information on natural resources	3.1 Gather soil survey information 3.2 Identify strategies to minimise and reduce soil erosion, and physical and chemical soil deterioration 3.3 Identify water source availability and quality 3.4 Identify ground water depth and salinity issues 3.5 Define climatic characteristics 3.6 Develop a map overlay to illustrate natural resource features
4. Compile information on enterprise cropping and planting	4.1 Define the suitability of soils and water quality for crops and plants 4.2 Identify any special irrigation requirements of crops and plants 4.3 Develop monthly and annual water budgets for each crop and plant program 4.4 Identify current yields and compare with benchmark crop yields 4.5 Establish targets with consideration for any factors which would limit optimum production 4.6 Define intended crop rotations 4.7 Develop a map overlay to illustrate crop and plant detail
5. Compile information on existing irrigation and drainage system where used	5.1 Evaluate current system performance 5.2 Compare current system performance to benchmark performance parameters 5.3 Develop scheduling procedures 5.4 Define drainage management performance including environmental authority compliance issues 5.5 Identify areas for improvement in system management and structure 5.6 Develop a map overlay to illustrate irrigation system layout
6. Develop an irrigation and drainage management plan with	6.1 Summarise performance requirements for distribution, treatment and drainage systems

Element	Performance criteria
specifications for new or up-graded irrigation and drainage system	6.2 List new or replacement components 6.3 Develop a development timetable 6.4 Define proposed scheduling system 6.5 Define performance monitoring procedures and work health and safety requirements 6.6 Define drainage management processes 6.7 Develop a map overlay to illustrate proposed irrigation and drainage development

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG504A Develop an irrigation and drainage management plan.

Assessment Requirements for AHCIRG504 Develop an irrigation and drainage management plan

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- compile and analyse complex information
- develop and implement relevant work health and safety and environmental procedures
- develop plans and reports
- identify adverse environmental impacts of irrigation system activities and recommend appropriate remedial action
- interpret statistical data and measurements
- use a range of irrigation and information management software

Knowledge Evidence

The candidate must demonstrate knowledge of:

- computerised irrigation systems
- enterprise policies and procedures
- environmental impacts of irrigation systems using water from any ground or underground source
- irrigation system options
- measuring and monitoring procedures
- methods and techniques of irrigation
- readily available water
- soil, plant and water relationships
- water table and salinity

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCIRG505 Establish and maintain an irrigation-related environmental protection program

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish and maintain an irrigation-related environmental protection program.

It applies to individuals who analyse information and exercise judgement to complete a range of skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Irrigation (IRG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish and maintain an irrigation and drainage	1.1 Develop an irrigation and drainage environmental plan in consultation with property owner or manager 1.2 Define environmental responsibilities for the property and include

Element	Performance criteria
environmental protection program	in the duties of all personnel 1.3 Include financial and human resources to implement the environmental plan in a timely and consistent manner 1.4 Establish and maintain environmental records
2. Establish and maintain arrangements to ensure the involvement of all personnel in the environmental program	2.1 Develop procedures and processes that allow and encourage all personnel at all levels to have input into environmental issues 2.2 Address issues raised through involvement and consultation with personnel
3. Establish and maintain risk management procedures to protect the environment from irrigation practices and related activities	3.1 Establish and maintain procedures for identifying and assessing existing and potential risks to the environment arising from irrigation practices and related activities 3.2 Design work processes and procedures to reduce or eliminate risks and hazards to the environment 3.3 Establish and maintain organisational and administrative systems to control risks to the environment arising from irrigation practices and related activities 3.4 Establish and maintain procedures to monitor risks to the environment and compliance with relevant legislation and regulations
4. Establish and maintain procedures for responding to environmental pollution events	4.1 Identify potential environmental pollution events 4.2 Develop procedures to control the level of risk associated with pollution events in consultation with relevant environmental protection agencies and local government authorities 4.3 Provide appropriate information and training to personnel to ensure prompt implementation of response procedures
5. Establish and maintain an environmental protection induction and training program	5.1 Develop an environmental protection induction and training program and incorporate into the organisational personnel training program to ensure compliance with relevant legislation and regulations 5.2 Maintain records of environmental protection training

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG505A Establish and maintain an irrigation-related environmental protection program.

Assessment Requirements for AHCIRG505 Establish and maintain an irrigation-related environmental protection program

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply and comply with environmental requirements
- audit data bases
- develop and implement relevant work health and safety and environmental procedures
- develop policies and procedures
- identify adverse environmental impacts of irrigation activities and take appropriate remedial action
- use technology to draft documents, develop environmental information and audit data bases

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental impacts of irrigation, using water from any ground or underground source
- environmental planning for irrigation and drainage
- external factors that may affect the system
- relevant work health and safety and environmental protection legislation, codes of practice and enterprise procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLPW301 Supervise park visitor activities

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to give information and advice, and supervise public access and activities within a park or reserve.

All work is done in accordance with enterprise procedures, legislative and public health and safety requirements.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Provide information on opening and closing	1.1 Operate security systems 1.2 Inform public of opening and closing times

Element	Performance criteria
times	
2. Advise public on park or reserve access and activities	2.1 Communicate with public in a courteous, confident and effective manner 2.2 Inform public of responsibilities and safety requirements when using park facilities 2.3 Check park access and facilities are suitable for access 2.4 Inform public of changes to access to park facilities when these have been affected by severe weather or other event
3. Monitor visitor activities	3.1 Monitor visitor activities to ensure there is no risk of environmental degradation or destruction or to biosecurity 3.2 Monitor visitor activities to ensure the safety of staff and the general public 3.3 Act upon non-compliance with site access conditions 3.4 Report and respond to incidents

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW301A Supervise park visitor activities.

Links

Assessment Requirements for AHCLPW301 Supervise park visitor activities

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- advise public on park or reserve access and activities
- provide information on safety requirements
- monitor visitor activities to ensure compliance with park or reserve conditions of entry, safety and environmental requirements
- act on non-compliance activities promptly
- report incidents according to organisation procedures and legislative requirements
- use standard industry terminology
- follow work health and safety policies and procedures and monitor visitor activities to ensure safety of general public

Knowledge Evidence

The candidate must demonstrate knowledge of:

- limits to personal and legal authority to act on non-compliance with site access conditions
- enterprise procedures, work health and safety and legislative requirements
- enterprise security systems and communication equipment
- conditions for visitors entering park

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLPW303 Construct access tracks

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to construct access tracks and clear vegetation on rural land.

This unit applies to workers in land management who are required to implement erosion control principles and apply specialised earthmoving techniques to fine tolerances. Work is often carried out in varied conditions and landscapes that require operators to develop skills that are unique to this sector.

All work is undertaken in accordance with relevant national, State, and local legislation and/or regulations.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

Licenses for vehicles and machinery may be required for this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for construction of access track	1.1 Confirm construction details and work sequence 1.2 Confirm compliance with relevant regulatory planning and environmental legislation 1.3 Confirm equipment is ready for work 1.4 Match equipment and attachments to tasks and terrain 1.5 Locate survey pegs and site indicators on work site 1.6 Follow organisational work health and safety procedures 1.7 Adhere to site environmental concerns 1.8 Apply principles of erosion and sediment control to the construction of track 1.9 Determine control points, required grades and water crossing points and structures from field observations and any available additional information 1.10 Obtain permits or licences required for the construction 1.11 Schedule and coordinate people, materials and equipment
2. Construct access track	2.1 Use earthworks methods and patterns for specific machines during construction according to job requirements 2.2 Monitor and maintain optimum machine loads to suit prevailing conditions 2.3 Use safe machine operating techniques and procedures to match terrain, site conditions and other operators 2.4 Complete excavation, transport, dumping and compaction of material in line with job sequence and endorsed industry practices 2.5 Clear vegetation according to industry best practice 2.6 Liaise with neighbouring landholders, local authorities and interest groups during the construction activity 2.7 Complete documentation required by organisation 2.8 Communicate with staff, clients and contractors during construction 2.9 Ensure work methods meet environmental sustainability, biosecurity and work health and safety requirements
3. Apply final finish to track	3.1 Use endorsed industry methods to surface track to achieve job specifications 3.2 Retain site features and vegetation in line with work plan 3.3 Clear site and remove debris in line with contract requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW303A Construct access tracks.

Assessment Requirements for AHCLPW303 Construct access tracks

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select and prepare equipment
- determine control points, required grades and water crossing points and structures from field observations
- confirm that plans comply with legislative requirements by checking with a supervisor or authorised person
- construct tracks to organisational standards
- excavate, transport, dump and compact road material according to job sequence and endorsed industry practices
- finish track surface
- clean worksite to organisational standards
- operate machinery according to manufacturer and safe operating procedures
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- erosion and sediment control standards, principles and issues that apply to the construction of the access track, including:
 - soils and soil formation
 - earthmoving principles
 - total catchment issues
 - how to manage peak water flows

- subsurface and surface drainage principles and systems
- key concepts of the relevant wildlife, environmental, planning, ground water legislation
- biosecurity in the context of own work
- permits and licenses required for the construction of access tracks

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLPW304 Carry out inspection of designated area

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out an inspection of a designated area.

All work is undertaken in accordance with statutory and local authority requirements.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

Vehicle licenses apply to this unit. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Define area and target of inspection	1.1 Confirm location and size of area to be inspected 1.2 Identify features of natural environment in target area 1.3 Set frequency of inspection according to management strategy

Element	Performance criteria
	1.4 Determine targets of inspection from management strategy 1.5 Confirm characteristics and favoured conditions for targets with management
2. Carry out risk assessment and minimisation	2.1 Check time and duration of inspection and notify relevant personnel 2.2 Identify risks to the environment associated with the inspection 2.3 Take precautions to minimise environmental risks associated with the inspection 2.4 Identify safety hazards associated with the inspection 2.5 Follow work health and safety policies and procedures to minimise safety risks
3. Prepare for inspection	3.1 Identify vehicles, equipment and materials required for the inspection 3.2 Check vehicles, equipment and materials for serviceability
4. Carry out inspection	4.1 Operate vehicles and equipment 4.2 Carry out inspection within the specified area 4.3 Identify and record target occurrence as required by the management strategy 4.4 Follow statutory requirements and enterprise protocols regarding entering private property 4.5 Follow regulatory requirements and enterprise procedures for dealing with landholders or their employees 4.6 Implement precautions to minimise risks to the environment and self 4.7 Note and report incursions of non-targeted threats
5. Establish the impact of the specified target	5.1 Collect information on potential impacts from stakeholders 5.2 Collect and analyse data on environmental hazards resulting from target presence
6. Prepare a report	6.1 Document collated data, inspection records and analysis of findings with appropriate recommendations 6.2 Report targets as required by legislation or regulation 6.3 Submit report to supervisor or other authority 6.4 Ensure samples submitted comply with legislative requirements or regulations 6.5 Clean and store equipment and materials according to industry standards

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW304A Carry out inspection of designated area.

Assessment Requirements for AHCLPW304 Carry out inspection of designated area

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- define the scope and criteria on which to base inspection
- define the hazards and risks to work health and safety and the environment associated with the inspection
- conduct inspections, complying with statutory requirements and enterprise protocols for entry to private property
- conduct inspections in a manner that minimises environmental impacts
- operate equipment and vehicles according to organisation procedures
- establish environmental impacts caused by the presence of the target
- document the inspection findings and recommend follow up actions
- apply work health and safety practices in the context of own work
- take precautions to minimise environmental risks during inspection

Knowledge Evidence

The candidate must demonstrate knowledge of:

- risk management processes
- characteristics of inspection targets
- inspection procedures and techniques
- monitoring techniques
- reporting protocols
- relevant legislative and regulatory requirements including environmental protection legislation

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLPW305 Perform diving for scientific purposes

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to dive to support scientific research, monitoring and inspection roles associated with places or areas of significance.

All work is undertaken to legislative, manufacturer, enterprise and code of practice requirements.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

This unit requires compliance with the current Australian Standard for Occupational Diving Operations: Scientific Diving.

Dive certificates and licensing apply for this unit and specific determination should be sought from the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Plan diving operations	1.1 Determine dive objectives 1.2 Assess number and type of dives to develop a dive program that will meet objectives 1.3 Determine equipment and personnel required for dive operations 1.4 Consult appropriate people about the dive objectives and proposed program
2. Prepare for diving operations	2.1 Obtain equipment and personnel required for dive operations 2.2 Obtain appropriate notification and consents for dive plans 2.3 Check equipment condition 2.4 Send faulty equipment for repair or replacement 2.5 Assess requirements for and source consumables 2.6 Check personnel for competence and possession of a current medical clearance 2.7 Develop safety and emergency procedures for the dive program 2.8 Conduct a safety hazard analysis and risk assessment
3. Conduct dive	3.1 Establish communications procedures for all dives 3.2 Perform pre-dive checks 3.3 Complete assessment of environmental factors before entering the water 3.4 Conduct dives within the parameters of the special dive plan, including entry, descent, working on dive objective and exit 3.5 Amend dive procedures within enterprise requirements, codes of practice and personal authority in light of dive conditions, and any changes to dive objectives 3.6 Monitor dive conditions and suspend or cancel dives where safety or equipment operation considerations warrant 3.7 Suspend dives where personnel have completed allowed number of dives according to no-decompression limit tables 3.8 Remove equipment from site at completion of dives 3.9 Log dives Carry out dives according to Australian Standard
4. Debrief diving team	4.1 Review procedures and outcomes after dive 4.2 Amend procedures and dive plans 4.3 Record dive debriefing
5. Check and store equipment	5.1 Check dive equipment for condition and operation 5.2 Send faulty equipment for repair or replacement 5.3 Test and store equipment

Element	Performance criteria
	5.4 Record equipment use
6. Review diving program	6.1 Review dive plan in light of debriefing, outcomes achieved, risk assessments and safety analysis and future requirements 6.2 Record and report review conclusions
7. Respond to diving incidents	7.1 Monitor dive operations to identify potential or actual incidents 7.2 Suspend or cancel dive operations where potential or actual maladies have been identified 7.3 Ensure a rescue plan has been developed for all dives and that the plan has been communicated to the dive team as part of the pre-dive briefing 7.4 Apply diver first aid to injured or distressed personnel 7.5 Notify emergency authorities where assistance is required 7.6 Review procedures and dive plan in light of risks identified and potential or actual malady 7.7 Record all incidents on the enterprise register

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW305A Perform diving for scientific purposes.

Assessment Requirements for AHCLPW305 Perform diving for scientific purposes

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan to carry out a dive
- prepare to dive
- carry out pre-dive checks and safety risk assessments
- monitor dive conditions, respond to incidents and amend dive procedures if necessary
- debrief dive team
- store diving equipment
- dive safely and according to organisational policies and procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- interpretation of no-decompression limit tables to determine maximum length and number of dives allowed
- the physics of diving
- dive equipment
- safety risks associated with scientific dives
- dive planning
- Australian Standards for occupational diving
- rescue procedures
- oxygen administration procedures
- agency standing orders for notification
- emergency service procedures
- dive communication procedures and equipment

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLPW306 Undertake sampling and testing of water

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and carry out sampling and testing of water quality as part of a monitoring program.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for sampling and testing field work	1.1 Confirm monitoring schedule 1.2 Identify water quality and environmental parameters 1.3 Identify samples to be collected 1.4 Determine and arrange equipment requirements for water sampling and testing 1.5 Assess range of likely operating conditions, hazards and difficult

Element	Performance criteria
	or sensitive environments for impact on sampling and testing
2. Prepare equipment and resources	2.1 Obtain equipment required for sampling and testing 2.2 Check and calibrate equipment for availability and serviceability 2.3 Verify correct and accurate performance of equipment 2.4 Repair and maintain field-based equipment and instruments 2.5 Collect data or record sheets for use 2.6 Install and protect equipment 2.7 Brief staff undertaking sampling and testing on responsibilities
3. Carry out sampling and testing of water	3.1 Undertake tests in accordance with monitoring plan 3.2 Take and test samples in accordance with monitoring standards 3.3 Prepare, package and send samples to laboratory for external analysis 3.4 Make specific and general observations including information on relevant ambient and antecedent environmental conditions 3.5 Inform appropriate person of obvious water quality or environmental issues immediately
4. Complete water sampling and testing activities	4.1 Clean, repair and store equipment and clothing 4.2 Repair damaged or malfunctioning equipment on site or send to manufacturer or specialist 4.3 Record test results and observations on data sheets 4.4 Report changes in field conditions and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW306A Undertake sampling and testing of water.

Assessment Requirements for AHCLPW306 Undertake sampling and testing of water

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan a water sampling program under direction according to regulatory and organisation requirements
- test and calibrate equipment according to regulatory and organisation requirements
- sample and test water according to regulatory and organisation requirements
- record results on data sheets
- record and report water testing results to organisational standards
- report obvious water quality issues observed during sampling to supervisor or manager immediately
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water monitoring schedules and guidelines
- standards for water quality
- sampling and testing methods

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLPW401 Process applications for changes in land use

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to process applications from landowners to make changes in land use.

This unit applies to those whose job role includes assessing the impact of changes in land use, and processing applications.

These individuals have limited responsibility for others and apply judgement in known and sometimes changing contexts.

All work is carried out according to agency guidelines and best practice procedures and based on program guidelines.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks And Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Establish client requirements	1.1 Discuss and confirm the proposed changes with the landholder 1.2 Review the catchment characteristics in view of the proposed land use 1.3 Explain current impacting legislation and policies to the landholder 1.4 Discuss possible strategies with the landholder and confirm the best option
2. Determine scope of the request	2.1 Determine profile of site from survey and aerial photographs 2.2 Undertake initial inspection checks against legislative or agency procedures 2.3 Check native vegetation types against maps and local guidelines 2.4 Check threats to local species against local resources 2.5 Check catchment characteristics of the land 2.6 Determine the impact on soil and water of proposed land use and industry principles 2.7 Note cultural heritage issues according to agency guidelines 2.8 Consider the application against eligibility criteria, and relevant policies and legislation
3. Present finding	3.1 Provide applicant with technical data following program guidelines 3.2 Report findings relating to the formal application 3.3 Inform applicant of specific requirements relating to submitting a formal application 3.4 Communicate and confirm assessment process 3.5 Communicate potential risks associated with proceeding with the application

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW401A Process applications for changes in land use.

Assessment Requirements for AHCLPW401 Process applications for changes in land use

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establish client intentions and requirements
- communicate the process, policies and relevant legislation to the applicant
- discuss the scope and application of the submission in light of preliminary discussion
- present findings and feedback to the applicant
- provide further information and explain the appeal process if application is rejected
- explain provisions within Federal and State legislation or relevant land use to landholder
- interpret aerial photographs, maps and geographical information systems to identify particular landmarks and areas
- undertake investigations to determine scope and impact of request

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevance and impact of Federal and State legislation and regulations related to land use
- catchment characteristics of land in question
- vegetation types native to area
- signs and landmarks in aerial photographs, maps and geographic information system (GIS)
- agency policies and procedures
- formats for presenting information to clients
- process for applying for changes in land use and process for appeals if application is rejected

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLPW402 Implement land and sea management practices

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement sustainable land and sea management practices.

This unit applies to those whose job role includes implementing sustainable Indigenous and non-Indigenous land and sea management practices required for a given area according to land and sea management plans and strategies, Community guidelines and cultural protocols.

This unit applies to individuals who have limited responsibility for others and apply judgement in known or changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine appropriate Indigenous land and	1.1 Observe cultural protocols in discussing and evaluating

Element	Performance criteria
sea management practices	Indigenous land and sea management practices 1.2 Review land and sea management plans and priorities 1.3 Assess the most appropriate Indigenous practices for a specified area 1.4 Make comparisons with non-Indigenous land and sea management practices 1.5 Define and quantify technology, materials and resources for Indigenous management practices for a specific area or practice 1.6 Identify appropriate persons to provide advice and information on Indigenous land and sea management practices 1.7 Determine cultural protocols and customs in relation to disclosure of information on Indigenous land and sea management practices
2. Determine appropriate non-Indigenous land and sea management practices	2.1 Identify legislative, enterprise and best practice parameters governing non-Indigenous land and sea management practices 2.2 Review land and sea management plans and priorities 2.3 Determine the most appropriate non-Indigenous practices for a specified area 2.4 Make comparisons with Indigenous land and sea management practices 2.5 Define technology, materials and resources for non-Indigenous land and sea management practices 2.6 Identify and access relevant information sources on non-Indigenous land and sea management practices
3. Develop approach to implementation of land and sea management practices	3.1 Develop options based on comparison of Indigenous and non-Indigenous land and sea management practices 3.2 Consult appropriate persons about available options 3.3 Prepare staging strategy for preferred option with realistic costs 3.4 Consult and involve owners and stakeholders of specific area in setting priorities for management work and practices
4. Undertake land and sea management practice	4.1 Undertake land and sea management practices in compliance with agreed approach 4.2 Undertake work according to enterprise guidelines, industry best practice and community expectations and work health and safety policies and procedures 4.3 Respect cultural customs and protocols throughout performance of work 4.4 Ensure practices are carried out by appropriately authorised persons

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW402A Implement land and sea management practices.

Assessment Requirements for AHCLPW402 Implement land and sea management practices

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- consult with authorised Community members to determine appropriate Indigenous land and sea management practices using accepted protocols
- determine appropriate non-Indigenous land and sea management practices
- develop and discuss preferred options to implement land and sea management practices with Indigenous groups and other stakeholders
- undertake land and sea management practices in compliance with agreed approach and cultural customs and protocols
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- cultural protocols of local Aboriginal Communities that relate to land and sea management activities
- Indigenous land and sea management practices
- non-Indigenous land and sea management practices
- technology used for environmental management
- implementation strategies for land and sea management
- work health and safety, environmental legislation and codes of practice

Assessment Conditions

Assessor must satisfy current standards for RTOs.

AHCLPW403 Inspect and monitor cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to inspect and monitor cultural places.

This unit applies to those whose job role includes inspecting and monitoring the fabric and setting of heritage or culturally significant places to identify non-conformities with conservation and management plans. A high level of cultural awareness and the need to observe cultural protocols are important in parts of the process.

This unit applies to individuals who undertake a range of routine and non-routine activities in known and changing contexts and provide solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for inspection	1.1 Determine significance of place from conservation and management plans 1.2 Determine specific facilities and equipment required for inspection according to operational request 1.3 Obtain appropriate checklists relating to condition of cultural place and surrounds to suit the application
2. Carry out comprehensive inspection	2.1 Follow work health and safety policies and procedures for carrying out inspections 2.2 Inspect condition of cultural place for deterioration and damage 2.3 Record non-conformity with conservation and management plans 2.4 Evaluate deterioration and damage to the cultural place to determine the short and long-term impact on the significance 2.5 Determine threats to place 2.6 Check records for accuracy 2.7 Determine and schedule maintenance works for the cultural place 2.8 Identify and detail potential safety risks and hazards
3. Submit report and recommendations	3.1 Address situations requiring urgent action in accordance with conservation management plan 3.2 Provide draft reports to stakeholders 3.3 Prepare and submit report to management 3.4 Review frequency and scope of inspection requirements in management systems 3.5 Ensure recommendations for future action are consistent with conservation management plan and industry best practice and comply with legislative requirements and international environmental standards, guidelines and charters 3.6 Submit collected data and information for inclusion on information management system
4. Monitor surroundings	4.1 Monitor condition of surrounds and setting of the place or area for deterioration, damage and biological or geophysical changes and potential biosecurity risks 4.2 Evaluate deterioration and damage to determine short and long-term impact on the significance of the place 4.3 Plan restoration or modification of biological aspects of the setting including Indigenous and exotic species 4.4 Plan required restoration or modification of geophysical aspects of the setting and surrounds 4.5 Integrate maintenance, restoration and modification of place, setting and surrounds
5. Monitor stakeholder	5.1 Consult stakeholders to determine their views on the significance

Element	Performance criteria
views on significance	<p>and maintenance of the place and area</p> <p>5.2 Consult visitors to obtain their views on the place and area</p> <p>5.3 Assess changes in views for impact on cultural significance, approach to maintenance, restoration and modification, and current and proposed uses of the place or area</p> <p>5.4 Report assessment of changed views to enterprise and Burra Charter processes or Indigenous places guidelines</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW403A Inspect and monitor cultural places.

Assessment Requirements for AHCLPW403 Inspect and monitor cultural places

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establish the cultural value and significance of the place
- prepare or source checklists for inspection
- inspect the place to establish a schedule of maintenance and monitor site management
- prepare reports to enterprise standards
- submit report and recommendations based on requirements of contract including a review of existing management systems
- monitor surroundings to establish restoration, reclamation, modification and protection required in the immediate area
- conduct safety hazard analysis and risk assessments according to organisational policies and procedures
- monitor stakeholder views for impact on cultural significance, approach to maintenance, restoration and modification, and current and proposed uses of the place or area
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant aspects of Australian Heritage Commission legislation and requirements, State or Territory Heritage requirements and World Heritage requirements
- relevant environmental standards and best practice guidelines
- application of national and International Charters of the International Council on Monuments and Sites (ICOMOS), including the Burra Charter to monitoring of cultural places
- environmental legislation and codes of practice

- processes of environmental and artefact deterioration and damage
- maintenance, restoration and modifications that could be applied to place or area
- threats to place or area, including visitor impacts

Assessment Conditions

Assessment must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCLPW404 Produce maps for land management purposes

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to access geographical information and incorporate it onto maps for use in land management.

This unit applies to those whose job role includes preparing maps by hand or by using geographical information systems (GIS) for land management purposes.

This unit applies to individuals who have limited responsibilities for others in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain information for a specific land	1.1 Define information required from data sets 1.2 Collect and present information from stakeholders on land

Element	Performance criteria
management purpose	<p>management and production systems consistent with the local area management strategy</p> <p>1.3 Collect information to include temporal and spatial data</p> <p>1.4 Review information for relevance and accuracy</p>
2. Assess data availability	<p>2.1 Ascertain availability of required data sets from internal and external sources</p> <p>2.2 Confirm ownership of data and determine access and pricing</p> <p>2.3 Obtain data in accordance with industry standards, statutory requirements and enterprise policy</p> <p>2.4 Develop procedures to capture data</p>
3. Assess data quality	<p>3.1 Assess data for integrity and to determine suitability for task</p> <p>3.2 Investigate and resolve disparities between data sets</p>
4. Format and present data	<p>4.1 Identify compatible formats for data</p> <p>4.2 Assemble relevant data elements</p> <p>4.3 Select data formats to meet user's requirements</p> <p>4.4 Present information using suitable media</p> <p>4.5 Present information in accordance with appropriate enterprise requirements and Australian standards</p>
5. Incorporate data onto maps	<p>5.1 Use range of computer applications to transfer information from various data sources onto maps</p> <p>5.2 Produce draft maps showing spatial and temporal data consistent with development and implementation of the land management strategy</p> <p>5.3 Review and edit maps to confirm accuracy and develop a map key to identify natural resource features, structures and land uses</p> <p>5.4 Analyse maps for data to assist in development or implementation of land management plan</p>
6. Review customer satisfaction	<p>6.1 Seek feedback from users regarding satisfaction with information and presentation</p> <p>6.2 Resolve any areas of dissatisfaction</p> <p>6.3 Analyse and use customer feedback as a quality improvement tool</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLPW404 Produce maps for land management purposes

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- source data sets that provide the required information
- validate the data for currency and compare to ground observations
- present data to workplace requirements
- incorporate data onto a map
- use drafting and editing processes to ensure accuracy of data and maps and to ensure reports and maps meet organisational standards
- provide a map key and any supporting information required
- evaluate maps for suitability for purpose and value in making land management decisions

Knowledge Evidence

The candidate must demonstrate knowledge of:

- land management processes relevant to map being prepared
- mapping principles and conventions including layout, legends, scale, media, printing and presentation styles
- use of software and hardware such as GIS, computer-aided design (CAD), desktop publishing, desktop mapping, multimedia, graphic animation, plotters and printers

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLPW405 Monitor biodiversity

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor biodiversity in a given area, and record and analyse findings.

This unit applies to natural area managers and those seeking information on natural systems or areas. These individuals take limited responsibility in known or changing contexts within established guidelines.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select monitoring techniques	1.1 Select monitoring operations to obtain required data described in monitoring plan 1.2 Assess range of likely operating conditions, hazards and difficult or sensitive environments for impact on monitoring

Element	Performance criteria
	1.3 Consider alternative land, sea and air operations to collect data 1.4 Trial operations to test monitoring scheme for reliability, timeline and safety
2. Prepare equipment and resources	2.1 Obtain appropriate certificates, licenses and authorisations 2.2 Source equipment required for monitoring 2.3 Transport equipment and personnel to monitoring sites 2.4 Install and protect equipment from weather conditions 2.5 Test equipment and monitoring procedures in field conditions 2.6 Ensure equipment does not have lasting detrimental impacts on the environment 2.7 Develop systems to capture, maintain and analyse data
3. Monitor biodiversity	3.1 Make observations according to monitoring plan 3.2 Record data to monitoring plan and database requirements 3.3 Record location and times of observations
4. Analyse data	4.1 Determine presence of ecosystems and flora, fauna and microorganism populations within specified area 4.2 Identify threats to specified area 4.3 Examine records of monitored data for consistency and accuracy within requirements of the monitoring plan 4.4 Determine whether the observations and measurements are addressing factors and issues consistent with the monitoring plan 4.5 Adjust monitoring techniques to overcome any deficiency or report need for adjustment to monitoring plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW405A Monitor biodiversity.

Assessment Requirements for AHCLPW405 Monitor biodiversity

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use monitoring techniques suitable for the environment and species
- install and use monitoring equipment
- develop systems to capture, maintain and analyse data
- make observations and record data on species diversity and abundance
- analyse data
- ensure the monitoring process is correctly targeted and implemented

Knowledge Evidence

The candidate must demonstrate knowledge of:

- ecosystems
- plant and animal classification
- monitoring systems for flora, fauna and microorganism populations
- accepted scientific processes for monitoring biodiversity
- set up and use of monitoring equipment
- data recording and analysis techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCLPW501 Develop a management plan for a designated area

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a management plan for a designated area.

This unit applies to land managers who are responsible for the development of management strategies and the documentation of management plans with a defined emphasis on flora or fauna and covering the range of biodiversity present in a designated area.

These individuals apply judgement and have defined responsibilities in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Define the need for a	1.1 Identify management plan objectives for the designated area

Element	Performance criteria
management plan	1.2 Consult with client to achieve agreement on brief 1.3 Identify planning team, including specialists and consultants
2. Undertake preliminary planning activities	2.1 Identify major stakeholders 2.2 Ascertain availability of specialists to assist in management planning work and prepare contracts 2.3 Establish timelines for development of the management plan and reporting arrangements to client 2.4 Identify resources required for the development of management strategies
3. Prepare a site description	3.1 Identify and map landscape values of the area 3.2 Identify and map physical features and characteristics of the area 3.3 Research land uses and determine and record their effects on the designated area 3.4 Assess and document physical condition of site including civil design concepts, where relevant 3.5 Document biological characteristics of the site including the existence of native and pest fauna and flora populations, habitat requirements for fauna, seasonal and nutritional influences on lifecycles
4. Analyse site information and description	4.1 Evaluate information in terms of core principles and objectives 4.2 Produce site plans, technical reports and maps 4.3 Determine priorities and key conservation issues 4.4 Prepare longitudinal projections of continuing impacts 4.5 Assess land capability 4.6 Identify and document opportunities and constraints to meeting planning objectives and goals 4.7 Present to stakeholders and incorporate feedback into planning documentation
5. Identify management strategies	5.1 Identify management strategies that address defined objectives 5.2 Design management strategies to alleviate existing impacts, pests, and diseases or to target management actions 5.3 Cost and compare management strategies to existing budgets and available resources 5.4 Plan staging of work to prioritise outcomes and management resource allocation 5.5 Consult with stakeholders and incorporate feedback into planning documentation
6. Prepare the management plan	6.1 Document site information and management strategies into a draft management plan for consultation

Element	Performance criteria
	6.2 Consult with stakeholders and clients 6.3 Make changes to the draft plan and prepare and present a final plan to client

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW501A Develop a management plan for a designated area.

Assessment Requirements for AHCLPW501 Develop a management plan for a designated area

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- discuss management plan objectives, deliverables and timeline with client
- prepare a site plan detailing landscape values, physical features and characteristics, past and present land uses, physical condition and biological characteristics
- assess land capability and identify conservation issues on and surrounding the site
- analyse site information and description to assess feasibility of management objectives
- develop and cost recommended actions in line with client requirements
- present a draft management plan to client for discussion
- consult with stakeholders and incorporate feedback into the final management plan
- prepare documentation to enterprise standards and to meet client needs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- civil design concepts
- management planning principles and issues
- environmental assessment, survey and analysis techniques and practical application to a range of habitats and landscapes
- native fauna or flora physiology, habitat requirements, and seasonal and nutritional influences on life cycle
- wildlife habitats associated with the designated area and local geographic region
- pest plant and animal and disease identification, physiology, control techniques, and equipment, pesticides and habitat requirements
- land management strategies including:
- pest management or control techniques

- techniques and strategies for use in the management, rehabilitation and enterprise use of native Australian habitats, species and landscapes
- Indigenous flora regeneration and revegetation techniques, equipment and methods of application in relation to a range of landscape characteristics
- management and rehabilitation techniques for the wildlife and habitat relevant to the designated area
- soil, plant and water testing processes and procedures, interpretation and application of results

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLPW503 Assess applications for legislative compliance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assess legislative compliance of formal applications for changes in land use, and make recommendations.

All work follows legislative requirements and is completed in line with program guidelines and procedures according to enterprise guidelines and industry best practice.

This unit applies to individuals who apply judgement in assessing applications for legislative compliance and have defined responsibilities in known or changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for assessment	1.1 Review and confirm existing data concerning suitability of application for changes in land use

Element	Performance criteria
	1.2 Communicate intention to process formal application 1.3 Complete title search 1.4 Communicate issues about collection of evidence aligning with technical guidelines 1.5 Establish timing of inspection and data collection with client
2. Collect site evidence	2.1 Check accuracy of site details using site maps, aerial photographs and geographic information systems 2.2 Collect relevant data 2.3 Check threats to species diversity 2.4 Assess soil and water impact consistent with proposed land use 2.5 Investigate and record cultural heritage issues
3. Compile final report	3.1 Check detail and accuracy of site data against assessment criteria 3.2 Report recommendations in accordance with legislative and agency requirements 3.3 Present final report and supporting documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW503A Assess applications for legislative compliance.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLPW503 Assess applications for legislative compliance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review existing data on land use changes according to program guidelines
- undertake title searches
- schedule physical inspection with land holder
- collect evidence from the site on potential impacts on species diversity and soil and water quality according to legislative requirements and enterprise procedures
- record any evidence of issues with cultural values of the site
- interpret aerial photographs, maps and geographic information systems
- compile reports to agency standards and make recommendations supported by evidence

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant Federal and State legislation and regulations that apply to vegetation clearance and land use
- agency policies and procedures
- formats for reporting
- assessment approaches for area of notification

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLPW505 Implement natural and cultural resource management plans

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement natural and cultural resource management plans.

This unit applies to individuals whose job role includes implementing natural and cultural resource management plans, and demonstrate judgement and defined responsibilities in known or changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine priorities within the conservation or resource	1.1 Identify priorities in plan that conserve places of high significance, address threats to significance, manage risks, and generate revenue from the resources

Element	Performance criteria
management plan	1.2 Express priorities in the plan in terms of new or continuing investigations into natural or cultural significance, new procedures, and new or continuing development or maintenance projects 1.3 Develop procedures to address conservation priorities within the context of legislation, park or reserve procedures and Codes of Practice
2. Develop projects to priorities	2.1 Determine development and maintenance projects according to Burra Charter and Australian National Heritage Charter guidelines 2.2 Identify outcomes and key project steps 2.3 Identify project steps and funding requirements
3. Obtain and manage funds	3.1 Develop budget and estimate funds to develop operations and projects 3.2 Make applications for funds 3.3 Manage budget
4. Brief staff on plan, priorities and project	4.1 Brief staff on the plan objectives, priorities and planned actions 4.2 Train staff in new procedures developed to address plan objectives, including work health and safety, sustainability and biosecurity policies and procedures 4.3 Develop project implementation details

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW505A Implement natural and cultural resource management plans.

Links

Assessment Requirements for AHCLPW505 Implement natural and cultural resource management plans

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine priorities based on areas of high significance, the level of risk to sensitive areas, and the potential for revenue generation
- identify projects from the agreed priorities
- develop budgets for projects and apply for funding
- brief and train staff to carry out tasks and projects safely and in accordance with organisation policies, procedures and the management plan
- apply work health and safety policies and procedures to plans and strategies
- apply biosecurity measures to plans and strategies
- apply appropriate sustainability practices to plans and strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- park or reserve management approaches
- human resource and financial management
- works and project management practices
- policies applying across all levels of government and within the specific region, including those under catchment plans
- Australian Natural Heritage Charter and the Burra Charter and the interpretation of the charters
- good planning practice and enterprise planning procedures and timelines

Assessment Conditions

Any assessment undertaken on Aboriginal Country must comply with Community protocols and guidelines and be supported by Elders and Custodians of Country.

Assessors must satisfy current standards for RTOs.

AHCLPW601 Coordinate the preparation of a regional resource management plan

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to engage stakeholders and coordinate the development of regional natural resource management plans. This unit applies to individuals who coordinate the preparation of a regional resource management plan at a strategic level with the capacity to devolve responsibilities and tasks to specialist planners and others.

All work is undertaken according to legislative, program, enterprise and contract requirements.

This unit applies to individuals who demonstrate judgement and defined responsibility in known and changing contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Lands, Parks and Wildlife (LPW)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Review existing information	1.1 Review scoping or prior resource management plans to determine starting point for planning process 1.2 Identify sources of additional information for use 1.3 Examine natural resource management issues previously identified to determine current and future impacts 1.4 Identify scope and potential solutions from documentation for use in planning process
2. Form groups to support process	2.1 Approach key stakeholder groups to obtain views on consultative structures and processes 2.2 Form groups to obtain stakeholder views and assistance on plan development 2.3 Develop structure of groups that allow diversity and promote involvement, ownership and co-operation
3. Plan consultations	3.1 Ensure all stakeholders have the opportunity to comment 3.2 Record formal consultations for reporting 3.3 Organise consultations to include Indigenous cultural heritage
4. Coordinate the collection of data	4.1 Coordinate data collection and surveys 4.2 Develop rules and relationships between various data sets where required for loading into a database 4.3 Engage process data specialists for reporting to planning process 4.4 Record data in a database for further processing and reporting 4.5 Manage data collection and recording within budgetary constraints
5. Coordinate the development of goals and strategies	5.1 Use technical advisory groups to coordinate the development of goals and strategies 5.2 Obtain technical advice on issues at regional and local levels for integration into goals and strategies 5.3 Provide advice to groups to assist in the development of goals and strategies 5.4 Facilitate groups to provide suggestion for goals and strategies and their formulation at a regional level 5.5 Review original scope and basis for planning process at major developmental stages
6. Coordinate the preparation of a draft plan	6.1 Coordinate preparation of draft plan using technical and stakeholder input 6.2 Coordinate personnel to structure the draft plan 6.3 Ensure draft plan includes goals, strategies and outcomes that reflect consultation and technical advice

Element	Performance criteria
	6.4 Review plan against legislative requirements and government and regional policies and processes 6.5 Submit draft plan for editing, review and approval processes before public comment
7. Coordinate the revision of the plan to reflect consultations	7.1 Revise draft plan to reflect consultation comments 7.2 Use technical advice to develop responses to comments 7.3 Submit revised plan for editing, review and approval processes before final approval 7.4 Submit revised plan to regional planning groups before final approval
8. Submit plan for approval	8.1 Submit final plan for approval and publication 8.2 Evaluate planning process and outcomes to identify potential future improvements in process and outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW601A Coordinate the preparation of a regional resource management plan.

Assessment Requirements for AHCLPW601 Coordinate the preparation of a regional resource management plan

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- review existing planning documents and sources of information to inform the plan
- identify land management issues and potential solutions
- identify stakeholders to form discussion groups and seek individual input to planning
- organise for the collection and analysis of data to inform planning and monitor progress
- work with stakeholders and technical advisers to develop goals and performance criteria
- develop a draft plan for widespread consultation and feedback
- finalise the regional resource management plan
- complete all documentation to enterprise standards

Knowledge Evidence

The candidate must demonstrate knowledge of:

- regional and rural planning concepts from town planning, rural industry planning, and natural resource planning perspectives
- impact of government processes and industry activities in social and economic terms
- consultative techniques that take into consideration cross cultural and cultural factors relevant to social structures
- local government operations that affect the regional resource management plan
- natural resource management and issues
- sources of technical advice

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC101 Support landscape work

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to provide support to others undertaking landscape works in public, commercial and domestic situations

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Unit Sector

Landscape [LSC]

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for landscaping work	1.1 Identify the required materials, tools and equipment according to lists provided or supervisor's instructions 1.2 Conduct checks on materials, tools and equipment with insufficient or faulty items reported to the supervisor 1.3 demonstrate correct manual handling techniques when loading and unloading materials 1.4 Select and check suitable personal protective equipment (PPE) 1.5 Provide landscaping support according to workplace health and safety requirements and workplace information 1.6 Identify and report workplace hazards to the supervisor

Element	Performance criteria
2. Undertake landscape work as directed	2.1 Follow instructions and directions provided by supervisor and seek clarification when necessary 2.2 Undertake landscape work in a safe and environmentally appropriate manner 2.3 Carry out interactions with other staff and customers in a positive manner 2.4 Follow enterprise policy and procedures in relation to workplace practices, handling and disposal of materials 2.5 Report problems or difficulties in completing work to required standards or timelines to supervisor
3. Handle materials and equipment	3.1 Store waste material and debris produced during landscape work in a designated area according to supervisor's instructions 3.2 Handle and transport materials, equipment and machinery according to supervisor's instructions and enterprise guidelines 3.3 Maintain a clean and safe work site while undertaking landscaping activities
4. Clean up on completion of landscaping work	4.1 Return materials to store or dispose of according to supervisor's instructions 4.2 Clean, maintain and store tools and equipment according to manufacturer's specifications and supervisor's instructions 4.3 Make good the site according to supervisor's instructions 4.4 Report work outcomes to the supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC101A Support landscape work.

AHCLSC202 Construct low-profile timber or modular retaining walls

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to construct low-profile timber or modular retaining walls in landscape settings.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare work	1.1 Read work instructions relating to constructing the retaining wall and confirm instructions with the supervisor 1.2 Prepare tools and equipment and use according to the supervisor's instructions 1.3 Identify and report to supervisor any manual handling and other work health and safety hazards

Element	Performance criteria
	1.4 Select, use and maintain personal protective equipment (PPE) and clothing 1.5 Check the quantity and quality of materials to make sure they conform to the requirements of the job plans 1.6 Locate and mark out services
2. Mark out site for retaining wall	2.1 Mark out the position of the retaining wall according to site plans 2.2 Determine the location and depth of excavations 2.3 Establish profiles to conform to the designated tolerances 2.4 Establish survey benchmarks
3. Prepare footings according to industry standards	3.1 Excavate foundations for the retaining wall to the required depth and dimensions as designated on the site plans 3.2 Remove soil and waste material and stockpile to ensure a safe working area 3.3 Locate reinforcing or steps in the excavated site and position accordingly 3.4 Position pegs to maintain levels of even depth and horizontal plane to the top of footings 3.5 Place, consolidate and finish footings to determined levels, to ensure coverage of reinforcement as necessary
4. Prepare and install retaining wall components	4.1 Prepare and lay out components for installation 4.2 Mark components to be cut to length and shape, and cut to the requirements of profiles already established 4.3 Install drainage media 4.4 Construct base layer of retaining wall to a point above the top of the drainage media and form weep holes where indicated 4.5 Back-fill and compact fill material behind base of retaining wall 4.6 Construct retaining wall components to required dimensions, profiles and levels as specified on the site plans 4.7 Set capping to top of retaining wall to specified levels with a tolerance appropriate to the style of capping
5. Clean up site and store tools and equipment	5.1 Dispose of or recycle soil and waste material from the site to minimise damage to the environment 5.2 Store and stack unused construction materials for future re-use 5.3 Clean and store all tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCLSC202 Construct low-profile timber or modular retaining walls

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting.

The candidate must provide evidence that they can

- read and interpret site and construction plans
- identify work health and safety hazards
- calculate materials required and mark out the area to be retained
- mark out the site and assemble materials
- construct footings and place reinforcing
- construct retaining walls as specified
- clear up the site and dispose of waste

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of low profile retaining walls
- construction approaches and methods
- construction materials for retaining walls
- safe lifting practices for large and heavy components
- methods of disposing soil and waste materials in order to minimise damage to the environment
- the environmental effects of altering water flow when installing retaining walls with or without drainage media
- the environmental impact of soil disturbance when excavating an area to be retained

Assessment Conditions

Assessors must satisfy current standards for RTOs.

1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install aggregate paths in landscape projects.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for installation	1.1 Confirm work instructions with the supervisor 1.2 Prepare tools and equipment for use 1.3 Check the quantity and quality of materials 1.4 Identify and report to supervisor manual handling issues and other

Element	Performance criteria
	work health and safety hazards 1.5 Select, use and maintain personal protective equipment (PPE) and clothing 1.6 Put in place measures to avoid environmental impacts before starting work
2. Set out the site for path construction	2.1 Mark out the location of the proposed path 2.2 Put public risk protection measures in place
3. Undertake ground preparation	3.1 Clear the area of debris and excavate to base level 3.2 Relocate or dispose of soil and waste materials 3.3 Place and compact base material to the required finished level 3.4 Install drainage structures 3.5 Install edge restraints, where required 3.6 Check set out work at regular intervals with supervisor, according to the site plan
4. Lay surface aggregate materials	4.1 Spread surface aggregate materials over the area to the designated depth 4.2 Screed material to ensure consistent depth of materials 4.3 Level aggregate materials to the designated level and falls 4.4 Compact aggregate materials using appropriate machinery
5. Make good the site	5.1 Dispose of or recycle soil and waste material from the site 5.2 Reinststate areas disturbed by installation works 5.3 Clean and store all tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC203A Install aggregate paths.

Assessment Requirements for AHCLSC203 Install aggregate paths

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare for installation and site safety
- read and interpret site plans
- undertake ground preparation for the path
- lay base material and surface aggregate materials
- set the path out
- reinstate site at completion of work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of aggregate path installation
- base and aggregate materials and their performance
- environmental impacts of soil disturbance when installing paths
- types of machinery used in path construction
- types of signs and barriers that need to be erected around the site
- tools and equipment used for installing paths

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC204 Lay paving

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to lay modular paving in landscape projects.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare for paving work	1.1 Confirm work instructions with the supervisor 1.2 Prepare tools and equipment 1.3 Select, use and maintain personal protective equipment (PPE) and clothing 1.4 Check the quantity and quality of materials to make sure they

Element	Performance criteria
	<p>conform to the requirements of the job plans</p> <p>1.5 Identify work health and safety hazards, assess risks and report to supervisor</p>
2. Set out and prepare paving area	<p>2.1 Mark out the area to be paved according to site plan</p> <p>2.2 Assist with pegging the reduced levels of the proposed paving area according to site plans and supervisor's instructions</p>
3. Undertake ground preparation	<p>3.1 Excavate the area to shape, depth and dimensions to sub-base level</p> <p>3.2 Trim the sub base to the designated level and falls to ensure that the final level of paving can be achieved</p> <p>3.3 Construct drainage systems as necessary according to site plan</p> <p>3.4 Place and compact base material to the required finished level</p>
4. Lay bedding material	<p>4.1 Establish screed rails to ensure the bedding course is maintained</p> <p>4.2 Spread bedding material loosely over the area to ensure the designated bedding depth can be attained</p> <p>4.3 Level bedding material to the designated level and falls</p>
5. Lay pavers to a given pattern	<p>5.1 Set grid string lines to required levels to ensure the designated pattern of the project is attained and to maintain straight lines of components</p> <p>5.2 Set out pavers to the required dimensions and pattern</p> <p>5.3 Lay whole pavers and compact to the established finish level</p> <p>5.4 Mark, cut and fit pavers to fill gaps in the pattern within nominated tolerances</p> <p>5.5 Install permanent edge constraints to prevent movement of pavers</p> <p>5.6 Spread sand on the paved area and compact to the finished level</p>
6. Clean site and store tools and equipment	<p>6.1 Sweep paving to produce a clean and flat surface free of debris</p> <p>6.2 Dispose of or recycle soil and waste material from the site to ensure minimal impact on the environment</p> <p>6.3 Clean and store all tools and equipment</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC204A Lay paving.

Assessment Requirements for AHCLSC204 Lay paving

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read, interpret and apply information from a site plan
- prepare the site for paving
- lay bedding material
- lay pavers to pattern
- clean up the site and dispose of waste

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of paving
 - methods of disposing of soil and waste materials
 - pavers
 - paving styles and methods
 - site layout and planning
 - the potential environmental impact of a paving project
 - the types of signs and barriers that need to be erected around an area to be paved

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC205 Install tree protection devices

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to protect trees during construction work by installing protective devices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to install	1.1 Read work instructions relating to the task and confirm with the supervisor 1.2 Prepare tools and equipment and use according to the supervisor's instructions

Element	Performance criteria
	1.3 Identify and report manual handling and other work health and safety hazards 1.4 Select, use and maintain personal protective equipment (PPE) and clothing 1.5 Identify trees to be protected, and method of protection to be used 1.6 Collect protection devices or materials to assemble devices and check against requirements as indicated in tree protection plan
2. Install protection devices	2.1 Assemble and install tree protection devices 2.2 Carry out work in a manner that minimises risk of damage to trees and the surrounding environment
3. Complete installation activities	3.1 Check protection devices for their effectiveness 3.2 Report damaged and ineffective devices to the supervisor 3.3 Maintain a clean and safe area throughout and on completion of work 3.4 Record workplace outcomes and report to the supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC205A Install tree protection devices.

Assessment Requirements for AHCLSC205 Install tree protection devices

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read and interpret site and tree protection plans
- select and operate tools and equipment for protecting trees, constructing and assembling tree protection devices and for traffic control
- measure materials used in constructing and assembling tree protection devices
- assemble and build protection devices
- clean up materials and maintain worksite

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of installing tree protection devices
- how to care and maintain trees during protection operations
- techniques for assembling or constructing a range of tree protection devices
- the application of a range of tree protection devices suitable to the requirements of the tree species
- the damage that can occur to trees during construction work
- principles and techniques relating to the choice of tools and equipment for installing tree protection devices

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC301 Set out site for construction works

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to set out a site for construction works in accordance with site plans and specifications. This may be done in advance of proposed works or in conjunction with construction works already being carried out.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare work	1.1 Interpret plans and specifications 1.2 Compare site plan and specifications with other available plans 1.3 Select tools and equipment required for setting out construction

Element	Performance criteria
	works and check for serviceability 1.4 Identify hazards, assess risks and implement controls 1.5 Consider environmental impact of proposed construction works in interpreting site plans
2. Locate and mark out position of construction works	2.1 Locate existing site features from the site plan 2.2 Locate position of proposed construction works 2.3 Using the correct scale transfer scale measurements of lines, shapes, angles and dimensions from the site plan to site 2.4 Mark out the shape of proposed construction works on site
3. Establish datum point and survey benchmarks on site	3.1 Establish datum point to ensure all existing and proposed construction works can be linked by survey equipment 3.2 Select and establish survey benchmarks on positions or structures on site according to site plans or specifications
4. Take and verify site levels	4.1 Set up levelling equipment and check for accuracy of readings 4.2 Adjust instruments which are out of specification 4.3 Take levels and verify and record in accordance with established datum point and survey benchmarks 4.4 Clean, maintain and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC301A Set out site for construction works.

Assessment Requirements for AHCLSC301 Set out site for construction works

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret site plans and specifications
- use mathematical and geometrical principles to mark out a site for construction work
- use a range of surveying instruments
- establish datum points and survey benchmarks on site
- take and verify site levels

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of site set out for landscape works
- how other plans may be referred to in assisting setting out a site
- how to determine if other plans may be referred when setting out a site

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC302 Construct landscape features using concrete

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to construct concrete structures and features as a component of landscape project works.

This unit applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare work	1.1 Interpret plans and specifications 1.2 Check the quantity and quality of materials 1.3 Select tools and equipment and check for serviceability 1.4 Identify hazards, assess risks and implement controls

Element	Performance criteria
	1.5 Select and use personal protective equipment (PPE) 1.6 Identify and ameliorate environmental impacts of proposed concrete works
2. Set out and prepare the site	2.1 Determine and locate services 2.2 Mark out the position of the structure or feature according to plans 2.3 Establish profiles to conform to the nominated tolerances 2.4 Prepare subsoil by removing all debris, vegetable matter and topsoil to provide a solid foundation for concrete 2.5 Install drainage systems according to plans and specifications 2.6 Install form work to the site in a manner that will ensure it remains rigid during concrete pouring operations 2.7 Place and compact sub-base material to the required finished levels 2.8 Complete preparation of the site according to the type of structure or feature to be constructed 2.9 Place reinforcement as designated in plans and specifications
3. Mix and pour concrete	3.1 Determine proportions for concrete mix according to the strength requirements of the project 3.2 Determine the volume of dry materials necessary to produce final concrete mix 3.3 Mix together all dry ingredients and required additives to ensure a thorough blending of all materials is achieved 3.4 Introduce sufficient water to produce a concrete mix to the required consistency 3.5 Pour concrete to designated levels in a manner to avoid segregation of materials 3.6 Consolidate concrete using an approved vibration method
4. Finish concrete	4.1 Screed concrete to the desired finished level 4.2 Trowel surface to desired finish 4.3 Finish concrete off according to plans and specifications
5. Check quality of work and clean-up site	5.1 Inspect the quality of finished works to ensure the required standard has been achieved 5.2 Remove and clean form work to allow reuse 5.3 Ensure all clean-up works minimise impact to the environment 5.4 Clean, maintain and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC302A Construct landscape features using concrete.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret site plans and specifications
- set out and prepare a site for concrete
- measure and construct profiles
- establish levels using levelling equipment
- place reinforcement
- pour, consolidate and finish concrete

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of constructing concrete landscape features
- industry standards in relation to reinforcing and consolidating concrete
- MPA testing theory and what affects MPA specifications in a concrete mix
- sub-base and sub-grade materials and preparation
- the comparative environmental implications associated with soil removal and the placement of concrete

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for paving project	1.1 Clarify the requirements of the paving project 1.2 Select and use tools, equipment and machinery and check for serviceability 1.3 Identify workplace health and safety hazards, assess risks and

Element	Performance criteria
	implement controls 1.4 Identify and ameliorate environmental impacts of proposed works 1.5 Select, use and maintain personal protective equipment (PPE) 1.6 Organise delivery of materials to site according to workplace priorities
2. Set out and prepare the site	2.1 Erect site bunting, control pedestrian access and place safety signage 2.2 Locate services 2.3 Make provision for irrigation lines to cross paved areas 2.4 Mark out the paving pattern according to plans and specifications 2.5 Place and compact sub-base material to the required finished levels 2.6 Incorporate surface drainage as specified
3. Implement paving project	3.1 Construct paving 3.2 Install appropriate drainage 3.3 Use tools, equipment and machinery safely in accordance with enterprise safe operating procedures and work health and safety requirements
4. Check quality of work and clean-up site	4.1 Inspect the quality of finished works to ensure they have met the required drawings and specifications standards 4.2 Clean work-site and dispose of debris in an environmentally safe and sensitive manner 4.3 Clean, maintain and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC306A Implement a paving project.

Assessment Requirements for AHCLSC306 Implement a paving project

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine project requirements from plans
- calculate material and resource requirements
- organise work and use tools and equipment
- use tools and equipment to construct paving
- clean up, store and maintain tools, machinery and equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of paving
- landscape paving materials
- methods and practices for maintaining and repairing paved areas
- methods of work schedule programming
- set-out techniques
- the range and use of required materials, equipment and machinery

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSC307 Implement a retaining wall project

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read and interpret documentation associated with retaining wall projects
- calculate material and resource requirements
- establish survey benchmarks
- excavate and profile soil levels
- use tools and equipment to construct retaining wall projects

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of retaining walls
- environmental impacts of landscape works
- landscape retaining wall materials and construction techniques
- legislative requirements and codes of practice affected by landscape works
- local council permit requirements for landscape works
- materials, equipment and machinery that may be required for the project
- methods and practices for maintaining and repairing retaining walls
- set out techniques
- work health and safety issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC308 Install metal structures and features

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install metal structures and features as a component of landscape project works.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare work	1.1 Interpret plans and specifications 1.2 Check the quantity and quality of materials 1.3 Select tools and equipment and check for serviceability 1.4 Identify hazards, assess risks and implement controls

Element	Performance criteria
	1.5 Select and use personal protective equipment (PPE)
2. Set out the site for the structure	2.1 Determine and locate services 2.2 Mark out the position of the structure or feature 2.3 Establish profiles to conform to nominated tolerances 2.4 Excavate and prepare footings according to the type of structure to be erected
3. Prepare and cut metal components	3.1 Lay components out for assembly 3.2 Mark the length of components and the positions of joints 3.3 Cut, check and join components in preparation for joining and assembly
4. Assemble and erect structure	4.1 Fix, join or assemble metal components into position and fix into place 4.2 Install remaining components and fix into position 4.3 Finish off structure to ensure all components are secure and complete 4.4 Apply coatings
5. Check quality of work and clean-up site	5.1 Inspect the quality of finished works to ensure they have met the required drawings and specifications standards 5.2 Clean debris from structure and site 5.3 Remove and dispose of all debris in a manner that minimises risk to the environment 5.4 Store unused metal components for future re-use 5.5 Clean, maintain and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC308A Install metal structures and features.

Assessment Requirements for AHCLSC308 Install metal structures and features

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare metal structures and features using plans and specifications
- mark out sites for metal structures and features using design drawings and specifications
- use surveying instruments
- establish levels and prepare footings
- excavate footings
- estimate quantities
- use power tools efficiently and safely
- measure and mark lengths of metal components
- fix, join or assemble metal components using a variety of recognised methods
- apply a variety of surface finishes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of installing metal structures and features
- levelling principles and techniques
- footings for timber structures and their construction methods

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC309 Install water features

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install water features. Water features may include waterfalls, ponds, waterways and fountains. They may be prefabricated as supplied by irrigation suppliers and garden centres or formed 'in situ'.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan and prepare work	1.1 Interpret plans and specifications 1.2 Check the quantity and quality of materials 1.3 Select tools and equipment and check for serviceability 1.4 Identify work health and safety hazards, assess risks and

Element	Performance criteria
	implement controls 1.5 Select and use personal protective equipment (PPE) 1.6 Identify the environmental implications of constructing water features
2. Set out and prepare the site	2.1 Locate services as specified 2.2 Determine the exact location and depth of excavations and mark out accordingly 2.3 Excavate site to the shape, depth and dimensions as marked out 2.4 Construct drainage systems as specified 2.5 Place and compact bedding material to the required finished levels 2.6 Sort and stockpile soil and waste material ready for removal, reuse or recycling
3. Install water feature and accessories	3.1 Install the waterproof membrane, prefabricated shell or formed 'in situ' feature as specified 3.2 Install all accessories to the feature as specified with consideration to safety issues 3.3 Fill the feature with water, test for leaks and repair accordingly 3.4 Treat water to remove or neutralise contaminants resulting from excavation and installation work
4. Check quality of work and clean-up site	4.1 Check any mechanical features and adjust to ensure correct operation 4.2 Clean debris from structure and site 4.3 Dispose of soil and waste material in an environmentally safe and sensitive manner 4.4 Clean, maintain and store tools and equipment 4.5 Inspect quality of finished works to ensure standard of the finished works is in accordance with drawings and specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC309A Install water features.

Assessment Requirements for AHCLSC309 Install water features

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine project requirements from plans
- use surveying instruments
- Set out and prepare a water feature site
- measure and calculate area, depth and volume
- use tools and equipment to construct a water feature
- clean up the site

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of water feature installation
- pipe sizes, types and applications
- pumping systems and accessories associated with water features
- set-out techniques
- water treatment methods

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC310 Implement a tree transplanting program

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a tree transplanting program.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for tree transplantation	1.1 Liaise with local authorities and information services to determine location of services and utilities, local by-laws and regulations governing the transplanting and transportation of trees 1.2 Inspect tree to ensure the appropriate transplanting operations are implemented

Element	Performance criteria
	<p>1.3 Identify hazards, assess risks and implement control measures</p> <p>1.4 Select and use personal protective equipment (PPE)</p> <p>1.5 Select, prepare and use tools, equipment and machinery necessary to implement tree transplanting</p> <p>1.6 Select, prepare and use root ball and crown treatments according to the requirements of the species to ensure the tree remains viable throughout the transplanting process</p> <p>1.7 Notify local residents and authorities where necessary as part of preparing site for transplanting activities</p> <p>1.8 Confirm assets, property and vegetation related to work zone activities are protected, relocated, or secured from potential damage during transplanting</p>
2. Implement transplanting operations	<p>2.1 Excavate the soil around the root zone and undercut the root ball with minimum stress to the plant</p> <p>2.2 Prune roots where required to meet the appropriate Australian Standard</p> <p>2.3 Stabilise tree as the root system is undercut and apply anti-transpirants as a root soak or foliar spray to maintain viability of the plant</p> <p>2.4 Bind root ball with appropriate material to ensure adequate soil is retained and keep moist prior to transportation and installation</p> <p>2.5 Lift tree and secure for potential storage or transportation using safe lifting techniques</p> <p>2.6 Prepare and handle tree or shrub to minimise damage during transportation</p> <p>2.7 Implement appropriate drainage and soil improvements</p> <p>2.8 Re-install and stabilise the tree</p>
3. Maintain health and viability of transplanted tree	<p>3.1 Apply water to the transplanted tree over a sustained period to minimise leaf loss and promote new growth</p> <p>3.2 Apply anti-transpirants and provide nutritional requirements of the species</p> <p>3.3 Install tree protection devices to provide adequate support and protection</p> <p>3.4 Monitor tree condition and site to ensure the plant remains healthy</p> <p>3.5 Clean, maintain and store tools, equipment and machinery at completion of work</p> <p>3.6 Record completed transplanting program and report to management or the client</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC310A Implement a tree transplanting program.

Assessment Requirements for AHCLSC310 Implement a tree transplanting program

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- locate existing services and utilities, local by-laws and regulations
- determine tree transplanting requirements from specifications
- prepare tools and equipment, tree and new site for tree transplanting
- calculate tree mass and size for safe removal
- bind and wrap root balls and crowns
- lift, reinstall and stabilise a tree

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of tree transplanting
- causes of stress in trees resulting from transplanting, storage and transportation
- environmental impact of tree removal and transplantation
- principles and methods of operating tree moving equipment
- problems and methods relating to the aftercare of trees during their establishment period
- requirements for securing and signage when transporting trees on road vehicles
- safety procedures and potential hazards of removing and transplanting trees
- the relevant Australian Standards and codes of practice
- tree anatomy and physiology as it relates to transplanting trees
- tree transplanting techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC401 Supervise landscape project works

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise landscape project works.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify scope of landscape project works	1.1 Identify the nature of the landscape project work and extent of responsibilities and check against landscape documentation 1.2 Identify personnel and other resources required to undertake landscape works according to scope of project 1.3 Develop a work program to ensure that project outcomes are

Element	Performance criteria
	<p>reached within designated time lines</p> <p>1.4 Identify workplace health and safety hazards, assess risks and implement controls</p> <p>1.5 Identify environmental impact of proposed landscape project works</p> <p>1.6 Select and use personal protective equipment (PPE)</p>
2. Coordinate the supply of materials and equipment	<p>2.1 Calculate material quantities and equipment requirements to ensure an ongoing work program is maintained</p> <p>2.2 Order material and equipment, check for quantity and quality and store as required</p> <p>2.3 Convey and confirm any specific delivery instructions with suppliers to ensure materials are delivered according to work program</p> <p>2.4 Send any rejected material back to supplier and re-order</p>
3. Monitor project works	<p>3.1 Monitor work program and adjust to ensure the site is developed and that project outcomes are reached within designated timelines</p> <p>3.2 Identify, record and report variations to the work program, issues likely to cause delays, and contingencies beyond the scope of the project</p> <p>3.3 Monitor the work site to ensure it remains in a clean, tidy and safe condition throughout and on completion of works</p>
4. Complete site works	<p>4.1 Inspect site prior to practical completion to ensure all works have been undertaken according to client needs and relevant documentation</p> <p>4.2 Note any works not complying and rectify</p> <p>4.3 Produce a completed landscape project works report for client</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC401A Supervise landscape project works.

Assessment Requirements for AHCLSC401 Supervise landscape project works

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify scope of landscape project work
- identify personnel and other resource requirements
- develop a project plan
- calculate materials and equipment
- control the quality of supplied materials
- monitor, record and report on progress of a works program
- complete a landscape works report
- liaise with clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of supervising landscape works
- causes of disruption to work programs and their effect on quality and time schedules
- environmental impacts of landscape works
- hazard identification, assessment and control
- how to conduct site assessment and work site establishment
- issuing of instructions, variations and requests for information
- format, frequency and documentation for job reporting requirements
- legislative requirements and legal responsibilities
- contracts, plans and specifications for project documentation
- supervision techniques of staff and sub-contractors

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC501 Survey and establish site levels

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to undertake site surveys and map levels and issues of levels in gardens.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Undertake the site survey	1.1 Determine survey items from the existing plan or client brief 1.2 Measure survey items and relevant landscape features 1.3 Take measurements and reduce with reference to the design

Element	Performance criteria
	1.4 Check and record measurements
2. Read maps and plans	2.1 Take current magnetic declinations and magnetic bearings 2.2 Determine differences between true and magnetic north and place north points on plans 2.3 Transfer magnetic bearings to true north points on plans
3. Record site details	3.1 Record orientation and levels on site plan 3.2 Produce scale plan for a garden design 3.3 Present plan of site to the client

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC501A Survey and establish site levels.

Assessment Requirements for AHCLSC501 Survey and establish site levels

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read maps and plans
- record levels of survey items and site features
- orientate a landscape site
- use survey equipment
- analyse surveying and levelling results
- map orientation and levels and issues of levels on a scale plan
- book and log results
- produce scale drawings for designs and costings
- Liaise with clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of establishing site levels
- techniques to deal with different garden shapes
- surveying tools and equipment used in landscape projects

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSC502 Manage landscape projects

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare landscape project documentation
- develop and cost a bill of quantities
- develop a schedule of works
- organise and manage the works program and works team
- identify sub-contracted work and program
- manage sub-contractors
- identify, negotiate and implement variations to the contract
- identify and rectify non-conforming elements to the contract
- liaise with clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of managing landscape projects
- project management principles
- public liability and legal responsibilities
- regulations having possible bearing on landscape projects
- the environmental implications of a landscape project
- types of landscape machinery and equipment

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSC503 Manage a tree transplanting program

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a tree transplanting program.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Landscape (LSC)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess the sites and trees	1.1 Undertake site assessments to identify site conditions which may impact upon transplanting activities at the lifting site and the transplant site

Element	Performance criteria
	<p>1.2 Identify work health and safety hazards, assess risks and implement suitable controls</p> <p>1.3 Liaise with authorities and information services to determine location of services and utilities, and regulations governing the transplanting and transportation of trees</p> <p>1.4 Assess trees for viability for transplanting to ensure the best time and conditions are chosen according to tree species characteristics</p>
2. Determine transplanting requirements	<p>2.1 Identify the appropriate tools, equipment, machinery and specialist contractors</p> <p>2.2 Identify the tree species to be transplanted</p> <p>2.3 Determine excavation methods and root ball preparation according to the characteristics of the species</p> <p>2.3 Determine crown reduction and protection tasks according to the characteristics of the species and the appropriate Australian Standard</p> <p>2.4 Calculate root ball and tree mass to determine appropriate lifting and transport requirements</p> <p>2.5 Coordinate labour requirements to ensure trees are prepared, lifted, transported and re-installed with minimum stress to the trees, and with regard to safety and environmental factors</p> <p>2.6 Identify a transport route with regard to the size and shape of the tree and road transport vehicle requirements</p> <p>2.7 Determine and document an aftercare plan outlining monitoring frequency and methods to maintain the health and viability of the transplanted trees in the program</p>
3. Document a tree transplanting program	<p>3.1 Document the transplanting program</p> <p>3.2 Document resources and costing details</p> <p>3.3 Communicate transplanting program for implementation</p> <p>3.4 Assess completed tree transplanting program to ensure that transplantation was undertaken according to the identified program and budget guidelines</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSC503A Manage a tree transplanting program.

Assessment Requirements for AHCLSC503 Manage a tree transplanting program

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess tree viability for transplantation
- liaise with authorities and information services regarding transplanting and transporting trees
- calculate project resources and costs
- calculate root ball and tree mass and size
- assess crown and root reduction requirements
- determine transplant and transportation requirements and removal methods
- develop transport plan
- develop a budget
- document and communicate transplanting program, contingency planning and after-care plan
- assess and control risks

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of tree transplanting management
- aftercare management
- causes of stress in trees resulting from resulting from transplanting, storage and transportation
- current practices and techniques in tree preparation, lifting, transportation and replanting
- local government tree protection and preservation regulations
- methods of managing tree moving operations
- planning considerations and environmental implications of transplanting activities

- requirements for securing and signing trees for road transportation
- the relevant Australian Standards and Codes of Practice
- tree anatomy, physiology and biochemistry
- tree transplanting techniques appropriate to the specific requirements of the species

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCLSK101 Support extensive livestock work

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to support extensive livestock work.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy. They undertake defined routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for extensive livestock	1.1 Identify the required materials, tools and equipment using provided lists and supervisor's instructions

Element	Performance criteria
work	1.2 Carry out checks on all materials, tools and equipment and report insufficient or faulty items to the supervisor 1.3 Use safe manual handling techniques when loading and unloading materials and equipment 1.4 Select and use suitable personal protective equipment (PPE) and check prior to use 1.5 Identify hazards and report to supervisor
2. Undertake extensive livestock work as directed	2.1 Follow instructions and directions provided by supervisor and seek clarification when necessary 2.2 Carry out work in a safe and environmentally appropriate manner 2.3 Interact with other staff and customers in a positive and professional manner 2.4 Report problems or difficulties in completing work to required standards or timelines to supervisor 2.5 Carry out livestock handling and husbandry activities in line with enterprise animal welfare policies
3. Handle materials and equipment	3.1 Store waste material produced during work in a designated area according to supervisor's instructions 3.2 Handle and transport materials, equipment and machinery appropriately 3.3 Maintain a clean and safe work site
4. Clean up on completion of work	4.1 Return materials to store or dispose of appropriately 4.2 Clean, maintain and store tools and equipment 4.3 Report work outcomes to supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK101A Support extensive livestock work.

Assessment Requirements for AHCLSK101 Support extensive livestock work

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow safe work practices
- participate in teams and contribute to team objectives
- understand instructions
- read labels and work health and safety symbols
- use safe animal handling techniques
- use livestock handling tools and equipment
- assist in monitoring livestock health and welfare
- provide assistance to repair and maintain facilities
- follow work health and safety policies
- follow enterprise animal welfare and sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- safe work practices
- animal handling techniques including animal welfare requirements
- tools and equipment
- repair and maintenance of facilities work health and safety and environmental protection legislation and enterprise procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK201 Assist with feeding in a production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with the process of preparing and providing feed and water for livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare and distribute	1.1 Check requirements for the daily feeding program with supervisor

Element	Performance criteria
feed	1.2 Identify hazards and report to supervisor 1.3 Select, use and maintain suitable personal protective equipment 1.4 Select and check tools, machinery and equipment for readiness 1.5 Provide assistance for weighing and measuring feed 1.6 Load feed into trolleys from silos or other storage bins and distribute feed 1.7 Check automatic or computerised feeders, where used, for blockages and correct functioning 1.8 Report abnormalities or irregularities with feed stocks to supervisor
2. Check watering systems	2.1 Adjust watering systems for height or position where appropriate 2.2 Check water level and flow and make adjustments accordingly 2.3 Empty and clean watering containers or lines where necessary
3. Keep workplace records	3.1 Keep basic feeding records and report to supervisor 3.2 Clean, maintain and store tools, machinery and equipment 3.3 Apply enterprise biosecurity and environmental policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK201A Assist with feeding in a production system

Links

Assessment Requirements for AHCLSK201 Assist with feeding in a production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- identify a range of feed types and qualities
- identify feed contaminants
- prepare and distribute feed
- check watering systems
- recognise and rectify minor operational faults
- interpret and apply task instructions, communicate with work team and supervisor and record and report faults, workplace hazards and accidents
- complete records and documentation of feed use and volumes for the enterprise section
- use machinery and equipment associated with providing feed
- report on feeding to supervisors
- follow enterprise work health and safety policies
- follow enterprise biosecurity and environmental policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- silo operations, tractors and associated feeding machinery and equipment
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures
- common grains, meals, pelleted and liquid feeds
- evidence of spoilage and handling of spoilt feeds
- enterprise work health and safety, biosecurity and environmental policies

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK202 Care for health and welfare of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for the health and welfare of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Discuss work requirements with supervisor and seek clarification where necessary 1.2 Identify work health and safety risks and inform supervisor 1.3 Prepare and use suitable personal protective equipment 1.4 Select and prepare appropriate tools and equipment
2. Monitor and assess livestock health and welfare	2.1 Check livestock regularly to assess health and welfare 2.2 Recognise and report symptoms of injuries, ill health or abnormal behaviour 2.3 Handle livestock in line with enterprise animal welfare policies
3. Implement livestock health and welfare procedures	3.1 Follow quarantine and biosecurity procedures as instructed to minimise the risk of disease 3.2 Maintain thorough personal hygiene practices in all activities associated with handling livestock to reduce risks from diseases that are transmissible to humans 3.3 Treat sick and injured livestock or make arrangements to humanely destroy livestock if necessary 3.4 Recognise environmental implications associated with livestock husbandry practices and follow relevant procedures 3.5 Follow the regulations and codes of practice appropriate for the industry 3.6 Follow enterprise animal welfare emergency procedures where required
4. Administer drenches, vaccines and prescribed treatments to livestock	4.1 Prepare livestock treatment site and facilities 4.2 Prepare livestock treatments 4.3 Move, yard and control livestock and inspect for treatment requirements 4.4 Use safe work practices with regard to livestock handling 4.5 Administer treatment if required as instructed or under supervision
5. Monitor treated livestock and maintain records	5.1 Monitor livestock post-treatment for signs of treatment effectiveness 5.2 Recognise and report livestock health and condition abnormalities 5.3 Record disease incidence, livestock losses, and treatments 5.4 Report post-treatment information to the supervisor so that prevention strategies can be planned and implemented

Element	Performance criteria
6. Complete work	6.1 Dispose of treatment materials appropriately 6.2 Clean, maintain and store equipment, materials and facilities 6.3 Dispose of livestock residues and waste in an environmentally responsible manner

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK202 Care for health and welfare of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle livestock safely and humanely
- monitor and assess livestock health and welfare
- select, use and maintain specialised animal health equipment
- prepare treatment site, facilities and equipment
- administer treatments to livestock
- monitor the effectiveness of treatments and report issues
- keep and maintain records
- dispose of unused treatments safely and in an environmentally correct manner
- recognise ill health and abnormal behaviour in livestock
- recognise fear and aggressive behaviour in livestock
- recognise heat stress
- follow enterprise animal welfare emergency procedures
- follow enterprise work health and safety policies
- follow enterprise biosecurity, animal welfare and sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water quality and animal requirements
- feed requirements and quality
- workplace biosecurity and euthanasia procedures
- safe handling of sick and dead livestock
- livestock handling principles and livestock behaviour

- signs of heat stress
- symptoms of ill-health in livestock
- the range of common diseases affecting livestock
- vaccination programs
- relevant legislation and regulations relating to waste and environment management, livestock health, stock medicines and animal welfare
- relevant work health and safety legislation, regulations and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK203 Carry out birthing duties

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist animals and their newborn at birthing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for birthing	1.1 Check animal records and confirm anticipated birthing date where possible 1.2 Check condition and health status of pregnant animal and monitor prior to imminent birthing 1.3 Check birthing equipment, resources and materials and prepare for use 1.4 Give females access to shelter to give birth in during severe weather conditions 1.5 Identify hazards and report to supervisor 1.6 Use safe work practices
2. Assist at the birthing process	2.1 Monitor environment and animals to ensure birth progresses normally 2.2 Check for presence of predators and implement control measures where necessary and report to supervisor 2.3 Handle animals calmly with minimal disruption to the birthing process and in line with enterprise animal welfare policies 2.4 Identify animals experiencing birthing difficulties and intervene as appropriate 2.5 Seek supervisor or veterinary advice if birth complications cannot be resolved
3. Provide post-birthing assistance	3.1 Monitor post-birthing health and bonding of female and newborn 3.2 Maintain birthing environment, facilities and equipment in a safe, hygienic and operational state and report or fix faults 3.3 Keep records of birth

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK203A Carry out birthing duties

Assessment Requirements for AHCLSK203 Carry out birthing duties

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement predator control strategies
- prepare birthing environment, materials and resources to industry standards
- recognise signs of imminent birthing of animals
- apply contingency measures for birthing in the event of adverse weather conditions
- monitor birthing and provide assistance if required or refer on if birthing difficulties require veterinary assistance
- recognise abnormalities in newborn animals
- provide a non threatening environment and access to adequate feed and water immediately post birthing.
- carry out animal husbandry procedures associated with birthing
- monitor animal condition and recognise abnormal behaviour
- provide due care and handle animals humanely in line with enterprise animal welfare policies
- maintain a safe and secure post-birthing environment
- select birthing equipment and materials and check for operation
- demonstrate safe and environmentally responsible workplace practices
- identify hazards and use safe work practices in the birthing environment
- communicate abnormalities, equipment faults and workplace hazards and report and maintain animal records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal behaviour, basic health and nutritional requirements

- birthing environment requirements for animals
- birthing equipment and materials, their components and functions
- birthing intervention and non-intervention strategies
- effects of adverse weather conditions on birthing process and newborn animals
- effects of inadequate nutrition on animals and newborn
- enterprise policies with regard to treating animals, recording and reporting routines
- environmental impacts and minimisation measures associated with animal production
- hazards associated with handling animals
- relevant livestock gestation and appropriate birthing and husbandry procedures
- personal protective clothing and equipment and when and how it should be used
- problems associated with birthing and remedial treatment
- procedures for cleaning and maintaining treatment equipment and materials
- predator behaviour and control procedures
- relevant State/Territory legislation, regulations and codes of practice with regard to work health and safety and animal welfare.

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK204 Carry out regular livestock observation

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe operating procedures
- check livestock regularly
- handle livestock safely and humanely
- identify signs of ill health, injury and abnormality
- identify symptoms of ill health or injury
- deal efficiently and calmly with livestock emergencies
- complete basic livestock first aid procedures
- record and report serious issues or injuries.
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- range of ailments that may occur or affect livestock
- application of a range of basic treatments under veterinary supervision
- behaviour of the relevant species
- environmental controls and codes of practice applicable to the enterprise
- organisations livestock production and management plans
- relevant work health and safety legislative requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to handle livestock	1.1 Confirm work plan with supervisor 1.2 Identify, prepare and maintain livestock handling areas, gates and access routes 1.3 Select, check and prepare handling equipment for use and report missing equipment, malfunctions and need for maintenance as required 1.4 Recognise hazards in the workplace and report safety concerns 1.5 Select appropriate personal protective equipment and ensure correct fit
2. Handle livestock	2.1 Locate and identify livestock for handling 2.2 Observe and anticipate behavioural characteristics of livestock and use appropriate handling methods 2.3 Move livestock to designated handling areas and carry out procedures to control, draft and sort livestock with due care and in line with enterprise animal welfare policies 2.4 Carry out restraint procedures safely and with minimum stress and discomfort to livestock and in line with enterprise animal welfare policies 2.5 Monitor and anticipate continually livestock behaviour during moving and drafting processes to ensure wellbeing of livestock and safety of handlers 2.6 Conduct or tally livestock numbers or livestock count of groups/mobs and record or report as required 2.7 Recognise and report environmental implications associated with livestock production
3. Complete handling procedure	3.1 Confirm livestock dispersal plan with supervisor as required 3.2 Prepare gates and access routes for livestock departure 3.3 Move livestock to designated areas safely and with minimal stress 3.4 Ensure adequate clean water and feed at destination as required 3.5 Clean and maintain handling areas and equipment and store surplus materials 3.6 Report handling area maintenance requirements and equipment faults or malfunctions 3.7 Dispose of livestock residues and waste in accordance with environmental practices 3.8 Record and report relevant information

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK205A Handle livestock using basic techniques

Links

Assessment Requirements for AHCLSK205 Handle livestock using basic techniques

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare handling areas, gates and access routes for livestock movement
- monitor and anticipate livestock behaviour
- recognise enterprise livestock identification systems
- identify and draft livestock during handling operations
- move and control livestock using low stress livestock handling techniques
- minimise undue stress and risk to livestock and handlers
- recognise livestock abnormalities
- assess, calculate and record livestock numbers
- control the environmental impacts associated with livestock production within the limitations of own responsibility
- follow enterprise work health and safety policies
- follow enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock behavioural characteristics and movement in handling areas
- components and functions of handling equipment
- handling techniques and restraint methods
- enterprise livestock identification systems
- environmental codes of practice with regard to livestock production
- regulatory controls with regard to handling livestock on public roads where required
- common livestock breeds

- basic nutritional and welfare requirements
- range of common livestock abnormalities, illnesses and injuries and associated signs
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK206 Identify and mark livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out the identification and marking of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to identify and mark animals	1.1 Select and check appropriate equipment for correct operation, and maintain or replace as required 1.2 Select appropriate materials and ensure adequate quantities for required task 1.3 Identify, clean and prepare suitable marking sites and facilities 1.4 Prepare and ensure adequate quantities of animal preventative health treatments as instructed 1.5 Identify hazards, control risks as appropriate and report to supervisor 1.6 Select, use and maintain suitable personal protective equipment
2. Identify and mark animals	2.1 Muster animals and identify, draft and move young animals to marking site in readiness for identifying and marking 2.2 Carry out animal identifying and marking operations in line with enterprise animal welfare policies 2.3 Carry out contingency plans as instructed in the event of adverse weather conditions 2.4 Identify environmental implications associated with enterprise operations for identifying and marking animals and report to the supervisor
3. Complete identifying and marking operation	3.1 Keep tally or record animal numbers as required during operations and assist to conduct and record animal counts at completion of tasks 3.2 Prepare animals and move along a planned route without damage to person, livestock, property or environment 3.3 Clean, maintain and store equipment, materials and facilities 3.4 Report equipment faults or malfunctions 3.5 Dispose of animal residues and waste appropriately 3.6 Monitor livestock behaviour and wellbeing post-operations, and mother-up young animals if required 3.7 Apply enterprise biosecurity and environmental policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK206A Identify and mark livestock

Assessment Requirements for AHCLSK206 Identify and mark livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, control risks and implement safe operating procedures
- prepare and maintain appropriate identifying and marking sites and facilities to industry standards
- handle animals in a safe and humane manner in line with enterprise and industry animal welfare policies
- operate and maintain equipment
- determine identifying and marking methods
- carry out identifying and marking operations
- monitor animal's behaviour post-marking for health and well-being, mother-up animals and their young if required
- apply contingency measures in the event of adverse weather conditions
- tally, count, calculate and record animal numbers during marking operations if required
- demonstrate safe and environmentally responsible workplace practices
- follow enterprise work health and safety policies
- follow enterprise biosecurity and environmental policies as required

Knowledge Evidence

The candidate must demonstrate knowledge of:

- components and functions of animal handling equipment
- animal marking methods and identification systems
- animal preventative health requirements and procedures
- relevant livestock behaviour
- basic livestock health and nutritional requirements

- environmental codes of practice with regard to animal production
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK207 Load and unload livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to load and unload animals for transport.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Check facilities and equipment for sound working conditions	1.1 Identify facilities and equipment required for the task and confirm with supervisor 1.2 Prepare loading facilities and equipment according to enterprise procedures 1.3 Check the work site, facilities and equipment for hazards and operation, control risks where appropriate and report safety concerns to supervisor 1.4 Carry out or organise repairs and maintenance of facilities and equipment required for loading or unloading livestock where necessary 1.5 Select appropriate personal protective equipment and ensure correct fit
2. Load animals	2.1 Identify, muster, yard or secure animals using safe working methods in line with enterprise animal welfare policies 2.2 Inspect animals for signs of ill health, injury or abnormal behaviours and separate animals unsuitable for transport 2.3 Prepare animals for transport 2.4 Record identification details of animals and fit individual animal tags as required 2.5 Count, record and load livestock safely and with minimal stress to ensure no injury to co-workers or animals in line with enterprise animal welfare policies 2.6 Complete vendor declarations and any other required documentation
3. Unload animals	3.1 Unload livestock in a safe manner to ensure no injury to other workers or animals 3.2 Record numbers and individual identification details of livestock 3.3 Inspect livestock for signs of ill health, injury or abnormal behaviours and report to appropriate persons 3.4 Check documentation and reach agreement on condition of animals with the receiving or dispatching party where required
4. Perform appropriate animal health procedure	4.1 Sort stock, and separate distressed, injured or ill livestock if required 4.2 Undertake animal health treatments off truck if required 4.3 Feed and water animals as instructed 4.4 Apply enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK207 Load and unload livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check loading facilities for correct operation and hazards to animals and workers
- sort livestock as required and separate unsuitable animals for transport
- load and unload livestock
- anticipate animal behaviour
- provide and maintain appropriate animal feed and water
- complete relevant documentation and affix individual tags if required
- monitor animal health and welfare
- read and interpret mustering, work and loading plans and maps
- calculate animal numbers to assess and calculate feed and water requirements
- follow relevant work health and safety requirements
- follow relevant biosecurity policies as required
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- animal handling and movement methods and techniques
- basic animal health and nutritional requirements
- animal herding and flocking behaviour
- techniques and uses of working dogs where appropriate
- types of animal health treatments that may be required
- common diseases and injuries in livestock
- common abnormal livestock behaviours

- causes of livestock being unfit for transport
- legislative documentation requirements for livestock transport
- relevant work health and safety, biosecurity and animal welfare requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK208 Monitor livestock to parturition

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor animal health, wellbeing and welfare to parturition.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Check health status of animals	1.1 Check condition and health status of animals and confirm against enterprise health strategies and records 1.2 Recognise signs of poor health and condition or abnormal behaviour and report to the supervisor for remedial action 1.3 Arrange preventative health treatments and administer as instructed 1.4 Identify hazards and report to supervisor 1.5 Identify environmental implications associated with production and report to the supervisor
2. Identify pregnant animals	2.1 Identify animals and separate on basis of pregnancy status 2.2 Identify dry animals and implement appropriate procedures 2.3 Report additional assistance required for assessing pregnancy status to the supervisor for remedial action
3. Feed pregnant animal	3.1 Identify nutritional needs of pregnant animals and confirm against the feeding plan 3.2 Identify animals with special feeding needs and give them preferential feeding and record 3.3 Implement supplementary feeding as required and record accordingly 3.4 Maintain a safe and secure environment for pregnant animals 3.5 Handle animals with minimum stress and discomfort to the animals without excessive yarding or shedding in line with enterprise animal welfare policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK208 Monitor livestock to parturition

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety directions
- observe livestock health and wellbeing from joining
- maintain appropriate nutritional and environmental requirements
- recognise and report abnormalities for remedial action
- provide a safe and secure environment for the promotion of the welfare and wellbeing of pregnant animals through to birthing.
- administer preventative health treatments
- calculate animal numbers, measure feed, assess rate and frequency of feeding, and calculate animal gestation
- communicate orally and in writing, animal behaviour and identified abnormalities
- control environmental impacts associated with animal production
- handle pregnant animals with due care
- observe and accurately report animal behaviour
- observe local climatic conditions
- follow relevant work health and safety requirements
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- effects of adverse weather conditions and inadequate nutrition on pregnant animals and their newborn
- effect of local climatic conditions on the timing of shearing, separating and transporting pregnant animals

- environment codes of practice with regard to animal production
- correct livestock handling techniques for dry and pregnant animals
- health and nutritional requirements for pregnant animals
- housing requirements for intensively produced animals
- livestock identification methods
- pregnant animals behaviour and abnormalities
- pregnancy checking and confirmation procedures (including scanning)
- health treatments, procedures and methods to livestock when required
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

AHCLSK209 Monitor water supplies

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor the supply of potable water for livestock from water storages and sources.

All work must be carried out to comply with workplace procedures, work health and safety, legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor water supplies	1.1 Inspect water supplies routinely

Element	Performance criteria
	1.2 Recognise high and low water levels and report to supervisor 1.3 Treat water quality problems or pathogens when found 1.4 Record and report information on water supplies
2. Inspect and clear intake and outlet points	2.1 Inspect intakes and outlets 2.2 Report potential blockages and clear actual blockages 2.3 Check and replace water filters as required 2.4 Reposition intake lines as necessary to ensure unobstructed suction 2.5 Clear strainers of debris and sludge
3. Operate water delivery equipment	3.1 Identify hazards and risks and report to supervisor 3.2 Prepare and check water delivery equipment 3.3 Operate water delivery equipment 3.4 Check outflow to ensure water delivery equipment is operating correctly 3.5 Shut down water delivery equipment as required 3.6 Report on activities and water delivery equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK209A Monitor water supplies

Assessment Requirements for AHCLSK209 Monitor water supplies

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safety procedures
- record and report water supply information, activities and system performance
- read and follow manufacturers procedures
- problem solve to identify potential as well as actual blockages
- undertake basic poly pipe repairs
- check outflow rates
- record and report water supply information, activities and system performance
- read and follow manufacturers procedures
- identify blockages and clear them using safe working procedures
- check flow rates
- inspect and report on water supplies with only routine supervision
- follow work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water delivery systems and components and their operation
- enterprise procedures for carrying out inspections, recording and reporting water information and system performance
- environmental impacts and procedures for water supplies
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK210 Muster and move livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to muster and move livestock as part of a team.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for muster	1.1 Identify mustering requirements and confirm with supervisor 1.2 Arrange transport requirements and check and confirm for operation 1.3 Identify and access additional information relevant to livestock movements 1.4 Identify hazards and safety concerns and report to the supervisor 1.5 Select and use personal protective equipment
2. Carry out muster	2.1 Locate livestock identified in the muster plan and aggregate in preparation for movement 2.2 Carry out muster processes in line with enterprise animal welfare policies
3. Move livestock	3.1 Carry out livestock movement with minimal stress to livestock and without damage to person, property or environment 3.2 Monitor and maintain livestock welfare during movement with adequate provision of rest, water and feeding points 3.3 Confine and pasture livestock at destination 3.4 Count and record numbers of livestock 3.5 Follow enterprise biosecurity policies where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK210 Muster and move livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and follow safe work procedures
- read and interpret muster plans and maps
- prepare equipment and working dogs (when used) for handling livestock
- implement directions for mustering
- monitor livestock behaviour and recognise abnormalities
- muster and move livestock along prepared routes in a calm and controlled manner
- handle livestock safely and humanely, monitor welfare of mustered stock
- monitor and minimise impacts to the environment
- communicate effectively with the muster team
- calculate livestock numbers and assess and calculate feed and water requirements
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements where required
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- mustering and movement methods and techniques
- livestock basic health and nutritional requirements
- livestock herding/flocking behaviour
- environmental codes of practice with regard to livestock production
- working dogs uses and techniques (where appropriate)
- legislative requirements for stock movement along public roads

- environmental impacts and procedures for livestock movements and musters
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK211 Provide feed for livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- monitor and record livestock condition
- provide feed and feed supplements in accordance with feeding plan
- monitor livestock health and condition, and recognise abnormalities
- employ safe and environmentally responsible systems and procedures with regard to the handling of livestock and feed
- read and interpret feeding plan, work plan and supervisors instructions
- communicate and report livestock feeding abnormalities and workplace hazards, and maintain livestock records
- assess and calculate herd/flock numbers, measure feed and rate and frequency of feeding
- safely handle livestock in line with enterprise animal welfare policies
- report feeding abnormalities and maintain records
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional requirements for livestock (including water)
- types of feed and feed supplements (including pastures and grazing)
- types of noxious and toxic plants relevant to feeding areas
- livestock health and behaviour
- livestock scoring and weighing methods

- environmental impact of livestock
- safe livestock handling techniques and procedures
- hazards associated with handling livestock and control measures
- personal protective clothing and equipment
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK213 Clean out production sheds

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to clean out sheds used for the production of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to clean shed	1.1 Confirm work to be undertaken with supervisor

Element	Performance criteria
	1.2 Identify work health and safety hazards and seek advice from supervisor for implementation of suitable risk controls 1.3 Select, maintain and use suitable personal protective equipment 1.4 Identify the potential environmental and biosecurity impacts of cleaning the shed and seek advice from supervisor for managing these impacts 1.5 Raise, dismantle or remove equipment from the shed for cleaning and clean equipment to appropriate industry standards 1.6 Cover or seal electrical switchboards and other equipment to prevent entry of water if appropriate
2. Clean shed and surrounds	2.1 Service and prepare machinery for cleaning operation 2.2 Remove and dispose of litter where these are used 2.3 Remove and dispose of manure appropriately 2.4 Remove dust and cobwebs from all surfaces 2.5 Service filters and flush drinker lines and tanks 2.6 Empty and clean silos where appropriate 2.7 Prepare and use cleaning agents in line with safe working procedures 2.8 Air shed to completely remove traces or vapours of the cleaning agent prior to re-entry of staff and re-installation of equipment 2.9 Handle chemical agents safely and use in accordance with relevant work health and safety and industry practices 2.10 Dry clean electrical equipment 2.11 Ensure run-off from cleaning activity complies with enterprise, industry and regulatory effluent and waste management procedures 2.12 Ensure all cleaning and hygiene processes are completed to industry standards
3. Complete cleaning operation	3.1 Clean and store equipment appropriately at end of operation 3.2 Dispose of containers, leftover fluids, waste and debris from the cleaning operations appropriately 3.3 Complete records and documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, follow safe work practices and use personal protective equipment appropriately
- make appropriate preparations for cleaning out shed
- clean shed and surrounds
- complete cleaning operation
- complete records
- follow relevant environmental and biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of sheds and equipment found in sheds
- methods to handle and transport equipment found in sheds
- methods of sealing or covering shed equipment to prevent entry of water
- methods for dry cleaning electrical equipment
- environmental and biosecurity impacts of shed cleaning operation, and measures to mitigate these impacts
- equipment and machinery used for shed cleaning operation, and the maintenance, servicing and storage of such equipment and machinery
- environmental and biosecurity impacts and methods of disposal of effluent, bio-waste and waste generated by the cleaning operation
- cleaning, maintenance and servicing of filters, drinker lines, tanks and silos
- types, handling, use and disposal of cleaning agents, work health and safety and environmental practices for these agents

- types of documentation and records that need to be completed after the cleaning operations
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK214 Maintain production growing environments

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain growing environments for livestock under production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Maintain environment systems	1.1 Carry out biosecurity procedures, including access to sheds and boot washing 1.2 Carry out maintenance work according to enterprise work health and safety standards for hazards identification, risk assessment and risk control measures 1.3 Carry out shed heating, cooling and ventilation systems maintenance 1.4 Check litter and manure conditions and report changes 1.5 Maintain lighting programs specified for the production unit and report variations 1.6 Clean light globes regularly and report malfunctions 1.7 Check feed program is working according to enterprise procedures and report malfunctions 1.8 Check feeding times and feed rate when restricted feeding is practised and report malfunctions 1.9 Carry out maintenance work as necessary 1.10 Check waterers in sheds and report malfunctions
2. Observe and assess livestock health	2.1 Check livestock regularly 2.2 Recognise and report ill health of livestock 2.3 Carry out disease prevention strategies appropriate to the unit as instructed and in line with biosecurity codes
3. Handle livestock	3.1 Handle livestock in accordance with animal welfare requirements and codes of practice 3.2 Count and identify livestock 3.3 Recognise and identify injured, malformed or non-productive livestock, and report to enterprise or supervisor 3.4 Treat livestock under direction of the unit supervisor, and report the effects of treatment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK214A Maintain production growing environments

Assessment Requirements for AHCLSK214 Maintain production growing environments

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and follow safe work practices
- follow relevant biosecurity practices
- maintain environment systems
- observe and assess livestock health
- follow relevant animal welfare practices when handling or treating livestock

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant biosecurity requirements
- relevant animal welfare requirements
- relevant work health and safety requirements and sustainability practices
- shed heating, cooling and ventilations systems, their functions, maintenance and servicing, and impact of changes on livestock
- types of litter, functions and impact of litter changes on livestock
- impact of manure conditions on livestock
- lighting programs and impact of variations in lighting programs on livestock
- types of lighting, functions, maintenance and servicing
- feeding programs and impact of changes and malfunctions on livestock
- restricted feeding and impact of changes and malfunctions on livestock
- watering systems, functions, maintenance and servicing, and the impact of changes and malfunctions on livestock
- types of maintenance work that need to be carried out in a livestock production unit

- signs of health, anatomy, physiology and behaviour of the livestock species
- signs of ill health in the livestock species
- signs of injury, malformation and non-productiveness in livestock
- types of disease prevention strategies and their functions
- methods for handling livestock
- methods for counting and identifying livestock
- types of treatment in livestock and assessment of treatment effectiveness

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK215 Carry out alpaca handling and husbandry operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to move and control alpacas using basic handling methods and procedures.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to handle alpacas	1.1 Identify, prepare and maintain alpaca handling areas, gates and access routes 1.2 Locate and identify alpacas for handling according to supervisor instructions 1.3 Observe and anticipate behavioural characteristics of alpacas and select appropriate handling methods 1.4 Select, check for soundness and prepare handling equipment 1.5 Identify hazards and report to supervisor 1.6 Recognise hazards to animals and report to supervisor 1.7 Observe site quarantine and other biosecurity protocols 1.8 Select and use suitable personal protective equipment
2. Handle alpacas	2.1 Follow procedures to control and sort alpacas safely and in line with enterprise animal welfare policies 2.2 Classify alpacas according to age, sex and husbandry tasks to be performed 2.3 Carry out restraint procedures with minimum stress and discomfort to alpacas 2.4 Transport alpacas when required according to animal welfare requirements 2.5 Monitor and anticipate alpaca behaviour during moving and handling processes to ensure wellbeing of alpacas and safety of handlers 2.6 Conduct alpaca count record 2.7 Recognise environmental impacts of alpaca handling and husbandry tasks and report to supervisor
3. Carry out alpaca husbandry tasks	3.1 Carry out alpaca husbandry safely and in line with enterprise animal welfare policies 3.2 Identify unhealthy stock and abnormal conditions and behaviour and report 3.3 Provide adequate feed and clean water to stock 3.4 Recognise plants poisonous to alpacas and report to supervisor
4. Complete alpaca handling activities	4.1 Complete alpaca husbandry tasks as instructed, and prepare gates and access routes for alpacas' departure 4.2 Clean and maintain handling areas and equipment and store surplus materials 4.3 Report equipment faults or malfunctions

Element	Performance criteria
	4.4 Dispose of alpaca residues and waste appropriately 4.5 Record and report relevant information about particular animals and the husbandry tasks performed

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK215 Carry out alpaca handling and husbandry operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and apply safe work practices
- assess and calculate alpaca numbers
- prepare handling areas, gates and access routes for alpaca movement
- monitor and anticipate alpaca behaviour in handling operations
- identify, sort, move and control alpacas for handling and husbandry operations
- use correct equipment, and calming and humane methods to minimise undue stress and risk to alpacas or handlers
- carry out typical basic alpaca husbandry tasks
- recognise and report signs of unusual behaviour, unhealthy animals or abnormal conditions
- control environmental impacts associated with alpaca handling and husbandry
- feed and provide adequate clean water to alpacas
- identify a range of plants poisonous to alpacas
- provide due care in the handling of alpacas
- read and comprehend oral and written information and instructions and maintaining alpaca handling records
- use enterprise alpaca identification systems
- follow relevant work health and safety requirements
- follow relevant biosecurity requirements
- follow relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- alpaca behavioural characteristics and movement in handling areas
- classes of alpacas and their basic nutritional and welfare requirements
- components and functions of handling equipment
- enterprise identification systems for alpacas
- environmental codes of practice with regard to alpaca production
- correct handling techniques and restraint methods
- alpaca husbandry procedures and why they are carried out
- regulatory controls relating to the transport of animals on public roads
- relevant work health and safety requirements
- relevant animal welfare and biosecurity legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK216 Clean and maintain livestock pens

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to clean and maintain livestock pens.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They identify and provide solutions to a limited range of predictable problems.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to clean pens	1.1 Confirm work to be undertaken with supervisor 1.2 Identify work health and safety hazards and seek advice from supervisor for implementation of suitable risk controls 1.3 Select, maintain and use suitable personal protective equipment 1.4 Identify the potential environmental and biosecurity impacts of cleaning the pens and seek advice from supervisor for managing these impacts 1.5 Raise, dismantle or remove equipment from the pens for cleaning if required and clean equipment to appropriate industry standards
2. Clean pens	2.1 Service and prepare machinery and tools for cleaning operation 2.2 Remove and dispose of manure appropriately 2.3 Clean feeding and watering troughs or equipment appropriately 2.4 Ensure run-off from cleaning activity complies with enterprise, industry and regulatory effluent and waste management procedures 2.5 Ensure all cleaning and hygiene processes are completed to industry standards
3. Maintain pens	3.1 Repack worn and uneven pen surface appropriately 3.2 Repair damaged feed bunks and leaking water troughs as required 3.3 Repair pen fences, gates and shade structures as required
4. Complete cleaning and maintenance operation	4.1 Clean and store equipment appropriately at end of operation 4.2 Dispose of containers, leftover fluids, waste and debris from the cleaning operations appropriately 4.3 Complete records and documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCLSK217 Apply animal welfare principles to handling and husbandry of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to apply animal welfare principles to the handling and husbandry of animals to ensure their welfare.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify animal welfare requirements	1.1 Identify legislative, regulatory and industry animal welfare requirements 1.2 Identify the principles of animal welfare
2. Comply with animal welfare requirements	2.1 Follow enterprise work health and safety policies 2.2 Carry out animal handling and husbandry activities in compliance with relevant animal welfare codes of practice and workplace requirements 2.3 Recognise animal welfare issues in the workplace and report to supervisor or management 2.4 Take appropriate corrective action as instructed by supervisor 2.5 Complete appropriate record keeping of workplace animal welfare concerns and actions taken as required
3. Participate in animal welfare process	3.1 Participate in workplace or industry animal welfare induction programs and training 3.2 Participate in workplace or industry animal welfare emergency training

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCLSK217 Apply animal welfare principles to handling and husbandry of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- follow enterprise work health and safety policies
- identify animal welfare requirements in relevant legislation, regulations, codes of practice and workplace procedures
- apply animal welfare principles to animal handling and husbandry activities in compliance with relevant animal welfare codes of practice and workplace requirements
- recognise and report animal welfare issues to supervisor
- participate in workplace or industry animal welfare emergency training

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal welfare legislation, regulations and codes of practice
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- workplace or industry animal welfare procedures and animal emergency procedures
- workplace or industry procedures for reporting and recording animal welfare concerns, non-conformance and malpractice in the workplace
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK301 Administer medication to livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- prepare, clean and maintain treatment site, facilities and equipment to industry standards
- select and utilise equipment and materials appropriate for treating requirements and match to work tasks
- muster, move and handle livestock for health treatments
- administer preventative health treatments in accordance with work plan
- monitor effectiveness of treatments and provide follow up if required
- maintain records of treatments
- assess and calculate herd/flock numbers, measure dosage and quantities
- monitor livestock behaviour and recognise abnormalities
- apply contingency measures for administering treatments in the event of adverse weather conditions
- carry out animal husbandry procedures
- provide due care and handle livestock humanely
- communicate abnormalities, equipment faults and workplace hazards
- read and interpret manufacturers specifications, work and maintenance plans, veterinary chemical labels and Safety Data Sheets (SDS's)
- apply relevant work health and safety requirements
- apply relevant biosecurity requirements
- apply relevant animal welfare practices
- apply relevant environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- equipment and materials for treating livestock, their components and functions
- livestock health treatments, procedures and methods
- livestock identification methods
- mustering and moving techniques
- withholding periods for residues in meat, milk or wool
- technique of disposing of livestock residues and waste appropriately
- hazards associated with handling livestock and veterinarian medicines and chemicals
- implications and management of veterinary medicine and/or chemical resistance
- personal protective clothing and equipment and when and how it should be used and maintained
- procedures for cleaning and maintaining treatment equipment and materials
- enterprise policies with regard to treating livestock, recording and reporting routines
- relevant State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare, biosecurity and the use and control of hazardous substances

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK302 Mate and monitor reproduction of alpacas

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implementing safe operating procedures
- accurately score alpaca condition
- assist with ultrasonography and blood collection if requested by professional service providers
- clean up work site and safely dispose of waste
- monitor the condition of female and male alpacas
- recognise ovulation and detect oestrus in females
- supervise alpaca mating and assisting as appropriate
- conduct a spit off
- conduct and commission pregnancy tests
- identify and implement action required as a result of pregnancy tests
- communicate effectively with other team members and veterinarians
- apply relevant work health and safety requirements
- apply relevant biosecurity policies requirements
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- alpaca handling and assisted joining techniques
- alpaca health and abnormalities
- alpaca movement and behavioural characteristics
- enterprise and industry identification system for alpaca

- enterprise and industry policies regarding recording and reporting routines for matings
- management of female and male body conditions core through nutrition programs
- Johne's disease status mating procedures
- mobile mating procedures
- relevant Personal Protective Equipment (PPE) and when and how it should be used
- pregnancy testing techniques, including detection of ovulation
- state and territory animal welfare legislation and codes of practice
- relevant state and territory legislation, regulations and codes of practice with regard to work health and safety and biosecurity

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK303 Carry out feedlot operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out feedlot operations

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to corporate, small scale or opportunity lot feeding of cattle, sheep and goats.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

In addition to legal responsibilities, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work with livestock feed	1.1 Check work to be undertaken from work program and confirm with supervisor where necessary. 1.2 Identify work health and safety hazards, assess risks and apply suitable control measures 1.3 Select, use and maintain suitable personal protective equipment 1.4 Select, check and maintain tools and equipment suitable for the work to be undertaken 1.5 Identify environmental impacts of undertaking work, assess likely outcomes and, if necessary, take responsible action
2. Mix feed	2.1 Calibrate scales and containers to be used for measurements 2.2 Identify ingredients from instructions and obtain from storage locations 2.3 Measure ingredients in the specified ratios and quantities 2.4 Blend ingredients adequately and hygienically in the manner specified using appropriate equipment 2.5 Carry out grinding, where required, in the manner specified and using appropriate equipment
3. Feed livestock	3.1 Store feed appropriately 3.2 Check the physical quality, quantity and type of feed on their arrival to the shed 3.3 Feed livestock at scheduled time, rate and frequency 3.4 Maintain quality and hygiene of feed throughout the feeding process
4. Apply and maintain feedlot hygiene and biosecurity procedures	4.1 Examine livestock entering feedlot, check their documentation and quarantine them for specified period 4.2 Maintain cleanliness and hygiene by selecting and using appropriate cleaning methods 4.3 Maintain thorough personal hygiene practices in all activities associated with handling livestock, including reducing risks from diseases transmissible to humans (zoonotic diseases) 4.4 Dismantle and clean equipment and fittings and replace correctly 4.5 Place and dispose of waste and debris in allocated areas, and ensure run-off is managed according to the Feedlot Code of Practice, environmental legislation and public health standards 4.6 Check and sign in visitors to feedlot according to enterprise and industry procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant work health and safety requirements, identify hazards and implement safe work procedures
- prepare equipment and machinery mixing feed
- identify a range of grain and feed types and qualities
- mix livestock feed
- feed livestock
- follow relevant procedures for the safe and environmentally responsible disposal of waste
- apply and maintain relevant feedlot hygiene and biosecurity procedures
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety requirements
- relevant biosecurity requirements
- relevant animal welfare practices
- tools and equipment used for working with livestock feed, their functions and maintenance
- environmental impacts of working with livestock feed and mitigation methods
- measurement systems for livestock feed, and calibration and maintenance of measuring equipment
- types of grains and feed ingredients (grains, meals, vitamins, minerals and premix formulations) used for feeding livestock, their functions, characteristics and quality assessment methods

- methods and equipment for blending and grinding of feed
- methods of storage and handling of livestock feed and impact of feed quality changes on livestock
- livestock feeding programs and impact of program changes or variations on livestock
- impact of biosecurity practices on livestock in a feedlot
- cleaning methods, cleaning agents, their proper use and disposal, and relevant Work Health and Safety practices
- common zoonoses and their impacts on human and livestock health
- management and disposal of waste, debris and run-offs according to relevant biosecurity and environmental regulations, codes of practice, industry and enterprise standards
- management of and biosecurity requirements for visitors to the feedlot

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK304 Carry out post-mortem examination of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out post-mortem examination of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts and use discretion and judgement in the selection and use of available resources

Individuals must comply with national and local regulations for disposal of the carcass.

Individuals must comply with regulations for sending of biological samples by post.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to conduct post-mortem / necropsy	1.1 Select site for post-mortem, ensuring compliance with biosecurity and environmental requirements 1.2 Prepare the site to be used for the post-mortem 1.3 Obtain and collate all relevant preliminary information about the carcass to be examined 1.4 Identify work health and safety and biosecurity hazards, assess risks and take appropriate action 1.5 Select and use personal protective equipment 1.6 Obtain and prepare required equipment and resources 1.7 Move the animal to be examined to the post mortem area using appropriate manual lifting techniques and equipment 1.8 Seek expert assistance if required
2. Carry out post-mortem examination	2.1 Carry out external assessment and note outward signs of disease or injury 2.2 Seek expert advice and assistance before proceeding where unusual symptoms are present 2.3 Perform post mortem of the carcass in a systematic and safe manner using appropriate techniques and equipment, without causing artificial damage to organs and tissues 2.4 Examine organs, tissues and joints 2.5 Take samples of organs and tissues where appropriate, and place in properly labelled containers to meet laboratory requirements 2.6 Record relevant data and details of the post mortem examination and suggest the cause of death where possible
3. Carry out post necropsy procedures	3.1 Dispose of carcass and biological materials using appropriate equipment and comply with biosecurity and environmental requirements, and national and local regulations for carcass disposal 3.2 Send labelled and packaged samples to the laboratory for analysis and comply with regulations for sending biological samples by post 3.3 Collate all information about the livestock examined and the records made during the post-mortem, and forward to supervisor or veterinarian for analysis and establishing a diagnosis 3.4 Clean and disinfect all equipment used and store appropriately 3.5 Clean and disinfect site used for the post-mortem 3.6 Disinfect disposable personal protective equipment before disposing them 3.7 Wash hands and exposed body areas thoroughly 3.8 Change clothing and place in appropriate bin for laundering and disinfect boots

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK304A Carry out post-mortem examination of livestock

Assessment Requirements for AHCLSK304 Carry out post-mortem examination of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for post mortem, ensuring appropriate handling and use of equipment, personal protective equipment and disinfectants
- identify work health and safety and biosecurity hazards and implement risk controls
- handle carcasses safely and appropriately
- perform external examination and post mortem examination of carcass
- dispose of carcass appropriately
- carry out post necropsy procedures of cleaning and disinfection of equipment, post mortem site and personal protective equipment
- prepare biological samples for sending to the laboratory where appropriate
- carry out procedures for personal hygiene
- apply relevant work health safety environmental and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- sequence of actions in conducting a post mortem examination
- appropriate handling and use of post mortem equipment, personal protective equipment and disinfectants
- requirements for correct preparation, labelling and packaging of biological samples
- anatomy and physical features of the species being examined
- common causes of death for the species being examined
- typical signs of pathology in major organs
- typical symptoms and clinical signs of notifiable diseases in the relevant species

-
- relevant work health and safety environmental and biosecurity requirements, and carcass disposal regulations

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on a livestock carcass:

- carry out post mortem examination

Assessors must satisfy current standards for RTOs.

AHCLSK305 Maintain livestock water supplies

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain livestock water supplies.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify maintenance requirements	1.1 Check livestock water supplies for quality and inspect for signs of contamination or deterioration, and low or interrupted supply

Element	Performance criteria
	1.2 Check components of water supply systems for wear, deterioration or malfunctions 1.3 Check and confirm Identified maintenance requirements according to the maintenance plan
2. Prepare for maintenance	2.1 Select tools, equipment and materials appropriate to the job requirements and check for serviceability 2.2 Identify faulty or unsafe tools and segregate for repair or replacement 2.3 Identify hazards, assess risks and implement control measures 2.4 Select and use personal protective equipment
3. Carry out maintenance procedures	3.1 Maintain water systems and equipment to manufacturers specifications, livestock requirements and maintenance plan 3.2 Carry out maintenance and repair of motors where necessary, including fault finding 3.3 Report more complex faults and repair requirements to the supervisor
4. Complete maintenance activities	4.1 Clean worksite, tools and materials, return to operating order and store 4.2 Report malfunctions, faults, and wear or damage to tools for repair or replacement 4.3 Collect, treat and dispose of or recycle unwanted materials and waste from maintenance activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK305A Maintain livestock water supplies

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK305 Maintain livestock water supplies

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- estimate water requirements based on average and peak demand for water
- test and monitor machinery and equipment for correct operation and recognise minor faults and report major faults
- identify the components of a range of water supply systems
- arrange water supply system components and materials
- use hand and power tools safely
- carry out routine servicing and minor repairs on a range of water supply systems and equipment
- work as part of a contract team as required
- demonstrate safe and positive environmental working practices
- test water quality as directed
- read and interpret a water supply plan
- measure and calculate lubrication requirements
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock requirements and average and peak demand for water
- operational principles of various pumps and pumping systems
- functions and components of a range of water supply systems
- operation and maintenance of diesel and petrol engines

- factors which affect water quality, various water contaminants and remedial action
- advantages and disadvantages of different types of water supply systems
- State and Territory work health and safety legislative requirements relevant to the job role
- relevant legislative requirements with regard to property water supply systems
- environmental code of practices associated with maintenance activities.

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK306 Coordinate and monitor production performance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate resources and monitor the work of others within an intensive production process.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work, including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for work in the	1.1 Confirm work to be undertaken from work program where

Element	Performance criteria
production area	<p>necessary, and clarify with supervisor if required</p> <p>1.2 Identify hazards, assess risks and implement suitable controls</p> <p>1.3 Select and use suitable personal protective equipment</p> <p>1.4 Select, check and maintain tools and equipment suitable for the work to be undertaken</p> <p>1.5 Communicate the personal protective equipment and other safety requirements to staff and contractors, and obtain confirmation of understanding</p>
2. Coordinate work activities	<p>2.1 Communicate the work required to staff and contractors clearly and unambiguously following the production plan and program</p> <p>2.2 Meet work schedules, plans and priorities according to the needs of the organisation or situation</p> <p>2.3 Ensure the allocation of work optimises resources and the existing competencies of staff</p> <p>2.4 Provide feedback to staff and management on request, or as necessary</p>
3. Monitor daily operations	<p>3.1 Assess manure and litter consistency and treat to prevent deterioration, where appropriate</p> <p>3.2 Implement the designated lighting and internal environment programs for the unit</p> <p>3.3 Check that effluent storage and disposal systems are operated according to the production program and manufacturer's instructions</p> <p>3.4 Ensure that all rubbish and used consumables are removed from production site according to the requirements of the production program</p> <p>3.5 Ensure work, health and safety requirements are being observed and followed</p> <p>3.6 Communicate with operational staff and any contractors regularly to ensure smooth operation and progress</p>
4. Monitor herd/flock health	<p>4.1 Observe herd/flock and shed conditions for signs of ill health, and record and report changes</p> <p>4.2 Examine livestock for evidence of disease through post-mortem techniques in line with individual unit standard and veterinary advice</p> <p>4.3 Identify disease status of unit stock and request serviceman or veterinary assistance when required</p> <p>4.4 Check components of quarantine/ biosecurity procedures for compliance</p> <p>4.5 Comply with enterprise animal welfare policies</p>

Element	Performance criteria
5. Complete records and documentation	5.1 Collate information gathered throughout production operations 5.2 Graph collated information where required, and prepare for presentation to supervisor or manager ensuring easy recognition and extraction of data

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK306 Coordinate and monitor production performance

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- maintain biosecurity procedures and report concerns immediately
- read and interpret cost sheets, production information, target statistics, quantities of feed and other inputs
- read and interpret production and other information in a manner that is readily accessible for both management and operators
- monitor shed temperature and adjust as required
- read and interpret spreadsheet information using a software package
- discuss production performance, risk and hazard potential, quality of output, and methods of production with both management and operators
- read and interpret the activities contained in livestock production plans
- observe, identify and react appropriately to work health and safety hazards and environment risks
- recognise when performance standards are not met and investigate and report findings in written form
- provide supervision of staff including allocating duties and feedback on performance
- read and interpret cost sheets, production information, target statistics, quantities of feed and other inputs
- prepare and present production and other information in a manner that is readily accessible for both management and operators
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

-
- biosecurity procedures and codes of practice
 - common livestock diseases and clinical signs
 - relevant industry, environmental and quality standards (including ISO9002:1094)
 - animal welfare codes of practice and procedures
 - types of sheds and equipment
 - raw data to determine issues and problems
 - recording and reporting requirements
 - fundamentals of quarantine and control methods
 - common feed ingredients and additives
 - water reticulation systems and quality
 - State and Territory work health and safety legislation and codes of practice relevant to the sector

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK307 Euthanase livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to euthanase livestock without distress or suffering prior to cessation of their vital life functions.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts and use discretion and judgement in the selection and use of available resources.

Individuals must hold firearms licenses if they are using firearms to euthanase livestock.

Individuals must comply with national and local regulations for disposal of the carcass.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for euthanasia	1.1 Confirm criteria for decision to destroy livestock conforms to workplace procedures and approval of supervisor where required 1.2 Confirm the method selected to destroy livestock is suitable for the species and meets animal welfare requirements, as outlined in the relevant codes of practice 1.3 Prepare equipment and materials required to complete the euthanasia 1.4 Identify hazards, assess risks and implement control measures 1.5 Identify environmental and public safety risks associated with the euthanasia 1.6 Obtain licences and permits required to complete euthanasia where necessary 1.7 Check and prepare equipment and materials for euthanasia 1.8 Select and use personal protective equipment
2. Carry out euthanasia of animal	2.1 Handle and transport equipment appropriately and safely 2.2 Restrain animal in a way that minimises pain and distress 2.3 Euthanase animal in a quick and painless way 2.4 Check animal to ensure it is dead 2.5 Destroy animals that have not been euthanased immediately, in a humane manner
3. Carry out post euthanasia procedures	3.1 Handle and prepare carcass to be used for research or commercial according to enterprise requirements 3.2 Dispose of carcass not to be used for research or commercial purposes in line with legislative and enterprise requirements 3.3 Clean and store equipment and materials 3.4 Report and record animal and euthanasia details as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK307 Euthanase livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant animal welfare requirements
- implement relevant work health and safety practices
- implement relevant biosecurity requirements
- prepare for euthanasia
- carry out euthanasia of animal
- confirm signs of death in the euthanased animal
- handle, prepare or dispose of carcass in line with workplace procedures, national and local regulations
- clean and store equipment and materials
- record details of the euthanasia

Knowledge Evidence

The candidate must demonstrate knowledge of:

- their responsibilities with regard to animal welfare as outlined in the relevant animal welfare codes of practice
- relevant work health and safety and biosecurity requirements, explain the requirements of statutory legislation and codes of practice related to euthanasing livestock
- workplace procedures for euthanasia of livestock as required, describe animal handling, restraint and behaviour for carrying out euthanasia
- signs of death in an animal
- anatomy and physical features of the relevant livestock species
- methods of euthanasia suitable for the livestock species as outlined in the relevant codes of practice

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on a live animal:

- carry out euthanasia of animal

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and implement safe work practices
- handle and draft livestock in line enterprise animal welfare practices
- identify criteria for animal selection
- control and sort livestock
- select animals according to selection criteria
- safely and humanely apply identification devices
- appraise and grade animals
- recognise livestock abnormalities
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- handling techniques and restraint methods
- animal movement and drafting
- animal welfare principles
- livestock behaviour relevant to drafting
- selection criteria for breeding stock
- livestock identification systems and devices
- enterprise animal identification procedures
- State and Territory work health and safety and animal welfare legislative and enterprise requirements.

Assessment Requirements for AHCLSK309 Implement animal health control programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices for animal health treatment
- identify the symptoms of parasite infestation and other diseases
- monitor animal health status and refer to the production plan for intervention strategies
- select livestock prone to infection for culling
- accurately diagnose the type and severity of infection or parasite infestation
- arrange and co-ordinate equipment and resources
- read and interpret chemical and veterinary health labels, manufacturer's specifications and Safety Data Sheets (SDSs)
- calculate animal numbers and measure treatment dosage and rates
- select and administer treatments appropriate to treat infections and infestations and observe withholding periods
- drench and vaccinate livestock
- provide due care and humanely handle animals
- return animals to prepared and clean environments
- monitor animals for treatment effectiveness
- apply relevant work health and safety requirements
- apply relevant biosecurity, animal welfare and environmental sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of parasite infestation and their symptoms
- parasite resistance of different classes of livestock

- application procedures and effects of veterinary chemicals
- types of health preparation treatments
- enterprise vaccination program and procedures
- identification of and prescribed treatments for infections and infestations
- grazing management strategies used in internal parasite control
- drenching equipment, drenches and their efficiency
- relevant codes of practice with regard to the safe use and handling of hazardous substances
- withholding periods for treated animals
- animal handling and restraint techniques
- animal welfare principles
- relevant work health and safety and animal welfare legislative and enterprise requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK310 Implement feeding plans for intensive production

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement feeding plans

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to intensive animal production systems.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for feeding	1.1 Identify work health and safety hazards, assess risks and implement suitable controls 1.2 Assess and record livestock welfare and condition 1.3 Identify livestock production status or stage of production 1.4 Identify environmental impacts of undertaking work, assess likely outcomes and, if necessary, take responsible action 1.5 Check and maintain feed distribution system and feeders 1.6 Follow enterprise animal welfare policies
2. Carry out feeding and watering	2.1 Check automatic and computerised feeders for blockages and correct functioning 2.2 Rectify abnormalities or irregularities with feed stocks 2.3 Monitor feed consumption and wastage and make adjustments 2.4 Feed and water livestock as required 2.5 Adjust watering systems for height or position 2.6 Check water flow and make appropriate adjustments 2.7 Empty watering containers or lines and clean where necessary
3. Conduct hygiene and administration activities	3.1 Clean feeding equipment appropriately to maintain hygiene standards 3.2 Collate gathered information and present the information 3.3 Complete required records and documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK310A Implement feeding plans for intensive production

Assessment Requirements for AHCLSK310 Implement feeding plans for intensive production

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply relevant work health and safety requirements, identify hazards and implement safe work procedures and suitable risk controls
- assess livestock according to enterprise requirements
- prepare for feeding livestock
- carry out feeding and watering
- clean feeding equipment
- complete records and documentation
- follow relevant biosecurity requirements and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety requirements
- relevant animal welfare practices and biosecurity requirements
- environmental impacts of intensive livestock feeding
- methods of assessing livestock condition
- systems and stages of intensive livestock production
- feed distribution systems and feeders, their functions, maintenance and servicing
- methods of storage and handling of intensive livestock feed and impact of feed quality changes on livestock
- intensive livestock feeding programs and impact of program changes or variations on livestock
- watering systems and equipment, their functions, maintenance, servicing and impact of changes or variations on livestock

- methods of cleaning feed equipment, cleaning agents, their proper use and disposal, and relevant work health and safety practices
- type of information to be gathered, documentation and records which must be maintained

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK311 Implement feeding plans for livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor available pasture for grazing and implementing a feeding plan.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Determine livestock condition and nutritional requirements	1.1 Monitor and report livestock condition 1.2 Identify livestock production status 1.3 Source livestock nutritional requirements and the nutritional value of feedstuffs from the feeding plan 1.4 Use feeding plans to determine adjustment in response to the monitoring of livestock condition and pasture growth 1.5 Report and separate animals that are in atypical condition, injured or diseased in line with enterprise biosecurity policies 1.6 Apply enterprise animal welfare policies to livestock handling and husbandry activities
2. Assess pasture feed	2.1 Assess quantity and quality of available pasture 2.2 Implement grazing management plans and monitor to ensure the sustainable stocking capacity of pasture 2.3 Monitor grazing behaviour of livestock and identify shy or problem feeders 2.4 Determine livestock feeding methods and level of supplementary feeding if required
3. Manage the feeding of livestock	3.1 Graze livestock on pasture according to the guidelines described in the feeding plan 3.2 Obtain required supplementary feed 3.3 Provide supplementary feed to livestock in the appropriate manner and times 3.4 Identify and assess indications of any negative environmental impacts and make amendments to the feeding method as required 3.5 Monitor and report condition and live weight response to feeding

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK311 Implement feeding plans for livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor pasture health and condition
- assess herd/flock health and condition and live weight
- identify livestock nutritional requirements
- order feed if requested in line with feeding plan
- identify feeding problems and animals that require individual treatment
- handle livestock humanely and monitor animal welfare
- respond to or report negative environmental impacts of feeding
- apply relevant biosecurity, animal welfare and environmental sustainability policies

Knowledge Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor pasture health and condition
- assess herd/flock health and condition and live weight
- identify livestock nutritional requirements
- order feed if requested in line with feeding plan
- identify feeding problems and animals that require individual treatment
- handle livestock humanely and monitor animal welfare
- respond to or report negative environmental impacts of feeding

- apply relevant biosecurity, animal welfare and environmental sustainability policies

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK312 Coordinate artificial insemination and fertility management of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate artificial insemination and fertility management of livestock.

This unit can be delivered in the context of the following industries: beef cattle, dairy cattle, alpacas, sheep and goats.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity requirements, and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts and use discretion and judgement in the selection and use of available resources.

Operators performing artificial insemination may require accreditation and certification, such as National Herd Improvement Association of Australia Inc. accreditation for cattle AI technicians.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare animals for artificial insemination (AI)	1.1 Determine body condition of individual female livestock and record body condition scores 1.2 Rank female livestock according to body condition scores and adjust nutritional requirements to facilitate optimum condition at the time of artificial insemination 1.3 Ensure that feeding strategies and supplementation are appropriate to animals' environment and seasonal conditions 1.4 Confirm females are not pregnant before commencing the AI program
2. Facilitate artificial insemination	2.1 Carry out oestrus inducement and detection procedures appropriately in compliance with animal welfare requirements and industry standards 2.2 Prepare artificial insemination equipment and facilities and obtain semen 2.3 Use handling techniques that minimise stress and discomfort to livestock in compliance with work health and safety and animal welfare requirements 2.4 Apply hygiene procedures to minimise risk of infection
3. Carry out post AI procedures	3.1 Maintain female livestock on appropriate nutrition and husbandry management 3.2 Monitor female livestock for signs of early abortion or return to oestrus 3.3 Apply pregnancy detection techniques at earliest opportunity. 3.4 Complete and maintain records of artificial insemination and pregnancy status

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK312A Coordinate artificial insemination and fertility management of livestock

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCLSK312 Coordinate artificial insemination and fertility management of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare females for insemination
- detect females in oestrus
- sterilise equipment and prepare hygienic worksite prior to insemination procedures
- coordinate the artificial insemination of animals
- monitor livestock post insemination
- coordinate and record the results of pregnancy testing
- follow relevant work health and safety, animal welfare and biosecurity requirements and practices relevant to work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- body condition scoring
- relevant husbandry and management practices for pregnant and non-pregnant female livestock
- relevant anatomy and physiology of female livestock
- reproductive physiology and pregnancy development of female livestock
- requirements and procedures of artificial insemination
- reproductive diseases and complications in female livestock
- pregnancy testing methods
- relevant work health and safety, animal welfare and biosecurity requirements, and sustainability practices

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- facilitate artificial insemination

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- monitor livestock health and welfare
- monitor the production environment
- monitor feed systems and water supplies
- perform routine maintenance checks
- complete monitoring activities
- follow relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- production parameters and production assessment systems of the livestock industry
- signs of health and methods of assessing livestock health
- relevant animal welfare requirements of the livestock industry and their impact on the enterprise
- housing, production and management systems of the livestock industry and equipment used in these systems
- relevant hygiene and biosecurity requirements of the livestock industry and their impact on the enterprise
- relevant waste disposal requirements of the livestock industry and their impact on the enterprise
- feed management and feeding programs of the livestock industry and their impact on the enterprise

- monitoring, maintenance and servicing of housing structures, production structures, environmental control equipment, watering equipment and feed delivery equipment
- type of information to be gathered, documentation and records which must be maintained
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK314 Prepare animals for parturition

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- match supply of grazing or predetermined rations to nutritional requirements for pregnant animals
- monitor animal health and condition and recognise abnormalities
- carry out animal husbandry procedures, and provide due care and handle animals humanely in line with enterprise animal welfare policies
- maintain animal shelter and housing where applicable
- administer preventative health treatments
- collect, store and administer colostrum
- implement contingency measures in the event of adverse weather or birthing difficulties
- employ safe and environmentally responsible systems and procedures with regard to the handling of animals, feed, hazardous substances and predator control strategies
- read and interpret manufacturers specifications, work and feeding plans, and Safety Data Sheets
- assess and calculate herd/flock numbers, measure feed, assess rate and frequency of feeding, and calculate animal gestation
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- physiological and behavioural signs of impending birth
- animal behaviour and nutritional requirements of pregnant animals
- pasture and animal grazing management
- feed and feed supplements for pregnant animals and when to provide them

- effects of weather conditions, and inadequate nutrition on pregnant animals and their newborn
- preventative health treatments, procedures and methods
- animal husbandry procedures
- environmental impact of animals on ground cover and minimisation measures
- hazards associated with handling animals and veterinarian medicines and chemicals
- State/Territory legislation, regulations and codes of practice with regard to work health and safety, animal welfare and poisons
- predators and behaviour patterns, and control and eradication measures
- relevant licensing and permit requirements (firearms)
- enterprise policies with regard to birthing animals, recording and reporting routines

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK315 Prepare for and implement natural mating of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- prepare dams and sires for joining
- manage dams and sires during joining
- appraise breeding soundness in animals
- estimate live weights
- monitor joining activity
- prepare joining paddocks
- assess the serving capacity and fertility of males pre joining
- ensure females are above minimum body weights to exhibit oestrus
- use sufficient males for the number of females to be mated in the group
- use back up sires where single sire mating is practised
- record mating details
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- mating behaviour of sires and dams
- optimum live weights and condition for mating
- physical abnormalities and mating problems in males and females
- environmental influences on joining

- work health and safety and animal welfare legislation, codes of practice and enterprise procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK316 Prepare livestock for competition

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- plan for and provide livestock feed and water requirements
- maintain livestock facilities and handling equipment
- restrain, handle and groom livestock using safe and humane methods and procedures
- train livestock for showing
- comply with animal welfare requirements
- prepare livestock to competition standards
- parade and present livestock for show
- read and interpret written information, receive, comprehend and communicate oral information, write basic statements and maintain livestock records
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- competition requirements for grooming, handling and presentation
- components and functions of handling equipment
- handling techniques, restraint methods and when to use them
- livestock grooming and training techniques (to lead and stand correctly)
- livestock health and nutritional requirements
- preparation and maintenance requirements for livestock facilities and equipment
- livestock movement and behavioural characteristics in handling and confined areas

- work health and safety , animal welfare and livestock movement legislative requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK317 Plan to exhibit livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select livestock for exhibition
- prepare animals for exhibition
- present livestock to best advantage
- promote the product to clients and pursue sales opportunities
- communicate with staff during preparations, exhibit officials and potential customers
- identify potential exhibits against selection criteria to accurately select livestock/fleeces
- train animals to be led and presented in competition
- organise entries, resources and facilities for showing
- arrange and prepare for transport
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- criteria for competition judging
- preparation procedures
- requirements for entry of competitors
- transportation requirements
- feeding and nutrition requirements
- communication and supervision techniques
- observation methods

- relevant legislative work health and safety requirements, especially as they relate to livestock and fleece exhibitions, and animal transportation, animal welfare and safe livestock handling techniques
- enterprise and industry policies and codes of practice with regard to livestock exhibitions, sales, livestock transportation, and recording and reporting requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK318 Rear newborn and young livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to rear newborn and young livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Prepare for care of newborn and young	1.1 Identify, select and prepare facilities, equipment and supplies needed to provide care 1.2 Assess and prepare for the needs of newborn and young animals 1.3 Implement and observe feeding routines 1.4 Identify and maintain hygiene, health and environmental requirements 1.5 Handle newborn and young animals humanely in line with enterprise animal welfare policies
2. Provide care for newborn and young	2.1 Provide feed and feed supplements as required 2.2 Monitor relationship between mother and young and implement strategies to address any problems where appropriate 2.3 Maintain and monitor feeding, water and shelter areas for correct operation, cleanliness and hygiene 2.4 Treat routine health and feeding problems, including digestive upsets and infections
3. Monitor health of newborn and young	3.1 Monitor newborn and young against benchmarks for growth, health and development 3.2 Take appropriate action for sick, weak, orphaned and injured, newborn and young 3.3 Seek assistance for more complex health and feeding problems 3.4 Separate newborn and young requiring routine husbandry and health procedures treat and return 3.5 Carry out treatments and checks appropriately
4. Meet ongoing requirements	4.1 Identify young animals ready for weaning and wean according to weaning programs 4.2 Identify and meet feeding requirements 4.3 Handle animals regularly as required 4.4 Keep and maintain records 4.5 Ensure all work is conducted safely and in accordance with enterprise requirements, work health and safety and animal welfare legislation and regulations

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK318A Rear newborn and young livestock

Assessment Requirements for AHCLSK318 Rear newborn and young livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- weigh and assess condition of newborn and young animals
- work within animal welfare legislative requirements and enterprise and industry guidelines
- identify abnormal conditions and report or react promptly
- safely and humanely handle and care for newborn and young animals
- recognise signs of stress or ill health in newborn and young animals
- communicate with other personnel
- provide support as needed to veterinarians attending to sick newborn and young animals
- collect samples
- identify the young and their parent
- use feed, shelter and ventilation equipment
- calculate feed and dose rates
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- newborn and young animals development and growth
- newborn and young animals feed, shelter and environmental requirements
- common deformities
- infection controls and treatment programs

- significance of colostrum to livestock
- feeding systems and weaning strategies
- husbandry procedures
- hygiene and cleanliness requirements
- enterprise requirements for rearing of newborn and young animals and recording and reporting requirements
- relevant legislative animal welfare health and work health and safety requirements especially as they relate to safe animal handling techniques, feeding, animal treatments, and rearing and caring for newborn and young animals

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK319 Slaughter livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to slaughter livestock humanely.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They work in a range of known contexts, use discretion and judgement in the selection and use of available resources and complete routine activities.

Individuals must hold firearms licences if they are using firearms to slaughter livestock.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for slaughter	1.1 Identify reasons for slaughter 1.2 Identify and prepare slaughter site

Element	Performance criteria
	1.3 Prepare equipment and transport equipment to slaughter site where required 1.4 Select and prepare livestock to be slaughtered in compliance with animal welfare requirements 1.5 Determine the slaughter method
2. Slaughter animal	2.1 Conduct slaughter humanely in compliance with work health and safety and animal welfare requirements 2.2 Bleed animal by severing the major blood vessels safely and hygienically 2.3 Dress, hang and protect carcase where appropriate 2.4 Comply with all relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements
3. Complete slaughter operations	3.1 Dispose of, or destroy offal and waste products in an environmentally responsible manner and according to State/Territory and local authority health standards 3.2 Clean and store equipment safely and appropriately 3.3 Clean slaughter site appropriately 3.4 Prepare meat for intended use where appropriate

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCLSK319 Slaughter livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare site, equipment and livestock for slaughter safely and appropriately
- conduct the slaughter of livestock in compliance with relevant requirements and regulations
- complete slaughter operations
- dispose of, or destroy offal and waste products in an environmentally responsible manner and according to State/Territory and local authority health standards
- comply with all relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, public health, hygiene, animal welfare, biosecurity and environmental sustainability requirements
- preparation, selection and use of the site, equipment and livestock for the slaughter
- methods and procedures for the humane slaughter of livestock
- preparation, processing and disposal of the carcass and its parts after slaughter
- post-slaughter procedures for the site and equipment
- anatomy and physical features of the species being slaughtered
- typical signs of pathology in major organs
- typical symptoms and clinical signs of notifiable diseases in the relevant species
- codes of practice for the welfare and husbandry of relevant livestock species

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on a live animal:

- prepare for slaughter
- slaughter animal
- complete slaughter operations

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

AHCLSK320 Coordinate and monitor livestock transport

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to safely and efficiently transport livestock to a destination within specified timeframes.

Animal welfare and low stress stock handling principles and practices are to be observed at all times.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for the transport of livestock	1.1 Check the transport directions and calculate load 1.2 Determine transport requirements and engage a suitable carrier 1.3 Identify required equipment and resources and move livestock to loading facility 1.4 Assemble and prepare livestock for transport 1.5 Identify existing and potential hazards and report to supervisor
2. Load livestock	2.1 Observe industry and enterprise work health and safety policies and procedures 2.2 Ensure documentation is signed by the relevant person and check that the required animal identification is in place 2.3 Obtain relevant permits and comply with movement restrictions where required 2.4 Record animal details and identification as required using technology where applicable 2.5 Load and secure prepared livestock in accordance with industry and enterprise animal welfare and work health and safety procedures and requirements
3. Monitor transport and unload livestock	3.1 Communicate with the carrier to ensure livestock are transported with minimal stress and discomfort according to animal welfare requirements 3.2 Ensure livestock are checked regularly throughout the journey and unloaded for feeding and watering appropriately 3.3 Unload livestock using appropriate equipment and facilities, such as National Livestock Identification System (NLIS) readers where applicable 3.4 Monitor livestock condition and welfare post transport and provide feed and water appropriately
4. Complete transportation operations	4.1 Clean, maintain and secure vehicle, equipment and facilities appropriately 4.2 Complete required records according to legislative and enterprise requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK320 Coordinate and monitor livestock transport

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- interpret transport plan requirements
- coordinate the transport of livestock
- safely, load livestock while maintaining load within specifications
- distribute animals on transport to prevent overcrowding and minimise risk of injury
- obtain relevant permits and comply with movement restrictions
- ensure documentation and livestock identification is in place
- ensure appropriate recording including use of technology where applicable
- safely unload livestock
- review health and condition of livestock after transit
- demonstrate safe and humane handling of livestock according to animal welfare codes of practice
- demonstrate safe and environmentally responsible workplace practices
- read and comprehend manufacturers specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- apply relevant work health and safety requirements
- apply relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- industry and legislative requirements for the transport of livestock
- model codes of practice for the welfare of animals Land transport (various species)

- animal welfare, biosecurity and work health and safety legislative requirements
- environmental codes of practice with regard to vehicle operation and livestock transport
- market requirements in relation to the quality and condition of livestock
- process of sourcing and costing transportation alternatives
- livestock transport recording and documentation requirements
- enterprise policies with regard to the use of vehicles and equipment
- relevant documentation requirements and procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK321 Service and repair bores and windmills

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to service and repair bores and windmills. This includes activities such as replacing parts, checking equipment for wear and tear, determining lime deposits, stripping, dismantling or reassembling bores and windmills.

These activities carry risk of falls due to working at heights, injury due to working with moving parts and machinery.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes of practice and manufacturer's specifications

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish bore history and enterprise policy	1.1 Review enterprise records and confirm bore history 1.2 Confirm enterprise bore and windmill service and repair policy with supervisor 1.3 Obtain any required specialist instructions and assistance as appropriate
2. Prepare to carry out service and repairs	2.1 Select and inspect tools, equipment and materials appropriate to job requirements 2.2 Carry out dismantling and stripping of windmill and bore installations appropriately 2.3 Identify hazards in the workplace, assess and control risks appropriately
3. Carry out service and repairs	3.1 Select, use and maintain personal protective equipment appropriately 3.2 Carry out service and repairs to bores, windmills, motors and pumps appropriately 3.3 Report complex faults and repairs and refer for specialist advice and remedial action appropriately 3.4 Retrieve lost equipment appropriately
4. Complete service and repair activities	4.1 Reassemble and test bore and windmill components appropriately for full function and flow 4.2 Clean work site, tools and equipment, return to operating order and store appropriately 4.3 Collect, treat, dispose of or recycle waste from service and repair activities appropriately 4.4 Document information appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK321A Service and repair bores and windmills

Assessment Requirements for AHCLSK321 Service and repair bores and windmills

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe work procedures
- apply basic diagnostic techniques
- recognise faults and deterioration of components and carry out repairs to bore, mill heads and pumps to ensure the full function and flow of water supplies
- select and match tools and equipment with work requirements
- apply safe workplace and positive environmental procedures
- read and interpret enterprise policy, maintenance plans, manufacturer specifications and Safety Data Sheets (SDSs)
- effectively communicate with contractors and supervisor, record and report maintenance details and outcomes
- calculate volumes, and measure speed, flow rates and distance
- maintain all components of bores and windmills
- carry out testing procedures to determine correct operation
- refer to bore histories for troubleshooting
- apply relevant work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- construction of bores and windmills and maintenance requirements
- diesel engine components, maintenance requirements and repair procedures
- working principles of diesel engines
- drive systems and components
- types and uses of lubricants and other servicing materials

- servicing characteristics of bores and windmills
- types, characteristics, uses and limitations of hand and power tools
- basic diagnostic processes and techniques
- environmental codes of practice with regard to maintenance activities
- work health and safety legislative requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK322 Transport farm produce or bulk materials

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to transport farm produce or bulk materials.

All work must be carried out to comply with workplace procedures, work health and safety, biosecurity legislation and codes of practice.

This unit applies to individuals who work under broad direction and take responsibility for own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

Note: relevant vehicles licences are required when farm produce or bulk materials are transported on public roads.

This unit does not apply to livestock transport

Relevant vehicles licences are required when farm produce or bulk materials are transported on public roads.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise for the transport of farm produce	1.1 Receive, interpret and clarify briefing, hand-over details, authorisation and clearances appropriately 1.2 Confirm the transportation schedule and organise appropriate equipment and authorised personnel 1.3 Adhere to schedule specifications 1.4 Identify and manage hazards and risks 1.5 Conduct equipment pre-operational checks 1.6 Observe site environmental practices
2. Load, transport and unload farm produce	2.1 Conduct start-up, park and shutdown procedures for plant and equipment 2.2 Determine load appropriately and prevent damage to equipment or loss of load 2.3 Load and secure farm produce 2.4 Transport farm produce 2.5 Ensure vehicles follow approved transport routes and speed limits 2.6 Conduct transport of farm produce 2.7 Unload farm produce or bulk materials 2.8 Coordinate transport of farm produce with harvesting machinery, if required 2.9 Complete transport of farm produce to plan and within the operating capacity of the equipment 2.10 Dispatch produce retain documentation, including weigh bills
3. Protect farm produce quality and integrity	3.1 Maintain hygiene of all surfaces in contact with farm produce 3.2 Protect farm produce from loss, contamination, moisture and pests during transport 3.3 Store farm produce according to enterprise procedures 3.4 Clean and maintain storage and holding areas, keeping potentially hazardous substances at a safe distance 3.5 Monitor the transport environment using temperature data loggers, if applicable 3.6 Check quality of farm produce at unloading 3.7 Monitor batches of farm produce for isolation and product integrity, where applicable

Element	Performance criteria
4. Carry out equipment maintenance	4.1 Conduct visual inspection and fault finding 4.2 Conduct routine operational servicing

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK322 Transport farm produce or bulk materials

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- manoeuvre transport machinery or truck in difficult sites and conditions
- drive truck safely using all available controls
- clean and store vehicles and equipment
- identify operational faults
- complete time sheets and other maintenance records as required
- use communication methods to advise and anticipate conditions
- interpret plans, reports, maps, specifications
- maintain and store records, reports, and log books
- select, fit, and use personal and protective equipment
- operate and load a truck in accordance with Road Traffic Regulations
- plan, load, unload and move a range of loads over a full range of road conditions in accordance with Road Traffic Regulations
- conduct pre-start and post-operational checks
- maintain the quality and integrity of transported produce
- apply relevant work health and safety requirements
- apply relevant biosecurity practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- manufacturers and work site requirements including property conditions, and hazards on the property and on the open road

- road traffic laws and licensing requirements
- organisational procedures for use of vehicles and equipment
- relevant work health and safety requirements for storage of materials and equipment
- work health and safety legislation, codes of practice, procedures, and principles, including manual handling
- emergency procedures
- site safety requirements
- equipment safety requirements
- operational, start up, and shutdown procedures and checks
- hauling and towing procedures
- receipt and document requirements at both ends of the transport operation
- differences in handling and operation with bagged and bulk loads
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs to the Assessment Conditions.

Assessment Requirements for AHCLSK323 Maintain and monitor feed stocks

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- undertake feed stocktake and update inventory
- determine quantities of stockfeed required
- place stockfeed orders with suppliers
- receive feed into feed store
- prepare and maintain feed storage areas and containers
- dispose of spoiled feeds
- implement relevant work health and safety and biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- stocktaking and inventory for stockfeeds
- enterprise livestock feeding plans and determination of stockfeed quantities and qualities
- procedures for ordering stockfeeds
- procedures for taking, checking and handling stockfeeds during delivery
- post-delivery handling and storage of stockfeeds
- quality parameters of stockfeeds and feed ingredients
- documentation and record keeping requirements for stockfeeds
- procedures for cleaning feed storage areas and containers
- pest management of feed storage areas and containers
- monitoring, maintenance and servicing of feed storage facilities
- feed disposal methods and management
- relevant work health and safety and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK324 Care for and train working dogs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select, train and care for working dogs in the rural industry.

This unit applies to farm workers who use dogs to handle livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. Individuals must be aware of state/territory regulations and licensing requirements for keeping working dogs.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify workplace requirement and select working dog	1.1 Identify and confirm working dog requirements for the workplace 1.2 Research suitable working dog breeds and determine availability 1.3 Inspect dogs for suitability and make selection according to workplace criteria
2. Develop and implement training program for working dog	2.1 Teach commands for working tasks 2.2 Introduce the dog to a small flock in a confined area 2.3 Train the dog to handle larger numbers in more open areas 2.4 Train the dog on specialist skills such as backing and forcing 2.5 Assess existing and potential hazards associated with handling livestock in the workplace and implement measures to control risks 2.6 Comply with animal welfare codes of practice
3. Maintain health and welfare of working dog	3.1 Monitor and maintain health and condition of the working dogs 3.2 Provide an adequate and balanced diet to meet nutritional requirements of the working dogs taking into account work load/training program 3.3 Seek veterinary advice and arrange for or administer preventative health treatments 3.4 Provide and maintain appropriate housing facilities and equipment in line with animal welfare requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK324 Care for and train working dogs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify the workplace need for working dogs
- select working dog to meet workplace requirements
- develop working dog training programs and apply effective training methods
- maintain health and welfare of the working dog
- follow relevant work health and safety and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- working dog breeds and behaviour
- use of working dogs in the workplace
- effective working dog training systems and procedures
- livestock handling methods and techniques
- care, husbandry and management procedures for working dogs
- signs of health, anatomy and physiology of working dogs
- common illnesses of working dogs and preventative health strategies
- relevant State/Territory legislative and regulatory requirements with regard to work health and safety, animal welfare, biosecurity and the registration and care of domestic dogs

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- develop and implement training program for working dog

Assessors must satisfy current standards for RTOs.

AHCLSK325 Castrate livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to castrate young animals.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Prepare for animal castration	<p>1.1 Interpret work to be undertaken from work program where necessary, and confirm with management</p> <p>1.2 Hold discussions with other workers who may be affected by the activities to ensure continued smooth operation of the production process</p> <p>1.3 Identify work health and safety hazards, assess risks, and implement suitable controls</p> <p>1.4 Select, use and maintain suitable personal protective equipment</p> <p>1.5 Hygienically clean castration area to minimise the risk of infection</p> <p>1.6 Select and assemble equipment, instruments and resources needed for castration operations, ensuring adequate supplies of consumables</p> <p>1.7 Separate male animals as required to facilitate ease of handling and to minimise stress and in compliance with animal welfare codes</p>
2. Castrate animals	<p>2.1 Select, catch and restrain individual animals using industry standard techniques</p> <p>2.2 Check animals for health and soundness according to organisation guidelines</p> <p>2.3 Castrate restrained animals in a humane and hygienic manner according to organisational guidelines, industry standards, and the relevant of animal welfare codes of practice</p> <p>2.4 Complete records as instructed by organisational guidelines</p>
3. Complete hygiene and administration activities	<p>3.1 Remove all debris, waste material and animal residues from the site and dispose of in an environmentally aware and safe manner according to organisation work procedures</p> <p>3.2 Hygienically clean, maintain and store instruments and equipment according to organisation work procedures</p> <p>3.3 Maintain a clean and safe area throughout and on completion of work</p> <p>3.4 Document work outcomes and report to the supervisor where appropriate according to organisation work procedures</p>
4. Monitor castrates	<p>4.1 Move animals from yard to pasture as soon as practical with minimal stress to reduce risk of infection</p> <p>4.2 Monitor animals to identify post-castration complications</p> <p>4.3 Identify and treat animals exhibiting signs of ill health or infection</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCLSK325 Castrate livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement safe operating procedures
- handle animals humanely and with minimal stress in line with animal welfare legislation codes of practice
- perform a recommended method of castration with attention to hygiene
- administer pre or post operative treatments
- monitor castrated animals
- carry out animal husbandry tasks in hygienic manner
- record the number and health of animals post castration
- work effectively as a part of a team and communicate with supervisors
- apply relevant work health and safety requirements
- apply relevant animal welfare and environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- male anatomy as it relates to castration
- castration methods for various species of livestock
- organisation castration, hygiene and animal welfare procedures and policies
- industry standards for the care and husbandry of animals
- industry and enterprise requirements for debris, waste material and animal residues disposal
- relevant work health and safety legislation, codes of practice and industry and enterprise requirements
- relevant animal welfare legislation, codes of practice and industry and enterprise requirements

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK326 Mix and mill standard stockfeed

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, assess risks and implement suitable control measures
- follow enterprise mill and mix stockfeed work program
- order and store feeds and ingredients
- identify feed ingredients and obtain from storage locations
- measure ingredients in the specified ratios and quantities
- mix feeds and ingredients in line with industry quality standards and requirements
- recognise and rectify minor operational faults and perform routine maintenance
- complete records and documentation of feed use and volumes for the shed
- conduct post-procedural hygiene and administration activities
- implement relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- enterprise requirements for mixing and milling feeds
- relevant work health and safety requirements
- tools and equipment machinery used for mixing and milling feeds, and the cleaning, maintenance, servicing and storage of such tools and equipment
- environmental impacts of mixing and milling feeds and strategies to mitigate such impacts
- type of feed ingredients and procedures for ordering, handling and storage of feed ingredients

- the impact of seed, chemical, insect and fungal contamination of grain. This includes an awareness of the industry process in place to monitor these contaminants - the National Residue Survey (NRS), the National Antibiotic Residue Minimisation (NARM) and programmed basket surveys
- measurement equipment for feed ingredients, and their calibration and maintenance
- procedures for mixing, blending and milling feed ingredients and feeds
- documentation and record keeping requirements for mixing and milling feed
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK327 Collect, store and administer colostrum

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect colostrum from lactating animals and processing the colostrum to support newborn animals.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Obtain colostrum	1.1 Obtain, check and sterilise required equipment 1.2 Select suitable donor animals and collect colostrum 1.3 Check frozen colostrum stored and select suitable ones for use 1.4 Select, use and maintain appropriate Personal Protective Equipment (PPE)
2. Administer colostrum to newborn animals	2.1 Identify newborn animals requiring supplementary colostrum 2.2 Obtain and prepare feeding equipment 2.3 Thaw frozen colostrum at room temperature 2.4 Warm thawed colostrum to body temperature 2.5 Administer warmed colostrum to newborn animals according to individual animal requirements and workplace procedures 2.6 Check newborn animals regularly after administration of colostrum and repeat colostrum feeds as required 2.7 Follow enterprise animal welfare policies
3. Store colostrum	3.1 Filter colostrum according to workplace procedures and place in appropriate container 3.2 Freeze surplus colostrum for future use and label container with details of donor animal and date of collection

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK327A Collect, store and administer colostrum

Links

Assessment Requirements for AHCLSK327 Collect, store and administer colostrum

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- obtain colostrum from suitable donor animals and select suitable frozen colostrum
- handle and feed new born animals appropriately
- handle frozen colostrum according to enterprise and health and safety procedures
- store colostrum for future use
- follow relevant work health and safety and animal welfare requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional needs of newborn animals and the need for feeding colostrum to newborn animals
- selection of suitable donor animals
- methods and equipment used to collect colostrum
- care, husbandry and management of newborn animals
- handling of frozen colostrum
- administration of colostrum to newborn animals and their post-administration care
- storage procedures of colostrum
- relevant work health and safety and animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- obtain colostrum
- administer colostrum to newborn animals

Assessors must satisfy current standards for RTOs.

AHCLSK328 Remove and facilitate reuse of effluent and manure from an intensive production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to remove and facilitate reuse of effluent and manure from an intensive livestock production system.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

The production enterprise may be required to comply with local council, State or Commonwealth licensing requirements for operations involving effluent and manure.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work with effluent disposal equipment	1.1 Interpret work to be undertaken from work program where necessary, and confirm with management 1.2 Hold discussions with other workers who may be affected by the maintenance activities to ensure continued smooth operation of the production process 1.3 Identify work health and safety hazards, assess risks and implement suitable controls 1.4 Select, use and maintain suitable personal protective equipment (PPE) 1.5 Select, check and maintain tools and equipment suitable for the work to be undertaken
2. Maintain and operate effluent storage and disposal system	2.1 Observe and follow regulatory and industry requirements and standards for effluent operations 2.2 Service and maintain effluent removal and disposal equipment 2.3 Use effluent disposal systems according to system design in compliance with approval granted by local government and state environment protection authority 2.4 Carry out techniques for irrigation compliance with relevant regulatory and industry standards when using liquid effluent storages 2.5 Flush and drain in-shed effluent pits as required 2.6 Turn composted effluent in compliance with relevant regulatory and industry standards
3. Monitor effluent disposal system	3.1 Check flow rates, pit levels, compost temperatures and equipment regularly to maintain effective operation of the system 3.2 Carry out cleaning procedures and hygiene practices 3.3 Identify environmental impacts of effluent disposal and reuse, assess likely outcomes and if necessary, take responsive action
4. Conduct hygiene and administration activities	4.1 Clean equipment according to manufacturer specifications 4.2 Clean and store attachments and other ancillary equipment according to manufacturer specifications 4.3 Dispose of all containers, leftover fluids, waste and debris from the operations safely and appropriately 4.4 Complete all required records and documentation accurately and promptly

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK328 Remove and facilitate reuse of effluent and manure from an intensive production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards, assess risks and implement suitable controls
- make preparations to work with effluent disposal equipment
- maintain and operate effluent storage and disposal system in compliance with approval granted by local government and state environment protection authority
- monitor effluent disposal system
- conduct cleaning and hygiene practices associated with effluent operations
- implement relevant environmental practices
- complete organisational records

Knowledge Evidence

The candidate must demonstrate knowledge of:

- an enterprise work program and program requirements for effluent operations
- relevant work health and safety requirements
- tools, equipment and systems used for effluent operations (effluent handling, removal and disposal) and their functions, cleaning, maintenance, servicing and storage of such tools, equipment and systems
- relevant local government, State and Commonwealth regulations and industry requirements for effluent operations
- environmental impacts of effluent operations and liquid effluent irrigation, and strategies to mitigate such impacts
- irrigation techniques for liquid effluent
- functions, maintenance and service of effluent pits
- methods and maintenance of effluent composting

- methods for safe and appropriate disposal of containers, leftover fluids, waste and debris from effluent operations
- documentation and type of records that need to be completed for effluent operations
- relevant biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK329 Implement procedures for calving

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor cows at calving and provide the support required.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to workers on cattle farms who are responsible for overseeing calving. These individuals are expected to refer any high risk issues or problems for veterinary advice.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for calving	1.1 Assess and monitor condition and health status of cow prior to calving 1.2 Check calving equipment, resources and materials and prepare for use 1.3 Graze cows at risk of calving difficulty (especially first calf heifers) in an area where intervention can be carried out with as little disruption as possible 1.4 Identify hazards in assisting with calving and follow safe work practices 1.5 Check mating records and confirm anticipated calving date
2. Observe the calving	2.1 Monitor cows for signs of approaching parturition and throughout calving 2.2 Note signs of calf malpresentation or dystocia from the rate of progress in giving birth and the initial orientation of the feet and head
3. Support calving	3.1 Handle calving cows calmly and put in a secure environment 3.2 Implement hygiene procedures to ensure that any calving equipment entering the birth canal is clean 3.3 Estimate the orientation and size of the foetus relative to the pelvis through manual palpation 3.4 Check the possibility of twins and adjust position of the lead foetus where required 3.5 Manipulate a malpresentation physically into the correct position where required 3.6 Apply calving ropes/chains are placed on the calf above the front fetlocks and appropriate calf pulling equipment in the case of dystocia, without causing undue harm to the female 3.7 Bring in specialist support in if normal assistance procedures are not adequate to assist the calving 3.8 Apply enterprise animal welfare policies to livestock handling procedures
4. Carry out monitoring after calf has been born	4.1 Allow cow to rest and encourage cow to lick the calf as an initial bonding 4.2 Check calves that have been assisted for clear airways 4.3 Leave the placenta for the cow to ingest after calving 4.4 Treat and record cows with retained placentas or other

Element	Performance criteria
	abnormalities 4.5 Maintain the calving environment, facilities and equipment in a safe, hygienic and operational state and report or fix faults 4.6 Keep record of calving

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK329 Implement procedures for calving

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and use safe work practices in the calving environment
- carry out cow husbandry procedures and recognise signs of imminent calving
- apply contingency measures for calving in the event of difficulties
- prepare calving environment, materials and resources to industry standards
- ability to correctly apply calving ropes/chains and use suitable calf pulling equipment
- monitor cow condition and recognise abnormal behaviour/presentations
- ability to manual palpate and recognise simple malpresentations
- recognise abnormalities in calving behaviour, expulsion of foetus and placenta, and progress of calf immediately after birth
- recognise when normal assistance procedures are not adequate to assist the calving and specialist veterinary support is required
- maintain a safe and secure post-calving environment
- demonstrate safe and environmentally responsible workplace practices
- apply relevant work health and safety requirements
- apply relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- calving behaviour and basic health and nutritional requirements as directed
- calving equipment and materials, their components and functions
- calving intervention and non-intervention strategies
- normal calf presentation v abnormal that may need assistance

- problems associated with calving and intervention and follow up treatment
- enterprise policies with regard to calving down, recording and reporting routines
- health and injury hazards associated with handling cattle
- personal protective clothing and equipment, and when and how it should be used
- procedures for cleaning and maintaining treatment equipment and materials
- relevant State/Territory legislation, regulations and codes of practice with regard to work health and safety and animal welfare.

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK331 Comply with industry animal welfare requirements

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to comply with industry animal welfare requirements in the production of livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities, work in a range of known contexts, and use discretion and judgement in the selection and use of available resources. They provide and communicate solutions to a range of predictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine and identify animal welfare requirements	1.1 Determine legislative, regulatory and industry and enterprise animal welfare requirements 1.2 Identify workplace animal welfare concerns 1.3 Propose actions that can be taken to address identified workplace animal welfare concerns
2. Comply with animal welfare requirements	2.1 Carry out workplace animal welfare procedures and requirements consistently 2.2 Report non-conformance to supervisor 2.3 Take appropriate corrective action as advised by supervisor and in compliance with workplace procedures 2.4 Complete appropriate record keeping of workplace animal welfare concerns and actions taken
3. Participate in animal welfare process	3.1 Recognise animal welfare issues in the workplace, report to supervisor or management and take appropriate corrective action as required 3.2 Participate in workplace and/or industry animal welfare induction, training and programs 3.3 Participate in workplace and/or industry animal welfare emergency training

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK331 Comply with industry animal welfare requirements

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine and identify animal welfare requirements of relevant legislations, regulations, codes of practice and industry and workplace procedures
- comply with animal welfare requirements by carrying out workplace procedures, reporting non-conformance, taking appropriate corrective actions and completing record keeping
- participate in workplace animal welfare processes by reporting animal welfare issues and taking part in animal welfare induction, training and programs
- participate in workplace and/or industry animal emergency training

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal welfare legislation, regulations and codes of practice
- basic requirements for ensuring the welfare of livestock described in the relevant Codes of Practice
- workplace and/or industry animal welfare procedures and animal emergency procedures
- workplace and/or industry procedures for reporting and recording animal welfare concerns, non-conformance and malpractice in the workplace

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor animal health status	1.1 Source information on animal health programs from the livestock production plans 1.2 Assess animal health status by routinely inspecting each animal from induction to despatch by having unimpeded access and opportunity to observe behavioural characteristics, signs of ill-health and freedom of movement 1.3 Source information on past treatment(s) from the individual animal's identification tag or identification marking and enterprise records 1.4 Identify husbandry practices appropriate for the health status of the individual animal: follow-up observation, isolation from other livestock and/ or treatment
2. Identify animals requiring treatment	2.1 Identify individual animals with potential health issues or in ill health 2.2 Determine the type and severity of infection or injury and identify and/or isolate affected animals requiring treatment
3. Determine the type and scope of treatment	3.1 Determine the need for, type and scope of treatment by seeking expert or veterinary advice 3.2 Prepare equipment, materials and treatment site 3.4 Identify work health and safety hazards, assess risks and implement control measures in relation to the treatment 3.5 Record withholding periods and other details of treatment
4. Administer treatment	4.1 Check, select and use suitable personal protective equipment (PPE) 4.1 Handle and restrain animals safely and humanely 4.2 Administer treatment appropriately according to chemical label or veterinary advice 4.3 Identify treated animals from non-treated animals to ensure compliance with the required Withholding Period (WHP) 4.4 Prepare and move treated animals as planned
5. Carry out post-treatment procedures	5.1 Monitor animal health and condition post-treatment and report on animal's progress 5.2 Identify, environmental impacts associated with the administration of treatment, assess likely outcomes and take responsive action 5.3 Clean equipment and worksite, and dispose of organic and

Element	Performance criteria
	non-organic waste appropriately 5.4 Store unused medications appropriately 5.5 Complete documentation and records accurately and promptly 5.6 Comply with enterprise biosecurity policies

1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor animal health status
- identify animals requiring treatment
- determine the type and scope of treatment
- identify work health and safety hazards, assess risks and implement control measures associated with administering treatments to animals
- handle, restrain and treat animals without compromising animal welfare
- monitor animals post treatment and complete workplace recording requirements
- implement relevant animal welfare and biosecurity policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type of information to be gathered from livestock production plans, animal health plans and individual animal records
- signs of health, signs of ill health and methods of assessing livestock health
- biosecurity requirements, husbandry and management strategies and procedures for ill or injured animals
- methods for humane and safe handling and restrain of animals
- common diseases of the livestock species, and strategies for treatment and management of such diseases
- typical and common medications, vaccines, the routes of administration in animals and keeping/storage of such medications
- work health and safety requirements associated with administering treatments to animals

-
- principles and regulations for veterinary medicines treatment and Withholding Periods in animals
 - environmental impacts of administering treatments to animals and strategies to mitigate these impacts
 - enterprise heat load management plans
 - types of and disposal methods for organic and non-organic waste
 - documentation and type of records that need to be completed for animal treatments

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK333 Monitor pen condition and ration suitability

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor the suitability of rations and pen conditions for livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Monitor ration and water levels	<p>1.1 Source information on ration ingredients and composition from enterprise livestock production and/or feed plans</p> <p>1.2 Assess ration levels, composition and consistency and identify potential production and health issues for different pens and classes of livestock</p> <p>1.3 Identify strategies for removing wet, mouldy and fouled ration from bunks, and preventing livestock from access to unsuitable rations</p> <p>1.4 Assess water quantity and quality to meet requirements of livestock</p>
2. Inspect pen status and condition	<p>2.1 Source information on pen group status from enterprise livestock production plan</p> <p>2.2 Assess pen infrastructure, feed bunks, feed apron and water troughs together with animal feeding behaviour and identify performance and potential issues</p> <p>2.3 Identify strategies to control leaking troughs, and prevent livestock from access to damaged pen or feeding areas</p> <p>2.4 Assess pen surface conditions and behaviours of livestock in consideration of prevailing weather conditions</p> <p>2.5 Identify strategies for adjusting stocking density, providing access to shade, modifying pen drainage, cleaning pen and modifying the ration</p>
3. Assess manure condition	<p>3.1 Assess manure consistency and colour as indicators of individual animal and herd health</p> <p>3.2 Identify strategies for increasing roughage in ration, courser processing of grains and adjusting rations for sick animals</p>
4. Check pen hygiene	<p>4.1 Assess feed bunks, feed aprons and water troughs for fouling and unhygienic build-ups of waste</p> <p>4.2 Identify strategies for resolving animal production and health issues, work health and safety concerns, and cleaning of pens to prevent odour and insect problems</p>
5. Report and record incidents as required	<p>5.1 Report incidents and problems to supervisor as required</p> <p>5.2 Record and monitor effectiveness of strategies adopted</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCLSK333 Monitor pen condition and ration suitability

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor ration and water levels and respond to issues as required
- inspect pen status and condition and respond to issues as required
- assess manure condition and respond as required
- check pen hygiene and respond to issues as required
- report and record incidents
- communicate with work team and supervisors
- implement relevant work health and safety, biosecurity, animal welfare and environmental protection requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type of information on rations, water, housing infrastructure and feeding infrastructure that can be gathered from livestock production and feeding plans
- principles and elements of nutrition and the impact of nutrition on livestock production
- nutritional requirements of different livestock species, classes and life stages
- impacts of poor nutrition and unsuitable rations on livestock production, and strategies to mitigate these impacts
- how rations can be adjusted or modified to benefit sick animals
- housing requirements and housing management of different livestock species, classes and life stages
- feeding and water requirements, and feeding and water management of different livestock species, classes and life stages

- impacts of unsuitable housing, feeding and watering infrastructure on livestock and strategies to mitigate these impacts
- effects of weather on housing and feeding infrastructure and strategies to mitigate such effects
- methods for using manure as assessment of livestock health
- methods for maintaining, cleaning and removing waste from housing and feeding infrastructure
- documentation, record keeping and methods for monitoring effectiveness of adopted strategies
- relevant work health and safety, biosecurity, animal welfare and environmental protection requirements and practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK334 Plan, prepare and conduct mulesing procedures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct the most efficient and humane mulesing procedure in circumstances where all alternative methods of breech flystrike prevention have been evaluated and mulesing is considered the most appropriate of these for the long-term welfare of the sheep.

This unit applies to sheep farmers and contractors in the livestock industry who normally operate under limited supervision.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Conduct pre-mulesing evaluations	1.1 Identify and comply with relevant State/Territory legislation, regulations and animal welfare standards and guidelines 1.2 Identify industry standards and guidelines 1.3 Seek expert advice and discuss alternative strategies to manage flystrike susceptibility prior to undertaking mulesing procedures 1.4 Confirm workplace requirements for use of mulesing 1.5 Conduct pre-operative evaluation of sheep 1.6 Assess risks associated with mulesing procedure and implement measures to control the risks such as using appropriate Personal Protective Equipment
2. Prepare for mulesing operations	2.1 Identify and order all required supplies and equipment in advance 2.2 Monitor weather conditions to determine optimal conditions for operation and recovery of sheep from the procedure 2.3 Select suitable time of day for operation to minimise the separation time of lambs and ewes 2.4 Engage adequate number of skilled workers 2.5 Select appropriate yards, paddocks and pastures for each mob and each day to allow adequate time for mothering up of lambs after separation from the ewes 2.6 Use appropriate procedures for mustering, movement and handling so that stress to sheep is kept to a minimum 2.7 Allow lambs to settle and cool after yarding
3. Select, maintain and use appropriate equipment	3.1 Maintain all equipment in clean, hygienic and working conditions to reduce the risk of infection and cross-infection in sheep 3.2 Maintain cradles to be used for mulesing in good working condition and can be operated to ensure minimal risk to the operator or lamb, especially when loading and unloading 3.3 Set, grind and sharpen mulesing shears to working standards 3.4 Disinfect mulesing shears after sharpening, before use and between each animal 3.5 Prepare wash-down, soaking and disinfecting containers for use 3.6 Prepare and test chemical application equipment to check for operational efficiency 3.7 Clean and disinfect all equipment at the end of operation and store appropriately to minimise contamination

Element	Performance criteria
4. Conduct mulesing procedures	4.1 Conduct all procedures in accordance with work health and safety, animal welfare and biosecurity requirements 4.2 Maintain a high standard of hygiene throughout the operation in relation to facilities, operators' hands, handling and equipment 4.3 Handle lambs calmly and use appropriate restraints such as cradles 4.4 Perform mulesing procedure in accordance with model code of practice and industry standards 4.5 Apply pain relief to the wound immediately after the procedure in accordance with industry standards and legislative requirements, and following label and Safety Data Sheet (SDS) instructions 4.6 Apply insecticide dressing to the surrounding intact wool bearing skin (not the wound) immediately after the procedure in accordance with industry standards and following label and SDS instructions 4.7 Continually evaluate wound symmetry, size and position, and breaks in selvage (muscle fascia) 4.8 Remove lambs from cradles so they land gently on all four feet
5. Conduct post-mulesing management procedures	5.1 Allow lambs, following release, to 'mother-up' to ewes as soon as possible 5.2 Provide immediate treatment for lambs that are abandoned or unable to stand or walk 5.3 Monitor lambs for abnormal signs such as infection and septicaemia 5.4 Maintain and update required documentation and records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK334A Plan, prepare and conduct mulesing procedures

Assessment Requirements for AHCLSK334 Plan, prepare and conduct mulesing procedures

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess alternative strategies and confirm key indicators for the use of mulesing
- identify optimal conditions for carrying out mulesing procedures
- conduct pre-operative evaluation of lambs submitted for mulesing procedures and risk assessment in consultation with sheep manager
- prepare appropriate sites, facilities and equipment in line with infection control, work health and safety and animal welfare standards including pain management in accordance with industry best standards and legislative requirements
- follow low stress stock mustering, movement and handling procedures
- carry out mulesing operations in accordance with industry recognised best practice mulesing techniques and hygiene standards
- follow appropriate procedures and label directions to provide pain relief plus insecticide dressing as required
- monitor animals' behaviour post-mulesing for health and well-being including the ability to recognise signs of post-mulesing complications
- communicate post-mulesing management requirements to sheep manager
- accurately document and maintain appropriate records
- follow relevant work health and safety, animal welfare and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare and biosecurity requirements
- relevant codes of practice and industry standards for mulesing

- reasons and requirements for mulesing in sheep
- body condition scoring (BCS), breech wrinkle scoring (BRWR) and breech cover scoring (BCOV) in lambs and adult sheep
- methods and strategies of flystrike control
- effects of weather, environmental, facility, flock, individual animal and human factors on mulesing operations
- use and maintenance of materials and equipment for mulesing
- principles and maintenance of hygiene in mulesing operations
- methods and techniques for handling and restraint of adult sheep and lambs
- use of pain relief and insecticide treatment in mulesing procedures
- anatomy and external features of sheep
- health and animal welfare implications of post mulesing complications in sheep
- signs of ill health and related management strategies in sheep
- use of and regulatory considerations for the use of disinfectants
- relevant care, husbandry and management strategies for sheep flocks
- relevant legislation, regulations and codes of practice, including those relating to work health and safety, animal welfare, veterinary practitioner/surgeons' Acts, stock diseases and waste disposal, agricultural and veterinary chemical use

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- conduct mulesing procedures

Assessors must satisfy current standards for RTOs.

AHCLSK335 Conduct dropped ovary technique procedures for spaying cattle

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan, prepare and conduct Dropped Ovary Technique (DOT) procedures for controlling fertility in females in extensive beef herds, where alternative options for the management of cull heifers and cows, other than spaying, have been evaluated but deemed unsuitable or unavailable.

This unit applies to cattle producers and contractors in the livestock industry who normally operate under limited supervision. It is essential that candidates who undertake this unit have at least one year's prior experience working with cattle.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They complete routine activities and work in a range of known contexts.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Candidates should confirm the regulatory requirements that apply in their relevant State or Territory before undertaking this unit. Regulations in some States and Territories restrict the conduct of the DOT procedure to registered veterinarians. There is a direct link between this unit of competency and approval for lay operators to perform the DOT procedure in some State/Territory jurisdictions.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Conduct pre-DOT evaluations	<p>1.1 Identify and comply with relevant State/Territory legislation, regulations, codes of practice and animal welfare standards and guidelines</p> <p>1.2 Discuss alternatives to ovariectomy (spaying) with cattle manager and carefully consider them prior to undertaking DOT procedure</p> <p>1.3 Confirm pre-operative evaluation of cattle submitted for ovary dropping with cattle manager</p> <p>1.4 Identify and discuss risks associated with DOT procedure with cattle manager</p>
2. Prepare for DOT operations	<p>2.1 Monitor weather conditions to determine optimal conditions for operation</p> <p>2.2 Select time of day for operation to minimise animal stress</p> <p>2.3 Engage adequate numbers of skilled workers</p> <p>2.4 Select appropriate holding yards, forcing yards, race and settling yards</p> <p>2.5 Follow low-stress stock mustering, movement and handling procedures</p> <p>2.6 Allow cattle to settle and cool after yarding</p>
3. Select, maintain and use appropriate equipment	<p>3.1 Ensure all equipment is well-maintained and in a clean and hygienic condition to reduce the risk of infection and cross-infection</p> <p>3.2 Ensure cattle crush used for procedure is maintained in good working order and operated to ensure minimal risk to the operator and animal, especially when loading and unloading</p> <p>3.3 Prepare wash-down, soaking and disinfecting containers and position ready for use</p> <p>3.4 Prepare disinfectant solution in accordance with the label and Safety Data Sheet (SDS) directions</p> <p>3.5 Sharpen ovariator regularly and disinfect before use and between each procedure</p> <p>3.6 Clean and disinfect all equipment at the end of operations and store appropriately to minimise contamination</p>
4. Conduct DOT	4.1 Conduct all procedures in accordance with animal welfare

Element	Performance criteria
procedures	requirements, biosecurity requirements and work health and safety standards 4.2 Maintain a high standard of hygiene throughout the procedures in relation to facilities, hands, handling and equipment 4.3 Handle cattle quietly in the holding yards, forcing yards and race so that they are relatively calm when they reach the crush 4.4 Identify common DOT procedural impediments and plan remedial actions 4.5 Provide pain management in accordance with legislative requirements 4.6 Perform DOT procedures in accordance with industry best practice standards and processing rates 4.7 Apply identification earmarks or ear tags to cattle upon completion of procedures, in accordance with relevant State/Territory legislative requirements 4.8 Release and allow ovariectomised animals to settle on to feed and water in the settling yards for several hours, before moving them quietly to pasture
5. Carry out post DOT procedures	5.1 Record the identity of the cattle and date of the procedure, with details of significant observations where required 5.2 Inspect cattle regularly and with minimal disturbance for signs of post-operative complications during the healing process and take appropriate action where required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK335A Conduct dropped ovary technique procedures for spaying cattle

Assessment Requirements for AHCLSK335 Conduct dropped ovary technique procedures for spaying cattle

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess alternative strategies and confirm key indicators for the use of DOT procedures in consultation with cattle manager
- identify optimal conditions for carrying out DOT procedures
- conduct pre-operative evaluation of cattle submitted for ovary dropping and risk assessment in consultation with cattle manager
- comply with animal welfare legislation, animal welfare standards and guidelines, State and Territory veterinary surgeons' or practitioners' legislation and regulations and relevant codes of conduct
- prepare appropriate sites, facilities and equipment in line with infection control, work health and safety and animal welfare standards including pain management in accordance with legislative requirements
- follow low-stress stock mustering, movement and handling procedures
- carry out DOT procedures in accordance with industry recognised best practice DOT procedure and processing rates, implement remedial actions and hygiene standards
- communicate post-spay management requirements to cattle manager
- accurately document and maintain appropriate records
- follow relevant biosecurity requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- alternative options available to control fertility in cattle
- animal welfare and biosecurity requirements for the use of DOT in cattle
- anatomy and reproductive features of cattle

- body condition scoring of cattle
- relevant cattle nutrition and husbandry requirements for the specific cattle management system
- industry recognised best practice DOT procedure and processing rates
- use of, and regulatory considerations for the use of disinfectants
- health and animal welfare implications of post-operative complications of the use of DOT in cattle
- animal welfare legislation, animal welfare standards and guidelines, State and Territory veterinary surgeons' or practitioners' legislation and regulations and relevant codes of conduct as they apply to DOT
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace OR the workplace and a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for performance evidence must be conducted in an on-farm workplace situation with access to appropriate female cattle, facilities and equipment.

Assessment for the following performance evidence must be conducted on live animals:

- conduct DOT procedures

Assessors must satisfy current standards for RTOs.

AHCLSK401 Develop feeding plans for a production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop feeding plans for a production system.

This unit applies to supervisors and unit managers who are responsible for nutrition and feeding in an intensive livestock production facility.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select ingredients for feed	1.1 Identify nutritional needs of livestock from information available and class of livestock 1.2 Source nutritional advice from the appropriate industry or organisational sources 1.3 Select ingredients that provide for the identified nutritional need of livestock 1.4 Select suppliers of ingredients on the basis of quality and cost of feed 1.5 Determine quantities of individual ingredients required, in conjunction with advice from other available information and expert/supplier advice
2. Determine feed rations and schedules	2.1 Determine quantities of total feeds required for livestock from the production program, in conjunction with advice from other available information and expert advice 2.2 Take into consideration the results of any available laboratory testing when determining the quantities of each ingredient used 2.3 Schedule feeding and allocate responsibility for feeding in line with the production program and other operations occurring within the site 2.4 Identify the method(s) of providing feed to livestock identified in the production plan and confirm with supplier of ingredients and other expert advice
3. Supervise mixing and storage of feed	3.1 Organise secure and hygienic storage of feed and ingredients to eliminate contamination and infestation 3.2 Select storage location to ensure safe access 3.3 Organise rotation of feedstocks and replacements to arrive at the appropriate time to ensure optimum freshness 3.4 Organise mixing of feed to suit the needs of the livestock, the identified nutritional requirements and the equipment available within the organisation 3.5 Add medications to feeds according to enterprise procedures if required 3.6 Take, package and label samples of feed and forward them to the laboratory for testing according to the schedules described in the production program 3.7 Check calibration of measuring equipment and calculation of quantities at regular intervals

Element	Performance criteria
	3.8 Identify work health and safety hazards, assess risks, and implement, monitor and review risk controls for feed preparation and feeding operations 3.9 Comply with enterprise biosecurity policies
4. Supervise feeding	4.1 Supply rations to the livestock according to the production program and schedules devised 4.2 Make potable water available continuously to the livestock 4.3 Monitor the health and wellbeing of the livestock in line with enterprise requirements and animal welfare policies 4.4 Monitor and report any change in production levels as a direct result of changes to feed types, ingredients or schedules 4.5 Give advice to operational staff during the feeding operation when requested, or when the need is observed 4.6 Remove all waste materials and substances from the site and store, or disposed of, according to legislation, environmental policies and enterprise procedures 4.7 Collate and store documentation according to the requirements of the organisation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK401A Develop feeding plans for a production system

Assessment Requirements for AHCLSK401 Develop feeding plans for a production system

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work practices
- discuss feed and nutritional content with nutritionist and managers
- identify a range of raw ingredients
- operate a range of feeding equipment
- perform basic troubleshooting of the feeding operation
- monitor animal intake and performance
- read and interpret manufacturers specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- interpret and apply task instructions, communicate with work team and supervisor, and record and report faults, workplace hazards and accidents
- accurately measure and calculate volumes, consumption and storage requirements
- complete the required records of feed use and livestock performance
- comply with enterprise biosecurity, environmental and animal welfare procedures and policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- control of common livestock diseases and preventative measures including the placement of medications in feed
- growth and development in livestock
- milling systems
- dietary needs and analysis of feed samples
- organisations sampling requirements and techniques

- where to access appropriate legislative requirements, manufacturers instructions and enterprise procedures/instructions
- silo operations and configuration, machinery and operating practices
- codes of practice and enterprise policies with regard to work health and safety, biosecurity, environment and animal welfare
- cleaning and storage of machinery, equipment and materials
- enterprise recording and reporting procedures

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK402 Develop livestock feeding plans

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research predicted seasonal pasture production for the area
- estimate the feed value of a standing pasture at different times of the year
- calculate the feed demand for different types of livestock and production phases
- match feed supply and demand
- assess feeding plan alternatives
- develop and document a feeding plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- nutritional and daily energy requirements of livestock
- water quality and livestock tolerances
- nutritional value of different feedstuffs
- assessment procedures to ascertain livestock condition
- methods of assessing pastures quality and quantity
- pasture livestock carrying capacity
- supplementary feeding strategies
- change in nutritional requirements during late pregnancy and lactation

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Provide information about animal welfare to the team	1.1 Explain the relevant provisions of animal welfare regulations and codes of practice to the work group 1.2 Provide information on workplace animal welfare policies, procedures and programs in a readily accessible manner 1.3 Provide information about identified animal welfare requirements to the group and individuals in a broad workplace context and in the context of the individuals' job roles
2. Facilitate the participation of workers in animal welfare compliance	2.1 Implement and monitor workplace procedures for compliance with animal welfare procedures 2.2 Explain procedures for reporting animal welfare concerns, grievances and complaints to workers, and action that will be taken to address these concerns, grievances and complaints 2.3 Manage and resolve animal welfare concerns, grievances and complaints according to workplace procedures, or refer to the appropriate personnel where necessary
3. Implement and monitor workplace animal welfare procedures	3.1 Report existing and potential animal welfare concerns, and take action to address these concerns according to workplace procedures 3.2 Maintain detailed records of animal welfare concerns, grievances and complaints, and actions taken 3.3 Monitor implementation of workplace animal welfare procedures to ensure ongoing adherence to and effectiveness of these procedures
4. Implement workplace procedures for dealing with animal welfare emergencies	4.1 Implement workplace procedures for dealing with animal welfare emergencies 4.2 Record and report animal welfare emergencies to workplace management or relevant authorities 4.3 Implement measures to prevent recurrence and minimise risk of animal welfare emergencies
5. Implement and monitor workplace procedures for providing animal welfare training	5.1 Identify animal welfare induction and training needs 5.2 Implement both on and off-the-job animal welfare induction and training for work group

Element	Performance criteria
6. Implement and monitor workplace procedures for maintaining animal welfare records	6.1 Implement and monitor procedures to maintain animal welfare records 6.2 Use aggregate information from animal welfare records to implement animal welfare programs

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK404A Implement and monitor animal welfare programs

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCLSK404 Implement and monitor animal welfare programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- provide information about animal welfare to the work group and individuals in the workplace
- facilitate the participation of workers in animal welfare compliance
- implement and monitor workplace procedures for animal welfare
- implement workplace procedures for animal welfare emergencies
- implement and monitor staff training in animal welfare
- maintain animal welfare records
- implement relevant work health safety animal welfare and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant animal welfare legislation, regulations, codes of practice and guidelines including:
 - Australian Animal Welfare Strategy
 - Animal Welfare Act or Prevention of Cruelty to Animals Act or equivalent specific to the State or Territory
 - Australian Standards and Model Codes of Practice specific to the livestock or industry sector
 - industry requirements and standards for animal welfare for the animal species
- animal welfare emergencies procedures for:
 - animal disease or injury
 - damage to facilities where animals are housed

-
- animals which have escaped from the normal control of the workplace
 - road accidents when moving and transporting animals
 - inclement weather - flooding, strong wind, lightning, storm, extreme temperatures
 - fire
 - power failure
 - water or feed failure or contamination
 - need for animal welfare in the workplace
 - requirements for ensuring the welfare of livestock described in the relevant codes of practice
 - workplace policies, procedures, guidelines and standard operating procedures relating to animal welfare
 - relevant work health safety animal welfare and biosecurity requirements and practices in the context of animal welfare

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK405 Implement intensive production systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement intensive production systems.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for production	1.1 Identify and obtain documents within the enterprise that detail the

Element	Performance criteria
operations	<p>requirements of the production program</p> <p>1.2 Assess and calculate the resources required for the production operations from the product to be produced, the available timelines, the available resources, and the types of housing and feeding infrastructure</p> <p>1.3 Determine measurable indicators, specifications and targets based on the production program and type of housing and feeding infrastructure</p> <p>1.4 Hold discussions with operational personnel and immediate management to discuss the production program</p> <p>1.5 Identify, seek and obtain approvals that are required for the production operations</p>
2. Communicate production program and complete administration activities	<p>2.1 Co-ordinate, schedule and communicate regularly with people, materials and equipment required for the operations according to the prepared plan to ensure smooth operation and progress</p> <p>2.2 Identify work health and safety hazards, assess risks and take responsive action throughout the production operations</p> <p>2.3 Communicate clearly to operational personnel the procedures and tools to be used, personal protective equipment to be used/worn, types of records to be kept, work health and safety hazards that have been identified, and actions to be taken to mitigate the work health and safety risks, and seek confirmation of the communication from the operational personnel</p> <p>2.4 Promptly and accurately complete documentation and records</p> <p>2.5 Provide advice to operational staff and contractors during the production operations when requested, or when the need arises</p>
3. Manage livestock and production environment	<p>3.1 Monitor herd/flock regularly for signs of ill health or injuries and record and report observations</p> <p>3.2 Monitor housing and feeding infrastructure regularly for signs of damage, wear and tear, and record and report observations</p> <p>3.3 Supervise examination of dead livestock for evidence of disease through correct post-mortem techniques and seek veterinary advice if required</p> <p>3.4 Assess and evaluate disease status of livestock, notify or report to appropriate personnel and seek veterinary assistance if required</p> <p>3.5 Monitor components of quarantine procedures regularly to ensure compliance with regulatory and industry standards</p> <p>3.6 Monitor and adjust aspects of the production system environment in line with the production program</p>
4. Manage effluent and waste	<p>4.1 Monitor effluent storage and disposal systems according to production program and manufacturer instructions</p>

Element	Performance criteria
	4.2 Calculate, monitor and document volume and type of effluent 4.3 Monitor the removal of all waste and debris from the production environment 4.4 Carry out ongoing production environment maintenance program throughout all seasons 4.5 Monitor and report on the regulatory and legislative requirements associated with the production program
5. Monitor and adjust production operations	5.1 Ensure monitoring of components specified in the production plan is adhered to 5.2 Make checks to ensure that work health and safety requirements are being observed and followed 5.3 Make checks to ensure that environment regulatory requirements are being observed and followed 5.4 Communicate with operational staff and contractors regularly to ensure smooth operation and progress 5.5 Make checks to ensure that all documentation and records required by regulatory agencies, industry and enterprise are completed clearly, promptly and accurately 5.6 Take corrective action promptly when required 5.7 Collate and store documentation and records appropriately 5.8 Prepare recommendations for future production programs based on the conduct of the operations, the data collected and the discussions with enterprise staff and contractors 5.9 Report on the progress and key aspects of the production operations and throughput to enterprise

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK405A Implement intensive production systems

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCLSK405 Implement intensive production systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine measurable indicators, specifications and targets for the intensive enterprise assess the resources required for unit operations
- establish processes/strategies, procedure and controls to meet quality assurance requirements and production targets
- communicate production program to relevant personnel and complete administration activities
- manage livestock and the production environment
- implement quarantine procedures and monitor disease status of stock
- manage effluent and waste generated by production operations
- monitor and adjust production system for output, QA compliance, costs and profitability.
- prepare recommendations for future production programs based on the conduct of the operations, the data collected and the discussions with enterprise staff and contractors
- implement relevant work health and safety, biosecurity, animal welfare and environmental requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- type and use of information that can be gathered from enterprise programs, documents and records
- types of resources required, types of products, methods for assessing and calculating resources and products by using information from enterprise programs, documents and records

- type of measurable indicators, specifications and targets for the production system using information from enterprise programs, documents and records
- functions, parameters and scope of enterprise production programs and production plans
- relevant regulatory, industry and enterprise approvals, licences, authorities, documentation, records and reporting requirements for enterprise production operations
- manpower, materials and equipment requirements for carrying out effective and efficient enterprise production operations
- relevant work health and safety requirements
- signs of health, signs of ill health and methods of assessing livestock health
- types and functions of housing and feeding infrastructure relevant to the enterprise production operations and methods for assessing damage, wear and tear to infrastructure
- techniques, procedures and requirements for post-mortem examination of livestock carcasses
- common diseases of livestock, and methods for assessing and evaluating disease status
- relevant biosecurity requirements, quarantine requirements, functions, components and facilities required of an enterprise quarantine system
- regulatory and industry requirements for effluent storage and disposal, types and functions of effluent storage and disposal systems, and methods for assessing and calculating effluent production
- regulatory and industry requirements, methods and systems for waste and debris storage and disposal
- relevant environment requirements and sustainability practices
- functions and aspects of production environment maintenance programs
- relevant animal welfare requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK406 Oversee animal marking operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to oversee animal marking operations.

This unit applies to livestock producers and those with supervisory responsibilities within livestock production enterprises.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare marking plan	1.1 Obtain and clarify information and instructions with regard to marking operations 1.2 Ensure timing of marking and calendar of operations fit so that growth checks are minimised 1.3 Determine animal groupings, marking operations and sequencing 1.4 Assess and determine resource requirements within enterprise budgetary constraints 1.5 Prepare marking plan and ensure sufficient flexibility to adapt to changes during marking operations
2. Co-ordinate and arrange resources	2.1 Locate and arrange suitable locations for undertaking marking operations and facilities to meet requirements of marking schedules 2.2 Arrange and provide appropriate and adequate equipment, materials and health treatments on site 2.3 Confirm staff and provide them with safety, task and operational briefings 2.4 Identify work health and safety hazards, assess risks, and implement, monitor and review risk controls in line with enterprise policies 2.5 Time and supervise marking operations to ensure mistreatment is minimised and animal welfare requirements are met
3. Monitor marking operation	3.1 Monitor implementation of marking plan for efficiency and effectiveness in terms of achieving enterprise objectives 3.2 Monitor condition and health status of animals, take appropriate action to rectify risks to animal welfare, and report abnormalities where necessary 3.3 Maintain effective worksite communication to ensure efficient workflow and address immediate problems 3.4 Document data with regard to operational processes and outcomes for continual assessment and management planning

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCLSK406 Oversee animal marking operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement and monitor of safe operating procedures
- plan, cost and schedule resource requirements
- prepare and implement a work plan for marking
- prioritise and schedule marking operations
- determine and allocate staff roles and responsibilities
- monitor the health and well-being of animals during and after marking
- manage staff and operations and establish and monitor performance targets
- document and prepare plans and reports for the understanding of staff and management
- implement and monitor relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- management processes and procedures
- cost analysis techniques
- procedures for planning and developing marking plans
- marking and production plans
- codes of practice with regard to animal marking and animal health and welfare
- use of veterinary medicines and their administration
- animal marking methods and procedures
- work health and safety and animal welfare legislation, codes of practice and enterprise requirements
- animal behaviour and nutritional requirements

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK407 Plan and monitor intensive production systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and monitor intensive production systems.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source information for	1.1 Consult livestock production plan for details of current period

Element	Performance criteria
input to production system planning	planning, enterprise requirements and market expectations 1.2 Analyse key production data to establish unit performance 1.3 Access and analyse information regarding the characteristics of the herd/flock under production 1.4 Access and analyse regulatory, industry and enterprise requirements that impact on the production system 1.5 Access and analyse market information regarding quality, standards and trends for input to the planning process
2. Plan for production	2.1 Determine target unit performance through a comparison with industry and enterprise standards 2.2 Establish and confirm production targets using data and information from unit's livestock production 2.3 Determine resources required to achieve production targets in terms of personnel, equipment and materials 2.4 Organise and engage staff and contractors to suit the production plan and its targets 2.5 Select and order other resources according to enterprise guidelines
3. Plan for animals' needs, environmental and effluent management to ensure welfare of animals and achieve production targets	3.1 Assess and calculate housing, effluent management, environmental management and biosecurity requirements from livestock numbers, market requirements and regulatory requirements 3.2 Evaluate construction and equipment system options and select the best option 3.3 Select materials chosen for construction according to animal welfare needs, cost and efficiency 3.4 Determine aspects of the production environment according to animals' welfare needs, efficiency of systems and market expectations 3.5 Select animal feed based on animal production, the size of the herd/flock, and the suitability of available feed products
4. Determine scheduling and key responsibilities	4.1 Determine scheduling for the production plan taking the range of seasonal, geographic and resourcing factors into consideration 4.2 Determine key responsibilities for specific implementation processes 4.3 Determine documentation and record keeping requirements and put procedures in place to ensure compliance with the range of applicable regulations 4.4 Ensure the production plan, including scheduling and key responsibilities, is clearly documented 4.5 Ensure the production plan includes the type, format, frequency

Element	Performance criteria
	and detail of all reporting requirements by managers and operators
5. Monitor and adjust production plan strategies	5.1 Evaluate the effectiveness of the production plan at key points and make adjustments as necessary 5.2 Identify, monitor and assess environmental impacts and work health and safety hazards relating to the production plan throughout the implementation process 5.3 Make modifications to the production plan as and when necessary

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCLSK407 Plan and monitor intensive production systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse key production data, herd/flock information and market requirements
- set production targets and identify resources needed to achieve them
- plan accommodation that meets animal welfare and production requirements
- develop feeding plans and evaluate alternatives for feed purchasing, milling and distribution
- determine work responsibilities and staffing requirements
- handle waste and effluent in line with environmental requirements and legislation
- monitor, review and adjust intensive production plans
- implement relevant work health and safety requirements
- implement relevant biosecurity, animal welfare and environmental management requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- functions, parameters and scope of production plans
- type and use of information from enterprise production plans and enterprise production data that can be used to formulate production system planning and production unit performance targets
- type and use of information on herd/flock characteristics; regulatory, industry and enterprise requirements; industry and enterprise standards and benchmarks; market specifications for product qualities, product standards and market trends; production unit's history and data, for the formulation of the production system plan and performance targets

- types, quantities, assessment and calculation, procurement and selection of manpower, material, equipment and other resources required for the production plan
- types and functions of, and methods for assessing and calculating requirements of, housing, effluent management and environmental management infrastructure
- efficiency and cost benefit ratios of different types of housing, effluent management and environmental effluent infrastructure and systems, taking into account animal welfare requirements and enterprise production targets
- types, functions and cost benefit ratios of livestock feeds
- relevant aspects and impacts of production cycles and staff job roles on production planning
- relevant regulatory, industry and enterprise documentation, records and reporting requirements for implementation of production plans
- methods for assessing and evaluating production plans
- relevant work health and safety requirements
- relevant environmental requirements and sustainability practices
- relevant biosecurity requirements
- relevant animal welfare practices

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK408 Pregnancy test animals

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out pregnancy testing in livestock.

This unit can be delivered in the context of the following industries: cattle and horses.

This unit does not cover ultrasound scanning for pregnancy diagnosis.

This unit applies to those whose job role includes testing animals for pregnancy using manual diagnosis procedures. Veterinary advice may need to be sought in some cases where pregnancy symptoms are difficult to detect, or animals are to be identified as pregnant for sale.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for pregnancy testing	1.1 Prepare physical resources, human resources and relevant documentation for pregnancy testing 1.2 Muster, yard and safely restrain animals in compliance with work health and safety, animal welfare and workplace procedures 1.3 Draft animals to be tested according to breeding or management program requirements
2. Arrange support for pregnancy testing	2.1 Assemble pregnancy testing supplies and equipment for the operators 2.2 Separate and restrain individual animals for veterinary treatment or examination 2.3 Undertake all handling and testing of animals with strict adherence to animal welfare codes of practice 2.4 Complete records of pregnancy testing operations in line with established procedures and report outcomes to management as required
3. Carry out manual pregnancy diagnosis procedures	3.1 Identify work health and safety hazards, assess risks and implement suitable controls while working with animals 3.2 Fit and use personal protective equipment in compliance with biosecurity and personal hygiene requirements 3.3 Humanely restrain individual animals for testing and check individual breeding records 3.4 Clean rectal area of animal prior to examination 3.5 Humanely and safely carry out rectal examination/palpation to establish pregnancy or non-pregnancy 3.6 Implement strict hygiene procedures between pregnancy testing individual animals in compliance with animal welfare and biosecurity requirements 3.7 Record identities and relevant details of animals tested 3.8 Observe and record other indicators of animal health for input to

Element	Performance criteria
	herd health management
4. Carry out post pregnancy testing procedures	4.1 Accurately identify animals diagnosed as pregnant or not pregnant 4.2 Consign all animals to their destination or return them to paddocks/pens in line with workplace requirements 4.3 Dispose of biological waste, debris and veterinary medicine waste in compliance with work health and safety, biosecurity and environmental requirements 4.4 Carry out regular monitoring of animals post pregnancy testing to detect post-testing complications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK408A Pregnancy test animals

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK408 Pregnancy test animals

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan and prepare for pregnancy testing coordinate and arrange support for pregnancy testing
- arrange support for pregnancy testing
- draft animals and source information on joining to assist in pregnancy testing
- restrain animals for pregnancy testing using humane methods and facilities
- carry out manual pregnancy diagnosis procedures in adherence with animal welfare codes
- monitor animals after pregnancy testing
- maintain records of pregnancy testing
- apply relevant animal welfare requirements
- implement relevant work health and safety animal welfare and biosecurity requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant anatomy and physiology of the animal species
- reproductive physiology and pregnancy development of the animal species
- husbandry and management strategies for pregnant and non-pregnant animals
- pregnancy testing methods
- reproductive diseases and complications in the animal species
- relevant work health and safety, animal welfare and biosecurity legislation, codes of practice and industry and enterprise policies
- recording and reporting systems used in conjunction with pregnancy diagnosis and animal breeding programs.

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- carry out pregnancy diagnosis procedures

Competency in this unit can be determined in a single species.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK409 Supervise animal health programs

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement and monitor safe work practices and appropriate hygiene procedures
- monitor the health and wellbeing of animals
- detect possibility of disease through parameters such as loss of bodyweight behaviour or length of time required to eat food
- recognise clinical symptoms (normal vs. abnormal)
- recognise abnormal physiological and behavioural signs in livestock
- collect samples for testing for internal parasites and diseases
- implement preventative health strategies
- administer vaccines and medications to animals
- maintain records associated with animal health programs
- implement relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- symptoms of common livestock diseases and parasite infestations
- storage conditions for a range of chemicals, including veterinary chemicals
- types of vaccines and how they work
- zoonotic diseases and their mode of transmission
- animal anatomy and physiology relevant to the collection of tissue, organ, blood and other biological samples in live and dead animals and the conduct of post-mortems
- relevant biosecurity requirements

- management practices and processes to minimise noise, odours, and debris from the livestock operations
- relevant legislation, regulations and codes of practice relating to the use of veterinary medicines, animal diseases, animal welfare and waste and environmental management,
- relevant work health and safety legislation, regulations and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK410 Supervise feedlot operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise feedlot operations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Select feedlot livestock	1.1 Consult enterprise plans and management regarding the breeds, classes and numbers of livestock to be obtained for feedlotting 1.2 Select and purchase livestock for feedlotting 1.3 Inspect purchased livestock on delivery for satisfactory health and condition 1.4 Complete required documentation and records accurately and promptly, and store these appropriately
2. Oversee the preparation of rations for feedlot livestock	2.1 Identify nutritional needs of livestock from information available and enterprise production targets 2.2 Gather expert advice on livestock nutrition from the appropriate government, industry or enterprise sources 2.3 Select feed ingredients that meet the identified nutritional needs of livestock 2.4 Select suppliers of feed ingredients based on quality and cost benefit ratios 2.5 Determine quantities of feed ingredients required based on available information and advice 2.6 Formulate feeding schedule and allocate responsibility for feeding livestock to appropriate personnel 2.7 Assess and identify method(s) of feeding livestock based on available information and advice
3. Supervise feeding of feedlot livestock	3.1 Organise mixing of feed to suit the needs of the livestock, the identified nutritional requirements, and the equipment available within the enterprise 3.2 Supervise calibration of measuring equipment and calculation of feed ingredient quantities 3.3 Supervise the selection, maintenance and use of suitable personal protective equipment 3.4 Identify work health and safety hazards, assess risks and implement control measures 3.5 Supervise the feeding of livestock according to production program
4. Monitor performance of feedlot livestock	4.1 Monitor the health and condition of livestock and their production levels; record and report any reaction or change to a change in feed types, ingredients or schedules 4.2 Provide advice to enterprise staff on the feeding of livestock when requested, or when the need arises 4.3 Supervise the storage, removal and disposal of all feed wastes and debris from the production environment 4.4 Supervise the dispatch of livestock for slaughter with required identification and documentation

Element	Performance criteria
	4.5 Collate and analyse feedback from slaughter point and downstream customers 4.6 Maintain and store documentation and records appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK410A Supervise feedlot operations

Assessment Requirements for AHCLSK410 Supervise feedlot operations

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select, purchase and induct livestock for feedlotting according to enterprise requirements
- source advice on feed and feeding regime with nutritionist and managers
- oversee the preparation of rations for feedlot livestock
- supervise feeding of feedlot livestock and provide advice to staff where required
- monitor livestock performance on weight gains and meeting carcass criteria and diagnose feeding problems and remove animals for treatment
- review procedures in response to feedback from slaughter point and customers
- complete the required records of feed use and livestock performance
- implement relevant work health and safety, animal welfare, biosecurity and environmental management requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types and use of information to be gathered from enterprise plans and management for the determination of suitable feedlot livestock to be procured
- breeds, classes and characteristics of feedlot livestock
- criteria for assessment and selection of feedlot livestock
- regulatory, industry and enterprise requirements and procedures for purchase, delivery and movement of feedlot livestock.
- principles of nutrition, feeding strategies and feeding management of feedlot livestock
- types, characteristics and quality assessments of feed ingredients, and the methods for assessing their nutritional value in meeting the needs of feedlot livestock
- types, forms and characteristics of livestock feeds

- process and requirements of a cost benefit analysis
- procedures and resource requirements for mixing, blending and milling feed ingredients and feeds
- relevant work health and safety requirements
- signs of health, ill health, good condition and poor condition in livestock, and methods for assessing livestock health and condition in relation to nutrition and feeding
- possible production changes in relation to changes in nutrition, feeds and feeding strategies
- types of and disposal methods for organic and non-organic waste
- relevant environmental requirements and sustainability practices
- regulatory, industry and enterprise requirements for selection, movement and dispatch of livestock for slaughter
- types and use of information that can be gathered from slaughter facilities and downstream customers to formulate, improve or adjust nutritional and feeding strategies for feedlot livestock
- relevant animal welfare and biosecurity requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK411 Supervise natural mating of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise the natural mating of livestock.

This unit applies to livestock producers and those with supervisory responsibilities within pastoral production enterprises.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare animals for breeding	1.1 Access and confirm requirements of enterprise breeding program and relevant animal data 1.2 Identify work health and safety hazards, assess risks, and implement, monitor and review risk controls in line with enterprise policies 1.3 Identify and prepare joining areas using a range of selection factors 1.4 Handle animals safely and humanely to minimise stress and discomfort and in line with industry and enterprise animal welfare requirements 1.5 Draft animals according to mating plan and in appropriate ratios to encourage optimum mating 1.6 Determine and meet sire requirements in advance of mating 1.7 Prepare and examine animals for mating
2. Implement breeding program and monitor mating	2.1 Access veterinary advice according to animal's needs, enterprise requirements and industry practice 2.2 Identify and schedule dates and timing of breeding 2.3 Carry out physical examination of animals to evaluate health and welfare status of animals 2.4 Observe behaviour of animals during joining to identify necessity of intervention and assistance 2.5 Provide assistance as required
3. Complete breeding program	3.1 Remove sires from herd, mob or flock where required 3.2 Monitor mating activity to ensure successful joinings have occurred, to identify problems and to effect remedial action as required 3.3 Arrange for pregnancy testing to determine the effectiveness of joining 3.4 Record and document data to develop history of mating performance and outcomes 3.5 Research industry information of emerging and prevailing practices and compare with enterprise practice to recommend future improvements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK411 Supervise natural mating of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, assess risks and implement and monitor of safe operating procedures
- carry out physical examination of sires and females for health and breeding soundness
- prepare animals for joining
- monitor joining activity and returns to oestrus
- access, interpret and record data associated with mating program
- implement relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- mating behaviour
- anatomy and physiology of the reproductive organs and reproductive process in animals
- required live weights and conditions for mating
- environmental influences and their effects on joining
- ovulation stimulation and synchronisation
- enterprise's breeding programs and selection criteria (EBV & ASBV)
- pregnancy testing/ scanning procedures
- animal health and abnormalities
- relevant State/Territory legislation, regulations and Codes of Practice with regard to work health and safety and animal welfare
- enterprise and industry policies with regard to recording and reporting requirements
- identification of veterinary and non-veterinary procedures

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK412 Arrange livestock purchases

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research livestock price trends and budgeted returns
- organise transport
- negotiate on price and terms
- assess livestock and condition
- arrange transport and insurance
- check on health status and condition of livestock
- complete records associated with livestock transport
- implement relevant quarantine/biosecurity practices where required
- implement relevant work health and safety requirements
- implement relevant animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock assessment for relevant features / traits
- livestock selling procedures
- matching livestock to feed available
- livestock transportation
- animal health procedures
- livestock insurance
- relevant legislative work health and safety requirements especially as they relate to livestock sales, livestock products, animal welfare, animal transportation for local and export markets, and safe livestock handling techniques

- enterprise and industry policies and codes of practice with regard to livestock sales, livestock transportation, and recording and reporting requirements (NLIS)

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK413 Design livestock handling facilities

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design livestock handling facilities.

This unit applies to those whose job role includes planning and designing handling and/or accommodation facilities for livestock.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupation licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine requirements	1.1 Assess and clarify requirements for livestock handling facilities 1.2 Negotiate and confirm cost structures and timelines within enterprise budgetary constraints 1.3 Obtain and assess plans for livestock handling facilities from a variety of sources
2. Undertake a site analysis	2.1 Inspect location of new or existing site and record physical elements and features of the site for assessment of suitability 2.2 Specify surveys to be undertaken and determine tolerances according to enterprise requirements 2.3 Assess and determine site preparation requirements according to enterprise policies and site parameters
3. Prepare a design brief	3.1 Modify plans appropriate to the individual site and enterprise objectives 3.2 Assess options to modify existing facilities or establish alternative handling operations and obtain quotes 3.3 Identify relevant work health and safety, animal welfare, biosecurity and environment sustainability requirements, codes of practice, enterprise quality assurance requirements and incorporate them into the plan 3.4 Identify legal requirements and constraints on development processes 3.5 Prepare design brief and undertake consultation to establish agreement on options and approaches for development
4. Develop a final plan	4.1 Prepare recommendations based on the analysis of data and enterprise instructions 4.2 Obtain authorisations and approvals required for implementation of the plan 4.3 Produce detailed plan with considerations for work health and safety, animal welfare, biosecurity and environmental implications and enterprise objectives

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCLSK413 Design livestock handling facilities

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the need for livestock handling facilities
- evaluate and recommend alternative options
- determine the site and design the handling facility for the site
- incorporate work health and safety and animal welfare requirements, potential environmental impacts and enterprise operational principles for livestock handling and movement into design
- estimate cost of building the designed facilities
- develop a detailed plan for livestock handling facility

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock behaviour and design interactions
- enterprise livestock handling facility requirements
- requirements of transportation vehicles and loading areas
- costing methodologies
- livestock handling options and accommodation facilities and their uses
- site constraints in relation to livestock handling facilities
- industry and legislative requirements for the planning and establishment of livestock handling facilities
- relevant work health and safety legislative requirements
- codes of practice with regard to environmental protection and animal welfare

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCLSK416 Identify and select animals for breeding

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop selection criteria for a breeding program
- select animals that have defects in conformation and /or productivity
- select animals that display characteristics associated with desirable genetic traits
- select animals according to a breeding program's selection criteria
- assess and record performance information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of genetic selection for multi traits
- structural abnormalities and their potential impact on production
- correlated traits
- market requirements and related physical and measurable traits
- enterprise animal selection criteria
- strategies for animal selection -including individual traits, measured performance, Estimated Breeding Value (EBVs & ASBVs), and indexes
- use of breeding value percentile tables

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCLSK418 Escort livestock during export

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to escort livestock during export.

This unit applies to animal attendants who escort livestock on sea voyages.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They may provide direction to others, and use discretion and judgement in the selection, allocation and use of available resources. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

AHCLSK331 Comply with industry animal welfare requirements

AHCLSK307 Euthanase livestock

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out administration requirements	1.1 Obtain and clarify details of the livestock to be exported from the exporter or producer 1.2 Establish effective communication links between all parties to the consignment and any relevant organisations or agencies 1.3 Investigate and verify specific details of the vessel/plane to facilitate loading and transit operations 1.4 Complete required certification, permit and invoicing arrangements according to exporter requirements and relevant legislation 1.5 Estimate nutritional and veterinary requirements and order required quantities according to exporter directions, established industry standards and load specifications
2. Prepare for livestock to be loaded	2.1 Comply with work health and safety policies and procedures, including selection of appropriate Personal Protective Equipment (PPE) 2.2 Ensure that animal welfare and biosecurity requirements are met 2.3 Establish communication lines with all shipboard personnel for the voyage 2.4 Review exporter instructions according to loading criteria 2.5 Identify appropriate infrastructure for loading 2.6 Perform basic risk analysis for loading and recommend preventative measures 2.7 Identify appropriate on-board loading resources including personnel requirements 2.8 Check and ensure all on-board equipment is in working condition, including the veterinary kit and euthanasia equipment
3. Load and accompany livestock on transport	3.1 Observe and follow work health and safety policies and procedures, animal welfare, biosecurity and environmental requirements 3.2 Load and secure prepared livestock safely and humanely according to animal welfare, biosecurity, work health and safety and exporter requirements 3.3 Check and verify loading densities and conditions in accordance with the loading plan and regulatory requirements 3.4 Monitor and record water and feed provision to livestock and report any abnormalities or variance from feed budgets to the appropriate party

Element	Performance criteria
	<p>3.5 Carry out regular observation of all livestock to ensure timely and appropriate responses to changes in condition, feed and water intake, or incidence of disease</p> <p>3.6 Deal humanely with injured or diseased livestock in accordance with relevant animal welfare, biosecurity, health and environmental considerations and in consideration of customer requirements</p> <p>3.7 Complete reports according to shipping company policy and in accurate observation of shipping conditions</p>
4. Complete post-shipment procedures	<p>4.1 Establish unloading strategies including timing, health checks and documentation in consultation with the carrier's Chief Officer or Master</p> <p>4.2 Complete pen cleaning and other established pre-unloading procedures prior to entering port</p> <p>4.3 Unload animals safely and humanely using appropriate equipment and facilities in line with work health and safety, animal welfare, biosecurity and exporter requirements</p> <p>4.4 Identify specific animal requirements at unloading and obtain supplies to meet consignment needs</p> <p>4.5 Complete end of voyage reports and required documentation in accordance with exporter requirements, shipping company policy, government legislation, and customer requirements</p> <p>4.6 Undertake post-transport checks according to exporter and customer requirements, and shipping company policy</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK418A Escort livestock during export

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK418 Escort livestock during export

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out pre-shipping and consignment administration procedures
- make preparations for loading of livestock
- load livestock onto the carrier
- handle, treat and feed livestock in accordance with relevant animal welfare, biosecurity, health and environmental legislation and codes of practice and in consideration of customer requirements
- identify signs of ill health and injury, or signs of abnormal or depressed appetite
- handle and restrain livestock for observation and treatment as required
- oversee the care of livestock in transit
- communicate effectively with exporting agents and related agencies, as well as the Master/Captain, officers and seamen on board
- complete export documentation including daily records of animal observations and conditions
- communicate effectively with exporting agents and related agencies, as well as transportation officers and staff
- implement relevant work health and safety, animal welfare, biosecurity and environmental requirements and practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant work health and safety, animal welfare, biosecurity and quarantine, and environmental legislation and codes of practice

- regulatory requirements and industry standards for the transport of livestock using sea carriers
- typical exporter and shipping company requirements, policies and procedures
- how conflicts should be handled between regulatory requirements and requirements of exporters or shipping companies
- working culture and specifications for imported livestock of common importing countries
- care, husbandry and management procedures for health and welfare of all classes of livestock - including pregnant livestock - in transit
- methods and techniques for handling and restraint of all classes of livestock
- methods and techniques for loading and unloading of livestock
- signs of health, anatomy and physiology of the livestock species
- zoonoses of livestock and preventative health strategies for humans and livestock
- common diseases of the livestock species and preventative health strategies
- signs of ill health and related management strategies in the livestock species
- methods and techniques of euthanasia
- disposal of animal carcasses on-board sea carriers
- on-board procedures and responsibilities
- use and maintenance of personal protective equipment, veterinary, euthanasia and disinfectant materials and equipment
- invoice, receipt and document requirements at both ends of the transport operation
- strategies for effective communication between all parties to the consignment, relevant organisations and agencies, and on-board carrier personnel

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessments for the following performance evidence must be conducted on live animals:

- load and transport livestock

Competency for the unit can be determined in a single species.

Assessors must satisfy current standards for RTOs

AHCLSK501 Manage livestock production

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan for livestock production and manage the implementation of such a plan.

This unit applies to farm managers with extensive or intensive livestock production enterprises.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Plan for production	<p>1.1 Assess the capability of land resources for grazing and determine stock, pasture and land management strategies for each land capability class</p> <p>1.2 Assess the suitability and sustainability of water resources</p> <p>1.3 Establish livestock production targets for each enterprise for the short and long term according to the farms marketing and business plans</p> <p>1.4 Establish production targets, taking into consideration enterprise short and long term livestock production goals, herd/flock breeding improvements and relevant risk control strategies</p> <p>1.5 Select genetics and breeding programs based on the production targets and the marketing requirements for the enterprise</p> <p>1.6 Select and design production facilities in a way that deals sensitively with identified waste products</p> <p>1.7 Establish and specifically include environmental controls in the production plan</p> <p>1.8 Identify work health and safety hazards, assess risks and incorporate suitable controls into the production plan</p> <p>1.9 Prepare a plan that documents the decisions taken, the assessments made, the targets established, and any specific issues that relate to work health and safety, animal welfare, biosecurity and environmental risks</p> <p>1.10 Ensure plan includes the type, format, frequency and detail of any reporting required by both manager(s) and operators</p>
2. Plan for livestock needs	<p>2.1 Determine feed requirements for each age/sex category of herds and/or flocks</p> <p>2.2 Determine most appropriate feeding plan for each livestock category based on a cost benefit analysis</p> <p>2.3 Research and implement most appropriate health strategies to prevent and control disease in each herd and/or flock on the basis of a cost benefit analysis</p> <p>2.4 Prepare schedules for purchasing and using the products and services used in livestock production</p> <p>2.5 Research and implement most appropriate livestock production, harvesting, handling and transportation methods and animal welfare requirements from a cost benefit analysis</p> <p>2.6 Prepare a livestock production plan that incorporates the calendar of operations for each enterprise production cycle, and the management of any specific animal welfare issues</p> <p>2.7 Ensure plan includes the type, format, frequency and detail of any</p>

Element	Performance criteria
	reporting required by both manager(s) and operators
3. Seek information on innovations for existing or potential enterprises and farm activities	3.1 Identify and access sources of information on innovations relevant to the enterprise and livestock species 3.2 Assess information on innovations to determine whether or not such innovations could be used in the present enterprise, or in a potential future enterprise 3.3 Amend prepared production plans to include innovations deemed suitable for use in the enterprise
4. Test and adopt relevant innovations	4.1 Consult any people who may be involved in implementing the innovation or in planning for it and discuss the change with them 4.2 Test innovations on the farm to determine whether or not they are suitable, and whether they may be readily adapted to suit the circumstances of the business 4.3 Identify any work health and safety hazards, animal welfare, biosecurity or environmental risks that present during the trial phase, assess them and take responsible action 4.4 Make a decision about whether or not to adopt the innovation, based on its costs and benefits and any implementation issues, including work health and safety, animal welfare, biosecurity and environmental considerations
5. Implement, monitor and evaluate livestock production plans	5.1 Implement and monitor production plans according to the calendar of operations 5.2 Site, erect or install production facilities in a way that deals sensitively with identified waste products 5.3 Evaluate livestock growth/maturity or production according to the planned targets and the marketing requirements 5.4 Monitor flock/herd health, and control and prevent parasite and disease outbreaks quickly and effectively 5.5 Assess feed supplies, monitor pasture or landscape condition and species composition, and vary stocking rates to maintain optimum pasture and livestock health 5.6 Identify, monitor and manage work health and safety hazards, animal welfare, biosecurity or environmental impacts relating to livestock production in the business to promote optimum pasture, livestock, and employee health 5.7 Analyse physical and financial records and extractions taken from them to assess production performance, and to provide information for business and taxation purposes 5.8 Evaluate the production performance of each enterprise to determine whether or not they are sustainable and profitable, and to use in reviewing and revising production plans
6. Comply with legal	6.1 Obtain information about the legal requirements and regulations

Element	Performance criteria
requirements and regulations	<p>that affect farm land ownership/possession and livestock production</p> <p>6.2 Determine record keeping requirements, and put in place procedures to ensure compliance with the range of applicable regulations including taxation legislation</p> <p>6.3 Obtain permits from the relevant authorities for the transport and movement of livestock and equipment</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCLSK501 Manage livestock production

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop livestock production plans
- manage all resources for a grazing enterprise
- implement grazing strategies that match livestock needs and optimise pasture growth
- maintain the farm natural resource base through sustainable practice
- plan and monitor the finances of the production unit
- observe, identify and react appropriately to animal welfare, biosecurity and environmental implications and work health and safety hazards
- monitor and manage animal health, welfare and nutrition
- supervise livestock husbandry operations
- analyse and assess the economic impact of specific situations
- establish processes/strategies, procedures and controls for livestock production
- assess land capability
- comply with legal and taxation requirements
- maintain records of production.
- assess, and then adopt profitable innovations
- implement and monitor relevant work health and safety, animal welfare, biosecurity and environmental requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock nutrition
- health and welfare of animals within the production system.

- key considerations in a livestock breeding operation
- livestock husbandry and management practices
- land capability and its relevance to planning livestock production in the context of the whole farm
- sustainable land use principles and practices applicable in the region
- environmental controls and codes of practice applicable to the enterprise
- budgeting and financing for an enterprise
- cost benefit analysis,
- management practices and processes to minimise noise, odours and debris from the livestock operations
- relevant legislation and regulations relating to soil and water degradation issues, animal health and welfare, biosecurity and chemical use
- relevant work health and safety legislation and codes of practice

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK502 Arrange marketing of livestock

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify appropriate markets and sales opportunities
- calculate cost of production and target sale price
- select sales outlets
- select selling method and negotiate with brokers, sellers and agents
- prepare and implement marketing plan
- ensure that the product meets legislative and industry requirements for fitness for sale
- coordinate sales and transport logistics for livestock products
- analyse sales data and trends to maximise future profit margins

Knowledge Evidence

The candidate must demonstrate knowledge of:

- market specifications for the products produced
- quality assurance procedures and their implementation
- sales outlets
- current and alternate sale methods
- preparation of livestock and transportation systems
- price risk and sales strategies
- sales analysis
- enterprise and industry policies and codes of practice with regard to livestock sales transportation, recording and reporting requirements
- market access requirements -Minimum Residue Levels (MRLs) and the variance between countries, withholding periods after treatment

Assessment Conditions

Competency is to be assessed in the work place or workplace and simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK503 Develop and implement a breeding strategy

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and implement a livestock breeding program.

This unit applies to managers of livestock enterprises responsible for selection and breeding programs and the use of resources appropriate to meet the breeding aims of the enterprise.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Assess breeding requirements	1.1 Assess and clarify breeding requirements 1.2 Identify and arrange resources to support breeding requirements 1.3 Select breeding options to optimise results and consistency 1.4 Undertake economic assessments to establish the feasibility of the breeding objectives 1.5 Formulate breeding program to meet enterprise objectives, and ensure sufficient flexibility to accommodate contingencies
2. Select livestock for breeding	2.1 Determine selection criteria for the visual and objective methods of selecting livestock based on heritability and economic returns for the enterprise 2.2 Establish culling and replacement practices to maintain or improve appropriate herd size, animal ratios and grade of livestock 2.3 Assess genetic gain potential to determine and justify herd or flock structure 2.4 Source genetic material to optimise genetic gain within the herd or flock from suitable sources 2.5 Check and monitor selected livestock to ensure condition and welfare status meets breeding program requirements 2.6 Carry out measurements of production and genetic characteristics and evaluate results within appropriate breeding program requirements
3. Monitor breeding program	3.1 Monitor implementation of the breeding program for efficiency and effectiveness 3.2 Prioritise and implement changes necessary to achieve breeding aims according to breeding program requirements 3.3 Monitor and control allocated resources within enterprise budgetary constraints 3.4 Maintain safe workplace and environmentally responsible practices in line with industry and enterprise work health and safety and environment sustainability requirements 3.5 Observe and comply with relevant legislative requirements associated with livestock production such as animal welfare and biosecurity requirements
4. Evaluate breeding program	4.1 Review and evaluate breeding program processes and outcomes against enterprise objectives 4.2 Evaluate performance of facilities, resources and equipment for effectiveness and efficiency 4.3 Evaluate effectiveness of selection criteria for contribution to

Assessment Requirements for AHCLSK503 Develop and implement a breeding strategy

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify genetic information for existing and potential livestock through breed data
- use industry programs to benchmark and identify sources of genetic material
- develop a breeding objective
- implement selection strategies for livestock
- implement animal welfare strategies to handle livestock safely and humanely
- monitor progress in a breeding program and review where necessary
- evaluate breeding program
- document and review data derived from the breeding strategy
- maintain a safe and hazard-free workplace environment
- monitor and minimise impacts to the environment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- difference between genotype and phenotype, the heritability of genetic traits and the basic genetic theory related to genetic correlation of traits
- relevance of generation interval in relation to commercial improvement
- relevance of estimated breeding values in the development of a multi trait selection strategy
- economic impact of production characteristics
- features of and measurement of production and genetic characteristics used in breeding programs
- relevant work health and safety and biosecurity requirements, and animal welfare and environment sustainability practices

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

Assessment Requirements for AHCLSK504 Develop livestock health and welfare strategies

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify livestock diseases relevant to the workplace and local environment
- develop prevention and treatment strategies for diseases
- implement a proactive risk management approach to managing animal health and welfare
- implement health and welfare strategies appropriate to the livestock species
- calculate dose rates and schedule treatments
- implement and monitor relevant work health and safety requirements
- implement and monitor relevant biosecurity and animal welfare practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- livestock health and abnormalities
- preventative health strategies
- principles of genetic resistance and immunity
- contingency and operational planning
- relevant animal welfare legislation, regulations and codes of practice
- relevant environmental protection legislation and codes of practice
- treatment applications, handling and consequences of their use
- relevant quarantine, biosecurity and emergency legislation, codes of practices and procedures
- relevant work health and safety legislative requirements

Assessment Conditions

Competency is to be assessed in the work place or simulated environments that accurately reflect performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

essential outcomes.	achievement of the element.
1. Determine the feasibility of an effluent management system	1.1 Assess and determine planning parameters that affect the design of effluent management systems 1.2 Assess and determine statutory, local government and environment authority requirements for effluent disposal 1.3 Assess and determine the environmental impacts of livestock effluent disposal 1.4 Evaluate effluent recycling options in conjunction with the enterprise plan 1.5 Analyse effluent processing options on the basis of their merits and suitability for the environment 1.6 Obtain information from effluent management specialists on all relevant aspects of effluent management 1.7 Assess and determine an effluent management system on the basis of a cost benefit analysis
2. Design an effluent management system	2.1 Calculate the volume of livestock effluent using information collected from enterprise plans, industry and enterprise production data and other sources 2.2 Calculate the volume of water flowing into the effluent management system 2.3 Calculate storage requirements 2.4 Obtain professional advice appropriate to the complexity of the task and the financial risk involved 2.5 Ensure plan and layout include provision of access, availability and the incorporation of technological innovations 2.6 Assess and evaluate work health and safety hazards and risks, establish safe systems, and maintain records 2.7 Ensure effluent management system design reflects the requirements of the enterprise business plan, production plan and management plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLSK506A Design livestock effluent systems

Assessment Requirements for AHCLSK506 Design livestock effluent systems

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess the effectiveness of a range of effluent management systems to meet the requirements of statutory, local government and environment authorities for effluent disposal
- conduct cost benefit analysis of livestock effluent management systems to select a suitable effluent management system
- design and plan the layout of an effluent system that meets environmental standards and enterprise requirements
- design an effluent management system
- incorporate the enterprise work health and safety and environmental management policies into the plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, characteristics, disadvantages and advantages of effluent management systems (including storage, recycling, processing and disposal)
- regulatory requirements, including environmental, sustainability work health and safety and biosecurity requirements, industry standards, industry and enterprise production parameters, data and information for the design and planning of effluent management systems
- uses and processes for cost benefit analyses, and their applications in relation to livestock production and effluent management
- types and use of information required, and methods for the assessment and determination of effluent production, output and volume for livestock enterprises

- effects and impacts of different livestock production systems on the design and planning of effluent management systems
- types and use of information and advice from other professions or industry sectors that are relevant to livestock enterprises in the design of effluent management systems, including engineering and financial professions

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current conditions for RTOs.

AHCLSK507 Plan, monitor and evaluate strategies to improve livestock through genetics

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Application

This unit of competency covers the planning required to determine the genetic selection of a pure breed or cross breeding program to suit the farm environment. The plan will aim to increase production and financial return by using genetic improvement of the livestock for meat production, dairy production and fibre production and the evaluation of the current breeding program. Data is collected and analysed in order to select sires and dams to improve the livestock to meet the product specifications chosen for the enterprise. Evaluation of the breeding program is carried out on completion.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes of practice and sustainability practices.

This unit is applicable to a person who has a role in managing a breeding enterprise. This unit is likely to require consultation with breed societies, importers and distributors of genetic material, local livestock agents, processors and marketers of the product.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Livestock (LSK)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine breeding goals for the enterprise in relation to market specifications	1.1 Determine the breeding goals for the short term and the strategy to meet market specifications in the long term 1.2 Analyse the traits affecting profit in a livestock breeding enterprise to optimise production through an improved genetic breeding program 1.3 Assess the environment where the breeding enterprise is based and select a breed and breeding program to match that environment 1.4 Select a product specification suited to the breeding enterprise
2. Assess current performance of the breeding enterprise	2.1 Collect and analyse data on the traits currently used in the breeding enterprise 2.2 Collect and analyse data on current market performance, using feedback from processors and customers
3. Assess and select livestock for genetic improvement	3.1 Assess the current breeding herd for the genetic traits required for production and marketing 3.2 Analyse genetic information to select herd replacements from the breeding herd and before purchasing stock 3.3 Evaluate the costs and benefits of natural mating, Artificial Insemination (AI) and Embryo Transfer (ET) to achieve genetic improvement
4. Carry out a breeding program	4.1 Assess and improve the facilities on the property for drafting, inseminating and pregnancy testing 4.2 Develop and monitor procedures to be followed for work health and safety while implementing the animal-breeding program 4.3 Apply legal, veterinarian and welfare requirements 4.4 Apply practices to improve submission rates and conception rates of a breeding program 4.5 Assist genetic selection by the use of equipment to aid in data collection and analysis 4.6 Use new technology to collect feedback to improve production and market performance
5. Evaluate the breeding program against the breeding goals	5.1 Assess the compliance of the livestock to the market specifications by using electronic information including feedback sheets and test results 5.2 Assess the phenotype of the livestock produced against the breeding goals

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to VBP152 Plan, monitor and evaluate strategies to improve livestock through genetics.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCLSK507 Plan, monitor and evaluate strategies to improve livestock through genetics

Modification History

Release Number	TP Version	Comments
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- analyse profit for the breeding enterprise
- select suitable market specifications for the enterprise
- develop selection criteria for a breeding program
- select livestock for a breeding program on phenotype and genotype
- assess farm facilities to carry out a breeding program
- use Breed Object index
- arrange Artificial Insemination (AI) and Embryo Transfer (ET) programs
- implement the breeding program
- feed livestock to ensure success of a breeding program
- organise drugs, animal identification and all equipment in clean working order in preparation for the program
- keep breeding and production records
- submit records and information for statistical analysis and registration of livestock
- handle livestock safely and humanely
- interpret feedback information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- theory of cell division and the structure of DNA
- heritability estimates for the selected characteristics
- recording and understanding breed pedigrees
- dominant genetic traits and marker genes

- accuracy of the genetic potential of the selected breeding trait for the program
- genetic defects
- value of heterosis in a breeding program
- ethics and codes of practice for the welfare of livestock on the breeding program
- phenotype selection criteria
- market specifications targeted by the breeding program
- long term breeding aims
- pregnancy testing procedure
- veterinary and non-veterinary standard operating procedures
- sources for genetic information, up to date program design and implementation procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMER301 Process customer complaints

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to handle formal and informal feedback and complaints from customers.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Merchandising and Sales (MER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Respond to customer complaints	1.1 Process complaints as per organisational policies and procedures 1.2 Obtain, document and review reports relating to the complaints

Element	Performance criteria
	1.3 Make decisions taking into account applicable law, company policies and codes 1.4 Negotiate resolution of the complaint and seek agreement where possible 1.5 Maintain a register of complaints and disputes 1.6 Inform customer of outcome of investigation
2. Refer complaints	2.1 Identify complaints that require referral to other personnel or external bodies 2.2 Make referrals to appropriate personnel for follow up 2.3 Forward all documents and investigation reports 2.4 Ensure appropriate personnel are followed up to gain prompt decisions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMER301A Process customer complaints.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCMER301 Process customer complaints

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply organisational or industry procedures for customer complaints
- investigate the details of and background to the complaint and refer to other parties if required
- negotiate an outcome with the customer if appropriate
- process the complaint according to enterprise policy
- recommend appropriate action arising from the complaint

Knowledge Evidence

The candidate must demonstrate knowledge of:

- State/Territory/Commonwealth legislation, regulations, industry codes of practice, standards and guidelines
- organisational policy and procedures for dealing with complaints
- strategies for dealing with customer complaints
- negotiation and communication strategies
- the individual's role in processing customer complaints

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCMER302 Provide advice on hardware products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- advise customers as to the range of products available for their specific application/environment
- engage with and give advice to customers
- ensure that the advice, product type, application and suitability are understood by the customer
- encourage add on sales
- research hardware products
- organise the demonstration of products
- represent the enterprise in a professional manner when dealing with customers

Knowledge Evidence

The candidate must demonstrate knowledge of:

- customer service and selling techniques
- systems and procedures for the safe handling of products
- enterprise policies and procedures, business values, structure, product range and services
- industry terminology for products
- relevant requirements of work health and safety, industry, fair trading, trade practices, sales of goods, and public liability

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHC MER304 Recommend irrigation products and services

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recommend irrigation products and services to fulfil the needs of a client.

It applies to individuals who take responsibility for own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Merchandising and Sales (MER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Research store product range	1.1 Accessing relevant sources of information to develop product knowledge 1.2 Identify products according to relevant product information 1.3 Operate store products, machinery and equipment safely 1.4 Demonstrate a broad knowledge of irrigation product range

Element	Performance criteria
2. Recommend irrigation products	2.1 Identify client's needs 2.2 Provide details of product specifications and explain to clients to assist buying decisions 2.3 Explain features and benefits of products to clients to create a buying environment
3. Estimate quantities	3.1 Estimate quantities of irrigation products accurately from measurements and information provided according to product requirements 3.2 Provide client with accurate quotation for estimated quantities
4. Advise on irrigation product warranties	4.1 Provide client with clear explanations of the comparisons between products and manufacturer's warranties 4.2 Confirm individual product warranty terms and conditions from relevant sources of information 4.3 Provide client with written information regarding individual product warranty terms and conditions, especially extended or promotional warranties
5. Negotiate price and payment options	5.1 Explain payment options including store recommended retail pricing for various brand options 5.2 Negotiate individual product prices where necessary to achieve sales
6. Advise on and arrange product service and repairs	6.1 Question client to determine nature of problem 6.2 Identify problem by accessing manufacturer's information 6.3 Offer solutions taking in consideration the nature of problem and available product information 6.4 Identify and discuss the service or repair process 6.5 Quote price and timeline for basic service or repairs 6.6 Obtain client details and record on repair form 6.7 Label item for repair and store securely 6.8 Notify client on completion of service or repair

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHCMER401 Coordinate customer service and networking activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate customer service and networking activities.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes.

This unit applies to agricultural or horticultural merchandise or department managers who have responsibility for customer service delivery by others.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Merchandising and Sales (MER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Contribute to quality customer standards	1.1 Access, interpret, apply and monitor customer service standards in the workplace 1.2 Make contributions to the development, refinement and improvement of service policies, standards and processes 1.3 Ensure customer interactions are consistent with legislation, codes of practice and enterprise policies
2. Implement customer service systems	2.1 Encourage personnel to consistently implement customer service systems 2.2 Review customer feedback in consultation with appropriate personnel and analyse when improving work practices 2.3 Identify customer service complaints and make adjustments to ensure continued service quality 2.4 Communicate adjustments to all those involved in service delivery within appropriate time frames 2.5 Coordinate and manage delivery of services or products to ensure they effectively and efficiently meet agreed quality standards
3. Manage networks to ensure customer needs are addressed	3.1 Establish effective regular communication with customers 3.2 Establish, maintain and expand networks to ensure referral of customers to products or services 3.3 Establish procedures to ensure that decisions about targeting of customer services are based on up-to-date information about the customer and the products/services available 3.4 Establish procedures to ensure that referrals are based on the matching of the assessment of customer needs and availability of products/services 3.5 Maintain records of customer interaction in accordance with organisational guidelines

Identify customer needs	1.1 Use interpersonal skills to identify customer needs 1.2 Handle customer enquiries courteously and promptly 1.3 Match available products to customer needs and against environmental considerations 1.4 Research and update knowledge and understanding of farm chemicals and related products from authoritative sources 1.5 Research local enterprise and district requirements for farm chemical products
2. Provide product advice	2.1 Provide advice that addresses customer needs in a timely and professional manner and is in line with enterprise and legislative requirements 2.2 Consider and discuss environmental considerations, non-chemical alternatives and additional products 2.3 Address customers concerns and questions 2.4 Ensure that information and directions on the product label are understood by the customer 2.5 Provide relevant safety information to the customer for recommended products 2.6 Prepare and supply quotations
3. Sell products	3.1 Ensure relevant licences/accreditation regarding the sale and handling of farm chemicals are held by salesperson and enterprise 3.2 Complete sales in to customer's satisfaction in accordance with enterprise and legislative requirements 3.3 Supply Safety Data Sheets (SDS) to customers purchasing registered chemicals. 3.4 Identify and respond to opportunities for add-on and repeat sales 3.5 Monitor sales results against specified criteria 3.6 Review sales techniques to enhance future sales results
4. Handle and maintain products	4.1 Handle and store farm chemical products safely and efficiently in line with manufacturer, work health and safety and chemical legislation requirements 4.2 Complete documentation 4.3 Monitor stock levels and follow re-ordering procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMER403A Provide advice and sell farm chemicals.

Assessment Requirements for AHC MER403 Provide advice and sell farm chemicals

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- engage customers, in relation to giving advice, receiving information and creating additional sales opportunities
- assess and demonstrate cost benefits of products
- ensure that information and directions on the product label are understood by the customer
- research supplier information
- supply Safety Data Sheets (SDSs) with all registered chemicals
- encourage add on sales and represent the enterprise in a professional manner
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- potential environmental impact of chemicals
- enterprises business values, structure, products and services
- chemical formulations, available proprietary products and their applications
- the content and legal status of registered chemical labels
- relevant HAZCHEM, AGSAFE, Australian Dangerous Goods, work health and safety, industry, fair trading, trade practices, and sales of goods legislation
- enterprise policies and procedures relating to customer service
- relevant licences/accreditation regarding the sale and handling of farm chemicals
- work health and safety, pesticides and environmental legislation, codes of practice and enterprise procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMER404 Provide advice on agronomic products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide advice on agronomic products.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit applies to rural products merchandisers whose job role includes providing advice on agronomic products including fertilisers.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Merchandising and Sales (MER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Identify customer needs	1.1 Use interpersonal skills to identify customer needs 1.2 Handle customer enquiries courteously and promptly in accordance with enterprise and legislative requirements 1.3 Match available products to customer needs and against ecological considerations 1.4 Research and update knowledge and understanding of agronomic products and related products from authoritative sources 1.5 Research local enterprise and district requirements for agronomic products
2. Provide product advice	2.1 Provide advice that addresses customer needs in a timely and professional manner and is in line with enterprise and legislative requirements 2.2 Exhibit or demonstrate products to customer in line with enterprise procedures and legislative requirements 2.3 Organise product trials of products when required 2.4 Suggest alternative and additional products and services 2.5 Address customers concerns and questions in line with enterprise requirements 2.6 Provide relevant safety information to the customer for recommended products

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC MER404A Provide advice on agronomic products.

Assessment Requirements for AHC MER404 Provide advice on agronomic products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research sources of agronomic information to retain technical currency in all aspects of agronomy relevant to local district requirements
- engage with and give advice to customers
- ensure that the advice and product type are applicable and suitable for the purpose and growing environment of the client
- encourage add on sales
- represent the enterprise in a professional manner when dealing with customers
- follow enterprise of work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- customer service techniques
- systems and procedures for the safe handling of products
- enterprises business values, structure, products and services
- industry terminology for products
- requirements of local or specific customers
- relevant requirements of work health and safety, industry, fair trading, trade practices, sales of goods, environment and public liability legislation
- agronomic products including fertilizers and crop seeds and their uses
- relevant components of State/Territory Acts relating to fertilisers and certified seeds

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMER406 Provide information on fertilisers and soil ameliorants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide information on fertilisers and soil ameliorants.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes, and sustainability practices.

This unit applies to employees in a sales role in an agricultural or horticultural support enterprise who provide information on fertilisers, soil ameliorants and related environmental information to primary producers

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Merchandising and Sales (MER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Gather information on the requirements of the client	1.1 Identify basis of fertiliser or soil ameliorant requirement 1.2 Evaluate planned use of fertiliser or soil ameliorant against legislative requirements, local productivity and environmental guidelines and food safety regulations 1.3 Take individual soil, plant tissue and water samples for each customer 1.4 Provide customer with relevant sampling kits and advice on sampling procedures where appropriate
2. Provide information on nutrient management program	2.1 Provide information and referrals about the fertiliser and soil ameliorant products including work health and safety, biosecurity, food safety and environmental and sustainability issues inline with industry codes of practice and enterprise policies 2.2 Recommend use of nutrient management tools where necessary 2.3 Suggest changes to application method or timing if necessary 2.4 Research and update knowledge and understanding of fertilisers, soil, ameliorants and related products from authoritative sources 2.5 Research local enterprise and district requirements for fertilisers, soil, ameliorants and related products
3. Provide appropriate service or product	3.1 Refer customer to a specialist adviser if required 3.2 Provide customer with information regarding transporting, storing and handling fertiliser and soil ameliorants 3.3 Arrange transport, handling and storage of fertiliser and soil ameliorants where required 3.4 Supply fertiliser and soil ameliorants that meet legislative requirements and productivity, food safety, biosecurity and environmental guidelines 3.5 Record details of transaction

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMER406A Provide information on fertilisers and soil ameliorants.

Assessment Requirements for AHCMER406 Provide information on fertilisers and soil ameliorants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- take soil, plant tissue and water samples
- use and explain use of nutrient management tools
- provide information on the relationship between soil types, water, crops, fertiliser and soil ameliorant use
- follow enterprise work health and safety policies
- follow enterprise biosecurity and sustainability policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- crop nutrient requirements - both macro and micro nutrients
- effect of soil ameliorants in dispersion and adjustment for acidity or alkalinity (pH)
- fertiliser and soil ameliorant application methods, including timing and frequency of fertiliser and soil ameliorant application to minimise losses
- fertiliser and soil ameliorants availability and relative costs
- industry production regimes and fertiliser practices
- sources of technical information
- major nutrient management risks of leach, run-off, load, blow, mine and how these impact on the environment
- nutrient management advisory tools and processes used by advisers in making a crop nutrition recommendation
- organisational work health and safety and environmental procedures, practices and policies in operating sampling equipment
- packaging and dispatch procedures for samples

- physical, chemical and biological properties related to a healthy soil and environment,
- sampling tools and methods, including soil, plant tissue and water tests; yield monitoring; and electrical conductivity survey
- impact of climate on soil productivity
- environmental impacts including soil structural decline, fertility decline, acidification and salinity, erosion, loss of organic matter, water quality, fertiliser and soil ameliorant impurities, and greenhouse gas emissions
- work health and safety legislation
- use, transport, handling and storage requirements of fertiliser and soil ameliorants in terms of legislation, codes of practice, environmental stewardship and human safety

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMER407 Provide irrigation sales and service

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide irrigation sales and service.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Merchandising and Sales (MER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify customer needs	1.1 Use appropriate interpersonal skills to accurately identify customer needs 1.2 Handle customer enquiries courteously and promptly

Element	Performance criteria
	1.3 Match available products to customer needs and against ecological considerations 1.4 Research and update knowledge and understanding of irrigation products regularly from authoritative sources
2. Provide advice on products and services	2.1 Provide advice that addresses customer needs to customers in a timely and professional manner 2.2 Explain or show products to customer that may meet needs 2.3 Suggest alternative and additional products and services as necessary 2.4 Address customer concerns and questions sensitively
3. Recommend irrigation components and pumps	3.1 Interpret irrigation design 3.2 Confirm pump and component requirements and discuss with customer 3.3 Provide advice on irrigation pumps based on suitability for the task, energy efficiency from pump curves and serviceability 3.4 Provide advice on components based on technically correct and current information
4. Research irrigation innovations and products	4.1 Maintain contacts in irrigation product development and review new products regularly 4.2 Study exhibitions and field displays to update technical expertise 4.3 Read and incorporate technical information and extension advice to provide advice to customers
5. Conduct retail transactions with irrigation clients	5.1 Estimate quantities for irrigation installation projects 5.2 Provide quotes on products and services 5.3 Negotiate price and payment options 5.4 Provide advice on irrigation product warranties 5.5 Organise product service and repairs 5.6 Organise delivery of irrigation merchandise

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCIRG428A Provide irrigation sales and service.

Assessment Requirements for AHC MER407 Provide irrigation sales and service

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate pressure loss due to irrigation components
- calculate pumping requirements
- conduct research of products
- estimate requirements for materials and components from a plan
- identify adverse environmental impacts of irrigation pumping activities and take appropriate remedial action
- implement and follow work health and safety and environmental requirements
- interpret irrigation plans
- interpret pump curves
- monitor performance of pumps and irrigation components
- pressure testing pumps
- provide customer service
- select irrigation components for a system
- use pressure testing equipment
- use recorded information to review energy and water efficiency for an irrigation system

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of irrigation sales and service
- basic irrigation system diagnostic techniques
- demonstration and assembly of irrigation products and components
- determination of pump capacities in relation to proposed application

- interpretation of manufacturers specifications
- irrigation components technical specifications and suitability
- price negotiation and payment options
- pump and irrigation equipment characteristics, technical capabilities and limitations
- pump and irrigation equipment components, controls, features and functions
- store irrigation products and pump range
- store product and service and repair policy

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCMER501 Develop a sales strategy for rural products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a sales strategy for rural products.

All work must be carried out to comply with workplace procedures, work health and safety legislation and codes.

This unit applies to individuals who take responsibility for their own work and who provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

This unit applies to retail and wholesale rural products managers.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Merchandising and Sales (MER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Review existing sales plans	1.1 Review current market returns against sales objectives for the property 1.2 Analyse and compare current performance data to relevant benchmark information 1.3 Identify trends and opportunities in respect to customer requirements 1.4 Review current specifications for products and services
2. Devise a sales strategy	2.1 Identify range of market options for farm products and services 2.2 Analyse alternative market options for their profitability and feasibility consistent with sales objectives for property 2.3 Review the legal implications of the sales strategy 2.4 Develop sales plan identifying product specifications and quality assurance strategy, target market outlets, timing and volume of sales and price risk management strategy 2.5 Determine available resource commitments and capacity to implement the sales strategy 2.6 Define contingency arrangements to manage variations in production and market prices
3 Implement and review a sales strategy	3.1 Conduct sales according to the sales strategy and adjust according to the contingency plan 3.2 Review and amend sales plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

AHC MKH304 Monitor and establish milking machine cleaning

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and provide advice on cleaning milking machines.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify cleaning problems	1.1 Establish hygiene practices through interview and shed records 1.2 Establish bacterial levels for the plant from factory test results and

Element	Performance criteria
	identify potential cleaning problems 1.3 Identify residues and other evidence of poor cleaning regimes by Inspecting and disassembling milking equipment 1.4 Establish cleaning and hygiene regimes and identify cleaning chemicals to be used 1.5 Determine water quality and quantity for optimal cleaning outcomes 1.6 Identify work health and safety hazards, assess risks, implement control measures and keep records
2. Carry out cleaning routines	2.1 Carry out manufacturer specified machine and ancillary equipment cleaning routines 2.2 Carry out manufacturer specified vat cleaning routines 2.3 Monitor water temperature and circulating chemical concentrations throughout the cleaning cycle 2.4 Remove milk stone and other accumulated residues by manually cleaning milking facility equipment
3. Determine chemicals and cleaning routines	3.1 Determine and document suitable cleaning routines in consultation with equipment manufacturer and chemical company 3.2 Determine and record cleaning routine and hygiene regime for the milking facility and all installations 3.3 Evaluate cleaning routine and hygiene regime to ensure that equipment and cleaning performance meets established performance specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH304A Monitor and provide advice on cleaning milking machines.

Assessment Requirements for AHCMKH304 Monitor and establish milking machine cleaning

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify cleaning problems
- carry out cleaning routines
- determine chemicals and cleaning routines
- apply enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning, monitoring and maintenance of milking machines, milking machine components and milking facility equipment
- requirements, criteria and assessment methods for optimal performance of milking machines and their components
- possible faults, problems and poor performance with milking machines and their components, impacts on milking operations and corrective actions for these faults and problems
- requirements, criteria, procedures, routines and assessment methods for optimal cleaning and hygiene of milking machines and their components
- types, handling, use and disposal of detergents and cleaning agents, work health and safety and environmental practices for these agents
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMKH305 Mechanically test milking machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to mechanically test milking machines.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Record milking machine specifications	1.1 Establish herd details and health status 1.2 Determine expected performance from machine specifications

Element	Performance criteria
	1.3 Assess and record condition of components 1.4 Identify work health and safety hazards, assess risks implement controls, record and report to supervisor
2. Calculate required milking machine performance	2.1 Calculate effective reserve based on facility specifications 2.2 Calculate vacuum pump capacity from effective reserve 2.3 Record manufacturer's recommended component specification and matching
3. Measure milking machine performance	3.1 Measure working vacuum levels in line with required performance 3.2 Adjust vacuum to optimise milking facility performance 3.3 Determine and report air consumption and component leakage. 3.4 Test pulsators in line with manufacturer's recommendations 3.5 Establish and match working air consumption to manufacturer's recommendations
4. Make recommendations to optimise machine performance	4.1 Interpret test results in line with desired performance and herd details 4.2 Provide recommendations and a written report on safety considerations for the specific installation tested 4.3 Provide recommendations on milking facility performance 4.4 Complete report on component condition in line with manufacturer's requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH305A Mechanically test milking machines.

Assessment Requirements for AHCMKH305 Mechanically test milking machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- record milking machine specifications
- calculate required milking machine performance
- measure milking machine performance
- make recommendations to optimise machine performance
- apply enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- information required, criteria and methods for assessing herd health status
- types, functions, cleaning, monitoring and maintenance of milking machines, milking machine components and milking facility equipment
- requirements, criteria and assessment methods for optimal performance of milking machines and their components
- requirements and methods for determining the performance targets of a milking enterprise from the herd status and milking installations
- possible faults, problems and poor performance with milking machines and their components, impacts on milking operations and corrective actions for these faults and problems
- relevant work health and safety requirements
- key aspects and components of reports and recommendations to a milking enterprise

Assessment Conditions

Competency is to be assessed in the workplace OR workplace and simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHC MKH401 Carry out cleaning-time tests of milking machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to carry out cleaning time tests of milking machines.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for cleaning-time testing	1.1 Implement enterprise work health and safety policies 1.2 Establish protocols for the conduct of cleaning-time tests based

Element	Performance criteria
	<p>on previous testing outcomes</p> <p>1.3 Assess and record quality of water used for the cleaning process from on-site, facility or laboratory tests</p> <p>1.4 Determine the suitability and recommended concentrations of cleaning chemicals in line with prevailing water quality, facility requirements and equipment manufacturer recommendations</p> <p>1.5 Establish bacteriology of the specific facility from relevant records</p>
2. Carry out cleaning-time tests of milking equipment	<p>2.1 Identify and record details of normal cleaning routines and procedures while testing is carried out</p> <p>2.2 Install testing equipment to measure water or airflow velocities</p> <p>2.3 Carry out cleaning-time tests before or during the cleaning of the milking machines or bulk milk tank</p>
3. Report on cleaning-time test result	<p>3.1 Record and collate test results</p> <p>3.2 Interpret test report results in line with industry standards and manufacturer recommendations</p> <p>3.3 Report test results to the enterprise</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH401A Carry out cleaning-time tests of milking machines.

AHCMKH402 Design and fabricate milking equipment installations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design and fabricate milking equipment installations.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare design and	1.1 Determine facility design and installation estimates to suit the

Element	Performance criteria
installation estimates	application 1.2 Document financial and physical resources that impact on the proposed works 1.3 Identify work health and safety issues that impact on the design and construction of the facility and installation, and incorporate risk controls in the design and construction planning 1.4 Determine manpower and other resources required and submit the tender
2. Plan installation	2.1 Complete contract for work including verification of material estimates and costings 2.2 Obtain relevant building and planning permits 2.3 Ensure site planning includes consideration of environmental issues, service connections and alternative power supplies 2.4 Plan required components to match the proposed installation and source from the original equipment manufacturer 2.5 Plan the installation to eliminate hazards to people and animals during milking, cleaning or service operations
3. Facilitate the completion of the installation	3.1 Carry out job scheduling with all relevant parties 3.2 Order and take delivery of physical and material resources 3.3 Coordinate the implementation of the milking machine installation 3.4 Establish areas of responsibility for all the project participants and provide full notification

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH402A Design and fabricate milking equipment installations.

AHC MKH403 Design and install enterprise milk cooling and storage

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design and install on-farm milk cooling and storage systems.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine cooling and	1.1 Determine available cooling water supply quantity and test the

Element	Performance criteria
storage system requirements	<p>quality of the water supply</p> <p>1.2 Ensure the planned milk cooling and storage systems meet industry standards and match enterprise and herd needs</p> <p>1.3 Determine and record design considerations including appropriate siting of components</p> <p>1.4 Determine work health and safety hazards, assess risks, implement controls and report as required</p>
2. Determine milk pre-cooling requirements	<p>2.1 Measure and record maximum peak flow of milk delivery</p> <p>2.2 Check cooling water temperatures and quality against design specifications</p> <p>2.3 Compare available milk cooling equipment with design requirements and select suitable equipment</p> <p>2.4 Determine work health and safety and human health regulatory requirements and establish compliance targets</p> <p>2.5 Determine water cooling system requirements in line with planned equipment and available resources</p>
3. Determine milk storage requirements	<p>3.1 Determine enterprise milk production levels and projected production increases</p> <p>3.2 Establish milk entry temperature and other critical design considerations in consultation with the enterprise and from available data</p> <p>3.3 Select a suitable milk vat to meet shed production requirements and bulk milk collection routines</p>
4. Install milk cooling and storage equipment	<p>4.1 Install plate cooler and other components of the pre-cooling system in line with established system design and industry standards</p> <p>4.2 Install vat and refrigeration equipment to meet design specifications</p> <p>4.3 Complete commissioning tests to ensure the operation of all elements of the cooling and storage systems comply with performance targets and milk supply quality standards</p>
5. Operate and maintain milk cooling and storage equipment	<p>5.1 Complete routine maintenance program requirements in line with manufacturers' recommendations</p> <p>5.2 Determine repair and service requirements, including rectification of operational faults, as part of maintenance routines</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH403A Design and install on-farm milk cooling and storage.

Assessment Requirements for AHCMKH403 Design and install enterprise milk cooling and storage

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine cooling and storage system requirements
- determine milk pre-cooling requirements
- determine milk storage requirements
- install milk cooling and storage equipment
- operate and maintain milk cooling and storage equipment
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant requirements and industry standards for design, planning, installing and operating milk cooling and milk storage systems
- types, functions, cleaning, operating, monitoring and maintenance of milk cooling and milk storage systems and all components
- requirements, components and considerations for designing, planning, siting and installing milk cooling and milk storage systems and their components, and to meet the needs of the enterprise
- requirements, criteria and assessment methods for determining water quality and the impacts of water quality on maintenance and performance of milk cooling and milk storage systems
- possible faults, problems and poor performance with milk cooling and milk storage systems and their components, impacts on enterprise operations and corrective actions for these faults and problems

- criteria and methods for assessing performance of milk cooling and milk storage systems and their components
- requirements and assessment methods for determining enterprise milk production levels
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMKH404 Install milking equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install milking equipment.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Order installation components	1.1 Complete contract for work with customer 1.2 Order specified tinware as per planned installation

Element	Performance criteria
	1.3 Ensure bending and rolling of pipe work meet specifications 1.4 Assemble components in transportable sections for transfer to site 1.5 Seek specialist advice for non-standard installations
2. Inspect and prepare installation site	2.1 Check site location, dimensions and levels 2.2 Determine work health and safety hazards, assess risks, implement controls and complete records 2.3 Report non-compliance and make alterations and corrections in consultation with the appropriate authorities 2.4 Measure installation and mark layout as per contract plans
3. Manufacture components in the workshop	3.1 Ensure vacuum pump guards and stands are made according to specifications 3.2 Ensure pipelines and vessels are manufactured and assembled according to installation design 3.3 Pre-wire electrical components 3.4 Complete non-milking systems as per dairy plan 3.5 Determine work health and safety hazards, assess risks and implement safe systems of manufacture
4. Install machine/equipment	4.1 Prepare machine/equipment components for sequential installation 4.2 Install machine/ equipment as per specifications and in co-operation with the enterprise and trade and building personnel 4.3 Carry out all work as per regulatory requirements and in compliance with the Australian Standards for Milking Equipment Installation and Performance 4.4 Determine work health and safety hazards, assess risks and implement safe systems of installation 4.5 Make modifications to standard operating procedures as required 4.6 Level, align, couple and connect machine/ equipment as per specifications, excluding electrical components
5. Commission test installed machine/equipment	5.1 Complete mechanical testing of machine/ equipment to ensure conformance to specifications, performance standards and other requirements such as work health and safety 5.2 Take corrective actions for machine/equipment performing below standards and manufacturer's specifications 5.3 Ensure final work quality and finish comply with established industry standards 5.4 Clean site, remove all leftover materials and waste, and ensure that site is safe 5.5 Record and report all alterations/modifications to machine/equipment to the appropriate authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Assessment Requirements for AHCMKH404 Install milking equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- order installation components
- inspect and prepare installation site
- manufacture components in the workshop
- install machine/equipment
- commission test installed machine/equipment
- implement work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, functions, cleaning, operation, monitoring and maintenance of milking facilities and milking machine/equipment
- requirements, resources, components, manpower and procedures for installation of milking machine/equipment
- requirements, criteria and procedures for making alterations/modifications to milking machine/equipment
- Australian Standards for Milking Equipment Installation and Performance, regulatory requirements and procedures for reporting non-compliance
- implications and impacts of non-compliance of milking machine/equipment
- relevant requirements and considerations for installing milking machine/equipment
- key aspects and components of contracts for work
- types of relevant approvals, authorities and permits required, and procedures to obtain these approvals, authorities and permits
- criteria and methods for assessing performance of milking machine/equipment

- requirements, procedures and assessment criteria for mechanical testing of milking machine/equipment
- possible faults, problems and poor performance with milking machine/equipment and corrective actions for these faults, problems and poor performance
- requirements, methods and procedures for site cleaning, waste and debris disposal
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMKH405 Performance test milking machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to performance test milking machines.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit may apply to partnerships between milking machine technicians, veterinarians, dairy factory field officers, herd test personnel, detergent and chemical company representatives, original equipment manufacturer representatives, regulatory authority personnel and enterprise.

This unit applies to individuals who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Milk Harvesting (MKH)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Wet test milking machine/equipment	1.1 Apply enterprise work health and safety policies 1.2 Collate relevant mechanical testing reports and outcomes as the basis for additional tests 1.3 Establish protocols for wet testing to suit individual installation requirements 1.4 Install test equipment at specific locations to complete tests 1.5 Measure and record vacuum levels and vacuum drop and identify abnormalities
2. Carry out milking-time tests of milking machine/equipment	2.1 Establish protocols for milking-time tests based on consideration of previous dry or wet testing outcomes 2.2 Install testing equipment to complete agreed tests during milking 2.3 Complete milking-time tests and record results 2.4 Submit written assessment and recommendations to the enterprise

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMKH405A Performance test milking machines.

Assessment Requirements for AHCMKH405 Performance test milking machines

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- wet test milking machine/equipment with live animals
- carry out milking-time tests of milking machine/equipment with live animals
- apply enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- requirements, equipment, procedures and assessment criteria for mechanical testing, wet testing and milking time testing of milking machine/equipment
- criteria, methods and procedures for assessing performance of milking machine/equipment
- key aspects and components of collating, interpreting and reporting on test results to an enterprise
- relevant work health and safety requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMOM101 Assist with routine maintenance of machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with routine maintenance of small engine machinery and equipment including hand tools.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare for basic routine maintenance	1.1 Read or listen to work instructions from supervisor and clarify where necessary 1.2 Identify and select tools and supplies required to carry out basic routine maintenance tasks 1.3 Carry out routine pre-operational checks of machinery and equipment and make adjustments where required 1.4 Identify and segregate faulty or unsafe machinery and equipment for repair or replacement 1.5 Identify work health and safety hazards in the workplace and report to the supervisor 1.6 Select and use suitable personal protective equipment
2. Carry out basic routine maintenance	2.1 Carry out greasing, lubrication and other basic servicing of machinery and equipment 2.2 Make routine adjustments and repairs to machinery and equipment 2.3 Use safe work methods
3. Complete basic routine maintenance activities	3.1 Clean and store tools 3.2 Collect, treat and dispose or recycle waste from maintenance activities according to environmental procedures and enterprise requirements 3.3 Clean and maintain work area 3.4 Report malfunctions, faults, wear or damage to tools to supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM101A Assist with routine maintenance of machinery and equipment.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- test machinery and equipment to identify faults
- carry out basic repairs
- complete work records
- clean up work area
- apply safe and environmentally responsible workplace practices
- read and interpret manufacturers specifications, work and maintenance plans, safety decals and Safety Data Sheets (SDSs)
- measure and calculate volumes, consumption and lubrication requirements
- use oral communication skills and language competence to communicate effectively with others
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types, characteristics and functions of machinery and equipment
- machinery and equipment operating procedures
- types, characteristics and functions of tools used in maintenance of machinery and equipment
- enterprise work health and safety legislative requirements
- Codes of Practice with regard to the use and control of hazardous substances
- environmental Codes of Practice with regard to disposal of fuels and oils

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOM201 Operate two wheel motorbikes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and operate two wheel motor bikes.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

Appropriate licenses for the operation of a two wheel motorbike are obtained where required.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare a two wheel motor bike for	1.1 Read or listen to supervisor's instructions and clarify where necessary

Element	Performance criteria
operation	1.2 Identify and report potential work health and safety hazards 1.3 Conduct routine pre operational checks 1.4 Replace and report damaged or worn components 1.5 Use, fit and maintain personal protective equipment 1.6 Ensure any items that are to be transported on the bike are safely secured 1.7 Identify areas and applications excluded to two wheel motor bikes on the workplace safety plan 1.8 Select appropriate two wheel motorbike for the rider's size, skill and task to be completed 1.9 Two wheel motor bike is safely unloaded from transport where applicable
2. Operate a two wheel motor bike	2.1 Recognise and control risks to self, others and the environment according to legislative and enterprise requirements 2.2 Comply with legislation and enterprise policies in regards to carrying passengers 2.3 Steer, manoeuvre and position two wheel motor bikes in a smooth and controlled manner 2.4 Identify, anticipate and control riding hazards through the application of safe riding techniques 2.5 Operate farm two wheel motor bikes in a safe and controlled manner on a range of surface and terrain conditions 2.6 Identify and account for environmental implications associated with machinery operation
3. Complete and check two wheel motor bike operation	3.1 Conduct shut-down procedures 3.2 Perform routine operational servicing and minor maintenance 3.3 Identify and report malfunctions, faults, irregular performance or damage 3.4 Clean, secure and store two wheel motor bikes 3.5 Load and secure c for transport where required 3.6 Maintain two wheel motor bikes use records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM201A Operate two wheel motorbikes.

Assessment Requirements for AHCMOM201 Operate two wheel motorbikes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- ride and maintain two wheel motorbikes as part of daily work routines
- apply hand-eye coordination and body positioning to achieve stable riding
- undertake routine pre-operational checks and maintenance
- recognise and control hazards and risks
- safely operate two wheel motor bikes in a range of surface and terrain conditions
- maintain vehicle records
- unload and load two wheeled motor bikes where required
- follow enterprise environmental policies
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- hazards and risks associated with two wheel bike use
- components, controls and features of two wheel motor bikes and their functions
- a range of two wheel motor bikes and attached equipment and functional applications
- operating principles and operating methods
- load limits and the principles of weight distribution with regard to load shifting and bike movement
- effects of different surface and terrain conditions on the operation of two wheel motor bikes
- licensing requirements

- work health and safety requirements, codes of practice and workplace procedures
- codes of practice with regard to the use and control of hazardous substances
environmental codes of practice for machinery operation
- standard operating procedures (SOPs)

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMOM202 Operate tractors

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate tractors with and without attached equipment.

Working with tractors is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all work health and safety aspects of operating tractors. The tractor must also comply with relevant Australian standards for tractors.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare tractor for operation	1.1 Confirm the activity to be undertaken with supervisor, including identifying potential hazards and implementation of safe working procedures 1.2 Read the relevant machinery operation manual and observe manufacturer's instructions 1.3 Use and maintain personal protective equipment 1.4 Select and attach equipment required to carry out work 1.5 Conduct safety pre operational checks on both tractor and attached equipment and report faults or malfunctions for repair 1.6 Attach equipment and loads that do not exceed the weight limitations or change the dynamic stability of the tractor
2. Operate tractor	2.1 Recognise and control risks to self and others 2.2 Steer, manoeuvre and position tractor in a smooth and controlled manner 2.3 Operate tractor according to low risk operating procedures in a controlled manner and monitored for performance and efficiency 2.4 Undertake work in accordance with the agreed plan and within the operating capacities and manufacturer's specifications 2.5 Recognise and minimise environmental impacts associated with tractor operation
3. Complete and check tractor operation	3.1 Conduct shut-down procedures 3.2 Perform routine operational servicing and minor maintenance 3.3 Identify and report malfunctions, faults, irregular performance or damage 3.4 Clean, decontaminate, secure and store tractor and attached equipment 3.5 Apply enterprise biosecurity policies where required 3.6 Maintain tractor and equipment use records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

An induction process for the use of the tractor must be followed, including reading and observing the manufacturer's manual when using a different tractor or on a different property.

Assessments must be conducted on candidates performing a range of activities, using a range of attachments and implements, in a range of surface and terrain conditions.

Unit Mapping Information

This unit is equivalent to AHCMOM202A Operate tractors.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCMOM202 Operate tractors

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed operating a tractor with a range of attached equipment and implements, in a range of surface and terrain conditions.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- carry out pre-operational checks and maintenance including tagging defects
- set and secure attachments according to manufacturer's directions
- steer, manoeuvre and position the tractor in a safe and controlled manner
- utilise the various components and controls of the tractor
- secure, adjust and calibrate attachments and implements for operation
- operate tractors in a range of surface and terrain conditions, with and without attachments and implements
- carry out shut down procedures
- minimise environmental impacts associated with tractor operation
- follow enterprise work health and safety policies
- follow enterprise biosecurity protocols where required

Knowledge Evidence

The candidate must demonstrate knowledge of:

- tractor components, controls and features and operational functions
- tractor operators manuals
- tractor steering systems and features
- features and operational functions and procedures of attachments and implements

- load limits and the principles of weight distribution with regard to load shifting and tractor movement
- distinguishing characteristics of individual tractors including rated performance capacities
- effects of various surface and difficult terrain conditions on tractor operation
- duty of care to self, others and the environment
- relevant legislation with regard to machinery operation and licensing requirements
- environmental Codes of Practice with regard to machinery operation
- enterprise work health and safety requirements to operate a tractor safely
- enterprise biosecurity procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessment should take place in a range of surface and terrain conditions, including adverse conditions.

AHCMOM203 Operate basic machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate and maintain machinery and equipment.

This unit does not apply to chainsaws, tractors, vehicles, earth moving equipment.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Assessment Requirements for AHCMOM203 Operate basic machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Identify and report potential work health and safety hazards
- carry out pre-operational checks and maintenance
- carry out basic servicing and maintenance of basic machinery and equipment
- report and tag defects if necessary
- secure attachments according to manufacturer's directions
- operate machinery in a safe and controlled manner
- implement shut-down and storage procedures
- record maintenance and operation details
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- pre-operational and safety checks for basic machinery and equipment
- hazards associated with the operation of basic machinery and equipment
- operating principles and operating methods for basic machinery and equipment
- procedures for cleaning, securing and storing basic machinery and equipment
- risks associated with the operation of machinery and equipment in different weather conditions and difficult terrain conditions
- relevant State or Territory legislation, regulations and Codes of Practice with regard to work health and safety requirements, and the use and control of hazardous substances
- environmental impacts and minimisation measures associated with the operation of basic machinery and equipment

- enterprise policies with regard to machinery and equipment use, recording and reporting routines

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOM204 Undertake operational maintenance of machinery

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to undertake operational maintenance of machinery.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for	1.1 Confirm work with supervisor

Element	Performance criteria
maintenance	1.2 Select tools and supplies appropriate to job requirements and confirm against maintenance plan 1.3 Inspect tools for serviceability and prepare for use 1.4 Identify work health and safety hazards and report safety concerns to the supervisor
2. Perform scheduled maintenance	2.1 Undertake basic servicing tasks of machinery 2.2 Adjust equipment appropriately 2.3 Apply basic diagnostic techniques and identify and fix mechanical faults 2.4 Report more serious or complex faults for referral
3. Complete maintenance activities	3.1 Clean and store tools 3.2 Collect, treat and dispose or recycle waste from maintenance activities according to enterprise environmental requirements 3.3 Clean, return to operating condition, and maintain work areas 3.4 Complete enterprise records of machinery maintenance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM204A Undertake operational maintenance of machinery.

Assessment Requirements for AHCMOM204 Undertake operational maintenance of machinery

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify work health and safety hazards and report to supervisor
- select and prepare tools and equipment
- carry out lubrication and operational servicing
- conduct basic diagnostic tests
- report simple faults and report and tag more serious faults
- collect, remove and recycle or dispose of wastes according enterprise environmental policies
- maintain records of machinery maintenance
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types and uses of lubricants and other commonly used servicing materials
- operational principles of machinery including mechanical and auto-electrical systems
- servicing characteristics of plant and equipment
- types, characteristics, uses and limitations of hand power tools
- functions of components of common mechanical and hydraulic systems
- different working principles of 2-stroke, 4-stroke, petrol and diesel engines
- set-up requirements of plant and equipment, and principles of calibration
- basic diagnostic processes and techniques
- environmental Codes of Practice with regard to maintenance activities

- work health and safety, environmental legislative and enterprise requirements and Codes of Practice
- hazard identification procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOM207 Conduct front-end loader operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate a front end loader in an agricultural environment.

All work is carried out to comply with workplace procedures and any local, state and federal government regulations, legislation and codes of practice.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context. Appropriate licences for the operation front-end loaders must be obtained where required.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for operations	1.1 Read or listen to supervisor's instructions and seek clarification where necessary 1.2 Read the front end loader operation manual and observe manufacturer's instructions

Element	Performance criteria
	1.3 Identify and report potential site, work health and safety hazards 1.4 Assess the work site and confirm the suitability of the machinery for the task 1.5 Conduct routine pre operational checks 1.6 Observe safety rules and regulations, including site rules and legislation and site specific instructions
2. Operate front-end loader	2.1 Undertake start-up, park-up, shut-down and communications procedures in accordance with manufacturers' and site specific requirements 2.2 Conduct Front-end loader operations within equipment and operational limitations 2.3 Use safe work practices 2.4 Select loading technique and modify where required to meet changing work conditions 2.5 Use attachments in accordance with manufacturer's instructions and site requirements 2.6 Use safe towing practices in accordance with the authorised equipment and connection capabilities 2.7 Undertake work in accordance with the agreed plan and within the operating capacities and manufacturer's specifications 2.8 Carry out all work with consideration of environmental impact
3. Carry out basic operator maintenance	3.1 Follow shut down procedures in line with manufacturers' specifications and site requirements 3.2 Perform routine operational servicing and minor maintenance 3.3 Identify and report malfunctions, faults, irregular performance or damage 3.4 Clean, secure and store machinery 3.5 Apply enterprise biosecurity policies where required 3.6 Maintain machinery use records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM207A Conduct front-end loader operations.

Assessment Requirements for AHCMOM207 Conduct front-end loader operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and report potential work health and safety hazards on the site
- read the front end loader operation manual and observe manufacturer's instructions
- conduct pre-operational checks
- operate front-end loaders safely
- operating the front-end loader features and attachments consistent with manufacturer's operator manual
- use safe towing practices
- carry out day to day servicing and fault finding and minor maintenance
- communicate with supervisor and work team
- apply enterprise environmental policies
- apply enterprise biosecurity policies where required

Knowledge Evidence

The candidate must demonstrate knowledge of:

- front-end loader operations as stated in the relevant manufacturers operation manual
- front-end loader and site safety requirements
- hazards and risks associated with front-end loader operations
- characteristics, technical capabilities and limitations of front-end loaders
- operational and maintenance procedures
- enterprise biosecurity and environmental policies and protocols
- relevant State/Territory legislation related to the operation of front-end loaders

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessment must be conducted in a range of surface conditions and on a range of different terrains.

Assessors must satisfy current standards for RTOs

Assessment Requirements for AHCMOM208 Conduct excavator operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed operating an excavator.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- carry out day to day servicing and minor maintenance
- operate an excavator safely
- operate the excavator's features and attachments consistent with operator manual
- minimise environmental impact of excavator activities
- maintain machinery use records
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- excavator and site safety requirements
- excavator characteristics, technical capabilities and limitations
- excavator operational and maintenance procedures
- relevant State and Territory legislation

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOM209 Conduct dozer operations

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to undertake dozer operations.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for operations	1.1 Read or listen to supervisor's instructions and seek clarification

Element	Performance criteria
	where necessary 1.2 Identify and report potential work health and safety hazards 1.3 Conduct routine pre operational checks 1.4 Observe safety rules and regulations, including site rules and legislation and site specific instructions
2. Operate a dozer	2.1 Undertake start-up, park-up, shut-down and communications procedures as required by site specific requirements 2.2 Conduct operations within equipment and operational limitations 2.3 Use safe work practices 2.4 Undertake work in accordance with the agreed plan and within the operating capacities and manufacturer's specifications 2.5 Carry out all work with consideration of environmental impact
3. Carry out basic operator maintenance	3.1 Follow shut down procedures 3.2 Perform routine operational servicing and minor maintenance 3.3 Identify and report malfunctions, faults, irregular performance or damage 3.4 Clean, secure and store machinery 3.5 Maintain machinery use records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM209A Conduct dozer operations.

AHCMOM211 Operate side by side utility vehicles

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to undertake work using a side by side utility vehicle used for general transport, carrying loads, towing small trailers and mustering stock.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare side by side	1.1 Confirm the activity to be undertaken with supervisor, including

Element	Performance criteria
utility vehicle for use	identifying safe working areas, potential hazards and implementation of safe working procedures 1.2 Conduct safety pre operational checks on the vehicle and report faults or malfunctions for repair 1.3 Use and maintain personal protective equipment 1.4 Attach equipment and loads that do not exceed the weight limitations or change the dynamic stability of the vehicle 1.5 Secure loads and ensure weight does not exceed limits
2. Operate side by side utility vehicle	2.1 Operate machinery and equipment in a safe, efficient and controlled manner 2.2 Operate side by side utility vehicles in accordance with task requirements, conditions and manufacturers operating guidelines 2.3 Assess and minimise potential risks to self, others and the environment 2.4 Ensure that the vehicles seat belts and other safety features are functional and used 2.5 Identify and account for environmental implications associated with machinery operation
3. Complete work	3.1 Conduct shut-down procedures according to manufacturer's specifications and enterprise requirements 3.2 Perform routine operational servicing and minor maintenance 3.3 Identify and report malfunctions, faults, irregular performance or damage 3.4 Clean, secure and store machinery 3.5 Ensure biosecurity procedures are followed where required 3.6 Maintain machinery use records for servicing purposes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCMOM211 Operate side by side utility vehicles

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and risks associated with side by side utility vehicle use
- conduct pre and post operational checks
- operate side by side utility vehicles in a safe, efficient and controlled manner
- minimise environmental impacts of side by side utility vehicle use
- perform any required minor maintenance
- follow wash-down procedures in line with biosecurity guidelines
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- equipment characteristics, technical capabilities and limitations
- safe driving techniques in a range of surface conditions and terrain
- transporting the side by side utility vehicles on a trailer or transportation device
- manufacturer's specifications and workplace requirements for pre-start checks, machinery operation techniques, load carrying operator level servicing and shutdown emergency procedures
- components and controls, features and functions
- enterprise work health and safety policies
- relevant State /Territory legislation in regard to side utility vehicle use

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOM212 Operate quad bikes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate and maintain quad bikes as well as load and unload them onto trailers or other vehicles used for their transport.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and operator manuals and sustainability practices.

Working with quad bikes is an inherently dangerous activity. Individuals who work at this level must be thoroughly instructed in all work health and safety aspects of operating quad bikes.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and provide solutions to a limited range of predictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare a quad bike for operation	1.1 Confirm the activity to be undertaken with supervisor, including potential hazards and implementation of safe working procedures 1.2 Select, fit correctly, use and maintain personal protective equipment including helmets 1.3 Conduct safety pre operational checks on quad bike and report faults or malfunctions for repair 1.4 Identify safe work areas and applications (loads and attachments) from workplace safety plan and operators manual 1.5 Unload quad bike safely from the trailer or transportation device
2. Operate a quad bike	2.1 Recognise and control risks to self and others 2.2 Steer, manoeuvre, position and stop quad bike in a smooth and controlled manner 2.3 Apply hand-eye coordination and transfer of body weight appropriately (active riding) to maintain bike stability 2.4 Identify and avoid riding surfaces, terrains and slopes that are dangerous to safe operation 2.5 Identify environmental implications associated with machinery operation and minimise impact 2.6 Identify and account for biosecurity implications associated with machinery operation
3. Complete and check quad bike operation	3.1 Conduct shut-down procedures 3.2 Perform routine operational servicing and minor maintenance 3.3 Identify and report malfunctions, faults, irregular performance or damage 3.4 Clean, secure and store quad bike 3.5 Follow wash-down procedures in line with biosecurity guidelines where required 3.6 Maintain quad bike use records for servicing purposes 3.7 Load and secure quad bike safely

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

No passengers, no riders under 16 years of age, no towing, helmets must be worn at all times.

Candidates must NOT be under the influence of any alcohol or drugs. Candidates must NOT be taking any medication (prescribed or otherwise) that may impair judgement.

Unit Mapping Information

This unit is equivalent to AHCMOM212A Operate quad bikes.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCMOM212 Operate quad bikes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed operating a quad bike using safe work procedures.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and risks associated with quad bike use
- identify safe work areas
- select, fit correctly, use and maintain personal protective equipment including helmets
- operate quad bikes in a range of riding surface conditions and terrain conditions
- steer, manoeuvre, position and stop the quad bike in a smooth and controlled manner
- apply hand-eye coordination and correctly transfer body weight (active riding) to maintain bike stability including riding on uneven or steep terrain
- follow enterprise work health and safety procedures
- unload and load quad bike safely
- follow wash-down procedures in line with biosecurity guidelines

Knowledge Evidence

The candidate must demonstrate knowledge of:

- hazards and risks associated with quad bike use
- components, controls and features of quad bikes and their functions
- a range of quad bikes and functional applications
- operating principles and operating methods of quad bikes
- manufacturer's instructions, including but not exclusive to the operating manual
- load limits and the principles of weight distribution with regard to load shifting and bike movement including riding on uneven or steep terrain
- loading and unloading safely from a trailer or other transportation device

- effects of different riding surfaces and terrain conditions on the operation of quad bikes

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessment must be conducted in a range of riding surface conditions and in a range of terrains appropriate for the safe use of quad bikes.

Assessors must satisfy current standards for RTOs.

AHCMOM213 Operate and maintain chainsaws

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to safely operate a hand-held chainsaw and maintain it in working condition.

This unit applies to cross-cutting fallen timber using safe cutting techniques.

This unit applies to individuals who undertake defined activities with specialised tools and methods, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems.

Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Assessment Requirements for AHCMOM213 Operate and maintain chainsaws

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply chainsaw use and operation risk assessment and implementation of controls
- clean and store chainsaw
- confirm first aid and emergency personnel, equipment and procedures
- confirm work zone with work crew and monitor site
- determine site location and work details and clarify with supervisor
- identify site hazards, assess risks and report to supervisor
- identify, tag and report chainsaw faults and malfunctions
- record and implement work health, safety, site, environmental and traffic control measures
- use appropriate personal protective equipment
- safely cross-cut fallen timber using compression and tension cuts with a hand held chainsaw
- use appropriate tools and materials to maintain chainsaw
- use environmentally responsible workplace practices
- use low risk work practices including stopping, disengaging quickly and dealing with foreign matter
- use safe work procedures relevant to operating a chainsaw

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practice for operating chainsaws
- safe operating procedures
- relevant Australian Standards concerning chainsaw operation

- components of chainsaws and their respective functions
- common defects in woody materials
- cutting methods and techniques, patterns and sequence of cuts
- how to estimate and measure dimensions and calculate volumes
- work health and safety requirements for the operation of a chainsaw including caution and hazard signs and symbols
- hazards and risks when operating a chainsaw
- environmental Codes of Practice regarding chainsaw operation

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCMOM214 Operate cane haulage vehicle

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare and operate a cane haulage vehicle in the sugar cane production industry.

All work must be carried out to comply with workplace procedures, work health and safety and biosecurity legislation and codes, and sustainability practices.

Operation of cane haulage vehicles carries risk and all work is carried out to comply with manufacturer's specifications and workplace procedures.

Cane haulage vehicles may include trucks, infield transporters, tractor trailer combinations and other cane transporters.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare cane haulage vehicle	1.1 Conduct routine pre-operational checks appropriately of cane haulage vehicle 1.2 Conduct cabin drill according to enterprise policies 1.3 Identify work health and safety hazards in cane haulage and report to supervisor and implement suitable controls 1.4 Select, use and maintain suitable personal protective equipment
2. Carry out cane haulage operations	2.1 Operate vehicle safely and monitor for performance and efficiency 2.2 Select, haul and deliver cane appropriately 2.3 Identify risks to self, others and the environment and report to supervisor and implement appropriate strategies 2.4 Identify environmental implications for cane haulage and report to the supervisor
3 Complete cane haulage operation	3.1 Complete shut-down procedures to manufacturer's specifications and enterprise requirements 3.2 Complete and maintain records 3.3 Identify and report malfunctions, faults, irregular performance and damage to supervisor 3.4 Clean, secure and store cane haulage vehicle appropriately 3.5 Apply enterprise biosecurity policies as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBAC205A Operate cane haulage vehicle.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCMOM214 Operate cane haulage vehicle

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and apply safe work practices
- operate a variety of pushing and towing haulage vehicles
- demonstrate emergency operating procedures in normal and adverse conditions
- obtain relevant licences and permits
- read and interpret farm maps, operators manuals, manufacturers specifications, work and maintenance plans, and Safety Data Sheets (SDSs)
- check haulage equipment prior to use
- determine operating methods and load from farm maps and instructions
- haul cane safely and efficiently
- identify and report faults or breakdowns
- conduct shutdown procedures
- maintain records
- communicate with supervisor
- follow enterprise work health and safety policies in the context of own work
- follow enterprise biosecurity policies in the context of own work
- follow enterprise sustainability policies in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- components, controls and features of cane haulage vehicles and their functions
- operating principles and operating methods for cane haulage vehicles
- principles of weight distribution with regard to load shifting and vehicle movement

- risks associated with the operation of cane haulage vehicles in different weather and difficult terrain conditions
- environmental codes of practice with regard the operation of machinery
- legislation and regulations with regard to the operation of cane haulage vehicles and licensing requirements
- cane haulage processes and spillage minimisation techniques
- cane harvesting processes as they relate to collection and haulage of harvests
- enterprise work health and safety, biosecurity and environmental policies and procedures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMOM301 Coordinate machinery and equipment maintenance and repair

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate machinery and equipment maintenance and repair for a small enterprise.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
<p>1. Prepare for maintenance and repair work</p>	<p>1.1 Clarify requirements of the work responsibilities with the supervisor</p> <p>1.2 Identify equipment and material resource requirements according to the scope of the coordination work and the supervisor's instructions</p> <p>1.3 Identify, document and present the priorities for maintenance and repair activities and time allocation to the supervisor for verification</p> <p>1.4 Identify the environmental implications of the proposed maintenance and repair work and assess and report the likely outcomes to the supervisor</p> <p>1.5 Identify work health and safety hazards, assess risks and implement risk controls</p> <p>1.6 Select, use and maintain personal protective equipment according to enterprise procedures</p>
<p>2. Maintain and repair machinery and equipment</p>	<p>2.1 Maintain and repair equipment and machinery</p> <p>2.2 Purchase, store and use materials to assist in maintenance and repair work</p> <p>2.3 Organise delivery of materials to the site</p> <p>2.4 Organise machinery and equipment to be on-site in good order when they are required</p> <p>2.5 Identify and organise maintenance and repairs requiring specialist attention</p>
<p>3. Coordinate and report on maintenance and repair activities</p>	<p>3.1 Coordinate resources to suit the maintenance and repair activities and priority of work</p> <p>3.2 Inform operators of their responsibilities in respect to operational maintenance requirements of machinery and equipment</p> <p>3.3 Monitor and document personnel, activities, timelines and materials usage</p> <p>3.4 Recognise and report contingency situations to the supervisor and take corrective actions</p> <p>3.5 Report to management the maintenance and repair activities undertaken and completed</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCMOM301 Coordinate machinery and equipment maintenance and repair

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- perform a work health and safety risk assessment and implement safe work procedures and ensure a safe workplace
- read and interpret documentation associated with work site activities
- seek technical advice on the scale of repairs required where necessary
- establish priorities for work to be carried out
- calculate material and resource requirements
- co-ordinate a team to achieve optimum performance
- respond to contingencies and taking corrective actions where necessary
- document activities, timelines and material usage

Knowledge Evidence

The candidate must demonstrate knowledge of:

- work schedule programming
- possible causes of disruption to work activities and their effect on quality and time schedules
- responsibilities and requirements for maintaining and repairing machinery and equipment
- range, use and availability of materials, equipment and machinery that may be required for the project
- environmental awareness associated with undertaking maintenance and repair work on machinery and equipment to ensure the impact on the environment is minimal
- relevant work health and safety issues, legislative requirements and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOM302 Perform machinery maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain machinery and equipment that is used principally in agriculture, horticulture, and conservation and land management work.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to work	1.1 Clarify requirements of the work responsibilities with the supervisor 1.2 Identify equipment and material resource requirements 1.3 Identify work health and safety hazards, assess risks and implement risk controls 1.4 Select, use and maintain personal protective equipment according to enterprise procedures
2. Carry out engine and equipment checks	2.1 Carry out regular engine equipment checks on machinery and equipment 2.2 Lubricate all relevant grease or lubricant points 2.3 Change oils and filters at intervals prescribed in operator manual 2.4 Check hydraulic hoses and systems for deterioration and rectify defects
3. Carry out transmission checks	3.1 Check drive and steering clutches for operation and adjust where required 3.2 Check transmission oil levels 3.3 Check tracks or wheels and undercarriage for oil leaks and wear 3.4 Identify faulty seals or leaks and take corrective actions where required 3.5 Clean machine as a part of maintenance checks
4. Maintain components and attachments	4.1 Check components for wear and condition 4.2 Replace worn or unserviceable replacement components as part of daily routines 4.3 Complete component inspection and replacement activities 4.4 Check moving operational components for wear and condition and adjust to the tolerances specified in operator manual where applicable 4.5 Clean and maintain work areas and return to operating condition 4.6 Collect, treat and dispose or recycle waste from maintenance activities according to enterprise environmental requirements
5. Record maintenance	5.1 Record identified faults and defects in machine record 5.2 Record maintenance procedures including duplicates usage in workshop record 5.3 Report and action service or repair requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM302A Perform machinery maintenance.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCMOMB02 Perform machinery maintenance

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed maintaining machinery and equipment that is used in agriculture, horticulture, or conservation and land management work.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- carry out engine and equipment checks
- carry out transmission checks
- carry out lubrication and replacement of oils and filters
- check machinery and equipment components for wear and tear, replace parts, tag and report defects
- maintain machinery and equipment components
- record details of maintenance and monitoring
- implement enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- engine function principles
- turbo charging and after cooling
- assessing engine specifications in line with power requirements
- engine electric and hydraulic indicators and gauges
- transmission and drive systems
- machinery and equipment operation principles

- environmental impacts of machinery servicing and legislation covering disposal of fuels, oils and other wastes
- relevant work health and safety, environmental legislation, enterprise requirements and codes of practice

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOMB04 Operate machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate and maintain machinery and equipment.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare machinery and	1.1 Identify and report potential workplace health and safety hazards

Element	Performance criteria
equipment for use	1.2 Conduct routine pre operational checks as described in operator manual 1.3 Replace and report damaged or worn components 1.4 Select and use appropriate personnel protective equipment 1.5 Attach ancillary equipment and check for correct operation
2. Operate machinery and equipment	2.1 Operate machinery and equipment in a safe, efficient and controlled manner 2.2 Operate machinery in accordance with task requirements, conditions and manufacturers operating guidelines 2.3 Monitor machinery performance and efficiency and make adjustments as required 2.4 Assess and minimise potential risks to self, others and the environment
3. Check and complete machinery and equipment operation	3.1 Follow shut down procedures 3.2 Perform routine operational servicing and minor maintenance 3.3 Identify and report malfunctions, faults, irregular performance or damage 3.4 Clean, secure and store machinery 3.5 Maintain machinery use records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM304A Operate machinery and equipment.

Assessment Requirements for AHCMOM304 Operate machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed operating and maintaining agricultural or horticultural machinery and equipment.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- complete pre-operational checks
- attach ancillary equipment and checking for correct operation
- recognise and reporting defects
- operate machinery and equipment to industry standards
- apply safe and environmentally responsible workplace practices
- implement shut down procedures
- clean, secure and store machinery
- record maintenance and operation details

Knowledge Evidence

The candidate must demonstrate knowledge of:

- manufacturers specifications for servicing of machinery and equipment
- operating principles and operating methods for machinery and equipment
- principles of weight distribution with regard to load shifting and machinery movement
- procedures for cleaning, securing and storing machinery, equipment and materials
- potential risks and hazards associated with the operation of machinery and equipment
- environmental impacts and minimisation measures associated with the operation of machinery and equipment

- work health and safety and environmental legislation, regulations and Codes of Practice
- relevant State or Territory legislation, regulations and Codes of Practice with regard to licensing, roads and traffic requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Evidence records must include details of the machinery and equipment that the candidate was assessed on.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCMOMB05 Operate specialised machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed operating specialised agricultural or horticultural machinery and equipment.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- complete pre and post operational checks
- recognise and reporting defects
- operate machinery and equipment in a safe, efficient manner to perform specific tasks by utilising the various component, controls and features to industry standards
- perform minor maintenance and fault finding
- perform shut down procedures
- complete operational records
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- manufacturer's requirements and workplace requirements for:
 - pre-operational checks
 - machinery operation techniques
 - operator level servicing
 - shutdown
- emergency procedures

- basic diagnostic techniques
- equipment characteristics, technical capabilities and limitations
- components and controls features and functions
- relevant work health and safety and environmental legislation, Codes of Practice and enterprise requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Evidence records must include a description of the machinery and equipment that the candidate was assessed on.

Assessors must satisfy current standards for RTOs.

AHCMOMB06 Ground spread fertiliser and soil ameliorant

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to ground spread fertiliser and soil ameliorants.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability and biosecurity practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Confirm customer	1.1 Confirm with customer that fertiliser or soil ameliorant products

Element	Performance criteria
requirements.	<p>to be spread are those that were ordered</p> <p>1.2 Verify with customer that technical specification of product is acceptable for job</p> <p>1.3 Confirm customer's written fertiliser order with customer and document to enable trace back to depot or factory if required</p> <p>1.4 Document agreement for spreading services according to enterprise or industry codes of practice</p>
2. Identify features of the target area.	<p>2.1 Identify and agree with customer on the location and boundaries of area to be treated and record according to relevant industry codes of practice</p> <p>2.2 Assess visually soil type and condition or seek advice from customer</p> <p>2.3 Identify environmentally sensitive areas and plan operations to ensure minimum adverse impact and compliance with any required buffer zones</p> <p>2.4 Inspect and identify in consultation with customer features that may present a hazard to the operation and take appropriate action as required</p> <p>2.5 Identify in consultation with customer location of services and utilities and adjust proposed spreading operation if required</p> <p>2.6 Identify local weather and climate conditions and take into account when preparing to begin operations</p>
3. Perform pre-spreading checks.	<p>3.1 Determine rate of spreading and calculate buffer zone allowance</p> <p>3.2 Ensure machinery and equipment are clean of soil and/or plant material before it is moved onto site</p> <p>3.3 Prepare machinery and equipment according to enterprise procedures and manufacturer instructions to ensure they are serviceable and are set up and calibrated</p>
4. Spread fertiliser	<p>4.1 Select and fit Personal Protective Equipment (PPE) to be used by operator and all personnel involved in spreading tasks</p> <p>4.2 Apply fertiliser or soil ameliorant in a manner that complies with guidelines on buffer zones and minimises run-off into waterways and drains</p> <p>4.3 Monitor weather and other conditions to ensure that variations that may alter limits to operation are taken into account, and adjust operations as required</p> <p>4.4 Follow any existing site quarantine or biosecurity protocols as required</p> <p>4.5 Monitor all work to ensure that it is performed in an environmentally aware and safe manner and according to industry codes of practice</p>

Element	Performance criteria
5. Perform follow up and clean-up activities on completion of spreading operations	5.1 Return machinery, equipment and hand tools to depot or storage area after cleaning, checking for future serviceability, and carrying out basic preventative maintenance according to enterprise procedures 5.2 Record faults for remedial action 5.3 Complete records according to enterprise procedures and industry codes of practice

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM306A Ground spread fertiliser and soil ameliorant.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCMOM306 Ground spread fertiliser and soil ameliorant

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed operating fertiliser and soil ameliorant spreading equipment.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate with clients to ensure a common understanding of task to be performed
- assess environmental and physical hazards that may be encountered when ground spreading and take appropriate action to minimise these risks
- identify hazards and implement safe work procedures
- use maps and interpret written instructions regarding areas to be spread, and products and rates to be applied
- maintain and operate equipment according to manufacturer recommendations and in line with equipment calibration and industry standards for uniformity of application
- attach ancillary equipment and check for correct operation
- apply fertiliser or soil ameliorants at rate agreed by customer to specified land area
- monitor and record activities performed
- implement shut down procedures, clean, secure, store machinery and record maintenance and operation details
- apply safe and environmentally responsible workplace practices
- apply enterprise biosecurity procedures

Knowledge Evidence

The candidate must demonstrate knowledge of:

- equipment being used and understanding of appropriate service and safety checks
- environmental risks and how to identify and manage them

- operational limits of equipment being used with regard to uniformity of application and health and safety risks
- spreading characteristics of different fertiliser and soil ameliorant products
- environmental impacts of fertiliser spreading including hazards to waterways
- work health and safety hazards including operating in rough or steep terrain
- operating principles and operating methods for spreading equipment
- procedures for cleaning, securing and storing spreading equipment
- environmental impacts and minimisation measures associated with the operation of spreading equipment
- work health and safety and environmental legislation, regulations and Codes of Practice
- relevant State or Territory legislation, regulations and Codes of Practice with regard to licensing, roads and traffic requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOMB07 Operate a cane harvester

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare and operate a cane harvester in the sugar cane production industry.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Identify and report potential work health and safety hazards

Element	Performance criteria
	1.2 Conduct routine pre operational checks as described in operator manual 1.3 Replace and report damaged or worn components 1.4 Select and use appropriate personnel protective equipment 1.5 Carry out cabin drill 1.6 Locate and select crop class, variety and field for harvest
2. Carry out cane harvesting	2.1 Set and operate harvester in a safe, controlled and correct manner and monitored for performance and efficiency 2.2 Operate harvester in co-ordination with haul out vehicles and other associated harvesting equipment 2.3 Harvest cane in a productive, safe and controlled manner and consign correctly 2.4 Anticipate risks to self, others and the environment implement minimisation strategies accordingly 2.5 Identify and asses environmental implications associated with cane harvesting and report to the supervisor
3. Complete cane harvesting operations	3.1 Follow shut down procedures 3.2 Perform routine operational servicing and minor maintenance 3.3 Identify and report malfunctions, faults, irregular performance or damage 3.4 Sterilise harvester to prevent cross-property contamination 3.5 Secure and store machinery 3.6 Maintain machinery use records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM307A Operate a cane harvester.

Assessment Requirements for AHCMOMB07 Operate a cane harvester

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed preparing and operating a sugar cane harvester.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- perform routine safety, basic service and maintenance procedures
- complete pre-operational checks
- recognise and reporting defects
- familiarise self with local conditions
- carry out emergency operating procedures
- operate machinery and equipment to industry standards
- communicate and co-operating with other personnel such as haul-out drivers
- control cane spillage
- sterilise effectively the harvester to prevent cross-property contamination
- use safe and environmentally responsible workplace practices
- maintain operational records
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- components, controls and features of cane harvesters and their functions
- operating principles and operating methods for cane harvesters
- cane harvester processes and spillage minimisation techniques

- legislative requirements with regard to licensing
- harvest and haulage processes and procedures
- principles of the safe removal of obstacles from harvesters and adjustment of harvester settings
- work health and safety and environmental protection legislation, codes of practice and enterprise procedures
- enterprise biosecurity policies
- environmental impacts and minimisation measures

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCMOM310 Operate land-forming machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed operating land forming machinery and equipment for agricultural or conservation earthworks purposes.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe operating procedures
- operate land forming machinery and equipment in a safe, efficient and controlled manner
- conduct pre and post operational checks
- attach and uncouple associated equipment
- perform minor maintenance and fault finding
- record work activities
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- manufacturer's requirements and workplace requirements for:
 - pre-operational checks
 - machinery operation techniques
 - operator level servicing
 - shutdown
 - emergency procedures
- basic diagnostic techniques
- equipment characteristics, technical capabilities and limitations

- components and controls features and functions including precision controls
- general land forming concepts and practices including:
 - contouring, surface drainage and erosion
 - slope requirements
 - survey and set out
- relevant work health and safety and environmental legislation, Codes of Practice and enterprise requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOM311 Operate precision control technology

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate precision technology used in the control of specialised machinery and equipment. This unit is used to optimise specialised machinery performance.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare precision technology for use	1.1 Identify and report work health and safety hazards 1.2 Complete routine pre-operational checks 1.3 Carry out and record minor routine servicing and housekeeping tasks 1.4 Check ancillary equipment for correct operation 1.5 Check that data complies with job specifications
2. Use precision technology	2.1 Operate technology in accordance with task requirements and conditions 2.2 Monitor activities to ensure that machinery is operating in an efficient and controlled manner and make adjustments as required 2.3 Assess and minimise potential risks to self, others and the environment during operation
3. Complete work	3.1 Follow shutdown procedures 3.2 Download data and complete operational records 3.3 Perform basic diagnostic procedures 3.4 Identify and report malfunctions, faults and irregular performance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM311A Operate precision control technology.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCMOMB11 Operate precision control technology

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed operating agricultural or horticultural machinery using precision technology.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and report work health and safety hazards
- conduct pre-operational checks
- use technology to operate machinery in an efficient and controlled manner
- perform routine maintenance tasks
- perform basic diagnostic procedures
- download and upload data for the task

Knowledge Evidence

The candidate must demonstrate knowledge of:

- manufacturer specifications and requirements for:
- pre-operational checks
- precision instrument controls, feature and functions
- minor servicing
- uploading and downloading of data
- diagnostic techniques for operational performance
- characteristics, technical capabilities and limitations of associated machinery and equipment
- components and controls features and functions of equipment

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOMB14 Transport machinery

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to safely move, load and secure machinery for the purpose of transport.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Load machines	1.1 Access and comply with the enterprise safe operating procedures

Element	Performance criteria
	<p>for transporting machinery</p> <p>1.2 Prepare trailer, low loader or float for loading according to contractor policy</p> <p>1.3 Load machine in compliance with safe operating procedures</p> <p>1.4 Complete tying down procedures in line with recognised industry procedures</p> <p>1.5 Secure machine to prevent movement in transport according to industry practice</p> <p>1.6 Display signs indicating oversized loads according to legal requirements</p> <p>1.7 Arrange permits, clearances and escorts for transporting oversized loads</p>
2. Transport machines	<p>2.1 Drive machines on or off road in compliance with relevant legislation</p> <p>2.2 Load and drive machinery safely to destination in compliance with relevant legislation</p> <p>2.3 Ensure selected transport route for oversized loads complies with permits, clearances and relevant legislation</p> <p>2.4 Unload machines safely in line with accepted workplace policy</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCMOM314 Transport machinery

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed loading, transporting and unloading large machinery such as that used for earthmoving or agricultural operations.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- load and unload earthmoving machines
- secure machinery as a transport load
- provide an escort to wide loads
- arrange permits and escorts as required by legislation
- drive machinery to destination, complying with requirements for moving wide loads
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- provisions, requirements and legislation pertaining to heavy transport
- principles for machine operation
- tying down procedures for large machinery
- work health and safety, vehicle and operator licensing, and road transport legislation
- environmental legislation, codes of practice and enterprise requirements

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting. All evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Assessors must satisfy current standards for RTOs.

AHCMOM315 Operate chemical application machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate specialised liquid and granular chemical application machinery and equipment.

All work must be carried out to comply with workplace procedures, work health and safety requirements manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare machinery for use	1.1 Select and use appropriate personal protective equipment 1.2 Conduct routine pre-operational checks and housekeeping tasks 1.3 Replace and report damaged or worn components 1.4 Identify and report potential work health and safety hazards 1.5 Identify and report potential environmental impacts 1.6 Set up and calibrate equipment in accordance with spray application plan 1.7 Attach ancillary equipment and check for correct operation 1.8 Undertake and record pre-operational checks
2. Operate machinery and equipment	2.1 Operate machinery and equipment in a safe, efficient and controlled manner 2.2 Operate machinery in accordance with task requirements, conditions and manufacturers operating guidelines 2.3 Monitor machinery performance and efficiency and make adjustments as required 2.4 Assess and minimise potential risks to self, others, product integrity and the environment 2.5 Assess and minimise spray drift risk 2.6 Monitor meteorological conditions before and during application and respond to changes in conditions 2.7 Wear appropriate personal protective equipment during operation and clean up
3. Complete work	3.1 Follow shut down procedures 3.2 Flush and clean components in accordance with manufacturer's specifications and chemical label requirements 3.3 Complete operational records in accordance with legislative and regulatory requirements 3.4 Undertake routine operator servicing 3.5 Identify and report malfunctions, faults, irregular performance or damage

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM315A Operate chemical application machinery and equipment.

Assessment Requirements for AHCMOM315 Operate chemical application machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed calibrating, operating and cleaning specialised liquid and granular chemical application machinery and equipment.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe work procedures
- conduct pre and post operational checks
- calibrate and set up application components
- operate machinery in a safe, efficient and controlled manner
- perform operator maintenance tasks and fault finding
- attach and uncouple associated equipment
- assess and minimise spray drift risk
- record work activities
- follow enterprise work health and safety policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- manufacturers specifications and workplace requirements for:
 - pre-operational checks
 - machinery operation techniques
 - operator level servicing
 - shutdown emergency procedures
- features and functions of application equipment components including:

- liquid spray - nozzles, tanks, agitation systems, pumps, filters, pressure regulation valves
- granular applicators/dusters - hoppers, flow control valves
- effects of meteorological conditions on chemical application
- equipment characteristics, technical capabilities and limitations
- basic diagnostic techniques
- equipment characteristics, technical capabilities and limitations
- components and controls features and functions of equipment
- environmental impacts including spray drift

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMOM316 Refuel machinery or vehicle

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to receive and store bulk fuel, and refuel machinery or vehicle.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Receive and store bulk	1.1 Identify regulatory and industry requirements for the receipt and

Element	Performance criteria
fuel	<p>storage of bulk fuel, and refuelling operations</p> <p>1.2 Identify work health and safety hazards, assess risks and implement suitable controls</p> <p>1.3 Identify dangers of volatile fuel liquids and vapours</p> <p>1.4 Locate and check firefighting and spill response equipment, and replace faulty equipment</p> <p>1.5 Ensure facilities for storage of bulk fuel meet national standards</p> <p>1.6 Check bulk fuel storage facilities to ensure fuel quality is maintained during storage</p> <p>1.7 Check storage facilities and refuelling equipment for leaks.</p> <p>1.8 Receive bulk fuel into storage, in compliance with regulatory requirements and enterprise policies</p> <p>1.9 Complete documentation for receipt of bulk fuel if required</p> <p>1.10 Monitor bulk fuel during storage to maintain fuel quality and usage</p>
2. Prepare for refuelling	<p>2.1 Select, maintain and use personal protective equipment</p> <p>2.2 Select fuel based on machinery or vehicle use and manufacturer instructions</p> <p>2.3 Ensure appropriate firefighting and spill response equipment are accessible</p> <p>2.4 Ensure appropriate refuelling equipment is available and meets national standards</p> <p>2.5 Check and secure refuelling equipment</p> <p>2.6 Position and secure machinery or vehicle for refuelling</p>
3. Refuel machinery or vehicle from fixed storage	<p>3.1 Open tank valves if necessary</p> <p>3.2 Refuel machinery or vehicle in compliance with regulatory requirements and manufacturer instructions</p> <p>3.3 Ensure there is no residual fuel in fuel transfer equipment such as hoses</p> <p>3.4 Contain spills and mitigate environment or safety dangers if required, in compliance with legislation and enterprise policies</p> <p>3.5 Check fuel levels</p> <p>3.6 Close and secure tank valves if necessary</p>
4. Refuel machinery or vehicle from portable containers	<p>4.1 Ensure only approved containers are used to transport decanted fuel</p> <p>4.2 Ensure portable containers being towed are secure</p> <p>4.3 Check containers to ensure fuel quality is maintained</p> <p>4.4 Decant fuel from fixed storage into containers ensuring potential risks are minimised</p> <p>4.5 Ensure there is no residual fuel in fuel transfer equipment for all</p>

Element	Performance criteria
	decanting procedures 4.6 Transport containers to worksite following codes of practice or guidelines 4.7 Decant fuel from portable containers using appropriate equipment 4.8 Contain spills and mitigate environment or safety dangers if required, in compliance with legislation and enterprise policies
5. Complete refuelling	5.1 Clean, maintain and store refuelling equipment and containers 5.2 Complete documentation and records if required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCMOMB16 Refuel machinery or vehicle

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- receive and store bulk fuel
- prepare for refuelling
- refuel machinery or vehicle from fixed storage
- refuel machinery or vehicle from portable containers
- complete refuelling
- apply relevant work health and safety requirements
- apply relevant industry and enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- regulatory and industry requirements for the receipt and storage of bulk fuel, and refuelling operations
- relevant work health and safety requirements
- types, use and maintenance of personal protective equipment
- types, features and use of fuels for relevant machinery and vehicles
- requirements, types, features and use of bulk fuel receipt and storage facilities
- relevant legislation for storage of fuels
- requirements and procedures of checking fuel storage facilities, refuelling equipment and fuel transfer equipment for leaks
- risks and dangers associated with volatile fuel liquids and vapours, and mitigation and protection measures

- requirements, types, features, use and maintenance of firefighting and spill response equipment
- requirements, types, features, use, maintenance and storage of fuel transfer and refuelling equipment
- requirements and procedures for refuelling of relevant machinery and vehicles
- methods and procedures for securing portable fuel containers during transport
- procedures for emptying fuel transfer equipment such as hoses and checking that they are empty of residual fuel
- requirements, containment methods and equipment for fuel spills
- mitigation and protection measures for the environment in fuel spills
- required documentation and records
- industry and enterprise environmental sustainability practices

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMOM401 Conduct major repair and overhaul of machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to conduct major repair and overhaul of machinery and equipment.

This unit applies to those working in a technical role to ensure that machinery and equipment for the enterprise is repaired or overhauled in a way that allows the core business of the enterprise to continue with minimal disruption.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to carry out major repairs and overhaul of machinery and equipment	1.1 Identify major repairs and overhaul requirements for machinery and equipment and organise resources according to manufacturer's recommendations and enterprise requirements 1.2 Identify, access and confirm tools and equipment against job requirements 1.3 Risk assess and control potential and existing hazards in the workplace according to work health and safety and enterprise requirements 1.4 Use and maintain suitable personal protective equipment according to work health and safety and enterprise requirements
2. Conduct major repairs and overhaul of machinery and equipment	2.1 Confirm machinery and equipment faults and malfunctions 2.2 Estimate scope and costing for repairs or overhaul and present for approval by management 2.3 Implement repair and replacement process for major repairs 2.4 Identify worn or damaged parts in need of overhaul and remove and overhaul 2.5 Consult appropriate personnel as necessary in regard to overhaul requirements and major repairs
3. Carry out advanced welding repairs and workplace engineering	3.1 Identify work health and safety hazards, assess risks and implement, monitor and review risk controls 3.2 Select, set up and start cutting and welding equipment and materials 3.3 Conduct cutting and welding to industry and safety standards 3.4 Carry out workplace engineering tasks to modify design or manufacture parts
4. Complete major repairs and overhaul operation	4.1 Shut down, adjust, clean and store tools and equipment 4.2 Collect, treat and dispose or recycle waste from repair and maintenance activities according to enterprise environmental requirements 4.3 Clean, maintain and return work areas to operating condition 4.4 Record breakdowns, major repairs, overhauls, incidents and work conducted

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM401A Conduct major repair and overhaul of machinery and equipment.

Assessment Requirements for AHCMOM401 Conduct major repair and overhaul of machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed undertaking major repair and overhaul of machinery and equipment in a manner that allows the core business of the enterprise to continue with minimal disruption.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify potential and existing hazards in the workplace and implement control measures
- plan for and meet seasonal deadlines
- identify the most effective and economic option in the replacement, repair and overhaul of components
- select and use tools and materials appropriate to the task
- recognise and replace deteriorated or worn parts
- disassemble and reassemble parts and components of machinery and equipment use and maintain welding and thermal cutting equipment
- diagnose faults
- determine appropriate cutting and welding techniques
- operate welding equipment safely and effectively

Knowledge Evidence

The candidate must demonstrate knowledge of:

- assemblies and components of drive, electrical and hydraulic systems
- operational requirements of machinery and equipment
- detailed knowledge of mechanics and equipment operating systems
- storage and use of welding equipment

- work health and safety legislative and enterprise requirements
- environmental codes of practice with regard to the major repair of machinery and equipment

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMOM402 Supervise maintenance of property, machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise maintenance of property, machinery and equipment.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They use discretion and judgement in the selection, allocation and use of available resources and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Prepare maintenance plan	1.1 Identify maintenance requirements for property, machinery and equipment from relevant information sources 1.2 Identify and quantify maintenance costs 1.3 Check maintenance requirements against warranty, insurance agreements and indemnity provisions 1.4 Develop a maintenance plan to promote and sustain performance and production systems in line with enterprise requirements 1.5 Establish an effective workplace communication strategies with regard to maintenance plan, environmental and work health and safety policies, and enterprise requirements
2. Implement maintenance plan	2.1 Identify, secure and include resource and supply requirements in enterprise budgets and operational considerations 2.2 Communicate prepared maintenance schedules and procedures effectively to staff, contractors and suppliers 2.3 Implement and schedule a maintenance plan to minimise disruption to enterprise operations 2.4 Assess potential risks with regard to staff and supply problems, and prepare contingency plans accordingly 2.5 Align tasks required to staff capability and provide training where required 2.6 Confirm machinery and equipment is operated to manufacturer's specifications, work health and safety and enterprise requirements
3. Monitor maintenance plan	3.1 Monitor maintenance activities and performance against maintenance plan for efficiency and effectiveness 3.2 Monitor and control workplace hazards and environmental implications associated with maintenance procedures in line with work health and safety and enterprise requirements 3.3 Monitor and control costs within enterprise budget requirements 3.4 Document relevant information with regard to the maintenance plan in accordance with enterprise requirements 3.5 Ensure property, machinery and equipment are maintained in clean and safe operational conditions

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM402A Supervise maintenance of property, machinery and equipment.

Assessment Requirements for AHCMOM402 Supervise maintenance of property, machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards, implement risk control strategies and oversee safe work practices
- plan, cost and schedule maintenance requirements
- order materials and allocating resources
- deal with contingencies and reschedule maintenance where necessary
- establish and monitor performance targets for maintenance team
- monitor and report on performance of maintenance activities
- dispose of waste products appropriately
- communicate effectively with work team, contractors and management
- implement enterprise work health and safety and environmental policies
- provide on job training /mentoring

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of maintenance requirements with regard to property, machinery and equipment
- maintenance and servicing cycles for property, machinery and equipment
- relevant State or Territory legislation, regulations and Codes of Practice with regard to work health and safety, environmental protection requirements, and the use and control of hazardous substances
- principles of hazard identification and risk management in the work place
- principles of on the job training and mentoring

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCMOM501 Manage machinery and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and implement safe systems of work
- monitor machinery and equipment operations
- evaluate machinery and equipment
- develop machinery and equipment operation and maintenance procedures in compliance with environmental Codes of Practice and work health and safety and hazardous substances legislation
- schedule, supervise and record the service and maintenance of machinery and equipment
- monitor machinery and equipment operations and maintenance, and review risk assessments periodically to ensure a safe operating environment
- assess staff capability in machinery maintenance and operation, and provide training and mentoring

Knowledge Evidence

The candidate must demonstrate knowledge of:

- servicing and maintaining machinery and equipment within area of responsibility
- methods of calculating the cost of machines and their contribution
- training and instruction techniques for directing the learning of staff
- relevant work health and safety and environmental issues, legislative requirements and Codes of Practice
- work health and safety hazard identification, risk assessment and developing risk controls
- environmental legislation and Codes of Practice with regard to maintenance of machinery and equipment, disposal of wastes and hazardous substances
- legislative and enterprise requirements for work health and safety

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMOM502 Implement a machinery management system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a machinery management system.

All work must be carried out to comply with workplace procedures, work health and safety requirements, manufacturer's specifications and sustainability practices.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse and synthesise information and analyse, design and communicate solutions to sometimes complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify machinery and equipment	1.1 Identify machinery and equipment requirements of the enterprise

Element	Performance criteria
requirements for the enterprise	1.2 Evaluate alternative options to machinery ownership for applicability 1.3 Identify and address storage and housing requirements for machinery and equipment 1.4 Monitor and assess machinery innovations for applicability 1.5 Maintain inventory of machinery and equipment as required by the enterprise
2. Select and manage the range of machinery services provided by off-farm suppliers	2.1 Identify services to be provided by off-property suppliers 2.2 Develop criteria to select and monitor the provision of services 2.3 Record and monitor agreements and transactions
3. Manage machinery maintenance	3.1 Determine machinery and equipment maintenance requirements from manufacturer's instructions and establish maintenance schedules 3.2 Establish systems for recording machinery use and maintenance 3.3 Monitor machinery maintenance to ensure adherence to schedules and manufacturer's instructions
4. Manage machinery and equipment operation	4.1 Monitor and record machinery and equipment use according to enterprise requirements 4.2 Monitor machinery operation to ensure compliance with manufacturer's instructions 4.3 Determine procedures for the safe operation of machinery and monitor and ensure adherence to safe procedures 4.4 Train staff in machinery safe operation and procedures for the maintenance of machinery

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHC/MOM502A Implement a machinery management system.

Assessment Requirements for AHCMOM502 Implement a machinery management system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be observed establishing and managing a machinery management system.

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify hazards and managing safe systems of work
- identify machinery and equipment requirements for the property or enterprise
- select and manage the range of machinery services provided by off-farm suppliers
- manage machinery and equipment operation
- manage machinery maintenance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- cultural operations and their associated machinery requirements
- costs associated with the use of machinery
- maintenance requirements of machinery and equipment
- storage and housing requirements of machinery
- safe operating procedures for machinery
- systems for monitoring machinery maintenance and operation
- licensing requirements for the operation of machinery
- work health and safety and environmental legislation, codes of practice and enterprise requirements
- principles of staff training

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCMOM601 Analyse machinery options

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to analyse machinery options within an agricultural, horticultural or land management enterprise.

All work must be carried out to comply with workplace procedures, work health and safety requirements and manufacturer's specifications.

This unit applies to individuals who take personal responsibility and exercise autonomy in undertaking complex work. They analyse information and exercise judgement to complete a range of advanced skilled activities. They work in contexts that are subject to change and adapt a range of fundamental principles accordingly.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Machinery operation and maintenance (MOM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Calculate costs	1.1 Calculate overhead, operating and intangible costs related to

Element	Performance criteria
associated with machinery use	machinery 1.2 Source and compare relevant benchmark data that relates machinery costs to enterprise productivity to own enterprise data 1.3 Make comparison of productivity and suitability of different types and brands of machinery
2. Review machinery requirements	2.1 Review machinery inventory in the context of the goals of the business and current and future productivity and profitability levels 2.2 Identify, cost and evaluate alternatives to ownership 2.3 Identify tax impact of the capital investment through appropriate professional support and incorporated into the analysis 2.4 Assess and control risks associated with high capital investment in machinery in making machinery decisions
3. Analyse returns from major capital investments in machinery	3.1 Use capital budgeting techniques including energy efficiency to calculate the rate of return on major investment decisions 3.2 Review machinery options plan and analysis and record changes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCMOM601A Analyse machinery options.

Assessment Requirements for AHCMOM601 Analyse machinery options

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate costs associated with machinery
- review machinery inventory and requirement
- evaluate and cost options
- assessing investment risk
- budget and incorporate benchmarks
- calculate returns from major capital investments in machinery
- compare the productivity and suitability of different types and brands of machinery
- analyse the financial costs, tax impact and investment risk for different types of machinery
- document the analysis and defining the preferred option
- review the investment plan and analysis of options

Knowledge Evidence

The candidate must demonstrate knowledge of:

- benchmarking practices and procedures, including energy efficiency, carbon footprint and water use efficiency
- capital budgeting techniques
- relevant taxation provisions relating to investment
- risks associated with investments
- analysis and planning processes

Assessment Conditions

Competency is to be assessed in the workplace or simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCNAR201 Carry out natural area restoration works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- establish the task and site with supervisor by referring to a revegetation plan
- carry out weed control and ground preparation as part of a team
- transport tools, plants and planting materials to the site
- carry out planting and regeneration techniques to organisational standards
- protect the restored area with plant guards and fencing
- remove any waste at the end of the job and clean site to pre-work condition
- carry out all work according to organisational standards and work health and safety requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- common names of native plants and animals present in restoration area
- common names of weeds and pest animals present in restoration area
- the importance and value of the local provenance species
- natural area restoration techniques
- enterprise requirements for natural area restoration works

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR202 Maintain wildlife habitat refuges

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain wildlife habitats and refuges to protect desirable animal species from predators.

All work is undertaken in accordance with statutory and local authority requirements.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess the scope of the	1.1 Identify species to be protected and determine their behaviour

Element	Performance criteria
refuge maintenance job	pattern 1.2 Identify characteristics of refuges required for target species 1.3 Determine locations of refuges 1.4 Estimate time to complete the work 1.5 Identify environmental risks associated with the work 1.6 Determine vehicles, equipment and materials required to complete the work
2. Prepare for the refuge maintenance job	2.1 Determine location and boundaries for the wildlife habitat refuge maintenance job in accordance with the pest management strategy and monitoring program 2.2 Conduct safety risk assessment and apply work health and safety policies and procedures 2.3 Take precautions to minimise environmental and biosecurity risks associated with the work 2.4 Check vehicles, equipment and materials for serviceability and cleanliness in accordance with manufacturer specifications and relevant enterprise policies
3. Maintain wildlife habitat refuges for protection of desirable species from predators	3.1 Operate vehicles and equipment in accordance with manufacturer and organisational procedures 3.2 Maintain wildlife habitat refuges in accordance with industry practice and environmental statutory requirements 3.3 Implement strategies to control vertebrate pests in a wildlife habitat 3.4 Identify harbours used by pest animals and notify supervisor 3.5 Dispose of debris from site in accordance with industry practice and environmentally sustainable and work health and safety policies and procedures
4. Clean and store equipment and material	4.1 Clean and store equipment and materials to enterprise and environmental standards in order to maintain biosecurity of area 4.2 Record job completion according to relevant policies and procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR202A Maintain wildlife habitat refuges.

Assessment Requirements for AHCNAR202 Maintain wildlife habitat refuges

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- maintain wildlife habitats and refuges to protect desirable animal species from predators
- identify native species that are present in the wildlife refuge
- confirm the features required for a wildlife habitat refuge
- provide harbors and modify habitat where necessary to provide refuge for native species
- assess the risk of vertebrate pest predators within the refuge
- implement strategies to control vertebrate pests in a wildlife habitat as directed by supervisor
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- vertebrate predators present in local area
- harbours used by vertebrate pests
- wildlife habitats used by desirable animal species
- wildlife habitat modification techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR301 Maintain natural areas

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain natural areas.

This unit applies to workers on land management projects who carry out the maintenance of natural areas.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan maintenance works	1.1 Plan movement through place to minimise disturbance and degradation

Element	Performance criteria
	1.2 Identify legislative requirements, codes of practice and the relevant management strategy and plan 1.3 Identify relevant environmental factors in maintenance works 1.4 Consult stakeholders about pending maintenance works 1.5 Determine and obtain equipment, machinery and materials for maintenance works 1.6 Conduct pre operational machinery checks according to environmental, biosecurity and safety requirements
2. Undertake maintenance	2.1 Follow enterprise work health and safety, environmentally sustainability and biosecurity policies and procedures when undertaking maintenance work 2.2 Undertake maintenance and rehabilitation works according to plans 2.3 Ensure maintenance works conform to relevant risk control measures and practices 2.4 Take interim protective measures to avoid degradation and disturbance during maintenance works 2.5 Monitor activities of personnel and visitors to reduce risks to the significance of the place
3. Complete of activities	3.1 Clean and restore site on completion of works 3.2 Clean and store equipment and machinery 3.3 Remove and store or dispose of excess materials from site according to organisational requirements 3.4 Report completed maintenance works to supervisor according to organisational and legislative requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR301A Maintain natural areas.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCNAR301 Maintain natural areas

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare to carry out maintenance activities in a manner which minimises damaging impacts to site
- consult with stakeholders, including traditional owners about pending maintenance works
- carry out agreed maintenance works with minimal damaging impacts to environment
- select and apply protective structures, devices and signs
- clean up the site and remove surplus materials and waste
- report completion of activities to supervisor
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental factors to be considered in maintenance works, including:
 - ecology in land based, coastal zones or marine parks
 - marine, shore and land based species
 - natural and human threats to places of natural significance
 - pollution sources and damage potential
- basic protection and rehabilitation methods
- enterprise procedures for reporting maintenance works
- applicable State or Territory and Commonwealth legislation covering parks, conservation, environmental protection and heritage

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR302 Collect and preserve biological samples

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect and preserve biological samples as part of a monitoring program.

This unit applies to individuals who most likely work under limited supervision from others with checking only related to overall progress.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan for collection	1.1 Confirm the purpose of sampling 1.2 Confirm sampling schedule with manager 1.3 Confirm sampling site location and obtain approval for site access 1.4 Identify samples to be collected and preserved 1.5 Organise equipment required for biological sampling and

Element	Performance criteria
	preserving 1.6 Assess range of likely operating conditions, hazards and sensitive environments for impact on sampling and testing 1.7 Identify work health and safety policies and procedures for sampling tasks, including required personal protective equipment
2. Prepare equipment and resources	2.1 Obtain equipment required for sampling and preserving 2.2 Check equipment for availability and serviceability 2.3 Clean and sanitise equipment where necessary to maintain integrity of samples and biosecurity of area 2.4 Collect data or record sheets necessary for task 2.5 Move equipment, data sheets and personnel to sampling sites without injury or damage and prepare for use
3. Carry out biological sampling and preserving procedures	3.1 Collect samples in accordance with sampling plan 3.2 Apply environmental sustainability and biosecurity practices to collection processes 3.3 Preserve and record samples in accordance with sampling standards and guidelines 3.4 Prepare, package and send samples for external analysis in accordance with sampling schedule and laboratory standards 3.5 Make specific and general observations on relevant ambient and antecedent environmental conditions 3.6 Operate equipment and undertake work in accordance with work health and safety requirements 3.7 Report and deliver collection outcomes, including presentation of samples, according to enterprise guidelines
4. Complete collection of biological sampling activities	4.1 Clean, sanitise, repair and store equipment and clothing 4.2 Repair damaged or malfunctioning equipment 4.3 Record site sampling results and observations on data sheets 4.4 Report changes in field conditions and equipment to supervisor

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR302A Collect and preserve biological samples.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCNAR302 Collect and preserve biological samples

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect and preserve biological samples as part of a monitoring program according to enterprise procedures
- establish the sampling purpose and requirements
- plan the collection
- prepare equipment and facilities to take biological samples
- carry out biological sampling as part of a monitoring program and according to enterprise procedures
- preserve and record samples as part of a monitoring program and forward for testing if required according to enterprise procedures
- record sampling data and observations according to enterprise procedures
- report outcomes of collection according to enterprise procedures and monitoring program
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- types of biological samples that may be included in the plan, including water, animal, plant samples
- industry biological sampling and preserving guidelines and protocols
- field procedures for biological sampling and preservation
- collecting equipment and methods

- preservation equipment and processes
- fauna and flora recognition relevant to sampling activities
- own role in complying with relevant environmental legislation

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR303 Implement revegetation works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement revegetation works in natural restoration areas.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for revegetation works	1.1 Identify appropriate timing and method of planting required 1.2 Select tools and materials required for the task and check functionality and cleanliness 1.3 Identify, obtain and store plant materials 1.4 Determine and organise labour and machinery requirements

Element	Performance criteria
	1.5 Prepare a works schedule and provide to management or client 1.6 Conduct a safety risk assessment and apply work health and safety procedures
2. Prepare the revegetation site	2.1 Identify site hazards, assess risks and implement risk controls 2.2 Undertake site preparation according to planting plan or supervisor's instructions 2.3 Use soil nutrients and ameliorants, if required by plan specifications 2.4 Mark out revegetation site according to supervisor instructions or plan, applying knowledge of ecosystems and habitat requirements 2.5 Treat all diseased and competing plants, debris and pollutants according to the plan and implement risk controls 2.6 Select and apply treatments according to the risk controls selected 2.7 Install protective structures where indicated by the risk controls implemented
3. Undertake revegetation works	3.1 Carry out revegetation works in accordance with work health and safety policies and procedures and wear appropriate personal protective equipment 3.2 Inspect plant materials before revegetation works and discard defective materials 3.3 Treat plant materials with required nutrients according to documented guidelines 3.4 Plant revegetation stock according to planting program 3.5 Apply appropriate techniques for protecting, securing or anchoring new plants 3.6 Apply appropriate biosecurity and environmentally sustainable practices 3.7 Ensure all of the revegetation program requirements have been implemented 3.8 Identify and report potential threats to revegetation works
4. Maintain revegetated site	4.1 Monitor growth of plants 4.2 Maintain site according to the planting program requirements 4.3 Undertake remedial action and plant protection according to the needs of the species 4.4 Clean, maintain and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR303A Implement revegetation works.

Links

Assessment Requirements for AHCNAR303 Implement revegetation works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- carry out all revegetation works according to the planting plan or supervisor instructions
- prepare the site for revegetation works
- conduct a site hazard identification and risk control assessment
- recognise and treat plant diseases on a revegetation site
- treat weeds and competing plants
- clean and maintain the revegetated site
- use, clean, maintain and store machinery and equipment according to manufacturer instructions
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- revegetation techniques
- ecosystems, provenance and habitat requirements
- factors affecting the timing and method of planting
- identification of pests and diseases of trees
- principles and methods relating to the prevention and control of pests and diseases
- safety requirements when handling and using hazardous goods
- nutrient requirements of a range of plant species and cultivars
- physiology of plant growth

- techniques for protecting and securing or anchoring trees and shrubs
- soils, nutrients and ameliorants applicable to revegetation program

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR304 Undertake direct seeding

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plant out regeneration sites using direct seeding methods.

All work is undertaken according to site conditions and rehabilitation plan.

This unit applies to individuals who work under broad direction and use discretion and judgement in the selection and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for direct seeding	1.1 Receive, interpret and clarify requirements for seeding 1.2 Select equipment and materials according to rehabilitation plan and site conditions and work health and safety requirements

Element	Performance criteria
	1.3 Identify and manage work health and safety risks and hazards 1.4 Conduct pre-start equipment checks 1.5 Identify site environmental and heritage issues and implement control measures 1.6 Collect seed from local plants near the rehabilitation site for use in rehabilitation activities 1.7 Determine type and proportion of cover crop according to rehabilitation plan and site conditions 1.8 Take steps to avoid introduction of foreign plant species or incompatible species 1.9 Prepare rehabilitation site
2. Conduct direct seeding operations	2.1 Follow work health and safety policies and procedures when conducting seeding operations 2.2 Ensure direct seeding method provides adequate plant coverage according to plant type and rehabilitation plan 2.3 Minimise damage to site using direct seeding equipment and appropriate techniques 2.4 Conduct seeding activities in appropriate season and growing conditions 2.5 Carry out seeding and fertilising according to site conditions, flora type and rehabilitation plan and environmental guidelines 2.6 Apply appropriate seed mix and fertiliser according to soil, site and weather conditions, accessibility and future land use
3. Complete operations	3.1 Clean and store attachments and other equipment to manufacturer, enterprise and biosecurity requirements 3.2 Complete records and documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR304A Undertake direct seeding.

Assessment Requirements for AHCNAR304 Undertake direct seeding

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- use direct seeding methods on revegetation sites, according to revegetation plans
- conduct work according to site procedures, regulations, work health and safety, other relevant legislation, and manufacturer specifications
- prepare the site for seeding with consideration to environmental impacts
- conduct seeding to maximise germination response
- complete seeding operations in line with site stability and environmental requirements
- operate, clean, maintain and store equipment safely and according to manufacturer instructions and organisational requirements
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental procedures
- seasonality of plants identified for seeding
- equipment processes, technical capability and limitations
- equipment safety requirements
- fertiliser characteristics and application methods
- seeding methods
- soil dynamics

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR305 Collect native seed

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect, treat and store seed for native revegetation projects.

This unit applies to workers who work under broad direction and use discretion and judgement in the selection and use of available resources to collect seed in a bush environment.

Licensing conditions and permissions or approvals apply to the collection of native seed. Specific determination should be sought through the relevant State or Territory.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to collect seed	1.1 Identify and follow environmental, legislative and organisational requirements to collect seed 1.2 Review work plan for seed collection 1.3 Identify potential locations for seed collection 1.4 Obtain necessary approvals and permissions for access to site and

Element	Performance criteria
	removal of seeds 1.5 Plan seed collecting operations to ensure safe working conditions 1.6 Communicate with others involved in seed collection project 1.7 Select and prepare materials, tools, equipment and personal protective equipment
2. Select and assess seed	2.1 Follow work health and safety policies and procedures when collecting and cleaning seed 2.2 Follow environmental protection and biosecurity measures for the site 2.3 Identify plant species required 2.4 Assess plant species and conditions to ensure seeds are from healthy plants 2.5 Select the appropriate methods of seed collection 2.6 Collect seed from a range of plants and different areas of the plant without causing damage to the parent plant 2.7 Place seed in clean containers and clearly and accurately label according to organisational requirements
3. Clean and store seed	3.1 Separate seed from other materials 3.2 Weigh and store seed in line with species requirements 3.3 Accurately record seed information 3.4 Record and report seed collection information and results

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCNAR305 Collect native seed

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- obtain all necessary permissions and approvals to collect seed in a particular area, including operating in a particular jurisdiction, removal of native seed from a national park and permission from Elders or Custodians to work on Country
- use and maintain relevant material, equipment and resources efficiently and safely
- carry out seed collecting, cleaning and storage procedures efficiently and safely
- identify seed species relevant to plan
- follow organisational policies and procedures relevant to collecting seed
- distinguish between healthy and unhealthy parent plants for seed collection
- accurately record seed collection information and results
- apply work health and safety procedures for seed collection
- apply biosecurity measures in collection and storage of seeds
- apply sustainability practices in the context of own work

Knowledge Evidence

The candidate must explain:

- environmental protection requirements and procedures for minimising environmental impact
- native plant and seed characteristics of revegetation site
- types of diseases and pests likely to infect a range of seed species
- work health and safety requirements for seed collection methods
- procedures for collecting, storing and labelling seed

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR306 Conduct photography for fieldwork

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to take photos for fieldwork for purposes including identifying flora and fauna, vegetation communities and landscapes, photo-point surveys, photography for compliance evidentiary purposes, photography for publications and project monitoring and reporting.

This unit applies to land managers, rangers, weed officers and project officers who are required to use cameras and take photographs for work purposes. These individuals are usually workers who take responsibility for own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to take photographs	1.1 Determine the purpose and end use of photographs 1.2 Prepare a photograph checklist that includes subject, purpose and

Element	Performance criteria
	requirements 1.3 Assess work health and safety risks associated with conducting fieldwork photography and identify controls according to workplace requirements 1.4 Obtain necessary permits and file according to workplace requirements
2. Identify and select appropriate equipment	2.1 Select camera based on suitability for the intended use 2.2 Select and prepare photographic equipment and accessories according to the intended use 2.3 Transport and store photographic equipment and accessories to reduce risk of damage
3. Take photos using correct methods and techniques	3.1 Conduct safety risk assessment and apply safe work practices 3.2 Select position from which to take photos that is safe, unobstructed and easily accessible 3.3 Select camera settings to suit conditions and capture subject 3.4 Select the perspective, framing and sequencing of photographs according to the subject and purpose of photographs and the checklist 3.5 Take photos and check quality on site to make sure they are fit for purpose 3.6 Use specialised photography techniques following proper techniques and methods 3.7 Record field notes identifying site location, date, time, conditions, subject details, further photos required at a later date and other relevant details 3.8 Mark the location of the camera so the perspective and framing can be easily reproduced on future shoots.
4. Download, catalogue and store photographs	4.1 Download photos from camera to computer hard drive or other storage medium according to workplace and legislative requirements 4.2 Electronically file, name and catalogue photos according to workplace policies and procedures and to meet copyright requirements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCNAR306 Conduct photography for fieldwork

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the purpose of the photo
- complete permission forms, obtain permits and confirm copyright requirements before taking photos
- prepare a checklist that includes subject, purpose and requirements
- assess work health and safety risks and apply suitable controls
- select the appropriate camera, lenses and equipment for the task
- adjust aperture, shutter speed, depth of field, white balance, ISO, macro settings, as required by camera type, to suit the purpose, subject matter and environmental conditions
- use the following specialised photography techniques:
 - macro (close-up)
 - photo points
 - evidentiary photos
- take photos, check they are fit for purpose and retake if necessary
- record appropriate field notes according to purpose, enterprise requirements and with sufficient information to repeat photo in future
- download, file and name evidentiary photos following chain of custody policies and legal procedures

Knowledge Evidence

The candidate must explain:

- legal requirements of copyright, privacy, permission and environmental protection relating to taking photos for fieldwork
- hazard identification, assessment and control procedures

- purpose of photographic equipment used in fieldwork
- principles of photography including aperture, shutter speed, depth of field, ISO, white balance, exposure compensation and dynamic range, where DSLR cameras are used

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR307 Read and interpret maps

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to read and interpret road and topographical maps for land management and pest management purposes.

This unit applies to those whose job role includes navigating to remote areas using paper maps or geographical information systems (GIS) for land management purposes. It also applies to those who are required to plot sites on maps for recording and monitoring purposes.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan a route using a map	<p>1.1 Select appropriate paper or GIS maps, equipment and navigation aids and check for accuracy, currency and operational effectiveness</p> <p>1.2 Assess and select route to destination, consider information from map, plan or field observations</p>

Element	Performance criteria
	1.3 Examine maps, and identify relevant symbols, information and navigation data 1.4 Identify and locate current position in the field, on map or plan using landmarks and key geographical features 1.5 Identify and locate required destination on map or plan 1.6 Plan a safe route to destination 1.7 Measure and estimate distance to destination using map scale for selected route
2. Navigate using a map	2.1 Navigate and traverse planned route and schedule 2.2 Orient the map or plan to surroundings and planned route 2.3 Use and interpret navigation aids 2.4 Navigate alternative routes to bypass obstacles and improve efficiency of route or course
3. Plot sites and locations using maps and GIS	3.1 Identify and locate position or site on map comparing landmarks and key geographical features to symbols and features on map 3.2 Use GIS data to precisely record locations

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCNAR307 Read and interpret maps

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret symbols, lines and grids on maps to identify locations
- plan the safest and most effective routes to a location using a map, GIS device and other known information
- navigate and traverse a route at least 2km long
- identify current position by comparing nearby landmarks and features to maps
- identify obstructions and plan alternative routes, where necessary
- interpret scales accurately and estimate distances
- mark a location or site on a map, or recording precise GIS details for a site or location

Knowledge Evidence

The candidate must demonstrate knowledge of:

- uses for types of maps, charts and scales that are applicable to own job role
- symbols and representations of topographical and geographical information used on maps
- common scales used on maps and plans
- features and use of a compass and factors that affect compass accuracy
- applications of a GIS device
- advantages and disadvantages of different map and chart types and sources of error
- techniques for estimating distance

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR401 Supervise natural area restoration works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to supervise natural area restoration works on revegetation programs.

All work is undertaken according to enterprise guidelines and contract documents.

This unit applies to individuals who supervise others and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify scope of natural area restoration works	1.1 Identify and check nature and scope of works and extent of responsibilities against relevant contract documentation 1.2 Confirm or create site map for works

Element	Performance criteria
	<p>1.3 Determine personnel and other resources required according to the scope of the project and relevant documentation</p> <p>1.4 Develop a work program to ensure that project outcomes are reached within designated time lines</p> <p>1.5 Determine and advise of potential environmental impacts of the proposed restoration</p> <p>1.6 Identify work health and safety hazards, assess risks and implement, monitor and review risk controls</p>
2. Coordinate the supply of materials and equipment	<p>2.1 Calculate and coordinate material quantities and equipment requirements</p> <p>2.2 Order materials, check for specified quantity and quality, then stockpile</p> <p>2.3 Confirm specific delivery requirements with suppliers</p> <p>2.4 Return rejected materials or products for replacement</p>
3. Monitor restoration works	<p>3.1 Coordinate the team to carry out restoration works</p> <p>3.2 Monitor and adjust the work program to meet client changes or directions and to ensure that project outcomes are reached</p> <p>3.3 Give written instructions to contractors</p> <p>3.4 Identify, record and report issues, likely to cause delays or alter the scope of the works, to management and the client</p> <p>3.5 Cost alterations using agreed unit rates and forward variations for approval by the client in writing</p> <p>3.6 Undertake periodic inspection of work to ensure project outcomes are achieved and to make progress payments</p> <p>3.7 Monitor the work site to ensure it remains in a clean, tidy and safe condition throughout and on completion of works</p> <p>3.8 Monitor team to ensure adherence to work health and safety, environmental sustainability and biosecurity policies and procedures</p>
4. Prepare site for completion	<p>4.1 Inspect site before practical completion to ensure all works have been completed to enterprise and client standards</p> <p>4.2 Note any works not complying and rectify according to the contract specification as outstanding items</p> <p>4.3 Produce and communicate a report to management or client</p> <p>4.4 Forward a practical completion certificate to the contractor</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR401A Supervise natural area restoration works.

Assessment Requirements for AHCNAR401 Supervise natural area restoration works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- supervise natural area restoration works
- identify hazards and ensure safe systems of work are in place
- scope the natural area restoration works required and compare to specifications of work on the contract
- develop a work program and source labour and equipment to undertake the work
- maintain the supply of materials and access to equipment to allow restoration work to proceed
- coordinate team to achieve optimum performance
- monitor the work program and make adjustments to task schedule where required
- monitor work to achieve specified outcomes and to minimise environmental disturbance
- inspect work to ensure specifications are met and environmental impact is minimised
- report project completion to management or client according to enterprise requirements
- monitor the application of appropriate sustainability practices in natural area restoration works
- monitor team to ensure work health and safety policies and procedures are followed
- monitor team to ensure biosecurity measures are applied

Knowledge Evidence

The candidate must demonstrate knowledge of:

- strategies and techniques to avoid negative environmental impacts
- work programming
- natural area restoration techniques to be used in the works

- environmental factors to be considered in restoration works, including:
- the role of native plants and animals in the ecosystem of the area
- vertebrate pests and options for control
- impact of weeds and pests and appropriate control methods
- ability to assess restoration potential of sites
- basic plant and animal ecology
- knowledge of different ecosystems
- team supervision
- strategies for monitoring work quality and progress
- application of work health and safety and environmental legislation, codes of practice and enterprise procedures in natural area restoration works

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR402 Plan the implementation of revegetation works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan the implementation of revegetation works.

This unit applies to supervisors of revegetation programs who supervise others and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out preliminary planning activities for revegetation works	1.1 Confirm client preferences and contract requirements including the scope of the work for the revegetation project 1.2 Identify statutory obligations and site responsibilities that may affect the implementation of works 1.3 Conduct an initial site visit to verify the biophysical and other factors of the project area including environmental considerations

Element	Performance criteria
	<p>and historical modifications</p> <p>1.4 Identify work health and safety obligations, assess hazards and develop controls</p> <p>1.5 Verify the availability, quantity and costs of plants and other materials listed in the project schedules</p>
2. Prepare a staged plan of work	<p>2.1 Identify, cost and confirm availability of materials, tools and equipment required for revegetation procedures and ongoing maintenance of the site</p> <p>2.2 Investigate site access and establishment issues</p> <p>2.3 Prepare a program of works which incorporates a plan to minimise environmental impacts of works and work health and safety practices</p> <p>2.4 Develop timelines for site establishment, the establishment period and maintenance of works</p> <p>2.5 Incorporate seasonal factors and impacts in the staging strategy</p> <p>2.6 Include special project works related to habitat resource development and enhancement in the implementation plan, where required</p> <p>2.7 Document the staged implementation plan</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR402A Plan the implementation of revegetation works.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCNAR402 Plan the implementation of revegetation works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan the implementation of revegetation works
- investigate site access and establishment issues
- plan for environmental impacts of site work practices and minimise safety risks to workers and the public
- assess site for opportunities and constraints associated with implementation of revegetation works
- establish the purpose and client preferences for the site to be revegetated
- carry out a site visit and confirm any planning requirements
- develop a plan for the site, detailing the resources required and the program of works
- develop schedules for the establishment and maintenance phases of the project
- document the staged implementation plan
- incorporate seasonal factors and impacts in the staging strategy to allow for planting, supply and care, wet day access, machinery use, fire hazards and establishment
- include work health and safety practices in plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the role of revegetation works in the restoration of the environment
- the environmental issues associated with undertaking revegetation works, how to comply with legislation and ensure that the impact on the environment is minimal, including:
- principles of ecology including specific native plant and animal relationships and habitat requirements
- identification, propagation and establishment techniques of specific native plant species

- chemical, cultural and biological weed and feral animal control techniques
- soil conservation and enhancement techniques and their advantages and disadvantages in reference to specific sites and habitats
- soil erosion control and stormwater management techniques
- maintenance requirements and practices for native plants prior to and after initial establishment
- growth habits and cultural requirements of specific native plants under a range of soil and environmental conditions
- site evaluation techniques including methods of analysing soils, waterways and their condition
- practical understanding of the advantages and disadvantages of options for revegetation procedures
- work health and safety hazards associated with undertaking revegetation works and the controls necessary to remove or minimise risks associated with them
- contract documents including specifications, plans of landscape works, services, supplies and surveyors documents

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR501 Manage natural areas on a rural property

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage natural areas on a rural property.

This unit applies to management of programs on privately owned rural property, which are designed to enhance the sustainable ecological and economic capacity and outcomes of the land.

All work is undertaken in accordance with relevant national, State, Territory and local legislation and regulations.

This unit applies to individuals who manage projects and people and who provide and communicate solutions to a range of predictable and unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine location, size and type of area to be managed	1.1 Map location confirming property ownership and boundaries 1.2 Obtain lists of native animal and plant species specific to area 1.3 Determine features, characteristics and topography of site 1.4 Source and confirm accuracy of vegetation structure and conservation value data 1.5 Obtain details of the presence of and threats from pests 1.6 Assess ecological value of natural areas on property 1.7 Compile documented evidence of physical impacts on area
2 Prepare management plan	2.1 Identify budgetary constraints for management plan 2.2 Design boundary control appropriate to natural area protection guidelines 2.3 Plan restoration and maintenance strategies in line with budget requirements 2.4 Reduce or correct physical impacts using industry endorsed strategies 2.5 Liaise with planning and specialist personnel and local authorities 2.6 Develop habitat enhancement strategies 2.7 Develop strategies to integrate management of natural areas into land use and production systems of property 2.8 Incorporate biosecurity, environmental sustainability and work health and safety procedures into management plan 2.9 Confirm management plan complies with relevant national, State, Territory and local legislation or regulations relating to environmental concerns 2.10 Prepare and present management plan
3. Implement management strategies	3.1 Develop work schedules consistent with production requirements 3.2 Coordinate people, materials and equipment to carry out work according to management strategy 3.3 Schedule works in conjunction with operational personnel, taking seasonal weather conditions into consideration 3.4 Obtain permits or licenses for natural area works 3.5 Consult with neighbours, local authorities and others, as required, during the implementation of the works 3.6 Communicate with staff, clients and contractors regularly during implementation of the works

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR501A Manage natural areas on a rural property.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCNAR501 Manage natural areas on a rural property

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine features and characteristics of natural areas
- source topographical information and conservation data about a site
- assess the ecological value of natural areas on a property
- develop and implement management strategies in accordance with organisational guidelines and industry best practice
- consult with neighbouring landholders, local authorities and interest groups
- coordinate team to carry out work in natural areas according to management strategies and within statutory requirements
- develop and implement restoration and maintenance management strategies that meet relevant national, State, Territory and local legislation or regulations relating to environmental concerns
- ensure management plans incorporate work health and safety and biosecurity legislative requirements and appropriate sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- natural area restoration and management principles
- advantages and limitations of sustainable land management strategies, including environment sustainability as a 'whole-system' approach
- property planning and enterprise budgeting systems and procedures
- environmental issues especially in regard to water catchments, air, noise, ecosystems, habitat and waste minimisation that impact on management plan

- relevant State/Territory legislative requirements related to environmental protection and control standards

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR502 Conduct biological surveys

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and conduct biological surveys and produce a biological survey report, according to client requirements and biological components to be surveyed.

This unit applies to land restoration managers who provide and communicate solutions to a range of predictable and unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication. However, all units of competency dealing with animals in the AHC Training Package have the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Carry out preliminary design activities for the biological survey	1.1 Identify survey scope, objectives and constraints according to client requirements 1.2 Source, collate and evaluate current data relevant to survey

Element	Performance criteria
	<p>requirements</p> <p>1.3 Develop processes for data collection and processing consistent with the survey scope, objectives and constraints</p> <p>1.4 Design survey plan that reflects client requirements and present to client for approval</p> <p>1.5 Incorporate work health and safety and environmental sustainability and biosecurity procedures into plan</p>
2. Determine requirements of the biological survey	<p>2.1 Identify biological survey indicators and evaluate constraints and opportunities for data collection</p> <p>2.2 Identify data collection points that are repeatable and statistically representative</p> <p>2.3 Identify hazards associated with a biological survey, assess risks and develop controls, determine costs, and document in the survey design</p> <p>2.4 Determine tools, equipment and machinery required for the survey and confirm availability with suppliers, contractors and personnel</p> <p>2.5 Schedule survey activities and surveyor access according to the survey design</p> <p>2.6 Document survey procedures and schedules and present to appropriate personnel and client for approval</p>
3. Conduct the biological survey	<p>3.1 Conduct field visit to verify previous data and gather further information on species frequency, distribution and health or habitat values</p> <p>3.2 Conduct the biological survey according to the survey design</p> <p>3.3 Monitor survey activities for accuracy, compliance to the survey design and out-of-specification procedures or events</p> <p>3.4 Undertake staged data collection according to the survey design, scheduling and surveyor access requirements</p> <p>3.5 Record all monitoring and survey data promptly and accurately according to specifications of the survey design</p>
4. Compile a biological survey report	<p>4.1 Analyse data and draw conclusions based on appropriate evidence and reasoned arguments</p> <p>4.2 Prepare a biological survey report that describes survey findings according to the survey scope and objectives, identifies areas requiring remedial action for improvement and details recommendations for action</p> <p>4.3 Present report to the client</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR502A Conduct biological surveys.

Assessment Requirements for AHCNAR502 Conduct biological surveys

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan, conduct and report on biological surveys according to client requirements, enterprise policy and industry best practice
- identify the scope, objectives and constraints for a biological survey according to client requirements, the biological components to be surveyed and enterprise policy
- assess the availability of current data and determine data collection and processing needs
- identify biological indicators that are repeatable and statistically representative
- develop a survey plan that documents survey methods and indicators
- schedule survey activities and establish access to the site
- conduct a biological survey with data collection staged and recorded according to the survey plan
- produce a biological survey report with detailed analysis and conclusion, including a description and assessment of the specified biological components, in agreed timeframes to client and enterprise standards
- design and conduct biological survey in accordance with work health and safety and environmental legislative requirements
- ensure survey plan and activities complies with Animal Welfare Codes of Practice
- apply work health and safety practices in the context of own work
- apply biosecurity measures in the context of own work
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- biological classification systems

- plant and animal recognition relevant to survey area
- environmental factors that impact on vegetation and animal populations
- requirements for ensuring the welfare of animals described in the relevant Codes of Practice
- ecological principles and terminology
- energy flows and trophic structures of communities
- legal requirements relating to the protection and clearance of vegetation and animal species
- assessment, reporting and client liaison procedures and best practice techniques
- enterprise work team management guidelines
- work health and safety legislative requirements and Codes of Practice
- hazard identification, assessment and control measures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR503 Design a natural area restoration project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design a natural area restoration project.

This unit applies to restoration managers who analyse information and exercise judgement to complete a range of skilled design and development activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a natural area restoration project design brief	1.1 Consult with client to establish the purpose, scope, budget and other requirements of design 1.2 Develop and confirm ecological objectives for the project 1.3 Develop the design brief and agree on extent of project 1.4 Prepare the project budget with the client

Element	Performance criteria
	1.5 Obtain or prepare a site base plan 1.6 Review existing site data and information before visiting the site
2. Undertake a site analysis	2.1 Inspect project site at the first stage of the design work 2.2 Quantify and map on the base plan, elements and features of the site, its biological condition and the presence of threats 2.3 Record soil, topography, aspect, habitat resources, existing vegetation, ecological communities and climatic factors in the base plan and in the site report 2.4 Assess legal requirements and constraints on restoration work 2.5 Assess the potential for natural regeneration and record the limiting factors 2.6 Determine options for passive and active interventions 2.7 Assess and record other relevant information
3. Develop a concept design for the natural area restoration project	3.1 Prepare concept design to illustrate location and layout of the project 3.2 Get agreement from client on options and approaches for development in accord with the proposed ecological aims and goals 3.3 Present the concept design with supporting information and justification or reasons for the proposed actions
4. Produce a final design for the natural area restoration project	4.1 Draft a detailed plan according to the design brief and concept design 4.2 Establish the quality and standard of the works and the responsibilities of the contractor during implementation 4.3 Apply appropriate construction and engineering principles to restoration design 4.4 Organise or prepare any further design documentation according to the design brief and enterprise guidelines

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR503A Design a natural area restoration project.

Links

Assessment Requirements for AHCNAR503 Design a natural area restoration project

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- design a natural area restoration project according to client specifications and workplace and legislative requirements
- conduct an on site analysis to assess potential for regeneration and determine constraints, and use information to inform the design process
- establish the project purpose, scope and extent, and costs and benefits
- prepare a base plan incorporating landforms, soils, fauna and flora and habitat
- determine options for natural area restoration and incorporate into a concept design
- produce a final design with supporting documentation, including costings, planning, notes and specifications to give an interpretation of the plan to establish the quality and standards of the works and the responsibilities of the contractor during the implementation
- use professional graphic formats to present concept design

Knowledge Evidence

The candidate must demonstrate knowledge of:

- design process
- construction principles and practices
- graphical presentation and drafting techniques
- recognition of plant species and a range of ecological communities
- natural regeneration potential and limits
- ecological restoration theory and techniques
- drafting techniques
- developing and managing budgets

- calculations of materials, labour, machinery and equipment
- environmental implications of restoration works
- legislative requirements for natural area restoration works

Assessment Conditions

Assessor must satisfy current standards for RTOs.

AHCNAR504 Manage natural area restoration programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage natural area restoration programs.

This unit applies restoration managers who provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Inspect and assess site for restoration	1.1 Prepare a vegetation assessment report 1.2 Determine site conditions, level of degradation and restoration potential 1.3 Assess threats to existing ecosystem, flora, fauna and property from proposed restoration works 1.4 Assess range of likely operating conditions, hazards and difficult

Element	Performance criteria
	or sensitive environments for potential impact on restoration works
2. Plan natural area restoration program	2.1 Prepare plans and specifications according to program or management aims and objectives 2.2 Select restoration techniques to meet management plans 2.3 Outline staging strategy for works 2.4 Plan protective structures to ensure compliance with work health and safety requirements 2.5 Select or recruit appropriately skilled personnel 2.6 Obtain appropriate permits, licenses and authorisations required for program 2.7 Source equipment and materials for restoration work 2.8 Transport equipment and personnel to restoration sites
3. Monitor natural area restoration works	3.1 Check site is prepared according to specifications 3.2 Check plant materials, machinery and equipment comply with natural area restoration plan 3.3 Monitor natural area restoration works for quality and progression against plan 3.4 Monitor work to ensure remedial action is undertaken as required 3.5 Manage workers to ensure work is carried out in accordance with work health and safety legislation
4. Review natural area restoration programs	4.1 Monitor site to ensure compliance with maintenance program and specifications 4.2 Assess site to determine restoration works are consistent with management plans 4.3 Report changes to restoration techniques for adoption in future works

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR504A Manage natural area restoration programs.

Assessment Requirements for AHCNAR504 Manage natural area restoration programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- manage a natural area restoration program
- carry out a detailed site assessment for restoration
- select appropriate vegetation restoration techniques for the program
- plan a natural area restoration program effectively
- ensure program complies with relevant legislative and program requirements
- calculate staff and resources required
- supervise staff to carry out natural area restoration works according to the program
- review natural area restoration program against issues identified in the management plan for the area
- monitor staff to ensure work health and safety policies and procedures are followed

Knowledge Evidence

The candidate must demonstrate knowledge of:

- plant species and community recognition
- natural regeneration potential and limits
- ecological restoration theory and techniques
- factors affecting the timing and method of plant establishment
- identification of plant and animal threats to treated areas
- principles and methods relating to the prevention and control of pests and diseases
- safety requirements when handling and using hazardous goods
- soils and nutrients, plant selection and culture
- calculations for materials

- legislative requirements
- preparation of plans and specifications

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNAR505 Plan river restoration works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare a detailed plan for river restoration works, in consultation with the client and relevant consent authorities.

This unit applies to restoration and rehabilitation project managers who take responsibility for their own work and provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Area Restoration (NAR)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Establish client need	1.1 Confirm client expectations 1.2 Explain current impacting legislation and policies 1.3 Discuss possible strategies and confirm the best option

Element	Performance criteria
2. Develop the strategy to utilise river restoration works	2.1 Check maps and titles to determine property ownership and boundaries 2.2 Determine profiles of river sections from photographs 2.3 Develop erosion and sediment control measures consistent with industry principles and selection criteria 2.4 Develop fauna habitats following industry recommendations 2.5 Ensure plants used in project comply with industry guidelines 2.6 Establish and document restoration strategies with the client and relevant consent authority
3. Prepare a detailed river restoration works plan	3.1 Check selection criteria for earthwork structures or measures against industry guidelines and legislative requirements 3.2 Check habitat enhancement strategies against industry guidelines 3.3 Prepare plan according to industry best practice and the requirements for submission to the relevant consent authority

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR505A Plan river restoration works.

Assessment Requirements for AHCNAR505 Plan river restoration works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- check client expectations for restoration strategies for compliance and discuss issues with client
- plan river restoration works according to client, environmental and legislative requirements
- develop erosion and sediment control measures
- follow industry guidelines to establish fauna habitat and vegetation species
- document the strategy for submission to the relevant consent authority
- prepare a detailed works plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant environmental protection, planning and groundwater legislation
- river restoration techniques and processes
- erosion and sediment control techniques
- planning procedure for erosion and sediment control
- erosion control and design principles and factors including:
 - soils and soil formation
 - levels and levelling
 - earthmoving principles
 - total catchment issues
 - managing peak water flows
 - subsurface and surface drainage principles and systems

- restoration principles and techniques
- legal requirements related to permits
- environmental issues
- relevant legislation and regulations relating to soil and water degradation issues

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess requirements for improved land use	1.1 Audit the natural resource base and identify threats to sustainability

Element	Performance criteria
	1.2 Review the production and management plans to incorporate sustainable land use principles 1.3 Assess water resources, quality and impacts of run off for risk of erosion 1.4 Assess soil health and fertility against the requirements of the production plan 1.5 Assess vegetation types and coverage and identify required changes 1.6 Plan and prioritise land and water protection measures and structures
2. Carry out structural improvements to address threats to sustainability	2.1 Follow work health and safety policies and procedures in field work 2.2 Inspect sites, note key features and place pegs for improvements 2.3 Determine materials for the construction from the plans 2.4 Obtain and organise materials, personnel and equipment 2.5 Check equipment to be used 2.6 Construct structural works and revegetate the area and secure from livestock
3. Treat areas of land degradation	3.1 Realign fences to land classes and soil conservation works 3.2 Protect contour banks and repair as necessary 3.3 Construct water carrying structures or repair as necessary 3.4 Establish shelter belts for crop and stock protection 3.5 Review and amend soil cultivation and planting practices to prevent erosion and minimise soil run-off 3.6 Plan grazing strategies to maximise ground cover and avoid damage through foot tracks or damage to banks 3.7 Ensure all works and plans comply with environmental protection legislation, regulations and codes of practice

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNAR506A Develop and implement sustainable land use strategies.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCNAR506 Develop and implement sustainable land use strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop and implement sustainable land use strategies
- identify the threats to sustainability for an area or region
- manage water resources and riparian zones
- manage vegetation and plant succession for an area
- manage the health and sustainability of soils
- incorporate sustainability principles into land use practices
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the role of biodiversity in farming systems
- sustainable land and water use principles and practices applicable to the region
- sustainable soil management
- soil appraisal and remediation strategies
- environmental controls and codes of practice applicable to the business and to the improvement works
- relevant legislation and regulations relating to soil and water degradation issues, chemical use and structural works
- relevant work health and safety and environmental protection legislation, regulations and codes of practice
- causes of land degradation

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet -

AHCNRM401 Plan and implement a biosecurity program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and implement a biosecurity program.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters. They provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication, however, where animals are involved in training and assessment, the AHC Training Package has the requirements for animals to be handled humanely to minimise stress and discomfort.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Maintain a biosecure area to prevent disease transmission through	1.1 Maintain a controlled access perimeter to funnel authorised traffic through control points 1.2 Establish and implement procedures for all staff and equipment to

Element	Performance criteria
the use of physical barriers and hygiene practices	<p>cross the controlled access perimeter into the controlled access zone</p> <p>1.3 Restrict entry of workers and equipment into the controlled access zone by transferring inputs, waste and products through access points on the controlled access perimeter</p> <p>1.4 Maintain restricted access perimeters and restricted zones</p> <p>1.5 Prioritise access to restricted zones on the risks and potential impacts of infection being carried into the zone</p>
2. Implement biosecurity procedures to manage visitors	<p>2.1 Define the risk level of visitors by gathering information before the visit and during sign in</p> <p>2.2 Establish procedures for higher risk visitors</p> <p>2.3 Maintain clear signage to direct traffic and discourage unauthorised visitors</p> <p>2.4 Communicate the requirements for entry to visitors before they arrive on site</p> <p>2.5 Keep visitor parking separate to prevent staff vehicle or traffic way contamination</p> <p>2.6 Develop a questionnaire to be completed and signed by visitors to establish their risk levels</p> <p>2.7 Develop and post criteria for banning visitors including those who fail to make pre-arrangements</p> <p>2.8 Maintain visitor log books to allow traceability of any subsequent disease issues</p>
3. Apply sanitation practices and personnel movements to reduce the risk of disease	<p>3.1 Monitor and adjust drainage to ensure water doesn't collect and stand</p> <p>3.2 Implement and monitor hygiene and clothing procedures for entry to the site</p> <p>3.3 Establish and maintain well-defined transition zones for entering restricted zones</p> <p>3.4 Select disinfectants that are appropriate for surfaces and water quality</p> <p>3.5 Develop and implement standard operating procedures for cleaning and sanitising facilities, tools and equipment</p> <p>3.6 Ensure staff movements and animal exposures are from most susceptible animals to least susceptible</p> <p>3.7 Ensure boot dips are used correctly and recharged frequently</p>
4. Implement an integrated strategy for pests to reduce the risk of disease	<p>4.1 Maintain facilities to eliminate potential points of entry for pests</p> <p>4.2 Screen all inputs such as feed, fertiliser and animals to reduce the likelihood of pests being introduced</p> <p>4.3 Monitor pest numbers through the use of counts or other indicators</p>

Element	Performance criteria
	<p>4.4 Use good sanitation and hygiene to break pest cycles and eliminate pest habitat</p> <p>4.5 Control or exclude pests from output storage areas</p> <p>4.6 Reduce pest numbers by use of an integrated approach using a combination of biological, chemical, behavioural and mechanical controls</p> <p>4.7 Rotate pesticides periodically to overcome resistance in pest populations</p> <p>4.8 Document and evaluate pest control measures in response to effectiveness over time</p>
5. Manage outputs to reduce the risk of disease	<p>5.1 Remove and store outputs such as garbage for later removal or disposal</p> <p>5.2 Locate storage areas for outputs in low-traffic areas and managed to prevent cross-contamination and comply with environmental legislation</p> <p>5.3 Implement a mortality management strategy using alternatives such as burial, composting, rendering or incineration</p>
6. Review the implementation of biosecurity measures	<p>6.1 Use record keeping of biosecurity procedures to reduce risk of disease</p> <p>6.2 Monitor effectiveness and progress of control activities and compare with planned objectives</p> <p>6.3 Ensure standards and protocols for the monitoring of sheds and facilities are adhered to as part of work duties</p> <p>6.4 Address issues and concerns with biosecurity and amend procedures where required</p> <p>6.5 Revise control activities as required to address relevant protocols, maintain cost-effectiveness including appropriate resource allocation and contain wider impacts</p> <p>6.6 Review staff training and induction records to ensure they are able to implement all biosecurity requirements appropriate to their position</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCNRM401 Plan and implement a biosecurity program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- manage and maintain quarantine
- implement and monitor quarantine area sanitation
- disinfect facilities
- plan and implement pest control strategies
- establish a biosecure area
- manage visitor access and the storage and movement of inputs and outputs for biosecurity
- develop sanitation procedures to reduce the risk of disease
- apply integrated pest management practices to control pests in a biosecure area
- ensure staff are aware of and follow biosecurity procedures
- review biosecurity status based on records system

Knowledge Evidence

The candidate must demonstrate knowledge of:

- diseases and pests that pose a threat and their likely causes of spread
- principles of risk management applied to biosecurity
- requirements for personal hygiene and quarantine procedures for site entry
- principles of disinfecting a site
- safe use of chemicals and cleaning agents
- integrated pest management and rotation of chemical pest controls
- cleaning and disinfecting procedures
- work health and safety, environmental and biosecurity legislation, codes of practice and enterprise procedures

- record keeping requirements
- reporting incidents or issues
- safety practices related to use of equipment and materials used in cleaning and pest control
- basic requirements for ensuring the welfare of animals described in the relevant Codes of Practice, where animals are affected by biosecurity plans

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNRM501 Develop a coastal rehabilitation strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop, implement and evaluate a rehabilitation strategy for a natural area in a coastal zone.

This unit applies to persons working in enterprises, organisations or groups who are responsible for the management of natural resources within the coastal zone. They analyse information and exercise judgement to complete a range of advanced skills activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and describe coastal resources and assets	1.1 Identify existing sources of information on the coastal zone resource to be managed, including advice from the relevant land manager, organisation or group 1.2 Conduct site survey to determine physical or biological entities and resources and threatening processes

Element	Performance criteria
	1.3 Identify cultural and heritage sites within the zone and arrange for an archaeological assessment, if required 1.4 Determine resource use, management stakeholders and the requirements and opportunities for consultation
2. Establish condition of coastal area	2.1 Assess current ecological and environmental condition of resources within the coastal area 2.2 Assess the impact on the resources and assets of threatening processes within the area 2.3 Present preliminary findings on the coastal resource and its condition to stakeholders
3. Develop a strategy to rehabilitate the coastal area	3.1 Analyse information gathered to make decisions on management options 3.2 Present findings to management authority and seek direction on drafting management actions 3.3 Implement processes for consultation with management, enterprise staff, consultants and stakeholders in accordance with enterprise policies and procedures 3.4 Establish strategy and prioritise activities for asset rehabilitation and improvement in accordance with environmental sustainability practices 3.5 Design management action plan for implementation of the strategy 3.6 Document management and stakeholder acceptance of the plan according to organisational policies 3.7 Confirm plan complies with legislative and regulatory requirements and industry standards 3.8 Obtain formal consent from relevant land manager or authority
4. Implement and monitor the strategy and action plan	4.1 Seek funds and volunteer assistance to undertake works 4.2 Coordinate works with stakeholders 4.3 Monitor progress of works in accordance with strategy plans 4.4 Monitor volunteers to ensure they follow work health and safety, biosecurity and environmental sustainability policies and procedures 4.5 Review strategies and actions and make recommendations for change
5. Evaluate rehabilitation strategy	5.1 Monitor changes in resource condition and evaluate effectiveness of strategy 5.2 Report findings to management and stakeholders with recommendations for adjustments to strategy

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNRM501A Develop a coastal rehabilitation strategy.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCNRM501 Develop a coastal rehabilitation strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop, implement and evaluate a rehabilitation strategy for a natural area in a coastal zone
- assess the condition of a natural area within a coastal zone and identify threats through review of existing information, site surveys, consultation and expert advice
- determine management options and facilitate the development of a strategy and action plan through analysis of information collected, stakeholder consultation and advice from management authority
- monitor and evaluate the implementation of the strategy
- prepare reports to enterprise and authority standards
- apply work health and safety practices in the context of own work and in managing volunteers and undertaking rehabilitation works
- incorporate sustainability practices into rehabilitation strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- coastal zone topographical features
- ecological principles and environmental assessment techniques
- coastal zone information resources including on native flora and fauna identification, habitat requirements, vulnerable and endangered species
- management and rehabilitation techniques and strategies for application within the coastal zone
- environmental degradation processes
- management strategies for cultural and heritage sites

- natural resource management planning and issues
- relevant legislative and regulatory requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNRM502 Develop a water quality monitoring program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish requirements for monitoring water quality and developing a program to monitor water quality in a given site. It includes carrying out water monitoring activities and evaluating program effectiveness.

This unit applies to those working in the role of coordinator or manager in an organisation, group or enterprise concerned with gathering information for land or water management purposes. The role is likely to include delegation of implementation tasks and may include consultation with specialists such as hydrologists and hydrographers.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine water quality monitoring program requirements	1.1 Consult with client to identify scope, objectives and constraints of project and intended use of the data 1.2 Research and evaluate background information relevant to survey

Element	Performance criteria
	<p>type and site</p> <p>1.3 Determine water quality indicators to be measured, frequency and volume of sampling required to meet scope, objectives and constraints of project</p> <p>1.4 Establish procedures for data collection, processing and reporting that are consistent with the scope, objectives and constraints of the program and legislative requirements</p> <p>1.5 Seek estimates of costs involved and sources of funds for the program</p> <p>1.6 Identify and assess work health and safety hazards associated with conducting the sampling program</p> <p>1.7 Provide a survey strategy that reflects project requirements, scope, objectives and constraints for discussion and approval</p>
2. Undertake a site analysis	<p>2.1 Identify and record physical and biological features of the site</p> <p>2.2 Identify and record resource management factors contributing to water quality</p> <p>2.3 Survey biota, as required, to meet the scope and objectives of the program</p> <p>2.4 Identify and evaluate sampling points for safety, accessibility and opportunities for repeatable data collection</p>
3. Plan monitoring program	<p>3.1 Select suitable sites for repeatable monitoring to obtain representative samples</p> <p>3.2 Source laboratory and field equipment for the monitoring program and determine costs</p> <p>3.3 Confirm suitability and availability of laboratory and field equipment</p> <p>3.4 Confirm surveyor access to site for the duration of the monitoring program</p> <p>3.5 Document work health and safety controls and emergency procedures for the program in line with organisational policies</p> <p>3.6 Document environmental sustainability policies and procedures and biosecurity measures</p> <p>3.7 Document sampling techniques to be used</p> <p>3.8 Document methods of data collection, monitoring and field techniques for field operators</p> <p>3.9 Present survey schedules and procedures to appropriate personnel and the client for approval</p>
4. Monitor water quality	<p>4.1 Carry out water quality monitoring tasks in line with plan</p> <p>4.2 Transport, store and treat samples with regard to temperature, maximum holding periods and other variables</p> <p>4.3 Monitor surveying process for accuracy, compliance with the</p>

Element	Performance criteria
	survey plans and procedures 4.4 Implement contingency plans when problems arise, whilst continuously assessing and evaluating the plan for errors and inconsistencies
5. Evaluate program	5.1 Record and save data according to plan requirements 5.2 Analyse data collected according to industry policies and guidelines and scientific standards 5.3 Draw outcomes, conclusions or trends from the monitoring program using industry standards for interpretation of water quality data and appropriate evidence and reasoned arguments 5.4 Seek advice from client as to satisfaction with monitoring program in terms of the process and outcomes 5.5 Provide report on outcomes to client with recommendations for changes and improvements for any further monitoring activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNRM502A Develop a water quality monitoring program.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCNRM502 Develop a water quality monitoring program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must develop a water quality monitoring program in accordance with legislative and organisational policies. The candidate must also undertake the water quality monitoring.

The candidate must provide evidence that they can:

- establish scope, objectives and constraints and water quality monitoring requirements of the project through consultation with client
- undertake research and a site analysis to select suitable monitoring sites
- develop the monitoring plan in accordance with project brief and to meet client needs
- monitor water quality in accordance with project plan
- evaluate the program using data analysis, consultation with client and assessment against program objectives
- collect, transport and treat samples in accordance with organisational guidelines and policies
- analyse data according to scientific standards and organisational policies and guidelines
- apply work health and safety practices in the context of own work
- incorporate biosecurity into monitoring program
- apply sustainability practices in monitoring program
- draw conclusions based on appropriate evidence and reasoned arguments
- produce written reports to enterprise standards

Knowledge Evidence

The candidate must demonstrate knowledge of:

- water quality principles and factors including:
- hydrological cycle
- aquatic ecology
- water quality indicators
- chemical principles
- catchment and coastal management issues contributing to surface and groundwater quality
- standard techniques to assess ecological health of aquatic sites
- mathematical sampling techniques
- analytical techniques appropriate to water quality monitoring
- data storage and management
- accepted scientific processes and standards for data collection and analysis
- statistical analysis
- hazard identification, assessment and control

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNRM503 Support the implementation of waterways strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to support implementation of catchment plans relevant to improvement of waterways using a diverse range of strategies.

This unit applies to individuals who have a role in the development and management of waterways and are responsible for implementing waterways improvement plans by working with a range of stakeholders and applying a range of strategies.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Confirm arrangements for waterways planning and management	1.1 Identify the roles and responsibilities of key stakeholders, including landholders 1.2 Review the purpose, scope and impact of relevant legislation

Element	Performance criteria
within a catchment area	1.3 Review waterways planning and management arrangements and current trends 1.4 Review government policies and plans on waterways planning and management
2. Prioritise plans for waterways improvement	2.1 Review catchment plans based on relevant legislation and policies, management targets and priorities 2.2 Collect and assess information on the specific needs of waterways 2.3 Establish priorities, targets and funding requirements through consultation 2.4 Determine funding opportunities for projects 2.5 Assess strategies and programs for relevance to achievement of priorities and targets
3. Facilitate stakeholder participation	3.1 Communicate priorities and targets to stakeholders 3.2 Communicate funding and other opportunities that support strategies for action to stakeholders 3.3 Support the development of plans or submissions that identify aims, outcomes, steps, evaluation and reporting methodology 3.4 Facilitate cooperation and partnerships between stakeholders
4. Advise and support stakeholders	4.1 Document and report findings for use in future planning 4.2 Provide support to ensure that legislative requirements are met 4.3 Notify stakeholders of variations to planned approaches 4.4 Meet stakeholder needs with timely and appropriate support 4.5 Use communication and negotiation skills to resolve conflicts
5. Evaluate the achievement of priorities and targets	5.1 Use appropriate monitoring strategies 5.2 Collect and analyse monitoring information against priorities and targets 5.3 Evaluate progress towards achievement of priorities and targets 5.4 Communicate findings to stakeholders

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNRM503A Support the implementation of waterways strategies.

Assessment Requirements for AHCNRM503 Support the implementation of waterways strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate their ability to support the implementation of waterways improvement plans using a diverse range of strategies.

The candidate must provide evidence that they can:

- apply appropriate communication techniques to collect information on needs, inform funding opportunities, develop plans and submissions, and educate and resolve conflict
- identify and apply a diverse range of strategies to achieve the priorities and related targets from catchment plans
- liaise with, and give feedback to, a range of stakeholders to solve conflicts as they arise
- evaluate the progress towards achievement of priorities and targets
- prioritise projects based on regional targets and funding provisions
- determine funding requirements and identify enterprise funding mechanisms
- support the development of plans including establishing priorities and targets, strategies and programs, communication procedures, monitoring requirements and strategies and reporting processes
- identify aims, risks, outcomes and stages on the project in the project planning
- determine evaluation and reporting methods in the planning
- develop reports for stakeholders and for future planning purposes according to organisational requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- environmental legislation

- obligations of landholders
- contemporary regional catchment strategies
- principles of community capacity building and engagement
- relevant policies across all levels of government and within the specific region, including those under catchment plans
- waterways management and improvement techniques, including:
 - fencing
 - revegetation
 - habitat restoration
 - pest plant control

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNRM504 Interpret and report on catchment hydrology

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to interpret catchment hydrology to report on water quantity and quality within a catchment.

This unit applies to a person employed in a technical capacity to collect, collate, analyse and report on hydrological data for use in floodplain management, asset protection and water allocation. This person will analyse information and exercise judgement to complete a range of skilled activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collate and evaluate catchment information	1.1 Determine data collection priorities in consultation with supervisor or team 1.2 Access and collate catchment information 1.3 Determine the requirements for accuracy and currency of

Element	Performance criteria
	information and identify additional data requirements 1.4 Identify land uses within the catchment 1.5 Determine management units within the catchment
2. Analyse hydrological processes of a catchment using available data	2.1 Analyse natural ground and surface water processes 2.2 Identify man-made ground and surface water movement 2.3 Determine and analyse man-made impacts on water quantity 2.4 Determine the need for, and identify appropriate representative sites for collection of additional data 2.5 Apply work health and safety policies and procedures, environmentally sustainable practices and biosecurity measures when analysing hydrological processes
3. Design and implement field surveys and assess findings	3.1 Determine objectives, locations and resource requirements for site assessments in consultation with supervisor or team 3.2 Assess physical entities and processes, including threats, within representative management units 3.3 Collect site data according to enterprise policies, procedures and guidelines
4. Report on catchment hydrology	4.1 Prepare a written overview on catchment hydrological behaviour 4.2 Present a visual overview of catchment hydrological behaviour to stakeholders 4.3 Provide advice and guidance on remediation measures consistent with catchment management objectives

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNRM504A Interpret and report on catchment hydrology.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCNRM504 Interpret and report on catchment hydrology

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and collate existing hydrological information
- collect and analyse hydrological data using appropriate sustainable practices
- collect and assess a wide range of hydrological data
- determine the movement of water within a catchment from existing data
- assess processes within catchment to evaluate non-sustainable practices in catchments
- report on catchment hydrological behaviour to organisational requirements
- apply work health and safety practices to the collection and testing of water
- apply an awareness of biosecurity in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of factors used for analysis of water catchment area:

- hydrological cycles
- chemical and physical properties of water
- rock and soil types including weathering processes
- fluvial geomorphology:
 - drainage basin function
 - factors influencing stream flow rates
 - interactions between ground and surface water
 - stream hierarchy and ordering
 - human impacts on surface water quality and quantity
- hydrogeology:

- aquifer types and properties
- aquifer discharge and recharge
- rates of water movement through aquifers
- human impacts on groundwater quality and quantity
- sustainable use of ground and surface water:
 - uses of water in catchments
 - water allocation
 - policies and strategies determining water use

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNRM505 Provide technical advice on sustainable catchment management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide technical advice on sustainable catchment management to land managers in a catchment area or region.

This unit applies to those in a catchment management role and are responsible for identifying and managing land degradation, as well as providing advice and information on programs and funding for the sustainable management of farms, small properties, recreational land and land used for commercial activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Respond to requests for advice on sustainable catchment	1.1 Respond to requests for advice from land managers 1.2 Seek information on location, land management or production objectives and land management concerns

Element	Performance criteria
management	1.3 Review state and regional legislation, regulations and strategies relevant to the region in relation to potential constraints 1.4 Confirm options and processes for provision of advice with land managers
2. Identify and analyse land management issues	2.1 Conduct a site assessment to collect information on geological characteristics, ecological processes and biodiversity 2.2 Apply work health and safety policies and procedures, environmentally sustainable practices and biosecurity measures when conducting site assessments 2.3 Collect information on land uses and land management techniques 2.4 Interpret site information for land managers and other relevant stakeholders in a supportive and non-threatening manner 2.5 Evaluate the types and levels of land degradation in the site assessment
3. Provide advice on sustainable land and catchment management	3.1 Provide advice that complies with State and regional legislation, regulations and strategies 3.2 Propose options for changing land management practices, taking into account economic factors, technical difficulty, practical feasibility, social and environmental acceptability 3.3 Advise land manager on outcomes of analysis, sustainable land management techniques, whole property planning and remediation measures 3.4 Provide resource materials and information on supportive programs and funding

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNRM505A Provide technical advice on sustainable catchment management.

Assessment Requirements for AHCNRM505 Provide technical advice on sustainable catchment management

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- provide technical advice on sustainable catchment management to land managers in a catchment area or region in accordance with State and regional legislation, regulations and strategies and stakeholder requirements
- review State and regional legislation, regulations and strategies relevant to the responsibilities of land managers
- analyse the issues, processes and techniques in sustainable land management and assess land management practices in relation to the long-term objectives of a catchment or region
- source and communicate advice on sustainable land management practices to a variety of land managers in a knowledgeable and non-threatening manner
- apply appropriate sustainability practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- geology:
 - rock types
 - weathering
 - soil formation and soil types
- ecological processes:
 - energy flow through ecological systems
 - matter flow through ecological systems
 - nutrient cycling
- land degradation processes and impacts:

- soil compaction
- erosion
- tree decline
- pest plant and animal infestations
- eutrophication
- acidification
- salinity
- fertility decline
- catchment management principles:
- catchment planning priorities and programs
- roles and responsibilities of land users in catchments
- biodiversity:
 - basic plant identification techniques
 - animal identification
 - ecological vegetation communities
 - whole property planning principles:
 - energy flows
 - sustainable water management
 - land capability

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNRM506 Plan and monitor works projects in catchments and waterways

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan, implement, monitor and review works projects conducted in catchments and waterways. This includes engaging and working with stakeholders and ensuring works meet environmental and project outcomes and priorities.

This unit applies to those engaged in contract project works in catchments and waterways who take personal responsibility and exercise autonomy in undertaking complex work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Inspect and assess catchment and waterways sites for	1.1 Establish the environmental outcomes and priorities of the works program 1.2 Apply work health and safety policies and procedures,

Element	Performance criteria
inclusion in a works program	environmentally sustainable practices and biosecurity measures 1.3 Confirm the physical characteristics and health of catchment and waterways with a site assessment 1.4 Assess the range of operating conditions, hazards and sensitive environments for impact on proposed projects 1.5 Assess the heritage and cultural values of sites 1.6 Consult potential project partners and investors on the scope and purpose of the works program
2. Plan works project	2.1 Consult with stakeholders to determine project priorities 2.2 Obtain permits, licenses and other authorisations 2.3 Determine and source equipment and materials and personnel required for project 2.4 Confirm terms and conditions of project work with project partners and investors 2.5 Prepare plans and specifications for works project 2.6 Complete project documentation and communicate details
3. Monitor works project	3.1 Establish monitoring program that includes selecting representative water quality and macro invertebrate monitoring sites using data collection guidelines, data collection parameters and timelines 3.2 Establish data benchmarks for evaluating the outcomes of project 3.3 Ensure the ongoing requirements of contractors and project workers are met 3.4 Provide appropriate and timely support 3.5 Monitor the condition of the project site to ensure it is left in an agreed condition 3.6 Report outcomes of monitoring to enterprise requirements
4. Review works program	4.1 Evaluate individual projects to ensure compliance with agreed outcomes 4.2 Determine whether projects are meeting the environmental targets 4.3 Recommend changes to the works program to better achieve catchment and waterways priorities 4.4 Use a relational data management system for recording monitoring data and reporting to stakeholders

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNRM506A Plan and monitor works projects in catchments and waterways.

Assessment Requirements for AHCNRM506 Plan and monitor works projects in catchments and waterways

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply effective consultation techniques to ensure stakeholder contribution to project priorities
- research and determine the environmental conditions of project worksites in relation to the wider catchment
- undertake consultation with stakeholders
- work with and support project partners during project implementation
- develop waterway monitoring program that includes selecting representative water quality and macro invertebrate monitoring sites
- monitor project to ensure it is meeting regulatory requirements
- evaluate the impact of projects on sustainable catchment management
- determine the physical and human resources necessary for project success
- determine suitable monitoring procedures that will provide sufficient information for evaluation and review of the project
- evaluate the environmental benefits of the works program using existing techniques and reporting guidelines
- complete reporting requirements to enterprise standards and to meet the needs of stakeholders, partners and investors

Knowledge Evidence

The candidate must demonstrate knowledge of physical characteristics and indicators of health of waterways and catchments, including:

- wetland and floodplain processes and function:
 - factors that influence stream flow

- stream dynamics
- stream formation
- eutrophication
- impacts of land use on waterways
- indicators of catchment health:
 - pest plant and animal infestations
 - vegetation decline
 - soil erosion
 - stream bank erosion
 - water quality decline
- water quality parameters:
 - physical and chemical properties of water
 - biological indicators of water quality

The candidate must demonstrate knowledge of:

- project planning processes
- permits and licences required for on-ground works

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNRM507 Manipulate and analyse data within geographic information systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to extract, compare and manipulate data within a Geographic Information System (GIS) in response to customer requests.

This unit applies to those who undertake data analysis within a range of geographic information systems for the purpose of managing natural resources. They are likely to undertake a range of specialised skilled activities, exercise autonomy and take responsibility for complex work.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop procedures for manipulation and	1.1 Specify desired data format based on job requirements 1.2 Specify parameters for the manipulation of data sets

Element	Performance criteria
analysis of data	1.3 Explain the procedure and rationale for development in new documented procedures
2. Establish models required to provide outcome	2.1 Evaluate applicability of existing tools, models, theories, applications and solutions 2.2 Specify feasible parameters, equations and assumptions 2.3 Establish models required to provide specified outcome
3. Analyse data	3.1 Specify steps to be undertaken and computer operating systems and applications to be used to analyse and manipulate data 3.2 Consider restricting factors when selecting techniques for analysis 3.3 Isolate and retrieve data from its source 3.4 Interrogate data to ensure reliability 3.5 Prepare data for presentation media

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNRM507A Manipulate and analyse data within geographic information systems.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCNRM507 Manipulate and analyse data within geographic information systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must demonstrate that they can extract, compare and manipulate data in response to customer requests.

The candidate must provide evidence that they can:

- develop and document suitable procedures for data collection, manipulation and analysis
- use or create appropriate models
- use operating systems and computer applications for data analysis and report writing, according to organisational requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- database structures
- scripting and commands
- line instructions and programming
- operating systems used by enterprise for data analysis and storage, including:
 - UNIX
 - DOS
 - Windows
 - NT
- range of tools, models, theories, applications and solutions
- data analysis and manipulation techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNRM508 Investigate suspected breaches of natural resource management legislation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to investigate suspected breaches of natural resource management (NRM) legislation.

This unit applies to officers who investigate suspected breaches of NRM legislation. It applies to individuals who take responsibility for their own work and who provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

All work is undertaken in accordance with organisational protocol and legal requirements.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Respond to advice of	1.1 Record details relating to change in land use

Element	Performance criteria
change in land use	1.2 Complete pre-site inspection investigations in accordance with Federal or State legislation and local regulations 1.3 Report suspected breach and seek approval to proceed with investigation
2. Carry out site investigation	2.1 Follow work health and safety policies and procedures when carrying out investigations 2.2 Give notification to stakeholders of the consequences of their actions 2.3 Interview witnesses and landholders and record proceedings 2.4 Document records of interviews and proceedings 2.5 Communicate specific issues relating to collection of evidence aligning to technical guidelines 2.6 Record specific site details relevant to the investigation
3. Collect site evidence	3.1 Check accuracy of site details in line with program guidelines 3.2 Collect site evidence 3.3 Ensure completed investigations are sufficient to support judgement
4. Compile final report	4.1 Check detail and accuracy of supporting and validating data 4.2 Establish recommendations based on investigations that conform to legal protocol and organisational guidelines 4.3 Present final report and supporting workplace documentation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCLPW506A Investigate suspected breaches of Natural Resource Management (NRM) legislation.

Assessment Requirements for AHCNRM508 Investigate suspected breaches of natural resource management legislation

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate suspected breaches of NRM legislation in accordance with legal and organisational protocols and guidelines
- carry out preliminary investigations into a reported or suspected breach of land use legislation using organisational processes and procedures and in accordance with legislative and regulatory requirements
- seek approval to proceed with a full investigation
- carry out a site investigation according to organisational guidelines
- interview witnesses and land owners following organisational protocols
- document records of interviews, proceedings and site details according to legal requirements and organisational protocols
- check accuracy of all data and information collected and ensure it is sufficient to make an informed judgement
- make recommendations based on information collected
- complete final report with supporting documentation in line with policy guidelines and legislative and regulatory standards
- apply work health and safety practices in the context of own work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- application of Federal and State legislation and regulations to natural resource management issues
- types of breaches of natural resource management legislation
- organisational policies and procedures for investigating and reporting on breaches

- techniques for consulting with stakeholders, legal and agency policies and procedures
- assessment approaches for area of notification
- formats for compiling reports and submitting evidence

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNRM601 Review land management plans and strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to review and assess the effectiveness of management plans and strategies. It includes establishing criteria and review mechanisms as well as modifying plans and strategies as required, in response to review outcomes.

This unit is carried out at a strategic level, with the capacity to devolve responsibilities and tasks if required.

This unit applies to individuals who take responsibility for their own work and who provide and communicate solutions to a range of predictable and sometimes unpredictable problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine mechanisms	1.1 Establish reasons for the review of management plans and

Element	Performance criteria
and criteria for reviewing land management plans and strategies	strategies 1.2 Examine internal policy and procedural influences impacting on land management plans and strategies 1.3 Interpret trends to identify changes occurring in land management plans and strategies beyond normal variations 1.4 Establish the need for the review of management plans and strategies by reviewing industry information 1.5 Set realistic timeframes for review process
2. Analyse existing land management plans and strategies	2.1 Assess ecological and environmental trends and threats against the objectives of the plans and strategies 2.2 Identify and assess the effectiveness, relevance and impact of existing management plans relevant to the issue 2.3 Identify and prioritise gaps in management plans and strategies 2.4 Analyse management plans in consideration of the relevant historical, social, cultural, political and economic contexts in which they were developed 2.5 Inform persons contributing to the review of relevant enterprise requirements 2.6 Undertake consultation with stakeholders to gain support for the implementation of the reviewed plans and strategies 2.7 Identify and resolve stakeholder problems or issues with the plan
3. Modify land management plans and strategies	3.1 Modify plans and strategies, ensuring they are consistent with business plan and identified needs 3.2 Evaluate feedback from employees on existing management plans and strategies 3.3 Instruct staff in changes to management strategies and monitoring and recording processes 3.4 Submit proposed changes, according the organisational requirements, for approval 3.5 Include outcomes amendments from the consultative process 3.6 Ensure modified plans and strategies comply with relevant legislation
4. Implement modified land management plans and strategies	4.1 Make modifications to operational processes to obtain additional data or to monitor changes to conservation strategies and plans 4.2 Provide education and training to employees to ensure implementation is safe, effective and environmentally sustainable and that it meets biosecurity requirements 4.3 Provide education and information to stakeholders to promote implementation 4.4 Implement modifications in a timely manner to reflect the need for changes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCBUS602A Review land management plans and strategies.

Assessment Requirements for AHCNRM601 Review land management plans and strategies

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine mechanisms and criteria for reviewing management plans and strategies
- analyse statistical trends to determine changes occurring in land management plans and strategies beyond normal variations
- analyse existing management plans and strategies
- modify management plans and strategies using clear and concise language in a standardised format
- implement modified management plans and strategies within appropriate timeframes, using approved communication and education strategies
- undertake internal and external consultation appropriate to the review process
- undertake training needs analysis for staff on implementing new management plans and strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- mechanisms and criteria for reviewing management plans and strategies
- trends and threats both natural and from human activity, to places of natural significance, including:
 - ecosystems including the interrelationship of geophysical, hydrological, biological and meteorological factors
 - normal and abnormal life cycles of the biodiversity
 - pollution sources and damage potential
- legislation under which enterprise operates

Assessment Conditions

Assessor must satisfy current standards for RTOs.

AHCNRM602 Develop a monitoring, evaluation and reporting program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a monitoring, evaluation and reporting program for an organisation to measure progress against targets and reporting responsibilities.

It includes the development of evaluation strategies to inform implementation of a natural resource management Monitoring, Evaluation, Reporting and Improvement framework (MERI Framework), used to manage human, social, natural, physical and financial assets.

This unit applies to individuals who analyse information and exercise judgement to complete a range of highly skilled activities and demonstrate broad knowledge in an area of work with depth in areas of specialisation.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Natural Resource Management (NRM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the	Performance criteria describe the performance needed to demonstrate

Element	Performance criteria
essential outcomes.	achievement of the element.
1. Define terms of reference, scope and evaluation context	1.1 Identify and clarify the outcomes sought, who will use the information and for what purpose 1.2 Identify the key stakeholders who will be consulted 1.3 Select evaluation and monitoring methods which are suitable to the size and significance of the program, and the terms of reference 1.4 Complete a review of existing evidence and literature relevant to the proposed evaluation 1.5 Develop an evaluation methodology that supports broader management targets, natural resource management standards, targets and outputs
2. Identify the key stages and outcomes of the program	2.1 Define key stages, milestones and timeframe 2.2 Communicate with clients and stakeholders the details of the program and delivery timeline for endorsement 2.3 Identify potential risks, including work health and safety risks, which may impact on the proposed program 2.4 Refine targets and objectives as required
3. Define reporting and record keeping requirements for data management	3.1 Identify data collection, management and reporting requirements to meet the objectives of the program 3.2 Identify existing data sets that may be accessed for the program 3.3 Design data collection protocols and methodology so relevant standards and required formats are met 3.4 Identify how data will be stored to ensure security and appropriate access taking into account required formats 3.5 Identify the information products required taking into account client and stakeholder needs, and use in decision making 3.6 Produce reports to suit program audience types
4. Identify the resources needed to implement the program	4.1 Identify the personnel and skill sets required to implement the monitoring and evaluation program 4.2 Assess the material resources required to undertake the work
5. Design and manage the monitoring, evaluation and reporting program plan	5.1 Document the program plan to enterprise requirements 5.2 Outline reporting requirements for the program 5.3 Incorporate work health and safety, environmental sustainability and biosecurity policies and procedures into the plan

Foundation Skills

Assessment Requirements for AHCNRM602 Develop a monitoring, evaluation and reporting program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a monitoring, evaluation and reporting program for an organisation in accordance with the MERI Framework
- scope a project
- define terms of reference and context
- identify key stages and outcomes of the project
- assess and define data management requirements according to project requirements and objectives
- identify the resources needed to undertake the program, including financial, equipment, material and human resources
- develop data collection, management and analysis methodology and procedures
- design and manage a monitoring, evaluation and reporting program
- produce reports and planning documents to organisational standards
- review existing data and information appropriate to the plan, according to organisational requirements
- incorporate work health and safety practices, policies and procedures into the program

Knowledge Evidence

The candidate must demonstrate knowledge of:

- program design considerations, including equality, technical validation and ethics
- quantitative and qualitative methods for monitoring and evaluation
- data management techniques
- sources of existing evidence and literature relevant to the program

- the MERI framework data collection protocols

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY101 Support nursery work

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide support for nursery work.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters. They identify and seek help with simple problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for nursery work	1.1 Identify required materials, tools and equipment according to lists provided and supervisor's instructions 1.2 Conduct checks on all materials, tools and equipment and tell supervisor if there are insufficient or faulty items

Element	Performance criteria
	1.3 Use correct manual handling techniques when loading and unloading materials 1.4 Use suitable personal protective equipment (PPE) selected as directed by supervisor and ensure correct fit 1.5 Tell supervisor if any risks are identified
2. Undertake nursery work as directed	2.1 Follow instructions and directions provided by supervisor and ask for clarification when necessary 2.2 Communicate with other staff and clients in a professional manner 2.3 Handle and dispose of materials 2.4 Tell supervisor of there are problems or difficulties in completing work to required standards or timelines
3. Store and stockpile materials	3.1 Store plant debris and waste material produced during nursery activities as instructed 3.2 Prepare and process plant debris and waste materials in an appropriate and safe manner as instructed 3.3 Stockpile surplus materials for removal as instructed 3.4 Maintain a clean and safe work site while completing nursery work
4. Clean up on completion of nursery work	4.1 Store plants and materials as instructed 4.2 Clean, maintain and store tools and equipment 4.3 Tell supervisor of work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for potting up operations	1.1 Clarify work activity instructions with supervisor 1.2 Identify any work health and safety hazards and tell supervisor 1.3 Select and use tools and equipment for potting up 1.4 Clean and disinfect work area 1.5 Collect materials and check that there is sufficient quantity and

Element	Performance criteria
	quality for potting up operations 1.6 Select and use suitable personal protective equipment (PPE)
2. Prepare growing media	2.1 Measure media components and mix as instructed 2.2 Test growing media to ensure the product complies with media specifications
3. Pot up propagated plants	3.1 Prepare plants for potting 3.2 Pot up selected propagated plants 3.3 Grade plants during the potting process to meet quality specifications and report any abnormalities to supervisor 3.4 Adjust media level in pots to produce a well-furnished plant 3.5 Ensure that placement and depth of plants comply with the planting method and plan 3.6 Add fertilisers and other products as directed
4. Complete potting up operation	4.1 Water plants in to eliminate air pockets and prevent dehydration 4.2 Perform cleaning procedures and follow hygiene practices 4.3 Collect waste and dispose of or recycle to minimise damage to the external environment 4.4 Maintain records of potting up operations in the appropriate format 4.5 Clean and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY201A Pot up plants.

Assessment Requirements for AHCNSY201 Pot up plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare tools, equipment, media and plants
- measure media components
- disinfect work areas
- operate potting machinery (if required)
- pot up propagated plants
- handle plants with care
- treat common problems of plants
- use and maintain tools

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of potting up plants
 - appropriate use of personal protective equipment
 - basic plant physiology
 - common problems in a controlled environment
 - enterprise plants and their characteristics
 - hygiene and quality control
 - methods of disposing of waste
 - properties of relevant potting media

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY202 Care for nursery plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain and care for containerised nursery plants.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Clarify work activity instructions with supervisor 1.2 Identify any work health and safety hazards and tell supervisor 1.3 Select and use appropriate tools and equipment 1.4 Select and use suitable personal protective equipment (PPE)

Element	Performance criteria
2. Maintain the nursery environment	2.1 Service irrigation system components for basic operational use and repair or replace basic user serviceable parts 2.2 Check irrigation system for functionality 2.3 Monitor environmental controls to ensure specified levels are maintained 2.4 Follow hygiene practices to minimise risk of contamination
3. Maintain nursery plants	3.1 Apply fertiliser and other products as directed 3.2 Remove weeds from pots as directed 3.3 Apply water in the quantity and method specified 3.4 Block and space plants as required 3.5 Prune plants as directed 3.6 Stake and tie plants as directed 3.7 Provide feedback to supervisor on work completed
4. Complete nursery plant maintenance operation	4.1 Record workplace information in the appropriate format 4.2 Collect waste and dispose of or recycle 4.3 Clean and store tools and equipment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY202A Tend nursery plants.

Assessment Requirements for AHCNSY202 Care for nursery plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select and use appropriate tools and equipment
- maintain nursery hygiene
- Service, repair or replace basic operational irrigation system components and user serviceable parts
- maintain nursery plants as instructed
- check irrigation system performance
- monitor environmental controls
- recognise common problems in nursery plants
- repair or replace user serviceable irrigation components
- record workplace information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of nursery plant care
 - botany and plant physiology as applies to maintaining nursery plants
 - common problems that may occur with containerised plants in a controlled environment and their treatment
 - daily water requirements of nursery plants
 - hygiene and quality control when tending nursery plants
 - principles and operations of irrigation systems used in nurseries, in basic terms

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCNSY203 Undertake propagation activities

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for plant propagation according to instructions
- collect propagation material as appropriate to species
- apply pre-treatments
- apply water and nutrients
- carry out a variety of propagation techniques
- collect propagation material
- maintain environmental parameters and temperature controls
- minimise damage to and maximise viability of propagated material
- maintain records of activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of propagation
 - botany and plant physiology as it applies to propagation
 - common problems that occur while performing propagation activities
 - enterprise hygiene requirements
 - enterprise requirements for handling and disposal of nursery wastes
 - maintenance requirements of tools and equipment used for propagation
 - plant nutrition
 - propagation methods required for a range of plant species
 - quality specifications/characteristics of a range of parent plants and propagation materials

- record keeping relevant to the work function

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCNSY204 Maintain indoor plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Prepare for indoor plant maintenance activities according to instructions
- inspect plant quality
- measure quantities and calculate application rates
- operate, adjust and maintain watering system
- use a light meter
- monitor and maintain health of indoor plants
- maintain indoor plant environment
- record workplace information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of indoor plant maintenance
 - acclimatisation techniques for indoor plants
 - botany and physiology of indoor plants
 - common problems that may occur with indoor plants and their treatment
 - growth requirements of indoor plants
 - identification and characteristics of common indoor plants and their culture
 - light and moisture tolerance and intolerance for common indoor plant species
 - methods of disposing of waste to minimise damage to the environment
 - operations and maintenance of a range of irrigation and subirrigation systems used for watering indoor plants and displays

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCNSY301 Maintain nursery plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for nursery plant maintenance activities
- calculate daily water needs
- implement a range of plant maintenance activities
- monitor plant health
- operate irrigation systems
- recognise stages of plant growth
- record workplace information
- repair or replace user serviceable irrigation components

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of nursery plant maintenance
 - botany and plant physiology as it applies to plant maintenance
 - characteristics of various types of potting media
 - common problems that occur with nursery plants and their treatment
 - effect of different pruning and intervention methods
 - effects of environmental parameters on plant growth
 - factors affecting the growth of nursery plants
 - methods of calculating daily water needs
 - optimum growing conditions for a range of plants in a nursery
 - principles and operations of a range of irrigation systems used in nurseries

- processes for modifying environmental parameters
- relationship between plant water needs and environmental parameters
- symptoms of unhealthy plants
- treatments required by plants at different stages and environmental parameters

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY302 Receive and dispatch nursery products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select and collect nursery products for the purpose of dispatch, delivery or pick up by client and the process of receiving and processing of products from suppliers.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Select product for an order	1.1 Select and use materials, equipment and personal protective equipment (PPE) 1.2 Select product from stock batches to match order forms or client request

Element	Performance criteria
	1.3 Assist clients onsite with selection or direct to particular product or display area 1.4 Evaluate quality of product visually to ensure that it meets standard order requirements for quality 1.5 Block up stockholding areas for presentation 1.6 Monitor the amount of remaining product and retain information to inform other clients
2. Maintain the stock inventory	2.1 Collate orders in the sales or dispatch area 2.2 Check orders for quality of product and for accuracy of quantity 2.3 Keep electronic or manual records of outgoing sales in the product inventory 2.4 Adjust the inventory of the quantity of nursery stock available for sale
3. Prepare for dispatch or delivery	3.1 Check product for correct labelling and replace incorrect labelling 3.2 Package product for delivery and presentation to the client 3.3 Pack product into containers for ease of handling 3.4 Assist delivery of product by loading and stacking product according to the configuration of the transportation vehicle 3.5 Check product quality at each stage in the delivery process 3.6 Maintain and tidy sales and dispatch areas and packing and packaging materials
4. Receive products	4.1 Check incoming product for quality and correct quantities 4.2 Transfer product to stock holding areas with appropriate manual handling techniques 4.3 Transfer incoming documentation, receipts of delivery and invoices to administration

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY302A Receive and dispatch nursery products.

Assessment Requirements for AHCNSY302 Receive and dispatch nursery products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- evaluate product quality
- interpret order forms
- maintain product records
- meet client service requirements
- monitor and carry out product dispatch and delivery processes
- select product for order requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of receiving and despatching nursery products
 - best practice guidelines for nursery hygiene
 - common sources of cross contamination from transport vehicles
 - environmental controls necessary for transporting plants
 - quality standards for the packing, packaging and labelling of products
 - quarantine policies and relevant quarantine legislation
 - stock control procedures

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY303 Install and maintain plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install and maintain plant displays. Plant displays can be permanent, semi-permanent and temporary displays of plant life under a range of gardening, exhibition, visual merchandising, marketing and commercial leasing and hiring activities.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess requirements for plantscaping	1.1 Assess access factors impacting plantscaping and record prior to installation 1.2 Assess and record environmental parameters prior to installation

Element	Performance criteria
	1.3 Note light sources in regard to both plant growth and client requirements 1.4 Take light meter readings interior installations and record 1.5 Analyse site conditions and constraints for plant suitability and record findings 1.6 Select plants to meet the requirements of the site
2. Install containerised and direct planted specimens	2.1 Identify and schedule materials, equipment and machinery required for the job 2.2 Identify and schedule personnel required for the job 2.3 Identify work health and safety hazards, assess risks and implement control measures 2.4 Select, use and maintain suitable safety equipment and personal protective equipment (PPE) 2.5 Install plants securely and in a manner that ensures they are presented well, are accessible for routine maintenance and conform to the plan or specifications 2.6 Prune damaged or unnecessary material to enhance the presentation 2.7 Water and fertilise plants as required 2.8 Leave the site in a clean and tidy state
3. Maintain plants	3.1 Identify the symptoms of under and over-watering and rectify 3.2 Identify the symptoms of low and high light intensity and rectify 3.3 Identify the symptoms of low and high fertiliser concentration and measure the pH of the growing medium where required and amend as required 3.4 Identify insects, pests and diseases associated with plants and control as required 3.5 Enhance appearance of plants 3.6 Determine the cost benefit of reviving or replacing plants

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY303A Install and maintain plant displays.

Assessment Requirements for AHCNSY303 Install and maintain plant displays

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess site conditions, requirements and constraints impacting plantscaping
- select plants that meet the requirements of the display and chosen site
- determine spatial measurements of a plantscape
- identify and schedule materials, equipment and personnel to install a plant display
- install plants securely to ensure accessibility for maintenance and ascetic requirements
- maintain plants to meet their water, light and fertiliser requirements
- detect and control pests and diseases

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of installing and maintaining plantscapes
 - acclimatisation techniques for plants
 - characteristics and attributes of a range of plants used for plantscaping
 - commonly occurring problems with plantscaping
 - light and moisture tolerance/intolerance for common plant species
 - options for remedial action
 - photosynthesis, respiration, nutrient uptake and growth rate for plants
 - plant growth requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHCNSY304 Deliver and promote sales of plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- calculate orders, sales figures, ratios, proportions and application rates
- communicate with clients, work team members and supervisors
- coordinate own activities to deliver and maintain plant orders
- estimate treatment and product requirements, material sizes and quantities
- interpret and apply delivery schedules and marketing plans
- maintain mobile and remote displays and samples
- use reporting and work procedure documents

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of delivering and promoting plants
 - botanical, common and trade names, growth habits, and presentation requirements for display of plants
 - industry labelling standards and methods
 - practical understanding of the range of plants available from the enterprise
 - standards and methods for the preparation and dispatch of promotional literature and lists for seasonal promotions
 - standards and methods of packaging, and delivery of plant orders, samples and displays

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY305 Prepare specialised plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare specialised, unusual or rare plants in a production nursery or by other organisations, groups and individuals with a wide range of species and cultivars as the specialised plants or individual cultivars under production.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to treat specialised plants	1.1 Analyse customer requirements and clarify by market research or with a supervisor 1.2 Select specialist plants requiring treatment

Element	Performance criteria
	1.3 Select treatments appropriate to the specialised plant as outlined by the production and marketing plan of the organisation, or by the individual entrepreneur 1.4 Determine the timing of the treatments according to the seasonality of the plant species and market considerations 1.5 Identify work health and safety hazards, assess risks and implement control measures
2. Implement treatments	2.1 Select, prepare and use materials, tools and equipment required for implementing treatments 2.2 Select, use and maintain appropriate personal protective equipment (PPE) 2.3 Use treatments that meet the aesthetic requirements of the plan
3. Maintain aesthetic appearance of specialised plants	3.1 Monitor the health and aesthetic appearance of the plant to ensure quality standards are met 3.2 Apply water according to plant requirements 3.3 Modify environmental parameters to ensure optimum growth of plant 3.4 Apply remedial or preventative measures to the plants to ensure they maintain their aesthetic appearance

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY305A Prepare specialised plants.

Assessment Requirements for AHCNSY305 Prepare specialised plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- estimate treatment and plant requirements, sizes and quantities and calculating ratios, proportions and application rates
- organise and co-ordinate materials and equipment
- implement plant treatments
- meet quality standards for plant health and aesthetic appearance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of specialised plant preparation
 - aftercare requirements of treated plants
 - characteristics of a range of potted plants commonly treated for special aesthetic purposes
 - different treatments which are applied to specialised plants to achieve desired aesthetic appearance
 - nursery industry best practice
 - optimum timing of treatments

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY306 Implement a propagation plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to implement a propagation plan for a range of plants using a range of different propagation methods.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for propagation activities	1.1 Interpret workplace instructions and organise tasks to achieve daily work routine within time constraints 1.2 Select and prepare appropriate tools, equipment and machinery 1.3 Identify work health and safety hazards, assess risks, implement control measures and report to the supervisor

Element	Performance criteria
	1.4 Select, use and maintain appropriate personal protective equipment (PPE) 1.5 Prepare growing environment to suit species and propagation method 1.6 Implement hygiene practices
2. Select propagation material	2.1 Identify parent plant and select according to health, vigour and desired characteristics 2.2 Select and collect propagation material according to the propagation method and species 2.3 Select appropriate conditioning and storage requirements to ensure maximum viability of propagating material
3. Prepare propagating media	3.1 Select media components for propagation mix 3.2 Test propagation media to ensure the product complies with media specifications 3.3 Determine storage requirements for the unused propagation media
4. Propagate plants	4.1 Prepare propagation material safely ensuring risks associated with airborne hazards are reduced 4.2 Perform propagation techniques appropriate for the plant species 4.3 Handle plants to minimise damage 4.4 Provide aftercare to suit the media conditions, plant requirements and propagation techniques employed
5. Complete propagation operations	5.1 Clean work site using appropriate hygiene requirements 5.2 Collect waste and dispose of or recycle to minimise damage to the environment 5.3 Complete and maintain records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY306A Implement a propagation plan.

Assessment Requirements for AHCNSY306 Implement a propagation plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare the growing environment to suit species and propagation method
- recognise and rectify problems and anomalies with parent plants, propagation material, propagation media, equipment and materials
- select appropriate propagation material
- handle potting mixes and propagation materials in a safe manner
- apply propagation techniques as appropriate to plants being propagated
- Provide aftercare to suit media conditions, plant requirements and propagation techniques

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices for implementing a propagation plan
 - aftercare requirements for a range of propagated plants
 - problems that may occur performing propagation activities and preventative action
 - enterprise hygiene standards required for propagation activities
 - preferred types of propagation media for different species
 - propagation techniques required for a range of plants
 - quality specifications for parent plants and propagation materials
 - testing methods applied to propagation media

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY307 Operate fertigation equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate fertigation equipment to deliver fertilisers via an irrigation system.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials and equipment for operation	1.1 Interpret workplace instructions and organise tasks to achieve daily work routine within time constraints 1.2 Select and prepare appropriate tools, equipment and machinery 1.3 Identify work health and safety hazards, assess risks, implement

Element	Performance criteria
	control measures and report to the supervisor 1.4 Select, use and maintain appropriate personal protective equipment (PPE) 1.5 Calibrate and connect injection or fertigation equipment 1.6 Calculate fertiliser concentration and mix the solution thoroughly 1.7 Set equipment to meet fertigation requirements
2. Operate the fertigation process	2.1 Implement start-up sequence 2.2 Operate and monitor fertigation process to ensure delivery is maintained 2.3 Monitor fertigation equipment to ensure no adverse environmental impact is caused by faulty operation 2.4 Implement corrections to the process and equipment adjustments as necessary
3. Shut down fertigation equipment	3.1 Flush injection equipment prior to shut down 3.2 Clean and store equipment 3.3 Manage waste generated by both the fertigation process and cleaning procedures 3.4 Report and record fertigation activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY307A Operate fertigation equipment.

Assessment Requirements for AHCNSY307 Operate fertigation equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select and prepare fertigation materials
- connect and calibrate fertigation equipment
- monitor and adjust the delivery of fertilisers
- shut down, clean equipment and dispose of waste

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of fertigation operation
 - fertigation injection equipment
 - chemical handling procedures for fertiliser, chlorine, acid and cleaning agents
 - cleaning procedures for fertigation equipment
 - Material Data Sheets (MDSs)
 - environmental impacts of delivering fertilisers via the irrigation system

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCNSY401 Plan a growing-on program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan a growing-on program and monitor the implementation of the program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Nursery (NSY)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify issues affecting the growing-on program	1.1 Determine production requirements in consultation with management 1.2 Identify factors that could limit the production of nursery plants

Element	Performance criteria
	1.3 Identify work health and safety hazards, assess risks and implement control measures 1.4 Consider the environmental implications of a growing-on program 1.5 Incorporate sustainable practices into the growing-on plan
2. Develop the growing-on plan	2.1 Identify activities involved in the growing-on program 2.2 Identify labour, materials, tools and equipment needs 2.3 Select environmental parameters and alter to meet plant needs and production plans 2.4 Determine growing media requirements, taking into account the needs of the plant and production plans 2.5 Determine planting dimensions and layout after consulting production plans 2.6 Identify treatments required for the growing-on program 2.7 Identify hygiene requirements for the growing-on program
3. Document the growing-on plan	3.1 Document the growing-on plan, including all information identified in the development stage 3.2 Document a budget supporting the plan and request approval by management 3.3 Organise a schedule of activities 3.4 Communicate the growing-on plan and schedule of activities to staff
4. Oversee and monitor the growing-on program	4.1 Monitor the health of the plants to ensure they are at optimum growth 4.2 Modify treatments as required to maintain optimum growth 4.3 Confirm plants are ready for dispatch meet customer specifications

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCNSY401A Plan a growing-on program.

Assessment Requirements for AHCNSY401 Plan a growing-on program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and assess factors that could impact the growing-on program
- Identify labour, materials and activities involved in the growing-on program
- conduct research about production requirements, growth conditions and marketing implications of a growing-on program
- negotiate, budget and document plans
- communicate plans and schedules to staff
- oversee and monitor the growing-on program

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the principles and practices of planning a growing on program
 - application techniques for chemical and non-chemical intervention or treatments
 - chemical, cultural and biological pest, weed and disease control techniques
 - common problems of growing-on and preventative actions that may apply
 - enterprise hygiene standards required for growing-on activities
 - enterprise quality standards of nursery plant production
 - optimal growing requirements of nursery plants
 - preferred types of propagation media for different species
 - processes and techniques for preparing, costing and documenting plans for and scheduling growing-on activities
 - testing methods applied to propagation media

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCORG101 Support organic production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to support livestock and plant based organic production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who work under close supervision. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for organic production	1.1 Identify required materials, tools and equipment according to supervisor instructions

Element	Performance criteria
work	1.2 Conduct checks for serviceability on all materials, tools and equipment and report insufficient or faulty items 1.3 Demonstrate correct manual handling techniques when loading and unloading materials and minimise damage to self, load and vehicle 1.4 Select, check and fit suitable personal protective clothing and equipment before work 1.5 Identify and report work health and safety hazards
2. Undertake organic production work as directed	2.1 Follow instructions and directions and seek clarification when necessary 2.2 Undertake work in an environmentally appropriate manner and according to workplace information and principles of organic agriculture 2.3 Follow site quarantine, biosecurity protocols and farm and personal hygiene requirements as required by enterprise guidelines 2.4 Meet enterprise's food safety requirements where appropriate 2.5 Interact with other staff and customers in a positive and professional manner 2.6 Follow enterprise policies and procedures for workplace practices and handling and disposal of materials 2.7 Report problems or difficulties in completing work to required standards or timelines 2.8 Maintain a clean and safe work site while working
3. Handle materials and equipment	3.1 Store waste material produced during work in a designated area according to supervisor instructions 3.2 Handle and transport materials, tools and equipment according to supervisor instructions and enterprise guidelines
4. Clean up on completion of work	4.1 Return materials to store or dispose of 4.2 Clean, maintain and store tools and equipment 4.3 Report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG101A Support organic production.

Assessment Requirements for AHCORG101 Support organic production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply principles of organic agriculture to daily work routines
- follow supervisor instructions
- follow work health and safety procedures and where appropriate, food safety procedures
- report any variations from required standards or procedures to supervisor
- apply enterprise quarantine and biosecurity protocols

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of organic production
- organic procedures and recording requirements
- safe work practices relevant to the tasks being undertaken, including safe use of tools and equipment
- food safety requirements for enterprise's activities where appropriate
- work health and safety, biosecurity and environmental protection legislation and enterprise procedures

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG401 Manage biodynamic production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a farming system according to the principles of, and using the practices of, biodynamic agriculture.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to farmers who manage according to the principles of biodynamic agriculture. Work is likely to be done independently and according to the requirements of the National Standard for Organic and Biodynamic Produce.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare a plan for a biodynamic farming enterprise	1.1 Work in an environmentally appropriate manner and according to work health and safety requirements and enterprise guidelines 1.2 Identify requirements for biodynamic certification 1.3 Incorporate personal, ecological and financial goals for a biodynamic enterprise into an enterprise plan 1.4 Develop marketing plan for biodynamic produce which maintains product quality and integrity 1.5 Trial research findings for biodynamic agriculture and incorporate into plans 1.6 Develop and implement biodynamic production plan based on biodynamic principles and farm strategies
2. Make and apply biodynamic field spray preparations	2.1 Make and store horn manure (500), horn silica (501) and horn clay preparations 2.2 Stir preparations by creating vortex and chaos 2.3 Select equipment for application of biodynamic preparations 2.4 Calibrate and adjust equipment for suitable application rate 2.5 Apply preparations according to biodynamic principles
3. Use biodynamic compost preparations, composts and liquid brews	3.1 Use and store biodynamic compost preparations according to biodynamic principles 3.2 Identify materials and mineral inputs for compost from farm production plan and soil analysis 3.3 Build compost heap 3.4 Apply biodynamic preparations to compost according to biodynamic principles 3.5 Monitor aeration, moisture and temperature of compost heap 3.6 Apply compost to enhance natural cycles
4. Apply biodynamic principles and techniques to enhance soil and plant health	4.1 Plan planting, harvest and pruning times according to moon rhythms and planetary patterns 4.2 Optimise soil and plant health using biodynamic preparations, cover crops, crop rotation, mulching and composting and through application of farm-based fertility products 4.3 Identify weeds and insect pests in enterprise 4.4 Evaluate options for managing weeds and insects that consider natural predators, life cycles, cultural practices, soil health and the plant community

Element	Performance criteria
	4.5 Develop and implement plan for managing pests and weeds
5. Manage animals within a biodynamic production system	5.1 Optimise soil and plant health to provide a nutrient-dense and balanced diet 5.2 Develop and incorporate grazing and feeding strategies into the biodynamic system 5.3 Incorporate homeopathic remedies and allowable treatments into animal health strategies 5.4 Implement enterprise animal welfare policies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG401A Manage biodynamic production.

Assessment Requirements for AHCORG401 Manage biodynamic production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply biodynamic principles
- develop and implement biodynamic production plan
- make and apply biodynamic preparations and compost
- enhance soil and plant health
- integrate and manage animals in a biodynamic enterprise
- apply enterprise work health and safety policies and guidelines
- implement enterprise animal welfare policies
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- animal health
- biodynamic preparations and their role in soil food web and atmosphere
- biodiversity, shelter belts, birds and native bush on biodynamic farm
- calcium-clay-silica polarities
- crop and animal rotation systems
- cultivation methods
- etheric and astral forces and how they relate to biodynamics
- experiments and testing methods such as chromatography and sensitive crystallisation
- green manuring
- management of insects and birds

- paradigms of various farming systems: biodynamics, organics and permaculture, and holistic management
- peppering for animals and insects
- planting calendar
- purpose of various herbs and organs used for making biodynamic preparations
- relationship between soil, plant, animal and human health
- research in biodynamics principles and practices
- rhythms and cycles of planets and moon
- role of the biodynamic preparations 500-508
- role of bacteria and fungi
- role of humus
- soil: food web information, how it is made, its structure and feeding cycle
- water retention
- weed management
- principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG402 Manage organic livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to integrate livestock production into an organic production system.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to farmers who work according to the principles of organic and ecological agriculture.

Work is likely to be done independently and according to the requirements of the National Standard for Organic and Biodynamic Produce and agro-ecological principles. This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Manage animal health and welfare	<p>1.1 Consider natural behaviours of animals and requirements of animal welfare codes of practice in planning for organic livestock production</p> <p>1.2 Select and use varieties/genetics for the enterprise that match environmental conditions and optimise animal health</p> <p>1.3 Monitor livestock constantly for health and welfare and keep records</p> <p>1.4 Develop animal health preventative strategies, communicate to others working on farm and implement</p> <p>1.5 Identify and use animal health inputs suitable for organic systems where required</p> <p>1.6 Follow restrictions and prohibited/restricted inputs for certified organic systems and quarantine if applicable</p> <p>1.7 Conduct animal husbandry and transport in compliance with animal welfare principles and organic certification requirements</p> <p>1.8 Maintain livestock records required for organic certification</p>
2. Develop and implement supplementary feed requirements	<p>2.1 Identify feed gaps and requirements for supplementary feed taking into account seasonal conditions and drought</p> <p>2.2 Incorporate on-farm supplementary feed strategies including fodder crops, agroforestry or standing hay paddocks into the annual program for animal feed and on-farm sustainability</p> <p>2.3 Implement good storage practises for feed inputs to ensure quality is maintained</p> <p>2.4 Purchase and use nutritional inputs in the feed program that meet relevant Organic Standards and/or agro-ecological principles where applicable</p>
3. Develop and implement a sustainable grazing strategy	<p>3.1 Determine feed requirements, sustainable carrying capacity and a sustainable stocking rate for the enterprise that takes into account seasonal variability and livestock needs</p> <p>3.2 Determine indicators and benchmarks for sustainable pasture, land and soil use for the property</p> <p>3.3 Identify grazing infrastructure required for a planned grazing strategy and incorporate into a property improvement program</p> <p>3.4 Develop and implement a planned grazing system that ensures optimal livestock health and productivity at all times</p> <p>3.5 Develop and implement a planned grazing system that matches</p>

Element	Performance criteria
	<p>stocking rate to carrying capacity and ensure sustainable pasture, land and soil condition at all times</p> <p>3.6 Optimise soil and plant health to provide a nutrient-dense and balanced diet for livestock</p> <p>3.7 Monitor the grazing system to ensure productivity and sustainability on an on-going basis</p> <p>3.8 Implement strategies for controlling weeds in pastures based on Organic Standards and/or agro-ecological principles where applicable</p> <p>3.9 Keep grazing and feed records for enterprise management and to ensure compliance to Organic Standards where applicable</p>
4. Manage farm fertility for the livestock enterprise	<p>4.1 Estimate level of nutrients exported from farm</p> <p>4.2 Implement a fertility monitoring program such as soil-testing, plant testing or observation of pasture species to monitor pasture and soil fertility</p> <p>4.3 Maintain soil nutrient levels and balance through recycling, optimising nutrient availability in soil and/or sourcing fertility inputs that meet Organic Standards and/or agro-ecological principles where applicable</p> <p>4.4 Eliminate the risk of weed and chemical contamination to the farm by following Organic Standards and/or agro-ecological principles</p> <p>4.5 Keep fertility input records for enterprise management and to ensure compliance to Organic Standards where applicable</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG402A Manage organic livestock production

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCORG402 Manage organic livestock production

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor and maintain animals in an organic production system
- provide a suitable diet and living environment for animals based on the National Organic Standards for Organic Livestock Production and/or agro-ecological principles
- integrate animals into an organic production system
- manage animal health and welfare using Organic Standards and/or agro-ecological principles
- manage grazing of animals and allowable inputs to enhance soil health and fertility
- apply enterprise work health and safety policies and guidelines
- implement enterprise animal welfare policies
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- relevant organic certification requirements
- organic agriculture and agro-ecological principles
- animal health, pests, parasites and diseases
- relevant animal welfare code of practice
- grazing management, including pasture identification and assessment, feed budgeting and planned grazing strategies
- carrying capacity and sustainable pasture utilisation
- pasture, land and soil condition and indicators
- management options for animal health based on an understanding of pest life cycles, genetic selection and acquired immunity

- permitted, restricted and prohibited inputs and activities as described in the National Organic Standards for Organic Livestock Production relationship between soil, plant and animal health
- work health and safety and animal welfare legislation and codes of practice.
- record keeping
- principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG403 Manage organic soil improvement

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage organic soil improvement.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to managers on farms that are managed according to the principles of organic agriculture. Work is likely to be done independently and according to the requirements of the National Standard for Organic and Biodynamic Produce.

All work is done in an environmentally appropriate manner and according to workplace information, principles of organic agriculture and/or agro-ecology, work health and safety requirements and enterprise guidelines.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor indicators of soil fertility	1.1 Undertake work in an environmentally appropriate manner and according to the principles of organic agriculture, work health and safety requirements and enterprise guidelines 1.2 Sample and test soil at reference sites according to organic industry standards to develop baseline data to monitor soil health and fertility 1.3 Assess and record soil pH, mineral balances, and organic matter levels 1.4 Assess and record soil texture, structure, salinity and sodicity 1.5 Assess and record soil biological activity 1.6 Assess soil condition for drainage, compaction, aeration and water infiltration in relation to requirements for desired plant growth for selected species 1.7 Analyse results to identify trends in soil health and fertility and areas for improvement
2. Assess soil-related factors for selected plants	2.1 Identify nutritional requirements of selected plant species 2.2 Select soil analyses to be conducted using a suitable lab facility 2.3 Conduct plant tissue sample collection according to requirements of testing facility if applicable 2.4 Combine results of soil or tissue testing with observations of plant vigour and productivity to determine management and input requirements of the farming system
3. Select, design and implement allowable systems, techniques and inputs to optimise soil fertility	3.1 Identify range of allowable inputs according to requirements of the National Standard for Organic and Biodynamic Produce 3.2 Identify and implement cultural practices to enhance soil fertility, function and health 3.3 Calculate appropriate inputs based on soil/plant analyses, crop removal and plant/animal observations 3.4 Select and manage cover crop and pasture systems where applicable 3.5 Develop, apply and monitor mulching and composting systems where required 3.6 Design and implement crop rotations and grazing management systems to optimise soil fertility where appropriate

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG403A Manage organic soil improvement.

Assessment Requirements for AHCORG403 Manage organic soil improvement

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement principles of organic agriculture and agroecology
- implement knowledge of interrelationships between soil fertility, animals, plants, pests and diseases
- devise and implement a soil improvement plan to correct imbalances and maintain soil fertility
- sample soils and analyse soil test results for a range of indicators of soil fertility
- work with natural processes and allowable inputs to improve and maintain soil fertility
- apply enterprise work health and safety policies and guidelines
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- availability, use and definition of organic fertilisers
- structural properties of soils
- factors contributing to soil acidity, sodicity and salinity
- factors promoting soil and plant water-holding capacity
- importance of soil biological activity
- major nutrient elements and their role in plant growth
- methods and inputs that can be used to correct imbalances and maintain soil fertility
- principles of organic agriculture
- processes and practices that impact on soil structure, biological activity, water-holding capacity and weed patterns

- processes of aggregate and colloid formation
- range of soil analyses available and principles of each
- relationship between soil structure, water holding capacity and nutrient availability
- role of organic matter, humus and micro-organisms
- role of livestock in enhancing soil fertility
- role of macro and micro-elements in soil and plants
- role of weeds
- significance of levels and balance of soil fertility indicators
- soil food chains and food webs
- soil textural types and determinants
- when and how to take soil samples to test for indicators of soil fertility
- principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG404 Arrange selling through community based marketing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to arrange selling through community based marketing.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and evaluate selling options	1.1 Identify the various types of community based selling schemes 1.2 Identify characteristics of the farm business produce 1.3 Identify and document the potential customer base 1.4 Evaluate and document selling options

Element	Performance criteria
2. Comply with the requirements of the selected community marketing scheme	2.1 Identify and comply with market requirements 2.2 Comply with legislative requirements in each step of the supply chain 2.3 Keep records to verify compliance with the community marketing scheme, food safety and organic certification where applicable
3. Develop and maintain a relationship with customers	3.1 Investigate characteristics of the community customers 3.2 Identify potential links between the community and the farm system 3.3 Develop the connections between individuals and the farm production system 3.4 Develop a 'farm story' and communicate the uniqueness of the enterprise to the community using appropriate communication channels 3.5 Monitor community satisfaction levels through customer feedback and address valid concerns
4. Organise transport	4.1 Identify transport requirements and engage carriers as required 4.2 Arrange transport timing and delivery of product with carrier, processing and or selling facility and, where appropriate, agent 4.3 Comply with any special requirements to ensure appropriate transport 4.4 Comply with all relevant legislative requirements including food safety and organic certification
5. Keep records	5.1 Complete pre and post sale documentation 5.2 Record transactions to ensure traceability and reconciliation can be effected and business performance criteria can be assessed 5.3 Document customer feedback and identify and record potential improvements

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG404A Arrange selling through community based marketing.

Assessment Requirements for AHCORG404 Arrange selling through community based marketing

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify farm produce selling options
- identify and comply with requirements of a community marketing scheme and its characteristics
- establish relationships with community stakeholders and customers
- monitor and record community satisfaction levels and customer feedback and address concerns
- communicate the 'farm story' and the uniqueness of the enterprise to the community
- arrange timely transport and delivery of produce and address any special transport requirements
- comply with transport legislative requirements
- accurately record pre and post sale documentation and transactions
- identify and record potential improvements
- work with natural processes and allowable inputs to improve and maintain soil fertility
- apply enterprise work health and safety policies and guidelines
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable federal, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes in selling produce through community based markets
- relevant legislation and regulations relating to work health and safety
- organic certification systems and standards

- organisation policies and procedures related to supply chain management, purchasing, and contracting and tendering
- characteristics and composition of farm business marketing plans
- characteristics of community marketing schemes and the steps within a farm produce supply chain
- product knowledge related to goods and services required by the organisation
- ways to build trust and collaboration as opposed to competition
- business terms and conditions for purchasing, tendering and contracting
- ethical behaviour
- established communication channels and protocols
- procedures for operating electronic communications equipment
- procedures for recording and reporting workplace information and completing relevant documentation

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG405 Implement sustainable practices in the organic farm based business

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage the establishment and implementation of sustainable work practices in organic farming enterprises of all sizes and in a variety of work settings.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to production managers and workplace supervisors in an organic farming enterprise that are responsible for identifying selling options, developing a relationship with community groups, complying with community based marketing scheme requirements, organising appropriate transport and keeping sale records.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Access the farm businesses guidelines and principles for social, financial and environmental sustainability	1.1 Identify environmental regulations, organic farming requirements and the organic farm plan which apply to the farming enterprise 1.2 Source and interpret environmental and sustainable organic farming information and current best practice guidelines and underlying organic principles 1.3 Identify the impact of best practice guidelines and using organic principles on day to day farm operations and management 1.4 Identify key sustainability practices for an organic farming enterprise 1.5 Access business guidelines and farm practices which comply with sustainable organic farming guidelines and principles
2. Implement established farm business guidelines and principles	2.1 Implement strategies to effectively integrate sustainability principles and practices into the organic farm system 2.2 Identify continuous improvement opportunities and document identified changes to businesses guidelines and principles 2.3 Implement agreed improvements to the farm businesses guidelines and principles
3. Monitor farm business sustainability initiatives for effectiveness and compliance	3.1 Monitor and evaluate the effectiveness and compliance of organic and sustainability practices in terms of environmental, social and financial goals 3.2 Evaluate and report changing trends and techniques relevant to sustainable organic farming for continuous improvement
4. Engage farm business stakeholders in sustainability practices	4.1 Communicate sustainability strategies to stakeholders and relevant staff 4.2 Monitor stakeholder compliance with organic sustainability strategies along the entire supply chain 4.3 Identify and document identified continuous improvement initiatives 4.4 Encourage and assist stakeholders to implement improvements to the system
5. Determine Social Capital benefits from Community engagement with the farm enterprise	5.1 Identify food security and food sovereignty issues addressed by farm business practices 5.2 Monitor compliance with regulatory and legislative requirements in relation to labour management where applicable 5.3 Determine level of engagement with community engagement with local networks and community groups, regional food networks and regional bodies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG405A Implement sustainable practices in the organic farm based business.

Assessment Requirements for AHCORG405 Implement sustainable practices in the organic farm based business

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify businesses guidelines and principles for social, financial and environmental sustainability
- identify and interpret environmental regulations, sustainable organic farming requirements, farm plan and current best practice guidelines and principles
- implement strategies to integrate sustainability principles and practices into the farm system and identify continuous improvement opportunities
- monitor farm business sustainability initiatives for effectiveness and compliance
- adopt and document continuous improvement initiatives
- encourage staff and farm business stakeholders to embrace sustainability practices
- apply enterprise work health and safety policies and guidelines
- implement enterprise environmental sustainability practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- best practice guidelines
- principles and processes relevant to sustainable organic farming
- compliance requirements for all relevant environmental/sustainability legislation, regulations and codes of practice including resource hazards/risks associated with work area, job specifications and procedures
- sustainability issues including environmental and social issues that relate to an organic farm
- external benchmarks used within an organic farming enterprise, including approaches to improving techniques used and expected outcomes

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG406 Oversee compliance with an organic certification scheme

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to oversee continued compliance with an organic certification scheme.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to production managers and workplace supervisors in an organic farming enterprise that are responsible for ensuring compliance within the scope of the selected organic certification scheme.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify compliance requirements of the selected organic standard relating to the farm system	1.1 Access the selected organic certification scheme relevant to the operation and management of the organic farming enterprise 1.2 Identify and interpret key clauses and requirements of the organic standard that relate to the existing farm system enterprise mix 1.3 Identify and document compliance of the farm system with the requirements of the selected organic certification scheme 1.4 Identify and document key farm operations that are impacted by the organic standards
2. Keep records to comply with organic certification requirements	2.1 Identify the records and detail required for compliance with the organic certification scheme 2.2 Complete and maintain clear and accurate records to an approved industry standard 2.3 Communicate recording requirements to appropriate stakeholders and key personnel 2.4 Monitor the record keeping process and maintain records as required by the National Organic Standard
3. Support compliance with organic standards by staff in the farm business	3.1 Identify all steps within the production system that require compliance with the selected organic standards 3.2 Support and train staff and key personnel to implement and foster a compliant organic supply chain culture 3.3 Keep accurate records at all key supply chain steps to verify and maintain compliance, and to allow reconciliation and traceability 3.4 Describe certification compliance requirements of staff in Job Descriptions and Key Performance Indicators
4. Meet annual audit requirements of the selected organic certification scheme	4.1 Comply with the specific certification requirements 4.2 Prepare the farm and organic records and documents for audit and ensure accessibility 4.3 Conduct an internal organic audit of the farm system and complete associated records and documents 4.4 Take corrective actions to comply with the specific certification requirements 4.5 Participate in an annual organic audit 4.6 Comply with and close any corrective actions requested
5. Comply with food safety requirements	5.1 Identify food safety requirements that must be satisfied by the farm system to comply with industry regulations and standards 5.2 Communicate food safety requirements to all staff

Element	Performance criteria
	5.3 Keep records to demonstrate compliance with food safety requirements to industry regulations and standards 5.4 Correct any non-conformance issues identified by internal audit or industry compliance audit

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG406A Oversee compliance with an organic certification scheme.

Links

Assessment Requirements for AHCORG406 Oversee compliance with an organic certification scheme

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and document compliance requirements of the selected organic standard relating to the farm system
- identify and document key farm operations impacted by the organic standards
- support and train key personnel and staff to implement and foster a compliant organic supply chain culture
- keep accurate records at all key supply chain steps to verify and maintain organic compliance
- conduct an internal organic audit of the farm system and accurately complete associated records and documents
- participate in an annual organic audit and successfully close any identified corrective actions
- identify food safety requirements and ensure compliance of the farm system with industry standards
- ensure all farm records, traceability and production data is kept, monitored and maintained in compliance with National Organic Standard requirements
- comply with requirements of relevant organic standards

Knowledge Evidence

The candidate must demonstrate knowledge of:

- organic standards, compliance requirements and industry specifications
- applicable food safety and licensing requirements
- farm supply chain market requirements for product
- organic quality specifications for product

- enterprise and industry quality assurance systems
- strategies for control of hazards to organic compliance
- document control protocols

Assessment Conditions

Assessment may take place in a simulated or real workplace, however all evidence collected must meet minimum requirements including industry standard timeframes for performance of tasks.

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG407 Manage a landless organic production system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage a landless production system such as urban beekeeping, rooftop gardens, log-based mushrooms, aquaponics, worm farming or small scale fish farming.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to managers who work according to the principles of organic and ecological agriculture. Work is likely to be done independently and according to the requirements of the National Standard for Organic and Biodynamic Produce or agro-ecological principles.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Manage health and welfare in the enterprise	<p>1.1. Consider the requirements for the enterprise being managed to ensure optimal health and welfare and implement an optimal growing environment based on Organic Standards or agro-ecological principles</p> <p>1.2 Select and use varieties and genetics for the enterprise to optimise health and that match environmental conditions</p> <p>1.3 Implement a nutrition program for optimal enterprise health</p> <p>1.4 Monitor the enterprise constantly for health and welfare and keep records</p> <p>1.5 Develop preventative health strategies for the enterprise, communicate to others working in the enterprise and implement</p> <p>1.6 Use pest and disease inputs that meet relevant Organic Standards or agro-ecological principles where required</p> <p>1.7 Document use of any inputs for pest and disease management. Follow restrictions if applicable on prohibited or restricted inputs for organic systems</p> <p>1.8 Ensure transport and handling of organisms or produce is in compliance with organic certification requirements and animal welfare where applicable</p> <p>1.9 Maintain enterprise records required for organic certification where required</p>
2. Develop and implement enterprise nutrition requirements	<p>2.1 Determine nutrition requirements for the enterprise that takes into account seasonal variability and biological needs</p> <p>2.2 Implement a nutritional strategy that ensures optimal enterprise health at all times</p> <p>2.3 Use nutritional inputs in the nutrition program that meets relevant Organic Standards or agro-ecological principles</p> <p>2.4 Implement good storage practises for inputs to ensure quality is maintained</p> <p>2.5 Where applicable, integrate resources and nutrients from local and complementary biomass sources as part of the nutritional strategy</p> <p>2.6 Keep feed records for enterprise management and to ensure compliance to Organic Standards where applicable</p>
3. Develop and manage a suitable growing environment for the	3.1 Undertake planning to ensure a suitable growing environment for the enterprise that takes into account all biological needs for the organisms

Element	Performance criteria
enterprise	3.2 Implement and manage enterprise infrastructure to ensure optimal growing conditions and enterprise welfare at all times 3.3 Minimise waste and outputs from the enterprise by reusing and recycling by-products where possible 3.4 Monitor the growing environment and infrastructure and improve where applicable 3.5 Keep records on activities where applicable
4. Implement a suitable restocking or breeding program for the enterprise	4.1 Identify suitable source of organisms or genetics for the enterprise 4.2 Ensure requirements for replacement stock for the enterprise are being met 4.3 Select and use varieties and genetics for the enterprise that match business objectives 4.4 Ensure the breeding or restocking strategy is meeting all animal welfare needs at all times where applicable 4.5 Ensure transport and handling of any source stock is in compliance with organic certification requirements and animal welfare where applicable 4.6 Implement enterprise animal welfare policies

Assessment Requirements for AHCORG407 Manage a landless organic production system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement and manage a landless organic production system
- provide suitable nutrition and living environment for a landless based biological enterprise based on the relevant Organic Standards or agro-ecological principles
- manage health and welfare for a landless enterprise based on organic or agro-ecological principles
- manage breeding or restocking for a landless enterprise based on organic or agro-ecological principles
- maintain recording systems for production system
- implement biosecurity requirements
- implement organic or agro-ecological principles
- implement enterprise animal welfare policies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- organic certification requirements
- organic and agro-ecological principles
- enterprise relevant pests and diseases
- relevant animal welfare legislation and code of practices
- nutrition management, including feed types and assessment, feed budgeting and feeding strategies
- management options for preventative health based on an understanding of nutrition, life cycles, genetic selection, environmental conditions and acquired immunity

- management options for feeding and breeding based on organic and agro-ecological principles
- environmental conditions and infrastructure requirements for optimal enterprise performance and welfare
- work health and safety practices
- record keeping requirements
- relevant principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs

AHCORG408 Manage on farm composting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage on farm composting.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to farm managers who work according to the principles of sustainable, organic and ecological agriculture. Work is likely to be done independently and according to the requirements of State regulations, Australian Standards, the National Standard for Organic and Biodynamic Produce or agro-ecological principles

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise for composting	1.1 Confirm composting technology, recipe and method to be used are as appropriate to raw material types and farm enterprise needs 1.2 Define compost quality requirements for end product 1.3 Identify composting site requirements and prepare the composting area 1.4 Identify and implement measures are to manage drainage, dust, noise and odours 1.5 Select and check for serviceability and safe operation machinery, equipment and materials appropriate to the job 1.6 Identify and assess potential work health and safety hazards and take action to minimise risk to self and others 1.7 Select, fit, use, suitable personal protective equipment (PPE) 1.8 Maintain and store according to work requirements, manufacturer specifications and enterprise procedures 1.9 Comply with enterprise work health and safety guidelines
2. Prepare raw materials and compost on farm	2.1 Identify and collected raw materials and additives for composting, check to ensure compliance with enterprise procedures or organic standards if applicable; including assessment of physical or chemical contamination 2.2 Pre-process raw materials into suitable forms for composting if required 2.3 Mix raw materials are into suitable compost mixtures for composting according to documented recipes 2.4 Handle feedstock mixtures for composting according to technology, appropriate method, and industry best practice and enterprise procedures 2.5 Assign batch numbers or codes, and create batch documentation to enable tracking of batch through compost production cycle if required
3. Manage and monitor the composting process	3.1 Manage compost batches as required through the composting cycle 3.2 Monitor composting batch by observation or by use of field testing equipment to maintain effective composting process through the compost cycle 3.3 Maintain records for process control indicators through the compost production cycle 3.4 Identify problems observed at any stage of the composting

Element	Performance criteria
	<p>process are and take remedial action to maintain effective and consistent compost production</p> <p>3.5 Follow site quarantine, biosecurity protocols and farm and personal hygiene requirements are as required by enterprise guidelines</p>
<p>4. Inspect compost quality and maintain site</p>	<p>4.1 Inspect and assess finished compost is to determine if quality indicators have been met</p> <p>4.2 Maintain and clean loading-shifting machinery and other processing equipment as required to avoid contamination between batches</p> <p>4.3 Store raw materials and finished compost products in designated areas and kept processing site clean</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCORG408 Manage on farm composting

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- implement and manage an on farm compost system
- manage composting processes
- manage a composting site
- evaluate compost quality and implement remedial actions if required
- implement enterprise work health and safety policies
- follow site quarantine and biosecurity protocols

Knowledge Evidence

The candidate must demonstrate knowledge of:

- compost quality standards
- basic principles of composting
- different methods of composting
- characteristics of a range of raw materials
- fundamental characteristics of compost quality
- steps in pre-processing compost materials
- batch documentation techniques
- site and equipment requirements for on farm composting
- key process control stages critical to consistent compost production
- overview of systems and technologies used in compost production, particularly as relevant to farm
- characteristics and categories of a range of compost products.
- relevant environmental, work health and safety legislation and regulations

- record keeping requirements
- site quarantine and biosecurity protocols
- agro-ecological principles
- principles, practices and inputs allowable under the National Standard for Organic and Biodynamic Produce if applicable

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop an organic management plan (OMP).

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to those producers who develop an OMP to convert an agricultural or horticultural farm to an organic, biological and ecological system. It requires the capability to set objectives to meet organic certification requirements of the National Standard for Organic and Biodynamic Produce.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Locate and access assistance in developing the OMP	1.1 Locate and access sources of support and advice including agricultural extension officers and training programs 1.2 Assess industry publications and internet sources for their value in informing decision making 1.3 Seek and consider contributions of work colleagues and others during planning process 1.4 Access information from certifier and relevant Organic Standards on OMP requirements
2. Design the organic farming system to be described in the OMP	2.1 Develop or obtain map of property to be covered by OMP 2.2 Determine time scale to be addressed in plan 2.3 Collect information on soil fertility and management, and weed, pest, disease and animal health status and their interrelationships to serve as benchmarks for development of management options 2.4 Obtain regional catchment targets for land, water and biodiversity and identify those applicable to property and sub-catchment 2.5 Identify components of OMP that need to be developed 2.6 Develop suitable format for planning documents 2.7 Identify risks to organic integrity for the farm enterprise and outline strategies to manage these risks
3. Develop soil fertility plan	3.1 Undertake or commission a soil fertility assessment of farm production areas 3.2 Map soil types and topography on farm plan 3.3 Develop and document soil fertility plan that amends soil chemistry, soil structure and soil biology, based on assessment of soil test results, enterprise performance, overall budget and intended cropping/grazing regime 3.4 Identify appropriate inputs according to the National Standard for Organic and Biodynamic Produce and/or agro-ecological principles 3.5 Document plan according to established format
4. Develop soil management sub-plan	4.1 Determine suitability of land for production based on soil type, slope, aspect and previous use 4.2 Develop soil management plan to enhance soil structure and prevent compaction and water logging 4.3 Identify appropriate inputs according to the National Standard for Organic and Biodynamic Produce or agro-ecological principles

Element	Performance criteria
	4.4 Document sub-plan according to established format 4.5 Identify farm management practices and strategies that enhance soil fertility
5. Develop weed management sub-plan	5.1 Identify problematic weed species and observe weeds as an indicator of soil health 5.2 Identify life cycles of weeds species to inform management options 5.3 Identify appropriate inputs according to the National Standard for Organic and Biodynamic Produce or agro-ecological principles 5.4 Develop integrated farming strategies and cultural practices for managing weeds 5.5 Document sub-plan according to established format
6. Develop and design an integrated pest and disease management sub-plan	6.1 Collect and document evidence of pest and disease burden in farming system 6.2 Observe and monitor pests and diseases and their life cycles 6.3 Evaluate evidence of pest and disease burden to develop strategy for management 6.4 Evaluate pests and diseases as indicators of farming system health 6.5 Identify options for addressing pest and disease issues, including improving soil health, cultural practices and system redesign 6.6 Identify appropriate inputs according to the National Standard for Organic and Biodynamic Produce or agro-ecological principles 6.7 Document sub-plan according to established format
7. Develop animal health and management sub-plan	7.1 Identify regional and farm-based animal health issues 7.2 Identify options for preventative actions aimed at establishing and maintaining optimal animal health 7.3 Identify options for treating animal health issues 7.4 Develop a sustainable grazing management plan that addresses feed requirements, stocking densities and meets regional catchment land and soil condition targets where applicable 7.5 Develop an animal management program that ensures compliance to organic standards and/or agro-ecological principles 7.6 Document sub-plan according to established format
8. Integrate and finalise the organic management plan	8.1 Integrate sub-plans for soil fertility and management, and weed, pest, disease and animal health 8.2 Develop and implement record-keeping system to track various components of OMP as they are put into practice and reviewed 8.3 Review and update OMP annually noting any changes to farm practices

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG501A Develop an organic management plan.

Assessment Requirements for AHCORG501 Develop an organic management plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and develop required components of an OMP for a property
- understand and use interrelationships between soil, plant and animal health and farming system's resilience when developing plan
- identify options for prevention and treatment of risks
- apply appropriate regional catchment targets
- document the plan in compliance with certification requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of organic agriculture, especially fundamental role of soil health
- principles of sustainable production
- requirements and components of an OMP
- systems approach to agriculture and horticulture
- organic and biodynamic certification requirements

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG502 Prepare the enterprise for organic certification

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to prepare an enterprise for organic certification.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to farmers who are preparing a production enterprise for compliance with the Federal Government Department of Agriculture, accredited certification bodies and the National Standard for Organic and Biodynamic Produce.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Investigate and access information sources and support for conversion to organic production	1.1 Establish contact with other organic producers and marketers of organic products 1.2 Identify and use other sources of support and advice including agricultural extension officers and training programs 1.3 Assess literature, publications and internet sources of information to support decision-making for usefulness and reliability 1.4 Obtain certification process requirements from certification bodies and select appropriate certifier 1.5 Investigate roles and responsibilities of inspector, certifier and accreditation bodies, including role of government departments
2. Conduct a risk assessment of the site	2.1 Identify and document previous land use and chemicals applied on the site 2.2 Undertake and document risk assessment for potential on-farm contaminants 2.3 Assess potential contamination risk from off-farm land use and agricultural practices 2.4 Incorporate risk management procedures to minimise potential contamination from internal and external sources into a certification preparation plan
3. Develop and implement hazard analysis critical control point (HACCP) based procedures	3.1 Identify and document production processes and activities, and those sections of supply chain under one's control, according to certification bodies' requirements and the National Standard for Organic and Biodynamic Produce 3.2 Identify, document and compare quality, organic and statutory product standards to be met to actual standards achieved by product and enterprise 3.3 Identify and document corrective actions or improvements to processes and activities 3.4 Develop and implement procedures and processes for monitoring and annual review, including an internal review protocol where appropriate 3.5 Where required integrate a food safety management program
4. Manage customer feedback	4.1 Develop and implement procedures to obtain, analyse and respond to customer feedback on quality and integrity of organic product 4.2 Develop, communicate to relevant parties and monitor product recall procedures

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG502A Prepare the enterprise for organic certification.

Assessment Requirements for AHCORG502 Prepare the enterprise for organic certification

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify requirements for organic certification and apply them to one's enterprise
- identify critical points in supply chain at which the organic integrity of one's product may be compromised
- implement and monitor effective risk management for those parts of supply chain under one's control
- identify practices and strategies to minimise the risk of contamination and non conformance with organic standards
- develop an operational plan for conversion to organic production

Knowledge Evidence

The candidate must demonstrate knowledge of:

- certification process
- chain of custody
- HACCP (Hazard Analysis and Critical Control Points) principles and risk management
- health and food safety requirements and issues
- labelling requirements for domestic and export markets
- market for organic produce, including the organic movement and organic industry
- National Standard for Organic and Biodynamic Produce
- principles of organic agriculture
- procedures and responsibilities in the case of product recall
- procedures for conducting and documenting a risk assessment
- regulatory requirements and their domestic and international contexts

- requirements of an OMP, including record keeping
- role of quality management systems in organic industry including documentation requirements
- working knowledge of the regulated organic industry, including the role of the government, certification bodies and inspectors

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG503 Design and document an organic farm landscape

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design and document an organic farm landscape that will be used as the basis for an organic farm enterprise.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Source legislative requirements which	1.1 Identify and access applicable legislative documents and codes of practice relevant to the design and planning of an organic farming

Element	Performance criteria
impact on the management of an organic farm	enterprise 1.2 Investigate work practices and procedures which follow industry standards 1.3 Identify and interpret key clauses and requirements which apply to organic production and marketing 1.4 Identify relevant work practices and procedures which comply with regulatory requirements and codes of practice
2. Audit the natural resources and infrastructure of the property	2.1 Identify and record property physical and biological characteristics and landscape features 2.2 Develop a farm soil map 2.3 Determine land capability 2.4 Conduct a risk analysis of the farm and adjoining land-use to determine potential compliance issues with organic standards, legislative and environmental requirements
3. Develop an organic landscape plan	3.1 Identify key design parameters to meet financial, social and sustainability goals 3.2 Develop and document key farm rules 3.3 Investigate short term and long term uncertainties for the farm system 3.4 Investigate design options which impact on these long term changes 3.5 Identify and use appropriate design tools 3.6 Develop a concept framework
4. Document the organic landscape plan	4.1 Review the draft plan against the financial, social and sustainability goals 4.2 Document the plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG503A Design and document an organic farm landscape.

Assessment Requirements for AHCORG503 Design and document an organic farm landscape

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- source and interpret legislative requirements industry standards and codes of practice
- identify compliant work practices and procedures
- conduct an audit of the natural resources and infrastructure of the property
- identify physical and biological characteristics and landscape features of the property
- develop farm soil map and determine land capability
- develop an organic landscape plan using appropriate development tools
- revise a draft plan and document the final organic landscape plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable legislative documents and codes of practice relevant to farm landscape planning
- landscape types
- habitat and plant communities on farm
- relationship between land shape and soil type
- soil types
- different categories of cultural sites
- organic certification requirements
- landscape hydrology
- landscapes for agro-ecosystems
- native habitat requirements
- the requirements of the organic standard and agro-ecological principles

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG504 Develop and manage a community based marketing supply chain

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and manage a community based marketing supply chain.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to rural enterprise managers who develop and manage marketing strategies and systems within a community based marketing scheme to meet desired production and business outcomes.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Evaluate the suitability of different community marketing options for farm products	1.1 Research and document non traditional selling options 1.2 Identify different community marketing models applicable to the farm system 1.3 Identify key input supply chain steps and stakeholders and relevant certification requirements 1.4 Evaluate different options
2. Determine the marketing chain processes to participate in the selected community marketing schemes	2.1 Research and identify applicable legislative, environmental, and certification requirements relevant to managing a community based marketing chain 2.2 Document specifications for the various components of the marketing chain management system in line with organisational and legislative requirements 2.3 Document traceability requirements of the marketing chain
3. Determine appropriate community marketing strategies for farm products	3.1 Identify communities that have a potential relationship with the farm system 3.2 Document the characteristics and values of the identified communities 3.3 Match community characteristics and values to farm system 3.4 Establish and document market specifications to meet community expectations 3.5 Identify and document appropriate community marketing strategies 3.6 Identify and assess risks in strategy
4. Establish product marketing chain requirements to meet marketing options	4.1 Map required steps in marketing chains to supply identified market 4.2 Establish farm business requirements for each step in marketing chain 4.3 Establish compliance requirements at each step in marketing chain 4.4 Develop record keeping requirements for each step in marketing chain
5. Develop and document a community based marketing plan	5.1 Document required processes for the chosen enterprises and production systems 5.2 Identify and document marketing targets 5.3 Identify the key factors that differentiate product 5.4 Develop and document a promotion plan

Element	Performance criteria
	5.5 Collate customer feedback and use to improve market outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG504A Develop and manage a community based marketing supply chain.

Assessment Requirements for AHCORG504 Develop and manage a community based marketing supply chain

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research and evaluate the suitability of different community marketing options for farm products
- research and identify applicable legislative, environmental, and certification requirements relevant to managing a community based marketing chain
- document specifications for the various components of the marketing chain management system in line with organisational and legislative requirements
- establish and document market specifications meet community expectations
- establish product marketing chain to meet marketing options
- establish farm business requirements for each step in the marketing chain
- establish compliance requirements at each step in the marketing chain
- conduct record keeping requirements for each step in the marketing chain
- develop and document a community based marketing plan
- develop and document a promotion plan
- collate customer feedback and use to improve market outcomes

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable federal, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes in selling produce through community based markets
- relevant legislation and regulations relating to work health and safety
- organic certification systems and standards
- rural produce marketing and presentation

- organisation policies and procedures related to supply chain management, purchasing, and contracting and tendering
- characteristics and composition of farm business marketing plans
- characteristics of community marketing schemes and the steps within a farm produce supply chain
- product knowledge related to goods and services required by the organisation
- ways to build trust and collaboration as opposed to competition
- business terms and conditions for purchasing, tendering and contracting
- ethical behaviour
- established communication channels and protocols
- procedures for operating electronic communications equipment
- procedures for recording and reporting workplace information and completing relevant documentation

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG505 Develop and monitor a sustainable production plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop and monitor a sustainable production plan for an organic and/or agro-ecological farming system.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within know parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify personal and	1.1 Identify and record personal goals

Element	Performance criteria
enterprise goals	1.2 Identify and document physical, biological, social and financial resources under management 1.3 Identify and analyse the values, expectations and personal goals of customers, stakeholders and employees 1.4 Identify and document sustainability goals using current and historical industry data and organisational records
2. Research and evaluate available sustainable production systems	2.1 Identify and document potential enterprises and evaluate against identified goals and resources 2.2 Research and evaluate applicable sustainable production systems information from a range of sources for identified enterprises 2.3 Identify and document a selected production system that meets sustainability and enterprise management goals of the farm 2.4 Compare the elements of the selected system with the systems and production processes that currently exist on the farm 2.5 Assess the selected system against enterprise goals and sustainability principles and record the findings
3. Develop a sustainable production plan	3.1 Document required modifications to existing farm system processes and infrastructure for the chosen enterprises and production systems 3.2 Identify and document optimal production targets 3.3 Identify inputs and system design elements required to achieve the production targets 3.4 Establish risk management strategies 3.5 Identify record keeping requirements 3.6 Develop and document a sustainable production plan for the selected enterprises and production systems
4. Monitor and evaluate effectiveness of the sustainable production systems	4.1 Establish farm system monitoring procedures and performance indicators 4.2 Monitor performance indicators and against production and sustainability targets 4.3 Evaluate production and sustainability data against the sustainable production plan goals 4.4 Modify the enterprise mix or production system where differences between the sustainable production plan and actual results are identified 4.5 Identify, monitor and assess environmental impacts and work health and safety hazards relating to the production processes throughout the production cycle
5. Record and manage information and data	5.1 Create and maintain records and documents in line with the production plan, the work health and safety requirements, and machinery and equipment management programs

Element	Performance criteria
	5.2 Maintain record keeping systems and data to enterprise and industry standards and requirements 5.3 Prepare and assess recommendations for future sustainable production plans 5.4 Document revised plans and note changes in organic management plan (OMP), if applicable

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG505A Develop and monitor a sustainable production plan.

Assessment Requirements for AHCORG505 Develop and monitor a sustainable production plan

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify personal and enterprise goals
- identify and document physical, biological, social and financial resources under management
- research and evaluate sustainable production systems and select and document a production system that meets sustainability and enterprise management goals
- develop a sustainable production plan
- match land capacity with production system design
- monitor and evaluate effectiveness of the sustainable production system
- modify the enterprise mix or production system where differences between the sustainable production plan and actual results are identified
- record and manage farm system information and data

Knowledge Evidence

The candidate must demonstrate knowledge of:

- applicable federal, state or territory legislation, regulations, standards, codes of practice and established safe practices relevant to the full range of processes in developing and monitoring a sustainable production plan
- relevant legislation and regulations relating to work health and safety, contractor engagement, animal health and welfare, chemical use and application, vehicle and plant use and soil and water degradation issues
- environmental protection requirements and codes of practice, including the safe disposal of products and waste material, available to the organisation

- organisational policies and procedures, standards and site requirements for risk management and hazard identification
- sustainable land use principles and practices applicable in the region
- farm planning processes

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCORG506 Manage an agroecology production system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use agroecology principles in managing all elements of a farm ecosystem including the soil ecosystem, vegetation, animals, pests and diseases to achieve and maintain overall ecological and economic health of the farm ecosystem and farm production.

All work must be carried out to comply with workplace procedures, work health and safety, animal welfare and biosecurity legislation and codes, and sustainability practices.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others within known parameters and use discretion and judgment in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Organic Production (ORG)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify the farm agroecosystem functions at a systems level	1.1 Identify and map energy flows through a farm agroecosystem 1.2 Identify and map nutrient cycles through different parts of a farm ecosystem 1.3 Identify disturbance points in the farm ecosystem succession 1.4 Develop a model of the farm ecosystem and its elements 1.5 Identify areas of complexity and simplicity within the farm ecosystem 1.6 Identify ecosystem functions that can be used to replace the use of external inputs in the farm production systems 1.7 Identify interactions between elements of farm ecosystem 1.8 Assess health of existing farm ecosystems
2. Develop plans to enhance farm agroecosystem	2.1 Identify areas within the agroecosystem that require enhancement 2.2 Identify methods that encourage niche development, increase complexity in the farm agroecosystem and improve interactions between different components of farm agroecosystem 2.3 Document the implementation plan
3. Manage Farm Agroecosystems	3.1 Identify and monitor appropriate parts of the ecosystem 3.2 Set up monitoring system 3.3 Comply with requirements for monitoring determined by organic standards and legislative requirements 3.4 Review measured ecosystem and farm production performance with expected performance and adjust plan in response to differences

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCORG506A Manage an agro-ecology production system.

Assessment Requirements for AHCORG506 Manage an agroecology production system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify the farm agro ecosystem functions at a systems level
- assess the health of existing farm ecosystems
- develop plans to enhance farm agroecosystem
- manage and monitor the development of a farm ecosystem
- review ecosystem and farm production performance

Knowledge Evidence

The candidate must demonstrate knowledge of:

- advantages of ecological agriculture
- ecosystem processes, energy flows, nutrient cycles, biological succession, predator and prey relationships, ecological niche
- relationships between ecosystems and agricultural production
- application of ecosystem processes to a production system

Assessment Conditions

Competency is to be assessed in the workplace and/or a simulated environment that accurately reflects performance in a real workplace setting.

Assessors must satisfy current standards for RTOs.

AHCPCM201 Recognise plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise commonly encountered plants. Plants include desired species as well as weeds.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for plant recognition	1.1 Clarify work activity instructions with supervisor 1.2 Identify any work health and safety hazards and tell supervisor 1.3 Prepare resources and equipment for use in recognition activity 1.4 Identify, select and prepare available processes for plant

Element	Performance criteria
	recognition 1.5 Identify a range of desirable and non-desirable plants requiring recognition
2. Recognise specified plants	2.1 Carry out a visual inspection of plants 2.2 Recognise specified plants by their identifiable characteristics and name them 2.3 Record brief descriptions of plant habits, characteristics and significant features 2.4 Consult with others, browse the internet browsing, collect specimen collections, consult field guides and use workplace notetaking to assist with plant recognition 2.5 Seek advice when necessary and where appropriate to assist with plant recognition
3. Update the reference collection	3.1 Document information about plants and add to the reference collection 3.2 Update reference collection as new plants are recognised

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHPCPM201A Recognise plants.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPM201 Recognise plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare resources and processes for use in recognition activity
- identify desirable and non-desirable plants requiring recognition
- recognise and describe plant attributes
- describe specific handling requirements and growth requirements
- use appropriate methods of research to assist with plant recognition
- document and update information about identified plants

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant recognition
 - plant morphology and physiology as they relate to recognising plants
 - plant nomenclature
 - procedures for obtaining and providing advice and information about plants
 - plant recognition techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM202 Collect, prepare and preserve plant specimens

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect, prepare and preserve plant specimens for recording or identification purposes.

It applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Collect specimen	1.1 Collect the largest sample practical to fit on herbarium sheet 1.2 Confirm the sample includes flowers and fruit, leaves and roots and other features required for positive identification 1.3 Record observations of plant 1.4 Identify individual specimens in a manner that allows them to be

Element	Performance criteria
	linked to observations
2. Press plants	2.1 Protect samples from wilting until pressing 2.2 Arrange specimens on sheets ready for pressing 2.3 Press specimens 2.4 Attach archival specimens to suitable material with observations attached following established material 2.5 Pack specimens to be submitted for identification, including all data from collection observations as required by herbarium
3. Record data	3.1 Record and catalogue all data relating to specimens

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM202A Collect, prepare and preserve plant specimens.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPCM202 Collect, prepare and preserve plant specimens

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect plant specimens for identification
- arrange and press plant specimens
- attach archival specimens to material, together with observations
- pack specimens, with collection observation data, for identification
- record and catalogue data

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant collection
 - how to recognise plants to be collected
 - how to select the most suitable specimen for collection
 - how to store the specimens correctly

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCPCM203 Fell small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to fell small trees where hazards have been assessed as low risk.

It is an introductory or base-level unit that covers felling procedures for small trees.

This unit applies to individuals who undertake defined activities with specialised tools and methods, work in a structured context, apply knowledge and skills to demonstrate autonomy and limited judgement, and provide solutions to a limited range of predictable problems. Work is implemented with low risk work procedures and to comply with Safe Work Method Statement documentation.

Licensing, legislative, regulatory, or certification requirements apply to this unit in some states and territories at the time of publication, and may differ according to jurisdiction. Specific determination should be sought through the relevant state or territory.

Pre-requisite Unit

AHCMOM213 Operate and maintain chainsaws

Unit Sector

Plant culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assist in preparation of work site	1.1 Determine location of worksite and correct tree from the scope of works 1.2 Identify site hazards, assess risks and report to supervisor 1.3 Confirm work zone with work crew and monitor site 1.4 Identify first aid and emergency personnel, equipment and procedures 1.5 Record and implement work health, safety, site, environmental and traffic control measures
2. Identify tree felling requirements	2.1 Identify hazards associated with felling operation 2.2 Assess risks and report to supervisor 2.3 Examine topography and site conditions 2.4 Identify factors influencing the tree felling operation and confirm findings with supervisor 2.5 Identify <i>trees considered outside own skill level for felling</i> and seek assistance from appropriate personnel 2.6 Determine natural direction of fall, safe fall zone and exclusion zone and confirm with supervisor 2.7 Receive instructions for tree felling operations from supervisor and clarify instructions prior to undertaking work
3. Prepare for tree felling	3.1 Select and prepare felling equipment and component options appropriate to the task being undertaken 3.2 Prepare, transport and appropriately position support tools to minimise felling delays 3.3 Select, check, use, maintain and store suitable safety and personal protective equipment (PPE) 3.4 Clear fall zone of obstacles and articles which may be damaged by felled tree 3.5 Establish clear escape route appropriate to site
4. Fell tree	4.1 Note and monitor location of other personnel 4.2 Carry out tree felling operation 4.3 Communicate with work team during operations using voice, hand and whistle signals 4.4 Determine standard tree felling techniques, patterns and cut sequences by ground conditions and state of canopy 4.5 Take corrective action in response to changing conditions or problems encountered 4.6 Use planned escape route when tree starts to fall 4.7 Monitor fall of tree and movement on ground until felled tree is stable 4.8 Use low risk work practices in all activities

Element	Performance criteria
5. Complete tree felling operation	5.1 Determine appropriate method of clearing the site of felled tree 5.2 Select and use machinery required for removal of felled tree 5.3 Clear fall site of tree and all tree debris 5.4 Clean and store all machinery and equipment on completion of operation

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCARB202A Fell small trees.

Assessment Requirements for AHCPM203 Fell small trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare, transport and appropriately position support tools to minimise felling delays
- assess topography and site conditions, identify factors influencing tree felling operation and confirm findings with supervisor
- receive instructions for tree felling operations from supervisor and clarify prior to undertaking work
- clear fall zone of obstacles and articles which may be damaged by felled tree
- confirm first aid and emergency personnel, equipment and procedures
- identify site hazards, assess risks and report to supervisor
- record and implement work health, safety, site, environmental and traffic control measures
- select, check, use, maintain and store suitable safety and personal protective equipment
- confirm work zone with work crew and monitor location of other personnel
- determine natural direction of fall, safe fall zone and exclusion zone and confirm with supervisor
- determine standard tree felling techniques by ground conditions and state of canopy
- establish clear escape route appropriate to site
- safely operate a chainsaw to fell small trees
- monitor fall of tree and movement on ground until felled tree is stable
- take corrective action in response to changing conditions or problems encountered

Knowledge Evidence

The candidate must demonstrate knowledge of:

- corrective action
- emergency and first aid procedures
- felling equipment and components

- first aid and emergency personnel, equipment and procedures
- ground conditions
- how to determine natural direction of fall
- how to establish a clear escape route
- industry standard terminology
- low risk work practices
- obstacles and articles which may be damaged by felled trees
- positioning support tools
- safe operating procedures for felling small trees
- safe fall and exclusion zones
- selection, preparation and appropriate equipment for task
- standard tree felling techniques, patterns and cut sequences
- topography, site conditions and other factors influencing tree felling operations

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM301 Implement a plant nutrition program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to monitor and control the nutritional requirements of and applications to plants across a range of situations and environments.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for implementation of the plant nutrition program	1.1 Identify goals, target site, soils, plant species and varieties for implementing the program 1.2 Identify materials for soil and plant treatments and locate the storage site or supplier details

Element	Performance criteria
	1.3 Locate services using site plans and in consultation with the supervisor 1.4 Identify work health and safety hazard, assess risks and implement control measures 1.5 Select and use suitable personal protective equipment (PPE)
2. Monitor soil pH	2.1 Monitor soil pH in the implementation site in relation to plant nutrition 2.2 Identify, select, compare and source products useful in changing soil pH 2.3 Assess product application methods according to product type and type of growing media
3. Determine nutritional problems in plants	3.1 Identify common nutrient deficiency and toxicity problems in plants, using visual inspection 3.2 Consult supervisor or horticulturist, as required, to determine causes of nutritional or toxicity problems 3.3 Identify, compare, select and source soil ameliorants to improve soil fertility
4. Prepare to use fertilisers	4.1 Select a fertiliser that is compatible with plant species and type of growing media 4.2 Assess fertiliser application methods, taking into account the fertiliser type, soils and the environmental implications 4.3 Apply fertilisers appropriate to the plant growing cycle and the organisation's fertiliser calendar
5. Prepare application equipment	5.1 Select tools, equipment and machinery 5.2 Carry out pre-operational and safety checks on tools, equipment and machinery 5.3 Calibrate tools, equipment and machinery
6. Apply specific products at appropriate rates	6.1 Select specific products based on their analysis to meet plant needs 6.2 Calculate product application rates to optimise plant benefit and minimise environmental impact 6.3 Apply specific products at the correct rate, timing and method according to the product type and analysis and with consideration of the environmental implications 6.4 Record product applications 6.5 Monitor, document and report target plant response to the plant nutrition program, as well as non-target effects responses including environmental impacts or pests

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM301A Implement a plant nutrition program.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPMB01 Implement a plant nutrition program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify goals, target site, soils and plants for implementing the program
- identify materials and their supply source
- monitor soil pH in the implementation site
- identify appropriate products and application methods appropriate to implementing nutrition program
- estimate treatment and product requirements, material sizes and quantities
- conduct a site hazard identification and risk control assessment
- determine nutritional problems in plants
- plant nutrition program specifications
- apply specific products at appropriate rates and record their application
- select, check and calibrate tools, equipment and machinery

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant nutrition
 - botany and plant physiology
 - methods of nutrient uptake by plants
 - nutrient cycling and its practical relevance to the specific plants and soils
 - nutrients required by plants grown within the enterprise
 - soil ameliorants commonly required to treat the soil problems experienced by the enterprise
 - the effects of nutrient deficiency and toxicity on plant species and varieties

- the environmental implications of soil ameliorant and fertiliser use
- the main simple and compound fertiliser products available to the enterprise including analysis, solubility, salt index, application rates and costs
- the relationship between soil characteristics and the availability of nutrients

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM302 Provide information on plants and their culture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to provide information to clients and others about plants and their cultural requirements.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify the issue	1.1 Initiate contact with the client when appropriate 1.2 Assist the client in explaining the issue by using attentive listening and questioning techniques 1.3 Clarify the nature of the issue by gathering all relevant information from the client

Element	Performance criteria
	1.4 Define the issue as closely as possible according to the amount of information gathered 1.5 Advise the client that expert advice may be required to assist them further with their issue
2. Decide on preferred solution	2.1 Identify and develop options and strategies using available in-house and online reference material, product information, own experiences and sharing collective workplace knowledge 2.2 Examine and evaluate options and strategies using sound problem-solving techniques 2.3 Determine the optimal solution based on reasoned argument, appropriate evidence and sound cultural principles
3. Provide the preferred solution	3.1 Explain the recommended solution, method of application and probable outcomes to the client 3.2 Refer to the original source of the plant and its cultural requirements where necessary 3.3 Respond to client requests for clarification or expansion by the use of attentive listening and questioning techniques

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM302A Provide information on plants and their culture.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPMB02 Provide information on plants and their culture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop product knowledge through research and access to in-house and online information
- interpret information sheets, labels, horticultural literature, specifications and design symbols
- investigate requests for information, identify and evaluate options, decide on a solution, and deliver recommendation and information to the client
- select plants from a range of available stock lists
- communicate with clients, work team members, supervisors, suppliers, contractors and consultants

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of plant culture
 - broad range of plant species and their cultural requirements
 - duty of care in provision of advice and recommendations to retail, commercial and private clients
 - local plant suppliers, consultants, services, products and contractors
 - pest and disease symptoms, basic physiology and life cycle of pests and diseases, vulnerable plant growth stages, treatment thresholds, treatment products, effective application procedures and environmental implications
 - plant identification techniques, plant selection, plant physiology, habit and growth characteristics of the plants
 - soil characteristics particularly in relation to the local region

- weed species, growth stages, treatment thresholds, treatment products, effective application procedures and environmental implications

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM303 Identify plant specimens

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to inspect and describe the features and attributes of a plant for the purpose of plant identification and providing information to a client or organisation.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Inspect plant morphological features	1.1 Inspect the form and structures of the specimen and describe it in botanical terms 1.2 Record qualitative and quantitative data in a format listing the main observable features

Element	Performance criteria
	1.3 Use all relevant available senses to assist in recognition 1.4 Note useful identifying attributes of the leaf, flower, vegetative growth, fruiting body, stem, bark and habit 1.5 Determine plant group or family characteristics
2. Determine status of health	2.1 Inspect plant specimen for health and general condition 2.2 Use observations to identify any diseases, pests or deficiencies indicative of plant groups 2.3 Record, evaluate and, where possible, identify relevant data
3. Identify the specimen	3.1 Use research, reference material, field guides and taxonomic keys to define a closer identification 3.2 Inspect photographs or illustrations or physical specimens and compare to similar specimens in the reference material and database 3.3 Analyse unknown specimens for specific characteristics and identify to species and cultivar level where possible
4. Report on the process results	4.1 Compile the information data observed for the plant's morphological features 4.2 Label all the information data recorded and highlight key identifying features observed in the process 4.3 Produce a report of the identification process and list the compiled data 4.4 Inform the client or organisation of the results of the identification process

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM303A Identify plant specimens.

Assessment Requirements for AHCPMB03 Identify plant specimens

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Identify, describe in botanical terms and record key features of plant morphology
- compile a database of plant specimens and characteristics
- determine the health of plants
- recognise plants common to a region
- research multiple sources of reference material
- produce a report of the identification process with a list of compiled and labelled data observed on the plant's morphological features
- liaise with clients

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant identification
 - basic physiology and life cycle of pests and diseases
 - botany, plant morphology, physiology and taxonomy
 - methods of data capture
 - plant identification techniques
 - problem-solving techniques
 - soil characteristics particularly in relation to the local region
 - symptoms of plant pests and diseases

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM304 Report on health and condition of trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to report on general tree health and condition. It applies to the evaluation of trees for the purpose of work proposed in a local government area including parks and gardens, building and construction sites, public and private environments, and schools.

It applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plant culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare tree inspection requirements	1.1 Determine scope of work 1.2 Identify and prepare tools and equipment for inspection 1.3 Document and implement traffic management requirements

Element	Performance criteria
	where required
2. Inspect the tree	2.1 Determine the type, location and condition of tree 2.2 Inspect tree for obvious signs of structural damage, defects, pests, diseases and fauna 2.3 Identify and record tree condition on the inspection form
3. Record findings and advise client	3.1 Record tree location and site details 3.2 Recommend follow up treatments or further inspection from a consulting arborist 3.3 Complete report on tree health and condition and advise client-stakeholder

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPMB04 Report on health and condition of trees

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare materials and implement traffic management requirements for tree inspection
- document and implement traffic management requirements where required
- recognise a range of tree species and cultivars common to the region
- identify and report on the general health and condition of trees
- identify obvious potential structural defects, damage, pests and and/or diseases
- recommend treatments for pest and disease problems
- recognise potential structural or other defects that require inspection by an arborist
- record findings and inform client

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for inspecting trees
 - AS4373-2007 Pruning of amenity trees
 - botany and tree physiology
 - local government tree protection and preservation regulations
 - methods of determining tree dimensions
 - methods of low risk work
 - recognition of a wide range of trees common to the region
 - relevant Code of Practice
 - signs of structural defects, decay, damage and stress in trees

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM401 Recommend plants and cultural practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recommend plants and cultural practices. It applies to both sales staff in plant nurseries and garden centres and others in the amenity horticulture industries.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify client preferences and	1.1 Initiate contact with the client when appropriate 1.2 Clarify the purpose of the planting and cultural and environmental

Element	Performance criteria
requirements	factors of the intended planting site by gathering all relevant information from the client 1.3 Use botanical and common names to describe plants
2. Select plants to suit specific situations	2.1 Identify plants and their growth and performance characteristics that suit the specific situation using research and experiential awareness 2.2 Compare, assess and evaluate available plants using sound problem-solving techniques 2.3 Determine the best choice based on reasoned argument, appropriate evidence, sound principles and customer needs
3. Advise on plants for specific situation	3.1 Explain performance characteristics and particular planting, cultural and maintenance requirements to the client 3.2 Refer to the original supplier of the plant where necessary 3.3 Respond to client requests for clarification or expansion by the use of attentive listening and questioning techniques 3.4 Record and report recommendations

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM401A Recommend plants and cultural practices.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPCM401 Recommend plants and cultural practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- conduct literature and industry research, collate and analyse findings on plant species and cultivars, their characteristics and requirements
- comply with legislative requirements
- explain to the client work health and safety requirements or basic safety precautions relevant to the establishment and on-going maintenance of plants
- document client preferences and site particulars
- select plants that suit client preferences and suitability for the site
- report recommendations to the client that detail the types of plants chosen and their requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for recommending plants and their cultural practices
 - customer service and communication skills
 - features of plant species and cultivars
 - innovation and recent practices in plant selection, use and performance
 - plant nomenclature (family, genus, species and cultivar) for the range of plants recommended by the enterprise
 - practical understanding of the physiology of the range of plants supplied and recommended by the enterprise and their comparative growth and performance characteristics in response to different cultural and environmental factors
 - principles and practices for the establishment and maintenance of plants

- soil characteristics, particularly in relation to the geographical and climatic region from which clients generally originate

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM402 Develop a soil health and plant nutrition program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop a soil health and plant nutrition program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plant culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1.Determine relevant regional data and site characteristics	1.1 Define goals and target site for assessment and development of program 1.2 Access and review relevant climate data, environmental context

Element	Performance criteria
	<p>information and site data</p> <p>1.3 Determine appropriate soil, plant and water tests, taking into account plant species, climatic conditions and prevailing growth media</p> <p>1.4 Develop a soil, plant and water testing program that defines sampling, field testing, off-site analysis activities, task responsibilities, involvement of contractors, scheduling and desired information outcomes</p> <p>1.5 Implement and monitor soil, plant and water testing tasks, supervise liaison procedures with outside testing agencies and take remedial action where necessary</p> <p>1.6 Compile data and readings and present in a form that can be easily understood</p> <p>1.7 Determine seasonal variations and requirements from published data on species, historical records and own experience</p> <p>1.8 Determine characteristics, condition and nutritional status of soils and plant species by analysing collected data and comparing to accepted standards</p>
2. Define the requirements for plant nutrition	<p>2.1 Identify different nutritional requirements of the plant during the growing cycle and growing conditions, using published data on species, historical records and own experience</p> <p>2.2 Develop program to achieve appropriate soil conditions and nutrient availability for plant growth</p> <p>2.3 Determine soil amendments, management practices and fertiliser requirements</p> <p>2.4 Identify and cost resources, tools, equipment and machinery required for program and confirm availability with suppliers, contractors and appropriate personnel</p> <p>2.5 Determine cost-effective approach to soil management, soil amendment and provision of plant nutrients</p> <p>2.6 Identify work health and safety hazards associated with program, assess risks and develop and document control measures</p> <p>2.7 Identify and document environmental implications of program</p>
3. Document the soil health and plant nutrition program and specifications	<p>3.1 Establish a detailed soil health and plant nutrition plan, objectives, specifications and associated costs based on program requirements</p> <p>3.2 Develop and document detailed on-site procedures and schedules required for program</p>
4. Monitor plant growth and evaluate the program	<p>4.1 Monitor program implementation and results by testing soil, plants and produce</p> <p>4.2 Review and refine program to ensure it is responsive to changing</p>

Element	Performance criteria
	<p>conditions</p> <p>4.3 Identify non-compliance with documented objectives and specifications and implement remedial actions to alleviate or overcome identified shortcomings in program</p> <p>4.4 Take remedial action to improve plant nutrition and document</p> <p>4.5 Incorporate agreed changes into a detailed plan</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM402A Develop a soil health and plant nutrition program.

Assessment Requirements for AHPCPM402 Develop a soil health and plant nutrition program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and analyse information on regional site factors
- assess the physical, chemical and biological characteristics of soils
- assess the physical, nutritional and health requirements of plants
- develop a soil, plant and water testing program
- develop a program to achieve appropriate soil conditions and nutrient availability for plant growth, incorporating a soil health and plant nutrition plan
- research and analyse findings on plant nutritional requirements, nutrients available from soils and other growth media, and environmental implications of program
- select suitable management practices, soil amendments, additives and fertilisers

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of soil health and plant nutrition
 - characteristics of soil and other growth media types, uses and additives to enhance available nutrition for specific plants
 - main simple and compound fertiliser products available to enterprise, including analysis, solubility, salt index, application rates and costs
 - methods of nutrient uptake by plants and favourable conditions for effective uptake to occur
 - nutrients and water required by plants grown within enterprise and effects of nutrient deficiency and toxicity on individual plant species and varieties
 - visual and other symptoms of nutrient deficiency and toxicity on individual plant species and varieties

- organic matter, pest and disease, and nutrient interactions in soil and nutrient cycling
- environmental issues associated with selecting nutritional materials, implementing a plant nutrition program, legislation compliance requirements and ensuring minimal impact on environment
- the following types of relationships between soil and growth media characteristics and availability of nutrients to plants: macro and micro elements
- the following types of site evaluation techniques: methods of sampling and analysing soils and other growth media
- soil amendments commonly required to treat soil problems experienced by enterprise

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM403 Implement an integrated pest management program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to implement an integrated pest management program.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plant culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Assess weed, pest and disease infestations	1.1 Identify symptoms of weed, pest and disease infestation in response to client needs

Element	Performance criteria
	1.2 Define weed, pest and disease relationships and vectors as key factors in program development 1.3 Assess size and scope of infestation 1.4 Assess business implications and urgency of action according to published data and enterprise policy 1.5 Report conditions likely to impact on business viability
2. Plan appropriate integrated treatments for weeds, pests and diseases	2.1 Develop an integrated pest management (IPM) program, ensuring treatments selected include chemical or non-chemical products in line with enterprise practice 2.2 Outline integrated application of treatments in planning documentation 2.3 Choose treatments which provide a suitable response to infestations, having regard to cost of damage, cost of infestation, marketing requirements, withholding periods and sustainable horticultural practices 2.4 Seek professional assistance as required
3. Implement weed, pest and disease control measures	3.1 Ensure control procedures reflect sound implementation of integrated pest management strategy, marketing objectives and business imperatives 3.2 Develop and implement monitoring procedures 3.3 Instruct and supervise others to carry out work according to the IPM plan 3.4 Monitor prevention program and undertake remedial action where necessary 3.5 Monitor control procedures and undertake remedial action where necessary

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

No equivalent unit.

Assessment Requirements for AHCPCM403 Implement an integrated pest management program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify symptoms of weed, pest and disease infestation
- develop an integrated pest management (IPM) program
- develop and implement monitoring procedures
- instruct and supervise others to carry out work according to the IPM plan
- oversee the implementation of an IPM pest management plan
- monitor costs of pest management plan to meet budget requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for integrated pest management
- application techniques for chemical and non-chemical treatments
- concept and principles of Integrated Pest Management
- cost/benefit analysis relevant to selection of weed, pest and disease control measures
- crop and plant scouting and monitoring
- ecological impacts of different control treatments
- integration of weed, pest and disease control measures
- lifecycles of hosts, predators and pests and diseases
- sustainable horticultural practices
- weeds and pests of specific horticultural enterprises

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM501 Diagnose plant health problems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to diagnose plant health problems.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Monitor factors that influence plant health	1.1 Identify the plant species to the lowest taxonomic level and state its region of origin 1.2 Determine the seasonal growth stages of the plant

Element	Performance criteria
	<p>1.3 Record the day-to-day cultural practices used on each horticultural species</p> <p>1.4 Determine the characteristics of the growing environment that affect the growth of a specific plant species</p> <p>1.5 Record climatic data and environmental growing conditions</p> <p>1.6 Record the presence or numbers of beneficial organisms</p>
2. Diagnose plant health problems	<p>2.1 Identify environmental and cultural factors that predispose plants to attack by pests and diseases</p> <p>2.2 Identify the symptoms and signs of plant health problems using accepted nomenclature</p> <p>2.3 Assess the severity and extent of the problem in a plant species</p> <p>2.4 Compare observations with published data, historical records and own experience</p> <p>2.5 Determine the possible causes of the plant health problem</p> <p>2.6 Consult with specialist services in severe, complex or rapid onset cases</p> <p>2.7 Sample plant or soil specimens and dispatch for specialist diagnosis or laboratory testing where required</p> <p>2.8 Record plant disorders and problems and document in a report</p>
3. Remedy plant health problems	<p>3.1 Formulate a weed, pest and disease control program, taking into account the Integrated Pest Management (IPM) strategy and production plan</p> <p>3.2 Identify a range of modifications to growing conditions for a specific situation or plant species to rectify plant health problems</p> <p>3.3 Identify resources, tools, equipment and machinery required for work activities, analyse the costs and benefits and confirm availability with suppliers, contractors and appropriate personnel</p> <p>3.4 Identify work health and safety hazards associated with work activities, assess risks and implement controls</p>
4. Evaluate treatment program	<p>4.1 Monitor plants during treatment</p> <p>4.2 Record appropriate data</p> <p>4.3 Compare observations to expected results</p> <p>4.4 Recommend modifications to the treatment program are to client or management</p> <p>4.5 Present treatment program report to client or management</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM501A Diagnose plant health problems.

Assessment Requirements for AHCPM501 Diagnose plant health problems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research information about plant health problems, their diagnosis and remedial treatments
- differentiate between pest, disease and nutrient-associated symptoms
- identify signs and symptoms of plant health problems
- assess the severity, extent and speed of onset of health problems in a specific situation
- determine possible causes of the problem
- liaise with specialist services, clients and management
- formulate a weed, pest and disease control program
- implement treatment programs to remedy the diagnosed health problems
- evaluate treatment program and recommend modifications

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant health
 - chemical use, toxicity and compatibility with target plants, growth media, and environmental characteristics of the horticultural region
 - chemical, cultural and biological control methods included in the integrated pest management (IPM) strategy of the enterprise
 - enterprise and industry record keeping and reporting policies and requirements
 - evaluation procedures, including cost/benefit analysis, for plant and growth media treatments in relation to plant health, enterprise budget and performance targets
 - plant anatomy, morphology, physiology, histology, pathology, taxonomy and nomenclature

- plant nutrition issues associated with the growth media used and horticultural region for specific plant species
- sustainable horticultural practices relevant to the enterprise or horticultural region
- taxonomic descriptions, horticultural function, cultural and growth requirements, and target growth and performance characteristics of specific horticultural plants for the achievement of enterprise production and business plans
- weeds, pests and disease detection methods, taxonomic identification, life cycle stages and characteristic symptoms for the specific horticultural plants of the enterprise

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM502 Collect and classify plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to collect and identify plants using taxonomic keys.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for plant collecting	1.1 Confirm the purpose and objectives for collecting a range of plants 1.2 Define the area, location and habitat for collecting

Element	Performance criteria
	1.3 Determine and prepare resources to assist in locating and identifying plants 1.4 Determine and prepare equipment required for collecting and preserving specimens 1.5 Obtain licences or permission to collect specimens from landowner or managing agency 1.6 Assess the range of likely operating conditions, hazards and difficult or sensitive environments for impact on collecting and preserving specimens 1.7 Identify work health and safety hazards associated with plant collecting, assess risks and implement controls
2. Collect plant specimens	2.1 Observe collecting ethics when selecting specimens for picking 2.2 Enter into a field note book relevant information about the specimen, its characteristics and occurrence and note location coordinates 2.3 Confirm the specimen collected provides adequate material for identification and preserving 2.4 Tag and store specimens for later identification 2.5 Follow appropriate work health and safety requirements and work practices
3. Preserve specimens	3.1 Preserve specimen while still fresh 3.2 Clean and prepare specimen for preserving 3.3 Preserve specimen using either pressing or drying techniques 3.4 Mount dried specimen and label with information from notebook
4. Identify plant specimen	4.1 Use the relevant plant key to identify plant 4.2 Identify and document the basic characteristics of a plant 4.3 Confirm plant identity against botanical description of species 4.4 Document plant identity on label

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM502A Collect and classify plants.

Assessment Requirements for AHCPM502 Collect and classify plants

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for plant collecting
- note the location, characteristics and occurrence of specimens at the point of collection
- clean, preserve, mount and label specimens
- use a plant key to identify plants against the botanical description of the species

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant classification
 - herbarium collection techniques and ethics
 - physical and biological habitat types including vegetation associations and communities where appropriate
 - plant anatomy, physiology, morphology, taxonomy and nomenclature

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM503 Specify plants for landscapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select and specify landscape plants in a range of industries to provide information and advice to a client or organisation.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a client brief	1.1 Discuss and clarify the needs and objectives of the client 1.2 Identify purposes of the landscape and the client's expectations

Element	Performance criteria
	1.3 Establish the criteria for plant selection 1.4 Consult with client to finalise agreement of the brief
2. Determine the suitability of a plant for a purpose	2.1 Inspect the site and determine the planting area 2.2 Select species and cultivars for the size and aspect and the site 2.3 Consider and apply environmental conditions to the functional characteristics of the plant 2.4 Determine the suitability of the soil for the plants selected 2.5 Evaluate the selection of the plant and document the rationale for plant selection
3. Select plants	3.1 Select plants as outlined in the client brief and according to their suitability for the intended purpose 3.2 Determine plant function for the precise location within the plan 3.3 Make recommendations for soil improvements for the selected plant species 3.4 Match species and cultivars appropriately to the determined selection criteria for species' specific characteristics 3.5 Identify plant species appropriate for the site 3.6 Research relevant reference sources 3.7 Recommend plant species or cultivars for replacement or new plantings 3.8 Document plant selections, selection criteria and notes on quality expectations as specifications
4. Specify plants	4.1 Evaluate selection criteria for mature plants against capability and availability of transplanted plants 4.2 Assess final selections against the specified soil, site location and client brief and confirm 4.3 Assess selected plants for quality and quantities outlined in the specifications 4.4 Check materials, soils and growing media for specified quality 4.5 Document records of quality checks on delivered plants and product
5. Correlate and present a report	5.1 Document a report of the process and incorporate the correlated records 5.2 Present the client or organisation with the report

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM503A Specify plants for landscapes.

Assessment Requirements for AHCP503 Specify plants for landscapes

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a client brief on client's needs, objectives and expectations, the purpose of the landscape and plant selection criteria
- compile a database of plant specimens and characteristics
- conduct site inspections and site assessments
- evaluate and determine plant selections
- identify and select from a range of plants appropriate to the site
- research reference sources
- select and appraise soils and growing media
- use comparative techniques
- assess quality of plants and materials meet specifications

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of specifying plants for landscapes
 - basic physiology and life cycle of pests and diseases
 - botany, plant morphology, physiology, taxonomy and nomenclature
 - methods of data capture
 - plant identification techniques
 - soil characteristics particularly in relation to the local region
 - soils appraisal techniques
 - symptoms of plant pests and diseases

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM504 Design specialised landscape

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design a specialised landscape.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a design brief	1.1 Consult with client to establish the purpose and requirements of the design 1.2 Conduct a site inspection and note the physical elements and

Element	Performance criteria
	features of the site 1.3 Conduct a functional analysis of the site 1.4 Develop a design brief and consult with client to negotiate agreement
2. Design with plants as a main focus of the design project	2.1 Categorise plant families and genera, species and cultivars suitable for the design 2.2 Identify a wide range of plants for different design criteria and requirements, which include the use of aesthetic, ornamental, productive and economic plant groups 2.3 Determine and select plants appropriate to the design criteria 2.4 Use botanical nomenclature when documenting plants
3. Consider a range of factors that may influence the performance of the plants	3.1 Determine the implications of climate and environment on plant selection and design 3.2 Select plants that are adaptive to micro and meso climates in domestic, and small to moderate-scale public spaces 3.3 Report on the cultural techniques required to establish and maintain plants in specialised environments 3.4 Identify soil types and condition and make recommendations for appropriate soil management techniques 3.5 Identify organic and inorganic fertilisers and make appropriate recommendations 3.6 Identify common plant disorders and make appropriate recommendations
4. Develop specifications for the design	4.1 Incorporate instructions on the use and production of compost 4.2 Define the propagation techniques required 4.3 Outline the planting techniques to be used 4.4 Specify situations where staking and guying would be required 4.5 Define the required pruning and shaping techniques to be used 4.6 Outline the biological, organic and inorganic plant and plant pest management techniques to be used 4.7 Seek expert advice on irrigation requirements for the design 4.8 Develop a weed management plan 4.9 Document the design plan and present to client

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM504A Design and maintain a specialised landscape.

Assessment Requirements for AHCPM504 Design specialised landscape

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Develop a design brief in consultation with client to establish design purpose and requirements
- identify the implications of climate and environment on plant selection and design
- identify and design with plants appropriate for use in controlled environments
- identify and recommend soils and plant nutrition requirements
- identify and select plants appropriate to the design criterion
- use botanical nomenclature when selecting plants
- identify plant species and cultivars using botanical nomenclature
- identify weeds and recommend appropriate weed management
- Identify biological, organic and inorganic plant and plant pest management techniques to be used
- provide garden design solutions
- compile the recommendations and document a design plan or report

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of specialised landscape design
 - aesthetic, ornamental, productive and economic plant groups
 - allied horticultural, environmental and conservation industries and movements
 - botanical geography (plant families, geographic distribution and links)
 - botany - plant structures and physiology
 - ethno botany (sustainability and the stories of plants)

- horticultural media, information and knowledge-based resources
- how to determine suitability of plants for different environments such as green buildings (rooftops), conservatories, glass houses and atriums
- irrigation and current progress in new irrigation techniques
- plant families and detailed knowledge of species and cultivars used in garden design, horticulture industry and other ornamental, productive and economic plant industries
- plant taxonomy and nomenclature
- principles and processes of plant culture
- the use and development of plants through history
- turf culture
- types, properties and characteristics of a wide range of soils and growing media

Assessment Conditions

Assessors must satisfy current standards for RTOs.

Assessment Requirements for AHPCPM505 Conduct environment and food safety risk assessment of plant nutrition and soil fertility programs

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Research, identify and document community, government and agricultural industry information, concerns and requirements in relation to fertiliser and soil ameliorant use and environmental stewardship
- Research, identify and document information and standards relating to transporting, handling, storing and applying fertilisers and soil ameliorants
- identify and evaluate probability and severity of identified environmental risks associated with plant nutrition and soil fertility programs
- calculate areas, ratios, proportions and application rates
- liaise with managers and landowners, local and national organisations
- develop a nutrient management plan
- monitor effectiveness of plant nutrition and soil fertility management decisions over time
- identify opportunities to improve efficiency and effectiveness of plant nutrition and soil fertility program
- estimate treatment and product requirements, material sizes and quantities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of food safety risk assessment
- environmental implications for environment of soil amendment and fertiliser use, that may include nutrient mining, run-off, nutrient loading of soil and water, toxicity, noise and dust
- food safety issues relating to the use of fertilisers and soil ameliorants
- law of the minimum and importance of nutrient interactions

- methods and pathways of nutrient uptake by plants and loss from soil
- nutrient cycling and its practical relevance to specific plants and soils encountered in local area, including role of soil biology
- nutrients required by plants grown within enterprise and effects of nutrient deficiency and toxicity on individual plant species and varieties
- relationship between soil characteristics and the availability of nutrients, including macro and micro elements, to plants
- single nutrient and complete fertiliser products encountered in local area, including physical attributes, nutrient analysis, solubility, salt index, application rates and costs, and appropriate application techniques and equipment
- soil amendments commonly used to treat local soil problems
- soil and water sampling techniques to adapt activities and instructions to a range of environmental contexts
- techniques for interpreting laboratory results and making fertiliser and amendment recommendations
- techniques to assess effects of fertiliser and amendment recommendations on soil, plants and water

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM506 Develop an integrated pest management program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency covers the skills and knowledge required to develop an integrated pest management program.

It applies to individuals who analyse information and exercise judgement to complete a range of activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plant culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Determine IPM strategy	1.1 Identify weed, pest and disease infestations considering enterprise requirements 1.2 Define weed, pest and disease relationships and any vectors as key factors in developing the integrated pest management (IPM)

Element	Performance criteria
	program 1.3 Develop a system to assess the size and extent of any infestation 1.4 Assess business implications and urgency of action according to published data, enterprise policy and/or economic threshold 1.5 Report conditions likely to impact on business viability 1.6 Determine the economic threshold for the crops grown
2. Design control measures for weeds, pests or diseases	2.1 Determine the appropriate method to control any weed, pest or disease issue that ensures limited impact on beneficial organisms and minimises the possibility of weeds, pests or diseases developing resistance 2.2 Develop strategies to ensure minimal or no risk of resistance developing in the range of weeds, pests or diseases identified 2.3 Ensure that control measures account for the damage threshold for the enterprise requirement or particular crop and to ensure the product still conforms to market access requirements 2.4 Develop a weed, pest or disease prevention program where possible to minimise, limit or remove certain risk factors
3. Develop monitoring requirements for weed, pest or disease control measures	3.1 Monitor prevention program and undertake remedial action where necessary 3.2 Ensure control procedures reflect sound implementation of integrated pest management strategy, marketing objectives and business imperatives 3.3 Monitor control procedures and undertake remedial action where necessary

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - No equivalent.

Assessment Requirements for AHCPCM506 Develop an integrated pest management program

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine the economic threshold for a range of weed, pest or diseases
- develop an integrated pest management (IPM) strategy based on analysis of weed, pest or disease presence
- develop and implement monitoring procedures
- monitor costs of pest management plan to meet budget requirements
- oversee the implementation of an IPM pest management plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices for developing integrated pest management plans
 - application techniques for chemical and non-chemical treatments
 - cost/benefit analysis relevant to selection of weed, pest and disease control measures
 - crop and plant scouting and monitoring
 - ecological impacts of different control treatments
 - interaction of weed, pest and disease control measures
 - weeds and pests of specific horticultural enterprises
 - lifecycles of hosts, predators and pests and diseases

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPCM601 Develop and implement a plant health management strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to gather information and advice on plant health and develop and implement a management strategy on plant health.

It applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems. All work is carried out to comply with workplace procedures.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Plants culture and management (PCM)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Develop a plant health and management	1.1 Identify plant health issues from published data, historical records and industry consultation

Element	Performance criteria
program	1.2 Define management issues relative to desired quality, quantity and productivity requirements of marketing and production plans 1.3 Develop a program which defines enterprise guidelines and specific responsibilities of operational elements to achieve required outcomes 1.4 Establish systems to monitor business goals 1.5 Seek professional assistance where appropriate 1.6 Assess information to determine potential key information for input to planning decisions 1.7 Consider and document the environmental implications of chemical use, alternative methods and non-chemical preventative methods 1.8 Assess information to determine potential key information for input to planning decisions
2. Determine plant health strategies	2.1 Analyse gathered information for suitable approaches to plant health management 2.2 Consider strategies in the light of their impacts 2.3 Determine strategies for plant health management to integrate the most suitable methods with the proposed plants and the existing soil types 2.4 Establish environmental controls and include in the plan 2.5 Identify workplace health and safety hazards, assess risks and incorporate suitable controls into the plan
3. Provide input to other planning processes	3.1 Use details regarding plant health management strategies as input to other organisational planning processes 3.2 Collect and use information regarding other planning processes to inform the plant health management planning process 3.3 Communicate information about the range of planning processes verbally or in writing according to requirements and circumstances and the people involved
4. Determine scheduling and key responsibilities	4.1 Determine scheduling for plant health management, taking into consideration the range of seasonal, geographic, and resourcing factors 4.2 Determine key responsibilities for specific implementation processes 4.3 Determine record keeping requirements and put procedures in place to ensure compliance with the range of applicable regulations 4.4 Document the strategic plan, including scheduling and key responsibilities 4.5 Confirm the plan includes the type, format, frequency and detail

Element	Performance criteria
	of any reporting required by both managers and operators
5. Monitor and adjust plant health management strategies	5.1 Evaluate the effectiveness of the plant health management strategies at key points and make adjustments as necessary 5.2 Identify and monitor environmental impacts and workplace health and safety hazards relating to plant health management and assess and manage risks throughout the implementation process 5.3 Make modifications to the strategy as and when necessary for environmental, workplace health and safety, resourcing, or effectiveness reasons
6. Evaluate plant health management strategies and record result	6.1 Analyse data, observations and documentation from the implementation of the plant health management program against the plan, based on organisation guidelines 6.2 Prepare recommendations for future strategies based on the analysis of the data 6.3 Prepare a report that documents the implementation of the strategies

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

This unit is equivalent to AHCPCM601A Develop and implement a plant health management strategy.

Assessment Requirements for AHPCPM601 Develop and implement a plant health management strategy

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine plant health strategies
- determine scheduling and key responsibilities
- develop plant health management strategies
- evaluate plant health management strategies and record results
- provide input to other planning processes
- monitor and adjust plant health management strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles and practices of plant health management
 - environmental controls and codes of practice applicable to the business and to plant health management operations
 - environmental controls and codes of practice applicable to the enterprise
 - Integrated Pest Management (IPM)
 - management of weed, pest and disease infestations
 - management practices and processes to minimise plant health management control operations
 - planning water budgets and irrigation strategies
 - plant growth and development and growth regulators
 - plant growth processes such as photosynthesis, respiration, nutrient uptake, solute transport and metabolism, water balance and osmotic pressure
 - strategic aspects of managing plant quality, performance and nutrition

Assessment Conditions

Assessors must satisfy current standards for RTOs.

AHCPER101 Observe permaculture principles and work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to follow workplace directions and instructions while observing permaculture principles and practices.

Permaculture work can be carried out in the community, home, school and permaculture or community gardens and farms.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to work in a permaculture environment	1.1 Meet with supervisor, observe conditions and receive work tasks for the day 1.2 Identify required materials, tools and equipment 1.3 Check materials, tools and equipment and tell supervisor if there are insufficient or faulty items 1.4 Use correct manual handling techniques when loading and unloading materials 1.5 Identify hazards and tell supervisor 1.6 Use suitable personal protective equipment (PPE) and ensure correct fit
2. Identify permaculture work practices	2.1 Identify good environmentally sustainable practices, and seek clarification when necessary 2.2 Adopt work practices which maximise productivity and time efficiency and minimise waste and resource use 2.3 Follow instructions and directions and ask for clarification when necessary
3. Contribute to improved permaculture practices	3.1 Gather information about permaculture and support the development of improved permaculture practices 3.2 Discuss environmental issues, community issues and their relationship to permaculture practices with supervisor and colleagues 3.3 Contribute to the review of permaculture practices in a permaculture environment

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD841PPP01B.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPER101 Observe permaculture principles and work practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate with supervisors and workplace colleagues
- recognise basic environmental influences
- contribute to improved permaculture work practices

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture
 - ethics – earth care, people care, fair share
 - principles – at this level, limited to the trainer/supervisor’s interpretation and simplification of those contained in the two seminal permaculture text books (Mollison 1988 and Holmgren 2002)
- good practice approaches to minimising environmental hazards and risks
 - producing no waste
 - thinking globally and acting locally
 - observing nature and learning from her patterns
 - responding to change creatively and with consideration for the needs of all users of and/or elements in the system
 - learning from mistakes and developing successes
- factors to improve environmental performance in regard to water catchments, ecosystems, habitat, efficient use of resources, sustainability and waste minimisation
- factors to improve community issues, especially in regard to caring for people, sharing surpluses and setting limits to growth

- environmental issues and their potential impacts
 - sustainability of land use and agricultural work practices
 - reduction and disposal of waste
 - improvements to water quality
 - improvements to air quality
 - energy efficiency
 - biodiversity and habitat protection
 - conservation of natural resources
 - wild-fire management and mitigation
 - food, water and energy security
 - human rights and right livelihood

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER102 Support resource conservation practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to support resource conservation practices in a permaculture system under supervision, including preparing materials, tools and equipment for resource conservation, undertaking resource conservation activities, storing and stockpiling materials, and cleaning up on completion of work.

This unit applies to individuals who work alongside a supervisor in most situations and exercise limited autonomy within established and well known parameters. They identify and seek help with simple problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare materials, tools and equipment for resource conservation	1.1 Identify and check the required materials, tools and equipment and prepare according to lists provided and/or supervisor's instructions

Element	Performance criteria
	1.2 Adopt work practices which maximise productivity and time efficiency and minimise waste and resource use 1.3 Follow instructions and directions provided by supervisor and seek clarification when necessary
2. Undertake resource conservation practices as directed	2.1 Gather information on resource conservation in a permaculture system 2.2 Carry out resource conservation work in a safe and environmentally appropriate manner 2.3 Observe workplace policy and procedures in relation to workplace practice, handling, re-use and disposal of materials 2.4 Report problems or difficulties in completing work to required standards or timelines
3. Store and stockpile materials	3.1 Store all usable and re-usable materials in a designated area 3.2 Prepare and process all usable and re-usable materials
4. Clean up on completion of resource conservation work	4.1 Clean, maintain and store tools and equipment 4.2 Maintain a clean and safe work site while completing resource conservation activities 4.3 Complete any reporting requirements at the end of the job

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD841RES02B.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPER102 Support resource conservation practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- cooperate with team members
- store and stockpile materials
- clean up on completion of work

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- tools and equipment used
- principles of resource conservation including:
 - reduce, reuse, recycle, repair, repurpose, restore
 - minimal impact living
 - sustainable food production
 - energy efficiency
 - the following types of appropriate energy: solar and wind power
 - the following types of appropriate technology: composting toilets, grey water re-use
 - water catchment, storage and re-use
 - seed collection and seed banking
 - mulching and soil conservation
 - revegetation
- community and social interaction and support, such as:
 - resource banking

- seed banking
- co-operatives
- Local Energy Trading Systems (LETS)
- Skill-Share
- techniques used in resource conservation, such as:
 - stock piling resources
 - the following types of processing requirements for resources which cannot be stock-piled: composting, fermentation, drying
 - water storage and treatment
 - capture and storage of energy (heat capture in mass, basic turbine function)
- making connections between everyday living and sustainable use of resources

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify common features of Zone 1 permaculture gardens	1.1 Identify key characteristics of a Zone 1 permaculture garden 1.2 Compare and contrast common features of Zone 1 permaculture gardens with traditional home gardens 1.3 Identify functions and yields of plants in a Zone 1 permaculture garden

Element	Performance criteria
2. Demonstrate safe and efficient work practices	2.1 Identify and check the required materials, tools and equipment and prepare according to lists provided and/or supervisor's instructions 2.2 Adopt work practices which maximise productivity and time efficiency and minimise waste and resource use 2.3 Follow plant care instructions and directions provided by supervisor and seek clarification when necessary
3. Undertake bed preparation and planting activities	3.1 Prepare beds for planting of plants, seeds or seedlings 3.2 Plant the plants, seeds or seedlings 3.3 Follow instructions in relation to workplace practices, handling and disposal of materials 3.4 Report problems or difficulties in completing work to required standards or timelines to supervisor
4. Maintain plants	4.1 Determine watering regime for different plants in conjunction with supervisor 4.2 Determine nutrient requirements for plants in conjunction with supervisor 4.3 Clarify additional requirements of different plants in conjunction with supervisor
5. Harvest plants and plant yields	5.1 Identify potential yields from different species to be harvested 5.2 Harvest plants and plant yields 5.3 Store plants and plant yields 5.4 Complete any reporting requirements at the end of the job

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD841IPA03B.

Assessment Requirements for AHCPER103 Support plant care in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Identify common features of permaculture Zone 1 gardens
- identify and check the required materials, tools and equipment
- prepare a garden area for planting plants, seeds or seedlings
- determine the appropriate watering regime and nutrient requirements for the plantings
- harvest plant yields
- store the plant yields

Knowledge Evidence

The candidate must demonstrate knowledge of:

- the characteristics of permaculture Zone 1 gardens
 - how permaculture gardens differ from conventional gardens
 - functions and yields of plants in a Zone 1 garden
 - observing nature and learning from it
- principles of planting in permaculture systems, such as:
 - aspect
 - planting patterns
 - companion planting
 - the soil-water-plant relationship
- plant care techniques and plant nutrition, such as:
 - the role of composts, worm castings, green manures, animal manures and support species in permaculture plant care
 - when to leave weeds, chop-and-drop and mulching

- simple pest protection (cages, rings, stakes and nets)
- simple climate protection (sun/frost/wind)
- how to reuse and recycle excess products of plant care

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III qualification (or higher) in Permaculture and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

Assessment Requirements for AHCPER104 Support animal care in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- apply problem solving skills to use available resources and prioritise daily tasks
- collect yields from animals including waste materials for composting or worm farms
- clean up on completion of work
- identify basic indicators of animal health

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of animal care in permaculture systems, such as:
 - grazing systems
 - animal tractor systems
 - organic feed and nutrition systems
 - housing and species combinations for welfare of all species
 - predator protection, vermin control and weather protection
- principles of integrating animals into permaculture systems, such as:
 - zone and sector planning in relation to appropriate animal species
 - needs, functions and yields for animals within integrated systems
- the following components of animal care: feed, water, shelter, perch space, bedding, symptoms of ill health or stress
- animal handling techniques
- tools and equipment
- repair and maintenance of animal housing and containment

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III qualification (or higher) in Permaculture and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

Assessment Requirements for AHCPER105 Assist with maintaining structures in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for maintenance work
- maintain permaculture structures
- clean up on completion of work
- carry out reporting requirements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to structures in a permaculture system
- tools and equipment used
- permaculture structures, such as:
 - fences
 - gates
 - animal housing and enclosure
 - animal feeders and waterers
 - plant protection
 - light reflection and exclusion structures
 - seating
 - ponds, wicking systems and rain gardens
 - storage structures for materials
 - compost systems
 - water storage structures

- water harvesting and distribution structures
- propagation systems
- fireplaces and fire pits
- root cellars
- bee hives
- structural and safety issues associated with maintaining structures
- environmentally safe finishes and materials
- principles of repurposing and reuse of materials
- creative solutions to common and simple problems with permaculture structures

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III qualification (or higher) in Permaculture and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER201 Work effectively in permaculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to work effectively on an individual basis and with others in permaculture.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Obtain information about permaculture	1.1 Identify and access sources of information about permaculture 1.2 Collect information to assist effective and safe work performance within a permaculture work site 1.3 Identify workplace terms and conditions 1.4 Identify work and career options for permaculture practice

Element	Performance criteria
2. Observe requirements of a permaculture workplace	2.1 Ensure work practices comply with enterprise work requirements 2.2 Recognise faults and abnormalities in workplace practices and take remedial action 2.3 Observe punctuality in work attendance 2.4 Complete work routines and specific instructions to meet workplace expectations
3. Work effectively in a permaculture workplace	3.1 Plan work tasks in consultation with team members and supervisor 3.2 Follow instructions from supervisor 3.3 Cooperate with others as part of a team with consideration of special needs of co-workers and others 3.4 Accept responsibility for quality of own work
4. Contribute to a productive permaculture workplace	4.1 Fulfil commitments to undertake work or assist co-workers 4.2 Share knowledge and skills with co-workers through conversations and demonstrations 4.3 Recognise and seek out contributions from individuals of different gender and social and cultural backgrounds, if appropriate 4.4 Ensure work is consistent with workplace standards relating to anti-discrimination and workplace harassment 4.5 Recognise and resolve conflict through personal communication if possible and reference to supervisor for support 4.6 Undertake responsibilities and duties so as to promote cooperation and good workplace relationships

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD842PPP01B.

Assessment Requirements for AHCPER201 Work effectively in permaculture

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- access and collect information about permaculture
- interpret workplace schedules
- accept responsibility for own work
- promote workplace cooperation
- contribute to a productive workplace environment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture
 - different sectors within a permaculture system
 - relationships between sectors and the whole
 - permaculture services available in the area as listed in available references including:
 - media reports
 - reference books
 - industry journals
 - internet sites
 - libraries
 - observation of nature
 - personal observation and experience
 - relationships between the permaculture enterprise and other industries
 - legislation that affects permaculture enterprises

- unions and industry associations
- career opportunities within permaculture
- work ethic required to work in permaculture enterprises
- ethics of permaculture
 - care for the earth
 - care for all people
 - sharing the surplus
 - setting limits to growth
- permaculture practices and procedures, such as:
 - cooperation over competition
 - respecting and celebrating all ethnicities, religions, ages, genders and abilities
- wwoofing and other labour exchange programs
- lifestyle as a conserver
- workplace expectations and communication channels

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER202 Harvest, treat and store seed

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to harvest, treat and store seed.

All work is carried out to comply with workplace requirements.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for harvesting of seed	1.1 Discuss work requirements with supervisor and seek clarification where necessary

Element	Performance criteria
	1.2 Clean seed harvesting and handling equipment and transport to seed collecting site 1.3 Determine seed that is to be collected 1.4 Prepare locations for treatment and storage of seed
2. Harvest seed	2.1 Collect seed using selected method complying with any conditions of permit or agreements with land holders, if applicable 2.2 Protect the health of parent plants during seed collection, if required 2.3 Place seed in clean containers and label
3. Treat and store seed	3.1 Separate seeds from other materials using available separation methods 3.2 Treat seeds, if required, according to harvesting plan 3.3 Record all appropriate data regarding collected seed on the seed container according to the harvesting plan 3.4 Pack and store seeds

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD842RES02B.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPER202 Harvest, treat and store seed

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare to harvest seed
- harvest seed
- treat and store seed

Knowledge Evidence

The candidate must demonstrate knowledge of:

- seed harvesting techniques
- characteristics of mature healthy seed
- diseases and pests likely to affect the seed
- the following types of seed extraction:
 - hand selection
 - winnowing
 - sieving
 - vibration
 - flotation and fermentation
 - drying
 - heat-assisted dehiscing
 - crumbling of husks
- the following permaculture practices relating to seed harvesting and storage:
 - appropriate containers including re-used jars, boxes and packets
 - cool, dry location

- freezer or refrigerator
- pest deterrent mechanisms
- light exclusion mechanisms
- non-chemical protection against pathogens
- the following data included in seed saving:
 - genus, species, family, variety and cultivar information
 - provenance – where the seed came from
 - weight or number
 - date collected
 - place collected
 - collector
 - cultural advice or growing conditions
 - seed pre-treatment advice
 - longevity information
 - growing-out trial information
 - storage location information or record locator

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER203 Record information about the local bioregion

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to record information about the local bioregion.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare to work	1.1 Discuss work requirements with supervisor and seek clarification where necessary 1.2 Identify materials required for the work and collect and prepare them
2. Collect information	2.1 Determine the boundaries and extent of bioregion according to

Element	Performance criteria
	<p>community and geophysical and biological guidelines</p> <p>2.2 Identify key plant and animal species of the ecosystem by local or common name</p> <p>2.3 Identify special features and sites of the bioregion and relate to ecological information</p> <p>2.4 Investigate knowledge on plants and animals relationships from a permaculture perspective</p> <p>2.5 Investigate information on land uses and land management practices in the bioregion</p> <p>2.6 Outline the history of bioregion from community sources and available literature</p> <p>2.7 Define simple food chains and energy flows relevant to the local bioregion</p>
3. Review changes	<p>3.1 Identify environmental changes from land use and the impacts of these changes on current and future land uses</p> <p>3.2 Document environmental trends and their potential impacts on the bioregion</p> <p>3.3 Record land and water management practices that can repair environmental changes</p>
4. Document information	<p>4.1 Document information about the local bioregion</p> <p>4.2 Recognise and record ownership of information used in an appropriate manner</p> <p>4.3 Document any conditions and parameters defining use of information</p>

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER203 Record information about the local bioregion

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- collect information about the local bioregion
- review the information
- document the information

Knowledge Evidence

The candidate must demonstrate knowledge of:

- designated areas and features of a bioregion, such as:
 - a bioregion, as a land and water territory whose limits are defined not by political boundaries, but by the geographical limits of human communities and ecological systems.
 - water catchment, as one of the key identifiers of the bioregion
 - the vegetation on the catchment, as also an essential feature of a bioregion
- local and common names for plants and animals
- ecological concepts, such as:
 - niche
 - habitat
 - community
 - ecosystem
 - energy flows
 - food webs/chains
 - water cycles
 - species and species relationships

- plant and animal succession
- Permaculture perspectives, such as:
 - seeing connections between elements in a system
 - supporting ecological and community co-existence
 - valuing renewable resources and energy
- alternative strategies of trade such as barter and local exchange trading systems (LETS)
- community resources including local skills, public transport options, contractors and facilities

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

Assessment Requirements for AHCPER204 Check and operate permaculture water systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare to set up a permaculture water system
- set up water systems
- monitor water flows
- place system components in a way that gives most effect and greatest yield
- inspect earthworks for passive water catchment, storage and movement

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices in relation to water systems
- behaviour of water in the natural environment
- reading natural water flows
- operation of permaculture water systems, such as:
 - irrigation systems
 - water collection and storage containers (tanks, dams)
 - recycling
 - waste-water systems
 - water conservation approaches
 - swales
 - contour banks
 - mulch pit and path systems
 - dams

- chinampas
- free-flowing water (streams, rivers)
- aquaculture systems
- aquaponics systems
- productive water bodies (lakes, the sea)
- earthworks for passive water catchment, storage and yield
- components of a water system and their cleaning and storage requirements
- water conservation and management principles and practices including working with passive systems, swales, terraces, dams and other earthworks
- passive harvesting, movement and nutrient adding systems including appropriate earthworks
- biological filtering of water into and out of a permaculture water system

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

Assessment Requirements for AHCPER205 Prepare and store permaculture products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- handle products and their containers safely
- maintain containers in good condition
- maintain product storage areas and containers
- grade and label products
- pack and store products
- check stored products for damage, repacking or other treatments

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices in relation to product preparation and storage, such as:
 - the range of products produced by permaculture enterprises and their yields
 - parts of products stored
 - preserving the harvest
- correct handling, preparation and treatment techniques for a range of products, such as:
 - observation and identification of harvest readiness
 - storage methods for different products
 - pests and diseases likely to affect storage
 - hygiene issues in the handling and storage of permaculture products

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER206 Plant and maintain permaculture crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plant and maintain plants in a permaculture cropping system under routine supervision and involves a range of planting tasks, including site preparation, the handling and planting of a range of planting materials, and the maintenance of crops in the field.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to plant permaculture crops	1.1 Confirm instructions about planting with supervisor 1.2 Select and prepare tools and equipment 1.3 Identify plant materials to be planted 1.4 Select, use and maintain personal protective equipment
2. Prepare the site for planting	2.1 Remove or slash old plants, weeds and other residual materials if required 2.2 Apply soil treatments or amendments according to supervisor's instructions 2.3 Implement plant protection 2.4 Follow the permaculture planting plan and mark out the planting pattern
3. Carry out planting operations	3.1 Select appropriate planting material 3.2 Maintain planting material under conditions that ensure maximum viability 3.3 Handle and transport planting material to the site 3.4 Carry out planting according to permaculture planting plan
4. Maintain plants	4.1 Apply treatments to plantings according to the permaculture plan 4.2 Water plantings according to the irrigation schedule 4.3 Train and protect plants according to the permaculture plan

Assessment Requirements for AHCPER206 Plant and maintain permaculture crops

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- select plant material, tools and equipment for planting
- prepare site for planting
- plant according to permaculture planting plan or pattern
- support, train, guard or protect plants
- follow plans and schedules
- water plantings
- apply treatments to soil

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to planting operations, such as:
 - planting in natural groupings or guilds
 - utilising plant partnerships such as vines on corn crops
 - planting mixed species and interplanting with companion species
 - avoiding soil compaction or disturbance
 - utilising chickens to plough and prepare ground for planting
 - avoiding water, seed or weed leakages from the system
- principles of sustainable horticultural practices
- planting techniques
- basic plant nutrition
- soil improvement and nutrient maintenance, such as:
 - minerals, including rock dusts

- organic matter
- manures, appropriate fertilisers and composts
- foliar feeds or fertigation
- vermicompost and worm castings
- planting of a temporary green manure or cover crop
- legume plantings or interplantings
- sheet mulches
- companion planting
- plant growth and development
- methods of waste disposal causing minimal impact on the environment

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER207 Care for animals in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to care for the health and welfare of animals in a permaculture system through providing the optimal environment for them, caring for animals common in permaculture systems, animal behaviour and handling and maintaining basic records. This unit is applicable to both farm animals and companion animals.

All work is carried out to comply with workplace procedures, including animal welfare, quarantine and work health and safety policies and procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AHCPER207 Care for animals in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess animal health and welfare
- provide an optimal environment for animals
- feed and water animals
- handle animals safely and humanely
- move animals to different housing or pastures when necessary
- implement and record animal health and welfare control strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to animal care in a permaculture system
- animals common to permaculture systems in a given region or system
- role or niche of animals in system and interrelationship with other animals, plants or systems
- principles of animal feeding and nutrition
- principles of animal health, welfare and care
- symptoms of ill-health in animals
- legislation and regulations relating to animal health and welfare
- signs of animal fear, aggression and stress
- handling of animals
- safe handling of sick and dead animals

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

- principles of sustainable horticultural practices
- crops common in permaculture systems
- harvesting techniques, such as:
 - selective picking or hand picking ripe from unripe
 - tree shaking
 - picking leaves rather than whole plants
 - cutting plants and allowing to regrow (eg leeks, spring onions)
 - thinning or removing weak or diseased plants from among healthy ones
 - end of season crop extension harvesting (such as hanging tomato plants to ripen indoors)
- equipment and machinery used in harvesting
- sorting and grading, such as:
 - removing out-of-type plants
 - removing physically damaged, unhealthy, rotten or immature fruit and vegetables

- grading of the crop according to variety, size, length, colour, maturity, blemishes, bud count and quality, being subject to seasonal and market forces
- storage, transportation and grading of crops
- methods of waste disposal causing minimal impact on the environment

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER209 Recognise characteristics of integrated plant and animal systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise integrated plant and animal systems and their roles in permaculture design.

All work is carried out to comply with workplace procedures, including animal welfare, quarantine and work health and safety policies and procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Recognise plants and animals	1.1 Describe plant and animal habits, plant characteristics, animal characteristics and significant features and record appropriately 1.2 Recognise and name plants and animals used in permaculture systems according to their identifiable characteristics 1.3 Describe interconnectedness of plants and animals in permaculture systems using permaculture principles and practices
2. Describe functions of integrated systems in permaculture	2.1 Describe inputs, outputs and intrinsic features of plants and animals in integrated permaculture systems 2.2 Describe functions of integrated systems using a permaculture plan 2.3 Maintain records on integrated plant and animal systems

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD842IPA09B.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPER209 Recognise characteristics of integrated plant and animal systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- recognise animals and plants
- name animals and plants by common name
- read a permaculture plan
- identify plants and animals commonly encountered in a permaculture system
- identify plants with useful properties (food, fuel, fibre, medicinal, dyes, shade, habitat etc)
- describe animals with functions in the system
- produce a simple report

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to integrated plant and animal systems, such as:
 - practices which conserve energy and resources
 - protecting water, soil and other resources
 - obtaining a yield
 - preserving heritage or heirloom varieties (biodiversity)
 - re-using or adapting materials for other functions
 - making use of vertical space
 - creating multiple functions for the same thing
 - using nature as the model
 - seed-saving
- animals and plants common to permaculture systems in a given region or bioregion

- the role or niche of animals in system and interrelationship with other animals, plants or systems, such as:
 - native or wild animals and plants
 - pest and feral plants and animals
 - insects, fish, birds and reptiles, both friend and foe
- principles relating to integrated plant and animal systems

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER210 Operate within community projects

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to operate within community projects including the ability to gather information about communities and social structures, cultural customs and heritage of indigenous or other minority groups, and reading project plans and programs.

All work is carried out to comply with workplace procedures, including animal welfare, quarantine and work health and safety policies and procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Gather information about the community and community projects	1.1 Research major characteristics of the community 1.2 Identify features and impact of community projects 1.3 Define local land ownership, use and management issues 1.4 Determine community traditions and customs 1.5 Define main issues and trends impacting on community 1.6 Determine relationship of community project with a permaculture system or community
2. Assist in project preparation	2.1 Participate in community consultation 2.2 Obtain tools, equipment and resources for project and prepare for use 2.3 confirm work schedules and programs with supervisor 2.4 Identify any issues relating to project completion with supervisor and address these while planning
3. Work within a community project	3.1 Observe community protocols according to community or organisational guidelines and work procedures 3.2 Respect community traditions and customs and reflect in organisational work procedures 3.3 Complete project work on schedule and in cooperation with community

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD842COM10B.

Assessment Requirements for AHCPER210 Operate within community projects

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- gather information about a community and community projects, including major characteristics, features and impacts of community projects
- research the community
- assist in project preparation
- work within a community project

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to community work
- issues important to communities, such as:
 - health
 - housing
 - land rights
 - schooling and education levels
 - economics
 - town planning
 - transport
 - leisure activities
 - employment
- communities and social structures and characteristics, such as:
 - living arrangements

- patterns of daily life
- roles of men, women and children, class structures
- predominant language used
- main economic activities
- main transport systems used
- main information systems used
- predominant religion or spiritual beliefs
- main system of law and order
- main type of government
- main social upheavals experienced over specified periods of time
- main problems experienced by the society over specified periods of time
- cultural customs and heritage of indigenous or other minority groups
- cultural protocols, such as:
 - recognition of authority
 - taboos
 - religious or other belief sensitivities
 - economic sensitivities
 - issues of trust
- project plans and programs

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER211 Recognise threats and create opportunities in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to recognise and minimise threats and create opportunities in a permaculture system using observation, permaculture practices and cultural, biological and other appropriate methods.

All work is carried out to comply with workplace procedures, including animal welfare, quarantine and work health and safety policies and procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assess threats to permaculture system	1.1 Recognise plant pests, diseases and disorders 1.2 Identify threats from weather conditions and extreme weather events 1.3 Determine other environmental situations that may impact on permaculture systems 1.4 Identify interrelationships between weedy plants, pests, diseases or disorders and weather or environmental conditions 1.5 Record details of threat occurrences and report to the supervisor 1.6 Recognise treatment or response methods, or opportunities, in consultation with the supervisor 1.7 Identify hazards, assess risks and report to the supervisor
2. Apply treatments to reduce impact of threats	2.1 Select tools and materials for the job 2.2 Prepare treatments or responses to threats or consider opportunities according to supervisor's instructions 2.3 Apply treatments
3. Carry out post-treatment operations	3.1 Carry out post-treatment operations 3.2 Treat, recycle or dispose of waste materials 3.3 Maintain records

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD842IPA11B.

Assessment Requirements for AHCPER211 Recognise threats and create opportunities in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- recognise plant pests, diseases and disorders
- identify interrelationships between weedy plants, pests, diseases or disorders and weather or environmental conditions
- recognise treatment or response methods, or opportunities
- prepare and apply treatments or responses to threats

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices in regard to plant protection, such as:
 - creative solutions to common problems in a permaculture system
 - design for improved predator-pest balance
 - integrated plant and animal systems
 - guilds of planting for mutual support
 - mineral contribution of weeds to soil (bioaccumulation)
 - using pest-weed cycles to advantage (breaking the insect reproductive cycle for example)
- common weedy plants, plant pests, diseases and disorders
- common environmental impacts on permaculture systems
- fire, flood, storm and tsunami behaviours and precautions relevant to permaculture design
- different types of treatments or system modifications and their principles, such as:
 - non-chemical controls including sprays with organic or natural ingredients
 - cultural control methods

- animal systems to control plants or plant residues (chicken or pig tractors)
- shade used as a control
- biodynamic treatments and control measures
- sheet mulching
- composting of residues
- follow-up strategies including spot mulching, seedling disturbance, animals
- environmental considerations when applying treatments

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER212 Use and maintain garden hand tools and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to use and maintain garden hand tools and equipment. It requires knowledge of the correct purpose and function of garden hand tools and equipment and their maintenance needs.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify and describe	1.1 Correctly identify garden hand tools and equipment

Element	Performance criteria
uses of tools	1.2 Describe the correct purpose of each tool and how to use it correctly 1.3 Describe the maintenance and storage requirements for the tools
2. Use tools for their designed purpose	2.1 Ensure safe work practices are complied with 2.2 Undertake tasks using garden hand tools and equipment correctly 2.3 Return tools used to the storage area and stow correctly
3. Clean, maintain and store garden hand tools and equipment	3.1 Identify tools that need repairs or maintenance 3.2 Undertake regular tool maintenance tasks 3.3 Store garden hand tools and equipment properly to ensure long service

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit.

Assessment Requirements for AHCPER212 Use and maintain garden hand tools and equipment

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- describe uses of tools and equipment
- use a range of garden hand tools and equipment properly
- clean, maintain and store garden hand tools and equipment

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to garden tool use and maintenance
- principles of sustainable horticultural practices
- ergonomics
- garden hand tools and equipment used in permaculture systems, such as:
 - spades and shovels
 - forks
 - trowels
 - rakes
 - scythes and sickles
 - hand mowers
 - secateurs & loppers
 - picks & mattocks
 - pruning saws and bow saws
 - club hammer and sledge hammer
- maintaining tools and equipment in good condition, such as:

- replacing dulled blades
- replacing broken handles
- lubricating moving parts
- adjusting mechanisms
- sharpening and honing blades
- storage techniques for hand tools and equipment
- carrying and transporting hand tools and equipment safely

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER213 Assist with basic earth shaping for nutrient capture and storage

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to assist with basic earth shaping for nutrient capture and storage in a permaculture system. It requires knowledge of permaculture earthworks used for nutrient capture and storage, behaviour of water in the natural environment, reading the landscape, working with slopes and contours and digging techniques, both manual and mechanical.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Elements describe the	Performance criteria describe the performance needed to

Element	Performance criteria
essential outcomes.	demonstrate achievement of the element.
1. Assess and measure slope using simple tools	1.1 Identify issues with slope such as erosion gullies, plant growth, water pooling 1.2 Use a plumb bob and 3-4-5 triangle or similar to calculate fall 1.3 Record slope profile and fall in several places across a wide slope
2. Peg out contours	2.1 Step an A frame across the slope to find and peg the contour 2.2 Use an A-frame and water level to check contour pegging 2.3 Label or flag contour pegs to avoid confusion
3. Prepare to shape earth	3.1 Select tools and equipment for earth shaping work 3.2 Hire small machinery if necessary or if the job is a big one 3.3 Hire a contractor if the job demands and follow any legislative requirements 3.4 Check weather forecasts and condition of soil before digging
4. Shape earth for nutrient capture and storage	4.1 Use manual or mechanical digging system to shape the earth 4.2 Avoid damage to underground structures, services, roots of trees and building foundations 4.3 Follow the design requirements and clarify any anomalies
5. Test earth shaping work	5.1 Confirm that earth shaping holds water (or drains, as required) 5.2 Confirm that earth shaping of berms, swales or terraces will not erode or pool water 5.3 Rake, sweep or compact to even any discrepancies 5.4 Test earth shaped structure by watering or opening valves and adjust as required
6. Complete earth shaping work	6.1 Line earth shaped swales or ponds according to design 6.2 Plant contour banks or terraces according to design 6.3 Mulch any exposed soil or surfaces or fill, depending on climate and permaculture design requirements 6.4 Clean up any surplus or waste materials from the earth shaping work in an environmentally safe manner 6.5 Return tools, equipment and storable materials to storage

AHCPER214 Propagate plants for a permaculture garden system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to propagate plants for a permaculture garden system including small scale nurseries, school nurseries and systems where sales and profit are not the main drivers. It requires knowledge of propagation techniques, basic plant nutrition and potting media suitable for the home propagation system.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under general supervision and exercise limited autonomy with some accountability for their own work. They undertake defined activities and work in a structured context.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to propagate plants	1.1 Collect and wash containers and trays 1.2 Prepare containers with suitable potting mix for the propagation process being undertaken 1.3 Have tools, water and labelling materials on hand
2. Propagate plants using garden techniques	2.1 Take cuttings, sow seed or divide plants as required 2.2 Place new plants into prepared containers to required level and give water, cutting treatment or fertiliser as needed 2.3 Label the new plant accurately 2.4 Place containers in trays or in propagation area to grow on
3. Maintain health of plants during propagation	3.1 Monitor new plants and take remedial action as needed 3.2 Check for disease or pests and treat according to permaculture principles 3.3 Check for root growth and pot into larger container if required 3.4 Water, shelter or shade depending on prevailing weather conditions, size of container and needs of species 3.5 Harden off in a sheltered area before planting out
4. Maintain garden propagation system year round	4.1 Check propagation area between seasonal propagation activities and clean or tidy to avoid disease 4.2 Maintain health of mother plants for propagation purposes 4.3 Maintain stocks of containers, labels, stakes and ties for future use 4.4 Maintain stocks of potting materials and nutrient additives 4.5 Keep propagation system clean and weed free at all times

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER214 Propagate plants for a permaculture garden system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- prepare for plant propagation
- propagate plants using garden techniques
- maintain healthy new plants and mother plants

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to propagation, such as:
 - using reclaimed or reused containers (suitably cleaned to avoid cross-contamination)
 - labelling systems using reclaimed materials
 - maintaining rare and unusual varieties
 - using edges and valuing marginal or unusual plants in micro-climates
 - sharing and swapping to increase biodiversity and mutual wellbeing
 - preserving provenance of locally indigenous species
 - testing and trialling for new plants or resistant varieties
 - global food plant preservation including seed saving
- principles of sustainable horticultural practices
- propagation techniques, such as:
 - soft wood cuttings
 - hard wood cuttings
 - tip and root cuttings
 - layering and division

- grafting (whip and tongue, saddle and wedge)
- seed sowing
- basic plant nutrition
- potting mixes suitable for propagation in a garden setting, such as:
 - compost and worm casting mixes
 - sieved and graded sands
 - blends used for different purposes or different times of year
 - sphagnum moss
- basic plant growth and development
- small-scale glass, shade or poly house structures
- methods of waste disposal causing minimal impact on the environment

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

Assessment Requirements for AHCPER215 Assist with garden soil health and plant nutrition

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- undertake simple soil assessment tests
- add organic or allowable nutrients to improve soil
- Protect soil to maintain moisture and overall soil health

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to soil health and plant nutrition, such as:
 - working with natural soils rather than importing soil
 - soil as an ecosystem
 - soil as biomass and carbon capture and storage
- principles of sustainable horticultural practices
- soil testing techniques, such as:
 - jar test for texture
 - ribbon test and ball test
 - pH testing
 - surface evaporation test
 - worm count
- basic plant nutrition
- allowable additives to improve soils, such as:
 - compost and worm castings
 - compost teas

- rock dust
- gypsum
- green manures
- manures/animal bedding materials
- leaf mould
- plantings – green manures, nurse plants
- companion planting
- dynamic accumulators
- chop and drop
- nutrient trapping systems
- greywater use
- organically certified products
- methods of waste disposal causing minimal impact on the environment

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture to assess this unit of competency and/or have completed a Permaculture Design Course (PDC) and/or have completed the Permaculture Demonstrator Skill Set.

AHCPER301 Research and communicate information on permaculture principles and practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to research permaculture principles and practices, develop research techniques to gather general information on permaculture and non-permaculture systems and appropriately communicate information within culturally diverse groups.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AHCPER301 Research and communicate information on permaculture principles and practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research general information on permaculture
- identify differences between permaculture and other land management or land use practices
- share general information with others on permaculture

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- similarities and differences between other land use and management practices and permaculture, such as:
 - conventional broad-acre farming
 - battery chicken farms
 - intensive meat production facilities (e.g. feedlots, piggeries)
 - fish farming
 - biodynamic agriculture
 - organic mixed farms
- culturally appropriate speech and behaviour
- basic research techniques
- using primary data sources:
 - original data gathered by the researcher
 - measurements

- photographs
- maps or sketches
- soil tests
- observations of light, shade, sun angle
- flora and fauna present at the site
- slope and contour information
- observation of site and adjoining landscape features (e.g. sector analysis)
- weather observations
- using secondary data sources:
- data provided by government departments and agencies, local groups (such as Landcare) or individuals (such as neighbours)
- survey documents, maps and plans
- official weather data
- photographs, such as Google Earth
- communication techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER302 Develop recommendations for integrated plant and animal systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to develop recommendations for integrated plant and animal systems and requires the application of sound knowledge of permaculture and a broad range of plant-related and animal-related skills.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify scope of integrated plant and animal system required	1.1 Identify client needs and the nature of the job by gathering all relevant information from the client 1.2 Assist client to understand the concept of an integrated plant and animal system 1.3 Define client needs using research and observation
2. Develop options for preferred solutions	2.1 Identify options or devise strategies using research and experiential awareness, permaculture principles and enterprise work procedures 2.2 Examine options or evaluate strategies using problem-solving techniques 2.3 Determine the options based on appropriate evidence, availability of resources, energy, sound cultural principles, permaculture practices, and enterprise work procedures
3. Recommend the preferred solution	3.1 Recommend the integrated plant and animal method of establishment and probable outcomes to the client 3.2 Refer to the origin of the plant and animal species and their cultural requirements in an integrated system where necessary 3.3 Respond appropriately to client requests for clarification or expansion 3.4 Prepare drawings and tables to show how the systems integrate to increase yields, reduce work and eliminate waste 3.5 Record recommendations and report to client appropriately

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD844IPA02B.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

Assessment Requirements for AHCPER302 Develop recommendations for integrated plant and animal systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify client needs and the nature of the job
- determine options for developing an integrated plant and animal system
- communicate with clients, work team members, supervisors, suppliers, contractors and consultants
- identify plants
- provide information on the characteristics, needs and functions of plants and animals in integrated systems
- interpret site designs, maps, ground plans and specifications
- prepare drawings and tables showing how the systems integrate

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles related to integrated plant and animal systems
- permaculture practices, such as:
 - minimising effort for maximum effect
 - multiple uses for each element in the system
 - more than one way of providing important functions
 - re-using and valuing resources and energy
 - encouraging productivity of the system
 - seeing solutions not problems
 - using vertical space and other edges and connections
 - preventing waste and loss of resources from the system

- methods of design, such as planning spatially and allowing for overhead and underground structures, shadow, slope and sun angle
- an understanding of the place of permaculture topics sometimes relevant to integrated plant and animal systems, such as:
 - pattern understanding
 - ecological principles
 - climate and weather
 - water
 - soils
 - earthworks
 - aquaculture
 - species identification and selection information
 - plants in integrated systems
 - animals in integrated systems
- local plant suppliers, animal suppliers, consultants, services, products and contractors and availability of local resources
- patterns in permaculture design, such as:
 - patterns in space, such as planting patterns, naturally occurring patterns in nature (radial and bilateral symmetry, spirals, circles, dendritic and mandala patterns)
 - patterns in time, such as succession planting, breeding cycles, seasonality
 - patterns in human culture, such as gardening systems
 - nature as the model for design, such as stacking or layering as with a natural forest
 - gravity as a force for design, such as using contours in design
 - nutrient, water and energy capture, storage and re-use according to the inputs, outputs and intrinsic features of the system

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER303 Maintain integrated plant and animal systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to maintain integrated plant and animal systems, undertake maintenance, and maintain records of activities. Maintaining integrated plant and animal systems requires a knowledge of permaculture activities appropriate to climate and soil types, plants and animals commonly found on permaculture properties, permaculture principles and practices and typical permaculture solutions for water catchment and storage and soil maintenance and improvement for plant and animal systems.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Plan maintenance of integrated plant and animal systems	1.1 Assess maintenance requirements for the integrated plant and animal system 1.2 Consult stakeholders about maintenance activities where required 1.3 Determine and source the required equipment, machinery and materials for maintenance activities 1.4 Read and interpret permaculture design specifications for the property and follow any specific directions on maintenance approaches and strategies 1.5 Plan movement through production areas to minimise disturbance and degradation during maintenance activities
2. Undertake maintenance activities	2.1 Maintain a clean and safe work area 2.2 Take appropriate measures to avoid degradation and disturbance to soil, plants, animals, waterways and other parts of the ecosystem 2.3 Monitor activities of personnel and visitors to reduce risks to the productive systems undergoing maintenance
3. Complete maintenance activities	3.1 Make site good on completion of maintenance activities 3.2 Clean and store equipment and machinery appropriately on completion of maintenance activities 3.3 Remove or store excess materials 3.4 Maintain records of maintenance activities

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD843IPA03B.

Assessment Requirements for AHCPER303 Maintain integrated plant and animal systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan maintenance activities for integrated plant and animal systems
- undertake maintenance
- record and report on completion of activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- Integrated plant and animal systems, such as:
 - gardens, orchards, organic farms, woodlots and forests that include animals in free range or rotational systems
 - balanced ecosystems where the needs of all species are met
 - systems where poultry provide fertility, pest control and other services to plants, such as:
 - chicken-orchard systems
 - duck-rice systems
 - poultry used as tractor
 - frogs, birds and other wild creatures attracted to the garden to maintain ecological balance
 - patterns seen in nature, such as stacking and layering of plants in a forest, used in deliberate design
- plants and animals commonly found on permaculture properties
- plant groups and vegetation structures
- permaculture practices, such as:

- composting of weeds
- chop and drop practices
- feeding weeds to animals
- soil support and enhancement strategies
- animal husbandry strategies
- permaculture design information, such as:
 - permaculture site plan
 - components of integrated plant and animal systems
- the role of animals in improving soil, recycling nutrients, managing ‘weedy’ plants and controlling pests and diseases
- plants as indicators and improvers
- typical permaculture solutions to water catchment and storage for integrated plant and animal systems
- recycling of materials and waste

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is NOT sufficient at this level.

Assessment Requirements for AHCPER304 Carry out animal care, maintenance and treatment programs in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- monitor animal housing, enclosures and fencing and act to ensure good care and hygiene
- assess and provide appropriate animal nutrition and watering provision
- manage and reuse manures and other animal ‘wastes’ safely and hygienically
- diagnose parasitic infestations, diseases and injuries
- select and apply appropriate means to treat parasites, diseases and injuries

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles
- animal care, maintenance and treatment programs, such as:
 - maintenance of animal housing, enclosures and fencing, covering hygiene and welfare
 - ensuring availability of suitable forage, fodder and supplementary feedstuffs, and adjusting stocking rates, ranging and rotation schedules to suit
 - coordinating integration of animal ranging and maintenance with plant production systems (ranging in orchard to manure trees, reduce weeds, pests, eat windfall fruit, tractoring systems, compost manures and housing litter, maintain firebreaks)
 - researching, assessing, sourcing and preparing supplementary stock feed requirements, feeding quantities and schedules
 - researching and applying organic alternatives for treating stock in compliance with organic certification authorities, which may include herbal and homoeopathic treatments, mineral and vitamin supplements and permitted medications

- developing appropriate handling procedures to reduce stress
- harvesting, sourcing and handling useable products (such as milking and collecting eggs)
- requirements for animal housing, enclosures and fencing
- animal health and nutrition requirements
- information documented in animal care, maintenance and treatment records, such as
 - stocking rates
 - rotation schedules
 - pasture condition
 - feeding details
 - harvest records
 - details of equipment and materials used
 - the performance of equipment, faults and malfunctions
 - number of treated livestock and details of treatment, including spur docking for roosters, hoof trimming and other mechanical, non-chemical treatments
 - any testing carried out and results
 - expiry of withholding periods
 - evaluation of treatment effectiveness
 - observed abnormalities or behaviour in livestock
- methods for harvesting, sourcing and handling useable products (e.g. milking, collecting eggs)
- types of parasite infestation, their symptoms and seasonal incidence
- types of health promotion practices, including allowable organic methods
 - assessing the requirements of the particular animals for shelter, enclosure, rotation, food and medicinal plants
 - dosage and rates of treatments appropriate to the identified type of animal, its body weight and severity of infestation, infection or injury
- relevant Codes of Practice with regard to the safe use and handling of hazardous substances
- withholding periods for treated animals

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER305 Implement crop maintenance and harvesting programs for permaculture systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret site plans and crop maintenance and harvesting schedules
- harvest or maintain crops correctly and without damaging produce
- coordinate work group, contractors and own activities

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to obtaining a yield
- principles of maintaining crops and the methods used to maximise crop yields
- maintenance techniques for a range of crops, such as:
 - manual thinning
 - selective harvesting
 - training
 - summer and winter pruning
 - hedging
 - skirting
 - topping
 - trimming
 - picking
 - bagging
 - trellising
- maturity or ripeness properties of crops when ready for harvest

- effects of maintenance operations on plant growth, habit and production levels of maintenance operations
- maintenance of soil health and impact on production
- enterprise quality procedures and characteristics of a crop relative to varying market requirements

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER306 Use weedy plants in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- recognise a range of weedy plants and associated organisms within a particular permaculture enterprise
- identify uses of weedy plants in a permaculture system
- identify control methods used in permaculture weedy plant management plan
- implement a permaculture weedy plant management plan
- assess progress and effectiveness of the permaculture weedy plant management plan

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices in relation to the management of weedy plants
- weedy plant recognition
- strategies used in weedy plant management plans, such as:
 - organic chemical, biological and cultural control methods and treatments available to the enterprise within the parameters of a permaculture weedy plant management plan
 - range and use of tools, equipment and machinery available to the enterprise for implementing a permaculture weedy plant management plan
 - animal systems to use the weedy plant as a food source
 - plants and planting strategies to out-compete weedy plants or to be used as a follow up to successful treatment
- site monitoring and analysis techniques that may be used to implement a permaculture weedy plant management plan
- roles that weeds play within an ecological system, such as:

- soil stabilisers
- fodder for wild and domestic animals
- nutrient traps
- nutrient mining from subsoil
- identification of a range of edible weedy plants
- uses for weedy plants including commercial uses, such as:
 - animal fodder
 - basket making
 - compost teas
 - food and medicinal products, such as nettles as cheese wraps or herbal teas

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Certificate is not sufficient at this level.

AHCPER307 Establish a rural permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish a rural permaculture system from a permaculture design, as well as knowledge of a broad range of integrated plant and animal systems, earth shaping skills, soil improvement, water harvesting and work site coordination skills.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to establish a rural permaculture system	1.1 Read and interpret the design for the permaculture system 1.2 Identify the site, planting methods and system features 1.3 Select materials, tools, equipment and machinery
2. Coordinate establishment of the rural permaculture system	2.1 Coordinate work tasks in a sequential, timely and effective manner 2.2 Establish the permaculture system according to work health and safety requirements and with due consideration for environmental implications 2.3 Maintain a clean and safe work area throughout
3. Prepare the area	3.1 Undertake earthworks if required 3.2 Select and apply additives to the soil as required 3.3 Mark out patterns or positions of elements on site according to permaculture design
4. Undertake positioning of elements in the rural permaculture system	4.1 Inspect elements prior to planting, introduction or installation and remove elements with major defects 4.2 Trim or treat plants with minor defects to maintain health and vigour 4.3 Position elements to enable them to develop their full potential according to zone and sector analysis, pattern understanding and the permaculture design 4.4 Provide elements with post-installation care
5. Monitor establishment of the rural permaculture system	5.1 Monitor the system and take corrective action as needed 5.2 Identify situations which will prevent elements from reaching their full potential 5.3 Complete works for the permaculture design
6. Complete establishment of the rural permaculture system	6.1 Remove or dispose of waste material from the site 6.2 Clean, maintain and store tools, equipment and machinery 6.3 Report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER307 Establish a rural permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- communicate with work team members, supervisors, contractors and consultants
- utilise recording, reporting, analysis and work procedure documents
- read and interpret the permaculture design
- prepare the area for installation of elements of design
- install elements progressively over an appropriate period of time to establish the rural permaculture system

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of permaculture and practices in a rural context
 - rural permaculture system design for a farm or small holding where permaculture is practiced
- zone and sector analysis, for example:
 - consideration of the frequency of use and intensity of need of elements in the system
 - consideration of the spatial requirements of elements in the system
 - mutual benefit and connections between zones
 - consideration of the specific needs of the location of the system in terms of climate, access, slope, potential for wild fire, flood, tsunami or other catastrophic force
 - Consideration of the neighbouring or local environment, its need, products and intrinsic features
- Establishment of permaculture elements:
- Elements which together form a system

- species chosen for their functions in the overall system including plants, animals and objects
- elements chosen for mutual benefit
- elements which address important functions such as energy, water, food and fuel
- elements which support the needs of the system within the overall design
- the objectives of the plant system establishment program, including finished plant system forms, site appearance, end use and time constraints
- the interactions between plants and animals and how to maximise the benefits
- cultural requirements, planting procedures and follow-up care for plants
- environment and habitat requirements of animal species
- the identification of pests, diseases, parasites, and deficiencies that are likely to affect plants and animals and the use of appropriate treatments
- soils and appropriate soil amelioration techniques
- the ecology of the native species, and their value in a permaculture system

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER308 Establish an urban permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to establish an urban permaculture system from a permaculture design, as well as knowledge of a broad range of integrated plant and animal systems, urban retrofitting skills, soil improvement, water harvesting and work site coordination skills.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Prepare to establish an urban permaculture system	1.1 Read and interpret the design for the permaculture system 1.2 Identify the site, planting methods and system features 1.3 Select materials, tools, equipment and machinery
2. Establish the urban permaculture system	2.1 Coordinate work tasks 2.2 Establish the permaculture system 2.3 Maintain a clean and safe work area
3. Prepare the area	3.1 Undertake site retrofitting as required 3.2 Select and apply additives to the soil as required 3.3 Follow the permaculture design and mark out patterns or positions of elements on site
4. Position elements in the urban permaculture system	4.1 Inspect elements prior to planting, introduction or installation and remove plants with major defects 4.2 Trim or treat plants with minor defects to maintain health and vigour 4.3 Position elements to enable them to develop their full potential according to zone and sector analysis, pattern understanding and the permaculture design 4.4 Provide elements with post-installation care
5. Monitor establishment of the urban permaculture system	5.1 Monitor the system and take corrective action as needed 5.2 Identify situations which will prevent elements from reaching their full potential 5.3 Complete works for the permaculture design
6. Complete establishment of the urban permaculture system	6.1 Remove or dispose of waste material appropriately from the site 6.2 Clean, maintain and store tools, equipment and machinery 6.3 Report work outcomes

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit - equivalent to QLD843DES08B.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AHCPER308 Establish an urban permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- Communicate with work team members, supervisors, contractors and consultants
- utilise recording, reporting, analysis and work procedure documents
- interpret the permaculture design
- install elements progressively to establish the urban permaculture system (over an appropriate period of time)

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of permaculture and practices in an urban context
- Urban permaculture systems, such as:
 - houses and gardens where permaculture is practiced, or a productive section of it
 - community gardens or city farms where permaculture is practised
 - school gardens where permaculture is practised, or productive sections of them
 - Chicken, rabbit, guinea pig or other tractor systems
 - continuous worm farm systems
 - chicken dome pattern systems
 - tyre pond and mandala aquaculture systems appropriate to an urban permaculture system
 - aquaponics systems
 - duck and rice systems and other integrated systems appropriate to an urban permaculture system which utilise an animal, fish or bird species to generate a yield in association with plant species

- Zone and sector analysis
 - Consideration of the frequency of use and intensity of need of elements in the system
 - Consideration of the spatial requirements of elements in the system
 - Mutual benefit and connections between zones
 - Consideration of the specific needs of the location of the system in terms of climate, access, slope, potential for wild fire, flood, tsunami or other catastrophic force
 - Consideration of the neighbouring or local environment, its needs, products and intrinsic features
- Elements in permaculture elements
 - Elements which together form a system
 - species chosen for their functions in the system, including plants, animals and objects (built or existing)
 - elements which are chosen for mutual benefit
 - each important function (energy, water, food, fuel etc.) is supported by many elements
 - elements support the needs of the system within the overall design
- the interactions between plants and animals and how to maximise the benefits
- plant and animal species and their cultivars or breeds and what they contribute to the system
- cultural requirements, planting procedures and follow-up care for plants
- environment and habitat requirements of animal species
- the identification of pests, diseases, parasites, and deficiencies that are likely to affect plants and animals and the use of appropriate treatments
- soils and appropriate soil amelioration techniques
- the ecology of the native species, and their value in a permaculture system
- site retrofitting for urban permaculture systems:
 - constructing soil retainers
 - installing irrigation and drainage systems including swales, diversion drains, mulch-pit paths
 - establishing integrated plant and animal systems
 - collection and storage of nutrients or water
 - solar passive modifications to structures

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER309 Install and maintain permaculture water systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit provides the skills and knowledge to install and maintain permaculture water systems, organise resources for installation work, set out and prepare site, install water system components, complete installation work, commission water system systems and communicate with work team members, supervisors, contractors and consultants.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Organise resources for	1.1 Identify the construction site and construction method for the

Element	Performance criteria
installation work	<p>permaculture water system according to the permaculture plan</p> <p>1.2 Select materials, tools, equipment and machinery, water storage, movement and filtering systems according to the permaculture design requirements</p> <p>1.3 Check parts and equipment delivered to the site according to system drawings and specifications on the permaculture plan</p> <p>1.4 Check water supply to ensure that it is compatible with system specifications</p> <p>1.5 Carry out pre-operational and safety checks on tools, equipment and machinery according to manufacturer's specifications</p> <p>1.6 Select, use and maintain suitable safety and personal protective equipment</p>
2. Set out and prepare site	<p>2.1 Measure and mark out permaculture water system lines or lay out in accordance with the permaculture plan</p> <p>2.2 Dig trenches, where required, at the specified depth without damage to services, facilities, features and established plants</p> <p>2.3 Ensure that equipment operation and work practices conform with OHS requirements</p> <p>2.4 Observe any regulations and legislative requirements relevant to the situation</p> <p>2.5 Consider the needs of other stakeholders while setting out and preparing the site for permaculture water systems</p>
3. Install permaculture water systems	<p>3.1 Interpret the permaculture plan and, where applicable, supervise and monitor work by contractor</p> <p>3.2 Assemble and connect parts of irrigation systems, where used, according to manufacturer's specifications and the permaculture plan</p> <p>3.3 Install and adjust pump fittings and valves, where used according to manufacturer's specifications and the permaculture plan</p> <p>3.4 Maintain a clean and safe work area while installation work is carried out</p> <p>3.5 Check that works can be carried out without a licensed plumber and direct work to licensed individuals where required.</p>
4. Complete installation work	<p>4.1 Finish off earthworks to permaculture plan specifications</p> <p>4.2 Check the system configuration and capacity matches the installation plan</p> <p>4.3 Remove or dispose of waste material from the site, and restore site to original state in an environmentally aware and safe manner</p> <p>4.4 Clean, maintain and store tools, equipment and machinery</p>

Element	Performance criteria
5. Commission permaculture water systems	5.1 Prime, start up and flush irrigation and pump systems, where installed, in accordance with the operation manual 5.2 Identify and correct any operating faults according to operations manual 5.3 Test, calibrate and monitor equipment, where used, according to manufacturer's specifications 5.4 Record or report work outcomes, where appropriate
6. Monitor and maintain permaculture water systems	6.1 Regularly check permaculture water systems and monitor for optimum performance 6.2 Carry out routine maintenance procedures on permaculture water systems 6.3 Carry out repairs on permaculture water systems as required 6.4 Install erosion and sediment control measures, if required, in accordance with manufacturer's recommendation and the permaculture plan

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCPER309 Install and maintain permaculture water systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- organise resources for installation work
- set out and prepare site
- install permaculture water systems materials and components, excluding works requiring a licensed plumber.
- commission a permaculture water system
- monitor and maintain permaculture water systems
- communicate with work team members, supervisors, contractors and consultants

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture practices regarding water including natural flows, rainwater and wastewater, storage, movement and retention of water in the system
- permaculture water systems, such as:
 - swales
 - contour banks
 - terraces
 - mulch-pit paths
 - diversion channels and other passive installations
 - mains pressure systems
 - low pressure or gravity systems
 - below-ground systems
 - above-ground systems

-
- spray, dripper and capillary irrigation systems
 - water tanks
 - guttering and first-flush diversion system
 - water supply components, such as:
 - mains
 - dam
 - bore
 - windmill
 - tank
 - channel
 - understanding of contours
 - installation methods and techniques for permaculture water systems
 - components of permaculture water systems
 - characteristics and operation of joints, valves and sprinkler components
 - operation of pumps and water flow rates
 - behaviour of water on varying terrain and soil types
 - soil water retention testing techniques
 - water quality and water filtration techniques
 - calculations for installing permaculture water systems
 - soil characteristics
 - regulations and legislative requirements, such as:
 - permits for pruning or removal of large trees
 - connecting to water systems
 - licences for operating specialised machinery, such as chainsaws, skid steer loaders and forklifts
 - setting up traffic and pedestrian barriers
 - digging near services (phone, gas, power, water, sewerage and drains)
 - installing dams or diverting water in catchments
 - installing tanks
 - planning acts and codes
 - earth movement and digging guidelines and legislation
 - environmental legislation
 - land restoration codes
 - water conservation guidelines and legislation
 - soil movement regulations
 - habitat and wildlife protection legislation

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER310 Install structures for permaculture systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to install permaculture structures and features. These structures and features may include fences, trellises, animal housing, sheds, pergolas, appropriate technologies and other constructed features.

All work is carried out to comply with workplace procedures. Manufacturer's specifications are observed and operating instructions are followed when using tools and equipment.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Assessment Requirements for AHCPER310 Install structures for permaculture systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- interpret permaculture design drawings and specifications
- measure and mark lengths of materials accurately
- join and cut materials using different techniques and methods
- install and check permaculture structure

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles regarding structures and the built environment
- Permaculture design drawings and specifications, such as:
 - Permaculture design including construction detail drawings
 - measured drawing of structure in accordance with permaculture principles
- measuring principles and techniques
- typical permaculture structures, such as:
 - garden structures and features
 - fences and trellising
 - animal housing and shelters
 - netting structures and protective devices for plants
 - paving and landscaping
 - composting and worm-farming structures
 - retaining walls, observing relevant regulatory conditions
 - sheds or small outbuildings, observing relevant regulatory conditions)

- components of houses or other buildings, observing relevant regulatory conditions
- the correct use of hand and power tools and other work health and safety requirements associated with installing structures and features
- comparative environmental implications associated with excavation and construction activity
- safe lifting and transporting techniques
- appropriate use of personal protective clothing and equipment (PPE)
- appropriate use and installation of safety signs and barriers
- site access points
- implication of alteration to water flow during and after construction

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER311 Kill and dress small livestock for domestic consumption

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit provides the skills and knowledge required to identify and select small livestock for slaughter, preparing killing equipment, conducting safe and humane slaughter of small livestock, dressing and protecting meat, appropriately storing meat and ensuring meat is suited to end-use requirements. Competency also requires the application of skills and knowledge to hygienically clean equipment and slaughter areas and dispose of waste materials.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who work under broad direction and take responsibility for their own work including limited responsibility for the work of others. They use discretion and judgement in the selection and use of available resources and complete routine activities.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AHCPER311 Kill and dress small livestock for domestic consumption

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify and select small animals for slaughter
- humanely and hygienically kill small livestock
- dress and butcher small livestock carcasses
- clean facilities and equipment
- prepare and store meat
- dispose of wastes in an environmentally responsible manner

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture practices with regard to killing small livestock, such as:
 - need to supply meat for domestic human or animal consumption
 - need to cull pest animals such as rabbits
 - need to cull animals in excess
 - need to destroy old or sick small livestock
- health restrictions and laws applying to the slaughter of livestock for sale, including not offering for sale small livestock slaughtered for domestic consumption, except where these laws are well understood and adhered to)
- relevant legislative work health and safety requirements, especially where they relate to livestock and slaughter, and animal handling techniques
- animal welfare legislation, such as:
 - meat industry health and safety guidelines
 - Australian standard for hygienic production of meat for human consumption

- ANZFA food standards code
- state and territory regulations regarding meat slaughter handling and consumption
- industry and enterprise quality assurance standards
- withholding periods
- animal welfare legislation
- disease control legislation and requirements
- withholding periods
- usable products other than meat, such as:
 - feathers
 - skins
 - chicken feet and combs
- usable offal and offal disposal regulations, such as:
 - select cuts, such as poultry offal or rabbit kidneys, that are fit for human consumption
 - handling offal safely and hygienically
- human health and hygiene
- health issues affecting both humans and small livestock
- end uses for animal carcasses, such as:
 - meat for human consumption
 - disposal of culled old or sick small livestock
 - maximising useful meat cuts and other products of slaughter
- storage or treatment of products from animal slaughter, such as:
 - cool room, refrigerator and freezer
 - smoke-house or curing facilities
 - salting barrel
 - cauldron or large boiler for cooked treatments
 - containers for storage
- poultry and small animal carcass hanging methods, such as:
 - dressing to avoid cuts to carcass or pelt
 - preparing skin for drying, storage or disposal
 - protecting from dust, heat, flies, wild birds or wild animals with appropriate gauze or bags or shelters until process is complete
 - cold room or cool room
 - refrigerator or freezer

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER312 Plan organic garden and orchard systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan organic garden and orchard systems. It requires the application of horticultural and permaculture knowledge including permaculture principles, plant types, conditions and requirements to establish orchards for optimum production.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Assess site for organic garden and orchard system	1.1 Inspect the site for environmental and physical attributes 1.2 Research site characteristics, using a range of information sources 1.3 Test soil and analyse the results 1.4 Identify site constraints and opportunities 1.5 Define location of existing structures and services 1.6 Prepare site plan and zone and sector plan of site, based on information collected
2. Select plants for organic garden and orchard system	2.1 Select suitable plant varieties and types 2.2 Determine preferred type of plant materials for planting 2.3 Determine number and size of plants and plant materials
3. Develop planting plan for organic garden and orchard system	3.1 Identify zone and sector details from the site plan 3.2 Identify and place plants to be installed 3.3 Record required actions, timelines and specific information on the plan 3.4 Investigate availability of plants, materials and services for the system

Foundation Skills

Assessment Requirements for AHCPER312 Plan organic garden and orchard systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess site for planting
- test soil and analyse the results
- select plants
- identify zones and sectors of site to ascertain best planting locations
- identify structures and services and how these may impact on the plan
- develop planting plan to include at least 5 fruit trees or shrubs

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and ethics
- permaculture site planning
 - boundaries of sites drawn at an appropriate scale
 - direction of North (or sunward)
 - location of plants
 - other information relevant to a permaculture garden and orchard system drawn in clear and accurate graphic style
 - planting schedules and timelines, including Gantt charts
- zone and sector planning, such as:
 - zones for garden and orchard systems (Zones 1 and 2)
 - sector information such as prevailing winds, fire aspect, winter and summer sun angles, best locations for sun-loving and shade-tolerant species
 - microclimate information

- zone and sector plans drawn as overlays to a site plan
- garden and orchard systems, such as:
 - an orchard with 5 to 10 or more assorted fruit trees or shrubs
 - integrated plant and animal systems
 - consideration of and design for plant ecosystem relationships
- soil structure, types and function, including soil tests for agricultural purposes
- soil maintenance and improvement techniques
- aims and purposes of building organic garden and orchard systems
- design principles for organic garden and orchard systems
- features and characteristics of plants used in organic garden and orchard systems
- growing requirements of plants used in organic garden and orchard systems
- biosecurity policies and principles

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER313 Coordinate preparation and storage of permaculture products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- plan for preparation of permaculture products
- process and preserve permaculture products
- pack, present and store permaculture products
- coordinate the work of others in the preparation and storage process

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles related to product preservation and storage
- seasonal availability cycles
- products suitable for storage
- the following plant products:
 - fruits
 - vegetables
 - seeds
 - herbs
 - flowers
 - foliage
 - grains
 - bulbs
 - tubers
 - nuts

- mushrooms
- wild harvest plants
- oils
- firewood
- bamboo
- timber
- legumes and pulses
- mulch
- straw
- hay
- sawdust
- sap
- the following animal products:
 - meat
 - eggs
 - milk and dairy products
 - honey and bee products
 - young animals
 - fish fingerlings
 - feathers
 - wool
 - manure
 - bones
- storage methods appropriate to particular products
- treatment methods appropriate to particular products,:
 - removal of dirt and foreign material
 - stripping excess leaves and/or trimming
 - brushing
 - washing/hydration
 - drying
 - applying preservatives
 - dipping
 - observing quarantine requirements
 - storing in a controlled environment
 - comply with organic standards, if appropriate
- the importance of maintaining the quality of products including handling and storage requirements
- correct storage conditions for products:
 - specifications for storage facilities
 - environmental conditions such as temperature, humidity and light

- length of storage
- position in the storage facility: shed, cellar, root cellar, pantry, barn, refrigerator, freezer, drying room
- cleaning processes to ensure a level of hygiene that protects the quality and health status of the stored products
- hygiene issues in the handling and storage of biological products

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER314 Read and interpret property maps and plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to read and interpret property maps and plans, take information from maps and use maps in field situations.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Recognise maps and plans	1.1 Define different types and uses of maps and plans 1.2 Recognise features and characteristics of different maps and

Element	Performance criteria
	plans 1.3 Identify scale 1.4 Define and locate North 1.5 Recognise mapping conventions and common symbols
2. Take off information from maps	2.1 Determine distances and areas from maps and plans 2.2 Identify topographic features from maps and plans 2.3 Recognise site boundaries and site structures from maps and plans
3. Use maps in field situations	3.1 Locate current position in the field using landmarks and key geographical features 3.2 Recognise hazards and potential hazards in traversing from location to destination and interpret these from maps or plans, field observations and local knowledge 3.3 Check accuracy of maps or plan content against site features 3.4 Set out contour lines on site from maps or plans 3.5 Locate keylines and key points on map and in the field 3.6 Set out zones or property boundaries using grid system from maps or plans

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER314 Read and interpret property maps and plans

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- define maps and plans
- determine distances and areas
- identify topographical features
- identify site boundaries and site structures
- use maps to take-off information
- use maps in field situations

Knowledge Evidence

The candidate must demonstrate knowledge of:

- maps and plans
 - paper
 - electronic
 - 3D models of sites, including sand-box models
 - contour models
 - elevations and cross-sections
 - aerial photographs
- the following mapping conventions: symbols, distance and scale, direction, coordinate systems, line and area symbols, true North, grid North and magnetic North
- land survey systems, map projections, colour and symbol systems
- contours, slopes and slope profiles
- keyline and key point locations, as described in *Water for Every Farm* by P.J. Yeomans
- topographic features

- curved planes on flat surface distortions
- means of locating current position in the field, such as:
 - GPS
 - other positioning systems such as the sun, moon and stars
 - compass bearings

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER315 Coordinate community projects

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to coordinate small-scale community projects and small groups of people working on a permaculture-related project.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Prepare for community project	1.1 Clarify requirements of the community project after community consultation and design

Element	Performance criteria
	1.2 Identify personnel, equipment and material resource requirements appropriate to the scope of the project 1.3 Identify on-site, off-site, purchased, traded or scavenged resources 1.4 Identify and document the order of activities and allocate time to carry them out 1.5 Identify the environmental implications of proposed community projects and assess likely outcomes 1.6 Identify work health and safety hazards, assess risks, implement controls and take appropriate actions 1.7 Select, use and maintain personal protective equipment appropriately (PPE)
2. Organise resources	2.1 Acquire materials, equipment and resources 2.2 Apply for external agency permits in the correct order where required 2.3 Notify affected parties of works to be undertaken where required 2.4 Organise delivery of materials, equipment and resources to site 2.5 Organise personnel to be on site when they are required
3. Coordinate and report on activities	3.1 Coordinate all resources to suit the scope of the project and the project plan 3.2 Direct personnel in activities for each period of work 3.3 Monitor personnel, activities, timelines and resource usage and document 3.4 Recognise contingency situations and take corrective action as appropriate 3.5 Select and train teams to take over the running of the project to ensure the long-term survival of the project, if required 3.6 Write a project report to inform the community and other stakeholders

Foundation Skills

Assessment Requirements for AHCPER315 Coordinate community projects

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- read and interpret documentation associated with community projects
- organise field staff and volunteers
- represent and support community organisations
- calculate material and resource requirements
- coordinate project activities
- document and report results

Knowledge Evidence

The candidate must demonstrate knowledge of:

- community projects, such as:
 - small or short-term projects
 - projects that form part of larger projects
 - arranging social events
 - carrying out fundraising and sponsorship
 - representing a community group or project
- environmental awareness associated with undertaking project works to ensure minimal impact on the environment
- work schedule programming
- hiring and subcontracting of labour
- attracting volunteers
- possible causes of disruption to work activities and contingency situations, such as:
 - delay in delivery and/or breakdowns with equipment and machinery

- poor weather conditions
- poor quality materials
- unforeseen problems
- provision for providing other work on the site or away from the site while problems are fixed
- delaying a project if possible and necessary
- responsibilities and requirements for obtaining external agency permits as necessary
- the range, use and availability of materials, equipment and resources required for a project
- work health and safety issues, legislative requirements and Codes of Practice
- community consultation
- project coordination principles
- meeting and committee protocols
- project reporting
 - the project name
 - author name and date
 - project description
 - progress of activities
 - promotions and publicity
 - OHS issues
 - expenditure
 - future project-related activities that require planning

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER316 Select plant and animal species for permaculture systems

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- assess permaculture system needs
- research plants and animals to inform the new permaculture system design
- select plant and animal species for a permaculture system
- monitor plant and animal systems during the establishment phase

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to species selection
- permaculture needs analysis
- bioregional analysis
- plant and animal species and their interactions and interrelationships, such as:
 - permaculture combinations – guilds, companions, nurse plants and animal companions
 - EVCs (Ecological Vegetation Classes)
 - indigenous animals and plants
 - what grows or thrives locally – plants, animals, birds, insects, fish, frogs, reptiles
 - food, fodder and medicinal plant species suitable for chosen animals
 - integrated plant and animal systems such as chicken tractors, cell grazing, aquaculture systems
- basic research techniques
- using primary data sources, such as:
 - original data gathered by the researcher
 - local wisdom

- weather observations
- flora and fauna observations
- using secondary data sources, such as:
 - data provided by government departments and agencies
 - publications
 - reference books, websites and journals
 - official weather data
- communication techniques

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER317 Build with earth, straw and reclaimed materials

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to build with earth, straw and reclaimed materials, using techniques that use local earth, straw and rock, and that turn problems into solutions by converting waste, surplus or low embodied energy materials into solid and serviceable structures.

All work is carried out to comply with workplace procedures. Individuals observe manufacturer's specifications and follow operating instructions when using tools and equipment.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Assessment Requirements for AHCPER317 Build with earth, straw and reclaimed materials

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research building methods
- prepare for the building project
- build with earth, straw and/or reclaimed materials
- limit and re-use surplus and waste materials
- ensure the standard of the finished built structure is appropriate to the permaculture design

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles regarding structures and the built environment
- Building methods, such as
 - mud brick
 - straw bale
 - cobb & light earth
 - rammed earth (Pise)
 - wattle and daub
 - stabilised/compressed earth brick
 - earth ship
 - aerated concrete
 - compressed paper and timber fibres
 - wool brick
 - air dried timber

- structural issues
- planning issues
- properties of materials and suitability of local soils and timbers for building uses
- environmental, logistical and safety factors, such as:
 - issues related to harvesting and milling of local timbers
 - possible contaminants in or on materials
 - weight and size of materials and their transport to the site
- reclaimed materials, such as:
 - commercial timber off-cuts and wastes
 - demolition materials (timbers, windows and doors, plumbing fittings, roofing materials, bricks and other masonry items)
 - railway sleepers, telegraph poles, bridge timbers and other heavy reclaimed timbers
 - metal mesh and grill-work (fridge and oven shelves, wire baskets, fence panels, bed frames and bases, chicken wire, aviary mesh, pig/dog wire and other wire mesh products in small or large quantities)
 - reinforcing mesh and rods, trench mesh
 - pallets and packaging crates
 - shipping containers, ex-transport carriages, old cars, trailers and caravans
 - mirrors
 - bottles (glass and plastic)
 - ceramics and flower pots
 - car & truck tyres, windscreens, panels and seats
 - machinery parts
 - drums and cans
 - palings and weatherboards
 - reclaimed concrete
- typical permaculture structures, such as
 - garden structures and features
 - fences and trellising
 - animal housing and shelters
 - seating and garden walls
 - retaining walls and small dam walls (including observing all regulatory conditions)
 - sheds or small outbuildings (including observing all regulatory conditions)
 - components of houses or other buildings ((including observing all regulatory conditions and work with professionals on larger structures)
- the correct use of hand and power tools and other work health and safety requirements associated with installing structures and features
- techniques for working with reclaimed materials such as de-nailing, stripping old paint, dressing timber
- WHS considerations associated with recycled materials such as identification of lead paint, broken glass, rusty metal, chemically treated materials

- comparative environmental implications associated with excavation and construction activity
- safe lifting and transporting techniques
- appropriate use of personal protective clothing and equipment (PPE)
- appropriate use and installation of safety signs and barriers
- site access points
- implication of alteration to water flow during and after construction

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER318 Plan propagation activities for a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan propagation activities for a permaculture system. It requires the application of permaculture principles, seasonal propagation opportunities, organic principles and plant growth science.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Research propagation requirements for the permaculture system	1.1 Assess propagation needs according to garden needs or permaculture design 1.2 Consider opportunities for propagation from local area, such as seed banks, tree or shrub prunings, unusual varieties to be traded or varieties purchased for propagation 1.3 Determine numbers of new plants to be produced for the needs of the system and/or for swapping, selling or community needs
2. Develop the propagation plan	2.1 Prepare a propagation plan according to research undertaken 2.2 Ascertain best methods for species to be propagated and include them in the propagation plan 2.3 Construct a seasonal or monthly timeline or calendar to keep track of propagation requirements 2.4 Maintain the propagation plan as an active document through the seasons
3. Implementing the propagation plan	3.1 Consult the propagation plan when planning monthly activities 3.2 Clear space in the propagating area for the activity to be undertaken 3.3 Set up materials and equipment for propagation work 3.4 Organise propagules and apply pre-treatments if required 3.5 Create new plants in prepared containers or the garden area according to the propagation plan 3.6 Water, fertilise, label, mulch, stake and tie new plants as required
4. Maintaining propagated plants to end use	4.1 Maintain new plants by watering, sheltering and checking for pest or disease attack 4.2 Remove any new plants that have failed to thrive to avoid cross-contamination 4.3 Apply allowable organic treatments to new plants if required 4.4 Harden off new plants in a protected place before planting, selling or swapping
5. Maintain a healthy and orderly propagation area	5.1 Maintain tidiness and orderliness of propagating area 5.2 Store propagating materials, potting media and containers for future use 5.3 Remove any weed or moss growth regularly to ensure basic hygiene of the propagating and hardening off spaces

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit.

Assessment Requirements for AHCPER318 Plan propagation activities for a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- research propagation requirements for the permaculture system
- develop a propagation plan
- implement a propagation plan
- maintain propagated plants to maturity or end use

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to propagation
 - using reclaimed or reused containers (suitably cleaned to avoid cross-contamination)
 - labelling systems using reclaimed materials
 - maintaining rare and unusual varieties
 - using edges and valuing the marginal – unusual plants in micro-climates
 - sharing and swapping to increase biodiversity and mutual wellbeing
 - preserving provenance of locally indigenous species
 - testing and trialling for new plants or resistant varieties
 - global food plant preservation, including seed saving
- propagation plan including such considerations as:
 - seasonal activities
 - seed saving
 - needs of the system for plants
 - mother plant location and frequency of use

- schedules and timelines
- principles of sustainable horticultural practices
- propagation techniques, such as:
 - cuttings – softwood, hardwood, semi-hardwood, root and tip
 - layering – stool, aerial and runner
 - division
 - grafting – whip and tongue, saddle, wedge, approach and bench
 - budding – shield and patch
 - seed sowing
- potting media suitable for propagation in a garden setting, such as
 - compost and worm casting mixes
 - sieved and graded sands
 - blends used for different purposes or different times of the year
 - sphagnum moss
 - water (hydroponics or aquaponics)
- plant growth, development and nutrition
- botany and physiology
- maintaining moisture levels in simple systems without causing disease
- systems for protecting new plants and seedlings, such as:
 - polyhouse or shade-house systems, including hoop systems on garden beds
 - systems using reclaimed materials, such as bag-and-frame cloches, bottle protectors for seedlings, tyre stacks, birdcages and wire baskets
 - glass houses
 - shade houses
 - naturally occurring or planned microclimates
- minimal environmental impact waste disposal and composting systems which destroy pathogens

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER319 Test, improve and maintain healthy soil in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to test, improve and maintain healthy soil in a permaculture system. It requires knowledge of soils and their components, testing methods, nutrient action and soil improvement systems.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Take soil samples from a number of places in the permaculture system	1.1 Obtain samples from several places over a site 1.2 Prepare the samples for testing 1.3 Label containers accurately with location identifier, date, soil test and tester
2. Test soil for range of plant and structural needs	2.1 Carry out soil tests for texture, organic matter, structure, pH, water infiltration and compaction 2.2 Have samples tested by a laboratory for nutrient levels and deficiencies if concerned or if particular requirements exist for the crops and livestock in the permaculture system 2.3 Re-test in a different season or soil temperature
3. Analyse soil improvement requirements	3.1 Determine requirements for soil improvement from tests carried out 3.2 Determine requirements for soil improvement from the laboratory test results, if taken 3.3 Identify soil biota in soil and ascertain how to optimise biodiversity 3.4 Research soil improvement options, including discussing with neighbours and experienced practitioners appropriate options for soil improvement
4. Implementing soil improvement plan	4.1 Develop a plan for soil improvement over time and vary it depending on the location on the site and the crop or livestock being grown 4.2 Calculate required quantities of allowable additives and supplements to improve soil health 4.3 Use products at recommended rates and according to any existing certification system applying to the land 4.4 Protect soil biota present in soil, including using appropriate mulches for perennial and annual plants
5. Maintain health of soil according to organic guidelines	5.1 Observe changes over time and record using tables and photographic records 5.2 Avoid practices that can cause deterioration in soil health such as over- or under- watering, over-grazing, over-cultivating and off-contour ploughing 5.3 Follow organic and permaculture guidelines to increase soil carbon

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit.

Assessment Requirements for AHCPER319 Test, improve and maintain healthy soil in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- take soil samples
- test soils
- analyse soil improvement requirements
- implement soil improvement plan according to permaculture guidelines
- maintain soil health

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to soil health and plant nutrition
 - working with natural soils rather than importing soil
 - soil as an ecosystem
 - soil as biomass and carbon capture and storage
- principles of sustainable horticultural practices
- how to read a laboratory soil test
- soil testing techniques, such as:
 - jar test for soil structure
 - ribbon test and ball test for soil texture
 - infiltration or permeability test
 - pH testing
 - compaction test
 - non-wetting soil test

- air-filled porosity test
- worm count
- microscopic biota in soils
- plant nutrient uptake and mineral action
- soil chemistry
- science of composting
- fungal and bacterial action and mulches appropriate to different plants
- additives to improve soils, such as
 - compost and worm castings compost teas
 - biochar
 - green manures
 - organic mulch
 - manures/animal bedding materials
 - leaf mould
 - plantings – green manures, nurse plants
 - companion planting
 - chop and drop
 - nutrient trapping systems
 - greywater use
 - organically certified products
 - amendments that may include rock dust, gypsum, dolomite, lime, zircon, sulphur and other minerals
- plant growth and development
- soil life, including microscopic life
- methods of waste disposal causing minimal impact on the environment
- the effects of conventional agricultural chemicals on soils and soil ecosystems

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

AHCPER320 Manage plant pests, diseases and disorders in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to manage plant pests, diseases and disorders in a permaculture system. It requires knowledge of healthy permaculture systems and the pests, diseases and disorders that might need management. It includes focussing on solutions in an integrated design, rather than reacting to infestations.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Identify existing and potential pests, diseases and disorders in the permaculture system	1.1 Using observation of plants in the permaculture system, identify existing or potential for pest attack, disease or disorders 1.2 Using climatic data and weather observations, identify existing or potential for pest attack, disease or disorders 1.3 Monitor balances within the system such as pest and predator balances 1.4 Maintain a record of observations
2. Research pest, disease and disorder prevention methods	2.1 Research pests, diseases and disorders using both primary and secondary sources 2.2 Consult widely and use both electronic and conventional reference material 2.3 Establish prevention methods for maintaining a healthy balance 2.4 Research possible negative effects of treatments on other elements of the permaculture system
3. Develop a pest and disease management program	3.1 Develop a plan based on the research conducted and the observations made 3.2 Include information about weather conditions, time of year, cycle of pests or disease vectors in the management program
4. Implement the pest and disease management program	4.1 Provide solutions that address the interactions of many elements in the system rather than spot treating outbreaks 4.2 Avoid practices that spread disease, such as propagating using diseased plants, or using un-sanitised tools when pruning orchard trees 4.3 Provide habitat and microclimate conditions for useful insects, plants, birds and animals 4.4 Carry out permaculture practices that minimise the risk of pest and disease problems 4.5 Update the management program regularly so that it is active and useful to the permaculture system
5. Monitor and record the management of plant pests, diseases and disorders over time	5.1 Keep records of pest and disease control operations, noting weather conditions and times of year 5.2 Use records to enable predictions of or responses to possible disease and pest recurrences in similar weather or times of the year 5.3 Maintain records over time to build a history of the permaculture system

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit.

Assessment Requirements for AHCPER320 Manage plant pests, diseases and disorders in a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify existing and potential pests, diseases and disorders in the system
- research methods of managing pests, diseases and disorders in a permaculture system
- develop a pest and disease management plan
- implement a pest and disease management plan
- monitor pest and disease managements

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices related to managing plant pests, diseases and disorders
- principles of maintaining healthy permaculture crops, such as:
 - companion planting
 - increasing diversity
 - providing habitat and food for pests' natural predators
 - healthy, balanced soil
 - minimal use of soluble fertilisers
- allowable control methods in organic systems, such as
 - deterrent organic sprays
 - pheromone traps and lures
 - predatory and/or parasitic insects, mites and other organisms as part of biological control
 - nutrient additives

- crop rotation
- covers and netting
- BT (*Bacillus thuringiensis*) and other action-specific micro-organisms
- symptoms of disease and disorders in plants
- care needed to avoid transferring infections (such as through grafting and pruning practices)
- stages of development of pest organisms and signs of pest presence on plants and animals
- planting for insectivorous birds, lizards, frogs and microbats
- fungal, bacterial and viral infestations and their symptoms
- disease vectors and plants that harbor them
- companion planting
- succession planting

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=c6399549-9c62-4a5e-bf1a-524b2322cf72>

AHCPER321 Demonstrate permaculture practices to small groups of learners

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to demonstrate permaculture practices to small groups of learners. Demonstration of techniques related to animals, plants, structures, energy, resources and community development are covered in a non-threatening and experiential setting. It is intended for school teachers and those who demonstrate permaculture skills to small groups of learners in different situations and contexts.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify audience for demonstration	1.1 Identify characteristics of audience to cater to their needs 1.2 Confirm numbers and, if possible, names of individuals 1.3 Identify time allowed for demonstration 1.4 Identify location and facilities where demonstration will take place
2. Identify topic for demonstration	2.1 Identify topic/s for demonstration 2.2 Research topic/s and clarify best demonstration location and facilities 2.3 Develop order of demonstration, from patterns to details
3. Develop demonstration methods and resources	3.1 Develop participatory planning activities for the sessions 3.2 Develop participatory learning activities for each topic 3.3 Prepare materials and equipment, including enough of everything for the audience size 3.4 Develop review and revision activities for longer sessions 3.5 Confirm all materials, tools and equipment is present and in working order, including safety equipment for the demonstration
4. Conduct demonstration	4.1 Conduct a site and safety briefing 4.2 Conduct a group introduction session for names and stories of participants 4.3 Clarify the planning of sessions for the participants 4.4 Clarify each learning activity and then conduct it 4.5 Conduct review and revision activities as required 4.6 Close the session and clean up in a participatory way that includes session participants
5. Take feed-back from audience	5.1 Conduct a review of the demonstration/s 5.2 Collect feed-back information and address any issues identified 5.3 Use feed-back in future demonstration planning

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Unit Mapping Information

New unit.

Assessment Requirements for AHCPER321 Demonstrate permaculture practices to small groups of learners

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify audience for demonstration
- identify topic/s for demonstration
- prepare resources for demonstration
- conduct demonstration
- collect and use feed-back to address immediate issues or for future demonstration planning

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and ethics
- Permaculture practices, such as:
 - minimising effort for maximum effect
 - multiple uses for each element in the system
 - using more than one way to provide important functions
 - re-using and valuing resources and energy
 - encouraging productivity of a permaculture system
 - seeing solutions, not problems
 - using vertical space and other edges and connections
 - preventing waste and loss of resources from a permaculture system
- participatory planning and learning activities for topics such as:
 - methods of design
 - pattern understanding and integrated systems

- animal and plant species selection methods
- ecological principles
- climatic and geological influences
- water in the system
- soils
- earthworks for capturing nutrients
- permaculture structures and features
- different appropriate technologies that can be used
- resource use and reuse
- energy

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate III (or higher) in Permaculture. Completion of a Permaculture Design Course (PDC) is not sufficient at this level.

Assessment Requirements for AHCPER401 Provide advice on permaculture principles and practices

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify client needs and requirements for information and advice
- propose a selection of permaculture practices and strategies that best suit the needs and resources of the client and the potential of the site
- provide information on permaculture principles
- provide advice on permaculture practices and strategies

Knowledge Evidence

The candidate must demonstrate knowledge of:

- principles of permaculture based on 12 principles in David Holmgren *Principles and Pathways Beyond Sustainability* and the work of Mollison and Slay
- ethics of permaculture: care for the earth, care for all people, fair share of surpluses, setting limits to biophysical growth (population, resource use and waste)
- permaculture practices and strategies, such as
 - personal, household, community and bioregional strategies
 - sustainable agriculture, horticulture, aquaculture and organic gardening
 - economic alternatives that support sustainable living
 - low energy and low embodied energy building and manufacturing
 - appropriate technology
 - restoration ecology and maintenance of biodiversity
 - sustainable community development, bioregional development and relocalisation
 - Reuse and return of products in manufacturing cycle and waste utilisation, waste water, grey water, sewage and resource treatment for re-use and recycling

- Sustainability education
- elements of permaculture systems
- functions of permaculture systems
- permaculture design techniques
- innovation in plant, animal and technology selection, use and performance
- recent practice in bioregional community development and local energy descent planning
- client communication techniques, record keeping and listening techniques
- preparation of reports and presentations for clients
- uses of Statements of Limitation in the giving of advice

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER402 Design a rural permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design a rural permaculture system. It requires the ability to negotiate with clients to develop a permaculture design brief, undertake a site analysis, develop design concepts and produce final design documentation.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Develop a design brief for a rural permaculture system	1.1 Initiate or respond to contact with the client 1.2 Consult with the client to establish purpose, needs and requirements of design 1.3 Develop a design brief in consultation 1.4 Negotiate cost structures and timelines
2. Undertake design analysis	2.1 Obtain existing maps, geospatial data and aerial photographs of property 2.2 Survey area included in Zones 1, 2 and 3 using suitable survey tools and equipment 2.3 Prepare a base plan 2.4 Record site assessment data on the base plan 2.5 Carry out bioregional analysis of the site 2.6 Carry out research into potential permaculture design elements 2.7 Choose permaculture design elements 2.8 Revise brief with client in relation to completed research and analysis
3. Prepare a design concept	3.1 Evaluate and determine a permaculture system concept 3.2 Prepare conceptual design drawings to illustrate conceptual themes and patterns informing the location and layout of proposed design elements 3.3 Develop and compile a bill of quantities 3.4 Prepare a list of plant and animal species and varieties suitable for the chosen concept 3.5 Prepare a preliminary budget for the conceptual design 3.6 Present the concept plan in a graphic style 3.7 Consult the client and agree on options and approaches for design development 3.8 Review and revise concepts, elements and the design brief after taking feedback from the client
4. Produce final design	4.1 Design the rural permaculture system in accordance with the design brief, research, analysis, chosen elements and concepts 4.2 Produce detailed rural permaculture design documents 4.3 Present design plans, drawings and documents to the client 4.4 Take feedback from the client and revise or modify the design as required

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCPER402 Design a rural permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- develop a design brief for a rural permaculture system
- draw permaculture and landscape plans
- identify rural permaculture design solutions
- develop permaculture system concepts
- develop planting schedules, budget and bills of quantity
- develop a final design
- present design to client

Knowledge Evidence

The candidate must demonstrate knowledge of:

- elements of rural permaculture design
 - representation of up to 5 zones
 - detailed representation of Zones 1 to 3
 - sector analysis
 - bioregional analysis
 - superimposing of design over commercial aerial photograph or other geospatial representation
- principles of permaculture
- strategies in rural permaculture design, such as:
 - land shaping including contour ploughing, swaling, keyline dam systems, berms and terraces
 - integrated plant and animal systems that suit the bioregion and the land

- natural system preservation and incorporation into overall design
- soil and water preservation
- forest ecology and recharge plantings for maximum water and nutrient cycling
- innovative agricultural systems such as cell grazing, inter-cropping, commons and food forests
- preservation of old and rare breeds of animals
- biodiversity and habitat preservation and enhancement strategies
- design brief
 - statement of scope of design
 - statement of client needs and requirements
 - listing of project elements
 - listing of assessable tasks
 - options for dealing with client needs and requirements
- design analysis and research
 - investigation of permaculture books and publications, online material, audio and video material, maps, plans, charts and tables
 - searches in libraries and databases
 - viewing maps
 - searching geospatial data
 - talking to people in the local area or neighbours
- plan interpretation and map reading
- site analysis
 - initial on-site estimations of soil type, pH, texture
 - topography
 - aspect
 - zone and sectors planning
 - existing vegetation
 - climatic factors
 - indicator species or other landscape-reading notes
- site surveying methods and tools
 - surveying instruments for taking vertical measurements on site
 - surveying instruments for measuring angles on site
 - surveying instruments for measuring distance and horizontal measurements on site
- design concept, such as:
 - preliminary conceptual sketches
 - bubble diagrams
 - preliminary plan, section and elevation design drawings
 - use of design drawing and drafting conventions
 - presentable and legible design drawings for client use
- rural permaculture design

- integration of brief requirements, analytical information and conceptual planning
- rational justification for placement of design elements
- integration of elements to produce an efficient and functional rural permaculture system
- conventional design symbols and those to convey permaculture elements
- design drafting and drawing conventions
- plant and animal selection
- final design
 - rendered plan, elevation and section drawings to scale
 - use of design drawing and drafting conventions
 - use of consistent graphic style
 - supporting legends and keys of elements
 - supporting materials lists, tables, bills of quantity, timelines, installation plans and management plans
 - construction detail drawings
- methods of design
 - zone and sector planning
 - slope planning
 - patterns in space and time

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

Assessment Requirements for AHCPER403 Design an urban permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- draw permaculture and landscape plans
- identify urban permaculture design solutions
- analyse zones and sectors of site
- develop design concepts
- develop detail and construction drawings
- develop planting schedules, budget and bill of quantities
- develop a final design
- present a design to a client

Knowledge Evidence

The candidate must demonstrate knowledge of:

- elements of urban permaculture design
 - Zones 1 and 2, as the furthest areas represented on the plan (otherwise it is a rural design)
 - needs supplied by other zones, even if they are supplied off site
 - sector analysis
 - bioregional analysis
 - design which may utilise existing architects' drawings or local maps and plans
- principles of permaculture
- strategies in urban permaculture design
- edible landscapes and aesthetics in design
- public landscapes and community garden design

- design brief
 - statement of scope of design
 - statement of client needs and requirements
 - list of project elements
 - list of assessable tasks
 - options for dealing with client needs and requirements
- design analysis and research techniques
- plan interpretation and map reading
- site analysis
 - onsite measurement of site boundaries
 - mapping of boundaries to scale to a plan drawing
 - mapping of contour lines to a scale plan drawing
 - measurement and location of existing infrastructure and features on site
 - mapping of existing infrastructure and features to a scale plan drawing
 - measuring and plotting location of services (power, water, sewer, gas)
 - measuring and plotting location of meters or access points
- site surveying methods and tools
 - surveying instruments for taking vertical measurements on site
 - surveying instruments for measuring angles on site
 - surveying instruments for measuring distance and horizontal measurements on site
- design concepts
 - preliminary conceptual sketches
 - bubble diagrams
 - preliminary plans, sections and elevation design drawings
 - use of design drawing and drafting conventions
- presentable and legible design drawings for client use, such as:
 - domestic systems for urban and suburban properties
 - rooftop, balcony and courtyard gardens
 - public landscapes such as streets, parks, car parks, commercial premises, industrial estates and community centres
 - school gardens and learnscapes
 - community gardens and city farms
 - Community Supported Agriculture systems, urban market gardens and peri-urban small holdings
 - urban forestry
- conventional design symbols and those to convey permaculture elements
- design drafting and drawing conventions
- plant and animal selection
- final design
 - rendered plan, elevation and section drawings to scale

- use of design drawing and drafting conventions
- use of consistent graphic style
- supporting legends and keys of elements
- supporting materials lists, tables, bills of quantity, timelines, installation plans and management plans
- construction detail drawing
- methods of design
 - zone and sector planning
 - slope planning
 - patterns in space and time

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also hold a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER404 Plan and implement permaculture works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to plan and implement permaculture works through preliminary planning, scope of works, work health and safety policies and procedures, equipment and materials, works schedules, specifications and environmental impacts. Activities also include organising and directing works implementation.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Assessment Requirements for AHCPER404 Plan and implement permaculture works

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- write reports for supervisors, clients and contractors
- assess a site for opportunities and constraints associated with implementation of permaculture works
- implement a staged permaculture works plan
- determine tools and equipment required
- calculate amounts of materials required

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and practices
- permaculture works, such as
 - implementing permaculture designs
 - following a permaculture works plan as part of a permaculture project
 - constructing permaculture structures and features
 - implementing permaculture earthworks
- practical understanding of the environmental issues associated with undertaking permaculture works, such as:
 - use of materials that come from sustainable sources
 - duty of care in conserving site's natural values
 - work practices
 - the use and movement of machinery, storage of materials, removal of weeds and movement of soil and other materials into, across and beyond the site

- principles of ecology, including specific plant and animal relationships and habitat requirements
- statutory compliance and obligations, such as:
 - compliance with legislation, ordinances, regulations or bylaws relating to the works or the work site
 - Site responsibilities include OHS, industrial relations and equal opportunity and employment
- site evaluation techniques including methods of analysing soils, waterways and their condition
- practical understanding of the advantages and disadvantages of a range of permaculture procedures
- selection and use of appropriate combinations of machinery and tools
- work health and safety hazards associated with undertaking permaculture works and the controls necessary to remove or minimise risks associated with them
- contract documentation including specifications, plans of permaculture works, services, supplies and surveyors documents
- scope of works determination
- works' breakdown into tasks
- scheduling and time line generation
- task specifications and evaluation

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER405 Select appropriate technology for a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to select appropriate technologies for permaculture systems. It includes identification, research, evaluation, selection and communication of sustainable technology for permaculture applications.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.

Element	Performance criteria
1. Investigate appropriate technology for permaculture systems	1.1 Review design needs and requirements for potential applications of appropriate technology 1.2 Identify relevant sources and locations of information on appropriate technology 1.3 Determine required scale of appropriate technology 1.4 Identify permaculture principles and practices relevant to the appropriate technology
2. Research appropriate technology for permaculture systems	2.1 Research potential appropriate technology options for the project 2.2 Determine unique characteristics of different appropriate technology options 2.3 Research applications of alternative technologies 2.4 Research requirements for integrating new technology with existing permaculture systems 2.5 Determine capital cost of installation 2.6 Determine training and maintenance required for operation of the different options
3. Evaluate appropriate technology for permaculture systems	3.1 Evaluate potential for integrating new appropriate technologies in the permaculture system design 3.2 Compare potential alternative technologies against cost and efficiency criteria 3.3 Evaluate risks and obstacles of potential appropriate technology options
4. Select appropriate technology for permaculture systems	4.1 Select suitable appropriate technology for the design use 4.2 Determine availability of appropriate technology 4.3 Confirm cost and mode of delivery
5. Communicate appropriate technology for permaculture systems	5.1 Report on research, evaluation and selection of appropriate technology 5.2 Communicate location and detail of selected appropriate technology option on the permaculture design using appropriate drafting and drawing techniques 5.3 Explain appropriate technology and reason for selection to client

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Assessment Requirements for AHCPER405 Select appropriate technology for a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- investigate appropriate technologies for permaculture systems
- evaluate permaculture systems capabilities in relation to the use of new technologies
- evaluate suitability of new technology solutions to the permaculture application
- communicate information and options

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and ethics
- appropriate technologies, such as:
 - technologies involving solar, wind, wood, biomass and water driven equipment for generating power, performing pumping duties, heating hot water and biochar production
 - alternative and resource conserving technologies such as rainwater collection, waste water treatment, composting toilets, cooking stoves, cob ovens, space heating and cooling, household appliances, pedal-powered appliances, enterprise plant and equipment
 - building technology such as natural and resource conserving building materials and techniques including passive solar design strategies and features
 - tools and implements employed in gardening and farming operations such as electric fencing, hand vs. power tools, shredders, mulching machines and use of animal power
 - lifestyle choices and behavioural adjustments to conserve energy and resources to meet sustainability objectives

- smaller scale and lower cost solutions such as maintaining and riding a bicycle, using a refillable pen, using a razor with replaceable blades and substituting other non-disposable items where disposables are normally used
- low energy devices
- ingenuity applied to complex problems to develop simple solutions such as solar powered street lighting
- criteria for determining appropriateness of energy and resource conservation technologies
- principles of passive solar design, embodied energy and carbon emission reduction
- innovations in energy and resource conservation technologies
- role of appropriate technology in energy descent planning and greenhouse gas emission reduction
- types of appropriate technology systems commonly available and applied to the design of energy and resource conscious houses, farms, offices and community projects
- the benefits from combining a number of different appropriate technologies and the limitations of each different technology
- design of systems integrating appropriate technologies

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER406 Identify and analyse bioregional characteristics and resources

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to research, extract and provide information on bioregional characteristics and resources. It requires the ability to process a request for information on bioregional characteristics and resources, identify information sources, organise self and others, ensure information meets request, prepare and finalise reports.

For indigenous contexts, the delivery and assessment against this competency standard must comply with community protocols and guidelines and be supported by elders and custodians of country.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Identify sources of information on bioregional characteristics and resources	1.1 Identify the need, or respond to a request, for bioregional analysis 1.2 Research relevant sources and locations of information about the bioregion 1.3 Access identified sources and information
2. Organise self or others to obtain information on bioregional characteristics and resources	2.1 Locate information relevant to the particular request 2.2 Coordinate and monitor team work to obtain required information 2.3 Discuss resolutions to problems accessing information with designated person and implement where appropriate
3. Ensure information meets request	3.1 Assess information for its validity and reliability 3.2 Seek clarification and assistance from client group or individual where information is unclear or difficult to understand 3.3 Obtain additional information where available information is inadequate 3.4 Combine different types of information where appropriate, to provide a response to the request
4. Report on bioregional analysis	4.1 Develop a report format, plan and structure 4.2 Compile report using clear and concise language, and edit as appropriate 4.3 Produce report in format required by client
5. Finalise reporting process	5.1 Arrange to review and sign off on report with designated person where required 5.2 Present report to community group or client 5.3 Make a record of report

Foundation Skills

Foundation Skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for AHCPER406 Identify and analyse bioregional characteristics and resources

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- identify sources of information on bioregional characteristics and resources
- organise self or others to extract information on bioregional characteristics and resources
- ensure information meets requests
- employ appropriate media to present a report
- prepare, finalise and present a report

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles and ethics
- bioregional characteristics and resources, such as:
 - a bioregion as a land and water territory whose limits are defined not by political boundaries, but by the geographical limits of human communities and ecological systems
 - a town or a segment of a city as typical as the main node of a bioregion, as was the pattern of most settlement and economic development until the 20th century
 - water catchment as one of the key identifiers of the bioregion, with the water catchment, storage, use/treatment of effluent and the water quality of rivers and creeks as essential to permaculture design
 - The Ecological Vegetation Class (EVC) of the area or the population of endemic species, as well as the suitability of any other species to grow or breed in the area
 - history, social make-up, land use and population information that go towards understanding an area

- bioregional resources, including the human and social capital or culture of an area, its capacity to produce its own needs and supply surplus to others and its resilience in responding to change or catastrophe
- the natural (biophysical), built, social and cultural elements of the area, including water supply and catchment management systems, transport systems, local exchange trading systems (LETS) and cooperatives, food supply systems, fuel and fibre supply systems
- data held by local councils, community groups, historical societies, individuals and organisations that adds value to a study of the bioregion
- the following bioregional issues: transition initiatives, local food and water security and bioregional self-reliance regarding other components of daily life from local sources as opposed to importing basic needs from long distances at a high cost to the environment
- embodied energy, including how to measure it and compare it with energy output over the life of the item, and consideration of the waste disposal of an item as part of its energy 'cost'
- types of information sources
- methods and means of accessing data
- methods of presenting and formatting information
- means of validating information

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER407 Design harvesting and storage systems for permaculture products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit of competency describes the skills and knowledge required to design harvesting and storage systems for products to meet year round supply of fresh and stored produce. It requires the ability to determine harvesting and storage system requirements, identify requirements for maintaining optimum condition of permaculture products and preparing a harvesting and storage plan.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who take responsibility for their own work and for the quality of the work of others. They use discretion and judgement in the selection, allocation and use of available resources.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Assessment Requirements for AHCPER407 Design harvesting and storage systems for permaculture products

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- determine harvesting, post-harvest and storage system requirements
- identify requirements for maintaining optimum condition of products from a permaculture system
- prepare a harvesting and storage plan
- communicate harvesting and storage plan to clients and others

Knowledge Evidence

The candidate must demonstrate knowledge of:

- products from a permaculture system commonly harvested and stored, such as:
 - vegetables where the whole plant is harvested
 - vegetables where part of the plant is harvested
 - perennial plants where fruit/nuts are harvested
 - forests where timber, fuel and fibre crops are selectively removed
 - forests where a range of other medicinal and craft crops are harvested
 - harvest from wild systems (e.g. fruit, nuts, fungi and seeds), where a clear abundance of product has been identified
 - animal products such as eggs, feathers, hides, bone, milk and meat
 - Products may also include those derived from insects (such as honey)
 - fish (such as roe), and other organisms, such as fungi, algae and moss
- design systems for meeting year-round supplies of fresh and stored produce, such as:
 - growing requirements and crop regulation strategies calendar or seasonal chart with planting times of crops

- selection of early, mid- and late season varieties to extend harvest
- number of plants and area to be planted
- crop regulation and maintenance program involving tipping, mounding, thinning, staking
- sequential planting and/or harvesting schedules
- climatic conditions for harvesting crop such as appropriate time of day
- harvest and post-harvest factors influencing plant metabolism and quality
- post-harvest treatment and preparation techniques, such as:
 - flow chart of harvest, treatment, preservation and storage process
 - harvest and post-harvest treatment timelines and schedules
 - design or plans of processing and storage area
 - design of processing technology or equipment such as solar food dryer
 - lists of materials, tools, equipment and ingredients
 - manuals and operating instructions for equipment
 - recipes and instructions
 - anticipated shelf-life of product
 - labelling and recording systems
 - work health and safety, food safety, hygiene and other relevant enterprise and work practices
- preservation methods and processes for products from a permaculture system, such as:
 - drying and dehydrating
 - bottling
 - cheese-making
 - extraction (honey, cold-pressed and distilled oils)
 - culturing or fermenting
 - preserving with vinegar, oil, brine, sugar, salt and other natural agents
 - air exclusion (sealing with fats, wax, vacuum seal)
 - cellaring and root-cellaring
 - other processes that use minimal fossil fuel energy while maintaining the integrity of the harvested crop
- technologies used in crop processing, treatment, preservation and storage systems
- design of storage areas, such as:
 - buildings such as sheds
 - cupboards
 - shelving and racks
 - work benches
 - store rooms
 - pantry
 - cool store
 - cellar

- root cellar
- bins and containers
- developing planting and harvesting schedules for products from a permaculture system
- identifying training needs for harvest and storage workers, such as:
 - work health and safety, and other relevant enterprise and work practices
 - food safety and hygiene standards
 - appropriate clothing and personal protective equipment (PPE)
 - harvest and post-harvest handling, processing and storage practices
 - food preserving techniques
 - operation and maintenance of tools and equipment
 - reporting, recording and labelling procedures
- preparing plans and reports
- food safety, health and hygiene requirements for preservation and storage of products for human consumption

Assessment Conditions

Assessors must satisfy current standards for RTOs. Assessors must also have a nationally accredited Certificate IV or Diploma of Permaculture. Completion of a Permaculture Design Course (PDC) or non-accredited Permaculture Diploma is not sufficient at this level.

AHCPER408 Implement and monitor animal health and welfare programs for a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Application

This unit provides the skills and knowledge to implement and monitor animal health and welfare programs for a permaculture system. It requires the ability to provide information to clients and animal owners about animal welfare, facilitate the participation of others in complying with animal health and welfare guidelines, implement and monitor enterprise programs for animal care, deal with animal emergencies and maintain animal health records.

All work is carried out to comply with workplace procedures.

This unit applies to individuals who analyse information and exercise judgement to complete a range of advanced skilled activities and demonstrate deep knowledge in a specific technical area. They have accountability for the work of others and analyse, design and communicate solutions to a range of complex problems.

No occupational licensing, legislative or certification requirements are known to apply to this unit at the time of publication.

Pre-requisite Unit

Nil.

Unit Sector

Permaculture (PER)

Elements and Performance Criteria

Element	Performance criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Provide information about animal care in a permaculture system	1.1 Accurately and clearly explain to the client relevant permaculture practices towards animal health and welfare 1.2 Provide readily accessible information on animal care and maintenance and accurately and clearly explain this to clients and animal owners 1.3 Regularly provide information about identified animal health and welfare requirements and accurately and clearly explain this to clients and animal owners
2. Facilitate the participation of workers in animal care and maintenance in a permaculture system	2.1 Follow the permaculture plan for animal care and maintenance 2.2 Monitor animal health and welfare compliance with workers and others 2.3 Ensure adequate resource allocation and monitor to ensure effective animal health and welfare programs continue
3. Implement and monitor animal health and welfare procedures in a permaculture system	3.1 Identify and report existing and potential hazards to animal health and welfare so that effective remedial measures are implemented 3.2 Carry out animal health and welfare induction and training for workers and others 3.3 Establish strategies to maintain routines for animal health and welfare in the permaculture system 3.4 Monitor the procedures for animal health and welfare implemented by workers and others, to ensure consistency and adherence to the permaculture plan
4. Implement workplace procedures for dealing with animal health and welfare emergencies	4.1 Implement workplace procedures for dealing with animal health and welfare emergencies where necessary to ensure that prompt and effective control action is taken 4.2 Report animal health and welfare emergencies in accordance with established procedures 4.3 Implement measures to prevent recurrence and minimise risk of animal health and welfare emergencies
5. Implement and monitor enterprise procedures for maintaining animal health and welfare records	5.1 Complete animal health and welfare records accurately and legibly in accordance with permaculture procedures and legislative requirements 5.2 Identify potential hazards to animal health and welfare by using aggregate information from animal health and welfare records 5.3 Provide regular training to workers and others so that records are understood and used for the health and welfare of animals

Assessment Requirements for AHCPER408 Implement and monitor animal health and welfare programs for a permaculture system

Modification History

Release	TP Version	Comment
1	AHCv1.0	Initial release

Performance Evidence

The candidate must be assessed on their ability to integrate and apply the performance requirements of this unit in a workplace setting. Performance must be demonstrated consistently over time and in a suitable range of contexts.

The candidate must provide evidence that they can:

- provide information to clients, workers or animal owners about animal health and welfare
- implement animal health and welfare procedures
- monitor animal health and welfare procedures performed by others
- maintain animal health and welfare records
- provide training in understanding and using records for the health and welfare of animals in a permaculture system

Knowledge Evidence

The candidate must demonstrate knowledge of:

- permaculture principles, ethics and practices relating to integrated animal systems, such as:
 - minimising effort for maximum effect
 - multiple uses for each element in the system
 - using more than one way to provide important functions
 - re-using and valuing resources and energy
 - animal welfare and freedom from cruelty as part of care for the earth
 - encouraging productivity of the system
 - seeing solutions not problems
 - preventing waste and loss of resources from the system
- animal health and welfare requirements, practices and procedures, such as:
 - maintenance of animal housing, enclosures and fencing, covering hygiene and welfare

- ensuring availability of suitable forage, fodder and supplementary feedstuffs, and adjusting stocking rates, ranging and rotation schedules to suit
- Coordinating the following integration of animal ranging and maintenance with plant production systems: ranging in orchard to manure trees, reducing weeds, controlling pests, eating windfall fruit, tractor systems, composting manures and housing litter and maintaining firebreaks
- researching, assessing, implementing and monitoring supplementary stock feed requirements, feeding quantities and schedules
- researching and applying organic alternatives for treating stock in compliance with organic certification authorities, which may include herbal and homoeopathic treatments, mineral and vitamin supplements and permitted medications
- developing appropriate handling procedures to reduce stress
- harvesting, sourcing and handling the following useable products: milking, collecting eggs
- providing range areas for shade and shelter from climatic extremes through appropriate planting, including forage and fodder plants.
- equipment, including feeders and waterers, and back-up systems and alarms in case of equipment failure.
- lighting
- ventilation including fresh air, dust filters, humidity, and noxious gases.
- temperature, including cooling and heating, extreme weather conditions
- protection from predators, vermin, fires and floods.
- food with diet containing adequate nutrients
- water, including sufficient drinkable water to meet livestock requirements and monitoring water quality.
- health and distress, with signs of ill-health or distress in animals (as evidenced by behavioural changes) including reduced food and water intake, reduced production, changes in the nature and level of their activity, abnormal condition or changed physical features.
- prevention of infectious disease and internal and external parasitism.
- transport of growing and adult livestock
- animal physiology
- animal emergencies, such as:
 - injury
 - disease
 - failure of feeding or watering systems
 - poisoning
 - tick fever
 - birthing difficulties
 - escapement from housing or enclosures
 - predator attack
 - natural disasters such as bushfire, flooding, severe storm, other extreme weather event

- relevant animal welfare legislation and codes of practice
- animal health and welfare records, such as:
 - farm livestock records
 - daily harvest/yield records (eggs, milk)
 - feeding schedules and rosters
