AURJTJ001 Remove, inspect and refit motorcycle wheel and tyre assemblies

Release: 1

AURJTJ001 Remove, inspect and refit motorcycle wheel and tyre assemblies

Modification History

Release	Comment
Release 1	New unit of competency.

Application

This unit describes the performance outcomes required to remove, inspect and refit wheel and tyre assemblies fitted to motorcycles. It involves identifying and confirming work requirements, preparing for the work, removing, inspecting and refitting the wheel and tyre assembly, and completing workplace processes and documentation.

It applies to those working in the motorcycle service and repair industry.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Competency Field

Mechanical - Motorcycle

Unit Sector

Technical - Wheels and Tyres

Elements and Performance Criteria

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
1. Prepare to remove wheel and tyre assembly	1.1 Job requirements are determined from workplace instructions 1.2 Removal, inspection and refitting information is sourced and interpreted 1.3 Hazards associated with the work are identified and risks are managed

Elements	Performance Criteria
Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold and italicised text is used, further information is detailed in the range of conditions section.
	1.4 Tools, equipment and materials are selected and checked for serviceability
2. Remove and inspect wheel and tyre assembly	2.1 Wheel and tyre assembly is removed according to manufacturer specifications, workplace procedures and <i>safety requirements</i> , and without causing damage to components or systems 2.2 Wheel and tyre assembly, mounting points, and fitting are inspected for condition, damage and wear 2.3 Inspection findings are reported according to workplace procedures, including recommendations for necessary repairs, replacements or adjustments
3. Refit wheel and tyre assembly	3.1 Refitting options are analysed and those most appropriate to the circumstances are selected 3.2 Wheel and tyre assembly is fitted and adjusted according to manufacturer specifications, workplace procedures and safety requirements, and without causing damage to components or systems 3.3 Tightening sequence and torque settings are completed according to manufacturer specifications and workplace procedures 3.4 Wheel and tyre assembly is checked for correct operation and alignment according to manufacturer specifications and workplace procedures
4. Complete work processes	4.1 <i>Final inspection</i> is made to ensure work is to workplace expectations and motorcycle is presented ready for use 4.2 Work area is cleaned, waste and non-recyclable materials are disposed of, and recyclable material is collected 4.3 Tools and equipment are checked and stored according to workplace procedures 4.4 Workplace documentation is processed according to workplace procedures

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance and are not explicit in the performance criteria.

Skills	Description
--------	-------------

Skills	Description
Learning skills to:	<ul style="list-style-type: none"> locate appropriate sources of information efficiently.
Reading skills to:	<ul style="list-style-type: none"> interpret information from manufacturer specifications and workshop literature when seeking tyre and wheel rim specifications, including tightening procedures.
Writing skills to:	<ul style="list-style-type: none"> legibly and accurately fill out workplace documentation, making recommendations and recording parts and material used.
Numeracy skills to:	<ul style="list-style-type: none"> interpret numerical information in: <ul style="list-style-type: none"> workplace instructions manufacturer specifications tyres and wheels tyre inflation gauges understand numerical divisions in metric and imperial units of measurement.
Problem solving skills to:	<ul style="list-style-type: none"> recognise limitations and seek advice seek information and assistance to solve problems.
Technology skills to:	<ul style="list-style-type: none"> operate wheel and tyre assembly removal, inspection, refitting and adjustment tools and equipment.

Range of Conditions

This section specifies work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included. Bold italicised wording, if used in the performance criteria, is detailed below.

<i>Safety requirements</i> must include:	<ul style="list-style-type: none"> work health and safety (WHS) and occupational health and safety (OHS) requirements, including procedures for: <ul style="list-style-type: none"> lifting and supporting motorcycles manually handling wheel and tyre assemblies.
<i>Final inspection</i> must include:	<ul style="list-style-type: none"> wheel and tyre assembly run-out and alignment testing testing the operation of motorcycle systems affected by the removal and refitting of wheel and tyre assemblies checking chain and belt drive tension.

Unit Mapping Information

No equivalent unit.
