- 4 Perform arrival and landing**
- 4.1** Relevant non-towered aerodrome operational information is extracted from authorised sources prior to entering circuit area
- 4.2** Local or area barometric pressure adjusted for sea level (QNH) is set
- 4.3** Aircraft position and operating intentions are broadcast on appropriate frequencies
- 4.4** Aircraft separation and tracking tolerances are maintained
- 4.5** Wind velocity and direction is assessed to determine appropriate circuit and landing direction
- 4.6** Non-towered aerodrome runway or landing areas are confirmed as serviceable for landing sequence
- 4.7** Runway areas and landing areas are checked and confirmed to be clear of landing obstacles and hazards
- 4.8** Aircraft arrival sequence is conducted in accordance with manufacturer and organisational operating procedures
- 4.9** Aircraft is landed and cleared from runway and landing areas
- 4.10** Air service provider is advised of landing details as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0004 Operate at non-towered aerodromes.

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0036 Operate at non-towered aerodromes

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying aircraft taxi or air transit procedures
- applying day visual flight rules (VFR) departure procedures
- applying day VFR arrival and landing procedures
- applying effective aerodrome traffic situational awareness
- applying relevant aeronautical knowledge
- confirming runway and landing area serviceability
- displaying sound airmanship skills during non-towered aerodrome operations, including:
 - during taxi
 - aircraft departure
 - aircraft arrival
 - aircraft landing and dispersal
- identifying relevant operational information from En-route Supplement Australia (ERSA) and Notice to Airmen (NOTAM)
- interpreting weather forecasts and local observations
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- recognising and interpreting aerodrome ground markings
- setting appropriate transponder codes for local or area flight operations
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- transmitting local and area broadcasts.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerodrome ground markings and lighting
- aerodrome wind velocity, wind direction and appropriate circuit procedure
- airmanship considerations during non-towered aerodrome operations, including:

- during taxi
- aircraft departure
- aircraft arrival
- aircraft landing and dispersal
- appropriate aircraft lighting configuration
- appropriate transponder codes for local or area flight operations
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane or helicopter operations at non-towered aerodromes
- day VFR arrival and landing procedures
- day VFR departure procedures
- how to identify relevant radio and navigation aid frequencies
- how to identify special aerodrome procedures
- how to interpret weather forecasts and local observations
- local and area broadcast procedures
- non-towered aerodrome operational information from ERSA and NOTAM
- NOTAM information
- radio failure procedures
- standard radio telecommunication phraseology
- transponder codes for Class G airspace.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIY0037 Operate at a controlled aerodrome

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to operate at a controlled aerodrome in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes conducting pre-flight preparations; taxiing aircraft; and applying aircraft departure, arrival and landing procedures.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Conduct pre-flight preparations

- 1.1 Relevant controlled aerodrome operational information is extracted from authorised sources
- 1.2 Information is interpreted to determine appropriate departure, arrival and landing requirements
- 1.3 Special aerodrome procedures are identified as required
- 1.4 Weather forecasts and local observations are checked for operating validity for flight planned duration
- 1.5 Relevant radio and navigation aid frequencies are identified for use during all flight modes

2 Taxi aircraft at a controlled aerodrome

- 2.1 Air traffic clearances are obtained and complied with
- 2.2 Aircraft is manoeuvred to holding point as instructed and appropriate action is taken to avoid other aircraft and obstructions
- 2.3 Aerodrome ground markings are identified and appropriate action taken during aircraft taxi
- 2.4 Aerodrome lighting signals are identified and appropriate action taken to comply with ground/hover taxi requirements
- 2.5 Airport runway incursion hotspots are identified
- 2.6 Aircraft separation and lookout are maintained for other aircraft and other aerodrome obstructions, including jet blast hazards
- 2.7 Appropriate aircraft lighting is selected during aircraft taxi
- 2.8 Aircraft is taxied or air transited to runway holding point

3 Perform aircraft departure

- 3.1 Airways clearance is obtained and confirmed with air traffic services
- 3.2 Runway approaches are checked and cleared in all directions prior to entering runway
- 3.3 Aircraft transponder code and appropriate mode are selected

- 3.4 Air traffic departure instructions are complied with, and air traffic is advised of clearance instructions non-compliance as soon as possible as required
 - 3.5 Aircraft separation is maintained and wake turbulence conditions avoided during aircraft departure sequence
 - 3.6 Air traffic service is advised of departure details as required
 - 3.7 Airways clearance instructions are maintained within tracking and altitude tolerances, and lookout is maintained until clear of the aerodrome control zone
- 4 Perform arrival and landing**
- 4.1 Relevant controlled aerodrome operational information is extracted from authorised sources prior to entering control area
 - 4.2 Local or area barometric pressure adjusted for sea level (QNH) is set
 - 4.3 Air traffic clearance is gained from air traffic service and appropriate transponder code is selected prior to entry to control area, and air traffic is advised of clearance instructions non-compliance as soon as possible as required
 - 4.4 Aircraft separation, lookout and tracking tolerances are maintained within the control area
 - 4.5 Wind velocity and direction are assessed to confirm clearance instructions, and appropriate circuit and landing direction
 - 4.6 Landing clearance is confirmed with air traffic service
 - 4.7 Aircraft is landed and taxi clearance from runway and landing areas is obtained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0005 Operate at a controlled aerodrome.

Assessment Requirements for AVIY0037 Operate at a controlled aerodrome

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- advising air traffic service of airways clearance instructions confirmation or non-compliance
- applying aircraft taxi or air transit procedures
- applying relevant aeronautical knowledge
- applying relevant approach and landing procedures
- applying relevant departure procedures
- applying sound airmanship skills during controlled aerodrome operations, including:
 - during taxi
 - aircraft departure
 - aircraft arrival
 - aircraft landing and dispersal
- determining aerodrome wind velocity, wind direction and appropriate circuit procedure
- identifying relevant operational information from En-route Supplement Australia (ERSA) and Notice to Airmen (NOTAM)
- interpreting weather forecasts and local observations
- obtaining and interpreting traffic information
- recognising and interpreting aerodrome ground markings
- selecting appropriate aircraft lighting configuration
- setting appropriate transponder codes control area operations
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane or helicopter operations at controlled aerodromes
- controlled aerodrome ground markings and lighting

- NOTAM information
- radio failure procedures
- standard radio telecommunication phraseology
- transponder codes for radio failure and emergency.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment

AVIY0038 Operate aeroplane at low level

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to operate an aeroplane at low level in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes planning low-level flight operations, operating aeroplane safely during low-level flight operations, and manoeuvring aeroplane at low-level. It also includes undertaking low-level, straight and level flight, executing low-level turns, executing simulated forced landing from below 500 feet above ground level (AGL), and operating at low level in hilly terrain.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan low-level flight operations

- 1.1 Low-level flight hazards are identified, evaluated and treated in accordance with aviation risk management processes
- 1.2 Task requirements are confirmed through consultation with stakeholders involved in low-level operations
- 1.3 Aeroplane type and performance capability are confirmed as appropriate for task
- 1.4 Effects of fatigue and physical health on pilot performance are assessed and allowed for when planning low-level operations
- 1.5 Actual and forecast weather conditions are analysed and applied to low-level operations
- 1.6 Area of operations is identified using chart and geographical features
- 1.7 Geographical characteristics of area of flying operations are assessed to ensure safe completion of task
- 1.8 Location of ground support personnel is confirmed
- 1.9 Appropriate reconnaissance and pre-manoeuve or other relevant checks are conducted prior to descending below 500 feet AGL

2 Operate aeroplane safely during low-level flight operations

- 2.1 Pre-flight inspections are performed and aircraft serviceability determined prior to flight
- 2.2 Navigation systems are initialised and data validity checks conducted
- 2.3 Aeroplane is operated correctly and safely in accordance with aircraft operating requirements
- 2.4 Aeroplane take-off is conducted within authorised operational conditions and limitations

3 Manoeuvre aeroplane at low level

- 3.1 Low-level flight manoeuvres are performed safely using pre-planned manoeuvres at planned altitudes
- 3.2 Effects of wind velocity, false horizons, rising ground and mountainous terrain are managed and control of

aeroplane correctly maintained

- 3.3 Pilot's visual attention is focused outside the cockpit
 - 3.4 Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility and/or terrain
 - 3.5 Natural horizon is used as primary attitude reference
 - 3.6 Nose of aircraft is cleared to ensure forward visibility when appropriate
 - 3.7 Situational awareness is maintained at all times during low-level manoeuvres
 - 3.8 Aeroplane is safely manoeuvred adjacent to power lines and wires
 - 3.9 Obstacles are identified and are appropriately and safely avoided
 - 3.10 Personnel, animals, vehicles and buildings are identified and are appropriately and safely avoided
 - 3.11 Height is maintained by visual reference to the earth's surface when below 500 AGL
 - 3.12 Weather conditions are monitored and appropriate responses made
 - 3.13 Fuel status is monitored and appropriate responses made
 - 3.14 Local and published noise abatement requirements and curfews are observed
- 4 Undertake low-level, straight and level flight**
- 4.1 Aircraft energy state and inertia is managed to maintain safe low-level flight
 - 4.2 Wind velocity is estimated and is appropriately taken into account during low-level manoeuvres
 - 4.3 Height is adjusted and effects of rising and descending terrain are considered during low level, straight and level flight
 - 4.4 Aircraft drift is recognised and compensated for during low-level flight
 - 4.5 Obstructions are identified and are appropriately and

- safely avoided
- 5 Execute low-level turns**
- 5.1** Aeroplane is turned at normal cruise speed at angles of bank up to 60 degrees (45 degrees for multi-engine aircraft)
- 5.2** Clearance scan is performed prior to manoeuvre commencement
- 5.3** Power is adjusted to maintain required height over terrain
- 5.4** Effects of flight over water or featureless terrain are managed
- 5.5** Height is adjusted and effects of rising and descending terrain are considered during low-level turns
- 5.6** Effects of gradient wind are compensated for and rollout is anticipated to complete low-level turn
- 6 Execute simulated forced landing from below 500 feet AGL**
- 6.1** Emergency situations requiring a forced landing are identified
- 6.2** Immediate actions are performed in accordance with aircraft flight manual (AFM) and/or pilot's operating handbook (POH)
- 6.3** Aircraft control is maintained during simulated aircraft forced landing
- 6.4** Landing area within safe emergency flight distance is selected and appropriate action plan formulated
- 6.5** Emergency procedures are performed in accordance with AFM/POH and established action plan
- 6.6** Air traffic service and other traffic are advised of intentions during emergency
- 6.7** Aeroplane is landed in accordance with the AFM/POH and established action plan
- 7 Operate at low level in hilly terrain**
- 7.1** Aeroplane is safely manipulated at low level in hilly terrain
- 7.2** Safe operating heights relevant to low-level flight operation type are established and maintained

- 7.3 Safe contour flying techniques are applied
- 7.4 Appropriate natural markers to aid situational awareness are identified and selected
- 7.5 Safe approaches to higher ground, including identification of escape routes, are used during low-level flight operations
- 7.6 Safe turns in hilly terrain are conducted in accordance with accepted flight handling techniques
- 7.7 Situational awareness of effects of wind and turbulence in hilly terrain, including lee effects, is maintained and managed during low-level flight operations
- 7.8 Situational awareness of illusions in hilly terrain, including false horizon effect and shadows, are maintained and managed during low-level flight operations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0006 Operate aeroplane at low level.

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0038 Operate aeroplane at low level

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying correct navigation techniques and procedures at low level
- applying knowledge about wind effect in the vicinity of obstructions, mountainous terrain and illusions
- applying knowledge of the effect of false horizons
- applying relevant aeroplane aeronautical knowledge
- applying relevant legislation and workplace procedures
- applying safe contour flying handling techniques
- communicating effectively with others
- completing relevant documentation
- complying with airspace requirements and low-level flight procedures
- conducting procedure turns from a fixed ground reference point and compensating for effect of gradient wind
- establishing and maintaining safe height relevant to low level flight type
- flying at various speed and configurations not below calculated stall speed +15 knots indicated air speed (KIAS) or safe single-engine speed +15 KIAS (for multi-engine aeroplanes)
- identifying and correctly using required equipment
- identifying and justifying a decision to operate aeroplane at low level
- identifying and maintaining a safe distance from pole stay wires
- implementing aviation risk management processes and required action to minimise, control or eliminate identified hazards
- implementing contingency plans
- implementing work health safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- maintaining awareness and managing effects of wind and turbulence in hilly terrain, including lee effects
- managing energy state of aircraft, including:
 - identifying high kinetic energy situations

- identifying low kinetic energy situations
- identifying high potential energy situations
- identifying low potential energy situations
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- navigating to a predetermined destination at a height below 500 feet above ground level (AGL)
- operating electronic communications equipment to required protocol
- performing pre-flight inspection and determining aircraft serviceability for intended low-level flight
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- recognising and controlling the illusion of slipping and skidding during turns close to the ground
- recognising and managing the impact of sun glare on increased risk of collision with obstacles
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- responding appropriately to wind effect in the vicinity of obstructions, mountainous terrain and illusions
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- solving identified problems
- using relevant instruments to monitor aeroplane performance
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aeroplane type limitations applicable to low-level flight
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to low-level aeroplane operations
- dangers associated with 'out of balance' low-level flight manoeuvres
- flight rules, including:
 - privileges and limitations of a low-level rating
 - provisions of 157 of CASR 1988
 - requirements for flight and pilot responsibilities for flight below 500 feet AGL

- human factors applicable to low-level flight operations, including:
 - human factor issues and their impact on the safety of low-level flight operations
 - dehydration and its impact on pilot cognitive function and reaction time
 - fatigue and its impact on pilot cognitive function and situational awareness
 - stress and its short-term and long-term impact
 - drugs (including over the counter) and their impact on pilot cognitive function, reaction time and coordination
 - spatial disorientation and illusions
- legislative restrictions applicable to low flying
- local air traffic control (ATC) procedures and instructions
- low-level flight operational techniques, including:
 - methods of managing the following factors:
 - wind direction
 - sun glare
 - obstructions, including wires and power lines
 - identifying wire runs and treating/minimising associated risks:
 - preliminary inspection of treatment area
 - how to judge distance to the wire
 - danger and forms of distraction
 - considerations for flying above or under the wire
 - considerations for crossing oblique wires
 - visual cues of wire locations, such as pole runs, type, numbers and attitude
 - insulators, cross-stress and angle of cross-stress, supplementary or spur wires and buildings
 - characteristics and dangers of high wires and guy wires
 - factors affecting misjudgement of wire clearance
 - how to maintain awareness of located wires
 - hazards of mental overload
 - operation of differential global navigation satellite systems (DGNSS) for track guidance, including the importance of maintaining an active scan outside the cockpit while referencing the DGNSS
- maximum rate turns and minimum radius turn criteria
- meteorological factors affecting aeroplane flight performance during low-level flight, including:
 - effects of inversion on low-level flight
 - indicators of mechanical and thermal turbulence and shifting wind and implications for low-level operations
 - winds affecting low-level flying and associated flying conditions
 - effect of mountainous influence on airflow and associated flying conditions
 - weather phenomena hazardous to low-level operations
 - terrain and weather conditions that may lead to disorientation during low-level flight:

- flight into rising ground and toward low ground
- false horizons
- ridgeline and valley effects
- pilot corrective actions
- typical terrain and seasonal effects on local wind direction, strength and mechanical or thermal turbulence
- minimum height for low-level flight by an aircraft over a city, town or populous area
- minimum lateral and vertical distances that an aircraft must avoid persons, vessels, vehicles, structures or livestock over a sparsely populated area
- operations on, or in vicinity of, non-controlled and controlled aerodromes or airstrips, including:
 - restrictions and conditions on low-level operations at aerodromes with movements of regular public transport aircraft
 - circuit requirements at various types of aerodromes and aircraft landing areas (ALAs), including conditions applying to exemption from compliance with Civil Aviation Safety Authority (CASA) published procedures
 - aerial inspection methods and purpose
 - location of, and planning for, obstacle management and ground undulations
- operational planning, including:
 - flight planning and risk management:
 - aviation risk management processes
 - low-level flight hazards and controls applicable to:
 - hilly terrain
 - downdraughts
 - turbulence
 - false horizon effect
 - high country
 - irregular areas
 - pre-flight and after-flight inspections:
 - aircraft safety criteria
 - inspections and flight preparation
 - operational inspections:
 - operating area inspection methods and purpose
 - limitations of ground inspections
 - low-flying restrictions, planning notice, precautions and procedures with respect to overflying, or in close proximity to, buildings during low-level flight operations, including stating the required safety distances and minimum height from buildings
- problems that may occur when operating an aeroplane at low level and appropriate action that should be taken in each case
- relevant WHS and environmental procedures and regulations
- relevant sections of CASRs and Civil Aviation Orders

- unintended incipient spinning inducement and pilot corrective actions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0039 Conduct aerial application operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the application of skills and knowledge required to conduct aerial application operations in compliance with the relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes conducting pre-flight operations, performing operational area evaluations, conducting an aerial survey, applying substances through aerial application, and conducting global navigation satellite system (GNSS) swath guidance equipment operations.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Conduct pre-flight actions

- 1.1** Own fitness for flight and planned operations is self-assessed
- 1.2** Operational aircraft type is determined for suitability for type of aerial application operation
- 1.3** Aircraft and role equipment are checked and assessed for serviceability prior to commencing flight operations
- 1.4** Required applicable maintenance documentation is compiled and checked for accuracy and completeness
- 1.5** Role equipment calibration is checked and adjusted as required
- 1.6** Planned aerial application operations are assessed for potential or actual hazards
- 1.7** Fuel requirements are determined and established within aerial application management plans
- 1.8** Logistical considerations are addressed within scope of application management plan, including airstrip/aerodrome status, ground support requirements, personal supplies and air traffic service requirements

2 Conduct planning and risk management

- 2.1** Suitability of current and forecast weather is determined
- 2.2** Application management plan is developed and used as the basis for aerial application operations
- 2.3** Potential and actual hazards and operational requirements are identified, risks to aerial application operations assessed and appropriate risk controls implemented in accordance with the application management plan
- 2.4** Treatment area map is correctly interpreted
- 2.5** Command decision on the safety of the proposed application, including refusing to undertake an application where the risks are considered to be too high, is made as required
- 2.6** Appropriate selection of application pattern and direction of treatment is made taking into consideration

- safety, efficiency, hazards and terrain
- 2.7 Acceptable aircraft performance for aerial application operational conditions is confirmed through performance planning
 - 2.8 Normal and abnormal operational communications and signals are confirmed
- 3 Perform operational area evaluation**
- 3.1 Aircraft is flown to aerial application operational area using appropriate flight and navigational techniques
 - 3.2 Operational landing areas are assessed for length, condition, approach/landing direction, hazard identification and meteorological conditions
 - 3.3 Issues relating to aircraft weight, performance, dimensions, load and meteorological conditions are identified and managed
 - 3.4 Landing areas suitable for conducting aerial application operations are selected
 - 3.5 Aircraft pre-landing/take-off checks are performed in accordance with operational procedures
 - 3.6 Appropriate landing and take-off techniques are conducted during aerial application operations
 - 3.7 Appropriate dumping point for each take off, including adequate safety buffers, is identified
 - 3.8 One-way airstrip operations are safely applied as required
 - 3.9 Safe helicopter operations from a marginal helicopter landing site (HLS) are demonstrated, as required
- 4 Fly between operational and application areas**
- 4.1 Low-level navigation techniques from an operational area to an application area are used as required
 - 4.2 Most appropriate routes and heights between operational and application areas with considerations to terrain, stock, populated areas, housing and hazards are selected
 - 4.3 Operations at a certified or registered aerodrome are conducted as required
 - 4.4 Aerial application operations are performed in accordance with published regulations requirements

- 5 Conduct an aerial survey**
- 5.1** Appropriate aerial survey plans are developed for conducting safe aerial application operations
 - 5.2** Operating area boundaries are established and environmentally sensitive areas identified, including areas that are noise sensitive, biologically susceptible, populated and urban, and restricted or dangerous
 - 5.3** Potential emergency or alternate landing areas are identified and/or established for contingency operations
 - 5.4** Environmental hazard factors affecting aerial application operations are considered
 - 5.5** Wind velocity and direction are assessed for effect on operations
 - 5.6** Application management plans are amended or modified based on aerial survey assessment results as required
- 6 Operate within the vicinity of power lines**
- 6.1** Power lines within and outside the treatment area during an aerial survey are identified
 - 6.2** Power line infrastructure cues are interpreted to aid wire run identification
 - 6.3** Wire heights are accurately assessed to support safe operations in vicinity of power lines, including safe flying parallel to wires
 - 6.4** Other hazards relevant to operations near power lines, such as pole stays, crop height, fences or machinery that may pose a risk, are identified and managed
 - 6.5** Safe command decision whether to fly over or under a wire is made
 - 6.6** Aerial application operations over wires, including adequate safety buffers for pull-up and let down and accurate cut-off and on-off application equipment, are conducted
 - 6.7** Aerial application operations under wires, including assessment of safe clearance distances, are conducted
 - 6.8** Application approaches towards power lines when passage beneath is unachievable are terminated safely
 - 6.9** Human factors that may affect operations near power lines, particularly distraction, short-term memory

- limitations and inattention (perceptual) blindness, are applied during aerial application operations
- 7 Apply substances through aerial application**
- 7.1** Substances are applied safely in accordance with the application management plan
- 7.2** Correct application height relevant to terrain, application type and meteorological conditions is established and maintained
- 7.3** Appropriate airspeed and flight profile are controlled on entry or re-entry to operational areas
- 7.4** Aerial application equipment is operated within scope of the application management plan
- 7.5** Hazard areas are manoeuvred around with adequate safety margins during application operations
- 7.6** Aircraft smoke dispersal equipment is routinely utilised to establish accurate wind velocity and direction
- 7.7** Application flow rates, pressure and product quantities are monitored during application operations
- 7.8** Decisions to suspend or continue safe aerial application operations are taken based on planned or actual operating conditions
- 7.9** Clean up operations and hazard safety checks are conducted on completion of aerial application
- 8 Conduct GNSS swath guidance equipment operations**
- 8.1** GNSS familiarity is applied to the appropriate level of operational requirement
- 8.2** Sound judgement is applied during application treatment area pattern selection
- 8.3** Correct swath relevant to aircraft, configuration and substance to be applied is selected
- 8.4** AB line and C point is accurately placed as required
- 8.5** Aircraft is accurately manoeuvred on correct swath line with reference to light bar and natural features
- 8.6** Aircraft is operated at maximum permissible weights for aerial application operations in accordance with

manufacturer and regulatory requirements

8.7 Aircraft take-off weight is determined within requirements relevant to strip length and operating conditions

8.8 Aircraft is operated safely and effectively at maximum weights during all phases of flight, including taxi, take off and climb, approach and landing, application, turns and obstacle avoidance manoeuvres

9 Jettison a load

9.1 Full liquid load is jettisoned during take-off and control of aircraft is maintained

9.2 Full liquid load is jettisoned during flight and aircraft pitch, roll, yaw and speed changes are controlled

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0007 Conduct aerial application operations.

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0039 Conduct aerial application operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant aeronautical knowledge
- applying short field/strip landing and take-off techniques
- assessing airstrip/aerodrome suitability, including:
 - approach and landing direction
 - airstrip/aerodrome hazards
 - meteorological conditions
 - operational length
 - surface condition and restrictions
- assessing and checking aircraft and role equipment for flight serviceability
- assessing identified environmental hazard factors
- assessing own fitness for flight and planned operations
- assessing relevant wind velocity and direction
- compiling applicable maintenance documentation
- conducting pre-flight operational planning
- determining aircraft take-off weights relevant to strip length and operational conditions
- determining landing area suitability for normal and contingency operations
- determining relevant aircraft type suitability
- developing, amending and modifying application management plans
- establishing and implementing safe operating condition margins during aerial application operations
- establishing operational fuel requirements for normal and contingency operations
- flying aircraft to/from aerial application operating areas
- identifying aerial application hazards
- identifying logistical considerations for application management plan, including:
 - airstrip/aerodrome status
 - air traffic service requirements
 - ground support requirements
 - personal supplies and life support

- identifying potential contingency and alternate landing areas
- jettisoning full liquid load and maintaining aircraft control, including:
 - during take-off prior to lift-off
 - immediately after take-off
 - during flight and control pitch change to maintain altitude (+100/-0 ft) by adjustments of elevator and power
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerial application human factors, including:
 - heat stress and dehydration
 - in-flight distractions
 - maintaining situational awareness
 - mental and physical fatigue
- aerial application role equipment
- aircraft configuration and flight characteristics for the aircraft being flown during maximum weight flight and load jettison operations
- aircraft flight manual, performance, engine and systems
- applicable regulations that relate to conducting a safe aerial application operation
- aviation risk and fatigue risk management processes
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aerial application operations
- Civil Aviation Safety Authority (CASA) exemptions with regards to maximum take-off weight and applicability of other aircraft limitations
- factors to be considered when determining payload weights for aerial application
- flight control and throttle actions required to maintain control of aircraft being flown when jettisoning a full load
- global navigation satellite system (GNSS) equipment and operator procedures
- low-level flight safety hazards and risks
- meteorological factors affecting aircraft flight performance during low-level flight
- relevant aerodynamics and aircraft performance
- terrain following techniques.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIY0040 Apply aeronautical knowledge to aviation operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to apply aeronautical knowledge to aviation operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes utilising aviation terminology, demonstrating knowledge of basic aircraft power plants and systems, and applying aerodynamic theory. It also includes applying knowledge of aviation navigation charts, aircraft operations, and performance and planning factors.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Utilise aviation terminology	1.1 Standard aeronautical terminology and phraseology is used to explain aviation operations
	1.2 Flight direction is correctly explained using accepted units of measure and direction
	1.3 Flight speed, distance and velocity terms are correctly outlined
	1.4 Aviation units of measure are utilised during aviation operations
2 Apply knowledge of basic aircraft power plants and systems	2.1 Piston engine aircraft operating principles are explained
	2.2 Operator knowledge of aviation fuels and oils usage is applied
	2.3 Engine handling techniques and operating limitations are implemented
	2.4 Aircraft system component malfunctions/failures and associated system warnings, cautions and indications are correctly outlined
	2.5 Aircraft flight instruments are identified and their purpose explained
3 Apply basic aerodynamic theory	3.1 Basic aircraft operational states are explained in terms of kinetic and potential energy terms
	3.2 Standard aerodynamic terminology and phraseology is used to describe aviation operations
	3.3 Wake turbulence and associated aircraft operational effects are explained
	3.4 Thrust stream turbulence, including jet blast and rotor downwash hazards to flight operations, are identified
4 Apply knowledge of aviation navigation charts	4.1 Visual chart types and major chart features displayed are explained
	4.2 Controlled airspace (CTA), prohibited, restricted and danger (PRD) areas are identified on appropriate visual

- charts
- 4.3 Appropriate PRD data is determined and extracted for use in aviation navigation planning
 - 4.4 Runway information and operational limitations data is extracted from en route supplements for use in aviation navigation planning
- 5 Apply knowledge of aircraft operations, performance and planning**
- 5.1 Aircraft airworthiness requirements and certification documentation are identified and correctly compiled
 - 5.2 Aircraft take-off and landing performance data is extracted from authorised sources and is correctly used during aircraft performance planning
 - 5.3 Aircraft weight and balance planning factors are correctly outlined and used during aircraft loading calculations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0008 Apply aeronautical knowledge to aviation operations.

Assessment Requirements for AVIY0040 Apply aeronautical knowledge to aviation operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying basic aerodynamic theory
- applying knowledge of aircraft operations, performance and planning
- applying knowledge of aviation navigation charts
- applying knowledge of basic aircraft power plants and systems
- applying relevant aeronautical knowledge
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- utilising aviation terminology.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- aircraft operations, performance and planning
- basic aerodynamic theory
- aviation navigation charts
- aviation terminology
- basic aircraft power plants and systems
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane or helicopter operations
- general flight planning and performance, including:
 - density height
 - take-off and landing performance
 - climb, cruise and descent performance
 - weight and balance
 - loading limitations and terminology
 - speed limitations and terminology

- en route supplement information relevant to day visual flight rules VFR operations
- flight plan preparation, including:
 - flight planning
 - equi-time point (ETP)
 - point of no return (PNR)
 - diversions.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIY0041 Apply the principles of civil air law to aviation operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to apply the principles of civil air law to aviation operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes compiling aviation documentation, applying flight crew licensing requirements, and applying flight rules and conditions of flight to aviation operations. It also includes applying air service operations legislative requirements, aerodrome and airspace knowledge, and aviation emergency and search and rescue (SAR) knowledge to aviation operations.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Compile aviation documentation	1.1 Flight time recording requirements are accurately transcribed and compiled within authorised flight documents and flight record systems
	1.2 Aviation legislation, aeronautical information and general operating rules are confirmed and applied to aviation operations
	1.3 Aircraft maintenance release requirements and documentation compliance requirements are clarified
2 Apply flight crew licensing knowledge	2.1 Knowledge of flight crew licence limitations and privileges is applied
	2.2 Flight crew licence medical standards and limitations are confirmed and applied to aviation operations
	2.3 Licence holder privileges relating to daily maintenance inspections, maintenance release documentation and defect reporting are complied with
3 Apply flight rules and conditions of flight	3.1 Rules of the air are applied to aviation operations
	3.2 Aerodrome operating requirements are applied
	3.3 Separation minima at non-controlled aerodromes is applied
	3.4 Smoking restrictions during take-off, landing and refuelling operations are complied with
	3.5 Carriage and discharge of firearms requirements are applied
	3.6 Visual flight rules (VFR) and visual meteorology conditions are applied to aviation operations below 10,000 feet (ft)
	3.7 Altimetry procedures for flight below 10,000 ft are applied to aviation operations
	3.8 Drugs and alcohol usage rules, including temporary medical unfitness for flight, are complied with
	3.9 Aircraft lighting configuration and operating

requirements are followed

- 3.10** Minimum operating heights for flights over populated and other areas are applied
 - 3.11** Flight operating limitations for acrobatic flights and flights over public gatherings are complied with
 - 3.12** Flight operating requirements for take-off and landing during daylight hours are applied
- 4 Apply air service operations legislative requirements**
- 4.1** Passenger carriage legislative requirements are extracted from authorised references
 - 4.2** Cargo, floatation and survival equipment, dangerous goods and miscellaneous cargo carriage requirements are applied
 - 4.3** Legislative responsibilities and requirements of the pilot in command (PIC) are identified
 - 4.4** Legislative requirements of flight crew before and after flight duties are applied
- 5 Apply aerodrome and airspace knowledge**
- 5.1** Aerodrome movement areas, landing areas, helicopter landing site (HLS) and markings are identified
 - 5.2** Aerodrome operating procedures are applied to circuit operations
 - 5.3** Aerodrome meteorological minima is applied
 - 5.4** Classes of controlled and uncontrolled airspace are complied with
 - 5.5** Prohibited, restricted and danger (PRD) area flight operating conditions are applied
 - 5.6** Flight information and air traffic service area boundaries and limitations are identified and applied to aviation operations
 - 5.7** Altimetry datum and appropriate reference heights are calculated and applied to aviation operations
 - 5.8** Airspace documentation is identified and prescribed airspace requirements followed
 - 5.9** Air Defence Identification Zone (ADIZ) operating

- requirements, pilot interception actions and vested powers of the PIC are explained
- 6 Apply aviation emergency and search and rescue (SAR) knowledge**
- 6.1** Radio equipment testing and listening watch requirements are applied
 - 6.2** Aircraft navigation and landing light usage during emergency procedures is explained and applied
 - 6.3** Emergency incident and accident definitions and reporting requirements are outlined
 - 6.4** Mercy flight conditions and restrictions are outlined
 - 6.5** Flight incident and accident notification responsibilities of the PIC are identified
 - 6.6** Search and rescue time (SARTIME) is determined and applied to aviation operations
 - 6.7** Emergency procedure documents are identified and utilised during emergency and SAR operations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0009 Apply the principles of civil air law to aviation operations.

Assessment Requirements for AVIY0041 Apply the principles of civil air law to aviation operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying air service operations legislative requirements
- applying aviation emergency and search and rescue (SAR) knowledge to aviation operations
- applying flight crew licensing requirements
- applying flight rules and conditions of flight to aviation operations
- applying relevant aeronautical knowledge
- compiling legislated aviation documentation
- extracting information from civil air law, aviation regulations, policies and procedures
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of civil air law, aviation regulations, policies and procedures to aviation operations
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane or helicopter operations
- relevant sections of CASRs and Civil Aviation Orders pertaining to civil air law, regulations, policies and procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate,

assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIY0042 Apply aeronautical knowledge and civil air law to flight dispatch operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to apply aeronautical knowledge and civil air law to flight dispatch operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes identifying aviation regulations, utilising aviation terminology, applying knowledge of basic aircraft power plants and systems, and applying aerodynamic theory. It also includes applying knowledge of aviation navigation charts, aircraft operations, and performance and planning factors.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight dispatch and flight operations support personnel and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision as a single operator or within a team environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify aviation regulations

- 1.1 State/territory authority requirements and authorisations required for commercial and air transport operations are explained
- 1.2 Methods of exercising state/territory authority functions are identified
- 1.3 Requirements of an Air Operator Certificate (AOC) are applied
- 1.4 Role of International Air Transport Association (IATA), International Civil Aviation Organisation (ICAO) and other relevant aviation organisations is explained
- 1.5 Role of national aviation regulatory bodies and enterprise organisational structures is explained
- 1.6 Specific state/territory and enterprise regulations relating to dispatch of aircraft are applied to flight dispatch activities
- 1.7 International civil aviation convention provisions are identified

2 Utilise aviation terminology

- 2.1 Standard aeronautical terminology and phraseology is used to describe aviation operations
- 2.2 Flight direction is correctly explained using accepted units of measure and direction
- 2.3 Flight speed, distance and velocity terms are correctly explained and applied to flight dispatch activities
- 2.4 Aviation units of measure are utilised during flight dispatch operations

3 Apply knowledge of basic aircraft power plants and systems

- 3.1 Aircraft propulsion system types, principles and operational differences are followed
- 3.2 Propeller driven aircraft types and principles of operation are explained

- 3.3 Jet-propelled aircraft types and principles of operation are explained
 - 3.4 Operator knowledge of aviation fuels and oils usage is applied to flight planning tasks
 - 3.5 Aircraft flight instruments are identified and their purpose explained
- 4 **Apply basic aerodynamic theory**
 - 4.1 Basic aircraft operational states are explained in terms of kinetic and potential energy terms
 - 4.2 Standard aerodynamic terminology and phraseology is used to describe flight operations
 - 4.3 Wake turbulence and associated aircraft operational effects are applied to flight dispatch activities
 - 4.4 Thrust stream turbulence (jet blast/rotor downwash) hazards to flight operations are identified
- 5 **Apply knowledge of aviation navigation charts**
 - 5.1 Visual chart types and major chart features displayed are explained
 - 5.2 Controlled airspace (CTA), prohibited, restricted and danger (PRD) areas are identified on appropriate visual charts
 - 5.3 Appropriate PRD data is determined and extracted for use in operational flight planning tasks
 - 5.4 Runway information and operational limitations data is extracted from en route supplements for use in operational flight planning tasks
- 6 **Apply knowledge of aircraft operations, performance and planning**
 - 6.1 Aircraft airworthiness requirements and certification documentation are identified and correctly compiled
 - 6.2 Aircraft take-off and landing performance data is extracted from authorised sources and correctly used during aircraft performance planning
 - 6.3 Aircraft weight and balance planning factors are correctly outlined and used during aircraft loading calculations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0010 Apply aeronautical knowledge and civil air law to flight dispatch operations.

Links

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0042 Apply aeronautical knowledge and civil air law to flight dispatch operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

- applying aeronautical knowledge during flight planning and flight dispatch activities
- applying civil air law during flight planning and flight dispatch activities
- applying knowledge of aircraft operations, performance and planning
- applying knowledge of aviation navigation charts
- applying knowledge of basic aircraft power plants and systems
- identifying international and national aviation organisations and applicable legislation affecting aircraft operation
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- utilising aviation terminology.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- aeroplane power plants and aircraft systems, including:
 - air-conditioning and cabin pressurisation systems
 - automatic flight control systems
 - auxiliary power units
 - barometric flight instruments
 - communications systems
 - constant speed units
 - direct reading magnetic compass
 - electrical and ignition systems
 - engine cooling devices
 - engine systems
 - fire protection, detection and warning systems
 - fuel system components
 - gyroscopic flight instruments

- hydraulic system components
- ice and rain protection
- lubrication system
- propellers
- retractable undercarriage system components
- stall warning devices
- aerodynamic theory, including:
 - terminology
 - Bernoulli's theorem and Coanda theory
 - power requirements
 - manoeuvres
 - performance considerations
 - changes in angle of attack
 - aerodynamic design features
 - lift and drag
 - flight controls and effects
 - climb performance factors
 - descent performance factors
 - turning performance factors
 - stalling, spinning and spiral dives
 - stability and control
 - taxi, take-off and landing
 - effects of structural damage on aircraft performance
- aircraft minimum equipment list (MEL), including:
 - general description
 - use of the MEL by flight dispatchers
 - use of the MEL by maintenance
 - use of the MEL by flight crew
- aircraft operations, performance and planning
- aviation navigation charts
- aviation terminology
- basic aircraft power plants and systems
- domestic civil aviation laws, acts and statutes
- domestic Civil Aviation Safety Regulations (CASRs), orders and instruments
- flight instruments
- relevant WHS and environmental procedures and regulations
- international civil aviation conventions, including:
 - historical significance
 - contracting states
 - sovereignty of airspace

- rights of commercial flight over contracting states/territories
- issues concerning travelling public
- issues concerning the state/territory
- issues concerning the aircraft manufacturer
- issues concerning the operator
- issues concerning flight crew members
- issues concerning dispatchers
- international civil aviation laws, acts and statutes
- International Civil Aviation Organization (ICAO), including:
 - historical significance
 - annexes to the convention and application
 - publications, Procedures for Air Navigation Services (PANS) and technical publications
 - air navigation plans
 - state/territory responsibility of air worthiness
 - operator responsibility for maintenance of aircraft air worthiness
 - operator responsibility for loading data
- operations and performance, including:
 - take-off and landing performance
 - aeroplane limitations
- operators authority to engage in types of specific air transport operations:
 - categories
 - routes and frequency
 - area of operation
 - terminal, alternate and emergency airports
 - aircraft types, navigation and communication systems
- operations manual (OM), including:
 - authority of the OM
 - format
- relevant sections of CASRs and Civil Aviation Orders pertaining to flight dispatcher functions
- regulatory provisions of a flight manual, including:
 - flight manual authority
 - content, structure and approval
- state/territory-based requirements, including:
 - managerial and technical competencies
 - qualifications, training and competency
 - financial resources
 - equipment
 - maintenance
 - flight manuals

- OMs
- audit requirements
- operational control
- duty and flight time limitations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIY0043 Monitor flight performance

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to monitor flight performance in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and international aviation operating standards.

It includes maintaining a flight watch, maintaining aviation communication and data links, managing routine and emergency airborne situations, and identifying and assessing aviation ground resources.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight dispatch and flight operations support personnel and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision as a single operator or within a team environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operations and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Maintain a flight watch

- 1.1** Aircraft fuel requirements for flight completion are continuously monitored and re-calculated as required
- 1.2** Fuel remaining until exhaustion is continuously monitored and re-calculated as required
- 1.3** En route meteorological conditions at altitude and adjacent altitudes are monitored and advised to flight crew as required
- 1.4** Estimated time of arrival (ETA) for position fixes and destination is updated based on fuel requirements, aircraft performance, prevailing meteorological conditions and flight crew advice
- 1.5** Departure, position reports and arrival information are monitored, maintained and updated within relevant operational flight logs
- 1.6** Effects on ETA at destination, including passenger connections and curfews, are evaluated when implementing contingency plans
- 1.7** Fatigue management policies and procedures are applied to crew endurance when implementing contingency plans

2 Maintain aviation communication and data links

- 2.1** Voice and data communication links with air traffic services are monitored and maintained throughout flight support activities using a range of appropriate transmitting and receiving methods and protocols
- 2.2** Voice and data communication links with operating aircraft are monitored and maintained throughout flight support activities using a range of appropriate transmitting and receiving methods and protocols
- 2.3** Voice and data communication links with emergency response agencies are monitored and maintained throughout flight support activities using a range of appropriate transmitting and receiving methods and protocols
- 2.4** Authorised aviation radio telephony procedures are used during all voice communications with air traffic services, operating aircraft and emergency response

agencies

- 2.5** Aircraft position information and reports are routinely monitored and updated using aircraft voice and data communication links within flight support monitoring systems
 - 2.6** Aircraft communication links are continuously monitored and appropriate voice and data communication failure response plans implemented
- 3 Manage routine airborne situations**
- 3.1** Aircraft performance, including the limitations imposed by minimum equipment list (MEL) restrictions, is continuously monitored
 - 3.2** Effects of air traffic service reroutes are identified and appropriate courses of action developed
 - 3.3** Unanticipated severe weather penetration effects are evaluated against flight plan and amendments advised to flight crew
 - 3.4** High terrain transit performance calculations and effects on flight performance are advised to flight crew
 - 3.5** Effects of identified moderate or severe icing conditions not known to air traffic services are evaluated
 - 3.6** Flight crew are advised of changes to planned flight conditions and updated about relevant operational information to maintain flight performance and aircraft safety
- 4 Manage emergency airborne situations**
- 4.1** Overdue position reports are responded to in accordance with regulatory and workplace requirements
 - 4.2** Overdue at destination response actions are implemented in accordance with regulatory and workplace requirements
 - 4.3** Contingency plans for aircraft fuel exhaustion are implemented and coordination with air traffic services and emergency response agencies maintained
 - 4.4** Aircraft in-flight fires are responded to in accordance with regulatory and workplace requirements
 - 4.5** Loss of aircraft engine/s is responded to in accordance with regulatory and workplace requirements

- 4.6 Unlawful interference with aviation and aircraft flight safety is identified and managed in accordance with regulatory and workplace requirements
 - 4.7 Incapacitation of flight crew member/s is identified and contingency actions advised to maintain flight performance and aircraft safety
 - 4.8 Ditching and emergency landing procedures are implemented during aircraft emergency situations
 - 4.9 Coordination and liaison with search and rescue (SAR) agencies are maintained during aircraft emergency situations
- 5 Identify and assess aviation ground resources**
- 5.1 Aircraft maintenance support requirements are identified and assessed for routine and emergency situations
 - 5.2 Performance engineering requirements are identified and assessed for routine and emergency situations
 - 5.3 Aviation medical support requirements are identified and assessed for routine and emergency situations
 - 5.4 Aviation security and law enforcement support requirements are identified and assessed for routine and emergency situations
 - 5.5 Operating aerodrome capabilities and support requirements are identified and assessed for routine and emergency situations
 - 5.6 Aviation ground support requirements are identified and assessed for routine and emergency situations
 - 5.7 Passenger service and support requirements are identified and assessed for routine and emergency situations
 - 5.8 Meteorological conditions and effects are identified and assessed for routine and emergency situations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0012 Monitor flight performance.

Assessment Requirements for AVIY0043 Monitor flight performance

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and negotiating effectively with others
- completing documentation related to work activities
- identifying and correctly using flight support equipment, processes and procedures
- implementing and managing contingency plans for unanticipated and routine airborne situations, including:
 - aircraft fuel consumption variations
 - aircraft performance calculations and variations
 - effects of air traffic reroutes
 - effects of flight diversion over different terrain
 - unanticipated meteorological conditions, including icing conditions
- implementing and managing contingency plans for unanticipated and emergency airborne situations, including:
 - overdue position report
 - overdue at destination
 - fuel exhaustion
 - inability to communicate with aircraft
 - continuing to operate in unsafe conditions
 - in-flight fire
 - loss of engine/s
 - loss of cabin pressure
 - security threat
 - incapacitation of flight crew member
 - ditching/emergency landing
 - rescue coordination

- government/air traffic control (ATC) coordination and notification
- unlawful interference with aviation
- interpreting and following operational instructions and prioritising work
- maintaining aviation communications and data links, including:
 - data communications:
 - transmission control protocol (TCP)/internet protocol (IP)
 - high frequency (HF)
 - satellite
 - voice communications:
 - mobile telephony
 - very high frequency (VHF)
 - ultra-high frequency (UHF)
 - HF
 - radio over IP (ROIP)
 - satellite
- modifying activities depending on differing operational dispatch contingencies, risk situations and environments
- monitoring flight performance, including:
 - fuel consumption
 - en route weather, including winds
 - aircraft performance, including the limitations imposed by minimum equipment list (MEL) restrictions
 - in-flight equipment failures
 - security problems
 - effects of and on hazardous materials
 - restricted articles
 - perishable cargo
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and documenting unlawful interference with aviation
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- responding appropriately to cultural differences in the workplace
- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS) standards
- taking action to manage unlawful interference with aviation
- working collaboratively with others when managing disruptive and unlawful behaviour within aviation operating environments
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aeronautical fixed service, including:
 - message format
 - national practical fixed network:
 - Aeronautical Fixed Telecommunication Network (AFTN)
 - Société Internationale de Télécommunications Aéronautiques (SITA)
- aeronautical mobile service, including:
 - VHF band frequency utilisation
 - phonetic alphabet
 - standard words
 - call signs
 - abbreviations
 - communications
 - priorities:
 - distress
 - urgency
 - traffic
 - practical operations
- automated aeronautical service, including:
 - telecommunications service
 - flight weather (VOLMET)
 - VHF
 - HF
 - automatic terminal information service (ATIS)
- applying relevant aeronautical knowledge to flight monitoring services
- aviation risk management processes
- contingency planning considerations for unanticipated and routine airborne situations, including:
 - aircraft fuel consumption variations
 - aircraft performance calculations and variations
 - effects of air traffic reroutes
 - effects of flight diversion over different terrain
 - unanticipated meteorological conditions (including icing conditions)
- contingency planning considerations for unanticipated and emergency airborne situations, including:
 - overdue position report
 - overdue at destination

- fuel exhaustion
- inability to communicate with aircraft
- continuing to operate in unsafe conditions
- in-flight fire
- loss of engine/s
- loss of cabin pressure
- security threat
- incapacitation of flight crew member
- ditching/emergency landing
- rescue coordination
- government/ ATC coordination and notification
- elementary radio theory, including:
 - amplitude
 - frequency
 - period
 - wavelength
 - electromagnetic (EM) wave
 - sound wave
 - EM spectrum
 - radio spectrum:
 - very low frequency (VLF)
 - low frequency (LF)
 - medium frequency (MF)
 - HF
 - VHF
 - ultra-high frequency (UHF)
 - propagation of radio waves
 - skip distance and hops
 - D, E and F layers
 - aerials:
 - polar diagrams
 - Figure 8
 - cardioid
 - modulation:
 - AM
 - FM
 - sidebands: single side band (SSB) and double side band (DSB)
 - elementary radio transmit/receive (TX/RX)
- en route weather changes, including:

- winds
- en route alternate terminal weather, including extended operations (ETOPS)
- turbulence
- icing
- weather reroutes initiated by flight dispatch
- fatigue risk management processes
- flight equipment failures, including:
 - effect on performance:
 - potential for diversion
 - effect on subsequent flights
 - availability of maintenance at diversion aerodrome:
 - effect on other systems
 - ETOPS considerations
 - emergency potential
- flight monitoring resources — position reports, including:
 - company radio:
 - Aeronautical Radio Incorporated (ARINC) reports
 - commercial radio net reports
 - aircraft situation display (ASD)
 - departure station reports
 - destination station reports
 - ATC reports
 - satellite communications (SATCOM)
- flight watch requirements, including:
 - aircraft position fixes and reporting requirements
 - en route weather and wind monitoring
 - estimated time of arrival (ETA) calculations
 - fuel performance calculations for routine and emergency airborne situations
- identification of methods and procedures for managing unlawful interference with aviation as a flight dispatcher, including:
 - taking control of an aircraft by force, or threat of force, or any other form of intimidation or by any trick or false pretence
 - destroying an aircraft that is in service
 - causing damage to an aircraft that is in service that puts the safety of the aircraft, or any person on board or outside the aircraft, at risk
 - doing anything on board an aircraft that is in service that puts the safety of the aircraft, or any person on board or outside the aircraft, at risk
 - placing, or causing to be placed, on board an aircraft that is in service, anything that puts the safety of the aircraft, or any person on board or outside the aircraft, at risk
 - putting the safety of aircraft at risk by interfering with, damaging or destroying air navigation facilities

- putting the safety of an aircraft at risk by communicating false or misleading information
- committing an act at an airport, or causing any interference or damage, that puts the safe operation of the airport, or the safety of any person at the airport, at risk
- international aeronautical telecommunications service, including:
 - fixed
 - mobile radio navigation service
 - broadcasting telecommunications service
- radio navigation service, including:
 - standard navigation aids
 - operational objectives:
 - CAT I
 - CAT II
 - CAT III
 - instrument landing system (ILS)
 - ground-controlled approach (GCA)
 - VHF omni-directional range (VOR)/distance measuring equipment (DME)
 - non-directional beacon (NDB) and directional finding (D/F)
- relevant state/territory regulations and requirements
- relevant WHS and environmental protection procedures and guidelines
- risks and hazards when monitoring flight performance and related actions to control the risk.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0044 Conduct a 2D instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct a 2D instrument approach in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes preparing for an approach, conducting the initial approach and conducting a holding pattern. It also includes conducting an approach and conducting a missed approach.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operations and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

- | | |
|------------------------------------|--|
| 1 Prepare for approach | 1.1 Latest available information for destination is reviewed |
| | 1.2 Navigation system validity check is conducted as required |
| | 1.3 Receiver autonomous integrity monitoring (RAIM) check is conducted as required |
| | 1.4 Flight plan is selected, loaded, checked and activated as required |
| | 1.5 Current approach chart for the approach to be flown is selected and briefed to flight crew |
| | 1.6 Navigation aid required for approach is checked and confirmed as serviceable |
| 2 Conduct initial approach | 2.1 Altimeter QNH is set correctly |
| | 2.2 Aircraft is manoeuvred to holding fix |
| 3 Conduct a holding pattern | 3.1 Holding pattern is entered and performed from holding fix |
| | 3.2 Aircraft is flown in accordance with relevant approach procedure requirements |
| 4 Conduct an approach | 4.1 Altimeter QNH is updated and set |
| | 4.2 Automation is used appropriately |
| | 4.3 Approach is performed correctly and within published tolerances |
| | 4.4 Navigation aid signal integrity is monitored during approach |
| | 4.5 Aircraft is flown to a stabilised descent profile from final approach fix to minima |
| | 4.6 Visual reference is established and a visual circling or runway approach conducted for a landing on the selected runway |
| 5 Conduct a missed approach | 5.1 Missed approach conditions are recognised and missed approach is initiated |
| | 5.2 Aircraft is manoeuvred to missed approach point |

(MAPt)

- 5.3 Missed approach procedure is conducted in accordance with the instrument approach and landing (IAL) chart
- 5.4 Obstacle clearance in instrument meteorological conditions (IMC) or simulated IMC is maintained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0013 Conduct a 2D instrument approach.

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0044 Conduct a 2D instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- required navigation performance (RNP)-lateral navigation (LNAV), area navigation (RNAV)/GNSS and RNP-LP (wide area augmentation system [WAAS]) as required determining 2D approach procedure applicable minima for aircraft
- determining conditions permitting descent below minima
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting 2D instrument approach procedure chart
- interpreting and following operational instructions and prioritising workload
- modifying activities depending on workplace contingencies, situations and environments
- monitoring aid signal integrity
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing systematic scan techniques
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- selecting approach and determining applicable minima

- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- working collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- conducting 2D instrument approach, including:
 - non-directional beacon (NDB)
 - very high frequency (VHF) omni-directional range (VOR) and localiser (LOC)
 - distance measuring equipment (DME)/global navigation satellite system (GNSS) global positioning satellite system arrival (DGA)
- abnormal operations and emergency procedures for an approach, including navigation aid failure
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to instrument flight operations
- cause and magnitude of typical GNSS errors
- conditions required to transition to and operate in that mode of operation for the GNSS/non-precision approach (NPA) and the associated course deviation indicator (CDI) sensitivity and receiver autonomous integrity monitoring (RAIM) protection provided
- effect of each type of RAIM prediction on operational requirements
- effects of availability or otherwise of barometric altimeter-aiding on RAIM availability and prediction
- effects of satellite unserviceability on reliability of each type of prediction
- factors that adversely affect the conduct of a GNSS/NPA, and suitable pilot procedures to minimise such effects
- GNSS operating procedures for navigation tasks
- GNSS operational and serviceability checks
- GNSS system fundamentals and principles of operations
- GNSS warnings and messages
- human factors limitations associated with using GNSS equipment
- instrument approach procedures and limitations
- loss of radio communication during an approach procedure
- minimum obstacle clearance criteria during approach procedure and missed approach procedure
- missed approach procedure for an approach
- mode of operation required during each segment of a GNSS/NPA
- operating procedures for GNSS equipment that reduce or eliminate errors
- operating procedures that provide safeguards against GNSS navigational errors
- operational requirements that apply to planning a flight on the basis of conducting a RNAV/GNSS procedure at the destination

- parameters applicable to RAIM warnings in en route, terminal and approach modes
- prediction limitations that apply to availability of approach RAIM at the destination or alternate aerodrome
- procedure for joining the circuit from an approach procedure
- radio procedures during an approach
- requirements applicable to pilots and equipment for GNSS operations
- sector entry joining procedures for entering a holding pattern
- tracking tolerance and altitude limitations for flying the published approach procedure
- tracking tolerances, automatic way-point sequencing, CDI sensitivity and RAIM availability parameters for entry, RAIM availability and approach segments.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0045 Conduct a 3D instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct a 3D instrument approach in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes preparing for an approach, conducting the initial approach and conducting a holding pattern. It also includes conducting an approach and conducting a missed approach.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Assessment Requirements for AVIY0045 Conduct a 3D instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- determining 3D approach procedure applicable minima for aircraft
- determining conditions permitting descent below minima
- identifying and correctly using equipment required to conduct a 3D instrument approach
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting 3D instrument approach procedure chart
- modifying activities depending on workplace contingencies, situations and environments
- monitoring aid signal integrity
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing systematic scan techniques
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- selecting approach and determining applicable minima
- setting local or area QNH at appropriate stages of flight
- working collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- conducting 3D instrument approach, including:
 - instrument landing system (ILS)
 - microwave landing system (MLS)
 - global navigation satellite system (GNSS) with ground-based augmentation (GBA)
 - required navigation performance (RNP)-lateral navigation (LNAV)/vertical navigation (VNAV) barometric (baro) and RNP localizer performance with vertical guidance (LPV) (Wide Area Augmentation System [WAAS]) as required
- abnormal operations and emergencies procedures during an approach, including navigation aid failure
- adjustment to baro-determined minima for temperature effect
- automation and flight management system (FMS) management for low-visibility operations
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to instrument flight operations
- contaminated runway operations
- equipment redundancy during low-visibility operations
- low-visibility operations and environmental limitations
- runway markings and lighting
- runway visual range (RVR) versus slant visual range (SVR)
- temperature effects on altimeter
- types of approach lighting systems
- use of and precautions with approach slope indicators.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment

- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0046 Execute advanced aeroplane manoeuvres and procedures

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to execute advanced aeroplane manoeuvres and procedures in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes turning the aeroplane steeply, sideslipping, and executing short take-off and landing procedures. It also includes entering and recovering from stall conditions and recovering from an incipient spin.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and ground personnel and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Turn aeroplane steeply

- 1.1 Pre-manoeuve checks for steep turning are performed
- 1.2 Flightpath is cleared before and during turn
- 1.3 Steep level turn of nominated bank angle is achieved without altitude change to nominated heading
- 1.4 Descending turn of nominated bank angle is achieved to nominated heading
- 1.5 Awareness of higher stall speed in turns is applied
- 1.6 Aeroplane operating limits are not exceeded

2 Sideslip aeroplane

- 2.1 Yaw is induced to achieve increased rate of descent while maintaining track and airspeed
- 2.2 Recovery from sideslip is achieved and aeroplane is returned to balanced flight
- 2.3 Flightpath is cleared before and during manoeuvre
- 2.4 Glide speed is maintained

3 Execute short take-off

- 3.1 Take-off performance is calculated in accordance with performance chart
- 3.2 Pre-take-off, line-up and after take-off checks are performed in accordance with approved checklist and regulatory requirements
- 3.3 Aeroplane is lined up to enable use of maximum runway length
- 3.4 Short take-off technique is applied in accordance with aircraft flight manual (AFM)/pilot's operating handbook (POH) requirements
- 3.5 Separation with other traffic is maintained
- 3.6 Appropriate allowance is made for surface and wind conditions

- | | | |
|---------------------------------------|------------|---|
| 4 Execute short landing | 4.1 | Landing performance is calculated in accordance with performance chart |
| | 4.2 | Aeroplane is landed at nominated touchdown point using appropriate techniques and procedures in accordance with AFM/POH requirements |
| | 4.3 | Separation with other traffic is maintained |
| | 4.4 | Appropriate allowance is made for surface and wind conditions |
| | 4.5 | After-landing checks are performed in accordance with approved checklist and regulatory requirements |
| 5 Enter and recover from stall | 5.1 | Pre-manoevre checks for stalling are performed |
| | 5.2 | Stall signs and symptoms are recognised |
| | 5.3 | Aeroplane is controlled by applying required pitch, roll and yaw inputs as appropriate in a smooth, coordinated manner, and aeroplane is accurately trimmed to enter and recover from stall conditions |
| | 5.4 | Stall recovery in simulated partial and complete engine failure configurations is initiated and completed using established stall recovery techniques |
| 6 Recover from incipient spin | 6.1 | Pre-manoevre checks for an incipient spin are performed |
| | 6.2 | Incipient spin signs and symptoms are recognised |
| | 6.3 | Aeroplane is controlled during spin manoeuvres by applying required pitch, roll and yaw inputs as appropriate in a smooth, coordinated manner, to enter and recover from spin conditions during straight and level flight, climbing and turning |
| | 6.4 | Spin recovery is initiated and completed using established incipient spin recovery techniques |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0018 Execute advanced aeroplane manoeuvres and procedures.

Links

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0046 Execute advanced aeroplane manoeuvres and procedures

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeroplane aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others when executing advanced aeroplane manoeuvres and procedures
- compensating for the secondary effects of controls
- completing relevant documentation
- conducting short take-offs and landings
- conducting steep turns, including:
 - straight and level
 - descending
- entering and recovering from stall conditions, including:
 - incipient stall
 - stall with full power
 - stall without power applied
- conducting stall during:
 - straight and level flight
 - climbing
 - descending
 - approach to land configuration
 - turning
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising workload
- maintaining compliance with regulatory requirements

- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring functions of fuel systems
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing pre-manoeuve checks in accordance with regulatory requirements and manufacturer procedures
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- recognising flight situations that may require advanced manoeuvres and procedures, and applying the necessary techniques
- recognising single-engine incipient spin conditions
- recovering from single-engine incipient spins, including:
 - straight and level
 - climbing turning
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- sideslipping an aeroplane including:
 - straight sideslip
 - sideslipping turn
 - recovery actions
- using instruments to monitor aeroplane performance
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerodynamic and aeroplane operational considerations related to slow flight, sideslipping, stalling, spinning, steep turns, upset aeroplane states, including:
 - symptoms of approach to stall and throughout the stall, manoeuvre until recovery
 - relationship between angle of attack and stall
 - effects of weight, 'g' force and angle of attack
- dangers of unbalanced flight
- principle of stick and control and the point of stall
- priority given to reduce angle of attack during stall manoeuvres
- loss of height in relation to available height and energy state

- technique of converting excess speed to height
- technique of converting excess height to speed
- symmetrical and rolling 'g' force limitations
- higher stall speeds when aeroplane is turning
- effects on fuel, pitot and flap systems
- application of pre-maneuvre checks in accordance with regulatory requirements and manufacturers procedures
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane operations
- contents of the aircraft flight manual (AFM)/pilot's operating handbook (POH)
- day visual flight rules (VFR) criteria
- effects of 'g' forces
- effects of a sideslip on aeroplane performance
- effects of maximum rate and minimum radius turns
- effects of sideslipping on aeroplane on fuel, pitot and flap systems
- environmental conditions that represent visual meteorological conditions (VMC)
- functions and effects of all aeroplane controls
- ground hazards associated with minimum ground roll operations
- hazards of unbalanced flight
- in a Defence context, relevant Defence Orders and Instructions
- increased induced drag during a steep turn
- increased stalling speed in a steep turn
- local and published noise abatement requirements and curfews
- operational circumstances where steep turns are required
- principles of aerodynamics
- procedures and techniques for short take-offs and landings
- procedures and techniques for sideslipping an aeroplane
- procedures and techniques for turning an aeroplane steeply
- procedures for recovering from stalls and spins
- procedures for short take-offs and landings
- recognising stall and incipient spin conditions
- relevant sections of aeronautical information package (AIP)
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- take-off and landing performance chart calculations
- windsock and other indicators used to determine wind velocity.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory

requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0047 Manage abnormal aeroplane flight situations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to manage abnormal aeroplane flight situations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes managing engine failure after take-off, performing forced landings following engine failure, conducting precautionary search and landing, and managing on-board abnormal and emergency situations.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Manage engine failure after take-off

- 1.1 Abnormal or failed engine indications are correctly identified
- 1.2 Control of aeroplane is maintained during emergency response procedures
- 1.3 Immediate actions are performed in accordance with pilot's operating handbook (POH)
- 1.4 Landing area within gliding distance is selected and emergency procedures performed in accordance with aircraft flight manual (AFM)/POH
- 1.5 Flight profile is flown, from which a controlled landing could be achieved
- 1.6 Air traffic services or other agencies capable of providing assistance are advised of situation and intentions

2 Perform forced landing following engine failure

- 2.1 Partial or complete engine failure condition is correctly recognised and appropriate emergency response identified
- 2.2 Control of aeroplane is maintained during emergency response procedures
- 2.3 Immediate actions are performed in accordance with POH
- 2.4 Recovery plan is formulated and explained, most suitable landing area within gliding distance selected and aeroplane manoeuvred to nominated landing area
- 2.5 Consideration is given to restarting engine as required, and engine is restarted as required
- 2.6 Optimal gliding flight profile is selected and flown, from which a controlled landing could be achieved
- 2.7 Air traffic services or other agencies capable of providing assistance are advised of situation and intentions
- 2.8 Passengers and/or flight crew members are updated on flight situation and are advised to adopt emergency

- positions, time permitting
- 2.9** Aeroplane is landed ensuring safest outcome if engine restart is not achieved
- 3 Conduct precautionary search and landing**
- 3.1** Flight circumstances are assessed and appropriate decision to perform a precautionary landing is made
- 3.2** Intentions are communicated to other traffic or agencies as required
- 3.3** Aeroplane is configured for inspection flight profile
- 3.4** Landing area is selected and inspected for approach, landing distance, surface and obstacle clearance to ensure aeroplane can be landed safely
- 3.5** Passengers and/or flight crew members are updated on flight situation and are advised to adopt emergency positions, time permitting
- 3.6** Aeroplane is landed and secured and passengers managed as required
- 4 Manage on-board abnormal and emergency situations**
- 4.1** Control of aeroplane is maintained during emergency response procedures
- 4.2** Abnormal and emergency situations are correctly identified and managed in accordance with relevant emergency procedures and regulatory requirements
- 4.3** Appropriate emergency procedures are followed in accordance with AFM/POH and published procedures while maintaining control of aeroplane
- 4.4** Requirement for emergency evacuation of aeroplane is identified
- 4.5** Emergency evacuation of aeroplane is executed as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0019 Manage abnormal aeroplane flight situations.

Links

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0047 Manage abnormal aeroplane flight situations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying awareness of appropriate forced landing areas in aerodrome environments
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeroplane aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others, including when using radio
- compensating for the secondary effects of controls
- completing documentation related to abnormal aeroplane flight situations
- conducting flight with unreliable airspeed indications
- conducting precautionary search and landing
- ensuring compliance with relevant emergency procedures and regulatory requirements
- executing simulated emergency evacuation plans
- identifying aeroplane emergency evacuation conditions
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising workload
- managing engine failure after take-off
- managing on-board abnormal and emergency situations
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating aeroplane within its limitations and achieving optimum performance
- operating electronic communications equipment to required protocol
- performing forced landings following engine failure, including:
 - complete engine failure (simulated)
 - partial engine failure (simulated)
- performing various flight control functions simultaneously as required

- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- recognising situations that may require a precautionary landing
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment in abnormal aeroplane flight situations
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- using instruments to monitor aeroplane performance
- working collaboratively with others when managing abnormal aeroplane flight situations
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- action planning processes
- action required in an engine failure in flight, other than after take-off
- actions to be conducted following a forced landing
- aircraft performance in a glide (straight and turning)
- applicable engine failure and abnormal situation checklist items
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane operations
- causes leading to precautionary landings
- contents of flight manual and pilot's operating handbook (POH)
- controllability checks and external inspection procedures
- ditching procedures when specified in the aircraft flight manual (AFM), POH or company operations manual
- effects of partial engine failure on aeroplane performance with respect to straight and level flight and turning while maintaining level flight
- effects of partial engine power on performance, flight profile, range and landing options
- emergency radio procedures
- engine failure scenarios and procedures for partial and complete power loss
- factors affecting a stall
- factors to be considered when deciding whether to land immediately or proceed to a more suitable landing area after a partial engine failure
- forced landing scenarios and procedures
- functions and effects of all aeroplane controls
- hazard of sideslip at low altitude
- hazards associated with flying operations at low level

- hazards associated with turning an aeroplane at slow speed using large angles of bank while maintaining level flight following a partial engine failure after take-off
- height loss while gliding, including minimum height to achieve safe turns towards selected landing area
- in a Defence context, relevant Defence Orders and Instructions
- judging descent profiles in various configurations
- operation of safety/survival/life support equipment applicable to aeroplane type
- passenger control and briefing procedures for abnormal and emergency situations
- poor visibility configuration
- potential dangers of unbalanced flight at slow speed
- practical action plans for use in an engine failure after take-off
- pre-abandonment/emergency evacuation checks
- principles of aerodynamics
- prioritising activities during emergencies and non-normal situations
- relevant sections of aeronautical information package (AIP) related to abnormal and emergency flight situations
- relevant sections of CASRs and Civil Aviation Orders related to abnormal and emergency flight situations
- relevant sections of En Route Supplement Australia (ERSA) related to abnormal and emergency flight situations
- relevant WHS and environmental procedures and regulations
- suitable fields for forced landings and precautionary landings
- survival techniques following an emergency evacuation
- visual meteorological conditions (VMC).

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals

- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0048 Taxi helicopter

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to taxi a helicopter in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes performing air taxiing manoeuvres and air transiting manoeuvres.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Perform air taxiing manoeuvres

- 1.1** Helicopter is manoeuvred over the ground on a prescribed track at constant height associated with ground effect, and speed is adjusted to suit helicopter type, surface conditions, congestion, maintenance of control and to avoid collision with obstacles or other aircraft
- 1.2** Awareness of adverse effects of rotor downwash on surrounding aircraft, people, objects and environment is maintained
- 1.3** Engine and rotor speed (revolutions per minute (RPM)/recommended revolutions per minute (RRPM)) are managed within normal operating limits

2 Perform air transiting manoeuvres

- 2.1** Helicopter is manoeuvred, while allowing for prevailing conditions, over a prescribed track within aerodrome boundaries that is clear of obstacles at a height not above 100 feet (ft) above ground level (AGL) at airspeeds greater than speeds used for air taxiing
- 2.2** Helicopter performance is considered throughout air transit manoeuvres
- 2.3** Awareness of adverse effects of rotor downwash on surrounding aircraft, people, objects and environment is maintained
- 2.4** Instruments, switches or devices are manipulated when safe to do so, including when the release of the collective pitch level is required, while maintaining height, heading, speed, and attitude and not exceeding RPM or power limits
- 2.5** Air transit ground speed is adjusted to suit helicopter type, traffic conditions, congestion, and maintaining control, and to avoid collision with obstacles or other aircraft
- 2.6** Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility and terrain
- 2.7** Appropriate risk management is applied during air transit manoeuvres

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0020 Taxi helicopter.

Assessment Requirements for AVIY0048 Taxi helicopter

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying air safety practices and regulations
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others when taxiing helicopter
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and applying air traffic control instructions
- interpreting/using a helicopter manufacturer height-velocity diagram/graph
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- using instruments to monitor helicopter performance
- working collaboratively with others when taxiing helicopter
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- adverse effects of rotor wash
- aerodrome and helicopter landing site markings and their meanings
- application of a height/velocity diagram/graph
- basic principles of aerodynamics
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to helicopter operations
- causes and effects of ground resonance and related action that should be taken
- causes and effects of loss of tail rotor effectiveness and related action that should be taken
- effects of rotor wash and related precautions that should be taken
- functions and effects of all helicopter controls
- ground resonance and action to be taken when it occurs
- hazards and risks associated with conducting air taxi and air transit manoeuvres, and precautions for controlling the risks
- height-velocity diagram
- helicopter braking and steering systems
- light and marshalling signals relevant to helicopter operations
- local air traffic control (ATC) procedures and instructions
- loss of tail rotor effectiveness and action to be taken when it occurs
- problems that may occur when taxiing a helicopter and appropriate action that should be taken in each case
- purpose and functions of helicopter systems
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- taxiway and runway markings.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0049 Operate helicopter at low level

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to operate a helicopter at low level in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes planning low-level operations, manoeuvring a helicopter at low level and performing quick stop manoeuvres. It also includes executing reversal turns, executing a forced landing from below 200 feet (ft) above ground level (AGL), and operating at low level in hilly terrain.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan low-level operations

- 1.1** Requirement to operate at low level is identified and justified in accordance with workplace procedures and regulatory requirements
- 1.2** Low-level operational hazards are identified, evaluated and risk managed, and appropriate decision is made concerning the safe conduct of these operations
- 1.3** Aircraft type and performance is assessed as appropriate for low-level operations
- 1.4** Consultation with all relevant stakeholders involved in a low-level operation is completed to confirm task/operating requirements
- 1.5** Pre-flight inspection is correctly performed, and aircraft serviceability type and performance are determined as appropriate for the task
- 1.6** Actual and forecast weather conditions are analysed for effects on low-level operations
- 1.7** Area of low-level operations is identified using chart and geographical features, including the boundary where low flying may commence, and normal flight altitude is required
- 1.8** Action plans for the operation are formulated to ensure safe and effective operation of a helicopter at low level
- 1.9** Unplanned manoeuvres are avoided
- 1.10** Compliance is maintained with air traffic control (ATC) instructions, regulatory and reporting requirements

2 Manoeuvre helicopter at low level

- 2.1** Low-level flight manoeuvres are performed safely using pre-planned manoeuvres at planned altitudes
- 2.2** Effects of wind velocity, false horizons, rising ground and mountainous terrain are managed, and control of helicopter is correctly maintained
- 2.3** Visual attention is focused outside the cockpit
- 2.4** Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility and/or

terrain

- 2.5 Natural horizon is used as primary attitude reference
 - 2.6 Nose of aircraft is cleared to ensure forward visibility when appropriate
 - 2.7 Situational awareness is maintained at all times during low-level manoeuvres
 - 2.8 Helicopter is safely manoeuvred adjacent to power lines and wires
 - 2.9 All obstacles are identified and appropriately and safely avoided
 - 2.10 Personnel, animals, vehicles and buildings are identified and appropriately and safely avoided
 - 2.11 Height is maintained by visual reference to earth's surface when below 500 ft above ground level (AGL)
 - 2.12 Weather conditions are monitored and appropriate responses made
 - 2.13 Fuel status is monitored and appropriate responses made
 - 2.14 Local and published noise abatement requirements and curfews are observed
- 3 Perform quick stop manoeuvre**
- 3.1 Deceleration of helicopter from forward flight is initiated into wind, maintaining height to terminate to the hover at nominated hover point
 - 3.2 Aircraft is turned and decelerated or decelerated and turned, maintaining height by controlled action, to terminate to the hover at nominated hover point, into wind
 - 3.3 Deceleration/acceleration manoeuvres are conducted within the time and distance limitations specified while maintaining a constant height above the surface
 - 3.4 Wind velocity is estimated and is appropriately taken into account in manoeuvres
 - 3.5 Helicopter inertia is anticipated and appropriate allowance made in manoeuvres
 - 3.6 Situation awareness is maintained at all times during a

- quick stop manoeuvre
- 3.7** Obstructions are identified, and are appropriately and safely avoided
- 4 Execute forced landing from 200 ft AGL**
- 4.1** Emergency situations requiring a forced landing are identified
- 4.2** Appropriate immediate actions are performed
- 4.3** Landing area within autorotative distance is selected and appropriate action plan is formulated
- 4.4** Emergency procedures are performed
- 4.5** Emergency radio messages of intentions are transmitted
- 4.6** Helicopter is landed and shut down as required
- 5 Operate at low level in hilly terrain**
- 5.1** Helicopter is safely manoeuvred at low level in hilly terrain
- 5.2** Safe operating heights relevant to low-level operation type are established and maintained
- 5.3** Terrain flight following techniques are applied during low-level operations
- 5.4** Appropriate geographical features and markers are identified and selected to aid situational awareness
- 5.5** Rising and falling ground/terrain is identified and approached using safe flying techniques, including identifying abort points and escape routes
- 5.6** Effects of wind and turbulence in hilly terrain, including lee effects, are identified and managed
- 5.7** Spatial disorientation factors relevant to low-level operations are identified and applied to low-level manoeuvres

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0021 Operate helicopter at low level.

Links

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0049 Operate helicopter at low level

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying awareness of wind effect in the vicinity of obstructions, mountainous terrain and illusions
- applying correct navigation techniques and procedures at low level
- applying knowledge of the effect of false horizons
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- complying with airspace requirements and procedures
- conducting procedure turns from a fixed ground reference point
- flying at various speed and configurations not below safe single-engine speed (+15 knots-indicated air speed (KIAS) for multi-engine aircraft)
- identifying and avoiding power lines and wires by a minimum of 15 feet (ft) when crossing overhead
- identifying and correctly using relevant equipment
- identifying and justifying a decision to operate a helicopter at low level
- identifying escape routes and rising ground
- identifying poles, cross trees, wires and insulators to assist power line and wire location
- identifying the requirement to operate in the vicinity of power lines and wires and assessing associated risk
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- maintaining a constant altitude over featureless terrain or water
- managing the aircraft energy state, including:
 - identifying high kinetic energy situations

- identifying low kinetic energy situations
- identifying high potential energy situations
- identifying low potential energy situations
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- navigating to a predetermined destination at altitude below 500 ft above ground level (AGL)
- operating adjacent to power lines and wires
- operating electronic communications equipment to required protocol
- performing flight at various speed and configurations
- performing low-level circuit and landing
- performing quick stop manoeuvres, including:
 - into wind entry
 - downwind entry
- performing straight flight
- performing turns at various bank angles up to 60° angle of bank at normal cruise speed
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- recognising and controlling the illusion of slipping and skidding during turns close to the ground
- recognising and managing the impact of sun glare on increased risk of collision with obstacles
- recognising the effect of rising and descending terrain on aircraft performance
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- using instruments to monitor helicopter performance when operating a helicopter at low level
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- air traffic requirements
- application of the height/velocity diagram/graph
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to low level helicopter operations
- critical operational conditions, including retreating blade stall, vortex ring, overpitching, loss

- of anti-torque effectiveness and negative g effects
- effect of aircraft inertia at low level
- effect of wind velocity on low-level operations
- effects of illusions
- flight rules and legislation related to low-level ratings
- functions and effects of all helicopter controls, including rotor revolutions per minute (RPM)/recommended revolutions per minute (RRPM) management (governors) and engine acceleration response
- human factors during low-level operations, including:
 - dehydration
 - fatigue
 - stress and short/long-term impacts
 - drugs impact
 - spatial disorientation and illusions
- local air traffic control (ATC) procedures and instructions
- low-level operational techniques
- maximum rate and minimum rate turn criteria
- meteorological factors affecting helicopter flight performance during low-level flight
- obstruction avoidance techniques
- operational inspections
- operations on, or in vicinity of, non-controlled and controlled aerodromes or airstrips, including:
 - aerial inspections
- planning and aviation risk management processes
- pre-flight and after-flight inspections
- problems that may occur when operating a helicopter at low level and appropriate action that should be taken in each case
- procedures for using performance charts
- purpose and functions of helicopter systems
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- safety hazards and risks of low-level helicopter operations and precautions for controlling risks
- terrain following techniques
- use of escape routes and rising ground
- weather effects on low-level operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory

requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0050 Perform instrument arrival and standard arrival route procedures

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to perform instrument arrival and standard arrival route (STAR) procedures in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes preparing for instrument meteorological conditions (IMC) arrival, conducting IMC arrival to instrument approach point, and conducting IMC arrival using a STAR.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Prepare for IMC arrival | 1.1 Applicable aerodrome weather, airfield conditions and traffic information are obtained and applied |
| | 1.2 Descent/approach checks and briefs are completed |
| | 1.3 Approach and landing configurations are established appropriate for the runway and meteorological condition |
| 2 Conduct IMC arrival to instrument approach point | 2.1 Ground track is maintained to ensure subsequent instrument approach or traffic pattern can be flown, taking into account any obstructions and air traffic control (ATC) instructions |
| | 2.2 Obstacle clearance minima are maintained in accordance with aeronautical information publication (AIP) and/or ATC instructions |
| | 2.3 Existing wind conditions are verified making corrections for drift to maintain a precise ground track |
| | 2.4 Stabilised approach is maintained within specified airspeed and rate of descent tolerances |
| | 2.5 Approach point is intercepted in accordance with AIP requirements for commencing selected instrument approach |
| 3 Conduct IMC arrival using a STAR | 3.1 Current chart for STAR to be flown is selected and navigation systems are configured |
| | 3.2 Approach applicable to runway being used for landing is correctly executed |
| | 3.3 Aircraft is correctly manoeuvred from an inbound route to a fix at or near the destination aerodrome, using navigation aids and transition to an approach as instructed by ATC |
| | 3.4 Obstacle clearance minima are maintained in accordance with AIP and/or ATC instructions |
| | 3.5 Aircraft is manoeuvred within tolerance specified in AIP |
| | 3.6 ATC instructions amending STAR procedure are correctly implemented |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY0022 Perform instrument arrival and standard arrival route procedures.

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0050 Perform instrument arrival and standard arrival route procedures

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- adjusting for deviation in aircraft vertical profile
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- interpreting standard arrival route (STAR) charts
- manipulating flight management system (FMS)/navigation (NAV) system data
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- working collaboratively with others
- working systematically with required attention to detail without injury to self, or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- applicable instrument approach procedure or visual approach at end of STAR
- applicable instrument approach procedure or visual approach at end of an instrument arrival
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to instrument flight operations
- how to read and interpret a STAR chart
- instrument arrival procedures and limitations
- instrument arrival radio procedures
- loss of radio communication during an instrument arrival
- loss of radio communication during STAR
- methodologies for input, monitoring and amending FMS/NAV system data
- pilot responsibilities during instrument arrival
- pilot responsibilities when STAR clearance is given or cancelled
- procedures for abnormal operations and/or emergencies during an instrument arrival, including navigation aid failure
- procedures for abnormal operations and/or emergencies during STAR, including navigation aid failure
- STAR procedures and limitations
- STAR radio procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0051 Conduct helicopter landing site and unprepared helicopter landing site operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct helicopter landing site (HLS) and unprepared helicopter landing site (UHLS) operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes preparing for and conducting HLS/UHLS operations.

This unit addresses aviation non-technical skill requirements (mental, social and personal-management abilities) for aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed under limited or no supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Prepare for HLS/UHLS operations

- 1.1 Helicopter cabin and/or mission equipment is configured for HLS/UHLS operations
- 1.2 Helicopter flight performance calculations are assessed to meet operational requirements
- 1.3 Weather conditions in operating environment are identified and effects on mission are considered and communicated to other crew members
- 1.4 Visual or map reconnaissance of HLS/UHLS is conducted
- 1.5 In-flight crew briefing is conducted and applicable crew resource management (CRM) and human factor concerns are addressed
- 1.6 Operational requirements are considered and concerns about completing the operation are raised to other crew members
- 1.7 Safety hazards are identified and reported to other flight crew members
- 1.8 Appropriate hazard mitigation strategies are determined and implemented in conjunction with other flight crew members

2 Conduct HLS/UHLS operations

- 2.1 Helicopter position in relation to HLS/UHLS is assessed and information is communicated to other flight crew members to meet operational standards
- 2.2 Obstacles are identified and relative aircraft position is communicated to crew members to maintain situational awareness
- 2.3 Abnormal and emergency situations are identified and communicated to crew to maintain safety of flight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY3052 Conduct helicopter landing site and unprepared helicopter landing site operations.

Assessment Requirements for AVIY0051 Conduct helicopter landing site and unprepared helicopter landing site operations

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- assessing helicopter flight performance calculations
- applying risk management principles and initiating required actions to identify, minimise, control or eliminate identified hazards
- communicating adjustments to aircraft flight profile to applicable/responsible flight crew member as required in an efficient and effective manner
- communicating, collaborating and interacting effectively with others
- completing relevant documentation
- identifying and assessing vertical, horizontal and relative spatial distances in relation to the aircraft fuselage, rotor system, mission and/or operational stores and equipment, with regard to potential obstacles to the safety of flight
- identifying and using required communications technology
- identifying hazardous and/or dangerous situations that pose risks to safety of flight and personnel
- implementing contingency plans
- interpreting and following aircraft documentation
- interpreting and following operational instructions and prioritising work
- maintaining situational awareness
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in communications equipment in accordance with standard operating procedures (SOPs)
- planning own work including predicting consequences and identifying improvements
- reacting appropriately to avoid hazardous situations and/or dangerous situations that pose risks to safety of flight and personnel
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with workplace procedures

- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- flight performance calculations, including:
 - aircraft configuration
 - aircraft weight
 - engine power
 - environmental conditions
 - fuel
 - speed
- aviation risk management processes
- helicopter positions considerations, including:
 - aircraft lateral drift during hover sequences
 - altitude
 - heading/yaw orientation
 - rate of closure (relative speed)
 - rate of descent or climb (relative speed)
 - rate of turn related to flight obstacles
- helicopter landing site (HLS)/unprepared helicopter landing site (UHLS) operating environment, including:
 - over land or over sea
 - prepared or unprepared rotary wing aircraft landing sites
 - urban, rural, mountainous, desert and wilderness operational environments
- operational requirements, including:
 - emergency medical services (EMS)/search and rescue (SAR) task and mission support
 - fire-fighting operations
 - formation flight by day/night
 - hoisting
 - internal/external load lift missions
 - maritime support tasking
 - media operations
 - VIP and general passenger transport
- communication procedures and terminologies applicable to conduct HLS/UHLS operations
- helicopter capabilities and limitations
- helicopter dimensions
- helicopter power and performance data factors

- HLS/UHLS operational and safety procedures
- abnormal and emergency situations, including:
 - abnormal or emergency situations related to aircraft, crew or mission factors
 - aircraft fuselage or rotor system obstacle strike
 - aircraft system malfunction or failure
 - bird/bat strike
 - degraded or loss of situational awareness
 - degraded/restricted visibility due to meteorological effect
 - ineffective crew resource management
 - loss of internal/external aircraft communications
 - loss of situational awareness, internal and external to the aircraft
 - personal equipment failure
- procedures for operating electronic communications equipment and required protocol
- safety hazards and obstacles, including:
 - aircraft system malfunction and/or failure
 - ambient light (sun/moon position)
 - cultural lighting
 - fuselage strike
 - HLS/UHLS area surface conditions
 - maritime environment, including sea state, vessels and weather
 - moon luminance
 - other aircraft
 - personnel within the vicinity of HLS/UHLS operations
 - rotor blade strike
 - urban environment structures, both man-made and natural edifices
 - rural environment elements, including man-made structures, terrain and wildlife
 - undetected proximity to ground obstacles
 - wilderness environment including vegetation, terrain and wildlife
- relevant work health and safety (WHS) and environmental protection procedures and guidelines.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace

conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIY0052 Control remote pilot aircraft systems on the ground

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to control remote pilot aircraft systems (RPAS) on the ground in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes starting an engine, taxiing and/or positioning the RPAS, and performing an RPAS shutdown.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to RPAS operational duties of flight crew and ground personnel and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew RPAS environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Start engine

1.1 Pre-start and after-start checks are completed in accordance with aircraft flight manual (AFM)/pilot's operating handbook (POH)

1.2 RPAS is positioned to ensure safety when starting engine

1.3 Manufacturer limitations and report deviations are complied with as required

1.4 Engine/s are started in accordance with AFM/POH

1.5 Emergencies are managed in accordance with AFM/POH and regulatory requirements

2 Taxi and/or position RPAS

2.1 Automatic terminal information service (ATIS) reports and taxi clearance are obtained as required

2.2 RPAS is taxied at a safe speed and in accordance with prevailing location, traffic, surface and weather conditions

2.3 Instrument checks are performed clear of conflicting traffic and other hazards to confirm serviceability

2.4 Handling and braking on ground is in accordance with AFM/POH

2.5 Airfield markings/lights/signals/indicators are interpreted and complied with as required

2.6 Lookout and right-of-way rules are complied with as required

2.7 Adverse effects on other aircraft, facilities and personnel are avoided

2.8 Inspection of taxi path is carried out when surface conditions are obscured as required

2.9 RPAS (and launch system) is positioned in accordance with launch point requirements and applicable safety precautions

3 Perform RPAS shutdown

3.1 Pre-and post-shutdown checks are completed in accordance with AFM/POH

3.2 Engine is shut down in accordance with AFM/POH

- 3.3** Required documentation is completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY3073 Control remote pilot aircraft systems on the ground.

Assessment Requirements for AVIY0052 Control remote pilot aircraft systems on the ground

Modification History

Release 1. This is the first release of this qualification in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- complying with regulatory requirements and local air traffic control (ATC) instructions
- controlling and managing remote pilot aircraft systems (RPAS) taxi emergencies
- controlling RPAS on the ground in accordance with aircraft flight manual (AFM)/pilot's operating handbook (POH)
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and communicating operational information
- interpreting and following operational instructions and prioritising work
- manoeuvring RPAS on the ground without incident
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing various on-ground functions simultaneously as required
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- using instruments to monitor aircraft taxi performance

- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- aeronautical decision-making processes
- airfield markings, indicators and lights
- automatic terminal information service (ATIS) reports
- effective communication
- error management, including error types, causes and consequences
- fatigue risk management
- human performance and its limitations, including the senses, memory and situational awareness
- in a Defence context, relevant Defence Orders and Instructions
- on-ground control procedures
- relevant aircraft/equipment type characteristics
- relevant sections of AFM/POH
- relevant sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- stress, workload and time pressure management
- taxi clearance information
- weather information.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and

operation manuals

- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0053 Manage remote pilot aircraft systems energy source requirements

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to manage remote pilot aircraft systems (RPAS) energy source requirements in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes planning energy source requirements, managing energy source system, and refuelling and recharging the RPAS.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and ground personnel and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew RPAS environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Assessment Requirements for AVIY0053 Manage remote pilot aircraft systems energy source requirements

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- applying relevant safety practices and regulations
- calculating energy source allowances, consumption and endurance
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using relevant equipment
- identifying applicable grade of fuel/fuel cell/battery for remote pilot aircraft system (RPAS) type
- implementing contingency plans
- implementing safety precautions during RPAS refuelling/recharging
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- maintaining compliance with regulatory requirements
- maintaining relevant workplace records
- managing operation of RPAS energy source systems
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring energy source usage to achieve desired profile, range or endurance following configuration changes
- monitoring work activities in terms of planned schedule
- monitoring RPAS endurance
- operating electronic communications equipment to required protocol
- performing energy source quality control checks
- planning RPAS energy source requirements
- reading, interpreting and following relevant regulations, instructions, procedures, information

and signs

- recognising deteriorating situations impacting on energy source requirements
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- aerodynamic, engine and airframe requirements for RPAS to achieve best range and endurance
- aeronautical decision-making processes
- calculation of conversion between imperial and metric measures
- dangers of using the incorrect grade of fuel/fuel cell/battery
- effective communication
- energy source consumption of RPAS at varying propulsion and systems power settings
- energy source principles relating to RPAS
- energy source reserve requirement for RPAS
- energy source transfer equipment appropriate for the type of RPA and energy source being used
- energy sources, including:
 - battery charger
 - gas
 - liquid fuel
 - other power producing source
 - other renewable energy
 - power producing sources that power the on-board systems and thrust producing components of the specific RPAS
 - solar
- energy source allowances, including:
 - en route and destination meteorological forecasts
 - fixed energy source reserves
 - holding requirements
 - operational tasking requirements
- error management, including error types, causes and consequences
- factors affecting energy source consumption

- hazards that exist when refuelling/recharging RPAS and related hazard control procedures and precautions
- methods of identifying applicable grade of fuel/fuel cell/battery for RPAS type
- mixture leaning or power conservation techniques
- operation of the specific RPAS energy source system
- principles of RPAS energy source systems
- problems that may occur when managing RPAS energy source and appropriate action that should be taken in each case
- regulations and procedures for refuelling/recharging RPAS
- relevant sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- stress, workload and time pressure management.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0054 Control aeroplane on the ground

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to control an aeroplane on the ground in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes starting and stopping an aeroplane engine, and taxiing an aeroplane.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Start and stop engine**
 - 1.1** Pre-start and after-start checks are completed in accordance with aircraft flight manual (AFM)/pilot's operating handbook (POH)
 - 1.2** Engine is started and shut down in accordance with AFM/POH
 - 1.3** Emergencies are managed in accordance with AFM/POH and regulatory requirements
 - 1.4** Pre-and after shutdown checks are completed in accordance with AFM/POH
 - 1.5** Manufacturer limitations are complied with and deviations are reported as required
 - 1.6** Aeroplane is positioned to ensure safety when starting engine
- 2 Taxi aeroplane**
 - 2.1** Automatic terminal information service (ATIS) reports and taxi clearance are obtained as required
 - 2.2** Aeroplane control and safe taxi speed are maintained in accordance with prevailing aerodrome, traffic, surface and weather conditions
 - 2.3** Brake serviceability and functionality checks are performed clear of conflicting traffic and other hazards to confirm serviceability
 - 2.4** Instrument checks are conducted and altimeter settings adjusted to confirm serviceability prior to aircraft departure
 - 2.5** Engine handling and braking on the ground is in accordance with AFM/POH
 - 2.6** Airfield markings/lights/signals/indicators are interpreted and complied with
 - 2.7** Lookout is maintained and right-of-way rules are adhered to while complying with applicable air traffic control (ATC) or marshalling instructions
 - 2.8** Adverse effect of propeller slipstream or jet wash on other aeroplanes, aerodrome facilities and personnel are avoided
 - 2.9** Taxi path is inspected when surface conditions are

obscured

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4001 Control aeroplane on the ground.

Assessment Requirements for AVIY0054 Control aeroplane on the ground

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeroplane aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others when controlling an aeroplane on the ground
- completing relevant documentation
- complying with regulatory requirements and local air traffic control (ATC) instructions
- controlling an aeroplane on the ground in accordance with aircraft flight manual (AFM)/pilot's operating handbook (POH)
- controlling and managing engine start-up and shutdown emergencies
- identifying and correctly using required equipment
- identifying suitable parking areas
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting airfield diagrams
- interpreting and communicating operational information
- interpreting and following operational instructions and prioritising work
- interpreting marshalling signals
- manoeuvring aeroplane on the ground without incident
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment, including throttle, steering and brakes

- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- starting and stopping aeroplane engines
- taking appropriate actions in a brake, tyre or steering failure
- taxiing aeroplanes within controlled or uncontrolled aerodrome environments
- using instruments to monitor aeroplane performance
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerodrome markings, lighting and marshalling signals
- aeroplane type recognition
- aircraft weight and balance and how to calculate the aircraft centre of gravity
- carburettor icing
- care of propellers
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane operations
- cause and effect of fuel vaporisation
- contents of the AFM and POH for the aircraft being flown
- day visual flight rules (VFR)
- differences between normally aspirated and fuel-injected systems
- environmental conditions that represent visual meteorological conditions (VMC)
- in a Defence context, relevant Defence Orders and Instructions
- local ATC procedures
- meaning and interpretation of:
 - light and marshalling signals
 - aerodrome markings, signals and local procedures
- on-ground control procedures, including pre-start checks, clearing propellers, use of filtered air, hot and cold engine start, after-start checks, pre-shutdown checks, actions in a brake or tyre failure, aeroplane emergency management, and engine hand-start procedures
- propeller wash, rotor wash and jet blast and how they affect other aircraft
- relevant aeroplane/equipment characteristics, including starter system limitations, fuel system, including cause and effect of fuel vaporisation, and aeroplane braking and steering systems
- relevant sections of CASRs and Civil Aviation Orders
- relevant sections of the aeronautical information package (AIP)
- relevant sections of the relevant AFM/POH
- relevant WHS and environmental procedures and regulations
- typical aircraft performance characteristics of single-engine aeroplanes and the effects of

- local weather conditions on performance
- typical single-engine aeroplane aircraft systems.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0055 Take off aeroplane

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to take off in an aeroplane in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes carrying out pre-take-off procedures, conducting an aeroplane take-off, and performing a rejected take-off procedure.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Carry out pre-take-off procedures

- 1.1** Critical take-off airspeeds, aircraft configuration, and emergency and abnormal procedures for normal and cross-wind take-offs are correctly identified
- 1.2** Pre-take-off briefing is completed
- 1.3** Approved pre-take-off and line-up checklists are completed in accordance with flight manual/pilot's operating handbook (POH) or company operations manual
- 1.4** Correction for existing wind component to the take-off performance is verified and correctly applied
- 1.5** Runway approach path is visually cleared of conflicting traffic and other hazards prior to lining up for take-off
- 1.6** Aeroplane is aligned with runway centre line in take-off direction
- 1.7** Air traffic control (ATC) clearances are obtained as required

2 Conduct aeroplane take-off

- 2.1** Take-off power is applied, aeroplane is maintained aligned with centre of runway with wings maintained level and rotated at manufacturer recommended speed to achieve planned climb performance
- 2.2** Aeroplane is configured for nominated climb profile, and tracking on centreline of runway is maintained during take off
- 2.3** Power controls, settings and instruments during take-off are monitored to ensure all predetermined parameters are achieved and maintained
- 2.4** Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility and terrain
- 2.5** Separation with all circuit traffic is maintained
- 2.6** Radiotelephone listening watch is maintained
- 2.7** Local and published noise abatement requirements and curfews are observed
- 2.8** After-take-off checks are performed in accordance with

approved checklist

- 3 Perform rejected take-off**
- 3.1** Requirement to abort/reject take-off is identified
 - 3.2** Power is reduced smoothly and promptly
 - 3.3** Braking devices are activated
 - 3.4** Control is maintained to bring aeroplane to a safe stop
 - 3.5** Associated procedures and/or checklists are initiated and completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4002 Take off aeroplane.

Links

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0055 Take off aeroplane

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeroplane aeronautical knowledge
- applying relevant legislation and workplace procedures
- applying take-off procedures in accordance with regulatory requirements
- calculating normal and cross-wind take-off and landing performance
- communicating effectively with others
- compensating for the secondary effects of controls
- completing relevant documentation
- complying with air traffic instructions and regulatory requirements
- conducting aeroplane take-offs, including:
 - normal
 - cross-wind
- identifying and correctly using equipment required
- identifying surface conditions, obstructions, other crossing traffic on runways and taxiways, or other hazards that might hinder a safe take-off
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- interpreting windsock indications
- maintaining awareness of the circuit traffic situation
- managing take-off emergencies
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing minimum length take-off procedure
- performing rejected take-off procedure
- reading, interpreting and following relevant regulations, instructions, procedures, information

and signs

- reporting and/or rectifying identified promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- working collaboratively
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aeroplane take-off and landing performance calculations and charts
- air traffic requirements
- all pre-take-off and after-take-off checks
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane operations
- factors affecting directional control of the aeroplane
- factors affecting take-off distance and initial climb performance
- functions and effects of all aeroplane controls
- how to interpret aerodrome charts
- how to interpret windsock indications and how to determine wind direction and speed
- how to obtain or calculate cross-wind and down or up-wind components
- in a Defence context, relevant Defence Orders and Instructions
- local topographical charts to identify safe areas for engine-failure purposes and noise-abatement considerations
- manufacturer specifications relating to operating the aeroplane
- obstacle clearance requirements
- principles of aerodynamics
- problems that may occur when taking off an aeroplane and appropriate action that should be taken in each case
- procedures for using take-off performance charts
- purpose and functions of aeroplane systems
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0056 Control aeroplane in normal flight

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to control an aeroplane in normal flight in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes climbing an aeroplane, maintaining straight and level flight, descending an aeroplane and turning an aeroplane. It also includes controlling an aeroplane at slow speed, performing circuits and approaches, and complying with airspace requirements.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Climb aeroplane

1.1 Adjustments are made to attitude and power to achieve an increase of altitude at normal, maximum rate (VY), maximum angle (VX) and cruise conditions of flight during straight and turning manoeuvres

1.2 Aeroplane is maintained in balanced flight and trimmed

1.3 Aeroplane is levelled off from climb at nominated altitude using standard aeroplane procedures

1.4 Flightpath clearance is ensured

1.5 Climb checks are completed

1.6 Air traffic control (ATC) altitude restrictions are observed

2 Maintain straight and level flight

2.1 Power, attitude and configuration are set to achieve straight and level flight

2.2 Aeroplane is maintained in balanced flight and trimmed

2.3 Altitude and heading are maintained within tolerances

2.4 Flightpath clearance is ensured

3 Descend aeroplane

3.1 Power, attitude and configuration are set to achieve descent during glide, power-assisted flight and approach profiles

3.2 Aeroplane is maintained in balanced flight and trimmed

3.3 Aeroplane is levelled from a descent at a nominated altitude

3.4 Flightpath clearance is ensured

3.5 ATC altitude restrictions are observed

3.6 Aeroplane operating limits are not exceeded during descent

3.7 Effects of undercarriage and flaps are managed

3.8 Descent checks are completed

4 Turn aeroplane

4.1 Airspace cleared procedure is carried out

- 4.2 Heading is altered in balanced flight during level, climbing, descending and gliding manoeuvres and turns are performed at varying rates to achieve specified tracks
 - 4.3 Turn on to nominated heading or geographical feature is achieved
 - 4.4 Aeroplane operating limits are maintained during turns
- 5 Control aeroplane at slow speed**
 - 5.1 Pre-manoeuve checks are completed in accordance with operating procedures
 - 5.2 Aeroplane is flown at minimum clean approach speed and at minimum landing configuration approach speed as specified in aircraft flight manual (AFM)/pilot's operating handbook (POH) in balanced flight
 - 5.3 Height awareness is maintained during slow speed flight
 - 5.4 Positive control responses are implemented and reduced control effectiveness recognised during slow flight manoeuvres
 - 5.5 Stall warnings, cautions and indications are monitored during slow speed flight
 - 5.6 Recovery to cruise speed is achieved while maintaining height
- 6 Perform circuits and approaches**
 - 6.1 Traffic patterns are conducted in accordance with aeronautical information package (AIP) procedures appropriate to the aeroplane type with allowance for wind velocity on all legs of the circuit
 - 6.2 All checklists are completed and radiotelephone procedures followed
 - 6.3 Approach path is appropriately intercepted and maintained in a manner applicable to aeroplane type, while remaining clear of other traffic
 - 6.4 Traffic conflict or adverse flight conditions are recognised when they arise and a go-around is performed from any position in the traffic pattern
 - 6.5 Right-of-way rules are applied and complied with
 - 6.6 Radio listening watch is maintained in accordance with

- established procedures
- 6.7** Aeroplane is configured for landing
- 7 Comply with airspace requirements**
- 7.1** While aeroplane is maintained within a specified area, compliance is maintained with air traffic requirements and restricted, controlled and other appropriately designated airspace
- 7.2** Appropriate reactions are made to factors that may affect the safe progress of the flight
- 7.3** Awareness of aeroplane position is maintained using charts and geographical features
- 7.4** Radio listening watch is maintained in accordance with established procedures
- 7.5** Weather conditions are monitored and appropriate action taken
- 7.6** Local and published noise abatement requirements and curfews are observed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4003 Control aeroplane in normal flight.

Assessment Requirements for AVIY0056 Control aeroplane in normal flight

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- adhering to restricted, controlled and other appropriately designated airspace requirements
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeroplane aeronautical knowledge
- applying relevant legislation and workplace procedures
- applying the techniques of straight and level, climbing and descending flight to achieve a consistent traffic pattern and approach to landing
- communicating effectively with others when controlling an aeroplane in normal flight, including using an aeronautical radio
- compensating for the secondary effects of controls
- completing relevant documentation
- confirming runway and aerodrome serviceability and availability
- controlling an aeroplane during slow-speed flight
- controlling an aeroplane during turning manoeuvres
- determining appropriate runway and circuit procedures
- identifying and correctly using relevant equipment
- identifying geographical features from aerodrome charts, including:
 - aerodromes and landing areas within local area
 - geographical limits
 - geographical limits of flight training areas
 - restricted, controlled and uncontrolled airspace areas
 - state/territory local airspace limits
 - transit route between departure aerodrome and training area
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- maintaining compliance with regulatory requirements
- maintaining separation between aircraft

- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- operating safely in the vicinity of local aerodromes and landing areas
- performing circuits and approaches
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- remaining within a designated area while complying with airspace and air traffic requirements
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- using instruments to monitor aeroplane performance
- working collaboratively with others when controlling an aeroplane in normal flight, including using an aeronautical radio
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- after-take-off checks
- aircraft performance
- aircraft systems
- aircraft weight and balance
- airspace cleared procedure to be carried out before all turns
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane operations
- cause of and compensation for aileron drag
- circuit patterns and procedures
- contents of the aircraft flight manual (AFM) and pilot's operating handbook (POH)
- dangers associated with mechanical and wake turbulence
- dangers of turbulence and wake turbulence when flying at low speed
- day visual flight rules (VFR) criteria
- effect of angle of bank and load factor on stall speeds
- effect of turning and acceleration on magnetic compass accuracy
- effects and use of carburettor heat or de-icing systems
- effects of carburettor or intake icing

- effects of excessive cooling on engine performance
- effects of flap
- engine considerations during prolonged climbing and descending
- environmental conditions that represent visual meteorological conditions (VMC)
- functions and effects of all aeroplane controls
- go-around procedures from base leg and final approach
- hazards during maximum rate descent
- hazards when performing performance manoeuvres
- in a Defence context, relevant Defence Orders and Instructions
- local area operating procedures
- operation of stall warning devices fitted to aeroplane
- pre-landing checks
- primary effects of controls
- principles of aerodynamics
- procedures for setting power in normally aspirated, turbocharged or supercharged engines
- relationship between angle of bank, load factor and stall speed
- relationship between induced drag and operating at slow speed
- relationship of attitude and power to trim
- relevant sections of aeronautical information package (AIP)
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- requirements and procedures for maximum rate descent
- tendency to under bank in descending turn and over bank in a climbing turn
- theory and application of best rate and angle of climb
- turning using a magnetic compass
- use of autopilot/flight director functions
- use of flap
- use of instruments to monitor aeroplane performance
- use of trim controls.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0057 Land aeroplane

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to land an aeroplane in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes conducting aeroplane landings and managing mishandled landings.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Conduct aeroplane landing

- 1.1** Aeroplane is landed at a controlled rate of descent with alignment above the runway centreline, within a specified area without drift, and directional control is maintained
- 1.2** Existing wind conditions are confirmed, drift corrections are applied, precise ground track is maintained, and aeroplane is configured for cross-wind landing conditions as required
- 1.3** Ballooning and bouncing are minimised and controlled in accordance with established aeroplane landing procedures
- 1.4** Positive directional control is maintained and cross-wind corrections are applied as required during the after-landing roll
- 1.5** After-landing checks are performed in accordance with approved checklist
- 1.6** Separation with conflicting air and ground traffic is maintained
- 1.7** Runway is vacated when practicable
- 1.8** Aeroplane is stopped safely using drag and/or braking devices within available runway length
- 1.9** Landing clearance is obtained at applicable airfields
- 1.10** Wake turbulence is avoided
- 1.11** Weather conditions are monitored

2 Manage mishandled landing

- 2.1** Conditional requirements for conducting a missed approach are recognised
- 2.2** Decision to perform missed approach and subsequent go-around is made when safe landing cannot be achieved
- 2.3** Power, attitude and configuration are selected to safely control aeroplane
- 2.4** Aeroplane is manoeuvred clear of the ground and after

take-off procedures are conducted

2.5 Allowance for wind velocity is made during go-around

2.6 Wake turbulence is avoided

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4004 Land aeroplane.

Assessment Requirements for AVIY0057 Land aeroplane

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeroplane aeronautical knowledge
- applying relevant legislation and workplace procedures
- calculating landing performance
- carrying out correct procedures in a go-around
- communicating effectively with others including using an aeronautical radio
- compensating for the secondary effect of controls
- completing relevant documentation
- conducting aeroplane cross-wind landing procedures, including:
 - verifying existing wind conditions, making proper correction for drift and maintaining a precise ground track
 - configuring aeroplane for cross-wind conditions
 - controlling aeroplane during transition from final approach to touchdown and during after-landing roll
 - applying cross-wind drift corrections during landing and taxi procedures
- conducting aeroplane landing procedures, including:
 - maintaining constant landing position aim point
 - achieving a smooth, positively-controlled transition from final approach to touchdown, including control ballooning during flare
 - achieving touchdown at a controlled rate of descent, in the specified touchdown zone within tolerances
 - controlling bouncing after touchdown
 - aligning touchdown with centreline within tolerances
 - ensuring separation is maintained
 - maintaining positive directional control and cross-wind correction during after-landing roll
 - using drag and braking devices, as applicable, in such a manner to bring the airplane to a safe stop

- completing applicable after-landing checklist items in a timely manner
- conducting aeroplane missed approach, including:
 - recognising the conditions when a missed approach should be executed
 - making the decision to execute a missed approach when it is safe to do so
 - making a smooth, positively-controlled transition from approach to missed approach, including:
 - selecting power, attitude and configuration to safely control aeroplane
 - manoeuvring aeroplane clear of the ground and conducting after-take-off procedures
 - making allowance for wind velocity during go-around
 - avoiding wake turbulence
- conducting aeroplane missed landing procedure, including:
 - recognising the conditions when a missed landing should be executed
 - making decision to execute recovery when it is safe to do so
 - making a smooth, positively-controlled transition from missed landing to missed landing, including
 - selecting power, attitude and configuration to safely control aeroplane
 - manoeuvring aeroplane clear of the ground and conducting after take-off procedures
 - making allowance for wind velocity during go-around
 - avoiding wake turbulence
- conducting aeroplane short landing procedures, including:
 - landing aeroplane at nominated touchdown point at minimum speed
 - controlling ballooning during flare
 - controlling bouncing after touchdown
 - maintaining direction after touchdown
 - applying maximum braking without locking up wheels
 - stopping aircraft within landing distance available
- exercising sound judgement sufficient to perform landing procedures
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- maintaining compliance with regulatory requirements
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- recognising and responding to conditions leading to a go-around
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment, including trim controls, flaps, carburettor heat and

braking devices

- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- using instruments to monitor aeroplane performance
- working collaboratively with others when landing aeroplane
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerodynamic forces involved during a flare
- aeroplane limitations
- aeroplane performance
- aeroplane weight and balance
- air traffic procedures
- all required checklist items
- Civil Aviation Safety Authority (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane operations
- causes of aquaplaning and procedures to avoid aquaplaning
- causes of loss of control of aeroplane on landing
- causes of loss of directional control during landing
- circuit and landing procedures
- contents of aircraft flight manual (AFM) and pilot's operating handbook (POH)
- cross-wind limits for the aeroplane type flown
- day visual flight rules (VFR) criteria
- effect of wind on landing performance
- environmental conditions that represent visual meteorological conditions (VMC)
- how to calculate a cross-wind component
- in a Defence context, relevant Defence Orders and Instructions
- options when local conditions are not suitable for landing
- principles of aerodynamics
- propeller wash, rotor wash and jet blast
- relevant sections of aeronautical information package (AIP)
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- steps for landing an aeroplane in normal head-wind and cross-wind
- techniques used to land an aeroplane in a cross-wind
- touch and go procedures

- typical single-engine aeroplane aircraft systems
- wake turbulence considerations
- windsock and other indicators that are used to determine wind velocity.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0058 Manage aircraft fuel

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to manage aircraft fuel in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes planning fuel requirements, managing the fuel system and refuelling aircraft.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and ground personnel and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Plan fuel requirements**
 - 1.1** Total en route and reserve fuel requirement are determined in accordance with regulatory requirements
 - 1.2** Allowance is made for possible abnormal or emergency situation
- 2 Manage fuel system**
 - 2.1** Fuel system, including pumps, engine controls and cross-feed systems, are operated in accordance with aircraft flight manual (AFM)/pilot's operating handbook (POH)
 - 2.2** Fuel quantity on-board is verified using two independent methods
 - 2.3** Fuel quality checks are confirmed before flight
 - 2.4** Fuel usage and status is monitored throughout flight and fuel log is accurately maintained
 - 2.5** Aircraft is configured to achieve desired profile, best range or endurance and operational endurance calculations are revised as required
 - 2.6** Work health and safety (WHS) procedures are followed at all times
 - 2.7** Potential hazards are anticipated and precautions applied
- 3 Refuel aircraft**
 - 3.1** Aircraft is refuelled correctly in accordance with AFM/POH, WHS, regulatory requirements and workplace procedures
 - 3.2** Appropriate precautions are taken to ensure the safety of personnel and property during refuelling operations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4007 Manage aircraft fuel.

Assessment Requirements for AVIY0058 Manage aircraft fuel

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying air safety practices and regulations
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- calculating equi time point (ETP) and point of no return (PNR)
- calculating fuel allowances, consumption and endurance
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing safety precautions during aircraft refuelling
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- maintaining compliance with regulatory requirements
- maintaining workplace records relevant to aircraft fuel management
- managing the operation of an aircraft fuel system
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring fuel usage to achieve desired profile, best range or endurance following configuration changes
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing fuel quality control checks
- planning aircraft fuel requirements
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- recognising deteriorating situations impacting on fuel requirements
- refuelling an aircraft, including:

- identifying applicable grade of fuel for aircraft type
- complying with aircraft bonding and earthing requirements
- implementing fuel loading and unloading procedures
- ensuring fuel cap security
- undertaking fuel quality checks:
 - operator checks
- reporting and/or rectifying identified promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- working collaboratively with others when managing aircraft fuel
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerodynamic, engine and airframe requirements for aircraft to achieve best range and endurance
- dangers of using the incorrect grade of fuel
- factors affecting fuel consumption
- fire extinguishers that can be used for fuel-related fires, including requirements and how to use them in a fire
- fuel consumption of aircraft at varying power settings
- fuel reserve requirement for aircraft
- hazards that exist when refuelling aircraft and related hazard control procedures and precautions
- how to calculate conversions between imperial and metric measures
- in a Defence context, relevant Defence Orders and Instructions
- limitations on using drum stock fuel
- location of refuelling places
- methods of identifying applicable grade of fuel for aircraft type
- methods of verifying the quantity of fuel on board an aircraft
- minimum fuel requirements for day visual flight rules (VFR) operations
- mixture leaning technique
- operation of the aircraft fuel system
- principles of aircraft fuel systems
- problems that may occur when managing aircraft fuel and appropriate action that should be taken in each case
- procedures for calculating ETP and PNR
- regulations and procedures for refuelling aircraft

- relevant sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- variations to planned fuel consumption
- WHS requirements applicable to aircraft fuelling operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0059 Control helicopter on the ground

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to control a helicopter on the ground in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes starting and stopping a helicopter engine, engaging the rotor, and controlling the main rotor disc and anti-torque system.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Start engine and rotor

1.1 Helicopter is positioned with a view to safety and rotor clearance when starting engine and rotors

1.2 Wind conditions are assessed for start

1.3 Pre-start checklist actions are performed

1.4 Engine start and rotor engagement are performed

1.5 Disc/rotor position is controlled during start

1.6 Engine is operated within aircraft limits

1.7 Emergencies are managed

2 Stop engine and rotor

2.1 Wind conditions are assessed and appropriate allowances made

2.2 Helicopter is positioned with a view to safety and rotor clearance when stopping engine and rotors

2.3 Engine shutdown and rotor stop are performed

2.4 Disc/rotor position is controlled during shutdown

2.5 Engine and transmission system indications are monitored and managed

3 Control main rotor disc and anti-torque system

3.1 Main rotor disc attitude is maintained during all rotor speed (RRPM) operations

3.2 Anti-torque pedals are set to compensate for main rotor torque

3.3 Rotor disc attitude and RRPM are managed while performing other tasks or actions

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4011 Control helicopter on the ground.

Assessment Requirements for AVIY0059 Control helicopter on the ground

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others when controlling helicopter on the ground
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant controls/equipment including throttle, rotor controls, anti-torque pedals and collective and cyclic pitch controls
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- solving problems associated with controlling a helicopter on the ground
- using instruments to monitor helicopter performance
- working collaboratively with others when controlling helicopter on the ground
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- aerodrome landing area markings, and light and marshalling signals
- aircraft operational start limitations
- applicable helicopter systems
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to helicopter operations
- clearing of rotor blades
- dynamic roll over
- effect of wind on engines and rotor blades (blade sailing)
- fire management applicable to engine starting and stopping
- fitted fire-fighting extinguishing system and its applications
- fuel system, including cause and effect of fuel vaporisation
- ground resonance
- helicopter braking and steering systems
- helicopter starter motor limitations
- hot and cold engine start procedures
- local air traffic control (ATC) procedures
- local noise abatement procedures and curfews
- on-ground helicopter control procedures, including:
 - operating on different surfaces, including sealed and unsealed surfaces
 - pre-start checks
 - after-start checks
 - regulations and procedures relating to ground operation of rotorcraft
- relevant helicopter/equipment characteristics
- relevant sections of CASRs and Civil Aviation Orders
- relevant sections of the aircraft flight manual (AFM)/pilot's operating handbook (POH)
- relevant WHS and environmental procedures and regulations
- rotor engagement system
- shutdown checks
- use of filtered air.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate,

assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0060 Control helicopter in hovering flight

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to control a helicopter in hovering flight in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes lifting off to hover and performing hovering checks, hovering a helicopter in cross- and tail-winds, performing turns around the mast, conducting turns around nose and tail, and performing sideways and backwards flight. It also includes landing from the hover, managing a mishandled landing, and managing a mishandled lift off.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Lift-off to hover and perform hover checks

- 1.1 Aircraft performance is calculated for flight
- 1.2 Pre-take-off checks are performed
- 1.3 Flight controls are set to prepare for lift-off to hover
- 1.4 Flight and power controls are used to lift helicopter off the surface to a stable hover at appropriate height for helicopter while controlling heading
- 1.5 Wind effect is anticipated and accounted for with appropriate control inputs to maintain position over nominated hover point
- 1.6 Awareness of adverse effects of rotor downwash on surrounding aircraft, people, objects and environment is applied
- 1.7 Flight control functions, centre of gravity and hover power checks are performed
- 1.8 Hover taxi manoeuvre is commenced, maintained and stopped at a constant and safe hover height, while maintaining engine power and rotor speed (RRPM) within limits
- 1.9 Coordinated corrective action is used to counter wind effects
- 1.10 Implications of environmental conditions are assessed and appropriate compensation made
- 1.11 Helicopter is maintained clear of obstructions
- 1.12 Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility or terrain

2 Hover helicopter in cross- and tail-winds

- 2.1 Helicopter is maintained in hovering flight remaining over a nominated hover point at a nominated height and heading in cross- and tail-winds
- 2.2 Coordinated corrective action is used to maintain a constant rate of turn and to counter wind effects

3 Perform turns around

- 3.1 Helicopter is turned around the mast while maintaining a constant height and specified rate of turn over

- mast** nominated hover point
- 3.2** Turn is completed on nominated heading
- 3.3** Controlled corrective action is used to control effects of wind gusts
- 3.4** Helicopter is maintained clear of obstructions
- 3.5** Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility, obstructions and terrain
- 3.6** RPM is managed within limits during turn
- 4 Perform turns around nose and tail**
- 4.1** Helicopter is turned around nominated point on or forward of helicopter nose while maintaining a constant height and specified rate of movement around point
- 4.2** Helicopter is turned around nominated point on or aft of helicopter tail while maintaining a constant height and specified rate of movement around point
- 4.3** Controlled corrective action is taken to counter effects of wind gusts
- 4.4** Helicopter is maintained clear of obstructions during turning manoeuvres
- 4.5** Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility, obstructions and terrain
- 4.6** Turns in a specified direction are commenced and stopped at a specified heading
- 4.7** RPM is managed within limits during turn
- 4.8** Ground track is maintained at a constant distance from nominated point
- 4.9** Anti-torque pedals are used to ensure helicopter nose or tail is pointed at nominated turning point
- 5 Perform sideways and backwards flight**
- 5.1** Helicopter is transitioned from static hover to sideways and rearward flight
- 5.2** Lookout is maintained in direction of flight using a systematic scan technique at a rate determined by traffic density, visibility, obstructions and terrain

- 5.3 Rearward movement is only conducted after visually checking behind helicopter, and height is adjusted as required
 - 5.4 Helicopter directional control is maintained and manoeuvred clear of obstructions during sideways and backwards flight manoeuvres
 - 5.5 RPM is managed within limits during turn
 - 5.6 Rate of movement of helicopter is maintained at a safe speed
 - 5.7 Sideways and rearward flight is terminated over nominated hover point
- 6 **Land from the hover**
 - 6.1 Pre-landing checks are completed as required
 - 6.2 Helicopter is lowered onto nominated point from hovering flight without adverse longitudinal, lateral, yawing or rolling movements
 - 6.3 Helicopter stability on landing gear is ensured prior to fully lowering collective
 - 6.4 After-landing checks are performed
- 7 **Manage a mishandled landing**
 - 7.1 Appropriate action is taken to identify when an adverse landing situation is developing
 - 7.2 Appropriate action is taken to either land aircraft or discontinue landing and return to hover safely
- 8 **Manage a mishandled lift-off**
 - 8.1 Appropriate action is taken to identify when an adverse lift-off situation is developing
 - 8.2 Appropriate action is taken to discontinue lift-off and return to ground safely

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4012 Control helicopter in hovering flight.

Assessment Requirements for AVIY0060 Control helicopter in hovering flight

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant controls/equipment, including throttle, rotor controls, anti-torque pedals, and collective and cyclic pitch controls
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- solving problems when controlling a helicopter in hovering flight
- using instruments to monitor helicopter performance
- working collaboratively with others when controlling helicopter in hovering flight
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerodrome and helicopter landing site markings
- aircraft operational limitations
- application of a height/velocity graph
- calculation of aircraft performance for flight
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to helicopter operations
- dynamic rollover
- effect of wind on rotor blade control (blade sailing)
- effects of rotor wash
- ground resonance
- hazards and risks when controlling a helicopter in hovering flight and precautions for controlling the risks
- helicopter braking and steering systems
- helicopter hovering procedures
- hover checks
- how to use of fire extinguisher system fitted to helicopter being used
- landing a helicopter
- light and marshalling signals
- local air traffic control (ATC) procedures
- local noise abatement procedures and curfews
- maintaining hovering flight in a range of operational conditions
- making a transition from static hover to sideways and rearward flight
- managing a mishandled landing
- managing a mishandled lift off
- operating on different surfaces, including sealed and unsealed surfaces
- operational and start limitations of typical helicopters
- pre-take-off checks
- recirculation
- relevant helicopter/equipment characteristics
- relevant sections of aircraft flight manual (AFM)/pilot's operating handbook (POH)
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- turning a helicopter around the mast.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training

Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0061 Take off helicopter and approach to hover

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to control a helicopter in hovering flight in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes lifting off to hover and performing hovering checks, hovering a helicopter in cross- and tail-winds, performing turns around the mast, conducting turns around nose and tail, and performing sideways and backwards flight. It also includes landing from the hover, managing a mishandled landing, and managing a mishandled lift off.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Carry out pre-take-off checks

1.1 Pre-take-off checks and safety briefings are completed

1.2 Safe take-off path is selected

1.3 Helicopter is lined up in take-off direction and is positioned at the optimum position within the helicopter landing site (HLS)

1.4 Line-up checks are performed in accordance with approved checklist as required

2 Take off helicopter

2.1 Air traffic control (ATC) clearances are obtained and compliance is maintained with clearance conditions and requirements when operating within controlled airspace

2.2 Helicopter is transitioned from a stationary position in a specified direction passing through translational lift, remaining clear of obstructions, and establishing and maintaining a recommended or nominated climb speed

2.3 Helicopter flight path is controlled using appropriate flight handling techniques, including awareness of helicopter performance considerations, aircraft balance and flight control trim, as required

2.4 Power and attitude are managed for flight path, departure profile and indicated airspeed (IAS) being flown

2.5 Local and published noise abatement requirements and curfews are observed

2.6 Situational awareness of circuit traffic is maintained and conflict avoided

3 Approach to hover

3.1 Suitable termination point is selected

3.2 Pre-landing checks are completed in accordance with approved checklist

3.3 Appropriate approach angle and track is intercepted and approach manoeuvres conducted in accordance with ATC instructions

3.4 Helicopter is descended to hover at selected termination point at a reducing closure rate and along a specified

- track on an approach angle appropriate to helicopter type and conditions
- 3.5 Landing gear is aligned to planned approach direction
 - 3.6 Loss of translational lift is recognised and controlled
 - 3.7 Revolutions per minute (RPM) is managed within normal operational limits
 - 3.8 Approach is terminated at hover over termination point
- 4 Perform go-around procedure**
- 4.1 Critical situations are recognised and timely decisions made to go-around in circumstances that require discontinuing a circuit or approach
 - 4.2 Go-around is initiated
 - 4.3 Power and attitude are set to initiate safe climb at appropriate IAS from any position in the circuit
 - 4.4 Obstructions and traffic are appropriately avoided during climb following a decision to go-around
 - 4.5 Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility or terrain
 - 4.6 Situational awareness of circuit traffic is maintained throughout go-round procedure
 - 4.7 After-take-off checks are completed in accordance with approved checklist
 - 4.8 Local and published noise abatement requirements and curfews are observed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4014 Take off helicopter and approach to hover.

Links

Assessment Requirements for AVIY0061 Take off helicopter and approach to hover

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant controls/equipment, including throttle, rotor controls, anti-torque pedals, and collective and cyclic pitch controls
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- solving problems when controlling a helicopter in hovering flight
- using instruments to monitor helicopter performance
- working collaboratively with others when controlling helicopter in hovering flight
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerodynamic factors affecting helicopter flight performance
- air traffic requirements
- aircraft flight manual (AFM) and pilot's operating handbook (POH)
- aircraft performance
- aircraft systems
- aircraft weight and balance
- all pre- and after- take-off and pre- and after- landing checks
- application of a height/velocity diagram/graph
- avoidance and recognition of recovery techniques appropriate to helicopter type
- basic principles of aerodynamics
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to helicopter operations
- contributing operational situations and environmental conditions
- day visual flight rules (VFR) criteria
- factors affecting take-off and climb performance
- flapback
- functions and effects of all helicopter controls
- ground effect
- hazards and risks when taking off a helicopter and controlling its approach to hover and precautions for controlling the risks
- inflow roll
- local air traffic control (ATC) procedures and instructions
- loss of tail rotor effectiveness (LTE)
- low 'g' force and mast bumping
- overpitching or low rotor revolutions per minute (RRPM) speed – rotor stall
- problems that may occur when taking off a helicopter and controlling its approach to hover and appropriate action that should be taken in each case
- procedures for using performance charts
- purpose and functions of helicopter systems
- recirculation
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- settling with power
- translational lift
- vortex ring state
- weight and balance.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0062 Control helicopter in normal flight

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to control a helicopter in normal flight in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes climbing a helicopter, maintaining straight and level flight, descending a helicopter and turning a helicopter. It also includes controlling a helicopter at any speed, performing circuits and approaches, and complying with airspace requirements.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Climb helicopter

- 1.1** Adjustments are made to attitude and power to achieve an increase of altitude at normal, maximum rate (VY), maximum angle (VX) and cruise climb flight configurations from straight and level flight
- 1.2** Appropriate altimeter settings are set
- 1.3** Helicopter is maintained in balanced flight during adjustments to attitude and power
- 1.4** Power is maintained as altitude increases
- 1.5** Helicopter is levelled off from climb at nominated altitude
- 1.6** Lookout is maintained during climb using a systematic scan technique at a rate determined by traffic density, visibility and terrain
- 1.7** Situational awareness is maintained

2 Maintain straight and level flight

- 2.1** Attitude and power are adjusted to achieve a constant height, heading and speed while remaining in balanced flight
- 2.2** Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility or terrain
- 2.3** Natural horizon is used as primary attitude reference
- 2.4** Altitude is maintained within allocated height band

3 Descend helicopter

- 3.1** Attitude and power are adjusted to enter and maintain a descent from straight and level flight
- 3.2** Helicopter is levelled from a descent at a nominated altitude
- 3.3** Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility or terrain
- 3.4** Clearance ahead and below is maintained
- 3.5** Air traffic control (ATC) altitude restrictions are

- observed
- 3.6** Design limits are not exceeded during helicopter descent
 - 3.7** Appropriate altimeter settings are set
 - 3.8** Situation awareness is maintained at all times during helicopter descent
- 4 Turn helicopter**
- 4.1** Attitude and power are adjusted to enter and maintain turns at varying rates from level, climbing and descending flight to achieve nominated tracks
 - 4.2** Helicopter is rolled out from the turn to achieve nominated heading or geographical feature alignment
 - 4.3** Helicopter balance and trim are ensured as required
 - 4.4** Lookout is maintained in direction of turn and above or below using a systematic scan technique at a rate determined by traffic density, visibility and terrain
 - 4.5** Engine operating limits are not exceeded
- 5 Control helicopter at any speed**
- 5.1** Attitude and power are adjusted, accelerated or decelerated to manoeuvre helicopter at any specified airspeed within the flight envelope while maintaining balanced flight
 - 5.2** Height awareness is maintained at all times and appropriate adjustments are made as required
 - 5.3** Wind conditions are monitored and appropriate allowance made
 - 5.4** Helicopter is suitably controlled to ensure it is operated within its design limits
- 6 Perform circuits and approaches**
- 6.1** Circuits are joined and conducted in accordance with aeronautical information publication (AIP) and/or local procedures at normal and low altitude appropriate to the helicopter type
 - 6.2** Due allowance is made for wind and all appropriate checklist items are completed when performing circuits and approaches
 - 6.3** Radiotelephone procedures are followed during circuit operations

- 6.4 Approach path applicable to helicopter type is intercepted and maintained while remaining clear of other traffic
 - 6.5 Lookout is maintained during circuits and approaches using a systematic scan technique at a rate determined by traffic density, visibility and terrain
 - 6.6 Conflicting traffic is recognised and appropriate responses made
 - 6.7 Right-of-way rules are applied and compliance with rules maintained
 - 6.8 Weather conditions are monitored and appropriate responses made
 - 6.9 Fuel status is monitored and appropriate responses made
 - 6.10 Helicopter approach is conducted to establish hover or to conduct a landing at the nominated termination point
- 7 Comply with airspace requirements**
- 7.1 Suitable aeronautical charts are interpreted and used to maintain airspace compliance requirements
 - 7.2 Circuit departure is performed
 - 7.3 Helicopter is maintained within a specified area and/or track while complying with air traffic requirements, controlled or restricted airspace conditions or limitations and reacting to factors that affect the safe progress of a flight
 - 7.4 Orientation is maintained to geographical features with the aid of suitable charts and maps
 - 7.5 Circuit join is performed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4015 Control helicopter in normal flight.

Assessment Requirements for AVIY0062 Control helicopter in normal flight

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others when controlling helicopter in normal flight
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant controls, including throttle, rotor controls, anti-torque pedals and collective and cyclic pitch controls
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- solving problems associated with controlling a helicopter in normal flight
- turning a helicopter with the following parameters:
 - level turns
 - climbing turns with 20° bank angle

- powered descending turn with 30° bank angle
- using instruments to monitor helicopter performance
- working collaboratively with others when controlling helicopter in normal flight
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of a height/velocity diagram/graph
- application of heading and track
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane or helicopter operations
- cause and effects of retreating blade stall
- circuit patterns and procedures
- circumstances and procedures for the use of carburettor heat
- conditions leading to loss of tail rotor/anti-torque control during descent
- dangers of wind shear, turbulence and wake turbulence
- effect of turning and acceleration on magnetic compass accuracy
- forces and moments acting on a helicopter and precautions to manage their effects
- functions, and primary and secondary effects of all helicopter controls
- hazards and risks when controlling a helicopter in normal flight and precautions for controlling the risks, including:
 - in a climb
 - in a turn
 - in straight and level flight
- helicopter instruments and monitoring helicopter performance
- managing non-normal and emergencies in the circuit area
- principles of aerodynamics
- problems that may occur when controlling a helicopter in normal flight and appropriate action that should be taken in each case
- procedures for setting power in normally aspirated, turbocharger, supercharged or turbine engines
- procedures for the use of trim controls if appropriate
- recognition and avoidance of settling with power/vortex ring state
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- rotational and induced airflow
- theory and application of best rate and angle of climb
- use of instruments to monitor helicopter performance and significance of colour coding
- vortex ring state

- wind shear, turbulence and wake turbulence.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0063 Execute advanced helicopter manoeuvres and procedures

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to execute advanced helicopter manoeuvres and procedures in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes turning a helicopter steeply, performing autorotative flight, and landing on and lifting off sloping ground. It also includes landing, taking off and manoeuvring in a confined area; executing limited power take-offs, approaches and landings; and taking off and landing at a pinnacle or ridge line.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Turn helicopter steeply

- 1.1 Level turn of nominated bank angle is achieved without altitude change to nominated heading
- 1.2 Descending turn of nominated bank angle is achieved to nominated heading
- 1.3 Awareness of higher stall speed in turns is applied
- 1.4 Helicopter operating limits are not exceeded

2 Perform autorotative flight

- 2.1 Appropriate action plan, including task priorities, is formulated that ensures the safe completion of autorotative manoeuvres
- 2.2 Autorotative flight is entered and maintained at a nominated speed and heading in balanced flight
- 2.3 Autorotative flight is performed at the optimum range and minimum descent rate speeds
- 2.4 Heading is altered with helicopter in balanced flight at a nominated speed
- 2.5 Helicopter is recovered and transitioned to normal flight from autorotative flight using power to a climb at nominated heading and speed
- 2.6 Helicopter autorotative landing to the ground is performed into the wind, using appropriate mix of control inputs within tolerances of termination point without lateral or rearward movement, and zero or minimum run-on speed
- 2.7 Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility and terrain
- 2.8 Situation awareness is maintained at all times during autorotative flight

3 Land on and lift off sloping ground

- 3.1 Surface conditions are confirmed to be suitable for the helicopter type

- 3.2 Stakeholders are briefed to ensure safe operations in the vicinity of helicopter
 - 3.3 Helicopter is landed from the hover onto sloping ground using appropriate slope landing techniques relevant to helicopter type
 - 3.4 Helicopter is lifted off from sloping ground to a hover using appropriate slope landing techniques relevant to helicopter type
 - 3.5 Control inputs and adjustments during landing on and lifting off are made in response to wind, surface and applicable aircraft limitations, using appropriate slope landing techniques and helicopter handling procedures
 - 3.6 Any abnormal situations are recognised and appropriate controlled corrective action implemented
 - 3.7 Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility or terrain
 - 3.8 Situation awareness is maintained at all times during lift-offs and landings on sloping ground
- 4 Land, manoeuvre and take off in a confined area**
- 4.1 Confined area is assessed, an action plan is formulated and a decision made to operate in the area
 - 4.2 Own pilot capabilities and helicopter performance are assessed, and decisions to take off or land are adjusted accordingly
 - 4.3 Appropriate approach and departure path is identified prior to intercepting and approach path to nominated termination point is maintained
 - 4.4 Helicopter is safely landed in a confined area using appropriate landing on techniques
 - 4.5 Helicopter is manoeuvred in a confined area while remaining clear of obstructions, and within helicopter operating limitations
 - 4.6 Helicopter departure plan and contingency procedures are briefed prior to departure
 - 4.7 Helicopter is safely taken off from a confined area using

- appropriate lifting off techniques
- 4.8** Situational awareness is maintained at all times during manoeuvres in a confined area
- 5 Execute limited power take-off, approach and landing**
- 5.1** Need for limited power manoeuvres is established
- 5.2** Decision to conduct limited power manoeuvres is implemented and appropriate action plan is formulated to conduct limited power operations
- 5.3** Helicopter performance is calculated and power requirements confirmed prior to commencing limited power operations
- 5.4** Appropriate area for a safe take-off and landing suitable for limited power available is selected
- 5.5** Awareness of own capabilities is applied, and limitations and decisions to take-off, approach or land are adjusted accordingly
- 5.6** Limited power take-off is performed, applying maximum or nominated power while maintaining optimum rotor revolutions per minute (RRPM) speed
- 5.7** Limited power approach and landing is performed while managing helicopter airspeed and optimum RRPM appropriate to power available and landing environment
- 5.8** Situational awareness is maintained at all times during limited power manoeuvres
- 5.9** Appropriate allowance is made for wind effects during limited power manoeuvres
- 6 Take off and land at a pinnacle or ridge line**
- 6.1** Suitable pinnacle or ridge line is selected and assessed, helicopter performance is assessed and/or confirmed, approach and landing plan is formulated, and decision is made to operate onto the area
- 6.2** Awareness of own capabilities is applied, and limitations and decisions to take-off or land are adjusted accordingly
- 6.3** Helicopter is safely landed on a pinnacle or ridge line using appropriate landing on techniques

- 6.4 Helicopter is safely lifted and taken off from a pinnacle or ridge line using appropriate lifting off techniques
- 6.5 Situational awareness is maintained at all times during take-offs, approaches and landings at a pinnacle or ridge line
- 6.6 Appropriate allowance is made for wind effects, landing surface conditions and approach/departure path obstacles during take-off, approach and landing at a pinnacle or ridge line

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4017 Execute advanced helicopter manoeuvres and procedures.

Assessment Requirements for AVIY0063 Execute advanced helicopter manoeuvres and procedures

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- following air traffic control procedures and instructions
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- interpreting/using a helicopter manufacturer height-velocity diagram/graph
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing autorotative flight, including:
 - power recovery
 - power termination
 - autorotative landing
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of

flight

- solving problems
- using instruments to monitor helicopter performance
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- actions to be conducted following a forced landing
- aerodynamic factors affecting helicopter flight performance, including:
 - aerodynamic forces
 - dynamic rollover
 - settling with power
 - recirculation
 - loss of tail rotor (anti-torque) effectiveness (LTE)
- all applicable checklist items
- application of a height/velocity diagram/graph
- basic principles of aerodynamics
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to helicopter operations
- cross-wind and rotor control limits for a helicopter
- cross-wind loss of rotor control limits for helicopter type flown
- emergency radio procedures
- functions and effects of all helicopter controls
- hazards and risks when executing advanced helicopter manoeuvres and procedures and precautions for controlling the risks
- helicopter performance limitations
- local air traffic control (ATC) procedures and instructions
- local weather conditions
- pinnacle and ridge line landing techniques, including:
 - intercepting and maintaining the approach path to the termination point
 - maintaining effective translational lift until touchdown is assured
 - terminating to a hover over selected landing and lift-off area
 - touching down on nominated touchdown point
 - controlling helicopter on the ground
- pinnacle and ridge line lift-off techniques, including:
 - planning take-off from in a pinnacle or ridgeline
 - calculating and confirming helicopter take-off performance is adequate for departure

- determining an appropriate abort point as required
- conducting take-off and departure from pinnacle or ridgeline remaining clear of obstacles with a margin that is applicable to the operation
- power required and power available curves
- pressure altitude and density considerations
- problems that may occur when executing advanced helicopter manoeuvres and procedures, and appropriate action that should be taken in each case
- procedures for using performance charts
- purpose and functions of helicopter systems
- relevant instructions, procedures and information
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- typical hazards and risks associated with conducting advanced manoeuvres, and precautions and procedures to control the risks
- wind and terrain effects.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0064 Manage abnormal and emergency helicopter flight situations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the application of skills and knowledge required to manage abnormal and emergency helicopter flight situations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes managing a forced landing from level flight after take-off or on approach, managing an engine failure at the hover or during taxi, managing a tail rotor malfunction, and managing a jammed flight control system. It also includes managing adverse aerodynamic conditions and managing a malfunction of the helicopter operating systems.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|--|
| 1 Manage a forced landing from level flight, after take-off or on approach | <p>1.1 Emergency situation requiring a forced landing is correctly identified</p> <p>1.2 Autorotative flight is entered and established at nominated speed and heading in balanced flight</p> <p>1.3 Required immediate actions are performed</p> <p>1.4 Rotor revolutions per minute (RRPM) speed is controlled within limitations</p> <p>1.5 Landing area within autorotative distance is selected and appropriate action plan is formulated to ensure safety of helicopter</p> <p>1.6 Emergency procedures are implemented and task priorities allocated to all actions to ensure aircraft, flight crew and passenger safety</p> <p>1.7 Emergency radio messages of intentions are transmitted</p> <p>1.8 Helicopter is landed into wind with as slow as practical ground speed while maintaining control of helicopter</p> <p>1.9 Situational awareness is maintained at all times during forced landing manoeuvres</p> |
| 2 Manage an engine failure at the hover or during taxi | <p>2.1 Hover and taxi surfaces are suitably selected to maximise options in an engine failure</p> <p>2.2 Emergency situation involving an engine failure is correctly identified</p> <p>2.3 Required immediate actions are performed</p> <p>2.4 Controlled touchdown is performed</p> |
| 3 Manage a tail rotor malfunction in flight and at the hover | <p>3.1 Hover heights and surfaces are selected to maximise options in a tail rotor malfunction</p> |

- 3.2 Tail rotor malfunction is correctly identified
 - 3.3 Required immediate actions are performed
 - 3.4 Control of helicopter is established and suitable landing area selected
 - 3.5 All emergency checks are performed and a plan formulated to achieve an approach and landing
 - 3.6 Emergency radio messages of intentions are transmitted
 - 3.7 Controlled emergency landing with a malfunctioning tail rotor is performed
 - 3.8 Situational awareness is maintained at all times during tail rotor malfunction handling manoeuvres
- 4 Manage a jammed flight control system**
 - 4.1 Jammed or malfunctioning flight control system malfunction is correctly identified
 - 4.2 Control of helicopter is established and suitable landing area selected
 - 4.3 All emergency checks are performed and a plan formulated to achieve approach and landing
 - 4.4 Emergency radio messages of intentions are transmitted
 - 4.5 Controlled emergency landing with a jammed flight control is performed
 - 4.6 Situational awareness is maintained at all times during flight control handling manoeuvres
- 5 Manage a malfunction of a helicopter operating system**
 - 5.1 Abnormal situations involving a helicopter system/s malfunction are correctly identified and confirmed
 - 5.2 Appropriate emergency procedures are conducted while maintaining control of helicopter flight path
 - 5.3 System malfunctions are managed and situational awareness maintained at all times during a system malfunction
- 6 Manage upset recovery**
 - 6.1 Correct techniques for upset recovery in various configurations are applied
 - 6.2 Aircraft is configured appropriately

- 6.3 Upset conditions are recognised
- 6.4 Aircraft is recovered to level flight conditions

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4018 Manage abnormal and emergency helicopter flight situations.

Assessment Requirements for AVIY0064 Manage abnormal and emergency helicopter flight situations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting/using a helicopter manufacturer height/velocity diagram/graph
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- solving problems associated with managing a helicopter in abnormal and emergency situations
- using instruments to monitor helicopter performance
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- actions to be conducted following a forced landing
- aerodynamic factors affecting helicopter flight performance
- all applicable checklist items
- applicable helicopter system malfunctions, including:
 - cautions, warnings and indications
 - engine failure/s
 - tail rotor malfunction
 - jammed or malfunctioning flight controls
 - critical flight controls:
 - fuel systems
 - hydraulics
 - flight instruments
- application of a height/velocity diagram/graph
- basic principles of aerodynamics
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to aeroplane or helicopter operations
- emergency procedures
- emergency radio procedures
- functions and effects of all helicopter controls
- hazards and risks when managing a helicopter in abnormal and emergency flight situations and precautions for controlling the risks
- impact of high gross weight and high-density altitude on key hazards
- key hazards and typical causal factors and contributing operational situations, avoidance and recognition of symptoms and recovery techniques, including:
 - vortex ring state
 - ground resonance
 - loss of tail rotor effectiveness (LTE)
 - low 'g' force and mast bumping
 - overpitching or low rotor revolutions per minute (RRPM) – rotor stall
 - retreating blade stall
 - recirculation
 - dynamic rollover
- local air traffic control (ATC) procedures and instructions
- low-level weather and topography effects
- managing system malfunctions
- practical action plans for use in an engine failure

- prioritising tasks when managing malfunctions
- problems that may occur when managing a helicopter in abnormal and emergency flight situations and appropriate action that should be taken in each case
- procedures for using performance charts
- purpose and functions of helicopter systems
- relevant sections of CASRs and Civil Aviation Orders pertaining to abnormal flight situations
- relevant WHS and environmental procedures and regulations
- threat and error management (TEM), including:
 - flight planning to avoid hazardous or adverse aerodynamic flight conditions and regimes
 - techniques to avoid a potentially hazardous situation developing while in flight.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0065 Conduct external load-lift operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct external load-lifting operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes preparing for load-lifting operations, performing load-lifting operations, concluding load-lifting operations, and responding to external load operational emergencies and abnormal situations.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare for load-lifting operations

- 1.1 External load characteristics and dimensions are determined and calculated
- 1.2 Aerial delivery equipment is prepared and checked as required in accordance with equipment manuals and publications
- 1.3 Helicopter cargo hook system is prepared and checked for correct operation
- 1.4 Aircraft safety hazards are identified using established procedures
- 1.5 Aircraft power availability is calculated
- 1.6 Wind speed and direction are determined
- 1.7 Approach and overshoot paths are determined
- 1.8 Load-lifting location and surrounds are checked for suitability
- 1.9 External load-lifting plan is developed and communicated to other crew members

2 Perform load-lifting operations

- 2.1 Helicopter is manoeuvred to external load-lifting point
- 2.2 Aircraft operational checks are conducted
- 2.3 External load is connected using appropriate operational method
- 2.4 Situational awareness of inflight load stability and aircraft flight performance is maintained
- 2.5 External load is released at nominated delivery point

3 Conclude load-lifting operations

- 3.1 Aerial delivery equipment is recovered as required
- 3.2 Aircraft external load hook equipment and control systems are secured and checked for serviceability

4 Respond to external load operational emergencies and abnormal situations

- 4.1 External load operational emergencies are identified, diagnosed and communicated

- 4.2** External load operational emergency or remedial actions are undertaken to maintain safety of flight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4051 Conduct external load-lift operations.

Assessment Requirements for AVIY0065 Conduct external load-lift operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying relevant legislation and workplace procedures
- completing aerial delivery equipment assembly
- completing relevant documentation
- determining wind speed and direction
- identifying and using required communications technology
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating aerial delivery equipment
- operating and adapting to differences in communications equipment in accordance with standard operating procedures (SOPs)
- performing weight calculations
- planning own work, predicting consequences and identifying improvements
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with workplace procedures
- using communication skills for helicopter control
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include

knowledge of:

- approach and overshoot considerations
- approved operational procedures and processes for different external load-lifting operations
- cargo hook system and aerial delivery equipment capabilities and limitations
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to helicopter external load operations
- correct aerial delivery equipment configuration
- external load characteristics, including:
 - dangerous goods
 - dimensions
 - fragility
 - non-dangerous
 - rigging requirements
 - size
 - weight
- aerial delivery equipment, including:
 - cargo nets
 - chains
 - clevis assemblies
 - D rings
 - drogue chutes
 - firefighting buckets
 - hooks
 - lifting slings
 - pallets
 - pendant assemblies
 - rigging cordage
 - semi-rigid strops
 - shackles
 - single link assemblies
 - strops
 - swivel assemblies
- external load-lifting safety and configuration
- external load-lifting emergency procedures
- external load-lifting risk assessment principles
- external load-lifting verbal/non-verbal communication procedures
- external load operational emergencies and abnormal situations, including:
 - communications system failure
 - helicopter electrical or mechanical system failure or malfunction
 - inadvertent release of external load

- inflight external load instability
- helicopter capabilities and limitations
- aircraft safety hazards, including:
 - fauna
 - flora
 - man-made structures
 - meteorological conditions
 - other aircraft
 - ship structures and rigging
 - ship movements
 - smoke
 - terrain
- organisational policies and procedures for load-lifting operations
- practices concerning external load-lifting operations
- procedures and protocols for using communications systems during an emergency
- typical problems that may occur when conducting external load-lifting operations and appropriate action and solutions
- work health and safety (WHS) issues applicable to operations, aircraft and personnel safety.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIY0066 Conduct hoisting operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct hoisting operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes preparing for hoisting operations, performing hoisting operations, responding to hoisting emergencies and abnormal situations, and concluding hoisting operations.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Prepare for hoisting operations

- 1.1 Hoisting equipment is prepared and checked
- 1.2 Helicopter safety hazards are identified using established procedures
- 1.3 Aircraft power availability is calculated
- 1.4 Wind speed and direction are determined
- 1.5 Approach and overshoot paths are determined
- 1.6 Hoisting location and surrounds are checked for suitability
- 1.7 Hoist is prepared and checked for correct operation
- 1.8 Hoisting operation plan is developed and communicated to flight crew

2 Perform hoisting operations

- 2.1 Helicopter is manoeuvred to the most appropriate hover position to perform safe hoisting operations
- 2.2 Hoisting accessories/equipment items are checked and attached to hoist hook
- 2.3 Aircraft operational/control checks are conducted as required
- 2.4 Flight crew situational awareness of hoisting operation and aircraft flight performance is maintained using appropriate voice and/or non-verbal communication procedures
- 2.5 Passengers are deployed/dispatched, monitored, retrieved and secured to achieve operational requirements
- 2.6 Stores are deployed/dispatched, monitored, retrieved and secured to achieve operational requirements
- 2.7 Aircraft hoist system is operated in accordance with equipment operating procedures

3 Respond to hoisting emergencies and abnormal situations

- 3.1 Hoisting emergencies and abnormal situations are identified, diagnosed and communicated to other flight crew

- | | |
|---------------------------------------|--|
| 4 Conclude hoisting operations | 3.2 Hoist emergency or remedial actions are undertaken to maintain safety of flight and/or to complete hoist operations |
| | 4.1 Hoisting accessories/equipment items are removed from hoist hook and stowed |
| | 4.2 Hoist is secured and checked for serviceability |
| | 4.3 Aircraft maintenance documentation is completed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4054 Conduct hoisting operations.

Assessment Requirements for AVIY0066 Conduct hoisting operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying crew resource management (CRM) principles
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying relevant legislation and workplace procedures
- assembling hoisting equipment
- communicating effectively with others
- completing relevant documentation
- deploying and redeploying hoist cable to full length, including:
 - in-ground effect
 - out-of-ground effect
- determining wind speed and direction
- identifying and using required communications technology
- implementing contingency plans
- maintaining situational awareness
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in communications equipment in accordance with standard operating procedures (SOPs)
- operating hoist and associated primary and alternate hoist controls
- operating hoisting accessories
- planning own work, predicting consequences and identifying improvements
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with workplace procedures
- using communication skills for conning
- working collaboratively with others

- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- abnormal/emergency situations and responses
- aircraft approach and overshoot considerations
- aircraft control voice and communications procedures
- aircraft safety, including day and night considerations
- approved operational procedures and processes for different hoisting operations
- aviation risk management processes
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to helicopter operations
- correct hoist and equipment configuration
- CRM principles
- helicopter capabilities and limitations
- hoisting equipment, including:
 - double lift harness
 - emergency slings
 - extension strop
 - hi-line transfer equipment
 - rescue litter
 - rescue net
 - rescue sling/strop
 - rope harness sling
 - single rescue sling
 - stretchers
 - transfer equipment and message bag
- hoisting operations, including:
 - hi-line transfer
 - litter kit/equipment deployment/redeployment
 - personnel deployment/redeployment
 - rescue equipment deployment/redeployment
 - stores deployment/redeployment
- hoist capabilities and limitations
- hoist emergency procedures, including:
 - aircraft electrical/mechanical failure
 - aircraft malfunction

- aircraft system failure
- communications equipment failure
- fouled cable
- fouled hoist
- hoist equipment malfunction
- hoistee incapacitation
- intercom system failure during hoisting operations
- operator incapacitation
- runaway hoist
- hoisting considerations within a range of operational environments, including:
 - bushfire affected areas
 - confined areas
 - forest/bush
 - mountainous areas
 - over water
 - over land
 - pinnacles
 - ship/boat transfers
- meaning of non-verbal communications signals relevant to aircraft hoist configuration, including:
 - aircraft go-around
 - all clear
 - boom in/out
 - cease movement
 - come up/down
 - emergency descent
 - hoist in/out
 - hoist up/down
 - move left/right
 - ready to be hoisted
 - stop hoisting
- organisational policy and procedures for conducting hoisting operations
- typical problems that may occur and actions and appropriate solutions
- work health and safety (WHS) issues applicable to hoisting operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory

requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIY0067 Conduct airborne extraction operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct airborne extraction operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes preparing helicopter and personnel for airborne extraction, performing airborne extraction operations, and responding to airborne extraction emergencies and abnormal situations.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare helicopter and personnel for airborne extraction

- 1.1 Helicopter and airborne extraction equipment are checked to determine serviceability
- 1.2 Extraction zone characteristics and dimensions are determined and calculated
- 1.3 Extraction personnel characteristics are considered in scope of mission planning
- 1.4 Crew is briefed during mission brief
- 1.5 Airborne extraction supervisor is briefed
- 1.6 Static ground rehearsals are conducted with personnel and equipment

2 Prepare for airborne extraction

- 2.1 Extraction equipment is attached and checked for security
- 2.2 Helicopter safety hazards are communicated using workplace procedures
- 2.3 Extraction checks are conducted prior to extraction equipment deployment
- 2.4 Wind speed and direction are communicated
- 2.5 Approach and overshoot paths are communicated

3 Perform airborne extraction operations

- 3.1 Helicopter is manoeuvred to extraction point
- 3.2 Extraction equipment is deployed in accordance with workplace procedures
- 3.3 Personnel are supervised and directed to attach to extraction equipment in accordance with workplace procedures
- 3.4 Situational awareness of extraction position and aircraft flight performance is maintained
- 3.5 Progress of extraction operation is communicated
- 3.6 Personnel are directed to detach from extraction equipment

- | | |
|---|--|
| 4 Respond to airborne extraction emergencies and abnormal situations | 4.1 Airborne extraction emergencies and abnormal situations are identified, diagnosed and communicated |
| | 4.2 Airborne extraction emergency or remedial actions are undertaken to maintain safety of flight and personnel |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4055 Conduct airborne extraction operations.

Assessment Requirements for AVIY0067 Conduct airborne extraction operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- attaching and security checking extraction equipment
- briefing crew and supervisor in accordance with workplace procedures
- communicating extraction operation progress in accordance with workplace procedures
- communicating helicopter safety hazards, wind speed and direction, approach and overshoot paths
- communicating to pilot, information relevant to aircraft vertical/horizontal position
- completing airborne extraction equipment pre-flight serviceability checks
- completing relevant documentation
- determining and calculating extraction zone characteristics and dimensions
- determining wind speed and direction
- directing personnel to attach and detach from extraction equipment in accordance with workplace procedures
- following relevant legislation and workplace procedures
- identifying, communicating and diagnosing airborne extraction emergencies in accordance with workplace procedures
- implementing contingency plans
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in communications equipment in accordance with established procedures
- performing operational personnel/equipment weight calculations
- planning own work, predicting consequences and identifying improvements
- reading, interpreting and applying relevant regulations, legislation, policies and procedures
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with established procedures
- taking actions in a remedial and/or emergency situation in accordance with aircraft flight

- manuals, organisational policy and workplace procedures
- using communication skills for helicopter control
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- extraction personnel characteristics, including:
 - experience of personnel (advanced and beginners)
 - size
 - variations in extraction equipment to be worn
 - weight
- airborne extraction emergency procedures
- airborne extraction supervisor, including:
 - airborne team leader
 - airborne safety officer
 - aircrewman
 - chalk commander
 - drop master
 - loadmaster
 - observer
 - rescue crewman
- airborne extraction equipment capabilities, correct configuration and limitations, including:
 - attachment devices
 - caving ladder
 - eye goggles
 - head protection
 - hearing protection
 - rappelling attachment device
 - rappelling gloves
 - rappelling harness
 - suspended extraction ropes
- airborne extraction risk management processes
- airborne extraction safety and configuration
- airborne extraction verbal/non-verbal communication procedures
- aircraft earthing procedures
- approved operational procedures and processes for different airborne extraction operations

- helicopter approach and overshoot considerations
- helicopter capabilities and limitations as defined in aircraft publications/documentation
- helicopter safety hazards, including:
 - fauna
 - flora
 - foreign object damage (FOD)
 - loss of visual reference
 - man-made structures
 - meteorological conditions
 - other aircraft
 - ship movements
 - ship structures and rigging
 - smoke
- procedures and protocols for using communication systems during an emergency
- airborne extraction emergencies, including:
 - aircraft emergencies
 - extraction equipment/extracted personnel snagged in trees/obstacles
 - extraction equipment malfunction
 - extracted personnel unable to detach from rope
- relevant regulations, legislation, organisational policy and procedures
- typical problems that may occur when conducting airborne extraction operations, and appropriate actions and solutions
- work health and safety (WHS) issues applicable to extraction operations, aircraft and personnel safety.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and

operation manuals

- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIY0068 Conduct airborne rappelling operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct airborne rappelling operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes preparing helicopter and personnel for airborne rappelling operations, preparing for airborne rappelling operations, performing airborne rappelling operations, and responding to airborne rappelling emergencies and abnormal situations.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare helicopter and personnel for airborne rappelling operations

- 1.1 Helicopter and airborne rappelling attachment device are pre-flight checked to determine serviceability
- 1.2 Airborne rappelling location and surrounds are assessed for suitability
- 1.3 Rappelling personnel characteristics and operational variations are considered in scope of mission planning
- 1.4 Crew is briefed during mission brief
- 1.5 Airborne rappelling supervisor is briefed
- 1.6 Static ground rehearsals are conducted with personnel and equipment
- 1.7 Fitness of rappelling personnel to complete task is confirmed in accordance with established procedures

2 Prepare for airborne rappelling operations

- 2.1 Ropes are attached to airborne rappelling attachment device and are checked for security
- 2.2 Rappellers are restrained in aircraft prior to take-off
- 2.3 Fitting of rappeller personnel protective equipment is checked
- 2.4 Deployment checks are conducted prior to rope deployment
- 2.5 Helicopter safety hazards are communicated using workplace procedures
- 2.6 Wind speed and direction are communicated to relevant personnel
- 2.7 Approach and overshoot paths are communicated to relevant personnel

3 Perform airborne rappelling operations

- 3.1 Helicopter is manoeuvred to rappelling point
- 3.2 Ropes and rappellers are deployed in accordance with workplace procedures
- 3.3 Situational awareness of rappelling position and aircraft

- flight performance is maintained
- 3.4 Rappelling ropes are recovered or released as required
 - 3.5 Clearance for aircraft departure is provided by airborne rappelling dispatcher at completion of deployment
- 4 Respond to airborne rappelling emergencies and abnormal situations**
- 4.1 Airborne rappelling emergencies and abnormal situations are identified, diagnosed and communicated to relevant personnel
 - 4.2 Airborne rappelling emergency or remedial actions are undertaken to maintain safety of flight and personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Assessment Requirements for AVIY0068 Conduct airborne rappelling operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- assessing suitability of airborne rappelling location and surrounds, including:
 - single or multiple rappellers
 - basic airborne rappelling
 - advanced airborne rappelling
 - airborne fast roping
- attaching and security checking ropes to airborne rappelling device
- briefing crew and airborne rappelling supervisor in accordance with workplace procedures
- communicating helicopter safety hazards, wind speed and direction, approach and overshoot paths
- communicating rappelling operation progress in accordance with workplace procedures
- completing airborne rappelling attachment device pre-flight serviceability checks
- completing relevant documentation
- conducting deployment checks prior to rope deployment
- conducting fitting checks of rappeller personnel protective equipment (PPE) in accordance with established procedures
- conducting serviceability pre-flight checks of helicopter and airborne rappelling attachment device
- deploying ropes and rappellers, and recovery/release of ropes in accordance with workplace procedures
- determining wind speed and direction
- following relevant legislation and workplace procedures
- identifying, communicating and diagnosing rappelling emergencies in accordance with workplace procedures
- implementing contingency plans
- monitoring work activities in terms of planned schedule
- operating airborne rappelling attachment device
- operating and adapting to differences in communications equipment in accordance with

- established procedures
- performing weight calculations
- planning own work, predicting consequences and identifying improvements
- providing clearance for aircraft departure once all ropes are clear or secured
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly in accordance with established procedures
- taking actions in a remedial and/or emergency situation in accordance with aircraft flight manuals, organisational policies and workplace procedures
- using communication skills for helicopter control
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- rappelling personnel characteristics, including:
 - experience of personnel (advanced and beginners)
 - size
 - variations in rappelling equipment to be worn
 - weight
- airborne rappelling attachment device capabilities and limitations
- airborne rappelling supervisor, including:
 - airborne team leader
 - airborne safety officer
 - aircrewman
 - chalk commander
 - drop master
 - loadmaster
 - observer
 - rescue crewman
- airborne rappelling equipment, including:
 - attachment devices
 - eye goggles
 - fast ropes
 - head protection
 - hearing protection

- rappelling attachment device
- rappelling gloves
- rappelling harness
- rappelling ropes
- airborne rappelling emergency procedures, including:
 - aircraft emergencies
 - rappelling equipment/personnel snagged in trees/obstacles
 - rappelling equipment malfunction
 - rappelling personnel unable to detach from rope/s
- airborne rappelling risk assessment principles
- airborne rappelling techniques
- airborne rappelling verbal/non-verbal communication procedures
- approved operational procedures and processes for different airborne rappelling operations
- correct airborne rappelling safety equipment configuration
- helicopter approach and overshoot considerations
- helicopter capabilities and limitations as defined in aircraft publications/documentation
- procedures and protocols for using communication systems during an emergency
- relevant regulations, legislation, organisational policy and procedures
- typical problems that may occur when conducting airborne rappelling operations, and appropriate actions and solutions
- work health and safety (WHS) issues applicable to rappelling operations, aircraft and personnel safety
- helicopter safety hazards, including:
 - fauna
 - flora
 - foreign object damage (FOD)
 - loss of visual reference
 - man-made structures
 - meteorological conditions
 - other aircraft
 - ship movements
 - ship structures and rigging
 - smoke
 - terrain.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the

time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0069 Pilot a helicopter during external load operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to pilot a helicopter during external load operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes planning and preparing for external load operations, conducting pre-flight briefings, and operating the helicopter during external load operations. It also includes managing abnormal and emergency situations, and conducting post-flight activities.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan and prepare for external load operations

- 1.1** External load tasking requirements are identified
- 1.2** External load is secured, stabilised and rigged in accordance with workplace procedures
- 1.3** External load procedures, equipment and personnel required for task are determined
- 1.4** Helicopter performance data is interpreted and calculated to ensure suitability of aircraft for external load operations
- 1.5** Outbound and return flight routes are planned
- 1.6** Secure and stable load preparations are arranged
- 1.7** Load-lifting equipment strength and suitability are assessed

2 Conduct pre-flight briefings

- 2.1** Requirements of load task are explained and confirmed
- 2.2** Personnel responsible for inspecting load-lifting equipment for serviceability and security are identified
- 2.3** Communication and hook-up procedures are explained
- 2.4** Hook-up person and hook-up procedure are specified
- 2.5** Departure, transit, approach, termination and load release procedures are explained
- 2.6** Emergency procedures are explained and confirmed
- 2.7** Pilot vertical reference (long line) procedure is explained
- 2.8** Crew and ground support personnel are briefed on all aspects of external load operation
- 2.9** Seating is adjusted to ensure full exercise of flight controls and ability to scan instrument panel
- 2.10** Helicopter performance data is interpreted and calculated to ensure suitability of aircraft for operations

- | | | |
|---|-------------|--|
| | 2.11 | Aircraft is configured for external load operations and security of internal equipment is arranged as required |
| 3 Operate helicopter | 3.1 | Functional and safety checks on role equipment are performed and defects reported |
| | 3.2 | Fuel and cargo load combinations to achieve task are calculated |
| | 3.3 | Adequacy of power margin and directional control are determined |
| | 3.4 | Stable hover over load during hook-up/delivery procedures is maintained |
| | 3.5 | External load is lifted and transported to a separate location and placed at a specified position |
| | 3.6 | External load is monitored and appropriate actions taken to ensure load security and stability during flight |
| 4 Manage abnormal and emergency situations | 4.1 | Helicopter control is maintained |
| | 4.2 | Abnormal and/or emergency situations are identified and managed |
| | 4.3 | Load is jettisoned when flight safety is compromised or load stability is uncontrollable |
| 5 Conduct post-flight activities | 5.1 | Operating procedures and outcomes of flight are reviewed and analysed |
| | 5.2 | Effectiveness, efficiency and performance of equipment are analysed and reported |
| | 5.3 | Inspection, servicing and stowage of equipment are organised |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4058 Pilot a helicopter during external load operations.

Assessment Requirements for AVIY0069 Pilot a helicopter during external load operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- communicating effectively with others
- completing relevant documentation
- following relevant legislation and workplace procedures
- identifying and assessing vertical, horizontal and relative spatial distances in relation to aircraft fuselage, rotor system, mission and/or operational stores and equipment with regard to potential obstacles to flight safety
- identifying and correctly using equipment required when operating a helicopter during external load operations
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting hover performance and power available/power required from graphs/charts
- maintaining situational awareness
- managing abnormal and emergency situations, including:
 - load instability:
 - controllable
 - uncontrollable
 - inadvertent load release
 - single-engine failure (single/multi-engine)
 - double-engine failure (multi-engine only)
 - external load aircraft system failure
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing external load scan techniques

- preparing and rigging sling load, including all sub-tasks in accordance with workplace procedures and the aircraft flight manual (AFM)/pilot's operating handbook (POH)
- reading and interpreting relevant instructions, procedures and information
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- using instruments to monitor helicopter performance during external load operations
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerial delivery equipment inspection, operation, safe working loads and limitations
- aerial inspections for external load operations
- aircraft dimensions
- aircraft performance calculations (for all phases of flight)
- awareness of load rigging and preparation for flight
- cargo hook limitations, problems and hazards
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to helicopter external load operations
- communication procedures and terminology applicable to external load operations
- control effectiveness in all phases of flight
- engine performance checks for helicopter type to be flown
- external load operational planning and risk control
- external load operations on, or in vicinity of, non-controlled and controlled aerodromes or airstrips
- flight rules applicable to external load operations
- hazards that exist and problems that can occur when operating an aircraft during external load operations
- helicopter dimensions and operating weights, including:
 - helicopter landing site (HLS) requirements
 - all up weight (AUW)
 - maximum all up weight (MAUW)
- human factors applicable to external load operations, including:
 - dehydration and its impact on pilot cognitive function and reaction time
 - fatigue and its impact on pilot cognitive function and situational awareness

- stress and its short-term and long-term impact
- drugs (particularly over the counter) impact on pilot cognitive function, reaction time and coordination
- spatial disorientation and illusions:
 - night external load operations
- in a Defence context, relevant Defence Orders and Instructions
- internal and external load limitations for helicopter type to be flown
- load rigging and preparation for flight
- low-level flight techniques for external load operations
- meteorological requirements for external load operations
- operational planning requirements for external load operations, including:
 - pre-flight and after-flight inspections
 - operational inspections
- principles of aerodynamics
- privileges and limitations of a low-level rating
- procedures to address problems associated with a helicopter during external load operations
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- vertical reference (long line) operation procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0070 Pilot a helicopter during rappelling operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to pilot a helicopter during rappelling operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes planning rappelling operations, conducting pre-flight briefings and operating a helicopter. It also includes managing abnormal and emergency situations, and conducting post-flight briefings.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan rappelling operations

- 1.1** Tasking requirements are identified, including operational variations
- 1.2** Crew and equipment required to ensure safe achievement of task are determined
- 1.3** Helicopter performance data is interpreted and calculated to ensure suitability of aircraft for rappelling operations
- 1.4** Transit, rappelling operation communications and recovery are planned in accordance with workplace procedures
- 1.5** Operations at rappelling site, including obstructions, terrain and any factors that may adversely affect deployment, are planned
- 1.6** Abnormal and emergency rappelling situation contingency procedures are planned

2 Conduct pre-flight briefings

- 2.1** Rappelling operational requirements are briefed and confirmed
- 2.2** Location, terrain features (sea state as applicable) and forecast weather conditions are obtained and confirmed
- 2.3** Timings, route/s, airspeeds and altitudes are confirmed
- 2.4** Relevant personnel are briefed about pilot, crew and rappelling personnel responsibilities and communication procedures
- 2.5** Abnormal and emergency rappelling situation contingency procedures are briefed

3 Operate helicopter

- 3.1** Adequacy of hover power margin and control limits to perform rappelling operations is checked and maintained
- 3.2** Site inspection, approach and hover heading are determined in accordance with operational requirements
- 3.3** Descent and approach are controlled to terminate over rappelling site
- 3.4** Control is applied to helicopter to maintain position over

- rappelling site
- 3.5 Obstacle clearances to obstructions, constructions and terrain are maintained during deployment and/or retrieval operation
 - 3.6 Effective communications with crew and relevant personnel are maintained during operation
 - 3.7 Safety and security of passengers and/or cargo is managed
 - 3.8 Rappelling ropes are recovered and/or detached, and site is vacated in accordance with workplace procedures
- 4 Manage abnormal and emergency situations**
- 4.1 Helicopter control is maintained
 - 4.2 Abnormal and/or emergency situations are identified and managed
 - 4.3 Rappelling equipment/personnel are safely jettisoned (as required) when flight safety or hover stability is compromised
- 5 Conduct post-flight briefings**
- 5.1 Operating procedures and flight outcomes are reviewed and analysed
 - 5.2 Effectiveness, efficiency and performance of equipment is analysed and reported
 - 5.3 Inspection, servicing and stowage of rappelling equipment is organised/confirmed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4059 Pilot a helicopter during rappelling operations.

Assessment Requirements for AVIY0070 Pilot a helicopter during rappelling operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying reporting procedures for identified problems
- communicating effectively with others
- completing relevant documentation
- conducting pre-flight and post-flight rappelling operations briefings and debriefings, including all sub-tasks:
 - fast rappelling considerations
 - rappelling considerations
 - unprepared helicopter landing sites
 - confined areas
 - unknown landing sites
 - pinnacles
 - embarked/sea platforms (as required)
 - marine environments (as required)
- conducting rappelling operation variations including:
 - single or multiple rappellers
 - basic airborne rappelling
 - advanced airborne rappelling
 - airborne fast roping
- following relevant legislation and workplace procedures
- identifying and assessing vertical, horizontal and relative spatial distances in relation to aircraft fuselage, rotor system, mission and/or operational stores and equipment with regard to potential obstacles to flight safety
- identifying and correctly using relevant equipment
- identifying and justifying a decision to operate a helicopter during rappelling operations

- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting hover performance and power available/power required from graphs/charts
- maintaining situational awareness
- managing abnormal and emergency situations during rappelling operations, including:
 - aircraft system failure or malfunction
 - rappelling and rappelling equipment malfunction or failure
 - injury to rappelling/rappelling personnel
 - degraded environmental conditions
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reacting appropriately to avoid hazardous situations and/or dangerous situations that pose risks to safety of flight and personnel
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- solving problems associated with operating a helicopter during rappelling operations
- using instruments to monitor helicopter performance during rappelling operations
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- aircraft performance calculations (for all phases of flight)
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to helicopter roping or rappelling operations
- communications procedure and terminology applicable to rappelling operations
- control effectiveness in all phases of flight
- engine performance checks for helicopter type to be flown
- flight rules and legislation applicable to rappelling operations
- functions and effects of all aircraft controls and instruments
- hazards, limitations and problems that can occur when operating an aircraft during rappelling operations
- helicopter dimensions
- human factors applicable to roping/rappelling operations, including:

- crew coordination
- dehydration and effects on pilot cognitive function
- fatigue and situational awareness
- stress and short-term and long-term impacts
- drugs, including over-the-counter
- spatial orientation and illusions
- in a Defence context, relevant Defence Orders and Instructions
- internal and external load limitations for helicopter type to be flown, including weight and balance consideration
- meteorological requirements for roping/rappelling operations
- operational inspections
- operational planning and risk management processes for rappelling operations
- pre- and post-flight inspection requirements
- principles of aerodynamics
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- rappelling and/or fast roping operational planning requirements, including:
 - fast roping considerations
 - rappelling considerations
 - unprepared helicopter landing sites
 - confined areas
 - unknown landing sites
 - pinnacles
 - embarked/sea platforms
 - marine environments
- rappelling and/or fast rope attaching point limitations
- rappelling and/or fast roping operational flight techniques, including:
 - low-level flight handling
 - deployment and recovery procedures
 - abnormal and emergency handling techniques.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0071 Pilot a helicopter during hoisting operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to pilot a helicopter during hoisting operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes planning hoisting operations, conducting pre-flight briefings for hoisting operations, and operating a helicopter during hoisting operations. It also includes managing abnormal and emergency situations during hoisting operations, and conducting post-flight briefings for hoisting operations.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan hoisting operations

- 1.1** Tasking requirements are identified
- 1.2** Crew and equipment required to ensure safe achievement of task are determined
- 1.3** Helicopter performance data is interpreted and calculated to ensure suitability of aircraft for operations
- 1.4** Transit, hoisting operation communications and recovery are planned in accordance with workplace procedures
- 1.5** Operations at hoist site, including consideration of obstructions, terrain and any factors that may adversely affect lift, are planned
- 1.6** Abnormal and emergency hoisting situation contingency procedures are planned

2 Conduct pre-flight briefings

- 2.1** Hoisting operational requirements are briefed and confirmed with relevant personnel
- 2.2** Location, terrain features (sea state as required) and forecast weather conditions are obtained and confirmed with relevant personnel
- 2.3** Timings, route/s, airspeeds and altitudes are confirmed with relevant personnel
- 2.4** Relevant personnel are briefed about pilot, crew and hoisting personnel responsibilities and communication procedures
- 2.5** Abnormal and emergency hoisting situation contingency procedures are briefed

3 Operate a helicopter during hoisting operations

- 3.1** Adequacy of hover power margin and control limits to perform hoisting operations is checked and maintained
- 3.2** Site inspection, approach and hover heading are determined in accordance with operational requirements
- 3.3** Descent and approach are controlled to terminate over hoist site

- 3.4 Control is applied to helicopter to maintain position over hoist site
 - 3.5 Obstacle clearances to obstructions, constructions and terrain are maintained during deployment and retrieval operation
 - 3.6 Effective communications with crew and relevant personnel are maintained during operation
 - 3.7 Safety and security of passengers and/or cargo is managed
 - 3.8 Hoist cable is recovered and stowed, and site is vacated in accordance with workplace procedures
- 4 **Manage abnormal and emergency situations**
 - 4.1 Helicopter control is maintained
 - 4.2 Abnormal and/or emergency situations are identified and managed
 - 4.3 Hoist cargo/personnel are safely jettisoned (as required) when flight safety or hover stability is compromised
- 5 **Conduct post-flight briefings**
 - 5.1 Operating procedures and flight outcomes are reviewed and analysed
 - 5.2 Effectiveness, efficiency and performance of equipment are analysed and reported
 - 5.3 Inspection, servicing and stowage of hoist equipment are organised/confirmed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4060 Pilot a helicopter during hoisting operations.

Assessment Requirements for AVIY0071 Pilot a helicopter during hoisting operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant helicopter aeronautical knowledge
- applying reporting procedures for identified problems that may occur when operating a helicopter during hoisting operations
- communicating effectively with others
- completing relevant documentation
- conducting pre-flight and post-flight hoisting operations briefings and debriefings, including:
 - hoisting method considerations
 - unprepared helicopter landing sites
 - confined areas
 - unknown landing sites
 - pinnacles
 - embarked/sea platforms (as required)
 - marine environments (as required)
- following relevant legislation and workplace procedures
- identifying and assessing vertical, horizontal and relative spatial distances in relation to aircraft fuselage, rotor system, mission and/or operational stores and equipment with regard to potential obstacles to flight safety
- identifying and correctly using relevant equipment
- identifying and justifying a decision to operate a helicopter during hoisting operations
- identifying and managing abnormal and emergency situations in accordance with workplace procedures and the aircraft flight manual (AFM)/pilot's operating handbook (POH)
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting hover performance and power available/power required from graphs/charts
- maintaining situational awareness
- managing abnormal and emergency situations during hoisting operations, including:

- aircraft system failure or malfunction
- hoisting equipment malfunction or failure
- injury to hoisting personnel
- degraded environmental conditions
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- solving problems associated with operating a helicopter during hoisting operations
- using instruments to monitor helicopter performance during hoisting operations
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aircraft performance calculations (for all phases of flight)
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to helicopter hoisting operations
- communication procedure and terminology applicable to hoisting operations
- control effectiveness in all phases of flight
- engine performance checks for helicopter type to be flown
- flight rules and legislation applicable to hoisting operations
- functions and effects of all aircraft controls and instruments
- hazards that exist and problems that can occur when operating an aircraft during hoisting operations
- helicopter dimensions
- hoist limitations
- hoisting operation flight techniques, including:
 - low-level flight handling
 - deployment and recovery procedures
 - abnormal and emergency handling techniques
- hoisting operational planning requirements, including:
 - hoisting method considerations
 - unprepared helicopter landing sites
 - confined areas

- unknown landing sites
- pinnacles
- embarked/sea platforms
- marine environments
- human factors applicable to hoisting operations, including:
 - crew coordination
 - dehydration and effects on pilot cognitive function
 - fatigue and situational awareness
 - stress and short-term and long-term impacts
 - drugs, including over-the-counter
 - spatial orientation and illusions
- in a Defence context, relevant Defence Orders and Instructions
- internal and external load limitations for helicopter type to be flown including weight and balance consideration
- meteorological requirements for hoisting operations
- operational inspections
- operational planning and risk management processes for hoisting operations
- pre- and post-flight inspection requirements
- principles of aerodynamics
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0072 Operate a multi-engine aeroplane

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to operate a multi-engine aeroplane in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes operating a multi-engine aeroplane in all phases of flight, managing an engine failure/malfunction in flight and managing an engine failure/malfunction after take-off. It also includes performing a rejected take-off, managing an engine failure/malfunction during approach/landing, and conducting a go-around or missed approach with an engine failure.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|---|
| 1 Operate a multi-engine aeroplane in all phases of flight | <p>1.1 Normal operations of multi-engine aeroplane type on the ground and in flight are conducted in accordance with the aircraft flight manual (AFM), pilot's operating handbook (POH) and company operating procedures</p> <p>1.2 Asymmetric operations for all phases of flight are anticipated and contingencies are planned</p> <p>1.3 Plan of action is self-briefed or briefed to crew members to ensure safest outcome in asymmetric operations</p> |
| 2 Manage engine failure/malfunction in flight | <p>2.1 Control of aeroplane is maintained and/or regained during implementation of emergency response procedures</p> <p>2.2 Failed/malfunctioning engine is identified and confirmed</p> <p>2.3 Power set on serviceable engine/s and aeroplane configuration is adjusted to achieve desired aeroplane performance</p> <p>2.4 Failed/malfunctioning engine is managed</p> <p>2.5 Indicated airspeed is maintained above minimum controllable airspeed (V_{mca})</p> <p>2.6 Air traffic control (ATC) or another agency capable of assistance is advised of situation and intentions</p> <p>2.7 Recovery or diversion to appropriate aerodrome is evaluated and conducted</p> |
| 3 Manage engine failure/malfunction after take-off | <p>3.1 Engine failure/malfunction is managed after take-off while control of aircraft flight path is maintained</p> <p>3.2 Initial climb not less than best engine out angle of climb speed (V_X) or best engine out rate of climb speed (V_Y) until clear of obstacles, then V_Y is maintained</p> <p>3.3 Recovery or diversion to appropriate aerodrome is evaluated and conducted</p> |
| 4 Perform rejected take-off | <p>4.1 Take-off is aborted prior to speed beyond which take-off can no longer be safely aborted (V₁) or at a decision point during take-off where abort procedure can be</p> |

- initiated and aeroplane stopped on remaining runway/stopway
- 4.2 Power is reduced smoothly and promptly
 - 4.3 Spoilers, prop fine/reverse, thrust reverse, wheel brakes and other drag and braking devices are activated
 - 4.4 Positive control is maintained to bring aeroplane to a safe stop
 - 4.5 Engine failure procedures and/or checklists are initiated and completed
- 5 Manage engine failure/malfunction during approach/landing**
- 5.1 Control of aeroplane flight path is maintained during implementation of emergency response procedures
 - 5.2 Engine inoperative approach is performed
 - 5.3 Decision is made to continue or abort approach/landing
 - 5.4 Decision height for landing is nominated
 - 5.5 ATC or other agency capable of providing assistance is advised of situation and intentions
 - 5.6 Smooth, positively-controlled flight profile is flown, from which a controlled landing could be achieved
 - 5.7 Positive directional control is maintained and cross-wind corrections are applied during after-landing roll while maintaining centreline within tolerances
 - 5.8 Spoilers, prop reverse, thrust reversers, wheel brakes, and other drag or braking devices are applied to bring airplane to a safe stop after landing
- 6 Conduct go-around or missed approach with engine failure**
- 6.1 Engine failure in a multi-engine aeroplane during a go-around or missed approach is identified and confirmed
 - 6.2 Control of aeroplane flight path is maintained during implementation of emergency response procedures
 - 6.3 Engine inoperative go-around is performed from decision height

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5023 Operate a multi-engine aeroplane.

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0072 Operate a multi-engine aeroplane

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeroplane aeronautical knowledge
- applying relevant air safety practices and regulations
- applying relevant legislation and workplace procedures
- calculating accelerate/stop distance
- calculating fuel flow and true airspeed with one engine inoperative
- calculating initial rate of climb and climb gradient for one engine inoperative after take-off
- calculating point no return (PNR) and equi time point (ETP)/critical point (CP) for one engine inoperative with maximum fuel
- calculating the speed beyond which take-off can no longer be safely aborted (V1) for any specified take-off conditions
- communicating effectively with others
- completing relevant documentation
- controlling and managing aeroplane during flight with failed engine/s in accordance with the aircraft flight manual (AFM)/pilot's operating handbook (POH)
- determining if range of aeroplane increases or decreases following an engine failure
- extracting, calculating and applying all performance information applicable to aeroplane
- identifying and correctly using equipment required to operate a multi-engine fixed wing aeroplane
- identifying critical/malfunctioning engine correctly
- identifying, and managing emergency and abnormal situations while maintaining control of the aeroplane
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- maintaining compliance with relevant regulatory requirements
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action

- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- setting priorities and managing workload to ensure safe task completion in the time available
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- airspeed limitations, including:
 - velocity normal operations – V_{no}
 - velocity acceleration – V_a
 - velocity best angle of climb – V_x
 - velocity best rate of climb – V_y
 - velocity never exceed – V_{ne}
 - maximum flap extended speed – V_{fe}
 - velocity landing gear operations – V_{lo}
 - velocity landing gear extended – V_{le}
 - velocity landing gear down – V_{lo2}
 - maximum cross-wind
 - turbulence penetration speed
 - maximum load factor
- conditions that would increase take-off decision speed
- emergency airspeeds, including:
 - velocity minimum control speed – V_{mca}
 - velocity safe single engine – V_{sse}
 - engine/s inoperative climb
 - approach and final speed
 - emergency descent
 - best glide range speeds
- emergency procedures, including:

- engine failure after take-off
- engine fire on the ground and airborne
- engine failure in the cruise
- waste gate failure
- propeller/turbine over-speed
- in a Defence context, relevant Defence Orders and Instructions
- markings on airspeed indicator that apply to failed engine operations
- methods of regaining control of an aeroplane with a failed engine that is flying at a speed less than V_{mca}
- normal and cross-wind take-off and landing procedures, including:
 - climb
 - cruise
 - descent procedures, including, airspeeds, configurations and method of drift allowance
 - setting of flight instruments
 - abnormal/emergency procedures
- other abnormal or emergency items as contained in the AFM/POH
- performance the aeroplane can achieve after reaching best rate of climb (V_y) or take off safety speed V_2 during asymmetric flight
- power, flight and configuration requirements that apply to V_{mca}
- relevant sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders
- relevant WHS procedures and regulations
- safety implications of asymmetric flight below V_{mca}
- technique and procedure for carrying out a rejected take-off after engine/system/s failure/warnings, including related safety factors
- techniques and procedures used during engine failure on take-off, appropriate reference airspeeds, and specific pilot actions required
- techniques and procedures used to conduct an asymmetric go-around or missed approach during engine failure on take-off, appropriate reference airspeeds and specific pilot actions required.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0073 Operate aircraft in the traffic pattern at night

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the application of skills and knowledge required to operate an aircraft in the traffic pattern at night in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes controlling aircraft on the ground, activating pilot activated lighting (PAL) and taking off at night. It also includes managing emergency situations at night, performing a go-around, and landing at night, with and without the use of aircraft landing lights.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Control aircraft on the ground	<p>1.1 Instrument and cockpit lighting are adjusted to an appropriate level for taxiing</p> <p>1.2 Air traffic control (ATC) instructions and manoeuvres of an aircraft on the ground at night within the approved movement area as defined by aerodrome ground lighting, are complied with</p> <p>1.3 Aircraft lighting to identify obstructions, other aircraft, and taxiway and runway limits is used as required</p> <p>1.4 Aircraft is taxied at a speed that allows for an adequate lookout to be maintained to avoid obstructions</p>
2 Activate PAL	<p>2.1 Appropriate radiotelephone frequency is utilised to activate PAL system when within radio range</p> <p>2.2 PAL system is activated using appropriate transmit sequence</p> <p>2.3 Wind indicator lighting is monitored to determine end of activation period</p>
3 Take off at night	<p>3.1 Aircraft is lined up correctly in centre of runway in take-off direction</p> <p>3.2 Line-up checks appropriate to night take-off are completed</p> <p>3.3 Take-off by reference to flare path/runway lighting and aircraft instruments is executed</p> <p>3.4 Aircraft is rotated at manufacturer recommended speed</p> <p>3.5 Aircraft control and climb attitude is completed solely by reference to instruments</p> <p>3.6 Alignment with runway by visual reference and lookout is established and maintained</p> <p>3.7 Post-departure checks are performed at a safe height after take-off</p>
4 Manage emergency situations at night	<p>4.1 Control of aircraft flight path is maintained during implementation of emergency response procedures</p>

- | | | |
|----------|---|---|
| | 4.2 | Emergency situation is managed in accordance with the aircraft flight manual (AFM), pilot's operating handbook (POH) and aeronautical information publication (AIP) |
| | 4.3 | Electrical lighting and power sources are monitored |
| | 4.4 | Electrical lighting and power source emergency procedures are implemented as required |
| 5 | Perform a go-around | |
| | 5.1 | Need to conduct a go-around is recognised |
| | 5.2 | Go-around is performed from any point on base and final approach legs |
| 6 | Land at night, with and without the use of aircraft landing lights | |
| | 6.1 | Circuit entry and pattern are performed with reference to runway environment |
| | 6.2 | Safe altitude is maintained by reference to aircraft instruments and runway lighting |
| | 6.3 | Aircraft is safely landed at night with and without landing lights |
| | 6.4 | After landing checks are performed |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5024 Operate aircraft in the traffic pattern at night.

Links

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0073 Operate aircraft in the traffic pattern at night

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using equipment required while operating an aircraft in the traffic pattern at night
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritise work
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- utilising fault finding for system failures
- utilising secondary lighting and power sources
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to night visual flight operations
- causes that may aggravate vestibular disorientation, including:
 - somatogravic illusions
 - somatogyral illusions and ‘graveyard spiral’
 - coriolis effect
 - leans
- circumstances that aggravate vestibular disorientation and how to overcome them
- colours and patterns of aerodrome lighting, including:
 - permanent threshold light
 - runway threshold identifications lights
 - displaced threshold lighting
 - runway edge lighting
 - runway end lighting
 - runway centreline lighting
 - obstacle lighting
- communications equipment checks
- conditions and causes under which visual illusions may occur, including:
 - false horizons
 - visual-cue illusions
 - relative motion illusions
 - flicker effect
 - black hole illusion
 - autokinesis
- electrical system management as recommended in the applicable aircraft flight manual (AFM)/pilot’s operating handbook (POH)
- fuel tank capacity and range
- human factors and physiological limitations for conducting operations at night
- identification of aerodromes with standby power
- light signals used in the circuit area at night
- method of activating an aerodrome frequency response unit (AFRU) with pilot activated lighting (PAL) options
- method of activating PAL
- night circuit procedures
- night visual flight rules (NVFR) legislation, including:
 - privileges and limitations of the rating
 - minimum NVFR aircraft equipment requirements

- aircraft landing area/helicopter landing site (ALA/HLS) dimension and lighting requirements
- NVFR operations, including:
 - principles of operations, limitations and errors for the radio navigation systems used
 - flight planning/notification requirements, including lower safe altitude (LSALT), weather, fuel and lighting
 - requirements for departure and descent for clearance from terrain
 - alternate aerodrome planning requirements
 - operation of PAL
 - air traffic control (ATC) procedures relevant to NVFR operations
- operation and use of a visual approach slope indicator (VASI) and pilot approach path indicator (PAPI) system
- PAL system warning indications that lights are about to be extinguished
- procedures for operating electronic communications equipment
- requirements for completing relevant documentation
- time that PAL remains illuminated
- vestibular systems, namely the semicircular canals and otoliths, in helping the pilot maintain orientation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

For aircraft in the helicopter category, taking off at night requires the following additional assessment:

- accelerating helicopter in take-off direction on a prescribed track
- recognising and controlling translational lift
- executing take-off by reference to flare path/runway lighting or HLS lighting and aircraft instruments
- applying climb power and adjusting aircraft attitude to maintain climb speed appropriate to obstacle clearance requirements
- aligning helicopter landing gear with planned take-off direction until point at which balanced flight is required
- retracting undercarriage at a safe height and airspeed

- trimming and balancing helicopter.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0074 Perform non-published instrument departure procedures

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to perform non-published instrument departure procedures in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes determining applicable standards for an instrument departure and taking off and climbing to cruising altitude/level under the instrument flight rules (IFR) (non-standard instrument departure [SID]/standard radar departure [SRD]).

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Determine applicable standards for an instrument departure (non-SID/SRD)

1.1 Standard take-off minima are determined in accordance with the aerodrome using aeronautical information publication (AIP)

1.2 Departure is planned to ensure aircraft can maintain obstacle and terrain clearance after take-off and during climb to lowest safe altitude (LSALT)

1.3 Ceiling minima is increased and/or track is planned to ensure terrain clearance is maintained, as required

2 Take off and climb to cruising altitude/level under the IFR (non-SID/SRD)

2.1 Appropriate checklist items are completed and confirmed to ensure aircraft systems applicable to instrument take-off are operating correctly

2.2 Radios, navigation aids and flight instruments are set to desired setting prior to initiating take-off

2.3 Track, altitude requirements and emergency procedures are reviewed and briefed for an instrument departure

2.4 Climb to cruising altitude/level after take-off is achieved

2.5 Obstacle and terrain clearance is maintained below LSALT while intercept track is maintained within five nautical miles (nm) of departure aerodrome

2.6 Transitions from visual meteorological conditions (VMC) to actual or simulated instrument meteorological conditions are performed without loss of aircraft control

2.7 Radio transmissions are performed in accordance with AIP requirements

2.8 Separation from other traffic is maintained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of

competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5027 Perform non published instrument departure procedures.

- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to instrument flight operations
- conditions required to effect at take-off with no meteorological forecast
- content and timing of airborne and departure reports
- non-published instrument departure procedures
- obstacle and terrain clearance requirements after take-off and during the climb to lowest safe altitude (LSALT)
- pilot responsibility in an instrument flight rules (IFR) visual departure
- procedures for abnormal operations and/or emergencies
- procedures for loss of radio communication
- requirement for establishing aircraft on departure track
- take-off minima for single or multi-engine aircraft at aerodromes without suitable instrument departure procedures
- transponder code requirements for the flight.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0075 Perform published instrument departure procedures

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to perform published instrument departure procedures in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes determining applicable standards for an instrument departure using published procedures, and taking off and climbing to cruising level using published procedures (standard instrument departure [SID]/standard radar departure [SRD]).

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Determine applicable standards for an instrument departure using published procedures

- 1.1** Standard take-off minima are determined for the aerodrome in accordance with aeronautical information publication (AIP)
- 1.2** Plan is developed to ensure obstacle clearance requirements for take-off area
- 1.3** Aircraft performance is calculated to ensure minimum design climb gradient of SID or SRD and any additional specified gradients can be achieved

2 Take off and climb to cruising level using published procedures

- 2.1** Appropriate checklist items are completed and confirmed to ensure aircraft systems applicable to instrument take-off are operating correctly
- 2.2** Radios, navigation aids/systems and flight instruments are set to desired setting prior to initiating take-off
- 2.3** Track, altitude requirements and emergency procedures for SID or SRD are reviewed and self-briefed or briefed to flight crew
- 2.4** Climb to cruising altitude/level after take-off is achieved from standard take-off ceiling
- 2.5** Obstacle and terrain clearance is maintained while below lowest safe altitude (LSALT)/minimum safe altitude (MSA) to intercept track in accordance with SID or SRD requirements
- 2.6** Transitions from visual meteorological conditions (VMC) to actual or simulated instrument meteorological conditions are performed without loss of aircraft control
- 2.7** Radio transmissions are performed in accordance with AIP requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5028 Perform published instrument departure procedures.

Assessment Requirements for AVIY0075 Perform published instrument departure procedures

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- calculating ceiling and visibility minima for circling approach
- communicating effectively with others
- completing relevant documentation
- determining circling area applicable to aircraft performance category being flown
- determining obstacle clearance requirements in circling area
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting instrument approach charts
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing systematic scan techniques
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- conditions required to affect a take-off with no meteorological forecast
- pilot responsibilities if SID or SRD tracking and performance requirements cannot be met
- pilot responsibilities when SID or SRD clearance is given or cancelled
- procedures for abnormal operations and/or emergencies during SID, including navigation aid failure
- procedures for loss of radio communication during SID or SRD
- radio report requirements to be made in SID or SRD
- SID and SRD procedures and limitations
- SID and SRD tracking and performance requirements, and flight parameters assumed of aircraft
- take-off minima for single and twin-engine aircraft for aerodromes with relevant instrument approach procedures.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0076 Perform visual circling approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to perform a visual circling approach in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes determining minima applicable for visual circling for specified instrument approaches, conducting visual circling procedure following instrument approach using appropriate visual cues, and conducting a missed approach from visual circling.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Determine minima applicable for visual circling for specified instrument approach

1.1 Requirement to conduct a circling approach in accordance with aeronautical information publication (AIP) is determined

1.2 Ceiling and visibility minima are determined for circling approach appropriate for instrument approach procedure and category of aircraft being used in accordance with applicable instrument approach charts

2 Conduct visual circling procedure following instrument approach, using appropriate visual cues

2.1 Circling procedures are planned and briefed in relation to runway position relative to aircraft as it will appear to pilot when approaching minima

2.2 Circling approach is conducted in accordance with AIP

2.3 Aircraft is controlled and maintained within altitude limitations by reference to instruments

2.4 Aircraft position is controlled and maintained using visual cues

2.5 Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility or terrain

3 Conduct missed approach from visual circling

3.1 Conditions requiring a missed approach are recognised and missed approach procedure is initiated

3.2 Aircraft is manoeuvred to missed approach point (MAPt) and a missed approach procedure is conducted in accordance with applicable instrument approach chart

3.3 Obstacle clearance in instrument meteorological conditions (IMC) is maintained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5033 Perform visual circling approach.

Links

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0076 Perform visual circling approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- calculating ceiling and visibility minima for circling approach
- communicating effectively with others
- completing relevant documentation
- determining circling area applicable to aircraft performance category being flown
- determining obstacle clearance requirements in circling area
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting instrument approach charts
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing systematic scan techniques
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- briefing requirements for a circling approach
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to instrument flight operations
- conditions under which a circling approach must be discontinued and a missed approach initiated
- emergency procedures
- how to calculate ceiling and visibility minima for a circling approach
- how to determine circling area applicable to aircraft performance category being flown
- how to determine minima applicable for visual circling for specified instrument approaches
- how to determine obstacle clearance requirements in circling area
- procedure to conduct a missed approach from any nominated point within circling area on a specified approach
- procedures for adjusting controls to optimise equipment operation
- recall when an aircraft may descend below the minimum descent altitude (MDA) by day and night
- relevant sections of national and state/territory regulatory requirements and codes of practice
- relevant WHS and environmental procedures and regulations
- requirements for completing relevant documentation.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0077 Conduct a 2D non-directional beacon instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct a 2D instrument approach using the non-directional beacon (NDB) procedure in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes selecting approach and determining applicable minima and monitoring aid signal integrity. It also includes conducting initial approach, holding pattern, instrument approach and missed approach procedures.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Select approach and determine applicable minima

1.1 Current instrument approach and landing (IAL) chart for the NDB approach to be flown is selected

1.2 IAL is reviewed and briefed to flight crew in relation to directing entry to the approach, lowest safe altitude (LSALT) or minimum safe altitude (MSA) is maintained prior to entry and tracks, distances, timing and descent limitations are maintained for the approach

1.3 Fuel availability and latest divert time procedures are enacted as required

2 Monitor aid signal integrity

2.1 NDB to be used for selected approach is tuned and identified

2.2 Morse code identification and NDB indications are monitored throughout selected approach to ensure signal integrity

3 Conduct initial approach

3.1 Altimeter is set to appropriate QNH

3.2 Aircraft is manoeuvred to holding fix on an inbound track and at or above route MSA or LSALT is maintained in accordance with aeronautical information publication (AIP) requirements, using the NDB

4 Conduct holding pattern

4.1 Aircraft holding pattern from the holding fix at or above LSALT or MSA is entered in accordance with specified sector entry

4.2 Holding pattern is performed in accordance with AIP, using the NDB

5 Conduct instrument approach procedure

5.1 Altimeter QNH is updated and set prior to approach commencement

5.2 Instrument approach is conducted in accordance with tolerances specified in AIP using the NDB

5.3 Landing runway is identified

5.4 After establishing visual reference, a visual circling or

runway approach is conducted for a landing on selected runway in accordance with AIP

6 Conduct missed approach procedure

- 6.1** Conditions requiring a missed approach are recognised and missed approach is initiated
- 6.2** Aircraft is manoeuvred to missed approach point (MAPt)
- 6.3** Missed approach procedure is conducted in accordance with the IAL chart
- 6.4** Obstacle clearance in instrument meteorological conditions (IMC) is maintained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5034A Perform non-directional beacon (NDB) instrument approach.

Assessment Requirements for AVIY0077 Conduct a 2D non-directional beacon instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- determining conditions permitting descent below minima
- determining non-directional beacon (NDB) approach procedure applicable minima for aircraft
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting NDB instrument approach procedure chart
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing systematic scan techniques
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- 2D instrument approach procedures and limitations, including:
 - initial approach
 - holding pattern
 - instrument approach procedure
 - missed approach procedures
 - instrument approach procedures and limitations
- abnormal operations and/or emergency procedures for an NDB approach, including navigation aid failure
- aid signal integrity monitoring techniques
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards Schedule (MOS) 3 Aeronautical Knowledge relevant to instrument flight operations
- emergency procedures
- how to operate electronic communications equipment
- loss of radio communication during an NDB approach procedure
- minimum obstacle clearance criteria during an NDB approach procedure/missed approach procedure
- procedure for joining the circuit from an NDB approach procedure
- procedures for adjusting controls to optimise equipment operation
- procedures for managing and controlling hazardous situations
- radio procedures for an NDB approach
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- relevant sections of national and state/territory regulatory requirements and codes of practice
- relevant WHS and environmental procedures and regulations
- requirements for completing relevant documentation
- sector entry joining procedures for entering the holding pattern of an NDB approach
- sources of information on differences in equipment and related standard operating and servicing procedures
- steps involved in planning work activities
- tracking tolerance and altitude limitations for flying a published distance measuring equipment (DME) arc of an NDB approach procedure.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory

requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0078 Conduct a 2D very high frequency omni-directional radio range instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct a 2D instrument approach using the very high frequency (VHF) omni-directional radio range (VOR) or VOR/distance measuring equipment (DME) approach procedure in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes selecting approach and determining applicable minima, and monitoring aid signal integrity. It also includes conducting initial approach, holding pattern, instrument approach and missed approach procedures.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Select approach and determine applicable minima

1.1 Current instrument approach and landing (IAL) chart for the VOR approach to be flown is selected

1.2 IAL is reviewed and briefed to flight crew in relation to directing entry to the approach, lowest safe altitude (LSALT) or minimum safe altitude (MSA) is maintained prior to entry approach, and tracks, distances, timing and descent limitations are maintained for the approach

1.3 Fuel availability and latest divert time procedures are enacted as required

2 Monitor aid signal integrity

2.1 VOR to be used for selected approach is tuned and identified

2.2 Warning flags and course deviation indicators (CDI) are monitored throughout selected approach to ensure signal integrity

3 Conduct initial approach

3.1 Altimeter is set to appropriate QNH

3.2 Aircraft is manoeuvred to holding fix on an inbound track and at or above route MSA or LSALT is maintained in accordance with aeronautical information publication (AIP) requirements, using the VOR

4 Conduct holding pattern

4.1 Aircraft holding pattern from the holding fix at or above LSALT or MSA is entered in accordance with specified sector entry

4.2 Holding pattern is performed in accordance with AIP, using the VOR

5 Conduct instrument approach procedure

5.1 Altimeter QNH is updated and set prior to approach commencement

5.2 Instrument approach is conducted in accordance with tolerances specified in AIP using the VOR or VOR/DME

- 5.3 Landing runway is identified
- 5.4 After establishing visual reference, a visual circling or runway approach is conducted for a landing on selected runway, in accordance with AIP
- 6 **Conduct missed approach procedure**
 - 6.1 Conditions requiring a missed approach are recognised and missed approach is initiated
 - 6.2 Aircraft is manoeuvred to missed approach point (MAPt)
 - 6.3 Missed approach procedure is conducted in accordance with the IAL chart
 - 6.4 Obstacle clearance in instrument meteorological conditions (IMC) is maintained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5035A Perform VHF omni-directional radio range (VOR) instrument approach.

AVIY0079 Conduct a 3D instrument landing system instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct a 3D instrument approach using instrument landing system (ILS) procedures in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes selecting and preparing for approach, and monitoring aid signal integrity. It also includes conducting initial approach, holding pattern, approach and missed approach procedures.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Select and prepare for the approach

- 1.1** Current instrument approach and landing (IAL) chart for the ILS approach to be flown is selected
- 1.2** Navigation system validity and receiver autonomous integrity monitoring (RAIM)/space-based augmentation system (SBAS) checks are conducted as required
- 1.3** Instrument approach and missed approach procedure is planned and self-briefed or briefed to flight crew as required
- 1.4** Direct entry to the approach is reviewed, briefed to flight crew and evaluated
- 1.5** Entry via holding pattern is reviewed, briefed to flight crew and evaluated
- 1.6** Minimum altitude, lowest safe altitude (LSALT) or minimum safe altitude (MSA) prior to approach entry is reviewed and briefed to flight crew in relation to tracks, distances, timing and descent limitations
- 1.7** Applicable approach minima for aircraft performance category and runway to be used is selected
- 1.8** Pressure error correction for decision altitude (DA) is selected
- 1.9** Holding or diversion action if visual reference is not established, is reviewed and briefed
- 1.10** Fuel availability and latest divert time is selected as required
- 1.11** Aircraft systems are configured for approach and altimeter is set to appropriate QNH

2 Monitor aid signal integrity

- 2.1** ILS to be used for selected approach is tuned and identified
- 2.2** Warning flags and course deviation indicators (CDI) for localiser (LLZ) and glide slope is monitored throughout the approach to ensure signal integrity
- 2.3** Locator beacons for approach are tuned and identified

- 2.4 Marker beacon/s are tested and monitored for visual and aural indications during approach
 - 2.5 Distance measuring equipment (DME) is tuned and identified or global navigation satellite system (GNSS) is configured for ILS approach as required
 - 2.6 DME/GNSS is monitored for distance indications during applicable approach
 - 3 **Conduct initial approach**
 - 3.1 Altimeter is set to appropriate QNH
 - 3.2 Holding fix is identified and aircraft is manoeuvred to appropriate sector entry position
 - 4 **Conduct holding pattern**
 - 4.1 Holding pattern at or above LSALT or MSA is entered in accordance with specified sector entry
 - 4.2 Holding pattern is performed in accordance with instructions in aeronautical information publication (AIP), using the LLZ and any other navigation aids
 - 5 **Conduct approach procedure**
 - 5.1 Aircraft is tracked to initial approach fix using appropriate tracking aids or radar vectors at or above route MSA or LSALT, to intercept the LLZ track
 - 5.2 ILS approach is conducted from initial approach fix with tracking by reference to LLZ and descent by reference to glide path
 - 5.3 Marker beacons, DME/GNSS or approved alternative fix are used to provide distance indications
 - 5.4 Specified altitude check on glide slope is performed
 - 5.5 Continued descent on glide slope to the DA is performed in accordance with AIP
 - 5.6 Landing runway is identified
 - 5.7 Runway or circling approach for a landing is conducted in accordance with AIP after visual reference is established
 - 6 **Conduct missed approach procedure**
 - 6.1 Conditions requiring a missed approach are recognised and missed approach is initiated
 - 6.2 Aircraft is manoeuvred to missed approach point (MAPt)

- 6.3 Missed approach procedure is conducted in accordance with the IAL chart
- 6.4 Obstacle clearance in IMC is maintained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5036A Perform instrument landing system (ILS) instrument approach.

Links

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY0079 Conduct a 3D instrument landing system instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- determining conditions permitting descent below minima
- determining instrument landing system (ILS) approach procedure applicable minima for aircraft
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritise work
- interpreting ILS instrument approach procedure chart
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing systematic scan techniques
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or

damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- abnormal operations and/or emergency procedures for an ILS approach, including navigation aid failure
- adjustment to baro determined minima for temperature effect
- automation and flight management system (FMS) management for low-visibility operations
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to instrument flight operations
- contaminated runway operations
- emergency procedures
- equipment redundancy during low-visibility operations
- ILS instrument approach procedures and limitations, including the minimum system components required to conduct an approach
- limitations, errors, warnings and messages of a global navigation satellite system (GNSS)
- loss of radio communication during an ILS approach procedure
- low-visibility operations and environmental limitations
- missed approach procedures for an ILS approach
- principles of operation of a GNSS
- procedure for joining the circuit from an ILS approach
- procedures for adjusting controls to optimise equipment operation
- procedures for managing and controlling hazardous situations
- radio procedures for an ILS approach
- relevant sections of national and state or territory regulatory requirements and codes of practice
- relevant WHS and environmental procedures and regulations
- requirements applicable to pilots and equipment for GNSS operations
- runway markings and lighting
- runway visual range (RVR) versus slant visual range (SVR)
- sector entry joining procedures for entering the holding pattern of an ILS approach
- sources of information on differences in equipment and related standard operating and servicing procedures
- steps involved in planning work activities
- temperature effects on altimeter
- tracking tolerance and altitude limitations for flying a published distance measuring equipment (DME) arc of an ILS approach procedure
- types of approach lighting systems
- use of and precautions for approach slope indicators.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0080 Conduct a 2D distance measuring equipment global navigation satellite system instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct a 2D instrument approach using distance measuring equipment (DME) or global navigation satellite system (GNSS) procedures in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes selecting and preparing for approach, using appropriate tracking aid and distance information, and monitoring aid signal integrity. It also includes conducting approach and missed approach procedures.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Select and prepare for approach

- 1.1** Current instrument approach and landing (IAL) chart for the DME/GNSS approach to be flown is selected
- 1.2** Instrument approach and missed approach procedures are planned
- 1.3** Minimum descent altitude (MDA) is determined
- 1.4** Sector entry to approach and holding pattern is selected, reviewed and briefed to flight crew as appropriate
- 1.5** Minimum altitude, lowest safe altitude (LSALT) or minimum safe altitude (MSA) prior to approach entry, is reviewed and briefed to flight crew in relation to tracks, distances and descent limitations
- 1.6** Applicable approach minima for aircraft performance category and runway to be used, is selected
- 1.7** Holding or diversion action if visual reference is not established, is reviewed and briefed
- 1.8** Fuel availability and latest divert time is selected as required
- 1.9** Altimeter is set to appropriate QNH

2 Use appropriate tracking aid and distance information, and monitor aid signal integrity

- 2.1** DME is tuned and identified
- 2.2** Reference way-point (WPT) for GNSS to be used for tracking inbound, is selected
- 2.3** Distance indication is checked
- 2.4** Approach aid is monitored throughout approach to ensure signal integrity
- 2.5** DME or GNSS is used to provide distance indications for descent via the distance/altitude steps of the

- approach
- 2.6 Availability of receiver autonomous integrity monitoring (RAIM) is ensured before descending below LSALT or MSA
- 3 Conduct approach procedure**
- 3.1 Initial approach is conducted not below the specified limiting altitude for the distance/altitude descent steps
 - 3.2 Arrival procedure is conducted while descending on the specified track or sector in accordance with aeronautical information publication (AIP) requirements
 - 3.3 Landing runway is identified
 - 3.4 Runway or circling approach for a landing is conducted after visual reference is established
- 4 Conduct missed approach procedure**
- 4.1 Conditions requiring a missed approach are recognised and missed approach is initiated
 - 4.2 Aircraft is manoeuvred to missed approach point (MAPt)
 - 4.3 Missed approach procedure is conducted in accordance with the IAL chart
 - 4.4 Obstacle clearance in instrument meteorological IMC is maintained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5037A Perform distance measuring equipment (DME)/global positioning system (GPS) arrival.

Assessment Requirements for AVIY0080 Conduct a 2D distance measuring equipment global navigation satellite system instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- determining conditions permitting descent below minima
- determining distance measuring equipment (DME) or global navigation satellite system (GNSS) arrival applicable minima for aircraft
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting a DME or GNSS arrival chart
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing systematic scan techniques
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- working collaboratively with others

- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- abnormal operations and/or emergencies during a DME or GNSS arrival, including:
 - navigation aid failure
 - loss of GNSS receiver autonomous integrity monitoring (RAIM)
 - GNSS RAIM warning
 - disparity between very high frequency (VHF) omni-directional radio range (VOR)/non-directional beacon (NDB) track and GNSS track indication
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to instrument flight operations
- cause and magnitude of typical GNSS errors
- conditions and limitations for manoeuvring within a DME or GNSS arrival sector
- conditions required to transition to and operate in the mode of operation for a GNSS/non-precision approach (NPA), and associated course deviation indicator (CDI) sensitivity and RAIM protection provided
- DME or GNSS arrival missed approach
- DME or GNSS arrival procedures and limitations in all classes of airspace
- effect of each type of RAIM prediction on operational requirements
- effects of availability or otherwise of barometric altimeter-aiding on RAIM availability and prediction
- effects of satellite unavailability on reliability of each type of prediction
- emergency procedures
- factors that adversely affect the conduct of a GNSS/NPA, and suitable pilot procedures to minimise such effects
- GNSS operating procedures for navigation tasks
- GNSS operational and serviceability checks
- GNSS system fundamentals and principles of operations
- GNSS warnings and messages
- human factors limitations associated with using GNSS equipment
- loss of radio communication during a DME or GNSS arrival procedure
- minimum obstacle clearance criteria during a DME or GNSS arrival missed approach procedure
- mode of operation required during each segment of a GNSS/NPA
- operating procedures for GNSS equipment that reduce or eliminate errors
- operating procedures that provide safeguards against GNSS navigational errors
- operation of electronic communications equipment
- operational requirements that apply to planning a flight on the basis of conducting a area navigation (RNAV) (GNSS) procedure at the destination

- parameters applicable to RAIM warnings in the en route, terminal and approach modes
- pilot responsibilities when DME or GNSS arrival is conducted outside controlled airspace
- prediction limitations that apply to availability of approach RAIM at the destination or alternate aerodrome
- procedure for joining the circuit from a DME or GNSS arrival
- procedures for adjusting controls to optimise equipment operation
- procedures for managing and controlling hazardous situations
- radio procedures for a DME or GNSS arrival
- relevant sections of national and state/territory regulatory requirements and codes of practice
- relevant WHS and environmental procedures and regulations
- requirements applicable to pilots and equipment for GNSS operations
- requirements for completing relevant documentation
- sources of information on differences in equipment and related standard operating and servicing procedures
- steps involved in planning work activities
- tracking tolerances, automatic way-point sequencing, CDI sensitivity and RAIM availability parameters for entry, RAIM availability and approach segments.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0081 Conduct a 2D global navigation satellite system non-precision instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to conduct a 2D instrument approach using global navigation satellite system (GNSS) or non-precision approach (NPA) procedures in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes selecting approach and determining minima; selecting, retrieving and activating the approach from a database; and monitoring GNSS signal integrity. It also includes conducting initial approach, conducting holding patterns, conducting approach procedure and conducting missed approach procedure.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Select approach and determine applicable minima

- 1.1** Current instrument approach and landing (IAL) chart for GNSS/NPA approach to be flown is selected
- 1.2** Entry to and conduct of instrument approach and missed approach procedure are reviewed and briefed to flight crew
- 1.3** Currency of GNSS receiver database is confirmed
- 1.4** Applicable meteorological minima of approach for aircraft performance category is determined
- 1.5** Fuel availability and holding or diversion action if visual reference is not established, is reviewed and briefed to flight crew

2 Select, retrieve and activate approach from database

- 2.1** GNSS approach for appropriate runway from GNSS receiver navigation database, is selected
- 2.2** Initial approach fix to be used to transition approach procedure is selected
- 2.3** Aerodrome altimeter subscale setting to obtain elevation or altitude (QNH) in GNSS receiver is entered and approach activated
- 2.4** Confidence check of tracks and distances between approach way-point (WPT) as calculated by the GNSS receiver is performed
- 2.5** Course deviation indicators (CDI) are checked and selected to GNSS as required

3 Monitor GNSS signal integrity

- 3.1** Receiver autonomous integrity monitoring (RAIM) is checked for availability on the approach
- 3.2** RAIM indications are monitored throughout the approach

4 Conduct initial approach

- 4.1** Altimeter is set to appropriate QNH

- 4.2 Track to initial approach WPT is maintained at or above route minimum safe altitude (MSA) or lowest safe altitude (LSALT)
- 5 **Conduct holding pattern**
 - 5.1 Automatic sequencing of GNSS is suspended
 - 5.2 Published holding pattern is conducted at appropriate initial approach WPT using prescribed sector entry procedure
 - 5.3 Automatic sequencing is resumed to continue approach
- 6 **Conduct approach procedure**
 - 6.1 GNSS/NPA instrument approach is conducted while descending on specified track to each approach WPT
 - 6.2 Approach altitude restrictions are complied with
 - 6.3 GNSS receiver transitions to approach mode is confirmed no later than the final approach point (FAP), WPT or discontinue approach
 - 6.4 Secondary navigation aid is utilised to maintain situational awareness
 - 6.5 Descent to not below the minimum descent altitude (MDA) while tracking to the missed approach point, is conducted within tolerances
 - 6.6 Landing runway is identified
 - 6.7 Runway or circling approach for landing is conducted after visual reference is established
- 7 **Conduct missed approach procedure**
 - 7.1 Conditions requiring a missed approach are recognised and missed approach is initiated
 - 7.2 Published missed approach procedure is executed if visual reference is not established before reaching the MAPt or RAIM
 - 7.3 Missed approach is conducted on any other event specified in aeronautical information publication (AIP) or GNSS operations manual
 - 7.4 Aircraft is manoeuvred to MAPt
 - 7.5 Missed approach mode is selected
 - 7.6 Missed approach procedure is conducted in accordance

with IAL chart

- 7.7 GNSS receiver is configured to conduct another approach or to hold or divert as required
- 7.8 Obstacle clearance in instrument meteorological conditions (IMC) is maintained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5038A Perform global positioning system (GPS)/non-precision approach (NPA).

Assessment Requirements for AVIY0081 Conduct a 2D global navigation satellite system non-precision instrument approach

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying global navigation satellite system (GNSS) operating procedures to typical navigation tasks
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- determining conditions permitting descent below minima
- determining GNSS/non-precision approach (NPA) procedure applicable minima for aircraft
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting GNSS/NPA instrument approach procedure chart
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring GNSS signal integrity
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing systematic scan techniques
- predicting availability of approach RAIM at the destination or alternate aerodrome
- predicting RAIM availability at destination and estimated time of arrival (ETA) using aircraft GNSS receiver and, as required, an external RAIM prediction service
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards

- selecting, retrieving and activating approach from database
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to instrument flight operations
- cause and magnitude of typical GNSS errors
- conditions required to transition to and operate in the mode of operation for a GNSS/NPA, and the associated course deviation indicator (CDI) sensitivity and RAIM protection provided
- effect of each type of RAIM prediction on operational requirements
- effects of availability or otherwise of baro-aiding on RAIM availability and prediction
- effects of satellite unavailability on reliability of each type of prediction
- emergency procedures
- factors that adversely affect the conduct of a GNSS/NPA and suitable pilot procedures to minimise such effects
- GNSS operating procedures for navigation tasks
- GNSS operational and serviceability checks
- GNSS system fundamentals and principles of operations
- GNSS warnings and messages
- GNSS/NPA instrument approach procedure chart
- human factors limitations associated with using GNSS equipment
- mode of operation required during each segment of a GNSS/NPA
- operating electronic communications equipment
- operating procedures for GNSS equipment that reduce or eliminate errors
- operating procedures that provide safeguards against GNSS navigational errors
- operational requirements that apply to planning a flight on the basis of conducting a required area navigation (RNAV) (GNSS) procedure at the destination
- parameters applicable to RAIM warnings in en route, terminal and approach modes
- prediction limitations that apply to availability of approach RAIM at the destination or alternate aerodrome
- procedures for adjusting controls to optimise equipment operation
- procedures for managing and controlling hazardous situations
- relevant sections of national and state/territory regulatory requirements and codes of practice
- relevant WHS and environmental procedures and regulations
- requirements applicable to pilots and equipment for GNSS operations

- requirements for completing relevant documentation
- sources of information on differences in equipment and related standard operating and servicing procedures
- steps involved in planning work activities
- tracking tolerances, automatic way-point sequencing, CDI sensitivity and RAIM availability parameters for entry, RAIM availability and approach segments.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY0082 Operate a multi-engine helicopter

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to operate a multi-engine helicopter in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes operating a multi-engine helicopter in all phases of flight, managing engine failures and malfunctions, performing a rejected take-off with engine failure, and conducting a go-around or missed approach with an engine failure.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Operate a multi-engine helicopter in all phases of flight

- 1.1** Normal multi-engine helicopter operations on-ground and in-flight are conducted in accordance with workplace procedures and the aircraft flight manual (AFM)/pilot's operating handbook (POH)
- 1.2** Single engine operations contingencies for all phases of flight are anticipated and planned for
- 1.3** Single engine operations contingency plan is briefed to crew members as required

2 Manage engine failure/malfunction

- 2.1** Control of helicopter is maintained and/or regained
- 2.2** Failed/malfunctioning engine is identified and confirmed
- 2.3** Power set on serviceable engine/s and helicopter configuration is adjusted to achieve desired aircraft performance
- 2.4** Failed/malfunctioning engine is managed
- 2.5** Decision to continue or abort approach/landing is made
- 2.6** Decision height for landing is nominated
- 2.7** Indicated airspeed is maintained at or above minimum level flight speed for one inoperative engine
- 2.8** Air traffic control (ATC) or another agency capable of assistance is advised of situation and intentions
- 2.9** Flight profile is flown from which a controlled landing could be achieved
- 2.10** Recovery to a suitable landing site is evaluated and conducted

3 Perform rejected take-off with engine failure

- 3.1** Requirement for a rejected take-off is recognised
- 3.2** Rejected take-off procedures are implemented
- 3.3** Contingency power on remaining engine/s is applied as required

- | | | |
|----------|------------|--|
| | 3.4 | Controlled landing in rejected take-off distance available is performed |
| 4 | 4.1 | Requirement for a go-around or missed approach is identified and confirmed |
| | 4.2 | Control of helicopter is maintained and/or regained |
| | 4.3 | Engine inoperative go-around is performed from decision height |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5065 Operate a multi-engine helicopter.

Assessment Requirements for AVIY0082 Operate a multi-engine helicopter

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant air safety practices and regulations
- applying relevant helicopter aeronautical knowledge
- communicating effectively with others
- completing relevant documentation
- controlling and managing aircraft during flight with failed engine/s
- extracting, calculating and applying all performance information applicable to aircraft
- following relevant legislation and workplace procedures
- identifying and correctly using relevant equipment
- identifying and managing emergency and abnormal situations while maintaining control of aircraft
- identifying critical or malfunctioning engine correctly
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- maintaining compliance with relevant regulatory requirements
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- setting priorities and managing workload to ensure safe task completion in time available

- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- aircraft performance limitations
- aircraft systems, including:
 - fuel system
 - hydraulic system
 - electrical system
 - oil system
 - stability augmentation, automatic flight control systems (AFCS) and flight director system (FDS)
 - anti-icing and de-icing systems
 - heating and ventilation systems
 - pitot and static system
 - fire extinguisher system
 - engine systems
 - transmission and rotor systems
 - display systems
 - landing gear (fixed or retractable)
- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Schedule 3 Aeronautical Knowledge relevant to multi-engine helicopter operations
- climb performance, hover out of ground effect and height-velocity diagram charts
- climb, cruise, descent procedures, including airspeeds, configurations, method of drift allowance, setting of flight instruments and non-normal/emergency procedures
- compressor speed (N1) and torque split indications
- corrective action to be taken when engine run-up or run-down has been diagnosed
- emergency procedures, including:
 - engine failure in hover
 - engine failure during taxiing
 - engine failure during transitions before and after take-off
 - engine failure in cruise
 - engine failure on final approach before and after landing
 - engine fire on the ground and airborne
 - electrical fire on the ground and airborne
 - cabin fire in flight
- engine, transmission and any other stated operating limits in the aircraft flight manual (AFM)

- equi-time point (ETP) for one engine inoperative
- failed engine operations
- general aircraft data
- how to identify malfunctioning governor in flight and manage the related engine
- in a Defence context, relevant Defence Orders and Instructions
- initial rate of climb and climb gradient for one engine inoperative for specified conditions
- key hazards, typical causal factors and contributing operational situations, avoidance and recognition of symptoms and recovery techniques, including:
 - vortex ring state
 - ground resonance
 - loss of tail rotor effectiveness (LTE)
 - low 'g' and mast bumping
 - overpitching or low rotor revolutions per minute (RRPM)– rotor stall
 - retreating blade stall
 - recirculation
 - dynamic rollover
- low speed wind limits
- make, type and model of helicopter, designation of engines, take-off and rated power
- markings on the performance instruments that apply to failed engine operations
- normal and take-off/landing procedures
- point of no return (PNR) for one engine inoperative
- range of aircraft increases or decreases following an engine failure
- relevant sections of CASRs and Civil Aviation Orders
- relevant WHS and environmental procedures and regulations
- rotor speed (RRPM) limits (Power ON and Power OFF)
- stated airspeed limitations, including:
 - velocity never exceed – Vne (at varying all up weights (AUW) and density altitudes)
 - velocity maximum level flight – Vh
 - configuration airspeed limit
 - velocity landing operations – Vlo
 - velocity turbulence penetration – Vturb
 - maximum cross-wind
- slope landing limitations
- take-off and landing topics, including:
 - continuing and rejected take-off distances
 - take-off decision point
 - landing decision point
- technique and procedures for carrying out a rejected take-off after engine/system/s failure/warnings, including related safety factors
- technique and procedures used during engine failure on take-off, appropriate reference airspeeds, and specific pilot actions required

- technique and procedures used to conduct a go-around or missed approach during engine failure on take-off, appropriate reference airspeeds and specific pilot actions required
- weight and balance topics, including:
 - weight, balance and performance
 - permissible take-off weight
 - maximum gross weight, landing weight, ramp weight and zero fuel weight
 - centre of gravity position for any specified conditions
 - centre of gravity limitations
 - appropriate charts to determine centre of gravity
 - calculated centre of gravity position and confirmation it is within limits.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIY4057 Perform helicopter deck landing operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to perform helicopter deck landing operations, in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority and national operating standards.

It includes planning deck landing operations, conducting pre-flight briefings for deck landing operations, and taking off and transiting to and from a vessel. It also includes approaching and landing on vessel helidecks, taking off and climbing out from vessel helidecks, and managing abnormal and emergency situations during deck landing operations.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew, and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Use for Defence Aviation is to be in accordance with relevant Defence Orders, Instructions, Publications and Regulations.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan deck landing operations

- 1.1 Tasking requirements are identified
- 1.2 Crew, role equipment and safety equipment necessary to ensure safe achievement of task are determined
- 1.3 Helicopter is certified for task in accordance with regulations and workplace procedures
- 1.4 Outbound and return flight loading and flight routes are planned
- 1.5 Security and care of passengers and/or equipment for deck landing operations are planned

2 Conduct pre-flight briefings for deck landing operations

- 2.1 Flight/ground crews and other relevant stakeholders are briefed on allocated duties
- 2.2 Weather suitability is determined and confirmed against workplace procedures and limitations
- 2.3 Briefs/self-briefs for deck landing operations are performed

3 Take off and transit to and from vessel

- 3.1 Appropriate take-off and departure configurations are selected
- 3.2 Helicopter is navigated to the rendezvous
- 3.3 Information regarding identified vessel's ability to receive aircraft is obtained
- 3.4 Vessel is instructed to manoeuvre to achieve optimum deck conditions for landing
- 3.5 Relative wind, ship pitch and roll information, hover heading and helideck location are obtained and acceptability is confirmed

- 3.6 Pre-descent checks are completed
- 3.7 Descent profile and circuit pattern are determined
- 4 Approach and land on vessel helideck**
 - 4.1 Control manipulation, instrument scan and visual cues are used to manoeuvre aircraft safely during approach and landing
 - 4.2 Night interception of glide slope is carried out as required
 - 4.3 Touch-down point and reference markers are identified and confirmed
 - 4.4 Constant angle approach and landing is performed
 - 4.5 Safe termination of approach and stable hover over helideck is performed
 - 4.6 Helideck landing is performed
- 5 Take off and climb out from vessel helideck**
 - 5.1 Safety and security during deck operations is managed
 - 5.2 Stable hover over deck is established
 - 5.3 Obstacles are identified and avoided
 - 5.4 Instrument take-off under no horizon conditions is performed
 - 5.5 Instrument climb-out procedure is performed
- 6 Manage abnormal and emergency situations during deck landing operations**
 - 6.1 Abnormal and/or emergency situations are identified and confirmed
 - 6.2 Helicopter is controlled to maintain safe flight
 - 6.3 Abnormal or emergency situations are managed in accordance with workplace procedures, and aircraft flight manual (AFM)/pilot's operating handbook (POH)
 - 6.4 Aborted approach from final approach is performed
 - 6.5 Ditching and underwater escape procedures are applied as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4057A Perform helicopter deck landing operations.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY4057 Perform helicopter deck landing operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures
- applying relevant helicopter aeronautical knowledge
- applying reporting procedures for identified problems
- approaching and landing on vessel helideck
- briefing deck landing operational requirements to relevant stakeholders:
 - helideck location and configuration
 - helideck markings
 - vessel configuration
 - obstructions
 - hazards associated with deck landing operations (ship movement, engine salt ingestion, wind direction and velocity, pitch, roll limitations)
 - crash on deck procedures
 - landing and take-off procedures
 - lighting signals
 - marshalling signals
 - aircraft securing procedures
 - communications procedures
 - transit route to and from ship
 - approach and departure procedures
 - ditching procedures
 - emergency situations (e.g. fire, engine/transmission/aircraft system malfunctions)
 - location and operation of survival equipment
 - aircraft evacuation procedures (on ditching)
- communicating effectively with others
- completing relevant documentation

- following relevant legislation and workplace procedures
- identifying and assessing, vertical, horizontal and relative spatial distances in relation to aircraft fuselage, rotor system, mission and/or operational stores and equipment with regard to potential obstacles to flight safety
- identifying and correctly using relevant equipment
- identifying and justifying a decision to operate a helicopter during deck landing operations
- implementing contingency plans
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- interpreting hover performance and power available/power required from graphs/charts
- managing abnormal and emergency situations during deck landing operations:
 - crash on deck
 - ditching procedures (simulated)
 - emergency situations (e.g. fire, engine/transmission/aircraft system malfunctions)
 - fouled/obstructed landing deck
 - loss of communications
 - loss of visual aids or landing references
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- solving problems associated with operating a helicopter during deck landing operations
- using instruments to monitor helicopter performance during deck landing operations
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aircraft evacuation procedures
- aircraft performance calculations (for all phases of flight)
- basic global navigation satellite system (GNSS) principles
- CASR Part 61 Manual of Standards Schedule 3 Aeronautical Knowledge relevant to helicopter operations
- communication procedure and terminology applicable to deck landing operations
- control effectiveness in all phases of flight
- dead-reckoning navigation
- deck landing operational requirements:
 - helideck location and configuration
 - helideck markings
 - vessel configuration
 - obstructions
 - hazards associated with deck landing operations (ship movement, engine salt ingestion, wind direction and velocity, pitch, roll limitations)
 - crash on deck procedures
 - landing and take-off procedures
 - lighting signals
 - marshalling signals
 - aircraft securing procedures
 - communication procedures
 - transit route to and from ship
 - approach and departure procedures
 - ditching procedures
 - emergency situations (e.g. fire, engine/transmission/aircraft system malfunctions)
 - location and operation of survival equipment
 - aircraft evacuation procedures (on ditching)
- diversion considerations and procedures
- effects of excessive vessel movement on aircraft serviceability
- en route GNSS navigation principles
- engine performance checks for helicopter type to be flown
- functions and effects of all aircraft controls and instruments
- hazards that exist when controlling an aircraft during deck landing operations
- helicopter dimensions
- helideck markings
- in a Defence context, relevant Defence Orders and Instructions
- lighting and marshalling signals
- maximum payload and minimum fuel operations
- navigation techniques for extended over-water flights
- operation of night vision devices
- planning and briefing requirements for helicopter deck landing operations

- post flight debriefing techniques
- principles of aerodynamics
- relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- relevant WHS/OHS and environmental procedures and regulations
- survival equipment location and operation
- survival skills post ditching
- vessel movement limitations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

AVIY4061 Perform aerobatic manoeuvres

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to perform aerobatic manoeuvres, in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority and national operating standards.

It includes preparing for aerobatic manoeuvres, performing looping manoeuvres, performing rolling manoeuvres, and performing advanced aerobatic manoeuvring.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew, and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Use for Defence Aviation is to be in accordance with relevant Defence Orders, Instructions, Publications and Regulations.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare for aerobatic manoeuvres

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Operating area within suitable airspace is selected that allows for completing all aerobatic manoeuvres above the authorised minimum altitude
- 1.2 Pre-manoeuve checks are performed and aircraft is configured for aerobatic manoeuvres
- 1.3 Lookout is maintained using a systematic scan technique at a rate determined by traffic density, visibility or terrain

2 Perform looping manoeuvre

- 2.1 Entry airspeed is achieved that will ensure completion of looping manoeuvre
- 2.2 Aircraft is pitched vertically through 360 degrees in balanced flight
- 2.3 Wings are maintained parallel to the earth's horizon while applying positive 'g', without stalling
- 2.4 Alignment with nominated line feature is maintained
- 2.5 Engine, airframe and physiological limitations are complied with
- 2.6 Direction, altitude control and height loss are maintained within prescribed limits, or as appropriate to aircraft type
- 2.7 Safe entry and recovery heights are observed
- 2.8 Exit airspeed/height is achieved at completion of looping manoeuvre

3 Perform rolling manoeuvre

- 3.1 Entry airspeed is achieved that will ensure completion of rolling manoeuvre
- 3.2 Aircraft is rolled from a nominated airspeed around the fore and aft axis through 360 degrees
- 3.3 Direction, altitude control and height loss are maintained within prescribed limits, or as appropriate to aircraft type

- 3.4 Engine, airframe and physiological limitations are complied with
- 3.5 Safe entry and recovery heights are observed
- 4 Perform advanced aerobatic manoeuvre**
 - 4.1 Entry speed for aerobatic manoeuvre is achieved
 - 4.2 Control inputs are applied to achieve advanced aerobatic manoeuvre
 - 4.3 Exit airspeed/height is achieved at completion of advanced aerobatic manoeuvre
 - 4.4 Engine, airframe and physiological limitations are complied with
 - 4.5 Direction, altitude control and height loss are maintained within prescribed limits, or as appropriate to aircraft type
 - 4.6 Safe entry and recovery heights are observed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4061A Perform aerobatic manoeuvres.

Assessment Requirements for AVIY4061 Perform aerobatic manoeuvres

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- achieving entry airspeed for completion of all aerobatic manoeuvres
- adapting to differences in equipment and operating environment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeroplane aeronautical knowledge
- applying unusual attitudes, fully developed and incipient spin and spiral dive recovery techniques
- communicating effectively with others
- compensating for the secondary effects of controls
- completing relevant documentation
- conducting maximum rate turning
- following relevant legislation and workplace procedures
- identifying symptoms of loss of control
- implementing contingency plans
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- maintaining lookout using appropriate systematic scan technique
- managing aircraft energy to achieve safe manoeuvre entry and recovery heights
- manoeuvring aircraft on the buffet
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- observing safe entry and recovery heights for all aerobatic manoeuvres
- operating aircraft within its limitations, achieving optimum performance
- operating electronic communications equipment to required protocol
- performing advanced aerobatic manoeuvring:
 - spin

- incipient spin
- porteous loop
- wing-over
- cuban eight
- roll off the top
- split S
- vertical eight
- lazy eight
- derry turn
- stall turn
- slow loop
- flick (snap) rolls
- hesitation roll
- performing pre-manoevre checks and configuring aircraft for aerobatic manoeuvres
- performing rolling manoeuvres:
 - barrel rolls
 - aileron roll
 - slow rolls
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- recognising approaching maximum performance limitations of aircraft
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and correctly using relevant equipment
- selecting and using required personal protective clothing and equipment conforming to industry and WHS/OHS standards
- selecting operating area within suitable airspace that allows for completion of all aerobatic manoeuvres above the authorised minimum altitude
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- using instruments to monitor aircraft performance
- working collaboratively with others
- working systematically with required attention to detail without injury to self, others or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- advanced aerobatic manoeuvre flight techniques:
 - spin
 - incipient spin
 - porteous loop
 - wing-over
 - cuban eight
 - roll off the top
 - split S
 - vertical eight
 - lazy eight
 - derry turn
 - stall turn
 - slow loop
 - flick (snap) rolls
 - hesitation roll
- 'g' limitations for aircraft being flown
- aerodynamic principles for performing aerobatic manoeuvres
- aircraft limitations for aircraft flown including environmental factors
- CASR Part 61 Manual of Standards Schedule 3 Aeronautical Knowledge relevant to aeroplane aerobatic manoeuvres
- energy management as applied to aerobatic routines
- factors that lead to increased density altitude
- in a Defence context, relevant Defence Orders and Instructions
- maximum rate turn criteria
- minimum height required to complete a pull through manoeuvre, remaining within the structural limits of the aircraft, from inverted flight at 80 kts in aircraft type being flown
- minimum height required to recover from a spin in aircraft type being flown
- minimum radius turn criteria
- Mueller-Beggs emergency spin recovery technique
- physiological effects applicable to maximum performance flight
- potential dangers associated with conducting aerobatics below 500 feet (ft) above ground level (AGL) over unfamiliar terrain
- precautions that should be taken with regard to radius of turn when operating at a high-density altitude
- pre-manoevre check procedures
- recovery technique to regain physiological and aircraft control when disorientation is experienced

- regulatory requirements applicable to performing aerobatic manoeuvres
- relevant sections of Civil Aviation Safety Regulations and civil Aviation Orders
- relevant WHS/OHS and environmental protection procedures and regulations
- rolling ‘g’ limitations for the aircraft being flown
- rolling manoeuvre flight techniques:
 - barrel rolls
 - aileron roll
 - slow rolls
- safe manoeuvre entry and recovery heights
- techniques for entry to and control of, aerobatic manoeuvres.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

AVIY4063 Perform close formation flight

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to perform close formation flight in fixed or rotary wing aircraft, in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority and national operating standards.

It includes flying close formation, performing station changes, performing breakaway and rejoin manoeuvres, and managing abnormal and emergency situations during formation flight.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to aircraft operational duties of flight crew, and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Use for Defence Aviation is to be in accordance with relevant Defence Orders, Instructions, Publications and Regulations.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|--|
| 1 Fly close formation | 1.1 Specified echelon formation stations are maintained during flight manoeuvres and phases |
| | 1.2 Specified line astern formation station is maintained during aircraft flight manoeuvres and phases |
| | 1.3 Balanced flight is maintained |
| | 1.4 Clear and concise radiotelephony phraseology or hand signals are utilised to ensure precise advice to formation lead and other formation aircraft |
| 2 Perform station changes | 2.1 Aircraft is manoeuvred safely to specified alternative formation stations during flight manoeuvres in accordance with briefed sequence and/or lead's direction |
| | 2.2 Clearance with other formation aircraft is maintained |
| | 2.3 Formation lead changes are conducted as required |
| 3 Perform breakaway and rejoin | 3.1 Loss of contact with formation or any other requirement to break away is recognised |
| | 3.2 Break away from formation is implemented |
| | 3.3 Formation is rejoined at specified stations |
| 4 Manage abnormal and emergency situations | 4.1 Control of aircraft when operating within formation is maintained |
| | 4.2 Abnormal or emergency situations affecting formation performance are identified and analysed |
| | 4.3 Course/s of action to resolve abnormal or emergency situations are implemented and monitored |
| | 4.4 Task workload and flight safety priorities are organised to ensure optimum outcome of the situation |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIY4063A Perform close formation flight.

Assessment Requirements for AVIY4063 Perform close formation flight

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant aeronautical knowledge
- communicating effectively with others
- compensating for the secondary effects of controls
- completing relevant documentation
- following relevant legislation and workplace procedures
- identifying and correctly using relevant equipment
- implementing break away from formation and rejoin at specified stations
- implementing contingency plans
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- maintaining clearance from other formation aircraft
- maintaining station during echelon and line astern formations
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating aircraft within its limitations, achieving optimum performance
- operating electronic communications equipment to required protocol
- performing circuit and stream landing
- performing formation collision avoidance turns
- performing formation landing
- performing formation overshoot
- performing manoeuvres in echelon and line astern:
 - straight and level at various airspeeds
 - level turns at various airspeeds

- climbing:
 - straight
 - turning
- descending at various speeds:
 - straight
 - turning
- flight in various aircraft configurations:
 - straight and level
 - turning and level
 - descending in straight flight
 - descending and turning
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- recognising loss of contact with formation or any other requirement to break away
- recognising relative position changes with reference to the formation
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment
- selecting and using required personal protective clothing and equipment conforming to industry and WHS/OHS standards
- setting local or area barometric pressure adjusted for sea level (QNH) at appropriate stages of flight
- using instruments to monitor aircraft performance
- working collaboratively with others
- working systematically with required attention to detail without injury to self, others or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- CASR Part 61 Manual of Standards Schedule 3 Aeronautical Knowledge relevant to aeroplane or helicopter formation operations
- formation positions and manoeuvres:
 - echelon
 - line astern
 - station position and changes
 - departure

- circuit
- approach and landing
- overshoots
- breaks and rejoins
- formation radio procedures
- formation standard operating procedures (SOPs)
- how to manoeuvre from echelon right to echelon left
- how to manoeuvre from echelon to line astern
- how to manoeuvre from line astern to echelon
- in a Defence context, relevant Defence Orders and Instructions
- procedure for flying close formation
- procedure for performing station changes
- procedure for when visual contact is lost with lead aircraft
- procedures for abnormal and emergency situations
- procedures for performing straight and turning rejoins to a formation
- reference points to achieve line astern position for aircraft being flown with respect to specified formation position
- reference points to achieve specified left and right echelon formation positions for aircraft being flown with respect to specified formation position
- relevant sections of Civil Aviation Safety Regulations and Civil Aviation Orders
- relevant WHS/OHS and environmental protection procedures and regulations
- verbal and non-verbal signals for:
 - commence take off roll
 - position changes
 - radio receiver failure
 - radio transmitter failure
 - lost contact procedure
 - formation rejoin procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

AVIY5022 Manage traffic flow

Modification History

Release 2. ISC upgrade - a statement relevant to Defence Aviation has been added to the Application of the unit.

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the application of skills and knowledge required to manage traffic flow during air traffic control (ATC) operations, in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority and national operating standards.

It includes managing traffic flow safely, establishing traffic sequences, and providing traffic flow adjustments.

Air traffic flow management (ATFM) is established and managed using automated systems or by manual determination, to support ATC in ensuring an optimum flow of air traffic to, from, through or within defined areas during times when demand or expected demand exceeds system capacity.

If automated systems are used, human reasoning should be applied to ensure safety and the most suitable flow of traffic, particularly in times of adverse weather and/or emergency and abnormal flight operations.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to ATC duties that complement the non-technical skills of air traffic controllers, and contribute to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military air traffic services across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision as a single operator or within a team environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Use for Defence Aviation is to be in accordance with relevant Defence Orders, Instructions, Publications and Regulations.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Manage traffic flow safely

2 Establish traffic sequence

3 Provide traffic flow adjustments

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 ATFM is established

1.2 Safety is prioritised when managing traffic flow, including when responding to changed conditions

1.3 Traffic flow is managed and changed conditions are responded to in a timely manner, in accordance with the situation

1.4 Hazards are identified, risks are assessed and risk controls are implemented

2.1 Traffic order is established in accordance with runway mode and/or airspace configuration

2.2 Traffic sequence is monitored and adjustments to traffic flow are made as required

2.3 Instructions to regulate traffic flow and to maintain safety are issued

3.1 Circumstances where delaying actions are required and their causes, are accurately identified

3.2 Air traffic clearances are withheld or instructions are imposed to achieve required delay

- 3.3 Delaying actions are cancelled or relaxed as required and instructions are issued for onwards flight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5022B Manage traffic flow.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AVIY5022 Manage traffic flow

Modification History

Release 2. ISC upgrade - a statement relevant to Defence Aviation has been added to the Application of the unit.

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to procedures
- adjusting routing and tracking of aircraft
- advising aircraft of delays
- allocating attention according to demand and task managing:
- human machine interface (HMI) or equipment use
- air traffic communications
- traffic flow
- applying reasoning and decision making to airspace and flight path scenarios
- communicating effectively with others
- conducting holding of aircraft and onwards processing
- formulating and issuing onwards airways clearances, conditional clearances and clearance limits
- identifying and applying precautions and required action to minimise, control or eliminate identified hazards
- implementing contingency plans
- managing traffic flow safely
 - by day and night
 - in variable weather conditions
- prioritising tasks and managing workload
- projecting and planning airspace, traffic and flight path scenarios.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerodrome runway combinations and traffic requirements
- air traffic clearances to hold, delay, limit and continue flight
- air traffic control (ATC) principles
- aircraft performance characteristics
- airspace geography and topography
- airspace, route structures and procedures used to assist strategic air traffic flow management
- area of radar coverage
- classification and special use airspace
- conditional air traffic clearance
- contingency plans including for reduced facilities and degraded systems
- how to interpret airspace charts and approach to land procedures including holding patterns
- how to interpret meteorological data
- non-published aircraft holding techniques
- relevant sections of regulatory and operational documentation
- reporting procedures
- role of air traffic flow management (ATFM)
- to support ATC in ensuring an optimum flow of air traffic to, from, through or within defined areas during times when demand or expected demand exceeds system capacity
- roles and responsibilities for managing air traffic flow
- safety hazards, risks and related risk control procedures and precautions
- systems and tools used for air traffic flow management
- traffic management techniques.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

AVIY5048 Provide approach control services

Modification History

Release 2. ISC upgrade - a statement relevant to Defence Aviation has been added to the Application of the unit.

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to provide approach control services during air traffic control operations, in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority and national operating standards.

It includes managing terminal airspaces and assuring separation.

This unit is applied to specific terminal airspaces that offer varying levels of air traffic services according to the International Civil Aviation Organization (ICAO) and national classifications of airspaces.

This unit addresses aviation technical skill requirements (physical, mental and task-management abilities) related to air traffic control duties that complement the non-technical skills of air traffic controllers, and contribute to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military air traffic services across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision as a single operator or within a team environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Use for Defence Aviation is to be in accordance with relevant Defence Orders, Instructions, Publications and Regulations.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Manage terminal airspaces

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Traffic priorities are applied in accordance with standard operating procedure
- 1.2 Service priorities are applied in accordance with that which is most safety critical
- 1.3 Hazards are identified, risks are assessed and risk controls are implemented
- 1.4 Control practices and procedures are adjusted in accordance with changing airspace environment factors
- 1.5 Systematic scan technique of terminal airspace and air routes is maintained
- 1.6 Standard routing is facilitated
- 1.7 Documented instructions and agreements applicable to the area of jurisdiction are applied
- 1.8 Non-compliance with control instructions and procedures is recognised and addressed
- 1.9 Terrain and obstacle clearance is provided
- 1.10 Pilot preferred altitudes or flight levels are facilitated
- 1.11 Aircraft are authorised to use terminal airspaces
- 1.12 Control services are provided in accordance with airspace classification and status

- 1.13 Airspaces are administered in accordance with user activity
- 1.14 Flight deviations and diversions are facilitated
- 1.15 Suitable runway mode is negotiated with aerodrome control
- 1.16 Aircraft release for departure is authorised in accordance with runway mode and airspace configuration
- 1.17 Aircraft approach to land is authorised in accordance with runway mode and airspace configuration

2 Assure separation

- 2.1 Conflicts are recognised and resolved
- 2.2 Separation is provided
- 2.3 Jurisdiction for maintaining aircraft separation is agreed and assigned
- 2.4 Alternative separation is provided as required
- 2.5 Separation is adjusted when systems are degraded or airways facilities are reduced
- 2.6 Most appropriate separation is applied taking into account safety, expedition, control method and surveillance
- 2.7 Compromised separation is recognised and addressed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5048A Provide approach control services.

Assessment Requirements for AVIY5048 Provide approach control services

Modification History

Release 2. ISC upgrade - a statement relevant to Defence Aviation has been added to the Application of the unit.

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to procedures
- adjusting route and track of aircraft
- allocating attention based on priorities
- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying reasoning and decision making to airspace and flight path scenarios
- assigning separation to pilot
- communicating effectively with others
- completing relevant documentation for approaching control services
- coordinating flight information
- executing control actions
- facilitating in-flight deviations, diversions, changes of altitude and flight level
- facilitating unusual flight operations
- formulating airways clearance and control instructions
- formulating and authorising approach to land for aircraft
- formulating and authorising release of aircraft for departure
- implementing contingency plans
- interpreting and evaluating current traffic events
- interpreting and following operational instructions, and prioritising work
- maintaining a strategic traffic management plan for airspace jurisdiction
- maintaining surveillance of terminal airspaces
- operating equipment in accordance with standard operating procedures
- perceiving and comprehending incoming information
- performing handover/takeover
- planning and prioritising tasks in accordance with safety imperative

- processing military aircraft
- projecting and developing future airspace and flight path scenarios
- recognising display information and symbology
- recording and annotating flight information and messages
- reporting and rectifying identified problems promptly
- responding to stressful situations with a considered and measured approach
- separating aircraft using approach control techniques and standards
- varying heading of aircraft
- varying speed of aircraft
- working collaboratively with others
- working systematically with attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- air navigation systems and visual aids
- air traffic priorities
- air traffic services
- airborne collision and avoidance systems
- aircraft conflict resolution techniques
- aircraft type, associated wake turbulence and performance categories
- airspace service priorities and safety imperatives
- approach control separation standards and techniques
- characteristics of terminal airspace air traffic patterns and traffic flows
- charts and operational documentation
- communication phraseologies and procedures
- compromised separation and non-compliant use of airspaces
- conditional air traffic clearance
- coordination requirements
- departure and approach to land procedures
- display information and symbology
- division of responsibilities for air traffic services
- formation flight configurations, separation and procedures and practices
- handover/takeover procedures and practices
- human machine interface (HMI) states and associated interactions
- jurisdiction and adjacent airspace characteristics
- meteorological documentation, terms and definitions,
- military flight operations
- national airspace system and standard route structure

- navigation principles and terminology
- organisational and licensing administration
- principles and procedures of altimetry
- principles of error management
- principles of flight
- procedures for recording and annotating operational information
- provision of air traffic services and air traffic flow management during system degradation including facility failures and restoration of system components
- relevant sections of regulatory and operational documentation
- route, track, heading and aircraft performance characteristics
- rules of the air governing visual and instrument flight
- safety occurrence reporting
- security against acts of unlawful interference with aviation
- terrain and prominent landmarks affecting flight operations within terminal airspace
- terrain protection
- transfer of control points
- transition from instrument flight to visual flight
- weather phenomena affecting flight operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- acceptable means of simulation assessment.

ELEMENTS

Elements describe the essential outcomes.

1 Manage enroute airspaces

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Traffic priorities are applied in accordance with standard operating procedure
- 1.2 Service priorities are applied according to in accordance with that which is most safety critical
- 1.3 Control practices and techniques are adapted to changing airspace environment factors
- 1.4 Hazards are identified, risks are assessed and risk controls are implemented
- 1.5 Systematic scan technique of airspaces and air routes is maintained
- 1.6 Standard routing is facilitated
- 1.7 Preferred routing is facilitated
- 1.8 Documented instructions and agreements applicable to jurisdictional area are applied
- 1.9 Non-compliance with control instructions and procedures is recognised and addressed
- 1.10 Terrain and obstacle clearance is provided
- 1.11 Pilot requested altitudes and flight levels are facilitated
- 1.12 Aircraft are authorised to use enroute airspaces
- 1.13 Control services are provided in accordance with airspace

classification and status

1.14 Airspaces are administered in accordance with user activity

1.15 Flight diversions or deviations are facilitated

2 Assure separation

2.1 Conflicts are recognised and resolved

2.2 Separation is provided

2.3 Jurisdiction for maintaining aircraft separation is agreed and assigned

2.4 Alternative separation is provided as required

2.5 Separation is adjusted when systems are degraded or airways facilities are reduced

2.6 Most appropriate separation is provided taking into account safety, expedition and the method of control and surveillance

2.7 Compromised separation is recognised and addressed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5049A Provide area control services.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIY5049 Provide area control services

Modification History

Release 2. ISC upgrade - a statement relevant to Defence Aviation has been added to the Application of the unit.

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting appropriately to cultural differences in the workplace, including modes of behaviour and interactions with others
- adhering to procedures through a series of steps followed in a regular definite order or as required, a traditional or established way of doing things
- adjusting route and track of aircraft
- allocating attention in accordance with priorities
- anticipating and preparing for work tasks
- applying an error management attitude that limits unintentional deviation from work practices and maintains accuracy through a disciplined approach to implementing procedures and practices, and a methodical work ethic
- applying human reasoning to airspace and flight path scenarios
- applying precautions and required action to minimise, control or eliminate identified hazards
- communicating effectively with others
- completing relevant documentation
- coordinating air traffic services effectively
- executing control actions
- facilitating in-flight deviations, diversions and changes of altitude and flight level
- formulating airways clearance and control instruction
- implementing contingency plans
- implementing decisions using knowledge-based, rule-based and skill-based activities
- implementing work health and safety (WHS)/occupational health and safety (OHS) procedures and relevant regulations
- interpreting and evaluating current traffic events
- interpreting and following operational instructions and prioritising work
- interpreting charts and operational documentation associated with air traffic services

- maintaining a strategic traffic management plan for the airspace jurisdiction
- maintaining surveillance of enroute airspaces
- maintaining speed control
- operating equipment in accordance with standard operating procedures
- perceiving and comprehending incoming information
- processing military aircraft
- projecting and predicting future traffic scenarios
- reporting and rectifying identified problems promptly
- recording and annotating flight information and messages
- responding to stressful situations with a considered and measured approach
- scanning the human machine interface (HMI)
- separating aircraft using area control techniques and standards
- separating aircraft using wake turbulence standards
- vectoring aircraft
- working collaboratively with others
- working systematically with attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- air navigation systems and visual aids
- air traffic priorities
- air traffic services
- airborne collision and avoidance systems
- aircraft performance characteristics
- aircraft type associated wake turbulence and performance categories
- airspace service priorities and the safety imperative
- area control separation standards and techniques
- characteristics of enroute sector air traffic patterns and traffic flows including critical positions/hot-spots
- charts and operational documentation
- communication phraseologies and procedures
- compromised separation and non-compliant use of airspaces
- coordination requirements
- departure and approach to land procedures
- division of responsibilities for air traffic services
- formation flight configurations, separation and procedures and practices
- handover/takeover procedures and practices
- how to interpret charts and operational documentation associated with air traffic services

- human machine interface (HMI) states and associated interactions
- jurisdiction and adjacent airspace characteristics
- meteorological documentation, terms and definitions
- military flight operations
- national airspace system and standard route structure
- navigation principles and terminology
 - heading
 - route
 - track
- organisational and licensing administration
- preferred routing
- principles and procedures of altimetry
- principles of flight
- procedures for recording and annotating operational information
- provision of air traffic services and air traffic flow management during system degradation including facility failures and restoration of system components
- rules of the air governing visual and instrument flight
- safety occurrence reporting
- standard routing
- terrain and prominent landmarks affecting flight operations within enroute airspace
- terrain protection
- transfer of control points
- transition from instrument flight to visual flight conditions
- weather phenomena affecting flight operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry

- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- acceptable means of simulation assessment.

AVIY5050 Provide aerodrome control services

Modification History

Release 2. ISC upgrade - a statement relevant to Defence Aviation has been added to the Application of the unit.

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to provide aerodrome control services during air traffic control operations, in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority and national operating standards.

It includes managing aerodrome traffic zones, aerodrome manoeuvring areas, and assuring separation.

This unit is applied to provide aerodrome control services in control towers equipped with surveillance capability and/or using procedural control practices.

This unit addresses:

- aviation technical skill requirements (physical, mental and task-management abilities) related to managing aerodrome traffic zones and aerodrome manoeuvring areas in which distance between aircraft as well as their relative positions and speed might compromise the safety of the aircraft operations
- air traffic control duties that complement the non-technical skills of air traffic controllers, and contribute to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military air traffic services across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision as a single operator or within a team environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Use for Defence Aviation is to be in accordance with relevant Defence Orders, Instructions, Publications and Regulations.

Pre-requisite Unit

Not applicable.

Competency Field

Y – Aircraft Operation and Traffic Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Manage aerodrome traffic zone and aerodrome manoeuvring area

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Traffic priorities are applied in accordance with standard operating procedure
- 1.2 Service priorities are applied in accordance with that which is most safety critical
- 1.3 Hazards are identified, risks are assessed and risk controls are implemented
- 1.4 Control practices and procedures are adjusted in accordance with changing aerodrome traffic zone and aerodrome environment factors
- 1.5 Systematic scan technique of aerodrome traffic zone and aerodrome is maintained
- 1.6 General and sector weather observations are conducted
- 1.7 Documented instructions and agreements applicable to jurisdictional area are applied
- 1.8 Non-compliance with control instructions and procedures is recognised and addressed
- 1.9 Taxiways are used to facilitate maximum use of runways

- 1.10 Runway mode selected is suitable and efficient for traffic flow
- 1.11 Runways are operated dependently
- 1.12 Runways are operated independently
- 1.13 Control services are provided in accordance with airspace classification and status
- 1.14 Airspaces are administered in accordance with user activity
- 1.15 Aircraft are authorised to use aerodrome traffic zone and aerodrome
- 1.16 Vehicles and pedestrians are authorised to use aerodrome manoeuvring areas

2 Assure separation

- 2.1 Conflicts are recognised and resolved
- 2.2 Separation is provided
- 2.3 Jurisdiction for maintaining aircraft separation is agreed and assigned
- 2.4 Alternative separation is provided as required
- 2.5 Separation is adjusted when systems are degraded or airways facilities are reduced
- 2.6 Most appropriate applied separation is provided taking into account safety, expedition and the method of control and surveillance
- 2.7 Compromised separation is recognised and addressed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to AVIY5050A Provide aerodrome control services.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for AVIY5050 Provide aerodrome control services

Modification History

Release 2. ISC upgrade - a statement relevant to Defence Aviation has been added to the Application of the unit.

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adhering to procedures
- adjusting route and track of aircraft
- allocating attention according to priorities
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying reasoning and decision making to airspace and flight path scenarios
- communicating effectively with others
- completing relevant documentation
- conducting general and sector meteorological observation
- coordinating air traffic services effectively
- determining runway mode
- executing control actions
- facilitating unusual flight operations
- formulating airways clearance and control instructions
- implementing contingency plans
- maintaining a strategic traffic management plan
- maintaining surveillance of aerodrome traffic zone and aerodrome
- managing aerodrome traffic zone operating equipment in accordance with standard operating procedures
- operating taxiways
- perceiving and comprehending incoming information
- processing military aircraft
- projecting and developing future airspace and flight path scenarios
- recording and annotating flight information and messages
- reporting and rectifying identified conflicts promptly

- reporting and rectifying identified problems promptly
- responding to stressful situations with a considered and measured approach
- separating aircraft using aerodrome control techniques and standards
- working collaboratively with others
- working systematically with attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aerodrome and runway markings
- aerodrome control separation standards and techniques
- aerodrome lighting
- air navigation systems and visual aids
- air traffic priorities
- air traffic services
- airborne collision and avoidance systems
- aircraft type, associated wake turbulence and performance categories
- airspace service priorities and the safety imperative
- characteristics of aerodrome traffic zone patterns and traffic flows including critical positions
- charts and operational documentation
- communications phraseologies and procedures
- compromised separation and non-compliant use of aerodromes and airspaces
- conditional air traffic clearance
- coordination requirements
- division of responsibilities for air traffic services
- formation flight configurations, separation, procedures and practices
- handover/takeover procedures and practices
- human machine interface (HMI) states and associated interactions
- meteorological documentation, terms and definitions
- military flight operations
- national airspace system and standard route structure
- navigation principles and terminology
- organisational and licensing administration
- physical characteristics of aerodrome and runways
- principles and procedures of altimetry
- principles of error management
- principles of flight
- procedures for recording operational information

- provision of air traffic services and air traffic flow management during system degradation including facility failures and restoration of system components
- relevant sections of regulatory and operational documentation
- route, track, heading and aircraft performance characteristics
- rules of the air governing visual and instrument flight
- runway visibility measurement
- safety occurrence reporting
- terrain and prominent landmarks affecting flight operations within aerodrome traffic zone
- terrain protection
- transfer of control points
- transition from instrument flight to visual flight conditions
- weather phenomena affecting flight operations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

AVIZ0002 Maintain and manage situational awareness as pilot in command

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to maintain and manage situational awareness as pilot in command (PIC) in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes establishing and maintaining own and flight crew situational awareness, setting crew priorities and task management, and working with others in managing situational awareness.

This unit addresses aviation non-technical skill requirements (mental, social and personal-management abilities) of a PIC and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently and without supervision within a multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Pre-requisite Unit

Not applicable.

Competency Field

Z – Situation Awareness

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

- | | |
|---|---|
| 1 Establish and maintain situational awareness of self and flight crew | 1.1 Continuous active monitoring (effective lookout) of all critical factors relevant to the safe progress of a flight is undertaken |
| | 1.2 Situational awareness is applied to own and others' performance in accordance with relevant regulations and legislative requirements |
| | 1.3 Trends towards an unsafe situation are promptly recognised and appropriate corrective action is taken |
| | 1.4 Breakdown in flight crew situational awareness is identified and rectified promptly |
| 2 Set crew priorities and manage tasks | 2.1 Crew priorities and workload are allocated to ensure completion of all tasks relevant to the safety of the flight |
| | 2.2 Safe operation of aircraft is prioritised ahead of competing tasks |
| | 2.3 Critical events and tasks are anticipated and managed to ensure accurate completion within available time constraints |
| | 2.4 Technology is used effectively to reduce workload and to improve ability to safely perform mental and manipulative activities |
| | 2.5 Signs and symptoms of team fatigue are identified and actions taken to manage fatigue of self or in others |
| 3 Work with others in managing situational awareness | 3.1 Collaboration with flight crew members is undertaken to ensure safe completion of flight operations |
| | 3.2 Effective and efficient crew communications and interpersonal relationships are established and maintained to ensure safe flight outcome |
| | 3.3 Flight crew members are encouraged to contribute to safe flight outcome |
| | 3.4 Appropriate actions are taken in conjunction with others to cooperatively correct identified unsafe situations that may develop at any point during the flight |
| | 3.5 Command decisions are communicated to other flight crew members to maintain and manage situational |

awareness

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIZ0001 Maintain and manage situational awareness as pilot in command.

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIZ0002 Maintain and manage situational awareness as pilot in command

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accepting responsibility for own performance
- advising pilot flying of deviations from planned operations
- analysing aircraft systems and flight environment information to identify actual and potential threats or errors
- applying relevant aeronautical knowledge
- avoiding fixation on a single task or function
- being assertive
- clarifying problems and making effective decisions
- communicating effectively with others
- cross-checking actions of other flight crew members
- interacting with and delegating tasks to flight crew members
- implementing work health and safety (WHS) procedures and relevant regulations
- maintaining compliance with WHS requirements
- maintaining radio listening watch
- making effective decisions
- managing a flight crew incapacitation event in accordance with published procedures
- monitoring flight path, aircraft configuration and systems to achieve desired performance using a systematic scan technique
- operating electronic equipment, including communications equipment, to required protocols
- prioritising tasks to achieve safe flight performance
- promptly identifying, reporting and rectifying problems
- responding appropriately to cultural differences in the workplace
- selecting and using appropriate instruments, displays, communications equipment and aids
- taking initiative and responding to changing situations
- using visual systematic scanning technique with required attention to detail
- using flight radio and inter-crew communications
- using traffic information to establish and maintain situational awareness
- utilising available resources to collect flight environment information and to modify planned operations as required.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Civil Aviation Safety Regulation (CASR) Part 61 Manual of Standards (MOS) Aeronautical Knowledge relevant to the role of pilot in command (PIC)
- cockpit management, including:
 - crew coordination:
 - distribution of responsibilities
 - working with a crew concept
 - crew cooperation:
 - small group dynamics (norms, atmosphere, pressure, communication and structure)
 - conflict management
 - leadership styles of management, including:
 - concern for performance
 - concern for people
 - democratic versus autocratic style
 - encouraging inputs and feedback
 - optimising flight crew performance in flight
 - correcting crew coordination deficiencies
 - communication, including:
 - verbal and non-verbal communication
 - one and two-way communication
 - effects of different communication styles
 - miscommunication (including cultural misunderstandings)
- effective decision-making processes, including:
 - identifying problems and causal factors
 - assessing component parts systematically and logically
 - employing analytical techniques to identify solutions and considering the value and implications of each
 - generating solutions and/or alternative courses of action
 - assessing alternative solutions and risks with other flight crew members
 - determining course of action
 - communicating decisions and delegating tasks to flight crew
 - monitoring progress against agreed plan
 - evaluating decisions in line with changing circumstances
 - ensuring decision-making is improvement-focused and directed towards achieving optimum outcomes
- fatigue risk management processes, including:
 - proactive

- predictive
- reactive
- hazard identification, risk analysis and control
- human performance and its limitations, including the senses, memory and situational awareness
- judgement and decision making, including:
 - pilot judgement concepts:
 - types of judgement
 - motor skills and human factors
 - aeronautical decision making:
 - decision-making concepts
 - pilot responsibilities
 - behavioural aspects
 - identification of hazardous attitudes:
 - physical factors
 - psychological factors
 - social influences and interface between people
 - pilot judgement awareness:
 - risk assessment
 - cockpit stress management
 - applying decision-making concepts:
 - practical application
 - managing resources
 - safety awareness
- relevant problems that may occur and actions to overcome them
- procedures for maintaining situational awareness
- procedures for transferring aircraft control between flight crew members
- standard radiotelephony phraseology
- systematic scanning techniques
- task allocation and management
- threat and error management (TEM) principles
- use of navigational computers and equipment
- workload, stress and time pressure management.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIZ0003 Maintain basic situational awareness in an aviation workplace

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and required to maintain basic situational awareness in an aviation workplace in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes maintaining basic situational awareness, assessing situations and taking appropriate action, setting priorities and managing work tasks, and working with others in managing situational awareness.

This unit addresses aviation non-technical skill requirements (mental, social and personal-management abilities) of flight and ground operations personnel and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision as a single operator or within a team environment.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit at time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Z – Situational Awareness

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Maintain basic situational awareness

1.1 Continuous monitoring of all critical factors relevant to the safety and security of an aviation workplace is undertaken

1.2 All relevant indications of an unsafe or insecure situation are recognised and appropriate action is taken to alert relevant personnel and/or to take appropriate action

1.3 Situational awareness is maintained at all times during workplace activities

2 Assess situations and take appropriate action

2.1 Factors that may adversely affect the safety and security of an aviation workplace are identified

2.2 Relevant information concerning the safety and security of an aviation workplace is recognised and interpreted, and timely action is taken

2.3 Risks to workplace safety and security are recognised and appropriate action is taken to control the risk

2.4 Changes to workplace environment and related risks are monitored and managed to ensure a safe outcome to workplace operations

2.5 Safe alternative plan of action is formulated and implemented as required in response to changed circumstances and risks

3 Set priorities and manage work tasks

3.1 Task priorities are set and workload organised to ensure completion of all assigned tasks relevant to the safety and security of the workplace

3.2 Appropriate tasks are prioritised and implemented to maintain ongoing workplace operations and to achieve workplace objectives

3.3 Relevant information is accessed and applied to ensure the safety and security of an aviation workplace when completing workplace tasks

- 4 Work with others in managing situational awareness**
- 3.4** Critical safety and essential security workplace tasks are prioritised over routine activities and completed in accordance with workplace procedures, checklists and legislative and regulatory requirements
 - 3.5** Symptoms of fatigue are recognised and appropriate action is taken to reduce its effects
 - 4.1** Communications with relevant personnel are undertaken in an effective and efficient manner to achieve situational awareness and to meet all requirements for the safety and security of the workplace
 - 4.2** Team members and others in the workplace are encouraged to participate in and contribute to the safety and security of the workplace
 - 4.3** Effective interpersonal skills are used when working with others to maintain awareness and the safety and security of the workplace
 - 4.4** Appropriate action is taken in conjunction with others to cooperatively correct any identified unsafe and/or insecure situations

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIZ1005B Maintain basic situational awareness in the aviation workplace.

Assessment Requirements for AVIZ0003 Maintain basic situational awareness in an aviation workplace

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using relevant equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- responding appropriately to cultural differences in the workplace
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include

knowledge of:

- communication procedures and protocols
- people to consult about maintaining situational awareness, including:
 - airline personnel and managers
 - aviation passengers
 - contractors
 - other workplace personnel and managers
 - emergency services personnel
 - relevant human resources staff
 - relevant technical staff
 - safety personnel
 - security personnel
 - workplace visitors
- procedures for maintaining situational awareness
- factors that may adversely affect the safety and/or security situation of an aviation workplace, including:
 - breaches of security regulations and procedures
 - changes in wind and weather conditions
 - equipment exceeding nominated operating parameters and tolerances
 - equipment or facility breakdown, malfunction or failure
 - moving vehicles and aircraft in the workplace environs
 - persons committing criminal or unlawful acts of interference with aviation
 - poor housekeeping
 - safety hazards in the workplace, such as rotating equipment and propellers, jet blast, slippery surfaces, exposed electrical leads and connections, and toxic materials
 - security threats
 - workplace emergencies, such as a fire, flood, chemical/toxic spill, crash or personnel injury
- indications of an unsafe or insecure situation including:
 - deteriorating or faulty equipment or facility performance obtained through routine equipment and facility checks
 - emergency sirens and alarms
 - equipment exceeding or about to exceed operating parameters and tolerances
 - poorly maintained workplace and related facilities
 - observation and recognition of a security threat
 - observed breaches of security regulations and procedures
 - observed rubbish and untidiness in the workplace
 - persons acting suspiciously
 - recognition of safety hazards in the workplace and/or breaches of safety policies and procedures

- warning signs and visual/audible signals indicating hazards arising from moving vehicles and/or aircraft in the workplace
- weather and other meteorological information that indicates a potential threat to workplace operations and/or personnel in the workplace
- aviation information including:
 - approved workplace checklists
 - conditions of service, legislation and industrial agreements including workplace agreements and awards
 - emergency procedures
 - equipment facility performance specifications/charts
 - induction and training materials
 - local instructions for the aviation workplace concerned
 - operations manuals
 - relevant approved aviation publications
 - relevant regulations for the aviation workplace concerned
 - safety and security policies, procedures and guidelines
 - weather and meteorological information, charts, advice and forecasts
 - workplace procedures and instructions, and job specifications
- relevant safety, security and environmental regulations, policies, procedures and rules and any other relevant regulatory requirements including:
 - Civil Aviation Act
 - relevant Australian Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders pertaining to the aviation workplace concerned
 - relevant Australian Standards
 - relevant health, food handling and hygiene legislation
 - relevant International Air Transport Association (IATA) regulations
 - relevant requirements, standards and recommended practices of the International Civil Aviation Organization (ICAO) for the aviation workplace concerned
 - relevant security regulations
 - relevant national and state/territory work health and safety (WHS) legislation
 - relevant state/territory environmental protection legislation
- safety and security hazards and risks that may be identified in an aviation workplace and ways of controlling identified hazards and associated risks
- safety and security problems that may be identified when maintaining and managing situational awareness and action that can be taken to overcome these problems
- weather information and its implications for workplace operations.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIZ0004 Maintain security awareness and vigilance in an aviation workplace

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to maintain security awareness and vigilance in an aviation workplace in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes maintaining awareness of security measures and security risks, maintaining security vigilance, and recognising and assessing potential security risks. It also includes responding to potential security risks and reporting potential security risks.

This unit addresses aviation non-technical skill requirements (mental, social and personal-management abilities) of aviation personnel and contributes to safe and effective performance in complex aviation operational environments

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision as a single operator or within a team environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit at time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Z – Situation Awareness

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Maintain awareness of security measures and security risks	1.1 Security roles of workers in an aviation workplace are recognised 1.2 Security measures are applied in the workplace in accordance with legislative requirements and the organisation's aviation transport security program 1.3 Information about potential aviation security risks is reviewed and used to guide work 1.4 Security policies and procedures are identified, interpreted and applied
2 Maintain security vigilance	2.1 Potential security risks are monitored during workplace activities 2.2 Effective communication skills are used when working with others to maintain security vigilance
3 Recognise and assess potential security risks	3.1 Factors that may affect security of an aviation workplace are identified and considered 3.2 Security assessment principles are applied when potential security risks are identified and appropriate actions taken
4 Respond to potential security risks	4.1 Potential security risks are effectively and efficiently communicated in accordance with workplace procedures 4.2 Instructions from security supervisors/managers and security procedures are adhered to
5 Report potential security risks	5.1 Security risks are reported accurately and in a timely manner in accordance with workplace procedures 5.2 Security documentation is identified and completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of

competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIZ2050B Maintain security awareness and vigilance in the aviation workplace.

Assessment Requirements for AVIZ0004 Maintain security awareness and vigilance in an aviation workplace

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- applying security measures in an aviation workplace
- communicating effectively with others when maintaining security awareness and vigilance in the aviation workplace
- explaining the security role of individual workers in the aviation workplace accurately
- identifying and completing required documentation when maintaining security awareness
- identifying and correctly responding to security risks within an aviation workplace
- identifying and selecting relevant equipment, processes and procedures when maintaining security awareness
- modifying activities in response to workplace contingencies, risk situations and environments
- monitoring and anticipating security issues and risks that may arise when maintaining security awareness and taking appropriate action
- reading, interpreting and applying security and safety practices, and regulations applicable to own work functions
- reading, interpreting and applying relevant regulations, instructions and workplace procedures concerning security awareness
- using correct documentation when reporting potential security issues
- using initiative to determine the correct response to a security threat when maintaining security awareness in an aviation workplace
- working collaboratively with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- appropriate action to avoid and resolve security issues
- contingency procedures, as detailed in workplace procedures, to be taken when a security risk is identified
- enforcement agencies present in an aviation environment

- information contained in personal identification (ID) cards
- legislative requirements that relate to security awareness when working in an aviation workplace, including all the following:
 - current Aviation Transport Security Act (and amendments)
 - current Aviation Transport Security Regulations
 - notices made under the Act and the Regulations
 - organisation's transport security program as approved under the Aviation Transport Security Act
- organisational paperwork associated with reporting requirements
- organisational security policies and procedures and aviation transport security program (ATSP) developed in accordance with the Aviation Transport Security Act and Regulations, which outlines the security measures and procedures to be followed by employees to maintain aviation security
- potential weapons, explosives, prohibited items or liquid, aerosol or gel (LAG) products
- reporting procedures for vehicles in areas not reserved for parking or designated parking areas
- reporting requirements for identified security risks or incidents in accordance with workplace procedures
- security and risks in an aviation workplace
- security principles in an aviation workplace
- signs and indications of suspicious behaviour of passengers, consignors or other persons who might pose a threat to aviation security
- signs and indications that items have been tampered with or have been left unattended
- site layout including any applicable security zones
- types of ID cards and access available to holders of each type of ID card.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and

operation manuals

- relevant materials, tools, equipment and personal protective equipment (PPE) currently used in industry.

AVIZ0005 Apply situational awareness in remote pilot aircraft systems operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills, knowledge and attitudes required to apply situational awareness in remote pilot aircraft systems (RPAS) operations in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA).

It includes maintaining situational awareness, assessing situations and making decisions, setting priorities and managing tasks, and working with others in managing situational awareness.

This unit addresses aviation non-technical skill requirements (mental, social and personal-management abilities) of aviation personnel and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew RPAS environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit at time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Z – Situational Awareness

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Maintain situational awareness

1.1 Continuous monitoring of all critical factors relevant to the safe progress of an RPAS flight is undertaken

1.2 Effective visual scan is applied, during RPAS operations

1.3 Trends towards unsafe situations are recognised and appropriate corrective action employed in accordance with operational workplace procedures and regulatory requirements

1.4 Breakdown in situational awareness is identified and rectified promptly

2 Assess situations and make decisions

2.1 Operational problems are identified

2.2 Operational risks are assessed and reported in accordance with regulatory requirements

2.3 Potential solutions are identified and control measures decided and implemented

2.4 Determined plan of action is communicated and tasks allocated to others as appropriate

2.5 Plan of action is implemented and monitored to achieve safe outcomes

3 Set priorities and manage tasks

3.1 Priorities and workload are organised to ensure completion of all tasks relevant to flight safety

3.2 Safe and effective operation of the RPAS is prioritised ahead of competing tasks

3.3 Critical events and tasks are anticipated and managed to ensure completion within available time constraints

3.4 Technology is used to reduce workload and to improve ability to perform mental and manipulative activities safely

3.5 Signs and symptoms of fatigue are identified and

appropriate actions taken to manage fatigue of self or in others

4 Work with others in managing situational awareness

- 4.1** Collaboration with others is undertaken to ensure safe completion of flight
- 4.2** Effective communications and interpersonal relationships are established and maintained with all stakeholders to ensure safe flight outcome
- 4.3** Crew members are encouraged to participate in and contribute to safe flight outcome
- 4.4** Appropriate action is taken in conjunction with others to cooperatively correct any identified unsafe situations that may develop during an RPAS flight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIZ3052A Apply situational awareness in remote pilot aircraft systems (RPAS) operations.

Links

AVI Training Package Companion Volume Implementation Guide available on VET Net: - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIZ0005 Apply situational awareness in remote pilot aircraft systems operations

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying aviation safety management system policies and procedures for remote pilot aircraft systems (RPAS) flight
- applying precautions and required action to minimise, control or eliminate identified hazards
- managing tasks, including:
 - visual line of sight
 - visual meteorological conditions
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using required equipment
- implementing aviation risk management processes in RPAS contexts
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- interpreting and following operational instructions and prioritising work
- maintaining all necessary communications
- maintaining compliance with WHS and regulatory requirements
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems that may occur promptly in accordance with regulatory requirements and workplace procedures
- responding appropriately to cultural differences in the workplace
- selecting and using appropriate instruments, displays, communications equipment and aids

- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- sourcing and interpreting aviation weather forecast products appropriate to flight planning and navigation procedures
- transferring RPAS control between crew members as required
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- factors relevant to the safe progress of a flight, including:
 - air traffic in the vicinity of a RPAS
 - becoming lost
 - changes in wind and weather conditions at destination
 - changes in wind and weather conditions en route
 - engine or equipment malfunction or failure
 - errors in navigation
 - exceeding nominated operating parameters and tolerances for RPAS
 - instrument or display malfunction or failure
 - running out of fuel/energy
 - security threat at RPAS control station
- aeronautical communication procedures and protocols
- aeronautical decision-making processes
- air navigation techniques applicable to RPAS operations
- air traffic rules and procedures
- effective communication
- error management, including error types, causes and consequences
- fatigue risk management
- human performance and its limitations, including the senses, memory and situational awareness
- in a Defence context, relevant Defence Orders and Instructions
- operational hazards that may be identified when managing situational awareness and ways of controlling those hazards and associated risks
- principles of flight relevant to RPAS operations
- problems that may occur when managing situational awareness and action that can be taken to overcome these problems
- procedures for maintaining situational awareness
- procedures for transferring RPAS control between crew members
- relevant sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders

related to RPAS operations

- relevant WHS/OHS and environmental procedures and regulations
- risk identification, analysis and control
- RPAS energy source usage rates
- stress, workload and time pressure management
- use of navigational computers and equipment.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIZ0006 Manage situational awareness in aircraft flight

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to manage situational awareness in aircraft flight in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

It includes maintaining situational awareness, assessing situations and making decisions, setting priorities and managing tasks, and working with others in managing situational awareness.

This unit addresses aviation non-technical skill requirements (mental, social and personal-management abilities) of flight crew and contributes to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of recreational, commercial and military aircraft activities across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision within a single-pilot or multi-crew environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit at time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Z – Situational Awareness

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Maintain situational awareness

- 1.1** Continuous monitoring of all critical factors relevant to the safe progress of a flight is undertaken
- 1.2** Effective visual scan is applied and radio communication, traffic information and aircraft systems are used appropriately
- 1.3** Trends towards unsafe situations are recognised and appropriate corrective actions employed in accordance with workplace procedures and regulatory requirements
- 1.4** Breakdown in situational awareness is identified from errors or discrepancies and is rectified by ensuring safe operation of aircraft and response to situation

2 Assess situations and make decisions

- 2.1** Problems are identified and analysed
- 2.2** Solutions are identified and risks are assessed
- 2.3** Course of action is chosen to ensure a safe outcome to a flight or manoeuvre
- 2.4** Plan of action is communicated and tasks allocated
- 2.5** Actions are taken to achieve optimum outcomes
- 2.6** Progress is monitored against plan
- 2.7** Plan is re-evaluated to achieve optimum outcomes
- 2.8** Operational changes and related risks are monitored and managed to ensure a safe outcome to a flight or manoeuvre

3 Set priorities and manage tasks

- 3.1** Priorities and workload are organised to ensure completion of all tasks relevant to flight safety
- 3.2** Safe and effective operation of aircraft is prioritised ahead of competing tasks
- 3.3** Technology is appropriately used to reduce workload and to improve ability to perform mental and manipulative activities
- 3.4** Fixation on single actions/functions is avoided

- 3.5 Symptoms of fatigue are recognised and appropriate action taken to reduce its effects
- 3.6 Critical events and tasks are anticipated and completed in time available
- 4 **Work with others in managing situational awareness**
 - 4.1 Level of assertiveness is applied that ensures safe flight completion
 - 4.2 Effective and efficient communications and interpersonal relationships are established and maintained with all stakeholders to ensure safe flight outcome
 - 4.3 Passengers and crew members are encouraged to participate in and contribute to safe flight outcome
 - 4.4 Appropriate action is taken in conjunction with others to cooperatively correct any identified unsafe situations that may develop during an aircraft flight

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Unit Mapping Information

This unit replaces and is equivalent to AVIZ4001 Manage situation awareness in aircraft flight.

Assessment Requirements for AVIZ0006 Manage situational awareness in aircraft flight

Modification History

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures (SOPs)
- applying air safety practices and regulations
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using required equipment
- implementing contingency plans
- implementing work health and safety (WHS) procedures and relevant regulations
- maintaining all necessary communications
- maintaining and managing an aircraft situation alone and in conjunction with others
- maintaining compliance with regulatory requirements
- modifying activities depending on workplace contingencies, situations and environments
- monitoring and anticipating operational problems and hazards and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant regulations, instructions, procedures, information and signs
- reporting and/or rectifying identified problems promptly in accordance with regulatory requirements and workplace procedures
- responding appropriately to cultural differences in the workplace
- selecting and using appropriate instruments, communications equipment and aids
- selecting and using required personal protective equipment (PPE) conforming to industry and WHS standards
- sourcing and interpreting aviation weather forecast products appropriate to flight planning and navigation procedures
- transferring aircraft control between crew members
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and range of conditions and include knowledge of:

- air navigation techniques
- aircraft communication procedures and protocols
- aircraft fuel usage rates
- in a Defence context, relevant Defence Orders and Instructions
- operational hazards identified when managing situational awareness and ways of controlling those hazards and associated risks
- principles of aircraft flight
- problems that may occur when managing situational awareness and action that can be taken to overcome these problems
- procedures for maintaining situational awareness
- procedures for transferring aircraft control between crew members
- relevant WHS and environmental procedures and regulations
- relevant sections of Civil Aviation Safety Regulations (CASRs) and Civil Aviation Orders
- traffic rules and procedures
- use of a navigational computer.

Assessment Conditions

Assessors must hold credentials specified within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must satisfy the Principles of Assessment and Rules of Evidence and all regulatory requirements included within the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- acceptable means of simulation assessment
- applicable documentation, including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and PPE currently used in industry.

AVIZ5049 Manage situational awareness in the air traffic control environment

Modification History

Release 2. ISC upgrade - a statement relevant to Defence Aviation has been added to the Application of the unit.

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Application

This unit involves the skills and knowledge required to manage situational awareness during air traffic control operations, in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority and national operating standards.

It includes establishing and maintaining situational awareness, and contributing to team situational awareness.

This unit addresses aviation non-technical skill requirements (mental, social and personal-management abilities) related to air traffic control duties that complement the technical skills of air traffic controllers, and contribute to safe and effective performance in complex aviation operational environments.

Operations are conducted as part of commercial and military air traffic services across a variety of operational contexts within the Australian aviation industry.

Work is performed independently or under limited supervision as a single operator or within a team environment.

Licensing, legislative, regulatory or certification requirements are applicable to this unit.

Use for Defence Aviation is to be in accordance with relevant Defence Orders, Instructions, Publications and Regulations.

Pre-requisite Unit

Not applicable.

Competency Field

Z – Situation Awareness

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Establish and maintain situational awareness

- 1.1 Status of the air traffic control (ATC) environment is established
- 1.2 Incoming information is accurately perceived
- 1.3 Pertinent information and elements are comprehended and prioritised
- 1.4 Elements within the ATC environment are projected and consequences are established
- 1.5 ATC environment is monitored and status of elements is updated
- 1.6 Loss of situational awareness is identified and actions are taken to recover situational awareness

2 Contribute to team situational awareness

- 2.1 Team situational awareness is established and monitored
- 2.2 Hazards are identified, risks are assessed and risk controls are implemented
- 2.3 Required information is recognised and shared

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit is equivalent to AVIZ5049A Manage situational awareness in the air traffic control environment.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=4725260a-0af3-4daf-912b-ef1c2f3e5816>

Assessment Requirements for AVIZ5049 Manage situational awareness in the air traffic control environment

Modification History

Release 2. ISC upgrade - a statement relevant to Defence Aviation has been added to the Application of the unit.

Release 1. This is the first release of this unit of competency in the AVI Aviation Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required actions to minimise, control or eliminate identified hazards
- applying reasoning and decision making to airspace and flight path scenarios
- communicating effectively with others
- completing relevant documentation
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- maintaining a strategic traffic management plan
- making decisions related to managing situational awareness in the air traffic control (ATC) environment
- operating equipment in accordance with standard operating procedures
- perceiving and comprehending incoming information
- prioritising tasks to regulate workload
- projecting and developing future airspace and flight path scenarios
- reporting and/or rectifying identified problems promptly
- responding to stressful situations with a considered and measured approach
- working collaboratively with others
- working systematically with attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- aircraft performance characteristics
- ATC environment
- duty of care
- factors affecting individual and team situational awareness
- loss of situational awareness identifiers
- loss of situational awareness prevention techniques
- principles of effective ATC
- relevant sections of regulatory and operational documentation
- situational awareness recovery techniques
- techniques for establishing and maintaining situational awareness.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- acceptable means of simulation assessment.

BSBADM502 Manage meetings

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage a range of meetings including overseeing the meeting preparation processes, chairing meetings, organising the minutes and reporting meeting outcomes.

It applies to individuals employed in a range of work environments who are required to organise and manage meetings within their workplace, including conducting or managing administrative tasks in providing agendas and meeting material. They may work as senior administrative staff or may be individuals with responsibility for conducting and chairing meetings in the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – General Administration

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Prepare for meetings	1.1 Develop agenda in line with stated meeting purpose 1.2 Ensure style and structure of meeting are appropriate to its purpose 1.3 Identify meeting participants and notify them in accordance with organisational procedures

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Confirm meeting arrangements in accordance with requirements of meeting</p> <p>1.5 Despatch meeting papers to participants within designated timelines</p>
2 Conduct meetings	<p>2.1 Chair meetings in accordance with organisational requirements, agreed conventions for type of meeting and legal and ethical requirements</p> <p>2.2 Conduct meetings to ensure they are focused, time efficient and achieve the required outcomes</p> <p>2.3 Ensure meeting facilitation enables participation, discussion, problem-solving and resolution of issues</p> <p>2.4 Brief minute-taker on method for recording meeting notes in accordance with organisational requirements and conventions for type of meeting</p>
3 Follow up meetings	<p>3.1 Check transcribed meeting notes to ensure they reflect a true and accurate record of the meeting and are formatted in accordance with organisational procedures and meeting conventions</p> <p>3.2 Distribute and store minutes and other follow-up documentation within designated timelines, and according to organisational requirements</p> <p>3.3 Report outcomes of meetings as required, within designated timelines</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 3.1, 3.2	<ul style="list-style-type: none"> Identifies and interprets information from complex texts including legislation, organisational policies and procedures Compares final output with original notes to check for accuracy
Writing	1.1-1.5, 3.2, 3.3	<ul style="list-style-type: none"> Addresses the context, purpose and audience when generating a range of texts Prepares complex texts from notes using appropriate

		<p>structure, and accurate spelling, grammar and punctuation</p> <ul style="list-style-type: none"> Records notes of meeting proceedings according to organisational requirements Edits and corrects own work to ensure accuracy
Oral Communication	2.1-2.4	<ul style="list-style-type: none"> Participates in verbal exchanges using appropriate style, tone and vocabulary for audience, context and purpose Listens for specific information during meetings Asks questions and listens to responses to clarify understanding
Numeracy	1.4, 1.5, 3.2, 3.3	<ul style="list-style-type: none"> Recognises and interprets numerical information related to timeframes and budgets
Navigate the world of work	1.3, 2.1, 2.4, 3.1, 3.2	<ul style="list-style-type: none"> Recognises and responds to both explicit and implicit organisational procedures and protocols and legislative/regulatory requirements
Interact with others	1.3, 1.5, 2.3, 3.2	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Cooperates with others as part of familiar activities, playing an active role in facilitating group interaction
Get the work done	1.1, 1.3, 1.4, 1.5, 2.1, 2.2, 2.4, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> Applies formal processes when planning complex tasks, producing plans with logically sequenced steps, reflecting an awareness of time constraints Recognises and takes responsibility for addressing predictable problems in familiar work contexts

Assessment Requirements for BSBADM502 Manage meetings

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply conventions and procedures for formal and informal meetings including:
 - developing and distributing agendas and papers
 - identifying and inviting meeting participants
 - organising and confirming meeting arrangements
 - running the meeting and following up
- organise, take part in and chair a meeting
- record and store meeting documentation
- follow organisational policies and procedures.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline meeting terminology, structures, arrangements
- outline responsibilities of the chairperson and explain group dynamics in relation to managing meetings
- describe options for meetings including face-to-face, teleconferencing, web-conferencing and using webcams
- identify the relevant organisational procedures and policies regarding meetings, chairing and minutes including identifying organisational formats for minutes and agendas.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the general administration field of work and include access to:

- reference material in regard to meeting venues and technology, catering and transport suppliers
- organisational policies and procedures for managing meetings
- office supplies and equipment
- computers and relevant software
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBAUD402 Participate in a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to prepare for and participate in a quality audit as a member of a quality audit team. The types of audits may include external or internal systems audits or process or product/service audits.

The process includes reviewing designated documentation; identifying and developing checklists and audit related documentation; preparing audit schedules; gathering, analysing and evaluating information; and reporting findings to the lead auditor.

It applies to individuals with a broad knowledge of the quality auditing environment who analyse and evaluate information from a variety of sources to provide solutions to auditing issues, including unpredictable quality auditing problems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Quality Auditing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Review auditee documentation	1.1 Where applicable, review auditee's previous quality audits to establish possible impact on the conduct of the current audit 1.2 Request relevant organisational documents from auditee, and

ELEMENT	PERFORMANCE CRITERIA
	<p>review and check the adequacy of these documents</p> <p>1.3 Amend reviewed documents, and determine and source any further documentation required</p> <p>1.4 Resolve issues which arise with auditee and relevant parties</p>
2 Participate in developing audit schedules	<p>2.1 Access or prepare appropriate checklists/tools and audit related documentation</p> <p>2.2 Confirm schedules and required resources with auditee before beginning auditing activities</p> <p>2.3 Anticipate possible issues and outline strategies to address these issues, should they arise</p> <p>2.4 Ensure preparation activities and documentation correspond to the audit plan</p> <p>2.5 In consultation with auditing team, determine appropriate methods and techniques</p> <p>2.6 Assist lead auditor in creating entry and exit meeting agendas</p>
3 Gather and analyse information	<p>3.1 Access a range of potential sources of information</p> <p>3.2 Collect and make an initial assessment of sample documentation</p> <p>3.3 Interview appropriate persons in relation to relevant documentation</p> <p>3.4 Identify and report patterns, trends, interrelationships and areas of risk</p> <p>3.5 Identify aspects of the audit that require the use of specialists and request appropriate assistance</p>
4 Evaluate information	<p>4.1 Evaluate information against prescribed benchmarks</p> <p>4.2 Form a defensible opinion as to the meeting of these benchmarks by the auditee</p> <p>4.3 Ensure opinions are formed from and supported by available information</p>
5 Report findings	<p>5.1 Formulate findings and prepare a corrective action report if discrepancies or non-compliances are detected</p> <p>5.2 Examine results/findings against audit objectives and present to lead auditor</p> <p>5.3 Report recommendations for improvements as applicable</p>
6 Participate in exit	6.1 Prepare for exit meeting

ELEMENT	PERFORMANCE CRITERIA
meeting	<p>6.2 Ensure reporting arrangements are agreed upon and documented during the meeting</p> <p>6.3 Ensure context and consequences of audit are explained, and follow-up is discussed</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.2, 2.4, 2.6, 3.1-3.5, 4.1, 4.3, 5.1, 5.2	<ul style="list-style-type: none"> Identifies and interprets information from organisational documentation and workplace procedures
Writing	1.2, 1.3, 2.1, 2.2, 2.4, 2.6, 3.2-3.5, 4.1, 4.3, 5.1-5.3, 6.2	<ul style="list-style-type: none"> Records or amends information and conveys details in accordance with audit objectives
Oral Communication	1.2, 1.4, 2.2, 2.5, 2.6, 3.3, 3.5, 5.2, 5.3, 6.2, 6.3	<ul style="list-style-type: none"> Participates in spoken exchanges using structure and language to suit the audience Listens for required information and asks clarifying questions
Numeracy	2.5, 3.1, 3.2, 3.4, 4.1-4.3, 5.1, 5.2	<ul style="list-style-type: none"> Uses a wide range of mathematical calculations to analyse and arrange numeric information
Navigate the world of work	1.1, 1.2	<ul style="list-style-type: none"> Adheres to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.2, 1.4, 2.2, 2.5, 2.6, 3.3, 3.4, 3.5, 5.2, 5.3, 6.2, 6.3	<ul style="list-style-type: none"> Collaborates and cooperates with others to achieve joint outcomes Selects and uses appropriate conventions and protocols when communicating with team members and other people in a range of work contexts
Get the work done	1.1-1.4, 2.1, 2.3, 2.4, 3.1, 3.4, 4.1-4.3, 6.1	<ul style="list-style-type: none"> Organises, plans and prioritises workload with some sense of what can be achieved in a timeframe Systematically gathers, analyses and evaluates all relevant information to make decisions Recognises and addresses some problems within own scope, recognising when to seek the expertise of others

Assessment Requirements for BSBAUD402 Participate in a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- review and amend all relevant documentation
- develop an audit schedule using relevant tools and strategies
- use various methods to gather data and information to complete an audit, seeking specialist advice where appropriate
- use predetermined benchmarks to evaluate findings and formulate well-founded opinions
- develop a comprehensive report for the exit meeting, which analyses both context and consequences of the completed audit
- use terminology relating to quality auditing in written or oral communications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe relevant auditing codes of practice or ethics
- outline auditing methods and techniques
- summarise current audit practices
- identify current industry products and/or services to assist in the auditing process.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – quality auditing field of work and include access to:

- workplace documentation including previous quality audit reports, checklists, risk management plans and audit plans.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBAUD501 Initiate a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to initiate and organise a quality audit with an auditee. It covers assessing the scope and objectives of a quality audit; communicating with the auditee regarding the proposed quality audit; identifying resources required to conduct the audit; and developing and submitting a quality audit plan. The types of audits may include external or internal systems audits or process or product/service audits.

It applies to individuals with a well-established theoretical knowledge base in quality auditing who are proficient in using a wide range of specialised, quality auditing and managerial techniques to plan, carry out and evaluate a quality audit. Individuals also supervise and monitor the processes and outcomes of others working in a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Quality Auditing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Assess quality audit scope and objectives	1.1 Determine and discuss audit objectives with the auditee, client and all other relevant parties 1.2 Determine and discuss scope of the quality audit with the auditee, client and all other relevant parties

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Identify relevant standards that impact the environment in which the audit operates</p> <p>1.4 Determine scope commensurate with identified risks</p>
2 Communicate with auditee regarding proposed quality audit	<p>2.1 Determine audit history, organisational structure and culture through consultation with the auditee</p> <p>2.2 Negotiate and ensure agreement with auditee, the proposed audit methods and techniques to be applied</p> <p>2.3 Outline audit processes to establish sequence of audit activities, and the roles of the auditors and auditees in the process</p>
3 Identify resources required to conduct quality audit	<p>3.1 Identify resources required to perform the quality audit efficiently and effectively</p> <p>3.2 Select audit team members on the basis of relevant expertise</p> <p>3.3 Confirm availability of resources required to conduct the audit with auditee</p> <p>3.4 Assign roles and responsibilities to audit team members</p>
4 Develop and submit quality audit plan	<p>4.1 Develop quality audit plan according to established scope and objectives</p> <p>4.2 Assign timing, schedules and responsibilities for implementation of the audit plan</p> <p>4.3 Develop audit priorities and ensure agreement with auditees and audit team members</p> <p>4.4 Document and submit audit plan to auditee</p>
5 Prepare audit team	<p>5.1 Inform audit team members of their responsibilities, audit objectives and scope</p> <p>5.2 Communicate audit plan and schedules to all audit team members</p> <p>5.3 Discuss and clarify audit methods and techniques with audit team members</p>
6 Review auditee documentation	<p>6.1 Review auditee's previous audits to establish possible impact on the conduct of the current audit</p> <p>6.2 Review and check relevant organisational documents for accuracy</p> <p>6.3 Resolve arising problems with auditee and relevant parties</p>
7 Identify and prepare checklists and audit	<p>7.1 Develop checklists to reflect audit scope and objectives</p>

ELEMENT	PERFORMANCE CRITERIA
related documentation	7.2 Develop or obtain documentation required for the audit 7.3 Prepare agenda for entry meeting 7.4 Include value-adding activities in audit related documentation where required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 4.1, 6.1, 6.2, 7.1	<ul style="list-style-type: none"> Interprets and analyses information from organisational documentation
Writing	4.1-4.4, 6.2, 7.1-7.4	<ul style="list-style-type: none"> Develops a range of documents using structure, tone and vocabulary appropriate to audience, context and purpose Records or amends information and conveys details in accordance with audit objectives
Oral Communication	1.1, 1.2, 2.1-2.3, 4.3, 5.1-5.3, 6.3	<ul style="list-style-type: none"> Participates in spoken exchanges using structure and language to suit the audience Uses questioning and listening techniques to clarify requirements
Numeracy	4.2	<ul style="list-style-type: none"> Uses mathematical calculations for project scheduling
Navigate the world of work	1.3	<ul style="list-style-type: none"> Monitors adherence to organisational policies and relevant standards and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.2, 2.1, 2.2, 3.4, 4.4, 5.1, 5.2	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Recognises the importance of building rapport and building effective working relationships Collaborates with others to negotiate acceptable outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.1, 1.2, 1.4, 2.1, 2.3, 3.1, 3.2, 4.1,	<ul style="list-style-type: none"> Organises, plans and sequences own workload and schedules work activities of others Uses analytical processes to decide on a course of

	4.2, 4.3, 6.1, 6.3	<p>action, establishing criteria for deciding between options and seeking advice from others before taking action when necessary</p> <ul style="list-style-type: none"> • Addresses some unfamiliar problems of increasing complexity within own scope, recognising when to seek the expertise of others

Assessment Requirements for BSBAUD501 Initiate a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- produce documented audit plans for auditees across a variety of contexts including:
 - the scope and objectives of the audit
 - proposed audit methods and techniques to be used
 - required resources and schedules
 - allocation of individual audit team member responsibilities for conducting the proposed audit.
- use terminology relating to quality auditing in written or oral communications.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the relevant auditing codes of practice or ethics
- describe auditing methods and techniques
- outline the requirements of auditing regulations and standards
- identify current audit practices
- outline quality auditing principles, techniques and systems
- describe the requirements of house or other style manual protocols for written communications
- identify software applications relevant to quality auditing activities.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the regulation, licensing and risk – quality auditing field of work and include access to:

- workplace documentation including previous quality audit reports, checklists, risk management plans and audit plans.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBAUD503 Lead a quality audit

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead an audit team as it runs a quality audit. It covers conducting entry and exit meetings; identifying and gathering relevant information; managing audit team resources; and providing feedback to audit team members on their performance. The types of quality audit that may be covered by this unit include an external or internal systems audit or process or product/service audit.

It applies to individuals with a well-established theoretical knowledge base of quality auditing, who are proficient in using a wide range of specialised quality auditing and managerial techniques to carry out their own work and to supervise the quality audit team. It is relevant to audits where a lead auditor is responsible for a quality audit team.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Quality Auditing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Conduct entry meeting	1.1 Organise entry meeting in advance at a mutually agreed time 1.2 Prepare agenda for audit 1.3 Confirm objectives and scope of audit at entry meeting 1.4 Confirm schedules and logistical arrangements at entry

ELEMENT	PERFORMANCE CRITERIA
	meeting 1.5 Make changes to plan, schedules and arrangements where required
2 Identify and gather information	2.1 Identify a range of potential sources of information 2.2 Interview appropriate persons 2.3 Gather relevant information and sample documentation
3 Manage audit team resources	3.1 Supervise activities of audit team members 3.2 Assess and review audit team findings in line with audit scope 3.3 Re-assign team members as required 3.4 Instigate contingency actions as required 3.5 Seek and reach agreement on corrective action reports
4 Conduct exit meeting	4.1 Make preparations for exit meeting 4.2 Examine results and findings against audit objectives and present to auditee 4.3 Ensure reporting arrangements are agreed on 4.4 Explain context and consequences of audit and discuss during follow-up
5 Guide team members in continuously improving their performance	5.1 Provide feedback on performance to audit team members 5.2 Encourage and support audit team members to critique their own work 5.3 Provide and document advice for individual improvement

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	3.2, 4.2	<ul style="list-style-type: none"> Interprets and analyses information from audit scoping materials
Writing	1.2, 1.5, 5.3	<ul style="list-style-type: none"> Develops a range of documents using relevant structure, tone and vocabulary appropriate to audience,

		<p>context and purpose</p> <ul style="list-style-type: none"> Records or amends information and conveys details in accordance with audit objectives
Oral Communication	1.3, 1.4, 2.2, 3.5, 4.2-4.4, 5.1, 5.2, 5.3	<ul style="list-style-type: none"> Participates in spoken exchanges using clear language, tone and pace Uses questioning and listening techniques to clarify requirements
Numeracy	4.2	<ul style="list-style-type: none"> Uses mathematical calculations to analyse and arrange numeric information
Interact with others	1.3, 1.4, 2.2, 3.1, 3.3, 4.2-4.4, 5.1, 5.2, 5.3	<ul style="list-style-type: none"> Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Recognises the importance of rapport in establishing and building effective working relationships Collaborates with others to negotiate acceptable outcomes, playing an active role in directing and facilitating effective group interaction
Get the work done	1.1, 1.2, 1.4, 2.1, 2.3, 3.2, 3.3, 3.4, 4.1	<ul style="list-style-type: none"> Organises, plans and sequences own workload and schedules work activities of others Uses a combination of formal, logical planning processes and an increasingly intuitive understanding of context to identify relevant information and evaluate appropriate strategies to achieve objectives Responds to problems requiring immediate attention, drawing on past experiences to devise solutions Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of factors into account

Assessment Requirements for BSBCMM301 Process customer complaints

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- process and document customer complaints according to organisational and legislative requirements
- use effective communication techniques to discuss options and resolve complaints
- follow correct procedures when referring and following up complaints.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify the key provisions of relevant legislation from all forms of government that may affect aspects of business operations
- explain the communication skills required when handling customer complaints
- outline organisational procedures and standards for processing complaints
- list external bodies to which complaints could be referred.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:

- organisational policies and procedures relevant to customer complaints
- relevant legislation or codes of practice
- office equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBCMM401 Make a presentation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare and deliver presentations related to occupation or area of interest which demonstrate the use of:
 - effective presentation strategies and communication principles
 - aids and materials to support the presentation
- select and implement methods to review the effectiveness of own presentation and document any changes which would improve future presentations.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify information collection methods that will support review and feedback of presentations
- identify regulatory and organisational obligations and requirements relevant to presentations
- describe the principles of effective communication
- describe the range of presentation aids and materials available to support presentations.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals using interpersonal communication skills in the workplace and include access to:

- equipment, materials and business software packages for making a presentation
- business technology
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBCUS301 Deliver and monitor a service to customers

Modification History

Release	Comments
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use communication skills to establish rapport and build relationships with customers in accordance with organisational requirements
- identify customer needs using appropriate questioning and active listening skills
- provide customer service in accordance with organisational requirements
- respond to and record customer feedback and action taken according to organisational standards, policies and procedures
- produce a report which identifies and recommends ways to improve service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- summarise key provisions of relevant legislation from all levels of government that may affect aspects of business operations
- explain organisational policy and procedures for customer service, including handling customer complaints
- provide examples of verifiable evidence that could be used to review customer satisfaction
- outline the interpersonal skills needed for serving customers, including customers with specific needs.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- office equipment and technology
- workplace documents, organisational policies and procedures for customer service
- examples of customer complaints and feedback
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBCUS501 Manage quality customer service

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0 Version created to clarify assessment conditions
Release 1	This version first released with Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and manage organisational systems for quality customer service
- develop and review plans, policies and procedures for delivering and monitoring quality customer service
- implement policies and procedures to ensure quality customer service
- solve complex customer complaints and system problems that lead to poor customer service
- monitor and assist teams to meet customer service requirements
- develop, procure and use human and physical resources to support quality customer service delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation relevant to customer service
- describe organisational policy and procedures for customer service including handling customer complaints
- identify service standards and best practice models
- summarise public relations and product promotion
- outline techniques for dealing with customers including customers with specific needs

- explain techniques for solving complaints including the principles and techniques involved in the management and organisation of:
 - customer behaviour
 - customer needs research
 - customer relations
 - ongoing product and/or service quality
 - problem identification and resolution
 - quality customer service delivery
 - record keeping and management methods
 - strategies for monitoring, managing and introducing ways to improve customer service relationships
 - strategies to obtain customer feedback.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the customer service field of work and include access to:

- legislation, regulations and codes of practice related to customer service
- business technology
- workplace documentation and resources
- complex customer complaints
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for BSBFLM306 Provide workplace information and resourcing plans

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use management information system to collect, store and retrieve data to support the preparation of business plans and/or budgets
- involve the work team in planning and budget preparation
- estimate resource needs and usage according to organisational requirements and allocating or acquiring resources within limits of own role.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe information contained in management information systems
- discuss basic financial concepts relating to operational plans and budgets
- list the main requirements of a business plan
- outline data required to prepare resource proposals
- outline methods to gain efficiencies in operational resource management.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to contribute to the effectiveness of the work team. It involves planning with the team to meet expected outcomes, developing team cohesion, participating in and facilitating the work team, and communicating with the management of the organisation.

It applies to individuals who play a prominent part in motivating, mentoring, coaching and developing team cohesion through team leadership and forming the link between the management of the organisation and the team members. At this level, work will normally be carried out within known routines, methods and procedures, and may also involve complex or non-routine activities that require some discretion and judgement.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Frontline Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Contribute to team outcomes	1.1 Consult team members to identify team purpose, roles, responsibilities, goals, plans and objectives 1.2 Support team members to meet expected outcomes

ELEMENT	PERFORMANCE CRITERIA
2 Support team cohesion	<p>2.1 Encourage team members to participate in the planning, decision making and operational aspects of the work team to their level of responsibility</p> <p>2.2 Encourage team members to take responsibility for their own work and to assist each other in undertaking required roles and responsibilities</p> <p>2.3 Provide feedback to team members to encourage, value and reward team members' efforts and contributions</p> <p>2.4 Identify and address issues, concerns and problems identified by team members, or refer to relevant persons as required</p>
3 Participate in work team	<p>3.1 Actively encourage and support team members to participate in team activities and communication processes and to take responsibility for their actions</p> <p>3.2 Support the team to identify and resolve problems which impede its performance</p> <p>3.3 Utilise own contribution to work team to serve as a role model for others and enhance the organisation's image within the work team, the organisation and with clients/customers</p>
4 Communicate with management	<p>4.1 Maintain open communication with line manager/management at all times</p> <p>4.2 Communicate information from line manager/management to the team</p> <p>4.3 Communicate unresolved issues to line manager/management and follow up to ensure action is taken in response to these matters</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Writing	2.3, 2.4, 4.2, 4.3	<ul style="list-style-type: none"> Uses appropriate vocabulary, grammatical structures and conventions to communicate information, matching style to purpose and audience
Oral	1.1, 1.2, 2.1-2.4, 3.1,	<ul style="list-style-type: none"> Presents ideas and seeks feedback from others using vocabulary and non-verbal features appropriate to the

Communication	3.2, 4.1-4.3	<p>audience</p> <ul style="list-style-type: none"> Participates in open discussions to elicit the views of others by asking questions and listening to responses
Navigate the world of work	1.1	<ul style="list-style-type: none"> Ensures that team members are aware of their rights and responsibilities in the workplace, including workplace safety
Interact with others	1.1, 1.2, 2.1-2.4, 3.1, 3.2, 4.1-4.3	<ul style="list-style-type: none"> Collaborates, supports and cooperates with others to achieve work outcomes, and encourages others to do the same Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role Recognises importance of own interpersonal skills in projecting a positive image to others in work context Understands the need to modify own communication style to accommodate individual differences
Get the work done	1.1, 2.4, 4.1, 4.3	<ul style="list-style-type: none"> Plans and implements tasks required to achieve required outcomes Recognises and responds to problems related to role and seeks assistance when problems are beyond immediate responsibilities

Assessment Requirements for BSBFLM312 Contribute to team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- discuss and clarify goals and responsibilities with a team of people
- apply management and communication skills with a range of people that:
 - provides direction and leadership
 - assists individuals to achieve goals
 - motivates and builds team cohesion
 - fosters contribution of and respect for ideas
- apply techniques for resolving problems within organisational and legislative requirements
- communicate effectively with management including escalating problems outside own area of responsibility
- manage communication of information to, and between, the team.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list organisational goals, objectives and plans that relate to the team
- identify legislation, regulations, standards or codes of practice that may impact team performance and outcomes
- describe the organisational structure with reference to the organisational chart
- describe options for addressing performance issues in the organisation
- explain the principles and techniques of:
 - group dynamics and processes
 - motivation

- negotiation
- explain why considering individual behaviour and differences is important to a manager.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management field of work and include access to:

- relevant workplace documentation and resources
- relevant legislation
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBHRM405 Support the recruitment, selection and induction of staff

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare job descriptions
- use job descriptions to support sourcing, selecting and appointing suitable staff
- use different advertising channels to promote vacancies and/or establish a potential talent pool
- consult with managers to gain approvals
- develop selection criteria and interview questions in consultation with relevant personnel
- schedule interviews and advise relevant people of times, dates and venues
- participate in interviews and other selection techniques including assessing candidates against selection criteria to short list them
- obtain referees' reports
- prepare and distribute a selection report including feedback to give unsuccessful candidates
- advise unsuccessful candidates of the results
- secure preferred candidate's agreement and provide an employment contract
- advise other staff of the successful candidate and arrange induction.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify documentation required for recruitment, selection and induction
- explain human resources life cycle and the place of recruitment and selection
- identify legislation relevant to recruitment, selection and induction of staff
- describe channels and technology to advertise vacancies

- explain a range of interviewing techniques and other selection processes and their application.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- workplace policies and procedures
- business technology
- position descriptions
- legislation, regulations, Codes and Standards relevant to staff recruitment, selection and induction
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBHRM506 Manage recruitment selection and induction processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage all aspects of recruitment selection and induction processes in accordance with organisational policies and procedures.

It applies to individuals or human resource personnel who take responsibility for managing aspects of selecting new staff and orientating those staff in their new positions. It is not assumed that the individual will be directly involved in the selection processes themselves, although this may well be the case.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Human Resource Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Develop recruitment, selection and induction policies and procedures	1.1 Analyse strategic and operational plans and policies to identify relevant policies and objectives 1.2 Develop recruitment, selection and induction policies and procedures and supporting documents 1.3 Review options for technology to improve efficiency and effectiveness of recruitment and selection process

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Obtain support for policies and procedures from senior managers</p> <p>1.5 Trial forms and documents supporting policies and procedures and make necessary adjustments</p> <p>1.6 Communicate policies and procedures to relevant staff and provide training if required</p>
2 Recruit and select staff	<p>2.1 Determine future human resource needs in collaboration with relevant managers and sections</p> <p>2.2 Ensure current position descriptors and person specifications for vacancies are used by managers and others involved in recruitment, selection and induction processes</p> <p>2.3 Provide access to training and other forms of support to all persons involved in recruitment and selection process</p> <p>2.4 Ensure advertising of vacant positions complies with organisational policy and legal requirements</p> <p>2.5 Utilise specialists where necessary</p> <p>2.6 Ensure selection procedures are in accordance with organisational policy and legal requirements</p> <p>2.7 Ensure processes for advising applicants of selection outcome are followed</p> <p>2.8 Ensure job offers and contracts of employment are executed promptly, and new appointments are provided with advice about salary, terms and conditions</p>
3 Manage staff induction	<p>3.1 Provide access to training and ongoing support for all persons engaged in staff induction</p> <p>3.2 Check induction processes are followed across the organisation</p> <p>3.3 Oversee management of probationary employees and provide them with feedback until their employment is confirmed or terminated</p> <p>3.4 Obtain feedback from participants and relevant managers on extent induction process is meeting its objectives</p> <p>3.5 Make refinements to induction policies and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.2, 2.4, 2.6, 2.7	<ul style="list-style-type: none"> Critically evaluates and applies content from a range of complex texts to determine legislative and business requirements
Writing	1.2-1.6, 2.1, 3.3-3.5	<ul style="list-style-type: none"> Demonstrates clear writing skills by selecting appropriate conventions and to express precise meaning relevant to context and audience
Oral Communication	1.4, 1.6, 2.1, 2.3, 3.3, 3.4	<ul style="list-style-type: none"> Draws on a repertoire of open questioning and active listening when seeking feedback from others Uses appropriate terminology and non-verbal features to present information and clarify understanding
Numeracy	2.8	<ul style="list-style-type: none"> Analyses numerical information to determine employees' remuneration packages Makes basic calculations to ensure work output is delivered in a timely manner
Navigate the world of work	1.1, 1.2, 1.5, 1.6, 2.4, 2.6	<ul style="list-style-type: none"> Understands and adheres to relevant organisational policies and procedures Develops or updates organisational policies to meet organisational objectives Considers own role in terms of its contribution to broader goals of work environment
Interact with others	1.4, 1.6, 2.1-2.3, 2.5, 2.7, 2.8, 3.1, 3.3, 3.4	<ul style="list-style-type: none"> Seeks expert advice and skills training where required Selects appropriate mode of communication for a specific purpose relevant to own role Uses effective communication skills to liaise with a range of people across the organisation
Get the work done	1.1-1.3, 1.5, 1.6, 2.1, 2.3, 2.7, 2.8, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> Plans and implements tasks required to deliver timely outcomes, negotiating some key aspects with others Monitors implementation of plans and adjusts as necessary Considers whether and how often others should be involved, using consultative or collaborative processes as an integral part of the decision-making process Analyses outcomes of decisions to identify improvement opportunities Actively identifies systems, devices and applications with potential to meet current and future needs

Assessment Requirements for BSBHRM506 Manage recruitment selection and induction processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop or critically analyse a policy and procedures framework for recruitment, selection and induction
- identify the need for recruitment
- prepare and oversee appropriate documentation required for recruitment
- select and advise job applicants appropriately
- manage the induction process
- comply with relevant legislation and organisational requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe recruitment and selection methods, including assessment centres
- explain the concept of outsourcing
- describe the purpose of employee contracts and industrial relations
- summarise relevant legislation, regulations, standards and codes of practice that may affect recruitment, selection and induction
- explain why terms and conditions of employment are an important aspect of recruitment
- explain the relevance of psychometric and skills testing programs to recruitment.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce development – human resource development field of work and include access to:

- an appropriate range of documentation and resources normally used in the workplace
- relevant organisational policies and procedures
- relevant legislation, regulations and codes of practice
- business technology.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBINM501 Manage an information or knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to organise training for others for an information or knowledge management system and to manage the use of the system.

It applies to individuals who are responsible for seeing that key information and corporate knowledge are retained, accessible to others and improve business outcomes.

The unit applies to information or knowledge management systems which comprise policies, protocols, procedures and practices to manage information or knowledge within the organisation and among relevant stakeholders.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Information Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1 Organise learning to use information or knowledge management system	1.1 Identify learning needs of relevant personnel and stakeholders for input into and use of an information or knowledge management system 1.2 Identify and secure human, financial and physical resources

ELEMENT	PERFORMANCE CRITERIA
	<p>required for learning activities to use an information or knowledge management system</p> <p>1.3 Organise and facilitate learning activities</p> <p>1.4 Promote and support use of the system throughout the organisation</p> <p>1.5 Monitor and document effectiveness of learning activities</p>
2 Manage use of information or knowledge management system	<p>2.1 Ensure implementation of policies and procedures for the information or knowledge management system are monitored for compliance, effectiveness and efficiency</p> <p>2.2 Address implementation issues and problems as they arise</p> <p>2.3 Monitor integration and alignment with data and information systems</p> <p>2.4 Collect information on achievement of performance measures</p> <p>2.5 Manage contingencies such as system failure or technical difficulties by accessing technical specialist help as required</p>
3 Review use of information or knowledge management system	<p>3.1 Analyse effectiveness of system and report on strengths and limitations of the system</p> <p>3.2 Review business and operational plan and determine how effectively the system is contributing to intended outcomes</p> <p>3.3 Make recommendations for improvement to system, policy or work practices</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.5, 2.1-2.5, 3.1-3.3	<ul style="list-style-type: none"> Researches and critically analyses documentation from a variety of sources to determine requirements
Writing	1.1-1.5, 2.1-2.4, 3.2, 3.3	<ul style="list-style-type: none"> Prepares and produces documentation for a specific audience using clear and detailed language to convey explicit information, requirements and recommendations

Oral Communication	1.1, 1.2, 1.3, 1.4, 2.2, 2.5, 3.3	<ul style="list-style-type: none"> • Presents information using structure and language to suit the audience • Uses active listening and questioning and reading of verbal and non-verbal signals to clarify information and to confirm understanding
Navigate the world of work	2.1, 3.3	<ul style="list-style-type: none"> • Takes full responsibility for following policies, procedures and legislative requirements and identifies organisational implications of new legislation or regulation • Modifies or develops organisational policies and procedures to comply with legislative requirements and organisation goals
Interact with others	1.1-1.4, 2.5, 3.3	<ul style="list-style-type: none"> • Implements strategies for a diverse range of colleagues and clients in order to build rapport and foster strong relationships • Collaborates with others sharing information to build strong work groups and avoid behaviours that are not conducive to a productive environment • Elicits feedback and provides feedback to others in order to improve self or workgroup behaviours
Get the work done	1.1-1.5, 2.1-2.5, 3.1, 3.2	<ul style="list-style-type: none"> • Accepts responsibility for planning and sequencing complex tasks and workload, negotiating key aspects with others and taking into account capabilities, efficiencies and effectiveness • Monitors progress of plans and schedules and reviews and changes them to meet new demands and priorities • Applies systematic and analytical processes to address problems and make decisions in complex situations • Investigates new and innovative ideas as a means to continuously improve, work practices and processes • Uses and investigates new digital technologies and applications to manage and manipulate data and communicate effectively with others

Assessment Requirements for BSBINM501 Manage an information or knowledge management system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify learning needs and plan and implement learning activities to enable personnel to use information or knowledge management system including
 - providing human, financial and physical resources as required
 - use of coaching, mentoring, information sessions, workshops, training programs and e-learning as appropriate
- monitor performance and address issues and contingencies as they arise including
 - accessing technical specialists as required
 - correct application of policies and procedures for the information or knowledge management system
 - alignment and effectiveness of the policies and procedures
 - effectiveness of information or knowledge management system for intended outcomes
- recommend improvements to systems, policies and practices as appropriate.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislation, codes of practice and national standards relevant to privacy, freedom of information and knowledge management
- explain organisational policies and procedures including:
 - records management
 - information management
 - customer service
 - commercial confidentiality

- describe the organisational operations and existing data and information systems.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the knowledge management – information management field of work and include access to:

- relevant legislation, regulation, standards and codes
- relevant workplace systems, documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit defines skills, knowledge and outcomes required to plan and supervise the performance of the team and develop team cohesion.

It applies team leaders, supervisors and new emerging managers who have an important leadership role in the development of efficient and effective work teams.

Leaders at this level also provide leadership for the team and bridge the gap between the management of the organisation and the team members. As such they must 'manage up' as well as manage their team/s.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan to achieve team outcomes	<p>1.1 Lead the team to identify, establish and document team purpose, roles, responsibilities, goals, plans and objectives in consultation with team members</p> <p>1.2 Engage team members to incorporate innovation and</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>productivity measures in work plans</p> <p>1.3 Lead and support team members in meeting expected outcomes</p>
2. Lead team to develop cohesion	<p>2.1 Provide opportunities for input of team members into planning, decision making and operational aspects of work team</p> <p>2.2 Encourage and support team members to take responsibility for own work and to assist each other in undertaking required roles and responsibilities</p> <p>2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions</p> <p>2.4 Recognise and address issues, concerns and problems identified by team members or refer to relevant persons as required</p> <p>2.5 Model expected behaviours and approaches</p>
3. Participate in and facilitate work team	<p>3.1 Actively encourage team members to participate in and take responsibility for team activities and communication processes</p> <p>3.2 Give the team support to identify and resolve problems which impede its performance</p> <p>3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image within the work team, the organisation and with clients/customers</p>
4. Liaise with management	<p>4.1 Maintain open communication with line manager/management at all times</p> <p>4.2 Communicate information from line manager/management to the team</p> <p>4.3 Communicate unresolved issues, concerns and problems raised by the team/team members to line manager/management and ensure follow-up action is taken</p> <p>4.4 Communicate unresolved issues, concerns and problems related to the team/team members raised by line managers/management to the team and ensure follow-up to action is taken</p>

Assessment Requirements for BSBLDR403 Lead team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- apply knowledge of organisational goals, objectives and plans
- develop a team work plan including documentation of how it was generated and how it will be monitored
- identify and incorporate innovation and productivity measures into a team work plan
- communicate with team members and management to identify and establish the team purpose, roles, responsibilities, goals plans and objectives and resolve problems
- use techniques to consult, encourage, support and provide feedback to team members
- model team leadership behaviours and approaches
- liaise with management to develop the teamwork plan, resolve issues and ensure follow-up action is taken.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must explain principles and techniques associated with:

- delegation and work allocation
- goal setting
- group dynamics and processes
- individual behaviour and difference
- leadership styles
- motivation
- negotiation
- problem solving
- planning

- workplace innovation
- workplace productivity.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- information about the organisation, including organisational structure, goals, objectives and plans
- case studies, and where possible, real situations
- workplace equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR502 Lead and manage effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead and manage effective workplace relationships.

It applies to individuals in leadership or management who have a prominent role in establishing and managing processes and procedures to support workplace relationships taking into account the organisation's values, goals and cultural diversity.

At this level work will normally be carried out within complex and diverse methods and procedures, which require the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manage ideas and information	1.1 Ensure strategies and processes are in place to communicate information associated with the achievement of work responsibilities to all co-workers 1.2 Develop and/or implement consultation processes to ensure that

ELEMENT	PERFORMANCE CRITERIA
	<p>employees have the opportunity to contribute to issues related to their work role</p> <p>1.3 Facilitate feedback to employees on outcomes of the consultation processes</p> <p>1.4 Develop and/or implement processes to ensure that issues raised are resolved promptly or referred to relevant personnel</p>
2. Establish systems to develop trust and confidence	<p>2.1 Establish and/or implement policies to ensure that the organisation's cultural diversity and ethical values are adhered to</p> <p>2.2 Gain and maintain the trust and confidence of colleagues and external contacts through professional conduct</p> <p>2.3 Adjust own interpersonal communication styles to meet the organisation's cultural diversity and ethical environment and guide and support the work team in their personal adjustment process</p>
3. Manage the development and maintenance of networks and relationships	<p>3.1 Use networks to build workplace relationships providing identifiable outcomes for the team and the organisation</p> <p>3.2 Conduct ongoing planning to ensure that effective internal and external workplace relationships are developed and maintained</p>
4. Manage difficulties to achieve positive outcomes	<p>4.1 Develop and/or implement strategies to ensure that difficulties in workplace relationships are identified and resolved</p> <p>4.2 Establish processes and systems to ensure that conflict is identified and managed constructively in accordance with the organisation's policies and procedures</p> <p>4.3 Provide guidance, counselling and support to assist co-workers in resolving their work difficulties</p> <p>4.4 Develop and implement an action plan to address any identified difficulties</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Assessment Requirements for BSBLDR502 Lead and manage effective workplace relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and/or implement processes to manage ideas and information including:
 - communicating information to support others to achieve work responsibilities
 - facilitating employees' contributions to consultation on work issues
 - providing feedback on the outcomes of consultations
 - resolution of issues raised or referral to relevant personnel
- establish and/or implement policies to ensure that the organisation's cultural diversity and ethical values are adhered to
- provide leadership through own behaviour including:
 - professional conduct that promotes trust with internal and external contacts
 - adjusting own interpersonal communication style to meet the organisation's cultural diversity and ethical environment
- plan for, and manage, the use of networks to support identifiable outcomes for the team and the organisation
- develop and/or implement processes and systems to manage difficulties including:
 - identifying and resolving conflicts and other difficulties according to organisational policies and procedures
 - planning how to address difficulties
 - providing guidance, counselling and support to assist co-workers in resolving their work difficulties.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how systems, policies and procedures can support the development of effective work relationships focusing on interpersonal styles, communications, consultation, cultural and social sensitivity, networking and conflict resolution
- outline legislation relevant to managing effective workplace relationships.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLDR511 Develop and use emotional intelligence

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit covers the development and use of emotional intelligence to increase self-awareness, self-management, social awareness and relationship management in the context of the workplace.

It includes identifying the impact of own emotions on others in the workplace, recognising and appreciating the emotional strengths and weaknesses of others, promoting the development of emotional intelligence in others and utilising emotional intelligence to maximise team outcomes.

It applies to managers who are required to identify, analyse, synthesise and act on information from a range of sources and who deal with unpredictable problems as part of their job role. They use initiative and judgement to organise the work of self and others and plan, evaluate and co-ordinate the work of teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify the impact of	1.1 Identify and use evaluation criteria to determine own emotional

ELEMENT	PERFORMANCE CRITERIA
own emotions on others in the workplace	<p>strengths and weaknesses</p> <p>1.2 Identify personal stressors and own emotional states related to the workplace</p> <p>1.3 Analyse and document potential emotional triggers in workplace situations which may require determine appropriate emotional responses</p> <p>1.4 Evaluate the impact of own workplace behaviours that demonstrate management of emotions</p> <p>1.5 Use self-reflection and feedback from others to improve development of own emotional intelligence</p>
2. Recognise and address the emotional strengths and weaknesses of others	<p>2.1 Respond to the emotional states of co-workers and assess emotional cues</p> <p>2.2 Develop a plan for identifying and responding appropriately to a range of cultural expressions of emotions</p> <p>2.3 Apply techniques to demonstrate flexibility and adaptability in dealing with others</p> <p>2.4 Demonstrate consideration of the emotions of others when making decisions</p>
3. Promote the development of emotional intelligence in others	<p>3.1 Create opportunities for others to express their thoughts and feelings</p> <p>3.2 Assist others to understand the effect of their behaviour and emotions on others in the workplace</p> <p>3.3 Develop and implement plans to encourage the self-management of emotions in others</p> <p>3.4 Develop and implement plans to encourage others to develop their own emotional intelligence, to build productive relationships, and maximise workplace outcomes</p>
4. Utilise emotional intelligence to maximise team outcomes	<p>4.1 Identify opportunities to utilise emotional intelligence to increase team performance in line with organisational objectives</p> <p>4.2 Encourage a positive, inclusive emotional climate in the workplace</p> <p>4.3 Use the strengths of workgroup members to achieve team and/or organisational objectives</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Learning	<ul style="list-style-type: none"> Identifies and uses strategies to improve own emotional intelligence
Oral communication	<ul style="list-style-type: none"> Uses appropriate language and nonverbal features to present information and seek feedback Uses listening and questioning skills to elicit the views of others and to clarify or confirm understanding
Interact with others	<ul style="list-style-type: none"> Reflects on personal attributes and considers the impact on others and modifies approach to support development Adapts personal communication style to model behaviours, build trust and positive working relationships and to build understanding of emotional intelligence Leads a collaborative approach, using inquiring and inclusive techniques, to develop understanding and skills that enhances individuals' emotional intelligence
Get the work done	<ul style="list-style-type: none"> Leads processes to develop, implement and monitor plans and processes to ensure team engagement and effectiveness

Assessment Requirements for BSBLDR511 Develop and use emotional intelligence

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Performance Evidence

Evidence of the ability to:

- conduct an analysis to identify own emotional strengths, weaknesses, stressors, emotional states and triggers, incorporating feedback from others
- identify workplace situations and environments that may trigger an emotional response
- model behaviours that demonstrate management of emotions
- recognise the impact that cultural behaviours and beliefs may have on workplace interactions
- recognise and respond to the emotional states of others
- use emotional intelligence of self and others to enhance team performance
- promote the development of emotional intelligence in others.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- Key features of emotional intelligence principles and strategies
- Key elements of the relationship between emotionally effective people and the attainment of business objectives
- Key strategies for communicating with a diverse workforce which has varying cultural expressions of emotion
- Key features of emotional intelligence in the context of building workplace relationships.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies or, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBLDR802 Lead the strategic planning process for an organisation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead the development of high-level strategic plans that serve the vision and mission of an organisation. It addresses analysing the environment, identifying risks and opportunities, planning staffing requirements, succession planning, and establishing and monitoring financial and non-financial performance indicators.

Leadership is applied in order to engage people with the organisation's vision and goals and in developing and implementing the plan.

It applies to senior managers and business owners who use cognitive and creative skills to review, critically analyse, consolidate and synthesise knowledge, in order to generate ideas and provide solutions to complex problems. They use communication skills to demonstrate their understanding of theoretical concepts and to transfer knowledge and ideas to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership - Leadership

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

ELEMENT	PERFORMANCE CRITERIA
1. Initiate the strategic planning process	<p>1.1 Consult organisation's decision makers to determine the parameters that will be used for the planning process, including timeframes and budget</p> <p>1.2 Analyse current strategic planning documents to determine a methodology that is in keeping with the organisation's needs and past practice</p> <p>1.3 Identify stakeholders who will contribute to the plan's development</p> <p>1.4 Develop and document planning methodology within a project plan including resource allocation</p>
2. Conduct an environmental and organisational scan	<p>2.1 Research local and international best practice and trends in the organisation's field of operation</p> <p>2.2 Identify, collect and analyse demographic and trend data to provide profiling information about the organisation's market.</p> <p>2.3 Collect and analyse industry intelligence relating to competitors</p> <p>2.4 Identify key strengths, weaknesses, opportunities and threats (SWOT) to the organisation</p> <p>2.5 Identify major risk factors that could constrain the achievement of organisational goals in the short, medium and long term</p> <p>2.6 Consult stakeholders to identify issues and expectations affecting the organisation's operations</p>
3. Lead the establishment of organisational key directions and goals	<p>3.1 Engage staff and relevant stakeholders in establishing the major goals of the organisation</p> <p>3.2 Establish leadership to articulate the vision, mission and key goals of the organisation</p> <p>3.3 Provide leadership to establish the organisation's key result areas</p>
4. Lead the development of the plan's key activities and performance indicators	<p>4.1 Initiate and manage processes and delegations to develop detailed activities to achieve the organisation's goals</p> <p>4.2 Develop specific performance indicators to enable the measurement of success</p> <p>4.3 Cost and budget for resourcing levels to enable the plan to be enacted</p> <p>4.4 Gain commitment to the process and the plan</p> <p>4.5 Engage relevant stakeholders and participants to sign off and commit to the finalised strategic plan</p>
5. Manage the	5.1 Develop tactical or operational annual plans to facilitate

ELEMENT	PERFORMANCE CRITERIA
implementation process	<p>implementation of longer-term strategic plan</p> <p>5.2 Prioritise and resource (human, financial and capital) programs and operational tactics</p> <p>5.3 Analyse and plan for changes to processes or practices</p> <p>5.4 Plan human resource development and succession strategies to ensure long-term business viability</p> <p>5.5 Initiate strategies to skill the workforce in order to implement the plan</p> <p>5.6 Establish communication processes to inform and support staff and stakeholders through implementation of the plan</p>
6. Manage the evaluation process	<p>6.1 Establish and implement processes to monitor performance against agreed benchmarks and performance</p> <p>6.2 Monitor outcomes of the strategic and operational plans</p> <p>6.3 Undertake review or refinement of activities in light of changing conditions to ensure the attainment of the strategic plan goals</p>

Foundation Skills

Assessment Requirements for BSBLDR802 Lead the strategic planning process for an organisation

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- facilitate processes to develop an organisation-wide strategic plan including:
 - consulting with decision makers and other stakeholders
 - planning and budgeting for human, financial and capital resources and implementing staff development and succession plans
 - identifying and analysing information about the organisation and its environment including research about industry trends and practices, an environmental and organisational scan, existing organisational strategic planning documents, a strengths, weaknesses, opportunities and threats (SWOT) analysis and identifying risks to achieving the organisation's goals
 - aligning the strategic plan to the vision, mission and key goals of the organisation
 - identifying performance indicators
 - communicating with and engaging stakeholders in the development, sign off and implementation of the plan
- harness resources, staff and stakeholder commitment to ensure implementation of the strategic plan by consulting and engaging with them throughout the process
- implement and evaluate the strategic plan including developing tactical or operational annual plans and refining the plan to respond to changed conditions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline contractual requirements and implications for the business
- explain financial management requirements and processes of the business
- describe industry trends and practices of relevance to the organisation's strategic direction

- specify organisational resource requirements to undertake projects
- describe processes and procedures for identifying strategic goals setting and activities
- describe risk management processes such as SWOT
- outline strategic and operational planning processes

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational and industry information and data
- workplace documents including strategic planning documentation
- case studies and, where available, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBLED401 Develop teams and individuals

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to determine individual and team development needs and to facilitate the development of the workgroup.

It applies to individuals with a broad knowledge of learning and development who apply their skills in addressing development needs to meet team objectives. They may have responsibility to provide guidance or to delegate aspects of tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Workforce Development – Learning and Development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine development needs	1.1 Systematically identify and implement learning and development needs in line with organisational requirements 1.2 Ensure that a learning plan to meet individual and group training and development needs is collaboratively developed, agreed to and

ELEMENT	PERFORMANCE CRITERIA
	<p>implemented</p> <p>1.3 Encourage individuals to self-evaluate performance and identify areas for improvement</p> <p>1.4 Collect feedback on performance of team members from relevant sources and compare with established team learning needs</p>
2. Develop individuals and teams	<p>2.1 Identify learning and development program goals and objectives, ensuring a match to the specific knowledge and skill requirements of competency standards relevant to the industry</p> <p>2.2 Ensure that learning delivery methods are appropriate to the learning goals, the learning style of participants, and availability of equipment and resources</p> <p>2.3 Provide workplace learning opportunities, and coaching and mentoring assistance to facilitate individual and team achievement of competencies</p> <p>2.4 Create development opportunities that incorporate a range of activities and support materials appropriate to the achievement of identified competencies</p> <p>2.5 Identify and approve resources and time lines required for learning activities in accordance with organisational requirements</p>
3. Monitor and evaluate workplace learning	<p>3.1 Use feedback from individuals or teams to identify and implement improvements in future learning arrangements</p> <p>3.2 Assess and record outcomes and performance of individuals/teams to determine the effectiveness of development programs and the extent of additional development support</p> <p>3.3 Negotiate modifications to learning plans to improve the efficiency and effectiveness of learning</p> <p>3.4 Document and maintain records and reports of competency according to organisational requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Learning	1.1-1.4, 2.1-2.4, 3.1, 3.3	<ul style="list-style-type: none"> • Uses structured approaches to set goals, monitor progress and adjust learning approaches for self and others • Builds on knowledge and experience to facilitate interaction and learning with others
Reading	1.1, 1.2, 1.4, 2.1, 2.2, 2.4, 2.5, 3.1-3.4	<ul style="list-style-type: none"> • Analyses textual information from a range of sources to identify organisational requirements • Analyses information from a range of sources to evaluate performance
Writing	1.1, 1.2, 1.4, 2.1, 2.5, 3.1-3.4	<ul style="list-style-type: none"> • Develops materials to suit the requirements of different roles and individuals in the organisation • Maintains records using correct technical and organisational vocabulary
Oral Communication	1.2, 1.3, 1.4, 2.3, 3.1, 3.3	<ul style="list-style-type: none"> • Uses vocabulary appropriate to context and to establish a supportive and learning environment • Uses listening and questioning techniques to confirm or show understanding of different perspectives
Navigate the world of work	1.1, 2.5, 3.4	<ul style="list-style-type: none"> • Recognises and responds to explicit and implicit organisational procedures and protocols Understands how own role meshes with others and contributes to broader goals
Interact with others	1.2, 1.3, 1.4, 2.2, 2.3, 3.1, 3.3	<ul style="list-style-type: none"> • Selects and uses appropriate conventions and protocols when communicating with co-workers in a range of work contexts • Recognises the importance of building rapport to establish effective working relationships • Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction • Negotiates with others to achieve joint/agreeable outcomes playing an active role in facilitating consensus in potentially contentious situations
Get the work done	1.1, 1.2, 1.4, 2.1, 2.2, 2.3, 2.5, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> • Uses logical planning processes to organise, implement and monitor learning and development needs • Systematically gathers and analyses all relevant information and evaluates options to make informed decisions • Evaluates outcomes of decisions to identify opportunities for improvement

Assessment Requirements for BSBLED401 Develop teams and individuals

Modification History

Release	Comments
Release 2	This version released with BSB Business Services Training Package Version 2.0. Version created to clarify assessment requirements
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- systematically identify and implement learning opportunities for others
- collect feedback on team and individual performance
- give and receive feedback from team members to encourage participation in and effectiveness of the team
- collaboratively develop learning plans to match skill needs of individuals and groups
- provide mentoring and coaching assistance to teams and individuals
- monitor and review workplace learning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe facilitation techniques to encourage team development and improvement
- outline organisational policies, plans and procedures for developing teams
- identify career paths and competency standards relevant to the industry.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the workforce learning and development field of work and include access to:

- office equipment and resources
- learning and development plans, policies and procedures
- case studies and, where available, real situations
- interaction with others.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams and individuals by modelling high standards of conduct to reflect the organisation's standards and values.

It applies to individuals who are making the transition from being a team member to taking responsibility for the work and performance of others and providing the first level of leadership within the organisation. These managers have a strong influence on the work culture, values and ethics of the teams they supervise.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Model high standards of management performance and behaviour	1.1 Ensure management performance and behaviour meets the organisation's requirements 1.2 Ensure management performance and behaviour serves as a positive role model for others 1.3 Develop and implement performance plans in accordance with organisation's goals and objectives 1.4 Establish and use key performance indicators to meet

ELEMENT	PERFORMANCE CRITERIA
	organisation's goals and objectives
2. Enhance organisation's image	<p>2.1 Use organisation's standards and values in conducting business</p> <p>2.2 Question, through established communication channels, standards and values considered to be damaging to the organisation</p> <p>2.3 Ensure personal performance contributes to developing an organisation which has integrity and credibility</p>
3. Make informed decisions	<p>3.1 Gather and organise information relevant to the issue/s under consideration</p> <p>3.2 Facilitate individual's and team's active participation in decision-making processes</p> <p>3.3 Examine options and assess associated risks to determine preferred course/s of action</p> <p>3.4 Ensure decisions are timely and communicate them clearly to individuals and teams</p> <p>3.5 Prepare plans to implement decisions and ensure they are agreed by relevant individuals and teams</p> <p>3.6 Use feedback processes effectively to monitor the implementation and impact of decisions</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 1.4, 2.1, 3.1, 3.3, 3.5, 3.6	<ul style="list-style-type: none"> Gathers, interprets and analyses text relating to organisational goals, standards and values to aid planning and decision making
Writing	1.3, 1.4, 3.1, 3.3, 3.5, 3.6	<ul style="list-style-type: none"> Records and reports key information related to the organisational goals, standards and objectives Researches, plans and prepares documentation for relevant stakeholders
Oral Communication	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	<ul style="list-style-type: none"> Uses appropriate structure and language when developing performance plans, or when seeking and providing information about organisational goals and

		objectives
Numeracy	1.4	<ul style="list-style-type: none"> Identifies and comprehends mathematical information in familiar texts to establish key performance indicators
Navigate the world of work	1.1, 1.2, 1.3, 1.4, 2.1, 2.3	<ul style="list-style-type: none"> Understands how own role meshes with others and contributes to broader work goals Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.2, 1.3, 2.2, 2.3, 3.2, 3.4, 3.5, 3.6	<ul style="list-style-type: none"> Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective outcomes Recognises the importance of taking audience, purpose and contextual factors into account when making decisions about what to communicate with whom, why and how
Get the work done	1.1, 1.3, 1.4, 3.1, 3.2, 3.3, 3.4, 3.5, 3.6	<ul style="list-style-type: none"> Develops plans to manage relatively complex, non-routine tasks with an awareness of how they contribute to longer term operational and strategic goals Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria Evaluates effectiveness of decisions in terms of how well they meet stated goals

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

Organisation's standards and values must be identified by considering:	<ul style="list-style-type: none"> explicitly stated values values that are implied by the way the organisation conducts its business.

Assessment Requirements for BSBMGT401 Show leadership in the workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the organisation's standards and values, whether stated or implied by the way the organisation conducts its business
- evaluate own behaviour and performance against these and adjust to achieve required standards
- develop and implement performance plans and key performance indicators (KPIs) to meet organisation's goals and objectives
- use established communication channels to raise questions about standards and values that may be damaging to the organisation
- ensure own behaviour and performance contributes to the integrity and credibility of the organisation
- facilitate processes to make decisions that are based on:
 - relevant information
 - examination of options and associated risks
 - input from relevant people
- communicate about making and implementing decisions including:
 - facilitating agreement on the preferred course of action and implementation plans
 - monitoring and feedback on the implementation and impact of decisions.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify an organisation's standards and values when they are:
 - stated

- implied
- articulate organisational values and expectations of behaviour
- explain basic theory of group behaviour
- outline the organisation's process for raising questions about standards and values
- give examples of behaviours and performance that would typically be considered damaging to an organisation
- explain concepts including:
 - organisational values
 - role modelling
 - integrity and credibility
 - leadership.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to implement the operational plan by monitoring and adjusting operational performance, planning and acquiring resources and providing reports on performance as required.

It applies to individuals who plan activities to achieve the measurable, stated objectives of the team and the organisation. At this level work will normally be carried out within routine and non-routine methods and procedures which require planning, evaluation, leadership and guidance of others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Implement operational plan	1.1 Collate, analyse and organise details of resource requirements in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Implement operational plans to contribute to the achievement of organisation's performance/business plan 1.3 Identify and use key performance indicators (KPIs) to monitor

ELEMENT	PERFORMANCE CRITERIA
	<p>operational performance</p> <p>1.4 Manage contingencies by adjusting the implementation of the operational plan in consultation with others</p> <p>1.5 Provide assistance in the development and presentation of proposals for resource requirements in line with operational planning processes</p>
2. Implement resource acquisition	<p>2.1 Recruit and induct employees within organisation's policies, practices and procedures</p> <p>2.2 Implement plans for acquisition of physical resources and services within organisation's policies, practices and procedures and in consultation with relevant personnel</p>
3. Monitor operational performance	<p>3.1 Monitor performance systems and processes to assess progress in achieving profit/productivity plans and targets</p> <p>3.2 Analyse and use budget and actual financial information to monitor profit/productivity performance</p> <p>3.3 Identify unsatisfactory performance and take prompt action to rectify the situation according to organisational policies</p> <p>3.4 Provide mentoring, coaching and supervision to support individuals and teams to use resources effectively, economically and safely</p> <p>3.5 Present recommendations for variation to operational plans to the designated persons/groups and gain approval</p> <p>3.6 Implement systems, procedures and records associated with performance in accordance with organisation's requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.4	<ul style="list-style-type: none"> Actively reinforces learning by applying new knowledge and skills in mentoring, coaching and supervising others
Reading	1.1-1.5, 2.1, 2.2, 3.1, 3.2, 3.6	<ul style="list-style-type: none"> Identifies, interprets, analyses and reviews textual information related to the operational plan and

		monitoring of operational performance
Writing	1.1-1.5, 2.1, 2.2, 3.2-3.6	<ul style="list-style-type: none"> Communicates relationships between ideas and information, matching style of writing to purpose and audience Researches, plans and prepares workplace documentation for relevant stakeholders using organisational formats
Oral Communication	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Participates in a variety of spoken exchanges with a range of audiences varying structure and language to suit the audience
Numeracy	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> Selects and uses familiar mathematical techniques to organise timely supply of adequate resources for the operational plan and to use budgetary information to monitor performance
Navigate the world of work	1.5, 2.1, 2.2, 3.3, 3.4, 3.6	<ul style="list-style-type: none"> Monitors adherence to organisational policies and procedures and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.4, 1.5, 2.1, 2.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with diverse individuals to build rapport, seek or present information Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group communication, influencing direction and taking a leadership role on occasion
Get the work done	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3, 3.6	<ul style="list-style-type: none"> Takes responsibility for planning, organising, implementing and monitoring tasks required to achieve required outcomes Uses systematic, analytical processes in complex, non-routine situations, setting goals, gathering relevant information and identifying and evaluating options against agreed criteria Evaluates effectiveness of decisions in terms of how well they met stated goals Recognises and addresses an increasing range of familiar problems by implementing contingency plans

Assessment Requirements for BSBMGT402 Implement operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- interact with a range of people/groups to identify resource requirements, performance objectives, systems, procedures and records relating to the operational plan
- vary the operational plan and gain approval to deal with contingencies
- monitor operational performance against the performance objectives and budgets and take action to rectify unsatisfactory performance
- plan and acquire physical and human resources using organisation's systems and procedures
- manage and support personnel to achieve performance objectives. including inducting new employees and providing mentoring and coaching
- present information and recommendations to support implementation and variation of the operational plan
- document and provide reports on performance as required by the organisation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe performance monitoring systems and processes
- describe methods for problem solving
- explain how organisational policies and procedures relate to the operational plan.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- organisational operational plans, policies and procedures
- workplace documentation and resources including budgets, physical and human resource procurement documentation, employee induction and performance monitoring procedures
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT405 Provide personal leadership

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to display high levels of personal leadership and be a role model within the work environment.

It applies to individuals who have a leadership role and how they conduct themselves, the initiative they take in influencing, assisting and guiding others, and the way they manage their own role and responsibilities.

Competence in this unit requires consistently high levels of self-management and behaviours that exemplify the desired standards within the organisation. The individual must earn the trust and respect of the team and act as a role model at all times.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Influence individuals and teams in a positive manner	1.1 Encourage, value and reward individual and team efforts and contributions 1.2 Promote accountability of work undertaken by individuals/teams by communicating roles, responsibilities and

ELEMENT	PERFORMANCE CRITERIA
	<p>expectations clearly</p> <p>1.3 Gain positive acceptance and support for information and ideas from the team</p>
2. Make informed decisions	<p>2.1 Gather and organise information relevant to issue/s under consideration</p> <p>2.2 Invite individuals/teams to actively participate in decision-making processes</p> <p>2.3 Determine preferred course of action after risks and options are examined and assessed</p> <p>2.4 Communicate decisions to individuals/teams clearly and in a timely manner</p> <p>2.5 Prepare plans to implement decisions after agreement with relevant individuals/team</p> <p>2.6 Monitor implementation and impact of decision using reliable feedback processes</p>
3. Enhance image of the enterprise	<p>3.1 Conduct business consistent with enterprise standards and values</p> <p>3.2 Note and promptly discuss with appropriate persons, any inappropriate values and standards exhibited within the organisation, using established communication channels</p> <p>3.3 Consistently display a very high standard of personal presentation in line with organisational expectations and policies</p>
4. Demonstrate high standards of personal and management performance	<p>4.1 Contribute to developing a reputable organisation which has integrity and credibility, through personal performance and own behaviour</p> <p>4.2 Ensure standards of personal and management performance are consistent with enterprise requirements</p> <p>4.3 Provide a positive role model for others through personal and managerial performance</p> <p>4.4 Develop and implement plans in accordance with enterprise goals and objectives</p> <p>4.5 Develop, set and monitor key performance indicators and targets within team/enterprise business plans</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	2.1, 2.3, 2.5, 2.6, 4.4, 4.5	<ul style="list-style-type: none"> Gathers, interprets and analyses text within job specifications and processes to make informed decisions and provide personal leadership

Assessment Requirements for BSBMGT405 Provide personal leadership

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- acquire and use information to best advantage for achievement of team/project performance goals
- make decisions appropriate to achievement of team performance goals
- effectively manage work to achieve goals and results
- introduce and monitor practices to improve performance
- undertake effective consultation processes
- effectively use management information systems in achievement of team performance goals and objectives
- promote available learning methods to support team competence
- clearly and effectively communicate critical information to team, peers and management.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- list relevant coaching and mentoring techniques
- identify continuous improvement techniques and processes
- describe enterprise culture and values
- identify the enterprise mission, business goals and standards
- list relevant enterprise policies, procedures and guidelines
- identify relevant performance management policies, procedures and systems.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT502 Manage people performance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the performance of staff who report to them directly. Development of key result areas and key performance indicators and standards, coupled with regular and timely coaching and feedback, provide the basis for performance management.

It applies to individuals who manage people. It covers work allocation and the methods to review performance, reward excellence and provide feedback where there is a need for improvement.

The unit makes the link between performance management and performance development, and reinforces both functions as a key requirement for effective managers.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Allocate work	1.1 Consult relevant groups and individuals on work to be allocated and resources available

ELEMENT	PERFORMANCE CRITERIA
	<p>1.2 Develop work plans in accordance with operational plans</p> <p>1.3 Allocate work in a way that is efficient, cost effective and outcome focussed</p> <p>1.4 Confirm performance standards, Code of Conduct and work outputs with relevant teams and individuals</p> <p>1.5 Develop and agree performance indicators with relevant staff prior to commencement of work</p> <p>1.6 Conduct risk analysis in accordance with the organisational risk management plan and legal requirements</p>
2. Assess performance	<p>2.1 Design performance management and review processes to ensure consistency with organisational objectives and policies</p> <p>2.2 Train participants in the performance management and review process</p> <p>2.3 Conduct performance management in accordance with organisational protocols and time lines</p> <p>2.4 Monitor and evaluate performance on a continuous basis</p>
3. Provide feedback	<p>3.1 Provide informal feedback to staff on a regular basis</p> <p>3.2 Advise relevant people where there is poor performance and take necessary actions</p> <p>3.3 Provide on-the-job coaching when necessary to improve performance and to confirm excellence in performance</p> <p>3.4 Document performance in accordance with the organisational performance management system</p> <p>3.5 Conduct formal structured feedback sessions as necessary and in accordance with organisational policy</p>
4. Manage follow up	<p>4.1 Write and agree on performance improvement and development plans in accordance with organisational policies</p> <p>4.2 Seek assistance from human resources specialists, where appropriate</p> <p>4.3 Reinforce excellence in performance through recognition and continuous feedback</p> <p>4.4 Monitor and coach individuals with poor performance</p> <p>4.5 Provide support services where necessary</p> <p>4.6 Counsel individuals who continue to perform below expectations and implement the disciplinary process if necessary</p> <p>4.7 Terminate staff in accordance with legal and organisational</p>

ELEMENT	PERFORMANCE CRITERIA
	requirements where serious misconduct occurs or ongoing poor-performance continues

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	2.2, 3.3, 4.4	<ul style="list-style-type: none"> Consolidates and improves own knowledge and skills by coaching, mentoring or training others
Reading	1.2, 1.6, 2.4	<ul style="list-style-type: none"> Gathers, interprets and analyses texts in organisational documents to facilitate performance management
Writing	1.2, 1.4, 1.5, 1.6, 2.1, 2.3, 2.4, 3.4, 3.5, 4.1, 4.7	<ul style="list-style-type: none"> Plans and prepares documents for allocating work and managing performance suitable for the target audience and in accordance with organisational requirements
Oral Communication	1.1, 1.4, 1.5, 2.2, 2.3, 3.1, 3.2, 3.3, 3.5, 4.2-4.7	<ul style="list-style-type: none"> Uses language and structure appropriate to context and audience to explain expected standards of performance, provide feedback and coach staff
Numeracy	1.3, 1.4, 1.5, 1.6, 2.1, 2.4, 3.4, 4.1	<ul style="list-style-type: none"> Extracts and evaluates mathematical information embedded in a range of tasks and text relating to performance standards and risk analysis
Navigate the world of work	1.2, 1.6, 2.1, 2.3, 3.4, 3.5, 4.1, 4.7	<ul style="list-style-type: none"> Appreciates the implications of legal and regulatory responsibilities related to own work and the organisation as a whole Monitors adherence to organisational policies and procedures
Interact with others	1.1, 1.3, 1.4, 1.5, 2.2, 3.1, 3.2, 3.3, 4.2-4.6	<ul style="list-style-type: none"> Recognises and applies the protocols governing what to communicate to whom and how in a range of work contexts Collaborates with others to achieve joint outcomes, influencing direction and taking a leadership role on occasion
Get the work done	1.2, 1.3, 1.5, 1.6, 2.1, 2.4, 4.1, 4.2	<ul style="list-style-type: none"> Sequences and schedules complex activities, monitors implementation and manages relevant communication Seeks advice, feedback and support as required to assist in the decision-making process Uses experiences to reflect on the ways in which

		variables impact on performance

Assessment Requirements for BSBMGT502 Manage people performance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- consult with relevant stakeholders to identify work requirements, performance standards and agreed performance indicators
- develop work plans and allocate work to achieve outcomes efficiently and within organisational and legal requirements
- monitor, evaluate and provide feedback on performance and provide coaching or training, as needed
- reinforce excellence in performance through recognition and continuous feedback
- seek assistance from human resources specialists where appropriate
- keep records and documentation in accordance with the organisational performance management system.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline relevant legislative and regulatory requirements
- outline relevant awards and certified agreements
- explain performance measurement systems utilised within the organisation
- explain unlawful dismissal rules and due process
- describe staff development options and information.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead and manage continuous improvement systems and processes. Particular emphasis is on the development of systems and the analysis of information to monitor and adjust performance strategies, and to manage opportunities for further improvements.

It applies to individuals who take an active role in managing a continuous improvement process in order to achieve an organisation's objectives.

At this level, work will normally be carried out using complex and diverse methods and procedures which require the exercise of considerable discretion and judgement, using a range of problem-solving and decision-making strategies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Lead continuous improvement systems and processes	1.1 Develop strategies to ensure that team members are actively encouraged and supported to participate in decision-making processes, assume responsibility and exercise initiative as

ELEMENT	PERFORMANCE CRITERIA
	<p>appropriate</p> <p>1.2 Establish systems to ensure that the organisation's continuous improvement processes are communicated to stakeholders</p> <p>1.3 Ensure that change and improvement processes meet sustainability requirements</p> <p>1.4 Develop effective mentoring and coaching processes to ensure that individuals and teams are able to implement and support the organisation's continuous improvement processes</p> <p>1.5 Ensure that insights and experiences from business activities are captured and accessible through knowledge management systems</p>
2. Monitor and adjust performance strategies	<p>2.1 Develop strategies to ensure that systems and processes are used to monitor operational progress and to identify ways in which planning and operations could be improved</p> <p>2.2 Adjust and communicate strategies to stakeholders according to organisational procedures</p>
3. Manage opportunities for further improvement	<p>3.1 Establish processes to ensure that team members are informed of outcomes of continuous improvement efforts</p> <p>3.2 Ensure processes include recording of work team performance to assist in identifying further opportunities for improvement</p> <p>3.3 Consider areas identified for further improvement when undertaking future planning</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 1.4, 1.5, 2.1, 2.2, 3.3	<ul style="list-style-type: none"> Identifies and extracts relevant information from a range of complex texts Locates, interprets and analyses workplace documentation to gather information relating to continuous improvement
Writing	1.1, 1.2, 1.4, 1.5, 2.1, 2.2, 3.1-3.3	<ul style="list-style-type: none"> Develops complex texts related to continuous improvement processes according to organisational requirements

		<ul style="list-style-type: none"> Ensures the vocabulary, grammatical structures and conventions are appropriate for the context and target audience
Oral Communication	1.1, 1.2, 1.4, 2.2	<ul style="list-style-type: none"> Presents information to a range of audiences using appropriate structure and language Listens and comprehends information from a variety of spoken exchanges with clients, co-workers and other stakeholders Confirms understanding through questioning and active listening
Navigate the world of work	1.1-1.3, 2.1, 2.2	<ul style="list-style-type: none"> Develops strategies to enable compliance with legislative requirements and achievement of the organisation's goals Monitors adherence to organisational policies, procedures and protocols and considers own role in terms of its contribution to broader goals of the work environment
Interact with others	1.1, 1.2, 1.4, 2.2	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with colleagues and external stakeholders Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction and influencing direction
Get the work done	1.1, 1.2, 1.4, 1.5, 2.1, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> Takes responsibility for developing, implementing and monitoring systems and processes to achieve organisational outcomes Uses analytical and lateral thinking to review current practices and develop ideas for improvement Reflects on the ways in which digital systems and tools are used, or could be used, to achieve work goals

Assessment Requirements for BSBMGT516 Facilitate continuous improvement

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to establish systems and processes for continuous improvement that:

- facilitate effective contributions to and communications about continuous improvement processes and outcomes
- address sustainability requirements
- incorporate mentoring, coaching and other support to enable people to participate effectively in continuous improvement processes
- capture insights, experiences and ideas for improvements and incorporate them into the organisation's knowledge management systems and future planning.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how systems and procedures can support effective continuous improvement
- explain how continuous improvement systems and processes relate to other business systems and requirements including, knowledge management, quality, performance management and sustainability.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to develop and monitor implementation of the operational plan to provide efficient and effective workplace practices within the organisation's productivity and profitability plans.

Management at a strategic level requires systems and procedures to be developed and implemented to facilitate the organisation's operational plan.

This unit applies to individuals who manage the work of others and operate within the parameters of a broader strategic and/or business plan.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop operational plan	1.1 Research, analyse and document resource requirements and develop an operational plan in consultation with relevant personnel, colleagues and specialist resource managers 1.2 Develop and/or implement consultation processes as an

ELEMENT	PERFORMANCE CRITERIA
	<p>integral part of the operational planning process</p> <p>1.3 Ensure the operational plan includes key performance indicators to measure organisational performance</p> <p>1.4 Develop and implement contingency plans for the operational plan</p> <p>1.5 Ensure the development and presentation of proposals for resource requirements is supported by a variety of information sources and seek specialist advice as required</p> <p>1.6 Obtain approval for the plan from relevant parties and explain the plan to relevant work teams</p>
2. Plan and manage resource acquisition	<p>2.1 Develop and implement strategies to ensure that employees are recruited and/or inducted within the organisation's human resources management policies, practices and procedures</p> <p>2.2 Develop and implement strategies to ensure that physical resources and services are acquired in accordance with the organisation's policies, practices and procedures</p> <p>2.3 Recognise and incorporate requirements for intellectual property rights and responsibilities in recruitment and acquisition of resources and services</p>
3. Monitor and review operational performance	<p>3.1 Develop, monitor and review performance systems and processes to assess progress in achieving profit and productivity plans and targets</p> <p>3.2 Analyse and interpret budget and actual financial information to monitor and review profit and productivity performance</p> <p>3.3 Identify areas of under-performance, recommend solutions and take prompt action to rectify the situation</p> <p>3.4 Plan and implement systems to ensure that mentoring and coaching are provided to support individuals and teams to effectively, economically and safely use resources</p> <p>3.5 Negotiate recommendations for variations to operational plans and gain approval from designated persons/groups</p> <p>3.6 Develop and implement systems to ensure that procedures and records associated with documenting performance are managed in accordance with organisational requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.5, 2.1, 2.2, 3.1, 3.2, 3.3, 3.4, 3.6	<ul style="list-style-type: none"> Identifies and extracts relevant information from a range of complex texts Gathers, interprets and analyses workplace documentation to determine requirements for the operational plan
Writing	1.1-1.5, 2.1, 2.2, 3.1-3.6	<ul style="list-style-type: none"> Develops and documents a range of detailed texts relating to the management of an operational plan according to organisational requirements Ensures the vocabulary, grammatical structures and conventions are appropriate for the context and target audience
Oral Communication	1.1, 1.2, 1.5, 1.6, 3.4, 3.5	<ul style="list-style-type: none"> Presents information to a range of audiences using appropriate register, vocabulary and paralinguistic features Listens and comprehends information from a variety of spoken exchanges with clients, co-workers and other stakeholders Confirms understanding through questioning and active listening
Numeracy	1.1, 1.3, 1.4, 3.1-3.4	<ul style="list-style-type: none"> Selects and uses mathematical problem-solving strategies to organise resource requirements, performance benchmarks and financial viability of the operational plan
Navigate the world of work	2.1, 2.2, 3.4, 3.6	<ul style="list-style-type: none"> Monitors adherence to organisational policies, procedures and considers own role in terms of its contribution to broader goals of the work environment Appreciates the implications of legal responsibilities with specific reference to health and safety
Interact with others	1.1, 1.2, 1.5, 1.6, 3.5	<ul style="list-style-type: none"> Identifies and uses appropriate conventions and protocols when communicating with colleagues and external stakeholders Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction, influencing direction and taking a leadership role on occasion

Assessment Requirements for BSBMGT517 Manage operational plan

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- develop and implement an operational plan using a variety of information sources and consultation (including using specialist advice if required) which includes:
 - resource requirements
 - key performance indicators
 - monitoring processes
 - contingency plans
- communicate effectively with relevant stakeholders to explain the plan and supporting information, seek approvals, negotiate variations and engage work teams
- develop and implement strategies to achieve the operational plan within the organisation's policies, practices and procedures including:
 - recruiting, inducting and developing personnel
 - acquiring physical resources and services
 - protecting intellectual property
 - making variations to the plan
 - monitoring and documenting performance.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe models and methods for operational plans
- explain the role of an operational plan in achieving the organisation's objectives
- explain budgeting processes

- list alternative approaches to developing key performance indicators to meet business objectives
- outline the legislative and regulatory context relevant to the operational plan of the organisation
- outline the organisation's policies, practices and procedures that directly relate to the operational plan.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership field of work and include access to:

- relevant legislation and regulations
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBMKG413 Promote products and services

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to coordinate and review the promotion of an organisation's products and services.

It applies to individuals with a broad knowledge of the promotion of products and services specific to an organisation. They may have responsibility to provide guidance or to delegate aspects of these tasks to others.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Marketing

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan promotional activities	1.1 Identify and assess promotional activities to ensure compatibility with organisational requirements 1.2 Plan and schedule promotional activities according to the marketing needs of the organisation 1.3 Determine overall promotional objectives in consultation with designated individuals and groups 1.4 Ensure that timelines and costs for promotion of activities are

ELEMENT	PERFORMANCE CRITERIA
	<p>realistic and consistent with budget resources</p> <p>1.5 Develop action plans to provide details of products and services being promoted</p>
2. Coordinate promotional activities	<p>2.1 Ensure personnel and resources to support promotional activities are identified and prepared to facilitate the achievement of promotional goals</p> <p>2.2 Identify and agree roles and responsibilities for delivery of promotional services and allocate to relevant personnel</p> <p>2.3 Establish and conduct relationships with targeted groups in a manner which enhances the positive image of the organisation</p> <p>2.4 Use networks to assist in the implementation of promotional activities</p>
3. Review and report on promotional activities	<p>3.1 Analyse audience feedback and data to determine the impact of the promotional activity on the delivery of products and services</p> <p>3.2 Assess effectiveness of planning processes to identify possible improvements in future activities</p> <p>3.3 Collect feedback and provide to personnel and agencies involved in promotional activity</p> <p>3.4 Analyse costs and time lines to evaluate the benefits accruing from the promotional activities</p> <p>3.5 Prepare conclusions and recommendations from verifiable evidence and provide constructive advice on future directions of promotional activities</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 3.1	<ul style="list-style-type: none"> Interprets, analyses and collates textual information relevant to promotional activities from a range of sources
Writing	1.2, 1.5, 2.3, 3.1, 3.3, 3.5	<ul style="list-style-type: none"> Uses clear and specific language to develop formal and informal documents for different audiences in accordance with organisational requirements

Oral Communication	1.3, 2.3, 3.3, 3.5	<ul style="list-style-type: none"> Actively participates in verbal exchanges of ideas and elicits the views and opinions of others by listening and questioning Uses clear and specific language to clarify, explain and present information relating to the promotional activity
Numeracy	1.4, 1.5, 3.1, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Classifies, analyses and compares numeric information, including costs and timelines, relevant to the promotional activity
Navigate the world of work	1.1	<ul style="list-style-type: none"> Adheres to legislative requirements and organisational policies and procedures
Interact with others	1.3, 2.3, 2.4, 3.3, 3.5	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols with a range of stakeholders to project a professional image while seeking or sharing information Recognises the importance of building rapport to establish and maintain positive working relationships
Get the work done	1.2, 1.2, 1.4, 1.5, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Sequences and schedules complex activities, monitors implementation and manages relevant communication Uses systematic, analytical processes in complex, non-routine situations, gathering relevant information and identifying and evaluating options against agreed requirements Evaluates effectiveness of decisions in terms of how well they meet stated goals Uses a range of digital tools to access data, and to extract, organise, integrate and share relevant information

Assessment Requirements for BSBMKG413 Promote products and services

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify the context for the promotional activities including:
 - relevant legislation/regulations
 - organisation's goals, objectives, systems, policies and procedures
 - budget and timelines
 - marketing needs and, if defined, marketing plans
 - objectives of the promotional activities
- consult with relevant stakeholders to plan promotional activities to meet objectives, budget and timelines
- coordinate promotional activities including:
 - allocation of personnel, roles and responsibilities
 - sourcing other resources and promotional products as appropriate
 - use of networks and relationships
- analyse feedback and data to evaluate the effectiveness of planning processes and promotional activities and make recommendations on future directions of promotional activities.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legislative and regulatory context of the organisation as relevant to the marketing plan
- outline the planning processes for organising promotional activities

- explain the organisation's marketing objectives and how they support the overall business objectives
- explain how common promotional activities could be used to support the marketing objectives with reference to
 - advertising
 - client functions
 - employee functions
 - media announcements
 - product launches
 - web pages.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the business development – marketing field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPMG410 Apply project time management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to assist with project scheduling activities, apply and monitor the agreed project schedule, and evaluate the effectiveness of time management for the project.

It applies to individuals who are project practitioners working in a project support role.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Management and Leadership – Project Management

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Assist in developing project schedule	1.1 Contribute to developing work breakdown structure with sufficient detail to enable effective planning and control 1.2 Contribute to estimating duration and effort, sequence and dependencies of tasks to achieve project deliverables 1.3 Assist in using project scheduling tools and techniques to identify schedule impact on project time management, resource requirements, costs and risks 1.4 Contribute to achieving an agreed schedule baseline and

ELEMENT	PERFORMANCE CRITERIA
	communicating the schedule to stakeholders
2. Maintain project schedule	<p>2.1 Use techniques to measure, record and report progress of activities in relation to agreed schedule</p> <p>2.2 Record baseline variance between actual and planned progress</p> <p>2.3 Contribute to forecasting impact of change on the schedule and analysing options</p> <p>2.4 Update task status and agreed changes to maintain currency and accuracy of schedule</p>
3. Participate in assessing time-management outcomes	<p>3.1 Assist in review of project performance to determine effectiveness of time management</p> <p>3.2 Document scheduling and time-management issues and responses to assist in project evaluation</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 3.1	<ul style="list-style-type: none"> Interprets project documentation to determine scheduling requirements and review performance
Writing	1.1, 1.3, 2.1, 2.2, 2.4, 3.2	<ul style="list-style-type: none"> Documents project activities using structure, layout, vocabulary, and conventions appropriate to context
Oral Communication	1.4, 3.1	<ul style="list-style-type: none"> Interacts effectively in verbal exchanges, using clear language and appropriate features to convey information Uses active listening and questioning to elicit and assess relevant information
Numeracy	1.2, 1.3, 2.1	<ul style="list-style-type: none"> Selects and applies a range of mathematical strategies to determine resources and measure work output against a predetermined timeline
Interact with others	1.4, 3.1	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with internal and external stakeholders in a range of work contexts
Get the work done	1.1, 1.3, 2.1, 2.2, 2.3, 2.4, 3.1, 3.2	<ul style="list-style-type: none"> Plans and implements tasks required to monitor implementation of plans

		<ul style="list-style-type: none"> • Reviews and reflects on outcomes to identify whether objectives were met • Uses digital tools to enter, analyse and present data and information
--	--	---

Assessment Requirements for BSBPMG410 Apply project time management techniques

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- create a project schedule showing tasks, deliverable milestones, sequence, dependencies and time estimates
- apply time-management techniques in a project
- use tools and techniques to maintain, monitor and update a project schedule.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain implications of time management for project resources, costs and risks
- describe methods for estimating task duration and resource requirements
- identify tools and techniques for managing project time and their particular applications
- explain techniques used to measure, record and report progress of activities.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the management and leadership – project management field of work and include access to:

- workplace documentation relevant to project management
- planning tools
- case studies and, where possible, real situations.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBPRC502 Manage supplier relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to manage relationships with suppliers of larger or multiple smaller procurement activities, where the relationship is of some significance to the organisation. It covers managing procurement agreements, resolving disagreements with suppliers, finalising agreements, and reviewing the performance of suppliers.

It applies to individuals who manage relationships with an organisation's suppliers, and is typically undertaken by a senior procurement officer or procurement manager.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Administration – Procurement and Contracting

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Manage supplier agreements	1.1 Monitor supplier performance throughout the duration of agreements in accordance with organisational policies and procedures 1.2 Identify, monitor and manage risks in risk management plans throughout the duration of agreements

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Identify and address potential and actual performance issues</p> <p>1.4 Negotiate and resolve amendments to agreements as a consequence of addressing performance issues</p> <p>1.5 Seek and obtain approval for amendments from organisational management</p> <p>1.6 Communicate approved amendments to suppliers and relevant personnel</p>
2. Resolve disagreements with suppliers	<p>2.1 Identify and investigate causes of disagreements with suppliers and assess their validity</p> <p>2.2 Negotiate and resolve disagreements</p> <p>2.3 Establish transparent and trust with supplier to support relationship</p> <p>2.3 Document amendments to agreements as a consequence of the resolution of disagreements in accordance with organisational policies and procedures</p> <p>2.4 Seek and obtain approval for amendments from organisational management</p> <p>2.5 Communicate approved amendments to suppliers and relevant personnel</p>
3. Finalise agreements	<p>3.1 Confirm all supplier obligations as having been met prior to agreements being finalised</p> <p>3.2 Finalise procurement agreements on completion of contract</p> <p>3.3 Document arrangements to finalise agreements in accordance to organisational policies and procedures</p>
4. Review performance of suppliers	<p>4.1 Evaluate supplier performance against the requirements of procurement agreements</p> <p>4.2 Inform suppliers of evaluation outcomes as required</p> <p>4.3 Make recommendations about future use of suppliers to relevant personnel</p>

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Interprets textual information from a range of sources and determines how content may be applied to organisational requirements
Writing	<ul style="list-style-type: none"> Documents amendments to agreements Develops documentation according to organisational formats
Oral Communication	<ul style="list-style-type: none"> Communicates verbally using clear language and appropriate features to provide information to a variety of individuals Uses active listening and questioning techniques to convey and clarify information
Numeracy	<ul style="list-style-type: none"> Interprets financial information within procurement agreements
Navigate the world of work	<ul style="list-style-type: none"> Understands legal and organisational obligations that underpin agreements and contracts with suppliers
Interact with others	<ul style="list-style-type: none"> Liaises with suppliers and relevant personnel to gain agreement on required performance levels Selects the appropriate form, channel and mode of communication for a specific purpose relevant to own role
Get the work done	<ul style="list-style-type: none"> Plans and implements tasks required to manage agreements, including negotiating and coordinating input from others Uses analytical processes to decide on a course of action, establishing criteria for deciding between options, and seeking input and advice from others Uses systematic, analytical processes to identify and solve performance problems

Assessment Requirements for BSBPRC502 Manage supplier relationships

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- successfully manage relationships with suppliers over the life of specific procurement agreements in accordance with organisational policies and procedures, including:
 - using effective communication to resolve disputes with suppliers amending and developing documentation to finalise an agreement with a supplier
 - evaluate supplier performance and formulate recommendations about future use of supplier.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role:

- key features of procurement supplier relationship management
- methodologies to monitor, review and evaluate supplier performance
- key techniques to successfully manage and resolve supplier disagreements
- key features to outline organisation's policies and procedures related to:
 - conduct and ethics
 - procurement
 - tendering and contracting.
 -

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the administration – procurement and contracting field of work and include access to:

- organisation policies and procedures
- procurement strategies and relevant procurement supplier management records
- office equipment and supplies
- case studies and, where possible, real situations
- interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBPUB501 Manage the public relations publication process

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to manage the design, production, implementation and evaluation of public relations publications in accordance with organisational requirements.

It applies to individuals who possess a sound theoretical knowledge base in advertising management and demonstrate a range of managerial skills to ensure that advertising functions are effectively conducted in an organisation or business area. In this role, individuals may either manage the publication process independently or coordinate the activities of people working under their supervision.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Business Development – Public Relations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research publication requirements and segment target audience	1.1 Prepare a public relations research brief that specifies the research objectives, methodology, time schedule and budget 1.2 Consider the internal and external factors that may impact on the effectiveness of a public relations publication 1.3 Assess primary and secondary research methods for their

ELEMENT	PERFORMANCE CRITERIA
	<p>capacity to provide information on publications requirements and market segments</p> <p>1.4 Evaluate and choose criteria to use in segmenting the audience in accordance with the public relations brief</p> <p>1.5 Define the target audience in terms of prospective readers of the publications</p> <p>1.6 Ensure the target audience profile meets organisational requirements in terms of level and style of language usage, format, content and level of detail</p>
2. Plan public relations publications	<p>2.1 Ensure publication purpose is consistent with the organisation's mission, vision and corporate values</p> <p>2.2 Identify, obtain agreement on and document publication objectives and central message consistent with messages in other organisational publications</p> <p>2.3 Select team members according to skill and knowledge requirements</p> <p>2.4 Develop and obtain agreement on budgets and schedules with relevant stakeholders</p> <p>2.5 Identify appropriate suppliers of goods and services and obtain quotations as required</p> <p>2.6 Develop criteria to test and evaluate the success of the publication</p>
3. Develop and evaluate public relations publications	<p>3.1 Design and write publication text in accordance with communication objectives and house style</p> <p>3.2 Check readability of material to ensure it is aligned to the target audience's reading levels</p> <p>3.3 Test document with relevant stakeholders and incorporate findings in the final publication</p> <p>3.4 Ensure publications, including any changes, comply with legal and ethical requirements</p> <p>3.5 Select and contract suppliers to complete publication production processes</p> <p>3.6 Distribute publication according to public relations plan</p> <p>3.7 Evaluate aspects of the publication in line with stakeholder feedback and against evaluation criteria</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.4, 1.6, 2.1, 2.2, 2.5, 3.1, 3.2, 3.4, 3.6, 3.7	<ul style="list-style-type: none"> Gathers and analyses textual information from a range of sources and identifies relevant and key information Assesses workplace documentation for clarity and accuracy to comply with house style and agreed communication objectives
Writing	1.1, 1.5, 2.2, 2.4, 2.6, 3.1, 3.3	<ul style="list-style-type: none"> Uses clear, accurate and engaging language to develop research briefs and materials in a range of styles for various audiences
Oral Communication	2.2, 2.4, 3.3	<ul style="list-style-type: none"> Employs listening and questioning techniques and negotiation skills to clarify information and confirm understanding Clearly articulates instructions and information using language and features suitable for diverse audiences
Numeracy	1.1, 2.4, 2.5	<ul style="list-style-type: none"> Uses basic mathematical formula to calculate whole numbers and decimals to determine suppliers' costs, project budgets and projected schedules
Navigate the world of work	1.2, 1.6, 2.1, 2.2, 3.1, 3.4	<ul style="list-style-type: none"> Understands organisational goals and adheres to implicit and explicit organisation policies and procedures Identifies the implications of legal and regulatory responsibilities related to own work
Interact with others	2.2, 2.4, 2.5, 3.3, 3.5	<ul style="list-style-type: none"> Actively identifies the requirements of important communication exchanges, selecting appropriate channels, format, tone and content to suit purpose and audience and monitoring impact Collaborates with others to achieve joint outcomes, playing an active role in facilitating effective group interaction
Get the work done	1.1-1.4, 2.2-2.6, 3.1, 3.3, 3.5-3.7	<ul style="list-style-type: none"> Coordinates and sequences tasks to ensure timelines are met and work flows efficiently Analyses relevant information to make decisions about staffing, contractors, market segments and target audiences Evaluates results to identify whether objectives

		<p>have been met</p> <ul style="list-style-type: none"> • Uses digital applications to record, store, retrieve and share documents

Assessment Requirements for BSBREL402 Build client relationships and business networks

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- identify clients' preferred communication styles and methods and potential barriers to communications and use appropriate communication styles and strategies
- apply communication techniques to establish rapport and promote two-way communication
- develop and implement client loyalty strategies and service standards based on business objectives and client information
- develop and implement strategies to elicit feedback from clients and use it to improve relationships and customer satisfaction
- maintain contacts and participate in formal and informal networks that support the business and enhance personal knowledge of the market.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- give examples of strategies that can build client loyalty including those that focus on:
 - financial incentives and special offers
 - premium services and private/dedicated facilities
 - loyalty programs, rewards and recognition
- outline issues that are commonly addressed in client care/service standards in the industry
- outline typical barriers to communicating with clients and possible strategies to address them
- give examples of strategies for feedback
- describe the principles and techniques for effective communication and networking
- outline networking opportunities relevant to the business with reference to:

- government, industry and professional associations
- trade shows, conferences, briefings and other professional development activities
- existing groups or networks
- businesses and individuals
- outline aspects of organisational policies, procedures and processes that are relevant to communicating with clients and participating in networks.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the stakeholder relations - relationship management field of work and include access to:

- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBRES411 Analyse and present research information

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 3.0.

Application

This unit describes the skills and knowledge required to gather, organise, analyse and present workplace information using available systems and sources. This includes identifying research requirements and sources of information, applying information to a set of facts, evaluating the quality and reliability of the information, and preparing and producing reports.

It applies to individuals in roles in which they are required to apply their broad knowledge of the work environment to analysis and research tasks, evaluate information from a variety of sources and apply solutions to a range of predictable and unpredictable problems.

No licensing, legislation or certification requirements apply to this unit at the time of publication.

Unit Sector

Knowledge Management – Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify reliable sources of research information	1.1 Identify potential sources for research information relevant to the organisation requirements 1.2 Assess reliability of potential sources, considering accuracy, authority, audience, relevance and likelihood of bias 1.3 Access research information and extract in a format suitable for analysis, interpretation and dissemination in accordance with

ELEMENT	PERFORMANCE CRITERIA
	organisational requirements 1.4 Store research information, in accordance with organisational requirements
2. Analyse and synthesise research information	2.1 Clearly define objectives of research ensuring consistency with organisational requirements 2.2 Ensure that information research strategies are relevant to the requirements of the research and aligned to organisational objectives 2.3 Apply information research strategy to obtain relevant information, identifying themes and drawing conclusions in line with established objectives of research 2.4 Demonstrate that assumptions and conclusions used in analyses are clear, justified, supported by evidence and consistent with research and business objectives
3. Present research information	3.1 Identify appropriate methods of reporting, considering the intended audience and relevant organisational requirements 3.2 Report on findings in an appropriate format, style and structure within a pre-determined timeframe 3.3 Report and distribute research findings in accordance with organisational requirements 3.4 Obtain feedback and comments on suitability and sufficiency of findings in accordance with organisational requirements

Foundation Skills

This section describes those language, literacy, numeracy and employment skills that are essential to performance but not explicit in the performance criteria.

Skill	Description
Reading	<ul style="list-style-type: none"> Analyses and evaluates textual information to develop information research strategies, integrate facts and ideas and meet organisational requirements
Writing	<ul style="list-style-type: none"> Gathers, evaluates and integrates information from a range of sources Presents findings, recommendations and issues in required format using language, structure and style appropriate to audience
Oral	<ul style="list-style-type: none"> Presents recommendations and issues using language appropriate to

Assessment Requirements for BSBSUS501 Develop workplace policy and procedures for sustainability

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- scope and develop organisational policies and procedures that comply with legislative requirements and support the organisation's sustainability goals covering at a minimum:
 - minimising resource use
 - resource efficiency
 - reducing toxic material and hazardous chemical use
 - employing life cycle management approaches
 - continuous improvement
- plan and implement sustainability policy and procedures including:
 - agreed outcomes
 - performance indicators
 - activities to be undertaken
 - assigned responsibilities
 - record keeping, review and improvement processes
- consult and communicate with relevant stakeholders to generate engagement with sustainability policy development, implementation and continuous improvement
- review and improve sustainability policies.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the environmental or sustainability legislation, regulations and codes of practice applicable to the organisation identify internal and external sources of information and explain how they can be used to plan and develop the organisation's sustainability policy

- explain policy development processes and practices
- outline organisational systems and procedures that relate to sustainability
- outline typical barriers to implementing policies and procedures in an organisation and possible strategies to address them.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the sustainability field of work and include access to:

- relevant legislation, regulations, standards and codes
- relevant workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package release 1.0

Application

This unit describes the skills and knowledge required to implement and monitor an organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area in order to meet legislative requirements.

It applies to individuals with supervisory responsibilities for implementing and monitoring the organisation's WHS policies, procedures and programs in a work area. These individuals have a broad knowledge of WHS policies and contribute well developed skills in creating solutions to unpredictable problems through analysis and evaluation of information from a variety of sources. They provide supervision and guidance to others and have limited responsibility for the output of others.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the</i>	<i>Performance criteria describe the performance needed to</i>

ELEMENT	PERFORMANCE CRITERIA
<i>essential outcomes.</i>	<i>demonstrate achievement of the element.</i>
1. Provide information to the work team about WHS policies and procedures	1.1 Accurately explain to the work team relevant provisions of WHS Acts, regulations and codes of practice 1.2 Provide information about the organisation's WHS policies, procedures and programs, and ensure it is readily accessible to, and understandable by the work team 1.3 Regularly provide and clearly explain to the work team information about identified hazards and the outcomes of risk assessment and control
2. Implement and monitor participation arrangements for managing WHS	2.1 Communicate to workplace parties the importance of effective consultation mechanisms in managing health and safety risks in the workplace 2.2 Apply consultation procedures to facilitate participation of the work team in managing work area hazards 2.3 Promptly deal with issues raised through consultation, according to organisational consultation procedures and WHS legislative and regulatory requirements 2.4 Promptly record and communicate to the work team the outcomes of consultation over WHS issues
3. Implement and monitor organisational procedures for providing WHS training	3.1 Identify WHS training needs according to organisational requirements and WHS legislative and regulatory requirements 3.2 Make arrangements to meet WHS training needs of team members in consultation with relevant individuals 3.3 Provide workplace learning opportunities and coaching and mentoring assistance to facilitate team and individual achievement of identified WHS training needs 3.4 Identify and report to management the costs associated with providing training for work team, for inclusion in financial and management plans
4. Implement and monitor organisational procedures and legal requirements for identifying hazards and assessing and controlling risks	4.1 Identify and report on hazards in work area according to WHS policies and procedures and WHS legislative and regulatory requirements 4.2 Promptly action team member hazard reports according to organisational procedures and WHS legislative and regulatory requirements 4.3 Implement procedures to control risks using the hierarchy of control, according to organisational and WHS legislative requirements

ELEMENT	PERFORMANCE CRITERIA
	<p>4.4 Identify and report inadequacies in existing risk controls according to hierarchy of control and WHS legislative requirements</p> <p>4.5 Monitor outcomes of reports on inadequacies, where appropriate, to ensure a prompt organisational response</p>
5. Implement and monitor organisational procedures for maintaining WHS records for the team	<p>5.1 Accurately complete and maintain WHS records of incidents of occupational injury and disease in work area, according to WHS policies, procedures and legislative requirements</p> <p>5.2 Use aggregate information and data from work area records to identify hazards and monitor risk control procedures in work area</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Assessment Requirements for BSBWHS401 Implement and monitor WHS policies, procedures and programs to meet legislative requirements

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- explain clearly and accurately to work team the relevant work health and safety (WHS) information including:
 - WHS legislative and organisational requirements
 - identified hazards and outcomes of risk assessment and control
- ensure that the team has access to information about WHS policies, procedures and programs in appropriate structure and language
- implement and monitor procedures according to organisational and legislative WHS requirements including:
 - consultation and communications to enable team members to participate in managing WHS risks and hazards
 - identifying WHS training needs and providing learning opportunities, coaching and mentoring as appropriate to needs
 - identifying, reporting and taking action on WHS hazards and risks
 - identifying and reporting inadequacies in existing risk controls and monitoring outcomes to ensure a prompt organisational response
 - reporting on the cost of WHS training
 - keeping WHS records
 - analysing aggregate WHS data to identify hazards and monitor risk control procedures in work area.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline the legal responsibilities and duties of managers, supervisors, persons conducting businesses or undertakings (PCBUs) and workers in relation to WHS risk management in the workplace
- identify key provisions of relevant WHS Acts, regulations and codes of practice that apply to the business and outline how they apply in the work area
- explain organisational policies and procedures relating to hazard identification, risk management, fire, emergency and evacuation, incident investigation and reporting
- explain the importance of effective consultation mechanisms in managing health and safety risks in the workplace
- explain how the hierarchy of control applies in the work area.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- an actual workplace or simulated environment
- workplace equipment and resources
- examples of documents relating to workplace safety, hazard identification and risk assessment
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWHS501 Ensure a safe workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to establish, maintain and evaluate the organisation's work health and safety (WHS) policies, procedures and programs in the relevant work area, according to WHS legislative requirements. It takes a systems approach and addresses compliance with relevant legislative requirements.

This unit applies to managers working in a range of contexts who have, or are likely to have responsibility for WHS as part of their broader management role. It is relevant for people with obligations under WHS legislation, for example persons conducting a business or undertaking (PCBUs) or officers, as defined by relevant legislation.

NOTE: The terms 'occupational health and safety' (OHS) and 'work health and safety' (WHS) are equivalent and generally either can be used in the workplace. In jurisdictions where the Model WHS Legislation has not been implemented RTOs are advised to contextualise the unit of competency by referring to the existing State/Territory OHS legislative requirements.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Regulation, Licensing and Risk – Work Health and Safety

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

ELEMENT	PERFORMANCE CRITERIA
1 Establish a WHS management system in a work area	<p>1.1 Locate, adapt, adopt and communicate WHS policies that clearly define the organisation's commitment to complying with WHS legislation</p> <p>1.2 Identify duty holders and define WHS responsibilities for all workplace personnel in the work area according to WHS legislation, policies, procedures and programs</p> <p>1.3 Identify and approve financial and human resources required by the WHS management system (WHSMS)</p>
2 Establish and maintain effective and compliant participation arrangements for managing WHS in a work area	<p>2.1 Work with workers and their representatives to set up and maintain participation arrangements according to relevant WHS legislation</p> <p>2.2 Appropriately resolve issues raised through participation and consultation arrangements according to relevant WHS legislation</p> <p>2.3 Promptly provide information about the outcomes of participation and consultation to workers and ensure it is easy for them to access and understand</p>
3 Establish and maintain procedures for effectively identifying hazards, and assessing and controlling risks in a work area	<p>3.1 Develop procedures for ongoing hazard identification, and assessment and control of associated risks</p> <p>3.2 Include hazard identification at the planning, design and evaluation stages of any change in the workplace to ensure that new hazards are not created by the proposed changes and existing hazards are controlled</p> <p>3.3 Develop and maintain procedures for selecting and implementing risk controls according to the hierarchy of control and WHS legislative requirements</p> <p>3.4 Identify inadequacies in existing risk controls according to the hierarchy of control and WHS legislative requirements, and promptly provide resources to enable implementation of new measures</p> <p>3.5 Identify requirements for expert WHS advice, and request this advice as required</p>
4 Evaluate and maintain a work area WHS management system	<p>4.1 Develop and provide a WHS induction and training program for all workers in a work area as part of the organisation's training program</p> <p>4.2 Use a system for WHS record keeping to allow identification of patterns of occupational injury and disease in the organisation, and to maintain a record of WHS decisions made, including reasons for the decision</p> <p>4.3 Measure and evaluate the WHSMS in line with the</p>

ELEMENT	PERFORMANCE CRITERIA
	organisation's quality systems framework 4.4 Develop and implement improvements to the WHSMS to achieve organisational WHS objectives 4.5 Ensure compliance with the WHS legislative framework to achieve, as a minimum, WHS legal requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 4.2, 4.3, 4.5	<ul style="list-style-type: none"> Organises, evaluates and critiques ideas and information from WHS legislation, policies, procedures and programs
Writing	1.1, 2.3, 3.2, 3.5, 4.1, 4.2	<ul style="list-style-type: none"> Produces WHS policies, procedures and programs using appropriate vocabulary, grammatical structure and conventions to produce Records WHS decisions according to organisational requirements
Oral communication	1.1, 2.1, 2.2, 2.3	<ul style="list-style-type: none"> Presents and seeks information from others using structure and language suitable for the audience Provides information on resolution of WHS issues varying level of technical vocabulary to suit audience
Numeracy	1.3	<ul style="list-style-type: none"> Selects from, and applies, an expanding range of mathematical and problem solving strategies in identifying financial and human resources required
Navigate the world of work	1.1, 1.2, 2.1, 2.2, 3.3, 3.4, 4.5	<ul style="list-style-type: none"> Monitors adherence to legal and regulatory rights and responsibilities for self and others in relation to WHS Takes responsibility for developing, implementing and reviewing policies, procedures and processes in accordance with organisational and legislative requirements
Interact with others	1.1, 2.1, 2.3, 3.5	<ul style="list-style-type: none"> Plays a lead role in situations requiring effective collaboration demonstrating the ability to guide discussions and negotiate agreeable outcomes Provides feedback to others in forms they can

		understand and use
Get the work done	1.1, 1.3, 2.1, 2.2, 2.3, 3.2, 3.3, 3.4, 3.5, 4.1, 4.2 4.3, 4.4, 4.5	<ul style="list-style-type: none"> • Develops plans or processes to manage relatively complex, WHS management tasks with an awareness of how they contribute to operational and strategic goals • Uses systematic, analytical processes, setting goals, gathering relevant information, and identifying and evaluating options against agreed criteria • Considers whether, and how, others should be involved, using consultative or collaborative processes as an integral part of the decision-making process • Uses digital systems and tools to enter, store and retrieve relevant information

Range of Conditions

This section specifies different work environments and conditions that may affect performance. Essential operating conditions that may be present (depending on the work situation, needs of the candidate, accessibility of the item, and local industry and regional contexts) are included.

WHS legislation must include:	<ul style="list-style-type: none"> • applicable Commonwealth and state or territory WHS Acts, regulations and codes of practice.

Assessment Requirements for BSBWHS501 Ensure a safe workplace

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- establish, implement, maintain and evaluate a work health and safety (WHS) management system for a work area of an organisation in accordance with WHS legislation including policies, procedures and record keeping
- ensure organisational WHS compliance
- establish, implement, maintain and evaluate effective and compliant participation arrangements for managing WHS including identifying duty holders, identifying and approving the required resources and developing and implementing a training program
- establish, implement, maintain and evaluate procedures for effectively identifying hazards, and assessing and controlling risks using the hierarchy of risk control
- provide information and complete documentation for a WHS management system
- identify requirements for and request expert WHS advice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and detail relevant WHS Acts, regulations and codes of practice
- specify relevant WHS organisational policies, procedures, programs and practices
- explain hazard identification and risk-management processes
- describe the hierarchy of risk control and how it is applied in the workplace
- specify in-house and WHS legislative reporting requirements.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced by individuals carrying out work health and safety duties in the workplace and include access to:

- organisational WHS policies and procedures
- WHS legislation, regulations and codes of practice
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

Assessment Requirements for BSBWOR301 Organise personal work priorities and development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- prepare a work plan according to organisational requirements and work objectives
- use business technology to schedule, prioritise and monitor completion of tasks in a work plan
- assess and prioritise own work load and deal with contingencies
- monitor and assess personal performance against job role requirements by seeking feedback from colleagues and clients
- identify personal development needs and access, complete and record skill development and learning.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- outline key provisions of legislation that relate to own work role
- describe goals, objectives or key performance indicators of own work role
- explain ways to elicit, analyse and interpret feedback when communicating with other people in the workplace
- explain the principles and techniques of goal setting, measuring performance, time management and personal assessment of learning and development needs
- explain signs and sources of stress and strategies to deal with stress in the workplace
- identify methods to identify and prioritise personal learning needs.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- office equipment and resources
- work schedules and performance improvement plans
- workplace documentation and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to create systems and process to organise information and prioritise tasks.

It applies to individuals working in managerial positions who have excellent organisational skills. The work ethic of individuals in this role has a significant impact on the work culture and patterns of behaviour of others as managers at this level are role models in their work environment.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish personal work goals	1.1 Serve as a positive role model in the workplace through personal work planning 1.2 Ensure personal work goals, plans and activities reflect the organisation's plans, and own responsibilities and accountabilities 1.3 Measure and maintain personal performance in varying work conditions, work contexts and when contingencies occur

ELEMENT	PERFORMANCE CRITERIA
2. Set and meet own work priorities	<p>2.1 Take initiative to prioritise and facilitate competing demands to achieve personal, team and organisational goals and objectives</p> <p>2.2 Use technology efficiently and effectively to manage work priorities and commitments</p> <p>2.3 Maintain appropriate work-life balance, and ensure stress is effectively managed and health is attended to</p>
3. Develop and maintain professional competence	<p>3.1 Assess personal knowledge and skills against competency standards to determine development needs, priorities and plans</p> <p>3.2 Seek feedback from employees, clients and colleagues and use this feedback to identify and develop ways to improve competence</p> <p>3.3 Identify, evaluate, select and use development opportunities suitable to personal learning style/s to develop competence</p> <p>3.4 Participate in networks to enhance personal knowledge, skills and work relationships</p> <p>3.5 Identify and develop new skills to achieve and maintain a competitive edge</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.1, 3.2, 3.3, 3.4, 3.5	<ul style="list-style-type: none"> Investigates and uses a range of strategies to develop personal competence
Reading	1.2, 3.1, 3.2	<ul style="list-style-type: none"> Analyses and interprets textual information from organisational policies and practices or feedback to inform personal development planning

Assessment Requirements for BSBWOR501 Manage personal work priorities and professional development

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use business technology to create and use systems and processes to organise and prioritise tasks and commitments
- measure and maintain personal work performance including assessing competency against competency standards and seeking feedback
- maintain an appropriate work-life balance to manage personal health and stress
- participate in networks
- develop a personal development plan which includes career objectives and an action plan
- develop new skills.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain principles and techniques involved in the management and organisation of:
 - performance measurement
 - personal behaviour, self-awareness and personality traits identification
 - a personal development plan
 - personal goal setting
 - time
- discuss management development opportunities and options for self
- describe methods for achieving a healthy work-life balance
- outline organisation's policies, plans and procedures
- explain types of learning style/s and how they relate to the individual
- describe types of work methods and practices that can improve personal performance.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace equipment and resources
- case studies and, where possible, real situations
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to lead teams in the workplace and to actively engage with the management of the organisation.

It applies to individuals working at a managerial level who facilitate work teams and build a positive culture within their work teams. At this level, work will normally be carried out using complex and diverse methods and procedures requiring the exercise of considerable discretion and judgement, using a range of problem solving and decision making strategies.

No licensing, legislative, regulatory or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry Capability – Workplace Effectiveness

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish team performance plan	<p>1.1 Consult team members to establish a common understanding of team purpose, roles, responsibilities and accountabilities in accordance with organisational goals, plans and objectives</p> <p>1.2 Develop performance plans to establish expected outcomes, outputs, key performance indicators (KPIs) and goals for work team</p> <p>1.3 Support team members in meeting expected performance</p>

ELEMENT	PERFORMANCE CRITERIA
	outcomes
2. Develop and facilitate team cohesion	<p>2.1 Develop strategies to ensure team members have input into planning, decision making and operational aspects of work team</p> <p>2.2 Develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities</p> <p>2.3 Provide feedback to team members to encourage, value and reward individual and team efforts and contributions</p> <p>2.4 Develop processes to ensure that issues, concerns and problems identified by team members are recognised and addressed</p>
3. Facilitate teamwork	<p>3.1 Encourage team members and individuals to participate in and to take responsibility for team activities, including communication processes</p> <p>3.2 Support the team in identifying and resolving work performance problems</p> <p>3.3 Ensure own contribution to work team serves as a role model for others and enhances the organisation's image for all stakeholders</p>
4. Liaise with stakeholders	<p>4.1 Establish and maintain open communication processes with all stakeholders</p> <p>4.2 Communicate information from line manager/management to the team</p> <p>4.3 Communicate unresolved issues, concerns and problems raised by team members and follow-up with line manager/management and other relevant stakeholders</p> <p>4.4 Evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.1, 4.4	<ul style="list-style-type: none"> Analyses and interprets textual information from the organisation's policies, goals and objectives to establish team goals or to determine corrective action
Writing	1.2, 2.1, 2.2, 2.4, 4.2, 4.3, 4.4	<ul style="list-style-type: none"> Prepares written reports and workplace documentation that communicate complex information clearly and effectively
Oral Communication	1.1, 2.3, 3.1, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> Engages in discussions or provides information using appropriate vocabulary and non-verbal features Uses listening and questioning techniques to confirm understanding and to engage the audience
Navigate the world of work	1.1, 2.1, 2.2, 3.3	<ul style="list-style-type: none"> Understands how own role contributes to broader organisational goals Modifies or develops policies and procedures to achieve organisational goals
Interact with others	1.1, 1.3, 2.2, 2.3, 3.1, 3.2, 4.2, 4.3	<ul style="list-style-type: none"> Selects and uses appropriate conventions and protocols when communicating with diverse stakeholders Uses interpersonal skills to gain trust and confidence of team and provides feedback to others in forms that they can understand and use Adapts personal communication style to build positive working relationships and to show respect for the opinions, values and particular needs of others Plays a lead role in situations requiring effective collaboration, demonstrating high level conflict resolution skills and ability to engage and motivate others
Get the work done	1.2, 2.1, 2.2, 2.4, 3.2, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> Develops, implements and monitors plans and processes to ensure team effectiveness Monitors and actively supports processes and development activities to ensure the team is focused on work outcomes Plans for unexpected outcomes and implements creative responses to overcome challenges

Assessment Requirements for BSBWOR502 Lead and manage team effectiveness

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Performance Evidence

Evidence of the ability to:

- use leadership techniques and strategies to facilitate team cohesion and work outcomes including:
 - encouraging and fostering shared understanding of purpose, roles and responsibilities
 - identifying and resolving problems
 - providing feedback to encourage, value and reward others
 - modelling desired behaviour and practices
- develop policies and procedures to ensure team members take responsibility for own work and assist others to undertake required roles and responsibilities
- establish processes to address issues and resolve performance issues
- support team to meet expected performance outcomes including providing formal and informal learning opportunities as needed
- develop performance plans with key performance indicators (KPIs), outputs and goals for individuals or the team which incorporate input from stakeholders
- communicate effectively with a range of stakeholders about team performance plans and team performance
- facilitate two-way flow of information between team and management relevant to team performance
- evaluate and take necessary corrective action regarding unresolved issues, concerns and problems raised by internal or external stakeholders.

Note: if a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how group dynamics can support or hinder team performance

- outline strategies that can support team cohesion, participation and performance
- explain strategies for gaining consensus
- explain issue resolution strategies.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability - workplace effectiveness field of work and include access to:

- workplace documents
- case studies and, where possible, real situations
- office equipment and resources
- interaction with others.

Assessors must satisfy NVR/AQTF assessor requirements.

CPPSEC3121 Control persons using empty hand techniques

Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3013A Control persons using empty hand techniques.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

Application

This unit specifies the skills and knowledge required to control persons using empty hand techniques.

It includes:

- identifying threats posed by persons presenting a risk to the safety of self or others and assessing response and withdrawal options
- negotiating with subjects to defuse conflict and give spoken warnings and directions
- applying recognised empty hand techniques using the minimum amount of force necessary to remove the immediate threat while avoiding vital areas of the body and without harming subjects
- isolating subjects at a safe distance from members of the public and monitoring their wellbeing and safety.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

Pre-requisite Unit

Nil

Unit Sector

Security operations

Elements and Performance Criteria

Elements describe the	Performance criteria describe what needs to be done to
-----------------------	--

essential outcomes.	demonstrate achievement of the element.
1. Assess need to use empty hand techniques and response options.	<p>1.1 Review workplace procedures and policies including WHS to ensure compliance with legal rights and responsibilities when using empty hand techniques for security work.</p> <p>1.2 Identify subject of threat and continually observe and anticipate movement and aggression.</p> <p>1.3 Ensure stance and distance from subject maximises range of defensive options and tactical advantages in physical contact.</p> <p>1.4 Assess alternative response and withdrawal options for viability and incorporate defensive options into selected response.</p> <p>1.5 Check and confirm personal safety needs and identify available escape routes.</p>
2. Apply defensive empty hand techniques.	<p>2.1 Use interpersonal techniques to exchange information with the subject and give spoken warnings and directions.</p> <p>2.2 Use empty hand techniques and ensure that grip on subject is secure, firm and applied using level of force proportionate to the threat context.</p> <p>2.3 Quickly apply holds to appropriate areas of the body in a safe manner.</p> <p>2.4 Anticipate strikes and blows from subject and adopt, parry or block positioning.</p> <p>2.5 Limit contact with subject to the minimum necessary to remove immediate threat, and use lower force options immediately when threat decreases or ceases.</p>
3. Restrain and isolate subject.	<p>3.1 Isolate and contain subject at a safe distance from members of the public, and minimise opportunities for escape.</p> <p>3.2 Identify situations requiring specialist assistance and seek assistance or advice from relevant persons using communication equipment.</p> <p>3.3 Escort subject from the incident scene to a secure location and monitor their wellbeing and safety.</p> <p>3.4 Use communication equipment to report incident details and subject location to relevant persons.</p>
4. Finalise and evaluate response.	<p>4.1 Review and evaluate effectiveness of response against incident circumstances and observations, in consultation with relevant persons.</p> <p>4.2 Identify improvements to future security response procedures using defensive techniques.</p> <p>4.3 Complete incident report and securely maintain</p>

	documentation in accordance with workplace requirements. 4.4 Recognise effects of stress and manage own well-being using stress management techniques.
--	---

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to provide information or advice in a form that is preferred and understood by the receiver and that engages minority groups
- writing skills to:
 - record and describe incident observations and actions taken
 - complete routine reports and forms
- reading skills to interpret and follow workplace procedures and policies that clarify legal rights and responsibilities
- speaking and listening skills to:
 - use questions and active listening to exchange and understand information with subject
 - control tone of voice when negotiating with the subject
 - give clear and succinct spoken warnings and directions when negotiating with the subject
 - use a radio to give clear and sequenced information to emergency services personnel when requesting assistance and reporting incident details
- numeracy skills to estimate safe distances when engaging with and isolating subject
- problem solving skills to:
 - formulate response options to match nature of risk
 - apply empty hand techniques that avoid vital areas of the body
 - recognise security risk situations requiring specialist assistance
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

Unit Mapping Information

Supersedes and is equivalent to CPPSEC3013A Control persons using empty hand techniques.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPSEC3121 Control persons using empty hand techniques

Modification History

Release 1.

Supersedes and is equivalent to CPPSEC3013A Control persons using empty hand techniques.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

Performance Evidence

To demonstrate competency in this unit, a person must control persons using empty hand techniques in three different threat situations, and in each situation, demonstrating:

- correct techniques for body safety and body positioning:
 - bladed stance
 - interview stance
 - defensive stance
- correct application of defensive techniques:
 - blocking techniques
 - locking and holding techniques
 - take-down techniques.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when controlling persons using empty hand techniques:
 - anti-discrimination and diversity
 - apprehension, arrest and restraint of persons
 - duty of care
 - licensing requirements and limits of own authority
 - trespass and the removal of persons
 - use of force
 - workplace health and safety (WHS)

- approved communication terminology, call signs and radio channels used in the security industry
- basic negotiation techniques
- body safety and body positioning techniques, including:
 - bladed stance
 - interview stance
 - defensive stance
 - defensive techniques and how and when they are applied, including
 - blocking techniques
 - empty hand techniques
 - impact techniques to less-than-lethal parts of the body
 - locking and holding techniques
 - take-down techniques
- methods of restraint and associated effects, including signs and symptoms of asphyxiation
- pre-attack indicators
- procedures for collaborating with emergency services personnel to restrain and isolate subject of threat
- procedures for effecting an arrest
- process of dynamic risk assessment and how it is applied
- response options using defensive techniques that are within specified legal limits
- signs that a person may be suffering from emotional or physical distress
- signs that a person may be suffering from mental illness
- signs that a person may be under the influence of intoxicating substances
- understanding of the force model
- vital areas of the body and reasons they are to be avoided (head, neck, throat, spine, tailbone, chest, kidney and liver, clavicle and collar bone).

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to control persons using empty hand techniques
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

CPPSEC3128 Conduct security screening using walk-through metal detection equipment

Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1007A Apply walk through metal detection procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

Application

This unit specifies the skills and knowledge required to conduct security screening of people and personal effects using walk-through metal detection equipment. Walk-through metal detection equipment is any electronic device in an upright configuration capable of being used in a security screening environment for the detection of metal by magnetic induction as a person walks through the detection zone.

It includes:

- setting up, testing and operating the walk-through equipment
- using sensitive spoken and non-verbal communication to manage the order and flow of people through the screening point and using special screening methods for infants, children and people with specific needs
- following legal requirements and procedures associated with personal search where required
- monitoring and maintaining security and responding quickly to positive alarms.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

Pre-requisite Unit

Nil

Unit Sector

Security operations

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
<p>1. Prepare for screening using walk-through metal detection equipment.</p>	<p>1.1 Review workplace procedures and policies to ensure compliance with legal rights and responsibilities when screening people and personal effects using walk-through metal detection equipment.</p> <p>1.2 Set up and test walk-through metal detection equipment following manufacturers' instructions, and rectify or report problems to relevant persons.</p>
<p>2. Screen people and personal effects.</p>	<p>2.1 Identify hazards and risks in the work area and implement necessary controls to maintain safety of people and property.</p> <p>2.2 Operate walk-through metal detection equipment following manufacturers' instructions.</p> <p>2.3 Direct and assist people through the screening point using interpersonal techniques and communication that accounts for individual social and cultural differences.</p> <p>2.4 Use alternate screening methods to accommodate infants, children and people with specific needs.</p>
<p>3. Monitor screening and respond to potential security risks.</p>	<p>3.1 Monitor people through the screening point and give spoken and non-verbal instructions to maintain an orderly flow and address causes of potential delays.</p> <p>3.2 Identify persons not consenting to be screened and take appropriate action following workplace procedures.</p> <p>3.3 Respond to positive alarms and locate and secure prohibited items following workplace procedures.</p> <p>3.4 Identify the need to conduct personal search, and clarify legal authority to search in consultation with relevant persons.</p> <p>3.5 Obtain consent for personal search, and use approved search techniques locate or confirm the absence of prohibited items.</p> <p>3.6 Where permission to search is refused, use communication equipment to immediately report situation to relevant persons.</p> <p>3.7 Monitor persons and items in the screening area to maintain situational awareness and to respond promptly to potential security risks.</p>

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:
 - provide information or advice using structure and language to suit the audience and engage minority groups
 - use strategies to overcome language barriers
 - use non-verbal signals to give directions to people through the screening point
- reading skills to interpret:
 - medical cards or letters for people requiring alternate screening methods
 - procedures and policies that clarify legal rights and responsibilities
 - manufacturers' instructions and equipment labels when setting up, testing and operating walk-through metal detection equipment
- speaking and listening skills to:
 - give clear, sequenced instructions when managing flow and assisting people through the screening point
 - use a radio or phone to report risks
 - use questions to clarify understanding when receiving spoken information
- numeracy skills to estimate time required to complete work tasks
- problem solving skills to:
 - identify equipment faults and malfunctions
 - recognise suspicious items and behaviours
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

Unit Mapping Information

Supersedes and is equivalent to CPPSEC1007A Apply walk through metal detection procedures.

Links

Companion volumes to this training package are available at the VETNet website - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=6f3f9672-30e8-4835-b348-205dfcf13d9b>

Assessment Requirements for CPPSEC3128 Conduct security screening using walk-through metal detection equipment

Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1007A Apply walk through metal detection procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

Performance Evidence

To demonstrate competency in this unit, a person must on two separate occasions, conduct security screening using walk-through metal detection equipment, involving, on each occasion:

- modifying the screening process to accommodate the needs of:
 - one child
 - one person who is unable to walk unassisted through the screening point
- responding to positive alarms and identifying at least two prohibited items.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when conducting security screening using walk-through metal detection equipment:
 - anti-discrimination and diversity
 - counter terrorism
 - dangerous goods
 - duty of care
 - limits of own authority
 - personal search
 - workplace health and safety (WHS)
- current national terrorism threat level and context
- methods for screening infants, children and people with specific needs
- potential hazards, risks and security risk situations that can arise when screening people and personal effects using walk-through metal detection equipment
- procedures for obtaining permission to search

- procedures for reporting the detection of prohibited items and security risks
- procedures for responding to denied request to search
- procedures for setting up and testing walk-through metal detection equipment
- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
 - definition of crowded places
 - key security issues for crowded places
 - objectives, characteristics and identification of active armed offenders
 - definition of hostile vehicles and methods of attack
 - signs of chemical weapons attack and recommended response
 - general features of improvised explosive devices and recommended incident response
- site emergency and evacuation plans and procedures
- situations requiring personal search to be conducted
- surveillance techniques for monitoring security of the screening point
- techniques for overcoming language barriers to ensure correct information exchange
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of items that are prohibited including weapons, explosives and dangerous goods
- ways that individual and social cultural differences may be expressed.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to conduct security screening using walk-through metal detection equipment
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry including:

- Australia's *Strategy for Protecting Crowded Places from Terrorism*
- operational walk-through metal detection equipment and screening scenarios and items to allow achievement of the performance evidence
- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

CPPSEC3130 Conduct security screening using hand-held metal detectors

Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1008A Apply hand-held metal detection procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

Application

This unit specifies the skills and knowledge required to conduct security screening of people and personal effects using a hand-held metal detector. Hand-held metal detectors are portable electronic devices that can detect metal by magnetic induction while the device is passed over a person or their personal effects.

It includes:

- checking, testing and operating hand-held metal detectors following manufacturers' specifications
- using screening techniques that cover the full body and personal effects and detect sources of positive alarms
- using sensitive spoken communication to direct, position and assist people through the screening process and investigate alarm sources
- maintaining situational awareness and responding quickly to security risks.

It applies to people working independently or under limited supervision as members of a security team.

This unit may form part of the licensing requirements for people engaged in security operations in those states and territories where these are regulated activities.

Pre-requisite Unit

Nil

Unit Sector

Security operations

Elements and Performance Criteria

Elements describe the essential outcomes.	Performance criteria describe what needs to be done to demonstrate achievement of the element.
1. Prepare for screening using hand-held metal detector.	<p>1.1 Review workplace procedures and policies to ensure compliance with legal rights and responsibilities when screening people and personal effects using a hand-held metal detector.</p> <p>1.2 Follow manufacturers' instructions to check battery, turn detector on, test for correct audible and visual signals, and rectify or report problems to relevant persons.</p> <p>1.3 Calibrate detector to correct sensitivity and volume for screening tasks.</p>
2. Screen people and personal effects.	<p>2.1 Identify hazards and risks in the work area and implement necessary controls to maintain safety of people and property.</p> <p>2.2 Direct and position person at the screening point using interpersonal techniques and communication that accounts for individual social and cultural differences.</p> <p>2.3 Sweep hand-held metal detector over the body and personal items within the maximum range specified by manufacturers' instructions for the type of detector.</p> <p>2.4 Complete screening using hand-held metal detector ensuring full body and all personal effects have been scanned.</p>
3. Respond to positive alarms and potential security risks.	<p>3.1 Respond to positive alarms and locate and secure prohibited items following workplace procedures.</p> <p>3.2 Where there is a positive alarm without a visible source, request assistance from the person to reveal potential alarm sources and repeat the scan until all alarms have been investigated.</p> <p>3.3 Identify situations requiring specialist assistance and report to relevant persons.</p> <p>3.4 Monitor persons and items in the screening area to maintain situational awareness and promptly respond to potential security risks.</p>

Foundation Skills

This section describes the language, literacy, numeracy and employment skills essential to performance in this unit but not explicit in the performance criteria:

- language skills to:
 - provide information or advice using structure and language to suit the audience and engage minority groups

- use strategies to overcome language barriers
- reading skills to interpret:
 - medical cards or letters for people requiring alternate screening methods
 - procedures and policies that clarify legal rights and responsibilities
 - manufacturers' instructions and equipment labels when checking, testing, calibrating and operating hand-held metal detectors
- speaking and listening skills to:
 - give clear, sequenced instructions when assisting people through the screening process
 - use questions to clarify understanding when receiving spoken information
- numeracy skills to estimate time required to complete work tasks
- problem solving skills to:
 - identify equipment faults and malfunctions
 - find the sources of positive alarms and interference
 - recognise suspicious items and behaviours
- teamwork skills to adjust personal communication styles in response to the opinions, values and needs of others.

Unit Mapping Information

Supersedes and is equivalent to CPPSEC1008A Apply hand-held metal detection procedures.

Assessment Requirements for CPPSEC3130 Conduct security screening using hand-held metal detectors

Modification History

Release 1.

Supersedes and is equivalent to CPPSEC1008A Apply hand-held metal detection procedures.

Updated to meet the Standards for Training Packages.

This version first released with CPP Property Services Training Package Version 7.0.

Performance Evidence

To demonstrate competency in this unit, a person must on two separate occasions, conduct security screening using a hand-held metal detector, involving, on each occasion:

- giving clear spoken instructions to direct the person into the correct stance and body positioning to ensure scanning of the entire body and personal effects
- responding to positive alarms and identifying at least two prohibited items.

In doing this, the person must meet the performance criteria for this unit.

Knowledge Evidence

To be competent in this unit, a person must demonstrate knowledge of:

- standard operating procedures and workplace policies that ensure compliance with legislative and regulatory requirements when conducting security screening using a hand-held metal detector:
 - anti-discrimination and diversity
 - counter terrorism
 - dangerous goods
 - duty of care
 - limits of own authority
 - workplace health and safety (WHS)
- current national terrorism threat level and context
- methods for screening people and items using a hand-held metal detector including infants, children and people with specific needs
- possible causes of positive alarms and interference from the work environment
- potential hazards, risks and security risk situations that can arise when screening people and personal effects using hand-held metal detectors
- procedures for checking, testing, calibrating and operating a range of hand-held metal detectors
- procedures for reporting the detection of prohibited items and security risks

- purpose of Australia's *Strategy for Protecting Crowded Places from Terrorism* and understanding of:
 - definition of crowded places
 - key security issues for crowded places
 - objectives, characteristics and identification of active armed offenders
 - definition of hostile vehicles and methods of attack
 - signs of chemical weapons attack and recommended response
 - general features of improvised explosive devices and recommended incident response
- site emergency and evacuation plans and procedures
- situations requiring assistance when screening people and items using hand-held metal detectors
- surveillance techniques for monitoring security of the screening point
- techniques for overcoming language barriers to ensure correct information exchange
- types of behavioural anomalies and suspect behaviours that can indicate criminal activity, hostile reconnaissance or the potential for terrorist activity
- types of items that are prohibited including weapons, explosives and dangerous goods
- ways that individual and social cultural differences may be expressed.

Assessment Conditions

Assessors must satisfy the requirements for assessors contained in the Standards for Registered Training Organisations (RTOs). All individuals engaged by a licensed RTO for security licensing purposes must hold both a security trainer's licence (where such a licence exists within the relevant jurisdiction) and a security operative licence that authorises the security activities about which the individual is training/assessing. Regulators may impose other assessor conditions to meet jurisdictional assessment requirements.

Assessment of performance must be undertaken in a simulated workplace environment. Tasks are to be performed to the level of proficiency and within the time limits that would be expected in a workplace.

The assessment of performance evidence must be done by direct observation of the learner by an assessor, either by an assessor observing the learner physically or by an assessor observing the learner via audio and visual media.

Assessment of performance evidence is only valid where the learner has been assessed performing the role of a security officer.

Assessors are responsible for ensuring that the person demonstrating competency has access to:

- specifications of assessment tasks to conduct security screening using a hand-held metal detector
- appropriate documents, materials, equipment and personal protective equipment (PPE) currently used in industry including:
 - Australia's *Strategy for Protecting Crowded Places from Terrorism*
 - operational hand-held metal detectors and scenarios to enable achievement of the performance evidence

- standard operating procedures and workplace policies related to the security work role and which specify requirements for complying with industry legislation and regulations.

Application

This unit describes the skills and knowledge required to recognise and respond to life-threatening emergencies in line with the Australian Resuscitation Council (ARC) Guidelines.

This unit applies to all workers who may be required to provide an emergency response in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

- | | |
|---|---|
| 1. Respond to an emergency situation | 1.1 Recognise an emergency situation
1.2 Identify, assess and minimise immediate hazards to health and safety of self and others
1.3 Assess the casualty and recognise the need for first aid response
1.4 Assess the situation and seek assistance from emergency response services |
| 2. Apply appropriate first aid procedures | 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with ARC guidelines
2.2 Provide first aid in accordance with established first aid principles
2.3 Display respectful behaviour towards casualty
2.4 Obtain consent from casualty where possible
2.5 Use available resources and equipment to make the casualty as comfortable as possible
2.6 Operate first aid equipment according to manufacturer's instructions
2.7 Monitor the casualty's condition and respond in accordance with first aid principles |
| 3. Communicate details of the incident | 3.1 Accurately convey incident details to emergency response services
3.2 Report details of incident to workplace supervisor as appropriate
3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies |

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Assessment Requirements for HLTAID002 Provide basic emergency life support

Modification History

Release	Comments
Release 4	Updated: <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 3	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Changes to evidence requirements relative to revised scope of unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:
 - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor

- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least one simulated first aid scenario contextualised to the candidate's workplace/community setting, including:
 - demonstrated safe manual handling techniques
 - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
 - allergic reaction
 - anaphylaxis
 - bleeding control
 - choking and airway obstruction
 - respiratory distress, including asthma
 - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
 - ARC Guidelines relevant to provision of CPR and first aid
 - safe work practices to minimise risks and potential hazards
 - Infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations, including:
 - awareness of potential need for stress-management techniques and available support following an emergency situation
 - duty of care requirements
 - respectful behaviour towards a casualty
 - own skills and limitations
 - consent
 - privacy and confidentiality requirements
 - importance of debriefing
- considerations when providing basic emergency life support, including:
 - airway obstruction due to body position

- appropriate duration and cessation of CPR
- appropriate use of an AED
- chain of survival
- standard precautions
- principles and procedures for first aid management of the following scenarios:
 - allergic reaction
 - anaphylaxis
 - bleeding control
 - cardiac conditions, including chest pain
 - choking and airway obstruction
 - respiratory distress, including asthma
 - shock
 - stroke
- basic anatomy and physiology relating to:
 - considerations in provision of first aid for specified conditions
 - chest
 - how to recognise a person is not breathing normally
 - response/consciousness
 - upper airway and effect of positional change

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandage
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressing

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

In addition hold current first aid certificate HLTAID003 or higher.

Release 2	Minor corrections to formatting to improve readability. Equivalent competency outcome.
Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. New evidence requirements for assessment. Removal of prerequisite unit.

Application

This unit describes the skills and knowledge required to provide a first aid response to a casualty. The unit applies to all workers who may be required to provide a first aid response in a range of situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for first aid response
- 1.4 Assess the situation and seek assistance from emergency response services

2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

3. Communicate details of the incident

- 3.1 Accurately convey incident details to emergency response services
- 3.2 Report details of incident to workplace supervisor as appropriate
- 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

ELEMENT**PERFORMANCE CRITERIA**

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

4. Evaluate the incident and own performance

4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

4.2 Participate in debriefing to address individual needs

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- Followed DRSABCD in line with ARC guidelines, including:

- performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- followed the prompts of an Automated External Defibrillator (AED)
- Responded to at least two simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
 - conducted a visual and verbal assessment of the casualty
 - demonstrated safe manual handling techniques
 - post-incident debrief and evaluation
 - provided an accurate verbal or written report of the incident
- Applied first aid procedures for the following:
 - allergic reaction
 - anaphylaxis
 - bleeding control
 - choking and airway obstruction
 - envenomation, using pressure immobilisation
 - fractures, sprains and strains, using arm slings, roller bandages or other appropriate immobilisation techniques
 - respiratory distress, including asthma
 - shock

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
 - ARC Guidelines relevant to provision of CPR and first aid
 - safe work practices to minimise risks and potential hazards
 - infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
 - awareness of potential need for stress-management techniques and available support following an emergency situation
 - duty of care requirements

- respectful behaviour towards a casualty
- own skills and limitations
- consent
- privacy and confidentiality requirements
- importance of debriefing
- considerations when providing first aid including:
 - airway obstruction due to body position
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - chain of survival
 - standard precautions
 - how to conduct a visual and verbal assessment of the casualty
- principles and procedures for first aid management of the following scenarios:
 - abdominal injuries
 - allergic reaction
 - anaphylaxis
 - basic care of a wound
 - bleeding control
 - burns
 - cardiac conditions, including chest pain
 - choking and airway obstruction
 - crush injuries
 - diabetes
 - dislocations
 - drowning
 - envenomation
 - environmental impact, including hypothermia, hyperthermia, dehydration and heat stroke
 - eye and ear injuries
 - fractures
 - febrile convulsions
 - head, neck and spinal injuries
 - minor skin injuries
 - needle stick injuries
 - poisoning and toxic substances
 - respiratory distress, including asthma
 - seizures, including epilepsy
 - shock
 - soft tissue injuries, including strains and, sprains
 - stroke

- unconsciousness
- basic anatomy and physiology relating to:
 - how to recognise a person is not breathing normally
 - chest
 - response/consciousness
 - upper airway and effect of positional change
 - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device
- placebo bronchodilator and spacer device
- roller bandages
- triangular bandages
- workplace First Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form for written reports
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

HLTAID006 Provide advanced first aid

Modification History

Release	Comments
Release 5	Updated: <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Minor changes to formatting to improve readability.
Release 1	<p>This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit.</p> <p>Removal of embedded content from HLTF412A Apply First Aid.</p> <p>New evidence requirements for assessment.</p> <p>Removal of pre-requisite unit.</p>

Application

This unit describes the skills and knowledge required to provide an advanced first aid response, including management of the incident and other first aiders, until the arrival of medical or other assistance.

The unit applies to workers who may be required to provide, coordinate and manage a first aid response across a range of complex situations, including community and workplace settings.

Specific licensing /regulatory requirements relating to this competency, including requirements for refresher training should be obtained from the relevant national/state/territory Work Health and Safety Regulatory Authorities.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for first aid response
- 1.4 Assess the situation and seek assistance from emergency response services
- 1.5 Deploy resources to appropriate locations as required in line with workplace procedures

2. Apply appropriate first aid procedures

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with Australian Resuscitation Council (ARC) guidelines
- 2.2 Provide first aid in accordance with established first aid principles
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Operate first aid equipment according to manufacturer's instructions
- 2.7 Monitor the casualty's condition and respond in accordance with first aid principles

ELEMENT**PERFORMANCE CRITERIA**

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

3. Coordinate first aid activities until arrival of medical assistance

3.1 Identify available resources required and establish communication links with appropriate personnel, emergency management services and medical assistance as appropriate

3.2 Deploy correct amount of required resources to appropriate locations in an effective manner to ensure timely arrival

3.3 Document the provision of resources and recommend modifications as required

3.4 Monitor the condition of casualties in accordance with first aid principles and workplace procedures

3.5 Coordinate evacuation of casualties according to relevant evacuation procedures

3.6 Arrange support services for personnel involved in the incident in accordance with relevant principles and procedures

4. Communicate details of the incident

4.1 Accurately convey incident details to emergency response services

4.2 Report details of incident in line with organisational policies

4.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

5. Evaluate the incident and own performance

5.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents

5.2 Participate in debriefing to address individual needs

5.3 Evaluate management of the incident and develop an action plan in consultation with relevant parties

5.4 Review contingency planning to identify and select alternative management principles and procedures as required

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Unit Mapping Information

No equivalent unit

Assessment Requirements for HLTAID006 Provide advanced first aid

Modification History

Release	Comments
Release 5	Updated: <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome.
Release 2	Minor changes to formatting to improve readability.
Release 1	This version was released in <i>HLT Health Training Package release 1.0</i> and meets the requirements of the 2012 Standards for Training Packages. Significant changes to elements and performance criteria, changes to scope of unit. Removal of embedded content from HLTF412A Apply First Aid. New evidence requirements for assessment. Removal of pre-requisite unit.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

There must be evidence that the candidate has completed the following tasks in line with state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures:

- followed DRSABCD in line with ARC guidelines, including:

- performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
- performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
- performed at least 2 minutes of Bag-valve-mask ventilation and at least 2 minutes of compression during a two rescuer procedure on an adult resuscitation manikin placed on the floor
- responded appropriately in the event of regurgitation or vomiting
- managed the unconscious breathing casualty
- followed the prompts of a Automated External Defibrillator (AED)
- followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- responded to at least three simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
 - demonstrated safe manual handling techniques
 - conducted a visual and verbal secondary survey assessment of the casualty
 - assessed vital signs (respirations, pulse and temperature)
 - communicated effectively with a first aid team providing direction and coordination of other first aiders
 - post-incident debrief and evaluation
 - provided an accurate verbal and written report of the incident
- applied first aid procedures for the following:
 - allergic reaction
 - anaphylaxis
 - bleeding control
 - choking and airway obstruction
 - conducted a basic triage for multiple casualty incident
 - envenomation (using pressure immobilisation)
 - fractures, sprains and strains (using arm slings, roller bandages or other appropriate immobilisation principles)
 - head, neck and spinal injuries (using immobilisation principles)
 - respiratory distress - including asthma
 - seizures - including epilepsy
 - shock
- located and interpreted workplace policies and procedures

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
 - ARC guidelines relevant to provision of CPR and first aid
 - guidelines of Australian national peak clinical bodies
 - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
 - infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace and community considerations including:
 - awareness of potential need for stress-management techniques and available support following an emergency situation
 - capabilities of emergency management services
 - consent
 - duty of care requirements
 - importance of debriefing
 - own skills and limitations
 - legal requirements of administration of medication and the rights and responsibilities of the First Aider in the workplace regarding medication
 - privacy and confidentiality requirements
 - respectful behaviour towards a casualty
- considerations when providing first aid including:
 - airway obstruction due to body position
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - assessment and interpretation of vital signs, including respirations, temperature and pulse
 - chain of survival
 - how to conduct a visual and verbal secondary survey assessment of casualty
 - priorities of management in first aid when dealing with life-threatening conditions
 - procedures for dealing with casualties who are aged or infirmed
 - procedures for dealing with major and minor accidents in the workplace
 - procedures when providing first aid to children
 - standard precautions
- principles and procedures for first aid management of the following scenarios, including complications:
 - abdominal injuries
 - allergic reaction

- anaphylaxis
- basic care of a wound
- bleeding control
- burns, including thermal, chemical, friction and electrical
- cardiac conditions, including chest pain
- choking and airway obstruction
- crush injuries
- diabetes
- drowning
- emergency childbirth
- envenomation
- environmental impact including hypothermia, hyperthermia, dehydration and heat stroke
- eye and ear injuries
- febrile convulsions
- head, neck and spinal injuries
- levels of consciousness
- needle stick injuries
- poisoning and toxic substances
- respiratory distress, including asthma
- seizures, including epilepsy
- shock
- skin injuries
- soft tissue musculoskeletal, including injuries including sprains, strains, dislocations and fractures
- stroke
- substance misuse, including common drugs and alcohol, including illicit drugs
- basic anatomy and physiology relating to:
 - how to recognise a person is not breathing normally
 - chest, skeleton, joints and muscles
 - response/level of consciousness
 - upper airway and effect of positional change
 - considerations in provision of first aid for specified conditions

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- adrenaline auto-injector training device
- AED training device.
- bag-valve-mask
- eye patch
- placebo bronchodilator and spacer device
- roller bandages
- thermometer
- triangular bandages
- workplace first Aid kit
- workplace injury, trauma and/or illness record, or other appropriate workplace incident report form
- wound dressings

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

Application

This unit describes the skills and knowledge required to use specialised equipment in the provision of resuscitation in line with the Australian Resuscitation Council (ARC) guidelines.

This unit applies to workers who may be required to use specialised equipment to provide resuscitation in a range of complex situations, include community and workplace settings.

Specific licensing requirements relating to this competency, including requirements for refresher training, should be obtained from the relevant state/territory Work Health and Safety Regulatory Authority.

Elements and Performance Criteria

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes.

Performance criteria specify the level of performance needed to demonstrate achievement of the element.

1. Respond to an emergency situation

- 1.1 Recognise an emergency situation
- 1.2 Identify, assess and manage immediate hazards to health and safety of self and others
- 1.3 Assess the casualty and recognise the need for advanced resuscitation response
- 1.4 Assess the situation and seek assistance from emergency response services where required

2. Perform advanced resuscitation

- 2.1 Perform cardiopulmonary resuscitation (CPR) in accordance with ARC guidelines
- 2.2 Provide supplemental oxygen
- 2.3 Display respectful behaviour towards casualty
- 2.4 Obtain consent from casualty where possible
- 2.5 Use available resources and equipment to make the casualty as comfortable as possible
- 2.6 Monitor casualty condition and rectify issues preventing adequate treatment

3. Communicate details of the incident

- 3.1 Accurately convey incident details to emergency response services
- 3.2 Report details of incident in line with organisational policies
- 3.3 Maintain confidentiality of records and information in line with statutory and/or organisational policies

4. Evaluate the incident and own performance

- 4.1 Recognise the possible psychological impacts on self and other rescuers involved in critical incidents
- 4.2 Participate in debriefing to address individual needs
- 4.3 Check, maintain and clean equipment ready for future use

Foundation Skills

The Foundation Skills describe those required skills (language, literacy, numeracy and employment skills) that are essential to performance.

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Assessment Requirements for HLTAID007 Provide advanced resuscitation

Modification History

Release	Comments
Release 5	Updated: <ul style="list-style-type: none"> • assessor requirements statement • foundation skills lead in statement • licensing statement • modification history to reflect 2012 standards Equivalent outcome.
Release 4	Updated mapping information. Changes to assessment requirements. Equivalent outcome.
Release 3	Updated mapping information. Equivalent outcome
Release 2	Updated mapping information.
Release 1	<p>This version was released in HLT Health Training Package release 1.0 and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Significant changes to elements and performance criteria, changes to scope of unit.</p> <p>Removal of embedded content from HLTF404C.</p> <p>Removal of analgesic gases.</p> <p>New evidence requirements for assessment.</p> <p>Removal of prerequisite unit.</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role.

The demonstrated evidence is performed in line within state/territory regulations, first aid codes of practice, Australian Resuscitation Council (ARC) guidelines and workplace procedures.

- Followed DRSABCD in line with ARC guidelines, including:
 - performed at least 2 minutes of uninterrupted single rescuer cardiopulmonary resuscitation (CPR) (5 cycles of both compressions and ventilations) on an adult resuscitation manikin placed on the floor
 - performed at least 2 minutes of uninterrupted single rescuer CPR (5 cycles both compressions and ventilations) on an infant resuscitation manikin placed on a firm surface
 - performed at least 2 minutes of bag-valve-mask ventilation and at least 2 minutes of compression on an adult resuscitation manikin placed on the floor
 - responded appropriately in the event of regurgitation or vomiting
 - managed the unconscious breathing casualty
 - followed the prompts of an Automated External Defibrillator (AED)
 - followed single rescue procedure, including the demonstration of a rotation of operators with minimal interruptions to compressions
- conducted a visual and verbal secondary survey assessment of the casualty
- assessed vital signs (respirations, pulse and temperature)
- responded to at least three simulated first aid scenarios contextualised to the candidate's workplace/community setting, including:
 - demonstrated safe manual handling techniques
 - clearing the airway using a suction device
 - post-incident debrief and evaluation
 - provided an accurate verbal and written report of the incident
- selected and inserted an oropharyngeal airway adjunct
- administered oxygen to an unconscious/conscious casualty, including:
 - selected and prepared correct oxygen equipment
 - administered oxygen safely at correct flow rate
- monitored and coordinated maintenance of resuscitation equipment
 - dismantling
 - storage
 - disposal
 - cleaning and decontamination
 - checking and diagnosis of faults
- located and interpreted workplace policies and procedures
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- State/Territory regulations, first aid codes of practice and workplace procedures including:
 - ARC guidelines relevant to provision of CPR
 - guidelines of Australian national peak clinical bodies
 - safe work practices to deal with risks and potential hazards including manual handling, hazardous substances, dangerous goods and chemicals
 - infection control principles and procedures, including use of standard precautions
 - requirements for currency of skill and knowledge
- legal, workplace or community considerations including:
 - awareness of potential need for stress-management techniques and available support following an emergency situation
 - capabilities of emergency management services
 - consent
 - duty of care requirements
 - importance of debriefing
 - legal requirements of administration of medication and the rights and responsibilities of the First Aider in the workplace regarding medication
 - own skills and limitations
 - privacy and confidentiality requirements
 - respectful behaviour towards a casualty
- considerations when performing resuscitation including:
 - airway obstruction due to body position
 - appropriate duration and cessation of CPR
 - appropriate use of an AED
 - assessment and interpretation of vital signs (respirations, temperature and pulse)
 - benefits, contraindications and complications with the use of an oropharyngeal airway
 - chain of survival
 - how to conduct a visual and verbal secondary survey assessment
 - standard precautions
- considerations when providing supplementary oxygen, including:
 - benefits, contraindications and complications of providing oxygen to a casualty and of providing suction during the application of advanced resuscitation techniques
 - complications with the use of a bag-valve-mask device and suitable strategies to minimise these
 - selection and operation of oxygen masks and other appropriate delivery devices
- basic anatomy, physiology and toxicology as it relates to the provision of advanced resuscitation, including:
 - basic electrical activity associated with normal and abnormal heart rhythm
 - how to recognise a person is not breathing normally
 - relevant organs of the cardio pulmonary system and their operation

- response/level of consciousness
- upper airway and effect of positional change
- methods for cleaning, replenishing, recharging and maintaining resuscitation and oxygen equipment including:
 - actions to rectify problems
 - procedures to ensure operational readiness
 - storage, cleaning, decontamination and safe disposal of consumables
 - troubleshooting to identify minor and major faults
 -

Assessment Conditions

Skills must be demonstrated working individually in an environment that provides realistic in-depth, industry-validated scenarios and simulations to assess candidates' skills and knowledge.

Assessment resources must include:

- adult and infant resuscitation manikins in line with ARC Guidelines for the purpose of assessment of CPR procedures
- airway model suitable for insertion of an oropharyngeal airway
- Automated External Defibrillator (AED) training device.
- bag-valve-mask
- oropharyngeal airway adjunct
- oxygen resuscitation system with oxygen cylinder
- selection of oxygen masks with tubing; nasal cannula, therapy mask, resuscitation mask with oxygen port
- thermometer
- suction device
- workplace incident, injury, trauma or illness record or other appropriate workplace incident report form.

Simulated assessment environments must simulate the real-life working environment where these skills and knowledge would be performed, with all the relevant equipment and resources of that working environment.

Assessor requirements

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.

PSPGEN049 Undertake negotiations

Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPGOV507A Undertake negotiations.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with the new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to undertake negotiations. It includes planning and finalising negotiation outcomes.

This unit applies to those working in generalist and specialist roles within the public sector.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work independently performing complex tasks in a range of familiar and unfamiliar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

General

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Plan for negotiation	<p>1.1 Clarify the purpose of the negotiation and the issue/s under consideration with affected personnel and through analysis of all related information.</p> <p>1.2 Identify primary needs and desired outcomes of all parties.</p> <p>1.3 Determine the organisation's position in consultation with senior personnel, and devise a negotiation approach based on an analysis of the strengths and weaknesses of the position.</p> <p>1.4 Collect, analyse and organise information relating to the negotiation, including any precedents.</p> <p>1.5 Agree upon timeframe and logistics, develop a negotiation plan and communicate to other staff, if any, involved in the negotiation team.</p>
2. Conduct negotiation	<p>2.1 Agree upon the issue/s under consideration and the negotiation process to be used with all parties and document.</p> <p>2.2 Use negotiation techniques to persuade the other party of the strength of the argument in favour of the organisation's position.</p> <p>2.3 Modify the negotiation plan if necessary to respond to contingencies.</p> <p>2.4 Select and use techniques for dealing with conflict or deadlocks in accordance with the negotiation plan and the progress of the negotiation.</p> <p>2.5 Discuss options for resolving the issue and determine the acceptability of these to the parties.</p>
3. Finalise negotiation outcomes	<p>3.1 Reach an agreed conclusion, document and obtain sign-off by the parties.</p> <p>3.2 Report negotiation outcomes and debrief stakeholders if required.</p> <p>3.3 Determine any further action required as a result of agreement and action.</p> <p>3.4 Review the negotiation process and outcomes, and document lessons learnt for future use.</p>

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPGOV507A Undertake negotiations.

Assessment Requirements for PSPGEN049 Undertake negotiations

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- applying legislation, regulations and policies relating to negotiating in the public sector
- communicating with diverse stakeholders including the other party, team members and senior management
- communicating by listening, questioning, establishing rapport and responding
- applying decision making and problem-solving
- adjusting quickly to new information or unexpected questions and attitudes

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- legislation, regulations, policies, procedures and guidelines relating to negotiations in the public sector
- sources of organisational information
- delegations and lines of authority
- decision making
- negotiation techniques
- conflict resolution
- recordkeeping requirements for negotiations

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PSPPCM011 Plan to manage a contract

Modification History

Release	Comments
1	<p>This unit was released in PSP Public Sector Training Package release 1.0 and meets the Standards for Training Packages.</p> <p>This unit supersedes and is equivalent to PSPPROC506A Plan to manage a contract.</p> <ul style="list-style-type: none"> • Unit code updated • Content and formatting updated to comply with new standards • All PC transitioned from passive to active voice

Application

This unit describes the skills required to establish arrangements for contract management. It includes confirming contract requirements, preparing a contract management plan, developing stakeholder relationships and implementing contract strategies and contractual arrangements.

This unit applies to those working in roles involving procurement contract management.

The skills and knowledge described in this unit must be applied within the legislative, regulatory and policy environment in which they are carried out. Organisational policies and procedures must be consulted and adhered to.

Those undertaking this unit would work autonomously while performing complex tasks, in familiar contexts.

No licensing, legislative or certification requirements apply to unit at the time of publication.

Competency Field

Procurement

Elements and Performance Criteria

ELEMENTS	PERFORMANCE CRITERIA
Elements describe the essential outcomes	Performance criteria describe the performance needed to demonstrate achievement of the element. Where bold italicised text is used, further information is detailed in the range of conditions section.
1. Confirm contract requirements	<p>1.1 Identify legislation, public sector standards and organisational requirements relating to probity, financial management, approvals and other considerations for inclusion in the contract management plan.</p> <p>1.2 Re-confirm contract requirements with all parties.</p> <p>1.3 Determine obligations to the contractor, limits of authority and delegations according to contractual arrangements.</p> <p>1.4 Confirm start-up or transition arrangements.</p>
2. Prepare contract management plan	<p>2.1 Identify contract risks and develop a risk management plan.</p> <p>2.2 Determine procedures to identify, receive and address contract variations.</p> <p>2.3 Determine procedures to investigate, resolve or refer disputes or complaints.</p> <p>2.4 Develop and negotiate key performance indicators and identify and approve administrative processes for the life of the contract.</p> <p>2.5 Document, obtain approval on and maintain a contract management plan that addresses key elements.</p> <p>2.6 Apply expected standards of behaviour, probity and privacy principles to all elements of contract management plan.</p> <p>2.7 Apply environmental, sustainability and corporate social responsibility principles to all elements of contract management plan.</p>
3. Develop stakeholder relationships	<p>3.1 Identify stakeholder networks and relationships.</p> <p>3.2 Use networking strategies to establish, develop and maintain working relationships to promote benefits to the contract requirements.</p> <p>3.3 Develop and maintain confidence of stakeholders through high standards of behaviour and ethical conduct.</p> <p>3.4 Use negotiation strategies to achieve positive outcomes when difficult situations arise.</p> <p>3.5 Identify and confirm communication requirements in line with contractual obligations and stakeholder needs.</p>
4. Implement contract strategies	<p>4.1 Identify requirements of confidentiality and freedom of information for the contract.</p> <p>4.2 Develop communication and/or information strategy that matches needs of the organisation, the contract and the contractor's</p>

	<p>business environment.</p> <p>4.3 Establish contract review requirements with stakeholders.</p> <p>4.4 Develop contract review strategy to review management of the contract, contractor performance and user satisfaction.</p>
5. Implement contractual arrangements	<p>5.1 Establish and manage business relationship with contractor.</p> <p>5.2 Implement start-up or transition arrangements.</p> <p>5.3 Establish financial, administrative and information management processes.</p> <p>5.4 Implement contractual arrangements according to contract management plan.</p> <p>5.5 Maintain appropriate records for the life of the contract.</p>

Foundation Skills

Foundation skills are embedded within the elements and performance criteria of this unit.

Unit Mapping Information

This unit supersedes and is equivalent to PSPPROC506A Plan to manage a contract.

Assessment Requirements for PSPPCM011 Plan to manage a contract

Modification History

Release	Comments
1	<p>These Assessment Requirements were released in PSP Public Sector Training Package release 1.0 and meet the Standards for Training Packages.</p> <ul style="list-style-type: none"> Assessment Requirements created drawing upon specified assessment information from superseded unit

Performance Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the candidate must demonstrate evidence of performance of the following on at least one occasion.

- networking, consulting and negotiating with contractors and stakeholders
- developing a written contract management plan and sub-plans
- reading and applying complex documents, including contracts, legislation and guidelines
- provide feedback
- modelling effective team management approaches
- referring issues to the correct person
- applying understanding of supplier issues and supply chain management in the context of procurement risk management
- planning and organising skills to manage and update the contract management plan and sub-plans
- maintaining currency of best practice examples in procurement practice and relevant procurement legislation, policies and procedures
- use electronic procurement templates

Knowledge Evidence

Evidence required to demonstrate competence must satisfy all of the requirements of the elements and performance criteria. If not otherwise specified the depth of knowledge demonstrated must be appropriate to the job context of the candidate.

- Commonwealth, state or territory, and local government legislation, policies, practices and guidelines relating to contract management, including environmental purchasing, sustainability and corporate social responsibility guidance relevant to the contract
- organisational procurement policies, practices and approval processes

- contract management planning for diverse contractual situations
- privacy and confidentiality issues
- codes of conduct, codes of practice and standards of individual behaviour relating to management of contracts and relationships with contractors
- financial and accounting issues relevant to the contract

Assessment Conditions

This unit contains no specific industry-mandated assessment conditions. Guidance on suggested and recommended conditions and methods can be found in the Implementation Guide.

Assessors must satisfy the NVR/AQTF mandatory competency requirements for assessors.

PUAAMS002 Search as a member of an air search team

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit involves the skills and knowledge required to conduct air search observation duties during an air search operation in accordance with organisational policies and procedures.

The unit is applicable to members of air search and rescue teams working in the air. Team members and crews may be members of a range of government or non-government organisations and/or agencies.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Aviation Marine Search and Rescue

Unit Sector

Aviation Marine Search and Rescue

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare for search operations

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Operational briefing is obtained from relevant search and rescue authority

1.2 Aircraft is configured and loaded, in accordance with requirements and pilot in command instructions

- 1.3 Involvement in briefings is undertaken, in accordance with organisational policies and procedures
 - 1.4 Incident information is used to determine personal equipment needed for search operation
 - 2 **Conduct search operations**
 - 2.1 Scanning distance is identified
 - 2.2 Search briefing is reviewed en route to task area
 - 2.3 Impediments to effective observation techniques are identified and appropriate adjustments are made
 - 2.4 Observation technique is applied to ensure effective scanning of identified area of interest
 - 2.5 Search equipment is operated to maximise sighting and identification effectiveness
 - 3 **Investigate sightings**
 - 3.1 Sightings are reported and maintained
 - 3.2 Sightings are investigated
 - 3.3 Sightings are logged and communicated to relevant search and rescue authority
 - 4 **Communicate outcome search**
 - 4.1 Emergency signals from target are identified and recognised
 - 4.2 Communications are logged and reported to relevant search and rescue authority

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAAMS002B Search as a member of an air search team and PUAAMS002A Search as a member of an air search team.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAAMS002 Search as a member of an air search team

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- communicating information clearly within the search team
- conducting search operations
- investigating sightings
- making decisions based on available information
- preparing for search operations
- selecting and using available technology appropriate to the search task

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- aircraft configuration
- communication techniques
- factors which may indicate evidence of a search target
- observation techniques and procedures including impediments to effective observation techniques
- organisational documentation, policies and procedures including WHS/OHS legislated requirements and risk mitigation
- physiology of sight
- search and rescue authorities
- search planning including search equipment
- signals and/or message equipment and procedures

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of

assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment including
 - appropriate training facility and an aircraft used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals

PUACOM005 Foster a positive organisational image in the community

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to enable two-way communication with the community and to promote a positive public image. It includes promoting and representing the organisation in the community and advising and involving the community in public safety activities.

The unit is applicable to personnel who are required to take an active community engagement and educational role.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUATEA004 Work effectively in a public safety organisation

Competency Field

Communication

Unit Sector

Public Safety

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Promote organisation in community

1.1 Community requests for information or participation are responded to, in accordance with organisational policies and procedures

1.2 Opportunities to explain and promote organisational activities are acted on to promote community recognition and support

1.3 Non-routine requests for information are referred to appropriate personnel

2 Represent organisation in community

2.1 Organisation's position on issues is disseminated to acknowledge community concerns and promote community awareness

2.2 Communication and presentations to the public are used to enhance the organisation's public image

3 Advise and involve community in public safety activities

3.1 Community is advised of prevention and mitigation techniques

3.2 Community members are informed on how to implement prevention and mitigation activities

3.3 Community is assisted to initiate, develop and conduct prevention and mitigation techniques to address their specific needs

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUACOM005B Foster a positive organisational image in

the community.

Assessment Requirements for PUACOM005 Foster a positive organisational image in the community

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- advising and involving the community in public safety activities
- communicating with diverse people and groups
- evaluating community activities
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- interpreting comments and feedback
- listening to community questions and responding
- promoting organisational messages in the community
- representing the organisation in the community positively
- risk mitigation and prevention techniques

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- appropriate personnel to contribute to community events
- characteristics of communities
- evaluation of community activities
- opportunities to promote including special promotions
- organisational documentation, policies and procedures including procedures for Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements, the provision of advice, recording comments and completing follow up actions
- organisation's position on current issues
- presentation strategies and techniques
- privacy principles
- risk mitigation and prevention techniques
- types of information to present to the community

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - organisational promotional information and materials
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUACOM007 Liaise with other organisations

Modification History

Release 1. This is the first release of this qualification in the PUA – Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to develop networks and relationships and to liaise with other organisations. It includes establishing networks and relationships and communicating and interacting with other organisations.

The unit is applicable to personnel who formally liaise with other organisations to increase response effectiveness and community safety.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

Release 1. This is the first release of this qualification in the PUA – Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- communicating and interacting with other organisations
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- networking and developing relationships
- participating in meetings
- providing accurate and clear information

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- awareness of role and responsibilities of other organisations
- goals and objectives of other organisations, agencies or sectors
- inter-organisational cooperation and collaboration
- meeting protocols and procedures
- organisational documentation, policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements and those that relate to liaising with other organisations and interested parties
- organisation's confidentiality requirements and privacy principles
- role and responsibilities
- types of organisations

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of

assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
 - on the job assessment will not entail additional resources however, rosters may need to be amended for simulation e.g. search and rescue exercises
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operations manuals.

PUAEMR008 Contribute to an emergency risk management process

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package

Application

This unit of competency involves the skills and knowledge required to participate in working groups or other forums in contributing to developing an emergency risk assessment and treatment plan for a community. It includes clarifying community contacts, applying emergency risk management methodology, developing risk statements and treatment options, promoting emergency risk management ownership and working cooperatively with stakeholders.

The unit applies to personnel who undertake emergency risk assessments with a community or part of a community and is relevant to individuals with specific expertise who may be invited to participate in an emergency risk assessment working group.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable

Competency Field

Emergency Management

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Clarify community context

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Known risks, safety concerns and expectations of emergency risk management processes information are

- collected and analysed
- 1.2 Safety concerns, drivers of change, recent events, community views and sensitivities are identified
 - 1.3 Legislation, policies, procedures and existing emergency management documentation and arrangements are identified
 - 1.4 Input to building an initial picture of community characteristics, safety expectations and perceptions of risk is provided to stakeholders
 - 1.5 Significance of available information for own organisation and/or constituency is assessed and reported to stakeholders
 - 1.6 Scope and focus of a feasible emergency risk management project is determined
- 2 Apply emergency risk management methodology**
- 2.1 Organisational responsibilities, roles, limits of authority, scope of community knowledge and expertise are outlined to emergency risk group members
 - 2.2 Organisational resources to support the emergency risk management process are identified
 - 2.3 Sources of useful and credible information are identified through stakeholders, community networks and interested parties
 - 2.4 Consultation and communication is undertaken, in accordance with organisational procedures
 - 2.5 Processes for accountability and communication of accurate and consistent information to stakeholders are developed and applied
- 3 Develop risk statements and treatment options**
- 3.1 Accuracy and currency of available risk information is assessed
 - 3.2 Additional information is sought from specialist stakeholders regarding information gaps and conflicting data or views
 - 3.3 Risk statements are developed using sources of risk, elements at risk and vulnerability, in accordance with organisational procedures
 - 3.4 Risk statements are analysed considering consequences

and likelihood of occurrences

- 3.5 Input is provided to assess effectiveness of existing treatment strategies
 - 3.6 Risk treatment options are developed considering practical constraints and assessment criteria, in accordance with organisational procedures
 - 3.7 Feedback on risks and treatment options is obtained from internal and external stakeholders
 - 3.8 Recommendations are developed with stakeholders and submitted for approval to authorised personnel
- 4 Promote emergency risk management ownership**
- 4.1 Stakeholder consultation is undertaken during risk management process
 - 4.2 Positions and commitments for emergency risk management are authorised before being communicated to others
 - 4.3 Management is kept informed of project progress, proposed variations in strategy, decisions and recommendations
 - 4.4 Resource variations are negotiated with authorised personnel
 - 4.5 Stages of emergency risk management processes, decisions and outcomes are documented, in accordance with organisational procedures, industry standards and legislative requirements
 - 4.6 Opportunities for improving emergency risk management processes are identified and reported to authorised personnel
- 5 Work cooperatively with stakeholders**
- 5.1 Allocated tasks are completed on time whilst encouraging stakeholders to help achieve common goals
 - 5.2 Meeting procedures are followed, in accordance with organisational procedures
 - 5.3 Accurate information is provided to stakeholders, in accordance with organisational procedures
 - 5.4 Opinions and advice are sought whilst appreciating the boundaries and cultures of organisations and diverse views of other stakeholders

- 5.5 A wide range of reactions and views are actively sought from stakeholders, in accordance with organisational procedures
- 5.6 Appropriate language is used when communicating with stakeholders in meetings, in accordance with organisational procedures
- 5.7 Confidentiality and privacy of information is maintained, in accordance with organisational procedures and privacy principles
- 5.8 Conflicts are resolved, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR008B Contribute to an emergency risk management process.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAEMR008 Contribute to an emergency risk management process

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- analysing risks, implications and impacts of proposed treatments
- applying organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- clarifying community context
- communicating and consulting with stakeholders
- delivering constructive input and gaining organisational and/or constituency support
- determining and applying emergency risk management methodology
- developing risk statements and treatment options
- informing organisation and constituency of emergency risk management process
- participating and contributing to emergency risk management processes
- promoting emergency risk management ownership
- providing constructive information and advice
- resolving conflicts
- undertaking emergency risk management processes
- working cooperatively with stakeholders

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- concepts and principles of emergency risk management
- emergency risk management methodology
- legislative and regulatory requirements for emergency risk management
- organisational documentation, policies and procedures including
 - arrangements specified in emergency management, land use and environmental or other legislation
 - disaster plans, agreements or memorandums of understanding
 - local planning regulations, development controls and environmental plans

- meeting procedures
- organisational or jurisdictional emergency risk management policies or procedures
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
- practical constraints including
 - arrangements, roles and responsibilities in existing emergency management plans
 - availability of technical expertise, technology and equipment
 - budgets, time, availability and capability of people
 - community knowledge of emergency risk management processes and benefits
 - existing hazards and risks
 - land use planning
 - legislation for emergency and environmental management, safety standards and local government regulations
 - political, social and cultural considerations
- principles of risk management and risk mitigation
- roles and responsibilities of key response and/or recovery organisations
- sources of useful and credible information
- stakeholder group dynamics and strategies for resolving conflict
- treatment options
- types of stakeholders

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Competency should be demonstrated in a range of contexts throughout the life of a community emergency risk management project or during the components of a number of projects.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - a community and the opportunity to contribute to an actual emergency risk management process and consideration of a range of community safety concerns

- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAEMR013 Design emergency management exercises

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to design, develop and/or modify activities that exercise elements of emergency management exercise arrangements. It includes determining exercise purpose by designing and planning exercise activities, assessing exercise risks and then planning resource allocation

Emergency management exercises are used to test emergency plans, practise responding to an emergency, develop and/or practise emergency management skills, build motivation for emergency management personnel and/or measure an organisation's ability to manage an emergency. An exercise can range from a small activity in a volunteer emergency response unit to a major evacuation exercise for an industrial plant.

The unit applies to personnel with responsibility for designing emergency management exercises. The design skills in this unit can be applied to any context in which an emergency management exercise is appropriate.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Emergency Management

Unit Sector

Not applicable

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Determine exercise purpose**
 - 1.1 Exercise stakeholders are identified and engaged, in accordance with organisational policies and procedures
 - 1.2 Exercise governance arrangements are confirmed, in accordance with organisational policies and procedures
 - 1.3 Exercise aim is identified, in consultation with stakeholders
 - 1.4 Exercise objectives are confirmed as meeting identified aim
 - 1.5 Exercise focus is determined, based on operational outcomes, results of training needs analysis, previous exercises and evaluation reports
- 2 Design and plan exercise activities**
 - 2.1 Planning team is established, in accordance with organisational policies and procedures
 - 2.2 Governance and planning meetings are held, agreements and decisions are made and outcomes are communicated to stakeholders
 - 2.3 Components of the exercise program are identified, developed and documented in the exercise plan
 - 2.4 Exercise style and activities consistent with objectives are selected, in consultation with stakeholders
 - 2.5 Design planning processes are undertaken with stakeholders to meet exercise objectives and components
 - 2.6 Exercise documentation is prepared, in accordance with organisational policies and procedures
- 3 Assess exercise risks**
 - 3.1 Risk and safety considerations are identified and included in the planning process
 - 3.2 Activities which mitigate or reduce risks associated with conducting exercise activities are designed
 - 3.3 Exercise risk and safety management plan is prepared, in accordance with organisational policies and procedures
- 4 Plan resource allocation**
 - 4.1 Resources to support the exercise are identified and secured

- 4.2 Exercise location and/or host is identified and a commitment to achieving exercise objectives is secured
- 4.3 Appropriate authorisation to use resources are obtained and documented, in accordance with organisational policies
- 4.4 Availability and timeframes for use of resources is agreed by appropriate personnel and/or authorities

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAEMR031 Design emergency management exercises.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAEMR013 Design emergency management exercises

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least two separate occasions and includes

- designing and planning exercise activities processes including
 - assessment and emergency management exercise criteria
 - background information and emergency management exercise inputs
 - briefings and debriefings
 - design of emergency management exercise scenario and activities
 - development and review of key performance indicators
 - duration of exercise activities
 - emergency management exercise contingency plans
 - emergency management exercise documentation
 - emergency management exercise management structure
 - emergency management exercise meetings
 - identifying and managing risks
 - issuing notifications to affected stakeholders
 - scoping of organisations and agencies participating and the level at which they are participating
 - seasonal weather considerations
 - securing resources
- determining emergency management exercise purpose and objectives
- following organisational policies and procedures including Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements including assessing emergency management exercise risks
- interpreting organisational needs to develop measurable, achievable objectives
- liaising and communicating with other organisations and agencies
- managing small group workshops and activities
- planning and delivering briefings and debriefings
- planning resource allocation
- preparing exercise documentation

- working in group settings

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- components of emergency management exercises including
 - activity plan
 - aim and objectives
 - authorities, permissions and governance
 - budget and logistics plan
 - debrief plan
 - detailed schedule of activities
 - evaluation or assessment plan
 - evidence collection tools and templates
 - exercise name
 - location
 - risk and safety management plan
 - scope or purpose statement
- educational principles underpinning the design of emergency exercise objectives and activities
- exercise management concepts and principles
- incident management principles
- jurisdictional emergency management arrangements
- legislative and regulatory arrangements for using resources such as land, buildings, equipment and volunteers
- organisational documentation, policies and procedures including WHS/OHS requirements and facility emergency response plans
- risk and safety management principles including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational contexts or exercise styles, including at least

one exercise that requires multi-organisational input and of which one may be simulated, where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment must confirm the ability to

- bring together an effective exercise design and planning team
- facilitate the construction of realistic, meaningful and safe activities that address the exercise aim and objectives

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operational manuals.

PUAFIR209 Work safely around aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to apply safe work practices when operating in or around aircraft at an airbase. It includes working safely near aircraft and facilitating safe ground support and it applies to personnel working in the public safety sector who work around aircraft.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Work safely in and around aircraft

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Personal protective clothing and equipment is used, in accordance with operational procedures

1.2 Precautions and clearances are obtained and followed

when operating on or near aircraft movement areas

- 1.3 Any approach to an operating aircraft is made, in accordance with organisational aircraft approach procedures, from an angle visible to the pilot or flight crew and with approval of the pilot or flight crew
- 1.4 Adequate clearance is maintained from propellers, rotors and/or turbine engines, exhaust gases and engine intakes
- 1.5 Typical manoeuvring patterns of aircraft are anticipated through activities
- 1.6 Instructions or signals from pilots or staff controlling aircraft are complied with, in accordance with organisational procedures
- 1.7 Site hazards are identified and risks are assessed and control measures are implemented

2 Facilitate safe ground support

- 2.1 Appropriate precautions are observed when positioning vehicles or equipment close to aircraft
- 2.2 Aircraft design features are taken into account whilst boarding, loading or handling aircraft
- 2.3 Instructions from pilots and staff coordinating aircraft operations, organisational procedures and placards are followed during ground support operations
- 2.4 Aircraft loading is conducted under pilot or flight crew member supervision and appropriate weight, balance and loading system are complied with
- 2.5 Areas are designated and separated, in accordance with site features and specific operations being conducted
- 2.6 Fitting of equipment to an aircraft is conducted under pilot supervision, in accordance with appropriate regulatory approvals
- 2.7 Aircraft fuels, oils, and supplies are stored and handled, in accordance with regulatory requirements and organisational procedures
- 2.8 Aircraft or equipment defects or hazards are reported to pilot and/or appropriate supervisor
- 2.9 Appropriate aerodrome regulations are complied with

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR209B Work safely around aircraft.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUAFIR209 Work safely around aircraft

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- complying with regulatory requirements and organisational procedures
- delivering briefings in appropriate locations including an area that is free of distractions including movement and noise, is safe and convenient to subsequent deployment needs and has the necessary facilities and equipment
- ensuring safety and quality procedures are applied
- identifying hazards and risks and acting to minimise, mitigate, control or eliminate
- implementing precautions and working safely whilst around aircraft
- using personal protective clothing and equipment and specialist aviation support equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements and performance criteria and includes knowledge of

- aerodrome layout, facilities and services including working zones and lighting facilities
- aerodrome legislation, industry standards, regulations and security procedures
- aircraft features and movement characteristics
- aircraft performance, operation, loading and refuelling precautions
- assessment and risk mitigation processes
- organisational documentation, policies and procedures
- participation in briefings including Situation, Mission, Execution, Administration, Command/control, Safety (SMEACS) and questions
- personal protective clothing and equipment including fire extinguisher, first aid kit, high visibility protective overalls and vests, respiratory protection, signalling devices, lighting or beacons and head, hand, eye, ear and foot protection
- roles and responsibilities of personnel supervising, managing and supporting aircraft operations
- site hazards

- suitable locations for conducting briefings and debriefings
- types of aircraft including aeroplanes, helicopters, remotely piloted aircraft and airborne vehicles
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including safe work practices around aircraft

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

PUAFIR211 Undertake hover-exit operations from helicopter

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Application

This unit of competency involves the skills and knowledge required to manage the transfer of trained personnel and equipment from a hovering helicopter to the ground. Helicopter hover-exit operations are undertaken primarily in areas where ground vegetation or terrain prevents a helicopter from conducting a full skid landing. The operation of aviation occurs in a heavily regulated environment.

The unit applies to personnel authorised to conduct helicopter hover-exit operations from a maximum height of 1.3 metres when a full skid landing is not possible. It is applicable to personnel responsible for the supervision and safety of hover-exit crews, specifically but not limited to hover-exit crew leaders, helicopter marshals and approved pilots.

The fire sector is those sections of government departments, statutory authorities or organisations that have responsibility under jurisdictional arrangements for the delivery of firefighting and fire management services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

It is essential that the prerequisite units listed below are obtained prior to the issuance of this unit to individuals within the fire sector or the units contributing to the attainment of a fire qualification.

PUAFIR209 Work safely around aircraft

Competency Field

Fire

Unit Sector

Fire

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare for hover-exit operations

- 1.1 Hover-exit equipment is selected and prepared, in accordance with organisational procedures and requirements
- 1.2 Appropriate clothing and equipment are worn, in accordance with organisational procedures and requirements
- 1.3 Pre-flight checks on clothing and equipment are undertaken, in accordance with organisational procedures
- 1.4 Damage to firefighting and safety equipment is reported to the supervisor for repair, replacement or disposal
- 1.5 General helicopter safety briefing is obtained from pilot, flight crew, air base and/or helibase manager

2 Load hover-exit personnel and equipment into helicopter

- 2.1 Firefighting and safety equipment is assembled, weighed and recorded
- 2.2 Pilot is informed of firefighting equipment and personnel weights
- 2.3 Equipment is loaded into helicopter and secured under pilot or flight crew supervision
- 2.4 Instructions are obtained from pre-mission briefing and clarification of objectives and procedures is sought, as required
- 2.5 Personnel are secured in seatbelts, in accordance with organisational procedures and flight crew instructions
- 2.6 Pre-flight safety briefing is obtained from pilot or flight crew

3 Prepare to exit from hovering helicopter

- 3.1 Appropriate landing technique is selected and used, in accordance with ground and safety conditions
- 3.2 Following clearance from pilot and hover-exit crew leader instructions are received to prepare for exit

- 3.3 Seat belt is released and then resecured prior to moving towards the helicopter doorway, in accordance with organisational procedures and instructions received
 - 3.4 Pre-descent checks are conducted, in accordance with organisational procedures and requirements
 - 3.5 Clearance is obtained from the pilot and hover-exit flight crew leader to disembark
 - 3.6 Emergency procedures are conducted, as required
 - 3.7 Emergency commands are responded to, in accordance with organisational procedures
- 4 Exit from hovering helicopter**
 - 4.1 Hover-exit operations are undertaken, in accordance with organisational procedures and Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) requirements
 - 4.2 Actions are undertaken to minimise uncommanded movement of the helicopter during transfer to the ground, in accordance with organisational procedures and instructions
 - 4.3 Assembly point for individuals and equipment is identified and reached
 - 4.4 All clear signal is communicated to pilot or flight crew when landing activity is complete
 - 4.5 Under instruction from hover-exit flight crew leader, individuals and equipment are transferred between helicopter and ground, in accordance with organisational procedures
 - 4.6 Emergency procedures are conducted, as required
 - 4.7 Emergency commands are responded to, in accordance with organisational procedures
- 5 Undertake hover-entry to helicopter**
 - 5.1 Individuals and equipment are located at nominated assembly point in preparation for hover-entry
 - 5.2 Following clearance from pilot and hover-exit flight crew leader, movement towards the helicopter is undertaken, in accordance with organisational procedures and instructions received

- 5.3 Actions to minimise uncommanded movement of the helicopter during transfer from the ground to the helicopter are undertaken, in accordance with organisational procedures and instructions
 - 5.4 Movement on board the helicopter and towards the helicopter seat is undertaken, in accordance with organisational procedures and instructions
 - 5.5 Seat belts are secured until clearance is obtained to commence movement within the helicopter, in accordance with organisational procedures, safe work practices and instructions from flight crew
 - 5.6 Seat belts remain secured until helicopter has landed and clearance is obtained to commence movement within the helicopter
- 6 Perform maintenance on equipment**
- 6.1 Equipment is inspected and maintenance is performed, in accordance with organisational procedures and manufacturers' guidelines
 - 6.2 Damage to equipment is reported to the supervisor for repair, replacement or disposal
 - 6.3 Maintenance or damage to equipment is documented and reported, in accordance with organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions may be found in the Companion Volume Implementation Guide.

general helicopter safety briefing must be conducted by

- air base or helibase manager
- crew person
- pilot

pre-mission briefing must be given by

- hover-exit crew leader

pre-flight safety briefing must be given by

hover-exit operations must include

- air crew member
- assistance from a helicopter for crew person
- conducting hover-exit operations from helicopter approved by the organisation
- transfer of equipment and firefighting crew between the helicopter and ground

Unit Mapping Information

This unit replaces and is equivalent to PUAFIR216 Undertake hover-exit operations from helicopter.

Links

PUA Training Package Companion Volume Implementation Guide is found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=3eca5672-6d5a-410b-8942-810d0ba05bbf>

Assessment Requirements for PUA FIR211 Undertake hover-exit operations from helicopter

Modification History

Release 1. This is the first release of this unit of competency in the PUA Public Safety Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions on at least one occasion and includes

- applying Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements
- demonstrating hover-exit procedures for exiting from different heights
- following instructions and procedures within helicopter
- implementing legislative, regulatory, organisational and operational procedures
- implementing emergency procedures
- loading hover-exit personnel and equipment into helicopter
- minimising movement during ascent and descent from helicopter
- participating in briefings and debriefings
- preparing for hover-exit operations from helicopter
- preparing to exit from hovering helicopter
- preparing, inspecting, carrying and stowing equipment prior to, during and following exiting from helicopter
- reporting accidents and incidents
- responding to emergency commands
- working as a team member in transferring personnel and equipment between helicopter and ground

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all the requirements of the elements, performance criteria and range of conditions and includes knowledge of

- categories of helicopters used by emergency service organisations for conducting hover-exit operations
- characteristics, limitations and operating principles of hover-exit equipment
- characteristics, limitations and operating principles of hover-exit operations
- personal protective clothing and equipment

- correct methods for carrying various types of equipment on a helicopter
- general safety, pre-mission and pre-flight safety briefing format and content
- inspection of equipment and maintenance procedures
- organisational documentation and regulatory reporting arrangements
- organisational policies and procedures including emergency command and safety and emergency procedures
- safe work practices when working in and around helicopters
- site selection for hover-exits
- types of landing techniques
- Work, Health and Safety (WHS)/Occupational Health and Safety (OHS) organisational requirements including risk mitigation

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment must occur in workplace operational situations. Where this is not appropriate, assessment must occur in industry approved simulated workplace operational situations that reflect workplace conditions.

Competency should be assessed on the job or in a range of simulated hover-exit or entry activities.

Resources for assessment must include access to

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, equipment, tools and personal protective clothing and equipment currently used in industry including
 - area to conduct operations, helicopter, briefing reports and appropriate personnel
- applicable documentation including organisational procedures, industry standards, equipment specifications, regulations, codes of practice and operation manuals.

SITHFAB002 Provide responsible service of alcohol

Modification History

Version	Comments
Release 1.0 updated on 2 March 2023	Minor changes to Knowledge Evidence in Assessment Requirements

Application

This unit describes the performance outcomes, skills and knowledge required to responsibly sell or serve alcohol.

Responsible practices must be undertaken wherever alcohol is sold or served, including where alcohol samples are served during on-site product tastings. This unit, therefore, applies to any workplace where alcohol is sold or served, including all types of hospitality venues, packaged liquor outlets and wineries, breweries and distilleries.

The unit applies to all levels of sales personnel involved in the sale, service and promotional service of alcohol in licensed premises. Those selling or serving alcohol may include food and beverage attendants; packaged liquor sales persons selling in person, over the phone or online; winery, brewery and distillery cellar door staff; and supplier sales representatives. The unit also applies to security staff who monitor customer behaviour and to the licensee who is ultimately responsible for responsible service of alcohol (RSA) management.

The unit incorporates the knowledge requirements, under state and territory liquor licensing law, for employees engaged in the sale or service of alcohol.

Certification requirements differ across states and territories. In some cases all people involved in the sale, service and promotional service of alcohol in licensed premises must be certified in this unit. This can include the licensee and security staff.

This unit covers the RSA skill and knowledge requirements common to all States and Territories. Some legislative requirements and knowledge will differ across borders. In some cases after completion of this unit, state and territory liquor authorities require candidates to complete a bridging course to address these specific differences.

Those developing training to support this unit must consult the relevant state or territory liquor licensing authority to determine any accreditation arrangements for courses, trainers and assessors.

Pre-requisite Unit

Competency Field

Food and Beverage

Unit Sector

Hospitality

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Sell or serve alcohol responsibly.
2. Assist customers to drink within appropriate limits.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Sell or serve alcohol according to provisions of relevant state or territory legislation, licensing requirements and responsible service of alcohol principles.
- 1.2. Where appropriate, request and obtain acceptable proof of age prior to sale or service.
- 1.3. Provide accurate information to customers on alcoholic beverages according to organisation or house policy and government legislation.
- 1.4. Assist customers with information on the range of non-alcoholic beverages available for purchase.
- 1.5. Identify issues related to the sale or service of alcohol to different types of customers, especially those at risk, and incorporate them into sales or service.
- 2.1. Prepare and serve standard drinks or samples according to industry requirements and professional standards.
- 2.2. Use a professional manner to encourage customers to drink within appropriate limits.
- 2.3. Recognise erratic drinking patterns as an early sign of possible intoxication and take appropriate action.
- 2.4. Monitor emotional and physical state of customers for

- signs of intoxication and effects of illicit or other drug use.
- 2.5. Where appropriate, offer food and non-alcoholic beverages.
 - 2.6. Decline requests for alcohol to be dispensed in a manner that is irresponsible and advise customers of the reasons for the refusal.
3. Assess alcohol affected customers and identify those to whom sale or service must be refused.
 - 3.1. Assess intoxication levels of customers using appropriate methods.
 - 3.2. When assessing intoxication, take into account factors that may affect individual responses to alcohol.
 - 3.3. Identify customers to whom sale or service must be refused according to state and territory legislation.
 4. Refuse to provide alcohol.
 - 4.1. Refuse sale or service in a professional manner, state reasons for the refusal, and where appropriate point out signage.
 - 4.2. Provide appropriate assistance to customers when refusing service.
 - 4.3. Where appropriate, give customers a verbal warning and ask them to leave the premises according to organisational or house requirements, the specific situation, and provisions of state or territory legislation and regulations.
 - 4.4. Use appropriate communication and conflict resolution skills to handle difficult situations.
 - 4.5. Refer difficult situations beyond the scope of own responsibility to the appropriate person.
 - 4.6. Promptly identify situations that pose a threat to the safety or security of colleagues, customers or property, and seek assistance from appropriate colleagues according to organisational policy.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

- Reading skills to:
- read at times complex information in:
 - general regulatory and advisory information issued by local, or state and territory liquor licensing authorities
 - in house policies and procedures
 - specific provisions of relevant state or territory legislation and

- licensing requirements
- read a range of identification (ID) and proof of age documents, statutory signage, and warning signs and wording within in house policies and procedures.
- Oral communication skills to:
- provide complex information on responsible service of alcohol laws in a way that is easily understandable for customers
 - speak firmly and clearly with intoxicated customers in a manner that de-escalates conflict.
- Numeracy skills to:
- measure and calculate standard drinks or samples
 - determine customer's age from date of birth on ID and proof of age documents.
- Learning skills to:
- source relevant information on laws, regulations and codes of practice or conduct relating to responsible service of alcohol and continuously update knowledge of changes in that information.
- Teamwork skills to:
- share customer information with team members to ensure proper responsible service of alcohol practices within the organisation.
- Self-management skills to:
- deal with hostile and uncooperative customers in a professional manner and in line with organisational procedures.

Assessment Requirements for SITHFAB002 Provide responsible service of alcohol

Modification History

Version	Comments
Release 1.0 updated on 2 March 2023	Minor changes to Knowledge Evidence in Assessment Requirements

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interpret the legal requirements for responsible sale or service of alcohol for the local state or territory law
- document organisational policies and procedures that must be followed for the responsible sale or service of alcohol
- identify at least three early indicators of intoxication and identify suitable intervention strategies to prevent intoxication
- demonstrate procedure to refuse sale or service of alcohol and assist each of the following groups of intoxicated customers:
 - those in emotional or physical distress
 - those with no food consumption during extended service of alcohol
 - those who appear to be under the effect of illicit substances or other drugs
- demonstrate organisational or house requirements and use effective communication and conflict-resolution skills when asking the following different intoxicated customers to leave the premises:
 - one compliant customer
 - one difficult customer refusing to leave.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- public interest reasons for implementing responsible service of alcohol (RSA) practices:
 - government and community concern with alcohol misuse and abuse
 - alcohol-impaired driving accidents, crime, public violence, family violence and anti social behaviour associated with alcohol abuse
- ways of assessing intoxication:

- observing changes in behaviour
- observing emotional and physical state
- monitoring noise levels and drink purchases
- customers to whom sale or service must be refused according to state and territory legislation:
 - minors and those purchasing on behalf of minors
 - intoxicated persons
 - persons affected by the consumption of illicit and other drugs
- impact of excessive drinking on:
 - local neighbourhood and community
 - the night-time economy
 - premises and staff
 - customers
 - particular types of customers who are at heightened risk:
 - minors
 - people affected by the consumption of illicit and other drugs
 - women, particularly pregnant women
 - young people
 - physical and mental health of individuals who drink to excess
 - productivity of individuals who drink to excess
 - those around the person drinking to excess:
 - family
 - friends
 - colleagues
 - government agencies:
 - local police
 - health facilities
 - road authorities
 - local councils
- key agencies and how to source relevant information on laws, regulations and codes of practice or conduct
- methods of supplying information on responsible sale or service of alcohol to customers:
 - use of fact sheets and advertising material that comply with legislative requirements
 - use of mandatory signage
 - verbally
 - websites
- current promotional and strategic community education campaigns developed and conducted by agencies and industry groups
- effects of alcohol on:
 - emotional state

- health
- physical alertness
- factors that affect individual responses to alcohol:
 - food consumption
 - gender
 - general health
 - rate of consumption
 - other substances taken
 - weight
- time for effects of alcohol to be registered
- what constitutes a standard drink for different beverage types and acceptable measures of alcohol:
 - types and strengths of standard drinks
 - alcoholic percentages of a range of frequently sold alcoholic beverages
- indicators of erratic drinking patterns:
 - mixing a wide range of drink types
 - drinking quickly and asking for more immediately
 - ordering more than one drink for own consumption
 - mixing alcohol consumption with consumption of prescription or illicit drugs
 - consistently returning to the tasting site to request more samples
 - ordering multiple samples
 - ordering large samples
 - ordering 'triple shots' or extra-large drinks
- ways of assessing customers affected by the consumption of illicit and other drugs
- communications methods used when refusing service:
 - using open and non-aggressive body language
 - using a number of strategies to defuse a situation:
 - taking the person away from an audience
 - blaming the refusal on 'the law'
 - monitoring the reactions of other customers
 - picking early warning signs and intervening before the person is intoxicated
 - not using physical touch or body language
 - remaining calm and using tactful language
- appropriate means of assistance to be offered when refusing service:
 - assisting the customer to connect with their designated driver
 - offering alternatives to alcohol:
 - food
 - non-alcoholic drinks
 - organising transport for customers wishing to leave
 - providing information on taxis

- principles of responsible delivery of packaged liquor:
 - ensuring adequate instruction to person delivering liquor
 - seeking proof that the delivery is being received by a person over the age of 18
 - procedures for delivering alcohol to an unoccupied premises
- principles of responsible service of alcohol, and their purpose and benefits
- principles of harm minimisation and community safety described in the jurisdiction's liquor legislation
- strategies to minimise the harm associated with liquor abuse:
 - those laid down in legislation and codes of conduct developed by government agencies and industry groups
 - organisational policies that are designed to reduce the harm associated with liquor abuse
- key provisions of liquor laws and regulations at a depth relevant to the scope of job responsibility in licensed premises and the following general requirements of liquor legislation and information that must be customised for each State or Territory:
 - legislative definition of intoxication; intoxicated person and unduly intoxicated
 - role of individual staff members and supervisors or managers in providing responsible service of alcohol, and seller or server duty of care and liability
 - requirement to adopt and use statutory signage on the premises for the entire range of circumstances applicable to the organisation
 - requirements for mandatory content of warning signs and wording in advertising or promotional material of any form
 - requirements relating to the remote sale and delivery of alcohol sales generated via the telephone, fax, email, internet or mail
 - requirements for proof of age and obligations to minors under local legislation
 - provisions for retaining and reporting falsified proof of age documents
 - provisions for requiring someone to leave the premises
 - transportation options for customers who have been removed from the premises
 - procedures for barring customers from premises
 - opening and closing hour provisions
 - requirements for monitoring noise and disturbances in and around licensed premises
 - requirements described by an in house policy, standard or code of practice or conduct for patrons and RSA staff in regard to responsible serving principles adopted by venue management
 - organisational training and training record keeping requirements to maintain currency in RSA certification
 - products that are banned or undesirable when responsibly selling or serving alcohol
 - personal and business implications of breaching any laws, regulations, government or industry-driven codes of practice or conduct
 - offences relating to the sale or service of alcohol and ramifications of non-compliance with the law and industry codes for the organisation, licensee and individual staff members

- legal restrictions on alcohol use customised to state or territory legislation
- intoxication provisions of liquor licensing laws
- legal drink and drive limits customised to state or territory legislation
- organisation specific policies and procedures for the responsible sale or service of alcohol.

Assessment Conditions

Skills must be demonstrated in an operational hospitality environment. This can be:

- an industry workplace
- a simulated industry environment.

Assessment must ensure access to:

- measures used to serve standard drinks or samples
- organisation specifications:
 - signage:
 - signs that comply with wording required by legislation
 - standard promotional signs issued by the relevant state or territory licensing authority
 - warning notices within any form of advertising
 - information and plain English fact sheets distributed by government regulators and industry bodies
 - contact information on taxis and available transport options for intoxicated customers
- industry-realistic range of customers to whom alcohol is sold or served; these can be:
 - customers in an industry workplace during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTTSL007 Process reservations

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to receive and process reservations for a tourism, travel, hospitality or events product or service offered for sale to agents or direct to the customer. It requires the ability to determine the availability of the product or service, offer alternatives, accurately record the reservation details and administer the reservation through to finalisation. This unit covers the required skills to manage reservations and not the related sales and computer skills that are found in other units.

The product can include any international or domestic product sold by any tourism, travel, hospitality, or event organisation. It applies to those operators who act as principal (the supplier) and who receive and process reservations for the supply of their product or service. This includes airlines, vehicle rental companies, hotels, motels, bed and breakfasts or other accommodation providers, tour operators of any type, outbound tour wholesalers, and attractions and theme parks.

The unit applies to those personnel who operate with some level of independence and under limited supervision. This includes reservations sales agents, reservations consultants, call centre consultants, booking officers, and business owner-operators.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Tourism Sales and Operations

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Receive reservation request.

1.1.Determine availability of requested reservation and advise customer.

1.2.Offer alternatives for unavailable reservations, including waitlist options.

1.3.Answer enquiries regarding costs and other product features.

2. Record details of reservation.

2.1.Record customer details against reservation to allow correct interpretation by other operational personnel.

2.2.Enhance customer service and operational efficiency by using available customer profile or history.

2.3.Record any special requests.

2.4.Confirm all details with customer, and then confirm their understanding and agreement.

2.5.File reservation according to system and procedural requirements and provide customer with reference code.

2.6.Prepare and issue documents tailored to customer reservation.

3. Update reservations.

3.1.Retrieve reservation data.

3.2.Update financial status of reservation.

3.3.Accept, process and record any customer requests for amendments or cancellations.

3.4.Provide details of amendment or cancellation conditions and charges and confirm customer understanding and agreement.

4. Advise others of reservation details.

4.1.Communicate general and specific customer requirements and reservation details to appropriate departments and colleagues.

4.2.Compile and provide reservation statistics.

4.3.Minimise use of printed materials and maximise electronic transmission and record keeping to reduce waste.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS

DESCRIPTION

Reading skills to:

- interpret customer files and profiles, customer requests, and

- complex product and costing information.
- Writing skills to:
- complete customer files accurately and legibly
 - succinctly document complex customer requests
 - document any specific conditions applicable to a reservation.
- Oral communication skills to:
- elicit information from customers about their requirements
 - respond to customers, giving clear sequenced information on product information and reservation options.
- Technology skills to:
- manipulate features of online reservation systems.

Assessment Requirements for SITTTSL007 Process reservations

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- receive and process at least five different reservations, recording the following details:
 - names and numbers of customers
 - arrival and departure details, times and locations
 - payment arrangements
 - details of particular operational or service requirements specified
 - information for a style of customer, such as special interest groups or those with VIP status
 - loyalty programs
 - special needs
 - special requests, such as bedding, dietary requirements, and request for special services
- issue the following documents tailored to each of the above customer reservations as applicable:
 - confirmation letter
 - credit note
 - information pack
 - invoice
 - receipt
 - service voucher
- update financial status of above reservations, including as applicable:
 - checking and recording that the reservation has been:
 - deposited
 - fully paid
 - checking correct method of payment
 - generating and issuing invoices and credit notes for changed reservations
 - inputting method of payment
 - receiving, processing and recording payments
- complete activities within commercial time constraints and deadlines determined by the customer or the organisation.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- different sources of reservations, and the industry and organisational relationships that exist
- different methods customers use to make reservations:
 - email
 - face to face
 - online
 - telephone
- specific industry sector:
 - different types of reservations and operations systems used
 - customer information required to record details
 - information contained within customer profiles
 - information required by other departments to deliver products and services
 - reservation statistics and their uses
- specific organisation:
 - features of products sold and specific costs
 - protocols and procedures relating to documentation to be provided to customers in relation to above reservations
- formats and inclusions used in reservations documents, confirmation letters and invoices, and styles that cater for those with special needs.

Assessment Conditions

Skills must be demonstrated in a tourism, travel, hospitality or events business operation or activity that receives and processes reservations. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- a reservations system currently used by tourism, travel, hospitality or event industry operators to control the reservations function for the supply of their product or service
- internet and email
- printers
- storage for computer data
- telephone
- generic computer software and applications:
 - computer operating system
 - databases

- spreadsheets
- word processing
- current commercial reservations documentation, confirmation letters, invoices and credit notes
- customers with whom the individual can interact; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTTSL009 Process travel-related documentation

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to process a range of travel and tourism documentation. It requires the ability to identify and interpret all documentation requirements and to prepare and despatch documents within designated deadlines.

The product can include any international or domestic product sold by any tourism, travel, hospitality, or event organisation. This unit applies to all organisations where travel and tourism documents, including air tickets, are issued to customers, suppliers and sometimes to tour delivery staff.

The unit applies to frontline sales and operations personnel who operate with some level of independence and under limited supervision. This includes travel consultants, inbound tour coordinators, visitor information officers, account managers for professional conference organisers, event coordinators, tour guides, tour desk officers, and operations coordinators. Some larger organisations support a documentation department staffed by entry-level documentation officers who may require more supervision.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1. Interpret information required for processing documentation.

- 1.1. Identify deadline for preparing and issuing documents.
- 1.2. Interpret existing reservation data to identify all customer details.
- 1.3. Identify and interpret details of specific products and services confirmed to customer and check prices quoted.
- 1.4. Identify confirmed bookings held for customers and check costs quoted by product and service suppliers.
- 1.5. Identify sources of general information required to issue necessary documents.
- 1.6. Check payment status of customer files and take appropriate action.
- 1.7. Check for and report any discrepancies in costs and take required action.
- 1.8. Identify operational documents required by personnel involved in delivering the product.

2. Process documentation.

- 2.1. Prepare accurate documentation within designated timeframes.
- 2.2. Record required details on documentation with accuracy and according to applicable product conditions.
- 2.3. Calculate supplier costs and record in supplier documents.
- 2.4. Action supplier payments within designated deadline.
- 2.5. Check all documentation for accuracy prior to issue and amend as necessary.
- 2.6. Process, file and despatch copies of documents according to organisation and supplier requirements.

3. Finalise processing of documentation.

- 3.1. Issue documents and reissue as required.
- 3.2. Process required refunds or additional payments according to product conditions.
- 3.3. Minimise use of printed materials and maximise electronic transmission and record keeping to reduce waste.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> interpret customer reservation and operational data, and complex itineraries and product information.
Writing skills to:	<ul style="list-style-type: none"> record accurate and clearly expressed travel-related documents.
Oral communication skills to:	<ul style="list-style-type: none"> discuss customer data and cost discrepancies with colleagues or supervisors.
Numeracy skills to:	<ul style="list-style-type: none"> calculate costs quoted to the customer use the 24-hour clock in a written context and then translate it to the 12-hour clock for customer use issue documents with correct monetary value.
Planning and organising skills to:	<ul style="list-style-type: none"> prepare and issue documents in correct customer file sequence according to the earliest service dates for customers.
Technology skills to:	<ul style="list-style-type: none"> use calculators, computers, software programs and printers when preparing documents.

Assessment Requirements for SITTTSL009 Process travel-related documentation

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- interpret and confirm reservation data for at least three different confirmed customer bookings, including at least one international and one domestic booking
- for each of the above customer bookings, accurately process both paper-based and electronically transmitted documentation as applicable relating to a travel and tourism product or service, using at least three types of documentation as specified in the knowledge evidence
- complete activities within commercial time constraints and deadlines determined by the customer or the organisation.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- different types of reservations and operations systems used to issue above travel-related documentation
- sources of general information:
 - air travel information:
 - airline schedules and timetables
 - airline fare manuals
 - tariffs from airlines
 - tariffs from consolidators
 - special bulletins issued by airlines and consolidators
 - brochures
 - computerised reservations systems (CRS)
 - global distribution systems (GDS)
 - contracts with suppliers
 - database of product suppliers and their details
 - internet sites
 - price schedules
 - timetables

- visa guides
- sources of information for:
 - customer details
 - supplier details
 - agent details
 - product information
 - product costs
 - document delivery details
- customer details required for processing travel-related documentation:
 - address for delivery of documents
 - age
 - agent details
 - date required for delivery of documents
 - name
 - special requirements to be noted on documents
- types of documentation:
 - air travel documents:
 - e-tickets
 - multi-purpose documents (MPD)
 - credit card charge forms (CCCF)
 - exchange tickets
 - briefing notes for crew
 - bus, coach or other form of transportation tickets
 - commission vouchers
 - confirmation letters
 - delegate information packs
 - letter of commission disclosure
 - letters advising sources of information relating to health, safety and regulatory issues for the customer's attention
 - letters outlining terms, conditions and liability restrictions
 - meeting or event confirmation letters
 - operational itineraries for crew
 - passenger itineraries
 - passenger lists
 - product disclosure statements
 - rooming lists
 - sales returns
 - travel insurance documentation
 - traveller's cheque requests
 - visa and passport forms

- vouchers for tourism products or services
- specific industry sector:
 - documentation types and standard formats
- documentation requirements for:
 - conferences
 - groups
 - guests or delegates
 - incentive tours
 - inclusive tours or optional tours
 - individual customers
 - meetings
 - multiple products and services making up a complete itinerary
 - one-off touring arrangements
 - series tours
 - single product or service
- specific organisation:
 - negotiated supplier costs and contractual arrangements for payments
 - features of products sold
 - formats and inclusions used in customer, supplier and crew documents, vouchers, and rooming lists
 - procedures and methods for paying suppliers
- processes involved in actioning supplier payments:
 - issuing an electronic miscellaneous document (EMD)
 - requesting payment from the accounts department
 - self-administering the payment
 - sending payment by cheque or electronic transmission.

Assessment Conditions

Skills must be demonstrated in a tourism, travel, hospitality or events business operation or activity that processes travel-related documents. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- customer and operational files providing reservation and operational information for issuing documentation
- computers, printers and software programs currently used by the tourism, hospitality or event industries to administer travel and tourism documents

- current product information found in sales kits, brochures, timetables, tour schedules, product manuals, supplier information kits, information databases and CRS
- current template documents for each of the documents listed in the knowledge evidence
- where assessment covers air documents and tickets:
 - current airline, consolidator and International Air Transport Association (IATA) documentation or computer data, tariffs and bulletins outlining rules, conditions and regulations
 - IATA actual or training facsimile air documentation
- customers with whom the individual can interact; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTTSL010 Use a computerised reservations or operations system

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to use a computerised reservations or operations system to create, maintain and administer bookings for products and services. The unit covers the required computer skills to use all system functions and capabilities and not the related sales skills, which are found in other units.

The unit applies to any tourism, travel, hospitality or event industry sector and any computerised system used to manage international or domestic product sales.

It applies to frontline sales and operations personnel who operate with some level of independence and under limited supervision. This includes travel consultants, inbound tour coordinators, visitor information officers, account managers for professional conference organisers, event coordinators, tour desk officers, operations consultants, and reservations sales agents.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Tourism Sales and Operations

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1. Access and manipulate system information.
2. Use computer system features to create and administer reservations.
3. Send and receive communications.
4. Administer sales and operations functions using the system.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1. Access and interpret system displays.
- 1.2. Use system features to access a range of information.
- 2.1. Check availability of required product or service according to system functions.
- 2.2. Create new reservations containing accurate customer details.
- 2.3. Input customer details in the format required by the system.
- 2.4. Retrieve bookings using the format required by the system.
- 2.5. Make and save accurate updates and amendments to reservations.
- 2.6. Reinstate, duplicate or split reservations as required.
- 2.7. Save, print and file required reservation details.
- 3.1. Create and process accurate communications to industry colleagues using system functions.
- 3.2. Access and interpret communications from industry colleagues.
- 4.1. Use system capabilities to manage the particular sales or operational need.
- 4.2. Use system capabilities to manage required accounting processes for reservations.
- 4.3. Produce reports to meet sales and operational needs.
- 4.4. Minimise use of printed materials and maximise electronic transmission and record keeping to reduce waste.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">• interpret system codes, abbreviations and complex product information controlled by the system, which can include costs, terms and conditions of sale.
Writing skills to:	<ul style="list-style-type: none">• input accurate customer or operational details• create accurate and succinct notes for special requests or operational details.
Numeracy skills to:	<ul style="list-style-type: none">• manage accounting processes for particular reservations• interpret statistical data within various reports.
Problem-solving skills to:	<ul style="list-style-type: none">• identify, report or resolve system failures and inaccurate product information.
Planning and organising skills to:	<ul style="list-style-type: none">• meet system-created deadlines for payments and issuing documents.
Technology skills to:	<ul style="list-style-type: none">• use a computer and keyboard• use capabilities and functions of a reservations or operations system.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- operate a computerised reservations or operations system to create and administer at least five different product or service reservations or operations from the following list:
 - accessing product information
 - booking a supplier service for a customer
 - constructing airfares
 - hiring special equipment
 - issuing air tickets, crew documentation, or customer documentation
 - planning functions
 - preparing quotations
 - processing and monitoring event registrations
 - providing specific product information and advice for destinations, foods and beverages, or events and functions
 - purchasing promotional products
 - selling tourism, hospitality or event products to the customer
- demonstrate the correct use of the full range of features when completing each of the above activities
- complete activities within commercial time constraints and deadlines determined by the customer or the organisation.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- specific industry sector:
 - different types of computer systems used for reservations and operations
 - products and services controlled by different computer systems
 - reservations terminology and jargon
 - role of computerised reservations and operations systems
- systems:
 - any organisation-specific computerised reservations or operations system

- industry-wide systems used by agencies when booking supplier services:
 - computerised reservations systems (CRS)
 - global distribution systems (GDS)
- industry-wide systems used by:
 - accommodation providers
 - holiday parks and resorts
 - inbound tour operators
 - outbound tour wholesalers
 - meetings and events management organisations
 - tour operators
 - vehicle rental companies
- operations-based
- property management system (PMS)
- reservations-based
- types of reservations:
 - inbound, for the supply of products and services by principals or suppliers:
 - accommodation providers
 - airlines
 - attractions
 - cruise operators
 - event staging businesses
 - function venues
 - holiday parks and resorts
 - meeting, conference and exhibition venues
 - outbound tour wholesalers
 - restaurants
 - tour operators
 - vehicle rental companies
 - outbound to book supplier service from:
 - event management companies
 - inbound tour operators
 - outbound tour wholesalers
 - retail travel agencies
- customer groups for whom reservations are made:
 - business travellers
 - events attendees
 - groups
 - inbound tourists
 - individuals
 - meetings and conference delegates

- tour guides, crew and other touring personnel
- tourists travelling domestically or internationally
- specific reservations and operations system:
 - sales, operational and accounting functions that can be controlled by the system
 - system codes for and requirements to enter and exit a system
 - reservation and operational jargon and entries, encodes and decodes
 - mandatory fields
 - specific formatted entries
 - system requirements for:
 - confirming, storing and retrieving reservations or operational data
 - amending and cancelling reservations
 - sending and receiving messages
 - diary entries and use of system-created deadlines for payments and issuing documents
 - use of the following reports required for product or service reservations or operations specified in performance evidence above:
 - accounting
 - business forecasts
 - cost comparisons for various product suppliers
 - customer activity
 - event attendance and registration
 - reservation activity
 - sales total and, sales generated by individual staff members and sales mix
 - specific to a department
 - usage rates for various product suppliers
 - used to determine currency of information held in the system
 - used to negotiate rates
- updates and amendments made through computerised reservations or operations systems:
 - adding additional customers
 - cancelling a booking
 - changing an itinerary by adding or deleting products or services
 - changing customer names, if permitted
 - cross-referencing multiple bookings
 - duplicating a booking
 - entering:
 - invoicing details
 - payment details
 - ticketing or voucher details
 - reinstating a booking
 - splitting an existing reservation
- accounting processes for which computerised reservation or operations systems are used:

- issuing:
 - credit notes
 - gift vouchers
 - internal events or function orders
 - internal purchase orders
 - invoices
- managing the receipt of customer payments and refunds
- reconciling all financial transactions.

Assessment Conditions

Skills must be demonstrated in a tourism, travel, hospitality or events business operation or activity that uses a computerised reservations system to administer sales or operational functions. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- reservations for products or services for which the computerised reservations or operations system must be used
- a computerised reservations or operations system currently used in the tourism, travel, hospitality or event industries to administer sales and operational functions.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

SITTTSL011 Source airfares for domestic flights

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to create flight itineraries and source airfares for domestic air travel. It requires the ability to interpret flight information and conditions applicable to specific fares and to quote on airfares that meet customer needs.

The unit applies to tourism and travel industry organisations that sell domestic airfares such as travel agencies, tour wholesalers and consolidators.

It applies to frontline sales and operations personnel who operate with some level of independence and under limited supervision. This includes travel consultants and managers, ticketing consultants, consolidator ticketing officers and reservations and operations consultants.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Pre-requisite Unit

Nil

Competency Field

Tourism Sales and Operations

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.	demonstrate achievement of the element.
1. Interpret domestic airfare information.	1.1. Identify and access sources of fare information. 1.2. Interpret information on domestic flights, fares and conditions applicable to specific fares.
2. Create domestic flight itineraries and airfares.	2.1. Identify domestic flight options to meet customer needs. 2.2. Create flight itineraries and source airfares for direct and connecting domestic flights. 2.3. Source costs for promotional and sector fares. 2.4. Identify costs of concession fares. 2.5. Calculate taxes, fees and surcharges. 2.6. Check calculations for accuracy. 2.7. Compare domestic airfares and quote optimum airfare that meets customer needs.
3. Document and maintain records of calculations.	3.1. Record full details of the calculated airfare. 3.2. Minimise use of printed materials and maximise electronic record keeping to reduce waste.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> interpret complex flight schedules, airline and consolidator fare schedules and applicable conditions research and sort relevant airfare information.
Writing skills to:	<ul style="list-style-type: none"> record accurate and legible records of fare calculations.
Numeracy skills to:	<ul style="list-style-type: none"> enter data from a number of sources and complete calculations and checks with that data identify and resolve mistakes in calculations.
Planning and organising skills to:	<ul style="list-style-type: none"> prepare fare quotations in correct customer file sequence according to the earliest departure dates for customers.
Technology skills to:	<ul style="list-style-type: none"> use appropriate technological devices to interpret the outcomes and cost optimum airfares for customers use calculators, computers, software programs and printers when preparing airfare calculations.

Assessment Requirements for SITTTSL011 Source airfares for domestic flights

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- source domestic airfares to meet the requirements of five different customers
- source information for the above airfares using at least three of the following sources:
 - computerised reservations system (CRS)
 - global distribution system (GDS)
 - information from airlines and consolidators
 - the internet
- interpret and explain to each of the above customers:
 - flight information
 - fare options
 - conditions applicable to specific fares
- create flight itineraries for each of the above customers
- complete activities within commercial time constraints and deadlines determined by the customer or the organisation.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information for:
 - domestic flight schedules:
 - direct and connecting services
 - minimum connecting times (MCT)
 - airline codes
 - airport codes
 - domestic fares:
 - published fare types and classes
 - normal fares
 - concession fares
 - promotional fares currently available

- fare conditions
- payment and ticketing deadline
- taxes, fees and surcharges
- domestic airfare conditions:
 - amendment fees
 - availability of:
 - any type of change to the air itinerary
 - changes to class of travel
 - change to name on ticket
 - refunds or credit notes in the event of cancellation
 - baggage allowance
 - cancellation charges
 - excess baggage charges
 - extensions to ticketing deadline
 - payment deadline
 - restricted articles in baggage
 - ticketing deadline
 - time limits for passenger name records (PNRs)
- content and format of information provided by airlines and consolidators:
 - fare schedules
 - flight schedules
 - published fares
 - special bulletins
 - websites
- formats used to calculate and record airfares.

Assessment Conditions

Skills must be demonstrated in a tourism or travel business operation or activity that sells domestic airfares. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- computers, software programs, printers, and CRS currently used in the tourism or travel industry to facilitate domestic airfare quotes
- current airline and consolidator documentation or computer data, published fares, schedules and bulletins outlining fares and conditions
- internet and email
- storage for computer data

- telephone
- customers with whom the individual can interact; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

Assessment Requirements for SITTTSL012 Construct normal international airfares

Modification History

Not applicable.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- create practical air itineraries and construct normal international airfares to meet the requirements of five different customers, including:
 - at least one adult and one child airfare
 - at least one airfare for travel to each of the following destinations:
 - New Zealand
 - USA/Canada
 - Europe
 - Asia
 - Africa
 - South West Pacific
 - South America
- source information for the above itineraries and airfares using each of the following at least once across the above customers:
 - computerised reservations system (CRS)
 - global distribution system (GDS)
 - information from airlines and consolidators
 - the internet
- demonstrate correct application of the following types of calculations and checks in constructing each of the above airfares:
 - global indicators (GI)
 - local currency fares (LCF)
 - mileage system:
 - maximum permitted mileages (MPMs)
 - ticketed point mileages (TPMs)
 - extra mileage allowance (EMA)
 - excess mileage surcharges (EMS)
 - neutral units of construction or currency (NUC) conversion
- interpret and document for each of the above customers:

- information on international fares, fare rules, conditions applicable to specific fares, and International Air Transport Association (IATA) regulations
- complete activities within commercial time constraints and deadlines determined by the customer or the organisation.

Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- sources of information for:
 - international flights:
 - route maps
 - direct and connecting services
 - minimum connecting times (MCT)
 - airline codes
 - airport codes
 - international fares:
 - published fare types and classes
 - normal fares
 - carrier fares with carrier-based routings
 - fare conditions
 - fare rules
 - global indicators
 - IATA areas
 - IATA regulations
 - IATA terminology and definitions
 - international airline terminology
 - payment and ticketing deadline
 - taxes, fees and surcharges
- international fare conditions:
 - amendment fees
 - availability of:
 - any type of change to the air itinerary
 - changes to class of travel
 - change to name on ticket
 - refunds or credit notes in the event of cancellation

SITTTSL014 Construct advanced international airfares

Modification History

Not applicable.

Application

This unit describes the performance outcomes, skills and knowledge required to create flight itineraries and construct complex fares using advanced international airfare rules and procedures. It requires the ability to interpret flight information and conditions applicable to specific fares and to construct airfares that meet customer needs according to International Air Transport Association (IATA) regulations.

The unit applies to tourism and travel industry organisations that sell international airfares such as travel agencies, tour wholesalers, airlines and consolidators.

It applies to frontline sales and operations personnel who operate with some level of independence and under limited supervision. This includes travel consultants and managers, ticketing consultants, airline and consolidator ticketing officers, and reservations and operations consultants.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Competency Field

Tourism Sales and Operations

Unit Sector

Tourism

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1. Create complex international flight itineraries and airfares.	1.1. Configure flight itineraries and apply minimum fare checks to appropriate itineraries. 1.2. Calculate and check complex international fares according to IATA regulations. 1.3. Calculate through fares, incorporating add-ons and those with intermediate points. 1.4. Calculate taxes, fees and surcharges for all itineraries. 1.5. Calculate pre-paid ticket advice for journeys commencing outside the country of sale according to IATA regulations.
2. Construct mixed class fares.	2.1. Identify options where mixed class combinations are allowed and appropriate to meet customer needs. 2.2. Calculate mixed class fares according to IATA regulations.
3. Apply indirect travel limitation rules.	3.1. Accurately calculate sector journeys and side trips according to IATA regulations.
4. Construct fares incorporating add ons.	4.1. Correctly interpret add-on tables. 4.2. Calculate through fares, incorporating add-ons according to IATA regulations.
5. Construct round the world journeys.	5.1. Identify situations where round the world fares are appropriate to meet customer needs. 5.2. Accurately calculate round the world fares according to IATA regulations.
6. Construct fares for open jaw journeys.	6.1. Identify options where open jaw journeys are allowed and appropriate to meet customer needs. 6.2. Accurately calculate round, circle and open jaw fares according to IATA regulations.
7. Apply the pricing unit concept.	7.1. Divide a single or return fare journey into separate pricing units. 7.2. Calculate the lowest combination of fares for a series of pricing units.
8. Document and maintain records of calculations.	8.1. Record full details of the calculated airfares. 8.2. Minimise use of printed materials and maximise electronic record keeping to reduce waste.

Foundation Skills

Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none">• interpret complex flight schedules, airline and consolidator fare schedules, applicable conditions and IATA regulations• research and sort relevant airfare information.

 - any type of change to the air itinerary
 - changes to class of travel
 - change to name on ticket
 - refunds or credit notes in the event of cancellation
 - baggage allowance
 - cancellation charges
 - excess baggage charges
 - extensions to ticketing deadline

- payment deadline
- restricted articles in baggage
- ticketing deadline
- time limits for passenger name records (PNRs)
- content and format of information provided by airlines and consolidators:
 - fare schedules
 - flight schedules
 - published fares
 - special bulletins
 - websites
- key elements of and procedures for advanced fare calculations and checks involving:
 - compliance with indirect travel limitations rule
 - GI
 - identifying fare basis code and fare type code
 - journeys commencing outside the country of sale
 - LCP
 - LCF
 - mileage system:
 - EMS
 - EMA
 - MPMs
 - TPMs
 - NUC conversion
 - re-routing
- formats used to calculate and record advanced international airfares:
 - the ladder and linear fare calculation methods.

Assessment Conditions

Skills must be demonstrated in a tourism or travel business operation or activity that sells complex international airfares. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure access to:

- computers, software programs, printers, and CRS currently used in the tourism or travel industry to facilitate advanced international airfare calculations
- current airline, consolidator and IATA documentation or computer data, published fares, schedules and bulletins outlining fares, rules, conditions and regulations
- internet and email

- storage for computer data
- telephone
- customers with whom the individual can interact; these can be:
 - customers in an industry workplace who are assisted by the individual during the assessment process; or
 - individuals who participate in role plays or simulated activities, set up for the purpose of assessment, in a simulated industry environment operated within a training organisation.

Assessors must satisfy the Standards for Registered Training Organisations' requirements for assessors; and:

- have worked in industry for at least three years where they have applied the skills and knowledge of this unit of competency.

TAEASS301 Contribute to assessment

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to contribute to the assessment process.

It applies to a person with technical or vocational expertise who is in a supervisory or mentoring/coaching work role, and for whom collecting the evidence for assessment is an adjunct to principal work responsibilities. The unit applies to those involved in collecting evidence for assessment against units of competency or accredited courses.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

ELEMENT	PERFORMANCE CRITERIA
1. Clarify role and responsibilities in the assessment process	<p>1.1 Discuss and confirm the purpose of the assessment with relevant people</p> <p>1.2 Discuss and confirm benchmarks for assessment with the qualified assessor</p> <p>1.3 Access, read and clarify assessment plan with the qualified assessor</p> <p>1.4 Discuss and agree with the qualified assessor specific responsibilities in gathering evidence, and the types of evidence to be gathered</p>
2. Confirm organisational arrangements for evidence gathering	<p>2.1 Access and confirm relevant assessment system policies and procedures, organisational, legal and ethical requirements, and other relevant advice on assessment</p> <p>2.2 Clarify the nominated assessment tools and methods for collecting evidence with the qualified assessor, to ensure that the procedures to be followed, and the instruments to be used are clear</p> <p>2.3 Discuss and confirm with the relevant people the assessment context, including the candidate's characteristics and any need for reasonable adjustments</p> <p>2.4 Confirm and arrange resource requirements in consultation with relevant people</p>
3. Collect evidence in accordance with the assessment plan	<p>3.1 Explain the assessment process to the candidate, including the different responsibilities of the parties involved, and refer any candidate issues or concerns to the qualified assessor, prior to undertaking assessment activities</p> <p>3.2 Use assessment instruments to gather quality evidence within the available time and resources, according to organisational, legal and ethical requirements</p>
4. Record and report findings	<p>4.1 Organise and provide evidence to the qualified assessor in a format suitable for analysis according to the assessment system's policies and procedures</p> <p>4.2 Actively seek feedback from the qualified assessor on whether evidence-gathering activities meet the principles of assessment, and whether the evidence collected meets the rules of evidence</p> <p>4.3 Document areas for improvement in collecting evidence for future assessment activities</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.2	<ul style="list-style-type: none"> Seeks feedback to build knowledge to improve process and professional practice
Reading	1.3, 2.1, 2.2, 2.4, 3.2	<ul style="list-style-type: none"> Sources and interprets procedural, and compliance information
Writing	1.1, 1.2, 1.3, 2.1, 2.3, 2.4, 3.2, 4.1, 4.3	<ul style="list-style-type: none"> Completes workplace documentation accurately using the appropriate language
Oral Communication	1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 3.1	<ul style="list-style-type: none"> Communicates information and process requirements clearly, based on techniques appropriate to the audience and environment Uses appropriate speaking and listening techniques to obtain specific information, and to support the assessment process
Navigate the world of work	2.1, 2.2, 3.2, 4.1	<ul style="list-style-type: none"> Accesses, confirms and takes responsibility for adherence to policies, procedures, and legal and ethical requirements
Interact with others	4.2	<ul style="list-style-type: none"> Asks questions to clarify understanding, and seeks feedback and further information
Get the work done	3.1, 4.1	<ul style="list-style-type: none"> Organises work according to defined requirements, taking some responsibility for decisions regarding the format of information

Assessment Requirements for TAEASS301 Contribute to assessment

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- clarifying the role to be taken during the assessment
- clarifying the assessment plan with the qualified assessor, including agreement about:
 - what evidence will be collected
 - how the evidence will be collected
- carrying out a minimum of three evidence-gathering activities and, on each occasion:
 - document evidence in a clear and concise manner
 - document feedback from others involved in the assessment

reporting findings to the qualified assessor, including an explanation of how the assessment meets the rules of evidence on each of the three occasions.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment
- the principles of assessment
- the rules of evidence
- the different purposes of assessment
- the diversity of assessment contexts
- different types of evidence
- evidence-gathering methods
- the purpose and features of assessment tools, and assessment plans

- potential barriers and processes relating to evidence-gathering procedures, and assessment processes
- the organisational policies and procedures relevant to this unit of competency.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to qualified assessors for consultation.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS401 Plan assessment activities and processes

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Application

This unit describes the skills and knowledge required to plan the assessment process, including recognition of prior learning (RPL), in a competency-based assessment system.

It applies to individuals with assessment planning responsibilities.

In planning activities and processes, individuals are required to identify the components of assessment tools, analyse and interpret assessment tools, and develop assessment instruments (also known as assessment tasks) and assessment plans.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the assessment approach	1.1 Identify the candidate and confirm the purposes and context of the assessment with relevant people according to legal,

ELEMENT	PERFORMANCE CRITERIA
	organisational and ethical requirements 1.2 Identify and access applicable industry or workplace standards for the assessment, and any specific assessment requirements
2. Prepare the assessment plan	2.1 Analyse units of competency and assessment requirements to identify evidence needed to demonstrate competence, according to the rules of evidence 2.2 Select assessment methods and instruments to support the collection of defined evidence, taking into account the context in which the assessment will take place 2.3 Develop the assessment plan and gain approval from relevant stakeholders
3. Identify modification and contextualisation requirements	3.1 Use information from the candidate and, where relevant, the candidate's workplace to identify contextualisation needs 3.2 Check advice provided by the training package or course developer relevant to identified contextualisation needs 3.3 Analyse existing assessment tools and record amendments required to address identified contextualisation needs 3.4 Determine opportunities for integrated assessment activities and record any changes required to assessment tools
4. Develop the assessment instruments	4.1 Analyse available assessment instruments for their suitability for use, and identify any required modifications 4.2 Develop assessment instruments to meet the required standard and specific workplace/candidate needs 4.3 Map assessment instruments against the unit or course requirements 4.4 Write clear instructions for the candidate and assessor regarding the use of assessment instruments 4.5 Check and confirm that draft assessment instruments meet required standards and specific workplace/candidate needs and record outcomes of checks

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Assessment Requirements for TAEASS401 Plan assessment activities and processes

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Performance Evidence

The candidate must demonstrate the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- planning and organising the assessment process on a minimum of five separate occasions
- planning and organising two Recognition of Prior Learning (RPL) assessments (which may be two of the five assessment processes above.)

The evidence requirements for each occasion must include:

- a documented assessment plan
- a different endorsed or accredited unit of competency (or clusters of units of competency) for each of the five occasions
- contextualisation of the unit(s) of competency and the selected assessment tools, where required
- incorporation of reasonable adjustment strategies
- development of suitable assessment instruments for each of the five occasions

following organisational arrangements.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- obligations of an assessor under applicable legislation and/or standards

- the major features of a unit of competency, and how they are to be addressed in assessment activities and processes
- interpreting competency standards as the minimum standard for assessment
- guidelines for contextualising units of competency
- different purposes of assessment and different assessment contexts, including RPL
- the purpose and features of evidence, and different types of evidence, used in competency-based assessments, including RPL
- the principles of assessment, and how they guide the assessment process
- the rules of evidence and how they guide the assessment process
- different assessment methods, including their suitability for collecting various types of evidence
- the components of assessment tools

different types of assessment instruments and their purpose and relevance for specific evidence-gathering opportunities.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and which are typical of those experienced in the training and assessment environment. This includes access to the units of competency used in assessment planning activities.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS402 Assess competence

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Application

This unit describes the skills and knowledge required to implement an assessment plan, and gather quality evidence to assess the competence of a candidate using compliant assessment tools.

It applies to teachers, trainers and assessors in enterprises and registered training organisations (RTOs) and those providing assessment advisory services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the assessment	1.1 Interpret assessment planning documentation and applicable organisational, legal and ethical requirements for conducting the assessment and confirm with the relevant people 1.2 Access and interpret units of competency that are to be used as

ELEMENT	PERFORMANCE CRITERIA
	<p>benchmarks for assessment, and the nominated assessment tools, to confirm the requirements for the evidence to be collected</p> <p>1.3 Determine opportunities for integrated assessment activities and document any changes to the assessment instruments, where required</p> <p>1.4 Determine opportunities for evidence-gathering in actual or simulated activities, through consultation with the candidate and relevant personnel</p> <p>1.5 Conduct a candidate briefing and explain, discuss and agree on the details of the planned assessment</p> <p>1.6 Arrange identified material and physical resource requirements</p> <p>1.7 Identify any specialist support requirements for the assessment, and organise if necessary</p>
2. Gather quality evidence	<p>2.1 Use agreed assessment methods and tools to gather, organise and document evidence in a format suitable for determining competence</p> <p>2.2 Apply the principles of assessment and rules of evidence in gathering quality evidence</p>
3. Support the candidate	<p>3.1 Discuss and guide candidates in gathering their own evidence to support the recognition of prior learning (RPL)</p> <p>3.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the candidate that reflects sensitivity to individual differences and enables two-way feedback</p> <p>3.3 Make decisions on reasonable adjustments with the candidate, based on the candidate's needs and characteristics</p> <p>3.4 Access specialist support, if required, in accordance with the assessment plan</p> <p>3.5 Address any workplace health and safety (WHS) risk to a person or equipment immediately</p>
4. Make the assessment decision	<p>4.1 Assess the collected evidence, and to evaluate whether it reflects the evidence required to demonstrate competence</p> <p>4.2 Use judgement to infer whether competence has been demonstrated, based on the available evidence</p> <p>4.3 Make the assessment decision in line with agreed assessment procedures and according to the agreed assessment plan</p> <p>4.4 Provide clear and constructive feedback to the candidate regarding the assessment decision, and clearly document</p>

ELEMENT	PERFORMANCE CRITERIA
	follow-up, if required
5. Record and report the assessment decision	<p>5.1 Record assessment outcomes promptly and accurately</p> <p>5.2 Complete and submit required assessment documentation, according to assessment procedures and confidentiality conventions</p> <p>5.3 Inform other relevant parties of the assessment decision, according to confidentiality conventions</p>
6. Review the assessment process	<p>6.1 Review the assessment process in consultation with candidates and other relevant people to improve future practice</p> <p>6.2 Document and record the review according to relevant assessment system policies and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 4.1	<ul style="list-style-type: none"> Accesses and interprets procedural and compliance documentation relevant to the assessment process Examines and evaluates assessment evidence
Writing	1.1, 1.3, 1.5, 2.1, 3.1, 5.1, 5.2, 5.3, 6.2	<ul style="list-style-type: none"> Completes workplace documentation accurately using appropriate language and following organisational requirements
Oral Communication	1.1, 1.4, 1.5, 3.1, 3.4, 4.4, 5.3, 6.1	<ul style="list-style-type: none"> Communicates information and assessment process requirements clearly, using techniques appropriate to the audience and environment Interacts appropriately with candidates to build rapport and understanding, and obtain specific information to support the assessment process
Navigate the world of work	1.1, 3.5, 5.3	<ul style="list-style-type: none"> Identifies, confirms and takes responsibility for adherence to legal and ethical requirements Recognises, and follows, explicit and implicit protocols and meets expectations associated with own role

Interact with others	1.1, 1.4, 1.5, 3.1, 3.2, 3.4, 5.3, 6.1	<ul style="list-style-type: none"> • Adjusts personal communication style in recognition of the values and experiences of others to build rapport • Cooperates and collaborates with others and contributes to activities requiring joint responsibility and accountability
Get the work done	1.1, 1.2, 1.3, 1.4, 1.6, 1.7, 2.1, 2.2, 3.3, 3.4, 4.1, 4.2, 4.3, 6.1, 6.2	<ul style="list-style-type: none"> • Uses systematic, analytical processes in complex, non-routine situations, gathering information, and identifying and evaluating options against agreed criteria • Organises work according to specific requirements taking some responsibility for decisions regarding the format of information • With guidance, reviews the effectiveness of solutions in relation to the set goals

Assessment Requirements for TAEASS402 Assess competence

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- assessment of at least five candidates within the vocational education and training (VET) context against at least one endorsed or accredited unit of competency according to the organisation's assessment processes and practices.
- using recognition of prior learning (RPL) processes in the assessment of at least one candidate (which may be one of the five candidates above)
- making reasonable adjustments in the assessment of at least one candidate.

The assessments must be undertaken under the supervision of a qualified assessor and cover an entire unit of competency for each candidate, including:

- the application of different assessment methods and instruments involving a range of activities and events
- using two-way communication and feedback with the candidate
- exercising judgement in making the assessment decision
- recording and reporting assessment outcomes in accordance with the assessment system and organisational, legal and ethical requirements

reviewing the assessment process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment, including:
 - VET as a competency-based system
 - how competency based assessment differs from other types of assessment
 - competency standards as the basis of qualifications
 - structure and application of competency standards
 - the principles of assessment and how they are applied
 - the distinction between assessment tools and assessment instruments
 - the rules of evidence and how they are applied
 - the range of assessment purposes and assessment contexts, including RPL
 - different assessment methods, including suitability for gathering various types of evidence, suitability for the content of units, and resource requirements and associated costs
 - reasonable adjustments and when they are applicable
 - types and forms of evidence, including assessment instruments that are relevant to gathering different types of evidence used in competency-based assessment, including RPL
 - the training and assessment strategies, including policies and procedures established by the industry, organisation or training authority
- RPL policies and procedures established by the organisation
- cultural sensitivity and equity considerations in assessment activities
- current legislative requirements relevant to the assessor and the assessment process
- workplace health and safety (WHS) responsibilities associated with assessing competence, including:
 - requirements for reporting hazards and incidents
 - emergency procedures
 - procedures for the use of relevant personal protective equipment
 - the safe use and maintenance of relevant equipment
 - sources of WHS information.

Assessment Conditions

Gather evidence to demonstrate consistent performance in a real assessment environment. The assessment environment must include access to assessment tools and recording materials.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Assessment Requirements for TAEASS403 Participate in assessment validation

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Updates to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- actively participating in a minimum of three validation sessions that address the critical aspects of validation
- clearly identifying the purpose for each validation, and the legal and ethical responsibilities of assessors
- collating and presenting documentation for each validation in a logical manner
- communicating and liaising with relevant people
- providing feedback and interpreting documentation in validation sessions
- recording their contribution to validation findings.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- how to determine the evidence needed to demonstrate competence in a competency-based environment
- the reasons for carrying out validation and different approaches to validation that may be appropriate before, during and after an assessment
- the components of assessment tools
- critical aspects of validation, including validation of assessment processes, methods and products
- how principles of assessment are addressed in validation

- how rules of evidence are addressed in validation
- work health and safety legislation, codes of practice, standards and guidelines that impact on assessment
- obligations of an assessor under applicable legislation and/or standards, particularly in relation to validation activities.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to:

- the texts and tasks usually found in the workplace
- units of competency and other materials used in validation sessions.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop and extend assessment expertise	1.1 Access, read and analyse current research on assessment and incorporate into own practice 1.2 Source and access opportunities to extend assessment experience and expertise and incorporate this new knowledge and

ELEMENT	PERFORMANCE CRITERIA
	skill into own assessment practice
2. Practise assessment	<p>2.1 Investigate and implement a range of assessment methods, in order to meet the requirements of related unit or units of competency</p> <p>2.2 Investigate and implement a range of assessment tools to meet the context requirements of different candidates</p>
3. Lead and influence other assessors	<p>3.1 Influence fellow assessors through modelling high standards of ethical and compliance practices</p> <p>3.2 Establish professional development needs of the assessor group, and implement approaches to build the skills and experience of this group</p>
4. Evaluate and improve assessment approaches	<p>4.1 Systematically monitor the assessment processes and activities of the assessor group</p> <p>4.2 Propose and implement improvements to assessment approaches</p> <p>4.3 Participate in and reflect upon the assessment moderation process</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.2	<ul style="list-style-type: none"> Uses ideas in current research to reflect on the performance of self and others to seek opportunities for learning, development, and the extension of experience and practice
Reading	1.1, 1.2, 4.1	<ul style="list-style-type: none"> Sources and analyses information from a range of sources
Writing	3.2, 4.2	<ul style="list-style-type: none"> Documents professional development needs and information required to implement improvements
Oral Communication	2.1, 3.2, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> Participates in and leads discussions, with individuals and groups, in order to extend thinking about assessment, to explore ideas and to find ways of

		improving assessment practice.
Navigate the world of work	3.1, 3.2	<ul style="list-style-type: none"> Formally reflects on own and others' performance as an integral part of planning for learning and development Takes responsibility for the practice and the demonstration of high standards of ethical practice
Interact with others	3.1	<ul style="list-style-type: none"> Recognises the importance of building rapport using role modelling and collaboration with others to achieve joint outcomes and effective group interaction
Get the work done	1.1, 1.2, 2.1, 2.2, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> Organises work according to defined requirements taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Uses analytical processes in routine and non-routine situations gathering information, and identifying and evaluating options for improvement against agreed criteria Seeks new ideas and opportunities, drawing on the diverse perspectives of others to gain insights into current practice and ideas for change

Assessment Requirements for TAEASS501 Provide advanced assessment practice

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This was first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete the tasks outlined in the elements and performance criteria of this unit, including:

- undertaking the assessment of at least 20 individual candidates, against at least one unit of competency
- assessing against a total of at least 50 units of competency from training packages or accredited courses. This total may be made up of combinations of candidates and units that add up to 50.
- accurately documenting the outcomes of all assessments undertaken
- leading the assessment of a group or team of assessors, consisting of at least three individuals, and demonstrating how that leadership has led to improved processes and outcomes

critically reviewing the assessment processes, and the approaches taken in these assessments, and proposing changes to improve both processes and outcomes.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency-based assessment, including:
 - vocational education and training as a competency-based system
 - competency standards as the basis of qualifications
 - the principles of competency-based assessment
 - assessment which is criterion referenced as distinct from norm-referenced assessment

- reporting of competency-based assessment
- the interpretation of units of competency and other related assessment information, to determine the evidence needed to demonstrate competency, including:
 - the dimensions of competency
 - all components of a national training package
- system requirements for assessment
- the importance of reflective practice in the quality improvement of own work
- the organisation's assessment system policies and procedures
- different assessment methods, purposes and applications
- appeals mechanisms within the organisation
- different types of assessment tools, what tools work for what types of evidence, what the characteristics are of well-constructed assessment tools
- the principles of assessment and how they guide assessment, validation, and appeals processes
- assessment strategies, assessment plans and their components
- applications of technology to improve or assist in quality assessment
- the roles and responsibilities of workplace trainers, facilitators, assessors and others, such as vocational experts, workplace supervisors and support persons in the assessment process
- strategies that ensure that the assessment process is transparent and credible
- legal, organisational and ethical responsibilities associated with the assessment system, including:
 - maintaining client privacy and confidentiality
 - providing accurate information
 - duty of care under common law
 - compliance with system requirements
 - copyright and privacy laws, as they apply to learning and assessment.

Assessment Conditions

Evidence must be gathered through the assessment of at least 20 individual candidates who are enrolled vocational learners.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS502 Design and develop assessment tools

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to design and to develop assessment tools used to guide the collection of quality evidence, including their application in formative, summative and recognition of prior learning (RPL) assessment.

It applies to experienced practitioners responsible for the development and/or delivery of training and assessment products and services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the focus of the assessment tool	1.1 Identify a target group of candidates, purposes of the assessment tool, and the contexts in which the tool will be used 1.2 Access relevant benchmarks for assessment and interpret them to establish evidence required to demonstrate competence

ELEMENT	PERFORMANCE CRITERIA
	<p>1.3 Identify, access and interpret industry requirements and relevant contextualisation guidelines</p> <p>1.4 Identify other related documentation to inform assessment tool development</p>
2. Design the assessment tool	<p>2.1 Select assessment methods that support the collection of defined evidence, taking into account the context in which the assessment will take place, and meeting the principles of assessment</p> <p>2.2 Enable candidates to show or support their claim for recognition of current competency through selected assessment methods</p> <p>2.3 Consider different assessment instruments for the selected assessment methods to generate options for collection of evidence</p> <p>2.4 Consider how the assessment instruments will be administered</p>
3. Develop the assessment tool	<p>3.1 Develop specific assessment instruments that support the collection of evidence that meets the rules of evidence</p> <p>3.2 Define and document clear and specific procedures instructing assessor and candidate on the administration and use of assessment instruments</p> <p>3.3 Consider the requirements of assessment system policies and procedures, and address storage and retrieval needs, and review, evaluation and version control procedures as part of this process</p>
4. Review and trial the assessment tool	<p>4.1 Check draft assessment tools against evaluation criteria and amend as required</p> <p>4.2 Trial assessment tools to validate content and applicability</p> <p>4.3 Collect and document feedback from relevant people involved in trialling</p> <p>4.4 Make amendments to the final tool based on the analysis of feedback</p> <p>4.5 Appropriately format, and file, finalised assessment tool according to assessment system policies and procedures</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 2.1, 2.3, 2.4, 3.3, 4.1, 4.3	<ul style="list-style-type: none"> Accesses, and interprets, procedural and compliance information, and assessment documentation
Writing	3.1, 3.2, 4.1, 4.3, 4.4, 4.5	<ul style="list-style-type: none"> Prepares assessment tools and documentation that incorporates language and format appropriate to the audience Amends tools in response to feedback
Oral Communication	2.2, 4.2, 4.3	<ul style="list-style-type: none"> Participates in communication in order to clarify the purpose and requirements of assessment tools, and to trial assessments
Navigate the world of work	1.3, 3.3, 4.5	<ul style="list-style-type: none"> Recognises, and follows, explicit and implicit protocols, policies and procedures, and meets expectations associated with own role Identifies, confirms and takes responsibility for adherence to organisational, legal and ethical requirements
Interact with others	4.3	<ul style="list-style-type: none"> Actively seeks to clarify the perspectives and experiences of others as part of the work role
Get the work done	1.1-1.4, 2.1-2.4, 3.1-3.3 4.1-4.4	<ul style="list-style-type: none"> Uses systematic, analytical processes in complex, non-routine situations, gathering information, and identifying and evaluating options against agreed criteria Organises work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Seeks new ideas and opportunities, drawing on the diverse perspectives of others to gain insights into current practice and ideas for change

Assessment Requirements for TAEASS502 Design and develop assessment tools

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- developing at least three assessment tools that support different assessment methods, and address at least one unit of competency each. Each assessment tool must:
- include the instruments for collecting evidence, reflecting the principles of assessment and the rules of evidence, and related instructions to the assessor/s and candidates
- show how the contextual needs of different environments are addressed

reporting on the trial and review of each assessment tool, including proposed changes.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the principles of assessment and how they are applied when developing assessment tools
- the rules of evidence and how they have been incorporated in the tools developed
- different assessment contexts and their relationship to developing assessment tools
- the dimensions of competency and how they are incorporated in the development of assessment tools
- the contextualisation of units of competency and contextualisation guidelines
- the components of training packages relevant to the development of assessment tools
- different assessment methods, their purposes and uses
- evaluation methods appropriate to the trial and review of assessment tools
- the principles of reasonable adjustment

- workplace health and safety (WHS) responsibilities associated with assessing competence, including:
 - requirements for reporting hazards and incidents
 - emergency procedures
 - procedures for the use of relevant personal protective equipment
 - sources of WHS information.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to relevant organisational policies and procedures in relation to the assessment system.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS503 Lead assessment validation processes

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor updates to Performance Criteria.
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to provide leadership in assessment validation processes.

It applies to experienced practitioners who work under limited supervision and who are responsible for the validation of assessment processes, both internally and externally.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Monitor assessment practice	1.1 Work with colleagues to systematically monitor assessment practice 1.2 Actively engage with, and support, other assessors as they work to improve assessment practice 1.3 Analyse assessment records ensuring legal, organisational and

ELEMENT	PERFORMANCE CRITERIA
	ethical requirements are being met, and appropriate advice is provided to improve record keeping
2. Coordinate assessment validation activities	<p>2.1 Initiate validation in line with Australian Industry and Skills Committee (AISC) guidelines and organisational, legal and ethical requirements</p> <p>2.2 Undertake risk assessment and analysis to determine the purpose, focus and context of validation activities</p> <p>2.3 Consider and determine approaches to validation</p> <p>2.4 Determine and confirm participants in validation, and organise any materials and resources needed for validation</p> <p>2.5 Provide guidance to support participants throughout the validation process</p> <p>2.6 Finalise and process validation documentation in accordance with assessment system, legal and organisational procedures, and present to relevant people, within an agreed timeframe</p> <p>2.7 Identify recommendations from validation processes, and forward to the appropriate authority</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.3, 2.1, 2.2, 2.3, 2.4, 2.7	<ul style="list-style-type: none"> • Accesses and interprets legal, organisational and ethical requirements, including AISC guidelines • Accesses and interprets assessment validation documentation
Writing	2.1, 2.2, 2.3, 2.4, 2.6, 2.7	<ul style="list-style-type: none"> • Produces accurate documentation, relevant to the validation process and in line with requirements
Oral Communication	1.3, 2.5, 2.6	<ul style="list-style-type: none"> • Engage with individuals and groups in communication to monitor, guide and validate assessment, leading to improved assessment practice
Numeracy	2.6	<ul style="list-style-type: none"> • Structures timeframes in order to represent a sequence of events

Navigate the world of work	1.3, 2.1, 2.6	<ul style="list-style-type: none"> Identifies, confirms and takes responsibility for adherence to policies and procedures Identifies, confirms and takes responsibility for adherence to organisational, legal and ethical requirements
Interact with others	1.1, 1.2, 2.4	<ul style="list-style-type: none"> Cooperates with others as part of routine activities, and contributes to particular activities requiring joint responsibility and accountability, aimed at improved practice Provides guidance and support by making adjustments to own personal communication style, in recognition of the values and experiences of others in order to build rapport
Get the work done	2.1, 2.2, 2.3, 2.4, 2.5, 2.7	<ul style="list-style-type: none"> Considers alignment with values and principles in decision-making processes Makes a range of critical and non-critical decisions in relatively complex situations, taking a range of constraints into consideration Identifies opportunities, drawing on the diverse perspectives of others to gain insights into current practice and ideas for change

Assessment Requirements for TAEASS503 Lead assessment validation processes

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor updates to Performance Criteria.
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- leading at least one validation process
- providing support to other assessors, including modelling good assessment and validation practice
- contributing positively to the work of assessors and others involved in carrying out assessments and validation
- taking responsibility for initiating, organising and facilitating assessment validation on at least three occasions
- using outcomes of validation to improve assessment practice.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the purpose and focus of internal and external validation, and the critical aspects of validation
- different activities and tools for validation
- NVR/AQTF requirements for assessment
- the organisation's assessment system policies and procedures, including validation processes
- the characteristics of well-constructed assessment tools and why, what assessment methods and instruments work for what types of evidence

- the rules of evidence and why they are important, particularly in a validation context
- assessment strategies, and assessment plans and their components
- legal, organisational and ethical responsibilities associated with the assessment system.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to the organisation's validation policy and procedure.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEASS504 Develop and implement recognition strategies

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to develop and implement a recognition strategy that may be used for recognition of current competencies against workplace or industry criteria, or recognition of prior learning (RPL) leading to completion of units of competency or qualifications.

It requires the ability to prepare information and advice on recognition, to identify evidence-gathering opportunities and to evaluate a recognition-based assessment process.

It also requires that all systems and instruments be validated by peers, industry or employers to determine fitness for purpose.

It applies to those who work under limited supervision to develop procedures and documentation for recognition-based assessment for an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Assessment

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>

ELEMENT	PERFORMANCE CRITERIA
1. Determine the purpose and parameters of the recognition process to be applied	<p>1.1 Identify the benchmarks to be used for measurement and recording of the achievement of competence</p> <p>1.2 Determine efficient and effective means of collecting evidence from individual candidates, organisations and third parties to identify current skill levels and/or prior learning</p> <p>1.3 Identify the needs of individual candidates who apply for recognition services</p> <p>1.4 Respect the confidentiality requirements of candidates in relation to recognition processes</p> <p>1.5 Establish the parameters set by the policies and procedures of the training organisation and NVR/AQTF requirements</p>
2. Analyse the criteria required to meet units of competency and qualifications framework	<p>2.1 Interpret units of competency and assessment requirements, in order to clarify requirements for evidence</p> <p>2.2 Analyse foundation skills to ensure that information relating to aptitude and workplace learning may be captured as relevant</p> <p>2.3 Nominate the sources and types of evidence that comply with the rules of evidence and assessment requirements, for each unit of competency</p> <p>2.4 Construct evidence grids that enable candidates to see that their evidence can be used across several units of competency</p> <p>2.5 Determine the direct and indirect evidence that is required to meet all components of the standards</p> <p>2.6 Conduct a risk assessment of different types of evidence that may be put forward and assign controls to ameliorate risks</p> <p>2.7 Determine the requirements for third party reports and the degree to which other evidence must be supplied to validate these</p>
3. Prepare a recognition package for applicants	<p>3.1 Develop information that meets the needs of organisational managers who need to know how recognition processes will be applied</p> <p>3.2 Prepare advisory information that can guide candidates to make informed choices about recognition services and outcomes and explain organisational policies and procedures for recognition in terms readily understood by the applicant</p> <p>3.3 Document the performance requirements for a unit of competency for direct applicant candidates and/or employees in an organisation</p> <p>3.4 Set out clearly the evidence that must be provided to meet the criteria of units and/or evidence collection tools</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>3.5 Use elements and performance criteria to develop plain and simple checklists for candidate self-evaluation</p> <p>3.6 Document exemplars and evidence lists to support candidates in their application for recognition</p> <p>3.7 Provide advice and support to workplace managers, to facilitate collection of workplace evidence or for preparation of third party reports</p>
<p>4. Monitor the recognition-based assessment for a unit of competency</p>	<p>4.1 Ensure that all recognition tools and systems are validated by peers and industry</p> <p>4.2 Provide guidance and support to assessors who are engaged in recognition services</p> <p>4.3 Develop and provide marker's guides, evidence guides and templates in consultation with all assessors who undertake recognition assessments</p> <p>4.4 Monitor the evidence collection process for a unit of competency to ensure that the rules of evidence are met and risk controls are applied</p> <p>4.5 Audit decision making in assessment against organisational policies and procedures to ensure that objective and fair decisions are reached</p> <p>4.6 Monitor feedback provided to the candidate and provide guidance to candidates where full competency against criteria is not met</p> <p>4.7 Determine the need for gap training and advise candidates, and/or employing organisation, of the requirements to meet full competence against units or qualifications</p>
<p>5. Evaluate the recognition assessment, the procedures and outcomes</p>	<p>5.1 Conduct a review of the advice to candidates and employers</p> <p>5.2 Review exemplar evidence lists in terms of their applicability and the evidence generated</p> <p>5.3 Gather and analyse candidate and organisational client feedback as part of a continuous improvement cycle</p> <p>5.4 Gather feedback from the candidate and/or the employing organisation on recognition services and outcomes</p> <p>5.5 Review recognition processes, inputs and practice against the organisation's policies and procedures</p> <p>5.6 Identify changes and enhancements and amend the organisation's policies, procedures and/or the recognition package</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1-1.3, 2.1, 2.2, 3.1, 4.1-4.3, 5.1-5.6	<ul style="list-style-type: none"> Sources, analyses and interprets relevant policies and procedures, and assessment documentation
Writing	1.1, 1.2, 2.2, 3.2, 3.3, 5.1, 5.2, 5.5, 5.6	<ul style="list-style-type: none"> Develops assessment documentation relevant to the RPL assessment process, including exemplars and evidence lists, using language and formatting to suit the audience and context
Oral Communication	1.1, 1.3, 3.1	<ul style="list-style-type: none"> Leads and facilitates communication to source information, provide advice, collect feedback, and articulate ideas and recommendations
Navigate the world of work	5.5	<ul style="list-style-type: none"> Recognises and follows policies and procedures, and meets expectations associated with own role
Interact with others	3.4, 5.1, 5.3, 5.4	<ul style="list-style-type: none"> Routinely collaborates to seek broad input into problem-solving and decision-making, and develops strategies to elicit views and ideas
Get the work done	1.3, 2.1, 2.2, 3.1, 4.1, 4.2, 4.3, 5.1, 5.3, 5.5	<ul style="list-style-type: none"> Organises work according to defined requirements, taking responsibility for decisions regarding the interpretation and the format of information Uses systematic, analytical processes in complex, non-routine situations, gathering information, identifying and evaluating options against agreed criteria Considers the effectiveness of a solution in terms of how well it met goals and seeks to improve a future response

Assessment Requirements for TAEASS504 Develop and implement recognition strategies

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- develop, implement and review one recognition strategy for a group of at least three units of competency, or a qualification for a specified group of candidates
- accurately document:
 - advice to assessors and candidates
 - advice to employers or organisations
 - the recognition tools and validation process used to ensure that the recognition approach meets industry needs, and will be used consistently by assessors in the training organisation
 - the risk management process used to assess the risks of different types of evidence, and the activities put in place to minimise those risks
- critically review an organisation's recognition-based assessment processes:
 - evaluate the approaches taken
 - prepare a report detailing proposed changes to improve both the processes and outcomes.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- recognition-based assessment including:
 - the criteria used in national vocational education and training (VET)
 - the units of competency as the basis of qualifications
 - the principles of recognition and evidence-based assessment

- techniques commonly used in recognition processes, including candidate self-assessment, competency conversations, workplace assessment tasks, direct observation, third party reporting
- how to interpret competency standards and other related assessment information to determine the evidence required to demonstrate competency including:
 - the components of competency
 - the units of competency and related assessment requirements
 - the organisation's assessment system, policies and procedures
 - different types of recognition approaches and tools
 - the principles of assessment and how they guide assessment, validation and appeals processes
 - assessment validation
 - roles and responsibilities in the recognition process, including workplace health and safety (WHS).

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to available recognition tools and documents.

Skills must be demonstrated with real vocational learners.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to conduct individual and group instruction, demonstrate work skills and assess the success of training and one's own training performance, using existing learning resources in a safe and comfortable learning environment.

It emphasises the training as being driven by the work process and context, and applies to a person working under supervision as a work skill instructor in a wide range of settings not restricted to training organisations,

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Organise instruction and demonstration	1.1 Gather information about learner characteristics and learning needs 1.2 Confirm a safe learning environment 1.3 Gather and check instruction, demonstration objectives, and seek assistance if required 1.4 Access and review relevant learning resources and learning

ELEMENT	PERFORMANCE CRITERIA
	<p>materials for suitability and relevance, and seek assistance to interpret the contextual application</p> <p>1.5 Organise access to necessary equipment or physical resources required for instruction and demonstration</p> <p>1.6 Notify learners of details regarding the implementation of the learning program and/or delivery plan</p>
2. Conduct instruction and demonstration	<p>2.1 Use interpersonal skills with learners to establish a safe and comfortable learning environment</p> <p>2.2 Follow the learning program and/or delivery plan to cover all learning objectives</p> <p>2.3 Brief learners on any workplace health and safety (WHS) procedures and requirements prior to, and during, training</p> <p>2.4 Use delivery techniques to structure, pace and enhance learning</p> <p>2.5 Apply coaching techniques to assist learning</p> <p>2.6 Use communication skills to provide information, instruct learners and demonstrate relevant work skills</p> <p>2.7 Provide opportunities for practice during instruction and through work activities</p> <p>2.8 Provide and discuss feedback on learner performance to support learning</p>
3. Check training performance	<p>3.1 Use measures to ensure learners are acquiring, and can use, new technical and generic skills and knowledge</p> <p>3.2 Monitor learner progress and outcomes in consultation with the learner</p> <p>3.3 Review relationship between the trainer/coach and the learner, and adjust to suit learner needs</p>
4. Review personal training performance	<p>4.1 Reflect upon personal performance in providing instruction and demonstration, and document strategies for improvement</p> <p>4.2 Maintain, store and secure learner records, according to organisational and legal requirements</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	4.1	<ul style="list-style-type: none"> Reflects on practice to improve
Reading	1.1, 1.3, 1.4, 2.2	<ul style="list-style-type: none"> Sources and interprets processes and procedures, learning resources and information relevant to providing a work instruction and delivery
Writing	1.4, 1.6, 2.3, 2.6, 2.8, 3.2, 4.1, 4.2	<ul style="list-style-type: none"> Accurately maintains learner records and documentation appropriate to the learning context and audience
Oral Communication	1.1, 1.6, 2.3, 2.4, 2.6	<ul style="list-style-type: none"> Uses appropriate communication strategies to engage, build rapport, provide instruction, monitor progress and provide feedback to individuals or groups
Interact with others	1.2, 1.3, 2.1, 2.5, 2.8, 3.2	<ul style="list-style-type: none"> Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes Asks questions in order to clarify understanding, and to provide and seek feedback Builds rapport to establish effective working relationships and to achieve effective outcomes
Get the work done	1.1-1.6, 2.1-2.8, 3.1-3.3, 4.1, 4.2	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to potential risks, problems and opportunities for improvement and considers options for different approaches

Assessment Requirements for TAEDEL301 Provide work skill instruction

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- carrying out a minimum of three training sessions, involving demonstrating and instructing particular work skills for at least two different individuals or small groups, with each session addressing:
 - different learning objectives
 - a range of delivery techniques and effective communication skills appropriate to the audience.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learner characteristics and needs
- the content and requirements of the relevant learning program, and/or the delivery plan
- the sources and availability of relevant learning resources and learning materials
- the content of relevant learning resources and learning materials
- training techniques that enhance learning, and when to use them
- introductory knowledge of learning principles and learning styles
- key workplace health and safety (WHS) issues in the learning environment, including:
 - roles and responsibilities of key personnel
 - responsibilities of learners
 - relevant policies and procedures, including hazard identification, risk assessment, reporting requirements, safe use of equipment and emergency procedures
 - risk controls for the specific learning environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to any necessary workplace documents.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL401 Plan, organise and deliver group-based learning

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Application

This unit describes the skills and knowledge required to plan, organise and deliver training for individuals within a group.

It applies to a person working as an entry-level trainer, teacher or facilitator structuring a learning program developed by others in, or with, a training and assessment organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Interpret learning environment and delivery requirements	1.1 Access, read, and interpret learning program documentation to determine delivery requirements 1.2 Use available information and documentation to identify group and individual learner needs, and learner characteristics 1.3 Identify and assess constraints, and risks to delivery

ELEMENT	PERFORMANCE CRITERIA
	1.4 Confirm personal role and responsibilities in planning, and delivering training, with relevant personnel
2. Prepare session plans	2.1 Refine existing learning objectives according to program requirements and specific needs of individual learners 2.2 Develop session plans and document these plans for each segment of the learning program 2.3 Use knowledge of learning principles and theories to generate ideas for managing session delivery
3. Prepare resources for delivery	3.1 Contextualise learning materials to meet the needs of the specific learner group 3.2 Finalise learning materials and organise facility, technology and equipment needs in time for delivery of learning sessions 3.3 Confirm overall delivery arrangements with relevant personnel
4. Deliver and facilitate training sessions	4.1 Conduct each session according to the session plan, modified where appropriate to meet learner needs 4.2 Use the diversity of the group as another resource to support learning 4.3 Employ a range of delivery methods to optimise learner experiences 4.4 Demonstrate effective facilitation skills to ensure effective participation and group management
5. Support and monitor learning	5.1 Monitor, and document, learner progress to ensure outcomes are being achieved, and individual learner needs are being met 5.2 Make adjustments to the delivery sessions to reflect specific needs and circumstances 5.3 Manage inappropriate behaviour to ensure that learning can take place 5.4 Maintain and store learner records according to organisational requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 3.1, 5.1	<ul style="list-style-type: none"> Access, read and interpret documentation relevant to the learning context, including program documents, learning materials, policies and procedures relevant to the context
Writing	2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 5.1, 5.2, 5.4	<ul style="list-style-type: none"> Develops and maintains workplace documentation accurately and in response to required needs
Oral Communication	1.2, 1.3, 4.1, 4.3, 4.4	<ul style="list-style-type: none"> Uses communication techniques to build rapport and explore requirements Facilitates training in an appropriate style for both individuals and groups
Navigate the world of work	1.4, 5.4	<ul style="list-style-type: none"> Recognises and follows organisational protocols, policies and procedures relevant to own role
Interact with others	1.4, 3.3, 4.4, 5.3	<ul style="list-style-type: none"> Cooperates and collaborates with others as part of routine activities to achieve team results, and to confirm that outcomes meet requirements Recognises inappropriate behaviours and the potential for conflict, and implements strategies to maintain an appropriate learning environment
Get the work done	1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1-4.4, 5.1-5.4	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to problems and opportunities for improvement and considers options for different approaches Uses information and communications technology (ICT) based tools to access, organise, analyse and display information relevant to role

Assessment Requirements for TAEDEL401 Plan, organise and deliver group-based learning

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete the tasks outlined in the elements and performance criteria of this unit, including:

- facilitating group-based learning by preparing and delivering at least three training sessions, including:
 - at least two consecutive sessions of at least 40 minutes duration, that follow one of the learning program designs, to a learner group of at least eight individuals
 - at least one session delivered to a learner group of at least eight individuals, with evidence of how the characteristics and needs of this group were addressed
- identifying and responding to individual needs
- accessing and using documented resources, and any support personnel required to guide inclusive practices.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- learning theories and principles
- resources available to identify different learner styles
- the relevant industry area and subject matter of the delivery
- the learner group profile, including characteristics and needs of individual learners in the group
- the requirements of the learning program and/or delivery plan, and the content purpose
- different delivery methods and techniques appropriate to face-to-face group delivery

- different techniques for the recognition and resolution of inappropriate behaviours
- behaviours that may indicate learner difficulties, and the methods used to address these difficulties
- the purpose of organisational record-management systems and reporting requirements
- evaluation and revision techniques used to improve session plans
- specific resources, equipment and support services available for learners with special needs
- assessment and risk control measures relating to the facilitation of group-based learning
- policies and procedures relevant to the learning environment.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to learning program designs in use in the learning environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Application

This unit describes skills and knowledge required to plan, organise and facilitate learning for individuals in a workplace, using real work activities as the basis for learning.

It applies to a person working as an entry-level trainer, teacher or facilitator or an employee, team leader or workplace supervisor responsible for guiding learning through work.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish effective work environment for learning	1.1 Establish, and agree upon, the objectives and scope of the work-based learning 1.2 Analyse work practices and routines to determine their effectiveness in meeting established learning objectives

ELEMENT	PERFORMANCE CRITERIA
	1.3 Identify, and address any workplace health and safety (WHS) implications of using work as the basis for learning
2. Develop a work-based learning pathway	2.1 Address contractual requirements and responsibilities for learning at work 2.2 Arrange for the integration and monitoring of external learning activities with the work-based learning pathway 2.3 Obtain agreement from relevant personnel to implement the work-based learning pathway
3. Establish the learning-facilitation relationship	3.1 Identify the context for learning and the individual's learning style 3.2 Select an appropriate technique or process to facilitate learning, and explain the basis of the technique to the learner 3.3 Develop, document and discuss an individualised learning plan with the learner 3.4 Access, read and interpret documentation outlining the WHS responsibilities of the various parties in the learning environment 3.5 Monitor supervisory arrangements appropriate to learner's levels of knowledge, skill and experience to provide support and encouragement and ensure learner's health and safety
4. Implement the work-based learning pathway	4.1 Explain the objectives of work-based learning, and the processes involved, to the learner 4.2 Sequence the introduction of workplace tasks, activities and processes to reflect the agreed work-based learning pathway 4.3 Encourage learner to take responsibility for learning and to self-reflect 4.4 Develop techniques that facilitate the learner's transfer of skills and knowledge
5. Maintain and develop the learning-facilitation relationship	5.1 Prepare for each session 5.2 Structure learning activities to support and reinforce new learning, build on strengths, and identify areas for further development 5.3 Observe learner cues, and change approaches where necessary, in order to maintain momentum 5.4 Practise ethical behaviour at all times 5.5 Monitor the effectiveness of the learning/facilitation relationship through regular meetings between the parties

ELEMENT	PERFORMANCE CRITERIA
6. Close and evaluate the learning-facilitation relationship	<p>6.1 Carry out the closure smoothly, using appropriate interpersonal and communication skills</p> <p>6.2 Seek feedback from the learner on the outcomes achieved, and the value of the relationship</p> <p>6.3 Evaluate effectiveness of the work-based pathway against the objectives, processes and techniques used</p> <p>6.4 Recommend improvements to work-based practice in light of the review process</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 1.3, 2.1, 3.1, 3.4, 3.5, 6.3	<ul style="list-style-type: none"> Accesses and interprets compliance information, contractual information, WHS information, and documents relevant to learning in the workplace, in the context of consultation and continuous improvement, to apply relevance to requirements
Writing	1.1, 2.3, 3.3, 4.1, 6.3	<ul style="list-style-type: none"> Develops and maintains documentation relevant to workplace learning, including learning plans and evaluations, in accordance with organisational and workplace requirements
Oral Communication	2.2, 3.3, 4.2, 5.5, 6.1	<ul style="list-style-type: none"> Uses oral communication techniques to identify needs, build rapport, agree on learning plans, facilitate effective learning and monitor practice Selects appropriate vocabulary adjusting language, tone and pace to maintain effective interactions, and to build and maintain engagement with individuals or groups
Navigate the world of work	1.3, 2.1, 5.4	<ul style="list-style-type: none"> Follows organisational protocols, policies and procedures in the management of records Recognises and responds to contractual and ethical requirements associated with own role
Interact with others	1.1, 2.3, 3.5, 4.3, 6.2	<ul style="list-style-type: none"> Asks questions to clarify understanding, and seeks feedback and further information Cooperates and collaborates with others as part of

		routine activities to achieve team results, and to confirm outcomes meet requirements
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.5, 4.1-4.4, 5.1-5.3, 5.5, 6.1-6.3	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Uses systematic, analytical processes in complex, routine and non-routine situations, gathering information, and identifying and evaluating options based on organisational needs Identifies and responds to problems and opportunities for improvement, considering options for different approaches Uses information and communications technology (ICT) based tools to design work processes and to complete work tasks

Assessment Requirements for TAEDEL402 Plan, organise and facilitate learning in the workplace

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- preparing and facilitating work-based learning
- providing a minimum of two examples of developing work-based learning pathways, that include:
 - identifying needs for learning
 - analysing work practices, work environment and work activities
 - organising and allocating work in a way that reflects learning needs, and provides effective learning opportunities through work processes
- conducting a learning facilitation relationship:
 - with at least two individuals
 - demonstrating communication skills and flexibility
 - demonstrating one or more of the processes, or techniques, identified.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- systems, processes and practices within the organisation where work-based learning is taking place
- systems for identifying skill needs within the workplace
- different learning styles, and how to encourage learning for those who learn in different ways

- workplace health and safety (WHS) relating to the work role, including:
 - hazards relating to the industry and specific workplace
 - reporting requirements for hazards and incidents
 - specific procedures for work tasks
 - safe use and maintenance of relevant equipment
 - emergency procedures
 - sources of WHS information.
 -

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to any documentation relating to workplace procedures required by the candidate.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL403 Coordinate and facilitate distance-based learning

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to coordinate and facilitate a distance-based learning process.

It applies to trainers, facilitators, teachers, and training and assessment consultants who work under limited supervision, and are responsible for guiding distance-based learning.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for distance-based learning	1.1 Access, read and interpret a learning strategy and learning program, to determine learning objectives and outcomes to be met 1.2 Develop knowledge of group, individual learner styles and learner characteristics to support effective planning for distance-based learning 1.3 Select and evaluate learning resources for appropriateness, and contextualise them for distance-based learning where required 1.4 Develop distance delivery-management plan, using knowledge

ELEMENT	PERFORMANCE CRITERIA
	<p>of learning principles and research to-date</p> <p>1.5 Identify and organise support mechanisms, and means of communicating with learners</p>
2. Manage distance-based learners	<p>2.1 Confirm expectations and requirements through direct contact, and clarify any issues or questions</p> <p>2.2 Establish distance-based learning relationships between the trainer/facilitator and learners</p> <p>2.3 Progressively distribute learning resources and learning materials according to the plan and to learner needs</p>
3. Monitor learner progress	<p>3.1 Document learner progress to ensure that outcomes are being achieved and individual learner needs are being met</p> <p>3.2 Develop and implement strategies to address learner difficulties, and techniques for maintaining motivation and commitment</p> <p>3.3 Provide support and guidance outside the formal communication process, where appropriate</p> <p>3.4 Maintain, store and secure learner records, according to organisational and legal requirements</p>
4. Review distance-based learning process	<p>4.1 Gather feedback to review own management of the distance-based learning process</p> <p>4.2 Analyse feedback to determine success of the distance-based learning in meeting learner needs and expectations</p> <p>4.3 Reflect on own performance as a coordinator/facilitator, and document improvement plans</p> <p>4.4 Identify and document options for improving the distance-based learning process, and discuss with relevant personnel for future action</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Learning	4.3	<ul style="list-style-type: none"> Reflects on and undertakes review of own performance to build own knowledge and skills
Reading	1.1, 1.2, 1.3, 1.5, 3.1, 4.2, 4.4	<ul style="list-style-type: none"> Sources and interprets texts, including strategy and planning documents, learner information, learning resources and review data relevant to the distance based-learning environment
Writing	1.4, 2.1, 2.2, 2.3, 3.1, 3.4, 4.3, 4.4	<ul style="list-style-type: none"> Accurately develops and maintains documentation using appropriate language, in accordance with organisational and workplace requirements
Oral Communication	2.1, 2.2, 3.3, 4.4	<ul style="list-style-type: none"> Uses appropriate communication techniques to establish requirements, confirm expectations, build relationships and facilitate effective distance learning, in a one-on-one or group situation
Navigate the world of work	1.2, 3.4	<ul style="list-style-type: none"> Develops knowledge of learning styles to perform role Follows legislative requirements, organisational protocols, policies and procedures in the management of records
Interact with others	4.1	<ul style="list-style-type: none"> Asks questions to clarify understanding and seek feedback, and further information
Get the work done	1.1, 1.2-1.5, 2.1-2.3, 3.1-3.4, 4.1-4.4	<ul style="list-style-type: none"> Organises and completes work according to defined requirements taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to problems, considering options for different approaches Uses information and communications technology (ICT) based tools to design work processes and to complete work tasks

Assessment Requirements for TAEDEL403 Coordinate and facilitate distance-based learning

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- organising and facilitating distance learning on at least two separate occasions, showing:
 - how learner needs were established
 - documentation detailing how the learning programs were planned, coordinated, facilitated and monitored
 - how training package units, or accredited course modules, were used as benchmarks for learning.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- adult learning principles
- learner styles
- the content and requirements of the learning strategy, and learning program, to be used in distance delivery
- best practice in online and distance engagement of learners
- the characteristics and needs of individual distance learners
- the technology used to support distance-based learning
- techniques for maintaining the motivation and commitment of distance learners
- support mechanisms available to distance learners.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to organisational policies and procedures in relation to the storage of records.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL404 Mentor in the workplace

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to establish and develop a professional mentoring relationship with an individual in a workplace.

It applies to workplace supervisors or other work colleagues who work under limited supervision and who have responsibility for mentoring one or more individuals in the workplace. This may include, but is not limited to, those who mentor an apprentice or trainee employed by, or undertaking a work placement within, an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Develop a mentoring plan	1.1 Identify scope and boundaries of the mentoring relationship according to organisational procedures 1.2 Document mentoring plan in accordance with organisational requirements 1.3 Establish ground rules and negotiate realistic expectations 1.4 Establish and maintain confidentiality of the relationship in

ELEMENT	PERFORMANCE CRITERIA
	accordance with legislation, policy and procedures
2. Facilitate mentoring relationship	<p>2.1 Develop learner's confidence, self-esteem, respect and trust in the mentoring relationship</p> <p>2.2 Share personal experiences and knowledge with the person being mentored according to agreed objectives</p> <p>2.3 Support the person being mentored to develop and use skills in problem solving and decision making</p> <p>2.4 Use personal and professional networks to assist the person being mentored</p> <p>2.5 Provide information, and guidance to enhance engagement in the workplace</p> <p>2.6 Use techniques for resolving differences without damaging the relationship, and obtain assistance according to organisational policy and procedures</p>
3. Monitor mentoring relationship	<p>3.1 Provide planning assistance and guidance as requested by the person being mentored in a form and style to suit their requirements</p> <p>3.2 Provide feedback to the person being mentored on progress towards achieving the expectations and goals of the mentoring process</p> <p>3.3 Recognise and discuss changes in the mentoring relationship with appropriate stakeholders</p> <p>3.4 Negotiate and manage closure of the mentoring arrangement once objectives have been met</p>
4. Evaluate effectiveness of mentoring	<p>4.1 Establish and discuss benefits gained from the mentoring process</p> <p>4.2 Reflect on and articulate the personal benefits gained from providing mentoring</p> <p>4.3 Identify and report the outcomes of the mentoring arrangement and the benefits to the organisation according to organisational policy and procedures to improve the mentoring system or program</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.4	<ul style="list-style-type: none"> Sources and interprets texts relevant to mentoring context, including organisational policies and learner information
Writing	1.1, 1.3, 2.5, 3.1, 3.2, 4.3	<ul style="list-style-type: none"> Develops content and documents information relevant to mentoring plan
Oral Communication	2.4, 3.3, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> Uses appropriate communication techniques to build rapport, trust, engagement and provide guidance and feedback
Navigate the world of work	1.1, 1.4, 2.6, 4.3	<ul style="list-style-type: none"> Follows legislative requirements, organisational protocols, policies and procedures in workplace mentoring
Interact with others	1.2, 2.1-2.3, 2.5, 2.6, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> Builds rapport using collaboration with others to achieve joint outcomes and effective interaction Provides mentoring and role modelling to achieve agreed outcomes Cooperates and consults with others to clarify understanding and seek feedback
Get the work done	1.1-1.4, 2.1-2.6, 3.1-3.4, 4.1-4.3	<ul style="list-style-type: none"> Plans, organises and completes work according to defined requirements taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to problems, considering options for different approaches

Release1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- preparing a mentoring plan between the mentor and mentee that sets out clear objectives for a mentoring relationship that will last at least one year
- facilitating at least three mentoring sessions
- documenting information on sessions, including comments and notes from both mentor and mentee.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- relevant policy, legislation, codes of practice and national standards likely to impact on the provision of workplace mentoring, including training contracts and responsibilities of employer, registered training organisation (RTO) and funding body where they exist
- mentoring methodologies and strategies
- learning theories in relation to mentoring
- strategies for working with a mentee including encouraging self reflection, confidence and the building of rapport
- acceptable behaviour in the mentoring relationship
- equal employment opportunity, equity and diversity principles
- how a mentor can support the mentee's employer to meet its WHS obligations for the mentee.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- documentation of any existing training plan or contract if applicable to the mentoring relationship.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL501 Facilitate e-learning

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to establish, facilitate, monitor and review e-learning delivered via electronic media.

It applies to individuals who use a range of specialised, technical and training competencies to engage with learners and others to facilitate e-learning

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Establish the e-learning environment	1.1 Access, read and interpret learning strategy and learning program, to determine the learning outcomes and objectives to be met 1.2 Develop knowledge of group and individual learner styles and learner characteristics to support effective planning 1.3 Develop e-learning delivery plan to manage and sequence e-learning activities and events, to ensure logical progression of learning content and continuity of e-learner progress

ELEMENT	PERFORMANCE CRITERIA
	<p>1.4 Confirm technical requirements for the e-learning environment</p> <p>1.5 Trial and check e-learning resources and materials for technical glitches</p> <p>1.6 Develop and document protocols for the e-learning environment</p> <p>1.7 Identify and organise specific technical support needs and mechanisms for e-learners</p>
2. Introduce e-learning	<p>2.1 Provide effective introduction to the e-learning environment and discuss, clarify and agree upon objectives and e-learning protocols</p> <p>2.2 Establish e-learning relationship with e-learners</p> <p>2.3 Initiate relationships between e-learners to support inclusivity, acknowledge diversity and enable a positive e-learning environment</p>
3. Guide and facilitate e-learning	<p>3.1 Use relevant electronic tools to facilitate e-learning according to the e-learning delivery plan</p> <p>3.2 Demonstrate good practice in e-learning facilitation to ensure an effective learning experience</p> <p>3.3 Use relevant support mechanisms to address technical issues</p> <p>3.4 Build opportunities for authentic learning, practice and formative assessment into the e-learning experience</p>
4. Monitor e-learning	<p>4.1 Monitor and document e-learner progress to ensure outcomes are being achieved and individual learner needs are being met</p> <p>4.2 Provide support and guidance, inside and outside, the e-learning environment as appropriate</p> <p>4.3 Continuously monitor e-learner interaction with others and participation in e-learning activities, and intervene where necessary to maintain momentum and engagement</p> <p>4.4 Maintain, store and secure learner records according to organisational and legal requirements</p>
5. Review e-learning processes	<p>5.1 Conduct a review to evaluate effectiveness of e-learning delivery and facilitation</p> <p>5.2 Reflect on own performance as an e-learning facilitator, and document improvement plans</p> <p>5.3 Identify, and document, recommendations for improvements in facilitating e-learning, and appropriateness of e-learning systems, tools and resources, and discuss with relevant personnel for future</p>

ELEMENT	PERFORMANCE CRITERIA
	action

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	5.1, 5.2	<ul style="list-style-type: none"> Reflects on performance of self and others to understand learning context, and seek opportunities for improvement
Reading	1.1, 1.2, 1.4, 1.5, 1.7, 4.1, 4.3, 5.1, 5.3	<ul style="list-style-type: none"> Analyses and interprets texts relevant to the environment, including learning strategies, learning programs, delivery plans, learning materials, technical information, data to monitor learning, and presented in a variety of formats to apply relevance to requirements and to define methodology and improvement strategies
Writing	1.3, 1.4, 1.6, 2.1, 2.2, 2.3, 3.1, 4.1, 4.3, 4.4, 5.1, 5.2	<ul style="list-style-type: none"> Accurately develops and maintains workplace documentation, including learning plans, learner progress reports, improvement reports, using appropriate language, and in accordance with the purposes and organisational requirements Organises web-based content in a manner that supports the purposes and audience
Oral Communication	3.2, 5.3	<ul style="list-style-type: none"> Uses communication techniques to determine needs, build rapport, and to appropriately guide and facilitate effective learning, and explore others' views to elicit understanding, and to assess the efficacy of practice Uses appropriate clear and engaging language to maintain effectiveness, and build and maintain engagement
Navigate the world of work	4.4	<ul style="list-style-type: none"> Follows organisational protocols, policies and procedures in the management of records
Interact with others	1.4, 1.7, 2.1, 2.2, 2.3, 4.2	<ul style="list-style-type: none"> Builds rapport using collaboration with others to achieve joint outcomes and effective interaction Cooperates and consults with others to confirm understanding and seek feedback
Get the work	1.1-1.7, 2.1-2.3, 3.1,	<ul style="list-style-type: none"> Plans, organises and completes work according to defined requirements taking responsibility for

done	3.3, 3.4, 4.1-4.4, 5.1-5.3	<p>decisions and sequencing tasks to achieve efficient outcomes</p> <ul style="list-style-type: none"> • Identifies and responds to problems and opportunities for improvement, considering options for different approaches • Uses information and communications technology (ICT) based tools to design assessment systems and work processes, and to complete work tasks
------	-------------------------------	---

Assessment Requirements for TAEDEL501 Facilitate e-learning

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- facilitating one complete e-learning program, providing detail about:
 - how learner needs were identified
 - the e-learning delivery plan
 - protocols for the learning environment
 - support mechanisms available to learners
 - at least two examples of organising and facilitating a minimum of two e-learning activities covering diverse e-learning environments
 - how the program was monitored and reviewed.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- adult learning principles
- how to distinguish between a technical problem and a content problem, and to respond accordingly
- the use of relevant technologies and tools, including those that allow the trainer/facilitator to monitor every entry and electronic movement of the learner
- relevant learning management systems
- the structure and content of relevant e-learning resources
- the ethics and codes of conduct related to e-learning
- cultural awareness, particularly in regard to ensuring electronic discussions are culturally sensitive
- workplace health and safety (WHS) relating to the work role, and the WHS considerations to include in the design of e-learning resources.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to the e-learning system in use in the organisation.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDEL502 Provide advanced facilitation practice

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to provide high-level facilitation, including reflective and continuous improvement practices, in a vocational education and training (VET) context.

It applies to experienced teachers, trainers and assessors utilising a range of techniques, across a range of contexts, to create the best learning outcomes for learners within a vocational education context such as a Registered Training Organisation (RTO).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Delivery and facilitation

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Extend facilitation practices	1.1 Update knowledge of learning methods, facilitation techniques and learning theories, to improve delivery and facilitation practices 1.2 Maintain currency of vocational competencies and related

ELEMENT	PERFORMANCE CRITERIA
	subject matter expertise 1.3 Practise flexibility, innovation and responsiveness in facilitation practice 1.4 Reflect on own practice and experiences as a facilitator, to determine and document potential improvements to delivery approaches
2. Prepare for complex environments	2.1 Identify environmental conditions and their potential impact on teaching 2.2 Manage constraints to delivery with relevant personnel 2.3 Review, and adjust, training and assessment strategies to address the constraints of complex environments
3. Prepare for learners with complex needs	3.1 Research the characteristics of learners with complex needs, and identify potential barriers to learning 3.2 Develop, and adjust, training and assessment strategies, and customise learning materials to meet needs
4. Develop learner independence	4.1 Enhance learner experiences using a range of learning methods and inclusive practices 4.2 Acknowledge and address potential barriers to learning 4.3 Encourage learners towards self-directed learning by establishing enabling processes
5. Reflect on, and improve practice	5.1 Seek input from other relevant personnel regarding teaching, facilitation and learning practices 5.2 Review teaching, facilitation and learning practices to identify and document opportunities for improvement 5.3 Implement the documented improvement plan, review, and adjust as required

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Learning	1.1, 1.2, 1.4	<ul style="list-style-type: none"> Undertakes research activities and reflects on performance to identify opportunities for own learning, development and extension of practice and experience
Reading	1.1, 1.2, 2.3, 3.1, 5.2	<ul style="list-style-type: none"> Sources, analyses and interprets text-based information to learn, develop and continuously improve
Writing	1.4, 2.3, 3.2, 5.2, 5.3	<ul style="list-style-type: none"> Appropriately documents potential improvements
Oral Communication	1.3, 5.1	<ul style="list-style-type: none"> Uses appropriate communication techniques to interact effectively with learners and staff, to respond to barriers, ensure engagement and facilitate effective learning.
Navigate the world of work	1.3	<ul style="list-style-type: none"> Takes steps to practise skills relevant to facilitation role
Interact with others	2.2, 4.1-4.3	<ul style="list-style-type: none"> Cooperates and consults with others to build rapport, understanding and an enhanced learning environment
Get the work done	1.1-1.4, 2.1-2.3, 3.1, 3.2, 4.1-4.3, 5.1-5.3	<ul style="list-style-type: none"> Plans, organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to problems, and opportunities for improvement, considering options for different approaches

Assessment Requirements for TAEDEL502 Provide advanced facilitation practice

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- facilitating groups of learners and demonstrating:
 - the selection and use of different teaching and delivery methods, applied in different delivery modes that are relevant and appropriate to different learners and their needs
 - integration of theory and practice in own performance and in supporting learners to develop competency
 - a variety of strategies to support increased learner independence
 - documentation of reflective practice and proposed changes to practice
- collecting feedback from observers such as supervising teachers/trainers, peers, colleagues, learners or clients
- analysing feedback from a range of sources, and reflecting on the success of the training delivery, as well as own performance.

The candidate must be able to show evidence of having conducted a minimum of 100 hours of group facilitation, in addition to any evidence provided of work with individual learners, or in a different learning context.

The candidate must show evidence of feedback from at least two peers and 10 learners, and evidence of reflection on this feedback.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the main branches of learning theory incorporating behavioural learning theory, cognitive learning theory, experiential learning theory, information processing theory, and current research on learning as it relates to teaching in an adult environment
- different delivery modes and facilitation techniques, and their appropriateness for different learners and learning situations
- the code of practice and/or ethics relevant to the vocational education and training (VET) sector
- ways in which components of Training Packages, accredited curricula and learning resources can be contextualised to meet the needs of individual learners, without compromising standards.
-

Assessment Conditions

Assessment must take place within a VET workplace, and include access to the full range of physical resources usually provided to a facilitator of a training program, in a registered training organisation (RTO).

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES401 Design and develop learning programs

Modification History

Release	Comments
Release 2	This version first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Application

This unit describes the skills and knowledge required to conceptualise, design, develop and review learning programs to meet an identified need for a group of learners. The unit addresses the skills and knowledge needed to identify the parameters of a learning program, determine its design, outline the content, and review its effectiveness.

It applies to trainers or facilitators who work under limited supervision to design, or develop, learning programs that are discrete, and provide a planned learning approach that relates to specific learning and training needs, or part of the learning design for a qualification.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Define the parameters	1.1 Clarify the purpose and type of learning program with key

ELEMENT	PERFORMANCE CRITERIA
of the learning program	stakeholders 1.2 Access and confirm the competency standards, and other training specifications, on which to base the learning program 1.3 Identify language, literacy and numeracy requirements of the program 1.4 Identify and consider characteristics of the target learner group
2. Work within the VET policy framework	2.1 Access relevant vocational education and training (VET) policies and frameworks, and apply to work practices 2.2 Identify changes to training packages and accredited courses, and apply these to program development 2.3 Conduct work according to organisational quality assurance policies and procedures
3. Develop program content	3.1 Research, develop and document specific subject matter content, according to agreed design options 3.2 Evaluate existing learning resources for content relevance and quality 3.3 Specify assessment requirements of the learning program
4. Design the structure of the learning program	4.1 Break the learning content into manageable segments, and document the timeframe for each segment 4.2 Determine and confirm delivery strategies, required assessment methods and tools 4.3 Document the complete learning program in line with organisational requirements 4.4 Review the complete program with key stakeholders, and adjust as required 4.5 Ensure a safe learning progression by analysing risks in the learning environment, and including a risk control plan

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description

Reading	1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 3.1, 3.2, 3.3, 4.2, 4.4, 4.5	<ul style="list-style-type: none"> Interprets specific information and instructions from a range of sources, to identify relevance to requirements
Writing	1.1, 3.1, 3.3, 4.1, 4.2, 4.3, 4.4, 4.5	<ul style="list-style-type: none"> Develops documents and content using the required format, accurate spelling, and grammar and terminology specific to the purpose and audience
Oral Communication	1.4	<ul style="list-style-type: none"> Uses appropriate language, questioning and listening techniques to provide and elicit information, confirm understanding and explore others' views.
Numeracy	4.1	<ul style="list-style-type: none"> Interprets familiar measurements relating to timeframes and compares against requirements
Navigate the world of work	4.3	<ul style="list-style-type: none"> Follows organisational protocols, policies and procedures regarding program documentation
Interact with others	1.1, 1.2, 4.2, 4.4	<ul style="list-style-type: none"> Recognises the importance of consultation and negotiation while collaborating to confirm strategy and achieve required outcomes
Get the work done	1.1-1.4, 2.1-2.3, 3.1-3.3, 4.1-4.5	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to potential risks, considering options for different approaches Uses information and communications technology (ICT) based tools to conduct research, design work processes, and to complete work tasks

Assessment Requirements for TAEDES401 Design and develop learning programs

Modification History

Release	Comments
Release 2	This version first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- designing, developing and reviewing learning programs within the vocational education and training (VET) context
- preparing and developing a minimum of two learning programs:
- that contain differentiated learning program designs to reflect particular needs, contexts and timelines

at least one of which must be based on competency standards or accredited courses, and must cover at least one entire unit of competency or accredited course module.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- information about training package developers and course accreditation agencies responsible for specific learning program parameters
- training packages and relevant competency standards to be used as the basis of the learning program
- other performance standards and criteria to be used as the basis of the learning program, where relevant
- the distinction and relationship between a training package/accredited course, learning strategy and learning program
- the different purposes and focus of learning programs

- instructional design principles relating to different design options for learning program design and structure
- availability and types of different relevant learning resources, learning materials, and pre-developed learning activities
- methodologies relating to developing and documenting new learning activities, and related learning materials
- different delivery modes and methods
- relevant policies, legal requirements, codes of practice and national standards, including commonwealth and state or territory legislation, that may affect training and assessment in the VET sector
- describe relevant workplace health and safety (WHS) knowledge relating to the work role, and WHS considerations that need to be included in the learning program.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to competency standards or accredited courses relevant to the learning programs.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES402 Use training packages and accredited courses to meet client needs

Modification History

Release	Comments
Release 2	This version first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Application

This unit describes the skills and knowledge required to use training packages and accredited courses as tools to support industry, organisation and individual competency development needs.

It applies to individuals who are working in or with training and/or assessment organisations as an entry-level trainer, teacher, facilitator or assessor using a pre-defined training product, such as a training package or accredited course.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Select appropriate training package or	1.1 Confirm the training and/or assessment needs of the client 1.2 Identify and source training packages, qualifications and/or

ELEMENT	PERFORMANCE CRITERIA
accredited course	accredited courses that could satisfy client needs 1.3 Use training products in line with vocational education and training (VET) sector requirements, and the training and assessment organisation's quality assurance policies and procedures
2. Analyse and interpret the qualifications framework	2.1 Read and interpret the qualification framework, and packaging rules of the identified qualification 2.2 Review and determine applicable licensing requirements and prerequisites 2.3 Determine suitable electives that meet client needs and job roles
3. Analyse and interpret units of competency and accredited modules	3.1 Select skill set, individual unit or accredited module to meet client needs and document reasons for selection 3.2 Read, analyse and interpret all parts of each selected unit, or accredited module, for application to client needs 3.3 Analyse links between the units, and/or accredited modules, to develop effective applications for the client
4. Contextualise units and modules for client applications	4.1 Use information from the client to contextualise units, or accredited modules, to meet client needs 4.2 Use advice on contextualisation produced by the training package developer or course developer to meet client needs
5. Analyse and interpret assessment information	5.1 Read and analyse the assessment information of the relevant training package or accredited course 5.2 Provide appropriate advice to the client about assessment requirements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 2.2, 2.3, 3.1, 3.2,	<ul style="list-style-type: none"> Sources, analyses and interprets information, to identify relevance to client needs

	3.3, 4.2, 5.1, 5.1	
Writing	3.3, 3.4, 4.1, 4.2, 5.1, 5.2	<ul style="list-style-type: none"> Prepares information that incorporates the interpretation and analysis of information, using appropriate language in a format and style suited to the audience and context
Oral Communication	1.1, 4.1, 5.2	<ul style="list-style-type: none"> Uses appropriate communication techniques to provide and elicit information, confirm understanding and communicate conclusions
Navigate the world of work	1.3	<ul style="list-style-type: none"> Follows organisational protocols, policies and procedures regarding quality assurance
Interact with others	1.1	<ul style="list-style-type: none"> Recognises the importance of consultation and negotiation to confirm client needs
Get the work done	1.1-1.3, 2.1-2.3, 3.1-3.4, 4.1, 4.2, 5.1, 5.2	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to problems and opportunities for improvement and innovation, and considers options for different approaches Uses information and communications technology (ICT) based tools to conduct research, design work processes, and to complete work tasks

Assessment Requirements for TAEDES402 Use training packages and accredited courses to meet client needs

Modification History

Release	Comments
Release 2	This version first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- analysing a training package and/or accredited course, to examine its component parts, identify relevant qualifications and units of competency or modules, and contextualise those to meet the specific needs of one client
- demonstrate a minimum of two examples of analysing training specifications, including at least one training package; the other may be another training package or an accredited course that meets a specific client need.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of the:

- Australian Qualifications Framework (AQF) guidelines, including characteristics of AQF qualification types
- functions and responsibilities of training package developers, and course accreditation agencies, and their roles as key vocational education and training (VET) organisations
- dimensions of competency
- format and structure of accredited courses
- format and structure of units of competency, and assessment requirements
- function of training packages and accredited curriculum as benchmarks in a competency-based VET training and assessment system

- methodology relating to analysing and using competency standards for a range of applications and purposes, to meet the needs of a diverse range of VET clients
- terminology used in training packages and accredited courses
- parts of training packages that can be contextualised and parts that cannot
- Standards for Training Packages, including the role and purpose of each endorsed component
- non-endorsed components of training packages
- sources of training package information.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to:

- training package components developed to meet the Standards for Training Packages, and those developed to meet the requirements of the Training Package Development Handbook.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES501 Design and develop learning strategies

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Application

This unit describes the skills and knowledge required to design, develop and review learning strategies.

It applies to those who work under limited supervision and use a range of specialised technical or managerial skills to develop learning strategies relevant to both Training Package qualifications and course-based qualifications.

The learning strategy provides an overview or outline only. Detailed guidance is provided in the content of specific learning programs.

No licensing, legislative or certification requirements apply to this unit at the time of publication

Unit Sector

Learning design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the	1.1 Clarify the purpose of the learning strategy, likely target

ELEMENT	PERFORMANCE CRITERIA
parameters of the learning strategy	<p>groups and their learning needs</p> <p>1.2 Research qualification or other benchmark options for meeting the likely target group needs and select an appropriate option</p> <p>1.3 Consult with relevant people to confirm the parameters of the learning strategy</p>
2. Develop the framework for the learning strategy	<p>2.1 Develop a learning strategy design that reflects the requirements of the selected qualification or other benchmark</p> <p>2.2 Analyse industry or organisation documentation to determine additional and supporting requirements</p> <p>2.3 Research and analyse options for design, based on likely target groups, their learning needs and contexts for delivery</p> <p>2.4 Use appropriate learning theories and instructional design principles to support the learning strategy design</p> <p>2.5 Identify and document learning outcomes</p> <p>2.6 Consult to modify and confirm the framework</p> <p>2.7 Develop the review process for the learning strategy</p>
3. Devise the content and structure of the learning strategy	<p>3.1 Construct content headings from learning outcomes to form an overview of content to be addressed</p> <p>3.2 Sequence the content to support learning and determine overall timelines within operating constraints</p> <p>3.3 Express learning strategy outcomes to reflect both generic and specific learning outcomes to be achieved</p> <p>3.4 Identify and document appropriate delivery and assessment strategies, taking account of the learning parameters, design framework and learning context</p> <p>3.5 Identify and document operational requirements</p>
4. Review the learning strategy	<p>4.1 Review the learning strategy in collaboration with relevant people against specified criteria prior to and post implementation</p> <p>4.2 Document a post-implementation review process that includes measures for identifying the effectiveness and quality of the learning strategy</p> <p>4.3 Make recommendations based on outcomes of the review processes, where appropriate, and document these</p> <p>4.4 Make modifications and document as part of a continuous improvement strategy</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.2, 2.3, 2.5, 3.4, 3.5, 4.1	<ul style="list-style-type: none"> Sources, analyses and interprets written information, including training standards, organisational policies and procedures and review data to identify relevance for learning strategy and continuous improvement
Writing	1.1, 2.1, 2.4, 2.5, 2.6, 2.7, 3.1, 3.2, 3.3, 3.4, 3.5, 4.2, 4.3, 4.4	<ul style="list-style-type: none"> Produces documents, including a learning strategy, that incorporates the analysis of information, and is presented in clear and format and style appropriate to audience and context
Numeracy	3.2	<ul style="list-style-type: none"> Structures timeframes to represent a sequence of events
Interact with others	1.1, 1.3, 2.6, 4.1	<ul style="list-style-type: none"> Recognises the importance of consultation and collaboration to clarify strategy and receive and incorporate feedback
Get the work done	1.1-1.3, 2.1-2.7, 3.1-3.5, 4.1-4.4	<ul style="list-style-type: none"> Plans, organises and completes work according to defined requirements taking responsibility for decisions Identifies and responds to problems and opportunities for improvement and considers options for different approaches Sequences tasks to achieve efficient outcomes and identifies appropriate process milestones and performance indicators to monitor progress

Assessment Requirements for TAEDES501 Design and develop learning strategies

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- preparation and presentation of a minimum of two examples of learning strategies designed by the candidate, with differentiated design structures in each that:
 - reflect the specific requirements of the qualification or skill set, and
 - reflect client needs and the contexts of application
- documentation of a review that provides outcomes and evidence of continuous improvement.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Training Packages, including the content of Training Packages relevant to the learning strategy
- accredited courses and the similarities and differences between them and the skill sets, or qualifications, within training packages
- NVR/AQTF requirements for Registered Training Organisations (RTOs) in terms of their effect on the design, and development, of learning strategies
- The Australian Qualifications Framework (AQF) including:
 - key features of each qualification type
 - AQF pathways policy including credit transfer
- industry and enterprise requirements, including:

- those relevant to the learning strategy
- industry licensing arrangements, where relevant
- the main branches of learning theory incorporating behavioural learning theory, cognitive learning theory, experiential learning theory, information processing theory and current research on learning, as it relates to teaching in an adult environment
- assessment approaches, including:
 - the basis and rationale for different assessment methods appropriate to the learning strategy.
 -

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to NVR/AQTF requirements for RTOs.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES502 Design and develop learning resources

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to design, and develop resources to support the learning process.

It applies to those who use a range of specialised technical or managerial skills, to develop learning resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research the learning resource requirements	1.1 Clarify with the client the brief, focus and type of learning resource 1.2 Research the target audience, their learning needs and the learning environment for the resource 1.3 Gather, collate and analyse relevant existing information 1.4 Identify any ethical and legal considerations and act on them 1.5 Write a development work plan

ELEMENT	PERFORMANCE CRITERIA
2. Design the learning resource and plan the content	<p>2.1 Generate a range of design options using a variety of techniques</p> <p>2.2 Develop and confirm with the client an outline or prototype for the learning resource</p> <p>2.3 Analyse content specifications of the learning product and map out proposed content</p>
3. Develop the learning resource content	<p>3.1 Develop content and content specifications in accordance with the agreed design</p> <p>3.2 Establish mechanisms for reviewing work-in-progress</p> <p>3.3 Ensure any text is clear, concise, grammatically correct and appropriate for the intended audience</p> <p>3.4 Ensure any visuals are relevant, instructive and appropriate for the intended audience</p>
4. Review learning resource prior to implementation	<p>4.1 Check resource content to ensure the accuracy and relevance of information against specifications</p> <p>4.2 Check text, format and visual design for clarity and focus</p> <p>4.3 Conduct an external review using appropriate review methods and incorporate feedback</p> <p>4.4 Review final draft against the brief and other relevant criteria to ensure it meets all requirements prior to delivery to the client</p>
5. Evaluate the design and development process	<p>5.1 Review the design and development process against appropriate evaluation criteria</p> <p>5.2 Reflect on the development process and methods and identify areas for improvement</p> <p>5.3 Document identified improvements for future projects</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 2.3, 3.1, 3.3, 3.4,	<ul style="list-style-type: none"> Sources, analyses and interprets text-based information to identify relevance to requirements

	4.1, 4.2, 4.3, 4.4, 5.1	<ul style="list-style-type: none"> Checks learning materials for accuracy, relevance, clarity and focus
Writing	1.1, 1.5, 2.1, 2.2, 2.3, 3.1, 3.3, 4.3, 5.2, 5.3	<ul style="list-style-type: none"> Produces learning materials that are clear, concise, grammatically correct and appropriate for the intended audience Produces documents in a format and structure appropriate for audience and context
Oral Communication	1.2, 1.4, 3.2, 4.3	<ul style="list-style-type: none"> Uses appropriate communication to clarify requirements, elicit information and review materials
Navigate the world of work	1.4	<ul style="list-style-type: none"> Identifies, confirms and takes responsibility for adherence to legal and ethical requirements
Interact with others	1.1, 2.2	<ul style="list-style-type: none"> Recognises the importance of consultation and negotiation, while collaborating to confirm strategy and achieve required outcomes
Get the work done	1.1-1.5, 2.1-2.3, 3.1-3.4, 4.1-4.4, 5.1-5.3	<ul style="list-style-type: none"> Plans, organises and completes work according to defined requirements, taking responsibility for decisions Sequences tasks to achieve efficient outcomes and monitors progress Seeks feedback and identifies, and responds to problems and opportunities for improvement, and considers options for different or improved approaches

Assessment Requirements for TAEDES502 Design and develop learning resources

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- researching, designing and developing two print based resources that reflect client needs and the contexts of application, with documented evidence of:
 - consultation with clients, research and findings
 - completed designs for the two resources
- completed development of one resource, with documented evidence of:
 - a review and trial of the resource, including user feedback and how this impacted on the development of the resource
 - the final print-based resource, either complete, or in part, or a sample
 - the candidate's specific role in the development process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the principles, theories and contemporary practices of instructional design
- the main branches of learning theory incorporating behavioural learning theory, cognitive learning theory, experiential learning theory, information processing theory and current research on learning, as it relates to teaching in an adult environment
- language, literacy and numeracy (LLN) issues, including:
 - requirements of the target audience
 - using the Australian Core Skills Framework (ACSF) as a framework to aid instructional design
- legal, organisational and ethical responsibilities associated with the assessment system, including:
 - maintaining client privacy and confidentiality

- providing accurate information
- duty of care under common law
- compliance with NVR/AQTF requirements
- copyright and its effect on the design, and development of learning resources.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES503 Design and develop e-learning resources

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to design and develop e-learning resources.

It applies to those who work under limited supervision and use a range of specialised technical or managerial skills, to develop e-learning resources.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Determine the scope and research the e-learning resource	1.1 Clarify the brief and focus for the e-resource with the client 1.2 Research the likely target audience for the e-resource, their characteristics and learning needs 1.3 Read, interpret and analyse existing relevant information, to determine the learning content for an e-learning resource 1.4 Determine the suitability of an e-learning resource for the likely target audience 1.5 Identify any ethical and legal considerations

ELEMENT	PERFORMANCE CRITERIA
	1.6 Document findings of the research
2. Design the e-learning resource	<p>2.1 Use knowledge and experience in learning theory and instructional design, to create the design for the e-learning resource</p> <p>2.2 Plan resources, materials and technical requirements needed for development of the e-learning resource based on the design of the e-learning resource</p> <p>2.3 Present and discuss the design with the client, and obtain further feedback of the e-learning resource</p> <p>2.4 Incorporate feedback and address any additional issues in the design</p> <p>2.5 Confirm with client the design to be developed into the e-learning resource</p>
3. Develop the e-learning resource	<p>3.1 Identify the relevant people to collaborate with on the development of the e-learning resources</p> <p>3.2 Determine the timelines and resource issues for the production of the e-learning resource</p> <p>3.3 Consult and use relevant technical guidelines and requirements</p> <p>3.4 Address any identified legal or ethical obligations, or issues that arise in the development of the e-learning resource</p> <p>3.5 Develop content and technical framework of the e-learning resources, and address any issues as they arise with relevant persons</p> <p>3.6 Document the development of the e-learning resource</p>
4. Review, trial and evaluate the e-learning process	<p>4.1 Review the e-learning resource against the client brief, likely target audience and learning needs</p> <p>4.2 Plan for the trial of the e-learning resource with potential users</p> <p>4.3 Trial the resource with appropriate recording of outcomes and feedback</p> <p>4.4 Analyse outcomes and feedback of the trial</p> <p>4.5 Make adjustments to finalise the e-learning resource</p> <p>4.6 Discuss and reflect on production of the e-learning resource</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 1.5, 2.2, 3.2, 3.3, 3.4, 4.1, 4.4	<ul style="list-style-type: none"> Sources, analyses and interprets text-based information, including technical standards, learning theories, organisational policies and procedures, learner information, and review data to inform development of resources
Writing	1.6, 2.1, 2.4, 3.2, 3.5, 3.6, 4.2, 4.3, 4.5	<ul style="list-style-type: none"> Produces e-learning material that incorporates an analysis of research, and meets the needs of a specific audience, context and medium Produces supporting documentation in an appropriate style and format
Oral Communication	1.2, 1.5, 2.3, 3.1, 4.1, 4.2, 4.6	<ul style="list-style-type: none"> Uses appropriate communication techniques to explore client requirements, present and discuss ideas and feedback, consult
Numeracy	3.2	<ul style="list-style-type: none"> Structures timeframes to represent a sequence of events Costs resources as appropriate Works with technical information
Navigate the world of work	1.5, 3.4	<ul style="list-style-type: none"> Identifies, confirms and takes responsibility for adherence to legal and ethical requirements
Interact with others	1.1, 2.5, 3.3	<ul style="list-style-type: none"> Recognises the importance of consultation and negotiation, while collaborating to confirm the strategy, and achieve required outcomes
Get the work done	1.1-1.6, 2.1-2.5, 3.1-3.6, 4.1-4.6	<ul style="list-style-type: none"> Plans, organises and completes work according to defined requirements, taking responsibility for decisions Sequences tasks and establishes timelines to achieve efficient outcomes and monitors progress Seeks feedback and identifies and responds to problems and opportunities for improvement and considers options for different or improved approaches Uses information and communications technology (ICT) based tools to conduct research, assess specifications and complete work tasks

Assessment Requirements for TAEDES503 Design and develop e-learning resources

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- to research, design and develop two e-learning resources that reflect client needs and the contexts of application, including:
 - documented evidence of consultation, research and findings
 - completed designs for the two resources
- completed development of one resource, with documented evidence of:
 - a review and trial of the resource, including user feedback and how this impacted on the development of the resource
 - the final e-learning resource, either complete, or in part, or a sample
 - the candidate's specific role in the development process.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the characteristics of the intended learner group or audience that may impact on learning, including:
 - language, literacy and numeracy competency
 - cultural, educational and other backgrounds
 - attributes or experience
- current and emerging technologies available for e-resources
- project management methodology to ensure the design and development meets requirements of budget, time, resources and administration
- the principles around effective learning using technology, including multiple perspectives, opportunity for reflection and collaborative learning, and the variety and organisation of information

- concepts of intellectual property and related legal requirements
- a range of e-learning environments and products, and their suitability for different learning outcomes and audiences
- design models and technical requirements for e-learning resources

how design models and technical resources affect learning.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to an e-learning environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES504 Research and develop units of competency

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to research, and develop units of competency to address work functions and processes, work roles and work-related vocational outcomes.

It applies to those who work under limited supervision and use a range of specialised analytical or managerial skills, in researching and developing units of competency.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Interpret requirements and research competency area	1.1 Clarify with the client, the purpose and scope for developing the unit of competency 1.2 Identify and confirm with relevant people, the systems and processes necessary to manage the development of the unit of competency 1.3 Conduct initial research in the defined scope to identify relevant information to the unit of competency

ELEMENT	PERFORMANCE CRITERIA
	1.4 Analyse work role using a variety of research methods 1.5 Establish an overview of the factors necessary to competently perform work functions 1.6 Confirm research outcomes with relevant people
2. Draft the unit of competency	2.1 Access and interpret relevant guidelines to format and structure, the unit of competency 2.2 Use the research outcomes and relevant guidelines to draft the unit of competency in the required format 2.3 Draft a consistent and accessible unit of competency using plain English and technical language appropriate to the audience 2.4 Confirm the draft unit of competency with relevant people
3. Validate the unit of competency	3.1 Plan and write a comprehensive consultation process to review, validate and obtain feedback on the draft unit of competency 3.2 Review the consultation process 3.3 Conduct the consultation process with relevant stakeholders 3.4 Collate and analyse feedback from the consultation process, and modify the draft unit of competency to address any issues raised 3.5 Document the consultation process and outcomes 3.6 Conduct further consultation if necessary, and any further modifications to the draft unit of competency 3.7 Confirm findings with relevant stakeholders
4. Finalise the unit of competency	4.1 Ensure the draft unit of competency includes all relevant changes and the draft meets all requirements 4.2 Consider and address any final issues in the draft unit of competency, and deliver to the client 4.3 Evaluate and reflect upon the development process to identify and make improvements

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance	Description
-------	-------------	-------------

	Criteria	
Learning	4.3	<ul style="list-style-type: none"> Reflects, seeks feedback and undertakes review activities to build own knowledge in order to improve
Reading	1.2, 1.3, 1.4, 2.1, 3.2, 3.4, 4.1, 4.2	<ul style="list-style-type: none"> Sources, analyses and interprets written texts, including research material, job role specifications, standards and organisational policies and procedures, to identify information relevant to units of competency and continuous improvement
Writing	1.1, 1.2, 1.5, 1.6, 2.2, 2.3, 2.4, 3.1, 3.3, 3.4, 3.5, 3.6, 3.7, 4.2, 4.3	<ul style="list-style-type: none"> Structures content and documents in a precise and logical manner that incorporates the interpretation and analysis of information various sources using language, format and style appropriate to a specific audience and context
Oral Communication	1.3, 1.4, 4.3	<ul style="list-style-type: none"> Leads communication using appropriate techniques to provide and elicit information, confirm understanding, explore client requirements and describe recommendations and improvements effectively and appropriately
Interact with others	1.1, 1.2, 1.6, 2.4, 3.3, 3.6, 3.7	<ul style="list-style-type: none"> Recognises the importance of consultation and collaboration, to clarify and confirm strategy and receive and incorporate feedback
Get the work done	1.1-1.6, 2.1-2.4, 3.1-3.7, 4.1-4.3	<ul style="list-style-type: none"> Plans, organises and completes work according to defined requirements, taking responsibility for decisions Seeks feedback, reflects and identifies and responds to problems and opportunities for improvement and considers options for different or improved approaches

Assessment Requirements for TAEDES504 Research and develop units of competency

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- to research, plan and draft three units of competency, and their associated assessment requirements, with consultation and review processes for each unit
- provide the draft units of competency that meet format requirements, each with a written report detailing:
 - discussions with the client to clarify the scope, and purpose of the unit of competency
 - research undertaken, including methods and outcomes
 - consultation process and feedback
 - changes made to the unit of competency as a result of the consultation process.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- training package development and implementation
- current Standards for Training Packages and any related guidelines
- the roles of Industry Skills Councils (ISCs) and the National Skills Standards Council (NSSC) in relation to the development and endorsement of Training Packages
- who to collaborate with in order to obtain information about competency standards and their development, including:
 - ISCs
 - employer organisations and unions
 - professional bodies
 - other developers
 - the training package quality assurance panel

- trainers
- facilitators and assessors
- relevant workplace health and safety (WHS) knowledge relating to the work role, and WHS considerations that need to be included in the content of competency standards.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to Standards for Training Packages.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEDES505 Evaluate a training program

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to evaluate a training program, by measuring the effectiveness of training in meeting workforce performance needs and capability requirements.

In a NVR/AQTF context it can contribute to the continuous improvement cycle within a registered training organisation (RTO).

It applies to those who have responsibility for delivery and assessment strategies in the training programs of an organisation.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Learning design

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Plan and prepare evaluation	1.1 Document the aim and scope of the evaluation study 1.2 Identify the data and information required, and access sources of information 1.3 Establish a project plan and timelines that identify tasks and

ELEMENT	PERFORMANCE CRITERIA
	stakeholders in the evaluation process 1.4 Select and brief staff to be involved 1.5 Establish constructive relationships with the stakeholders identified in the evaluation plan
2. Collect and collate evaluation data and information for a training program	2.1 Identify the most appropriate technique(s) for gathering quantitative and qualitative data and information 2.2 Develop evaluation instruments to gather data and information 2.3 Arrange workplace visits and meetings, and access to data and information 2.4 Collect data and information, and store in compliance with the record keeping and privacy policies and procedures of the organisation 2.5 Identify and record potentially useful information that is not identified in the evaluation plan 2.6 Collate and process data relevant to the evaluation
3. Analyse evaluation data and information and make conclusions	3.1 Analyse the data and information to identify the outcomes of training, and their impact on workforce capability 3.2 Cross-check findings where possible by comparing with the results from different evaluation instruments 3.3 Develop conclusions about the effectiveness and efficiency of the training program, as per the evaluation aim and scope 3.4 Document areas of training that are satisfactory and those requiring improvement 3.5 Identify factors affecting performance and suggest possible enhancements or alternatives to the training program
4. Report on the conclusions and recommendations of the evaluation	4.1 Document issues and conclusions arising from the analysis conducted 4.2 Make recommendations to stakeholders on areas of possible improvement 4.3 Discuss preliminary findings with stakeholders 4.4 Produce an evaluation report and distribute to all stakeholders

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.2, 2.1, 2.4 2.5, 2.6, 3.1, 3.2, 3.3	<ul style="list-style-type: none"> • Sources and analyses text-based information to identify relevance to requirements • Interprets written and numeric information to draw conclusions and to inform decision making
Writing	1.1, 1.3, 2.1, 2.2, 2.5, 2.6, 3.1, 3.3, 3.4, 3.5, 4.1, 4.2, 4.4	<ul style="list-style-type: none"> • Produces documentation including a project plan, evaluation instruments, data reports, project reports, and evaluations, in a logical and concise manner that incorporates the analysis of information and the development of conclusions and recommendations, using language, format and style appropriate to a specific audience and context
Oral Communication	1.4, 2.3, 2.4, 4.2, 4.3	<ul style="list-style-type: none"> • Uses appropriate communication techniques to provide and elicit information, confirm understanding, explore client requirements and discuss findings
Numeracy	1.2, 1.3, 2.1, 2.2, 2.5, 2.6, 3.1, 3.2, 4.1, 4.4	<ul style="list-style-type: none"> • Collates, interprets and compares numerical and statistical information to apply relevance to requirements
Navigate the world of work	2.4	<ul style="list-style-type: none"> • Follows organisational protocols, policies and procedures regarding program evaluation
Interact with others	1.5	<ul style="list-style-type: none"> • Recognises the importance of consultation and collaboration to build rapport, clarify and confirm strategy and receive and incorporate feedback
Get the work done	1.1-1.5, 2.1-2.6, 3.1-3.5, 4.1-4.4	<ul style="list-style-type: none"> • Plans, organises and completes work according to defined requirements taking responsibility for decisions • Sequences tasks to achieve efficient outcomes and identifies appropriate process milestones and evaluation processes to assess program effectiveness • Seeks feedback and identifies and responds to problems and opportunities for improvement and considers options for different or improved approaches

Assessment Requirements for TAEDES505 Evaluate a training program

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- evaluating one training program against workforce performance needs and capability requirements
- producing an evaluation report that addresses all phases of the evaluation process including recommendations on areas for improvement
- critically reviewing the evaluation process and approaches taken and propose changes to improve the process.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- Training Packages and accredited courses, and what comprises quality training and assessment services
- the terminology relating to quality evaluation processes
- a range of evaluation models/methods, including the Kirkpatrick Model
- security of information and confidentiality requirements in relation to evaluation
- different methodologies for evaluation, and when qualitative and quantitative measures are most useful.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to the full details of the training program to be evaluated.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEICR501 Work in partnership with industry, enterprises and community groups

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to work in partnership with industry, enterprises and community groups to provide a range of learning and development services. It covers preparing for the partnership as well as negotiating, implementing, maintaining, evaluating and reviewing the partnership arrangement.

It applies to individuals within a Registered Training Organisation (RTO) who are planning to work in partnerships, or who are already working in partnership, with an organisation such as an industry group, enterprise or community group, to provide a learning and development service, or related service.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Industry and community relations

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for partnership with the organisation	1.1 Determine RTO readiness for engagement with the partner organisation, in line with the RTO's strategic plan 1.2 Identify skills needed by RTO staff to work effectively with the organisation, as determined by the requirements of the

ELEMENT	PERFORMANCE CRITERIA
	<p>organisation</p> <p>1.3 Conduct an RTO skills analysis to determine if the RTO staff have the required skills, or need further development prior to engaging with the organisation</p>
<p>2. Negotiate the partnership</p>	<p>2.1 Identify and set objectives for the partnership, in line with the strategic direction and plan of both the RTO and the partner organisation</p> <p>2.2 Determine and act on the likely strengths and weaknesses, opportunities and threats of the partnership arrangement</p> <p>2.3 Come to a common agreement with the organisation about the services and responsibilities of the RTO and the organisation</p> <p>2.4 Analyse resources needed for the partnership arrangement, and determine what resources each party will be contributing to the partnership</p> <p>2.5 Facilitate the drawing up and signing of a contract, or agreement, by appropriate personnel in both organisations</p>
<p>3. Implement the partnership</p>	<p>3.1 Design organisational processes in consultation with the relevant RTO and the partner organisation's personnel</p> <p>3.2 Establish reporting and recordkeeping processes in accordance with the RTO and the organisation's requirements</p> <p>3.3 Set the parameters for quality assurance of the service offered to the organisation</p> <p>3.4 Develop a learning and development strategy in consultation with the relevant RTO and the organisation's personnel</p> <p>3.5 Contextualise the learning and development service as required by the organisation</p> <p>3.6 Provide the learning and development service required by the organisation</p>
<p>4. Maintain the partnership</p>	<p>4.1 Use appropriate communication and interpersonal skills to develop, and maintain, a professional relationship with the partner organisation</p> <p>4.2 Provide support for own staff when providing the service to the organisation</p> <p>4.3 Encourage the organisation to provide support for their own staff when undergoing training, development and assessment</p>
<p>5. Evaluate and review the partnership</p>	<p>5.1 Evaluate the participants' reaction to the learning and development service</p>

ELEMENT	PERFORMANCE CRITERIA
	<p>5.2 Evaluate the development in terms of the application of new skills, knowledge and attitude to the workplace</p> <p>5.3 Analyse the changes the learning and development service has made to the partner organisation</p> <p>5.4 Set up review criteria, and review the partnership arrangement, in consultation with the organisation</p> <p>5.5 Use evaluation and review processes to make suggestions for improving existing and future partnership arrangements, and report to relevant personnel</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	3.4, 3.6	<ul style="list-style-type: none"> Reflects on skills and knowledge of others, to seek opportunities for learning, development and improvement
Reading	1.1, 1.2, 2.1, 2.4, 5.1, 5.2, 5.3	<ul style="list-style-type: none"> Identifies, analyses and interprets written information presented in a variety of formats to identify relevance to requirements
Writing	1.3, 2.1, 2.2, 2.5, 3.1, 3.2, 3.3, 3.4, 3.5, 4.1, 5.4, 5.5	<ul style="list-style-type: none"> Prepares appropriate documentation in a detailed and logical manner using language, format and style appropriate to a specific audiences
Oral Communication	2.3, 4.1, 5.5	<ul style="list-style-type: none"> Leads communication to effectively provide and elicit information, confirm understanding, explore partner requirements, maintain relationships, support staff and clients
Navigate the world of work	2.3, 2.5, 3.1, 3.2	<ul style="list-style-type: none"> Facilitates the development of organisational goals, roles and responsibilities Facilitates the development and implementation of contracts or agreements
Interact with others	3.1, 3.4, 5.4	<ul style="list-style-type: none"> Recognises the importance of consultation and negotiation, while collaborating to achieve required outcomes
Get the work	1.1-1.3, 2.1-2.5,	<ul style="list-style-type: none"> Organises and completes work according to defined requirements, taking responsibility for decisions and

done	3.1-3.6, 4.2, 4.3, 5.1-5.5	<p>sequencing tasks to achieve efficient outcomes</p> <ul style="list-style-type: none"> • Uses systematic, analytical processes in complex, routine and non-routine situations gathering information and identifying and evaluating options based on organisational needs • Uses information and communications technology (ICT) based tools to design work processes, manage data and records and to complete work tasks

Assessment Requirements for TAEICR501 Work in partnership with industry, enterprises and community groups

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- developing and maintaining key aspects of a partnership between a Registered Training Organisation (RTO) and at least one organisation, including:
 - preparing for a partnership with an organisation
 - negotiating the partnership
 - implementing the partnership
- maintaining the partnership, including consulting and discussing issues with the organisation's personnel
- evaluating and reviewing the partnership.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- features of effective partnerships between RTOs and industry, enterprises and community groups
- the methods used to learn about:
 - the organisation's business and complexity
 - the organisation's services and/or products
 - emerging technologies, and trends, in the industry area that may affect the organisation's operations
- features of the partner organisation, including:
 - the purpose of the organisation, its strategic direction and plans
 - staffing numbers and organisational structure
 - reporting and recordkeeping requirements

- any policies and procedures relevant to the partnership, including quality, and workplace health and safety (WHS) procedures
- the importance of responding to the client organisation's needs efficiently and effectively
- training and assessment practices and procedures, including:
 - how the customisation of units of competency, resources and assessment tasks can be undertaken to meet organisational needs.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to the RTO's policy in relationship to partnerships with external organisations.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAELLN411 Address adult language, literacy and numeracy skills

Modification History

Release	Comments
Release 1	This unit of competency first released with <i>TAE Training and Education Training Package Version 1.0</i> .

Application

This unit describes the skills and knowledge a vocational trainer or assessor requires to identify language, literacy and numeracy (LLN) skill requirements of training and the work environment, and to use resources and strategies that meet the needs of the learner group.

The unit applies to individuals who teach, train, assess and develop resources.

Competence in this unit does not indicate that a person is a qualified specialist adult language, literacy or numeracy practitioner.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Language, literacy and numeracy practice

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse LLN requirements	1.1 Determine LLN skill requirements of the training specification 1.2 Identify and analyse the LLN skill requirements essential to workplace performance

	1.3 Determine the LLN skills of the learner group from validated tools and other sources
2. Select and use resources and strategies to address LLN skill requirements	2.1 Identify resources to support LLN skill development 2.2 Use learning and assessment materials to support identified LLN requirements, customising where necessary 2.3 Apply learning support strategies in training delivery appropriate to LLN requirements and learner group 2.4 Determine assessment strategies appropriate to LLN requirements and learner group
3. Use specialist LLN support where required	3.1 Review course demands and learner profile to determine if specialist LLN support is required 3.2 Access specialist LLN support where available 3.3 Integrate specialist LLN support into training or assessment practice where required
4. Evaluate effectiveness of learning support and assessment strategies in addressing LLN requirements	4.1 Seek feedback on learning support provided and assessment strategies used 4.2 Evaluate learning support and assessment strategies used 4.3 Determine areas for improvement based on evaluation

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 2.1, 2.2, 3.1	<ul style="list-style-type: none"> Analyses training specifications, training materials, LLN specific resources and validated tools based on the Australian Core Skills Framework (ACSF) Interprets information from enrolment records and pre-training assessments
Oral Communication	2.3, 3.2, 3.3, 4.1	<ul style="list-style-type: none"> Uses appropriate language with consideration to vocabulary, tone and pace to talk with learners and other vocational education and training (VET) colleagues

		<ul style="list-style-type: none"> Uses language that demonstrates cultural sensitivity and builds and maintains understanding and rapport
Interact with others	3.2, 4.1	<ul style="list-style-type: none"> Collaborates with colleagues and support specialists to design and implement effective learning strategies Considers how others should be involved, often using consultative or collaborative processes when evaluating practice
Get the work done	2.1, 3.2, 3.3, 4.1, 4.2, 4.3	<ul style="list-style-type: none"> Uses formal and informal processes to monitor implementation of solutions and reflect on outcomes

Unit Mapping Information

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=35337905-785d-4f93-8777-e9991ad4c6c3>

Assessment Requirements for TAELLN411 Address adult language, literacy and numeracy skills

Modification History

Release	Comments
Release 1	This unit of competency first released with <i>TAE Training and Education Training Package Version 1.0</i> .

Performance Evidence

Evidence of the ability to:

- use tools to identify the LLN skill requirements (reading, writing, speaking, listening and numeracy) of the training specification and/or assessment process relevant to vocational delivery
- use various sources to gather information on the current LLN skills of a learner group
- identify available sources of support to address at least two of the identified LLN skill needs of the learner group
- customise and use at least two learning resources to address LLN requirements
- select, use and review at least two instructional strategies that directly address the identified LLN needs of the learner group
- use advice from specialist LLN practitioners to inform practice
- select, use and review at least two assessment strategies that cater for the identified LLN needs of the learner group
- determine areas for improvement of own practice.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- specify the critical LLN skills essential to workplace performance in an identified industry or sector
- identify cultural and social sensitivities relevant to communicating with individuals who are identified as requiring LLN support

- identify sources of resources, strategies and LLN support available in own training organisation and procedures for accessing them
- explain techniques for evaluating own training and assessment practice.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- texts and tasks typically found in the workplace
- specialist LLN practitioners for consultation and verification of approaches
- training and assessment tools based on the ACSF levels
- training package support materials
- workplace-specific tools, equipment, materials and industry software packages (where applicable).

Skills must be demonstrated with real vocational learners.

Assessors must satisfy NVR/AQTF assessor requirements.

TAELLN412 Access resources and support to address foundation skills in vocational practice

Modification History

Release	Comments
Release 1	This unit of competency first released with <i>TAE Training and Education Training Package Version 1.0</i> .

Application

This unit describes the skills and knowledge that vocational trainers and assessors need to access resources, which include collaboration with foundation skills specialists, in order to integrate foundation skills into a vocational training program.

The unit applies to individuals who teach, train, assess and develop training and assessment resources.

Competence in this unit does not indicate that a person is a qualified specialist adult language, literacy or numeracy practitioner.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Language, literacy and numeracy practice

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify resourcing needs for effective delivery and assessment of	1.1 Identify key areas where foundation skills are critical to vocational competence 1.2 Use formal frameworks and validated tools to identify

foundation skills	<p>learner profile and potential barriers for learning</p> <p>1.3 Review the training plan to identify underpinning foundation skills that will require explicit instruction or attention in assessment</p> <p>1.4 Determine strategies in own repertoire that address the required foundation skills development</p> <p>1.5 Identify areas within own vocational practice where support is required to address foundation skills</p>
2. Research suitable resources to address foundation skills in vocational practice	<p>2.1 Review the available resources to address foundation skills delivery</p> <p>2.2 Identify resources which address foundation skills relevant to learner needs</p> <p>2.3 Identify sources of specialist advice to enhance own vocational practice</p>
3. Source and use resources and support	<p>3.1 Make arrangements to secure suitable resources and specialist input according to organisational operating procedures and processes</p> <p>3.2 Collaborate with VET colleagues to incorporate solutions into planning instructional strategy and assessment design</p> <p>3.3 Where appropriate, participate in collaborative activities to address foundation skills</p>
4. Evaluate own performance in supporting foundation skills development	<p>4.1 Build a personal record of resources and strategies that support learners' foundation skills development and vocational competence</p> <p>4.2 Seek feedback on approaches used to support foundation skills</p> <p>4.3 Access opportunities for improving own practice and use of resources and advice</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
-------	----------------------	-------------

Learning	1.1, 1.4, 2.3, 4.3	<ul style="list-style-type: none"> Analyses own vocational practice and degree to which foundation skills are being addressed Uses strategies to identify and access suitable resources, such as networking, web searching and contacting relevant organisations
Reading	1.1, 1.2, 1.3, 2.1	<ul style="list-style-type: none"> Reads training specifications and frameworks to select information relevant to foundation skills Reviews a range of training and education support documents and relevant research Evaluates resources to determine their applicability for use in training sequence design and implementation
Writing	3.2, 4.1	<ul style="list-style-type: none"> Keeps records of useful resources and how they might be used Incorporates solutions into training plans, teaching resources and assessments
Oral Communication	3.2, 3.3	<ul style="list-style-type: none"> Uses effective communication for instructional techniques, e.g. questioning, staging to convey critical foundation skills concepts
Numeracy	1.1, 1.2, 1.3, 2.1, 2.2, 4.2, 4.3	<ul style="list-style-type: none"> Identifies appropriate numeracy information from training specifications Uses numeracy concepts relevant to vocational competency in learning materials Identifies own numeracy knowledge gaps and seeks support where required
Navigate the world of work	3.1	<ul style="list-style-type: none"> Recognises and responds to workplace protocols relating to procurement of support services
Interact with others	3.2, 3.3, 4.2	<ul style="list-style-type: none"> Consults and collaborates with colleagues to identify resourcing solutions and implement integrated programs Responds to and uses diverse perspectives in analysis of feedback
Get the work done	1.4, 1.5, 3.1, 3.2, 3.3, 4.2	<ul style="list-style-type: none"> Makes decisions about resource options after analysing availability and suitability for purpose Identifies possible barriers for learners and applies resource solutions Reviews outcomes of collaboration

		<ul style="list-style-type: none">• Uses technology skills for sourcing and storing appropriate resources

Assessment Requirements for TAELLN412 Access resources and support to address foundation skills in vocational practice

Modification History

Release	Comments
Release 1	This unit of competency first released with <i>TAE Training and Education Training Package Version 1.0</i> .

Performance Evidence

Evidence of the ability to:

- analyse a training specification to identify key areas where foundation skills are critical to vocational competence
- analyse training plans to identify where foundation skills will need to be addressed in training and assessment for at least two of the core skills (learning, reading, writing, oral communication, numeracy)
- access and use appropriate resources with learners to address at least two of the core skills (learning, reading, writing, oral communication, numeracy)
- identify and access specialist input required to support own vocational practice
- plan and implement instructional strategies and assessments that integrate foundation skills, in collaboration with vocational and foundation skills practitioners
- document successful training and assessment practices and resources
- participate in at least two professional development activities with a foundation skills focus.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- describe techniques for identifying foundation skills content that is central to vocational competence
- explain the use of tools that analyse training specifications and learner profiles, which must include the Australian Core Skills Framework (ACSF) and Core Skills for Work

- describe the foundation skills that are essential to workplace competence in a particular vocational context, focussing on at least two of the core skills (learning, reading, writing, oral communication, numeracy)
- describe ways in which foundation skills can be a barrier to the development of specific vocational competencies
- describe range of resources and strategies that facilitate successful integration of foundation skills into vocational practice
- explain the organisational operating procedures for securing suitable resources and specialist input
- outline techniques used to evaluate approaches and seek feedback.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- texts and tasks typically found in the workplace
- specialist LLN practitioners for consultation and verification of approaches
- training and assessment tools based on the ACSF levels
- training package support materials
- workplace-specific tools, equipment, materials and industry software packages (where applicable).

Assessors must satisfy NVR/AQTF assessor requirements.

TAELLN413 Integrate foundation skills into vocational training delivery

Modification History

Release	Comments
Release 1	This unit of competency first released with <i>TAE Training and Education Training Package Version 1.0</i> .

Application

This unit describes the skills and knowledge that vocational trainers need to identify the foundation skills requirements that are critical to vocational competence within a vocational training specification. It covers how to plan, design and address those requirements using integrated approaches.

The unit applies to individuals who teach, train and assess; and those who develop training and assessment resources.

Competence in this unit does not indicate that a person is a qualified specialist adult language, literacy or numeracy practitioner.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Language, literacy and numeracy practice

Elements and Performance Criteria

Elements	Performance Criteria
<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse foundation skills content critical to	1.1. Determine the foundation skills in the training specification that are essential to vocational competence 1.2. Interpret the level of identified language, literacy and

vocational competence	<p>numeracy (LLN) skills using formal frameworks and validated tools and other sources of information</p> <p>1.3. Establish how the LLN skills relate to the skills needed for employment</p> <p>1.4. Develop a foundation skills profile of the learner group</p>
2. Plan for integrated delivery	<p>2.1. Analyse instructional strategies relevant to the vocational context for use in addressing identified foundation skills</p> <p>2.2. Access specialist advice and support as necessary to guide selection of strategies for integrated delivery</p> <p>2.3. Plan the vocational training sequence, integrating the selected instructional strategies that explicitly address the foundation skills requirements of the training specification</p>
3. Implement integrated delivery	<p>3.1. Use instructional strategies relevant to the profile of the learner group</p> <p>3.2. Deliver training using selected instructional strategies to develop required foundation skills</p> <p>3.3. Build a personal record of successful training and assessment practices that support learners' foundation skills development and vocational competence</p>
4. Evaluate instructional strategies used	<p>4.1 review effectiveness of selected instructional strategies and adjust training and assessment strategies accordingly</p> <p>4.2 identify opportunities to improve planning process to strengthen integration of foundation skills into own training practice</p> <p>4.3 access opportunities for further professional development</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	2.1, 3.1, 4.1	<ul style="list-style-type: none"> Develops knowledge of a range of instructional strategies
Reading	1.1, 1.2, 2.1, 3.1	<ul style="list-style-type: none"> Identifies key information about foundation skills in training specifications Researches a range of instructional approaches relevant to adult learners in

		training and education literature and materials
Writing	2.3, 3.3	<ul style="list-style-type: none"> Keeps records of useful instructional approaches Prepares training sequences that address foundation skills
Oral Communication	3.1, 3.2	<ul style="list-style-type: none"> Uses appropriate language with consideration to vocabulary, tone and pace to talk with learners and other vocational education and training (VET) colleagues Uses language that demonstrates cultural sensitivity relevant to the profile of the learner group
Numeracy	1.1, 1.2, 1.3, 1.4	<ul style="list-style-type: none"> Uses numeracy concepts relevant to vocational competence in chosen instructional activities
Interact with others	2.2	<ul style="list-style-type: none"> Consults and collaborates to identify instructional activities suitable to the training and industry context
Get the work done	1.4, 2.1, 2.2, 2.3, 3.1, 3.2, 4.1	<ul style="list-style-type: none"> Analyses information from a range of sources in order to make judgements about the foundation skills profile of learners Experiments with instructional activities and evaluates their effectiveness

Assessment Requirements for TAELLN413 Integrate foundation skills into vocational training delivery

Modification History

Release	Comments
Release 1	This unit of competency first released with <i>TAE Training and Education Training Package Version 1.0</i> .

Performance Evidence

Evidence of the ability to:

- identify the foundation skills content in a training specification and its relationship to workplace competence
- use the Australian Core Skills Framework (ACSF) to interpret the level of LLN skills required for vocational competence in the training program
- analyse sources of information to create a foundation skills profile of the learner group
- identify at least two instructional strategies that are suitable for the foundation skills requirements of the learner group (covering at least two core skills from the ACSF)
- collaborate with specialist LLN practitioners and other vocational education and training (VET) colleagues to plan a training sequence (covering at least two core skills from the ACSF) which integrates instructional strategies that match the requirements of the training specification, learner group and vocational delivery context
- deliver the planned training sequence to a group of vocational learners
- check that the integrated strategies are addressing foundation skills requirements and make necessary adjustments to practice
- participate in at least two professional development activities with a focus on improving planning and delivery of integrated foundation skills delivery.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- explain how to identify foundation skills content within a training specification in a relevant vocational area
- list the foundation skills that are essential to workplace competence in a particular vocational context

- describe components of the Australian Core Skills Framework (ACSF) and Core Skills for Work relevant to analysing training and assessment materials, and explain how to use them when planning and implementing training
- describe at least two instructional strategies that address at least two foundation skills in vocational training
- explain the techniques used for evaluating own training and assessment practice
- outline sources of professional development focussed on foundation skills delivery.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment and include access to:

- texts and tasks typically found in the workplace
- specialist LLN practitioners for consultation and verification of approaches
- training and assessment tools based on the ACSF levels
- training package support materials
- workplace-specific tools, equipment, materials and industry software packages (where applicable).

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Application

This unit describes the skills and knowledge required to support adult learners to extend their language, literacy and numeracy skills within a workplace or community context. It requires a sound knowledge of the Australian Core Skills Framework (ACSF) and skills to extend own practice, and the practice of others.

This unit applies to experienced trainers who provide leadership or guidance to others, and who deal with the language, literacy and numeracy (LLN) needs of learners for a Registered Training Organisation (RTO).

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Language, literacy and numeracy practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Analyse the purpose and context for LLN	1.1 Analyse the LLN requirements of the training specification or

ELEMENT	PERFORMANCE CRITERIA
development	learning situation, using the ACSF 1.2 Analyse the LLN requirements of the training context
2. Determine learners' LLN skill level	2.1 Identify each learner's LLN background 2.2 Identify factors or potential barriers that may affect the learner's development of LLN skills 2.3 Determine the learner's existing LLN skill level, using relevant tools and other approaches, including validated ACSF assessment tasks
3. Design and apply strategies to develop LLN skills	3.1 Analyse the learner's strengths and needs, using the ACSF 3.2 Examine a range of strategies to develop reading, writing, speaking, listening and numeracy skills 3.3 Design training and assessment to build LLN skills, utilising the ACSF to describe the approach 3.4 Access relevant LLN resources 3.5 Modify resources to meet LLN needs, and in relation to context 3.6 Implement the program
4. Review strategies	4.1 Monitor learner progress 4.2 Seek support and feedback from colleagues, and LLN specialists, whenever required 4.3 Review strategies in terms of their effectiveness and the feedback received
5. Develop and extend own and others' LLN practice	5.1 Access, read and analyse current research on adult LLN practice and incorporate knowledge into practice 5.2 Source and access opportunities, to extend own and others' practice 5.3 Propose and implement improvements to LLN practice 5.4 Provide assistance and advice to less experienced trainers, and assessors in relation to LLN practice

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 2.1, 2.3, 3.1, 3.2, 3.5, 3.6, 4.1, 4.3	<ul style="list-style-type: none"> Sources, analyses and interprets, written and numerical information to identify relevance
Writing	2.3, 3.3, 3.6, 4.1, 4.3	<ul style="list-style-type: none"> Develops and maintains accurate documentation using language appropriate to the audience and context, including learning and assessment materials
Oral Communication	2.1, 2.2, 2.3, 4.1	<ul style="list-style-type: none"> Leads verbal exchanges using appropriate techniques to effectively provide and elicit information, and to facilitate learning
Numeracy	1.1, 1.2, 2.1, 2.3, 3.6, 4.1	<ul style="list-style-type: none"> Interprets and explains numerical information to inform numeracy skill assessment, and strategy development
Interact with others	3.3, 4.2	<ul style="list-style-type: none"> Collaborates, seeks feedback and shares knowledge, and experience, with others to confirm understanding and to develop improved practice
Get the work done	1.1, 1.2, 2.1-2.3, 3.1-3.6, 4.1-4.3	<ul style="list-style-type: none"> Plans, organises and completes work according to requirements, taking responsibility for decisions and sequencing tasks to achieve effective and efficient outcomes Identifies and responds to problems and opportunities for improvement, and considers options for different approaches

Assessment Requirements for TAELLN501 Support the development of adult language, literacy and numeracy skills

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor updates to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, including:

- determining language, literacy and numeracy (LLN) levels using validated tools, including those based on the Australian Core Skills Framework (ACSF), for at least 5 learners
- determining the requirements of training, based on the ACSF
- planning training and assessment that incorporates LLN support strategies relevant to at least two different learners, or groups of learners, in response the ACSF assessment and learners' goals
- reviewing own strategy, and strategies of others, used to support LLN
- leading others to extend practice.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the current function of LLN skills in Australian society, including how LLN skills impact on an individual's participation in work, education and the community
- LLN competence in Australia, according to recent research, such as surveys conducted by the Australian Bureau of Statistics
- the ACSF and how it can be used to describe the LLN requirements integral to vocational competence
- using the ACSF to design training and assessment programs appropriate to learner needs

- a variety of strategies and resources used to build LLN skills appropriate to vocational work
- how context affects language use, including:
 - how the choice of linguistic style is affected by roles and relationships
 - how levels of formality are affected by factors such as age, role and ethnicity
 - how meaning making relies on linking to context
 - how people may be more proficient in some contexts and less in others
- the variety of ways texts can be approached, depending on purpose of reader, for example skimming, scanning and critical analysis
- numeracy and language knowledge to the level of the numeracy and language being taught.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Noise levels, production flow, interruptions and time variances must be typical of those experienced in the language, literacy and numeracy practice field of work, and include access to the necessary assessment tools and assessment resources to:

- guide the evidence collection process
- provide guidance to the qualified assessor regarding any adjustments to the assessment tools.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAEPDD501 Maintain and enhance professional practice

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Application

This unit describes the skills and knowledge required to manage personal professional performance, and to take responsibility for professional development in relation to the provision of training and/or assessment services.

It applies to those who work under limited supervision using a range of management skills and are involved directly, or indirectly, in the provision of training and assessment services in a Registered Training Organisation (RTO).

No licensing, legislative or certification requirements apply to this unit at the time of publication

Unit Sector

Professional development

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Model high standards of performance	1.1 Incorporate individual responsibilities and accountabilities into personal work plans in accordance with organisational and legal requirements

ELEMENT	PERFORMANCE CRITERIA
	<p>1.2 Model appropriate professional techniques and strategies</p> <p>1.3 Apply ethical and inclusive practices in professional practice</p>
2. Determine personal development needs	<p>2.1 Assess own knowledge and skills against relevant benchmarks to determine development needs and priorities</p> <p>2.2 Seek input from other relevant personnel about own development needs and priorities</p> <p>2.3 Identify ways to update and maintain currency of vocational competency, and prepare a vocational currency plan</p> <p>2.4 Identify ways to update, and maintain, vocational education and training (VET) knowledge and skills, as well as trainer and assessor competence, and prepare a VET currency plan</p> <p>2.5 Combine the vocational currency plan and VET currency plan into an overall professional development plan</p>
3. Collaborate with peers in professional development	<p>3.1 Observe facilitators in facilitation practice and provide them constructive feedback</p> <p>3.2 Invite peers to observe and provide constructive feedback on own facilitation practices</p> <p>3.3 Interview assessors in relation to the judgements they make in their assessment practices, and provide them constructive feedback</p> <p>3.4 Invite peers to question own judgements in assessment practices, and provide constructive feedback</p>
4. Participate in professional development activities	<p>4.1 Select and implement development opportunities to support continuous learning and maintain currency of professional practice</p> <p>4.2 Participate in professional networks to support continuous learning and maintain currency of professional practice</p> <p>4.3 Engage in processes that include observing peers in training and assessment practices, and providing them with feedback</p> <p>4.4 Invite peers and others to observe, and provide feedback, on own training and assessment practices</p> <p>4.5 Use technology to maintain regular communication with relevant networks, organisations and individuals</p>
5. Reflect on and evaluate professional practice	<p>5.1 Research developments and trends impacting on professional practice and integrate information into work performance</p> <p>5.2 Use feedback from colleagues and clients to identify, and introduce, improvements in work performance</p> <p>5.3 Document professional development activities, learning and</p>

ELEMENT	PERFORMANCE CRITERIA
	planned changes in behaviours, in accordance with the organisation's systems and processes

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	2.1, 2.2, 2.3, 2.4, 3.1, 3.2, 3.3, 3.4, 4.1, 4.2, 4.3, 4.4, 5.1, 5.2	<ul style="list-style-type: none"> Reflects on skills and knowledge of self and others, to seek opportunities for learning, development and improvement Undertakes independent research to source information and data, interpreting and synthesising understanding specific to the professional development context
Reading	1.1, 2.1, 2.3, 2.4, 4.1, 4.5, 5.1, 5.2	<ul style="list-style-type: none"> Sources, analyses and interprets written information about learning, learning development and continuous improvement, to refine professional practice Analyses currency of material, relevance and authority of source
Writing	1.1, 2.1, 2.3, 2.4, 2.5, 3.1, 4.3, 4.5, 5.1, 5.3	<ul style="list-style-type: none"> Produces documentation, including work reports and plans, incorporating analysis of information and observations of practice, using the language, format and style appropriate to a specific audience and context
Oral Communication	2.2, 4.2, 4.3, 4.4, 4.5, 5.2	<ul style="list-style-type: none"> Leads verbal communication about ideas and feedback with individuals and groups to improve practice
Navigate the world of work	1.1, 5.3	<ul style="list-style-type: none"> Identifies and takes responsibility for adherence to organisational policies and procedures, and legal, and ethical requirements
Interact with others	3.1, 3.2, 3.3, 3.4	<ul style="list-style-type: none"> Collaborates, provides feedback and shares knowledge, and experience, with others to confirm understanding and to develop improved skills, knowledge and practice
Get the work done	1.1-1.3, 2.1-2.5, 3.1-3.4, 4.1-4.5, 5.1-5.3	<ul style="list-style-type: none"> Plans, organises and completes work according to requirements, taking responsibility for decisions and sequencing tasks to achieve effective and efficient outcomes Researches, identifies and responds to problems and

		<p>opportunities for improvement using systematic, analytical processes</p> <ul style="list-style-type: none"> • Uses information and communications technology (ICT) based tools to conduct research, complete work tasks, and maintain effective communication

Assessment Requirements for TAEPDD501 Maintain and enhance professional practice

Modification History

Release	Comments
Release 2	This was first released with <i>TAE Training and Education Training Package Release 2.1</i> . Minor update to Assessment Conditions.
Release 1	This version first released with <i>TAE Training and Education Training Package Release 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- modelling appropriate professional techniques and strategies
- enhancing own professional development plan
- identify, locate and use, current and credible references to inform professional practice
- identify three critical incidents related to the role as teacher/trainer, and document actions, and reflections on these incidents by making links to relevant theories
- networking and using technology to gain information and other support
- participating in professional development activities and maintain currency of skills and knowledge in the vocational education and training (VET) sector as well as vocational area
- documenting, reflecting and discussing with peers evidence of
 - feedback from at least 10 hours of facilitation practice
 - interviews with assessors covering at least the assessment of 10 candidates enrolled in VET programs.
-

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- organisational goals and objectives
- the organisational processes, procedures and opportunities relating to professional development

- continuous improvement techniques and processes, and their application
- the theories of professional development, including reflective practice as a technique for professional practice
- the relevant capability frameworks for VET practitioners and their application as guides to current, and future, skill development
- social and educational trends, and changes, impacting on the VET environment, including:
 - policy changes
 - technological changes
 - cultural and social changes
 - economic changes
- networks relevant to professional practice
- ethical and inclusive principles, and the practices associated with professional development
- the types and availability of development activities, and opportunities.
-

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAERES501 Apply research to training and assessment practice

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to undertake research into educational theory, and apply this research to improve current training and assessment practice.

It applies to those who need to develop skills in research in order to apply educational theory to improve current and future training, and assessment practice.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Research

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare a research brief relating to training and assessment practice	1.1 Identify the purpose of research to be conducted, according to the current and future needs of the organisation around training and assessment practice 1.2 Identify and report on rationale for research and proposed research procedures and the methodology to be used 1.3 Define activities to be undertaken in conducting the research, timeframe, resource required, and expected outcomes in line with organisational practice 1.4 Develop process and criteria to evaluate achievement of the

ELEMENT	PERFORMANCE CRITERIA
	<p>outcomes</p> <p>1.5 Prepare budget and timelines for the research, in line with organisational requirements and constraints</p> <p>1.6 Present research proposal to relevant personnel for approval, in line with organisational procedures</p>
2. Conduct research in training and assessment practice	<p>2.1 Manage and conduct research activities using effective techniques for project management, implementation and data collection</p> <p>2.2 Collect data, and record appropriate project activities, in line with the research proposal</p> <p>2.3 Analyse data obtained from the research in relation to its application, improving current and future training, and assessment practice</p>
3. Investigate and apply educational theory to the research	<p>3.1 Identify appropriate sources of information to identify relevant educational theory</p> <p>3.2 Apply appropriate educational theories to the outcomes of the training and assessment research</p> <p>3.3 Make recommendations for training and assessment development, and improvement, in line with the identified current and future needs of the organisation</p>
4. Report on the application of educational theory to training and assessment practice	<p>4.1 Prepare relevant documentation on research findings using academic referencing and citation protocols, for presentation to key personnel</p> <p>4.2 Make recommendations for action to improve current, and future, training and assessment practice, based on the research findings, and present to relevant personnel for approval</p> <p>4.3 Establish criteria to monitor and evaluate new practices, based on the research recommendations, and recommend monitoring and evaluation processes</p>
5. Review entire process	<p>5.1 Design a process to review the research procedures, methodologies, data collection, analysis and reporting</p> <p>5.2 Conduct the review in consultation with key personnel</p> <p>5.3 Make recommendations for further research based on the review</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Learning	1.2	<ul style="list-style-type: none"> Analyses information to determine the rationale and methodology supporting the research project
Reading	1.1, 1.2, 1.6, 2.1, 2.3, 3.1, 3.2, 5.2	<ul style="list-style-type: none"> Critically sources, comprehends, analyses and applies information from a range of sources, to inform research processes
Writing	1.2, 1.3, 1.4, 1.5, 1.6, 2.2, 3.3, 4.1, 4.2, 4.3, 5.1, 5.2, 5.3	<ul style="list-style-type: none"> Documents relationships between information and ideas, and conveys specific and structured information, and analysis, in a style appropriate to the purpose and audience
Oral Communication	1.1, 1.2, 1.6, 2.1, 3.3, 4.1, 4.2, 5.3	<ul style="list-style-type: none"> Participates in verbal exchanges of information, articulating ideas and conclusions using language suitable to audiences
Numeracy	1.3, 1.5, 2.1, 2.2, 2.3	<ul style="list-style-type: none"> Structures timeframes to represent a sequence of events Collates, interprets and records data as required
Navigate the world of work	1.6, 4.1	<ul style="list-style-type: none"> Identifies and takes responsibility for adherence to organisational procedures and protocols
Interact with others	5.2	<ul style="list-style-type: none"> Routinely consults to seek broad input into problem solving and decision making, and develops strategies to elicit ideas and views
Get the work done	1.1-1.6, 2.1-2.3, 3.1-3.3, 4.1-4.3, 5.1-5.3	<ul style="list-style-type: none"> Plans, organises and completes work according to requirements, taking responsibility for decisions and sequencing tasks to achieve effective and efficient outcomes Researches, identifies and responds to problems and opportunities for improvement, using systematic, analytical processes Uses information and communications technology (ICT) based tools to conduct research and complete work tasks

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- completing at least one research project that includes:
 - a research brief, including purpose of research, rationale, methodology, research activities, timeframe, resources required and expected outcomes
 - wide research into educational theory
 - analysis of data in relation to its application, to improving current and future training, and assessment practice
 - recommendations for action to improve current and future training, and assessment practice
 - criteria to monitor and evaluate new practices, based on research
- finalising one research report using academic referencing and citation protocols
- conducting a review of the research process with recommendations for future research.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the Australian Code for the Responsible Conduct of Research
- intellectual property protocols
- a range of relevant research methods
- the sources of information relevant to educational research

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAESUS501 Analyse and apply sustainability skills to learning programs

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to identify explicit, and embedded, sustainability skills within training packages and accredited courses, document, and apply requirements to learning programs and resources associated with the development of competence.

It applies to experienced practitioners responsible for the development and/or delivery of learning and assessment services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Sustainability practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Research sustainability skill requirements of an industry area	1.1 Identify sustainability issues and practices in relation to a specific industry area 1.2 Investigate current and emerging practices in relation to sustainability in the specific industry area 1.3 Evaluate various approaches to building these into training and assessment practice, and related services and resource

ELEMENT	PERFORMANCE CRITERIA
	development 1.4 Identify specialist sustainability practitioners, and seek advice as required
2. Determine sustainability skills relevant to training	2.1 Analyse and document relevant sustainability skills in the training specification 2.2 Identify potential or implicit sustainability skills in the training specification 2.3 Document these skills as part of the learning and assessment strategy
3. Customise program to incorporate sustainability skills	3.1 Select and customise, or develop, learning and assessment materials linked to the required sustainability skills, and appropriate for the training specification, and the training context 3.2 Document the customised program

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.4, 2.1, 2.2	<ul style="list-style-type: none"> Interprets written information relevant to the context Identifies, evaluates and applies information from a range of sources
Writing	2.1, 2.3, 3.1, 3.2	<ul style="list-style-type: none"> Documents factual information in specific and clear language Documents relationships between information and ideas in a style appropriate to the purpose and audience, using correct spelling, grammar and technical terms
Oral Communication	1.1, 1.2	<ul style="list-style-type: none"> Uses communication techniques to elicit and explore information and ideas Participates in verbal exchanges of information and ideas, using appropriate style and language
Interact with others	1.4	<ul style="list-style-type: none"> Collaborates with others seeking advice to achieve required outcomes
Get the work	1.1-1.4, 2.1-2.3, 3.1,	<ul style="list-style-type: none"> Plans, organises and completes work according to

done	3.2	<p>requirements, taking responsibility for decisions and sequencing tasks to achieve effective and efficient outcomes</p> <ul style="list-style-type: none"> • Researches and evaluates information, and uses findings to consider options for training and assessment resource development

Assessment Requirements for TAESUS501 Analyse and apply sustainability skills to learning programs

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- identifying sustainability skill issues in at least two different training products
- providing documentation setting out training products and learning strategies, that incorporate sustainability skills
- producing outlines of how those sustainability skills are to be incorporated into training and assessment approaches.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- sustainability for different contexts in which a variety of definitions can be used
- training package contents, including industry-specific approaches to identifying the sustainability skills within them
- national policy on sustainability, including specific policy in relation to the development of sustainability skills in the vocational education and training sector
- workplace health and safety (WHS) relating to the work role, including:
 - reporting requirements for hazards
 - sources of WHS information
 - WHS obligations of employers and employees, including supervisors.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to different training products to be analysed for sustainability skills.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAESUS502 Identify and apply current sustainability education principles and practice to learning programs

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to research, identify, evaluate and apply current sustainability education principles, and practice, to learning and teaching programs.

It applies to experienced practitioners responsible for the development and/or delivery of learning and assessment services.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Sustainability practice

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify effective learning and teaching principles and practices	1.1 Explore effective learning and teaching pedagogies, in education and training 1.2 Identify and critique the criteria for effective learning 1.3 Analyse and document the relationship between effective learning and teaching, and learner-centred change 1.4 Explore the place of values and worldviews in vocational education and training

ELEMENT	PERFORMANCE CRITERIA
	1.5 Document the nexus between effective learning and teaching, and institutional policies and programs
2. Research development of current sustainability education principles and practice	2.1 Investigate the historical development of education regarding sustainability, and education for sustainability 2.2 Identify current and emerging sustainability education principles and practices 2.3 Evaluate current and emerging, national and international, sustainability education strategies for best practice 2.4 Investigate the relationship between effective learning and teaching, and sustainability education and training 2.5 Articulate stages of embedding sustainability education into all learning and teaching programs
3. Apply current sustainability education principles and practice to learning program	3.1 Select and apply, or develop, learning and assessment materials utilising current best practice sustainability education principles, and practice appropriate for the training specification and training context 3.2 Investigate synergies and challenges of embedding sustainability education into learning and teaching programs 3.3 Document the customised program

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.1, 1.2, 1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 3.2	<ul style="list-style-type: none"> Critically organises, evaluates and applies information from a range of sources Interprets national and international strategy, and practice in relation to current and emerging trends, relevant to requirements Analyses complex sources of information that present differing viewpoints in order to refine an approach
Writing	1.2, 1.3, 1.5, 2.5, 3.1, 3.3	<ul style="list-style-type: none"> Documents relationships between information and complex ideas in a style appropriate to purpose and audience Produces reports and synthesises using a language that

		is appropriate to the purpose and audience
Oral Communication	1.1, 1.4, 2.2, 2.3, 2.4, 2.5, 3.2	<ul style="list-style-type: none"> • Uses communication techniques to elicit information and explore ideas •
Get the work done	1.1-1.5, 2.1-2.5, 3.1-3.3	<ul style="list-style-type: none"> • Plans, organises and completes work according to requirements, taking responsibility for decisions and sequencing tasks to achieve effective and efficient outcomes • Researches, analyses and evaluates information, and uses findings to consider options for training and assessment practice

Assessment Requirements for TAESUS502 Identify and apply current sustainability education principles and practice to learning programs

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- to identify, analyse and document, effective learning and teaching principles and practices from a wide range of sources
- to identify and evaluate best practice sustainability education principles, practices strategies from a wide range of sources (nationally and internationally), and document link with effective learning and teaching
- to document the relationship between effective learning and teaching, and sustainability education
- applying best practice sustainability education principles to at least one learning program documenting:
 - how the learning and assessment materials utilise current best practice
 - the synergies and challenges involved
 - the customised program.
 -

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- the characteristics of Education for Sustainability (EfS) including:
 - systems thinking
 - critical and reflective thinking
 - inter-disciplinarily and trans-disciplinarily approaches
 - experiential learning and real-life issues
 - reconnecting to a sense of place

- developing dialogue
- space for emergence
- learning for action
- reflection on learning (reflexivity)
- the campus as curriculum
- the definitions of sustainability education, including:
 - environmental education
 - education about sustainability
 - EfS
 - Education for Sustainable Development (ESD)
- the definitions of sustainability, and the different contexts in which a variety of definitions can be used
- international codes of practice for Education for Sustainability including:
 - the United Nations Decade of Education for Sustainable Development (2005-2014)
 - the Talloires Declaration
- the principles, and practices, for effective learning and teaching, including:
 - adult learning theory
 - constructivism
 - systems thinking
 - critical thinking and practice
 - participatory learning
 - experiential learning
 - student/learner-centred learning
 - multiple learning and teaching styles
 - empowerment of the learner
 - the teacher as mentor and facilitator
 - action research
 - transformative and translational learning
 - appreciative inquiry
 - collaborative learning and co-inquiry
 - problem-based learning
 - values education
- legislation, codes of practice and associated requirements including:
 - environmental legislation
 - Equal Employment Opportunity legislation
 - privacy legislation
 - organisational requirements
- the national policy on sustainability, including specific policy in relation to the development of sustainability skills in the vocational education and training sector, including:

- the National Green Skills Agreement 2009
- the National Action Plan for Education for Sustainability 2009 (Living Sustainably: the Australian Government's National Action Plan for Education for Sustainability)
- the Victorian Tertiary Education for Sustainability Strategy 2011
- training package contents, including industry-specific approaches to identifying sustainability skills within them
- ways of viewing EfS including:
 - the education we need to make the transition to a sustainable society
 - building people's capacity to innovate and implement solutions
 - what skills, knowledge, values and ethics we need for the transition ahead
 - what we need to know in order to live responsibly, and within the means of nature
 - the learning processes and institutional processes we need to support transformative living
 - transformative learning that integrates learning for being, knowing and doing
 - transforming teaching practice to support change for sustainability and challenging, and changing curriculum, pedagogy and assessment
 - empowering people of all ages to assume responsibility for creating a sustainable future.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAETAS401 Maintain training and assessment information

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to maintain the training and assessment information requirements of the organisation and other relevant bodies, including the timely dissemination of accurate information to learners on training and assessment services, and the recording, and reporting of training and assessment service data.

It applies to trainers, facilitators, assessors, and training and assessment consultants responsible for the establishment and maintenance of training and assessment information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Training advisory services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Provide initial and ongoing information, and advice on training and assessment services	1.1 Provide potential learners with relevant information about the range of training and assessment services provided by the training and/or assessment organisation 1.2 Explain specific program content and assessment requirements to learners, in a clear and concise manner 1.3 Confirm training schedule with relevant personnel and disseminate to learners

ELEMENT	PERFORMANCE CRITERIA
	1.4 Access, provide and explain relevant organisational policies and procedures relating to training and/or assessment services to learners according to organisational and legal requirements
2. Complete training and assessment records	2.1 Collect, verify and record personal learner information on learner records management system 2.2 Collect, verify and record details of the specific learning strategy and learning program on the learner records management system 2.3 Confirm and record relevant additional requirements 2.4 Confirm and record learner progress and assessment outcomes in a timely manner 2.5 Organise certification processes according to national reporting requirements, where appropriate 2.6 Address custody and management requirements of training and/or assessment information and records
3. Complete reporting requirements	3.1 Complete and forward final results to appropriate personnel for signature, using systems to support reporting 3.2 Finalise, check and provide data for national reporting purposes to appropriate personnel for signature 3.3 Identify, document and address issues and irregularities in recording and reporting activities in a timely and effective manner 3.4 Refer issues and irregularities outside own area of responsibility or expertise to the appropriate personnel for resolution, if relevant

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.4, 2.1-2.4, 3.2, 3.3, 3.5	<ul style="list-style-type: none"> • Sources, analyses, interprets and checks written information relevant to context •
Writing	1.1, 1.3, 1.4, 2.1-2.6,	<ul style="list-style-type: none"> • Produces documents that provide information using language, format and style appropriate to a specific

	3.1-3.5	audience and context
Oral Communication	1.2, 1.4, 2.2, 3.4	<ul style="list-style-type: none"> Uses appropriate communication to collect, confirm and organise information, and ideas relevant to the audience and environment
Navigate the world of work	2.5, 3.5	<ul style="list-style-type: none"> Follows organisational protocols, policies and procedures in the management of certification processes
Interact with others	1.3, 2.3, 2.4	<ul style="list-style-type: none"> Asks questions to confirm understanding and seek further information
Get the work done	1.1-1.4, 2.1-2.6, 3.1-3.5	<ul style="list-style-type: none"> Organises and completes work according to defined requirements taking responsibility for some decisions and sequencing tasks to achieve efficient outcomes Identifies and responds to problems, considering options for different approaches Uses information and communications technology (ICT) based tools to source information and to complete work tasks

Assessment Requirements for TAETAS401 Maintain training and assessment information

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 2.0.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- providing initial and ongoing advice on training, and/or assessment services, programs, and specific information requirements to a range of learners
- managing records relating to a range of learners
- organising certification processes for a range of learners
- completing AVETMISS compliant documentation for at least one learning program.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- organisational policies and procedures relating to records and reporting procedures, and disseminating information to learners
- established training and assessment information systems
- the training and assessment services provided by the organisation
- the requirements for collecting, recording, and reporting vocational education and training information
- NVR/AQTF and AVETMISS requirements, covering:
 - records management
 - reporting requirements.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment, and include access to a set of records without private client information.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TAETAS501 Undertake organisational training needs analysis

Modification History

Release	Comments
Release 1	This version first released with <i>TAE Training and Education Training Package Version 2.0</i> .

Application

This unit describes the skills and knowledge required to undertake a training needs analysis (TNA) to identify the training and assessment needs of an organisation.

It applies to those working under limited supervision in roles that require them to work with organisations to identify training needs.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Unit Sector

Training advisory services

Elements and Performance Criteria

ELEMENT	PERFORMANCE CRITERIA
<i>Elements describe the essential outcomes.</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Identify the organisation's needs	1.1 Discuss with relevant staff from the organisation their objectives, expectations and organisational requirements 1.2 Use appropriate communication and interpersonal skills to develop a professional relationship with the organisation 1.3 Identify, analyse and address any existing, or potential, issues that may impact on the organisation's objectives and requirements 1.4 Identify and access resources, in accordance with organisational requirements

ELEMENT	PERFORMANCE CRITERIA
	1.5 Develop a project plan for the conduct of the TNA with relevant persons to be negotiated and agreed by the organisation
2. Conduct training needs analysis	<p>2.1 Use reliable, appropriate and efficient methods for collecting information and data on current, emerging and future training needs</p> <p>2.2 Analyse the organisation's work roles to determine skills and competencies needed for effective performance</p> <p>2.3 Follow legal, organisational and ethical requirements to gather information and data, to assess the current skills and competencies of staff</p> <p>2.4 Use reliable and valid data analysis methods to determine current and emerging organisational training needs</p>
3. Provide advice to the organisation	<p>3.1 Provide the organisation with clear advice and recommendations on training and assessment needs in the format preferred by the client organisation</p> <p>3.2 Provide the organisation with options for meeting identified training needs</p> <p>3.3 Obtain feedback and comments from the organisation on the suitability and sufficiency of advice and recommendations</p> <p>3.4 Use legal requirements to process, complete and present final report to the organisation</p>

Foundation Skills

This section describes language, literacy, numeracy and employment skills incorporated in the performance criteria that are required for competent performance.

Skill	Performance Criteria	Description
Reading	1.3, 1.4, 2.1, 2.2, 2.3, 2.4, 3.3, 3.4	<ul style="list-style-type: none"> Sources, analyses, interprets and follows text-based information relevant to requirements information to apply relevance to requirements
Writing	1.3, 1.5, 2.1, 2.2, 2.3, 2.4, 3.1, 3.2, 3.4	<ul style="list-style-type: none"> Structures documents in a logical, detailed and accurate manner that incorporates information and recommendations using language in a format and style appropriate to a specific audience and context

Oral Communication	1.1, 1.3, 1.4, 2.1, 2.3, 3.1, 3.2, 3.3, 3.4	<ul style="list-style-type: none"> Leads verbal exchanges about information and opinion, using appropriate communication techniques, articulating ideas and observations with a range of individuals and groups Uses appropriate language to maintain effective communication
Numeracy	2.1, 2.4	<ul style="list-style-type: none"> Collates, interprets and compares information relevant to requirements
Navigate the world of work	2.3, 3.4	<ul style="list-style-type: none"> Identifies and takes responsibility for adherence to legal requirements and organisational procedures
Interact with others	1.2, 1.5	<ul style="list-style-type: none"> Routinely negotiates, consults and builds rapport to obtain broad agreement and input into planning
Get the work done	1.1- 1.5, 2.1-2.4, 3.1-3.4	<ul style="list-style-type: none"> Plans, organises and completes work according to requirements, taking responsibility for decisions and sequencing tasks to achieve effective and efficient outcomes Researches, identifies and responds to problems and opportunities for improvement using systematic, analytical processes Uses information and communications technology (ICT) based tools to conduct research, analyse data and complete work tasks

Assessment Requirements for TAETAS501 Undertake organisational training needs analysis

Modification History

Release	Comments
Release 1	This version first released with TAE Training and Education Training Package Version 2.0.

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in the elements and performance criteria of this unit, including:

- researching, conducting and providing advice through a training needs analysis
- preparing at least two training needs analyses for one, or more organisations, and for each of these demonstrating:
 - the processes that were used to determine the organisation's needs
 - details of the research methods undertaken to identify suitable training and/or assessment
 - planning for the training needs analysis
 - presentations that outline advice and recommendations.

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge to effectively complete the task outlined in the elements and performance criteria of this unit. This includes knowledge of:

- competency standards, training packages and accredited courses
- NVR/AQTF requirements and standards
- risk identification and management strategies
- industry and enterprise knowledge
- evaluation and research methodologies
- the principles of intellectual property
- training and development strategies
- change management concepts/strategies
- workplace health and safety (WHS) relating to undertaking an organisational training needs analysis.

Assessment Conditions

Gather evidence to demonstrate consistent performance in conditions that are safe and replicate the workplace. Conditions must be typical of those experienced in the training and assessment environment.

Assessors must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.

TLIA0002 Prepare cargo for export

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare cargo for export and includes confirming correct preparation of the consignment, organising cargo loading and processing documentation.

Work must be carried out in compliance with relevant international and domestic legislation, regulations and codes of practice for exporting cargo.

Work is performed under general supervision, with some accountability and responsibility for self and others in achieving prescribed outcomes.

Work involves the application of routine freight forwarding principles and procedures to prepare cargo for export.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Confirm correct preparation of consignment

- 1.1 Consignment is checked to ensure cargo is consistent with packing specification and is suitable for mode and method of transport
- 1.2 Consignment is checked to ensure labelling and marking of cargo conforms with domestic and international regulations, and workplace requirements and that packaging of cargo conforms to regulatory requirements and is appropriate for transport method
- 1.3 Cargo is checked for dangerous goods or explosives and conformance of packaging and labelling with Australian and international dangerous goods or explosives codes is confirmed as required
- 1.4 Discrepancies in composition or preparation of cargo are noted and appropriate action is undertaken in accordance with workplace procedures

2 Organise cargo loading

- 2.1 Handling methods and equipment suitable for goods, transport mode and method are selected
- 2.2 Goods transfer methods between modes of transport are selected as required
- 2.3 Procedures for cargo loading are organised and followed in accordance with legislative and workplace requirements

3 Process documentation

- 3.1 All relevant documentation is consolidated and checked for completion and accuracy
- 3.2 Discrepancies in documentation are identified and appropriate action is undertaken in accordance with workplace procedures
- 3.3 Dangerous goods declaration is obtained from consignor as required
- 3.4 Copies of documents are retained in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces but is **not** equivalent to TLIA4030A Organise cargo for export.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIA0002 Prepare cargo for export

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing information and making decisions based on information provided
- applying relevant legislation and workplace procedures
- assessing and reporting unusual occurrences in relation to cargo export
- communicating effectively with others
- completing documentation related to organising cargo export
- identifying and solving problems that may occur when organising cargo export
- interpreting client requirements
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures, information, labels and documents
- responding appropriately to cultural differences in the workplace
- working collaboratively with others when organising cargo export
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable legislation, regulations and codes including:
 - Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances, including:
 - Australian Dangerous Goods (ADG) Code
 - Australian and international explosives codes
 - Australian Marine Orders and the International Maritime Dangerous Goods (IMDG) Code
 - International Air Transport Association (IATA) Dangerous Goods Regulations (DGR)
 - international transport regulations, codes and procedures
 - relevant Australian and international standards and certification requirements
 - relevant international and Australian state/territory road rules and transport regulations
 - relevant legislative requirements, codes and regulations for cargo export
 - relevant state/territory environmental protection legislation
 - relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) legislation
- contacts and sources of information/documentation needed when organising cargo export
- procedures for batching, dating and numbering
- procedures for calculating weights, volumes and dimensions
- procedures for completing consignment documentation
- procedures for reviewing transport options and availability of carriers
- workplace customer service policies and procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so. Where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice

and operation manuals

- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIA1001 Secure cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to secure cargo in accordance with procedures and regulatory requirements as part of work activities within the transport and logistics industry.

It includes preparing to secure cargo/containers, lashing and unlash cargo, protecting cargo from weather, and packing and unpacking cargo.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare to secure

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Work area is prepared and maintained in accordance with

- cargo/containers** national standards, safety codes and site operating procedures
- 1.2 Unsafe work practices and/or equipment are reported to appropriate personnel
- 1.3 Appropriate protective clothing, equipment and fittings are selected
- 1.4 Formwork is erected where no lashing points exist
- 1.5 Lashing plan is read and interpreted
- 2 Lash and unlash cargo**
- 2.1 Work is conducted in accordance with industry standards, statutory requirements, safety codes, site operating requirements and any special cargo requirements
- 2.2 Lashing points are identified and appropriate fittings and lashing equipment are used for each lashing point
- 2.3 Cargo is lashed and secured to lashing points ensuring the correct spread of lashings and that lashings are secured, attached and tensioned
- 2.4 Tensioners are securely fastened
- 2.5 When unlashings, fittings are released, disconnected and removed from the cargo
- 2.6 Lashing equipment is placed in designated storage areas or cleared from work area
- 2.7 No injury to personnel or damage to machinery or cargo during lashing/unlashing operations is ensured
- 2.8 Lashing is completed in accordance with lashing plan
- 3 Protect cargo from weather**
- 3.1 Cargo is covered/uncovered safely ensuring appropriate covering and lashing, no injury to personnel or damage to cargo or equipment
- 3.2 Work is conducted in accordance with the requirements of national standards, safety codes and site operating procedures
- 4 Pack and unpack cargo**
- 4.1 Damaged cargo is identified and reported in accordance with enterprise procedures
- 4.2 Cargo is sorted and stacked prior to packing or after unpacking, ensuring the stack is in the correct location, in accordance with national standards, safety codes, and site operating procedures

- 4.3 Cargo is identified through the interpretation of marks or numbers
- 4.4 Tight stow of cargo is maintained
- 4.5 Cargo is handled ensuring no injury to personnel or damage to cargo or equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA1001A Secure cargo.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIA1001 Secure cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating effectively with others when securing cargo or freight
- completing documentation related to securing cargo or freight
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings and where applicable, emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures when securing cargo or freight
- interpreting and following operational instructions and prioritising work
- operating and adapting to differences in cargo handling equipment in accordance with standard operating procedures
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting instructions, procedures, information and labels relevant to securing cargo or freight
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- using lashing and protection equipment
- working collaboratively with others when securing cargo or freight
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international standards, codes and regulations relevant to securing cargo or freight including ADG and IMDG codes
- cargo marking and numbering systems
- focus of operation of work systems, equipment, management and site operating systems for securing cargo or freight
- problems that may occur when securing cargo or freight and appropriate action that can be taken to resolve these problems
- procedures for managing and controlling hazardous situations when carrying out work activities
- relevant bond, quarantine or other legislative requirements
- relevant handling and safety codes
- relevant WHS/OHS and environmental procedures and regulations
- workplace procedures and policies for securing cargo or freight.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIA2009 Complete and check import/export documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete and check import and export documentation in accordance with the requirements of Customs and related legislation and workplace procedures.

It includes identifying procedures required for documenting import/export of goods, completing documentation to meet legislative and workplace requirements, checking documentation to ensure it meets legislative requirements and lodging documentation for processing.

Work is performed under some supervision generally within a team environment. Work is undertaken in a range of environments including small to large worksites in the customs broking and freight forwarding industries.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Assessment Requirements for TLIA2009 Complete and check import/export documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others when completing import and export documentation
- completing and checking documentation and records to meet relevant Customs legislation, related legislation and workplace requirements
- completing and/or assessing accuracy of import and export documentation
- identifying procedures required for documentation for import/export of goods
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- providing customer/client service
- reading, interpreting and following import and export instructions, procedures and labels
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant communications, computing and office equipment when completing import and export documentation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international standards, codes, conventions and regulations relevant to importing and exporting cargo and freight
- Customs Act 1901 and related legislation
- documentation requirements for importing and exporting cargo and freight
- focus of operation of work systems, equipment, management and site operating systems for completing import/export cargo and freight documentation

- problems that may occur when completing import and export documentation and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- workplace procedures and policies for completing import and export documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

TLIA2011 Package goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to package goods in accordance with regulatory and workplace requirements as part of work activities undertaken within the transport and logistics industry.

It includes selecting materials, packing, and labelling packaged products/loads to the required labelling standards.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Select materials and pack products

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Packaging specifications and order packaging documentation are correctly interpreted

- 1.2 Packaging technology suitable for the goods to be packed is selected
- 1.3 Packaging materials are identified and matched to specifications
- 1.4 Work plan is followed, materials are used economically and appropriate packaging is used to minimise loss and damage in transit or storage
- 1.5 Work is planned in accordance with work health and safety (WHS)/occupational health and safety (OHS) requirements
- 1.6 Completed packed goods are stacked to minimise damage from within and outside

2 Label packaged products/loads

- 2.1 Workplace labelling standards are identified
- 2.2 Appropriate goods handling, labelling and other identification symbols are used
- 2.3 Invoices and picking slips are attached as required
- 2.4 Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2011A Package goods.

Links

Assessment Requirements for TLIA2011 Package goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- checking operation of packaging equipment in terms of service schedule and standard operating procedures
- communicating and working effectively with others when packaging goods
- completing documentation related to work activities when packaging goods
- estimating the size, shape and special requirements of goods and loads
- implementing contingency plans when packaging goods
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring equipment performance when packaging goods
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading and interpreting instructions, procedures and labels relevant to packaging goods
- selecting and using relevant communications, computing equipment and materials when packaging goods
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to packaging goods
- documentation requirements for packaging goods, such as a workplan
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for packaging goods
- problems that may occur when packaging goods and appropriate action that can be taken to resolve these problems
- relevant WHS/OHS and environmental protection procedures and guidelines
- site layout and obstacles
- workplace procedures and policies for packaging goods.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIA2013 Receive goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to receive goods in accordance with regulatory and workplace requirements as part of work activities undertaken within the transport and logistics industry.

It includes identifying workplace procedures and documentation requirements for receiving goods; checking and inspecting goods on arrival and completing workplace documentation; and unloading, unpacking and storing stock.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify workplace procedures and 1.1 Workplace procedures for receiving goods are

- documentation requirements for receiving goods** identified
- 1.2 Purpose of documents associated with receiving goods is interpreted
 - 1.3 Workplace documentation requirements for receiving goods and reporting damage are identified
- 2 Check and inspect goods on arrival and complete workplace documentation**
- 2.1 Procedures for checking goods against orders or manifests are identified and followed
 - 2.2 Discrepancies and/or damaged goods are reported
 - 2.3 Non-conforming goods are appropriately documented and despatched or stored in accordance with company procedures
- 3 Unload, unpack and store stock**
- 3.1 Appropriate manual handling techniques and equipment are identified
 - 3.2 Safe work procedures are used when unloading, unpacking and storing stock
 - 3.3 Advice is sought on appropriate storage locations and requirements for particular products
 - 3.4 Goods are unloaded and unpacked in accordance with workplace procedures
 - 3.5 Assistance is sought from others as required to maintain safe and effective work
 - 3.6 Directions are followed to store stock in appropriate areas

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2013A Receive goods.

TLIA2014 Use product knowledge to complete work operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use product knowledge to complete work operations in accordance with workplace requirements and relevant regulations, as part of work activities within the transport and logistics industries.

It includes identifying products in a subsection of a warehouse or other storage area, examining quality, reporting on products, as well as using inventory and labelling systems to identify and locate products.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify products in a

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Products are identified against specified criteria in

subsection of a warehouse or other storage area	<p>accordance with workplace procedures</p> <p>1.2 Storage and handling characteristics are identified and applied consistently</p> <p>1.3 Products are described to internal customers identifying features that may affect location, safety or storage requirements</p>
2 Examine quality and report on products	<p>2.1 Products are inspected in accordance with workplace quality assurance procedures</p> <p>2.2 Workplace procedures are followed to replace, return or dispose of stock/products that are not useable</p> <p>2.3 Non-conforming products are recorded/reported in accordance with workplace procedures</p>
3 Use inventory and labelling systems to identify and locate products	<p>3.1 Inventory and labelling systems are used to locate products within the workplace</p> <p>3.2 Goods are physically located and identified</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

Assessment Requirements for TLIA2014 Use product knowledge to complete work operations

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in products and services in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when handling, transporting and storing products and providing information on products and services
- completing documentation related to work activities
- estimating the size, shape and special requirements of goods and loads
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings and where applicable, emergency information panels
- reading and comprehending simple statements in English
- reading, interpreting and following instructions, procedures, information and signs relevant to handling, transporting, storing products and providing information on products and services
- selecting and using relevant communications, computing and load handling equipment
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes and regulations relevant to products being identified, handled, transported, stacked and/or stored as part of work operations
- categories or groups of products and requirements for special handling, stacking and storage
- documentation requirements including reports and records concerning damaged or contaminated goods
- focus of operation of work systems, equipment, management and site operating systems for packaging goods
- housekeeping standards and procedures
- purpose and use of cataloguing and labelling systems
- site layout and obstacles
- strategies to seek out sources of product knowledge and to use this information to inform work
- types of equipment and storage areas appropriate for different categories of goods including perishable, fragile, dangerous, composition/state goods
- workplace procedures and policies for identifying, handling, stacking and storing particular categories of products.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIA2020 Replenish stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to replenish stock in accordance with workplace requirements as part of work activities undertaken within the transport and logistics industry.

It includes applying product knowledge to participate in stock rotation activities, interpreting and filling replenishment requests, and completing all required stock replenishment tasks.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Participate in stock rotation activities

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Stock levels are counted against appropriate documentation

1.2 Stock levels are recorded and reported

1.3 Stocks are replenished, adjusted or rotated in accordance with

workplace procedures

- 1.4 Stock re-ordering processes are activated when appropriate
- 1.5 Routine and non-routine problems with products or storage systems are reported in accordance with workplace procedures

2 Interpret and fill replenishment request

- 2.1 Order request documentation is interpreted
- 2.2 Product/s in order are noted and workplace location/s are identified
- 2.3 Workplace and product knowledge is used to plan sequence of work
- 2.4 Appropriate materials handling equipment is selected in accordance with workplace procedures and timeframes, and work health and safety (WHS)/occupational health and safety (OHS) regulations
- 2.5 Required schedules for order movement and despatch or storage are identified

3 Complete stock replenishment

- 3.1 Products are sorted, assembled and consolidated in the appropriate storage areas
- 3.2 Work is checked in accordance with company procedures
- 3.3 Documentation and records are completed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA2020A Replenish stock.

TLIA2022 Participate in stocktakes

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to participate in stocktakes in accordance with relevant regulations and workplace requirements within the transport and logistics industry.

It includes product knowledge, preparing and conducting stocktakes, counting and identifying stock discrepancies and completing all required documentation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare for stocktake

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Goods to be counted and appropriate inventory systems are identified

- 1.2 Required resources including equipment and record keeping systems are identified
 - 1.3 Allocated tasks, zones and work requirements are identified
 - 1.4 Sequencing of work activities is planned in a time effective manner
- 2 Stocktake and count stock**
- 2.1 Stocktaking and cyclical counts are undertaken in accordance with workplace policies and procedures
 - 2.2 Inventory data is interpreted
 - 2.3 Inventory data is confirmed to match stock
 - 2.4 Stock levels are accurately counted and documented
- 3 Identify stock discrepancies**
- 3.1 Discrepancies in type, number and quality of stock are accurately recorded and documented
 - 3.2 Products stored in inappropriate storage locations are relocated and stock records are adjusted
- 4 Complete documentation**
- 4.1 Inventory data is reconciled to match warehouse stock in accordance with workplace procedures
 - 4.2 Workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

Assessment Requirements for TLIA3002 Maintain container/cargo records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- estimating size, shape and special requirements of loads
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) Code/International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels
- interpreting and following operational instructions and prioritising work
- reading and interpreting relevant instructions, procedures, information and labels
- receiving, acknowledging and sending messages with available communications equipment
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and International Standards, codes of practice and regulations relevant to maintaining container and cargo records including the current ADG Code
- cargo marking and numbering systems
- focus of operation of work systems, equipment, management and site operating systems for maintaining container and cargo records
- problems that may occur when maintaining container and cargo records and appropriate action that can be taken to resolve these problems
- relevant bond, quarantine or other legislative requirements
- relevant handling and safety codes of practice
- site layout and location of reefer units
- workplace procedures and policies for maintaining container and cargo records.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, ADG Code, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIA3008 Transfer cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to transfer cargo in accordance with relevant regulations, and workplace requirements as part of work activities in the transport and logistics industry.

It includes preparing for load transfer, safely transferring cargo using appropriate lifting equipment, finalising a transfer, and completing all required documentation.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Prepare for load transfer**
 - 1.1 Load characteristics are identified to determine special handling or equipment requirements
 - 1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
 - 1.3 Location of load in yard is confirmed and transfer method is determined
 - 1.4 Pathway for load transfer is established consistent with workplace procedures, and obstacles and particular safety precautions are noted
 - 1.5 Working area is prepared in accordance with national standards, safety codes and site operating procedures
 - 1.6 Personal protective equipment and other safety equipment is assembled
 - 1.7 Safe working load (SWL) or working load limit (WLL) is calculated using appropriate formulae for type of lifting equipment
 - 1.8 Lifting equipment is inspected, before it is used, to identify any manufacturing faults or damage, in accordance with manufacturer specifications and workplace procedures
 - 1.9 Unsafe equipment is isolated, marked as unsafe and reported to appropriate personnel
- 2 Transfer cargo**
 - 2.1 Cargo is steadied and secured using appropriate devices
 - 2.2 Load is lifted and shifted safely following national standards, safety codes and site operating procedures
 - 2.3 Load is transferred and set down, ensuring no injury to personnel or damage to machinery or cargo
- 3 Complete transfer**
 - 3.1 Securing arrangements are released from load, ensuring no injury to personnel or damage to machinery or cargo
 - 3.2 Relevant documentation is completed including reporting of damaged cargo in accordance with workplace reporting requirements
 - 3.3 Equipment is returned to store and work area is returned to normal working condition

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3008A Transfer cargo.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIA3008 Transfer cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- conducting checks on equipment used when transferring cargo and freight in terms of service schedule and operating procedures
- estimating size, shape and special requirements of loads
- identifying, selecting and using relevant equipment, processes and procedures
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of load transfer equipment
- operating and adapting to differences in equipment in accordance with operating procedures
- prioritising work
- reading and interpreting relevant instructions, procedures, information and signs
- receiving, acknowledging and sending messages using appropriate communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and International Standards, codes and regulations relevant to transferring cargo/freight including the current Australian Dangerous Goods (ADG) Code
- cargo marking and numbering systems
- high risk licencing lifting equipment requirements
- lifting equipment manufacturer specifications
- operational work systems, equipment, management and site operating systems for transferring cargo/freight
- problems that may occur when transferring cargo/freight and appropriate action that can be taken to resolve these problems
- relevant load handling and safety codes of practice and guidelines
- relevant WHS/OHS and environmental protection procedures and guidelines
- requirements for safe working load (SWL) and working load limit (WLL) of load shifting equipment
- types of equipment used to transfer loads in terminals/wharves, their applications and procedures and precautions for their use
- workplace procedures and policies for transferring cargo and freight.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, ADG Code, national Load Restraint Guide (LRG), codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in

industry.

TLIA3015 Complete receipt/despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete receipt/despatch documentation in accordance with relevant regulations and workplace requirements as part of work activities within the transport and logistics industry.

It includes analysing orders to identify work requirements to fill order, following workplace order documentation processes, and finalising documentation in accordance with workplace procedures and any relevant regulatory requirements.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Analyse order to identify work requirements to fill order

1.1 Order request documentation is interpreted

1.2 Product/s in order are noted and workplace location/s are identified

1.3 Workplace and product knowledge are used to organise documentation

1.4 Required schedules for order movement are identified and noted as required

1.5 Special aspects of order such as dangerous/hazardous goods or temperature controlled goods are identified and information on required documentation procedures and relevant regulatory requirements is identified, accessed and interpreted

2 Follow workplace order documentation processes

2.1 Workplace procedures for order documentation are identified

2.2 Workplace documentation is completed in accordance with workplace procedures and relevant regulatory requirements

3 Finalise documentation

3.1 Order is checked against schedule and order form

3.2 Workplace records are completed, and labels and appropriate documentation are attached in accordance with workplace procedures and relevant regulatory requirements

3.3 Special transportation requirements are identified and conveyed to appropriate personnel

3.4 Required documentation for dangerous goods and hazardous materials is completed in accordance with relevant regulations and current Australian Dangerous Goods (ADG) Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA3015A Complete receipt/despatch documentation.

Assessment Requirements for TLIA3015 Complete receival/despatch documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing receival and despatch documentation
- estimating size, shape and special requirements of goods and loads
- identifying containers and goods coding, Australian Dangerous Goods (ADG) Code markings and emergency information panels
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures and labels
- selecting and using relevant computer, communications and office equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and International Standards, codes and regulations relevant to completing receival/despatch documentation, including current ADG Code and relevant bond, quarantine or other legislative requirements
- documentation requirements for receiving and despatching goods
- focus of operation of work systems, equipment, management and site operating systems for receiving and despatching goods
- housekeeping standards and procedures
- problems that may occur when completing receival and despatch documentation and

appropriate action that can be taken to resolve these problems

- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- site layout and obstacles
- specifications and standards for checking and inspecting received and despatched goods
- workplace procedures and policies for completing receival/despatch documentation.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIA4005 Check and evaluate records and documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to check and evaluate records and documentation in accordance with regulatory and workplace requirements, as part of work activities within the transport and logistics industry.

It includes checking documentation, and analysing and evaluating records.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Check documentation

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Documentation regulatory and workplace requirements are confirmed

1.2 Documentation is checked to ensure compliance with

regulatory and workplace requirements

- 1.2 Documentation is checked regularly and personnel responsible for documentation are advised of deadlines
- 1.3 Appropriate systems are used to ensure maintenance of records complies with regulatory and workplace requirements

2 Analyse and evaluate records

- 2.1 Records are analysed to identify unexpected deviations from plans or possible future problems with plant and/or equipment
- 2.2 Advice is provided to appropriate personnel when problems are identified
- 2.3 Security of records and documentation is maintained at all times and access is granted to authorised personnel in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA4005A Check and evaluate records and documentation.

Assessment Requirements for TLIA4005 Check and evaluate records and documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others when checking and evaluating transport documentation
- identifying cargo, container and goods, coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) markings, and emergency information panels
- identifying, selecting and using relevant equipment, processes and procedures when checking and evaluating documentation for local and/or international transport of cargo and containers
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures and labels
- receiving, acknowledging and sending messages with available communications equipment
- reporting and/or rectifying identified problems, faults or malfunctions, in accordance with regulatory requirements and workplace procedures
- working collaboratively with others when checking and evaluating transport documentation.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international standards, codes and regulations relevant to local and international cargo/container transport documentation requirements, including the ADG and IMDG Codes
- cargo marking and numbering systems
- operational work systems, equipment, management and site operating systems for checking and evaluating cargo/container transport documentation
- problems that may occur when checking and evaluating documentation, and appropriate action that can be taken to resolve these problems
- relevant bond, quarantine or other legislative requirements
- site layout, loading/unloading plans and sequence sheets
- types of cargo, containers and transport modes and their documentation requirements
- workplace procedures and policies for checking and evaluating documentation for local and/or international transport of cargo and containers.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIA4025 Regulate temperature controlled stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to regulate temperature controlled stock in accordance with relevant regulations and workplace procedures within the transport and logistics industry.

It includes identifying goods requiring temperature control, monitoring temperature of goods, and identifying and rectifying identified problems.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Identify goods requiring temperature control

- 1.1 Goods requiring temperature control are identified
- 1.2 Temperature for short-term and long-term storage is selected to match product type
- 1.3 Upper and lower limits for temperature control are identified
- 1.4 Storage separations and co-storage applications are identified for products

2 Monitor temperature

- 2.1 Appropriate methods for determining temperature of goods are identified
- 2.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
- 2.3 Storage areas are monitored for temperatures within range for product types
- 2.4 Products are monitored to ensure compliance with temperature storage requirements
- 2.5 Short-term storage times are identified for transit goods
- 2.6 Documentation is completed in accordance with workplace procedures

3 Identify and rectify problems

- 3.1 Implications of incorrect temperature are identified
- 3.2 Damaged goods are identified and appropriate action is taken in accordance with workplace procedures
- 3.3 Causes of out-of-temperature range are identified
- 3.4 Appropriate personnel are notified for problem rectification
- 3.5 Goods handling workplace procedures for maintenance of stock under temperature control are identified and implemented

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA4025A Regulate temperature controlled stock.

Assessment Requirements for TLIA4025 Regulate temperature controlled stock

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- checking refrigeration equipment operation in terms of maintenance schedule and standard operating procedures
- communicating effectively with others
- implementing contingency plans
- operating and adapting to differences in stock and equipment in accordance with workplace procedures
- reading and interpreting relevant instructions, procedures and labels
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment, processes and procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- focus of operation of work systems, equipment, management and site operating systems for regulating temperature controlled stock
- hazards when regulating and working with temperature controlled stock and appropriate action to control the risks involved
- problems that can occur with temperature controlled stock and appropriate action that can be taken
- procedures for pre-cooling and snap freezing

- relevant codes of practice, food safety standards and regulations for temperature controlled stock
- relevant work health safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- special handling, stacking and storage requirements for temperature controlled stock
- workplace procedures and policies for regulating temperature controlled stock.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIA4031 Consolidate freight

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to consolidate freight in accordance with relevant codes of practice and regulations, and to apply routine principles, procedures and regulations to effectively and efficiently combine and consolidate freight prior to shipment.

It includes assessing the scope to consolidate freight, combining or consolidating multiple shipments of products into higher volume shipments, and preparing related consignment documentation.

It is performed under general supervision, with some accountability and responsibility for self and others in achieving prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Assess scope to consolidate freight

- 1.1 Capacity and capability of different transport modes available to the organisation are assessed against proposed task
- 1.2 Individual consignment loads are evaluated to identify relevant information needed to combine or consolidate freight
- 1.3 Information is analysed to determine where opportunities for freight consolidation exist
- 1.4 Regulatory packaging and labelling requirements for consolidated cargo are followed
- 1.5 Procedures for loading cargo are planned in accordance with established industry practice and Australian Dangerous Goods (ADG) Code
- 1.6 Hazards are identified, risks are assessed and control measures are implemented
- 1.7 Volumes and dimensions of proposed consolidation are calculated
- 1.8 Proposed consolidation is matched against operational capacity and capability of carrier

2 Prepare consignment documentation

- 2.1 Consignment documentation required for consolidated cargo is confirmed
- 2.2 Labelling and marking requirements of cargo are documented in accordance with domestic and international regulations, ADG Code and workplace requirements
- 2.3 Consignment documentation is completed and filed/stored in accordance with workplace procedures including dangerous goods declaration as required
- 2.4 Freight is consolidated taking into account segregation requirements for dangerous goods as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA4031A Consolidate freight.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIA4031 Consolidate freight

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in freight and equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- selecting and using required computer and communications equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria, include knowledge of:

- customer service policies and procedures
- problems that may occur and appropriate action that can be taken
- procedures for planning freight/cargo loading such as:
 - using available space efficiently

- packing goods for ease of inspection and to meet delivery and customer requirements
- securing goods and ensuring no damage to contents
- ensuring weight and volume of consolidated cargo conforms to specifications
- procedures for calculating volumes and dimensions
- procedures for completing consignment documentation
- procedures for identifying and evaluating information needed to facilitate freight consolidation
- relevant codes of practice and legislative requirements including local and international freight regulations
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- sources of information and documentation for consolidating freight.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIA4032 Organise transport of freight or goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise the transport of freight or goods in compliance with relevant codes of practice and regulations, and to apply routine principles and procedures to organise the transport of freight or goods prior to shipment.

It includes planning transport operations, organising freight transport, completing the required documentation and finalising organisational processes.

It is performed under general supervision, with some accountability and responsibility for self and others in achieving prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Plan transport

1.1 Knowledge of product to be freighted and workplace procedures

- operations** are applied to the transportation analysis process
- 1.2 Domestic and international regulations, codes and procedures for transporting freight are identified
 - 1.3 Hazards are identified, risks are assessed and control measures are implemented
 - 1.4 Resources including manual handling equipment, employee competencies, storage areas, goods management equipment and transportation equipment are identified to match the task
 - 1.5 Work processes are planned to meet agreed timelines
 - 1.6 Types of transportation required for the freight or goods is identified to match customer requirements, freight type and delivery time
 - 1.7 Multiple transport modes are identified as required
 - 1.8 Goods transfer methods between modes of transport are selected as required
- 2 Organise freight transport**
- 2.1 Employees, equipment and temporary storage areas (as required) are allocated and supervised
 - 2.2 Freight is secured ensuring no damage to contents
 - 2.3 Handling methods suitable to the goods and transport method are selected
 - 2.4 Individuals are informed of work requirements and timelines
 - 2.5 Work processes are monitored to ensure human resources and equipment are maintained at productive levels in accordance with workplace and work health and safety (WHS)/occupational health and safety (OHS) requirements
 - 2.6 Discrepancies in freight are noted and appropriate action is undertaken in accordance with workplace procedures
- 3 Complete organisational processes**
- 3.1 Monitoring processes to track freight movement are implemented
 - 3.2 Reporting requirements are communicated to appropriate personnel
 - 3.3 Workplace documents and records are checked for completion and are filed/stored in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA4032A Organise transport of freight or goods.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIA4032 Organise transport of freight or goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- establishing effective working relationships with colleagues and clients
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- planning own work, prioritising work activities, predicting consequences and identifying improvements
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- reading, interpreting and following relevant instructions, procedures and signs
- selecting and using required communications equipment, computers and systems
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- problems that may occur and appropriate action that can be taken
- procedures for assessing storage and transport requirements and options
- procedures for calculating/estimating weight, volumes and dimensions
- procedures for coordinating the transfer and storage of goods including multi-modal transport
- procedures for identifying and evaluating information needed to facilitate the transport of freight
- procedures for selecting transport/storage equipment and systems
- procedures for organising required permits and for completing transport documentation
- relevant legislative requirements and codes of practice
- relevant WHS/OHS and environmental procedures and regulations
- sources of information and documentation for organising the transport of freight and goods.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in *the Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIA4033 Organise international transport of freight

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to organise the international transport of freight in accordance with relevant codes of practice and regulations.

It includes confirming customer requirements, organising freight arrangements and communicating with shipping agents and authorities.

It is performed under general supervision, with some accountability and responsibility for self and others in achieving prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

A – Handling Cargo/Stock

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Confirm customer requirements

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Customer requirements for moving cargo in terms of the nature of goods, the countries of origin and destination, the timescales for collection and delivery and the estimated

budget for the transaction are confirmed

1.2 Customer priorities for the shipment are confirmed

1.3 Decisions on possible routes, taking into account known variables, are undertaken

2 Organise freight arrangements

2.1 International regulations and codes of practice for transporting freight are confirmed

2.2 Work processes are planned to meet agreed timelines

2.3 Transport modes (including multi-modal options) are matched to customer requirements, freight type and delivery times

2.4 Availability of selected carrier/s is checked including modes of transport, scheduled departure dates and times, transfer times and costs for each shipment stage

2.5 Arrangements are made to consolidate freight, where appropriate

2.6 Freight carrier booking/s are confirmed

2.7 Transport of freight to selected international carrier is organised

3 Communicate with shipping agents and authorities

3.1 Freight documentation is checked for accuracy and forwarded as appropriate to shipping agents and authorities

3.2 Confirmation of despatch of freight from international carrier is obtained

3.3 Arrival of cargo at port of entry is confirmed

3.4 Acceptance of freight documentation is confirmed

3.5 Payments are authorised

3.6 Cargo is on-forwarded from point of entry, as required

3.7 Customer is advised that freight has been forwarded to point of destination

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIA4033A Organise international transport of freight.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIA4033 Organise international transport of freight

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures and labels
- using relevant communications, computer equipment and systems
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- contacts and sources of information/documentation needed for organising international transport of freight
- customer service policies and procedures
- problems that may occur and appropriate action that can be taken
- procedures for:
 - interpreting client requirements
 - reviewing transport options and availability of carriers
 - identifying and evaluating information needed to organise the international transport of

freight

- calculating volumes and dimensions
- completing consignment documentation
- liaising with Australian and international contacts using appropriate technology
- relevant codes of practice and legislative requirements including local and international freight regulations
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIB0002 Carry out vehicle inspection

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to carry out an inspection of a commercial vehicle in accordance with relevant workplace procedures.

It includes conducting routine checks, cleaning vehicles, ensuring all specified safety requirements are met and ensuring vehicles are operational according to workplace procedures.

Work is performed with limited or minimum supervision, and with duty of care for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Check and clean vehicle

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Vehicle hazards are identified and required action is taken to minimise, control or eliminate identified hazards

1.2 Visual check of internal and external condition of

vehicle is carried out and relevant documentation is completed in accordance with workplace procedures

- 1.3 Pre-operational inspections and checks are conducted in accordance with workplace procedures
 - 1.4 Associated equipment is tested to ensure it functions correctly to manufacturer specifications and workplace procedures
 - 1.5 Operational checks are carried out after engine is started to identify possible defects
 - 1.6 Shut-down checks are carried out to identify possible defects
 - 1.7 Warning systems (instruments and gauges) are checked to ensure they are operational in accordance with manufacturer specifications and workplace procedures
 - 1.8 Vehicle monitoring device including In Vehicle Monitoring System (IVMS) and telematics is logged on/off as required in accordance with manufacturer instructions and workplace procedures
 - 1.9 Vehicle is cleaned in accordance with work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) and environmental requirements and workplace procedures
- 2 Complete documentation**
- 2.1 Vehicle defects are identified and diagnosed, and appropriate action is taken to report to relevant person/s or remedy identified defects as required by workplace procedures
 - 2.2 Records of inspection are updated and recommended repairs from relevant person/s are documented in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work

environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB2004 Carry out vehicle inspection.

Links

Companion Volume Implementation Guides are found in VETNet -

Assessment Requirements for TLIB0002 Carry out vehicle inspection

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- carrying out vehicle inspections in accordance with workplace and manufacturer requirements including:
 - conducting engine oil checks
 - conducting coolant level checks
 - conducting hydraulic oil and other fluid checks
 - conducting globe replacement procedure
 - conducting tyre checks for wear
 - checking of gauges, warning lights, screen displays and buzzers to confirm operational status
- communicating effectively with others when reporting identified problems, faults or malfunctions
- completing documentation related to routine vehicle inspection clearly and concisely
- reading and interpreting relevant instructions, procedures, information and manuals
- reporting and rectifying identified problems, faults or malfunctions promptly
- visual checking for defects to internal and external of vehicle
- operating relevant cleaning equipment and using relevant cleaning supplies
- completing relevant workplace documentation
- applying working at height procedures during cleaning of vehicles
- applying relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH), environmental requirements and workplace procedures
- using relevant Personal Protective Equipment (PPE) while cleaning.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- duty of care requirements for routine vehicle inspections

- principles of systems operation on commercial vehicles
- problems that may occur during routine vehicle inspections and appropriate actions and solutions
- relevant reporting and documentation requirements for carrying out vehicle inspections
- relevant WHS/OHS/OSH and environmentally sustainable practices
- workplace procedures and manufacturer specifications for:
 - pre-operational inspection of a commercial vehicle
 - visual inspection
 - checking warning systems
 - associated equipment operation
 - function of gauges, warning lights and devices
 - In Vehicle Monitoring System (IVMS) and telematics
 - defect reporting
- safe use of vehicle cleaning supplies
- safe operation of cleaning equipment
- Safety Data Sheets (SDS) and relevant manufacturer specifications for cleaning products
- WHS/OHS/OSH and environmental requirements for waste disposal.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

TLIB0003 Use and maintain minor mechanical equipment

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use and maintain minor mechanical equipment in accordance with workplace procedures, safe working codes of practice and regulatory requirements across a variety of operational workplaces within the transport and logistics industry.

It includes carrying out pre-operational checks on equipment, operating mechanical equipment, conducting routine maintenance, and securing and storing equipment. Minor mechanical equipment may encompass hand and power tools.

Work is performed under some supervision, generally in a team environment.

Where required to operate mechanical plant or equipment, the operator must hold the relevant licence, permit or certificate for the class/type of equipment being operated.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | | |
|----------|--|------------|--|
| 1 | Carry out pre-operational checks | 1.1 | Pre-operational checks are conducted to manufacturer specifications to ensure optimum equipment functionality |
| | | 1.2 | Minor adjustments to equipment are made in accordance with manufacturer instructions to ensure efficient operation |
| | | 1.3 | Faulty and damaged equipment is reported to relevant person to ensure equipment is safe and effective to use |
| 2 | Operate mechanical equipment | 2.1 | Equipment is operated in accordance with manufacturer specifications and workplace procedures to ensure safe and effective operation |
| | | 2.2 | Personal protective equipment (PPE) is used to minimise risk of injury in accordance with workplace procedures |
| | | 2.3 | Work operational hazards are eliminated or controlled when using equipment to ensure safe working conditions |
| | | 2.4 | Assisting personnel are given clear instructions about their duties to ensure safe and effective working conditions |
| 3 | Conduct routine maintenance | 3.1 | Equipment is cleaned and maintained to ensure optimum functionality in accordance with manufacturer specifications, regulatory requirements and workplace procedures |
| | | 3.2 | Detailed and accurate records are maintained in accordance with workplace procedures |
| 4 | Secure and store mechanical equipment | 4.1 | Equipment is handled and transported in a safe, secure and efficient manner to minimise risk of injury to personnel and damage to equipment |
| | | 4.2 | Equipment is stored and secured according to manufacturer and workplace procedures to prevent damage to and loss of equipment |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB2029 Use and maintain minor mechanical equipment.

Assessment Requirements for TLIB0003 Use and maintain minor mechanical equipment

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant lashing and securing techniques for equipment
- applying environmental requirements when using and maintaining minor mechanical equipment
- applying workplace procedures in the use and maintenance of minor mechanical equipment
- carrying out one routine maintenance and conducting checks in a safe manner including:
 - engine oil checks
 - coolant level checks
 - hydraulic oil and other fluid checks
 - globe replacement procedure
 - tyre checks for wear
 - drive belt checks and adjustments
 - seat, mirror and related driver adjustments
- communicating and working effectively with others when reporting identified problems, faults or malfunctions
- completing a pre-operational check on one piece of equipment used in the job function
- completing workplace documentation processes
- following relevant tagout processes
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of equipment
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace procedures
- operating mechanical equipment to manufacturer and workplace requirements
- operating relevant cleaning equipment and using relevant cleaning supplies
- recording identified fault/damage in accordance with workplace procedures
- reporting identified problems, faults and malfunctions promptly, in accordance with workplace procedures
- selecting and using required personal protective equipment (PPE)

- using and handling cleaning agents and relevant cleaning equipment in accordance with work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH), environmental requirements
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic lashing securing techniques
- emergency procedures in the event of an accident when using and maintaining mechanical equipment
- environmental requirements for waste disposal when using and maintaining mechanical equipment
- manufacturer specifications and documentation
- pre-operational and operational checklists
- problems and faults that can occur when using and maintaining minor mechanical equipment and related action that should be taken to resolve these problems
- relevant Safety Data Sheets (SDS) and manufacturer specifications for cleaning products
- relevant WHS/OHS/OSH and environmental procedures and regulations
- safe operation of cleaning equipment
- safe use of cleaning supplies
- tools and equipment for using and maintaining minor mechanical equipment, and the procedures and precautions for their care, use and storage
- workplace documentation and records requirements
- workplace procedures for pre-operational checks
- workplace procedures for using and maintaining minor mechanical equipment.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIB2001 Check and assess operational capabilities of equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to check and assess the operational capabilities of equipment in accordance with regulations, workplace procedures and requirements, within the transport and logistics industry.

It includes inspecting equipment and the work area, checking the operational capability of equipment and its safety devices, identifying and assessing the impact of faults on safety and work requirements, and recording and reporting inspection and testing results.

Safety checks and equipment tests are performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Inspect equipment and

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Equipment is inspected prior to start-up in accordance with workplace pre-operational functional safety check

work area	procedures and manufacturer's specifications
	1.2 Aspects of equipment/work area found to be outside manufacturer's and/or workplace specifications are reported to designated persons for appropriate action
2 Check equipment operational capability	2.1 Equipment and components are tested after start-up in accordance with manufacturer's specifications and workplace procedures
	2.2 Warning systems are checked for operational effectiveness
3 Identify and assess impact of faults on work requirements	3.1 Faults are identified and assessment is made of the potential effect on the operation of the equipment for the required work
	3.2 Faults that may affect the safe operation of the equipment are reported to the appropriate personnel for rectification
4 Record and report inspection and testing results	4.1 Inspection and testing results are accurately reported in accordance with regulatory requirements, workplace policies and industry guidelines
	4.2 Clear, unambiguous and concise records are kept, in accordance with workplace policies
	4.3 Clear reference is made to any items that may affect the future safety of the equipment

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB2001A Check and assess operational capabilities of equipment.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIB2001 Check and assess operational capabilities of equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes during work activities
- communicating and working effectively with others when checking and assessing equipment operational capability
- completing documentation related to checking and assessing equipment operational capability
- implementing contingency plans and modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading, interpreting and following instructions, procedures, information, labels and signs relevant to the checking and assessing of the operational capability of equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment and communications technology when checking and assessing equipment operational capability
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- servicing equipment in terms of maintenance schedule and standard operating procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- equipment characteristics, capabilities, limitations and operational safety requirements
- housekeeping procedures
- operational work systems, equipment, management and site operating systems for checking and assessing equipment operational capability
- problems that may occur when checking and assessing equipment operational capability and appropriate action that can be taken to resolve these problems
- site layout and obstacles
- tools and equipment used when checking and assessing equipment operational capability and the precautions and procedures to be followed in their use.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIB2003 Carry out vehicle servicing and maintenance

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to carry out basic servicing and maintenance of a commercial vehicle, in accordance with relevant roads and traffic authority regulations.

It includes actions to implement vehicle manufacturer specifications for routine checks and maintenance, to ensure all specified safety requirements are met, and to ensure vehicle is operational to workplace requirements and relevant state/territory roads and traffic authority regulations.

Work is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Maintain and service vehicle systems

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Hazards are identified, risks are assessed and control measures are implemented
- 1.2 Fluid levels are checked and adjusted in accordance with manufacturer specifications and workplace procedures
- 1.3 Air levels are checked and adjusted in accordance with manufacturer specifications and workplace procedures
- 1.4 Routine checks are made of vehicle systems and appropriate action is initiated for maintenance as required in accordance with workplace procedures
- 1.5 Appropriate precautions and procedures are followed when servicing/maintaining a vehicle to ensure adequate protection of the environment
- 1.6 Work health and safety (WHS)/occupational health and safety (OHS) procedures are followed when carrying out routine servicing and maintenance of a vehicle

2 Carry out minor vehicle repairs

- 2.1 Vehicle components are removed, repaired or replaced and refitted to vehicle using correct tools in accordance with manufacturer instructions and workplace procedures
- 2.2 Tyres on vehicle are repaired or replaced in accordance with workplace procedures and manufacturer instructions
- 2.3 Worn brakes are identified and action is taken in accordance with workplace procedures and manufacturer specifications
- 2.4 Need for more complex maintenance procedures is identified and problem is correctly referred in accordance with workplace procedures

3 Diagnose minor vehicle faults and undertake repairs for the

- 3.1 Minor faults in vehicle systems are identified, diagnosed and repaired in accordance with

safe operation of a vehicle

manufacturer specifications and workplace procedures

- 3.2 Identified faults that create a safety hazard are reported and appropriate action is taken to remove vehicle from operation pending repair

4 Complete documentation

- 4.1 Routine servicing, maintenance and repair record requirements are confirmed

- 4.2 Records of routine servicing, maintenance and repairs are kept in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB2003A Carry out vehicle servicing and maintenance.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIB2003 Carry out vehicle servicing and maintenance

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- implementing contingency plans
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of equipment
- operating and adapting to differences in equipment in accordance with workplace procedures
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- servicing equipment in terms of maintenance schedule and standard operating procedures
- working systematically with required attention to detail without injury to self or others, or damage to vehicle or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic fault finding procedures required for routine servicing and maintenance of vehicles
- basic principles for operating systems on commercial vehicles, including electrical systems, fuel systems, cooling systems, steering systems, exhaust systems, tyres and brakes
- housekeeping standards for routine servicing and maintenance
- problems that may occur during vehicle routine servicing and maintenance and appropriate action and solutions
- procedures for checking, and routine servicing and maintenance of a commercial vehicle, in accordance with workplace and manufacturer requirements, and established safety rules and regulations
- procedures for use and maintenance of materials, tools and parts required for routine servicing and maintenance
- procedures required to minimise waste during routine servicing and maintenance
- recognition and diagnosis of faults and vehicle irregularities
- relevant duty of care requirements for routine servicing and maintenance of vehicles
- relevant WHS/OHS and pollution control procedures
- reporting and documentation requirements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals

- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIB2008 Carry out inspection of trailers

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to carry out an inspection of a commercial trailer, in accordance with relevant roads and traffic authority regulations for inspecting commercial trailers.

It includes action to implement trailer manufacturer specifications for routine checks, to clean trailer, to ensure all specified safety requirements are met, and to ensure trailer is operational to workplace requirements and relevant state/territory roads and traffic authority.

Work is performed with limited supervision and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Check trailer

1.1 Trailer hazards are identified and required action is taken to minimise, control or eliminate identified hazards

1.2 Visual check of internal and external condition of trailer is carried out in accordance with workplace procedures

1.3 Pre-operational inspections and checks of trailer brake systems, suspension and axles, electrical systems, wheels and tyres are carried out to ensure conformance with road safety standards

1.4 Associated equipment is tested to ensure it functions correctly to manufacturer specification

2 Clean trailer

2.1 Trailer is cleaned in accordance with workplace procedures

2.2 Associated equipment is cleaned in accordance with workplace procedures

3 Complete documentation

3.1 Faults are identified and/or diagnosed and appropriate action is taken to report or remedy identified faults as required by workplace procedures

3.2 Records of inspection are updated and recommended repairs are documented in accordance with workplace policies

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB2008A Carry out inspection of trailers.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIB2008 Carry out inspection of trailers

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- completing relevant documentation for inspecting trailers
- monitoring and checking condition of trailer and its equipment in terms of maintenance schedule and operating procedures
- reading and interpreting relevant instructions, procedures and information
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- principles of operation of systems on commercial trailers, including electrical systems, tyres, brakes and coupling systems
- procedures for routine inspection of a commercial trailer in accordance with workplace and manufacturer requirements, and established safety rules and regulations including visual inspection procedures and pre-operational checking procedures
- relevant duty of care requirements for routine inspection of trailers
- relevant work health and safety (WHS)/occupational health and safety (OHS) and pollution control procedures
- reporting and documentation requirements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIB2073 Clean road tankers

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to clean road tankers in accordance with workplace procedures and work health and safety (WHS)/occupational health and safety (OHS) and environmental protection regulations.

It includes preparing for cleaning operations, steam cleaning a tanker, cleaning a tanker using water and detergent, finalising cleaning operations, and completing all required documentation.

Work is performed under some supervision, usually in a team environment. Work involves the application of routine principles and procedures to clean commercial tankers across a variety of operational contexts.

Work must be carried out in accordance with WHS/OHS and environmental protection regulations and workplace procedures.

No licencing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|---|
| 1 Prepare for cleaning operations | <p>1.1 Vehicle is positioned under gantry in accordance with workplace procedures</p> <p>1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards</p> <p>1.3 Documentation is obtained from vehicle driver to determine product that has been previously carried in tanker</p> <p>1.4 Vehicle keys are taken from driver to prevent accidental drive off, before cleaning process is completed</p> <p>1.5 Appropriate cleaning process is selected for type of tanker/load in accordance with workplace procedures</p> <p>1.6 Cleaning materials are prepared in accordance with manufacturer instructions and workplace procedures</p> <p>1.7 Required personal protective equipment and safety equipment is selected and used in accordance with regulatory requirements and workplace procedures</p> |
| 2 Steam clean a tanker | <p>2.1 Vehicle is earthed to prevent sparks and explosions</p> <p>2.2 Valves are opened to allow draining of wash materials and hoses are attached in accordance with manufacturer instructions and workplace procedures</p> <p>2.3 All access points, including vents and washing points, are opened and heat-sensitive auto fill probes are removed in accordance with workplace procedures</p> <p>2.4 Where tank has held oil/diesel, a wash consisting of detergent wash and hot water rinse is carried out followed by the application of steam</p> <p>2.5 Where tank has only held petrol, a steam clean only is carried out in accordance with workplace procedures</p> <p>2.6 After wash, unit is left to drain until liquid ceases to drain from outlet valves and steam stops leaving vents on top of tank</p> |

- 2.7 All vents and valves are closed and auto fill probes are reconnected
- 2.8 Plastic seals are placed on valves to signify completed cleaning of tanker as required in accordance with workplace procedures
- 3 Clean a tanker using water and detergent**
 - 3.1 High pressure water and detergent are used to clean around top of tanker vents and hatches to remove dirt, and then top of tanker vents and hatches are rinsed clean with water
 - 3.2 Valves on outlet manifold are opened and connected with flexible pipes to waste storage facility or recycling tanks for tank cleaner
 - 3.3 All hatches are opened, spray balls are placed into tanks after visually checking tank condition, and solid materials present are washed out with high pressure water, prior to starting cleaning cycle
 - 3.4 Tank is rinsed, washed with tank wash until waste is clear and recycled into a holding tank for reuse, leaving tanker tank to drain
 - 3.5 Water in holding tank is topped up, ph is tested and solution is replaced as required in accordance with workplace procedures
 - 3.6 Tank is rinsed with water in short bursts until liquid leaving tank is clear
 - 3.7 Top of tank is hosed off again with water, and spray balls are removed
 - 3.8 Tank is visually checked through hatches with a torch, for cleanliness
 - 3.9 When cleanliness standards have not been achieved, tanker is rewashed or re-rinsed as required and hatches are closed
 - 3.10 At conclusion of cleaning operations, drainage hoses are removed, manifold is checked for cleanliness, and drainage valves are closed and sealed to indicate completed process in accordance with workplace procedures
- 4 Complete cleaning operations**
 - 4.1 Due care is taken to ensure disposal of used cleaning materials is in accordance with environmental protection regulations and workplace procedures

- 4.2 Wash water is suitably treated using available water cleaning and separation processes before draining into sewerage system
- 4.3 Cleaning equipment is cleaned, dried, checked and stored in accordance with workplace procedures
- 4.4 Cleaning operations documentation is completed in accordance with workplace procedures and is returned to driver along with vehicle keys

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIB2073 Clean road tankers

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- carrying out required cleaning operations
- communicating effectively with others
- interpreting and following operational instructions and prioritising work
- minimising waste during cleaning operations
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, labels and manuals
- selecting and using appropriate cleaning equipment and materials
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- hazards that may exist when cleaning road tankers and ways of controlling the risks involved
- housekeeping standards
- materials identification, handling and storage
- precautions and procedures to dispose of or reprocess cleaning waste in accordance with environmental protection requirements
- procedures for cleaning a commercial tanker in accordance with workplace and

manufacturer requirements, and established safety rules and regulations

- relevant codes such as the current Australian Dangerous Goods (ADG) Code
- relevant duty of care requirements for routine tanker cleaning
- relevant legislation and workplace procedures
- relevant recording and documentation procedures
- relevant technical knowledge to clean road tankers
- relevant WHS/OHS and pollution control procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLIB2119 Carry out maintenance of trailers

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to carry out basic servicing and maintenance of a commercial trailer across a variety of operational contexts.

It includes action to implement trailer manufacturer specifications for routine checks and maintenance, to ensure all specified safety requirements are met, and to ensure trailer is operational to workplace requirements and relevant state/territory roads and traffic authority regulations.

Work is performed with limited or minimum supervision, and with limited accountability and responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

B – Equipment Checking and Maintenance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify faults and perform routine maintenance

- 1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
- 1.2 Trailer faults are identified and diagnosed in accordance with workplace procedures
- 1.3 Trailer components are lubricated in accordance with manufacturer instructions and workplace procedures

2 Carry out repairs on trailers

- 2.1 Trailer air/hydraulic brake system is inspected and adjusted, and required minor maintenance or repairs are carried out
- 2.2 Trailer electrical system is checked for correct operation and required minor maintenance or repairs are carried out
- 2.3 Trailer suspension and axles are inspected and identified faults are repaired and/or reported in accordance with workplace procedures
- 2.4 Trailer wheels and tyres are inspected, removed, repaired and refitted as required, in accordance with workplace procedures
- 2.5 Required documentation is completed in accordance with workplace procedures
- 2.6 Records of routine maintenance and repairs are kept in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIB2119A Carry out maintenance of trailers.

Assessment Requirements for TLIB2119 Carry out maintenance of trailers

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- carrying out lubrication processes in the course of work activities
- communicating and working effectively with others
- completing relevant documentation
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace procedures
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- servicing trailer and equipment in terms of maintenance schedule and standard operating procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic fault-finding procedures required during routine servicing and maintenance of trailers
- basic principles of operation of systems on commercial trailers, including electrical systems, tyres, brakes and coupling systems
- housekeeping standards required for routine servicing and maintenance
- problems that may occur during routine servicing and maintenance of trailers and appropriate actions and solutions
- procedures for checking, and routine servicing and maintenance of commercial trailers in accordance with workplace procedures, manufacturer requirements and established safety rules and regulations
- procedures for using and maintaining materials, tools and parts required for routine servicing and maintenance
- recognition and diagnosis of faults and trailer irregularities
- relevant duty of care requirements for routine servicing and maintenance of trailers
- relevant national heavy vehicle legislation and regulatory requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and pollution control procedures
- reporting and documentation requirements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLIC1051 Operate commercial vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to maintain the safety of and to operate, a commercial vehicle across a variety of job roles.

It includes monitoring traffic and associated equipment, managing vehicle condition and performance, and effectively managing hazardous situations.

Driving must be carried out in accordance with relevant state/territory roads and traffic authority licence requirements and regulations.

Driving is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

Licensing, legislative, regulatory or certification requirements are applicable to this unit. Provisional car licence must be held prior to commencement of this unit of competency.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|---|--|
| 1 Operate commercial vehicle | <p>1.1 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage</p> <p>1.2 Driving hazards are identified and/or anticipated and avoided</p> <p>1.3 Vehicle lights and indicators are used in accordance with traffic regulations and manufacturer instructions</p> <p>1.4 Vehicle is secured in accordance with manufacturer specifications, traffic regulations and workplace procedures</p> <p>1.5 Appropriate procedures are followed in a driving emergency</p> <p>1.6 Appropriate low-risk driving behaviour is displayed towards other road users in accordance with workplace procedures</p> <p>1.7 Vehicle is positioning and moved conveniently and safely for loading and unloading in accordance with regulatory and workplace instruction</p> <p>1.8 All associated equipment is operated in accordance with manufacturer and workplace instructions</p> |
| 2 Monitor traffic and road conditions | <p>2.1 Most efficient route of travel is taken by monitoring and anticipating traffic flows and conditions, road standards and other factors likely to cause delays or route deviations</p> <p>2.2 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities</p> |
| 3 Monitor and maintain vehicle performance | <p>3.1 Vehicle performance and safety is maintained through vehicle pre-operational inspections and</p> <p>3.2 Performance and efficiency of vehicle operation is monitored during use</p> <p>3.3 Vehicle is driven in a manner that incorporates eco driving principles</p> <p>3.4 Defective or irregular performance or malfunctions are repaired as a minor repair or reported to appropriate authority</p> <p>3.5 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures</p> |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIC1051A Operate commercial vehicle.

Links

Assessment Requirements for TLIC1051 Operate commercial vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes
- completing relevant documentation
- demonstrating low-risk driving behaviours
- monitoring and anticipating traffic hazards and taking appropriate action
- monitoring performance of vehicle and taking appropriate action
- operating a commercial vehicle and its associated equipment
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information and signs .

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions, and related action that can be taken
- fatigue management strategies including on-road techniques

- lifestyles that promote effective long-term fatigue management
- low-risk driving behaviours
- map reading and road navigation techniques
- pre-operational checks carried out on vehicle and related action
- principles of stress management when driving a vehicle
- procedures to be followed in a driving emergency
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental/emissions procedures and regulations
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- vehicle controls, instruments and indicators and their use
- vehicle handling procedures
- workplace driving and operational instructions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

A simulator/online assessment is not suitable for the final assessment of this unit of competency.

TLIC3003 Drive medium rigid vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive a medium rigid vehicle safely in accordance with the licence requirements and regulations of the relevant state/territory roads and traffic authority pertaining to medium rigid vehicles.

It includes systematically and efficiently controlling vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Types of vehicles include all medium rigid vehicles, for example any 2-axle rigid vehicle, including trucks and buses greater than 8 tonnes gross vehicle mass (GVM).

Driving is performed with limited or minimum supervision, within duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Drive medium rigid vehicle

- 1.1 Medium rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturer instructions
- 1.2 Engine power is managed to ensure efficiency and performance and to minimise engine and transmission damage
- 1.3 Engine operation is maintained within manufacturer specified torque range and temperature, through effective transmission use
- 1.4 Braking system of medium rigid vehicle is managed and operated to ensure effective control of vehicle under all conditions
- 1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.6 Medium rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.7 Medium rigid vehicle is parked, shut down and secured in accordance with manufacturer specifications, traffic regulations and workplace procedures
- 1.8 Appropriate procedures are followed in a driving emergency

2 Monitor traffic and road conditions

- 2.1 Most efficient travel route is taken through monitoring and anticipating traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
- 2.2 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities

3 Monitor and maintain vehicle performance

- 3.1 Vehicle performance is maintained through pre-operational vehicle inspections and checks
- 3.2 Performance and efficiency of vehicle operation is monitored during use
- 3.3 Defective or irregular performance or malfunctions are reported to appropriate authority
- 3.4 Vehicle records are maintained/updated and information is

processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIC3003A Drive medium rigid vehicle.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIC3003 Drive medium rigid vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- carrying out pre-operational checks
- checking and replenishing fluids and carry out lubrication processes
- completing relevant documentation
- monitoring and anticipating traffic hazards and taking appropriate action
- monitoring equipment performance
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions, in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions, and related action that can be taken by a driver
- fatigue management strategies including on-road techniques

- lifestyles that promote effective long-term management of fatigue
- map reading and road navigation techniques including the use of a global positioning system (GPS) device
- medium rigid vehicle controls, instruments and indicators, and their use
- medium rigid vehicle handling procedures
- pre-operational checks carried out on vehicle and related action
- principles of operation of air brakes and procedures for their use
- principles of stress management when driving a vehicle
- procedures to be followed in a driving emergency
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- workplace driving and operational instructions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory road traffic authority.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIC3004 Drive heavy rigid vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive a heavy rigid vehicle safely, in compliance with relevant state/territory roads and traffic authority licence requirements and regulations for heavy rigid vehicles.

It includes maintaining systematic and efficient control of all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, and effectively managing hazardous situations.

Driving is performed with limited or minimum supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

demonstrate achievement of the element.

1 Drive heavy rigid vehicle

- 1.1 Heavy rigid vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturer instructions
- 1.2 Engine power is managed, to ensure efficiency and performance, and to minimise engine and gear damage
- 1.3 Engine operation is maintained within manufacturer specified torque range and temperature, through effective gear selection and smooth transition in gear changes
- 1.4 Heavy rigid vehicle braking system is managed and operated to ensure effective vehicle control under all conditions
- 1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.6 Heavy rigid vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.7 Heavy rigid vehicle is parked, shut down and secured in accordance with manufacturer specifications, traffic regulations and workplace procedures
- 1.8 Over width and overweight permit applications are completed and submitted in accordance with relevant regulatory requirements as required
- 1.9 Appropriate procedures are followed in a driving emergency

2 Monitor traffic and road conditions

- 2.1 Most efficient route of travel is taken by monitoring and anticipating traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
- 2.2 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment loads and facilities

3 Monitor and maintain vehicle performance

- 3.1 Vehicle performance is maintained through pre-operational inspections and vehicle checks
- 3.2 Performance and efficiency of vehicle operation is monitored during use
- 3.3 Defective or irregular performance or malfunctions are reported to appropriate authority
- 3.4 Vehicle records are maintained/updated and information is

processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIC3004A Drive heavy rigid vehicle.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIC3004 Drive heavy rigid vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- carrying out pre-operational checks
- completing relevant documentation
- demonstrating low-risk driving behaviours
- monitoring and anticipating traffic hazards and taking appropriate action
- monitoring performance of vehicle and its equipment, and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions, and related action that can be taken
- fatigue management strategies and on-road techniques
- heavy rigid vehicle controls, instruments and indicators, and their use

- heavy rigid vehicle handling procedures
- lifestyles that promote the effective long-term fatigue management
- pre-operational checks carried out on heavy rigid vehicle and related action
- principles of operation of air brakes and procedures for their use
- principles of stress management when driving a vehicle
- procedures to be followed in a driving emergency
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- workplace driving and operational instructions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory road traffic authority.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

TLIC3005 Drive heavy combination vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive a heavy combination vehicle safely.

It includes maintaining systematic and efficient control of all vehicle functions, monitoring traffic and road conditions, managing vehicle condition and performance, coupling and uncoupling a trailer, and effectively managing hazardous situations.

Driving must be carried out in accordance with relevant state/territory roads and traffic authority licence requirements and regulations for heavy combination vehicles.

Driving is performed with limited supervision, and duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Drive heavy combination vehicle	<p>1.1 Heavy combination vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturer instructions</p> <p>1.2 Engine power is managed to ensure efficiency and performance, and to minimise engine and gear damage</p> <p>1.3 Engine operation is maintained within the manufacturer specified torque range and temperature, through effective gear selection and smooth transition in gear changes</p> <p>1.4 Heavy combination vehicle braking system is managed and operated to ensure effective vehicle control under all conditions</p> <p>1.5 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving</p> <p>1.6 Heavy combination vehicle is driven in reverse, maintaining visibility and achieving accurate positioning</p> <p>1.7 Heavy combination vehicle is parked, uncoupled, shut down and secured in accordance with manufacturer specifications, traffic regulations and workplace procedures</p> <p>1.8 Over width and overweight permit applications are completed and submitted in accordance with relevant regulatory requirements as required</p> <p>1.9 Appropriate signage and lights are checked for operational effectiveness and for conformity to prescribed traffic regulations</p> <p>1.10 Appropriate procedures are followed in a driving emergency</p>
2 Monitor traffic and road conditions	<p>2.1 Most efficient route of travel is taken by monitoring and anticipating traffic flows and conditions, road standards and other factors likely to cause delays or route deviations</p> <p>2.2 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment loads and facilities</p>
3 Monitor and maintain vehicle	<p>3.1 Vehicle performance is maintained through pre-operational inspections and vehicle checks</p>

performance

- 3.2 Prime mover and trailer are aligned and coupled in accordance with manufacturer instructions and workplace procedures
- 3.3 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm it is fully operational
- 3.4 Performance and efficiency of vehicle operation is monitored during use
- 3.5 Defective or irregular performance or malfunctions are reported to appropriate authority
- 3.6 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIC3005A Drive heavy combination vehicle.

Assessment Requirements for TLIC3005 Drive heavy combination vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying map reading and road navigation techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- checking and replenishing fluids and carrying out lubrication processes
- completing relevant documentation
- demonstrating low-risk driving behaviours
- monitoring and anticipating traffic hazards and taking appropriate action
- monitoring performance of vehicle, its trailers and its equipment, and taking appropriate action as required
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions, and related action that can be taken
- fatigue management strategies including on-road techniques

- heavy combination vehicle controls, instruments and indicators, and their use
- heavy combination vehicle handling procedures
- lifestyles that promote effective long-term fatigue management
- map reading and navigation of vehicle and related action
- pre-operational checks carried out on heavy combination vehicle and related action
- principles of operation of air brakes and procedures for their use
- principles of stress management when driving a vehicle
- procedures to be followed in a driving emergency
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- workplace driving and operational instructions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIC3042 Operate coach/bus

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a passenger coach/bus across a variety of contexts.

It includes maintaining systematic and efficient control of all coach/bus functions, monitoring traffic and road conditions, managing coach/bus condition and performance, and effectively managing hazardous situations.

Operation of a passenger coach/bus is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

This unit meets part of the certification requirements for obtaining coach/bus driver accreditation. As requirements may vary between states and territories, people seeking coach/bus accreditation should contact their state/territory regulatory authority.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Operate coach/bus	<p>1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards</p> <p>1.2 Coach/bus is started, steered, manoeuvred, positioned and stopped in accordance with manufacturer instructions</p> <p>1.3 Engine power is managed to ensure efficiency and performance, and to minimise engine and transmission damage</p> <p>1.4 Engine operation is maintained within the manufacturer specified torque range and temperature, by effectively using transmission</p> <p>1.5 Coach/bus braking system is managed and operated to ensure effective control of coach/bus under all conditions</p> <p>1.6 Road and traffic hazards are identified and/or anticipated and avoided or controlled through defensive driving techniques</p> <p>1.7 Coach/bus is driven in reverse, maintaining visibility and achieving accurate positioning in accordance with workplace procedures</p> <p>1.8 Coach/bus is parked, shut down and secured in accordance with manufacturer specifications and workplace procedures</p> <p>1.9 Low risk driving behaviour is applied towards other road users in accordance with workplace procedures</p>
2 Monitor and respond to traffic and road conditions	<p>2.1 Efficient route of travel is taken by monitoring and anticipating traffic flows and conditions, road standards and other factors likely to cause delays or route deviations</p> <p>2.2 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities</p>
3 Monitor and maintain coach/bus performance	<p>3.1 Coach/bus performance is maintained through pre-operational inspections and checks of coach/bus and ancillary equipment</p> <p>3.2 Performance and efficiency of coach/bus operation is monitored during use</p> <p>3.3 Defective or irregular performance or malfunctions are repaired or reported to appropriate authority in accordance</p>

- with workplace procedures
- 3.4 Coach/bus records are maintained/updated and information is processed in accordance with workplace procedures
 - 3.5 Vehicle monitoring devices (such as tachographs) are operated in accordance with workplace procedures
- 4 Operate coach/bus safely**
- 4.1 Passenger positioning and dispersion is undertaken in accordance with manufacturer instructions and workplace procedures
 - 4.2 Coach/bus doors are operated safely for entry and exit from coach/bus in accordance with manufacturer and workplace procedures
 - 4.3 Visual checks are conducted on entry to and exit from coach/bus stops in accordance with workplace procedures
 - 4.4 Vehicle is positioned and moved conveniently and safely for passengers embarking and disembarking, in accordance with regulatory and workplace procedures
- 5 Operate coach/bus associated equipment**
- 5.1 Coach/bus associated equipment is operated in accordance with manufacturer and workplace procedures
 - 5.2 Faults with coach/bus associated equipment are reported according to manufacturer and workplace procedures
 - 5.3 Route destination is clearly displayed on vehicle in accordance with workplace procedures
- 6 Provide customer service to passengers on coach/bus**
- 6.1 Comfort and wellbeing of passengers are managed in accordance with workplace instructions
 - 6.2 Lost property is processed in accordance with workplace procedures
 - 6.3 Assistance is provided for identified customer specific needs and/or luggage and ancillary equipment requirements in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIC3042A Operate coach/bus.

Assessment Requirements for TLIC3042 Operate coach/bus

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying fatigue management techniques
- applying industry and organisational customer service standards
- applying knowledge of relevant legislation and workplace procedures
- applying precautions and required action to minimise, control or eliminate identified hazards
- checking and replenishing fluids and carrying out lubrication processes
- communicating effectively with others
- completing relevant documentation
- implementing responses to changing road conditions
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of coach/bus and its equipment and taking appropriate action
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol including on-board intercom and communications equipment
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- servicing coach/bus and its equipment in terms of maintenance schedule and standard operating procedures
- undertaking pre-operational checks and vehicle handling procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of driver fatigue
- coach/bus controls, instruments and indicators, and their use
- coach/bus handling procedures
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions and related action that can be taken by a driver
- fatigue management strategies including on-road techniques
- lifestyles that promote effective long-term fatigue management
- map reading and road navigation techniques
- pre-operational checks carried out on coaches/buses and related action
- principles of stress management when driving a vehicle
- procedures to be followed in a driving emergency
- relevant state/territory regulations and procedures in relation to bus stops
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- workplace driving and operational instructions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIC3063 Operate vehicle carrying special loads

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to safely operate a vehicle carrying a special load in accordance with road traffic authority and other relevant government regulations and company policies, and to effectively manage hazardous situations.

It involves carrying out pre-operational checks, driving a vehicle carrying special loads, and applying routine vehicle driving principles and procedures to maintain the safety and operation of a commercial vehicle carrying a special load across a variety of driving contexts.

Driving must be carried out in accordance with relevant state/territory roads and traffic authority licence and permit requirements and regulations and specific regulatory and permit requirements for the special load being carried.

Driving is performed with limited supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Carry out pre-operational checks

2 Drive a vehicle carrying special loads

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
- 1.2 Pre-operational checks for special purpose vehicle and associated ancillary equipment are carried out in accordance with manufacturer requirements, government regulations, and workplace policies and procedures
- 1.3 Faults and defects identified during checks are repaired or reported in accordance with workplace procedures
- 2.1 Vehicle is manoeuvred in accordance with regulations/permit requirements for vehicle class involved and load being carried
- 2.2 Vehicles carrying explosives or dangerous goods are driven along designated routes in accordance with relevant codes, government regulations and workplace policies
- 2.3 Load is transported and vehicle is manoeuvred in accordance with required precautions relating to load unusual/special characteristics and/or relevant government regulations for special load including the current Australian Dangerous Goods (ADG) Code and the current Australian Code for the Transport of Explosives by Road and Rail
- 2.4 Signs, placards or indicators are fixed to vehicle as required
- 2.5 Appropriate procedures are followed for load concerned in a driving emergency
- 2.6 Documentation is completed and proofread in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIC3063A Operate vehicle carrying special loads.

Links

Assessment Requirements for TLIC3063 Operate vehicle carrying special loads

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes
- communicating effectively with others
- completing relevant documentation
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and anticipating traffic hazards and taking appropriate action
- monitoring performance of vehicle, its equipment and load, and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- servicing vehicle and its equipment in terms of maintenance schedule and operating procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions and related action that can be taken by a driver
- fatigue management strategies including on-road techniques
- lifestyles that promote effective long-term fatigue management
- map reading and road navigation techniques
- pre-operational checks carried out on vehicle and related action
- procedures to be followed in a driving emergency
- relevant Australian regulations and codes of practice for handling and transporting dangerous goods and hazardous substances, including the current Australian Dangerous Goods (ADG) Code and the current Australian Code for the Transport of Explosives by Road and Rail
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- vehicle controls, instruments and indicators, and their use
- workplace driving and operational instructions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Practical assessment must be in vehicles designed to carry special loads, for example concrete agitator, livestock transporter, armoured car, tanker, refrigerated vehicle, waste vehicle, fresh produce vehicle, car carrier, container carrier, recovery vehicle.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, current ADG Code, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIC4006 Drive multi-combination vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to drive a multi-combination vehicle safely, including maintaining systematic and efficient control of all vehicle functions, coupling and uncoupling dollies, monitoring traffic and road conditions, managing vehicle condition and performance and effectively managing hazardous situations.

Driving must be carried out in accordance with relevant state/territory roads and traffic authority licence requirements and regulations for multi-combination vehicles.

Driving is performed with limited supervision, and duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

C – Vehicle Operation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Drive multi-combination vehicle

- 1.1 Multi-combination vehicle is started, steered, manoeuvred, positioned and stopped in accordance with traffic regulations and manufacturer instructions
- 1.2 Engine power is managed to ensure efficiency and performance, and to minimise engine and transmission damage
- 1.3 Multi-combination vehicle braking system is managed and operated to ensure effective control of vehicle under all conditions
- 1.4 Driving hazards are identified and/or anticipated and avoided or controlled through defensive driving
- 1.5 Multi-combination vehicle is driven in reverse, maintaining visibility and achieving accurate positioning
- 1.6 Multi-combination vehicle is parked, shut down, uncoupled and secured in accordance with manufacturer specifications, traffic regulations and workplace procedures
- 1.7 Appropriate signage and lights are checked for operational effectiveness and for conformity to prescribed traffic regulations
- 1.8 Appropriate procedures are followed in a driving emergency

2 Monitor traffic and road conditions

- 2.1 Most efficient and permissible route of travel is taken by monitoring and anticipating traffic flows and conditions, road standards and other factors likely to cause delays or route deviations
- 2.2 Traffic and road conditions are constantly monitored and acted on to enable safe operation and to ensure no injury to people or damage to property, equipment, loads and facilities

3 Monitor and maintain vehicle performance

- 3.1 Vehicle performance is maintained through pre-operational inspections and vehicle checks
- 3.2 Prime mover, dollies and trailer are aligned and coupled in proper sequence in accordance with manufacturer instructions and workplace procedures
- 3.3 Coupled vehicle is checked and tested to ensure it is correctly secured and to confirm it is fully operational
- 3.4 Performance and efficiency of vehicle operation is monitored

during use

- 3.5 Defective or irregular performance or malfunctions are reported to appropriate authority
- 3.6 Vehicle records are maintained/updated and information is processed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIC4006 Drive multi-combination vehicle

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- checking and replenishing fluids and carrying out lubrication processes
- completing relevant documentation
- monitoring and anticipating traffic hazards and taking appropriate action
- monitoring performance of vehicle, its trailers and its equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with standard operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- causes and effects of fatigue on drivers
- differences between transmission types
- driving hazards and related defensive driving techniques
- efficient driving techniques
- engine power management and safe driving strategies
- factors that increase fatigue-related accidents
- factors that may cause traffic delays and diversions and related action that can be taken
- fatigue management strategies including on-road techniques

- lifestyles that promote effective long-term fatigue management
- map reading and road navigation techniques
- multi-combination vehicle controls, instruments and indicators, and their use
- multi-combination vehicle handling procedures
- pre-operational checks carried out on multi-combination vehicle and related action
- principles of operation of air brakes and procedures for their use
- principles of stress management when driving a vehicle
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental procedures and regulations
- relevant state/territory road traffic authority road rules, regulations, permit and licence requirements
- workplace driving and operational instructions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Assessment of this unit may be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory road traffic authority.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID2003 Handle dangerous goods/hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to handle dangerous goods and hazardous substances in accordance with relevant work health safety (WHS)/occupational health and safety (OHS) regulations concerning the safe handling of dangerous goods and hazardous substances, within the transport and logistics industry.

It includes identifying requirements for working with dangerous goods and/or hazardous substances, confirming site incident procedures and selecting handling techniques.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Identify requirements for working with dangerous goods and/or hazardous substances

- 1.1 Dangerous goods/hazardous substances are identified from information including class labels, manifests and other documentation
- 1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
- 1.3 Storage requirements for dangerous goods/hazardous substances are identified and applied
- 1.4 Legislative requirements for dangerous goods/hazardous substances are used to plan work activities
- 1.5 Handling procedures for different classes and characteristics of goods are observed
- 1.6 Confirmation is sought from relevant personnel where dangerous goods/hazardous materials do not appear to be appropriately marked

2 Confirm site incident procedures

- 2.1 Incident reporting processes are identified
- 2.2 Emergency equipment is located and checked in accordance with workplace procedures and statutory regulations
- 2.3 Emergency procedures are identified and confirmed

3 Select handling techniques

- 3.1 Load handling and shifting procedures are selected in accordance with identified requirements for particular goods
- 3.2 Handling equipment is checked for conformity with workplace requirements and manufacturer guidelines
- 3.3 Suitable signage or placards are checked for compliance with workplace procedures, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2003A Handle dangerous goods/hazardous substances.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID2003 Handle dangerous goods/hazardous substances

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating and working effectively with others
- completing relevant documentation
- determining required permits
- estimating weight and dimensions of load and any special requirements
- identifying and assessing handling and storage precautions and requirements for dangerous goods/hazardous substances
- identifying and selecting safety requirements for handling dangerous goods/hazardous substances
- identifying containers and goods coding, markings and emergency information panels for mode of transport storage selected
- identifying dangerous goods/hazardous substances using labels, International Maritime Dangerous Goods (IMDG) Code markings, HAZCHEM signs and other relevant identification criteria
- identifying job and site hazards, and planning work to minimise risks
- implementing contingency plans
- maintaining workplace records and documentation
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule, predicting consequences and identifying improvements
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, regulations, information and signs
- recognising hazards and applying precautions and required action to minimise, control or eliminate recognised hazards
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures

- selecting and using required personal protective equipment (PPE) conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- selecting appropriate equipment and work systems including PPE
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- equipment applications, capacities, configurations, safety hazards and control mechanisms
- housekeeping standards and procedures
- permit and licence requirements
- problems that may arise when handling of dangerous goods and hazardous substances and actions that should be taken to prevent or solve these problems
- relevant aspects of current Australian Dangerous Goods (ADG) Code and relevant Australian Standards
- relevant regulations and codes concerning handling dangerous goods/hazardous substances
- risks when handling dangerous goods/hazardous substances and related precautions to control risk
- workplace procedures for handling and storing dangerous goods/hazardous substances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy

requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, current ADG Code, codes of practice and operation manuals
- relevant materials, tools, equipment, and personal protective equipment currently used in industry.

TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload goods and cargo in accordance with relevant state/territory roads and traffic authority regulations/permit requirements.

It includes loading and unloading goods and cargo, securing and protecting a load and completing all required documentation.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Load and unload goods/cargo**
 - 1.1 Load characteristics are identified and taken into account when determining appropriate loading and unloading workplace procedures
 - 1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
 - 1.3 Dangerous or hazardous goods are identified and handled in accordance with the current Australian Dangerous Goods (ADG) Code and other relevant regulations/permit requirements
 - 1.4 Load is packed/unpacked to make safe and effective use of available spaces
 - 1.5 Goods/cargo are loaded in accordance with relevant mass and loading regulations and workplace procedures
 - 1.6 Lifting aids and appliances are selected and used to aid loading procedures in accordance with workplace procedures and safety legislation
 - 1.7 Unloading activities are conducted in a safe and efficient manner taking into account suitable locations, stowage, safe use of equipment and balance of remaining load
 - 1.8 Goods requiring special handling and/or documentation are identified and workplace procedures are followed
 - 1.9 Relocated material is restacked appropriate for transport method, safe height, weight loading, size and crushability of goods
- 2 Secure and protect load**
 - 2.1 Load distribution is checked to ensure it is even, legal and within safe working capacity
 - 2.2 Load is checked to ensure dangerous goods and hazardous substances are appropriately segregated in accordance with current ADG Code
 - 2.3 Load is secured using correct load restraint and protection equipment for different loads, carrying and storage conditions
 - 2.4 Load is protected in accordance with legal and workplace safety requirements
- 3 Complete**
 - 3.1 Load is inspected and checked for security to travel, in accordance with relevant regulations/permit requirements

documentation

and current ADG Code, as required

- 3.2 All required goods documentation is completed in accordance with workplace requirements including current ADG Code, as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2004A Load and unload goods/cargo.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLID2004 Load and unload goods/cargo

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying required action to minimise, control or eliminate identified hazards
- completing relevant documentation
- estimating load size, shape and special requirements and taking appropriate action
- identifying containers and goods coding, Australian Dangerous Goods (ADG) and International Maritime Dangerous Goods (IMDG) Code markings and emergency information panels, and taking appropriate action
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in cargo and equipment in accordance with operating procedures
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information, signs and labels
- applying relevant legislation and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- chain of responsibility workplace procedures
- housekeeping workplace procedures
- national load restraint guidelines
- problems that may arise when loading and unloading goods and cargo and actions that should be taken to prevent or solve these problems
- relevant Australian and international regulations and codes of practice for handling and transporting dangerous goods and hazardous substances
- relevant Australian Standards and regulations including state/territory mass and loading regulations
- risks when loading and unloading goods/cargo and related precautions to control risk
- safe work methods for securing load
- security awareness requirements when loading and unloading vehicles and in particular recognising, isolating and reporting suspicious cargo and goods
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning the lifting and movement of loads
- workplace procedures and policies for loading and unloading goods/cargo.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, national Load Restraint Guide (LRG), codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in

industry.

TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate a forklift in compliance with the relevant state/territory authority licence requirements and regulations, in a variety of operational contexts.

It includes checking forklift condition, driving forklift to fulfil operational requirements, and monitoring and maintaining forklift performance and site conditions.

Assessment of this unit will usually be undertaken within a licensing examination conducted by, or under the authority of, the relevant state/territory work health and safety (WHS)/occupational health and safety (OHS) authority.

Operation of a forklift is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Check forklift condition

- 1.1 Condition of forklift is checked for compliance with WHS/OHS and workplace requirements for warning devices, manufacturer specifications and nature of load shifting task
- 1.2 Attachments are checked to ensure appropriate adjustment and operation
- 1.3 Mirrors and seats are adjusted for safe operation by driver
- 1.4 Logbooks are checked and appropriate workplace documentation is completed in accordance with workplace requirements

2 Drive forklift

- 2.1 Forklift is started, steered, manoeuvred, positioned and stopped in accordance with regulations and manufacturer instructions
- 2.2 Engine power is managed to ensure efficiency and performance and to minimise engine and gear damage
- 2.3 Operational hazards are identified and/or anticipated and avoided or controlled through defensive driving and appropriate hazard control techniques
- 2.4 Forklift is driven in reverse, maintaining visibility and achieving accurate positioning
- 2.5 Forklift is parked, shut down and secured in accordance with manufacturer specifications, regulations and workplace procedures

3 Operate forklift to handle loads

- 3.1 Lifting task to be undertaken is appropriately planned, and correct lifting truck and attachments are selected
- 3.2 Load is lifted, carried, lowered and set down in accordance with WHS/OHS legislation, manufacturer specifications and company procedures

4 Monitor site conditions

- 4.1 Hazards and traffic flow are identified when selecting the most efficient route and appropriate adjustments are made
- 4.2 Site conditions are assessed to enable safe operations and to ensure no injury to people or damage to property, equipment, loads or facilities occurs

5 Monitor and maintain forklift performance

- 5.1 Performance and efficiency of vehicle operation is monitored during use
- 5.2 Defective/irregular performance and malfunctions are reported to relevant personnel
- 5.3 Forklift records are maintained/updated in accordance with workplace procedures and legislative requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2010A Operate a forklift.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID2010 Operate a forklift

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids, and carrying out lubrication processes
- communicating and working effectively with others
- completing relevant documentation
- ensuring forklift and its equipment are maintained in terms of service schedule and standard operating procedures
- identifying points of balance and safe lifting positions on a range of loads when operating a forklift (including accessories)
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring performance of forklift and its equipment, and taking appropriate action as required
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- efficient driving techniques
- engine power management and safe operating strategies
- forklift controls, instruments and indicators, and their use
- forklift handling procedures
- high risk work licence requirements
- operating hazards and related defensive driving and hazard control techniques
- operational emergency procedures
- pre-operational checks carried out on forklift and related action
- principles of stress management when driving a forklift
- relevant duty of care requirements for operating a forklift
- relevant WHS/OHS and environmental procedures and regulations
- site layout and obstacles
- workplace operating procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLID2013 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to move materials mechanically using automated equipment such as automatic guided vehicles, tow motors, low level order pickers, conveyor systems and mechanised pallet movers.

It includes selecting appropriate mechanical moving equipment, moving materials/goods in accordance with operational requirements, checking condition of materials/goods and completing all required documentation.

Work must be carried out in compliance with relevant work health and safety (WHS)/occupational health and safety (OHS) regulations concerning moving materials mechanically using automated equipment.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Select load moving equipment

1.1 Mechanised handling equipment, route to be taken and procedures to be used are selected appropriate to goods characteristics

1.2 Dangerous goods and hazardous materials are identified and handled in accordance with codes of practice, WHS/OHS requirements and workplace procedures

2 Move goods

2.1 Hazards are identified, risks are assessed and control measures are implemented

2.2 Goods are moved using selected materials handling equipment in accordance with WHS/OHS regulations, manufacturer instructions and workplace procedures

2.3 Problems moving goods and materials using automated equipment are identified and reported in accordance with workplace procedures

3 Check goods and complete documentation

3.1 Relocated goods are inspected for possible damage during transit/movement and appropriate action is taken

3.2 Appropriate documentation is completed to track moved goods in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2013A Move materials mechanically using automated equipment.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLID2013 Move materials mechanically using automated equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- checking and replenishing fluids and carrying out lubrication processes during work activities
- communicating effectively with others
- ensuring servicing of automated equipment in terms of maintenance schedule and standard operating procedures
- implementing contingency plans
- monitoring and prioritising work activities in terms of planned schedule
- monitoring performance of automated equipment and taking appropriate action as required
- operating and adapting to differences in equipment in accordance with operating procedures
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for using automated equipment to move materials mechanically
- problems that may occur and appropriate action that can be taken to resolve these problems
- purpose, characteristics, capabilities, requirements and limitations of automated materials moving equipment
- relevant regulations, workplace procedures and policies for using automated equipment to move materials mechanically
- relevant WHS/OHS and environmental protection procedures and guidelines
- risks when using automated equipment to move materials and related precautions to control the risks
- site layout and obstacles.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLID2016 Load and unload explosives/dangerous goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to load and unload explosives/dangerous goods in a range of operational situations, in accordance with relevant Australian and state/territory regulations including current Australian Dangerous Goods (ADG) Code, current Australian Code for the Transport of Explosives by Road and Rail (AE Code), and mass and loading regulations.

It includes identifying explosives/dangerous goods, loading and unloading explosives/dangerous goods using appropriate equipment, securing and protecting vehicle load, and checking vehicle to ensure load is secure and vehicle is marked in accordance with regulatory requirements.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

D – Load Handling

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Prepare to load and unload vehicle	<p>1.1 Explosives/dangerous goods are identified and their characteristics are taken into account in accordance with relevant emergency procedures when determining appropriate handling, loading and storage procedures</p> <p>1.2 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards</p> <p>1.3 Compatibility of explosives/dangerous goods is taken into account when assembling and segregating cargo for loading</p> <p>1.4 Vehicle/loading equipment is checked to ensure it is suitable to handle/carry load</p>
2 Load/unload vehicle	<p>2.1 Vehicle is loaded/unloaded in accordance with workplace procedures and current ADG/AE Code as required</p> <p>2.2 Load is segregated according to class and subsidiary risk, and load distribution is checked in accordance with workplace procedures, relevant mass and loading regulations, and current ADG/AE Code as required</p> <p>2.3 Personal protective equipment is used during loading/unloading operations as required for type of explosives/dangerous goods concerned</p> <p>2.4 Emergency procedures are followed in an incident or accident when loading or unloading explosives and/or dangerous goods</p>
3 Secure and protect vehicle load	<p>3.1 Vehicle load is secured using correct load restraint and protection equipment for different loads, vehicles and carriage conditions concerned</p> <p>3.2 Load is protected in accordance with legal and workplace safety requirements</p> <p>3.3 Load distribution is checked to ensure it is even, legal and within safe working capacity of vehicle</p> <p>3.4 Vehicle is clearly marked/placarded to indicate carriage of explosives and/or dangerous goods, in accordance with government regulations and workplace procedures</p>
4 Check vehicle	<p>4.1 Loaded vehicle is inspected and checked to ensure it is suitable to carry explosives/dangerous goods, and load</p>

weight and dimensions are within vehicle safe carrying capacity and equipment capability

- 4.2 Loaded vehicle is checked to ensure it can be safely parked and secured
- 4.3 Dangerous goods declaration and required transportation documentation for cargo is completed in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID2016A Load and unload explosives and dangerous goods.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID2016 Load and unload explosives/dangerous goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- communicating and working effectively with others
- completing relevant documentation
- estimating size, shape and special requirements of loads
- identifying and interpreting containers and goods coding, markings and emergency information panels for mode of transport/storage selected
- identifying load characteristics, loading equipment and related practices
- identifying load label in accordance with identified classification and subsidiary risk information
- identifying markings/placards for vehicle in accordance with relevant regulatory requirements
- implementing contingency plans and modifying activities depending on operational contingencies, risk situations and environments
- loading and unloading explosives/dangerous goods safely, in accordance with workplace procedures and current Australian Dangerous Goods (ADG)/current Australian Code for the Transport of Explosives by Road and Rail (AE Code) requirements
- monitoring and prioritising work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting /rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- segregating, distributing and securing load for safe transport in accordance with regulations and current ADG/AE Code requirements
- selecting and using required personal protective equipment conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- using manual handling techniques and operating manually-operated load shifting equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics of various classes of explosives/dangerous goods relevant to handling and transport
- compatibility of various types of explosives and/or dangerous goods
- housekeeping standards and procedures
- manual handling techniques and manually-operated load shifting equipment required for loading, unloading and handling explosives/dangerous goods
- methods of placarding or marking a vehicle carrying explosives and/or dangerous goods
- methods of securing a load on a vehicle
- WHS/OHS procedures and guidelines concerning lifting and moving loads
- relevant Australian explosives and/or dangerous goods codes and state/territory regulations for identifying, handling and marking explosives/dangerous goods
- relevant state/territory mass and loading regulations
- risks and hazards when loading, unloading and handling explosives/dangerous goods, and related precautions to control the risk
- workplace procedures and policies for loading and unloading explosives/dangerous goods.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, ADG/AE Code,

codes of practice and operation manuals

- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLID3015 Identify and label explosives/dangerous goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to identify and label explosives/dangerous goods, in accordance with relevant Australian state/territory regulators and authorities concerned with the carriage of explosives and dangerous goods. This includes the current Australian Dangerous Goods (ADG) Code, Australian Code for the Transport of Explosives by Road and Rail (AE Code) and workplace procedures.

It includes assessing, handling and labelling explosives and/or dangerous goods, and complying with all required documentation.

Work is performed under limited or minimum supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.	demonstrate achievement of the element.
1 Assess explosives/dangerous goods	<p>1.1 Load is checked for explosives/dangerous goods in accordance with relevant codes and government regulations</p> <p>1.2 Types of explosives/dangerous goods are identified from labels, current ADG/AE Code declarations and placarding, in accordance with workplace procedures and all required action is taken to ensure compliance with relevant government regulations and current ADG/AE Code, as required</p> <p>1.3 Load hazards are identified from labels and safety data sheets (SDSs)/material safety data sheets (MSDSs) and required action is taken to minimise, control or eliminate identified hazards</p>
2 Handle explosives/dangerous goods	<p>2.1 Identified explosives/dangerous goods are handled and loaded/unloaded in accordance with regulatory requirements, codes, national Load Restraint Guide (LRG) and workplace procedures</p> <p>2.2 Appropriate personal protective equipment is used when handling explosives/dangerous goods in accordance with class, subsidiary risk and SDS/MSDS information</p> <p>2.3 Identified hazards posed by explosives/dangerous goods concerned are taken into account when handling different types of load</p> <p>2.4 When loading/storing explosives/dangerous goods, segregation procedures are followed in accordance with class and subsidiary risk information</p>
3 Label explosives/dangerous goods	<p>3.1 All packages/containers are labelled with class and subsidiary risk information, in accordance with current ADG/AE Code and workplace procedures as required</p> <p>3.2 Dangerous goods declaration is included with manifest and other shipping documents</p> <p>3.3 Vehicles carrying explosives/dangerous goods are placarded in accordance with current ADG/AE Code, as required</p>
4 Complete documentation	<p>4.1 Required transport documents are confirmed</p> <p>4.2 All required transport documents are completed in accordance with current ADG/AE Code and workplace procedures as required</p>

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLID3015A Identify and label explosives and dangerous goods.

Links

Companion Volume implementation guides are found in VETNet -
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLID3015 Identify and label explosives/dangerous goods

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- communicating effectively with others
- completing relevant documentation
- correctly marking/labelling explosives and dangerous goods
- handling explosives and/or dangerous goods in accordance with regulatory requirements, codes, national Load Restraint Guide (LRG) and employer policy as required
- identifying and using required personal protective equipment
- identifying explosives and dangerous goods from labels, in accordance with regulatory requirements and practices
- identifying hazards from labels of explosives and dangerous goods
- interpreting and following operational instructions and prioritising work
- interpreting safety data sheets (SDSs)/material safety data sheets (MSDSs), containers and goods coding, markings and other information describing explosives and dangerous goods including emergency information panels for mode of transport/storage selected
- locating, interpreting and applying relevant codes and regulations
- maintaining workplace records for explosives and dangerous goods
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with workplace procedures
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and using required personal protective equipment, and conforming to industry and work health safety (WHS)/occupational health and safety (OHS) standards
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics of explosives and dangerous goods relevant to handling and transport
- compatibility of various types of explosives and dangerous goods
- housekeeping standards and procedures
- relevant Australian and state/territory regulations and codes for identifying and labelling explosives and dangerous goods including the current Australian Dangerous Goods (ADG) Code and Australian Code for the Transport of Explosives by Road and Rail (AE Code)
- risks and hazards when loading, unloading and handling explosives and dangerous goods, and related precautions to control the risk
- site layout and obstacles
- WHS/OHS procedures and guidelines concerning lifting and moving loads
- workplace procedures and policies for identifying and labelling explosives and dangerous goods.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, current ADG/AE Code, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIE0002 Process workplace documentation

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to process workplace documentation and gather data in accordance with workplace requirements. Processing documentation/data is carried out as an integral part of work operations in the context of the workplace concerned.

It includes planning and completing documentation and data gathering to fulfil an identified purpose including legislative obligations.

Work may be performed in a team or autonomous working situations.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Plan documentation/data gathering

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Purpose of workplace documentation/data gathering is identified and confirmed in accordance with legislative obligations and workplace procedures

1.2 Information needed for completing workplace

documentation/data is identified as required in accordance with legislative obligations and workplace procedures

2 Complete documentation/data gathering

- 2.1** Data is gathered, required documentation is prepared and forms are completed, in accordance with workplace policies and procedures
- 2.2** Information/data is gathered and entered into computerised system as required in accordance with regulatory requirements and workplace procedures
- 2.3** Workplace documents and electronic applications and systems are maintained accurately and in a timely manner in accordance with regulatory requirements and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE2008 Process workplace documentation.

Links

Companion Volume Implementation Guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIE0002 Process workplace documentation

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) legislation and workplace procedures
- completing workplace documentation and forms
- ensuring processed information and data is checked for relevance, accuracy and completion
- operating and adapting to differences in electronic applications and systems in accordance with standard operating procedures
- reading, interpreting and organising information and data needed for completing and processing workplace documentation and forms
- working collaboratively with others when completing and processing workplace documentation, data and forms
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment
- writing and entering information and data into electronic applications and systems in a timely manner.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- procedures for processing workplace documentation and data using relevant workplace technology
- relevant procedures and duty of care requirements
- relevant WHS/OHS/OSH legislation, regulatory requirements and workplace responsibilities
- requirements and sources for workplace documentation including:
 - data
 - forms
 - logs
 - diaries
- typical problems in processing workplace documentation and data and appropriate action and

solutions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations*, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations*, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment must include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, electronic applications and systems, equipment and personal protective equipment (PPE) currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIE1003 Participate in basic workplace communication

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to participate effectively in basic workplace communication as an integral part of routine work in the context of the workplace concerned.

It includes communicating information about routine tasks, processes, events or skills; participating in group discussions to achieve appropriate work outcomes; and representing group views to others.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Communicate information about 1.1 Appropriate form of communication is selected

- routine tasks, processes, events or skills** and used to meet required purpose
- 1.2 Effective listening skills are used
 - 1.3 Questions are used to gain additional information and to clarify understanding
 - 1.4 Sources of information relevant to communication are identified
 - 1.5 Information is selected and sequenced correctly
 - 1.6 Verbal and written reporting is undertaken as required
 - 1.7 Communication is undertaken in familiar and unfamiliar situations, and with familiar and unfamiliar individuals and groups
- 2 Participate in group discussions to achieve appropriate work outcomes**
- 2.1 Responses are sought from and ideas are shared with others in the group
 - 2.2 Constructive contributions are made in terms of the process involved
 - 2.3 Goals or outcomes are communicated and/or recorded
- 3 Represent group views to others**
- 3.1 Group views and opinions are interpreted and clarified as required
 - 3.2 Context of and reasons for representing group views to others are confirmed and explained
 - 3.3 Groups views and opinions are accurately reflected in representation to others

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE1003A Participate in basic workplace communication.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIE1003 Participate in basic workplace communication

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others when completing basic work activities
- completing relevant documentation
- modifying communication activities depending on operational contingencies and environments
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures and information
- reporting and/or rectifying identified problems in communication promptly, in accordance with workplace procedures
- responding appropriately to cultural preferences in the workplace, including modes of behaviour and interactions with others.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic communication techniques including barriers to effective communication and how to overcome them
- basic principles of effective communication
- protocols and procedures for communicating with others using relevant workplace technology
- relevant procedures and duty of care requirements
- techniques for communicating effectively with people whose first language is not English

- techniques for communicating effectively with people whose understanding of English is limited
- typical communication problems and appropriate action and solutions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLIE2007 Use communications systems

Modification History

Release. ISC Upgrade - Minor edits to text in Performance Criteria.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use communications systems in accordance with relevant regulations and workplace procedures.

It includes identifying system features, operating a communications system effectively, using appropriate communications system protocols, maintaining equipment and completing documentation.

It involves applying established communication principles and practices, and using local technical, colloquial language and vocabulary in day-to-day communication.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

1 Check communications system requirements

demonstrate achievement of the element.

- 1.1 System features and control functions are identified
- 1.2 Impact of battery and signal levels on system's capability is determined
- 1.3 Mobile equipment is set up to optimise communication
- 1.4 Channels are selected appropriate to the communication as required

2 Communicate using communications technology

- 2.1 System checks are carried out to confirm communications system is operational, in accordance with manufacturer's instructions and workplace procedures
- 2.2 Communications system is operated safely in accordance with manufacturer's instructions, workplace procedures and regulatory requirements
- 2.3 Telephone and radio security is maintained in accordance with workplace procedures
- 2.4 Channel selection is appropriate for the location and type of communication
- 2.5 Messages are transmitted clearly and precisely, and user ethics and protocols are followed
- 2.6 Public address (PA) system is used, as required, to communicate with passengers and/or crew in accordance with standard operating procedures
- 2.7 Incoming messages are received and answered promptly and courteously in accordance with operating procedures and regulatory requirements
- 2.8 Appropriate language, protocols, procedures and codes are followed when using communications systems
- 2.9 Received messages are interpreted and recorded in accordance with workplace procedures
- 2.10 Clear and unambiguous vocal communication is used

3 Maintain communications equipment operational status

- 3.1 Equipment is checked and maintained in working order in accordance with workplace procedures
- 3.2 Minor communications systems faults are promptly

identified, diagnosed, and repaired or reported in accordance with workplace procedures

- 4 Complete documentation**
- 4.1 Appropriate communications records are maintained in accordance with workplace procedures
 - 4.2 Communications records are stored/filed as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE2007A Use communication systems.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIE2007 Use communications systems

Modification History

Release. ISC Upgrade - Minor edits to text in Performance Criteria.

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist when using communications systems
- communicating and working effectively with others using available communications systems
- completing documentation related to work activities when using communications systems
- following communications security procedures
- identifying and using required communications technology
- implementing contingency plans
- modifying activities depending on differing operational contingencies, risk situations and environments
- monitoring communications equipment performance and taking appropriate action as required
- planning, monitoring and prioritising work activities in terms of planned schedule, including predicting consequences and identifying improvements
- operating and adapting to differences in communications equipment in accordance with standard operating procedures
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- reading, interpreting and following communications systems instructions, procedures and relevant legislation
- using communications equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- basic communication techniques including barriers to effective communication and how to overcome them
- basic principles of effective communication
- features of various communications systems
- minor routine maintenance procedures for communications equipment
- pre-operational checks for communications systems and equipment
- procedures and protocols for using communications systems during an emergency
- protocols and procedures for communicating with others using relevant communications technology including PA systems
- relevant work health and safety work health and safety (WHS)/occupational health and safety (OHS) responsibilities
- relevant procedures and duty of care requirements
- typical problems that may occur when using communications systems, and appropriate action and solutions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to estimate and calculate mass, area and quantify dimensions of loads in accordance with workplace requirements and relevant regulations, as part of work functions within the transport and logistics industry.

It includes estimating loads to be transported or placed in storage, estimating load limits of transport and/or storage systems, and organising a load.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Estimate loads for transport or storage**
 - 1.1 Order forms/work orders are read and requirements are noted
 - 1.2 Shape, balance characteristics, dimensions and mass of load/s are identified
 - 1.3 Area/volume required for storage is estimated
 - 1.4 Weights and volumes are totalled to calculate load requirements of transport or storage system
- 2 Estimate load limits of transport and/or storage**
 - 2.1 Allowable load limits for storage and/or transport systems are identified in accordance with workplace procedures
 - 2.2 Capacity of transport and storage systems in terms of mass, area and volume is calculated
- 3 Organise load**
 - 3.1 Load/s is restricted to allowable range
 - 3.2 Load/s is spread to ensure safe weighting on pallets, trucks, platforms or other storage or transport systems
 - 3.3 Appropriate workplace documentation is completed

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3002A Estimate/calculate mass, area and quantify dimensions.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIE3002 Estimate/calculate mass, area and quantify dimensions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- identifying, selecting and using relevant calculators, computing and office equipment
- interpreting and following operational instructions and prioritising work
- performing basic mathematical operations required when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities including addition, subtraction, multiplication and division
- reading and interpreting relevant instructions, procedures, information and labels
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to workplace activities
- documentation requirements for the workplace activities concerned
- focus of operation of work systems, equipment, management and site operating systems for transporting and/or storing goods and stock
- problems that may occur when estimating and/or calculating mass, area and volumes of loads and transport/storage facilities, and appropriate action that can be taken to resolve these problems
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines

- workplace procedures and policies for estimating and/or calculating mass, area and volumes of loads, and transport and storage facilities, including the quantification of dimensions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIE3004 Prepare workplace documents

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare workplace documents and forms in accordance with workplace requirements and applicable regulations or codes, as part of work activities within the transport and logistics industry.

It includes planning and preparing simple workplace documents and gathering relevant information enabling the completion of a workplace form.

Work is performed under general supervision within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | | |
|-------------------------------------|-----|--|
| 1 Plan workplace document | 1.1 | Purpose and audience for document are identified |
| | 1.2 | Appropriate format for document is established to meet workplace requirements |
| | 1.3 | Relevant information is identified and selected for inclusion in document |
| 2 Prepare workplace document | 2.1 | Document is drafted in accordance with workplace procedures and conventions for sentence construction, grammar, spelling, style, punctuation and vocabulary appropriate for reader/s |
| | 2.2 | Document is edited and presented in a final version appropriate to task |
| 3 Complete workplace forms | 3.1 | Work related form/s is interpreted to identify information required for its completion |
| | 3.2 | Required information for completion of form is gathered from relevant sources in accordance with workplace procedures |
| | 3.3 | Form/s is completed in accordance with workplace policy and procedures, and applicable regulations and codes |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3004A Prepare workplace documents.

TLIE3012 Consolidate manifest documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to consolidate manifest documentation in accordance with relevant codes of practice and regulations for freight carriage.

It includes identifying and processing documentation required in accordance with workplace procedures.

Work is performed under general supervision, and with duty of care responsibility for self and others in achieving the prescribed outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- | | |
|--|--|
| 1 Identify required documentation | 1.1 Relevant documentation is collated and checked to ensure all appropriate information has been entered |
| | 1.2 Omissions/discrepancies are noted and reported in accordance with workplace procedures |
| | 1.3 Identification codes, manifest codes, details of dangerous goods declarations and pertinent data are entered into record system in accordance with workplace procedures and, as required, statutory requirements |
| | 1.4 Relevant clearances for moving goods/freight are checked and, as required, actions to rectify deficiencies are followed in accordance with workplace procedures |
| 2 Process documentation | 2.1 Files/system are amended including the appending of all relevant data/information |
| | 2.2 Tracking/monitoring processes are completed and documentation is forwarded in accordance with workplace procedures and, as required, statutory requirements |

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3012A Consolidate manifest documentation.

Assessment Requirements for TLIE3012 Consolidate manifest documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- reporting and/or rectifying identified problems that may arise promptly, in accordance with regulatory requirements and workplace procedures
- reading and interpreting relevant instructions, procedures, information and labels
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational procedures for document control
- relevant codes of practice and legislative requirements including current Australian Dangerous Goods (ADG) Code and relevant freight regulations
- sources of information/documentation needed when consolidating manifests
- workplace procedures to be followed when consolidating manifests.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIE3018 Maintain freight records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to maintain freight records in accordance with regulations and workplace requirements, as part of work activities in the transport and logistics industry.

It includes recording all freight receipts and despatch documentation in manual and/or computer-based systems.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Record freight receipt

1.1 Freight is identified and consignment/cartnote details are confirmed

- 1.2 Documentation is appropriately actioned in accordance with workplace procedures and legislative requirements
 - 1.3 Dangerous goods are identified and appropriate documentation is prepared and attached, in accordance with workplace procedures and legislative requirements
 - 1.4 Freight information is recorded on workplace freight tracking system
 - 1.5 Freight is directed for loading or storage as indicated by documentation
- 2 Record freight despatch**
- 2.1 Documentation for freight despatch is checked, verified and forwarded in accordance with workplace procedures
 - 2.2 Loads not cleared due to incorrect documentation are appropriately processed, in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE3018A Maintain freight records.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIE3018 Maintain freight records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- directing freight for loading and storage
- identifying freight including dangerous goods, and preparing and attaching appropriate documentation
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant computer, communications and office equipment when maintaining freight records.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant for maintaining freight records, including the Australian Dangerous Goods (ADG) Code and relevant bond, quarantine or other legislative requirements
- documentation requirements for maintaining freight records including workplace freight tracking systems
- freight transport timetables, yard/terminal facilities, and site layout
- housekeeping standards and procedures
- operational work systems, equipment, management and site operating systems for

maintaining freight records

- problems that may occur and appropriate action that can be taken to resolve these problems
- types of goods and related handling and documentation requirements including dangerous goods and hazardous substances
- workplace procedures and policies for maintaining freight records, including relevant international code and regulation requirements.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIE4006 Collect, analyse and present workplace data and information

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to collect, analyse and present workplace data and information as part of workplace operations.

It includes identifying required information, analysing and preparing information for use, explaining information and presenting workplace information to others.

Work is performed under general or limited supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Collect required data

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Purpose of data and information collection is confirmed

- and information**
 - 1.2 Sources of data and information are established
 - 1.3 Appropriate data and information is identified
- 2 Prepare data and information for use**
 - 2.1 Data and information is collated and analysed in accordance with workplace procedures
 - 2.2 Data and information are organised and presented in a logical manner
 - 2.3 Checks for accuracy are made
- 3 Explain information**
 - 3.1 Data and information collection and analysis is explained to others in a way that effectively contributes to workplace operations
 - 3.2 Outcomes of data and information analysis are presented to others using appropriate presentation modes and resources
 - 3.3 Questions are answered and appropriate clarification is given
- 4 Present workplace information**
 - 4.1 Information is processed and forwarded to appropriate personnel in accordance with workplace procedures
 - 4.2 Processed information is collated and stored in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE4006A Collect, analyse and present workplace data and information.

Links

Assessment Requirements for TLIE4006 Collect, analyse and present workplace data and information

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others when collecting, analysing and presenting workplace data and information
- completing relevant documentation
- identifying and using required communications and presentation technology
- monitoring and prioritising work activities in terms of planned schedule
- planning own work including predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions and procedures
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- presentation and communication techniques including barriers to effective communication and how to overcome them
- principles of effective presentation and communication of information
- protocols and procedures for the collection, analysis and presentation of workplace data and information using relevant technology
- relevant procedures and duty of care requirements
- sources of data and information and procedures for processing the information for workplace use
- typical presentation and communications problems, and appropriate action and solutions.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIE4013 Apply workplace statistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply statistical data in the workplace. The application of workplace statistics is carried out as an integral part of work operations in the context of the workplace concerned.

It includes identifying situations where statistics are used in the workplace, collecting numerical data, processing and presenting data, and interpreting trends and patterns from numerical data. It includes applying established statistical principles for work outcomes within workplace operations.

Work is performed under general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes within organisational policy and procedures.

The unit generally applies to those with responsibility for resource coordination and allocation, and who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

E – Communication and Calculation

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify situations where statistics are used in the workplace

- 1.1 Types of statistical representations of data are identified
- 1.2 Users of statistical data in the workplace are identified
- 1.3 Statistical data representations are matched for appropriate workplace applications

2 Collect numerical data

- 2.1 Purpose of data collection is identified
- 2.2 Sources of information are established
- 2.3 Data collection methods are used
- 2.4 Mathematical processes are used to arrange data
- 2.5 Data collected is checked for accuracy
- 2.6 Potential for inaccurate results arising from variables is estimated and outlined

3 Process and present data

- 3.1 Data collected is represented in graphs, tables, averages and percentages as required
- 3.2 Spreadsheets and flowcharts are used to present data

4 Interpret trends and patterns from numerical data

- 4.1 Non-conforming results outside of predicted outcome/s are noted and reasons are identified
- 4.2 Trends or patterns in data are noted
- 4.3 Possible reasons for trends or patterns are generated
- 4.4 Potential solutions are identified
- 4.5 Appropriate techniques are used to encourage participation of team/group members to interpret and use statistical data

5 Apply outcomes of statistical analysis to workplace operations

- 5.1 Interpreted data is used to identify possible improvements in work processes and organisation
- 5.2 Appropriate action is initiated to implement identified strategies for improving processes or work organisation in accordance with workplace procedures
- 5.3 Improvements are statistically monitored and evaluated in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIE4013A Apply workplace statistics.

Links

Assessment Requirements for TLIE4013 Apply workplace statistics

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others
- completing relevant documentation
- interpreting data and providing appropriate, timely information on the outcomes of data analysis to appropriate personnel
- reading, interpreting and following relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with workplace procedures
- selecting and appropriately applying technology, information systems and procedures to workplace tasks
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- coaching and mentoring approaches to support team members to develop knowledge and skills in statistical collection, collation and analysis
- customer and supplier contact and coordination
- operational recording, reporting and statistical analysis systems and resources
- relevant procedures and duty of care requirements
- resource availability including the processing capacity of equipment and software systems for statistical data analysis

- workplace business policies and plans including procedures for reporting performance
- workplace protocols and procedures for applying workplace statistics within work activities.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIF2012 Apply safe procedures when handling/transporting dangerous goods or explosives

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply safe handling strategies when handling/transporting dangerous goods or explosives.

It includes driving vehicle concerned in a safe manner and consulting with relevant authorities/persons in accordance with regulatory requirements.

Work must be carried out in accordance with relevant Australian and state/territory regulations and codes, including current:

- Australian Code for the Transport of Explosives by Road and Rail (AE Code)
- Australian Dangerous Goods (ADG) Code
- Code for the Safe Transport of Radioactive Material.

Work is performed under limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Operate equipment and/or vehicle in a safe manner

- 1.1 Job hazards are identified and required action is taken to minimise, control or eliminate identified hazards
- 1.2 Safety equipment is checked for serviceability and required quantities and types
- 1.3 Equipment/vehicle is operated safely in accordance with the relevant industry regulations, licence/permit requirements/or standards and as directed by police and/or competent authority
- 1.4 Safety guidelines and codes of practice are applied in accordance with workplace procedures
- 1.5 Dangerous goods/explosives/hazardous substances are handled/conveyed in accordance with relevant government regulations and current ADG Code
- 1.6 Relevant emergency procedures are assessed relative to the dangerous goods/explosives/hazardous substances concerned
- 1.7 Emergency procedures are instigated in accordance with current ADG Code, relevant codes of practice and government regulations, to ensure precautions are taken consistent with directions set out in emergency workplace procedures
- 1.8 Procedures are implemented to minimise damage to equipment, facilities and the environment, and to minimise injury to personnel

2 Consult with relevant authorities/persons

- 2.1 Dangerous goods occurrences are reported in specified timeframes to competent authority, fire brigade and/or police using appropriate workplace procedures, in accordance with relevant regulatory requirements
- 2.2 Assistance is provided to competent authority as requested
- 2.3 Other persons within affected emergency area are warned about hazard/s in accordance with workplace procedures as required

- 2.4 Documentation is completed and proofread in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF2012A Apply safe procedures when handling/transporting dangerous goods or explosives.

Assessment Requirements for TLIF2012 Apply safe procedures when handling/transporting dangerous goods or explosives

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- communicating effectively with others
- completing relevant documentation
- handling/transporting dangerous goods/explosives/hazardous substances safely, in accordance with workplace procedures and regulatory requirements
- identifying characteristics and hazards of dangerous goods/explosives/hazardous substances being handled
- identifying, selecting and using appropriate handling/transportation equipment, vehicles, personal protection equipment and related procedures
- interpreting and following operational instructions and prioritising work
- interpreting relevant signs, placards, labels and codes
- locating, interpreting and applying relevant information
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in handling and transportation equipment in accordance with operating procedures
- reading and interpreting relevant instructions, procedures, information and signs
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and use required personal protective equipment conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- characteristics of various dangerous goods, explosives or hazardous substances and their implications for handling and transport
- company incident reporting system and employer responsibility to report incidents to relevant government authority
- compatibility of various types of dangerous goods, explosives or hazardous substances
- emergency management plan
- housekeeping standards and procedures
- relevant Australian and state/territory regulations and codes pertaining to identifying, handling and marking dangerous goods, explosives or hazardous substances including current ADG Code
- risks and hazards when handling and conveying dangerous goods, explosives or hazardous substances, and related precautions to control the risk
- site layout and obstacles
- WHS/OHS procedures and guidelines for lifting and movement of loads
- workplace procedures for handling and transporting dangerous goods, explosives or hazardous substances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIF2018 Operate firefighting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to operate firefighting equipment. Work is undertaken in accordance with relevant codes of practice, manufacturer's instructions and workplace emergency procedures, as part of work activities within the transport and logistics industry.

It includes checking, identifying, selecting and using the appropriate firefighting equipment.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Check firefighting

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Firefighting equipment is checked for serviceability in accordance with manufacturer's specifications and regulatory

equipment	requirements
	1.2 Non-functioning equipment or equipment past its service date is identified and reported to designated personnel for replacement or service
2 Use firefighting equipment	2.1 Equipment and personal safety equipment used for fighting fires are correctly selected for type of fire in accordance with manufacturer's instructions
	2.2 Fire is controlled using firefighting equipment in accordance with manufacturer's instructions and workplace emergency procedures
	2.3 Equipment is stored safely in accordance with manufacturer's instructions and workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF2018A Operate firefighting equipment.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIF2018 Operate firefighting equipment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others when fighting fires using firefighting equipment
- identifying and correctly selecting, using and carrying out basic checks on firefighting equipment relevant to own work functions
- interpreting and following operational instructions and prioritising work
- monitoring performance of firefighting equipment and taking appropriate action
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in firefighting equipment and emergency procedures in the workplace
- reading and comprehending simple statements in English
- reading and interpreting instructions, procedures, regulations, signs and labels relevant to using firefighting equipment and applying them to work activities
- selecting and using required personal protective equipment conforming to industry, and work health and safety (WHS)/occupational health and safety (OHS) standards
- working safely and collaboratively with others when fighting fires using firefighting equipment
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian codes of practice, regulations and safeworking systems relevant using and checking firefighting equipment
- chemistry of fire, the effects of different types of material in a fire and the principles underlying the spread of fire and its extinguishment firefighting techniques, agents and precautions applicable to different classes of fire
- different classes of fire, their characteristics and strategies, and equipment needed for their extinguishment
- fixed fire prevention and extinguishing installations and their principles of operation
- manufacturer's instructions for checking firefighting equipment
- relevant WHS/OHS and environmental protection procedures and guidelines
- types of firefighting appliances, equipment and systems, their identifying features, principles of operation and the procedures for their use and basic checking of serviceability
- typical problems that can occur with firefighting equipment and operations, and appropriate action and solutions
- workplace procedures and policies for using and checking firefighting equipment.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIF3091 Apply awareness of dangerous goods and hazardous materials requirements

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to identify and apply an awareness of hazardous substances and dangerous goods requirements.

It includes identifying legislation relating to hazardous substances and dangerous goods; segregating dangerous goods and hazardous substances; and dealing with incidents involving hazardous substances and dangerous goods.

This unit is intended for people who have minimal or no contact with explosives or hazardous substances and dangerous goods as part of their job role but who require an awareness of how hazardous substances and dangerous goods are labelled and segregated when being transported.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Apply appropriate legislation for transporting dangerous goods and hazardous substances

- 1.1 Legislation and organisational policies and procedures for transporting hazardous substances and dangerous goods are identified and accessed
- 1.2 Labelling of different types of dangerous goods and hazardous substances is identified from accessed documentation
- 1.3 Hazardous loads are identified from transport manifests

2 Separate dangerous goods and hazardous substances

- 2.1 Hazardous substances and dangerous goods class and subsidiary risk information is identified
- 2.2 Hazardous substances and dangerous goods are correctly separated in accordance with relevant documentation, and class and subsidiary risk information as required

3 Deal with incidents involving dangerous goods and hazardous substances

- 3.1 Information is obtained about dangerous goods and hazardous substances involved
- 3.2 Hazards are identified, risks are assessed and risk control measures are implemented
- 3.3 Documentation is checked for compliance with separation rules as required, in accordance with organisational procedures
- 3.4 Information about dangerous goods and hazardous substances is relayed to appropriate people and authorities

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF3091A Apply awareness of dangerous goods and hazardous materials requirements.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIF3091 Apply awareness of dangerous goods and hazardous materials requirements

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- communicating effectively with others
- checking relevant dangerous goods and hazardous substances documentation in accordance with operational procedures and instructions
- checking relevant dangerous goods and/or hazardous substances segregation in accordance with class and subsidiary risk information/documentation
- identifying dangerous goods and hazardous substance labels
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- identifying relevant safety data sheets (SDSs)/material safety data sheets (MSDSs), manufacturer instructions, and organisational policies and procedures for dangerous goods and/or hazardous substances
- reading and interpreting relevant instructions, procedures, information and signs.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- labelling of dangerous goods and hazardous substances
- relevant national, state/territory regulations and codes of practice for identifying and labelling dangerous goods and hazardous substances, including appropriate sections of the current Australian Dangerous Goods (ADG) Code and other applicable legislation
- risks and hazards when transporting dangerous goods and hazardous substances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations or, where this is not available, in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry

TLIF4007 Implement and coordinate accident-emergency procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and coordinate accident and emergency procedures in accordance with relevant regulations and workplace procedures.

It includes responding to the incident, coordinating on-site activities and completing follow-up actions.

Work is performed under some supervision generally within a team environment. It involves the application of basic emergency response principles when implementing accident and emergency procedures, and includes providing assistance ranging for simple injuries to applying life support systems.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Respond to incident**
 - 1.1 Details of incidents, accidents and emergencies are received, analysed and confirmed
 - 1.2 Hazards are identified, risks are assessed and control measures are implemented
 - 1.3 Immediate coordination requirements are identified and actioned in accordance with organisation procedures
 - 1.4 Travel to incident site is undertaken by the shortest, fastest, legal means and routes
- 2 Coordinate on-site activities**
 - 2.1 Control of site activities is assumed on arrival, and operator and other authorities present are informed of this action
 - 2.2 Assistance is provided to clients and operators within limitations of duty of care and organisational requirements
 - 2.3 Details of personnel, including names and nature of injuries, are notified to relevant personnel, in accordance with organisational policies and procedures
 - 2.4 Assistance is provided to relevant authorities within legal and policy limitations
- 3 Complete follow-up actions**
 - 3.1 Details of affected personnel, including names, nature of injuries and follow-up treatments are notified to next-of-kin in accordance with organisational procedures
 - 3.2 Incidents resulting in a near miss, accident or emergency are investigated and a report, including recommendations, is completed in accordance with organisational policies and procedures
 - 3.3 Accident procedures and emergency plans are reviewed for effectiveness and recommendations for changes are prepared and submitted to appropriate persons

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF4007A Implement and coordinate accident-emergency procedures.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIF4007 Implement and coordinate accident-emergency procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others when implementing and coordinating accident and emergency procedures
- completing relevant documentation
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- reading and interpreting relevant instructions, procedures, information and signs
- working collaboratively with others when implementing and coordinating accident and emergency procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- means to control and organise an accident scene, provide practical assistance and cooperate with others at the scene
- relevant work health safety (WHS)/occupational health and safety (OHS) and other regulatory codes, procedures and guidelines concerning response to accidents and emergencies
- risks and hazards in the workplace and related precautions to control risk

- workplace procedures and policies for responding to accidents and emergencies.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.
-

TLIF4014 Develop and maintain a safe workplace

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to develop and maintain a safe workplace in accordance with regulations.

It includes planning and implementing safety requirements; informing and training personnel on work health safety (WHS)/occupational health and safety (OHS) legislation, codes and standards; and establishing and maintaining procedures for assessing and controlling safety risks. It also includes monitoring, adjusting and reporting safety performance, and evaluating the WHS/OHS system and related policies, procedures and programs.

Work involves discretion and judgement in developing and maintaining a safe workplace.

Work is performed under minimum supervision with general guidance on progress and outcomes of work.

Work generally involves responsibility for resource coordination and allocation, and provides leadership of others individually or in teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the essential outcomes.	Performance criteria describe the performance needed to demonstrate achievement of the element.
1 Plan and implement safety requirements	<ul style="list-style-type: none">1.1 Health and safety risk assessments are made as part of production planning exercises1.2 Policy and procedures are developed to implement requirements for a safe workplace1.3 Work practices are planned with colleagues to ensure compliance with workplace and environmental legislation and standards1.4 Safe operating procedures are documented and communicated1.5 Work practices are implemented in accordance with requirements specified in legislation and standards for safe workplaces and environments1.6 Effective induction and supervision is provided to support colleagues in managing their organisational responsibilities1.7 Purchasing policy for providing goods and services is informed by WHS/OHS considerations
2 Inform and train personnel on WHS/OHS legislation, codes and standards	<ul style="list-style-type: none">2.1 Legislation, standards and organisational policies and practices relevant to creating and maintaining a safe workplace and environment are made available to individuals/teams2.2 Arrangements are made to provide information in a language, style and format that is understood by colleagues2.3 WHS/OHS training program is developed and implemented to identify and fulfil employee WHS/OHS training needs as part of the organisational general training program2.4 Individuals/teams are informed of their legal responsibility for maintaining a safe workplace and environment2.5 Implications of an unsafe workplace and environment are made clear to all within the workplace
3 Establish and maintain	<ul style="list-style-type: none">3.1 Safety risks presented by identified hazards are correctly

procedures for assessing and controlling safety risks	assessed in accordance with WHS/OHS legislation and codes of practice
	3.2 Activities are monitored to ensure procedure is adopted effectively throughout area of managerial responsibility
	3.3 Risk assessment is addressed at the planning, design and evaluation stages of any change within area of managerial responsibility to ensure risk is not increased
	3.4 Measures to control assessed safety risks are developed and implemented in accordance with the hierarchy of controls, relevant WHS/OHS legislation, codes of practice and trends identified from the WHS/OHS records system
	3.5 Activities are monitored to ensure risk control procedure is adopted effectively throughout area of managerial responsibility
	3.6 Risk control is addressed at the planning, design and evaluation stages of any change within area of managerial responsibility to ensure adequate risk control measures are included
4 Monitor, adjust and report safety performance	4.1 Hazards are identified, assessed and prioritised for action
	4.2 Controls are selected to minimise risks to health and safety
	4.3 Waste recycling, reduction and disposal is carried out within legislative and organisational requirements
	4.4 Recommendations for improvements to meet legislation and associated standards are submitted to designated persons/groups
	4.5 Individuals/teams are informed of improvements and alterations to WHS/OHS procedures in the workplace
	4.6 Systems, records and reporting procedures are maintained according to legislative requirements
5 Evaluate WHS/OHS system and related policies, procedures and programs	5.1 Effectiveness of WHS/OHS system and related policies, procedures and programs is assessed in accordance with workplace WHS/OHS aims
	5.2 Improvements to WHS/OHS system are developed and implemented to ensure more effective achievement

workplace WHS/OHS aims and organisational policies and objectives

5.3 Inadequacies in existing risk control measures are identified in accordance with the hierarchy of controls, and resources enabling implementation of new control measures are sought and/or provided in accordance with appropriate procedures

6 Investigate and report non-conformance

6.1 Conformance with WHS/OHS legislation and codes of practice is assessed to ensure that as a minimum, legal WHS/OHS standards are maintained

6.2 Non-conformance is investigated and dealt with in accordance with legislative requirements

6.3 Colleagues are supported to acquire and apply competencies to meet legislative requirements and associated standards

6.4 Changes to operations and practices are implemented to ensure non-conformance is not repeated

7 Establish and maintain a WHS/OHS records system

7.1 WHS/OHS record requirements are confirmed to identify patterns of occupational injury and disease within area of managerial responsibility

7.2 WHS/OHS records system is set up to meet WHS/OHS record requirements

7.3 Employees are trained in the use of the WHS/OHS records system

7.4 Changes are made to the WHS/OHS records system to ensure effective achievement of workplace WHS/OHS aims

7.3 WHS/OHS records are used as the basis for developing and submitting relevant workplace WHS/OHS reports to management

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF4014A Develop and maintain a safe workplace.

Links

Companion Volume implementation guides are found in VETNet -

Assessment Requirements for TLIF4014 Develop and maintain a safe workplace

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- analysing the working environment to identify hazards, assess risks, implement control measures, and design and implement appropriate WHS/OHS management systems
- applying fatigue management knowledge and techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others when establishing a safe workplace
- completing relevant documentation when establishing a safe workplace
- designing and implementing appropriate WHS/OHS management systems
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocols
- planning work activities, including predicting consequences and identifying improvements
- reading and interpreting relevant instructions, procedures, information, labels and signs
- reporting and/or rectifying identified problems that may arise, in accordance with regulatory requirements and workplace procedures
- selecting and appropriately applying technology, information systems and procedures to improve WHS/OHS conformance, information systems and reporting requirements
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- working collaboratively with others when developing and maintaining a safe

workplace

- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- appropriate links to other management systems, for example contractors, maintenance and purchasing
- arrangements for participation and consultation over WHS/OHS
- considerations for choosing between different control measures
- elements of an effective WHS/OHS management system
- hazards and associated safety risks that exist in the workplace
- hierarchy of controls
- how to identify when expert advice is needed
- incident and accident investigation arrangements
- principles of risk management
- range of control measures available
- relevant WHS/OHS and environmental protection policies and procedures
- relevant regulatory and code requirements
- role of technical information and experts in designing risk control measures, monitoring systems and health surveillance procedures
- significance of other management systems and procedures for WHS/OHS
- systems of risk control, recognising the significance of WHS/OHS for effective workplace operation
- training, coaching and mentoring approaches appropriate for use in WHS/OHS training programs
- typical problems that can occur when managing WHS/OHS systems and related action that can be taken
- workplace business policies and plans related to WHS/OHS issues
- workplace protocols and procedures for managing personal work priorities and professional development.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIF4064 Manage fatigue management policy and procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage organisational fatigue management policy and procedures in accordance with relevant legislation and regulations.

It includes identifying legal requirements, liabilities and responsibilities for establishing and/or improving fatigue management implementation plans, policies and procedures. It also includes acting appropriately on reports and identified breaches of fatigue management regulations.

It also includes ensuring operational systems are compliant with fatigue management regulations and policy; planning and organising adequate resources and operational systems; and facilitating the training and assessment of staff on their responsibilities and fatigue management techniques.

Work is performed under minimum supervision generally as a manager.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

F – Safety Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Identify or confirm fatigue management legal requirements and responsibilities

1.1 Current legal requirements, liabilities and responsibilities for effective fatigue management within the organisation are identified and interpreted

1.2 Existing fatigue management plans, policies and procedures are obtained and reviewed

1.3 Internal risks concerning the potential effects of fatigue are identified or confirmed and reviewed

1.4 External risks within the organisational services and/or products supply chain concerning the potential effects of fatigue are identified or confirmed and reviewed in accordance with fatigue management regulations and the related chain of responsibility

2 Establish and improve fatigue management policy and procedures

2.1 Organisational fatigue risk management system implementation plan is developed or reviewed and improved

2.2 Organisational fatigue risk management policy and procedures are developed or reviewed and improved in conjunction with relevant personnel

2.3 Feedback is obtained on the implementation plan and related policies and procedures from key stakeholders internal and external to the organisation

2.4 Appropriate adjustments are made to the plan, policies and procedures based on the feedback received

2.5 Managerial approval for the fatigue risk management system implementation plan and related policies and procedures is obtained in accordance with organisational procedures

2.6 Fatigue risk management system implementation plan and the related policies and procedures are distributed and presented to relevant organisational personnel for implementation

3 Act upon reports on the implementation of fatigue management policy

3.1 Reports from designated personnel on the implementation of the organisational fatigue risk management system implementation plan and related policies and procedures are received and interpreted

3.2 Accidents and safety incidents are reviewed and/or investigated and analysed to identify the extent to which

fatigue might have been a contributing factor

3.3 Information provided in the reports indicating that fatigue management policy and procedures are not being correctly implemented is analysed and an appropriate managerial response and related action is initiated

3.4 Opportunities for improvements to the organisational fatigue risk management system implementation plan and related policies and procedures are identified and appropriate action is taken to make the necessary adjustments

4 Act upon identified fatigue management regulations breaches

4.1 Identified or reported fatigue management policy breaches are investigated in accordance with organisational procedures and regulatory requirements

4.2 Action is taken to ensure internal and/or external personnel who may have contributed to any breach of fatigue management policy are provided with appropriate feedback and information to avoid recurrence of the breakdown in planned fatigue management processes

4.3 Where organisational procedures or culture is found to have contributed to a breach in fatigue management policy, appropriate action is taken to improve procedures or to address the culture in ways that aim to avoid a recurrence of the breakdown in planned fatigue management processes

4.4 Report on breaches of fatigue management policy is prepared and submitted to designated personnel with details of action taken to prevent a recurrence, in accordance with organisational procedures

5 Ensure that operations systems are compliant with fatigue management regulations and policy

5.1 All operations systems and standard operating procedures are reviewed in terms of their compliance with the organisational fatigue management regulations and policy

5.2 Where necessary, changes are made to operations systems and standard operating procedures to ensure that they are compliant

5.3 In accordance with the chain of responsibility principles, appropriate discussions are held with relevant personnel in supplier or subcontractor companies in the organisational supply chain to ensure their operational systems and standard operating procedures are compliant with the fatigue management regulations and policy

- 6 Plan and organise adequate resources and operational systems**
- 6.1 Organisational budgets and resource allocation strategies are planned to provide adequate resources for the implementation of the organisational fatigue risk management system
 - 6.2 Periodic reviews are undertaken of budgetary and resource allocation arrangements as they relate to implementing the organisational fatigue risk management systems and appropriate improvements are made as required
- 7 Facilitate the training and assessment of staff on fatigue management policy and procedures**
- 7.1 Organisational training systems are planned to provide competency-based on-the-job and off-the-job training and assessment opportunities as detailed in the organisational strategic plan
 - 7.2 Team leaders, supervisory and training staff are provided with adequate opportunities to develop the required expertise to contribute to the organisational fatigue management training and assessment activities
 - 7.3 Periodic reviews are undertaken of fatigue management training systems and appropriate improvements are made as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIF4064A Manage fatigue management policy and procedures.

Assessment Requirements for TLIF4064 Manage fatigue management policy and procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to changes in legislation and regulations as they relate to fatigue management
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when implementing the organisational fatigue risk management system
- facilitating systems that assist employees to identify their own learning needs about fatigue management
- modifying activities and taking appropriate initiative to manage the implementation of an organisational fatigue risk management system depending on differing contexts, risk situations and environments
- organising audits and reviews of an organisation's fatigue risk management system
- planning and organising budgetary requirements and resource allocation for implementing an organisational fatigue risk management system
- reading and interpreting documentation on fatigue management legislation and the organisational fatigue risk management system and applying them to management activities
- recognising breaches of fatigue management strategies and regulations and taking appropriate action in accordance with the organisational fatigue risk management system.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- budgetary and resource requirements for implementing an organisational fatigue risk management system
- causes and effects of fatigue on employees
- components of a fatigue risk management system, and policies and procedures related to fatigue management, and the control of factors that can contribute to fatigue and

fatigue-related accidents

- factors that increase fatigue-related errors and accidents
- fatigue reduction and proofing strategies available to an organisation that can minimise the risk of errors and safety incidents due to fatigue such as assigning low risk tasks to periods when fatigue risk is higher
- how fatigue affects workplace performance
- how fatigue contributes to workplace accidents
- lifestyles that promote the effective long-term management of fatigue
- options and resources for providing training and learning opportunities for employees about fatigue management and implementing an organisational fatigue risk management system, including initial induction training, in-depth training on fatigue and fatigue management techniques, remedial training where existing competence is assessed as being insufficient, and refresher training on fatigue management
- procedures for auditing and reviewing an organisational fatigue risk management system and related policies and procedures, and for reporting audit outcomes
- processes and resources for assessing employee fatigue management competence
- relevant legislation, regulations, permit and licence requirements related to fatigue management
- relevant work health and safety (WHS)/occupational health and safety (OHS) regulations as they relate to fatigue
- responsibilities of an organisation and individual employees for implementing fatigue management regulations and policies, including requirements agreed with suppliers and sub-contractors in the supply chain about organisational services and products
- risks and hazards created by workplace fatigue
- sources of information on fatigue
- strategies and ways to manage fatigue
- strategies for ensuring that the investigation and analysis of errors, safety incidents and accidents identify the extent to which fatigue is a contributing factor
- systems for auditing the effectiveness and efficacy of organisational fatigue risk management strategies, policies and procedures
- ways of recognising fatigue.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational

situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIG3002 Lead a work team or group

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to lead a work team or group in accordance with workplace procedures and relevant regulations.

It includes participating in work team/group planning, managing and developing work team/group performance, participating in and facilitating a work team/group achieve workplace tasks, as well as documenting and reviewing work team/group performance.

Work is performed under some supervision, generally within a team environment.

Work involves the application of established procedures when leading a work team or group.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

G – Teamwork

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Participate in work team/group planning**
 - 1.1 Requirements of a team/group task are identified and clarified in conjunction with team/group members to ensure appropriate interpretation of specifications and in accordance with enterprise requirements
 - 1.2 Hazards are identified, risks are assessed and control measures are implemented
 - 1.3 Task is interpreted and relevant steps are identified in conjunction with team/group members to ensure efficient conduct of work to meet specifications and enterprise requirements
 - 1.4 Steps are planned in conjunction with other personnel to allow achievement of practical outcomes in accordance with enterprise and/or manufacturer procedures
- 2 Manage and develop work team/group performance**
 - 2.1 Task activities are assigned to team/group members based on competence, expertise and availability
 - 2.2 Team/group members are advised about symptoms and effects of fatigue, drugs and alcohol, safe lifting techniques and other work health and safety (WHS)/occupational health and safety (OHS) policies
 - 2.3 Performance measures and requirements are agreed with team/group members in accordance with enterprise procedures
- 3 Participate in and facilitate work team/group achieve tasks**
 - 3.1 Work activity is organised and carried out with team/group members and other personnel using relevant communication processes to ensure safe, unambiguous and appropriate sequencing of tasks
 - 3.2 Individuals and teams/groups are actively encouraged to take individual and joint responsibility
- 4 Document and review work team/group tasks**
 - 4.1 Necessary documentation related to job planning and progress is completed and recorded in accordance with statutory, manufacturer and enterprise requirements
 - 4.2 Outcomes of team/group task activities are compared with planned objectives, task instructions and specifications to ensure all requirements have been met

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIG3002 Lead a work team or group

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and recommending improvements to services, resource allocation and use
- leading and encouraging team members
- modifying team activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising team activities in terms of planned schedule
- negotiating and working effectively with team members
- operating electronic communications equipment to required protocol
- planning team activities, including predicting consequences and identifying improvements
- reading, interpreting and following relevant instructions, procedures
- selecting and appropriately applying technology, information systems and procedures to complete workplace tasks.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- coaching and mentoring approaches
- principles, duty of care and obligations within the chain of responsibility in the transport industry
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection policies and procedures
- relevant regulatory and codes of practice requirements
- strategies to implement continuous improvement processes
- techniques to encourage appropriate participation of team/group members
- typical problems that can occur when leading a work team and related appropriate action that can be taken
- workplace policies and plans including procedures for training and development
- workplace protocols and procedures for leading work teams.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIG4006 Facilitate work teams

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to lead and facilitate work teams. Work involves facilitating and encouraging the work of work teams/groups, and providing leadership to others in establishing and achieving team objectives.

It includes participating and providing leadership in team planning, developing team commitment and cooperation, and managing and developing team performance.

Work is performed under minimum supervision with general guidance on progress and outcomes. It involves discretion and judgement for self and others in facilitating work teams or groups.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

G – Teamwork

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Participate in team

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Clearly defined team goals, purpose, roles, responsibilities and accountabilities are established in consultation with team, in

- planning** accordance with organisational goals and objectives
- 1.2 Team performance plan is developed in consultation with team, in accordance with organisational business plan, policies and practices
 - 1.3 Processes to monitor and adjust team performance are developed and agreed to in consultation with team, in accordance with continuous improvement policies
 - 1.4 Benefits of team diversity membership are articulated by team and included in team plans
- 2 Develop team commitment and cooperation**
- 2.1 Open communication processes are used by team to obtain and share information
 - 2.2 Team is encouraged to show and exploit innovation and initiative
 - 2.3 Support is provided to team to develop mutual concern and camaraderie
- 3 Manage and develop team performance**
- 3.1 Team is supported in making decisions within agreed roles and responsibilities
 - 3.2 Results achieved by team contribute positively to the organisation business plans
 - 3.3 Team and individual competencies are monitored regularly to confirm that team is able to achieve goals
 - 3.4 Mentoring and coaching opportunities are provided to team members to enhance personal and collective knowledge and skills
 - 3.5 Delegates performance is monitored to confirm they have completed the relevant delegation/assignment
- 4 Encourage and facilitate the work of teams**
- 4.1 Team effectiveness is encouraged and enhanced through active participation in team activities and communication processes
 - 4.2 Individuals and teams are actively encouraged to take individual and joint responsibility for actions
 - 4.3 Team is supported to identify and resolve problems that impede performance

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIG4006A Facilitate work teams.

Assessment Requirements for TLIG4006 Facilitate work teams

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating and working effectively with others when facilitating the operation of work teams
- completing relevant documentation
- identifying improvements to services, resource allocation and use
- leading and encouraging others
- monitoring and prioritising work activities in terms of planned schedule
- negotiating and working effectively with others
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures, information and signs
- responding appropriately to cultural preferences in the workplace, including modes of behaviour and interactions with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- coaching and mentoring approaches to support team members to share knowledge and skills
- mechanisms to encourage team decision making, and to reward and support team achievement
- principles, duty of care and obligations within the chain of responsibility in the transport industry
- relevant regulatory and code requirements

- strategies to implement continuous improvement processes
- typical problems that can occur when facilitating work teams, and related appropriate action that can be taken
- workplace policies and plans including procedures for training and assessment
- workplace protocols and procedures for facilitating work teams.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLII1002 Apply customer service skills

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply routine customer service skills in accordance with workplace standards and procedures.

It includes dealing with customer inquiries, monitoring customer satisfaction and taking appropriate action to satisfy customer needs.

It involves implementing customer service principles and procedures in day-to-day interactions with internal and external customers as part of workplace operations.

Work is performed under supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

I – Customer Service

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Deal with customer inquiries

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Customer inquiries are responded to courteously and efficiently by phone and face-to-face

- 1.2 Questions are used to clarify customer needs or concerns
 - 1.3 Assistance from other staff is sought when customer inquiries cannot be fully answered
 - 1.4 Product, service and/or operational knowledge is used to answer customer queries or to respond to customer needs
 - 1.5 Customer inquiries and associated action are recorded and reported in accordance with workplace procedures
- 2 Monitor customer satisfaction**
- 2.1 Customer is greeted cordially in accordance with workplace procedures
 - 2.2 Customer requirements are dealt with according to workplace procedures
 - 2.3 Special needs are addressed in accordance with workplace policies
 - 2.4 Appropriate feedback is provided to managers and internal and/or external customers

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLII1002A Apply customer service skills.

TLI3020 Provide assistance to customers

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to assist customers, in accordance with legislative and regulatory requirements.

It includes establishing contact with customers, identifying customer needs and providing appropriate support to customers during their journey.

Work is performed with limited or minimum supervision. It involves providing assistance to customers requiring assistance during their journey.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

I – Customer Service

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes. Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Establish contact with

1.1 Customers are acknowledged and greeted in a professional, courteous and concise manner in

- customers**
- accordance with organisational requirements
- 1.2 Personal dress and presentation is maintained in accordance with organisational requirements
- 1.3 Communication involving appropriate interpersonal skills to facilitate accurate and relevant exchange of information is used
- 1.4 Sensitivity to customer specific needs, and cultural and individual differences is maintained
- 1.5 Genuine interest in customer needs is displayed
- 2 Identify customer needs**
- 2.1 Appropriate questioning and active listening are used to determine customer needs
- 2.2 Urgency of customer needs is assessed to identify priorities for service delivery
- 2.3 Appropriate customer service for specific customer need is identified
- 3 Deliver service to customers**
- 3.1 Identified service that meets identified customer need is promptly provided in accordance with organisational requirements
- 3.2 Customer communications are conducted in a clear, concise and courteous manner
- 3.3 Customer inquiries are dealt with courteously and efficiently
- 3.4 Questions are used to clarify customer needs or concerns
- 3.5 Knowledge of services and/or operations is used to answer customer queries or to respond to customer needs
- 3.6 Customer is directed to or assistance from other staff is sought, when a customer inquiry cannot be fully answered
- 3.7 Opportunities to enhance quality of service and products are identified and action is taken to improve service whenever possible
- 3.8 Information about problems and delays is provided and follow up is made within appropriate timeframes as required

- 3.9 Customer inquiries and associated action/s are recorded and/or reported as required in accordance with workplace procedures
- 4 Prepare for passengers with specific needs**
- 4.1 Vigilance is maintained for passengers with specific needs/disabilities on arrival
- 4.2 Hazards are identified, risks are assessed and risk control measures are implemented
- 4.3 Actions to assist customers with specific needs/disabilities are identified in accordance with workplace procedures and/or requirements
- 5 Provide assistance to customers with specific needs**
- 5.1 Ancillary equipment is accessed for passengers with wheelchairs/prams as required
- 5.2 Customers with assistance dogs are observed and assisted as required
- 5.3 Customers with other specific needs are observed and assisted as required
- 5.4 Customers are assisted in a courteous manner, sensitive to their needs
- 5.5 Ongoing support and/or vigilance is provided to customers with specific needs to maximise their travelling safety and comfort
- 5.6 Ancillary equipment is utilised safely in accordance with workplace procedures and safety regulations
- 6 Communicate regarding customers with specific needs**
- 6.1 Other personnel are informed when assisting customers with specific needs may cause delays to services
- 6.2 Other personnel are informed about the presence of customers with specific needs as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLII3020A Provide assistance to customers with and without special needs.

- typical quality-related problems that may arise in work operations and products, and related options for action and solutions
- workplace or site layout
- workplace quality assurance and improvement principles and procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIJ5007 Conduct internal quality audits

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct internal quality audits in accordance with relevant regulatory requirements, standards and codes of practice, including the Australian Dangerous Goods (ADG) Code and workplace procedures.

It includes preparing and scheduling for an internal audit, conducting an audit, documenting findings and reporting audit results, in accordance with workplace requirements.

Work is under general guidance on progress and outcomes. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

The unit generally applies to those with responsibility for resource coordination and allocation, and who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

J – Quality

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

PERFORMANCE CRITERIA

Elements describe the

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Prepare for internal audit

- 1.1 Benchmarks for the quality audit are established/identified
- 1.2 Procedures required to be audited are identified and implications of non-conformance are estimated
- 1.3 Technical and/or calibration requirements for audits are noted as required and appropriate support personnel are identified
- 1.4 Production schedules are examined to identify appropriate audit schedule

2 Schedule internal audit

- 2.1 Audit timings are planned to ensure relevant procedures are conducted within workplace agreed time intervals and timeframes
- 2.2 Audit frequency is adjusted based on importance of activities to the business unit, process or workplace changes or customer feedback
- 2.3 Contact is made with appropriate personnel and relevant audit appointments are made

3 Conduct audit and document findings

- 3.1 Methods for conducting the audit are established and confirmed
- 3.2 Observations and interviews are conducted with required approved third party as required
- 3.3 Documentation of observations and interview responses is completed

4 Report audit results

- 4.1 Audit results are discussed with personnel associated with the procedures or standards audit
- 4.2 Compliances noted are indicated in audit reports
- 4.3 Location, relevant standard or procedure, and supporting evidence are indicated in non-compliance reports

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIJ5007A Conduct internal quality audits.

Assessment Requirements for TLIJ5007 Conduct internal quality audits

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- conducting an internal audit in the workplace
- interpreting and following operational instructions and prioritising work
- leading others
- modifying activities to cater for variations in workplace contexts and environment
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with operating procedures
- planning and organising activities
- reading and interpreting relevant instructions, procedures, information and signs
- selecting and applying appropriate technology, information systems and procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include:

- application of current competencies within functional activity
- application of relevant Australian Standards and certification requirements
- coaching and mentoring approaches to support team members to share knowledge and skills
- enterprise business policies and plans including procedures for identifying non-compliance and best practice
- equipment applications, capacities, configurations, safety hazards and control mechanisms
- operational work systems, resources, management and workplace operating systems
- problems that may occur and action that can be taken to resolve or report these problems
- quality procedures and implementation strategies
- relevant regulations, codes of practice and legislative requirements including the Australian Dangerous Goods (ADG) Code
- relevant workplace documentation procedures
- resource availability including the competencies of individuals in the team/group
- workplace procedures for conducting internal quality audits.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIK2003 Apply keyboard skills

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to enter data into an infotechnology device using a keyboard. Work involves applying routine procedures when using computers for information management within the transport and logistics industry.

It includes applying work health and safety (WHS)/occupational health and safety (OHS) principles to keyboard operations and accurately entering data.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

K – Technology

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Apply WHS/OHS principles

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Information on WHS/OHS requirements when using keyboard/keypad devices is accessed and interpreted

1.2 Posture and ergonomic settings of chair and workstation are adjusted following WHS/OHS guidelines

1.3 WHS/OHS guidelines on rest periods and exercise are followed when using computer keyboards, calculators or other data entry devices

2 Enter data

2.1 Text and numeric data are entered into a computer, calculator or other data entry device using a keyboard or keypad as part of workplace tasks

2.2 Entered information is checked and corrected using a keyboard or keypad

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

Assessment Requirements for TLIK2003 Apply keyboard skills

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying fatigue management knowledge and techniques
- applying precautions and required action to minimise, control or eliminate hazards that exist when using keyboards to enter data
- applying relevant legislation and workplace procedures
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- operating and adapting to differences in keyboards, software and computer equipment in accordance with standard operating procedures
- operating electronic infotechnology and computer equipment to required protocol
- reading and interpreting instructions, procedures, information and manuals relevant to using keyboards to enter data
- working systematically with required attention to detail without injury to self.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- procedures for the use of keyboards and computer equipment in the workplace
- relevant WHS/OHS procedures and guidelines concerning the use of computer equipment in the workplace, including recommended posture, ergonomic settings of chair and work station, and the use of rest periods and exercise
- typical problems that can occur when using keyboards to enter data and related appropriate action that can be taken to prevent or solve these problems
- work health and safety(WHS)/occupational health and safety (OHS) hazards and risks when using computer equipment for work tasks, and ways of controlling the risks

involved.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIK2007 Perform electronic data interchange to transmit shipping documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to perform electronic data interchange (EDI) to transmit shipping documentation in accordance with relevant regulations and workplace procedures.

It includes identifying and establishing document purpose and information sources, compiling data files as well as transmitting and receiving documentation.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

K – Technology

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify and establish document purpose and

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Purpose of task is identified and appropriate document template/s is accessed

information sources

- 1.2 Manual and computerised sources of data are accessed in accordance with task requirements
- 1.3 Existing files and data to be updated are identified
- 1.4 Stored data regarding applicable regulations, client instructions, protocols and procedures are selected and combined correctly for the task

2 Compile data files

- 2.1 Files are created/updated according to required format and layout
- 2.2 Data is accurately entered consistent with required purpose and in accordance with regulatory and workplace requirements
- 2.3 All relevant documentation sections are checked for accuracy and completeness
- 2.4 Discrepancies in documentation are identified and appropriate action is undertaken in accordance with workplace procedures
- 2.5 Files created or updated are saved and stored in accordance with workplace and regulatory requirements

3 Transmit documentation

- 3.1 Document destination/s are correctly identified and selected
- 3.2 Destinations are checked for readiness to receive transmission
- 3.3 Security arrangements for data exchange are undertaken in accordance with workplace procedures
- 3.4 Documents are transmitted, componentry is used in accordance with workplace procedures and all information is correctly downloaded
- 3.5 Action is undertaken within scope of authority to rectify transmission faults
- 3.6 Print out of documents is made and filed/stored/forwarded in accordance with workplace procedures

4 Receive documentation

- 4.1 Infotechnology devices are checked for readiness to receive downloaded documentation

- 4.2 Received documentation is printed and/or checked for accuracy and legibility
- 4.3 Action is undertaken within scope of authority to rectify transmission faults
- 4.4 Print-out of documents is made and filed/stored/forwarded in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIK2007A Perform electronic data interchange (EDI) to transmit shipping documentation.

Assessment Requirements for TLIK2007 Perform electronic data interchange to transmit shipping documentation

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in electronic data interchange (EDI) equipment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when performing EDI to transmit shipping documentation
- completing documentation related to work activities
- identifying and using computer equipment, software, processes and procedures relevant to the job context
- maintaining eye-hand coordination
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- reading, interpreting and following instructions, procedures, information and manuals relevant to the use of EDI to transmit shipping documentation
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- using EDI to transmit shipping documentation to required protocol
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- equipment applications, capacities, configurations, safety hazards and control mechanisms
- housekeeping standards and procedures
- relevant agreements, codes of practice or other legislative requirements including local and international freight regulations
- typical problems that can occur when performing EDI to transmit shipping documentation and related action that can be taken to prevent or solve these problems
- workplace or site layout
- workplace procedures for the transfer and storage of electronic data and the use of related computer equipment and application software.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIK2010 Use infotechnology devices in the workplace

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to use infotechnology devices in the workplace in accordance with the relevant work health and safety (WHS)/occupational health and safety (OHS) regulations and workplace procedures, within the transport and logistics industry.

It includes identifying infotechnology equipment and systems; setting up, using and shutting down computer based equipment and systems; and inputting, storing and presenting files/data. It also involves implementing workplace procedures for managing and securing data.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

K – Technology

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Identify infotechnology systems 1.1 Types of infotechnology equipment used in the

work area are identified

- 1.2 Functions of equipment, component parts and accessories are identified
- 1.3 Applications for workplace activities of different infotechnology equipment and systems are interpreted
- 1.4 Routine faults in operating systems, software applications and operator errors are identified
- 1.5 Sources of information on rectifying/reporting faults with operating equipment, systems and application are identified

2 Access and operate computer-based equipment and systems

- 2.1 Work environments and equipment are adjusted to meet ergonomic requirements and workplace policies and procedures
- 2.2 Systems are accessed and checked as required for viruses
- 2.3 Equipment is set up for work requirements in accordance with workplace procedures and manufacturers guidelines
- 2.4 Infotechnology equipment and software operating manuals and/or help screens are used to inform work practices
- 2.5 Required application software packages and accessories are selected and accessed
- 2.6 Required file and/or data to be accessed is identified
- 2.7 Files/data are filed in accordance with workplace procedures
- 2.8 Shut-down procedures for files, applications and equipment are followed

3 Input, store and present files/data

- 3.1 Data is entered using appropriate equipment, keyboard/mouse, bar code reader, touch screen or other system
- 3.2 Accurate input is confirmed
- 3.3 Files are accessed in accordance with workplace

procedures

3.4 Data is manipulated to suit work requirements and is checked for accuracy

3.5 Saved files are accessed through relevant directories

3.6 Information and disk/s are stored as required

3.7 Information is presented using computerised projection facilities as required

4 Implement workplace procedures for managing and securing data

4.1 Security procedures are followed in accordance with workplace procedures

4.2 Precautions against the loss or corruption of data are followed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIK2010A Use infotechnology devices in the workplace.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIK2010 Use infotechnology devices in the workplace

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- accessing and/or completing electronic documentation through the use of infotechnology devices in the workplace
- adapting to differences in software and equipment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate hazards that may exist when using infotechnology devices in the workplace
- applying relevant legislation and workplace procedures
- identifying and using computer equipment, software, processes and procedures required within the job context
- identifying fault-finding procedures
- implementing contingency plans when using infotechnology devices in the workplace including using security and backup software and procedures
- modifying activities depending on operational contingencies, risk situations and environments
- operating infotechnology devices used within the workplace in accordance with operational requirements
- reading and interpreting instructions, procedures, information, operational instructions and manuals relevant to using infotechnology devices in the workplace
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- work health and safety (WHS)/occupational health and safety (OHS) risks and hazards when using computer equipment for work tasks, and ways of controlling these risks/hazards
- relevant WHS/OHS procedures and guidelines for using computer equipment in the workplace
- typical problems that can occur when using infotechnology devices, and computer applications in the workplace and related appropriate action that can be taken to prevent or solve these problems
- workplace procedures for using computer equipment and application software appropriate for work role.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIL2008 Complete routine administrative tasks

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to complete routine administrative activities within the transport and logistics industry, in accordance with relevant regulations and workplace procedures.

It includes receiving and distributing incoming mail, receiving and despatching outgoing mail, filing documents, and receiving and relaying written and oral messages.

Work is performed under supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Receive and distribute incoming mail

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Incoming mail is checked and registered to ensure accuracy of records

- 1.2 Urgent and confidential mail is identified and distributed promptly to addressee
 - 1.3 Mail is sorted and despatched to nominated person/location
 - 1.4 Damaged, suspicious or missing items are recorded and reported as required, in accordance with workplace procedures
- 2 Receive and despatch outgoing mail**
- 2.1 Outgoing mail is collected from organisational sections, checked and sorted to ensure all items are correctly prepared for despatch
 - 2.2 Mail items are collated, recorded in the register as required and correctly despatched to meet designated timelines
- 3 File documents**
- 3.1 Documents are classified, sorted and filed in accordance with workplace procedures
 - 3.2 Classification uncertainties are referred to other personnel in accordance with workplace procedures
 - 3.3 Documents are identified and retrieved
 - 3.4 Specified files/records are located within designated timelines
 - 3.5 Located files are extracted from system and despatched to nominated person
 - 3.6 Security and confidentiality procedures are followed
- 4 Receive and relay written and oral messages**
- 4.1 Messages are received and accurately recorded
 - 4.2 Areas of uncertainty are clarified with message conveyor where feasible
 - 4.3 Messages are relayed to nominated person within designated timelines

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL2008A Complete routine administrative tasks.

TLIL2031 Monitor and process attendance records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to monitor and process attendance records in accordance with regulatory and workplace requirements as part of work activities undertaken in the transport and logistics industry.

It includes monitoring attendance records as well as checking and processing attendance information.

Work is performed individually but the ability to work within a team environment may also be required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Monitor attendance records

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Hours worked, as recorded for each employee, are accessed, checked and documented on a prescribed time basis

- 1.2 Employee record cards or other daily time records showing hours absent are followed up to ensure authorised absences are accurately recorded
 - 1.3 Employee daily time records showing additional hours worked are followed up to determine whether additional payments are authorised
 - 1.4 Unauthorised absences are notified to appropriate personnel in a timely way to ensure follow-up action is initiated
 - 1.5 Employee attendance sheets are received, checked and processed to ensure accurate employee records are maintained
- 2 Process attendance records**
- 2.1 Unexplained absences are identified, confirmed and appropriate personnel are notified for follow-up action
 - 2.2 Timesheets, or equivalent, are checked and forwarded to payroll department for costing purposes
 - 2.3 Employee record cards or other identification system requirements are checked and redistributed in a timely way

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

Assessment Requirements for TLIL2031 Monitor and process attendance records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying conditions of employment and industrial agreements and awards
- applying relevant legislation and workplace procedures
- checking, monitoring and processing attendance records as per workplace procedures
- communicating and working effectively with others when monitoring and processing attendance records
- completing documentation related to work activities
- conducting simple calculations when monitoring and processing attendance records
- modifying activities depending on operational contingencies and environments
- operating electronic communication equipment to required protocol
- reading and interpreting instructions, procedures and information relevant to work activities
- reporting identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant computer, communications and office equipment required to monitor and process attendance records
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- documentation and reporting requirements for monitoring and processing attendance records including computer-based personnel recording systems
- elements of human resources systems relevant to monitoring and processing attendance records including: workplace timekeeping practices, conditions of employment, labour/costing practices, industrial agreements and awards, auditing requirements, payroll practices and procedures, personnel records requirements, and computer-based personnel recording systems
- focus of operation of work systems, equipment, management and site operating systems for monitoring and processing attendance records
- problems that may occur when monitoring and processing attendance records and appropriate action that can be taken to resolve these problems
- regulations and codes of practice relevant to monitoring and processing attendance records
- workplace procedures and policies for monitoring and processing attendance records.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIL4005 Apply conflict/grievance resolution strategies

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to apply conflict or grievance resolution strategies to resolve issues that may occur in the course of work.

It includes identifying potential conflict situations, implementing appropriate conflict resolution strategies and using effective interpersonal skills.

Work is performed under minimum supervision with general guidance on progress and outcomes. Work involves discretion and judgement for self and others when managing and resolving conflict or grievances internal and external to the workplace.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify potential conflict situations

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Signs and stages of conflict or grievance are recognised

1.2 Possible causes of conflict or grievance are identified

- 2 Implement conflict resolution strategies**
- 2.1 Factors and issues relevant to conflict or grievance are clarified
 - 2.2 Strategies for dealing with conflict or grievance are developed
 - 2.3 Options for resolving the conflict or grievance are presented that enable constructive responses to be negotiated and established relationships to continue
 - 2.4 Strategies are implemented to resolve the source of conflict
 - 2.5 Outcomes of the process are monitored to ensure objectives continue to be met
- 3 Use effective interpersonal skills**
- 3.1 Effective verbal and non-verbal communication is used during negotiations, including body language, questioning, language style, active listening and reflection
 - 3.2 Feedback is given assertively and received non-defensively during negotiations
 - 3.3 Shared understanding is created through written communications

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL4005A Apply conflict/grievance resolution strategies.

Assessment Requirements for TLIL4005 Apply conflict/grievance resolution strategies

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying interpersonal skills
- applying relevant legislation and workplace procedures
- communicating effectively with others when applying conflict and grievance resolution strategies
- completing relevant documentation
- gathering, recording and conveying simple and routine work-related information
- identifying existing and potential conflict or grievances
- interpreting and following operational instructions and prioritising work
- negotiating effectively with others when applying conflict and grievance resolution strategies
- participating in small informal work groups
- reading and interpreting relevant instructions, procedures, information and signs
- responding appropriately to cultural preferences in the workplace, including modes of behaviour and interactions with others
- selecting and appropriately applying technology, information systems and procedures to complete workplace tasks
- working collaboratively with others when applying conflict and grievance resolution strategies
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- options for constructive responses to typical conflict/grievance situations
- relevant regulation and code requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) policies and procedures
- relevant workplace business marketing policies and practices, including requirements for maintaining security and confidentiality
- signs, stages and possible causes of conflict in the workplace
- typical problems that can occur when applying conflict or grievance resolution strategies and related appropriate action that can be taken
- workplace protocols and procedures for identifying and resolving conflict or grievances.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIL4009 Manage personal work priorities and professional development

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage personal work priorities and personal professional development.

It includes managing personal performance, setting and meeting personal work priorities, and developing and maintaining personal professional competence.

Work is performed under minimum supervision with general guidance on progress and outcomes. It involves discretion and judgement in managing personal work priorities and professional development.

Work generally involves responsibility for resource coordination and allocation and provides leadership of others individually or in teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Manage self

- 1.1 Action is taken to ensure personal qualities and performance serve as a role model in the workplace
- 1.2 Organisational plans and personal roles, responsibilities and accountabilities are reflected in personal goals and plans
- 1.3 Action is taken to achieve and extend personal goals beyond those planned
- 1.4 Consistent personal performance is maintained in varying work conditions and work contexts

2 Set and meet own work priorities

- 2.1 Competing demands are prioritised to achieve personal, team and organisational goals and objectives
- 2.2 Technology is used efficiently and effectively to manage work priorities and commitments

3 Develop and maintain professional competence

- 3.1 Personal knowledge and skills are assessed against competency standards to determine development needs and priorities
- 3.2 Feedback from clients and colleagues is used to identify and develop ways to maintain and build on current competence
- 3.3 Management development opportunities suitable to personal learning style/s are selected and used to develop competence
- 3.4 Professional networks and associations are participated in to enhance personal knowledge, skills and relationships
- 3.5 New skills are identified and developed to achieve and maintain a competitive edge

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

TLIL4010 Assess and confirm customer transport requirements

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to assess and confirm customer freight transport requirements within the transport and logistics industry.

It includes assessing the goods/stock to be transported, determining the transit requirements and completing all required documentation.

Work involves discretion and judgement for self and others in assessing and confirming customer freight transport requirements and leadership of others individually or in teams. It is performed under minimum supervision with general guidance on progress and outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Assess goods/stock to be transported**
 - 1.1 Customer service parameters are followed in accordance with workplace procedures
 - 1.2 In consultation with customer, key characteristics of goods/stock to be transported are determined
 - 1.3 Regulatory and/or specific requirements for load shipment are identified
 - 1.4 Specific load handling characteristics/requirements are identified
 - 1.5 Task requirements are matched to workplace capability and operational focus
- 2 Determine transit requirements**
 - 2.1 Applicable transportation modes are matched to customer geographic location, load packaging characteristics, quantity of goods to be transported and specific requirements for goods
 - 2.2 Required pick-up and destination point/s are identified and assessed for safe access and operation
 - 2.3 Specified transit times and routes are identified and agreed with customer
 - 2.4 Transportation mode/s are determined with customer about load characteristics, transit requirements and cost effectiveness
 - 2.5 Risk assessment of transport service is undertaken in accordance with workplace policy and procedures
- 3 Complete documentation**
 - 3.1 Decisions for proceeding with task are undertaken or referred in accordance with workplace procedures and scope of authority
 - 3.2 Parameters of service requirements for the workplace and customer are documented
 - 3.3 Quotations for services/specifications are itemised and documented and processed in accordance with workplace procedures
 - 3.4 Legislative, insurance or specific conditions for load transport are recorded and filed in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL4010A Assess and confirm customer transport requirements.

TLIL4032 Implement equal employment equity strategies

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement equal employment opportunity (EEO) strategies in accordance with regulatory and workplace requirements, as part of work activities in the transport and logistics industry.

It includes identifying and communicating agreed EEO direction, responding to EEO enquiries, implementing EEO strategies, contributing to policy development, and evaluating and reporting on the implementation of EEO strategies in the workplace.

While work is performed individually the ability to work within a team environment may be required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify and communicate

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 EEO information and policy requirements are identified

- agreed employment direction** for the workplace
- 1.2 EEO information is disseminated to ensure relevant requirements are considered in decisions made within the workplace
 - 1.3 Advice is provided to assist with consistent interpretation of EEO information
 - 1.4 Negotiations are undertaken with management to ensure equity principles are incorporated throughout the workplace
 - 1.5 Interpretation and advice are provided on legislative requirements, workplace objectives and constraints, and human resource management practices
- 2 Respond to equal employment opportunity enquiries**
- 2.1 Arrangements are made to ensure EEO advice can be provided to personnel within necessary timeframes
 - 2.2 Enquiries are analysed to identify necessary information required to respond sufficiently
 - 2.3 Sources of information are identified and accessed to formulate response
 - 2.4 Responses are communicated clearly and appropriately and understanding of the response is checked
- 3 Implement strategies**
- 3.1 Strategies are developed to implement policies and objectives
 - 3.2 Measures are identified that reflect the success of strategies developed and suitable data collected
- 4 Contribute to policy development**
- 4.1 Consultation is regularly undertaken with stakeholders on policy development
 - 4.2 Advice is provided concerning the implications of EEO policy
- 5 Evaluate and report on policy implementation**
- 5.1 Data used to measure EEO policy performance is collected and statistically analysed
 - 5.2 Annual and other reports are produced on EEO policy performance
 - 5.3 Results of EEO strategies and performance are conveyed in a timely and appropriate way to relevant individuals and groups

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIL4032A Implement equal employment equity strategies.

TLIL4033 Promote effective workplace practice

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to promote effective workplace practice in accordance with regulatory and workplace requirements, as part of work activities undertaken in the transport and logistics industry.

It includes contributing positively to the work team environment, observing and promoting work safety procedures, maintaining and promoting the wellbeing of workplace team/s, and participating in competency development activities.

Work is performed individually but the ability to work within a team environment may be required.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

L – Resource Management

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Contribute positively to the work team environment**
 - 1.1 Workplace objectives are identified, interpreted and positively promoted to associated personnel and/or work team members
 - 1.2 Communication with associated personnel and/or work team members is effectively established
 - 1.3 Disputes are resolved through effective negotiation with relevant individuals or groups
 - 1.4 Quality assurance measures are maintained, systems improvement suggestions are encouraged, and proposals are submitted to relevant authorities
- 2 Observe and promote work safety procedures**
 - 2.1 Relevant statutory and workplace requirements for work health safety (WHS)/occupational health and safety (OHS) are communicated to all personnel and implemented at all worksites
 - 2.2 Accidents and injuries are reported and investigated in accordance with workplace policy
 - 2.3 Potential hazards and safety risks are identified, investigated and recommendations for preventative action are referred to appropriate authorities
 - 2.4 Training in WHS/OHS and First Aid are implemented
- 3 Maintain and promote team wellbeing**
 - 3.1 Prescribed medical and physical fitness criteria are promoted and maintained within the work environment
 - 3.2 Situations threatening safety arising from physical/psychological incompatibility with the work environment are identified and resolved
- 4 Participate in competency development**
 - 4.1 Competencies required by work team members are identified
 - 4.2 Suitable formal and informal competency development programs and approaches are identified
 - 4.3 Work team member skill gaps are determined and appropriate competency development programs and approaches are initiated to address these gaps
 - 4.4 Workplace trainer and assessor requirements are identified and team members are supported to take on these roles

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIL4033 Promote effective workplace practice

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying fatigue management knowledge and techniques
- applying precautions and required action to minimise, control or eliminate identified hazards
- applying principles of time management
- applying relevant legislation and workplace procedures
- communicating effectively with customers, associated personnel and all work team members when completing work activities
- completing relevant documentation
- coordinating the promotion of safe work practices, competency enhancement and work practice improvements throughout work groups
- counselling personnel on work related issues
- ensuring team members maintain the required level of physical fitness
- implementing contingency plans
- interpreting statistics related to workloads and quality assurance measures
- leading and coordinating the activities of multi-disciplinary work teams or specialist work groups
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading, interpreting and following relevant instructions, procedures and workplace publications
- reporting and/or rectifying identified problems, faults or malfunctions promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment conforming to industry and WHS/OHS standards
- settling disputes through face-to-face and group-based negotiation
- working systematically with required attention to detail without injury to self or others, or

damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements, performance criteria and include knowledge of:

- documentation and reporting workplace requirements
- elements of workplace operations relevant to effective work practice, including
 - workplace corporate plans, goals and objectives and industrial relations
 - communication and negotiation techniques and the benefits, advantages and disadvantages associated with them
 - group work practices and group dynamics; corporate customer service objectives
 - workplace procedures related to recording customer enquiries and actions
 - dispute settlement processes
 - workplace WHS/OHS and physical fitness requirements and related first-aid policies
 - competencies and skills required for workplace career path levels
- operational work systems, equipment, management and site operating systems
- problems that may occur during work activities and appropriate action that can be taken to resolve these problems
- relevant regulations and codes of practice
- relevant WHS/OHS and environmental protection procedures and guidelines
- workplace procedures and policies for promoting effective work practices.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations

- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIO0001 Undertake emergency response action to a security threat

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to undertake emergency response action to security and terrorist threats. Work must be carried out in accordance with sections of relevant state/territory authority regulations for secure delivery of valuables, secured products, documents and materials within the transport and logistics industry.

It includes selecting emergency actions to be applied, maintaining communications and reporting the incident in accordance with established procedures.

Work is performed under general or limited supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

O – Security

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Select emergency actions to be applied

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Suspicious or questionable activity by third parties during every day work activities is identified and reported in accordance with government guidelines and

workplace procedures

- 1.2** Security or terrorist threats or potential threats are identified in accordance with government guidelines and workplace procedures
 - 1.3** Hazards are identified and required action is taken to minimise, control or eliminate identified hazards
 - 1.4** Agency/branch/base and/or police are alerted to potential security/terrorist threat and all relevant details and requests for supportive action are detailed
 - 1.5** Range of emergency actions are identified and analysed
 - 1.6** Security or terrorist threat and appropriate emergency plans are matched in accordance with government guidelines and workplace procedures
 - 1.7** Emergency actions are invoked in accordance with emergency procedures and in consideration of safety of self, members of the public and the consignment
 - 1.8** Emergency actions are modified consistent with changes within the emergency environment and the safety of people and the consignment
- 2 Maintain communications**
 - 2.1** Communication is maintained with emergency services worker/s, agency/branch/base and relevant agencies/personnel in accordance with workplace and emergency procedures
 - 2.2** Information is conveyed in a clear, concise and accurate manner
- 3 Report incident**
 - 3.1** Reporting arrangements are completed in accordance with workplace procedures
 - 3.2** Police or other emergency services are provided with reports as required

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIO3007 Undertake emergency response action to a security threat.

Assessment Requirements for TLIO0001 Undertake emergency response action to a security threat

Modification History

Release 1. This is first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate identified hazards
- applying relevant agreements, codes of practice or other legislative requirements
- applying relevant workplace procedures
- communicating effectively with others
- completing relevant documentation
- identifying and correctly using relevant processes and procedures
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- reading and interpreting relevant instructions, procedures, information and signs
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- contingency planning for managing and controlling security/terrorist threats
- emergency management plan and procedures
- operational procedures for identifying security/terrorist threats and undertaking emergency response
- relevant state/territory permit and licence regulations and requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS)/occupational safety and health (OSH) procedures and guidelines
- government guidelines in relation to terrorist threats
- requirements for approved work procedures and relevant equipment

- risk and hazard-related precautions to control security/terrorist threats
- typical problems that can occur when undertaking emergency response action to a security/terrorist threat and appropriate action that can be taken to prevent or solve these problems.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- applicable documentation including workplace procedures, regulations, emergency management plan, codes of practice and operation manuals
- relevant materials, tools, equipment and personal protective equipment currently used in industry.

TLIO1002 Follow security procedures when working with passengers and personnel

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to follow security procedures when working with passengers and personnel within the transport and logistics industry.

It includes checking and maintaining the security of passengers, workplace personnel and visitors; identifying and responding to security threats or situations; and completing all required security records.

Persons achieving competence in this unit will need to comply with the applicable security regulations and the relevant sections of a transport organisation's workplace security program and procedures.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

O – Security

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Maintain security of passengers, workplace personnel and visitors

- 1.1 Security checks of passengers, workplace personnel and visitors are carried out in accordance with workplace security program and procedures, within limits of role and responsibilities
- 1.2 Precautions and measures aimed at protecting the security of passengers, workplace personnel and visitors are followed in accordance with workplace security procedures and applicable security regulations
- 1.3 Signs of suspicious behaviour from passengers, workplace personnel or visitors are recognised and reported promptly to designated personnel in accordance with workplace security procedures
- 1.4 Breaches of security requirements for passengers, workplace personnel and visitors are reported promptly to designated personnel in accordance with workplace procedures

2 Identify a security threat or situation

- 2.1 Signs of security threats are recognised and investigated in accordance with workplace security procedures
- 2.2 Security threat or situation is identified, assessed and reported promptly, in accordance with workplace security procedures
- 2.3 Implications of the security threat or situation are evaluated in accordance with workplace security procedures
- 2.4 Relevant personnel are alerted to the security threat or situation as required in accordance with workplace security procedures
- 2.5 Communications are maintained with relevant personnel to determine appropriate course of action

3 Respond to a security threat or situation

- 3.1 Response to an identified security threat or situation is in accordance with workplace security procedures, received instructions, regulatory requirements and emergency response plan
- 3.2 Security threats or incidents are handled appropriately in accordance with established response plan, within limits of responsibility and duty of care
- 3.3 Responsibilities are fulfilled in accordance with workplace security procedures and regulatory requirements
- 3.4 Assistance is provided in controlling the site prior to and

following arrival of security and/or emergency services

3.5 Assistance is provided to other staff and emergency services personnel conducting an initial survey of the security threat or emergency scene

3.6 Directions of the controlling security/emergency authority are followed and all possible assistance is provided in response to those directions

4 Maintain security records

4.1 Records of security checks and precautions are kept in accordance with workplace security procedures

4.2 Reports of security incidents or threats are completed in accordance with workplace security procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIO1002A Follow security procedures when working with passengers and personnel.

Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=df441c6e-213d-43e3-874c-0b3f7036d851>

Assessment Requirements for TLIO1002 Follow security procedures when working with passengers and personnel

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment, facilities, cargo and passengers
- applying procedures for security checks and precautions in accordance with limits of own role and responsibilities
- applying relevant legislation and workplace procedures
- communicating effectively with others when following security procedures
- completing required documentation and reports related to security procedures
- following security threat/incident response plan and procedures
- identifying and solving and/or reporting problems that arise when following security procedures
- identifying signs of a possible security threat
- modifying activities depending on workplace contexts, risk situations and environments
- reading and interpreting instructions, procedures, applicable regulatory requirements, labels, markings, ID cards and other information relevant to workplace security in the transport and logistics industry
- recognising signs of pillage and theft
- recognising signs of security threats and situations
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- responding to a possible security threat
- selecting and using relevant communications and other equipment required when following security procedures
- working collaboratively with others when following security procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- applicable measures for securing transport terminals, storage facilities, vehicles, trains, aircraft and/or vessels
- applicable transport security legislation including relevant international, national, state/territory Acts, regulations codes and/or guidelines
- common security problems that may occur when carrying out operations in the transport and logistics industry, and action that can be taken to address and resolve these problems
- common security threats and incidents that may occur in transport, logistics and allied industries, and related roles and responsibilities of personnel when reporting and responding to these threats and incidents
- layout of worksite, vehicle, vessel, train or aircraft and operating procedures
- operational work systems, equipment, management and site operating systems when carrying out operations in the transport and logistics industry
- precautions and procedures aimed at protecting the security of passengers, workplace personnel and visitors
- procedures for operating electronic communications equipment in accordance with required protocol
- relevant documentation and reporting requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- relevant quarantine regulations and requirements
- relevant workplace security program, policies and procedures for responding to security threats, situations and emergencies
- signs of pillaging and theft
- signs of suspicious behaviour.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIO2011 Provide revenue protection measures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to provide revenue protection measures during transport operations, in accordance with operational procedures.

It includes preparing for revenue protection activities and implementing revenue protection procedures.

Work is performed under some supervision, generally within a team environment. It involves the application of routine procedures and regulatory requirements when providing revenue protection measures.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

O – Security

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Prepare for revenue protection activities

- 1.1 Strategies to check customer ticketing are confirmed
- 1.2 Resources to implement ticket checks are arranged to suit anticipated passengers numbers
- 1.3 Queuing systems and barriers are set up to ensure ticket checks are comprehensive
- 1.4 Staff are allocated to planned activities in accordance with organisational procedures and policy
- 1.5 Staff are briefed on strategies for checking customer tickets

2 Implement revenue protection procedures

- 2.1 Ticket checks are conducted against organisational requirements
- 2.2 Fares are collected or infringement notices are issued
- 2.3 Use of concession, special and privilege passes is monitored for compliance with organisational policies

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIO2011A Provide revenue protection measures.

Assessment Requirements for TLIO2011 Provide revenue protection measures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant workplace procedures
- calculating fares
- communicating effectively with others
- completing relevant documentation
- identifying job hazards and taking required action to minimise, control or eliminate identified hazards
- implementing contingency plans
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating barriers
- reading and interpreting relevant instructions, procedures and information
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- validating tickets
- working collaboratively with others when providing revenue protection measures.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- concessional privileges
- customer service requirements
- fare structures
- organisational policies and workplace procedures
- organisation's transport services
- relevant state/territory revenue protection regulations and requirements
- relevant work health and safety (WHS)/occupational health and safety (OHS) and environmental protection procedures and guidelines
- relevant workplace procedures
- risks and hazards when providing revenue protection within a transport system and related precautions to control the risk
- timetables
- typical problems that can occur when providing revenue protection measures and appropriate action that can be taken to prevent or solve these problems.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIP2017 Maintain control of records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to maintain control of records in the transport and logistics industry, in accordance with regulations and workplace requirements.

It includes tracking records, conducting file audits, preparing reports from a records system, preparing staff lists, and implementing disaster recovery procedures.

Work is generally performed under some supervision, within a team/group environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

P - Administration and Finance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Track record

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Unique record identifier to be located is determined from request or instructions

1.2 Location of record is obtained from records system in accordance with records system rules and organisational

procedures

1.3 History of record location is obtained from records system in accordance with records system rules and organisational procedures

1.4 Information about record is obtained from records system in accordance with records system rules and organisational procedures

1.5 Information about record is updated and amended in accordance with organisational procedures

1.6 All transactions on the records system are completed within the designated timeframe

- 2 Conduct a file audit**
- 2.1 Files are physically located with action officer and in storage areas, in accordance with supervisor instructions
- 2.2 Discrepancies between nominal and actual record locations are identified
- 2.3 Supervisor is clearly/specifically informed/notified of any discrepancies and/or issue
- 2.4 Unacceptable record keeping practices are observed and noted during audit activities, in accordance with organisational procedures
- 2.5 Information about any anomalous record is updated and amended in accordance with organisational procedures
- 2.6 Reconciliation statement is prepared and forwarded to supervisor in accordance with organisational procedures and records system procedures
- 3 Prepare reports from records system**
- 3.1 Reports are prepared from system in accordance with supervisor instructions or requests
- 3.2 Reports are prepared in accordance with workplace procedures and records system procedures
- 3.3 All reports from the records system are prepared within the designated timeframe
- 4 Prepare staff lists**
- 4.1 Staff and user lists are checked and updated to accord with the current locations and designations of organisational staff members in accordance with supervisor instructions
- 4.2 Staff and user lists are duplicated and circulated to all those

requiring copies, in accordance with supervisor instructions

- 5 Implement disaster recovery procedures**
- 5.1 Policies and procedures are identified for disaster recovery
 - 5.2 Recovery actions are undertaken in accordance with workplace procedures and scope of authority
 - 5.3 Appropriate personnel are informed of actions taken in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIP2017 Maintain control of records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with standard operating procedures
- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- communicating and working effectively with others when maintaining control of records
- completing documentation related to maintaining control of records
- identifying, selecting and using equipment efficiently and effectively for maintaining control of records
- implementing contingency plans
- maintaining security and confidentiality of material
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and auditing records
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- planning own work including predicting consequences and identifying improvements
- preparing relevant reports
- reading, interpreting and applying instructions, legislation, procedures and information relevant to maintaining control of records
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- using a range of information technology devices including computers, radio frequency devices, electronic data exchange systems.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- housekeeping standards and procedures
- operational workflow within a records management system
- operational work systems, equipment, management and site operating systems for maintaining control of records as part of a records management process
- problems that may occur with maintaining control of records and appropriate action that can be taken to resolve these problems
- regulations relevant to maintaining control of records as part of a records management process
- types of equipment used in maintaining control of records and the precautions and procedures that should be followed in their use
- workplace procedures and policies for maintaining control of records including policies on confidentiality and security of information and records.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIP2018 Provide information from and about records

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to provide information from and about records in the transport and logistics industry in accordance with regulations and workplace procedures.

It includes identifying the range of records required, gathering the required records, interpreting and administering access rules and procedures and providing the information in response to users' requests.

Work is generally performed under some supervision, within a team/group environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

P – Administration and Finance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Identify range of

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Specific information required by the user is identified from interpretation of the user request and clarified where initial

- records required** request is unclear
- 1.2 Range of records likely to contain the information required by the user is identified from analysis of the request
 - 1.3 Availability of the required records is accessed using appropriate finding aids and record keeping system
 - 1.4 Where the information required exceeds own ability to meet the request, user is referred to an appropriate colleague or list of external organisation/s
- 2 Gather required records**
- 2.1 Range of records likely to contain the information required by the user is obtained and analysed for the required content
 - 2.2 Information is extracted as required and is prepared in line with the request
 - 2.3 Specific records satisfying user requirements are gathered in accordance with organisational procedures
 - 2.4 Records are tracked to record change in location and use by the requesting user in accordance with record keeping system rules and organisational procedures
 - 2.5 Obstacles to obtaining specific records within the specified time are explained to the user and a revised timeline is agreed
- 3 Interpret and administer access rules and procedures**
- 3.1 User requesting the record is identified and access rules and procedures category are confirmed in accordance with organisational procedures
 - 3.2 Access restriction rules and guidelines are applied to the records requested and to match the user access category
 - 3.3 Where access restriction rules and guidelines prevent access to the user, the decision is recorded and the user is informed of their rights to a review of the decision
 - 3.4 Where partial access restriction is determined, the restricted portions of the records or information and the basis of the restriction are identified and documented
- 4 Provide information in response to user requests**
- 4.1 Specific records or portions thereof, information and/or records are protected to prevent access as required, in accordance with access rules and organisational procedures
 - 4.2 Requested information is prepared for the user in an appropriate format, in accordance with initial request and

organisational procedures

- 4.3 All access rules, record preservation requirements, specified timelines and work health and safety (WHS)/occupational health and safety (OHS) guidelines are adhered to
- 4.4 Records retrieved and used to provide information are documented according to system rules and organisational procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIP2018A Provide information from and about records.

TLIP2024 Conduct financial transactions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct direct financial transactions within the transport and logistics industry. Work must be carried out in compliance with relevant codes and regulations concerned with the conduct of direct financial transactions during the collection and delivery of valuables, secured products, documents and materials.

It includes operating point of sale equipment, transacting sales, clearing register activity and maintaining sales documents.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

P - Administration and Finance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Operate point of sale equipment

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Point of sale equipment is operated and maintained in line with manufacturer specifications and workplace procedures

1.2 Procedure for opening sales equipment or register is followed

1.3 Adequate change is maintained for use in transactions

1.4 Sales equipment or register is closed off in accordance with workplace cash security procedures

2 Transact sale

2.1 Amount owing is calculated and customer is advised

2.2 Amount tendered in cash transactions is checked, correct change is calculated and given, and receipt/tax invoice is provided as required

2.3 Credit and other non-cash transactions are processed

3 Clear register

3.1 Sales equipment/register is cleared and cash is transferred at required times in accordance with workplace policy

3.2 Cheques, credit and other non-cash transaction documents are handled in accordance with workplace policy and procedures

3.3 Due security is maintained when handling cash in accordance with workplace security procedures

4 Maintain sales documents

4.1 Records are completed for all transactions including refunds and no sales

4.2 Adequate supplies of docketts, vouchers and point of sale documents are maintained

4.3 Debtor transactions are processed in line with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIP2024 Conduct financial transactions

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with standard operating procedures
- applying workplace procedures, relevant agreements, codes of practice or other legislative requirements
- communicating effectively with others when conducting financial transactions
- identifying and correctly using transaction equipment, processes and procedures
- interpreting and following operational instructions and prioritising work
- operating communication and financial equipment to required protocol
- reading and interpreting instructions, procedures and information relevant to conducting financial transactions
- using correct manual handling techniques safely
- transacting and completing documentation related to conducting financial transactions
- working collaboratively with others when conducting financial transactions
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- implications of credit and financial institution codes of practice
- operational procedures for conducting direct financial transactions with customers
- relevant state/territory regulations and requirements related to conducting financial transactions
- requirements of work systems, operations and relevant equipment

- risks and hazards when carrying out transactions and related precautions to control security threats
- typical problems that can occur when conducting financial transactions and appropriate action that can be taken to prevent or solve these problems.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIP2029 Prepare and process financial documents

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to prepare and process financial documents in compliance with the relevant financial codes of practice and regulations.

It includes recording and balancing petty cash transactions, balancing all other transactions, rectifying discrepancies as directed, preparing invoices for debtors, and preparing and processing banking documents.

Work is performed under general supervision.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

P – Administration and Finance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Record and balance petty cash transactions

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Petty cash vouchers are prepared in accordance with workplace procedures

- 1.2 Before processing, petty cash claims and vouchers are checked for accuracy and authenticity
- 1.3 Petty cash transactions are recorded
- 1.4 Irregularities are noted and referred to nominated person/section in accordance with workplace procedures
- 2 Balance all transactions**
 - 2.1 Transactions are presented to nominated person/section for checking in accordance with workplace procedures
 - 2.2 Invoices for payment to creditors are reconciled in accordance with workplace procedures
 - 2.3 Discrepancies between invoices and delivery notes/service agreements are identified and reported for resolution in accordance with workplace procedures
 - 2.4 Errors in invoice charges are identified and corrective action is undertaken within scope of authority in accordance with workplace procedures
- 3 Rectify discrepancies as directed**
 - 3.1 Correct and authorised invoices are processed for payment and entered into financial records as required
 - 3.2 Creditor inquiries are resolved within scope of authority or referred to appropriate personnel in accordance with workplace procedures
- 4 Prepare invoices for debtors**
 - 4.1 Preparatory calculations are performed to produce accurate invoices
 - 4.2 Relevant documentation is completed to ensure accuracy of contents
 - 4.3 Invoices are distributed to nominated personnel for verification prior to despatch
 - 4.4 Verified invoices are despatched within designated timelines
 - 4.5 Verified figures are entered into financial journals
 - 4.6 Documents are filed for auditing purposes and follow-up action is taken as required
- 5 Prepare and process banking documents**
 - 5.1 Financial transactions are listed on deposit forms in accordance with financial institution requirements
 - 5.2 Pay-in documentation is balanced with all financial

calculations

5.3 Financial institution deposit totals are balanced with internal records

5.4 Deposits are lodged with the financial institution

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIP2029A Prepare and process financial documents.

Assessment Requirements for TLIP2029 Prepare and process financial documents

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating effectively with others when preparing and processing financial documents
- completing documentation related to preparing, processing and recording financial transactions
- implementing contingency plans interpreting and following operational instructions and prioritising work
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- performing required calculations both manually and with the aid of relevant equipment and calculators
- reading and interpreting instructions, procedures and information relevant to preparing and processing financial documents
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant equipment when preparing and processing financial documents, including the use of an appropriate range of office equipment, computer systems and financial software packages
- working collaboratively with others when preparing and processing financial documents
- working systematically with required attention to detail.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- contacts and sources of information/documentation needed for preparing and processing financial documents
- customer service policies and procedures
- documentation requirements of banking institutions, governments and other relevant agencies
- relevant financial regulations, codes and procedures including pertinent taxation documentation requirements
- scope of authority when preparing documents
- typical problems that can occur when preparing and processing financial documents and appropriate action that can be taken to prevent or solve these problems
- workplace procedures for preparing and processing financial documents.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIP2033 Sell products and services

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to sell products and services in accordance with regulatory and workplace requirements in the transport and logistics industry.

It includes preparing for financial transactions, promoting products and selling products and/or services, processing refunds and reconciling financial transactions.

Work is performed under some supervision, generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

P - Administration and Finance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Prepare for financial transactions

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Float, goods and services are prepared in accordance with workplace policies and procedures

1.2 Point of sale is established to meet workplace requirements

- and standards
- 2 Promote products and services**
 - 2.1 Strategies to promote products and services are developed in accordance with workplace policies and procedures
 - 2.2 Strategies to promote products and services are implemented in accordance with workplace procedures
 - 3 Sell products or services**
 - 3.1 Product knowledge is applied when answering customer inquiries
 - 3.2 Sales transactions are conducted in a courteous manner to the customer's satisfaction
 - 3.3 Price is correctly calculated and charged, and correct change and receipt are issued
 - 4 Process refunds**
 - 4.1 Claim for refund is substantiated in accordance with company procedures
 - 4.2 Refund claim application processes are completed to ensure transaction details are recorded
 - 4.3 Refunds are correctly calculated and issued in a courteous manner
 - 5 Reconcile financial transactions**
 - 5.1 Value of money and vouchers issued and refunded are calculated to enable reconciliation against total sales to validate cash on hand
 - 5.2 Money, goods, service entitlements and reconciliation documents are secured in accordance with workplace requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

TLIP3034 Advise on and construct fares for customers

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to advise on and construct fares for customers in accordance with regulatory and workplace requirements.

It includes advising on air, coach, ferry, tram, bus and rail fares; constructing fares and itineraries; and issuing documents.

While work is performed individually, it will generally be undertaken within a team environment. It involves the application of tourist industry regulatory requirements and workplace procedures when advising on and constructing fares for customers in the transport and allied industries.

In providing advice to suit customer needs, the following types of fares must be considered:

- constructed fares
- net fares
- promotional fares
- published fares.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

P – Administration and Finance

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Advise on fares

1.1 Transport provider information is correctly interpreted to provide accurate information on fare details and conditions

1.2 Customers are clearly advised on features of the fares most appropriate to their needs

1.3 Accurate fare quotations are provided to customers in accordance with workplace policy and guidelines

2 Construct fares and itineraries

2.1 Fares are accurately constructed using standard industry techniques, providing the best fare and maximum travel benefits for the customer

2.2 Appropriate travel schedules are used to create the optimum itinerary for customers

3 Issue documents

3.1 Documents are correctly issued and all details are accurately recorded in accordance with workplace and regulatory requirements

3.2 Coupons/tickets are processed in accordance with workplace and industry guidelines

3.3 Refunds are processed where required in accordance with workplace and industry guidelines

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

TLIP4005 Manage workplace information

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to manage workplace information.

It includes identifying and sourcing information needs; collecting, analysing and reporting information; using management information systems; contributing to the preparation of operational plans; and preparing resource proposals.

Work is performed under limited or minimum supervision with general guidance on progress and outcomes. It involves the use of discretion and judgement for self and others when managing workplace information systems.

Work involves responsibility for managing information processing and storage systems in the workplace and the leading others individually or in teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

P – Administration and Finance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Identify and source information needs**
 - 1.1 Information needs of individuals/teams is determined and potential sources of information are identified
 - 1.2 Information held by the organisation is reviewed to determine suitability and accessibility
 - 1.3 Arrangements are made to obtain identified information not available/accessible within the organisation
- 2 Collect, analyse and report information**
 - 2.1 Information relevant to the needs of individuals/teams is collected as required
 - 2.2 Information is collected in or transferred to a format suitable for analysis, interpretation and dissemination
 - 2.3 Information is analysed to identify and report relevant trends and developments in terms of the needs for which it was acquired
- 3 Use management information systems**
 - 3.1 Management information systems are used effectively to store and retrieve data for decision making
 - 3.2 Technology available in the work area/organisation is used to manage information efficiently and effectively
 - 3.3 Recommendations for improving the information system are submitted to designated persons/groups
- 4 Contribute to the preparation of operational plans**
 - 4.1 Individuals/teams are involved in preparing operational plans in ways which use their contribution effectively and gain their support for the outcomes
 - 4.2 Operational plans are prepared and presented in accordance with workplace guidelines and requirements
- 5 Prepare resource proposals**
 - 5.1 Resource planning data is collected in consultation with colleagues, including those who have a specialist role in resource management
 - 5.2 Workplace business plans, and customer and supplier requirements are reflected in estimates of resource needs and use
 - 5.3 Proposals to secure resources are supported by clearly presented submissions describing realistic options, benefits, costs and outcomes

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIP4005A Manage workplace information.

Assessment Requirements for TLIP4005 Manage workplace information

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating and working effectively with others when managing workplace information
- identifying and collecting information for use in the workplace
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- operating electronic communications and information systems equipment to required protocol
- preparing and completing relevant documentation
- reading, interpreting and following relevant instructions and procedures
- reporting and/or rectifying identified problems that may arise, in accordance with regulatory requirements and workplace procedures
- selecting and appropriately applying technology, information systems and procedures to workplace tasks
- selecting and efficiently using information management systems and technologies
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- operational recording, reporting and statistical analysis systems and resources
- relevant regulatory and code requirements
- resource availability including the processing capacity of equipment and software systems for statistical analysis of data
- typical problems that can occur when managing workplace information and related appropriate action that can be taken
- workplace business policies and plans as they relate to financial reporting and information system management and improvement
- workplace protocols and procedures for managing workplace information.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIP4031 Maintain customer credit accounts and services

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to maintain customer credit accounts and services in accordance with workplace requirements, as part of work activities in the transport and logistics industry.

It includes establishing and maintaining customer credit accounts and services, and maintaining a customer information system.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

P – Administration and Finance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

1 Establish and maintain customer credit accounts and

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

1.1 Lines of credit and other credit facilities are established and communicated to customers

services

- 1.2 Customer payment schedules are monitored
- 1.3 Debtors are regularly identified and listed to initiate follow-up action
- 1.4 Debt recovery procedures are initiated and if unsuccessful, approval is sought to write off bad debts

2 Maintain customer information system

- 2.1 Status of credit accounts is conveyed to customers on a regular basis
- 2.2 Statistical returns are prepared displaying actual against anticipated performance
- 2.3 Database information regarding products and services sales on credit is maintained
- 2.4 Customer queries are dealt with promptly and courteously
- 2.5 Security of database and data integrity is maintained

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIP4031A Maintain customer credit accounts and services.

Assessment Requirements for TLIP4031 Maintain customer credit accounts and services

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment in accordance with operating procedures
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring and prioritising work activities in terms of planned schedule
- reading, interpreting and following relevant instructions, procedures and signs
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using relevant computer, communications and office equipment
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- Australian and international codes and regulations relevant to freight services, including the Australian Dangerous Goods (ADG) Code and relevant bond, quarantine or other legislative requirements
- documentation requirements for maintaining customer credit accounts and services
- information on relevant aspects of credit services, including credit services offered by the workplace, credit account systems, credit ratings and limits, and credit approval policies and procedures
- methods of payment including letters of credit, cheques, promissory notes, bank drafts
- operational work systems, equipment, management and site operating systems for maintaining customer credit accounts and services
- problems that may occur and appropriate action that can be taken to resolve these problems
- workplace procedures and policies for maintaining customer credit accounts and services.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

TLIP5007 Contribute to the development of a workplace learning environment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to contribute to the development of a workplace learning environment in accordance with the relevant Australian regulations, standards, codes of practice and workplace procedures.

It includes creating learning opportunities, facilitating and promoting learning, and monitoring and improving learning effectiveness.

Work is under general guidance on progress and outcomes. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

The unit generally applies to those with responsibility for resource coordination and allocation, who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

P – Administration and Finance

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Create learning opportunities

- 1.1 Workplace environments that facilitate learning are developed and supported
- 1.2 Learning plans are developed as an integral part of individual/team performance plans
- 1.3 Diversity of needs and learning opportunities of individual employees and the enterprise are reflected in learning plans
- 1.4 Individual/team access to, and participation in, formal and informal learning opportunities is facilitated
- 1.5 Negotiation is undertaken with training and development specialists to plan and provide learning that enhances the operation of the workplace

2 Facilitate and promote learning

- 2.1 Workplace activities are used as opportunities for learning
- 2.2 Workplace knowledge, skills and attitudes are developed through coaching and mentoring
- 2.3 Benefits of learning are shared with others in the team/workplace
- 2.4 Workplace achievement is recognised by timely and appropriate recognition, feedback and rewards

3 Monitor and improve learning effectiveness

- 3.1 Feedback from individuals/teams is used to identify and introduce improvements in future learning arrangements
- 3.2 Adjustments negotiated with training and development specialists result in improvements to the efficiency and effectiveness of learning
- 3.3 Records and reports of competency are documented and maintained within workplace systems and procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIP5007 Contribute to the development of a workplace learning environment

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying relevant assessment guidelines and endorsed competency standards appropriate for the workplace
- applying relevant legislation and workplace procedures
- communicating effectively with others when developing a workplace learning environment
- completing documentation related to developing a workplace learning environment
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- planning and organising learning opportunities
- prioritising work and coordinating self and others in relation to workplace learning opportunities and activities
- providing leadership and working collaboratively with others when developing a workplace learning environment
- reading and interpreting competency standards, job specifications, training and assessment instructions and materials relevant to developing a workplace learning environment
- selecting and applying appropriate technology, learning and assessment resources, information systems and procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of current competencies within functional activity
- application of relevant assessment guidelines and endorsed competency standards appropriate for the workplace
- business policies and plans including training and assessment
- focus of operation of work systems, resources, management and workplace operating systems
- problems that may occur when developing a workplace learning environment and action to be taken to report or resolve these problems
- quality and customer service standards, policies and procedures
- relevant regulations, codes of practice and legislative requirements
- relevant workplace documentation procedures
- resource availability including the competencies of individuals in the team/group
- workplace policies and processes for developing a workplace learning environment.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

TLIR4001 Monitor supplier performance

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to monitor the performance of contracted suppliers of goods/materials/services in compliance with workplace procedures and requirements.

It includes administering supplier contract, assessing for conformity to contracted requirements and completing all required contract documentation.

Work is performed under general guidance on progress and outcomes of work. It involves discretion and judgement for self and others in monitoring supplier performance.

Work involves responsibility for resource coordination and allocation, and for leading individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Administer supplier contract

1.1 Procedures for receiving supplied goods/materials/services are documented and implemented within the workplace

1.2 Supplied goods/material/services are assessed for conformity to contracted requirements including price, quantity, quality and delivery schedules

1.3 Non-conformance of supplier with contracted requirements is accurately detailed

1.4 Actions to rectify non-conformance are undertaken in accordance with enterprise procedures and within scope of authority

1.5 Issues of non-conformance beyond scope of authority are referred to designated personnel in accordance with enterprise operating procedures

2 Complete documentation

2.1 Annotations and performance assessment/evaluations are completed and appended to supplier file

2.2 Action taken in regard to non-conformance of contracted requirements is documented and appended to supplier file

2.3 System records are maintained and updated in accordance with enterprise information management system and required regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

TLIR4002 Source goods/services and evaluate contractors

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to source goods/services and to evaluate contractors in accordance with workplace policy and procedures.

The unit generally applies to those with responsibility for resource coordination and allocation and who lead individuals or teams.

It includes analysing supply requirements as well as evaluating and selecting appropriate potential contractors.

This unit involves discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

Work is performed under general guidance on progress and work outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

R – Contract Procurement

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential outcomes.

Performance criteria describe the performance needed to demonstrate achievement of the element.

1 Analyse supply requirements

- 1.1 Purpose and specifications of required goods/services are identified
- 1.2 Criteria to evaluate potential or existing contractor performance is established
- 1.3 Quantities of required goods/services are determined
- 1.4 Frequency of ordering/requesting of goods/services is identified

2 Evaluate potential contractors

- 2.1 Contractors of requested goods/materials/services are identified
- 2.2 Comparative costings for goods/materials/services are obtained
- 2.3 Contractor ability to provide a consistent level of performance on repeat jobs is assessed
- 2.4 Contractors are evaluated in relation to established criteria and in accordance with workplace and regulatory procedures
- 2.5 Prioritised contractor shortlist is established based on contractor capacity to provide a cost competitive quality service
- 2.6 Contractor selection process outcomes are documented including recommendations for actioning agreements/contracts with selected contractors
- 2.7 Information and data generated during selection process is filed and maintained in accordance with workplace procedures

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

TLIR4003 Negotiate a contract

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to contract transport and logistics services in compliance with relevant regulations, standards, legal requirements, codes of practice and workplace procedures.

It includes negotiating the contract, finalising the contract negotiations, as well as completing all contract requirements with a contractor.

The unit generally applies to those with responsibility for resource coordination and allocation, and who lead individuals or teams.

Work is under general guidance on progress and outcomes. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Elements and Performance Criteria

ELEMENTS

Elements describe the

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

essential outcomes.

demonstrate achievement of the element.

1 Negotiate contract specifics with contractor

1.1 Requirements of the contract are clearly documented and agreed to by the relevant parties

1.2 Areas of ambiguity or concern are clarified and resolved

1.3 Negotiations are undertaken with selected contractor for the contracting of required goods/services on a 'without prejudice' basis

1.4 Conditions for service and/or supply of goods/services are agreed between the enterprise and the contractor including the determination of key performance indicators

1.5 Alternative contractors are negotiated with if agreement is unable to be reached with preferred contractor

1.6 Contract negotiations are conducted in accordance with established workplace requirements and relevant legislation

2 Complete contract negotiations

2.1 Contract documentation is drafted in accordance with relevant legislation, workplace procedures and negotiated conditions of service and supply

2.2 Technical support in drafting contracts is accessed as required

2.3 Contract documentation is signed and exchanged between relevant parties

3 Complete enterprise contract requirements

3.1 Documentation systems are established to ensure traceability of orders and financial transactions

3.2 Workplace systems that require interaction with contractors are identified and actioned

3.3 Quality assurance procedures for supplied goods/services are initiated

3.4 Contract and ancillary documentation is completed and stored as required, in accordance with workplace procedures and regulatory requirements

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

TLIU1009 Monitor plant and equipment in an environmentally sustainable manner

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to monitor plant and equipment in an environmentally sustainable manner, in accordance with relevant state/territory environmental protection regulations, guidelines and workplace procedures.

It includes minimising the effects of pollution when operating and monitoring plant and equipment. It also includes transporting and handling environmentally hazardous materials safely.

Work is performed under some supervision generally within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

U – Environment

Unit Sector

Not applicable.

Elements and Performance Criteria

Elements describe the essential Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Minimise pollution effects during operations

1.1 Precautions are taken to ensure spilt fuel, lubricants and chemicals do not pollute the environment

1.2 Plant and equipment are operated efficiently to minimise air pollution through excessive exhaust emissions

1.3 Running of plant and equipment is minimised to avoid unnecessary noise and air pollution

1.4 Worksites are kept clean and tidy during work operations and waste is disposed of in accordance with environmental protection regulations and workplace procedures

2 Minimise pollution effects when monitoring plant and equipment

2.1 Routine checks are conducted or organised to ensure plant and equipment are operating correctly including emission controls where fitted

2.2 Suitable precautions are taken when cleaning plant and equipment not to pollute the environment

2.3 Care is taken during services and maintenance operations to implement housekeeping procedures and environmental protection precautions and procedures

2.4 Rubbish is deposited in designated rubbish disposal bins

3 Transport/handle environmentally hazardous materials safely

3.1 Relevant documentation is completed in accordance with government regulations and workplace requirements

3.2 Waste and effluent are disposed of in accordance with government regulations and workplace procedures

3.3 Environmentally hazardous materials are handled and moved in accordance with relevant regulations, workplace procedures and guidelines aimed at minimising the risk of environmental pollution

3.4 Routes for plant and equipment carrying hazardous and noxious loads are planned to minimise risk to the environment in an accident or spillage

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Assessment Requirements for TLIU1009 Monitor plant and equipment in an environmentally sustainable manner

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- adapting to differences in equipment and operating environment in accordance with standard operating procedures
- applying relevant legislation and workplace procedures
- communicating effectively with others
- completing relevant documentation
- following routine service and maintenance procedures for equipment and vehicles
- identifying and correctly using equipment and vehicles in accordance with environmental protection regulations and guidelines
- identifying suitable disposal and transport methods of hazardous or noxious materials
- identifying suitable precautions to prevent plant and equipment from polluting the environment
- interpreting and following operational instructions and prioritising work
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- reading and interpreting relevant instructions, procedures and information
- recognising potential pollution risks and ways of minimising these risks
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- working collaboratively with others
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of relevant environmental protection regulations and requirements
- emission control checking requirements for plant and equipment
- environmental hazards and toxicity of materials typically carried in loads
- environmental protection standards required in the workplace
- environmental risks when carrying out workplace operations, and related precautions to control the risk
- procedures and processes for waste and effluent regulation
- relevant environmental protection regulations
- service and maintenance procedures and checklists for equipment and vehicles
- site layout including location of rubbish disposal bins
- typical problems that can occur when caring for the environment, and appropriate action that can be taken to prevent or solve these problems
- workplace procedures and guidelines monitoring plant and equipment in an environmentally sustainable manner during workplace operations.
-

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the *Standards for Registered Training Organisations* current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry
- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIU4001 Implement and monitor environmental protection policies and procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to implement and monitor environmental protection policies and procedures.

It includes accessing relevant information concerning environmental protection regulations and procedures as well as implementing and monitoring environmental hazard procedures, related control procedures, environmental training arrangements and required records and documentation.

People achieving competence in this unit will need to comply with relevant national, state/territory legislative and regulatory requirements and codes of practice.

Work is generally performed within a team environment.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

U – Environment

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to

outcomes.

demonstrate achievement of the element.

1 Access information about environmental protection regulations and procedures

- 1.1 Relevant provisions of environmental legislation and codes of practice are accurately followed
- 1.2 Information on workplace environmental policies, procedures and programs is stored in a readily accessible location, in accordance with workplace procedures
- 1.3 Information is accurately and clearly explained to the work team and updated in accordance with workplace policy changes
- 1.4 Information about the outcomes of environmental risk identification and control procedures is provided to appropriate personnel

2 Implement and monitor environmental hazard procedures

- 2.1 Existing and potential environmental hazards in the workplace are identified and reported
- 2.2 Identified hazards are assessed in relation to relevant environmental protection policies
- 2.3 Workplace procedures for dealing with hazardous events are implemented to ensure that prompt control action is taken
- 2.4 Hazardous events are investigated to identify causes, and control measures are implemented to prevent recurrence and minimise risks of such events

3 Implement and monitor environmental control procedures

- 3.1 Existing environmental protection measures are implemented, monitored and reviewed
- 3.2 Environmental protection procedures are implemented and work group adherence to them is monitored
- 3.3 Required improvements to existing control measures are identified, including required resources for implementation, and reported to appropriate personnel

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIU4001A Implement and monitor environmental protection policies and procedures.

Assessment Requirements for TLIU4001 Implement and monitor environmental protection policies and procedures

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- carrying out training needs analysis relevant to workplace requirements
- communicating and working effectively with others orally and in writing when implementing and monitoring environmental protection procedures
- completing documentation related to implementing and monitoring environmental protection procedures
- counselling, advising and informing others on environmental protection matters
- identifying and correctly using equipment and vehicles in accordance with environmental protection regulations and guidelines
- interpreting and following operational instructions and prioritising work
- modifying activities depending on operational contingencies, risk situations and environments
- monitoring work activities in terms of planned schedule
- operating and adapting to differences in equipment in accordance with standard operating procedures
- operating electronic communications equipment to required protocol
- providing leadership and working collaboratively with others when implementing and monitoring environmental protection procedures
- reading and interpreting instructions, procedures, information and signs relevant to implementing and monitoring environmental protection procedures
- recognising potential environmental risks and ways of minimising them
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and using required personal protective equipment, conforming to industry and work health and safety (WHS)/occupational health and safety (OHS) standards
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- equipment and resources required when implementing and monitoring environmental protection, and instructions for their use
- hierarchy of control principles for environmental risks (including preferred models for risk elimination, engineering controls, administrative controls and specific environmental protection techniques)
- problems that can occur when implementing and monitoring environmental protection procedures
- relevant management systems and procedures for environmental management
- relevant national, state/territory legislative and regulatory requirements and codes of practice
- significance of equal employment opportunity (EEO) principles and practice for environmental management
- workplace environmental hazards and related hazard control measures
- workplace environmental operational risks and related precautions to control these risks
- workplace environmental protection standards
- workplace procedures and guidelines for implementing and monitoring environmental protection
- workplace reporting and recording processes and procedures.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

Assessment must occur in workplace operational situations where it is appropriate to do so; where this is not appropriate, assessment must occur in simulated workplace operational situations that replicate workplace conditions.

Assessment processes and techniques must be appropriate to the language, literacy and numeracy requirements of the work being performed and the needs of the candidate.

Resources for assessment include:

- a range of relevant exercises, case studies and/or other simulations
- relevant and appropriate materials, tools, equipment and personal protective equipment currently used in industry

- applicable documentation including workplace procedures, regulations, codes of practice and operation manuals.

TLIU5006 Conduct environmental audits

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Application

This unit involves the skills and knowledge required to conduct an environmental audit in accordance with relevant environmental protection regulatory requirements, standards, codes of practice and workplace procedures.

It includes preparing and conducting an environmental audit, scheduling an internal audit, documenting the findings and reporting on the results.

Work is carried out under general guidance on progress and outcomes. It requires discretion and judgement for self and others in planning and using resources, services and processes to achieve required outcomes.

The unit applies to those with responsibility for resource coordination and allocation, who lead individuals or teams.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Pre-requisite Unit

Not applicable.

Competency Field

U – Environment

Unit Sector

Not applicable.

Elements and Performance Criteria

ELEMENTS

Elements describe the essential outcomes.

PERFORMANCE CRITERIA

Performance criteria describe the performance needed to demonstrate achievement of the element.

- 1 Prepare for environmental audit**
 - 1.1 Relevant legislation, authority and enterprise requirements pertinent to workplace operations are identified and followed
 - 1.2 Practices and facilities required to be audited are identified and implications of non-conformance are established
 - 1.3 Technical and/or calibration requirements for audits are noted and appropriate support personnel are identified as required
 - 1.4 Work schedules are investigated to identify appropriate schedule for audit
- 2 Schedule environmental internal audit**
 - 2.1 Audit timings are planned to ensure relevant procedures are conducted within workplace agreed time intervals and timeframes
 - 2.2 Audit frequency is adjusted to ensure minimal disruption to the workplace
 - 2.3 Contact is made with appropriate personnel and audit appointments are made
- 3 Conduct environmental audit and document findings**
 - 3.1 Operational procedures and assessment methods for the environmental audit are confirmed with personnel concerned
 - 3.2 Observations and interviews are conducted with approved third party as required
 - 3.3 Documentation of observations and interview responses is completed
- 4 Report environmental audit results**
 - 4.1 Outcomes of the audit process are compared to workplace procedures
 - 4.2 Audit results are discussed with relevant personnel
 - 4.3 Reports of non-compliance are documented and options for system improvements are recommended
 - 4.4 Reports are forwarded to appropriate personnel for action

Foundation Skills

Foundation skills essential to performance are explicit in the performance criteria of this unit of competency.

Range of Conditions

Range is restricted to essential operating conditions and any other variables essential to the work environment.

Non-essential conditions can be found in the Companion Volume Implementation Guide.

Unit Mapping Information

This unit replaces and is equivalent to TLIU5006A Conduct environmental audits.

Assessment Requirements for TLIU5006 Conduct environmental audits

Modification History

Release 1. This is the first release of this unit of competency in the TLI Transport and Logistics Training Package.

Performance Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria on at least one occasion and include:

- applying precautions and required action to minimise, control or eliminate hazards that may exist during work activities
- applying relevant legislation and workplace procedures
- communicating effectively with others when conducting an environmental audit
- completing documentation related to conducting an environmental audit
- interpreting and following operational instructions and prioritising work
- modifying activities to cater for variations in workplace contexts and environment
- monitoring work activities in terms of planned schedule
- operating electronic communications equipment to required protocol
- planning and organising environmental audit activities
- providing leadership and working collaboratively with others when conducting an environmental audit
- reading and interpreting instructions, technical data, regulatory requirements and workplace policies and procedures relevant to conducting an environmental audit
- reporting and/or rectifying identified problems promptly, in accordance with regulatory requirements and workplace procedures
- selecting and applying appropriate technology, information systems and procedures
- working systematically with required attention to detail without injury to self or others, or damage to goods or equipment.

Knowledge Evidence

Evidence required to demonstrate competence in this unit must be relevant to and satisfy all of the requirements of the elements and performance criteria and include knowledge of:

- application of relevant Australian standards and associated certification requirements
- audit procedures and compliance implementation strategies
- environmental risk management and control procedures
- environmental safety regulatory and guidance material
- equipment applications, capacities, configurations, safety hazards and control
- hazards that may exist when conducting an environmental audit and ways of controlling the risks involved
- operation of workplace in relation to potential environmental risks and control/prevention measures
- problems that may occur when conducting an environmental audit and action to be taken to report or resolve these problems
- relevant work health and safety(WHS)/occupational health and safety (OHS) and environmental protection procedures and regulations, including the Australian Dangerous Goods (ADG) Code where applicable
- relevant workplace documentation procedures
- resource availability including the competencies of individuals in the team/group
- workplace business policies and plans including procedures for identifying non-compliance and best practice
- workplace processes for conducting an environmental audit.

Assessment Conditions

As a minimum, assessors must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

As a minimum, assessment must satisfy applicable regulatory requirements, which include requirements in the Standards for Registered Training Organisations, current at the time of assessment.

AVISS00031 Aerobatic Pilot Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces but is **not** equivalent to the AVISS00001 Aerobatic Pilot Skill Set.

Description

This Skill Set is for pilots who perform aerobatic manoeuvres, sequences and control aircraft in advanced flight manoeuvres in aircraft approved for aerobatic flight.

Pathways Information

The AVISS00031 Aerobatic Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **4 units** of competency must be attained.

AVIY0015	Perform an aerobatic sequence
AVIY0017	Control aircraft in advanced flight manoeuvres
AVIY0046	Execute advanced aeroplane manoeuvres and procedures
AVIY4061	Perform aerobatic manoeuvres

Target Group

Pilots who perform aerobatic manoeuvres, sequences and control aircraft in advanced flight manoeuvres in aircraft approved for aerobatic flight.

Suggested words for Statement of Attainment

The AVISS00031 Aerobatic Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of people working as an aerobatic pilot in an aviation operational environment.

Custom Content Section

Not applicable.

AVISS00032 Airborne Rappelling Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces but is **not** equivalent to the AVISS00005 Airborne Rappelling Skill Set.

Description

This Skill Set reflects the work required by individuals who apply aircraft safety procedures, and fast rope and rappel from helicopters in aviation operational environments.

Pathways Information

The AVISS00032 Airborne Rappelling Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **3 units** of competency must be attained.

AVIF0023 Apply aircraft safety procedures

AVIW0015 Fast rope from a helicopter

AVIW0016 Rappel from a helicopter

Target Group

Individuals who apply aircraft safety procedures, and fast rope and rappel from helicopters in aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00032 Airborne Rappelling Skill Set is from the AVI Aviation Training Package and

meets the needs people who apply aircraft safety procedures, and fast rope and rappel from helicopters in aviation operational environments.

Custom Content Section

Not applicable.

AVISS00033 Airborne Rappelling Supervisor Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00006 Airborne Rappelling Supervisor Skill Set.

Description

This Skill Set reflects the work required by people who perform the duties of airborne rappelling supervisors in aviation operational environments.

Pathways Information

The AVISS00033 Airborne Rappelling Supervisor Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **2 units** of competency must be attained.

AVIY0067 Conduct airborne extraction operations

AVIY0068 Conduct airborne rappelling operations

Target Group

Individuals who perform the role of an airborne rappelling supervisor within aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00033 Airborne Rappelling Supervisor Skill Set is from the AVI Aviation Training

Package and meets the needs of people working as an airborne rappelling supervisor in aviation operational environments.

Custom Content Section

Not applicable.

AVISS00034 Airborne Recovery Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces but is **not** equivalent to the AVISS00007 Airborne Recovery Skill Set.

Description

This Skill Set reflects the work required by people engaged in airborne recovery activities within aviation operational environments.

Pathways Information

The AVISS00034 Airborne Recovery Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **3 units** of competency must be attained.

AVIF0023 Apply aircraft safety procedures

AVIW0013 Be airborne extracted by suspended rope

AVIW0014 Be airborne extracted using suspended extraction equipment

Target Group

People interested in airborne recovery activities within the aviation operational environment.

Suggested words for Statement of Attainment

The AVISS00034 Airborne Recovery Skill Set is from the AVI Aviation Training Package and meets the needs of people engaged in airborne recovery activities in an aviation operational

environment.

Custom Content Section

Not applicable.

AVISS00035 Aircraft Underwater Escape Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces but is **not** equivalent to the AVISS00008 Aircraft Underwater Escape Skill Set.

Description

This Skill Set is for individuals required to undertake aircraft underwater escape and survival, to apply aircraft safety procedures, and to provide basic emergency life support in aviation operational environments.

Pathways Information

The AVISS00035 Aircraft Underwater Escape Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **3 units** of competency must be attained.

AVIF0023 Apply aircraft safety procedures

AVIF0038 Undertake aircraft underwater escape and survival

HLTAID002 Provide basic emergency life support

Target Group

Individuals in the aviation operational environment who require aircraft underwater escape skills such as airborne observer, flight crew and emergency services personnel who work underwater.

Suggested words for Statement of Attainment

The AVISS00035 Aircraft Underwater Escape Skill Set is from the AVI Aviation Training Package and meets the needs of people working in the helicopter operational environment who require aircraft underwater escape skills.

Custom Content Section

Not applicable.

AVISS00036 Aviation Operator Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces but is **not** equivalent to the AVISS00009 Aviation Operator Skill Set.

Description

This Skill Set reflects the work required by people who operate around aircraft, including fixed wing, rotary wing and balloon craft. It provides the skills and knowledge to apply aircraft safety procedures, to maintain basic situational awareness, to use communications systems and to follow security procedures within aviation operating environments.

Pathways Information

The AVISS00036 Aviation Operator Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority for specific requirements.

Skill Set Requirements

A total of **4 units** of competency must be attained.

AVIF0023	Apply aircraft safety procedures
AVIZ0003	Maintain basic situational awareness in an aviation workplace
TLIE2007	Use communications systems
TLIO1002	Follow security procedures when working with passengers and personnel

Target Group

People interested in operating around aircraft, including fixed wing, rotary wing and balloon craft.

Suggested words for Statement of Attainment

The AVISS00036 Aviation Operator Skill Set meets the needs people working as aviation operators in an aviation operational environment.

Custom Content Section

Not applicable.

AVISS00037 Cabin Crew Supervisor Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces but is **not** equivalent to the AVISS00010 Aviation Supervisory Cabin Crew Skill Set.

Description

This Skill Set is for individuals who perform cabin crew supervisory roles within commercial, charter or Defence aviation operational environments.

Pathways Information

The AVISS00037 Cabin Crew Supervisor Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **4 units** of competency must be attained.

AVIF0041	Maintain the safety of people and aircraft
AVIF0042	Respond to abnormal and emergency situations in an aircraft
HLTAID007	Provide advanced resuscitation
TLII4001	Coordinate quality customer service

Target Group

People interested in cabin crew supervisory roles within commercial, charter or Defence Aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00037 Cabin Crew Supervisor Skill Set is from the AVI Aviation Training Package and meets the needs of people who perform cabin crew supervisory roles within commercial, charter or Defence Aviation operational environments.

Custom Content Section

Not applicable.

AVISS00038 Emergency Breathing System Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00011 Emergency Breathing System Skill Set.

Description

This Skill Set is for individuals who work specifically in aviation operational environments and use emergency breathing systems.

Pathways Information

The AVISS00038 Emergency Breathing System Skill Set is part of the AVI Aviation Training Package. It may be undertaken in conjunction with the AVISS00035 Aircraft Underwater Escape Skill Set.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence aviation for specific requirements.

Skill Set Requirements

A total of **1 unit** of competency must be attained.

AVIF0039 Utilise emergency breathing system

Target Group

Individuals who work specifically in aviation operational environments and who use emergency breathing systems such as airborne observers, flight crew, emergency services workers who use an emergency breathing system.

Suggested words for Statement of Attainment

The AVISS00038 Emergency Breathing System Skill Set is from the AVI Aviation Training

Package and meets the needs of people who work in aviation operational environments and use emergency breathing systems.

Custom Content Section

Not applicable.

AVISS00039 External Load Pilot Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00012 External Load Pilot Skill Set.

Description

This Skill Set is for individuals who pilot a helicopter during external load operations in aviation operational environments.

Pathways Information

The AVISS00039 External Load Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence aviation for specific requirements.

Skill Set Requirements

A total of **1 unit** of competency must be attained.

AVIY0069 Pilot a helicopter during external load operations

Target Group

Helicopter pilots conducting external load operations in aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00039 External Load Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of people who pilot a helicopter during external load operations in aviation operational environments.

Custom Content Section

Not applicable.

AVISS00040 Formation Pilot Skill Set

Modification History

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00013 Formation Pilot Skill Set.

Description

This Skill Set is for individuals who perform close formation flight and lead close formation flight in aviation operational environments.

Pathways Information

The AVISS00040 Formation Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence aviation for specific requirements.

Skill Set Requirements

A total of **2 units** of competency must be attained.

AVIY0016 Lead formation flight

AVIY4063 Perform close formation flight

Target Group

Pilots who perform close formation flight and lead close formation flight in aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00040 Formation Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of pilots who perform close formation flight, and who lead close formation flight in aviation operational environments.

Custom Content Section

Not applicable.

AVISS00041 Handle Dangerous Goods/Hazardous Substances Skill Set

Modification History

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00014 Handle Dangerous Goods/Hazardous Substances Skill Set.

Description

This Skill Set covers personnel working in the aviation industry in transport, warehousing, distribution or storage who may handle dangerous goods and/or hazardous substances.

Pathways Information

The AVISS00041 Handle Dangerous Goods/Hazardous Substances Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with relevant Dangerous Goods industry authorities for specific requirements.

Skill Set Requirements

A total of **1 unit** of competency must be attained.

TLID2003 Handle dangerous goods/hazardous substances

Target Group

Personnel working in aviation transport, warehousing, distribution and storage who may handle dangerous goods and/or hazardous substances.

Suggested words for Statement of Attainment

The AVISS00041 Handle Dangerous Goods/Hazardous Substances Skill Set is from the AVI Aviation Training Package and meets the needs of people working in aviation transport, warehousing, distribution and storage who also handle dangerous goods and/or hazardous substances.

Custom Content Section

Not applicable.

AVISS00042 Helicopter Wireman Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00015 Helicopter Wireman Skill Set.

Description

This Skill Set is for individuals who perform helicopter wireman duties in aviation operational environments.

Pathways Information

The AVISS00042 Helicopter Wireman Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **1 unit** of competency must be attained.

AVIW0024 Perform down the wire duties

Target Group

Individuals who perform helicopter wireman duties in aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00042 Helicopter Wireman Skill Set is from the AVI Aviation Training Package and meets the needs of people who perform helicopter wireman duties in aviation operational environments.

Custom Content Section

Not applicable.

AVISS00043 Cargo Hold Baggage Handler Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00016 Manual Handle Freight/Baggage in Aircraft Cargo Hold Confined Spaces Skill Set.

Description

This Skill Set reflects the work required by people who load, unload and secure aviation freight and baggage from inside the aircraft cargo hold in ramp operational environments.

Pathways Information

The AVISS00043 Cargo Hold Baggage Handler Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

A total of **3 units** of competency must be attained.

AVID0009 Load and secure aviation freight and baggage

AVID0010 Unload aviation freight and baggage

AVIF2019 Work in aircraft confined spaces

Target Group

People interested in loading, securing and unloading aviation freight and baggage from outside the aircraft in ramp operational environments.

Suggested words for Statement of Attainment

The AVISS00043 Cargo Hold Baggage Handler Skill Set is from the AVI Aviation Training

Package and meets the needs of people who load, unload and secure aviation freight and baggage from inside the aircraft cargo hold in ramp operational environments.

Custom Content Section

Not applicable.

AVISS00044 Marine Transfer Pilot Skill Set

Modification History

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00017 Marine Transfer Pilot Skill Set.

Description

This Skill Set is for individuals who perform helicopter deck landing operations during marine transfer operations.

Pathways Information

The AVISS00044 Marine Transfer Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **1 unit** of competency must be attained.

AVIY4057 Perform helicopter deck landing operations

Target Group

Marine transfer pilots who perform helicopter deck landing operations during marine transfer operations.

Suggested words for Statement of Attainment

The AVISS00044 Marine Transfer Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of marine transfer pilots who perform helicopter deck landing operations during marine transfer operations.

Custom Content Section

Not applicable.

AVISS00045 Night Vision Imaging System Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00018 Night Aided Vision Aviation Operations Skill Set.

Description

This Skill Set is for individuals who conduct night vision imaging system (NVIS) operations in fixed or rotary wing aircraft operational environments.

Pathways Information

The AVISS00045 Night Vision Imaging System Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **1 unit** of competency must be attained.

AVIW0026 Conduct night vision imaging system operations

Target Group

Flight operations personnel who conduct NVIS operations in fixed or rotary wing aircraft operational environments.

Suggested words for Statement of Attainment

The AVISS00045 Night Vision Imaging System Skill Set is from the AVI Aviation Training Package and meets the needs of people who conduct night vision imaging system (NVIS)

operations in fixed or rotary wing aircraft operational environments.

Custom Content Section

Not applicable.

AVISS00046 Night Visual Flight Rules Pilot Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces but is **not** equivalent to the AVISS00019 Night Visual Flight Rules (NVFR) Pilot Skill Set.

Description

This Skill Set is for individuals who pilot fixed and rotary wing aircraft in aviation operational environments, under night visual flight rules (NVFR).

Pathways Information

The AVISS00046 Night Visual Flight Rules Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **4 units** of competency must be attained.

AVIH0015	Plan a flight under night visual flight rules
AVIH0016	Navigate aircraft under night visual flight rules
AVIY0033	Operate aircraft using aircraft flight instruments
AVIY0073	Operate aircraft in the traffic pattern at night

Target Group

Individuals who pilot fixed and rotary wing aircraft in aviation operational environments, under NVFR.

Suggested words for Statement of Attainment

The AVISS00046 Night Visual Flight Rules Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of people who pilot fixed and rotary wing aircraft in aviation operational environments, under night visual flight rules (NVFR).

Custom Content Section

Not applicable.

AVISS00047 Notice to Airmen Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00020 Notice to Airmen Skill Set.

Description

This Skill Set is for individuals who are required to complete a Notice to Airmen (NOTAM) in support of broader aviation operational objectives.

Pathways Information

The AVISS00047 Notice to Airmen Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

A total of **1 unit** of competency must be attained.

AVIE0005 Complete a Notice to Airmen (NOTAM)

Target Group

Individuals who are required to complete a Notice to Airmen (NOTAM) in support of broader aviation operational objectives.

Suggested words for Statement of Attainment

The AVISS00047 Notice to Airmen Skill Set is from the AVI Aviation Training Package and meets the needs of people who complete a Notice to Airmen (NOTAM) in support of broader aviation operational objectives.

Custom Content Section

Not applicable.

AVISS00048 Rappelling and Hoisting Pilot Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00021 Rappelling and Winching Pilot Skill Set.

Description

This Skill Set is for individuals who pilot a helicopter during rappelling and hoisting operations in aviation operational environments.

Pathways Information

The AVISS00048 Rappelling and Hoisting Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **2 units** of competency must be attained.

AVIY0070 Pilot a helicopter during rappelling operations

AVIY0071 Pilot a helicopter during hoisting operations

Target Group

Individuals who pilot a helicopter during rappelling and hoisting operations in aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00048 Rappelling and Hoisting Pilot Skill Set is from the AVI Aviation Training

Package and meets the needs of people who pilot a helicopter during rappelling and hoisting operations in aviation operational environments.

Custom Content Section

Not applicable.

AVISS00049 Simulator Operator Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00022 Simulator Operator Skill Set.

Description

This Skill Set is for individuals who operate simulators in support of vocational education and training objectives.

Pathways Information

The AVISS00049 Simulator Operator Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with industry regulatory authorities for specific requirements.

Skill Set Requirements

A total of **1 unit** of competency must be attained.

AVIM0008 Operate a simulator

Target Group

Individuals who operate simulators in support of vocational education and training objectives.

Suggested words for Statement of Attainment

The AVISS00049 Simulator Operator Skill Set is from the AVI Aviation Training Package and meets the needs of people who operate simulators in support of vocational education and training objectives.

Custom Content Section

Not applicable.

AVISS00050 Simulator Operator/Trainer Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00023 Simulator Operator/Trainer Skill Set.

Description

This Skill Set is for individuals who operate simulators, facilitate training in a synthetic environment and provide work skill instruction in support of vocational education and training objectives.

Pathways Information

The AVISS00050 Simulator Operator/Trainer Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with industry regulatory authorities for specific requirements.

Skill Set Requirements

A total of **3 units** of competency must be attained.

AVIM0008	Operate a simulator
AVIM0009	Facilitate training in a synthetic environment
TAEDEL301	Provide work skill instruction

Target Group

Individuals who operate simulators, facilitate training in a synthetic environment, and provide work skill instruction in support of vocational education and training objectives.

Suggested words for Statement of Attainment

The AVISS00050 Simulator Operator/Trainer Skill Set is from the AVI Aviation Training Package and meets the needs of people who operate simulators, facilitate training in a synthetic environment and provide work skill instruction in support of vocational education and training objectives.

Custom Content Section

Not applicable.

AVISS00051 Simulator Trainer Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00024 Simulator Trainer Skill Set.

Description

This Skill Set is for individuals who facilitate training in a synthetic environment and provide work skill instruction, in support of vocational education and training objectives.

Pathways Information

The AVISS00051 Simulator Trainer Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with industry regulatory authorities for specific requirements.

Skill Set Requirements

A total of **2 units** of competency must be attained.

AVIM0009 Facilitate training in a synthetic environment

TAEDEL301 Provide work skill instruction

Target Group

Individuals who facilitate training in a synthetic environment and provide work skill instruction in support of vocational education and training objectives.

Suggested words for Statement of Attainment

The AVISS00051 Simulator Trainer Skill Set is from the AVI Aviation Training Package and meets the needs of people who facilitate training in a synthetic environment, and provide work

skill instruction in support of vocational education and training objectives.

Custom Content Section

Not applicable.

AVISS00052 Use and Maintain Minor Mechanical Equipment Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00025 Use and Maintain Minor Mechanical Equipment Skill Set.

Description

This Skill Set reflects the work required by people who use and maintain minor mechanical equipment in aviation operational environments.

Pathways Information

The AVISS00052 Use and Maintain Minor Mechanical Equipment Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with relevant industry authorities for specific requirements.

Skill Set Requirements

A total of **1 unit** of competency must be attained.

TLIB0003 Use and maintain minor mechanical equipment

Target Group

People who are interested in using and maintaining minor mechanical equipment in aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00052 Use and Maintain Minor Mechanical Equipment Skill Set is from the AVI

Aviation Training Package and meets the needs of people who use and maintain minor mechanical equipment in aviation operational environments.

Custom Content Section

Not applicable.

AVISS00053 Aerodrome Reporting Officer Skill Set

Modification History

Release 2. Unit title AVIE3003 updated. Licensing/regulatory statement updated. No change in outcomes.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00026 Aerodrome Reporting Officer Skill Set

Description

This Skill Set is applicable to aerodrome reporting officers operating at aerodromes within Australian aviation environments. It provides the skills and knowledge required to perform the duties of Aerodrome Reporting Officers.

Pathways Information

This Skill Set contributes to a range of qualifications in the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure they have also read the part of the Training Package and Companion Volume Implementation Guide that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **8 units** of competency must be attained.

AVIB0002	Inspect and report on aerodrome serviceability
AVIB0003	Inspect and report on serviceability of aerodrome lighting systems
AVIB0004	Inspect and report on obstacle limitation surfaces
AVIC0001	Drive on the airside
AVIE0003	Operate aeronautical radio
AVIE0005	Complete a Notice to Airmen (NOTAM)
AVIF0045	Facilitate the safety of aerodrome works and works site access

AVIZ0003 Maintain basic situational awareness in an aviation workplace

Target Group

Individuals who perform the role of the aerodrome reporting officer within the aviation environment.

Suggested words for Statement of Attainment

The AVISS00053 Aerodrome Reporting Officer Skill Set is from the AVI Aviation Training Package and meets the needs of aerodrome reporting officers who work in an aviation environment.

Custom Content Section

AVISS00054 Aerodrome Works Safety Officer working with a Method of Works Plan Skill Set

Modification History

Release 2. Title of AVIE0005 updated. Licensing/regulatory statement updated. No change in outcomes.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00027 Aerodrome Works Safety Officer working with a Method of Works Plan (MOWP) Skill Set.

Description

This Skill Set is for individuals who perform the duties of aerodrome works safety officers operating at aerodromes within Australian aviation environments. It provides the skills and knowledge required to inspect and report on aerodrome serviceability, aerodrome lighting systems, and obstacle limitation surfaces and complete a Notice to Airmen (NOTAM).

Pathways Information

This Skill Set contributes to a range of qualifications in the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure they have also read the part of the Training Package and Companion Volume Implementation Guide that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **4 units** of competency must be attained.

AVIB0002	Inspect and report on aerodrome serviceability
AVIB0003	Inspect and report on serviceability of aerodrome lighting systems
AVIB0004	Inspect and report on obstacle limitation surfaces
AVIE0005	Complete a Notice to Airmen (NOTAM)

Target Group

Individuals who perform the role of an aerodrome works safety officer working with a MOWP in

an aviation environment.

Suggested words for Statement of Attainment

The AVISS00054 Aerodrome Works Safety Officer Working with a Method of Works Plan Skill Set is from the AVI Aviation Training Package and meets the needs of people performing the duties of an aerodrome works safety officer working with a method of works plan at aerodromes in Australian aviation environments.

Custom Content Section

Not applicable.

AVISS00055 Aerodrome Works Safety Officer working on Time Limited Works Skill Set

Modification History

Release 2. Minor edits. Licensing/regulatory statement updated. No change in outcomes.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00028 Aerodrome Works Safety Officer working on Time Limited Works Skill Set.

Description

This Skill Set is for individuals who perform the duties of aerodrome works safety officers at aerodromes within Australian aviation environments. It provides the skills and knowledge required to drive within airside environments, maintain radio communications as part of airport operations, and facilitate aerodrome works safety and works site access.

Pathways Information

This Skill Set contributes to a range of qualifications in the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure they have also read the part of the Training Package and Companion Volume Implementation Guide that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of **4 units** of competency must be attained.

AVIC0001	Drive on the airside
AVIE0003	Operate aeronautical radio
AVIF0045	Facilitate the safety of aerodrome works and works site access
AVIZ0003	Maintain basic situational awareness in an aviation workplace

Target Group

Individuals who perform the role of the aerodrome works safety officer working on time limited

works in an aviation environment.

Suggested words for Statement of Attainment

The AVISS00055 Aerodrome Works Safety Officer working on Time Limited Works Skill Set is from the AVI Aviation Training Package and meets the need of people performing the duties of an aerodrome works safety officer working on time limited works at aerodromes in Australian aviation environments

Custom Content Section

Not applicable.

AVISS00056 Maintain Security Awareness and Vigilance in the Aviation Workplace Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00029 Maintain Security Awareness and Vigilance in the Aviation Workplace Skill Set.

Description

This Skill Set is for individuals required to maintain security awareness and vigilance in the aviation workplace as part of their broader role within aviation operational environments.

Pathways Information

The AVISS00056 Maintain Security Awareness and Vigilance in the Aviation Workplace Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the relevant industry authority for specific requirements.

Skill Set Requirements

A total of **1 unit** of competency must be attained.

AVIZ0004 Maintain security awareness and vigilance in an aviation workplace

Target Group

Individuals required to maintain security awareness and vigilance in the aviation workplace as part of their broader role within aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00056 Maintain Security Awareness and Vigilance in the Aviation Workplace Skill

Set is from the AVI Aviation Training Package and meets the needs of people who maintain security awareness and vigilance as part of their broader role in aviation operational environments.

Custom Content Section

Not applicable.

AVISS00057 Remotely Piloted Aircraft Systems Observer Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

This Skill Set replaces and is equivalent to the AVISS00030 Remotely Piloted Aircraft (RPA) Observer Skill Set.

Description

This Skill Set reflects the work required by people who operate aeronautical radio communications, apply situational awareness in remotely piloted aircraft systems (RPAS) operations, and participate in basic workplace communications as part of their role within RPAS aviation operational environments.

Pathways Information

The AVISS00057 Remotely Piloted Aircraft Systems Observer Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence aviation for specific requirements.

Skill Set Requirements

A total of **3 units** of competency must be attained.

AVIE0003	Operate aeronautical radio
AVIZ0005	Apply situational awareness in remote pilot aircraft systems operations
TLIE1003	Participate in basic workplace communication

Target Group

People who operate aeronautical radio communications and are required to apply situational

awareness in RPAS operations, and to participate in basic workplace communications as part of their observer role in RPAS aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00057 Remotely Piloted Aircraft Systems Observer Skill Set is from the AVI Aviation Training Package meets the needs of people who operate aeronautical radio communications and are required to apply situational awareness in remote pilot aircraft systems (RPAS) operations, and to participate in basic workplace communications as part of their observer role in RPAS operational environments.

Custom Content Section

Not applicable.

AVISS00058 Aeromedical Operator Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set reflects the work required by people who perform aeromedical operator roles in rotary wing emergency services aircraft.

Pathways Information

The AVISS00058 Aeromedical Operator Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority for specific requirements.

Skill Set Requirements

A total of **3 units** of competency must be attained.

AVIF0023	Apply aircraft safety procedures
AVIW0024	Perform down the wire duties
HLTAID007	Provide advanced resuscitation

Target Group

People interested in performing aeromedical operator roles in fixed and rotary wing emergency services aircraft.

Suggested words for Statement of Attainment

The AVISS00058 Aeromedical Operator Skill Set is form the AVI Aviation Training Package and meets the needs of people who perform aeromedical operator duties in rotary wing

operational environments.

Custom Content Section

Not applicable.

AVISS00059 Baggage Handler Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set reflects the work required by people who load, unload and secure aviation freight and baggage from outside the aircraft in ramp operational environments.

Pathways Information

The AVISS00059 Baggage Handler Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

A total of **2 units** of competency must be attained.

AVID0009 Load and secure aviation freight and baggage

AVID0010 Unload aviation freight and baggage

Target Group

People interested in loading, securing and unloading aviation freight and baggage from outside the aircraft in ramp operational environments.

Suggested words for Statement of Attainment

The AVISS00059 Baggage Handler Skill Set is from the AVI Aviation Training Package and meets the needs of people who load, unload and secure aviation freight and baggage from outside the aircraft in ramp operational environments.

Custom Content Section

Not applicable.

AVISS00060 Dangerous Goods Pack and Accept Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for individuals who pack and accept dangerous goods for air transport in civil and military aviation operational environments.

Pathways Information

The AVISS00060 Dangerous Goods Pack and Accept Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines Dangerous Goods licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **2 units** of competency must be attained.

AVID0003 Package dangerous goods for air transport

AVID0005 Accept dangerous goods for air transport

Target Group

Individuals who pack and accept dangerous goods for air transport in civil and military aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00060 Dangerous Goods Pack and Accept Skill Set is from the AVI Aviation Training Package and meets the needs of people who pack and accept dangerous goods for air transport in civil and military aviation operational environments.

Custom Content Section

Not applicable.

AVISS00061 Aviation Shift Supervisor SkillSet

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for individuals who implement fatigue risk management processes and manage shifts, crewing and rostering activities in aviation operational environments.

Pathways Information

The AVISS00061 Aviation Shift Supervisor Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Not applicable.

Skill Set Requirements

A total of **2 units** of competency must be attained.

AVIF0027 Implement aviation fatigue risk management processes

AVIL0002 Manage shifts, crewing and rostering activities in aviation

Target Group

People interested in working as aviation shift supervisors in aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00061 Aviation Shift Supervisor Skill Set is from the AVI Aviation Training Package and meets the needs of people who implement fatigue risk management processes and manage shifts, crewing and rostering activities in aviation operational environments.

Custom Content Section

Not applicable.

AVISS00062 Flight Dispatcher Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for individuals who perform flight dispatcher duties in support of fixed and rotary wing operations in domestic, military and international aviation operational environments.

Pathways Information

The AVISS00062 Flight Dispatcher Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification as flight dispatchers should check with the Civil Aviation Safety Authority and/or the International Civil Aviation Organisation for specific requirements.

Skill Set Requirements

A total of **9 units** of competency must be attained.

AVID0005	Accept dangerous goods for air transport
AVIE0003	Operate aeronautical radio
AVIF0025	Manage human factors in flight dispatch operations
AVIH0011	Manage aircraft performance and load
AVIH0012	Implement instrument flight rules planning procedures
AVIO0019	Apply and monitor aviation workplace security procedures
AVIY0042	Apply aeronautical knowledge and civil air law to flight dispatch operations
AVIY0043	Monitor flight performance

AVIZ0004 Maintain security awareness and vigilance in an aviation workplace

Target Group

Individuals who perform flight dispatcher duties in support of fixed and rotary wing operations in domestic, military and international aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00062 Flight Dispatcher Skill Set is from the AVI Aviation Training Package and meets the needs of people who perform flight dispatcher duties in support of fixed and rotary wing operations in domestic, military and international aviation operational environments.

Custom Content Section

Not applicable.

AVISS00063 Multi-Crew Operations Pilot Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for Commercial Pilots and Air Transport Pilots who command, supervise, and manage an aircraft in a multi-crew environment in fixed and rotary wing aviation operational environments.

Pathways Information

The AVISS00063 Multi-Crew Operations Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **3 units** of competency must be attained.

- AVIN0003 Command an aircraft in a multi-crew environment
- AVIN0004 Supervise and manage safe flight operations as pilot in command
- AVIZ0002 Maintain and manage situational awareness as pilot in command

Target Group

Commercial Pilots and Air Transport Pilots who command, supervise, and manage an aircraft in a multi-crew environment in fixed and rotary wing aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00063 Multi-Crew Operations Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of people who command, supervise and manage an aircraft in a multi-crew environment in fixed and rotary wing aviation operational environments.

Custom Content Section

Not applicable.

AVISS00064 Aeroplane Maintenance Test Pilot Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for individuals who perform aeroplane maintenance test flight pilot duties within civil and military aviation operational environments.

Pathways Information

The AVISS00064 Aeroplane Maintenance Test Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **2 units** of competency must be attained.

AVIY0011 Conduct maintenance test flight activities

AVIY0047 Manage abnormal aeroplane flight situations

Target Group

Individuals performing aeroplane maintenance test flight pilot duties in civil and military aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00064 Aeroplane Maintenance Test Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of people who perform aeroplane maintenance test flight pilot duties in aviation operational environments.

Custom Content Section

Not applicable.

AVISS00065 Helicopter Maintenance Test Pilot Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for individuals who perform helicopter maintenance test flight pilot duties in civil and military aviation operational environments.

Pathways Information

The AVISS00065 Helicopter Maintenance Test Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **2 units** of competency must be attained.

AVIY0011 Conduct maintenance test flight activities

AVIY0064 Manage abnormal and emergency helicopter flight situations

Target Group

Individuals performing helicopter maintenance test flight pilot duties in civil and military aviation operational environments.

Suggested words for Statement of Attainment

The AVISS00065 Helicopter Maintenance Test Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of people who perform helicopter maintenance test flight pilot duties in aviation operational environments.

Custom Content Section

Not applicable.

AVISS00066 Single Engine Helicopter Pilot Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for individuals seeking certification as single engine helicopter pilots.

Pathways Information

The AVISS00066 Single Engine Helicopter Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **7 units** of competency must be attained.

AVIY0048	Taxi helicopter
AVIY0059	Control helicopter on the ground
AVIY0060	Control helicopter in hovering flight
AVIY0061	Take off helicopter and approach to hover
AVIY0062	Control helicopter in normal flight
AVIY0063	Execute advanced helicopter manoeuvres and procedures
AVIY0064	Manage abnormal and emergency helicopter flight situations

Target Group

Individuals seeking certification as single engine helicopter pilots.

Suggested words for Statement of Attainment

The AVISS00066 Single Engine Helicopter Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of people seeking certification as single engine helicopter pilots.

Custom Content Section

Not applicable.

AVISS00067 Multi-Engine Helicopter Pilot Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for individuals seeking certification as multi-engine helicopter pilots.

Pathways Information

The AVISS00067 Multi-Engine Helicopter Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **7 units** of competency must be attained.

AVIY0048	Taxi helicopter
AVIY0059	Control helicopter on the ground
AVIY0060	Control helicopter in hovering flight
AVIY0061	Take off helicopter and approach to hover
AVIY0062	Control helicopter in normal flight
AVIY0063	Execute advanced helicopter manoeuvres and procedures
AVIY0082	Operate a multi-engine helicopter

Target Group

Individuals seeking certification as multi-engine helicopter pilots.

Suggested words for Statement of Attainment

The AVISS00067 Multi-Engine Helicopter Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of people seeking certification as multi-engine helicopter pilots.

Custom Content Section

Not applicable.

AVISS00068 Single Engine Aeroplane Pilot Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for individuals seeking certification as a single engine aeroplane pilot.

Pathways Information

The AVISS00068 Single Engine Aeroplane Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **7 units** of competency must be attained.

AVIW0029	Manage pre- and post-flight actions
AVIY0046	Execute advanced aeroplane manoeuvres and procedures
AVIY0047	Manage abnormal aeroplane flight situations
AVIY0054	Control aeroplane on the ground
AVIY0055	Take off aeroplane
AVIY0056	Control aeroplane in normal flight
AVIY0057	Land aeroplane

Target Group

Individuals seeking certification as a single engine aeroplane pilot.

Suggested words for Statement of Attainment

The AVISS00068 Single Engine Aeroplane Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of people seeking certification as a single engine aeroplane pilot.

Custom Content Section

Not applicable.

AVISS00069 Multi-Engine Aeroplane Pilot Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for individuals seeking certification as a multi-engine aeroplane pilot.

Pathways Information

The AVISS00069 Multi-Engine Aeroplane Pilot Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority or Defence Aviation for specific requirements.

Skill Set Requirements

A total of **7 units** of competency must be attained.

AVIW0029	Manage pre- and post-flight actions
AVIY0046	Execute advanced aeroplane manoeuvres and procedures
AVIY0054	Control aeroplane on the ground
AVIY0055	Take off aeroplane
AVIY0056	Control aeroplane in normal flight
AVIY0057	Land aeroplane
AVIY0072	Operate a multi-engine aeroplane

Target Group

Individuals seeking certification as a multi-engine aeroplane pilot.

Suggested words for Statement of Attainment

The AVISS00069 Multi-Engine Aeroplane Pilot Skill Set is from the AVI Aviation Training Package and meets the needs of people seeking certification as a multi-engine aeroplane pilot.

AVISS00071 Aviation Risk Management Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for individuals who perform aviation risk and fatigue risk management functions within an aviation safety management system (SMS).

Pathways Information

The AVISS00071 Aviation Risk Management Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority (CASA).

Work is performed in accordance with:

- AS/NZS ISO 31000:2009 Risk management – Principles and guidelines
- Civil Aviation Order 48.1 Instrument 2013 and/or amendments.

Skill Set Requirements

A total of **2 units** of competency must be attained.

AVIF0026 Implement aviation risk management processes

AVIF0027 Implement aviation fatigue risk management processes

Target Group

Individuals interested in performing aviation risk and fatigue risk management functions within an aviation SMS.

Suggested words for Statement of Attainment

This AVISS00071 Aviation Risk Management Skill Set from the AVI Aviation Training Package meets the industry requirements for individuals who work in safety and operational risk, and fatigue risk management roles in an aviation safety management system (SMS), and are required to perform aviation risk and fatigue risk management tasks.

Custom Content Section

AVISS00072 Aviation Safety Management Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is for individuals performing aviation safety and operational management functions within an aviation safety management system (SMS).

Pathways Information

The AVISS00072 Aviation Safety Management Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority (CASA).

Work is performed in accordance with:

- AS/NZS ISO 31000:2009 Risk management – Principles and guidelines
- AS/NZS ISO: 9000:2006: Quality management systems – Fundamentals and vocabulary
- AS/NZS ISO 19011:2014 Guidelines for auditing management systems
- Civil Aviation Order 48.1 Instrument 2013 and/or amendments.

Skill Set Requirements

A total of **5 units** of competency must be attained.

AVIF0026	Implement aviation risk management processes
AVIF0027	Implement aviation fatigue risk management processes
AVIF0028	Manage aviation risk
BSBAUD501	Initiate a quality audit
BSBMGT517	Manage operational plan

Target Group

Individuals interested in performing aviation safety and operational management functions within an aviation safety management system.

Suggested words for Statement of Attainment

This AVISS00072 Aviation Safety Management Skill Set from the AVI Aviation Training Package meets the industry requirements for individuals who work in safety and operational management roles within aviation safety management systems (SMS).

AVISS00073 Aerodrome Reporting Officer Supervisor Skill Set

Modification History

Release 3. This is the third release of this Skill Set. Unit codes updated.

Release 2. This is the second release of this Skill Set. The unit AVIO2006 Control access to and exit from an airside security zone or landside security zone at an airport was recoded to AVIO0007 Control access to and exit from a security sensitive area.

Release 1. New Skill Set.

Description

This Skill Set is applicable to aerodrome reporting officer supervisors operating at aerodromes in Australian aviation environments. It provides the skills and knowledge required to supervise aerodrome reporting officers.

Pathways Information

The AVISS00073 Aerodrome Reporting Officer Supervisor Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification should check with the Civil Aviation Safety Authority for specific requirements

Skill Set Requirements

A total of **9 units** of competency must be attained.

AVIF0043	Apply relevant laws and regulations to the operation of an aerodrome
AVIF0045	Facilitate the safety of aerodrome works and works site access
AVIF0046	Facilitate an aerodrome emergency response
AVIL0006	Assess pavement concessions
AVIO0007	Control access to and exit from a security sensitive area
AVIO4003	Implement airside access

AVIW0023	Implement wildlife hazard control measures
BSBAUD402	Participate in a quality audit
TLIO0001	Undertake emergency response action to a security threat

Target Group

People performing the role of aerodrome reporting officer supervisor in an aviation environment.

Suggested words for Statement of Attainment

The AVISS00073 Aerodrome Reporting Officer Supervisor Skill Set is from the AVI Aviation Training Package and meets the needs of people who supervise aerodrome reporting officers in Australian aviation environments.

Custom Content Section

Not applicable.

AVISS00074 Aeronautical Radio Operator Skill Set

Modification History

Release 2. This is the second release of this Skill Set. Unit codes updated.

Release 1. New Skill Set.

Description

This Skill Set is applicable to aeronautical radio operators operating within Australian aviation environments. It provides the skills and knowledge required to operate an aeronautical radio, in compliance with relevant regulatory requirements of the Civil Aviation Safety Authority (CASA) and national operating standards.

Pathways Information

The AVISS00074 Aeronautical Radio Operator Skill Set is part of the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure that they have also read the part of the Training Package that outlines licensing and regulatory requirements. Individuals seeking certification as aeronautical radio operators should check with the CASA for specific requirements.

Skill Set Requirements

A total of **1 unit** of competency must be attained.

AVIE0003 Operate aeronautical radio

Target Group

People interested performing the role of aeronautical radio operator in Australian aviation environments.

Suggested words for Statement of Attainment

The AVISS00074 Aeronautical Radio Operator Skill Set is from the AVI Aviation Training Package and meets the needs of people who operate an aeronautical radio in Australian aviation environments.

Custom Content Section

Not applicable.

AVISS00075 Air Cargo Screening Officer Skill Set

Modification History

Release 1. New Skill Set.

Description

This Skill Set is for individuals who undertake a range of activities within transport security protection occupations within the Aviation Industry.

Pathways Information

This Skill Set contributes to a range of qualifications in the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure they have also read the part of the Training Package, Companion Volume Implementation Guide that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of 4 units of competency must be attained.

AVIO0005	Conduct screening using explosive trace detection
AVIO0003	Apply electronic metal detection
AVIO0014	Screen articles by interpreting X-ray images
AVIF0015	Apply awareness of dangerous goods and hazardous substances in the transport security environment

Target Group

People interested in working within the transport security screening environment at airports.

Suggested words for Statement of Attainment

This AVISS00002 Air Cargo Screening Officer Skill Set from the AVI Aviation Training Package meets the industry requirements for individuals who work within the transport Security

Screening environment at airports.

Custom Content Section

AVISS00076 Domestic Airport Screening Officer Skill Set

Modification History

Release 1. New Skill Set.

Description

This Skill Set is for individuals who undertake a range of activities within transport security protection occupations within the Aviation Industry.

Pathways Information

This Skill Set contributes to a range of qualifications in the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure they have also read the part of the Training Package, Companion Volume Implementation Guide that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of 10 units of competency must be attained.

AVIF0015	Apply awareness of dangerous goods and hazardous substances in the transport security environment
AVIO0006	Conduct vehicle search for access to security sensitive areas
AVIO0011	Manage disruptive behaviour and unlawful interference within a transport security environment
AVIO0004	Conduct frisk search of persons
AVIO0005	Conduct screening using explosive trace detection
AVIO0012	Manage the flow of items for screening by X-ray screening equipment
AVIO0014	Screen articles by interpreting X-ray images
CPPSEC3121	Control persons using empty hand techniques
CPPSEC3128	Conduct security screening using walk-through metal detection equipment

CPPSEC3130 Conduct security screening using hand-held metal detectors

Target Group

People interested in working within the transport security screening environment at Regional and Major airports.

Suggested words for Statement of Attainment

This AVISS00003 Domestic Airport Screening Officer Skill Set from the AVI Aviation Training Package meets the industry requirements for individuals who work within the transport Security Screening environment at regional and major airports.

Custom Content Section

AVISS00077 International Airport Screening Officer Skill Set

Modification History

Release 1. New Skill Set.

Description

This Skill Set is for individuals who undertake a range of activities within transport security protection occupations within the Aviation Industry.

Pathways Information

This Skill Set contributes to a range of qualifications in the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure they have also read the part of the Training Package, Companion Volume Implementation Guide that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of 12 units of competency must be attained.

AVIO0011 Manage disruptive behaviour and unlawful interference within a transport security environment

AVIO0004 Conduct frisk search of persons

AVIO0005 Conduct screening using explosive trace detection

AVIO0012 Manage the flow of items for screening by X-ray screening equipment

AVIO0014 Screen articles by interpreting X-ray images

AVIO0013 Operate body scanner

AVIO0010 Identify powders, liquids, aerosols and gels (PLAGs)

AVIO0006 Conduct vehicle search for access to security sensitive areas

AVIF0015 Apply awareness of dangerous goods and hazardous substances in the transport security environment

CPPSEC3121 Control persons using empty hand techniques

CPPSEC3128 Conduct security screening using walk-through metal detection equipment

CPPSEC3130 Conduct security screening using hand-held metal detectors

Target Group

People interested in working within the transport security screening environment at International airports.

Suggested words for Statement of Attainment

This AVISS00004 International Airport Screening Officer Skill Set from the AVI Aviation Training Package meets the industry requirements for individuals who work within the transport security screening environment at international airports.

Custom Content Section

AVISS00078 Maritime Screening Officer Skill Set

Modification History

Release 1. New Skill Set.

Description

This Skill Set is for individuals who undertake a range of activities within transport security protection occupations within the Aviation industry.

Pathways Information

This Skill Set contributes to a range of qualifications in the AVI Aviation Training Package.

Licensing/Regulatory Information

Candidates should ensure they have also read the part of the Training Package, Companion Volume Implementation Guide that outlines licensing and regulatory requirements.

Skill Set Requirements

A total of 8 units of competency must be attained.

AVIO0011	Manage disruptive behaviour and unlawful interference within a transport security environment
AVIO0004	Conduct frisk search of persons
AVIO0012	Manage the flow of items for screening by X-ray screening equipment
AVIO0014	Screen articles by interpreting X-ray images
AVIO0006	Conduct vehicle search for access to security sensitive areas
CPPSEC3121	Control persons using empty hand techniques
CPPSEC3128	Conduct security screening using walk-through metal detection equipment
CPPSEC3130	Conduct security screening using hand-held metal detectors

Target Group

People interested in working within the transport security screening environment within the Maritime industry.

Suggested words for Statement of Attainment

This AVISS00006 Maritime Screening Officer Skill Set from the AVI Aviation Training Package meets the industry requirements for individuals who work within the transport security screening environment as a Maritime Security Screener Inspector in the Maritime industry.
