Assessment Requirements for CPPWMT4005 Implement waste management site safety plans

Assessment Requirements for CPPWMT4005 Implement waste management site safety plans

Modification History

Release 1   This version first released with CPP Property Services Training Package Release 10.0.

Supersedes but is not equivalent to CPPWMT5045A Develop site safety plans.

Performance Evidence

To demonstrate competency, a candidate must meet the performance criteria of this unit by:

- assessing waste management site to confirm the layout and location of:
    - waste types
    - first aid and emergency facilities
    - evacuation plan
    - general access and restricted areas
    - traffic management plan
- implementing waste management site safety plan over a defined period and making two recommendations to improve current plan.

Knowledge Evidence

To be competent in this unit, a candidate must demonstrate knowledge of:

- features of waste management site safety plans
- identification signage used for regulated waste, including hazardous class, HAZCHEM codes and dangerous goods classification
- legislative and procedural requirements applicable to implementing waste management site safety plans and relevant to workplace operations:
    - commonwealth, state and territory legislation, regulations, codes of practice and standards, including work health and safety (WHS)
    - classifications of dangerous goods and hazardous substances
    - duty of care
    - incident notification
    - licensing for waste management site including licence for storing dangerous goods
    - record-keeping
- methods for implementing waste management site safety plans:
    - personnel with designated WHS roles
    - reviewing WHS procedures

- risk management
- site contract requirements
- WHS induction
- techniques for reviewing waste management site safety plans to identify improvements
- typical hazards in a waste management workplace and the harm they may cause to people, property and the environment
- waste types
- WHS issues identified in site safety plan
- workplace policies and procedures associated with site safety plans:
  - allocating equipment and personnel
  - documentation and reporting
  - hazard identification, risk assessment and control using the hierarchy of control
  - injury, dangerous occurrence and incident response and reporting
  - personal protective equipment.

Assessment Conditions

Assessors must meet the requirements for assessors contained in the Standards for Registered Training Organisations.

Assessment must be conducted in the workplace or in a simulated workplace environment using realistic workplace conditions, materials, activities, responsibilities, procedures, safety requirements and environmental considerations.

Candidates must have access to workplace policies and procedures, site safety plan and associated documentation, technologies and waste management workplace required to achieve the performance evidence.
