

**Australian Government**

# **SIS Sport, Fitness and Recreation Training Package**

**Release: 5.1**

## CONTENTS

<b>SIS Sport, Fitness and Recreation Training Package.....</b>	<b>30</b>
<b>SIS10115 Certificate I in Sport and Recreation .....</b>	<b>31</b>
<b>SIS20115 Certificate II in Sport and Recreation.....</b>	<b>33</b>
<b>SIS20221 Certificate II in Sport - Developing Athlete.....</b>	<b>36</b>
<b>SIS20321 Certificate II in Sport Coaching .....</b>	<b>39</b>
<b>SIS20419 Certificate II in Outdoor Recreation.....</b>	<b>42</b>
<b>SIS30115 Certificate III in Sport and Recreation .....</b>	<b>46</b>
<b>SIS30321 Certificate III in Fitness .....</b>	<b>49</b>
<b>SIS30421 Certificate III in Sport - Athlete.....</b>	<b>52</b>
<b>SIS30521 Certificate III in Sport Coaching .....</b>	<b>55</b>
<b>SIS30619 Certificate III in Outdoor Leadership.....</b>	<b>59</b>
<b>SIS31015 Certificate III in Aquatics and Community Recreation.....</b>	<b>70</b>
<b>SIS40115 Certificate IV in Sport and Recreation.....</b>	<b>74</b>
<b>SIS40221 Certificate IV in Fitness .....</b>	<b>79</b>
<b>SIS40321 Certificate IV in Sport Coaching.....</b>	<b>84</b>
<b>SIS40421 Certificate IV in Sport Development.....</b>	<b>88</b>
<b>SIS40619 Certificate IV in Outdoor Leadership .....</b>	<b>91</b>
<b>SIS40621 Certificate IV in Outdoor Leadership .....</b>	<b>104</b>
<b>SIS50115 Diploma of Sport and Recreation Management .....</b>	<b>117</b>
<b>SIS50321 Diploma of Sport.....</b>	<b>122</b>
<b>SIS50419 Diploma of Outdoor Leadership .....</b>	<b>126</b>
<b>SIS50421 Diploma of Outdoor Leadership .....</b>	<b>139</b>
<b>SISFFIT032 Complete pre-exercise screening and service orientation.....</b>	<b>152</b>
<b>Assessment Requirements for SISFFIT032 Complete pre-exercise screening and service orientation .....</b>	<b>156</b>
<b>SISFFIT033 Complete client fitness assessments .....</b>	<b>160</b>
<b>Assessment Requirements for SISFFIT033 Complete client fitness assessments.....</b>	<b>163</b>
<b>SISFFIT034 Assess client movement and provide exercise advice .....</b>	<b>166</b>
<b>Assessment Requirements for SISFFIT034 Assess client movement and provide exercise advice.....</b>	<b>169</b>
<b>SISFFIT035 Plan group exercise sessions .....</b>	<b>173</b>
<b>Assessment Requirements for SISFFIT035 Plan group exercise sessions .....</b>	<b>176</b>
<b>SISFFIT036 Instruct group exercise sessions.....</b>	<b>180</b>
<b>Assessment Requirements for SISFFIT036 Instruct group exercise sessions .....</b>	<b>183</b>
<b>SISFFIT037 Develop and instruct group movement programs for children.....</b>	<b>188</b>
<b>Assessment Requirements for SISFFIT037 Develop and instruct group movement programs for children.....</b>	<b>192</b>
<b>SISFFIT038 Plan group water-based exercise sessions .....</b>	<b>197</b>
<b>Assessment Requirements for SISFFIT038 Plan group water-based exercise sessions.....</b>	<b>200</b>
<b>SISFFIT039 Instruct group water-based exercise sessions.....</b>	<b>204</b>
<b>Assessment Requirements for SISFFIT039 Instruct group water-based exercise sessions.....</b>	<b>207</b>
<b>SISFFIT040 Develop and instruct gym-based exercise programs for individual clients..</b>	<b>212</b>
<b>Assessment Requirements for SISFFIT040 Develop and instruct gym-based exercise programs for individual clients.....</b>	<b>216</b>
<b>SISFFIT041 Develop personalised exercise programs .....</b>	<b>221</b>
<b>Assessment Requirements for SISFFIT041 Develop personalised exercise programs .....</b>	<b>224</b>
<b>SISFFIT042 Instruct personalised exercise sessions .....</b>	<b>228</b>
<b>Assessment Requirements for SISFFIT042 Instruct personalised exercise sessions .....</b>	<b>232</b>

<b>SISFFIT043 Develop and instruct personalised exercise programs for body composition goals.....</b>	<b>236</b>
<b>Assessment Requirements for SISFFIT043 Develop and instruct personalised exercise programs for body composition goals .....</b>	<b>241</b>
<b>SISFFIT044 Develop and instruct personalised exercise programs for older clients .....</b>	<b>245</b>
<b>Assessment Requirements for SISFFIT044 Develop and instruct personalised exercise programs for older clients.....</b>	<b>250</b>
<b>SISFFIT045 Develop and instruct personalised exercise programs for adolescent clients</b>	<b>254</b>
<b>Assessment Requirements for SISFFIT045 Develop and instruct personalised exercise programs for adolescent clients.....</b>	<b>259</b>
<b>SISFFIT046 Plan and instruct online exercise sessions.....</b>	<b>264</b>
<b>Assessment Requirements for SISFFIT046 Plan and instruct online exercise sessions....</b>	<b>268</b>
<b>SISFFIT047 Use anatomy and physiology knowledge to support safe and effective exercise</b>	<b>271</b>
<b>Assessment Requirements for SISFFIT047 Use anatomy and physiology knowledge to support safe and effective exercise .....</b>	<b>274</b>
<b>SISFFIT048 Use anatomy and physiology knowledge to support safe and effective water-based exercise .....</b>	<b>278</b>
<b>Assessment Requirements for SISFFIT048 Use anatomy and physiology knowledge to support safe and effective water-based exercise .....</b>	<b>281</b>
<b>SISFFIT049 Use exercise science principles in fitness instruction.....</b>	<b>285</b>
<b>Assessment Requirements for SISFFIT049 Use exercise science principles in fitness instruction.....</b>	<b>288</b>
<b>SISFFIT050 Support exercise behaviour change .....</b>	<b>291</b>
<b>Assessment Requirements for SISFFIT050 Support exercise behaviour change.....</b>	<b>294</b>
<b>SISFFIT051 Establish and maintain professional practice for fitness instruction.....</b>	<b>298</b>
<b>Assessment Requirements for SISFFIT051 Establish and maintain professional practice for fitness instruction.....</b>	<b>302</b>
<b>SISFFIT052 Provide healthy eating information .....</b>	<b>306</b>
<b>Assessment Requirements for SISFFIT052 Provide healthy eating information.....</b>	<b>309</b>
<b>SISFFIT053 Support healthy eating for individual fitness clients .....</b>	<b>312</b>
<b>Assessment Requirements for SISFFIT053 Support healthy eating for individual fitness clients.....</b>	<b>315</b>
<b>SISOABL001 Lead adventure-based learning activities .....</b>	<b>319</b>
<b>Assessment Requirements for SISOABL001 Lead adventure -based learning activities ..</b>	<b>322</b>
<b>SISOABL002 Facilitate adventure-based learning activities.....</b>	<b>325</b>
<b>Assessment Requirements for SISOABL002 Facilitate adventure -based learning activities</b>	<b>329</b>
<b>SISOABL003 Design adventure -based learning programs .....</b>	<b>332</b>
<b>Assessment Requirements for SISOABL003 Design adventure -based learning programs</b>	<b>335</b>
<b>SISOABS001 Abseil single pitches using fundamental skills .....</b>	<b>338</b>
<b>Assessment Requirements for SISOABS001 Abseil single pitches using fundamental skills</b>	<b>341</b>
<b>SISOABS002 Abseil single pitches, artificial surfaces .....</b>	<b>344</b>
<b>Assessment Requirements for SISOABS002 Abseil single pitches, artificial surfaces .....</b>	<b>347</b>
<b>SISOABS003 Abseil single pitches, natural surfaces.....</b>	<b>351</b>
<b>Assessment Requirements for SISOABS003 Abseil single pitches, natural surfaces .....</b>	<b>354</b>
<b>SISOABS004 Abseil multi pitches, natural surfaces .....</b>	<b>358</b>
<b>Assessment Requirements for SISOABS004 Abseil multi pitches, natural surfaces .....</b>	<b>361</b>
<b>SISOABS005 Establish ropes for single pitch abseiling on artificial surfaces .....</b>	<b>365</b>
<b>Assessment Requirements for SISOABS005 Establish ropes for single pitch abseiling on artificial surfaces .....</b>	<b>368</b>
<b>SISOABS006 Establish ropes for single pitch abseiling on natural surfaces .....</b>	<b>373</b>
<b>Assessment Requirements for SISOABS006 Establish ropes for single pitch abseiling on natural surfaces .....</b>	<b>376</b>
<b>SISOABS007 Establish ropes for multi pitch abseiling on natural surfaces .....</b>	<b>381</b>

**Assessment Requirements for SISOABS007 Establish ropes for multi pitch abseiling on natural surfaces .....384**

**SISOABS008 Lead single pitch abseiling activities on artificial surfaces .....389**

**Assessment Requirements for SISOABS008 Lead single pitch abseiling activities on artificial surfaces .....393**

**SISOABS009 Lead single pitch abseiling activities on natural surfaces .....396**

**Assessment Requirements for SISOABS009 Lead single pitch abseiling activities on natural surfaces .....400**

**SISOABS010 Lead multi pitch abseiling activities on natural surfaces.....403**

**Assessment Requirements for SISOABS010 Lead multi pitch abseiling activities on natural surfaces .....407**

**SISOARC001 Lead archery sessions .....410**

**Assessment Requirements for SISOARC001 Lead archery sessions .....414**

**SISOBWG001 Bushwalk in tracked environments .....418**

**Assessment Requirements for SISOBWG001 Bushwalk in tracked environments.....421**

**SISOBWG002 Bushwalk in difficult tracked environments.....425**

**Assessment Requirements for SISOBWG002 Bushwalk in difficult tracked environments428**

**SISOBWG003 Bushwalk in extremely difficult tracked and untracked environments ...432**

**Assessment Requirements for SISOBWG003 Bushwalk in extremely difficult tracked and untracked environments .....436**

**SISOBWG004 Cross rivers during bushwalks.....440**

**Assessment Requirements for SISOBWG004 Cross rivers during bushwalks .....443**

**SISOBWG005 Lead bushwalks in tracked environments .....446**

**Assessment Requirements for SISOBWG005 Lead bushwalks in tracked environments450**

**SISOBWG006 Lead bushwalks in difficult tracked environments.....453**

**Assessment Requirements for SISOBWG006 Lead bushwalks in difficult tracked environments .....457**

**SISOBWG007 Lead bushwalks in extremely difficult tracked and untracked environments .....460**

**Assessment Requirements for SISOBWG007 Lead bushwalks in extremely difficult tracked and untracked environments .....464**

**SISOCAY001 Traverse canyons .....467**

**Assessment Requirements for SISOCAY001 Traverse canyons.....470**

**SISOCAY002 Abseil in easy to intermediate canyons .....473**

**Assessment Requirements for SISOCAY002 Abseil in easy to intermediate canyons ....476**

**SISOCAY003 Abseil in intermediate to advanced canyons.....481**

**Assessment Requirements for SISOCAY003 Abseil in intermediate to advanced canyons484**

**SISOCAY004 Establish ropes and belays for abseils in easy to intermediate canyons ...489**

**Assessment Requirements for SISOCAY004 Establish ropes and belays for abseils in easy to intermediate canyons .....492**

**SISOCAY005 Establish ropes and belays for abseils in intermediate to advanced canyons497**

**Assessment Requirements for SISOCAY005 Establish ropes and belays for abseils in intermediate to advanced canyons .....500**

**SISOCAY006 Lead canyoning activities, easy to intermediate canyons .....506**

**Assessment Requirements for SISOCAY006 Lead canyoning activities, easy to intermediate canyons .....510**

**SISOCAY007 Lead canyoning activities, intermediate to advanced canyons.....513**

**Assessment Requirements for SISOCAY007 Lead canyoning activities, intermediate to advanced canyons .....517**

**SISOCHC001 Lead challenge course sessions, low elements.....521**

**Assessment Requirements for SISOCHC001 Lead challenge course sessions, low elements525**

**SISOCHC002 Set up and supervise challenge course sessions, low elements .....529**

Assessment Requirements for SISOCHC002 Set up and supervise challenge course sessions, low elements .....	533
SISOCHC003 Lead challenge course sessions, high elements .....	536
Assessment Requirements for SISOCHC003 Lead challenge course sessions, high elements	540
SISOCHC004 Set up and supervise challenge course sessions, high elements .....	544
Assessment Requirements for SISOCHC004 Set up and supervise challenge course sessions, high elements .....	548
SISOCHC005 Manage challenge course .....	554
Assessment Requirements for SISOCHC005 Manage challenge course .....	557
SISOCLM001 Top rope climb single pitches, artificial surfaces .....	561
Assessment Requirements for SISOCLM001 Top rope climb single pitches, artificial surfaces .....	564
SISOCLM002 Top rope climb single pitches, natural surfaces .....	568
Assessment Requirements for SISOCLM002 Top rope climb single pitches, natural surfaces .....	571
SISOCLM003 Lead climb single pitches, natural surfaces .....	576
Assessment Requirements for SISOCLM003 Lead climb single pitches, natural surfaces	580
SISOCLM004 Lead climb multi pitches, natural surfaces .....	585
Assessment Requirements for SISOCLM004 Lead climb multi pitches, natural surfaces	589
SISOCLM005 Establish belays for single pitch climbing on artificial surfaces .....	594
Assessment Requirements for SISOCLM005 Establish belays for single pitch climbing on artificial surfaces .....	597
SISOCLM006 Establish belays for single pitch climbing on natural surfaces .....	601
Assessment Requirements for SISOCLM006 Establish belays for single pitch climbing on natural surfaces .....	604
SISOCLM007 Establish belays for multi pitch climbing on natural surfaces .....	609
Assessment Requirements for SISOCLM007 Establish belays for multi pitch climbing on natural surfaces .....	612
SISOCLM008 Lead single pitch climbing activities on artificial surfaces, top rope climbing .....	617
Assessment Requirements for SISOCLM008 Lead single pitch climbing activities on artificial surfaces, top rope climbing .....	621
SISOCLM009 Lead single pitch climbing activities on natural surfaces, top rope climbing	624
Assessment Requirements for SISOCLM009 Lead single pitch climbing activities on natural surfaces, top rope climbing .....	628
SISOCLM010 Lead single pitch climbing activities on natural surfaces, lead climbing ..	631
Assessment Requirements for SISOCLM010 Lead single pitch climbing activities on natural surfaces, lead climbing .....	635
SISOCLM011 Lead multi pitch climbing activities on natural surfaces, lead climbing...	638
Assessment Requirements for SISOCLM011 Lead multi pitch climbing activities on natural surfaces, lead climbing .....	642
SISOCNE001 Paddle a craft using fundamental skills .....	645
Assessment Requirements for SISOCNE001 Paddle a craft using fundamental skills ...	648
SISOCNE002 Paddle a canoe on inland flatwater .....	652
Assessment Requirements for SISOCNE002 Paddle a canoe on inland flatwater .....	656
SISOCNE003 Paddle a canoe on moving water up to grade 1 rivers .....	661
Assessment Requirements for SISOCNE003 Paddle a canoe on moving water up to grade 1 rivers .....	665
SISOCNE004 Paddle a canoe on grade 2 rivers .....	670
Assessment Requirements for SISOCNE004 Paddle a canoe on grade 2 rivers .....	674
SISOCNE005 Lead canoeing activities on inland flatwater .....	680
Assessment Requirements for SISOCNE005 Lead canoeing activities on inland flatwater	684
SISOCNE006 Lead canoeing activities on moving water up to grade 1 rivers .....	687

**Assessment Requirements for SISOCNE006 Lead canoeing activities on moving water up to grade 1 rivers .....691**

**SISOCNE007 Lead canoeing activities on grade 2 rivers .....694**

**Assessment Re quirements for SISOCNE007 Lead canoeing activities on grade 2 rivers 698**

**SISOCVE001 Traverse caves.....701**

**Assessment Re quirements for SISOCVE001 Traverse caves .....704**

**SISOCVE002 Descend and ascend ladders in caves.....708**

**Assessment Re quirements for SISOCVE002 Descend and ascend ladde rs in caves .....711**

**SISOCVE003 Abseil single pitches in caves .....715**

**Assessment Re quirements for SISOCVE003 Abseil single pitches in caves.....718**

**SISOCVE004 Descend and ascend single ropes in caves.....722**

**Assessment Re quirements for SISOCVE004 Descend and ascend single ropes in caves .725**

**SISOCVE005 Establish ropes, ladders and belays for caving .....729**

**Assessment Re quirements for SISOCVE005 Establish ropes, ladders and belays for caving732**

**SISOCVE006 Lead caving activities .....738**

**Assessment Re quirements for SISOCVE006 Lead caving activities.....742**

**SISOCYT001 Set up, maintain and repair bicycles .....745**

**Assessment Re quirements for SISOCYT001 Set up, maintain and repair bicycles .....748**

**SISOCYT002 Ride bicycles on roads and pathways, easy conditions.....753**

**Assessment Re quirements for SISOCYT002 Ride bicycles on roads and pathways, easy conditions.....757**

**SISOCYT003 Ride bicycles on roads, up to moderate terrain and heavy traffic .....761**

**Assessment Re quirements for SISOCYT003 Ride bicycles on roads, up to mode rate terrain and heavy traffic .....765**

**SISOCYT004 Ride off road bicycles on easy trails .....769**

**Assessment Re quirements for SISOCYT004 Ride off road bicycles on easy trails .....773**

**SISOCYT005 Ride off road bicycles on intermediate trails .....777**

**Assessment Re quirements for SISOCYT005 Ride off road bicycles on intermediate trails 781**

**SISOCYT006 Lead cycling activities on roads and pathways, easy conditions.....785**

**Assessment Re quirements for SISOCYT006 Lead cycling activities on roads and pathways, easy conditions .....789**

**SISOCYT007 Lead cycling activities on roads, up to moderate terrain and heavy traffic 792**

**Assessment Re quirements for SISOCYT007 Lead cycling activities on roads, up to moderate terrain and heavy traffic .....796**

**SISOCYT008 Lead off road cycling activities on easy trails .....799**

**Assessment Re quirements for SISOCYT008 Lead off road cycling activities on easy trails 803**

**SISOCYT009 Lead off road cycling activities on interme diate trails .....806**

**Assessment Re quirements for SISOCYT009 Lead off road cycling activities on intermediate trails.....810**

**SISODRV001 Drive AWD/4WD vehicles on unsealed roads.....813**

**Assessment Re quirements for SISODRV001 Drive AWD/4WD vehicles on unsealed roads816**

**SISODRV002 Lead four wheel driving activities .....819**

**Assessment Re quirements for SISODRV002 Lead four wheel driving activities.....823**

**SISOFLD001 Assist in conducting recreation sessions.....826**

**Assessment Re quirements for SISOFLD001 Assist in conducting recreation sessions ...829**

**SISOFLD002 Minimise environmental impact .....832**

**Assessment Re quirements for SISOFLD002 Minimise e nvironmental impact.....835**

**SISOFLD003 Select, set up and operate a temporary or overnight site .....838**

**Assessment Re quirements for SISOFLD003 Select, set up and operate a temporary or overnight site .....842**

**SISOFLD004 Provide first aid in remote locations .....845**

**Assessment Re quirements for SISOFLD004 Provide first aid in remote locations.....849**

**SISOFLD005 Navigate waterway courses.....852**

Assessment Requirements for SISOFLD005 Navigate waterway courses .....	855
SISOFLD006 Navigate in tracked environments .....	859
Assessment Requirements for SISOFLD006 Navigate in tracked environments.....	862
SISOFLD007 Navigate in difficult tracked environments .....	865
Assessment Requirements for SISOFLD007 Navigate in difficult tracked environments	868
SISOFLD008 Navigate in extremely difficult tracked and untracked environments.....	872
Assessment Requirements for SISOFLD008 Navigate in extremely difficult tracked and untracked environments .....	875
SISOFSH001 Locate, attract and catch fish.....	880
Assessment Requirements for SISOFSH001 Locate, attract and catch fish .....	884
SISOFSH002 Select and catch bait .....	889
Assessment Requirements for SISOFSH002 Select and catch bait.....	892
SISOFSH003 Select and rig tackle outfits .....	896
Assessment Requirements for SISOFSH003 Select and rig tackle outfits .....	899
SISOFSH004 Lead fishing activities .....	902
Assessment Requirements for SISOFSH004 Lead fishing activities.....	906
SISOKYK001 Paddle a kayak on inland flatwater .....	909
Assessment Requirements for SISOKYK001 Paddle a kayak on inland flatwater .....	913
SISOKYK002 Paddle a kayak on moving water up to grade 1 rivers .....	918
Assessment Requirements for SISOKYK002 Paddle a kayak on moving water up to grade 1 rivers.....	922
SISOKYK003 Paddle a kayak on grade 2 rivers.....	927
Assessment Requirements for SISOKYK003 Paddle a kayak on grade 2 rivers .....	931
SISOKYK004 Paddle a kayak on grade 3 rivers.....	937
Assessment Requirements for SISOKYK004 Paddle a kayak on grade 3 rivers .....	941
SISOKYK005 Lead kayaking activities on inland flatwater .....	947
Assessment Requirements for SISOKYK005 Lead kayaking activities on inland flatwater	951
SISOKYK006 Lead kayaking activities on moving water up to grade 1 rivers .....	954
Assessment Requirements for SISOKYK006 Lead kayaking activities on moving water up to grade 1 rivers .....	958
SISOKYK007 Lead kayaking activities on grade 2 rivers.....	961
Assessment Requirements for SISOKYK007 Lead kayaking activities on grade 2 rivers	965
SISOKYK008 Lead kayaking activities on grade 3 rivers.....	968
Assessment Requirements for SISOKYK008 Lead kayaking activities on grade 3 rivers	972
SISOKYS001 Paddle a sea kayak in enclosed waters.....	975
Assessment Requirements for SISOKYS001 Paddle a sea kayak in enclosed waters .....	979
SISOKYS002 Paddle a sea kayak in sheltered coastal waters .....	983
Assessment Requirements for SISOKYS002 Paddle a sea kayak in sheltered coastal waters	987
SISOKYS003 Paddle a sea kayak in exposed coastal waters .....	992
Assessment Requirements for SISOKYS003 Paddle a sea kayak in exposed coastal waters	996
SISOKYS004 Lead sea kayaking activities in enclosed waters.....	1001
Assessment Requirements for SISOKYS004 Lead sea kayaking activities in enclosed waters .....	1005
SISOKYS005 Lead sea kayaking activities in sheltered coastal waters .....	1008
Assessment Requirements for SISOKYS005 Lead sea kayaking activities in sheltered coastal waters.....	1012
SISOKYS006 Lead sea kayaking activities in exposed coastal waters.....	1015
Assessment Requirements for SISOKYS006 Lead sea kayaking activities in exposed coastal waters.....	1019
SISOPLN001 Finalise operation of outdoor recreation activities .....	1022
Assessment Requirements for SISOPLN001 Finalise operation of outdoor recreation activities.....	1025
SISOPLN002 Plan outdoor activity sessions .....	1028

**Assessment Requirements for SISOPLN002 Plan outdoor activity sessions.....1031**  
**SISOPLN003 Develop outdoor recreation programs .....1034**  
**Assessment Requirements for SISOPLN003 Develop outdoor recreation programs.....1038**  
**SISOPLN004 Identify hazards, assess and control risks for outdoor recreation activities1042**  
**Assessment Requirements for SISOPLN004 Identify hazards, assess and control risks for outdoor recreation activities .....1045**  
**SISOPLN005 Interpret weather and environmental conditions for outdoor recreation activities.....1048**  
**Assessment Requirements for SISOPLN005 Interpret weather and environmental conditions for outdoor recreation activities.....1051**  
**SISOPLN006 Plan for minimal environmental impact.....1055**  
**Assessment Requirements for SISOPLN006 Plan for minimal environmental impact..1058**  
**SISOPLN007 Manage risk for outdoor programs .....1061**  
**Assessment Requirements for SISOPLN007 Manage risk for outdoor programs .....1065**  
**SISOPWC001 Ride personal watercraft in smooth water conditions.....1068**  
**Assessment Requirements for SISOPWC001 Ride personal watercraft in smooth water conditions.....1072**  
**SISOPWC002 Ride personal watercraft in slight water conditions.....1077**  
**Assessment Requirements for SISOPWC002 Ride personal watercraft in slight water conditions.....1081**  
**SISOPWC003 Lead personal water craft activities in smooth water conditions .....1086**  
**Assessment Requirements for SISOPWC003 Lead personal water craft activities in smooth water conditions .....1090**  
**SISOPWC004 Lead personal water craft activities in slight water conditions .....1093**  
**Assessment Requirements for SISOPWC004 Lead personal water craft activities in slight water conditions.....1097**  
**SISORAF001 Guide a raft on grade 2 rivers .....1100**  
**Assessment Requirements for SISORAF001 Guide a raft on grade 2 rivers .....1104**  
**SISORAF002 Guide a raft on grade 3 rivers .....1110**  
**Assessment Requirements for SISORAF002 Guide a raft on grade 3 rivers.....1114**  
**SISORAF003 Guide a raft on grade 4 rivers .....1120**  
**Assessment Requirements for SISORAF003 Guide a raft on grade 4 rivers .....1124**  
**SISORAF004 Lead rafting activities on grade 2 rivers .....1130**  
**Assessment Requirements for SISORAF004 Lead rafting activities on grade 2 rivers..1134**  
**SISORAF005 Lead rafting activities on grade 3 rivers .....1137**  
**Assessment Requirements for SISORAF005 Lead rafting activities on grade 3 rivers..1141**  
**SISORAF006 Lead rafting activities on grade 4 rivers .....1144**  
**Assessment Requirements for SISORAF006 Lead rafting activities on grade 4 rivers..1148**  
**SISORSC001 Conduct search and rescue .....1151**  
**Assessment Requirements for SISORSC001 Conduct search and rescue .....1154**  
**SISORSC002 Perform vertical rescues .....1157**  
**Assessment Requirements for SISORSC002 Perform vertical rescues.....1161**  
**SISORSC003 Perform complex vertical rescues .....1166**  
**Assessment Requirements for SISORSC003 Perform complex vertical rescues.....1170**  
**SISORSC004 Self rescue in white water .....1175**  
**Assessment Requirements for SISORSC004 Self rescue in white water.....1178**  
**SISORSC005 Rescue others in white water .....1181**  
**Assessment Requirements for SISORSC005 Rescue others in white water.....1184**  
**SISORSC006 Lead and participate in complex white water rescues.....1188**  
**Assessment Requirements for SISORSC006 Lead and participate in complex white water rescues .....1191**  
**SISORSC007 Perform basic surf rescues.....1195**  
**Assessment Requirements for SISORSC007 Perform basic surf rescues .....1198**

**SISOSAI001 Sail small boats in smooth water and light to moderate wind conditions .1201**  
**Assessment Requirements for SISOSAI001 Sail small boats in smooth water and light to moderate wind conditions .....1206**  
**SISOSAI002 Sail small boats in partially smooth water and moderate to fresh wind conditions.....1211**  
**Assessment Requirements for SISOSAI002 Sail small boats in partially smooth water and moderate to fresh wind conditions .....1215**  
**SISOSAI003 Sail small boats in open coastal waters and moderate wind conditions ....1220**  
**Assessment Requirements for SISOSAI003 Sail small boats in open coastal waters and moderate wind conditions .....1224**  
**SISOSAI004 Lead sailing activities in smooth water and light to moderate wind conditions 1229**  
**Assessment Requirements for SISOSAI004 Lead sailing activities in smooth water and light to moderate wind conditions .....1233**  
**SISOSAI005 Lead sailing activities in partially smooth water and moderate to fresh wind conditions.....1236**  
**Assessment Requirements for SISOSAI005 Lead sailing activities in partially smooth water and moderate to fresh wind conditions.....1240**  
**SISOSAI006 Lead sailing activities in open coastal waters and moderate wind conditions 1243**  
**Assessment Requirements for SISOSAI006 Lead sailing activities in open coastal waters and moderate wind conditions .....1247**  
**SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres.....1250**  
**Assessment Requirements for SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres.....1254**  
**SISOSCB002 SCUBA dive from boats.....1260**  
**Assessment Requirements for SISOSCB002 SCUBA dive from boats .....1263**  
**SISOSCB003 SCUBA dive at night.....1267**  
**Assessment Requirements for SISOSCB003 SCUBA dive at night .....1270**  
**SISOSCB004 Navigate prescribed routes underwater.....1273**  
**Assessment Requirements for SISOSCB004 Navigate prescribed routes underwater...1276**  
**SISOSCB005 Complete underwater search and recovery dives.....1280**  
**Assessment Requirements for SISOSCB005 Complete underwater search and recovery dives.....1283**  
**SISOSCB006 Perform diver rescues.....1287**  
**Assessment Requirements for SISOSCB006 Perform diver rescues .....1290**  
**SISOSCB007 Inspect and fill SCUBA cylinders .....1295**  
**Assessment Requirements for SISOSCB007 Inspect and fill SCUBA cylinders .....1298**

# SIS20419 Certificate II in Outdoor Recreation

## Modification History

- Release 2. Supersedes and is equivalent to Release 1. SIS20419 Certificate II in Outdoor Recreation.
- Release 1. No equivalent qualification.

## Qualification Description

This qualification reflects the role of individuals who assist with operational logistics and the delivery of recreational activities. They work under direct supervision and with guidance from those responsible for planning, finalising and delivering activities, including program managers and leaders.

Assistants use a range of fundamental activity techniques during activities and can work in indoor and outdoor recreation environments, adventure learning centres or camps. The combined skills and knowledge provided by this qualification do not provide for a job outcome as a leader and further training would be required before moving into those roles.

This qualification provides a pathway to work for any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

The skills in this qualification must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

11 units must be completed:

- 4 core units
- 7 elective units, consisting of:
  - 3 units from Group A
  - 4 units from Group A, Group B, elsewhere in the SIS Training Package, or from any other current training package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

Electives which appear in *italics* have prerequisite units of competency, which are also listed within their appropriate group.

### **Core units**

HLTWHS001 Participate in workplace health and safety

SISOFLD001 Assist in conducting recreation sessions

SISOFLD002 Minimise environmental impact

SISXIND002 Maintain sport, fitness and recreation industry knowledge

### **Elective units**

#### **Group A Activity units**

SISCAQU002 Perform basic water rescues

SISOABS001 Abseil single pitches using fundamental skills

SISOBWG001 Bushwalk in tracked environments

SISOCLM001 Top rope climb single pitches, artificial surfaces

SISOCLM002 Top rope climb single pitches, natural surfaces

SISOCNE001 Paddle a craft using fundamental skills

SISOCVE001 Traverse caves

SISOCYT001 Set up, maintain and repair bicycles

SISOCYT002 Ride bicycles on roads and pathways, easy conditions

SISOCYT004 Ride off road bicycles on easy trails

SISODRV001 Drive AWD/4WD vehicles on unsealed roads

SISOEQU001 Handle horses

*SISOEQU002 Ride horses using fundamental skills*

SISOFLD006 Navigate in tracked environments

- SISOFSH001 Locate, attract and catch fish
- SISOFSH002 Select and catch bait
- SISOFSH003 Select and rig tackle outfits
- SISOKYS001 Paddle a sea kayak in enclosed waters
- SISOPWC001 Ride personal watercraft in smooth water conditions
- SISOSAI001 Sail small boats in smooth water and light to moderate wind conditions
- SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres
- SISOSCB002 SCUBA dive from boats*
- SISOSCB004 Navigate prescribed routes underwater
- SISOSKT001 Ski on easy cross country terrain
- SISOSNK001 Snorkel
- SISOSRF001 Surf small waves using basic manoeuvres
- SISOSUP001 Paddle a stand up board on inland flatwater
- SISOWIN001 Windsurf in smooth water and light wind conditions

### **Group B General electives**

- HLTAID011 Provide First Aid
- ICTICT214 Operate application software packages
- MEM13015 Work safely and effectively in manufacturing and engineering
- MEM16006 Organise and communicate information
- MEM50008 Carry out trip preparation and planning*
- MEM50009 Safely operate a mechanically powered recreational boat*
- MEM50010 Respond to boating emergencies and incidents*
- SISXCAI001 Provide equipment for activities
- SISXCCS001 Provide quality service

SISXEMR001	Respond to emergency situations
SISXFAC001	Maintain equipment for activities
SISXFAC002	Maintain sport, fitness and recreation facilities
SISXFIN002	Process financial transactions
SITXCOM002	Show social and cultural sensitivity
SITXFSA001	Use hygienic practices for food safety
SITXFSA002	Participate in safe food handling practices
TLIB0002	Carry out vehicle inspection
TLIB2008	Carry out inspection of trailers
TLIH3002	Plan and navigate routes

## Qualification Mapping Information

Release 2.	Supersedes and is equivalent to Release 1. SIS20419 Certificate II in Outdoor Recreation.
Release 1.	No equivalent qualification.

# SIS30115 Certificate III in Sport and Recreation

## Modification History

Not applicable.

## Qualification Description

This qualification reflects the multi-skilled role of individuals in operational and customer support positions in the sport or community recreation industry. These individuals are competent in a range of activities and functions requiring autonomous work within a defined range of situations and environments.

They work in locations such as fitness centres, sporting grounds or complexes, leisure and aquatic centres and community recreation centres.

Possible job titles include:

- recreation officer
- activity operation officer
- sport and recreation attendant
- community activities officer
- leisure services officer.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

15 units must be completed:

- 9 core units
- 6 elective units, consisting of:
  - 3 units from the list below
  - 3 units from the list below, elsewhere in SIS Training Package, or any other current Training Package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

### Core

BSBWHS303	Participate in WHS hazard identification, risk assessment and risk control
BSBWOR301	Organise personal work priorities and development
HLTAID003	Provide first aid
HLTWHS001	Participate in workplace health and safety
ICTWEB201	Use social media tools for collaboration and engagement
SISXCAI003	Conduct non-instructional sport, fitness or recreation sessions
SISXCAI004	Plan and conduct programs
SISXCCS001	Provide quality service
SISXEMR001	Respond to emergency situations

### General Electives

BSBADM307	Organise schedules
BSBADM311	Maintain business resources
BSBCRT301	Develop and extend critical thinking skills
BSBFIA303	Process accounts payable and receivable
BSBINM301	Organise workplace information
BSBWOR204	Use business technology
HLTAID006	Provide advanced first aid
ICTICT203	Operate application software packages
SIRXMER303	Coordinate merchandise presentation
SIRXSLS304	Coordinate sales performance
SISXADM001	Organise and supervise participant travel
SISXCAI006	Facilitate groups

SISXDIS001	Facilitate inclusion for people with a disability
SISXDIS002	Plan and conduct disability programs
SISXFAC002	Maintain sport, fitness and recreation facilities
SISXFAC003	Implement facility maintenance programs
SISXFAC005	Manage stock supply and purchase
SISXFIN002	Process financial transactions
SISXIND003	Maintain legal knowledge for organisation governance
SISXIND006	Conduct sport, fitness or recreation events
SISXMGT001	Develop and maintain stakeholder relationships
SISXRES001	Conduct sustainable work practices in open spaces
SISXRES002	Educate user groups
SITXFSA101	Use hygienic practices for food safety

## SIS30321 Certificate III in Fitness

### Modification History

Supersedes and is not equivalent to SIS30315 Certificate III in Fitness.

### Qualification Description

This qualification reflects the role of group and gym fitness instructors. These fitness instructors may plan and deliver group exercise sessions and develop gym-based programs for individuals where the level of personalised instruction and ongoing client monitoring is limited. They work in predictable environments under general supervision. When instructing groups or interacting with clients, they use discretion and judgment to solve routine issues within the parameters of clearly defined organisational policies and procedures.

This qualification provides a pathway to work as a fitness instructor in settings such as fitness facilities, gyms, and leisure and community centres.

The skills in this qualification must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

### Entry Requirements

There are no entry requirements for this qualification.

### Packaging Rules

15 units must be completed:

- 11 core units
- 4 elective units, consisting of:
  - 2 units from the list below
  - 2 units from the list below, elsewhere in the SIS Training Package, or from any other current training package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

#### Core Units

BSBOPS304	Deliver and monitor a service to customers
BSBPEF301	Organise personal work priorities
HLTAID011	Provide First Aid

HLTWHS001	Participate in workplace health and safety
SISFFIT032	Complete pre-exercise screening and service orientation
SISFFIT033	Complete client fitness assessments
SISFFIT035	Plan group exercise sessions
SISFFIT036	Instruct group exercise sessions
SISFFIT040	Develop and instruct gym-based exercise programs for individual clients
SISFFIT047	Use anatomy and physiology knowledge to support safe and effective exercise
SISFFIT052	Provide healthy eating information

**Elective units**

BSBOPS403	Apply business risk management processes
BSBSUS211	Participate in sustainable work practices
BSBWHS332X	Apply infection prevention and control procedures to own work activities
BSBXTW301	Work in a team
CHCDIV001	Work with diverse people
CHCMHS001	Work with people with mental health issues
HLTWHS005	Conduct manual tasks safely
SIRXSLS001	Sell to the retail customer
SISCAQU002	Perform basic water rescues
SISCCRO001	Plan and conduct recreation programs for older persons
SISFFIT037	Develop and instruct group movement programs for children
SISFFIT038	Plan group water-based exercise sessions
SISFFIT039	Instruct group water-based exercise sessions
SISFFIT048	Use anatomy and physiology knowledge to support safe and effective water-based exercise

SISXDIS001	Facilitate inclusion for people with a disability
SISXEMR001	Respond to emergency situations
SISXFAC002	Maintain sport, fitness and recreation facilities
SISXFIN002	Process financial transactions
SISXIND009	Respond to interpersonal conflict
SISXIND010	Protect children and young people
SISXRES002	Educate user groups

## Qualification Mapping Information

Supersedes and is not equivalent to SIS30315 Certificate III in Fitness.

## Links

Companion Volume implementation guides are found in VETNet -

## SIS30421 Certificate III in Sport - Athlete

### Modification History

Supersedes and is equivalent to SIS30419 Certificate III in Sport – Athlete.

### Qualification Description

This qualification reflects the role of individuals who apply the skills and knowledge to undertake a career as an athlete at a regional, state or national level in a specific sport in the Australian sport industry. Athletes at this level may have access to match-payments, prize money, grants or endorsements as the primary source of their income.

This qualification provides a pathway to work as an athlete. Individuals with this qualification train for events, work with coaches and support staff, compete in sport at a regional, state or territory level and undertake promotional duties. They possess a range of well-developed skills where discretion and judgement are required. They are responsible for their own outputs under the guidance of a coach.

The skills in this qualification must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

### Entry Requirements

There are no entry requirements for this qualification.

### Packaging Rules

10 units must be completed:

- 6 core units
- 4 elective units, consisting of:
  - 1 unit from Group A, Group B or Group C
  - at least 2 units from the electives listed in Group D
  - up to 1 elective unit can be selected from elsewhere in the SIS Training Package, or from any other current Training Package or accredited course.

Packaging Rules for each specialisation:

- Group A elective must be selected for award of the Certificate III in Sport - Athlete (Cricket)
- Group B elective must be selected for award of the Certificate III in Sport - Athlete (Golf).

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

**Core units**

BSBPEF301	Organise personal work priorities
FNSFLT311	Develop and apply knowledge of personal finances
HLTWHS001	Participate in workplace health and safety
SISSPAR005	Develop athlete personal brand
SISSPAR007	Work as an athlete
SISSPAR008	Maintain personal wellbeing as an athlete

**Elective units****Group A: Cricket**

SISSCKT002	Participate in cricket at an advanced level
------------	---

**Group B: Golf**

SISSGLF003	Participate in golf at an advanced level
------------	--

**Group C: Sport-specific electives**

SISSAFL002	Participate in Australian Football at an advanced level
SISSPAR002	Participate in sport at an advanced level

**Group D: General electives**

BSBCM411	Make presentations
BSBOPS403	Apply business risk management processes
HLTAID011	Provide First Aid
ICTICT214	Operate application software packages
SISSPAR003	Follow specialist dietary advice
SISSPAR004	Book athlete travel and accommodation

SISSPAR006	Prepare and present athlete sponsorship proposals
SISSPAR009	Participate in conditioning for sport
SISSSOF001	Work as an official in sport
SISSSOF002	Continuously improve officiating skills and knowledge
SISSSOF003	Officiate sport competitions
SISXCAI001	Provide equipment for activities
SISXEMR001	Respond to emergency situations
SISXFAC001	Maintain equipment for activities

## Qualification Mapping Information

Supersedes and is equivalent to SIS30419 Certificate III in Sport – Athlete.

## Links

Companion Volume implementation guides are found in VETNet -

# SIS30521 Certificate III in Sport Coaching

## Modification History

Supersedes and is equivalent to SIS30519 Certificate III in Sport – Coach.

## Qualification Description

This qualification reflects the role of individuals who apply the skills and knowledge to coach participants up to an intermediate level in a specific sport.

This qualification provides a pathway to work in community coaching roles working or volunteering at community-based sport clubs and organisations in the Australian sport industry. Individuals with this qualification possess a range of well-developed skills where discretion and judgement are required. They are responsible for their own outputs.

Possible job titles depend on the specific sport and may include community coach.

The skills in this qualification must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

Specific industry accreditation requirements may apply to sport-specific coaching accreditation and information should be obtained from the relevant National Sporting Organisation (NSO).

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

10 units must be completed:

- 6 core units
- 4 elective units, consisting of either:
  - 1 unit from Group A or Group B or Group C
  - at least 1 unit from the electives listed in Group E
  - up to 2 elective units can be selected from elsewhere in the SIS Training Package, or from any other current Training Package or accredited course

or

- all the units in Group D.

Packaging Rules for each specialisation:

- Group B elective must be selected for award of the Certificate III in Sport Coaching (Swimming)

- Group C elective must be selected for award of the Certificate III in Sport Coaching (Tennis)
- Group D electives must be selected for award of the Certificate III in Sport Coaching (Equestrian).

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

### **Core units**

BSBOPS403	Apply business risk management processes
HLTAID011	Provide First Aid
HLTWHS001	Participate in workplace health and safety
SISSSCO002	Work in a community coaching role
SISSSCO003	Meet participant coaching needs
SISSSCO005	Continuously improve coaching skills and knowledge

### **Elective units**

#### **Group A: Sport-specific electives**

SISSBSB002	Coach basketball participants up to an intermediate level
SISSSCO012	Coach sport participants up to an intermediate level
SISSVOL001	Coach volleyball participants up to an intermediate level

#### **Group B: Swimming**

SISSSWM001	Coach swimmers up to a competitive level
------------	--

#### **Group C: Tennis**

SISSTNS001	Coach junior players in tennis
------------	--------------------------------

#### **Group D: Equestrian**

ACMEQU202	Handle horses safely
ACMEQU205	Apply knowledge of horse behaviour
ACMEQU210	Lunge educated horses
SISSEQS001	Coach individual participants in the introduction of equestrian activities

### **Group E: General electives**

BSBOPS405	Organise business meetings
CHCYTH001	Engage respectfully with young people
SISSSCO006	Implement sport selection policies and procedures
SISSSCO009	Work collaboratively with others in a sport environment
SISSSCO016	Coach participants in sport competition
SISSSOF001	Work as an official in sport
SISSSOF002	Continuously improve officiating skills and knowledge
SISSSOF003	Officiate sport competitions
SISSSPT001	Implement sport injury prevention and management strategies
SISXADM001	Organise and supervise participant travel
SISXCAI009	Instruct strength and conditioning techniques
SISXDIS001	Facilitate inclusion for people with a disability
SISXEMR001	Respond to emergency situations
SISXFAC001	Maintain equipment for activities
SISXIND006	Conduct sport, fitness or recreation events
SISXIND009	Respond to interpersonal conflict
SISXIND010	Protect children and young people

## Qualification Mapping Information

Supersedes and is equivalent to SIS30519 Certificate III in Sport – Coach.

# SIS30619 Certificate III in Outdoor Leadership

## Modification History

Release 2.	Supersedes and is equivalent to Release 1. SIS30619 Certificate III in Outdoor Leadership.
Release 1.	No equivalent qualification.

## Qualification Description

This qualification reflects the role of skilled outdoor recreation leaders who lead and supervise dependent participants in recreational activities according to pre-determined activity plans, adjusting as required to suit conditions and participant abilities.

Leaders are skilled in recreational activity techniques and have well-developed leadership skills to manage group participation, cohesion, operational logistics, risk and problems as they arise. Using discretion and judgement, they work with some independence and under limited supervision using clearly defined plans, policies and procedures to guide work activities.

This qualification reflects the role of leaders who can work in a range of settings including indoor centres and outdoor adventure learning centres and camps, or relatively close to base in the field. They have access to reliable communication systems and assistance from medical and emergency services. When in the field, supervision is provided remotely, in the form of support from base, to deal appropriately with unplanned events or significant problems.

This qualification provides a pathway to work for any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

The skills in this qualification must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

22 units must be completed:

- 9 core units
- 13 elective units, consisting of:

- all the units in any two Groups A to AB
- the remaining elective units can be selected from Groups A to AB, Group AC, elsewhere in the SIS Training Package, or from any other current training package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

Electives which appear in *italics* have prerequisite units of competency, which are also listed within their appropriate group.

### **Core units**

HLTWHS001 Participate in workplace health and safety

PUAOPE013 Operate communications systems and equipment

SISOFLD002 Minimise environmental impact

SISOPLN001 Finalise operation of outdoor recreation activities

SISOPLN004 Identify hazards, assess and control risks for outdoor recreation activities

SISOPLN005 Interpret weather and environmental conditions for outdoor recreation activities

SISXCCS001 Provide quality service

SISXEMR001 Respond to emergency situations

SISXFAC001 Maintain equipment for activities

### **Elective units**

#### **Group A: Abseiling, Artificial Surfaces**

SISOABS002 Abseil single pitches, artificial surfaces

SISOABS005 Establish ropes for single pitch abseiling on artificial surfaces

SISOABS008 Lead single pitch abseiling activities on artificial surfaces

#### **Group B: Abseiling, Natural Surfaces**

SISOABS003 Abseil single pitches, natural surfaces

SISOABS006 Establish ropes for single pitch abseiling on natural surfaces

SISOABS009 Lead single pitch abseiling activities on natural surfaces

SISOFLD006 Navigate in tracked environments

SISORSC002 Perform vertical rescues

### **Group C: Bushwalking, Tracked Environments**

SISOBWG001 Bushwalk in tracked environments

SISOBWG005 Lead bushwalks in tracked environments

SISOFLD006 Navigate in tracked environments

### **Group D: Bushwalking, Difficult Tracked Environments**

SISOBWG002 Bushwalk in difficult tracked environments

SISOBWG006 Lead bushwalks in difficult tracked environments

SISOFLD007 Navigate in difficult tracked environments

### **Group E: Challenge Course, Low elements**

SISOABL001 Lead adventure-based learning activities

SISOCHC001 Lead challenge course sessions, low elements

### **Group F: Challenge Course, High elements**

SISOABL001 Lead adventure-based learning activities

SISOCHC003 Lead challenge course sessions, high elements

### **Group G: Climbing, Artificial Surfaces**

SISOCLM001 Top rope climb single pitches, artificial surfaces

SISOCLM005 Establish belays for single pitch climbing on artificial surfaces

SISOCLM008 Lead single pitch climbing activities on artificial surfaces, top rope climbing

**Group H: Climbing, Natural Surfaces, Top Rope**

SISOCLM002 Top rope climb single pitches, natural surfaces

SISOCLM006 Establish belays for single pitch climbing on natural surfaces

SISOCLM009 Lead single pitch climbing activities on natural surfaces, top rope climbing

SISOFLD006 Navigate in tracked environments

SISORSC002 Perform vertical rescues

**Group I: Canoeing, Inland Flat Water**

SISOCNE002 Paddle a canoe on inland flatwater

SISOCNE005 Lead canoeing activities on inland flatwater

**Group J: Caving**

SISOCVE001 Traverse caves

SISOCVE002 Descend and ascend ladders in caves

SISOCVE003 Abseil single pitches in caves

SISOCVE004 Descend and ascend single ropes in caves

SISOCVE005 Establish ropes, ladders and belays for caving

SISOCVE006 Lead caving activities

SISORSC002 Perform vertical rescues

**Group K: Cycle Touring, On Road**

SISOCYT001 Set up, maintain and repair bicycles

SISOCYT002 Ride bicycles on roads and pathways, easy conditions

SISOCYT006 Lead cycling activities on roads and pathways, easy conditions

TLIH3002 Plan and navigate routes

**Group L: Cycle Touring, Off Road Easy Trails**

- SISOCYT001 Set up, maintain and repair bicycles
- SISOCYT004 Ride off road bicycles on easy trails
- SISOCYT008 Lead off road cycling activities on easy trails
- SISOFLD006 Navigate in tracked environments

**Group M: Four Wheel Driving**

- FWPCOT3260 Recover four wheel drive vehicles
- SISODRV002 Lead four wheel driving activities
- TLIB0002 Carry out vehicle inspection
- TLIC2025 Operate four wheel drive vehicle
- TLIH3002 Plan and navigate routes

**Group N: Horse Trail Riding**

- RGRPSH308 Provide first aid and emergency care for horses or other equines
- SISOEQU001 Handle horses
- SISOEQU002 Ride horses using fundamental skills*
- SISOEQU003 Ride horses on tracked trail rides*
- SISOEQU005 Guide horse trail rides in tracked areas*
- SISOEQU010 Identify hazards, assess and control safety risks for horse handling and riding activities
- SISOFLD006 Navigate in tracked environments

**Group O: Fishing**

- SISOFSH001 Locate, attract and catch fish
- SISOFSH002 Select and catch bait

SISOFSH003 Select and rig tackle outfits

SISOFSH004 Lead fishing activities

### **Group P: Kayaking, Inland Flatwater**

SISOKYK001 Paddle a kayak on inland flatwater

SISOKYK005 Lead kayaking activities on inland flatwater

### **Group Q: Sea Kayaking, Enclosed Waters**

SISOKYS001 Paddle a sea kayak in enclosed waters

SISOKYS004 Lead sea kayaking activities in enclosed waters

### **Group R: Personal Water Craft**

SISOFLD005 Navigate waterway courses

SISOPWC001 Ride personal watercraft in smooth water conditions

SISOPWC002 Ride personal watercraft in slight water conditions

SISOPWC003 Lead personal water craft activities in smooth water conditions

SISOPWC004 Lead personal water craft activities in slight water conditions

### **Group S: Rafting, Grade 2 Rivers**

SISOFLD006 Navigate in tracked environments

SISORAF001 Guide a raft on grade 2 rivers

SISORAF004 Lead rafting activities on grade 2 rivers

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

### **Group T: Sailing Small Boats**

SISOSAI001 Sail small boats in smooth water and light to moderate wind conditions

SISOSAI002 Sail small boats in partially smooth water and moderate to fresh wind conditions

SISOSAI004 Lead sailing activities in smooth water and light to moderate wind conditions

SISOSAI005 Lead sailing activities boats in partially smooth water and moderate to fresh wind conditions

### **Group U: SCUBA Diving**

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

SISOSCB004 Navigate prescribed routes underwater

SISOSCB006 Perform diver rescues

SISOSCB010 Lead SCUBA diving activities

### **Group V: Ski Touring**

SISOFLD007 Navigate in difficult tracked environments

SISOSKT001 Ski on easy cross country terrain

SISOSKT003 Use snow craft skills for alpine touring

SISOSKT004 Lead skiing activities on easy cross country terrain

### **Group W: Snorkelling**

SISCAQU002 Perform basic water rescues

SISOSNK001 Snorkel

SISOSNK002 Lead snorkelling activities

### **Group X: Surfing, Beginner**

SISORSC007 Perform basic surf rescues

SISOSRF001 Surf small waves using basic manoeuvres

SISOSRF004 Lead surfing activities, small waves and basic manoeuvres

### **Group Y: Surfing, Intermediate**

SISORSC007 Perform basic surf rescues

SISOSRF002 Surf waves using intermediate manoeuvres

SISOSRF005 Lead surfing activities, intermediate manoeuvres

### **Group Z: Stand up Paddle Boarding, Inland Flatwater**

SISOSUP001 Paddle a stand up board on inland flatwater

SISOSUP004 Lead stand up paddle boarding activities on inland flatwater

### **Group AA: Stand up Paddle Boarding, Surf**

SISORSC007 Perform basic surf rescues

SISOSUP002 Paddle a stand up board in small waves

SISOSUP005 Lead stand up paddle boarding activities on small waves

### **Group AB: Windsurfing**

SISCAQU002 Perform basic water rescues

SISOWIN001 Windsurf in smooth water and light wind conditions

SISOWIN002 Lead windsurfing activities in smooth water and light wind conditions

### **Group AC: General electives**

ACMHBR310 Prevent and treat equine injury and disease

BSBPEF301 Organise personal work priorities

CHCPRT002 Support the rights and safety of children and young people

CHCYTH001 Engage respectfully with young people

FWPFGM3214	Operate a four wheel drive in a towing situation
HLTAID011	Provide First Aid
ICTICT214	Operate application software packages
MEM13015	Work safely and effectively in manufacturing and engineering
MEM16006	Organise and communicate information
<i>MEM50008</i>	<i>Carry out trip preparation and planning</i>
<i>MEM50009</i>	<i>Safely operate a mechanically powered recreational boat</i>
<i>MEM50010</i>	<i>Respond to boating emergencies and incidents</i>
SISOARC001	Lead archery sessions
SISODRV001	Drive AWD/4WD vehicles on unsealed roads
SISOFLD003	Select, set up and operate a temporary or overnight site
<i>SISOSCB002</i>	<i>SCUBA dive from boats</i>
<i>SISOSCB003</i>	<i>SCUBA dive at night</i>
SISOSCB007	Inspect and fill SCUBA cylinders

## SIS31015 Certificate III in Aquatics and Community Recreation

### Modification History

Release	Comments
1.1	Correction to typographical error in unit title for SISXCCS001 Provide quality service.
1.0	Release of SIS Sport, Fitness and Recreation Training Package.

### Qualification Description

This qualification reflects the role of individuals who work in aquatic facilities or environments, and recreation facilities. These individuals are competent in a range of activities and functions requiring autonomous work within a defined range of situations and activities.

This qualification provides a pathway to work as a swimming teacher, pool lifeguard, or recreation leader.

Possible job titles include:

- swimming teacher
- pool life guard
- recreation leader.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

### Entry Requirements

There are no entry requirements for this qualification.

### Packaging Rules

14 units must be completed:

- 5 core units
- 9 elective units, consisting of:
  - 3 units in Group A

- remaining units to make up the required 9 elective units from Group A or Group B; maximum of 2 units from elsewhere in SIS Training Package, or any other current Training Package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

### Core

SISXCAI003	Conduct non-instructional sport, fitness or recreation sessions
SISXCCS001	Provide quality service
SISXEMR001	Respond to emergency situations
SISXIND001	Work effectively in sport, fitness and recreation environments
SISXRES002	Educate user groups

### Group A – Essential Imported Units

BSBRK401	Identify risk and apply risk management processes
BSBWOR301	Organise personal work priorities and development
HLTAID003	Provide first aid
SFICOMP205B	Communicate effectively in cross-cultural environments

### Group B - General Electives

BSBITU201	Produce simple word processed documents
CHCCDE002	Develop and implement community programs
CHCYTH301E	Work effectively with young people
HLTAID006	Provide advanced first aid
HLTFA211A	Provide basic emergency life support
ICTICT203	Operate application software packages
PUAEME001B	Provide emergency care
PUAEME003C	Administer oxygen in an emergency situation

PUAEME004A	Provide emergency care for suspected spinal injury
PUAOPE010C	Operate an automated external defibrillator in an emergency
SIRXCCS201	Apply point-of-sale handling procedures
SIRXSLS201	Sell products and services
SISCAQU001	Test pool water quality
SISCAQU002	Perform basic water rescues
SISCAQU006	Supervise clients in aquatic locations
SISCAQU007	Perform advanced water rescues
SISCAQU008	Instruct water familiarisation, buoyancy and mobility skills
SISCAQU009	Instruct clients in water safety and survival skills
SISCAQU010	Instruct swimming strokes
SISCAQU011	Promote development of infants and toddlers in an aquatic environment
SISCAQU012	Assist participants with a disability during aquatic activities
SISCCRO001	Plan and conduct recreation programs for older persons
SISFFIT011	Instruct approved community fitness programs
SISXADM001	Organise and supervise participant travel
SISXCAI001	Provide equipment for activities
SISXCAI006	Facilitate groups
SISXCAI007	Assist with activities not requiring equipment
SISXDIS001	Facilitate inclusion for people with a disability
SISXDIS002	Plan and conduct disability programs
SISXFIN001	Develop and review budgets for activities or projects
SISXFIN002	Process financial transactions
SISXHRM001	Recruit and manage volunteers
SISXMGT001	Develop and maintain stakeholder relationships

## Qualification Mapping Information

No equivalent qualification.

## SIS40115 Certificate IV in Sport and Recreation

### Modification History

Release	Comments
Release 2	Release 2. SIS40115 Certificate IV in Sport and Recreation supersedes and is equivalent to Release 1. SIS40115 Certificate IV in Sport and Recreation. Modifications include removal of unused units of competency in response to Skills Reform Ministerial Statement - 9 October 2020. Elective unit removed: SISCAQU013 Coordinate lifeguard service at an aquatic facility.
Release 1	Release 1. SIS40115 Certificate IV in Sport and Recreation.

### Qualification Description

This qualification reflects the role of individuals who work in the sport and recreation industry in an administrative or organisational capacity. These individuals are able to plan, conduct and evaluate activities of others, deal with unpredictable and non-routine situations and provide leadership and guidance to staff.

The qualification provides a pathway to work in a diversity of sport and recreation locations such as fitness centres, sporting grounds or complexes, leisure and aquatic centres and community recreation centres or sporting organisations and associations.

Possible job titles include:

- facility coordinator
- administration coordinator
- duty manager
- recreation coordinator
- swim school coordinator
- operations coordinator
- aquatic operations coordinator.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

## Entry Requirements

There are not entry requirements for this qualification.

## Packaging Rules

17 units must be completed:

- 10 core units
- 7 elective units, consisting of:
  - 4 units from the list below
  - 3 units from the list below, elsewhere in SIS Training Package, or any other current Training Package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

### Core

BSBRK401	Identify risk and apply risk management processes
BSBWOR404	Develop work priorities
CHCCS020	Respond effectively to behaviours of concern
HLTAID003	Provide first aid
HLTWHS003	Maintain work health and safety
SISXCCS003	Address client needs
SISXFIN001	Develop and review budgets for activities or projects
SISXIND004	Analyse participation patterns
SISXIND005	Coordinate work teams or groups
SISXMGT001	Develop and maintain stakeholder relationships

### General Electives

BSBFIA301	Maintain financial records
BSBFIA302	Process payroll
BSBFIA304	Maintain a general ledger
BSBGOV401	Implement board member responsibilities

BSBHRM404	Review human resources functions
BSBHRM405	Support the recruitment, selection and induction of staff
BSBHRM501	Manage human resource services
BSBPMG522	Undertake project work
BSBSMB407	Manage a small team
CHCCDE004	Implement participation and engagement strategies
CHCCDE005	Develop and support relevant community resources
CHCCDE007	Develop and provide community projects
CHCCDE010	Develop and lead community engagement strategies to enhance participation
CHCCOM002	Use communication to build relationships
CHCDIV001	Work with diverse people
CHCLAH002	Contribute to leisure and health programming
CHCPRP001	Develop and maintain networks and collaborative partnerships
CHCYTH001	Engage respectfully with young people
CHCYTH009	Support youth programs
HLTAID006	Provide advanced first aid
ICTICT203	Operate application software packages
PSPPROC414A	Manage contracts
SISCAQU001	Test pool water quality
SISCAQU002	Perform basic water rescues
SISCAQU003	Maintain aquatic facility plant and equipment
SISCAQU004	Develop and implement pool water maintenance procedures
SISCAQU005	Develop and implement aquatic facility maintenance procedures
SISCAQU007	Perform advanced water rescues
SISCAQU008	Instruct water familiarisation, buoyancy and mobility skills
SISCAQU009	Instruct water safety and survival skills

SISCAQU010	Instruct swimming strokes
SISCAQU011	Promote development of infants and toddlers in an aquatic environment
SISCAQU012	Assist participants with a disability during aquatic activities
SISCAQU014	Operate self-contained breathing apparatus in an aquatic facility
SISCCRD001	Facilitate community recreation initiatives
SISFFIT011	Instruct approved community fitness programs
SISSSDE503	Develop volunteer management policies
SISXCAI004	Plan and conduct programs
SISXCCS002	Coordinate client service activities
SISXDIS001	Facilitate inclusion for people with a disability
SISXDIS002	Plan and conduct disability programs
SISXFAC003	Implement facility maintenance programs
SISXFAC004	Coordinate facility and equipment acquisition and maintenance
SISXHRM001	Recruit and manage volunteers
SISXIND003	Maintain legal knowledge for organisation governance
SISXIND006	Conduct sport, fitness or recreation events
SISXRES001	Conduct sustainable work practices in open spaces
SISXRES002	Educate user groups

## SIS40221 Certificate IV in Fitness

### Modification History

Supersedes and is not equivalent to SIS40215 Certificate IV in Fitness.

### Qualification Description

This qualification reflects the role of personal trainers who develop, instruct and evaluate personalised exercise programs for generally healthy and low risk clients, to achieve specific fitness goals. Clients with higher health risks are referred to medical or allied health professionals. Personal trainers work independently using highly developed fitness skills and knowledge in both routine and unpredictable situations. They use well-developed communication and collaboration skills to interact with clients and health professionals to improve client fitness outcomes.

This qualification provides a pathway to work as an employed or self-employed personal trainer in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes, and outdoor locations. Personal trainers may offer services to individuals and groups, and may provide online training services. In some employment contexts, personal trainers may be involved in team leadership or supervisory activities.

The skills in this qualification must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

### Entry Requirements

Entry to this qualification is open to individuals who hold the following units of competency or units that have been superseded by these units:

- HLTAID011 Provide First Aid (or a unit that supersedes this unit)
- HLTWHS001 Participate in workplace health and safety
- SISFFIT032 Complete pre-exercise screening and service orientation
- SISFFIT033 Complete client fitness assessments
- SISFFIT035 Plan group exercise sessions
- SISFFIT036 Instruct group exercise sessions
- SISFFIT040 Develop and instruct gym-based exercise programs for individual clients
- SISFFIT047 Use anatomy and physiology knowledge to support safe and effective

exercise

SISFFIT052 Provide healthy eating information

## Packaging Rules

17 units must be completed:

- 10 core units
- 7 elective units, consisting of:
  - 2 units from Group A
  - 2 units from Group B
  - 3 units from Group A, B, or C, elsewhere in the SIS Training Package, or from any other current Training Package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

### Core units

CHCCOM006	Establish and manage client relationships
SISFFIT041	Develop personalised exercise programs
SISFFIT042	Instruct personalised exercise sessions
SISFFIT043	Develop and instruct personalised exercise programs for body composition goals
SISFFIT044	Develop and instruct personalised exercise programs for older clients
SISFFIT045	Develop and instruct personalised exercise programs for adolescent clients
SISFFIT049	Use exercise science principles in fitness instruction
SISFFIT050	Support exercise behaviour change
SISFFIT051	Establish and maintain professional practice for fitness instruction
SISFFIT053	Support healthy eating for individual fitness clients

### Elective units

#### Group A: Exercise Instruction

SISFFIT034	Assess client movement and provide exercise advice
SISFFIT037	Develop and instruct group movement programs for children
SISFFIT046	Plan and instruct online exercise sessions
SISXCAI005	Conduct individualised long-term training programs
SISXCAI009	Instruct strength and conditioning techniques
SISXCAI010	Develop strength and conditioning programs
SISXDIS002	Plan and conduct disability programs

### **Group B: Business Operations and Leadership**

BSBESB301	Investigate business opportunities
BSBESB302	Develop and present business proposals
BSBESB303	Organise finances for new business ventures
BSBESB401	Research and develop business plans
BSBESB402	Establish legal and risk management requirements of new business ventures
BSBESB403	Plan finances for new business ventures
BSBESB404	Market new business ventures
BSBESB405	Manage compliance for small businesses
BSBESB407	Manage finances for new business ventures
BSBLDR414	Lead team effectiveness
SISXIND005	Coordinate work teams or groups
TAEDEL404	Mentor in the workplace

### **Group C: General Electives**

BSBCM411	Make presentations
----------	--------------------

BSBCRT411	Apply critical thinking to work practices
CHCAGE001	Facilitate the empowerment of older people
CHCDIS007	Facilitate the empowerment of people with disability
CHCDIV001	Work with diverse people
CHCLAH002	Contribute to leisure and health programming
CHCLAH005	Incorporate lifespan development and sociological concepts into leisure and health programming
CHCMHS001	Work with people with mental health issues
CHCYTH001	Engage respectfully with young people
HLTINF004	Manage the prevention and control of infection
HLTWHS003	Maintain work health and safety
HLTWHS005	Conduct manual tasks safely
SIRXOSM002	Maintain ethical and professional standards when using social media and online platforms
SIRXOSM003	Use social media and online tools
SIRXOSM005	Develop a basic website for customer engagement
SIRXSLS001	Sell to the retail customer
SISCAQU002	Perform basic water rescues
SISFFIT038	Plan group water-based exercise sessions
SISFFIT039	Instruct group water-based exercise sessions
SISFFIT048	Use anatomy and physiology knowledge to support safe and effective water-based exercise
SISXDIS001	Facilitate inclusion for people with a disability

SISXICT001 Select and use technology for sport, fitness and recreation work

SISXIND004 Analyse participation patterns

SISXIND006 Conduct sport, fitness or recreation events

## Qualification Mapping Information

Supersedes and is not equivalent to SIS40215 Certificate IV in Fitness.

# SIS40321 Certificate IV in Sport Coaching

## Modification History

Supersedes and is equivalent to SIS40319 Certificate IV in Sport Coaching.

## Qualification Description

This qualification reflects the role of individuals who apply the skills and knowledge to coach participants up to an advanced level in a specific sport.

This qualification provides a pathway to work in advanced community coaching roles working or volunteering at community-based sport clubs and organisations in the Australian sport industry. Individuals with this qualification possess a range of highly developed coaching and communication skills with sound industry knowledge. They work with independence, taking responsibility for their own functions and outputs.

Possible job titles depend on the specific sport and may include:

- Advanced coach
- Head coach
- Performance coach
- Development coach
- Senior coach.

The skills in this qualification must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

Specific industry accreditation requirements may apply to sport-specific coaching accreditation and information should be obtained from the relevant National Sporting Organisation (NSO).

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

11 units must be completed:

- 7 core units
- 4 elective units, consisting of either:
  - 1 unit from Group A or Group B or Group C
  - at least 2 units from the electives listed in Group E
  - up to 1 elective unit can be selected from elsewhere in the SIS Training Package, or from any other current Training Package or accredited course

or

- all the units from Group D
- 1 unit from the electives below or from elsewhere in the SIS Training Package, or from any other current Training Package or accredited course.

Packaging Rules for each specialisation:

- all Group B electives must be selected for award of the Certificate IV in Sport Coaching (Swimming)
- all Group C electives must be selected for award of the Certificate IV in Sport Coaching (Tennis)
- all Group D electives must be selected for award of the Certificate IV in Sport Coaching (Equestrian).

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

### **Core units**

BSBOPS403	Apply business risk management processes
HLTAID011	Provide First Aid
HLTWHS003	Maintain work health and safety
SISSSCO003	Meet participant coaching needs
SISSSCO005	Continuously improve coaching skills and knowledge
SISSSCO015	Prepare participants for sport competition
SISXIND009	Respond to interpersonal conflict

### **Elective units**

#### **Group A: Sport-specific electives**

SISSSCO013	Coach sport participants up to an advanced level
------------	--

#### **Group B: Swimming**

SISSSWM002	Coach swimmers up to a high-performance level
------------	---

#### **Group C: Tennis**

SISSTNS002 Coach intermediate players in tennis

### **Group D: Equestrian**

ACMPHR401 Interpret equine behaviour

SISOEQU001 Handle horses

SISSEQS002 Coach unofficial local competition participants in equestrian

### **Group E: General electives**

ACMEQU202 Handle horses safely

ACMEQU205 Apply knowledge of horse behaviour

ACMEQU210 Lunge educated horses

ACMEQU301 Introduce horses to lunge exercise

BSBOPS405 Organise business meetings

CHCVOL003 Recruit, induct and support volunteers

CHCYTH001 Engage respectfully with young people

SISOEQU012 Assess horses for sport or recreational performance

SISOEQU013 Condition horses for sport or recreational performance

SISOEQU014 Determine nutritional requirements for sport or recreational horses

SISOEQU015 Acquire and educate horses for sport or recreational programs

SISSSCO006 Implement sport selection policies and procedures

SISSSCO009 Work collaboratively with others in a sport environment

SISSSCO010 Implement sport talent identification programs

SISSSCO016 Coach participants in sport competition

SISSSPT001 Implement sport injury prevention and management strategies

SISXADM001 Organise and supervise participant travel

SISXCAI010	Develop strength and conditioning programs
SISXDIS001	Facilitate inclusion for people with a disability
SISXEMR002	Coordinate emergency responses
SISXFAC003	Implement facility maintenance programs
SISXICT001	Select and use technology for sport, fitness and recreation work
SISXIND005	Coordinate work teams or groups
SISXIND006	Conduct sport, fitness or recreation events

## SIS40619 Certificate IV in Outdoor Leadership

### Modification History

Not applicable.

### Qualification Description

This qualification reflects the role of highly skilled outdoor recreation leaders who lead and supervise dependent participants in recreational activities according to activity plans, which they develop.

These leaders are proficient in recreational activity techniques and have well-developed leadership skills to manage group participation, cohesion, operational logistics, risk and significant problems as they arise. While actions are limited by the parameters of plans, policies and procedures, they work with a considerable amount of autonomy.

This qualification reflects the role of leaders who can work at or close to base but often work in remote areas distant from support. Communication systems may be unreliable and assistance from medical and emergency services may not be readily available. They are expected to make high level independent judgements about logistical, technical, safety and emergency response issues.

This qualification provides a pathway to work for any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

### Entry Requirements

There are no entry requirements for this qualification.

### Packaging Rules

27 units must be completed:

- 12 core units
- 15 elective units, consisting of:
  - all the units in any two Groups A to AH
  - the remaining elective units can be selected from Groups A to AH, Group AI elsewhere in the SIS Training Package, or from any other current training package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

Electives which appear in *italics* have prerequisite units of competency, which are also listed within their appropriate group.

### Core units

HLTWHS003	Maintain work health and safety
PUAOPE013	Operate communications systems and equipment
SISOFLD002	Minimise environmental impact
SISOPLN001	Finalise operation of outdoor recreation activities
SISOPLN002	Plan outdoor activity sessions
SISOPLN004	Identify hazards, assess and control risks for outdoor recreation activities
SISOPLN005	Interpret weather and environmental conditions for outdoor recreation activities
SISORSC001	Conduct search and rescue
SISXCAI006	Facilitate groups
SISXCCS003	Address client needs
SISXEMR002	Coordinate emergency responses
SISXFAC001	Maintain equipment for activities

### Elective units

#### Group A Abseiling, Natural Surfaces, Single pitch

SISOABS003	Abseil single pitches, natural surfaces
SISOABS006	Establish ropes for single pitch abseiling on natural surfaces
SISOABS009	Lead single pitch abseiling activities on natural surfaces
SISOFLD006	Navigate in tracked environments
SISORSC002	Perform vertical rescues

#### Group B Abseiling, Natural Surfaces, Multi pitch

SISOABS004	Abseil multi pitches, natural surfaces
SISOABS007	Establish ropes for multi pitch abseiling on natural surfaces
SISOABS010	Lead multi pitch abseiling activities on natural surfaces
SISOFLD006	Navigate in tracked environments
SISORSC002	Perform vertical rescues
SISORSC003	Perform complex vertical rescues

### **Group C Bushwalking, Difficult Tracked Environments, Rivers**

SISOBWG002	Bushwalk in difficult tracked environments
SISOBWG004	Cross rivers during bushwalks
SISOBWG006	Lead bushwalks in difficult tracked environments
SISOFLD007	Navigate in difficult tracked environments

### **Group D Bushwalking, Extremely Difficult Tracked and Untracked Environments**

SISOBWG003	Bushwalk in extremely difficult tracked and untracked environments
SISOBWG004	Cross rivers during bushwalks
SISOBWG007	Lead bushwalks in extremely difficult tracked and untracked environments
SISOFLD008	Navigate in extremely difficult tracked and untracked environments

### **Group E Canyoning, Easy to Intermediate**

SISOCAY001	Traverse canyons
SISOCAY002	Abseil in easy to intermediate canyons
SISOCAY004	Establish ropes and belays for abseils in easy to intermediate canyons
SISOCAY006	Lead canyoning activities, easy to intermediate canyons

SISOFLD007 Navigate in difficult tracked environments

SISORSC002 Perform vertical rescues

### **Group F Canyoning, Intermediate to Advanced**

SISOCAY001 Traverse canyons

SISOCAY003 Abseil in intermediate to advanced canyons

SISOCAY005 Establish ropes and belays for abseils in intermediate to advanced canyons

SISOCAY007 Lead canyoning activities, intermediate to advanced canyons

SISOFLD007 Navigate in difficult tracked environments

SISORSC002 Perform vertical rescues

SISORSC003 Perform complex vertical rescues

### **Group G Challenge Course, Low elements**

SISOABL002 Facilitate adventure-based learning activities

SISOCHC001 Lead challenge course sessions, low elements

*SISOCHC002 Set up and supervise challenge course sessions, low elements*

### **Group H Challenge Course, High elements**

SISOABL002 Facilitate adventure-based learning activities

SISOCHC003 Lead challenge course sessions, high elements

*SISOCHC004 Set up and supervise challenge course sessions, high elements*

### **Group I Climbing, Natural Surfaces, Top Rope**

SISOCLM002 Top rope climb single pitches, natural surfaces

SISOCLM006 Establish belays for single pitch climbing on natural surfaces

SISOCLM009 Lead single pitch climbing activities on natural surfaces, top rope climbing

SISOFLD006 Navigate in tracked environments

SISORSC002 Perform vertical rescues

### **Group J Climbing, Natural Surfaces, Lead, Single Pitch**

SISOCLM003 Lead climb single pitches, natural surfaces

SISOCLM006 Establish belays for single pitch climbing on natural surfaces

SISOCLM010 Lead single pitch climbing activities on natural surfaces, lead climbing

SISOFLD006 Navigate in tracked environments

SISORSC002 Perform vertical rescues

### **Group K Climbing, Natural Surfaces, Lead, Multi Pitch**

SISOCLM004 Lead climb multi pitches, natural surfaces

SISOCLM007 Establish belays for multi pitch climbing on natural surfaces

SISOCLM011 Lead multi pitch climbing activities on natural surfaces, lead climbing

SISOFLD007 Navigate in difficult tracked environments

SISORSC002 Perform vertical rescues

SISORSC003 Perform complex vertical rescues

### **Group L Canoeing, Moving Water**

SISOCNE002 Paddle a canoe on inland flatwater

SISOCNE003 Paddle a canoe on moving water up to grade 1 rivers

SISOCNE005 Lead canoeing activities on inland flatwater

SISOCNE006 Lead canoeing activities on moving water up to grade 1 rivers

SISOFLD006 Navigate in tracked environments

### **Group M Canoeing, White Water**

SISOCNE004	Paddle a canoe on grade 2 rivers
SISOCNE007	Lead canoeing activities on grade 2 rivers
SISOFLD006	Navigate in tracked environments
SISORSC004	Self rescue in white water
<i>SISORSC005</i>	<i>Rescue others in white water</i>

### **Group N Caving**

SISOCVE001	Traverse caves
SISOCVE002	Descend and ascend ladders in caves
SISOCVE003	Abseil single pitches in caves
SISOCVE004	Descend and ascend single ropes in caves
SISOCVE005	Establish ropes, ladders and belays for caving
SISOCVE006	Lead caving activities
SISORSC002	Perform vertical rescues
SISORSC003	Perform complex vertical rescues

### **Group O Cycle Touring, On Road**

SISOCYT001	Set up, maintain and repair bicycles
SISOCYT003	Ride bicycles on roads, up to moderate terrain and heavy traffic
SISOCYT007	Lead cycling activities on roads, up to moderate terrain and heavy traffic
TLIH3002	Plan and navigate routes

### **Group P Cycle Touring, Off Road Intermediate Trails**

SISOCYT001	Set up, maintain and repair bicycles
SISOCYT005	Ride off road bicycles on intermediate trails
SISOCYT009	Lead off road cycling activities on intermediate trails
SISOFLD007	Navigate in difficult tracked environments

**Group Q Four Wheel Driving**

FWPCOT3260	Recover four wheel drive vehicles
MSS024023	Navigate in urban, regional and remote areas
SISODRV002	Lead four wheel driving activities
TLIB0002	Carry out vehicle inspection
TLIB2003	Carry out vehicle servicing and maintenance
TLIC2025	Operate four wheel drive vehicle

**Group R Horse Trail Riding, Untracked**

RGRPSH308	Provide first aid and emergency care for horses or other equines
SISOEQU001	Handle horses
<i>SISOEQU002</i>	<i>Ride horses using fundamental skills</i>
<i>SISOEQU004</i>	<i>Ride horses on untracked trail rides</i>
<i>SISOEQU006</i>	<i>Guide horse trail rides in untracked areas</i>
SISOEQU010	Identify hazards, assess and control safety risks for horse handling and riding activities
<i>SISOEQU011</i>	<i>Manage horse illness and injury in remote areas</i>
SISOFLD008	Navigate in extremely difficult tracked and untracked environments

**Group S Horse Handling and Riding Instruction**

SISOEQU001	Handle horses
<i>SISOEQU007</i>	<i>Instruct horse handling skills</i>
<i>SISOEQU008</i>	<i>Instruct fundamental horse riding skills</i>
SISOEQU010	Identify hazards, assess and control safety risks for horse handling and riding activities

**Group T Horse Care**

RGRPSH308	Provide first aid and emergency care for horses or other equines
-----------	--

SISOEQU014 Determine nutritional requirements for sport or recreational horses

ACMHBR310 Prevent and treat equine injury and disease

### **Group U Kayaking, Moving Water**

SISOFLD006 Navigate in tracked environments

SISOKYK001 Paddle a kayak on inland flatwater

SISOKYK002 Paddle a kayak on moving water up to grade 1 rivers

SISOKYK005 Lead kayaking activities on inland flatwater

SISOKYK006 Lead kayaking activities on moving water up to grade 1 rivers

### **Group V Kayaking, White Water, Grade 2 Rivers**

SISOFLD006 Navigate in tracked environments

SISOKYK003 Paddle a kayak on grade 2 rivers

SISOKYK007 Lead kayaking activities on grade 2 rivers

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

### **Group W Sea Kayaking**

SISOFLD005 Navigate waterway courses

SISOKYS001 Paddle a sea kayak in enclosed waters

SISOKYS002 Paddle a sea kayak in sheltered coastal waters

SISOKYS004 Lead sea kayaking activities in enclosed waters

SISOKYS005 Lead sea kayaking activities in sheltered coastal waters

### **Group X Sea Kayaking, Exposed Waters**

MARO003 Transmit and receive information by the global maritime distress and safety system

SISOFLD005 Navigate waterway courses

SISOKYS003	Paddle a sea kayak in exposed coastal waters
SISOKYS006	Lead sea kayaking activities in exposed coastal waters

### **Group Y Rafting, Grade 3 Rivers**

SISOFLD006	Navigate in tracked environments
SISORAF002	Guide a raft on grade 3 rivers
SISORAF005	Lead rafting activities on grade 3 rivers
SISORSC004	Self rescue in white water
<i>SISORSC005</i>	<i>Rescue others in white water</i>
<i>SISORSC006</i>	<i>Lead and participate in complex white water rescues</i>

### **Group Z Rafting, Grade 4 Rivers**

SISOFLD006	Navigate in tracked environments
SISORAF003	Guide a raft on grade 4 rivers
SISORAF006	Lead rafting activities on grade 4 rivers
SISORSC004	Self rescue in white water
<i>SISORSC005</i>	<i>Rescue others in white water</i>
<i>SISORSC006</i>	<i>Lead and participate in complex white water rescues</i>

### **Group AA Sailing Small Boats**

MEM50010	Respond to boating emergencies and incidents
SISOSAI002	Sail small boats in partially smooth water and moderate to fresh wind conditions
SISOSAI003	Sail small boats in open coastal waters and moderate wind conditions
SISOSAI005	Lead sailing activities boats in partially smooth water and moderate to fresh wind conditions
SISOSAI006	Lead sailing activities boats in open coastal waters and moderate wind conditions

**Group AB SCUBA Diving**

SISOSCB001	SCUBA dive in open water to a maximum depth of 18 metres
SISOSCB004	Navigate prescribed routes underwater
SISOSCB006	Perform diver rescues
SISOSCB010	Lead SCUBA diving activities

**Group AC SCUBA Specialist Diving**

SISOSCB001	SCUBA dive in open water to a maximum depth of 18 metres
SISOSCB003	SCUBA dive at night
SISOSCB005	Complete underwater search and recovery dives
SISOSCB009	SCUBA dive to depths between 18 and 40 metres
SISOSCB011	Lead specialised SCUBA diving activities

**Group AD Ski Touring**

SISOFLD008	Navigate in extremely difficult tracked and untracked environments
SISOSKT002	Ski on intermediate cross country terrain
SISOSKT003	Use snow craft skills for alpine touring
SISOSKT005	Lead skiing activities on intermediate cross country terrain

**Group AE Surfing, Intermediate**

SISORSC007	Perform basic surf rescues
SISOSRF002	Surf waves using intermediate manoeuvres
SISOSRF005	Lead surfing activities, intermediate manoeuvres

**Group AF Surfing, Advanced**

SISORSC007	Perform basic surf rescues
SISOSRF003	Surf waves using advanced manoeuvres

SISOSRF006 Lead surfing activities, advanced manoeuvres

### **Group AG Stand up Paddle Boarding, Surf**

SISORSC007 Perform basic surf rescues

SISOSUP002 Paddle a stand up board in small waves

SISOSUP005 Lead stand up paddle boarding activities on small waves

### **Group AH Stand up Paddle Boarding Sheltered Coastal Waters**

SISOSUP003 Paddle a stand up board in sheltered coastal waters

SISOSUP006 Lead stand up paddle boarding activities in sheltered coastal waters

### **Group AI General electives**

BSBLDR403 Lead team effectiveness

BSBWOR404 Develop work priorities

CHCCCS009 Facilitate responsible behaviour

CHCCCS014 Provide brief interventions

CHCPRT002 Support the rights and safety of children and young people

CHCYTH001 Engage respectfully with young people

CHCYTH004 Respond to critical situations

FWPFGM3214 Operate a four wheel drive in a towing situation

HLTAID003 Provide first aid

MEM50008 Carry out trip preparation and planning

MEM50009 Safely operate a mechanically powered recreational boat

SISCAQU002 Perform basic water rescues

SISCAQU007 Perform advanced water rescues

SISOFLD003 Select, set up and operate a temporary or overnight site

<i>SISOFLD004</i>	<i>Provide first aid in remote locations</i>
<i>SISOSCB002</i>	<i>SCUBA dive from boats</i>
SISOSCB007	Inspect and fill SCUBA cylinders
<i>SISOSCB008</i>	<i>SCUBA dive using Enriched Air Nitrox</i>
SISXCCS002	Coordinate client service activities
SISXDIS001	Facilitate inclusion for people with a disability
SISXDIS002	Plan and conduct disability programs
SISXHRM001	Recruit and manage volunteers
SISXIND005	Coordinate work teams or groups
SISXIND010	Protect children and young people
SISXMGT001	Develop and maintain stakeholder relationships
SITTGDE002	Work as a guide
SITTGDE004	Lead tour groups
SITTGDE005	Prepare and present tour commentaries or activities
SITTGDE006	Develop and maintain the general and regional knowledge required by guides
SITTGDE007	Research and share general information on Australian Indigenous cultures
SITTGDE008	Prepare specialised interpretive content on flora, fauna and landscape
SITTGDE009	Prepare specialised interpretive content on marine environments
SITTGDE010	Prepare specialised interpretive content on cultural and heritage environments
SITTGDE011	Coordinate and operate tours
SITTGDE012	Manage extended touring programs
SITTPPD002	Develop interpretive activities

SITTTOP002	Provide outdoor catering
SITXCOM002	Show social and cultural sensitivity
SITXFSA001	Use hygienic practices for food safety
SITXFSA002	Participate in safe food handling practices
TAEASS401	Plan assessment activities and processes
TAEASS402	Assess competence
TAEASS403	Participate in assessment validation
TAEASS502	Design and develop assessment tools
TAEDEL301	Provide work skill instruction
TLIB2008	Carry out inspection of trailers
TLIB2119	Carry out maintenance of trailers

## Qualification Mapping Information

No equivalent qualification.

# SIS40621 Certificate IV in Outdoor Leadership

## Modification History

Not applicable.

## Qualification Description

This qualification reflects the role of highly skilled outdoor recreation leaders who lead and supervise dependent participants in recreational activities according to activity plans, which they develop.

These leaders are proficient in recreational activity techniques and have well-developed leadership skills to manage group participation, cohesion, operational logistics, risk and significant problems as they arise. While actions are limited by the parameters of plans, policies and procedures, they work with a considerable amount of autonomy.

This qualification reflects the role of leaders who can work at or close to base but often work in remote areas distant from support. Communication systems may be unreliable and assistance from medical and emergency services may not be readily available. They are expected to make high level independent judgements about logistical, technical, safety and emergency response issues.

This qualification provides a pathway to work for any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

The skills in this qualification must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

27 units must be completed:

- 12 core units
- 15 elective units, consisting of:
  - all the units in any two Groups A to AH
  - the remaining elective units can be selected from Groups A to AH, Group AI elsewhere in the SIS Training Package, or from any other current training package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

Electives which appear in *italics* have prerequisite units of competency, which are also listed within their appropriate group.

### Core units

HLTWHS003	Maintain work health and safety
PUAOPE013	Operate communications systems and equipment
SISOFLD002	Minimise environmental impact
SISOPLN001	Finalise operation of outdoor recreation activities
SISOPLN002	Plan activity sessions
SISOPLN004	Identify hazards, assess and control risks for outdoor recreation activities
SISOPLN005	Interpret weather and environmental conditions for outdoor recreation activities
SISORSC001	Conduct search and rescue
SISXCAI006	Facilitate groups
SISXCCS003	Address client needs
SISXEMR002	Coordinate emergency responses
SISXFAC001	Maintain equipment for activities

### Elective units

#### Group A Abseiling, Natural Surfaces, Single pitch

SISOABS003	Abseil single pitches, natural surfaces
SISOABS006	Establish ropes for single pitch abseiling on natural surfaces
SISOABS009	Lead single pitch abseiling activities on natural surfaces
SISOFLD006	Navigate in tracked environments
SISORSC002	Perform vertical rescues

**Group B Abseiling, Natural Surfaces, Multi pitch**

SISOABS004 Abseil multi pitches, natural surfaces

SISOABS007 Establish ropes for multi pitch abseiling on natural surfaces

SISOABS010 Lead multi pitch abseiling activities on natural surfaces

SISOFLD006 Navigate in tracked environments

SISORSC002 Perform vertical rescues

SISORSC003 Perform complex vertical rescues

**Group C Bushwalking, Difficult Tracked Environments, Rivers**

SISOBWG002 Bushwalk in difficult tracked environments

SISOBWG004 Cross rivers during bushwalks

SISOBWG006 Lead bushwalks in difficult tracked environments

SISOFLD007 Navigate in difficult tracked environments

**Group D Bushwalking, Extremely Difficult Tracked and Untracked Environments**

SISOBWG003 Bushwalk in extremely difficult tracked and untracked environments

SISOBWG004 Cross rivers during bushwalks

SISOBWG007 Lead bushwalks in extremely difficult tracked and untracked environments

SISOFLD008 Navigate in extremely difficult tracked and untracked environments

**Group E Canyoning, Easy to Intermediate**

SISOCAY001 Traverse canyons

SISOCAY002 Abseil in easy to intermediate canyons

SISOCAY004 Establish ropes and belays for abseils in easy to intermediate canyons

SISOCAY006 Lead canyoning activities, easy to intermediate canyons

SISOFLD007 Navigate in difficult tracked environments

SISORSC002 Perform vertical rescues

### **Group F Canyoning, Intermediate to Advanced**

SISOCAY001 Traverse canyons

SISOCAY003 Abseil in intermediate to advanced canyons

SISOCAY005 Establish ropes and belays for abseils in intermediate to advanced canyons

SISOCAY007 Lead canyoning activities, intermediate to advanced canyons

SISOFLD007 Navigate in difficult tracked environments

SISORSC002 Perform vertical rescues

SISORSC003 Perform complex vertical rescues

### **Group G Challenge Course, Low elements**

SISOABL002 Facilitate adventure-based learning activities

SISOCHC001 Lead challenge course sessions, low elements

*SISOCHC002 Set up and supervise challenge course sessions, low elements*

### **Group H Challenge Course, High elements**

SISOABL002 Facilitate adventure-based learning activities

SISOCHC003 Lead challenge course sessions, high elements

*SISOCHC004 Set up and supervise challenge course sessions, high elements*

### **Group I Climbing, Natural Surfaces, Top Rope**

SISOCLM002 Top rope climb single pitches, natural surfaces

SISOCLM006 Establish belays for single pitch climbing on natural surfaces

SISOCLM009 Lead single pitch climbing activities on natural surfaces, top rope climbing

SISOFLD006 Navigate in tracked environments

SISORSC002 Perform vertical rescues

### **Group J Climbing, Natural Surfaces, Lead, Single Pitch**

SISOCLM003 Lead climb single pitches, natural surfaces

SISOCLM006 Establish belays for single pitch climbing on natural surfaces

SISOCLM010 Lead single pitch climbing activities on natural surfaces, lead climbing

SISOFLD006 Navigate in tracked environments

SISORSC002 Perform vertical rescues

### **Group K Climbing, Natural Surfaces, Lead, Multi Pitch**

SISOCLM004 Lead climb multi pitches, natural surfaces

SISOCLM007 Establish belays for multi pitch climbing on natural surfaces

SISOCLM011 Lead multi pitch climbing activities on natural surfaces, lead climbing

SISOFLD007 Navigate in difficult tracked environments

SISORSC002 Perform vertical rescues

SISORSC003 Perform complex vertical rescues

### **Group L Canoeing, Moving Water**

SISOCNE002 Paddle a canoe on inland flatwater

SISOCNE003 Paddle a canoe on moving water up to grade 1 rivers

SISOCNE005 Lead canoeing activities on inland flatwater

SISOCNE006 Lead canoeing activities on moving water up to grade 1 rivers

SISOFLD006 Navigate in tracked environments

### **Group M Canoeing, White Water**

SISOCNE004 Paddle a canoe on grade 2 rivers

SISOCNE007 Lead canoeing activities on grade 2 rivers

SISOFLD006 Navigate in tracked environments

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

### **Group N Caving**

SISOCVE001 Traverse caves

SISOCVE002 Descend and ascend ladders in caves

SISOCVE003 Abseil single pitches in caves

SISOCVE004 Descend and ascend single ropes in caves

SISOCVE005 Establish ropes, ladders and belays for caving

SISOCVE006 Lead caving activities

SISORSC002 Perform vertical rescues

SISORSC003 Perform complex vertical rescues

### **Group O Cycle Touring, On Road**

SISOCYT001 Set up, maintain and repair bicycles

SISOCYT003 Ride bicycles on roads, up to moderate terrain and heavy traffic

SISOCYT007 Lead cycling activities on roads, up to moderate terrain and heavy traffic

TLIH3002 Plan and navigate routes

### **Group P Cycle Touring, Off Road Intermediate Trails**

SISOCYT001 Set up, maintain and repair bicycles

SISOCYT005 Ride off road bicycles on intermediate trails

SISOCYT009 Lead off road cycling activities on intermediate trails

SISOFLD007 Navigate in difficult tracked environments

**Group Q Four Wheel Driving**

- FWPCOT3260 Recover four wheel drive vehicles
- MSS024023 Navigate in urban, regional and remote areas
- SISODRV002 Lead four wheel driving activities
- TLIB0002 Carry out vehicle inspection
- TLIB2003 Carry out vehicle servicing and maintenance
- TLIC2025 Operate four wheel drive vehicle

**Group R Horse Trail Riding, Untracked**

- RGRPSH308 Provide first aid and emergency care for horses or other equines
- SISOEQU001 Handle horses
- SISOEQU002 Ride horses using fundamental skills*
- SISOEQU004 Ride horses on untracked trail rides*
- SISOEQU006 Guide horse trail rides in untracked areas*
- SISOEQU010 Identify hazards, assess and control safety risks for horse handling and riding activities
- SISOEQU011 Manage horse illness and injury in remote areas*
- SISOFD008 Navigate in extremely difficult tracked and untracked environments

**Group S Horse Handling and Riding Instruction**

- SISOEQU001 Handle horses
- SISOEQU007 Instruct horse handling skills*
- SISOEQU008 Instruct fundamental horse riding skills*
- SISOEQU010 Identify hazards, assess and control safety risks for horse handling and riding activities

**Group T Horse Care**

ACMHBR310 Prevent and treat equine injury and disease

RGRPSH308 Provide first aid and emergency care for horses or other equines

SISOEQU014 Determine nutritional requirements for sport or recreational horses

**Group U Kayaking, Moving Water**

SISOFLD006 Navigate in tracked environments

SISOKYK001 Paddle a kayak on inland flatwater

SISOKYK002 Paddle a kayak on moving water up to grade 1 rivers

SISOKYK005 Lead kayaking activities on inland flatwater

SISOKYK006 Lead kayaking activities on moving water up to grade 1 rivers

**Group V Kayaking, White Water, Grade 2 Rivers**

SISOFLD006 Navigate in tracked environments

SISOKYK003 Paddle a kayak on grade 2 rivers

SISOKYK007 Lead kayaking activities on grade 2 rivers

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

**Group W Sea Kayaking**

SISOFLD005 Navigate waterway courses

SISOKYS001 Paddle a sea kayak in enclosed waters

SISOKYS002 Paddle a sea kayak in sheltered coastal waters

SISOKYS004 Lead sea kayaking activities in enclosed waters

SISOKYS005 Lead sea kayaking activities in sheltered coastal waters

**Group X Sea Kayaking, Exposed Waters**

SISOFLD005 Navigate waterway courses

SISOKYS003 Paddle a sea kayak in exposed coastal waters

SISOKYS006 Lead sea kayaking activities in exposed coastal waters

**Group Y Rafting, Grade 3 Rivers**

SISOFLD006 Navigate in tracked environments

SISORAF002 Guide a raft on grade 3 rivers

SISORAF005 Lead rafting activities on grade 3 rivers

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

*SISORSC006 Lead and participate in complex white water rescues*

**Group Z Rafting, Grade 4 Rivers**

SISOFLD006 Navigate in tracked environments

SISORAF003 Guide a raft on grade 4 rivers

SISORAF006 Lead rafting activities on grade 4 rivers

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

*SISORSC006 Lead and participate in complex white water rescues*

**Group AA Sailing Small Boats**

SISOSAI002 Sail small boats in partially smooth water and moderate to fresh wind conditions

SISOSAI003 Sail small boats in open coastal waters and moderate wind conditions

SISOSAI005 Lead sailing activities boats in partially smooth water and moderate to fresh wind conditions

SISOSAI006 Lead sailing activities boats in open coastal waters and moderate wind conditions

### **Group AB SCUBA Diving**

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

SISOSCB004 Navigate prescribed routes underwater

SISOSCB006 Perform diver rescues

SISOSCB010 Lead SCUBA diving activities

### **Group AC SCUBA Specialist Diving**

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

SISOSCB003 SCUBA dive at night

SISOSCB005 Complete underwater search and recovery dives

SISOSCB009 SCUBA dive to depths between 18 and 40 metres

SISOSCB011 Lead specialised SCUBA diving activities

### **Group AD Ski Touring**

SISOFLD008 Navigate in extremely difficult tracked and untracked environments

SISOSKT002 Ski on intermediate cross country terrain

SISOSKT003 Use snow craft skills for alpine touring

SISOSKT005 Lead skiing activities on intermediate cross country terrain

### **Group AE Surfing, Intermediate**

SISORSC007 Perform basic surf rescues

SISOSRF002 Surf waves using intermediate manoeuvres

SISOSRF005 Lead surfing activities, intermediate manoeuvres

**Group AF Surfing, Advanced**

SISORSC007 Perform basic surf rescues

SISOSRF003 Surf waves using advanced manoeuvres

SISOSRF006 Lead surfing activities, advanced manoeuvres

**Group AG Stand up Paddle Boarding, Surf**

SISORSC007 Perform basic surf rescues

SISOSUP002 Paddle a stand up board in small waves

SISOSUP005 Lead stand up paddle boarding activities on small waves

**Group AH Stand up Paddle Boarding Sheltered Coastal Waters**

SISOSUP003 Paddle a stand up board in sheltered coastal waters

SISOSUP006 Lead stand up paddle boarding activities in sheltered coastal waters

**Group AI General electives**

BSBLDR414 Lead team effectiveness

BSBPEF402 Develop personal work priorities

CHCCCS009 Facilitate responsible behaviour

CHCCCS014 Provide brief interventions

CHCPRT002 Support the rights and safety of children and young people

CHCYTH001 Engage respectfully with young people

CHCYTH004 Respond to critical situations

FWPFGM3214 Operate a four wheel drive in a towing situation

HLTAID011 Provide First Aid

MEM13015 Work safely and effectively in manufacturing and engineering

MEM16006 Organise and communicate information.

MEM50008	<i>Carry out trip preparation and planning</i>
MEM50009	<i>Safely operate a mechanically powered recreational boat</i>
SISCAQU002	Perform basic water rescues
SISCAQU007	Perform advanced water rescues
SISOFLD003	Select, set up and operate a temporary or overnight site
SISOFLD004	<i>Provide first aid in remote locations</i>
SISOSCB002	<i>SCUBA dive from boats</i>
SISOSCB007	Inspect and fill SCUBA cylinders
SISOSCB008	<i>SCUBA dive using Enriched Air Nitrox</i>
SISXCCS002	Coordinate client service activities
SISXDIS001	Facilitate inclusion for people with a disability
SISXDIS002	Plan and conduct disability programs
SISXHRM001	Recruit and manage volunteers
SISXIND005	Coordinate work teams or groups
SISXIND010	Protect children and young people
SISXMGT001	Develop and maintain stakeholder relationships
SITTGDE002	Work as a guide
SITTGDE004	Lead tour groups
SITTGDE005	Prepare and present tour commentaries or activities
SITTGDE006	Develop and maintain the general and regional knowledge required by guides
SITTGDE007	Research and share general information on Australian Indigenous cultures
SITTGDE008	Prepare specialised interpretive content on flora, fauna and landscape
SITTGDE009	Prepare specialised interpretive content on marine environments
SITTGDE010	Prepare specialised interpretive content on cultural and heritage environments

SITTGDE011	Coordinate and operate tours
SITTGDE012	Manage extended touring programs
SITTPPD002	Develop interpretive activities
SITTTOP002	Provide outdoor catering
SITXCOM002	Show social and cultural sensitivity
SITXFSA001	Use hygienic practices for food safety
SITXFSA002	Participate in safe food handling practices
TAEASS401	Plan assessment activities and processes
TAEASS402	Assess competence
TAEASS403	Participate in assessment validation
TAEASS502	Design and develop assessment tools
TAEDEL301	Provide work skill instruction
TLIB2008	Carry out inspection of trailers
TLIB2119	Carry out maintenance of trailers

## Qualification Mapping Information

Release 1.                      Supersedes and is equivalent to SIS40619 Certificate IV in Outdoor Leadership.

# SIS50115 Diploma of Sport and Recreation Management

## Modification History

Not applicable.

## Qualification Description

This qualification reflects the role of individuals who work in the sport and recreation industry in a management or organisational capacity. These individuals have a high degree of autonomy and manage the effective provision of services or programs in locations such as fitness centres, sporting grounds or complexes, leisure and aquatic centres and community recreation centres.

Possible job titles include:

- competition manager
- executive officer
- facility manager
- program manager
- centre manager
- assistant centre manager
- volunteer coordinator
- sports program officer
- operations officer.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

20 units must be completed:

- 13 core units
- 7 elective units, consisting of:
  - 4 units from the list below
  - 3 units from the list below, elsewhere in SIS Training Package, or any other current Training Package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

### **Core**

AHCBUS506A	Develop and review a business plan
BSBFIM601	Manage finances
BSBHRM405	Support the recruitment, selection and induction of staff
BSBLDR502	Lead and manage effective workplace relationships
BSBMGT517	Manage operational plan
BSBMKG523	Design and develop an integrated marketing communication plan
BSBPMG522	Undertake project work
BSBRISK501	Manage risk
HLTWHS004	Manage work health and safety
SISXCCS002	Coordinate client service activities
SISXIND003	Maintain legal knowledge for organisation governance
SISXIND007	Develop and implement participation strategies
SISXMGT001	Develop and maintain stakeholder relationships

### **General Electives**

BSBADM502	Manage meetings
BSBADM503	Plan and manage conferences
BSBADM504	Plan and implement administrative systems
BSBADM506	Manage business document design and development
BSBFIM501	Manage budgets and financial plans
BSBFIM502	Manage payroll
BSBGOV401	Implement board member responsibilities
BSBHRM501	Manage human resource services

BSBHRM502	Manage human resource management information systems
BSBHRM505	Manage remuneration and employee benefits
BSBHRM506	Manage recruitment, selection and induction processes
BSBHRM507	Manage separation or termination
BSBHRM509	Manage rehabilitation or return to work programs
BSBHRM512	Develop and manage performance management processes
BSBLED502	Manage programs that promote personal effectiveness
BSBMGT502	Manage people performance
BSBMKG501	Identify and evaluate marketing opportunities
BSBMKG502	Establish and adjust the marketing mix
BSBMKG514	Implement and monitor marketing activities
BSBMKG521	Plan and implement sponsorship and event marketing
BSBRKG502	Manage and monitor business or records systems
BSBSUS501	Develop workplace policy and procedures for sustainability
BSBWOR501	Manage personal work priorities and professional development
BSBWRK510	Manage employee relations
CHCCDE002	Develop and implement community programs
CHCDIS005	Develop and provide person-centred service responses
CHCDIV003	Manage and promote diversity
CHCEDU001	Provide community focused health promotion and prevention strategies
CHCMGT001	Develop, implement and review quality framework
CHCMGT002	Manage partnership agreements with service providers
CHCMGT004	Secure and manage funding
CHCMGT005	Facilitate workplace debriefing and support processes
CHCPOL002	Develop and implement policy
CHCPRP003	Reflect on and improve own professional practice

CHCVOL004	Manage volunteer workforce development
CHCYTH009	Support youth programs
CHCYTH012	Manage service response to young people in crisis
FNSACC502	Prepare tax documentation for individuals
FNSACC504	Prepare financial reports for corporate entities
FNSACC505	Establish and maintain accounting information systems
FNSACC506	Implement and maintain internal control procedures
HLTAHW023	Plan, develop and evaluate health promotion and community development programs
HLTAID006	Provide advanced first aid
ICTICT308	Use advanced features of computer applications
ICTDBS409	Monitor and administer a database
PSPPROC414A	Manage contracts
SIRXINV005A	Control inventory
SIRXINV404	Manage retail merchandise
SIRXSLS406	Manage sales and service delivery
SIRXMER405	Manage store presentation and pricing
SISOODR506A	Evaluate policy for an outdoor organisation
SISSSCO513	Plan and implement high performance training and recovery programs
SISSSDE503	Develop volunteer management policies
SISSSPA505A	Coordinate team or group management
SISSSPA506A	Coordinate team or group administration
SISXFAC003	Implement facility maintenance programs
SISXFAC004	Coordinate facility and equipment acquisition and maintenance
SISXFAC005	Manage stock supply and purchase
SISXHRM001	Recruit and manage volunteers

SISXICT001	Select and use technology for sport, fitness and recreation work
SISXIND005	Coordinate work teams or groups
SISXIND006	Conduct sport, fitness or recreation events
SISXRES001	Conduct sustainable work practices in open spaces
SITXEVT505	Manage on-site event operations
SITXEVT602	Develop event concepts
SITXEVT603	Determine event feasibility
SITXFIN601	Manage physical assets

## Qualification Mapping Information

SIS50712 Diploma of Sport and Recreation Management

# SIS50321 Diploma of Sport

## Modification History

Supersedes and is equivalent to SIS50319 Diploma of Sport.

## Qualification Description

This qualification reflects the role of individuals who apply the skills and knowledge to pursue a range of roles within the Australian sport industry.

They work or volunteer at community-based sport clubs and organisations in the Australian sport industry.

Individuals with this qualification are involved in the self-directed application of knowledge and skills, and the provision of leadership and support to colleagues. They work autonomously and coordinate and supervise others.

Possible job titles include:

- High performance coach
- Sport development manager
- Talent manager.

The skills in this qualification must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

Specific industry accreditation requirements may apply to sport-specific coaching accreditation and information should be obtained from the relevant National Sporting Organisation (NSO).

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

14 units must be completed:

- 3 core units
- 11 elective units, consisting of:
  - at least 9 units from the electives below
  - up to 2 elective units can be selected from elsewhere in the SIS Training Package, or from any other current Training Package or accredited course.

Packaging Rules for each specialisation:

- all Group A electives must be selected for award of the Diploma of Sport (Coaching)

- all Group A and Group B electives must be selected for award of the Diploma of Sport (Golf Professional)
- all Group C electives must be selected for award of the Diploma of Sport (Sport Development)
- all Group A and Group D electives must be selected for award of the Diploma of Sport (Swimming Coaching)
- all Group A and Group E electives must be selected for award of the Diploma of Sport (Equestrian Coaching).

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

### Core units

BSBOPS504	Manage business risk
HLTWHS003	Maintain work health and safety
SITXHRM003	Lead and manage people

### Elective units

#### Group A: Coaching

HLTAID011	Provide First Aid
SISSSCO003	Meet participant coaching needs
SISSSCO004	Plan, conduct and review coaching programs
SISSSCO007	Apply sport psychology principles
SISSSCO008	Apply anti-doping policies
SISSSCO011	Manage integrity in sport

#### Group B: Golf Professional

SISSGLF001	Coach advanced level golfers
SISSGLF004	Fit and alter golf equipment
SISSGLF005	Manage the structure and facilitation of golf competitions and tournaments
SISSGLF006	Participate in high performance golf tournaments

SISSGLF007          Manage on-course golf operations

### **Group C: Sport Development**

BSBTWK503          Manage meetings

SISXFIN001          Develop and review budgets for activities or projects

SISXIND008          Manage legal compliance in sport and recreation

SISXMGT001          Develop and maintain stakeholder relationships

### **Group D: Swimming Coaching**

SISSSWM003          Coach swimmers up to an elite level

### **Group E: Equestrian Coaching**

ACMPHR402          Manage horses to meet performance horse sport requirements

ACMPHR403          Evaluate equine training methodologies

ACMPHR505          Manage fitness in performance horses

SISSEQS003          Coach official national competition participants in equestrian

### **Group F: General electives**

ACMPHR503          Evaluate performance horse conformation

BSBHRM525          Manage recruitment and onboarding

BSBMKG541          Identify and evaluate marketing opportunities

BSBOPS502          Manage business operational plan

BSBOPS505          Manage organisational customer service

BSBPEF502          Develop and use emotional intelligence

CHCVOL004          Manage volunteer workforce development

PSPGEN085	Manage media relationships
SISOEQU012	Assess horses for sport or recreational performance
SISOEQU013	Condition horses for sport or recreational performance
SISOEQU014	Determine nutritional requirements for sport or recreational horses
SISOEQU015	Acquire and educate horses for sport or recreational programs
SISSSCO010	Implement sport talent identification programs
SISSSCO014	Develop sport coaches
SISSSCO016	Coach participants in sport competition
SISXADM001	Organise and supervise participant travel
SISXCAI005	Conduct individualised long-term training programs
SISXCAI008	Plan, conduct and review training and recovery programs
SISXFAC004	Coordinate facility and equipment acquisition and maintenance
SISXICT001	Select and use technology for sport, fitness and recreation work
SISXIND006	Conduct sport, fitness or recreation events
SISXIND007	Develop and implement participation strategies
SISXIND010	Protect children and young people
SITXMGT003	Manage projects

## Qualification Mapping Information

Supersedes and is equivalent to SIS50319 Diploma of Sport.

# SIS50419 Diploma of Outdoor Leadership

## Modification History

Not applicable.

## Qualification Description

This qualification reflects the role of highly skilled senior leaders or program, logistics and operations managers.

Senior leaders lead and supervise dependent participants in recreational activities and have a role in planning these activities. They are highly proficient in activity techniques and have well-developed leadership skills to manage group participation, cohesion, operational logistics, risk and significant problems as they arise.

Managers are involved in recreational program planning, implementation and evaluation, facility and equipment management, the leadership of personnel, and the operational management of a department or a small business.

All work with significant autonomy, using initiative and judgement to analyse and solve complex problems, and to design systematic approaches to operational practices.

This qualification provides pathway to work for any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

28 units must be completed:

- 13 core units
- 15 elective units, consisting of:
  - all the units in any two Groups A to AE
  - the remaining elective units can be selected from Groups A to AE, Group AF, elsewhere in the SIS Training Package, or from any other current training package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

Electives which appear in *italics* have prerequisite units of competency, which are also listed within their appropriate group.

### Core units

HLTWH004	Manage work health and safety
PUAOPE013	Operate communications systems and equipment
SISOPLN002	Plan outdoor activity sessions
SISOPLN003	Develop outdoor recreation programs
SISOPLN004	Identify hazards, assess and control risks for outdoor recreation activities
SISOPLN005	Interpret weather and environmental conditions for outdoor recreation activities
SISOPLN006	Plan for minimal environmental impact
SISOPLN007	Manage risk for outdoor programs
SISXCAI006	Facilitate groups
SISXCCS002	Coordinate client service activities
SISXEMR002	Coordinate emergency responses
SISXIND005	Coordinate work teams or groups
SISXIND008	Manage legal compliance in sport and recreation

### Elective units

#### Group A Abseiling, Natural Surfaces, Multi pitch

SISOABS004	Abseil multi pitches, natural surfaces
SISOABS007	Establish ropes for multi pitch abseiling on natural surfaces
SISOABS010	Lead multi pitch abseiling activities on natural surfaces
SISOFLD006	Navigate in tracked environments
SISORSC002	Perform vertical rescues
SISORSC003	Perform complex vertical rescues

**Group B Bushwalking, Difficult Tracked Environments, Rivers**

SISOBWG002	Bushwalk in difficult tracked environments
SISOBWG004	Cross rivers during bushwalks
SISOBWG006	Lead bushwalks in difficult tracked environments
SISOFLD007	Navigate in difficult tracked environments

**Group C Bushwalking, Extremely Difficult Tracked and Untracked Environments**

SISOBWG003	Bushwalk in extremely difficult tracked and untracked environments
SISOBWG004	Cross rivers during bushwalks
SISOBWG007	Lead bushwalks in extremely difficult tracked and untracked environments
SISOFLD008	Navigate in extremely difficult tracked and untracked environments

**Group D Canyoning, Easy to Intermediate**

SISOCAY001	Traverse canyons
SISOCAY002	Abseil in easy to intermediate canyons
SISOCAY004	Establish ropes and belays for abseils in easy to intermediate canyons
SISOCAY006	Lead canyoning activities, easy to intermediate canyons
SISOFLD007	Navigate in difficult tracked environments
SISORSC002	Perform vertical rescues

**Group E Canyoning, Intermediate to Advanced**

SISOCAY001	Traverse canyons
SISOCAY003	Abseil in intermediate to advanced canyons
SISOCAY005	Establish ropes and belays for abseils in intermediate to advanced canyons
SISOCAY007	Lead canyoning activities, intermediate to

advanced canyons

SISOFLD007 Navigate in difficult tracked environments

SISORSC002 Perform vertical rescues

SISORSC003 Perform complex vertical rescues

### **Group F Challenge Course, Low elements**

SISOABL002 Facilitate adventure-based learning activities

SISOCHC001 Lead challenge course sessions, low elements

*SISOCHC002 Set up and supervise challenge course sessions, low elements*

SISOCHC005 Manage challenge course

SISXFAC004 Coordinate facility and equipment acquisition and maintenance

### **Group G Challenge Course, High elements**

SISOABL002 Facilitate adventure-based learning activities

SISOCHC003 Lead challenge course sessions, high elements

*SISOCHC004 Set up and supervise challenge course sessions, high elements*

SISOCHC005 Manage challenge course

SISXFAC004 Coordinate facility and equipment acquisition and maintenance

### **Group H Climbing, Natural Surfaces, Top Rope**

SISOCLM002 Top rope climb single pitches, natural surfaces

SISOCLM006 Establish belays for single pitch climbing on natural surfaces

SISOCLM009 Lead single pitch climbing activities on natural surfaces, top rope climbing

SISOFLD006 Navigate in tracked environments

SISORSC002 Perform vertical rescues

### **Group I Climbing, Natural Surfaces, Lead, Single Pitch**

SISOCLM003	Lead climb single pitches, natural surfaces
SISOCLM006	Establish belays for single pitch climbing on natural surfaces
SISOCLM010	Lead single pitch climbing activities on natural surfaces, lead climbing
SISOFLD006	Navigate in tracked environments
SISORSC002	Perform vertical rescues

### **Group J Climbing, Natural Surfaces, Lead, Multi Pitch**

SISOCLM004	Lead climb multi pitches, natural surfaces
SISOCLM007	Establish belays for multi pitch climbing on natural surfaces
SISOCLM011	Lead multi pitch climbing activities on natural surfaces, lead climbing
SISOFLD007	Navigate in difficult tracked environments
SISORSC002	Perform vertical rescues
SISORSC003	Perform complex vertical rescues

### **Group K Canoeing, Moving Water**

SISOCNE002	Paddle a canoe on inland flatwater
SISOCNE003	Paddle a canoe on moving water up to grade 1 rivers
SISOCNE005	Lead canoeing activities on inland flatwater
SISOCNE006	Lead canoeing activities on moving water up to grade 1 rivers
SISOFLD006	Navigate in tracked environments

### **Group L Canoeing, White Water**

SISOCNE004	Paddle a canoe on grade 2 rivers
SISOCNE007	Lead canoeing activities on grade 2 rivers
SISOFLD006	Navigate in tracked environments

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

### **Group M Cycle Touring, On Road**

SISOCYT001 Set up, maintain and repair bicycles

SISOCYT003 Ride bicycles on roads, up to moderate terrain and heavy traffic

SISOCYT007 Lead cycling activities on roads, up to moderate terrain and heavy traffic

TLIH3002 Plan and navigate routes

### **Group N Cycle Touring, Off Road Intermediate Trails**

SISOCYT001 Set up, maintain and repair bicycles

SISOCYT005 Ride off road bicycles on intermediate trails

SISOCYT009 Lead off road cycling activities on intermediate trails

SISOFLD007 Navigate in difficult tracked environments

### **Group O Four Wheel Driving**

FWPCOT3260 Recover four wheel drive vehicles

FWPFGM3214 Operate a four wheel drive in a towing situation

MSS024023 Navigate in urban, regional and remote areas

SISODRV002 Lead four wheel driving activities

TLIB0002 Carry out vehicle inspection

TLIB2003 Carry out vehicle servicing and maintenance

TLIC2025 Operate four wheel drive vehicle

### **Group P Horse Trail Riding, Untracked**

RGRPSH308 Provide first aid and emergency care for horses or other equines

SISOEQU001 Handle horses

<i>SISOEQU002</i>	<i>Ride horses using fundamental skills</i>
<i>SISOEQU004</i>	<i>Ride horses on untracked trail rides</i>
<i>SISOEQU006</i>	<i>Guide horse trail rides in untracked areas</i>
SISOEQU010	Identify hazards, assess and control safety risks for horse handling and riding activities
<i>SISOEQU011</i>	<i>Manage horse illness and injury in remote areas</i>
SISOFD008	Navigate in extremely difficult tracked and untracked environments

### **Group Q Horse Handling and Riding Instruction, Advanced**

SISOEQU001	Handle horses
<i>SISOEQU007</i>	<i>Instruct horse handling skills</i>
<i>SISOEQU008</i>	<i>Instruct fundamental horse riding skills</i>
<i>SISOEQU009</i>	<i>Instruct the advancement of recreational horse riding skills</i>
SISOEQU010	Identify hazards, assess and control safety risks for horse handling and riding activities

### **Group R Horse Care**

RGRPSH308	Provide first aid and emergency care for horses or other equines
SISOEQU014	Determine nutritional requirements for sport or recreational horses
ACMHBR310	Prevent and treat equine injury and disease

### **Group S Horse Management**

SISOEQU001	Handle horses
SISOEQU010	Identify hazards, assess and control safety risks for horse handling and riding activities
<i>SISOEQU012</i>	<i>Assess horses for sport or recreational performance</i>
<i>SISOEQU013</i>	<i>Condition horses for sport or recreational performance</i>

*SISOEQ014 Determine nutritional requirements for sport or recreational horses*

*SISOEQ015 Acquire and educate horses for sport or recreational programs*

### **Group T Kayaking, Moving Water**

SISOFLD006 Navigate in tracked environments

SISOKYK001 Paddle a kayak on inland flatwater

SISOKYK002 Paddle a kayak on moving water up to grade 1 rivers

SISOKYK005 Lead kayaking activities on inland flatwater

SISOKYK006 Lead kayaking activities on moving water up to grade 1 rivers

### **Group U Kayaking, White Water, Grade 2 Rivers**

SISOFLD006 Navigate in tracked environments

SISOKYK003 Paddle a kayak on grade 2 rivers

SISOKYK007 Lead kayaking activities on grade 2 rivers

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

### **Group V Kayaking, White Water, Grade 3 Rivers**

SISOFLD006 Navigate in tracked environments

SISOKYK004 Paddle a kayak on grade 3 rivers

SISOKYK008 Lead kayaking activities on grade 3 rivers

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

*SISORSC006 Lead and participate in complex white water rescues*

### **Group W Sea Kayaking**

SISOFLD005 Navigate waterway courses

SISOKYS001	Paddle a sea kayak in enclosed waters
SISOKYS002	Paddle a sea kayak in sheltered coastal waters
SISOKYS004	Lead sea kayaking activities in enclosed waters
SISOKYS005	Lead sea kayaking activities in sheltered coastal waters

### **Group X Sea Kayaking, Exposed Waters**

MARO003	Transmit and receive information by the global maritime distress and safety system
SISOFLD005	Navigate waterway courses
SISOKYS003	Paddle a sea kayak in exposed coastal waters
SISOKYS006	Lead sea kayaking activities in exposed coastal waters

### **Group Y Rafting, Grade 3 Rivers**

SISOFLD006	Navigate in tracked environments
SISORAF002	Guide a raft on grade 3 rivers
SISORAF005	Lead rafting activities on grade 3 rivers
SISORSC004	Self rescue in white water
<i>SISORSC005</i>	<i>Rescue others in white water</i>
<i>SISORSC006</i>	<i>Lead and participate in complex white water rescues</i>

### **Group Z Rafting, Grade 4 Rivers**

SISOFLD006	Navigate in tracked environments
SISORAF003	Guide a raft on grade 4 rivers
SISORAF006	Lead rafting activities on grade 4 rivers
SISORSC004	Self rescue in white water
<i>SISORSC005</i>	<i>Rescue others in white water</i>
<i>SISORSC006</i>	<i>Lead and participate in complex white water rescues</i>

**Group AA SCUBA Dive using Enriched Air Nitrox**

SISOSCB001	SCUBA dive in open water to a maximum depth of 18 metres
SISOSCB007	Inspect and fill SCUBA cylinders
<i>SISOSCB008</i>	<i>SCUBA dive using Enriched Air Nitrox</i>

**Group AB SCUBA Specialist Dives**

SISOSCB001	SCUBA dive in open water to a maximum depth of 18 metres
<i>SISOSCB003</i>	<i>SCUBA dive at night</i>
SISOSCB005	Complete underwater search and recovery dives
<i>SISOSCB009</i>	<i>SCUBA dive to depths between 18 and 40 metres</i>
SISOSCB011	Lead specialised SCUBA diving activities

**Group AC Ski Touring**

SISOFD008	Navigate in extremely difficult tracked and untracked environments
SISOSKT002	Ski on intermediate cross country terrain
SISOSKT003	Use snow craft skills for alpine touring
SISOSKT005	Lead skiing activities on intermediate cross country terrain

**Group AD Surfing, Intermediate**

SISORSC007	Perform basic surf rescues
SISOSRF002	Surf waves using intermediate manoeuvres
SISOSRF005	Lead surfing activities, intermediate manoeuvres

**Group AE Surfing, Advanced**

SISORSC007	Perform basic surf rescues
SISOSRF003	Surf waves using advanced manoeuvres
SISOSRF006	Lead surfing activities, advanced manoeuvres

**Group AF General electives**

ACMPHR407	Implement an equine facility maintenance, improvement and management program
BSBCRT301	Develop and extend critical and creative thinking skills
BSBHRM501	Manage human resource services
BSBLDR511	Develop and use emotional intelligence
BSBMGT622	Manage resources
BSBMKG507	Interpret market trends and developments
BSBWOR501	Manage personal work priorities and professional development
BSBWOR502	Lead and manage team effectiveness
CHCCCS019	Recognise and respond to crisis situations
CHCCDE002	Develop and implement community programs
CHCGRP002	Plan and conduct group activities
CHCPRT002	Support the rights and safety of children and young people
CHCVOL004	Manage volunteer workforce development
CHCYTH001	Engage respectfully with young people
CHCYTH004	Respond to critical situations
CHCYTH005	Develop and implement procedures to enable young people to address their needs
FNSORG501	Develop and manage a budget
HLTAID003	Provide first aid
MEM50008	Carry out trip preparation and planning
MEM50009	Safely operate a mechanically powered recreational boat
MEM50010	Respond to boating emergencies and incidents

SISCAQU002	Perform basic water rescues
SISCAQU007	Perform advanced water rescues
SISOABL003	Design adventure-based learning programs
SISOFLD003	Select, set up and operate a temporary or overnight site
<i>SISOFLD004</i>	<i>Provide first aid in remote locations</i>
SISORSC001	Conduct search and rescue
<i>SISOSCB002</i>	<i>SCUBA dive from boats</i>
SISXDIS001	Facilitate inclusion for people with a disability
SISXDIS002	Plan and conduct disability programs
SISXFAC005	Manage stock supply and purchase
SISXHRM001	Recruit and manage volunteers
SISXIND003	Maintain legal knowledge for organisation governance
SISXIND010	Protect children and young people
SISXMGT001	Develop and maintain stakeholder relationships
SISXRES001	Conduct sustainable work practices in open spaces
SITTGDE004	Lead tour groups
SITTGDE005	Prepare and present tour commentaries or activities
SITTGDE006	Develop and maintain the general and regional knowledge required by guides
SITTGDE007	Research and share general information on Australian Indigenous cultures
SITTGDE008	Prepare specialised interpretive content on flora, fauna and landscape
SITTGDE009	Prepare specialised interpretive content on marine environments
SITTGDE010	Prepare specialised interpretive content on cultural

	and heritage environments
SITTGDE011	Coordinate and operate tours
SITTGDE012	Manage extended touring programs
SITTPPD002	Develop interpretive activities
SITTPPD008	Develop tourism products
SITTPPD009	Develop environmentally sustainable tourism operations
SITTPPD010	Develop culturally appropriate tourism operations
TAEASS401	Plan assessment activities and processes
TAEASS402	Assess competence
TAEASS403	Participate in assessment validation
TAEASS502	Design and develop assessment tools
TAEDEL301	Provide work skill instruction
TAEDEL404	Mentor in the workplace

# SIS50421 Diploma of Outdoor Leadership

## Modification History

Not applicable.

## Qualification Description

This qualification reflects the role of highly skilled senior leaders or program, logistics and operations managers.

Senior leaders lead and supervise dependent participants in recreational activities and have a role in planning these activities. They are highly proficient in activity techniques and have well-developed leadership skills to manage group participation, cohesion, operational logistics, risk and significant problems as they arise.

Managers are involved in recreational program planning, implementation and evaluation, facility and equipment management, the leadership of personnel, and the operational management of a department or a small business.

All work with significant autonomy, using initiative and judgement to analyse and solve complex problems, and to design systematic approaches to operational practices.

This qualification provides pathway to work for any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

The skills in this qualification must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this qualification at the time of publication.

## Entry Requirements

There are no entry requirements for this qualification.

## Packaging Rules

28 units must be completed:

- 13 core units
- 15 elective units, consisting of:
  - all the units in any two Groups A to AE
  - the remaining elective units can be selected from Groups A to AE, Group AF, elsewhere in the SIS Training Package, or from any other current training package or accredited course.

The selection of electives must be guided by the job outcome sought, local industry requirements and the complexity of skills appropriate to the AQF level of this qualification.

Electives which appear in *italics* have prerequisite units of competency, which are also listed within their appropriate group.

### **Core units**

- HLTWHS004 Manage work health and safety
- PUAOPE013 Operate communications systems and equipment
- SISOPLN002 Plan outdoor activity sessions
- SISOPLN003 Develop outdoor recreation programs
- SISOPLN004 Identify hazards, assess and control risks for outdoor recreation activities
- SISOPLN005 Interpret weather and environmental conditions for outdoor recreation activities
- SISOPLN006 Plan for minimal environmental impact
- SISOPLN007 Manage risk for outdoor programs
- SISXCAI006 Facilitate groups
- SISXCCS002 Coordinate client service activities
- SISXEMR002 Coordinate emergency responses
- SISXIND005 Coordinate work teams or groups
- SISXIND008 Manage legal compliance in sport and recreation

### **Elective units**

#### **Group A Abseiling, Natural Surfaces, Multi pitch**

- SISOABS004 Abseil multi pitches, natural surfaces
- SISOABS007 Establish ropes for multi pitch abseiling on natural surfaces
- SISOABS010 Lead multi pitch abseiling activities on natural surfaces
- SISOFLD006 Navigate in tracked environments
- SISORSC002 Perform vertical rescues

SISORSC003 Perform complex vertical rescues

### **Group B Bushwalking, Difficult Tracked Environments, Rivers**

SISOBWG002 Bushwalk in difficult tracked environments

SISOBWG004 Cross rivers during bushwalks

SISOBWG006 Lead bushwalks in difficult tracked environments

SISOFLD007 Navigate in difficult tracked environments

### **Group C Bushwalking, Extremely Difficult Tracked and Untracked Environments**

SISOBWG003 Bushwalk in extremely difficult tracked and untracked environments

SISOBWG004 Cross rivers during bushwalks

SISOBWG007 Lead bushwalks in extremely difficult tracked and untracked environments

SISOFLD008 Navigate in extremely difficult tracked and untracked environments

### **Group D Canyoning, Easy to Intermediate**

SISOCAY001 Traverse canyons

SISOCAY002 Abseil in easy to intermediate canyons

SISOCAY004 Establish ropes and belays for abseils in easy to intermediate canyons

SISOCAY006 Lead canyoning activities, easy to intermediate canyons

SISOFLD007 Navigate in difficult tracked environments

SISORSC002 Perform vertical rescues

### **Group E Canyoning, Intermediate to Advanced**

SISOCAY001 Traverse canyons

SISOCAY003 Abseil in intermediate to advanced canyons

SISOCAY005 Establish ropes and belays for abseils in intermediate to advanced canyons

SISOCAY007 Lead canyoning activities, intermediate to advanced canyons

SISOFLD007 Navigate in difficult tracked environments

SISORSC002 Perform vertical rescues

SISORSC003 Perform complex vertical rescues

### **Group F Challenge Course, Low elements**

SISOABL002 Facilitate adventure-based learning activities

SISOCHC001 Lead challenge course sessions, low elements

*SISOCHC002 Set up and supervise challenge course sessions, low elements*

SISOCHC005 Manage challenge course

SISXFAC004 Coordinate facility and equipment acquisition and maintenance

### **Group G Challenge Course, High elements**

SISOABL002 Facilitate adventure-based learning activities

SISOCHC003 Lead challenge course sessions, high elements

*SISOCHC004 Set up and supervise challenge course sessions, high elements*

SISOCHC005 Manage challenge course

SISXFAC004 Coordinate facility and equipment acquisition and maintenance

### **Group H Climbing, Natural Surfaces, Top Rope**

SISOCLM002 Top rope climb single pitches, natural surfaces

SISOCLM006 Establish belays for single pitch climbing on natural surfaces

SISOCLM009 Lead single pitch climbing activities on natural surfaces, top rope climbing

SISOFLD006 Navigate in tracked environments

SISORSC002 Perform vertical rescues

**Group I Climbing, Natural Surfaces, Lead, Single Pitch**

- SISOCLM003 Lead climb single pitches, natural surfaces
- SISOCLM006 Establish belays for single pitch climbing on natural surfaces
- SISOCLM010 Lead single pitch climbing activities on natural surfaces, lead climbing
- SISOFLD006 Navigate in tracked environments
- SISORSC002 Perform vertical rescues

**Group J Climbing, Natural Surfaces, Lead, Multi Pitch**

- SISOCLM004 Lead climb multi pitches, natural surfaces
- SISOCLM007 Establish belays for multi pitch climbing on natural surfaces
- SISOCLM011 Lead multi pitch climbing activities on natural surfaces, lead climbing
- SISOFLD007 Navigate in difficult tracked environments
- SISORSC002 Perform vertical rescues
- SISORSC003 Perform complex vertical rescues

**Group K Canoeing, Moving Water**

- SISOCNE002 Paddle a canoe on inland flatwater
- SISOCNE003 Paddle a canoe on moving water up to grade 1 rivers
- SISOCNE005 Lead canoeing activities on inland flatwater
- SISOCNE006 Lead canoeing activities on moving water up to grade 1 rivers
- SISOFLD006 Navigate in tracked environments

**Group L Canoeing, White Water**

- SISOCNE004 Paddle a canoe on grade 2 rivers
- SISOCNE007 Lead canoeing activities on grade 2 rivers
- SISOFLD006 Navigate in tracked environments

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

### **Group M Cycle Touring, On Road**

SISOCYT001 Set up, maintain and repair bicycles

SISOCYT003 Ride bicycles on roads, up to moderate terrain and heavy traffic

SISOCYT007 Lead cycling activities on roads, up to moderate terrain and heavy traffic

TLIH3002 Plan and navigate routes

### **Group N Cycle Touring, Off Road Intermediate Trails**

SISOCYT001 Set up, maintain and repair bicycles

SISOCYT005 Ride off road bicycles on intermediate trails

SISOCYT009 Lead off road cycling activities on intermediate trails

SISOFLD007 Navigate in difficult tracked environments

### **Group O Four Wheel Driving**

FWPCOT3260 Recover four wheel drive vehicles

FWPFGM3214 Operate a four wheel drive in a towing situation

MSS024023 Navigate in urban, regional and remote areas

SISODRV002 Lead four wheel driving activities

TLIB0002 Carry out vehicle inspection

TLIB2003 Carry out vehicle servicing and maintenance

TLIC2025 Operate four wheel drive vehicle

### **Group P Horse Trail Riding, Untracked**

RGRPSH308 Provide first aid and emergency care for horses or other equines

SISOEQU001 Handle horses

*SISOEQU002 Ride horses using fundamental skills*

*SISOEQU004 Ride horses on untracked trail rides*

*SISOEQU006 Guide horse trail rides in untracked areas*

SISOEQU010 Identify hazards, assess and control safety risks for horse handling and riding activities

*SISOEQU011 Manage horse illness and injury in remote areas*

SISOFD008 Navigate in extremely difficult tracked and untracked environments

### **Group Q Horse Handling and Riding Instruction, Advanced**

SISOEQU001 Handle horses

SISOEQU007 Instruct horse handling skills

SISOEQU008 Instruct fundamental horse riding skills

SISOEQU009 Instruct the advancement of recreational horse riding skills

SISOEQU010 Identify hazards, assess and control safety risks for horse handling and riding activities

### **Group R Horse Care**

ACMHBR310 Prevent and treat equine injury and disease

RGRPSH308 Provide first aid and emergency care for horses or other equines

SISOEQU014 Determine nutritional requirements for sport or recreational horses

### **Group S Horse Management**

SISOEQU001 Handle horses

SISOEQU010 Identify hazards, assess and control safety risks for horse handling and riding activities

SISOEQU012 Assess horses for sport or recreational performance

SISOEQU013 Condition horses for sport or recreational performance

SISOEQU014 Determine nutritional requirements for sport or recreational horses

SISOEQU015 Acquire and educate horses for sport or recreational programs

### **Group T Kayaking, Moving Water**

SISOFLD006 Navigate in tracked environments

SISOKYK001 Paddle a kayak on inland flatwater

SISOKYK002 Paddle a kayak on moving water up to grade 1 rivers

SISOKYK005 Lead kayaking activities on inland flatwater

SISOKYK006 Lead kayaking activities on moving water up to grade 1 rivers

### **Group U Kayaking, White Water, Grade 2 Rivers**

SISOFLD006 Navigate in tracked environments

SISOFLD006 Navigate in tracked environments

SISOKYK003 Paddle a kayak on grade 2 rivers

SISOKYK007 Lead kayaking activities on grade 2 rivers

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

### **Group V Kayaking, White Water, Grade 3 Rivers**

SISOFLD006 Navigate in tracked environments

SISOKYK004 Paddle a kayak on grade 3 rivers

SISOKYK008 Lead kayaking activities on grade 3 rivers

SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

*SISORSC006 Lead and participate in complex white water rescues*

**Group W Sea Kayaking**

- SISOFLD005 Navigate waterway courses
- SISOKYS001 Paddle a sea kayak in enclosed waters
- SISOKYS002 Paddle a sea kayak in sheltered coastal waters
- SISOKYS004 Lead sea kayaking activities in enclosed waters
- SISOKYS005 Lead sea kayaking activities in sheltered coastal waters

**Group X Sea Kayaking, Exposed Waters**

- SISOFLD005 Navigate waterway courses
- SISOKYS003 Paddle a sea kayak in exposed coastal waters
- SISOKYS006 Lead sea kayaking activities in exposed coastal waters

**Group Y Rafting, Grade 3 Rivers**

- SISOFLD006 Navigate in tracked environments
- SISORAF002 Guide a raft on grade 3 rivers
- SISORAF005 Lead rafting activities on grade 3 rivers
- SISORSC004 Self rescue in white water
- SISORSC005 Rescue others in white water*
- SISORSC006 Lead and participate in complex white water rescues*

**Group Z Rafting, Grade 4 Rivers**

- SISOFLD006 Navigate in tracked environments
- SISORAF003 Guide a raft on grade 4 rivers
- SISORAF006 Lead rafting activities on grade 4 rivers
- SISORSC004 Self rescue in white water

*SISORSC005 Rescue others in white water*

*SISORSC006 Lead and participate in complex white water rescues*

### **Group AA SCUBA Dive using Enriched Air Nitrox**

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

SISOSCB007 Inspect and fill SCUBA cylinders

*SISOSCB008 SCUBA dive using Enriched Air Nitrox*

### **Group AB SCUBA Specialist Dives**

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

*SISOSCB003 SCUBA dive at night*

SISOSCB005 Complete underwater search and recovery dives

*SISOSCB009 SCUBA dive to depths between 18 and 40 metres*

SISOSCB011 Lead specialised SCUBA diving activities

### **Group AC Ski Touring**

SISOFLD008 Navigate in extremely difficult tracked and untracked environments

SISOSKT002 Ski on intermediate cross country terrain

SISOSKT003 Use snow craft skills for alpine touring

SISOSKT005 Lead skiing activities on intermediate cross country terrain

### **Group AD Surfing, Intermediate**

SISORSC007 Perform basic surf rescues

SISOSRF002 Surf waves using intermediate manoeuvres

SISOSRF005 Lead surfing activities, intermediate manoeuvres

**Group AE Surfing, Advanced**

SISORSC007 Perform basic surf rescues

SISOSRF003 Surf waves using advanced manoeuvres

SISOSRF006 Lead surfing activities, advanced manoeuvres

**Group AF General electives**

ACMPHR407 Implement an equine facility maintenance, improvement and management program

BSBCRT311 Apply critical thinking skills in a team environment

BSBHRM527 Coordinate human resource functions and processes

BSBMKG543 Plan and interpret market research

BSBOPS501 Manage business resources

BSBPEF501 Manage personal and professional development

BSBPEF502 Develop and use emotional intelligence

# SISFFIT032 Complete pre-exercise screening and service orientation

## Modification History

Supersedes and is not equivalent to SISFFIT001 Provide health screening and fitness orientation.

## Application

This unit describes the performance outcomes, skills and knowledge required to screen clients for participation in exercise programs and to provide general advice about programs and services suitable to clients.

It requires the ability to utilise industry standard pre-exercise screening systems, questionnaires and guidelines to collect and evaluate health information, and to determine suitable levels of exercise intensity for clients. This includes determining risk factors and providing referrals to medical or allied health professionals for guidance.

Screening may occur prior to clients beginning an exercise program, before changes to programs and when their health status changes. Outcomes are used by fitness instructors to plan client programs. Skills for planning are covered in complementary units.

This unit applies to group fitness instructors, gym instructors and personal trainers. It can also apply to other fitness facility staff members who screen clients and provide service information prior to clients participating in exercise activities. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes, and outdoor locations, depending on their job role.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Fitness

## Unit Sector

Fitness

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |  |
|--|--|
| <p>1. Screen clients for participation in exercise programs.</p> | <p>1.1. Consult with client to identify reasons for exercise participation and identify client needs and preferences.</p> <p>1.2. Question client to identify current and past participation in physical activities.</p> <p>1.3. Explain to client purpose of pre-exercise screening processes in identifying risks for participating in exercise programs.</p> <p>1.4. Assist client to complete industry standard pre-exercise screening questionnaire.</p> <p>1.5. Collect and record accurate client data and basic body measurements, with informed client consent.</p> |
| <p>2. Evaluate outcomes of screening.</p>                        | <p>2.1. Identify and evaluate client health risk factors using screening system guidelines and within boundaries of fitness industry scope of practice.</p> <p>2.2. Use screening system risk assessment guidelines to identify risks for client participation in exercise programs.</p> <p>2.3. Discuss outcomes of screening with client and provide information about suitable levels of exercise intensity.</p> <p>2.4. Determine need for guidance from medical and allied health professionals and discuss appropriate action with client.</p>                         |
| <p>3. Provide client referrals.</p>                              | <p>3.1. Explain referral process and confidentiality procedures to client and obtain informed client consent to share health information.</p> <p>3.2. Compile relevant, accurate and concise information for inclusion in referral.</p> <p>3.3. Document and provide referral information to relevant medical and allied health professionals according to client needs.</p>   |
| <p>4. Provide exercise service information.</p>                  | <p>4.1. Describe available programs, services and facilities relevant to client needs and preferences.</p> <p>4.2. Actively engage with client to explain the features, general benefits and health benefits of different services.</p> <p>4.3. Provide advice on suitability of exercise programs for client, according to outcomes of screening.</p> <p>4.4. Remind clients identified as requiring medical or allied</p>  |

health professional guidance of the requirement to obtain that guidance prior to participation.

- 4.5. Document accurate details of screening outcomes, referral details and advice provided.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret information of varying complexity in pre-exercise screening questionnaires and guidelines, including health terminology, directions for use and flow charts.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>use fundamental sentence structure to complete forms and referral letters that require factual and subjective information</li> <li>use drafting and proofreading strategies to construct logically sequenced referral information and ensure accuracy of spelling and grammar.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>ask open and closed probe questions and actively listen to elicit information from clients and to determine client understanding of information provided</li> <li>assist client understanding of screening process and questionnaire content using plain language and terms easily understood.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret sometimes complex numerical information in screening questionnaires and guidelines including symbols, abbreviations, percentages, weights, volumes, ratios and pressures</li> <li>take, discuss and record accurate basic body measurements involving blood pressure, weight, height, and length</li> <li>complete and record calculations involving addition, subtraction, multiplication, division percentages and ratios.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>critically analyse client health information to determine significance of risk factors and referral needs.</li> </ul>

## Unit Mapping Information

# Assessment Requirements for SISFFIT032 Complete pre-exercise screening and service orientation

## Modification History

Supersedes and is not equivalent to SISFFIT001 Provide health screening and fitness orientation.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role and:

- complete a pre-exercise screening and service orientation for three different clients including:
  - a female adult
  - a male adult
  - a client aged 55 years or over
- for each of the above three clients:
  - identify exercise needs and preferences
  - determine health risk factors for exercise participation using industry standard screening questionnaire and guidelines
  - measure and record resting blood pressure
  - take and record accurate basic body measurements:
    - weight in kilograms
    - height in metres
    - waist circumference in centimetres
    - body mass index
  - explain features and benefits of available programs, services and facilities that meet the client's needs and preferences
  - provide advice on suitability of exercise intensity and types of programs, according to the outcomes of their screening
  - accurately document details of client contact including screening outcomes and advice provided
- according to actual client interactions or case studies:
  - identify two clients with risk factors that require referral to medical or allied health professionals
  - document informed consent to share health information for each of the two clients
  - prepare accurate referral documentation for each of the two clients to obtain guidance from medical or allied health professionals for exercise participation and prescription.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key legal obligations and procedures for maintaining confidentiality of client information including requirements for the collection, use, maintenance and secure storage of private information, particularly sensitive health information
- boundaries and responsibilities of fitness instructors in completing pre-exercise screenings, determining health risks and providing exercise prescription
- how pre-exercise screening and referral of at-risk clients relate to duty of care
- aims of pre-exercise screening processes and importance of implementing at different times:
  - prior to clients beginning an exercise program from sedentary and low exercise levels
  - prior to significant exercise program changes
  - when client's personal health status changes significantly
  - when assuming exercise programming responsibility for a client previously screened by others
- industry standard pre-exercise screening questionnaires and guidelines:
  - format and inclusions
  - purpose of different stages of screening questionnaires
  - how to use to identify and evaluate client health risk factors
  - circumstances indicating need for referral to medical and allied health professionals
- health risk factors to be considered in screening clients for participation in exercise programs, why these factors are important, and how single and multiple factors contribute to assessment outcomes:
  - chronic disease in client and family history of disease:
    - cardiovascular disease including coronary heart disease and stroke
    - chronic obstructive pulmonary disease (COPD)
    - asthma
    - metabolic disease including diabetes mellitus
    - musculoskeletal disorders
  - adverse responses to physical activity including chest pain and dizziness
  - hypertension and hypotension
  - high cholesterol
  - high blood sugar
  - muscle, bone, tendon, ligament and joint injuries, pain and problems, including diagnosed and of significant concern
  - use of and reasons for prescribed medications
  - reasons for hospital admissions during previous year
  - body composition including underweight, overweight and obesity
  - antenatal and post-natal general issues and conditions
  - smoking

- role of medical and allied health professionals and their area of expertise in providing guidance for client exercise participation and prescription:
  - general practitioners (GPs)
  - rehabilitation physicians
  - sports physicians
  - physiotherapists
  - accredited exercise physiologists
  - accredited practising dietitians
- essential information included in referrals:
  - fitness instructor and facility details
  - client details
  - client consent for release of health information
  - reasons for referral
  - guidance being sought
  - copy of completed pre-exercise screening tool
- how to locate, use and adapt template referral letters
- legal and ethical obligations of obtaining and documenting informed consent from clients to:
  - share screening information with medical and allied health professions
  - authorise medical and allied health professionals to release health information to fitness instructors
- how to tailor consent documentation according to a client's instructions when they choose to limit information to be released to and from medical and allied health professionals
- how to take basic body measurement techniques recorded for screening and how to calculate body mass index (BMI):
  - weight in kilograms
  - height in metres
  - waist circumference in centimetres
- blood pressure and how to operate a blood pressure monitor
- features and benefits of different types of services offered by fitness facilities:
  - group classes
  - programs, advice and support provided by gym instructors
  - personalised exercise programming and instruction by personal trainers
  - supplementary services offered to promote health and wellbeing
- overview of the health benefits of exercise activities, and examples of exercise classes that feature:
  - cardiovascular exercises
  - resistance exercises
  - flexibility exercises
  - high impact exercise
  - low impact exercise.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

Assessment must ensure the use of:

- interaction with clients; these can be:
  - clients in an industry workplace, or
  - individuals who participate in simulated activities used for the purpose of skills assessment
- blood pressure monitor
- weight scales
- tape measures which can include stadiometers for measuring height
- industry standard pre-exercise screening questionnaire and guidelines
- informed consent forms
- client record keeping forms
- template referral letters.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate III or IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## SISFFIT033 Complete client fitness assessments

### Modification History

Supersedes and is not equivalent to SISFFIT006 Conduct fitness appraisals.

### Application

This unit describes the performance outcomes, skills and knowledge required to assess current fitness capabilities of clients using information from industry standard pre-exercise screening as the starting point. It requires the ability to complete assessments using a range of activities and measurements and to document outcomes.

Assessment may occur prior to clients beginning an exercise program, before changes to programs and when their health status changes. Outcomes are used by fitness instructors to plan client programs. Skills for planning are covered in complementary units.

This unit applies to gym instructors and personal trainers, who work unsupervised when interacting with clients using discretion and judgement to provide individually tailored client assessments. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations, depending on their job role.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Elements and Performance Criteria

#### ELEMENTS

*Elements describe the essential outcomes*

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for fitness assessments.
  - 1.1. Review client pre-exercise screening and medical guidance documentation to identify relevant information for fitness assessment.
  - 1.2. Communicate purpose, benefits and scope of fitness assessment to client, and obtain client consent.
  - 1.3. Consult with client to identify their goals and preferences to inform fitness assessment.
  - 1.4. Build trust and rapport with client by using client-centred communication showing sensitivity and empathy during interactions.
  
2. Assess current fitness capabilities.
  - 2.1. Select assessment activities and exercise equipment suited to individual client profile.
  - 2.2. Demonstrate and explain correct techniques appropriate for the exercise activity.
  - 2.3. Use monitors and measuring equipment to take and record accurate client data.
  - 2.4. Use communication techniques that encourage and support the client during completion of activities.
  - 2.5. Monitor client during activities and immediately discontinue if signs and symptoms of exercise intolerance appear.
  - 2.6. Evaluate results to determine client's current fitness capabilities.
  - 2.7. Review client goals against assessment results and determine suggested changes.
  - 2.8. Accurately record assessment outcomes in client records.
  
3. Communicate assessment outcomes.
  - 3.1. Explain assessment results to client and the implications for client goals and exercise programs.
  - 3.2. Discuss and confirm adjustments to client goals and suggest options for exercise activities based on assessment outcomes and availability of fitness services.
  - 3.3. Identify and communicate, to client, need for guidance from medical and allied health professionals prior to client participation in exercise programs.
  - 3.4. Document and provide referral information to relevant medical and allied health professionals according to client needs and confidentiality procedures.
  - 3.5. Encourage and respond to client feedback and questions.
  - 3.6. Document assessment information in appropriate format to facilitate individual exercise program planning.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION

# Assessment Requirements for SISFFIT033 Complete client fitness assessments

## Modification History

Supersedes and is not equivalent to SISFFIT006 Conduct fitness appraisals.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete a fitness assessment of three different clients including:
  - a female adult
  - a male adult
  - a client aged 55 years or over
- for each of the above three clients:
  - measure heart rate at rest, during exercise and post exercise using a heart rate monitor
  - select and use client-appropriate activities to assess:
    - cardiovascular endurance
    - muscle strength
    - muscle endurance
    - flexibility
  - accurately record results in client records and prepare information to facilitate exercise program development
  - suggest two options for suitable exercise activities according to fitness assessment outcomes and client goals
- according to actual client interactions or case studies:
  - identify two clients with risk factors that require referral to medical or allied health professionals
  - prepare accurate referral documentation for each of the two clients to obtain guidance from medical or allied health professionals for exercise participation and prescription.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key legal obligations to maintain confidentiality of client information including requirements for the collection, use, maintenance and secure storage of private information, particularly sensitive health information
- boundaries and responsibilities of fitness instructors in completing fitness assessments and providing exercise prescription

- how fitness assessments and referral of at-risk clients relate to duty of care
- type of information provided by industry standard pre-exercise screening processes and implications for fitness assessments:
  - client needs and exercise preferences
  - client body measurements
  - contraindications and precautions for exercise including those provided by medical and allied health professionals
  - indicative recommended level of exercise intensity
- purpose of fitness assessments and benefits for clients and instructors
- key aspects of health-related components of fitness, methods used to assess these and how to interpret results:
  - cardiovascular endurance
  - muscle strength
  - muscle endurance
  - flexibility
- methods for measuring exercise intensity:
  - heart rate response
  - talk test
  - rated perceived exertion (RPE) scale
  - power output
- types of exercise equipment used for fitness assessments and how to complete assessments without using exercise equipment
- functions of heart rate monitors used for fitness assessments and how to operate
- meaning of exercise intolerance and common signs and symptoms
- fitness assessment situations and outcomes indicating the need for referral to medical and allied health professionals
- essential information included in referrals
- formats of client fitness assessment records and the types of information they include
- services available in the fitness industry that match different fitness levels and types of client goals.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

Assessment must ensure the use of:

- interaction with clients; these can be:
  - clients in an industry workplace, or
  - individuals who participate in simulated activities used for the purpose of skills assessment

- heart rate monitor
- template referral letters
- client records which include completed industry standard pre-exercise screening documentation.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate III or IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## SISFFIT034 Assess client movement and provide exercise advice

### Modification History

Supersedes and is not equivalent to SISFFIT018 Promote functional movement capacity.

### Application

This unit describes the performance outcomes, skills and knowledge required to assess movement capacity in individual clients and provide advice on exercises to achieve optimal movement and safe and effective exercise technique. While this assessment may be completed as a separate dedicated activity, outcomes and recommended exercises may then be integrated into overall fitness programs for individual clients.

Assessment and advice are provided to clients who do not have unstable health conditions, pain or injury identified through pre-exercise screening and fitness assessment. The unit does not include assessment for the purposes of providing advice or treatment of injury or disease. In this case the fitness instructor refers clients to relevant medical or allied health professionals.

This unit applies to personal trainers who work independently with clients using discretion and judgement to provide individually tailored client movement assessments. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces, and homes and outdoor locations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

#### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Establish client needs.
  - 1.1. Review outcomes of client pre-exercise screening and fitness assessment and identify relevant information for movement assessment.
  - 1.2. Consult with client to obtain information about their needs in relation to movement capacity.
  - 1.3. Build trust and rapport with client by using client-centred communication showing sensitivity and empathy during interactions.
  - 1.4. Provide clear explanations about the importance of effective dynamic posture and movement capacity during exercise within scope of the personal trainer role.
2. Assess client movement.
  - 2.1. Select movements and exercises based on individual client needs and provide clear and accurate instruction and demonstration.
  - 2.2. Observe client static postural alignment and identify deviations outside normal range that may affect movement.
  - 2.3. Observe client movement and range of movement and identify joint mobility and movement restrictions.
  - 2.4. Identify unsafe and ineffective dynamic posture, movement patterns and exercise technique.
  - 2.5. Identify client balance and stability limitations.
  - 2.6. Accurately record observations of client static and dynamic posture and movement.
3. Provide advice on exercises for optimal movement.
  - 3.1. Review outcomes of assessment and explain implications to client using language and visual aids when required to support client understanding.
  - 3.2. Identify and communicate need for guidance from medical and allied health professionals.
  - 3.3. Suggest and demonstrate exercises that promote movement, optimise exercise performance and reduce likelihood of injury.
  - 3.4. Ask client to complete exercises and advise on modifications to their technique and dynamic posture.
  - 3.5. Identify and advise client of unsuitable exercises and activities based on assessment outcomes.
  - 3.6. Document movement assessment outcomes and exercises in client records and integrate into broader client program development based on individual needs.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"><li>interpret sometimes unfamiliar information of varying complexity in client pre-exercise screening records, including health and fitness terminology and abbreviations</li><li>interpret potentially complex information about human anatomy, physiology and movement.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to summarise subjective information in client records and record factual outcomes of observations.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>ask open and closed probe questions and actively listen to elicit information from clients and to determine client understanding</li><li>explain information that includes anatomical and physiological references using terms that clients can understand</li><li>support verbal explanations using visual aids including diagrams and infographics.</li></ul>

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT018 Promote functional movement capacity.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

## Assessment Requirements for SISFFIT034 Assess client movement and provide exercise advice

### Modification History

Supersedes and is not equivalent to SISFFIT018 Promote functional movement capacity.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- assess the posture and movement capacity of three different clients including:
  - a female adult
  - a male adult
  - a client aged 55 years or over
- for each of the above three clients:
  - make observations about static posture using appropriate tools
  - assess dynamic posture, balance, movement quality and limitations
  - use the following movement patterns during assessment:
    - squat
    - lunge
    - hinge
    - horizontal push
    - horizontal pull
    - vertical push
    - vertical pull
    - rotation
  - explain assessment outcomes and accurately record results in client records
  - recommend and demonstrate three exercises to address identified issues
  - have client complete the three exercises and observe and modify technique as required to correct technique
  - consistently use client-centred communication during all interactions.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- client-centred communication techniques for establishing and building trust and rapport, and how they may vary depending on individual client characteristics

- scope of practice for a personal trainer in assessing movement and posture, and recommending exercises:
  - boundaries and responsibilities
  - relationship between fitness instructors and medical and allied health professionals in supporting optimum client movement
  - situations where referral to medical and allied health professional is required:
    - pain during movement and exercise
    - static postural deviations outside normal ranges
    - client inability to correct dynamic posture
    - restricted joint mobility, strength imbalance, and stability concern that is limiting function
- basic aspects of current and emerging evidence-based research about movement and postural alignment and the impacts on movement and exercise prescription
- static posture:
  - types of measuring tools and observations used for basic assessments
  - recommended alignment and ranges based on individual structural differences
- influences affecting dysfunctional movement patterns and exercise technique:
  - abnormalities of the musculoskeletal system including the spine
  - damage to bones and connective tissue including ligaments and cartilage
  - asymmetrical muscle tone
  - poor muscle endurance
  - poor muscle strength
  - locomotive gait including walking, jogging and running
- deviations in postural alignment outside of normal ranges and functional limitations that can occur at commencement, during, and on completion of exercise and movement:
  - spinal curvature including lordosis and kyphosis
  - scapula setting:
    - winging of scapula
    - anterior tipping and tilting
    - upward and downward rotation
  - hip and pelvis position:
    - anterior and posterior
    - internal and external rotation
  - knee alignment, varus and valgus
  - foot alignment:
    - rotation
    - pronation and supination
- relationship between the following postural variances and potential for injury, and injury prevention techniques when they are present:
  - excessive posterior and anterior pelvic tilt
  - genu varum and genu valgum

- hyperextension of knees
- increased pronation of foot and ankle complex
- increased supination of foot and ankle complex
- spinal curvature including lordosis and kyphosis
- lateral tilt of pelvis and head
- rotated patella
- rounded shoulders
- winging of scapula
- effective dynamic posture and correct execution for major foundational movement patterns:
  - squat
  - lunge
  - hinge
  - horizontal push
  - horizontal pull
  - vertical push
  - vertical pull
  - rotation
- normal range of movement for major joints and types of flexibility exercises that support improved range of movement
- characteristics of balance and types of exercises that support improved balance:
  - base of support
  - centre of gravity and factors that can cause changes to a person's centre of gravity:
    - age
    - pregnancy
    - being overweight
  - limits of stability
  - components of balance maintenance
  - balance disturbance and key causes.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

Assessment must ensure use of:

- interaction with clients; these can be:
  - clients in an industry workplace, or
  - individuals who participate in simulated activities used for the purpose of skills assessment

- measuring tools including at least two of the following: flexometers, goniometers, plurimeters, plumb lines, grids and tape measures
- still and video cameras which can be mobile phone based
- equipment for selected assessment exercises
- visual aids for explanation of movement and postures
- client records which include completed industry standard pre-exercise screening documentation.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## SISFFIT035 Plan group exercise sessions

### Modification History

Supersedes and is not equivalent to SISFFIT007 Instruct group exercise sessions, and SISFFIT023 Instruct group personal training programs.

### Application

This unit describes the performance outcomes, knowledge and skills required to plan group exercise sessions designed for participation by mixed ability groups, or by groups that predominately comprise a particular profile, for example, older people. It requires the ability to account for the participation of individuals from specific population groups and of diverse abilities and allow for modifications that can be made during instruction.

It covers skills for evaluating and improving sessions in response to participant and instructor feedback, noting that sessions might be delivered by self or others. Skills for instructing group exercise sessions are covered in a complementary unit.

Exercise sessions are diverse in nature. They could combine or specifically concentrate on cardiovascular, resistance and flexibility exercises, and be delivered with or without music.

This unit applies to group fitness instructors and personal trainers who use discretion and judgment when planning sessions to meet diverse participant needs. Instructors practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and other locations, depending on their role.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

### Competency Field

Fitness

### Unit Sector

Fitness

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |   |
|---|---|
| 1. Identify needs and expectations of diverse participants. | 1.1. Identify diverse reasons and goals for participation in group exercise sessions and evaluate how these can be accommodated in a group setting.<br>1.2. Identify characteristics, abilities and special needs of participants from specific population groups and determine ways that session inclusions can address needs.<br>1.3. Identify common injury and medical barriers for participation in group exercise sessions and determine how session inclusions can be modified.  |
| 2. Plan group exercise sessions.                            | 2.1. Determine type of session and fitness goals to be targeted.<br>2.2. Identify participant characteristics, abilities and fitness levels and determine group profile.<br>2.3. Select exercises, training techniques and exercise equipment that target identified fitness goals and suit the group profile.<br>2.4. Plan sessions that incorporate volume and intensity and load of exercises appropriate to group profile.<br>2.5. Plan for exercise phases and volume within boundaries of session duration.<br>2.6. Determine ways that exercise type and intensity and load can be modified during instruction to meet individual participant abilities and needs.<br>2.7. Document session plans according to organisational formats. |
| 3. Review and modify future sessions.                       | 3.1. Collate and review feedback provided by participants and instructors.<br>3.2. Identify successes, problems and difficulties with session delivery.<br>3.3. Modify and improve future sessions according to feedback.   |

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Writing skills to:
- produce detailed session plans that use fitness terminology and abbreviations for instructional use
  - use fundamental sentence structure to complete basic evaluation records that require factual and subjective information.
- Numeracy skills to:
- record and complete calculations and estimations of varying complexity for session plans involving times, intervals, volume, speeds and loads.
- Problem-solving skills to:
- critically evaluate successes and failures of sessions to initiate future improvements.

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT007 Instruct group exercise sessions, and SISFFIT023 Instruct group personal training programs.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for SISFFIT035 Plan group exercise sessions

## Modification History

Supersedes and is not equivalent to SISFFIT007 Instruct group exercise sessions, and SISFFIT023 Instruct group personal training programs.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document session plans for six group exercise sessions, each with a minimum duration of 45 minutes, and include:
  - at least one session for each of the following participant groups:
    - female adults
    - male adults
    - participants aged 55 years or over
  - across the above six sessions collectively incorporate the following:
    - cardiovascular exercises
    - resistance exercises
    - flexibility exercises
    - exercises with and without equipment
- for two sessions and according to actual feedback or case studies:
  - review feedback provided by group participants
  - evaluate instructor feedback
  - modify future session content, and document details of the evaluation and changes.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- common reasons and goals for people participating in group exercise sessions
- different types of group exercise classes typically offered by the following and how these relate to general consumer market preferences, expectations and goals:
  - fitness gyms
  - leisure and community centres
  - personal trainers
- general factors that affect session design:
  - venue type and layout

- availability of different types of exercise equipment
- session duration preferences of different group markets
- factors that affect session design for particular client groups and mixed groups:
  - physical differences that need to be considered for:
    - adults of different sexes
    - older people
    - antenatal, postnatal, menopausal and post-menopausal women
  - cultural needs and expectations
  - differing fitness levels, and whether coming from sedentary or active base
- for a range of common injuries, medical conditions, and health risk factors:
  - contraindications and precautions for different types of exercise sessions and exercises
  - how exercises, intensity and loads can be modified to allow safe participation by individuals with low risk injuries and health conditions
- the meaning of the following components of fitness and how exercises can target improvements for each:
  - health-related components:
    - cardiovascular endurance
    - muscle strength
    - muscle endurance
    - flexibility
    - body composition
  - skill-related components:
    - coordination
    - balance
    - reaction time
    - proprioception
- different types of exercises and equipment that can be used:
  - cardiovascular exercises:
    - continuous
    - interval
  - resistance exercises using:
    - free weights
    - gym equipment including weight machines
    - body weight
  - flexibility exercises:
    - dynamic
    - static
- how different types of exercises can be combined and sequenced for safety and optimum effectiveness in group exercise sessions

- how the FITT (frequency, intensity, time and type) principle is used to structure group exercise sessions
- established phases of exercise sessions, their underpinning rationale and timing for each within designated time of session:
  - warm up
  - main workout
  - cool down and stretches
- components of exercise sessions, and how they can be used effectively for goals targeted by group sessions:
  - exercise order
  - volume and intensity of exercises
  - repetitions and sets
  - repetition tempo
  - rest intervals
- training techniques that can be used in group exercise sessions, how they can be used, and considerations for their use:
  - supersets
  - interval training including high intensity interval training (HIIT)
  - circuit training
- considerations for choreographing and cueing sequences of movements and exercises for group exercise sessions
- considerations for the use of music in instruction of group exercise sessions:
  - licensing requirements
  - tempo of music suited to different phases of exercise sessions and types of movements and exercises
  - how different styles of music impact on participant motivation
- format and inclusions of documented group exercise session plans
- methods that can be used to evaluate effectiveness of group exercise sessions:
  - participant and instructor evaluation questionnaires and reports
  - discussions with instructors delivering sessions
  - self-evaluation
  - evaluation of complaints, problems and difficulties.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

Assessment must ensure the use of:

- information about the environment in which activities will be instructed to allow for appropriate session design

- template group exercise session plans
- template participant and instructor evaluation questionnaires and evaluation reports.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate III or IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## SISFFIT036 Instruct group exercise sessions

### Modification History

Supersedes and is not equivalent to SISFFIT007 Instruct group exercise sessions, SISFFIT009 Deliver pre-choreographed or prescribed community fitness, SISFFIT010 Deliver pre-choreographed or prescribed group exercise to music, SISFFIT011 Instruct approved community fitness programs, and SISFFIT023 Instruct group personal training programs.

### Application

This unit describes the performance outcomes, skills and knowledge required to prepare for and deliver land-based group exercise sessions according to predesigned session plans which may have been developed by self or others.

It requires the ability to use exercise instructional techniques, and cater for different participant needs, in a mixed ability group situation within the confines of session guidelines.

Skills for planning group exercise sessions are covered in a complementary unit.

Exercise sessions are diverse in nature. They could combine or specifically concentrate on cardiovascular, resistance and flexibility exercises, and be delivered with or without music.

This unit applies to group fitness instructors who work unsupervised when instructing groups, using discretion and judgement to solve routine problems and are guided by policies and procedures. It also applies to personal trainers working independently with groups. Instructors practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and other locations, depending on their role.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Fitness

### Unit Sector

Fitness

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for group session.

- 1.1. Check and prepare physical environment to meet session requirements and identify and respond to factors that may impact session delivery.
- 1.2. Prepare required physical resources and check for safety and serviceability.
- 1.3. Follow pre-exercise screening procedures and assess participant characteristics, condition and capability as they present through observation and verbal screening and provide required response.
- 1.4. Allocate exercise equipment to match participant characteristics and types of exercises.

2. Brief participants.

- 2.1. Provide clear safety information about environment, equipment and group spacing for exercises.
- 2.2. Explain participant responsibility to work within their capability and provide clear advice on contraindications and precautions for particular activities during session.
- 2.3. Introduce session and its basic components using communication suited to participant characteristics.

3. Deliver group exercise session.

- 3.1. Follow predesigned session structure and timings.
- 3.2. Use voice projection techniques suited to the environment and nature of exercise activity.
- 3.3. Combine clear and accurate verbal instructions and demonstrations for exercise technique.
- 3.4. Use group communication techniques that motivate participants to maintain active participation in the session.
- 3.5. Monitor participant technique and safety and provide feedback, encouragement and corrective instruction based on observations.
- 3.6. Facilitate effective group interaction to maintain group cohesion, engagement and safety.
- 3.7. Observe individual participants, respond to difficulties and modify their activities to suit needs and to ensure engagement and comfort.

4. Evaluate group session.
- 4.1. Seek and acknowledge feedback from participants and evaluate satisfaction with session.
  - 4.2. Evaluate own performance and identify areas for improvement.
  - 4.3. Complete session documentation and evaluation according to record keeping procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret sometimes unfamiliar session plans which include fitness terminology and abbreviations</li> <li>• interpret detailed familiar procedures for instructing and reporting on group exercise sessions.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• use fundamental sentence structure to record factual and subjective information in session documentation.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• provide clear and unambiguous information to participants using language and terms easily understood.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• follow and adjust session timings to meet requirements of session duration.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• critically evaluate successes and failures of sessions to contribute to improvements.</li> </ul>

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT007 Instruct group exercise sessions, SISFFIT009 Deliver pre-choreographed or prescribed community fitness, SISFFIT010 Deliver pre-choreographed or prescribed group exercise to music, SISFFIT011 Instruct approved community fitness programs, and SISFFIT023 Instruct group personal training programs.

## Links

# Assessment Requirements for SISFFIT036 Instruct group exercise sessions

## Modification History

Supersedes and is not equivalent to SISFFIT007 Instruct group exercise sessions, SISFFIT009 Deliver pre-choreographed or prescribed community fitness, SISFFIT010 Deliver pre-choreographed or prescribed group exercise to music, SISFFIT011 Instruct approved community fitness programs, and SISFFIT023 Instruct group personal training programs.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- instruct three predesigned group exercise sessions:
  - each with a minimum duration of 45 minutes
  - each with at least six participants
  - one group that is predominately comprised of female adults
  - one group that is predominately comprised of male adults
  - one group that is predominately comprised of participants aged 55 years or over
- across the above three sessions collectively, instruct:
  - cardiovascular exercises
  - resistance exercises
  - flexibility exercises
  - exercises with and without equipment
- for each of the above three sessions:
  - prepare environment and equipment
  - pre-screen participants for current condition
  - brief participants and provide safety information tailored to the environment and types of exercises
  - incorporate the following techniques:
    - optimal instructor positioning
    - clear verbal communication
    - optimal voice projection
    - combined explanation and demonstration of safe exercise technique
    - verbal and visual cueing
    - motivational communication
  - complete accurate session documentation and evaluation reports
- according to actual client interactions or case studies:

- identify two situations from pre-session screenings that require recommendations on exercise participation, explain exercise precautions and provide recommendations for modifications
- respond to two individuals showing signs of over exertion or difficulty, and modify their activities.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- procedures for:
  - pre-exercise screening of group participants
  - maintaining records for session delivery and evaluation
- environmental factors that may impact session delivery and how to respond:
  - noise
  - venue climate control and ventilation
- safety and serviceability checks for equipment used with cardiovascular, resistance and flexibility exercises
- considerations for the use of music in instruction of group exercise sessions:
  - type and operation of music equipment
  - volume and instructor positioning in relation to sound system
- types of observations and verbal screening questions that can be used to assess suitability of individuals for participation
- safety considerations for group exercise sessions and importance of clear and accurate briefing information:
  - appropriate spacing for group numbers and exercise types
  - importance of participants working within own capability and tailoring intensity
  - dangers of exercising while sick
  - common medical conditions and injuries, contraindications and precautions for exercises, and how exercises, intensity and loads can be modified to allow safe participation by individuals with low risk injuries and health conditions
- participant clothing and footwear appropriate for comfort and safety, and how this may vary according to different cultural backgrounds
- established phases of exercise sessions and their underpinning rationale:
  - warm up
  - main workout
  - cool down and stretches
- types of exercises, equipment that can be used and safe techniques for their completion:
  - cardiovascular exercises:
    - continuous
    - interval
  - resistance exercises using:

- free weights
- gym equipment including weight machines
- body weight
- flexibility exercises:
  - dynamic
  - static
- benefits and impacts on the body of different types of exercises and specific injury prevention strategies
- physical differences that need to be considered and ways that exercises can be modified for:
  - adults of different sexes
  - older people with low risk health conditions
  - antenatal, postnatal, menopausal and post-menopausal women with low risk health conditions
- factors that affect selection of equipment to suit participants
- group exercise instructional techniques and how they impact effectiveness of instruction:
  - optimum positioning of instructor
  - physical formation of group
  - movement breakdown and combination
  - combining explanation and demonstration
  - verbal and visual cueing
  - mirror imaging
- ways of varying instruction:
  - to meet the needs different participant characteristics
  - to cater for individual abilities within a group
- group communication techniques used for the following, and how they may vary depending on participant profile:
  - voice projection with and without the use of a sound system
  - establishing rapport with group
  - providing clear instruction in group environment
  - motivating and encouraging participants of different abilities to keep them engaged and challenged
  - maintaining group cohesion
  - providing constructive feedback and positive reinforcement
- key considerations for monitoring participant comfort and safety during group exercise sessions:
  - common indicators of over exertion that can be observed in a group situation
  - how the talk test and rated perceived exertion (RPE) scale can be applied in a group situation
  - when exercise intensity and technique should be modified for individuals and how to instruct individuals while maintaining group momentum

- situations that indicate individuals should stop exercising
- factors to consider in session evaluation:
  - suitability of physical environment and availability of suitable equipment
  - structure and timing
  - suitability of exercises and equipment for session objectives
  - participant feedback
  - trainer communication and instruction.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure the use of:

- interaction with group participants; these can be:
  - group participants in an industry workplace, or
  - group participants who participate in simulated activities used for the purpose of skills assessment
- equipment for exercises
- predesigned session plans for group exercise sessions
- template evaluation reports
- procedures for:
  - pre-exercise screening of group participants
  - maintaining records for session delivery and evaluation.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate III or IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

# SISFFIT037 Develop and instruct group movement programs for children

## Modification History

Supersedes and is not equivalent to SISFFIT012 Instruct movement programs to children aged 5 to 12 years.

## Application

This unit describes the performance outcomes, skills and knowledge required to develop movement programs and individual sessions for children aged up to 12 years, and to deliver those programs to groups of children. Programs are those which are designed to promote movement, physical activity and general wellbeing and may consist of multiple sessions. Programs may be developed for general consumer groups or customised to the needs of a particular client organisation, such as a school. They may include the use of basic equipment such as balls, ropes and mats, but do not include instruction involving specialised equipment found in gyms or other fitness facilities.

It requires the ability to evaluate and improve programs in response to feedback and evaluation.

This unit applies to group fitness instructors and personal trainers. They use discretion and judgment to plan programs and work unsupervised when delivering group sessions in settings such as fitness facilities, gyms, leisure and community centres, child care centres, schools and outdoor locations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication. However, individuals must receive formal clearance to work with children through completion of a working with children check required in the relevant State or Territory.

## Pre-requisite Unit

Nil

## Competency Field

Fitness

## Unit Sector

Fitness

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Develop movement programs for children.

- 1.1. Identify known and potential participants and investigate physical activity needs based on their age, stage of development and physical abilities.
- 1.2. Determine key objectives for children's movement program based on identified needs and characteristics.
- 1.3. Select movement activities that target key elements of physical literacy suited to participant characteristics.
- 1.4. Structure program to achieve objectives.
- 1.5. Determine volume, intensity and frequency of activities required to achieve program objectives.
- 1.6. Determine and incorporate instructional techniques and instructor ratios appropriate for children and participant age and stage of development.
- 1.7. Identify and incorporate requirements for instructional assistance from parents or carers.
- 1.8. Identify specific risk factors and precautions for implementation based on nature of both program and participants.

2. Plan movement sessions for children.

- 2.1. Determine objectives of individual sessions within movement program.
- 2.2. Select, balance and sequence activities within session duration based on participant age and stage of development.
- 2.3. Incorporate injury prevention strategies that respond to exercise risks for children.
- 2.4. Document session plans according to organisational formats.

3. Prepare for session.
  - 3.1. Review details of completed pre-exercise screening questionnaire and informed consent from parents or guardians.
  - 3.2. Access, prepare and check environment to meet session requirements.
  - 3.3. Prepare and check required equipment for safety and serviceability.
  - 3.4. Inform children, parents or carers about activities and safety rules, check their understanding.
  
4. Instruct children's movement sessions.
  - 4.1. Follow predesigned session structure and timings.
  - 4.2. Use voice projection techniques suited to environment, nature of activity and children's characteristics.
  - 4.3. Provide and combine clear verbal instruction and demonstration to support children's understanding.
  - 4.4. Use communication techniques that promote physical activity and encourage an enjoyable, interactive and inclusive experience.
  - 4.5. Monitor children's technique and safety and provide positive feedback, encouragement and corrective instruction based on observations.
  - 4.6. Facilitate effective group interaction to maintain group control, engagement and safety.
  - 4.7. Observe individual children, respond to difficulties and modify their activities to suit needs and to ensure engagement and comfort.
  
5. Evaluate children's movement programs.
  - 5.1. Seek and acknowledge feedback from children, and their parents or carers.
  - 5.2. Evaluate own performance and identify areas for improvement.
  - 5.3. Determine extent to which objectives are being achieved and compare with expectations outlined in program plan.
  - 5.4. Modify and update program and future sessions according to feedback and evaluation.
  - 5.5. Maintain current program documentation according to procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret information of varying complexity about exercise options for young children, including fitness and health terminology.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>produce detailed program and session plans that use fitness terminology and abbreviations for instructional use</li> <li>use fundamental sentence structure to complete basic evaluation reports that require factual and subjective information.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>provide clear and unambiguous information using language and terms easily understood by both young children and adults</li> <li>use age-appropriate group communication skills during instruction.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>complete calculations of varying complexity for program and session plans involving times, frequency and intervals</li> <li>monitor and adapt session timings to meet program guidelines.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>critically evaluate successes and failures of programs to initiate improvements.</li> </ul>

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT012 Instruct movement programs to children aged 5 to 12 years.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISFFIT037 Develop and instruct group movement programs for children

## Modification History

Supersedes and is not equivalent to SISFFIT012 Instruct movement programs to children aged 5 to 12 years.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document one movement program for groups of children aged up to 12 years
- develop, document and instruct three group movement sessions, each with a minimum duration of 30 minutes and with at least six participants, that collectively target the following elements of physical literacy with exercises suited to the particular age group:
  - movement skills
  - moving with equipment
  - object manipulation
  - coordination
  - stability and balance
  - flexibility
  - agility
  - strength
  - muscular endurance
  - cardiovascular endurance
  - reaction time
  - speed
- for each of the above sessions:
  - complete participant pre-exercise screening processes using industry standard screening questionnaire and guidelines for children
  - consistently use instructional and communication techniques that are suited to participant age and stage of development
  - consistently engage children through positive feedback and reinforcement of strengths
  - cater to the individual needs of one child participant by modifying activities to suit
- according to actual participant interactions or case studies, evaluate the effectiveness of one children's group movement program, modify program and session content and document details of the evaluation and changes made.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- procedures for maintaining program documentation
- boundaries and responsibilities of fitness instructors in developing movement programs for children and relationship to duty of care
- legal and ethical requirements for fitness instructors specific to working with children:
  - working with children checks
  - obtaining informed consent from parents or guardians
- typical community and commercial contexts for the delivery of children's movement programs and how this may impact program development and delivery
- key considerations for program development and their application to developing children's movement programs:
  - objectives
  - benefits
  - environment requirements:
    - amount and nature of space required
    - acoustics
    - temperature
    - ventilation
    - hygiene and infection control precautions
    - security
  - participant pre-screening requirements
  - communication protocols
  - equipment requirements and use
  - participant to instructor ratio and maximum numbers
  - injury prevention strategies relevant to age group
- key purpose and content of established national guidelines that support the provision of fitness services to children:
  - movement guidelines for the early years, children and young people
  - Australian Physical Literacy Framework (or its successor):
    - guiding principles
    - components of the framework and domains
    - stages of development
    - elements of the physical domain and how they link to stages of development
  - industry standard pre-exercise screening questionnaire and guidelines for young people
  - industry-developed children's health and fitness services guidelines
- overview of the key stages of development and milestones for female and male children up to 12 years, and implications for exercise programming and instruction:

- physical
- social
- emotional
- cognitive
- language
- principles of safe practice when developing and instructing movement programs for children aged up to 12 years related to:
  - growth and maturation
  - coordination development and control
  - stability
  - posture
  - fundamental movement skills
  - aerobic capacity
- types of individual movement activities suited to children aged up to 12 years consistent with the Australian Physical Literacy Framework, and types of suitable equipment
- group instructional techniques and how they would be used with children:
  - optimum positioning of instructor
  - physical formation of group
  - movement breakdown and combination
  - combining explanation and demonstration
  - verbal and visual cueing
  - mirror imaging
- demonstration and instruction techniques appropriate for a range of children's ages and capabilities including cueing that is:
  - verbal
  - visual
  - tactile
  - kinaesthetic
- ways of varying instruction to cater for individual differences within a group
- communication techniques used for:
  - establishing rapport with groups of children
  - voice projection
  - motivating children through positive feedback and focusing on strengths
  - providing clear instruction that recognises stage of cognitive and language development:
    - using age-appropriate language
    - avoiding fitness terminology
  - providing constructive feedback and positive reinforcement
  - checking own understanding and the understanding of children
- key considerations for monitoring groups of young children in a movement session:

- level of supervision
- physical safety of children
- monitoring interactions between individual children
- format and inclusions of documented:
  - movement programs
  - movement session plans
- methods used to evaluate effectiveness of children's movement programs:
  - ongoing informal discussions with children, parents or carers
  - ongoing observation and measurement of improvements in children's physical capabilities
  - reflection on own performance.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure the use of:

- interaction with participants; these can be:
  - children aged up to 12 years in an industry workplace, or
  - children aged up to 12 years who participate in simulated activities used for the purpose of skills assessment, or
  - individuals who role play children during simulated activities
- indoor or outdoor venue suited to the nature of the movement activity sessions
- equipment required for sessions
- industry standard pre-exercise screening questionnaires and guidelines for young people
- parental informed consent forms
- template group movement program and session plans
- procedures for maintaining program documentation.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate III or IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## SISFFIT038 Plan group water-based exercise sessions

### Modification History

Supersedes and is not equivalent to SISFFIT008 Instruct water-based fitness activities, and SISFFIT022 Instruct aquatic sessions for specific population groups.

### Application

This unit describes the performance outcomes, skills and knowledge required to plan group water-based exercise sessions designed for participation by mixed ability groups, or by groups that predominately comprise a particular profile, for example, older people. It requires the ability to account for the participation of individuals from specific population groups and of diverse abilities, and allow for modifications that can be made during instruction.

It covers skills for evaluating and improving sessions in response to participant and instructor feedback, noting that sessions might be delivered by self or others. Skills for instructing group water-based exercise sessions are covered in a complementary unit.

Water-based exercise sessions may be conducted in indoor or outdoor pools, with or without equipment. They are most likely to involve music. Sessions could combine or specifically concentrate on cardiovascular, resistance and flexibility exercises. This unit does not apply to the planning of hydrotherapy or rehabilitation sessions.

This unit applies to aqua exercise instructors who use discretion and judgment when planning sessions to meet diverse participant needs. Aqua exercise instructors practise in settings with pools, such as fitness facilities, gyms, and leisure and community centres.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Writing skills to:
- produce detailed session plans that use fitness terminology and abbreviations for instructional use
  - use fundamental sentence structure to complete basic evaluation records that require factual and subjective information.
- Numeracy skills to:
- complete and record calculations and estimations of varying complexity for session plans involving times, intervals, volume, speeds and loads.
- Problem-solving skills to:
- critically evaluate successes and failures of sessions to initiate future improvements.

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT008 Instruct water-based fitness activities, and SISFFIT022 Instruct aquatic sessions for specific population groups.

## Links

## Assessment Requirements for SISFFIT038 Plan group water-based exercise sessions

### Modification History

Supersedes and is not equivalent to SISFFIT008 Instruct water-based fitness activities, and SISFFIT022 Instruct aquatic sessions for specific population groups.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document plans for six group water-based exercise sessions, each with a minimum duration of 30 minutes, that includes a session for:
  - at least one session for each of the following participant groups:
    - a group of female adults
    - a mixed sex group
    - a group of participants aged 55 years or over
- across the six sessions above collectively, incorporate the following:
  - anchored and weighted movements
  - active, rebound and energetic movements
  - propulsion or turbulent actions
  - suspended movements in deep or shallow water
  - formations
  - interval training
  - exercises with and without equipment
- for two sessions and according to actual feedback or case studies:
  - evaluate feedback provided by group participants
  - evaluate instructor feedback
  - modify future session content, and document details of the evaluation and changes made.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- common reasons and goals for people participating in group water-based exercise sessions
- different types of group water-based exercise classes typically offered by aquatic venues and how these relate to general consumer market preferences, expectations and goals
- general factors that affect session design:
  - indoor and outdoor pool environment

- size, depth and gradient of pool
- water temperature
- availability of different types of exercise equipment
- session duration preferences of different group markets
- factors that affect session design for particular client groups and mixed groups:
  - physical differences that need to be considered for:
    - adults of different sexes
    - older people
    - antenatal, postnatal, menopausal and post-menopausal women
  - cultural needs and expectations
  - differing fitness levels, and whether coming from sedentary or active base
- for a range of common injuries, medical conditions, and health risk factors:
  - contraindications and precautions for different types of water-based exercise sessions and exercises
  - how exercises, intensity and loads can be modified to allow safe participation by individuals with low risk injuries and health conditions
- the meaning of the following components of fitness, and how water-based exercises can target improvements for each:
  - health-related components:
    - cardiovascular endurance
    - muscle strength
    - muscle endurance
    - flexibility
    - body composition
  - skill-related components:
    - coordination
    - balance
    - reaction time
    - proprioception
- different types of water-based exercises and equipment that can be used:
  - cardiovascular exercises:
    - continuous
    - interval
  - resistance exercises
  - flexibility exercises
- how different types of water-based exercises can be combined and sequenced for safety and optimum effectiveness in group exercise sessions
- how the FITT (frequency, intensity, time and type) principle is used to structure group water-based exercise sessions
- established phases of exercise sessions, their underpinning rationale and timing for each within designated time of session:

- warm up
- main workout
- cool down and stretches
- components of water-based exercise sessions, and how they can be used effectively for goals targeted by group sessions:
  - exercise order
  - volume and intensity of exercises
  - repetitions and sets
  - repetition tempo
  - rest intervals
- training techniques that can be used in group water-based exercise sessions, how they can be used, and considerations for their use:
  - supersets
  - pyramiding
  - rebound
  - interval training including high intensity interval training (HIIT)
  - circuit training
- considerations for choreographing and cueing sequences of movements and exercises for group water-based exercise sessions
- considerations for the use of music in instruction of group water-based exercise sessions:
  - licensing requirements
  - tempo of music suited to different phases of exercise sessions and types of movements and exercises
  - how to break music down into phrases and beats per minute to time and sequence exercises with music
  - how different styles of music impact on participant motivation
- format and inclusions of documented group water-based exercise session plans
- methods that can be used to evaluate effectiveness of group exercise sessions:
  - participant and instructor evaluation questionnaires and reports
  - discussions with instructors delivering sessions
  - self-evaluation
  - discussions with venue operator on success of programs offered
  - evaluation of complaints, problems and difficulties.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

Assessment must ensure the use of:

- information about the pool environment in which activities will be instructed to allow for appropriate session design
- template group exercise session plans
- template evaluation reports.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a qualification or Statement of Attainment which includes this unit of competency, SISFFIT038, or units that have been superseded by SISFFIT038, and have a collective period of at least two years' experience working in aqua fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## SISFFIT039 Instruct group water-based exercise sessions

### Modification History

Supersedes and is not equivalent to SISFFIT008 Instruct water-based fitness activities, and SISFFIT022 Instruct aquatic sessions for specific population groups.

### Application

This unit describes the performance outcomes, skills and knowledge required to prepare for and instruct group water-based exercise sessions according to predesigned session plans which may have been developed by self or others. It requires the ability to use aquatic exercise instructional techniques, and cater for different participant needs in a mixed ability group situation, within the confines of session guidelines.

Skills for planning group water-based exercise sessions are covered in a complementary unit.

Water-based exercise sessions may be conducted in indoor or outdoor pools, with or without equipment. They are most likely to involve music. Sessions could combine or specifically concentrate on cardiovascular, resistance and flexibility exercises. This unit does not apply to the provision of hydrotherapy or rehabilitation sessions.

This unit applies to aqua exercise instructors who work unsupervised when instructing groups, using discretion and judgement to solve routine problems but are guided by venue policies and procedures. Aqua exercise instructors practise in settings with pools, such as fitness facilities, gyms, and leisure and community centres.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Fitness

### Unit Sector

Fitness

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for water-based session.
  - 1.1. Check and prepare pool environment to meet session requirements and identify and respond to factors that may impact session delivery.
  - 1.2. Prepare required physical resources and check for safety and serviceability.
  - 1.3. Follow pre-exercise screening procedures and assess participant characteristics, condition and capability as they present through observation and verbal screening and provide required response.
  - 1.4. Issue exercise equipment to match participant characteristics and types of exercises.
  
2. Brief participants.
  - 2.1. Provide clear safety information about exercise depth and gradient and appropriate group spacing.
  - 2.2. Explain participant responsibility to work within their capability and provide clear advice on contraindications and precautions for particular activities during session.
  - 2.3. Introduce session and its basic components using communication suited to participant characteristics.
  
3. Deliver water-based session.
  - 3.1. Follow pre-designed session structure and timings.
  - 3.2. Use voice projection techniques suited to the pool environment.
  - 3.3. Combine clear and accurate verbal instructions and demonstrations for exercise technique, and explain effects of water on participant movements.
  - 3.4. Use group communication techniques that motivate participants to maintain active participation in the session.
  - 3.5. Monitor participant technique and safety and provide feedback, encouragement and corrective instruction based on observations.
  - 3.6. Facilitate effective group interaction to maintain group cohesion, engagement and safety.
  - 3.7. Observe individual participants, respond to difficulties and modify their activities to suit needs and to ensure engagement and comfort.

4. Evaluate group-session.
  - 4.1. Seek and acknowledge feedback from participants and evaluate satisfaction with session.
  - 4.2. Evaluate own performance and identify areas for improvement.
  - 4.3. Complete session documentation and evaluation according to record keeping procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret sometimes unfamiliar session plans which include fitness terminology and abbreviations</li> <li>• interpret detailed familiar procedures for instructing and reporting on group exercise sessions.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• use fundamental sentence structure to record factual and subjective information in session documentation.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• provide clear and unambiguous information to participants using language and terms easily understood.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• follow and adjust session timings to meet requirements of session duration.</li> </ul>
Problem-solving skills to:	<ul style="list-style-type: none"> <li>• critically evaluate successes and failures of sessions to contribute to improvements.</li> </ul>

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT008 Instruct water-based fitness activities, and SISFFIT022 Instruct aquatic sessions for specific population groups.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

## Assessment Requirements for SISFFIT039 Instruct group water-based exercise sessions

### Modification History

Supersedes and is not equivalent to SISFFIT008 Instruct water-based fitness activities, and SISFFIT022 Instruct aquatic sessions for specific population groups.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- instruct three predesigned group water-based exercise sessions:
  - each with a minimum duration of 30 minutes
  - each with at least six participants
  - one group that is predominately comprised of female adults
  - one mixed sex group
  - one group that is predominately comprised of participants aged 55 years or over
- across the above three sessions collectively, instruct:
  - anchored and weighted movements
  - active, rebound and energetic movements
  - propulsion or turbulent actions
  - suspended movements in deep or shallow water
  - formations
  - interval training
  - exercises with and without equipment
- for each of the three sessions:
  - prepare environment and equipment
  - pre-screen participants for current condition
  - brief participants and provide safety information tailored to the pool environment and types of exercises
  - incorporate the following techniques:
    - optimal instructor positioning
    - clear verbal communication
    - optimal voice projection
    - combined explanation and demonstration of safe exercise technique
    - verbal and visual cueing
    - motivational communication
  - complete session documentation and evaluation reports
- according to actual client interactions or case studies:

- identify two situations from pre-session screenings that require recommendations on exercise participation, explain exercise precautions and provide recommendations for modifications
- respond to two individuals showing signs of over exertion or difficulty, and modify their activities.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- key content of established industry guidelines for safe pool operations relevant to aqua exercise instructors, and associated policies and procedures implemented by pool operators:
  - qualification requirements including those for rescues
  - zoning for water-based exercise programs
  - responsibilities of instructors while on site including supervisory and reporting lines
  - pool conditions and equipment
  - emergencies including rescue equipment that must be on hand
  - pre-exercise screening and briefing of group participants
  - maintaining records for session delivery and evaluation
- workplace health and safety issues for instructors of water-based activities and how to manage these:
  - effects of extended exposure to chlorinated water and sunlight
  - slips, trips and falls and safe pool footwear
  - physical demands of extended energy expenditure on the pool deck and in the pool
- pool environmental factors that may impact session delivery and how to respond:
  - noise
  - sun and glare
  - water temperature
- safety and serviceability checks for aqua exercise equipment
- considerations for the use of music in instruction of water-based exercise sessions:
  - type and operation of music equipment
  - volume and instructor positioning in relation to sound system
- types of observations and verbal screening questions that can be used to assess suitability of individuals for participation
- safety considerations for group water-based exercise sessions and importance of clear and accurate briefing information:
  - emergency procedures and how participants can raise the alarm
  - optimal spacing for group numbers and exercise types
  - exercising depth and gradient of pool for different types of exercises and population groups

- importance of participants working within own capability and tailoring intensity accordingly
- dangers of exercising while sick
- common medical conditions and injuries, contraindications and precautions for exercises, and how exercises, intensity and loads can be modified to allow safe participation by individuals with low risk injuries and health conditions
- appropriate instructor apparel and participant swimwear and footwear for comfort and safety, and how this may vary according to different cultural backgrounds
- established phases of exercise sessions, their underpinning rationale and timing for each within overall session:
  - warm up
  - main workout
  - cool down and stretches
- different types of water-based exercises, equipment that can be used, and safe techniques for their completion:
  - cardiovascular exercises:
    - continuous
    - interval
  - resistance exercises
  - flexibility exercises
- benefits and impacts on the body of different types of water-based exercises and specific injury prevention strategies
- physical differences that need to be considered and ways that exercises can be modified for:
  - adults of different sexes
  - older people with low risk health conditions
  - antenatal, postnatal, menopausal and post-menopausal women with low risk health conditions
- factors that affect selection of equipment to suit participants
- group exercise instructional techniques and how they impact effectiveness of instruction:
  - optimum positioning of instructor
  - physical formation of group
  - movement breakdown and combination
  - combining explanation and demonstration
  - verbal and visual cueing
  - mirror imaging
  - emulating water-based exercises from the pool deck accounting for hydrodynamics
  - instructing within the pool
- ways of varying instruction:
  - to meet the needs different participant characteristics
  - to cater for individual abilities within a group

- group communication techniques and how they may vary depending on participant profile:
  - voice projection with and without the use of a sound system
  - establishing rapport with group
  - providing clear instruction in group environment
  - motivating and encouraging participants of different abilities to keep them engaged and challenged
  - maintaining group cohesion
  - providing constructive feedback and positive reinforcement
- key considerations for monitoring participant comfort and safety during group water-based exercise sessions:
  - common indicators of over exertion that are particular to water-based activities
  - when exercise intensity and technique should be modified for individuals and how to instruct individuals while maintaining group momentum
  - situations that indicate individuals should stop exercising
- factors to consider in session evaluation:
  - suitability of physical environment and availability of suitable equipment
  - structure and timing
  - suitability of exercises and equipment for session objectives
  - participant feedback
  - trainer communication and instruction.

## Assessment Conditions

Skills must be demonstrated in an indoor or outdoor pool facility meeting current state or territory and local government regulations. The facility owner or operator must have guidelines or policies and procedures to regulate the safe operation of the facility and its use by facility users and instructors based on current industry guidelines for safe pool operations.

Pools can be publicly or commercially owned and operated, and can be in diverse locations including educational institutions, clubs, fitness facilities, gyms, and leisure and community centres.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- rescue equipment
- communication equipment for emergency response.

Assessment must ensure the use of:

- interaction with group participants who are participating in exercise activities within a pool; these can be:
  - group participants in an industry workplace, or
  - group participants who participate in simulated activities used for the purpose of skills assessment

- aqua equipment for exercises
- pre-designed session plans for group water-based exercise sessions
- template evaluation reports
- established industry guidelines for safe pool operations relevant to aqua exercise instructors, and associated guidelines or policies and procedures implemented by pool operators.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a qualification or Statement of Attainment which includes this unit of competency, SISFFIT039, or units that have been superseded by SISFFIT039, and have a collective period of at least two years' experience working in aqua fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## **SISFFIT040 Develop and instruct gym-based exercise programs for individual clients**

### **Modification History**

Supersedes and is not equivalent to SISFFIT003 Instruct fitness programs.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to develop tailored gym-based exercise programs for individuals where the level of personalised instruction, ongoing client monitoring and program evaluation is limited. Clients are provided with initial instruction and then largely self-manage their own exercise sessions at the gym, according to the program, without ongoing one-to-one instruction.

It requires the ability to integrate information from pre-exercise screenings, fitness assessments, and any medical guidance that may have been received for particular clients, to design suitable programs.

This unit applies to gym instructors and gym-based personal trainers who work unsupervised when interacting with clients using discretion and judgement and are guided by policies and procedures. They practise in settings such as fitness facilities, gyms, and leisure and community centres.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Fitness

### **Unit Sector**

Fitness

### **Elements and Performance Criteria**

#### **ELEMENTS**

#### **PERFORMANCE CRITERIA**

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Identify client needs.
  - 1.1. Review outcomes of client pre-exercise screening and fitness assessment and identify relevant information for program design.
  - 1.2. Identify implications of medical guidance for exercise programming and duty of care to follow.
  - 1.3. Discuss exercise preferences and consult with client to identify their short- and long-term fitness goals to inform program design.
  - 1.4. Build client trust and rapport using client-centred communication showing sensitivity and empathy during interactions.
  - 1.5. Develop and document client profile to assist with programming.
2. Develop program and session structure.
  - 2.1. Review client's exercise preferences, goals, current abilities and medical advice to determine types of exercises and equipment for program.
  - 2.2. Determine type and frequency of exercise sessions required for client to achieve goals.
  - 2.3. Select exercises, training techniques and exercise equipment that target client's fitness goals.
  - 2.4. Plan sessions that incorporate volume and intensity and load of exercises appropriate to client's age, sex and existing fitness capabilities.
  - 2.5. Plan for exercise phases and volume within client's preferred session duration.
  - 2.6. Document program and session plans for use by client according to organisational format.

3. Provide initial instruction and advice.
  - 3.1. Provide clear and accurate exercise technique instruction and demonstration to client.
  - 3.2. Demonstrate safe use of equipment included in program.
  - 3.3. Observe client exercise technique for safety and effectiveness and provide corrective instruction based on observations.
  - 3.4. Provide advice to client about how to adapt and progress exercise volume and intensity over time to achieve fitness goals.
  - 3.5. Seek feedback from client about proposed program and record agreed modifications before finalising program.
  - 3.6. Provide information about ongoing program monitoring and evaluation options and agree to approach based on client preferences.
  
4. Provide ongoing service to client.
  - 4.1. Identify and use opportunities to interact with and support client during their gym sessions and seek feedback on their experience with program.
  - 4.2. Complete formal program evaluation based on client requests and organisational requirements for periodic evaluation.
  - 4.3. Modify and update program according to feedback and evaluation.
  - 4.4. Update client records with details of evaluation and modifications.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret sometimes unfamiliar information of varying complexity in client pre-exercise screening and medical guidance records, including health and fitness terminology and abbreviations.

Writing skills to:

- present client-based information using plain language and minimal technical terminology for ease of understanding
- use fundamental sentence structure to complete program templates and client records that require factual and subjective information.

- Oral communication skills to:
- ask open and closed probe questions and actively listen to elicit information from clients and to determine client understanding of information provided
  - provide fitness and exercise information to clients using plain language and terms easily understood.
- Numeracy skills to:
- complete and record calculations and estimations of varying complexity for program and session plans involving times, frequency, intervals, volume, speeds and loads.
- Initiative and enterprise skills to:
- critically evaluate:
    - all client requirements for appropriate program design
    - successes and failures of programs to initiate improvements.

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT003 Instruct fitness programs.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for SISFFIT040 Develop and instruct gym-based exercise programs for individual clients

## Modification History

Supersedes and is not equivalent to SISFFIT003 Instruct fitness programs.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role.

- develop and document one individually tailored gym-based exercise program for three clients, to collectively include:
  - a female adult client
  - a male adult client
  - a client aged 55 years or over
  - a client for whom medical guidance has been received
- for each of the above three clients:
  - develop and document two session plans, each with a minimum duration of 30 minutes
  - instruct two sessions according to the above session plans, each with a minimum duration of 30 minutes
  - consistently use client-centred communication and instructional techniques
- across the above six session plans collectively, incorporate the following:
  - cardiovascular exercises
  - resistance exercises
  - flexibility exercises
  - exercises with and without equipment
- according to actual client interactions or case studies, evaluate the effectiveness of two client programs, modify program and session content and document details of the evaluation and changes made.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- role and scope of established gym procedures that impact fitness instruction
- boundaries and responsibilities of fitness instructors in providing tailored gym-based programs for clients and relationship to duty of care
- differences between gym-based programs where clients largely self-manage their exercise activities, and fully personalised programs involving ongoing one-to-one instruction

- type of client information provided by pre-exercise screening and fitness assessment processes, and implications for exercise programming:
  - client needs and exercise preferences
  - client body measurements
  - client fitness data and indication of suitable exercise intensity
- types of client guidance that may be provided by medical and allied health professionals and implications for exercise programming:
  - injury management protocols
  - contraindications and precautions for types of exercise for those with medical conditions and health risk factors
  - exercise recommendations for client health improvement and collaborative rehabilitation
- factors that affect the design of client-tailored gym-based exercise programs:
  - physical differences that need to be considered for:
    - adults of different sexes
    - older people
    - antenatal, postnatal, menopausal and post-menopausal women
  - exercise history and current abilities
  - desired frequency of gym attendance and other personal exercise activities
  - client goals
- the meaning of the following components of fitness, and how exercises can target client goals and improvements for each:
  - health related components:
    - cardiovascular endurance
    - muscle strength
    - muscle endurance
    - flexibility
    - body composition
  - skill related components:
    - power
    - speed
    - agility
    - coordination
    - balance
    - reaction time
    - proprioception
- different types of exercises, equipment that can be used and safe techniques for their completion:
  - cardiovascular exercises:
    - continuous
    - interval

- resistance exercises using:
  - free weights
  - gym equipment including weight machines
  - body weight
- flexibility exercises:
  - dynamic
  - static
- benefits and impacts on the body of different types of exercises and specific injury prevention strategies
- how different types of exercises can be combined and sequenced for safety and optimum effectiveness
- overview of the following exercise science principles and how they are used to design gym-based exercise programs and sessions for individuals:
  - adaptation
  - overload
  - specificity
  - individualisation
  - progression and regression
  - reversibility
- how the FITT (frequency, intensity, time and type) principle is used to structure exercise programs and sessions
- established phases of exercise sessions, their underpinning rationale and timing for each within designated time of session:
  - warm up
  - main workout
  - cool down and stretches
- components of exercise sessions, and how they can be used effectively to target client goals:
  - exercise order
  - volume and intensity and load of exercises
  - repetitions and sets
  - repetition tempo
  - rest intervals
- training techniques that can be used by clients in self-directed gym sessions, how they can be used, and considerations for their use:
  - supersets
  - drop sets
  - pre-fatigue techniques
  - plyometric training
  - interval training including high intensity interval training (HIIT)
  - circuit training

- instructional techniques used with individual clients and how they impact effectiveness of instruction and client execution of exercises:
  - providing clear information about exercises and instructions about technique
  - combining explanation and demonstration of correct exercise technique
  - cueing and how to adapt instruction to suit different learning styles:
    - verbal
    - visual
    - tactile
    - kinaesthetic
- communication techniques used for the following and how these may vary depending on individual client characteristics:
  - establishing and maintaining individual rapport
  - motivating individuals for optimum performance
  - providing constructive feedback and positive reinforcement
- ways of supporting clients managing their own exercise sessions in a gym environment:
  - recognising when clients could progress volume, intensity and loads and making suggestions
  - correcting technique
  - offering opportunities for formal program evaluation and modification
- methods used to evaluate gym-based exercise programs:
  - periodic informal discussions with client and targeted questions to elicit opinion about achievement of goals, fitness improvement, changes to health, general wellbeing and skills
  - periodic observation and measurement of client performance, and health and skill improvements
- format and inclusions of documented:
  - client based exercise programs
  - client based exercise session plans
  - client profile and client evaluation records.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

Assessment must ensure the use of:

- interaction with clients; these can be:
  - clients in an industry workplace, or
  - individuals who participate in simulated activities used for the purpose of skills assessment
- equipment required for selected exercises

- client records which include documentation of:
  - completed industry standard pre-exercise screenings
  - completed fitness assessments
- samples of guidance information provided by medical or allied health professionals
- template client-based exercise program and session plans

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate III or IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

# SISFFIT041 Develop personalised exercise programs

## Modification History

Supersedes and is not equivalent to SISFFIT021 Instruct personal training programs.

## Application

This unit describes the performance outcomes, skills and knowledge required to develop exercise programs and a series of sessions tailored to individual client needs, exercise preferences and fitness goals.

It requires the ability to integrate information from pre-exercise screenings, fitness assessments, and any medical guidance that may have been received for particular clients, to design suitable programs. Skills for instructing sessions are covered in a complementary unit.

Program design involves effective application of exercise science and training principles. This unit has a direct relationship with, and is supported by, SISFFIT049 Use exercise science principles in fitness instruction.

This unit applies to personal trainers who work independently with clients using discretion and judgement to develop individually tailored client programs. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

Fitness

## Unit Sector

Fitness

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Identify client needs.
  - 1.1. Review outcomes of client pre-exercise screening and fitness assessment and identify significant information for program design.
  - 1.2. Identify implications of medical guidance for exercise programming and duty of care to follow.
  - 1.3. Discuss exercise preferences and consult with client to identify, negotiate and confirm their short- and long-term fitness goals to inform program design.
  - 1.4. Build client trust and rapport using client-centred communication showing sensitivity and empathy during interactions.
  - 1.5. Develop and document client profile to assist with programming and ongoing evaluation.
  
2. Plan personalised exercise program.
  - 2.1. Review client's exercise preferences, goals, current abilities and medical advice to determine types of exercises and equipment for program.
  - 2.2. Determine appropriate training volume and frequency of sessions required to achieve client goals.
  - 2.3. Design a systematically structured program that incorporates the effective use of exercise training principles.
  - 2.4. Design overall program aligned to client's short- and long-term goals to allow progression towards fitness improvements.
  - 2.5. Plan for increased difficulty of exercise types to progress client throughout the program.
  - 2.6. Document exercise program according to organisational format.
  
3. Plan personalised exercise sessions.
  - 3.1. Determine objectives of individual sessions to allow progression of client fitness within overall exercise program.
  - 3.2. Select exercises, training techniques and exercise equipment that target components of client's health and fitness goals.
  - 3.3. Plan sessions that incorporate volume and intensity and load of exercises appropriate to client's age, sex and existing fitness capabilities.
  - 3.4. Plan for exercise phases and volume within client's preferred session duration.
  - 3.5. Develop sequenced and varied sessions to enhance client motivation and program adherence and to allow for recovery from specific exercise types.
  - 3.6. Incorporate at timely intervals progressive difficulty of

exercises that respond to client's progression.

### 3.7. Document session plans according to organisational format.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

# Assessment Requirements for SISFFIT041 Develop personalised exercise programs

## Modification History

Supersedes and is not equivalent to SISFFIT021 Instruct personal training programs.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document one personalised exercise program for three clients, to collectively include:
  - a female adult client
  - a male adult client
  - a client for whom medical guidance has been received
- consistently use client-centred communication to identify each of the above client's program needs and preferences
- for each of the above three clients, develop and document four personalised session plans, each with a minimum duration of 45 minutes
- across the above 12 sessions collectively, incorporate both indoor and outdoor sessions and the following types of exercises:
  - cardiovascular
  - resistance
  - flexibility
  - low and high impact
  - exercises that target the:
    - health related components of fitness
    - skill related components of fitness
  - exercises with and without equipment.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- boundaries and responsibilities of fitness instructors in providing personalised exercise prescription and relationship to duty of care
- type of client information provided by pre-exercise screening and fitness assessment processes, and implications for exercise programming:
  - client needs and exercise preferences
  - client body composition data

- client fitness data and indication of suitable exercise intensity
- types of client guidance that may be provided by medical and allied health professionals and implications for exercise programming:
  - injury management protocols
  - contraindications and precautions for types of exercise for those with medical conditions and health risk factors
  - exercise recommendations for client health improvement and collaborative rehabilitation
- factors that affect the design of personalised exercise programs:
  - physical differences that need to be considered for:
    - adults of different sexes
    - older people
    - antenatal, postnatal, menopausal and post-menopausal women
  - exercise history and current abilities

## SISFFIT042 Instruct personalised exercise sessions

### Modification History

Supersedes and is not equivalent to SISFFIT021 Instruct personal training programs.

### Application

This unit describes the performance outcomes, skills and knowledge required to prepare for, instruct and evaluate pre-designed exercise sessions that have been tailored to individual client needs, exercise preferences and fitness goals, as part of an overall personal training program. It covers skills for modifying programs in response to ongoing client monitoring and feedback.

Skills for planning programs and sessions are covered in a complementary unit.

This unit applies to personal trainers who work independently with clients using discretion and judgement to prepare for and instruct exercise activities. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Fitness

### Unit Sector

Fitness

### Elements and Performance Criteria

#### ELEMENTS

*Elements describe the essential outcomes*

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for session.
  - 1.1. Review client exercise program and confirm individual session objectives and activities.
  - 1.2. Check and prepare physical environment to meet session requirements and identify and respond to factors that may impact session delivery.
  - 1.3. Prepare required equipment and check for safety and serviceability.
  - 1.4. Assess client condition and capability as they present through observation and verbal screening and identify required exercise precautions.
  - 1.5. Identify implications of current medical guidance and make required adjustments to session activities.
2. Provide exercise instruction.
  - 2.1. Introduce and follow pre-designed session structure and timings.
  - 2.2. Use and combine verbal, visual and tactile instructional methods according to nature of information and client needs.
  - 2.3. Observe client exercise technique for safety and effectiveness and provide corrective instruction based on observations.
  - 2.4. Provide succinct explanations about the relationship between exercises, their beneficial impacts on the body and implications for achieving fitness goals.
  - 2.5. Monitor client performance against objectives using measures suited to the type of exercise.
  - 2.6. Identify signs of fatigue and exercise intolerance and make required session modifications.
3. Encourage and support clients during sessions.
  - 3.1. Build client trust and rapport using client-centred communication showing sensitivity and empathy during interactions.
  - 3.2. Encourage and respond to client questions about individual exercises and overall program.
  - 3.3. Use communication techniques that provide positive reinforcement and motivation to client.
  - 3.4. Encourage participants to provide feedback and identify personal progression and satisfaction with session.

- |  |   |
|--|---|
| 4. Evaluate session.                           | <p>4.1. Evaluate session against objectives and identify progress and aspects needing further emphasis and attention in future sessions.</p> <p>4.2. Evaluate own performance and identify areas for improvement.</p> <p>4.3. Document session evaluation and client progress according to record keeping procedures.</p>   |
| 5. Monitor client progress and update program. | <p>5.1. Monitor client progression towards goals through ongoing observation and measurements and compare with expectations in program plan.</p> <p>5.2. Request ongoing feedback from client to identify program likes and dislikes and their views on goal achievement.</p> <p>5.3. Modify and update program and future sessions according to feedback and evaluation.</p> <p>5.4. Maintain current program documentation according to procedures.</p> |

## Foundation Skills

# Assessment Requirements for SISFFIT042 Instruct personalised exercise sessions

## Modification History

Supersedes and is not equivalent to SISFFIT021 Instruct personal training programs.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- instruct six personalised exercise sessions which have been developed as part of overall exercise programs:
  - each with a minimum duration of 45 minutes
  - collectively instruct:
    - a female adult client
    - a male adult client
    - a client for whom medical guidance has been received
- across the above six sessions collectively, instruct indoor and outdoor sessions and the following types of exercises:
  - cardiovascular
  - resistance
  - flexibility
  - low and high impact
  - exercises that target:
    - health related components of fitness
    - skill related components of fitness
  - exercises with and without equipment
- for each of the above six sessions:
  - prepare environment and equipment
  - pre-screen client for current condition
  - use the following instructional and communication techniques:
    - clear and correct verbal, visual and tactile instructions
    - correct and safe exercise technique demonstration
    - feedback and positive reinforcement
    - motivational communication
  - complete accurate session records which include client progress notes, client feedback and evaluation of own performance
- according to actual client interactions or case studies:

- identify two situations from pre-session screenings that indicate exercise precautions and modify planned exercises in response
- respond to two clients showing signs of over exertion or difficulty, and modify their activities
- evaluate the effectiveness of one client program, modify program and future session content and document details of the evaluation and changes made.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- procedures for maintaining client records, session evaluation and program updates
- scope of practice for a personal trainer in instructing personalised exercise sessions:
  - responsibilities and limitations
  - professional boundaries
- environmental factors that may impact session delivery and how to respond:
  - noise
  - indoor venue climate control and ventilation
  - exposure to uncomfortable and extreme weather conditions in the outdoors
- safety and serviceability checks for equipment used with cardiovascular, resistance and flexibility exercises
- types of observations and verbal screening questions that can be used to assess and determine current condition of clients and exercise precautions
- common medical conditions and injuries, contraindications and precautions for exercises, and how exercises, intensity and loads can be modified to allow safe client participation
- established phases of exercise sessions and their underpinning rationale:
  - warm up
  - main workout
  - cool down and stretches
- different types of exercises, types of equipment that can be used and safe techniques for their completion:
  - cardiovascular exercises:
    - continuous
    - interval
  - resistance exercises using:
    - free weights
    - gym equipment including weight machines
    - body weight
  - flexibility exercises:
    - dynamic
    - static
    - proprioceptive neuromuscular facilitation

- common exercise related injuries, and how to prevent these in exercise instruction
- instructional techniques used with individual clients and how they impact effectiveness of instruction and client execution of exercises:
  - providing clear information about exercises and instructions about technique
  - combining explanation and demonstration of correct exercise technique
  - cueing, and how to adapt instruction to suit different learning styles:
    - verbal
    - visual
    - tactile
    - kinaesthetic
- communication techniques used for the following and how these may vary depending on individual client characteristics:
  - establishing and maintaining individual rapport
  - motivating individuals for optimum performance, including techniques for intrinsic and extrinsic motivation
  - providing constructive feedback and positive reinforcement
- measures that may be used to assess client performance against session objectives:
  - speed or timing
  - loads
  - endurance
  - range of movement
- methods for monitoring client comfort and safety during personalised exercise sessions:
  - how to use monitoring techniques:
    - heart rate response
    - talk test
    - rated perceived exertion (RPE) scale
  - how to recognise and respond to common indicators of over exertion and discomfort and when exercise should be modified or stopped
- factors to consider in session evaluation:
  - structure and timing
  - suitability of exercises and equipment for session objectives
  - client feedback
  - client performance and progress
  - trainer communication and instruction
- methods used to evaluate effectiveness of personalised exercise programs:
  - ongoing informal discussions with client and targeted questions to elicit opinion about achievement of goals, and improvements in skill, fitness and general health
  - ongoing observation and measurement of client performance and health and skill improvements
  - staged formal fitness assessments and comparison measurements.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure the use of:

- interaction with clients; these can be:
  - clients in an industry workplace, or
  - individuals who participate in simulated activities used for the purpose of skills assessment
- indoor and outdoor locations for exercise
- equipment required for sessions
- personalised exercise programs and session plans
- client records and progress charts
- procedures for maintaining client records, session evaluation and program updates.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## **SISFFIT043 Develop and instruct personalised exercise programs for body composition goals**

### **Modification History**

Supersedes and is not equivalent to SISFFIT020 Instruct exercise programs for body composition goals.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to develop and instruct exercise programs and sessions specifically tailored to meet body composition goals for individual clients. Goals may relate to body composition maintenance or change. It covers skills for evaluating and modifying programs in response to client monitoring and feedback.

It requires the ability to integrate information from pre-exercise screenings, fitness assessments, and medical guidance that may have been received for particular clients, to design suitable programs.

Program design involves effective application of exercise science principles. This unit has a direct relationship with, and is supported by, SISFFIT049 Use exercise science principles in fitness instruction.

This unit applies to personal trainers who work independently with clients using discretion and judgement to develop and instruct individually tailored client programs. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Fitness

### **Unit Sector**

Fitness

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Identify client body composition needs.

- 1.1. Review outcomes of pre-exercise screening and fitness assessment and identify relevant information for design of exercise program targeting body composition goals.
- 1.2. Take body measurements and use results for program development.
- 1.3. Identify implications of medical guidance for exercise programming and duty of care to follow.
- 1.4. Consult with client and confirm their body composition goals, exercise preferences and identified barriers.
- 1.5. Build client trust and rapport using client-centred communication showing sensitivity and empathy during interactions.
- 1.6. Develop and document client profile to assist with programming and ongoing evaluation.

2. Develop personalised exercise programs for body composition.

- 2.1. Review client characteristics, exercise preferences, goals, current abilities and medical advice to determine types of exercises and equipment.
- 2.2. Determine appropriate training volume and frequency of sessions required to achieve client body composition goals.
- 2.3. Design a systematically structured program that incorporates the effective use of exercise science principles.
- 2.4. Design overall program aligned to client's short- and long-term body composition goals.
- 2.5. Document exercise program according to organisational format.

3. Plan individual sessions.
  - 3.1. Determine objectives of individual sessions within overall exercise program.
  - 3.2. Select exercises and equipment that target body composition goals and take account of individual client characteristics.
  - 3.3. Plan sessions that incorporate volume and intensity and load of exercises appropriate to client's existing fitness capabilities.
  - 3.4. Plan for exercise phases and volume within client's preferred session duration.
  - 3.5. Develop sequenced and varied sessions to enhance client motivation and program adherence.
  - 3.6. Document session plans according to organisational format.
  
4. Instruct exercise sessions targeting body composition goals.
  - 4.1. Use and combine verbal, visual and tactile instructional methods according to nature of information and client needs.
  - 4.2. Observe client technique for safety and effectiveness and provide corrective instruction based on observations.
  - 4.3. Provide succinct explanations about the relationship between exercises, their impact on body composition and implications for achieving goals.
  - 4.4. Monitor client performance against objectives using measures suited to the type of exercise.
  - 4.5. Identify signs of fatigue and exercise intolerance and make session modifications.
  
5. Encourage and support clients during sessions.
  - 5.1. Encourage and respond to client questions about individual exercises and overall program.
  - 5.2. Use communication techniques that provide positive reinforcement and motivation to client.
  - 5.3. Highlight client's key strengths during instruction and provide information about progression towards body composition goals.
  
6. Evaluate program effectiveness.
  - 6.1. Monitor client progression towards body composition goals through ongoing observation and measurements and compare with expectations in program plan.
  - 6.2. Request ongoing feedback from client to identify program likes and dislikes and their views on goal achievement.
  - 6.3. Modify and update program and future sessions according to feedback and evaluation.
  - 6.4. Update client records with details of evaluation and modifications made.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret sometimes unfamiliar information of varying complexity in client pre-exercise screening and medical guidance records, including health and fitness terminology and abbreviations.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>produce detailed program and session plans that use fitness terminology and abbreviations for instructional use</li><li>use fundamental sentence structure to complete forms, basic evaluation records and client records that require factual and subjective information.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>ask open and closed probe questions and actively listen to elicit information from clients and to determine client understanding of information provided</li><li>provide information about body composition management to clients using plain language and terms easily understood.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>take and record accurate basic body measurements</li><li>interpret and use potentially complex body composition data</li><li>complete and record calculations and estimations of varying complexity for program and session plans involving times, frequency, intervals, volume, speeds and loads.</li></ul>
Initiative and enterprise skills to:	<ul style="list-style-type: none"><li>critically evaluate:<ul style="list-style-type: none"><li>all client requirements for appropriate program design</li><li>successes and failures of program to initiate improvements.</li></ul></li></ul>

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT020 Instruct exercise programs for body composition goals.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for SISFFIT043 Develop and instruct personalised exercise programs for body composition goals

## Modification History

Supersedes and is not equivalent to SISFFIT020 Instruct exercise programs for body composition goals.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document one personalised exercise program that targets specific body composition goals for a total of three clients to collectively include:
  - a female adult
  - a male adult
  - a client seeking to lose weight or fat
  - a client seeking to build muscle or increase weight
- for each of the above three clients:
  - take, record and interpret key body measurements
  - develop and document two personalised session plans, each with a minimum duration of 30 minutes
- instruct two sessions for two of the above clients (four sessions in total), according to session plans, each with a minimum duration of 30 minutes
- consistently use client-centred communication and instructional techniques
- according to actual client interactions or case studies, evaluate the effectiveness of one client program, modify program and session content and document details of the evaluation and changes.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- boundaries and responsibilities of fitness instructors in providing personalised body composition exercise prescription and relationship to duty of care
- information and recommendations contained in fitness industry eating disorder publications, and how fitness instructors can effectively respond to behavioural warnings signs for:
  - eating disorders
  - excessive exercise disorders
  - body dysmorphic disorder
  - muscle dysmorphia

- specific information related to body composition that is provided by pre-exercise screening and fitness assessment processes
- key body measurements, how to take these, and their role as baseline and progress markers in body composition exercise programs:
  - height
  - weight
  - body mass index
  - body circumference including waist, hip and limbs
  - waist to hip ratio
- strengths and limitations of commonly used methods for measuring body composition, information provided in reports and how fitness instructors use for programming purposes:
  - skinfold measurement and analysis
  - bioelectrical impedance analysis
  - air displacement plethysmography
  - DEXA (dual energy X-ray absorptiometry) scans
- aspects of exercise science principles relevant to the design of programs and sessions targeting body composition goals
- exercises that target body composition goals and types of equipment that can be used:
  - muscle maintenance and hypertrophy
  - fat loss
- factors for consideration when selecting exercises for programs targeting body composition goals:
  - current physical activity status of client: sedentary and active as defined in established national guidelines for physical activity
  - building on existing strengths and positives
  - functional and equipment limitations due to existing body composition
- definition and role of the following in developing and instructing exercise programs targeting body composition goals:
  - metabolism and resting metabolic rate
  - energy expenditure, energy intake and the balance between them for body composition maintenance and changes
  - basic concept of thermogenesis, including adaptive thermogenesis, and thermic effects of:
    - food
    - physical activity
- instructional techniques relevant to the delivery of sessions targeting body composition goals including spotting for weight training
- communication techniques used for clients with body composition goals:
  - establishing and maintaining individual rapport
  - motivating individuals to achieve goals, including techniques for intrinsic and extrinsic motivation

- providing constructive feedback and positive reinforcement
- methods used to evaluate effectiveness of personalised exercise programs:
  - ongoing informal discussions with client and targeted questions to elicit opinion about achievement of body composition goals
  - ongoing observation and measurement of client performance and improvements
  - staged formal assessments and comparison measurement.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure the use of:

- interaction with clients; these can be:
  - clients in an industry workplace, or
  - individuals who participate in role plays or simulated activities, used for the purpose of skills assessment
- weight scales
- tape measures which can include stadiometers for measuring height
- equipment required for sessions
- client records which include documentation of:
  - completed industry standard pre-exercise screenings
  - completed fitness assessments
- template exercise program and session plans
- client records and progress charts.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## Links

# **SISFFIT044 Develop and instruct personalised exercise programs for older clients**

## **Modification History**

Supersedes and is not equivalent to SISFFIT014 Instruct exercise to older clients.

## **Application**

This unit describes the performance outcomes, skills and knowledge required to develop and instruct exercise programs and sessions specifically tailored for individual older clients. Older clients are those aged at least 55 years; however, they can be significantly older. It covers skills for evaluating and modifying programs in response to client monitoring and feedback. Programs and sessions take account of the particular issues and risks for older clients.

It requires the ability to promote healthy ageing and integrate information from pre-exercise screenings, fitness assessments, and any medical guidance that may have been received for particular clients, to design suitable programs.

Program design involves effective application of exercise science principles. This unit has a direct relationship with, and is supported by, SISFFIT049 Use exercise science principles in fitness instruction.

This unit applies to personal trainers, who work independently with clients using discretion and judgement to develop and instruct individually tailored client programs. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations, depending on their role.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

  - 3.6. Incorporate injury and fall prevention strategies that respond to exercise and day-to-day risks for older clients.
  - 3.7. Document session plans according to organisational format.
  
4. Instruct exercise sessions for older clients.
  - 4.1. Use and combine verbal, visual and tactile instructional methods according to nature of information and client needs.
  - 4.2. Observe client technique for safety and effectiveness and provide corrective instruction based on observations.
  - 4.3. Provide succinct explanations about the relationship between exercises, client goals and improved health outcomes.
  - 4.4. Monitor client performance against objectives using measures suited to the type of exercise.
  - 4.5. Identify signs of fatigue and exercise intolerance and make required session modifications.
  
5. Encourage and support clients during sessions.
  - 5.1. Encourage and respond to client questions about individual exercises and overall program.
  - 5.2. Use communication techniques that provide positive reinforcement and motivation to client.
  - 5.3. Highlight client's key strengths during instruction and provide information about progression of fitness capabilities.
  - 5.4. Provide feedback to medical and allied health professionals on client response to exercise sessions and seek required further guidance.
  
6. Evaluate program effectiveness.
  - 6.1. Monitor client progression towards goals through ongoing observation and measurements and compare with expectations in program plan.
  - 6.2. Request ongoing feedback from client to identify program likes and dislikes and their views on goal achievement.
  - 6.3. Modify and update program and future sessions according

to feedback and evaluation.

6.4. Update client records with details of evaluation and modifications.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret sometimes unfamiliar information of varying complexity in client pre-exercise screening and medical guidance records, including health and fitness terminology and abbreviations.

Writing skills to:

- produce detailed program and session plans that use fitness terminology and abbreviations for instructional use
- use fundamental sentence structure to complete forms, reports, basic evaluation records and client records that require factual and subjective information.

Oral communication skills to:

- ask open and closed probe questions and actively listen to elicit information from clients and to determine client understanding of information provided
- provide information about healthy ageing to clients using plain language and terms easily understood.

Numeracy skills to:

- complete calculations of varying complexity for program and session plans involving times, frequency, intervals, volume, speeds and loads.

Initiative and enterprise skills to:

- critically evaluate:
  - all client requirements for appropriate program design
  - successes and failures of program to initiate improvements.

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT014 Instruct exercise to older clients.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISFFIT044 Develop and instruct personalised exercise programs for older clients

## Modification History

Supersedes and is not equivalent to SISFFIT014 Instruct exercise to older clients.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document one personalised exercise program for three different clients aged 55 years or over including:
  - a female client
  - a male client
  - a client for whom medical advice has been received
- for each of the above three clients:
  - develop and document two personalised session plans, each with a minimum duration of 30 minutes
  - incorporate exercises and injury prevention strategies suited to older clients
  - incorporate strength and balance exercises that can help prevent falls
- instruct two of the above sessions for two of the clients (four sessions in total), according to session plans, each with a minimum duration of 30 minutes
- consistently use client-centred communication and instructional techniques that are suited to older clients
- according to actual client interactions or case studies:
  - follow protocols for written reports to medical or allied health professionals for one client for whom guidance has been received, and communicate about:
    - client's current fitness capabilities and goals
    - client response to exercise sessions
    - questions, concerns and further guidance sought
  - evaluate the effectiveness of one client program, modify program and session content and document details of the evaluation and changes made.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- boundaries and responsibilities of fitness instructors in providing personalised exercise prescription for older clients and relationship to duty of care
- format and inclusions of client progress reports to medical and allied health professionals

- specific information provided by pre-exercise screening and fitness assessment processes relevant to developing exercise programs for older clients
- current philosophies of service delivery for older people:
  - concept of healthy ageing
  - empowerment
  - re-ablement
  - rights-based approaches
  - client-centred practice
- contents of the key overarching recommendations contained in established national physical activity guidelines for older people
- barriers to exercise for older people:
  - sensory decline, specifically hearing and vision loss
  - discomfort and pain
  - fear of injury and falls
  - fixed income
  - cognitive decline
  - isolation and depression
- common health changes related to ageing:
  - reduced:
    - bone density and risk of osteoporosis
    - coordination and balance
    - muscle mass, strength and physical endurance
    - joint flexibility and mobility
  - increased risk of:
    - falls and injury
    - high cholesterol
    - high blood pressure
    - cardiovascular disease, including coronary heart disease and stroke
    - chronic obstructive pulmonary disease (COPD)
    - cancer
    - osteoarthritis
    - diabetes mellitus
    - mental health issues including depression and anxiety
- exercises suited to older clients that target improvements in the above age related health changes, the particular importance of strength and balance exercises, and types of equipment that can be used
- aspects of exercise science principles relevant to the design of programs and sessions for older clients
- injury risks and issues for older clients during exercise and how to prevent and address these in exercise instruction:
  - falls

- strains
- sore joints
- overexertion
- appropriateness of different demonstration and instruction techniques for effective instruction of older clients
- how older clients with sensory, cognitive and physical decline can be supported during instruction
- communication considerations for older clients:
  - allowing time for interactions
  - avoiding fitness terminology
  - recognising and adapting to visual and hearing impairments
  - being positive and focussing on strengths
  - respecting the older person's rights
  - checking own understanding and the understanding of the older person
- how to recognise and respond to indicators of over exertion and discomfort that can present in older clients, and when exercise should be modified or stopped:
  - chest pain at rest and during activity
  - severe breathlessness, feeling faint, dizziness and loss of balance
  - unusual fatigue and shortness of breath
  - significant muscle, bone and joint pain beyond what is normally expected during exercise
- methods used to evaluate effectiveness of personalised exercise programs:
  - ongoing informal discussions with client and targeted questions to elicit opinion about achievement of goals
  - reports from older clients about improvements to health and functional movement
  - ongoing observation and measurement of client performance and improvements
  - staged formal assessments and comparison measurement.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure the use of:

- interaction with older clients; these can be:
  - older clients in an industry workplace, or

- older people who participate in simulated activities used for the purpose of skills assessment
- equipment required for sessions
- client records which include documentation of:
  - completed industry standard pre-exercise screenings
  - completed fitness assessments
- samples of guidance information provided by medical or allied health professionals
- template progress reports to medical or allied health professionals
- template exercise program and session plans
- client records and progress charts.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

# **SISFFIT045 Develop and instruct personalised exercise programs for adolescent clients**

## **Modification History**

Supersedes and is not equivalent to SISFFIT013 Instruct exercise to young people aged 13 to 17 years.

## **Application**

This unit describes the performance outcomes, skills and knowledge required to complete pre-exercise screening and fitness assessments for individual clients aged thirteen to seventeen years, and to develop and instruct exercise programs and sessions specifically tailored for these clients. It covers skills for evaluating and modifying programs in response to client monitoring and feedback.

Programs and sessions take account of the particular issues and limitations for adolescent clients.

Program design involves effective application of exercise science principles. This unit has a direct relationship with, and is supported by, SISFFIT049 Use exercise science principles in fitness instruction.

This unit applies to personal trainers, who work independently with clients using discretion and judgement to develop and instruct individually tailored client programs. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication. However, individuals must receive formal clearance to work with adolescents through completion of a working with children check required in the relevant State or Territory.

## **Pre-requisite Unit**

## **Competency Field**

Fitness

## **Unit Sector**

Fitness

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Screen and assess adolescent clients.

2. Develop personalised exercise programs for adolescent clients.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Consult with clients and parents or guardians to identify reasons for exercise program, current physical activity and specific goals.
- 1.2. Build client trust and rapport using client-centred and age-appropriate communication, and showing sensitivity and empathy during interactions.
- 1.3. Select and use pre-exercise screening questionnaire and fitness assessment activities and equipment based on client age and stage of development.
- 1.4. Accurately record and evaluate client data to determine current fitness capabilities and explain program implications to clients and parents or guardians.
- 1.5. Identify need for medical guidance prior to participation in exercise programs and communicate to client and parent or guardian.
- 1.6. Develop and document client profile to assist with programming and ongoing evaluation.
- 2.1. Review client goals, stage of development, current fitness capabilities, and medical and physical activity-specific advice in program design.
- 2.2. Determine types of exercises and equipment that are suited to client stage of growth and development.
- 2.3. Determine appropriate training volume and frequency of sessions required to achieve client goals.
- 2.4. Design a systematically structured program that incorporates the effective use of exercise science principles.
- 2.5. Design overall program consistent with client's stage of development and goals and gain parent or guardian informed consent according to procedures.
- 2.6. Document exercise program according to organisational format.

3. Plan individual sessions.
  - 3.1. Determine objectives of individual sessions within overall exercise program.
  - 3.2. Select exercises and equipment suitable for adolescent clients that target client's goals.
  - 3.3. Plan sessions that incorporate volume and intensity and load of exercises appropriate to client's age and existing fitness capabilities.
  - 3.4. Plan for exercise phases and volume within client's preferred session duration.
  - 3.5. Develop sequenced and varied sessions to enhance client motivation and program adherence.
  - 3.6. Incorporate injury prevention strategies that respond to exercise risks and duty of care for adolescent clients.
  - 3.7. Document session plans in according to organisational format.
  
4. Instruct exercise sessions for adolescent clients.
  - 4.1. Use and combine verbal, visual and tactile instructional methods according to nature of information, client age and needs.
  - 4.2. Observe client technique for safety and effectiveness and provide corrective instruction based on observations.
  - 4.3. Monitor client performance against objectives using measures suited to the type of exercise.
  - 4.4. Provide succinct explanations about relationship between exercises and client goals.
  - 4.5. Identify signs of fatigue and exercise intolerance and make required session modifications.
  
5. Encourage and support clients during sessions.
  - 5.1. Encourage and respond to client questions about individual exercises and overall program.
  - 5.2. Use age-appropriate communication techniques that provide positive reinforcement and motivation to client.
  - 5.3. Highlight client's key strengths during instruction and provide information about progression of fitness capabilities.

6. Evaluate program effectiveness.
- 6.1. Monitor client progression towards goals through ongoing observation and measurements and compare with expectations in program plan.
  - 6.2. Request ongoing feedback from client and parent or guardian to identify program likes and dislikes and their views on goal achievement.
  - 6.3. Modify and update program and future sessions according to feedback and evaluation.
  - 6.4. Update client records with details of evaluation and modifications.

# Assessment Requirements for SISFFIT045 Develop and instruct personalised exercise programs for adolescent clients

## Modification History

Supersedes and is not equivalent to SISFFIT013 Instruct exercise to young people aged 13 to 17 years.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete pre-exercise screening and fitness assessments of three different adolescent clients, to collectively include:
  - a female adolescent client
  - a male adolescent client
  - an adolescent client aged between 13 and 15 years
  - an adolescent client aged between 16 and 17 years
- for each of the above three client assessments:
  - determine health risk factors for exercise participation using industry standard screening questionnaire and guidelines for young people
  - select and use activities and equipment appropriate to age and stage of development to assess:
    - cardiovascular endurance
    - muscle strength
    - muscle endurance
    - flexibility
    - functional motor skills
  - accurately record screening and fitness assessment results in client records
- for each of the above three clients:
  - develop and document one personalised exercise program suited to the client age and stage of development
  - develop and document two personalised session plans, each with a minimum duration of 30 minutes
  - incorporate exercises and injury prevention strategies suited to client stage of development
- instruct two sessions for two of above the clients (four sessions in total), according to session plans, each with a minimum duration of 30 minutes
- consistently use client-centred communication and instructional techniques that are suited to client age and stage of development

- develop one 30 minute group session plan and instruct one group session of at least four adolescent clients
- according to actual client interactions or case studies, evaluate the effectiveness of one client program, modify program and session content and document details of the evaluation and changes.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- procedures for obtaining informed consent from parents or guardians
- boundaries and responsibilities of fitness instructors in providing personalised exercise prescription for adolescent clients and relationship to duty of care
- legal requirements for fitness instructors specific to working with adolescents:
  - working with children checks
  - obtaining informed consent from parent or guardian
  - sharing adolescent health information with parents or guardians, including ability of adolescents to limit and refuse information sharing
- format and inclusions of industry standard pre-exercise screening questionnaires and guidelines for young people, and:
  - purpose of different stages of screening questionnaires
  - how to use to identify and evaluate adolescent health risk factors
  - circumstances indicating need for guidance from medical and allied health professionals
- specific health risk factors to be considered in screening adolescents for participation in exercise programs, why these factors are important, and how single and multiple factors contribute to assessment outcomes:
  - heart conditions in adolescents and family history of conditions
  - epilepsy, seizures, convulsions, fainting and dizziness
  - diabetes
  - asthma
  - allergies and anaphylactic reactions
  - surgery in recent months
  - use of medications
- key purpose and overview content of established national guidelines that support the provision of fitness services to adolescents:
  - movement guidelines for children and young people
  - Australian Physical Literacy Framework or its successor
  - industry-developed children's health and fitness services guidelines
- overview of the key stages of development and milestones for adolescent females and males, and implications for exercise programming and instruction at different ages:
  - physical

- social
- emotional
- cognitive
- language
- common reasons why adolescent clients present for personalised exercise prescription and instruction:
  - sport and event specific training goals
  - muscle hypertrophy
  - fat loss
  - developmental and health concerns
- credible sources of information about eating and excessive exercise disorders in adolescents and overview knowledge of:
  - prevalence in adolescents
  - physical, social, and psychological impacts
  - physical and behavioural warnings signs
  - referral options and how fitness instructors can work collaboratively with medical and allied health professionals to support recovery
- methods, exercises and equipment suitable for assessing adolescents in:
  - health related components of fitness:
    - cardiovascular endurance
    - muscle strength
    - muscle endurance
    - flexibility
    - body composition
  - skill related components of fitness:
    - power
    - speed
    - agility
    - coordination
    - balance
    - reaction time
- aspects of exercise science principles relevant to the design of programs and sessions for adolescents
- principles of safe practice when prescribing exercise for adolescents related to:
  - growth and maturation
  - coordination development and control
  - stability
  - posture
  - fundamental movement skills
  - aerobic capacity

- different types of exercises suited to adolescent clients, types of suitable equipment, and safe techniques for their completion:
  - cardiovascular exercises
  - resistance exercises
  - flexibility exercises
  - coordination and balance exercises
- common exercise-related injuries and issues for adolescent clients, and how to prevent and address these in exercise instruction:
  - sprains
  - osteochondrosis including severs and patellofemoral pain syndrome
  - shoulder instability and joint hypermobility
- appropriateness of different demonstration and instruction techniques for effective instruction of adolescent clients of varying ages
- communication considerations for adolescents:
  - recognising stage of cognitive development
  - being positive and focussing on strengths
  - respecting the rights of young people
  - checking own understanding and the understanding of the younger person
- methods used to evaluate effectiveness of personalised exercise programs:
  - ongoing informal discussions with client and parent or guardian, and targeted questions to elicit opinion about achievement of goals
  - ongoing observation and measurement of client performance and improvements
  - staged formal assessments and comparison measurement.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure the use of:

- interaction with adolescent clients; these can be:
  - young clients aged between thirteen to seventeen years in an industry workplace, or
  - young people aged between thirteen to seventeen years who participate in simulated activities used for the purpose of skills assessment, or
  - individuals who role play adolescents during simulated activities
- equipment required for fitness assessments and sessions
- industry standard pre-exercise screening questionnaires and guidelines for young people

- parental informed consent forms
- template exercise program and session plans
- client records and progress charts
- procedures for obtaining informed consent from parents or guardians.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

# SISFFIT046 Plan and instruct online exercise sessions

## Modification History

No equivalent unit.

## Application

This unit describes the performance outcomes, skills and knowledge required to plan and instruct online exercise sessions for individuals or groups of clients. Online exercise activities are diverse in nature and could involve live or pre-recorded on demand sessions.

The focus of this unit is on the specific considerations for the delivery of online exercise sessions. It requires the ability to research, set up and use basic technologies for online instruction and to assess and manage session related safety risks. Exercises are selected based on their suitability for the online environment.

This unit applies to fitness instructors who use considerable discretion and judgement to deliver online sessions as part of a fitness operator's service delivery. It has particular application to personal trainers working independently with clients.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Fitness

## Unit Sector

Fitness

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Establish technology requirements for online exercise sessions.
  - 1.1. Source technologies that support delivery of live and other types of online exercise sessions.
  - 1.2. Research costs, features and capabilities of basic technologies and determine suitability for own fitness instruction activities and client technology capabilities.
  - 1.3. Select technology suited to online exercise activities based on research outcomes.
  - 1.4. Establish and set up hardware and software for effective operation according to technology requirements.
  
2. Assess safety risks associated with online exercise sessions.
  - 2.1. Identify common and foreseeable hazards for clients and others present during online exercise activities.
  - 2.2. Assist clients to identify environmental and equipment hazards in their exercise location.
  - 2.3. Analyse type and level of risk posed by identified hazards.
  - 2.4. Determine ways to eliminate and control risks during delivery of online exercise sessions.
  - 2.5. Confirm suitability of clients for online exercise sessions based on outcomes of pre-exercise screening and available fitness assessments.
  - 2.6. Document outcomes of risk assessment and proposed actions to eliminate and control risks.
  - 2.7. Determine legal and business consideration specific to online exercise delivery.
  
3. Plan online exercise sessions.
  - 3.1. Determine type of session and fitness goals to be targeted.
  - 3.2. Plan all activities according to documented risk assessment outcomes.
  - 3.3. Select exercises and exercise combinations that take account of instructional and monitoring limitations of the online environment.
  - 3.4. Select exercise equipment that will be safe and accessible to clients in their exercise location.
  - 3.5. Identify and incorporate other resources that support and complement the online exercise experience of clients.
  - 3.6. Document session plans according to organisational format.

- |                                       |   |
|---------------------------------------|---|
| 4. Instruct online exercise sessions. | <p>4.1. Set up own online instruction environment and equipment according to session plan and exercise demonstration requirements.</p> <p>4.2. Use and optimise technology features during all session phases.</p> <p>4.3. Support clients with clear advice on technology use for effective participation.</p> <p>4.4. Brief clients about risk management requirements for a safe physical environment for participation.</p> <p>4.5. Combine clear and accurate verbal instructions and exercise technique demonstrations suitable for online viewing.</p> <p>4.6. Monitor participant technique and safety in live sessions and provide corrective instruction based on observations.</p> |
| 5. Evaluate online exercise sessions. | <p>5.1. Seek and acknowledge feedback from clients and evaluate satisfaction with sessions.</p> <p>5.2. Evaluate effectiveness of technology and own performance and identify areas for improvement in online instruction.</p> <p>5.3. Complete session documentation and evaluation according to record keeping procedures.</p>  |

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret unfamiliar technical details about basic technologies that support online exercise instruction.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• use fundamental sentence structure to complete records that require factual and subjective information.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• provide clear and unambiguous information to participants using language and terms easily understood.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• score the level of risk and calculate overall risk level for hazards.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>• critically analyse hazards and logically evaluate associated risks to apply effective and tailored control measures.</li> </ul>

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume implementation guides are found in VETNet -

## Assessment Requirements for SISFFIT046 Plan and instruct online exercise sessions

### Modification History

No equivalent unit.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- research and set up one basic technology for the delivery of live online exercise sessions
- plan, document and instruct three live online exercise sessions, each with a minimum duration of 30 minutes, and include:
  - at least one session for an individual
  - at least one session for a group with a minimum of four and a maximum of eight participants
- across the above three online exercise sessions collectively, instruct exercises with and without equipment
- for each of the above three sessions:
  - assess the safety risks associated with the online exercise session:
    - identify hazards and analyse type and level of associated risk
    - document outcomes of risk assessment and proposed actions to eliminate or control risks
  - set up the online instruction environment and exercise equipment
  - complete participant safety briefing
  - effectively use communication and demonstration techniques suited to the online environment
  - use and optimise technology features effectively
  - complete accurate session documentation and evaluation reports.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- legal and business considerations specific to online exercise service offerings:
  - obligations to manage the safety of remote clients
  - requirements for insurance coverage
  - maintaining privacy of clients when instructing online
  - obtaining informed consent to record client exercise sessions
  - maintaining records for session delivery and evaluation

- different types of online exercise services offered by the fitness industry, and their features, benefits and limitations:
  - personal consultations
  - live online sessions
  - pre-recorded on demand sessions
  - library of pre-recorded individual exercise demonstrations
  - one-to-one services
  - group services with and without instructor interaction
- how different types of online services may work together with an overall suite of exercise service offerings and with personalised client programs
- types and features of basic technologies, both free and paid, that are typically used by fitness instructors to provide online exercise instruction and used for live instruction:
  - hardware
  - software
  - communication capabilities and limitations for live sessions
  - basic troubleshooting
- risk assessment considerations for the safe delivery of online exercise sessions:
  - common types of exercise related hazards in client exercise locations including those that relate to environment, equipment and the presence of other people
  - methods for identifying hazards in client locations, and types of assistance that can be provided to allow clients to identify hazards
  - features of commonly used risk assessment methods and templates
  - methods of eliminating and controlling risks particular to online exercise instruction
  - industry established safety standards and codes of practice
  - documentation requirements for risk assessments
- factors for consideration when determining client suitability for online exercise instruction:
  - outcomes of pre-exercise screening and fitness assessments
  - current capability and previous exercise participation
  - level of physical supervision required
- for online exercise sessions:
  - types of suitable exercises and rationale for their use:
    - those with easier technique
    - those which are easier to demonstrate and explain
    - those which can be suitably viewed and monitored in live online sessions
  - exercise equipment limitations and opportunities for clients to use safe alternative items
  - types of safety information to be provided to clients about the physical environment in which they are exercising
  - instructional limitations and suitable demonstration and communication techniques
  - importance of using appropriate technology to clearly view clients

- challenges for monitoring participant technique and safety and how these can be overcome
- resources that can support and complement online instruction:
  - pre-recorded individual exercise demonstrations
  - fitness tracking equipment and applications
  - applications to allow clients to report progress
- emergency procedures for live sessions
- factors to consider in online exercise session evaluation:
  - effectiveness of technology used
  - suitability of exercises and equipment for the online environment
  - client feedback
  - trainer demonstration, instruction and communication in the online environment.

## Assessment Conditions

Skills must be demonstrated in a workplace or simulated workplace venue suitable for instructing online exercise sessions.

Assessment must ensure the use of:

- interaction with clients in an online environment; these can be:
  - actual clients
  - individuals who participate in simulated activities used for the purpose of skills assessment
- hardware and software for live online exercise instruction
- equipment for demonstrating exercises
- hazard identification and risk assessment templates
- template online exercise session plans
- template evaluation reports.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree.

## **SISFFIT047 Use anatomy and physiology knowledge to support safe and effective exercise**

### **Modification History**

Supersedes and is not equivalent to SISFFIT004 Incorporate anatomy and physiology principles into fitness programming.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to identify the role of anatomy and physiology knowledge in fitness instruction, and to use that knowledge to develop and instruct safe and effective exercise activities.

Knowledge of anatomy and physiology underpins effective performance in a range of work functions for fitness instruction. This unit has direct links to, and supports, a range of units for planning and instructing group and personalised exercise programs.

This unit applies to group fitness instructors, gym instructors and personal trainers. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations, depending on their role.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Fitness

### **Unit Sector**

|--|---|
| 1. Identify role of anatomy and physiology in fitness instruction. | 1.1. Identify credible sources of information about anatomy and physiology that are relevant to fitness instruction.<br>1.2. Review information and identify how it relates to safe and effective fitness training for clients.                         |
| 2. Select effective exercise activities for participants.          | 2.1. Identify aspects of anatomy and physiology that impact selection of suitable exercises for participants.<br>2.2. Select exercises that account for variations associated with participant sex and age.   |
| 3. Support participants to exercise safely and effectively.        | 3.1. Provide succinct explanations about the relationship between exercises and their beneficial impacts on the body and health.<br>3.2. Explain injury risk factors and demonstrate and explain safe and effective exercise technique to participants. |

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret information of varying complexity about anatomy and physiology, including anatomical terminology.

Oral communication skills to:

- explain information that includes anatomical and physiological references using terms that participants can understand
- support verbal explanations using visual aids including diagrams and infographics.

Initiative and enterprise skills to:

- critically analyse information about anatomy and physiology for its application to fitness instruction
- critically interpret and synthesise complex information into participant focussed fundamental information.

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT004 Incorporate anatomy and physiology principles into fitness programming.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for SISFFIT047 Use anatomy and physiology knowledge to support safe and effective exercise

## Modification History

Supersedes and is not equivalent to SISFFIT004 Incorporate anatomy and physiology principles into fitness programming.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- source and review information about anatomy and physiology relevant to fitness instruction from three credible sources, and select specific information for use in different areas of fitness instruction work
- choose two exercises that are suitable for each of the following client types (ten exercises in total):
  - female adults
  - male adults
  - clients aged 55 years or over
  - sedentary clients
  - active clients
- for each of the ten exercises:
  - demonstrate safe and effective exercise technique to clients during either individual or group exercise sessions
  - during session instruction, provide a plain language explanation to the individual client or group about:
    - the relationship between the exercise and its beneficial impacts on the body and health, and muscular function
    - associated injury risk factors and safe exercise technique.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- types of activities where fitness instructors use knowledge of anatomy and physiology:
  - interpreting client health information and related terminology
  - developing exercise programs and sessions appropriate for participant characteristics and goals
  - providing instruction about exercise technique
  - explaining purpose of exercises and answering client questions

- credible sources of information about human anatomy and physiology that draw links with fitness instruction activities
- overview of the six levels of structural organisation of the human body:
  - chemical
  - cellular
  - tissue
  - organ
  - system
  - organism
- basic aspects of the following and any variances for different sexes:
  - cardiovascular system:
    - structure and overall function
    - role of blood and circulation pathways
    - relationships between exercise intensity and circulatory and ventilator responses
    - short- and long-term effects of different types of exercise on blood pressure and cardiorespiratory fitness
  - respiratory system:
    - structure and overall function
    - mechanics of breathing
    - respiratory system demands of exercise activities
  - muscular system:
    - structure and overall function
    - types of muscle tissue and classifications
    - major muscle groups
    - function of muscle proprioceptors
    - functions and actions of major muscles during movement and exercise, and resulting joint actions
    - short- and long-term effects of different types of exercise on muscle
    - changes to the muscular skeletal system over the lifespan
  - skeletal system:
    - structure and overall function
    - major bones, major joints and joint structures
    - bony landmarks
    - short- and long-term effects of different types of exercise on bones and joints
  - nervous system:
    - structure and overall function
    - the specific role of the central and peripheral nervous systems in controlling skeletal muscle
    - nerves and nerve impulses
    - short- and long-term effects of different types of exercise on neuromuscular system

- overview of these aspects of human biomechanics:
  - forces which act on the body during exercise
  - lever systems in the body
- anatomical planes and axes of movement, and relationships to joints and range of movement:
  - sagittal
  - frontal
  - transverse
- meaning of the following anatomical terms of location:
  - medial and lateral
  - anterior and posterior
  - superior and inferior
  - proximal and distal
  - superficial and deep
- meaning of the following anatomical terms relating to movement:
  - flexion
  - extension
  - abduction
  - adduction
  - pronation
  - supination
  - dorsiflexion
  - plantarflexion
  - circumduction
  - inversion
  - eversion
- basics of thermoregulation and its application to exercise activities:
  - processes of heat gain and heat loss
  - effects of environmental conditions
  - effects of dehydration on body temperature
- basic definitions of these types of injuries, and common exercise related causes:
  - primary and secondary
  - direct and indirect
  - acute and overuse
- how exercise activities can be adjusted to safely accommodate common and low risk injuries
- client-focussed plain language explanations of anatomical and physiological information
- types of visual aids that can assist with providing anatomical and physiological information to clients.

## Assessment Conditions

Instructional activities for this unit can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure the use of:

- interaction with individual clients or group exercise participants; these can be:
  - clients or participants in an industry workplace, or
  - people who participate in simulated activities used for the purpose of skills assessment
- equipment required for selected exercise types.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Identify role of anatomy and physiology in aqua fitness instruction.
  - 1.1. Identify situations where aqua instructors use knowledge of anatomy and physiology.
  - 1.2. Identify and use credible sources of information about anatomy and physiology that are relevant to aqua instruction.
2. Select effective water-based exercise activities for participants.
  - 2.1. Identify aspects of anatomy and physiology that impact selection of suitable exercises for participants.
  - 2.2. Select exercises that account for variations associated with participant sex and age.
3. Support participants to exercise safely and effectively.
  - 3.1. Provide succinct explanations about the relationship between water-based exercises and their beneficial impacts on the body and health.
  - 3.2. Explain injury risk factors and demonstrate and explain safe and effective exercise technique to participants.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

# Assessment Requirements for SISFFIT048 Use anatomy and physiology knowledge to support safe and effective water-based exercise

## Modification History

No equivalent unit.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- source and review information about anatomy and physiology relevant to aqua fitness instruction from three credible sources, and select specific information for use in different areas of aqua instruction work
- choose two water-based exercises that are suitable for each of the following participant types (eight exercises in total):
  - female adults
  - participants aged 55 years or over
  - sedentary participants
  - active participants
- for each of the above eight exercises:
  - demonstrate safe and effective exercise technique to participants during group water-based exercise sessions
  - during session instruction, provide a plain language explanation to the group about:
    - the relationship between the exercise and its beneficial impacts on the body and health, to include muscular function and process
    - associated injury risk factors and safe exercise technique.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- types of activities where aqua instructors use knowledge of anatomy and physiology:
  - interpreting participant health information and related terminology
  - developing water-based exercise sessions appropriate for participant characteristics and session goals
  - providing instruction about exercise technique
  - explaining purpose of exercises and answering participant questions
- credible sources of information about human anatomy and physiology that draw links with aqua fitness instruction activities

- basic aspects of the following and any variances for different sexes:
  - cardiovascular system:
    - structure and overall function
    - relationships between water-based exercise intensity and circulatory and ventilator responses
    - short- and long-term effects of water-based exercise on blood pressure and cardiorespiratory fitness
  - respiratory system:
    - structure and overall function
    - mechanics of breathing
    - respiratory system demands of water-based exercise activities
  - muscular system:
    - structure and overall function
    - major muscle groups
    - functions and actions of major muscles during water-based movement and exercise, and resulting joint actions
    - short- and long-term effects of water-based exercise on muscle
    - changes to the muscular skeletal system over the lifespan
  - skeletal system:
    - structure and overall function
    - major bones, major joints and joint structures
    - short- and long-term effects of water-based exercise on bones and joints
- overview of physiological and biomechanical differences between aquatic and land-based exercises
- properties of water and physiological impact and benefits in water-based exercise:
  - mass
  - density
  - viscosity
  - hydrostatic pressure at different depths
- forces that act on the body in water at different depths, and how these affect participants during water-based exercise:
  - buoyancy
  - resistance
  - turbulence
  - propulsion
  - inertia
- basics of thermoregulation and its application to exercising in water:
  - processes of heat gain and heat loss
  - effects of different water temperatures
  - effects of dehydration on body temperature
- basic definitions of these types of injuries, and common exercise related causes:

- primary and secondary
- direct and indirect
- acute and overuse
- how water-based exercise activities can be adjusted to safely accommodate common and low risk injuries
- participant-focussed plain language explanations of anatomical and physiological information.

## Assessment Conditions

Instructional activities for this unit must be demonstrated in an indoor or outdoor pool facility meeting current State or Territory and local government regulations. The facility owner or operator must have guidelines or policies and procedures to regulate the safe operation of the facility and its use by facility users and instructors based on current industry guidelines for safe pool operations.

Pools can be publicly or commercially owned and operated, and in diverse locations including educational institutions, clubs, fitness facilities, gyms, and leisure and community centres.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- rescue equipment
- communication equipment for emergency response.

Assessment must ensure the use of:

- interaction with group participants who are participating in exercise activities within a pool; these can be:
  - group participants in an industry workplace, or
  - group participants who participate simulated activities used for the purpose of skills assessment
- equipment required for selected exercise types.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a qualification or Statement of Attainment which includes this unit of competency, SISFFIT048, and have a collective period of at least two years' experience working in aqua fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## SISFFIT049 Use exercise science principles in fitness instruction

### Modification History

Supersedes and is not equivalent to SISFFIT019 Incorporate exercise science principles into fitness programming.

### Application

This unit describes the performance outcomes, skills and knowledge required to identify how exercise science principles (also known as exercise training principles) apply to fitness instruction, and use those principles in the design and ongoing modification of exercise programs for clients.

This unit has a direct relationship with, and supports the following units involving the application of exercise science and training principles to program design:

- SISFFIT041 Develop personalised exercise programs
- SISFFIT043 Develop and instruct personalised exercise programs for body composition goals
- SISFFIT044 Develop and instruct personalised exercise programs for older clients
- SISFFIT045 Develop and instruct personalised exercise programs for adolescent clients.

This unit applies to personal trainers who work independently with clients using discretion and judgement to develop and deliver individually tailored client exercise programs. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Fitness

### Unit Sector

Fitness

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Identify information sources for exercise science principles relevant to fitness instruction.
2. Incorporate exercise science principles in fitness instruction.
3. Maintain and update knowledge of exercise science.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Identify credible sources of evidence-based information about exercise science principles that are relevant to fitness instruction.
- 1.2. Review information and identify how exercise science principles relate to safe and optimum training and client fitness improvements.
- 1.3. Interpret exercise science terminology and its application to fitness instruction.
- 2.1. Identify relevance of exercise science principles to individual clients at different stages and levels of exercise activity.
- 2.2. Design programs for individual clients that consider client characteristics and goals and appropriate exercise science principles.
- 2.3. Monitor and adjust programs consistent with exercise science principles.
- 3.1. Identify and use opportunities to update and expand knowledge of exercise science relevant to scope of practice for personal trainers.
- 3.2. Use critical thinking processes to evaluate changing and emerging evidence-based information and its application to fitness instruction.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret unfamiliar and complex evidence-based information including scientific, anatomical and physiological terminology.
- interpret numerical information of varying complexity involving times, frequency, intervals, volume and loads
- complete calculation and estimations of varying complexity for program design.

Numeracy skills to:

Learning skills to:

- monitor emerging and changing information for use in own practice.

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT019 Incorporate exercise science principles into fitness programming.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for SISFFIT049 Use exercise science principles in fitness instruction

## Modification History

Supersedes and is not equivalent to SISFFIT019 Incorporate exercise science principles into fitness programming.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- source information from credible sources about the exercise science principles of:
  - adaptation
  - overload
  - specificity
  - individualisation
  - progression and regression
  - reversibility
- evaluate key aspects of the above information relevant to fitness instruction and identify how it can be used to inform the design of personalised exercise programs
- document how exercise science principles are incorporated into the design of four client programs, and record the following details for each client:
  - a profile of the client and how individual characteristics of age, sex, fitness levels and basic physical characteristics have been used to design the program
  - how the program is systematically structured to provide progression towards planned goals and adaptations
  - rationale for the selection of exercises that relate to the principle of specificity
  - how the principle of overload has been used to determine the volume and intensity of exercises and frequency of sessions
  - rationale for the types of recovery that are incorporated into sessions, and how sessions are sequenced to allow recovery from specific types of exercises between sessions.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- credible sources of evidence-based exercise science information that draw links with fitness instruction activities relevant to personal trainers
- meaning and key physiological aspects of the following exercise science principles, how the principles interrelate, and how they underpin exercise program design and instruction:
  - adaptation

- overload
- specificity
- individualisation
- progression and regression
- reversibility
- how each of the exercise science principles is applied to achieve improvements in:
  - health related components of fitness:
    - cardiovascular endurance
    - muscle strength
    - muscle endurance
    - flexibility
    - body composition
  - skill related components of fitness:
    - power
    - speed
    - agility
    - coordination
    - balance
    - reaction time
    - proprioception
- meaning of the following terms as they apply to exercise:
  - acute physiological response
  - chronic physiological adaptation
- key aspects of physiological responses to exercise:
  - cardiovascular system including acute responses and chronic adaptations of the cardiovascular system to aerobic, anaerobic and strength training
  - respiratory system including acute responses and chronic adaptations of the respiratory system to aerobic, anaerobic and strength training
  - musculoskeletal system:
    - acute musculoskeletal responses and chronic adaptations to aerobic, anaerobic and strength training
    - responses of bone, joints and muscle tissue to weight bearing activities
  - neuromuscular system:
    - acute neuromuscular responses and chronic adaptations to aerobic, anaerobic and strength training
    - responses to high intensity, strength, power, speed and hypertrophy training
  - endocrine system:
    - acute responses and chronic adaptations of the endocrine system to anaerobic training
    - acute and chronic hormonal responses to aerobic and strength training

- key aspects of physiological adaptations relevant to participating in long-term and endurance training:
  - energy system and substrate utilisation
  - nervous system improvements
  - improved thermoregulation
  - increased lactate threshold
- key physiological adaptations that occur from both high and low impact training
- role of exercise and fitness in the prevention of common exercise related injuries and day-to-day falls, and types of physiological adaptations that are related to this reduced risk
- meaning of overtraining, common physiological responses, and client signs and symptoms
- key aspects of physiology that relate to short and longer term recovery periods:
  - physiological needs and responses between sets of exercises
  - physiological needs and responses during cool down phase of exercise sessions
  - physiological needs and responses between exercise sessions.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

Assessment must ensure use of:

- evidenced-based information about exercise science principles from credible sources
- exercise program plans.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

# SISFFIT050 Support exercise behaviour change

## Modification History

Supersedes and is not equivalent to SISFFIT016 Provide motivation to positively influence exercise behaviour.

## Application

This unit describes the performance outcomes, skills and knowledge required to establish current patterns of client exercise and support clients to make changes to optimise fitness outcomes, health and wellbeing. Support for behaviour change reflects evidence-based approaches and can be integrated into fitness assessment, program planning, instruction and evaluation.

This unit applies to personal trainers who work independently with clients using discretion and judgement to develop and deliver individually tailored client exercise programs, and to provide support to individual clients. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Fitness

## Unit Sector

Fitness

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Establish current patterns of client exercise.
  - 1.1. Use questioning and active listening to obtain information about client's current exercise patterns, attitudes and motivation for change.
  - 1.2. Build trust and rapport with client by using client-centred communication showing sensitivity and empathy during interactions.
  - 1.3. Identify perceived and actual barriers and other factors that currently influence client exercise behaviour.
  - 1.4. Use information to assess client readiness for change and implications for fitness instruction.
  - 1.5. Identify situations where client needs fall outside scope of own role and refer to relevant health professional.
  
2. Assist clients to plan for change.
  - 2.1. Source and critically evaluate current and emerging evidence-based information about behaviour change to support professional practice and client needs.
  - 2.2. Provide clients with information and techniques for making exercise behaviour change based on their specific needs.
  - 2.3. Explain ways of setting and monitoring exercise activity goals that are specific, measurable and realistic.
  - 2.4. Support clients to set their preferred goals and nominate specific behaviour changes based on their individual exercise program.
  - 2.5. Maintain records of client goals and exercise preferences according to record keeping and confidentiality procedures.
  
3. Support the change process.
  - 3.1. Use observation and client discussion to monitor client progress towards changed behaviour and goals.
  - 3.2. Identify and use opportunities to provide positive feedback and reinforcement to clients about exercise behaviour change.
  - 3.3. Use techniques that address barriers and assist clients to maintain commitment to agreed exercise activities.
  - 3.4. Identify potential changes to improve client outcomes through reflection on client feedback and own performance.
  - 3.5. Adjust goals and approaches in collaboration with client based on reflection and progress being achieved.
  - 3.6. Update client records to reflect changes and progress.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret potentially complex and unfamiliar evidence-based information about exercise behaviour change.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to summarise both factual and subjective information in client records.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>provide clear and succinct information to clients about behaviour change techniques</li><li>ask open and closed probe questions and actively listen to elicit information from clients and to determine client understanding of information provided.</li></ul>

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT016 Provide motivation to positively influence exercise behaviour.

## Links

Companion Volume implementation guides are found in VETNet - <https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISFFIT050 Support exercise behaviour change

## Modification History

Supersedes and is not equivalent to SISFFIT016 Provide motivation to positively influence exercise behaviour.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- source evidence-based information on exercise behaviour change from credible sources
- evaluate key aspects of the above information, and identify how it can be used to provide client-centred behaviour change advice
- support the exercise behaviour change process for three clients as part of the design of their personalised exercise programs, and for each of the three clients:
  - collect information about:
    - client motivation for exercise behaviour change
    - client stage of readiness for change
    - barriers to client exercise participation and adherence
  - assist client to plan for exercise behaviour change according to their individual needs:
    - support client to identify ways they can overcome barriers to exercise participation
    - provide information about behaviour change techniques
    - assist client to nominate behaviour change actions
    - support client to set exercise activity goals
  - consistently use client-centred communication during all interactions
  - maintain client records that include details of information exchanged, client exercise goals, change techniques used and client progress
- for one of the above three clients:
  - monitor client progress towards exercise behaviour change and achievement of exercise activity goals over a four week period via ongoing communications
  - use client-appropriate techniques to enhance client adherence to agreed exercise activities
  - complete a follow up assessment of client and discuss progress, achievements and changing needs.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- procedures for maintaining client records and confidentiality of client information
- scope of practice for a personal trainer in supporting exercise behaviour change:
  - responsibilities and limitations
  - professional boundaries
  - situations where referral to a health professional is required for support with exercise behaviour change and role of relevant health professionals:
    - psychologists
    - general practitioners
- sources of evidence-based information about contemporary and emerging exercise behaviour change techniques
- how to determine the credibility of information sources
- client-centred communication techniques for establishing and building trust and rapport, and how they vary depending on individual client characteristics
- methods of collecting information about client's current exercise knowledge, patterns, attitudes, motivation and commitment to change
- factors that may affect exercise behaviour and the process of change:
  - family, cultural and social determinants
  - established lifestyle behaviours
  - experience of previous attempts at exercise behaviour change
- common barriers to exercise initiation and adherence, and how these may be overcome:
  - low importance placed on exercise
  - time and access to appropriate facilities
  - initial low fitness levels and low confidence
  - previous negative experiences
  - body image concerns
- stages in the behaviour change process and how these apply in a fitness industry context:
  - pre-contemplation
  - contemplation
  - preparation
  - action
  - maintenance
  - relapse
- the role of relapse, when it may occur and how it can be managed
- evidence-based techniques for promoting exercise behaviour change at different stages of fitness planning and implementation:
  - assessment and programming:
    - contracting
    - goal setting
    - client choice and self-direction
  - implementation:
    - exercise selection and variety

- client self-monitoring activities
- using natural supports and social networks
- monitoring:
  - prompts and reinforcement
  - feedback and rewards
  - ongoing assessment and progress measurement
- ways that techniques may be used and adapted for clients at different levels and stages of engagement with exercise activities
- approaches to goal setting and achievement:
  - setting short-, medium- and long-term goals
  - importance of goals that are specific, measurable, achievable, realistic and time based
  - different types of goals:
    - outcome
    - process
    - performance
  - common client strategies that can be used to achieve exercise behaviour change goals
  - recording goals and progress, and types of technology that can assist
- the role of arousal control and basic features of the following strategies in exercise behaviour change:
  - progressive relaxation
  - visualisation
  - positive self-talk
- methods and techniques used to:
  - engage with clients about progress
  - reflect on client feedback and own performance.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

Assessment must ensure use of:

- interaction with clients; these can be:
  - clients in an industry workplace, or
  - individuals who participate in simulated activities used for the purpose of skills assessment
- current information about evidence-based approaches to exercise behaviour change
- template client records for goal setting and recording progress
- procedures for maintaining client records and confidentiality of client information.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

# SISFFIT051 Establish and maintain professional practice for fitness instruction

## Modification History

Supersedes and is not equivalent to SISFFIT015 Collaborate with medical and allied health professionals in a fitness context, and SISFFIT028 Apply evidence-based practice to exercise programs.

## Application

This unit describes the performance outcomes, skills and knowledge required to establish the industry context for fitness instruction work, develop collaborative relationships with medical and allied health professionals, and use reflective practice and critical thinking for ongoing professional development. It requires the ability to identify and evaluate evidence-based information for use in day-to-day fitness instruction activities.

This unit applies to personal trainers who work independently with clients using discretion and judgement to develop and deliver individually tailored client exercise programs, and to provide support to individual clients. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Fitness

## Unit Sector

Fitness

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Establish context for fitness instruction work.
  - 1.1. Identify current fitness industry practices and standards and determine their impact on planning and delivery of exercise programs.
  - 1.2. Research legal and ethical requirements that govern fitness instruction work.
  - 1.3. Evaluate work implications of how fitness instruction roles intersect with, and diverge from, other health-related roles.
  - 1.4. Identify contemporary issues in fitness instruction that directly impact own workplace and clients.
  
2. Develop and maintain collaborative relationships with medical and allied health professionals.
  - 2.1. Identify medical and allied health professionals with whom fitness instructors interact.
  - 2.2. Build trust with medical and allied health professionals through use of professional communication protocols and industry terminology.
  - 2.3. Establish contact with medical and allied health professionals based on client needs and develop shared understanding of respective roles in supporting client outcomes.
  - 2.4. Identify and agree to nature, mode and regularity of communication required.
  - 2.5. Incorporate guidance from medical and allied health professionals when developing and modifying personalised exercise programs.
  - 2.6. Provide feedback on client progress to medical and allied health professionals and make suggestions for exercise activity modifications within the boundaries of agreed roles.

3. Participate in professional reflection and development.
  - 3.1. Identify the role of reflective practice in fitness instruction and how it can be used to improve client outcomes.
  - 3.2. Use reflective practice to identify personal strengths, areas for improvement and opportunities for further learning.
  - 3.3. Seek and use informal and formal input from others to identify own learning needs.
  - 3.4. Identify information from industry organisations and networks that support professional development for fitness instructors.
  - 3.5. Plan and implement steps to address professional development needs based on reflection, feedback and information sourced.
  
4. Maintain evidence-based knowledge for fitness instruction.
  - 4.1. Identify and source evidence-based information to inform decision-making in fitness instruction.
  - 4.2. Use critical thinking processes to evaluate information and its application to own fitness instruction.
  - 4.3. Compare different sources of information and their relative value to own work and clients.
  - 4.4. Extract relevant information and organise in ways that support easy access for use with individual clients.
  - 4.5. Identify opportunities for ongoing development of knowledge and incorporate learning into day-to-day activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- |                     |   |
|---------------------|---|
| Reading skills to:  | <ul style="list-style-type: none"> <li>• interpret varied, unfamiliar and potentially complex evidence-based information that may include health, scientific and industry terminology.</li> </ul> |
| Writing skills to:  | <ul style="list-style-type: none"> <li>• summarise key information from evidence-based research using fundamental sentence structure.</li> </ul>  |
| Numeracy skills to: | <ul style="list-style-type: none"> <li>• interpret statistical data in evidence-based research</li> <li>• complete calculations of varying complexity.</li> </ul>                                 |

- Teamwork skills to:
- share and receive information about varied and potentially complex fitness and health-related issues
  - work collaboratively with medical and allied health professionals.

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT015 Collaborate with medical and allied health professionals in a fitness context, and SISFFIT028 Apply evidence-based practice to exercise programs.

## Links

Companion Volume implementation guides are found in VETNet -

# Assessment Requirements for SISFFIT051 Establish and maintain professional practice for fitness instruction

## Modification History

Supersedes and is not equivalent to SISFFIT015 Collaborate with medical and allied health professionals in a fitness context, and SISFFIT028 Apply evidence-based practice to exercise programs.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- source information from credible sources about the current context for fitness instruction work in Australia, and identify and evaluate key aspects of:
  - three established industry practices or standards
  - three legal or ethical requirements
- use critical thinking processes to analyse and respond to the fitness instruction needs of two clients using evidence-based information for each client need:
  - identify and evaluate current and relevant sources of evidence-based information
  - develop and document a response to the clients needs that is supported by analysis and evidence
- review own professional development:
  - reflect on and evaluate own fitness instruction strengths and areas for improvement
  - identify sources of industry information about professional development and continuing education and document two actions for improving own skills and knowledge
- use industry terminology and follow protocols for professional communication with medical or allied health professionals for two clients with health issues that are ongoing, and communicate:
  - client health and fitness status
  - program progress
  - questions and concerns
  - client response to exercise
  - client goals.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- existence and purpose of established fitness industry practices and standards:

- bodies that develop practices and standards
- types of existing practices and standards, their key inclusions, and primary requirements:
  - industry accreditation and registration quality assurance schemes
  - code of ethical conduct
  - code of practice
  - scope of practice
  - qualification, professional development and continuing education requirements
  - established protocols for pre-exercise screening, assessment and programming
- legal and ethical requirements that govern fitness instructors:
  - maintaining confidentiality of client information including requirements for the collection, use, maintenance and secure storage of private information
  - obtaining and documenting informed consent to share client information
  - duty of care
  - responsibilities under consumer protection laws for fair and honest dealings
  - permit requirements for use of public spaces:
    - bodies that typically issue permits including local government, and how to apply for initial and ongoing permits
    - skill, qualification and accreditation requirements for obtaining permits
    - key compliance requirements, how to manage, and consequences of non-compliance
    - how to factor costs into fees charged for fitness services offered
- environmental sustainability considerations for use of outdoor spaces:
  - typical threats posed by the operation of exercise activities in public outdoor spaces, both environmental and social for local communities and other users
  - typical local government minimal impact codes of practice specific to environmental sustainability, and associated compliance requirements
  - minimal impact practices that can be implemented by fitness instructors
- different models of work for fitness instructors and how those models may impact work practices:
  - when employed:
    - following organisational policies and procedures
    - working under organisational insurance policies
  - when self-employed:
    - developing own policies and procedures
    - establishing legal and risk management requirements for operation, including those for insurance
- relationships between fitness instructors and medical and allied health professionals:
  - types of medical and allied health professionals with whom fitness instructors typically collaborate and their areas of expertise:
    - accredited exercise physiologists

- accredited practising dietitians
- chiropractors
- general practitioners (GPs)
- occupational therapists
- osteopaths
- physiotherapists
- podiatrists
- rehabilitation physicians
- sports physicians
- how to access and search practitioner registers
- referral systems and communication protocols for providing and receiving information about client health, fitness and progress
- basic health and fitness terminology and abbreviations commonly used in communication between fitness instructors and medical and allied health professionals
- benefits of establishing relationships
- respective roles of fitness instructors and medical and allied health professionals in supporting client outcomes
- behaviours that support effective relationships
- barriers to effective relationships
- networking opportunities
- contemporary issues and priorities in fitness instruction that relate to:
  - types of services offered
  - impacts of technology
  - changing demographics
  - population health profile and public health priorities
- reflective practice in fitness instruction:
  - how reflective practice is used to learn from the everyday, and as a process to guide decision making
  - the link with professional development
  - the need for multiple perspectives
  - ways that fitness instructors can use:
    - reflection in action
    - reflection on action
- common steps followed to create a professional development and continuing education plan, typical inclusions and methods of collating information
- definition of evidence-based practice and how it relates to fitness instruction roles
- how to determine the credibility of information sources
- sources of established and credible evidence-based information that underpins fitness instruction:
  - state, federal and global public health bodies
  - Australian and international industry bodies:

- fitness
- sport
- exercise science
- allied health professional associations
- complementary health professional associations
- critical thinking processes for evaluating information:
  - identifying key questions for the evaluation process
  - distinguishing relevant from irrelevant
  - extracting and summarising key details
- ways of organising information to support its use in day-to-day practice.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

Assessment must ensure use of:

- real workplace situations, simulated activities or case studies relevant to this unit and involve communication with medical or allied health professionals
- computers or mobile devices for research
- current information about:
  - fitness industry standards and practices
  - legal and ethical requirements for fitness instruction
  - evidence-based approaches to fitness instruction.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising health or exercise professional with a degree and experience relevant to this unit of competency.

## SISFFIT052 Provide healthy eating information

### Modification History

Supersedes and is not equivalent to SISFFIT005 Provide healthy eating information.

### Application

This unit describes the performance outcomes, skills and knowledge required to provide general, and not individualised, information about healthy eating to fitness clients.

Information is based on the main recommendations of the current Australian national dietary guidelines which aim to promote optimal health and wellbeing for generally healthy people.

The unit requires the ability to recognise situations that are beyond the scope of practice for fitness instructors, and to provide information about the types of medical and allied health professionals with expertise to advise on nutritional needs.

This unit applies to group fitness and gym instructors who practise in settings such as fitness facilities, gyms, and leisure and community centres.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Fitness

### Unit Sector

### Elements and Performance Criteria

#### ELEMENTS

*Elements describe the essential outcomes*

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |  |
|--|--|
| 1. Identify authoritative and evidence-based information.              | 1.1. Source information about healthy eating from the national dietary guidelines that apply to healthy people.<br>1.2. Interpret key national dietary guideline recommendations and healthy eating messages to inform healthy eating advice.  |
| 2. Communicate general healthy eating information to clients.          | 2.1. Advise clients about own role and limitations in providing healthy eating advice.<br>2.2. Provide information consistent with national dietary guidelines to help clients make informed healthy eating choices.<br>2.3. Advise on recommended daily serves of the five food groups outlined in national dietary guidelines.<br>2.4. Provide clear information about discretionary foods and inform clients about limiting daily intake.<br>2.5. Explain the benefits of healthy food and beverage choices, and impact of poor choices on health and wellbeing.<br>2.6. Show sensitivity to cultural and social differences that may influence food choices.<br>2.7. Provide accurate information about the role of healthy eating as part of a fitness program. |
| 3. Identify clients who require nutrition advice outside of own scope. | 3.1. Identify characteristics of clients who require nutrition advice beyond scope of practice and recognise risks of providing information to those clients.<br>3.2. Provide information about types of health professionals with required expertise to clients who require nutritional advice outside scope of practice.   |

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret key overarching recommendations of national dietary guideline documentation.

Oral communication skills to:

- provide information to clients using plain language and terms easily understood
- ask open and closed probe questions to clarify information needs and actively listen to determine client understanding of information.

- Numeracy skills to:
- interpret numerical aspects of the national dietary guidelines including recommended and proportional food intakes in different food groups.
- Learning skills to:
- use information provided in national guidelines to update and extend knowledge of healthy eating practices.
- Technology skills to:
- access and use national dietary guideline documentation.

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT005 Provide healthy eating information.

## Links

Companion Volume implementation guides are found in VETNet -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISFFIT052 Provide healthy eating information

## Modification History

Supersedes and is not equivalent to SISFFIT005 Provide healthy eating information.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- provide healthy eating information from the Australian national dietary guidelines to three clients and include information about:
  - the five food groups and their recommended proportional daily intakes
  - discretionary foods that should be eaten only sometimes and in small amounts
- according to actual client interactions or case studies:
  - identify three situations outside scope of own practice for providing nutrition advice
  - for each above situation:
    - advise client why their nutrition needs are outside scope of own role
    - provide information about the type of medical or allied health professional with relevant expertise.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- roles of medical and allied health professionals in providing nutritional advice and their expertise in addressing different needs:
  - accredited practising dietitians (APD)
  - accredited sports dietitians (AccSD)
  - general practitioners
- differences and similarities between the roles and skills of dietitians and nutritionists
- common consumer expectations of fitness instructors to provide nutrition and weight management advice, and:
  - purpose and content of established industry guidelines for scope of practice for fitness instructors in providing nutrition advice
  - own role and limitations in providing nutritional advice to clients
  - techniques used to positively communicate with clients about scope of own role and knowledge
  - how industry guidelines assist fitness instructors to appropriately respond to client enquiries outside their scope of practice

- opportunities for fitness instructors to promote and support healthy eating with clients
- how nutritional needs differ for special population clients, and characteristics of clients who require nutrition advice beyond fitness instructor scope of practice:
  - those with chronic conditions
  - the frail elderly
  - pregnant and breastfeeding women
  - clients who show signs of having an eating disorder as identified in established industry guidelines
  - any client seeking individualised information outside the scope of the population level recommendations in national dietary guidelines
- risks to clients of fitness instructors providing nutrition-related advice outside scope of practice:
  - nutrient deficiencies and imbalances
  - exposure to low energy availability (LEA) and overview of LEA impacts
  - negative impact on existing health conditions
  - food intolerance and allergy adverse reactions
  - negative food-drug interactions
  - nutrition confusion
  - financial burden of product recommendations
- risks to fitness instructors of providing nutrition-related advice outside scope of practice, specifically the potential professional, legal and financial consequences
- key contents of current Australian national dietary guidelines and associated resources:
  - the principal recommendations and guidelines
  - characteristics and examples of types of foods in the five food groups
  - proportions of the five food groups recommended for consumption each day
  - characteristics and examples of discretionary foods to be avoided
- healthy eating:
  - benefits of healthy eating
  - relationship to physical wellbeing
  - how healthy eating can impact on client health and fitness goals and outcomes
  - the role of healthy eating in a fitness program and basic aspects of how nutrition and exercise interrelate
- potential impacts of unhealthy food choices and eating patterns on general health and wellbeing and:
  - diet-related risk factors for chronic disease, including high cholesterol, high blood pressure and obesity
  - risk of chronic diseases including type 2 diabetes, cardiovascular disease and some types of cancers
- effects of cultural and social influences on food choices.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace set up for the purpose of skills assessment.

Assessment must ensure use of:

- interaction with clients; these can be:
  - clients in an industry workplace, or
  - individuals who participate in simulated activities used for the purpose of skills assessment
- established fitness industry guidelines for providing nutrition advice within scope of practice for fitness instructors
- current Australian national dietary guidelines and associated resources:
  - the principal recommendations and guidelines
  - guides to healthy eating
  - consumer brochures.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate III or IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising dietitian, sports dietitian, health or exercise professional with a degree and experience relevant to this unit of competency.

# SISFFIT053 Support healthy eating for individual fitness clients

## Modification History

Supersedes and is not equivalent to SISFFIT025 Recognise the dangers of providing nutrition advice to clients, and SISFFIT026 Support healthy eating through the Eat for Health Program.

## Application

This unit describes the performance outcomes, skills and knowledge required to identify individual client needs for healthy eating advice, and provide information that supports clients to establish healthier eating patterns. Information is based on the current Australian national dietary guidelines and associated resources which aim to promote optimal health and wellbeing for generally healthy people.

The unit requires the ability to recognise situations that are beyond the scope of practice for fitness instructors and to provide referrals to medical and allied health professionals with expertise to advise on nutritional needs.

This unit applies to personal trainers who work independently with clients using discretion and judgement to plan for and deliver exercise programs, and to provide support to individual clients. They practise in settings such as fitness facilities, gyms, leisure and community centres, client workplaces and homes and outdoor locations.

The skills in this unit must be applied in accordance with Commonwealth and State or Territory legislation, Australian standards and industry codes of practice.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Fitness

## Unit Sector

Fitness

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Identify client needs for nutrition advice.
  - 1.1. Consult with client to confirm their nutritional goals and clarify their expectations and need for nutrition advice.
  - 1.2. Explain boundaries of own role in providing nutritional advice to clients based on industry guideline scope of practice for fitness instructors.
  - 1.3. Identify clients with nutritional needs beyond own scope of practice and provide referral to medical and allied health professionals with expertise to advise on nutritional needs.
  
2. Provide healthy eating advice within scope of own role.
  - 2.1. Seek information on client's daily pattern of eating and compare with recommendations in national dietary guidelines and associated support resources.
  - 2.2. Provide feedback to client on their identified eating patterns and how they align with national dietary guidelines.
  - 2.3. Use a person-centred approach to assist client to identify changes to eating patterns to align with their health, fitness and nutritional goals.
  - 2.4. Provide information about patterns of healthy eating and appropriate proportions of different food types based on national dietary guidelines and associated support resources.
  - 2.5. Advise on limiting daily intake of discretionary foods outlined in national dietary guidelines.
  
3. Support clients to adopt and sustain healthier eating patterns.
  - 3.1. Use client-centred communication showing sensitivity and empathy to support sustained behaviour change.
  - 3.2. Assist clients to modify their daily patterns of eating to align with their nutritional goals.
  - 3.3. Provide clients with information about daily living strategies that support healthy eating.
  - 3.4. Maintain records of information provided and client goals and progress according to record keeping and confidentiality procedures.
  
4. Evaluate effectiveness of advice to clients.
  - 4.1. Seek and evaluate feedback from clients about value of healthy eating support.
  - 4.2. Identify potential changes to improve client outcomes and own practice through reflection on client feedback and own performance.
  - 4.3. Identify and use opportunities to update and expand knowledge of evidence-based nutritional information

relevant to scope of practice for fitness instructors.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret key recommendations and detailed implementation advice in national dietary guideline documentation and associated support resources.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to complete forms and reports that require factual and subjective information.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>provide information to clients using plain language and terms easily understood</li><li>ask open and closed probe questions and actively listen to elicit information from clients and to determine client understanding of information provided.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>interpret numerical and measurement information in national dietary guidelines and on food labels, expressed in kilojoules, cups, grams, millilitres, centimetres, percentages and fractions.</li></ul>

## Unit Mapping Information

Supersedes and is not equivalent to SISFFIT025 Recognise the dangers of providing nutrition advice to clients, and SISFFIT026 Support healthy eating through the Eat for Health Program.

## Links

# Assessment Requirements for SISFFIT053 Support healthy eating for individual fitness clients

## Modification History

Supersedes and is not equivalent to SISFFIT025 Recognise the dangers of providing nutrition advice to clients, and SISFFIT026 Support healthy eating through the Eat for Health Program.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- support healthy eating for three fitness clients and for each of the three clients:
  - identify daily eating patterns
  - compare daily eating patterns with the recommendations of Australian national dietary guidelines
  - assist clients with change to achieve healthier eating patterns using national dietary guidelines and associated resources, and:
    - provide information about daily patterns of healthy eating and recommended proportions of the five food groups
    - provide examples of healthy meals and snacks
    - provide information about healthy ways to prepare and cook food
    - educate clients about how to interpret nutrition information on food labels
  - consistently use client-centred communication during all interactions
  - maintain accurate records of client goals and advice provided
  - seek and evaluate feedback from clients and consider ways to improve own practice
- according to actual client interactions or case studies, respond to two clients seeking advice or services outside scope of own practice for providing nutrition advice, and for each client:
  - advise client why their nutrition needs are outside scope of own role
  - provide information about the appropriate type of medical or allied health professional with relevant expertise
  - write a referral that provides clear information about the client and the reasons for referral.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- procedures for maintaining client records and confidentiality of client information
- client-centred communication techniques for establishing and building trust and rapport to support behaviour change

- role and limitations of fitness instructors in providing nutritional advice to clients, and:
  - purpose and content of established fitness industry guidelines for providing nutrition advice within scope of practice for fitness instructors
  - reasons for confining information and advice that is consistent with current Australian dietary guidelines and support resources
  - potential professional, legal and financial consequences of providing nutrition-related advice outside of scope of practice
- how to screen clients to identify the type and depth of advice they are seeking about their nutrition needs
- techniques used to positively communicate with clients about scope of own role and knowledge
- appropriate responses to common fitness-related client requests and situations that require referral to medical and allied health professionals involving:
  - detailed nutritional assessment
  - personalised meal planning to meet a specific goal including advice and plans for weight loss and weight gain goals
  - high intensity, high volume and high level sports performance requirements
  - advice and recommendations on specific diet, eating trends and specific popular diets
  - nutritional supplements and specialised foods including for performance, medical and general health purposes
  - ergogenic aids
  - queries about nutrition and medication interactions
- risks to clients of fitness instructors providing nutrition-related advice outside scope of practice:
  - nutrient deficiencies and imbalances
  - exposure to relative energy deficiency in sport (RED-S) and overview of RED-S impacts
  - negative impact on existing health conditions
  - food intolerance and allergy adverse reactions
  - negative food-drug interactions
  - nutrition confusion
  - financial burden of product recommendations
- how to find information about available accredited practising dietitians (APD) and accredited sports dietitians (AccSD) in the local area
- benefits of working in collaboration with medical and allied health professionals for both fitness instructors and clients
- format and inclusions of referral letters to medical and allied health professionals
- information and recommendations contained in fitness industry eating disorder publications, and how fitness instructors can effectively respond to behavioural warnings signs for:
  - eating disorders
  - excessive exercise disorders

- muscle dysmorphia
- sources of authoritative and evidence-based information about nutrition and how to determine credibility
- the meaning of key nutritional terms:
  - diet
  - healthy eating
  - nutrition
  - nutrients including macronutrients and micronutrients, and overview of how the body uses these
- how to locate and use information from current Australian dietary guideline resources to provide healthy eating advice to individual fitness clients:
  - full guideline and summary documents
  - consumer brochures
  - teaching tools
- key population level recommendations and healthy eating guidance contained in current Australian national dietary guidelines and associated resources:
  - the principal recommendations and guidelines
  - characteristics of the five food groups and the nutrients they contribute to the diet
  - daily patterns of healthy eating and recommended proportions of the five food groups
  - types of discretionary foods to be limited and why
- methods and tools for collecting information about client daily eating patterns and how to evaluate this against national dietary recommendations
- strategies, informed by national dietary guidelines, that support clients with healthy eating:
  - how to interpret food labels including health star rating labelling systems to support healthier food choices
  - types of healthy meals and snacks
  - healthy ways to prepare and cook food
- the benefits to health and emotional wellbeing of combining healthy eating and physical activity
- methods used to evaluate support provided to clients:
  - client evaluation questionnaires
  - informal conversations with clients
  - self-reflection on client responses to information including difficulties in understanding and implementing.

## Assessment Conditions

Skills can be demonstrated in:

- the workplace, or
- a simulated workplace, set up for the purpose of skills assessment.

Assessment must ensure use of:

- interaction with clients; these can be:
  - clients in an industry workplace, or
  - individuals who participate in simulated activities used for the purpose of skills assessment
- established fitness industry guidelines for providing nutrition advice within scope of practice for fitness instructors
- fitness industry eating disorder publications
- current Australian national dietary guidelines and associated resources:
  - full guideline and summary documents
  - consumer brochures
  - teaching tools
- template referral letters
- procedures for maintaining client records and confidentiality of client information.

Assessors must:

- satisfy the Standards for Registered Training Organisations requirements for assessors, and
- hold a Certificate IV in Fitness, and have a collective period of at least two years' experience working in fitness instruction, where they have applied the skills and knowledge covered in this unit of competency; the two years' experience can incorporate full and part time experience, or
- be a registered or accredited practising dietitian, sports dietitian, health or exercise professional with a degree and experience relevant to this unit of competency.

## SISOABL001 Lead adventure-based learning activities

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead adventure-based learning activities in situations where the overall responsibility for the session or program rests with a more experienced facilitator.

It requires the ability to interpret activity requirements, assist with participant goal setting, briefing and debriefing, and to interact with participants for effective learning outcomes.

This unit applies to any type of organisation that delivers adventure-based learning programs including commercial, not-for-profit and government organisations.

It applies to those who work as assistant facilitators under supervision and according to guidance provided by adventure-based learning facilitators. They may work alongside the lead facilitator or have access to a supervisor for instructions when needed.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Adventure Based Learning

### Unit Sector

Outdoor Recreation

### Elements and Performance Criteria

#### ELEMENTS

#### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Confirm details for activity.
  - 1.1. Discuss, with activity lead facilitator or supervisor, participant characteristics, abilities and learning needs.
  - 1.2. Confirm, with lead facilitator or supervisor, program plan, objectives, learning outcomes, session plans and facilitation techniques.
  - 1.3. Determine individual roles, tasks and responsibilities.
  - 1.4. Confirm activity safety and emergency response procedures to ensure compliance of self and participants during activities.
2. Prepare participants.
  - 2.1. Participate in individual and group discussions to assist participants set realistic goals for activities in line with session learning outcomes.
  - 2.2. Discuss and determine, with participants, potential individual and group guidelines for their action and behaviour.
  - 2.3. Brief participants on known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.
3. Facilitate session activities.
  - 3.1. Respond to participant queries about activity requirements and techniques to engender trust and participant confidence.
  - 3.2. Motivate and encourage participants to keep them engaged and challenged.
  - 3.3. Observe individual actions and group interaction and provide constructive feedback throughout session.
  - 3.4. Encourage cooperation between individual group members.
  - 3.5. Monitor and maintain compliance with safety procedures and agreed individual and group guidelines.
  - 3.6. Assist participants facing physical or emotional difficulties and report any emerging issues related to group interaction and safety.
4. Participate in activity debrief and evaluation
  - 4.1. Participate in individual and group discussions to assist participants identify achievement of goals.
  - 4.2. Assist participants to formulate ideas for transferring learning.
  - 4.3. Debrief with team members to identify successes, problems and difficulties.
  - 4.4. Review own performance and discuss how to improve.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret unfamiliar and potentially complex information about participant characteristics, session plans and objectives.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>provide clear and unambiguous instructions to participants using language and terms easily understood</li><li>ask open and closed probe questions and actively listen to determine participants' level of engagement and comfort with challenges.</li></ul>
Learning skills to:	<ul style="list-style-type: none"><li>review own performance and comments from others to identify skills that need development.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>pro-actively and cooperatively work within teams of facilitators to deliver effective outcomes for participants.</li></ul>

## Unit Mapping Information

No equivalent unit.

## Links

## Assessment Requirements for SISOABL001 Lead adventure-based learning activities

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three different adventure-based learning sessions for a group of participants according to predetermined session plans
- during each session consistently:
  - work within role boundaries and responsibilities, and follow any directions provided by lead facilitator or supervisor
  - communicate clearly and positively with participants to assist with motivation, group cohesion and trust
  - monitor and maintain participant adherence to safety procedures
- after each session, assist in facilitating a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to respond to a total of three incidents involving the physical and emotional safety of participants during activities.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for activity sessions
- role boundaries and responsibilities of assistant facilitators, lead facilitators or supervisors for adventure-based learning activities
- definitions of experiential learning and adventure-based learning and how these are similar in principle and practice
- basic principles and theories of the transfer of learning from one context to others
- key features and phases of the adventured based learning cycle:
  - ice breaking and briefing
  - goal setting
  - development of trust
  - adventure activity participation
  - processing and debriefing
  - transfer of learning

- at a fundamental level of understanding, principles and theories of group formation and stages of group development
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - elicit ideas and feedback
- key principles of group dynamics and techniques used to manage positive group dynamics
- signs, stages and levels of conflict within groups and techniques used to resolve at early stage of escalation
- format and inclusions of program and session plans.

## Assessment Conditions

Skills must be demonstrated in an environment specific to the particular type of indoor or outdoor recreation activity, and the following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment relevant to the recreational activity.

Assessment must ensure use of:

- a group of participants whom the individual leads
- adventure-based facilitators who supervise the candidate; these can be:
  - lead facilitators or supervisors in an industry workplace, or
  - people who participate in role plays or simulated activities during the assessment
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit involving responses to the physical and emotional safety of participants during activities
- activity and personal protective equipment specific to the particular type of recreation activity
- program and session plans
- organisational safety and emergency response procedures for activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an adventure-based learning facilitator; the three years' experience can incorporate full and or part time experience.

## SISOABL002 Facilitate adventure-based learning activities

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to facilitate learning through adventure activities according to a pre-designed adventure based learning program which might be self-developed or developed by others. It requires the ability to adjust program content and manage all learning activities to encourage participant engagement.

This unit applies to any type of organisation that delivers adventure-based learning programs including commercial, not-for-profit and government organisations.

It applies to adventured-based learning facilitators who work independently using discretion and judgement to manage learning activities, risk, and any significant problems when they arise.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Adventure Based Learning

### Unit Sector

Outdoor Recreation

### Elements and Performance Criteria

#### ELEMENTS

#### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |   |
|---|---|
| <p>1. Prepare for program delivery.</p>                               | <p>1.1. Identify, from program plans, participant characteristics, learning needs and any barriers to learning.</p> <p>1.2. Interpret program plan, objectives, learning outcomes, session plans and facilitation techniques.</p> <p>1.3. Refine learning activities according to needs of individual participants, within scope of responsibility or refer for authorisation.</p>  |
| <p>2. Prepare participants.</p>                                       | <p>2.1. Advise participants on how learning during activities can transfer to life and work circumstances.</p> <p>2.2. Guide and support participants to set realistic individual and group goals consistent with activity learning outcomes.</p> <p>2.3. Negotiate individual and group guidelines to inform participant action and behaviour.</p> <p>2.4. Brief participants on known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p>  |
| <p>3. Manage adventure-based learning activities.</p>                 | <p>3.1. # Assessment Requirements for SISOABL002 Facilitate adventure-based learning activities

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- facilitate three different adventure-based learning sessions for a group of participants according to predetermined program and session plans
- during each session consistently:
  - monitor individual and group progression
  - monitor and maintain group cohesion
  - manage participant adherence to safety procedures
- across the three sessions, collectively use four different experiential facilitation techniques to be chosen from the following list:
  - funnelling
  - cognitive hierarchy
  - challenge by choice
  - working agreements
  - isomorphic framing
  - indirect frontloading
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit participant capabilities and responses
  - manage a total of three incidents involving the physical and emotional safety of participants during activities.

## Knowledge Evidence

**Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:**

- principles and theories of experiential learning in the context of adventure-based learning:
  - the transfer of learning from one context to others
  - sequencing of activities to achieve effective staged learning outcomes
- key features and phases of the adventure-based learning cycle:

- ice breaking and briefing
- goal setting
- development of trust
- adventure activity participation
- processing and debriefing
- transfer of learning
- key features and phases of different adventure-based experiential learning models:
  - linear
  - cyclical
  - spiral
  - nested loop
- key principles and theories of a range of facilitation techniques used in adventure-based learning activities:
  - funnelling
  - cognitive hierarchy
  - challenge by choice
  - working agreements
  - isomorphic framing
  - indirect frontloading
- for each of the above techniques:
  - advantages, disadvantages and limitations
  - appropriateness for a range of ages, learning needs and learning abilities
  - ethical issues related to their use
- principles and theories of group formation and stages of group development
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
- key principles of group dynamics and techniques used to manage positive group dynamics
- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- format and inclusions of program and session plans
- methods and tools used to monitor individual and group development during programs.

## Assessment Conditions

Skills must be demonstrated in an environment specific to the particular type of indoor or outdoor recreation activity, and the following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment relevant to the recreational activity.

Assessment must ensure use of:

- a group of participants whom the individual facilitates
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications to meet participant needs
  - managing incidents involving the physical and emotional safety of participants during activities
- activity and personal protective equipment specific to the particular type of recreation activity
- program and session plans.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an adventure-based learning facilitator where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOABL003 Design adventure-based learning programs

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to design adventure-based learning programs to meet the objectives and learning needs of participants and enhance their learning opportunities.

Programs may be developed for general consumer groups but would generally be customised to the needs of a particular client group.

This unit applies to any type of organisation that delivers adventure-based learning programs including commercial, not-for-profit and government organisations.

It applies to senior personnel who work autonomously and who are responsible for making decisions at an organisational level. This includes program managers and senior facilitators and leaders who may also deliver the program.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Adventure-based Learning

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

| 3. Evaluate effectiveness of the program. | 3.1. Develop methods and tools to monitor individual and group development during programs.                        |
|   | 3.2. Liaise with delivery personnel throughout program operation to identify successes, problems and difficulties. |
|   | 3.3. Obtain and evaluate feedback from delivery personnel, client groups and participants.                         |
|   | 3.4. Evaluate program according consultation with others.  |
|   | 3.5. Modify and continuously improve current and future programs according to feedback and program evaluation.     |

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Writing skills to:

- document comprehensive adventure-based learning programs using language easily understood by clients and all staff
- prepare detailed session plans incorporating correct terminology and jargon for activities and experiential facilitation techniques.

Self-management skills to:

- take responsibility for program development from initial research through to evaluation
- critically evaluate successes and failures of program to initiate improvements.

## Unit Mapping Information

No equivalent unit.

## Assessment Requirements for SISOABL003 Design adventure-based learning programs

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- design and document two different adventure-based learning programs tailored to the particular needs of two different types of participant groups
- for each of the above programs, develop and document at least three sequential session plans
- across the two planned programs, collectively incorporate the use of four different experiential facilitation techniques to be chosen from the following list:
  - funnelling
  - cognitive hierarchy
  - challenge by choice
  - working agreements
  - isomorphic framing
  - indirect frontloading
- for one of the above programs, utilise options provided in Assessment Conditions to:
  - evaluate feedback from delivery personnel and participants
  - modify aspects of the program according to evaluation.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for completing risk assessments
- common program objectives and learning needs of different key consumer markets for adventure-based learning programs:
  - corporate clients
  - school and other education groups
  - people with disability
  - youth at risk
  - offenders
- types of external service providers and how they can assist with identifying individual and group learning needs and barriers to learning:

- counsellors
- therapists
- specialist teachers
- human resource officers
- how characteristics of participants affect the choice of recreational activities and experiential program design:
  - age, size and weight
  - current experience in the recreational activity and skill level
  - fitness level and physical capabilities
  - injuries and medical conditions
  - emotional, behavioural and intellectual ability or disability
  - learning objectives
  - complex learning needs and barriers to learning
- principles and theories of experiential learning in the context of adventure-based learning:
  - the transfer of learning from one context to others
  - sequencing of activities to achieve effective staged learning outcomes
- key features and phases of the adventured based learning cycle:
  - ice breaking and briefing
  - goal setting
  - development of trust
  - adventure activity participation
  - processing and debriefing
  - transfer of learning
- key features and phases of different adventure-based experiential learning models:
  - linear
  - cyclical
  - spiral
  - nested loop
- key principles and theories of a range of facilitation techniques used in adventure-based learning activities:
  - funnelling
  - cognitive hierarchy
  - challenge by choice
  - working agreements
  - isomorphic framing
  - indirect frontloading
- for each of the above techniques:
  - advantages, disadvantages and limitations
  - appropriateness for a range of ages, learning needs and learning abilities
  - ethical issues related to their use

- format and inclusions of program and session plans
- methods and tools used to monitor individual and group development during programs.

## Assessment Conditions

Assessment must ensure use of:

- clients, external service providers and team members with whom the individual interacts; these can be:
  - clients, external service providers and team members in an industry workplace, or
  - people who participate in role plays or simulated activities during the assessment
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to evaluating program feedback and modifying programs
- participant profiles to include:
  - age, size and weight
  - current experience in the recreational activity and skill level
  - fitness level and physical capabilities
  - injuries and medical conditions
  - emotional, behavioural and intellectual ability or disability
  - learning objectives
  - complex learning needs and barriers to learning
- template:
  - adventure-based learning program plans
  - session plans
- organisational policies and procedures for completing risk assessments.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing adventure-based learning programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOABS001 Abseil single pitches using fundamental skills

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to abseil single pitches at a fundamental skill level and to belay other abseilers.

It applies to assistant leaders and support staff who use these skills when assisting with the delivery of recreational abseiling activities for groups of participants. They work under close supervision, and according to instructions and guidance provided by supervising activity leaders who may be guides or instructors.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Abseiling

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for the abseil.
  - 1.1. Select clothing, footwear and personal protective equipment suitable for the abseil and conditions.
  - 1.2. Confirm activity safety and emergency response procedures to ensure compliance during activities.
  - 1.3. Confirm protocols for communications between abseiler and belayer.
  - 1.4. Discuss and identify, with supervising leader, position of natural features and the abseil route.
  - 1.5. Attach descending device to abseil rope and tie knots suitable for the established belay system and check with supervising leader.
  - 1.6. Complete equipment safety checks prior to abseiling or belaying.
2. Abseil using single pitch descent techniques.
  - 2.1. Use safety procedures at top of and throughout descent to minimise risk to self and others present.
  - 2.2. Use appropriate posture and abseiling techniques to execute descents.
  - 2.3. Safely approach, avoid or negotiate hazards to descend in a controlled manner.
  - 2.4. Maintain effective communication with belayer throughout descent.
3. Belay abseilers under supervision.
  - 3.1. Avoid or negotiate hazards and use safety procedures to minimise risk to self and others present.
  - 3.2. Establish belaying position and attach self to anchor, as required, to allow effective and safe use of belay system.
  - 3.3. Maintain rope tension to minimise fall distance and ensure abseiler movement is not unduly restricted.
  - 3.4. Monitor abseiler progress constantly, and maintain clear communication with abseiler.
  - 3.5. Arrest falls promptly using technique suitable to belaying device and situation, and seek leader's assistance to allow abseiler to continue.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret detailed and familiar organisational safety and emergency response procedures.

- Oral communications skills to:
- use clear and unambiguous verbal and non-verbal communications to make intent known.
- Numeracy skills to:
- estimate load on ropes to determine appropriate tension for abseiling and belaying.
- Teamwork skills to:
- cooperatively work with supervising leader to take direction.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume Implementation Guides -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISOABS001 Abseil single pitches using fundamental skills

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete a total of four single pitch abseils with a belayer on at least two different pitches
- during each of the above abseils, consistently:
  - follow supervising leader's direction
  - follow safety procedures and safely negotiate hazards to descend in a controlled manner
  - connect self to abseil and belay system using appropriate device and or knots
- belay abseilers according to safety procedures, and complete the following:
  - two top rope, top belayed descents
  - one bottom braked descent
  - two simulated abseiler falls with assistance from supervising leader.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for abseiling activities
- purpose, features, and correct fit for safety, of personal protective equipment for abseiling to include:
  - clothing
  - footwear
  - gloves, advantages and disadvantages
  - abseiling/climbing helmets
  - harnesses of different types
- operational function of abseiling equipment:
  - carabiners
  - static and dynamic rope and when each might be used
  - tape
  - sewn sling
  - Prusik cord

- descending devices
- belay systems
- belay devices
- types of equipment and knots used, and how to tie them, when:
  - attaching descending devices to abseil ropes
  - attaching belay system to anchors
  - attaching self to anchor
- types of personal and equipment safety checks completed prior to abseiling and belaying
- abseiling techniques and appropriate posture
- techniques for belaying others during abseils to include those for:
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension
  - controlling bottom brake system
  - arresting abseiler falls and working with supervising leader to allow abseiler to continue
- reasons for attaching belayer to anchor system when belaying others including:
  - minimising belayer movement to retain stable position and stance
  - minimising effects of force of abseiler fall and risk of injury to belayer
  - minimising risks of belayer fall
- communication protocols used between abseilers and belayers to include:
  - calls
  - hand signals
  - whistles
  - radio
- typical hazards for single pitch abseiling, and techniques used to safely negotiate these:
  - falling objects and gear
  - abrasion points
  - sharp edges or fittings and fixtures
  - ledges
  - slippery or unstable terrain
  - tangled rope.

## Assessment Conditions

Skills may be demonstrated on indoor or outdoor single pitches and on either natural or artificial surfaces or a combination of both. Artificial surfaces can be fixed or portable structures.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment

- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during abseiling activities
- activity leaders, guides or instructors, who supervise the candidate
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
  - gloves, as required
- anchors which can include:
  - fixed artificial, naturally occurring or artificial removable anchors for natural surface abseils
  - established anchors for an artificial structure
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - descending devices
  - belay devices
- template safety checklists
- organisational safety and emergency response procedures for abseiling activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an abseiling leader, guide or instructor; the three years' experience can incorporate full and or part time experience.

# SISOABS002 Abseil single pitches, artificial surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to abseil single pitches on artificial surfaces which can be fixed or portable structures found in indoor or outdoor environments. It also requires the ability to belay abseilers and to self-belay.

It applies to leaders, guides or instructors who use these when skills leading participants during abseiling activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Abseiling

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for the abseil.
  - 1.1. Select clothing, footwear and personal protective equipment suitable for the abseil and conditions.
  - 1.2. Confirm activity safety and emergency response procedures to ensure compliance during activities.
  - 1.3. Confirm protocols for communications between abseiler and belayer.
  - 1.4. Interpret route description; identify position of artificial features and the abseil route.
  - 1.5. Attach descending device to abseil rope and tie knots suitable for the established belay system.
  - 1.6. Complete equipment safety checks prior to abseiling or belaying.
2. Abseil using single pitch descent techniques.
  - 2.1. Use safety procedures at top of and throughout descent to minimise risk to self and others present.
  - 2.2. Use appropriate posture and abseiling techniques to execute descents.
  - 2.3. Safely approach, avoid or negotiate hazards to descend in a controlled manner.
  - 2.4. Maintain effective communication with belayer throughout descent.
  - 2.5. Use techniques that minimise damage to equipment and the surface during abseil.
3. Belay abseilers during single pitch descents.
  - 3.1. Avoid or negotiate hazards and use safety procedures to minimise risk to self and others present.
  - 3.2. Establish belaying position and attach self to anchor, as required, to allow effective and safe use of belay system.
  - 3.3. Maintain rope tension to minimise fall distance and ensure abseiler movement is not unduly restricted.
  - 3.4. Monitor abseiler progress constantly, and maintain clear communication with abseiler.
  - 3.5. Arrest falls promptly using technique suitable to belaying device and situation.
  - 3.6. Safely and efficiently secure abseiler using tie off techniques; release tie off and allow abseiler to continue.
4. Self-belay during single pitch descents.
  - 4.1. Attach self to suitable belay device for descent with back up to maintain safety in the event of a fall.
  - 4.2. Use appropriate posture and abseiling techniques to execute self-belayed descents.
  - 4.3. Control self-belay system to execute safe and controlled descents.
  - 4.4. Utilise features of back up belay system in the event of a fall to self-arrest, self-rescue and complete descent.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

## Assessment Requirements for SISOABS002 Abseil single pitches, artificial surfaces

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete the following single pitch abseils on artificial pitches:
  - four descents with a belayer
  - two self-belayed descents
- during each of the above abseils, consistently:
  - follow safety procedures and safely negotiate hazards to descend in a controlled manner
  - connect self to abseil and belay system using appropriate device and or knots
- complete two additional self-belayed descents, simulating a self-arrest and self-rescue to complete the descent
- belay abseilers according to safety procedures, and complete the following:
  - three top rope, top belayed descents
  - one bottom braked descent
  - two simulated abseiler falls, and safely and efficiently secure and release abseilers to continue.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for abseiling activities
- purpose, features, and correct fit for safety, of personal protective equipment for abseiling on artificial surfaces to include:
  - clothing
  - footwear
  - gloves, advantages and disadvantages
  - abseiling/climbing helmets
  - harnesses of different types, advantages and disadvantages
- features, functions and operation of abseiling equipment used on artificial surfaces:
  - carabiners
  - static and dynamic rope and when each might be used

- tape
- sewn sling
- Prusik cord
- descending devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- belay systems:
  - top rope top belay
  - bottom brake
  - self-belay
- belay devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- types of equipment and knots used, and how to tie them, when:
  - attaching descending devices to abseil ropes
  - attaching belay system to anchors
  - attaching self to back up belay system for self-belays
  - attaching self to anchor
- types of personal and equipment safety checks completed prior to abseiling and belaying
- abseiling techniques and appropriate posture for descents on artificial surfaces to include those for:
  - walking backwards
  - self-belayed descents
- techniques for belaying others during abseils on artificial surfaces to include those for:
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension
  - controlling bottom brake system
  - arresting abseiler falls
  - securing abseiler, tying off belay system and releasing
- reasons for attaching belayer to anchor system when belaying others including:
  - minimising belayer movement to retain stable position and stance
  - minimising effects of force of abseiler fall and risk of injury to belayer

- minimising risks of belayer fall
- communication protocols used between abseilers and belayers to include:
  - calls
  - hand signals
  - whistles
- typical hazards for single pitch abseiling on artificial surfaces and structures, and techniques used to safely negotiate these:
  - sharp or protruding fittings and fixtures
  - surface irregularities
  - ledges
  - tangled rope
  - falling objects
- how to care for abseiling equipment during activities to avoid damage, and promote long lifespan
- techniques used to minimise damage to artificial abseiling surfaces and structures when abseiling.

## Assessment Conditions

Skills may be demonstrated in an indoor or outdoor environment where recreational single pitch abseils are completed on artificial surfaces. Artificial surfaces can be fixed or portable structures.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during abseiling activities
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
  - gloves, as required
- established anchors for the artificial structure
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling

- Prusik cords
- descending devices
- belay devices
- template safety checklists
- organisational safety and emergency response procedures for abseiling activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an abseiling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

# SISOABS003 Abseil single pitches, natural surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to abseil single pitches on natural surfaces such as cliff faces. It also requires the ability to belay abseilers and to self-belay.

It applies to leaders, guides or instructors who use these skills when leading participants during abseiling activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Abseiling

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for the abseil.
  - 1.1. Select clothing, footwear and personal protective equipment suitable for the abseil and conditions.
  - 1.2. Confirm activity safety and emergency response procedures to ensure compliance during activities.
  - 1.3. Confirm protocols for communications between abseiler and belayer.
  - 1.4. Interpret route description; identify position of natural features and the abseil route.
  - 1.5. Attach descending device to abseil rope and tie knots suitable for the established belay system.
  - 1.6. Complete equipment safety checks prior to abseiling or belaying.
2. Abseil using single pitch descent techniques.
  - 2.1. Use safety procedures at top of and throughout descent to minimise risk to self and others present.
  - 2.2. Use appropriate posture and abseiling techniques to execute descents.
  - 2.3. Safely approach, avoid or negotiate hazards to descend in a controlled manner.
  - 2.4. Maintain effective communication with belayer throughout descent.
  - 2.5. Use techniques that minimise damage to equipment and the surface during abseil.
3. Belay abseilers during single pitch descents.
  - 3.1. Avoid or negotiate hazards and use safety procedures to minimise risk to self and others present.
  - 3.2. Establish belaying position and attach self to anchor, as required, to allow effective and safe use of belay system.
  - 3.3. Maintain rope tension to minimise fall distance and ensure abseiler movement is not unduly restricted.
  - 3.4. Monitor abseiler progress constantly, and maintain clear communication with abseiler.
  - 3.5. Arrest falls promptly using technique suitable to belaying device and situation.
  - 3.6. Safely and efficiently secure abseiler using tie off techniques; release tie off and allow abseiler to continue.
4. Self-belay during single pitch descents.
  - 4.1. Attach self to suitable belay device for descent with back up to maintain safety in the event of a fall.
  - 4.2. Use appropriate posture and abseiling techniques to execute self-belayed descents.
  - 4.3. Control self-belay system to execute safe and controlled descents.
  - 4.4. Utilise features of back up belay system in the event of a fall to self-arrest, self-rescue and complete descent.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

# Assessment Requirements for SISOABS003 Abseil single pitches, natural surfaces

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete the following single pitch abseils on at least two different natural pitches:
  - a total of four descents with a belayer
  - a total of two self-belayed descents
- during each of the above abseils, consistently:
  - follow safety procedures and safely negotiate hazards to descend in a controlled manner
  - connect self to abseil and belay system using appropriate device and or knots
- complete two additional self-belayed descents, simulating a self-arrest and self-rescue to complete the descent
- belay abseilers according to safety procedures, and complete the following:
  - three top rope, top belayed descents
  - one bottom braked descent
  - two simulated abseiler falls, and safely and efficiently secure and release abseilers to continue.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for abseiling activities
- purpose, features, and correct fit for safety, of personal protective equipment for abseiling on natural surfaces to include:
  - clothing
  - footwear
  - gloves, advantages and disadvantages
  - abseiling/climbing helmets
  - harnesses of different types, advantages and disadvantages
- features, functions and operation of abseiling equipment used on natural surfaces:
  - carabiners
  - static and dynamic rope and when each might be used

- tape
- sewn sling
- Prusik cord
- descending devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- belay systems:
  - top rope top belay
  - bottom brake
  - self-belay
- belay devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- types of equipment and knots used, and how to tie them, when:
  - attaching descending devices to abseil ropes
  - attaching belay system to anchors
  - attaching self to back up belay system for self-belays
  - attaching self to anchor
- types of personal and equipment safety checks completed prior to abseiling and belaying
- abseiling techniques and appropriate posture for descents on natural surfaces to include those for:
  - walking backwards
  - self-belayed descents
- techniques for belaying others during abseils on natural surfaces to include those for:
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension
  - controlling bottom brake system
  - arresting abseiler falls
  - securing abseiler, tying off belay system and releasing
- reasons for attaching belayer to anchor system when belaying others including:
  - minimising belayer movement to retain stable position and stance
  - minimising effects of force of abseiler fall and risk of injury to belayer

- minimising risks of belayer fall
- communication protocols used between abseilers and belayers to include:
  - calls
  - hand signals
  - whistles
  - radio
- typical hazards for single pitch abseiling on natural surfaces, and techniques used to safely negotiate these:
  - falling rocks, water, debris, gear
  - abrasion points
  - sharp edges
  - squeezes and overhangs
  - ledges
  - traverses
  - slippery or unstable terrain
  - dense vegetation and trees
  - strong breezes
  - tangled rope
- how to care for abseiling equipment during activities to avoid damage, and promote long lifespan
- techniques used to minimise damage to abseiling surfaces in natural environments when abseiling.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where recreational single pitch abseils are completed on natural surfaces. Pitches can feature:

- undercut edges
- low angled anchors
- vertical and near vertical surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during abseiling activities
- personal protective equipment to include:
  - abseiling or climbing helmets

- harnesses
- gloves, as required
- anchors which can include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - descending devices
  - belay devices
- template safety checklists
- organisational safety and emergency response procedures for abseiling activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an abseiling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

## SISOABS004 Abseil multi pitches, natural surfaces

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to abseil multi pitches on natural surfaces such as cliff face and cave pitches. It also requires the ability to belay abseilers and to self-belay.

It applies to leaders, guides or instructors who use these skills when leading participants during abseiling activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Abseiling

### Unit Sector

Outdoor Recreation

### Elements and Performance Criteria

#### ELEMENTS

*Elements describe the essential outcomes*

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for the abseil.
  - 1.1. Select clothing, footwear and personal protective equipment suitable for the abseil and conditions.
  - 1.2. Confirm activity safety and emergency response procedures to ensure compliance during activities.
  - 1.3. Confirm protocols for communications between abseiler and belayer.
  - 1.4. Interpret route description; identify position of natural features and the abseil route.
  - 1.5. Attach descending device to abseil rope and tie knots suitable for the established belay system.
  - 1.6. Complete equipment safety checks prior to abseiling or belaying.
2. Abseil using multi pitch descent techniques.
  - 2.1. Use safety procedures at top of and throughout all descents to minimise risk to self and others present.
  - 2.2. Use appropriate posture and abseiling techniques to execute descents to each station.
  - 2.3. Safely approach, avoid or negotiate hazards to descend to stations in a controlled manner.
  - 2.4. Maintain effective communication with belayer throughout all descents.
  - 2.5. Retrieve ropes at bottom of each pitch, as last person down.
  - 2.6. Use techniques that minimise damage to equipment and the surface during abseil.
3. Change over safely at belay stations.
  - 3.1. Maintain continuous attachment to anchor points, traverse line or belay system.
  - 3.2. Changeover personal equipment from one rope system to another at belay stations, tie suitable knots and handle ropes without entanglement.
  - 3.3. Complete safety checks prior to loading belay system and before completing subsequent descents.
4. Belay abseilers during multi pitch descents.
  - 4.1. Avoid or negotiate hazards and use safety procedures to minimise risk to self and others present.
  - 4.2. Establish belaying position and attach self to anchor, as required, to allow effective and safe use of belay system.
  - 4.3. Maintain rope tension to minimise fall distance and ensure abseiler movement is not unduly restricted.
  - 4.4. Monitor abseiler progress constantly, and maintain clear communication with abseiler.
  - 4.5. Arrest falls promptly using technique suitable to belaying device and situation.
  - 4.6. Safely and efficiently secure abseiler using tie off techniques; release tie off and allow abseiler to continue.

- |  |  |
|--|--|
| 5. Self-belay during multi pitch descents. | 5.1. Attach self to suitable belay device for descent with back up to maintain safety in the event of a fall.          |
|  | 5.2. Use appropriate posture and abseiling techniques to execute self-belayed descents.                                |
|  | 5.3. Control self-belay system to execute safe and controlled descents.  |
|  | 5.4. Utilise features of back up belay system in the event of a fall to self-arrest, self-rescue and complete descent. |

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed and familiar organisational safety and emergency response procedures.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>• use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• visually estimate angles, estimate load on ropes to determine appropriate tension for abseiling and belaying.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• manage own timing to complete activities within planned timeframes.</li> </ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOABS004 Abseil multi pitches, natural surfaces

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete the following multi pitch abseils on at least two different routes:
  - a total of four descents with a belayer
  - a total of three self-belayed descents with one of those descents as last person down using a doubled rope descent
- during each of the above abseils, consistently:
  - follow safety procedures and safely negotiate hazards to descend in a controlled manner
  - connect self to abseil and belay system using appropriate device and or knots
- complete two additional self-belayed descents, simulating a self-arrest and self-rescue to complete the descent
- belay abseilers according to safety procedures, and complete the following:
  - three top rope, top belayed descents
  - one bottom braked descent
  - two simulated abseiler falls, and safely and efficiently secure and release abseilers to continue.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for abseiling activities
- purpose, features, and correct fit for safety, of personal protective equipment for abseiling on natural surfaces to include:
  - clothing
  - footwear
  - gloves, advantages and disadvantages
  - abseiling/climbing helmets
  - harnesses of different types, advantages and disadvantages
- features, functions and operation of abseiling equipment used on natural surfaces:
  - carabiners

- static and dynamic rope and when each might be used
- tape
- sewn sling
- personal attachment systems, including cow's tails
- Prusik cord
- descending devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- belay systems:
  - top rope top belay
  - bottom brake
  - self-belay
- belay devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- types of equipment and knots used, and how to tie them, when:
  - attaching descending devices to abseil ropes
  - attaching belay system to anchors
  - attaching self to back up belay system for self-belays
  - attaching self to anchor
- types of personal and equipment safety checks completed prior to abseiling and belaying
- abseiling techniques and appropriate posture for multi pitch descents on natural surfaces to include those for:
  - walking backwards
  - self-belayed descents
  - changing over at re-belays and using personal attachment system
  - self-belayed descent as last person down, doubled rope
- techniques for belaying others during abseils on natural surfaces to include those for:
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension
  - controlling bottom brake system
  - arresting abseiler falls

- securing abseiler, tying off belay system and releasing
- reasons for attaching belayer to anchor system when belaying others including:
  - minimising belayer movement to retain stable position and stance
  - minimising effects of force of abseiler fall and risk of injury to belayer
  - minimising risks of belayer fall
- communication protocols used between abseilers and belayers to include:
  - calls
  - hand signals
  - whistles
  - radio
- typical hazards for multi pitch abseiling on natural surfaces, and techniques used to safely negotiate these:
  - falling rocks, water, debris, gear
  - abrasion points
  - sharp edges
  - squeezes and overhangs
  - ledges
  - traverses
  - slippery or unstable terrain
  - dense vegetation and trees
  - strong breezes
  - tangled rope
  - rope catches or jams on natural features
  - abseiling past a belay station
  - limited space at belay station
  - uneven landing at belay station
- how to care for abseiling equipment during activities to avoid damage, and promote long lifespan
- techniques used to minimise damage to abseiling surfaces in natural environments when abseiling.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where recreational multi pitch abseils are completed on natural surfaces which might include cliff face or cave pitches. Pitches can feature:

- undercut edges
- low anchors at start
- vertical and near vertical surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during abseiling activities
- personal protective equipment to include:
  - abseiling, climbing or caving helmets
  - harnesses
  - gloves, as required
- anchors which can include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - personal attachment systems, including cow's tails
  - Prusik cords
  - descending devices
  - belay devices
- template safety checklists
- organisational safety and emergency response procedures for abseiling activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an abseiling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

# SISOABS005 Establish ropes for single pitch abseiling on artificial surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to select and set up belay systems and ropes suitable for single pitch recreational abseils on artificial surfaces. It requires the ability to select the abseil route and to select and utilise fixed anchors. Artificial surfaces can be fixed or portable structures and rigging can be for indoor or outdoor environments.

It applies to rigging staff and activity leaders who work independently or with limited guidance from others.

This unit applies to any type of organisation that delivers recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Abseiling

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Select route and equipment suitable for the abseil.
  - 1.1. Identify safe access to and egress from the pitch.
  - 1.2. Determine descent and ascent route appropriate for conditions.
  - 1.3. Select an abseiling and belay system suitable for the abseil, conditions and participant.
  - 1.4. Choose a belay device suitable for the artificial surface conditions and belayer.
  - 1.5. Select other equipment to suit abseil requirements and participants.
  - 1.6. Complete safety and serviceability checks on equipment and tag faulty equipment according to organisational procedures.
2. Set up belay system for artificial surface abseils.
  - 2.1. Select anchors and assess condition, including performance under likely load.
  - 2.2. Set up belay systems using existing fixed anchors.
  - 2.3. Select and tie appropriate knots, and rig ropes suitable for load and function within the belay system.
  - 2.4. Establish a belay from which belayer is independent of the system
  - 2.5. Establish a belay that maintains safety of belayer and abseiler.
  - 2.6. Position top rope or bottom brake belay away from hazards, or remove as able.
  - 2.7. Determine need for, and establish, back up belay systems.
  - 2.8. Complete safety checks according to organisational procedures.
3. Rig rope pitches for artificial surface abseils.
  - 3.1. Rig ropes to minimise effects of rope stretch and rub points and to allow efficient ascent and descent.
  - 3.2. Set up anchors and ropes to allow for a rescue.
  - 3.3. Select and tie knots suitable for system type established.
  - 3.4. Minimise risk of cross loading and mis-alignment of carabiners.
  - 3.5. Verify manufacturers' recommendations, equipment limitations and safety margins, and rig equipment accordingly.
  - 3.6. Complete safety checks according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed familiar organisational procedures for completing safety checks.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to complete safety and serviceability forms and fault tags that require factual information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>calculate loads for anchors and ropes under normal conditions and in the event of a fall</li><li>visually estimate distances to calculate lengths for ropes.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>follow a logical equipment selection, rigging and checking process.</li></ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOABS005 Establish ropes for single pitch abseiling on artificial surfaces

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- select and set up belay systems and ropes suitable for single pitch abseils on artificial surfaces for three different pitches
- collectively set up the following types of systems:
  - single rope
  - releasable abseil line
  - top rope top belay
  - bottom brake belay
  - self-belay
- collectively select and use at least three different types of anchors
- collectively select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
- identify and tag three different types of faulty equipment.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for safety and serviceability checks
- how the following factors affect selection of descent and ascent routes for artificial surfaces:
  - season of operation, weather and environmental conditions for outdoor abseils
  - participant characteristics including age, size, weight, fitness and abseiling skill level
  - group objectives and size
- hazards specific to abseiling on artificial surfaces and how these affect:
  - safe access to and egress from the pitch
  - choice of descent and ascent routes for safety of abseiler
  - positioning of top or bottom belay systems for safety of belayer
- features, functions, advantages and disadvantages of different types of anchors applicable to fixed or portable artificial abseiling structures:
  - bolts

- chains
- bollards
- eyelets
- U bolts
- beams
- poles
- wire cables
- single point anchors, multi-point anchors, angles and limiting knots
- issues that are assessed when selecting anchors and likely impacts of poor condition on performance under load:
  - wear and abrasion due to age and use
  - corrosion
  - decay
  - dislodgment
- meaning of the following terms, and principles which apply when rigging anchors and ropes:
  - equalisation of load
  - single point of failure
  - anchor redundancy
  - angle of separation
  - shock loading
  - cross loading and cyclical loading of carabiners
  - mis-alignment of carabiners
- types of forces (upwards, downwards) generated during abseiling and belaying, and how to calculate load on anchors and ropes for these circumstances:
  - top rope top belay
  - bottom brake belay
  - self-belay
  - abseiler descending under control
  - abseiler fall
  - belayer arresting falls
- the effects of rope stretch during operations and implications if not minimised:
  - abrasions
  - rope bounce
  - undue stress on the anchor system
  - potential for abseiler to impact with hazards, or become entangled
- features, functions, advantages and disadvantages of the following abseiling and belay equipment used on artificial surfaces:
  - abseiling and belay systems for:
    - single rope

- releasable abseil line
- top rope top belay
- bottom brake belay
- self-belay
- descending devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- belay devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- carabiners
- harnesses of different types
- static and dynamic rope and when each might be used
- rope protectors
- tape
- sewn sling
- Prusik cord
- how the following factors affect the selection and rigging of above equipment:
  - site characteristics including position of rub points
  - weather and environmental conditions for outdoor abseils on artificial surfaces
  - participant size, weight, and abseiling ability
  - cumulative load for group size and number of abseils
  - abseiling techniques to be used
  - distance, height and angle of anchor relative to top edge of abseil
- manufacturers' specifications for equipment use
- techniques used to establish belay systems for safety of belayer:
  - rigging belays for performance of rescues
  - attaching to anchor or self belay safety system
- situations requiring back up belay systems
- when different knots are used, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight

- end to end joining
- termination
- load control hitches
- slide and grip hitches
- types of safety checks completed for rigging of equipment
- how to care for abseiling equipment when rigging to avoid damage, and promote long lifespan.

## Assessment Conditions

Skills may be demonstrated in an indoor or outdoor environment where rigging is completed for recreational single pitch abseils on artificial surfaces. These can include fixed or portable structures.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
  - gloves, as required
- established anchors for the artificial structure
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - descending devices
  - belay devices
- template safety checklists
- organisational procedures for safety and serviceability checks.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an abseiling activity leader or rigger, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can be part time or full time experience.

# SISOABS006 Establish ropes for single pitch abseiling on natural surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to select and set up belay systems and ropes suitable for single pitch recreational abseils on natural surfaces, such as cliff faces, and according to current conditions. It requires the ability to select the abseil route and to select and utilise fixed artificial, naturally occurring or artificial removable anchors.

It applies to rigging staff and activity leaders who work independently or with limited guidance from others.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Abseiling

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Select route and equipment suitable for the abseil.
  - 1.1. Identify safe access to and egress from the pitch.
  - 1.2. Determine descent and ascent route appropriate for conditions.
  - 1.3. Select an abseiling and belay system suitable for the abseil, environmental conditions and participant.
  - 1.4. Choose a belay device suitable for the natural surface conditions and belayer.
  - 1.5. Select other equipment to suit abseil requirements and participants.
  - 1.6. Complete safety and serviceability checks on equipment and tag faulty equipment according to organisational procedures.
2. Set up belay system for natural surface abseils.
  - 2.1. Select anchors and assess condition, including performance under likely load and stability of surroundings.
  - 2.2. Rig or establish multiple anchors, ensuring equalisation and minimise potential for shock loading.
  - 2.3. Select and tie appropriate knots, and rig ropes suitable for load and function within the belay system.
  - 2.4. Establish a belay from which belayer is independent of the system.
  - 2.5. Establish a belay that maintains safety of belayer and abseiler.
  - 2.6. Position top rope or bottom brake belay away from hazards, or remove as able.
  - 2.7. Determine need for, and establish, back up belay systems.
  - 2.8. Complete safety checks according to organisational procedures.
3. Rig rope pitches for natural surface abseils.
  - 3.1. Rig ropes to minimise effects of rope stretch and rub points and to allow efficient descent and ascent.
  - 3.2. Set up anchors and ropes to allow for a rescue.
  - 3.3. Select and tie knots suitable for system type established.
  - 3.4. Minimise risk of cross loading and mis-alignment of carabiners.
  - 3.5. Verify manufacturers' recommendations, equipment limitations and safety margins, and rig equipment accordingly.
  - 3.6. Rig to minimise impact on the natural environment.
  - 3.7. Complete safety checks according to organisational

procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

# Assessment Requirements for SISOABS006 Establish ropes for single pitch abseiling on natural surfaces

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- select and set up belay systems and ropes suitable for single pitch abseils at three different natural pitches
- collectively set up the following types of systems:
  - single rope
  - releasable abseil line
  - rope systems suitable for single rope techniques
  - top rope top belay
  - bottom brake belay
  - self-belay
- collectively select and use these different types of anchors:
  - fixed artificial
  - naturally occurring
  - artificial removable
- collectively select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
- identify and tag three different types of faulty equipment.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for safety and serviceability checks
- how the following factors affect selection of descent and ascent routes for natural surfaces including:
  - season of operation, weather and environmental conditions
  - participant characteristics including age, size, weight, fitness and abseiling skill level
  - group objectives and size
- environmental hazards specific to abseiling on natural surfaces and how these affect:
  - safe access to and egress from the pitch
  - choice of descent and ascent routes for safety of abseiler

- positioning of top or bottom belay systems for safety of belayer
- features, functions, advantages and disadvantages of different types of anchors used for abseiling on natural surfaces including:
  - fixed artificial:
    - threads
    - bolts
    - chains
    - concrete bollards
  - naturally occurring:
    - trees
    - boulders
  - artificial removable:
    - spring loaded camming devices
    - nuts, wires and hexes
    - pitons
- issues that are assessed when selecting anchors and likely impacts of poor condition on performance under load:
  - wear and abrasion due to age and use
  - corrosion
  - decay
  - dislodgment
  - underlying stability of structural features and presence of:
    - cracks
    - deformities
    - fissures
- meaning of the following terms, and principles which apply when rigging anchors and ropes:
  - equalisation of load
  - single point of failure
  - anchor redundancy
  - angle of separation
  - shock loading
  - cross loading and cyclical loading of carabiners
  - mis-alignment of carabiners
  - closing the system, including advantages, disadvantages and methods used
- types of forces (upwards, downwards) generated during abseiling and belaying, and how to calculate load on anchors and ropes for these circumstances:
  - top rope top belay
  - bottom brake belay
  - self-belay

- abseiler descending under control
- abseiler fall
- belayer arresting falls
- the effects of rope stretch during operations and implications if not minimised:
  - abrasions
  - rope bounce
  - undue stress on the anchor system
  - potential for abseiler to impact with hazards, or become entangled
- features, functions, advantages and disadvantages of the following abseiling and belay equipment used on natural surfaces:
  - abseiling and belay systems for:
    - single rope
    - releasable abseil line
    - rope systems suitable for single rope techniques
    - top rope top belay
    - bottom brake belay
    - self-belay
  - descending devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - carabiners
  - harnesses of different types
  - static and dynamic rope and when each might be used
  - rope protectors
  - tape
  - sewn sling
  - Prusik cord
- how the following factors affect the selection and rigging of above equipment:
  - site characteristics including position of rub points

- weather and environmental conditions
- participant size, weight, and abseiling ability
- cumulative load for group size and number of abseils
- abseiling techniques to be used
- distance, height and angle of anchor relative to top edge of abseil
- manufacturers' specifications for equipment use
- techniques used to establish belay systems for safety of belayer:
  - rigging belays for performance of rescues
  - attaching to anchor or self belay safety system
- situations requiring back up belay systems
- when different knots are used, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight
  - end to end joining
  - termination
  - load control hitches
  - slide and grip hitches
- types of safety checks completed for rigging of equipment
- how to care for abseiling equipment when rigging to avoid damage, and promote long lifespan
- potential environmental impacts of rigging for abseils on natural surfaces including cliff faces and techniques used to minimise damage.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where rigging is completed for recreational single pitch abseils on natural surfaces. Pitches can feature:

- undercut edges
- low anchors at start
- vertical and near vertical surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses

- gloves, as required
- anchors to include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - descending devices
  - belay devices
- template safety checklists
- organisational procedures for safety and serviceability checks.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an abseiling activity leader or rigger, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can be part time or full time experience.

# SISOABS007 Establish ropes for multi pitch abseiling on natural surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to select and set up belay systems and ropes suitable for multi pitch recreational abseils on natural surfaces, such as cliff face and cave pitches, and according to current conditions. It requires the ability to select the abseil route and to select and utilise fixed artificial, naturally occurring or artificial removable anchors.

It applies to rigging staff and activity leaders who work independently or with limited guidance from others.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Abseiling

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Select route and equipment suitable for the abseil.
  - 1.1. Identify safe access to and egress from the pitch.
  - 1.2. Determine descent and ascent route appropriate for conditions.
  - 1.3. Select an abseiling and belay system suitable for the abseil, environmental conditions and participant.
  - 1.4. Choose a belay device suitable for the natural surface conditions and belayer.
  - 1.5. Select other equipment to suit abseil requirements and participants.
  - 1.6. Complete safety and serviceability checks on equipment and tag faulty equipment according to organisational procedures.
2. Set up belay system for natural surface abseils.
  - 2.1. Select anchors and assess condition, including performance under likely load and stability of surroundings.
  - 2.2. Rig or establish multiple anchors, ensuring equalisation and minimise potential for shock loading.
  - 2.3. Select and tie appropriate knots, and rig ropes suitable for load and function within the belay system.
  - 2.4. Establish a belay from which belayer is independent of the system.
  - 2.5. Establish a belay that maintains safety of belayer and abseiler.
  - 2.6. Position top rope or bottom brake belay away from hazards, or remove as able.
  - 2.7. Determine need for, and establish, back up belay systems.
  - 2.8. Complete safety checks according to organisational procedures.
3. Rig rope pitches for natural surface abseils.
  - 3.1. Rig ropes to minimise effects of rope stretch and rub points and to allow efficient descent and ascent.
  - 3.2. Rig retrievable abseil systems suitable for the top rope or bottom brake belay requirements.
  - 3.3. Set up anchors and ropes to allow for a rescue.
  - 3.4. Select and tie knots suitable for system type established.
  - 3.5. Minimise risk of cross loading and mis-alignment of carabiners.
  - 3.6. Verify manufacturers' recommendations, equipment limitations and safety margins, and rig equipment accordingly.

- 3.7. Rig to minimise impact on the natural environment.
- 3.8. Complete safety checks according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed familiar organisational procedures for completing safety checks.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• use fundamental sentence structure to complete safety and serviceability forms and fault tags that require factual information.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• calculate loads for anchors and under normal conditions and in the event of a fall</li> <li>• visually estimate distances to calculate lengths for ropes.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• follow a logical equipment selection, rigging and checking process.</li> </ul>

## Assessment Requirements for SISOABS007 Establish ropes for multi pitch abseiling on natural surfaces

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- select and set up belay systems and ropes suitable for multi pitch abseils at three different natural pitches
- collectively set up the following types of systems:
  - doubled rope technique
  - single rope
  - releasable abseil line
  - rope systems suitable for single rope techniques
  - retrievable rope systems for:
    - top rope top belay
    - bottom brake belay
    - self-belay
- collectively select and use these different types of anchors:
  - fixed artificial
  - naturally occurring
  - artificial removable
- collectively select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
- identify and tag three different types of faulty equipment.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for safety and serviceability checks
- how the following factors affect selection of descent and ascent routes for natural surfaces
  - season of operation, weather and environmental conditions
  - participant characteristics including age, size, weight, fitness and abseiling skill level
  - group objectives and size
- environmental hazards specific to abseiling on natural surfaces and how these affect:

- safe access to and egress from the pitch
- choice of descent and ascent routes for safety of abseiler
- positioning of top or bottom belay systems for safety of belayer
- features, functions, advantages and disadvantages of different types of anchors used for abseiling on natural surfaces:
  - fixed artificial:
    - threads
    - bolts
    - chains
    - concrete bollards
  - naturally occurring:
    - trees
    - boulders
  - artificial removable:
    - spring loaded camming devices
    - nuts, wires and hexes
    - pitons
- issues that are assessed when selecting anchors and likely impacts of poor condition on performance under load:
  - wear and abrasion due to age and use
  - corrosion
  - decay
  - dislodgment
  - underlying stability of structural features and presence of:
    - cracks
    - deformities
    - fissures
- meaning of the following terms, and principles which apply when rigging anchors and ropes:
  - equalisation of load
  - single point of failure
  - anchor redundancy
  - angle of separation
  - shock loading
  - cross loading and cyclical loading of carabiners
  - mis-alignment of carabiners
  - closing the system, including advantages, disadvantages and methods used
- types of forces (upwards, downwards) generated during abseiling and belaying, and how to calculate load on anchors and ropes for these circumstances:
  - top rope top belay

- bottom brake belay
- self-belay
- abseiler descending under control
- abseiler fall
- belayer arresting falls
- the effects of rope stretch during operations and implications if not minimised:
  - abrasions
  - rope bounce
  - undue stress on the anchor system
  - potential for abseiler to impact with hazards, or become entangled
- features, functions, advantages and disadvantages of the following abseiling and belay equipment used on natural surfaces:
  - abseiling and belay systems for:
    - doubled rope technique
    - single rope
    - releasable abseil line
    - rope systems suitable for single rope techniques
    - top rope top belay
    - bottom brake belay
    - self-belay
  - descending devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - carabiners
  - harnesses of different types
  - static and dynamic rope and when each might be used
  - rope protectors
  - tape
  - sewn sling

- personal attachment systems, including cow's tails
- Prusik cord
- how the following factors affect the selection and rigging of above equipment:
  - site characteristics including position of rub points
  - weather and environmental conditions
  - participant size, weight, and abseiling ability
  - cumulative load for group size and number of abseils
  - abseiling techniques to be used
  - distance, height and angle of anchor relative to top edge of abseil
- manufacturers' specifications for equipment use
- techniques used to establish belay systems for safety of belayer:
  - rigging belays for performance of rescues
  - attaching to anchor or self belay safety system
- situations requiring back up belay systems
- when different knots are used, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight
  - end to end joining
  - termination
  - load control hitches
  - slide and grip hitches
- types of safety checks completed for rigging of equipment
- how to care for abseiling equipment when rigging to avoid damage, and promote long lifespan
- potential environmental impacts of rigging for abseils on natural surfaces and techniques used to minimise damage.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where rigging is completed for recreational multi pitch abseils on natural surfaces which might include cliff face or cave pitches. Pitches can feature:

- undercut edges
- low anchors at start
- vertical and near vertical surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- personal protective equipment to include:
  - abseiling, climbing or caving helmets
  - harnesses
  - gloves, as required
- anchors to include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - personal attachment systems, including cow's tails
  - Prusik cords
  - descending devices
  - belay devices
- template safety checklists
- organisational procedures for safety and serviceability checks.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an abseiling activity leader or rigger, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can be part time or full time experience.

# SISOABS008 Lead single pitch abseiling activities on artificial surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during single pitch abseil activities on artificial surfaces according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct single pitch abseiling and belaying techniques for artificial surfaces. To do this, leaders must be proficient in single pitch abseiling skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

| <p>1. Prepare equipment and participants.</p>  | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.</p> <p>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.</p>  |
| <p>2. Brief participants and demonstrate single pitch abseiling and belaying techniques for artificial surfaces.</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate for the activity.</p> <p>2.6. Check and confirm participant ability to use and control equipment before activity commencement.</p> <p>2.7. Check matching of equipment and activities to participants and amend as required.</p> |
| <p>3. Lead and supervise single pitch abseiling activities on artificial</p>   | <p>3.1. Supervise activity according to designated role, adjusting position and role as required.</p> <p>3.2. Implement recreational instruction techniques to impart</p>  |

- surfaces. skills and knowledge for the activity.
- 3.3. Provide clear and accurate instructions and demonstrations throughout the session.
  - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during single pitch abseiling activities on artificial surfaces.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret detailed familiar organisational policies and procedures.
- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOABS008 Lead single pitch abseiling activities on artificial surfaces

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three single pitch abseiling sessions, for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for abseiling activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to single pitch abseiling activities on artificial surfaces:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - incidents that can occur during abseils, and rescue techniques used to resolve, both direct and indirect techniques
  - designated on rope and off rope and waiting zones.

## Assessment Conditions

Skills may be demonstrated in an indoor or outdoor environment where recreational single pitch abseils are completed on artificial surfaces. Artificial surfaces can be fixed or portable structures.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
  - gloves, as required

- established anchors for the artificial structure
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - descending devices
  - belay devices
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for abseiling activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an abseiling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

# Assessment Requirements for SISOABS009 Lead single pitch abseiling activities on natural surfaces

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three single pitch abseiling sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for abseiling activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to single pitch abseiling activities on natural surfaces:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - designated on rope and off rope and waiting zones.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where recreational single pitch abseils are completed on natural surfaces. Pitches can feature:

- undercut edges
- low angled anchors
- vertical and near vertical surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
  - gloves, as required

- anchors which can include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - descending devices
  - belay devices
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for abseiling activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an abseiling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

# SISOABS010 Lead multi pitch abseiling activities on natural surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during multipitch abseil activities on natural surfaces according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct multipitch abseiling and belaying techniques for natural surfaces. To do this, leaders must be proficient in multipitch abseiling skills on which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Abseiling

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |  |
|---|--|
| <p>1. Prepare equipment and participants.</p>   | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.</p> <p>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.</p>  |
| <p>2. Brief participants and demonstrate multipitch abseiling and belaying techniques for natural surfaces.</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate for the activity.</p> <p>2.6. Check and confirm participant ability to use and control equipment before activity commencement.</p> <p>2.7. Check matching of equipment and activities to participants and amend as required.</p> |
| <p>3. Lead and supervise multi pitch abseiling activities on natural</p>  | <p>3.1. Supervise activity according to designated role, adjusting position and role as required.</p> <p>3.2. Implement recreational instruction techniques to impart</p>  |

- surfaces. skills and knowledge for the activity.
- 3.3. Provide clear and accurate instructions and demonstrations throughout the session.
  - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during multi pitch abseiling activities on natural surfaces.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret detailed familiar organisational policies and procedures.
- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

## SISOARC001 Lead archery sessions

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise participants during recreational target archery sessions according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

This unit applies to any type of organisation that delivers recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently in the field using discretion and judgement to manage operational logistics, risk and routine problems within predetermined guidelines. Complex issues and problems would be referred to others for assistance, direction or resolution.

Leaders might also be involved in providing adventure based learning outcomes, the skills for which are provided in complementary units.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Archery

### Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

# Assessment Requirements for SISOARC001 Lead archery sessions

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three recreational archery sessions for a group of participants according to predetermined activity plans
- during each session, consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for archery activity sessions
- suitable clothing and footwear for archery sessions
- purpose, features, and correct fit for safety, of personal protective equipment for archery participants to include:
  - eye protection
  - armguards
  - finger tabs
  - shooting gloves
- features, functions and operation of equipment used for target archery, advantages and disadvantages of different types:
  - bows
  - strings

- arrows
- quivers
- stands
- targets
- how characteristics of participants affect the selection of archery equipment, including personal protective equipment:
  - age, size and weight
  - current experience archery and skill level
  - fitness level and physical capabilities
  - injuries and medical conditions
  - emotional, behavioural and intellectual ability or disability
- features of different types of archery ranges, and how these are laid out and marked for safety of play
- typical hazards and associated risks for archery, and techniques used to safely manage these:
  - poor archer technique including high draw, drawing out of line and exerting draw weight beyond capability
  - archer encroaching the allocated area of another archer
  - archer encroaching safety zones
  - exposure to heavy rain, hail, lightning, strong winds, extreme heat
- roles and responsibilities of activity leaders during archery sessions
- communication protocols used between participants and leaders during archery activities to include:
  - calls
  - hand signals
  - whistles
  - radio
- appropriate stance for shooting arrows
- correct positioning of bow arm and drawing arm
- techniques for:
  - knocking the arrow
  - pre-draw and drawing the bow
  - anchor positioning
  - holding and aiming
  - releasing
  - following through
  - relaxing and recovery
  - removing arrows from the ground and the target
- different techniques used to demonstrate archery technique to participants
- appropriateness of different demonstration techniques for a range of ages and capabilities
- step by step process followed when using the I.D.E.A demonstration technique:

- introduce
- demonstrate
- explain
- apply
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- a range of warm-up and practice exercises suitable for archery sessions
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics
- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation.

## Assessment Conditions

Skills must be demonstrated in an indoor venue or outdoor area with a safe and even surface, marked shooting lines and designated target lanes.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- personal protective equipment to include:
  - eye protection
  - armguards
  - finger tabs
  - shooting gloves
- archery equipment:
  - bows
  - strings

- arrows
- quivers
- stands
- targets
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for archery activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as an archery activities leader where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOBWG001 Bushwalk in tracked environments

## Modification History

Not applicable.

## Application

This unit describes the skills and knowledge required to complete walks in any type of environment including bushland, arid, alpine or tropical areas and according to planned routes.

The unit provides skills to walk on formed earthen tracks which generally have modified hardened or compacted surfaces. Some surfaces could be unstable with some natural obstacles such as roots, rocks and small logs. Steps and short steep slopes may be featured.

Tracks have signage at the track head, with route markers at intersections and where the track becomes less distinct. Tracks are reliably marked on maps and, along with signage, walkers do not require any specialist navigation skills to complete the track. Tracks could be graded according to the Australian Walking Track Grading System and might include features of grades 2 to 3.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders, guides or instructors who use these skills when leading participants during bushwalking activities. Leadership skills are provided in complementary units.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Bushwalking

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

#### 1. Prepare for the walk.

#### 2. Walk in tracked environments.

#### 3. Negotiate environmental obstacles, steps and slopes.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Select clothing, footwear, personal protective and other equipment suitable for the walk and conditions, and check for safe working condition.
- 1.2. Calculate and prepare food and water appropriate for the distance and environment of the trip.
- 1.3. Waterproof and pack clothing, personal resources, and food according to access requirements during walk.
- 1.4. Interpret planned route from activity plans, maps and track head signage to assist in following the route.
- 1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.
- 1.6. Confirm protocols for communications between walkers.
- 1.7. Ensure pack weight is appropriate to body weight and level of fitness; fit and adjust for comfort and safety.
- 2.1. Use appropriate posture and manual handling techniques when lifting and carrying backpack.
- 2.2. Establish and maintain an appropriate walking rhythm and pace according to conditions.
- 2.3. Use walking techniques specific to the environmental terrain.
- 2.4. Monitor walking pace of, and space between, party members to ensure safety of all, and completion within timelines.
- 2.5. Maintain effective communication with party members throughout all activities.
- 2.6. Follow the planned route and make adjustments to route according to track and environmental conditions.
- 2.7. Use techniques that minimise damage to equipment and the natural environment throughout all activities.
- 3.1. Safely approach, and negotiate obstacles and hazards to minimise risk of injury.
- 3.2. Control footing to walk safely on stretches of unstable track surface.

- 3.3. Utilise techniques and control pace to ascend and descend steps and short steep slopes.
- 3.4. Monitor own fatigue, adjust pace, food and water intake, and take breaks while maintaining contact with party members.
- 3.5. Monitor and regulate own body temperature by adding or removing clothing layers.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed and familiar organisational safety and emergency response procedures</li> <li>• interpret straightforward but potentially unfamiliar information on maps and track signage</li> <li>• interpret factual activity plan information in familiar formats.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>• use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and calculate numerical data involving distances, times and slope gradients from maps and track signage.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• manage own timing to complete activities within planned timeframes.</li> </ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOBWG001 Bushwalk in tracked environments

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three walks, each on a different track
- for one of the above activities, walk at least five kilometres
- during each walk:
  - maintain an effective walking rhythm by:
    - maintaining same stride and pace
    - allowing natural body swing
    - avoiding jerky movements or springing
  - use techniques to ascend steps and slopes:
    - placing feet down flat with a deliberate step
    - resting heels on any available projections
  - use techniques to descend steps and slopes:
    - placing toes against projections to avoid overstriding
    - avoiding placing feet down heavily
    - flat-footed or stiff-heeled technique
  - use walking techniques specific to the environmental terrain
  - consistently follow safety procedures and safely negotiate hazards.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for walking activities
- contents of the Australian Walking Track Grading System, in particular the specifications for grade 2 and 3 tracks
- suitable clothing and footwear for the particular region or locality in which outdoor recreational walks are delivered:
  - types of clothing and fabrics that protect against the effects of local weather conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear

- types of footwear suitable for walking in tracked environments; advantages and disadvantages of different types
- gaiters and their purpose
- as relevant, purpose and features of specialist aids
- purpose, features, advantages and disadvantages of walking poles
- effective design and construction features of back packs
- techniques used to effectively pack items for ease of access and maximum usage of space
- waterproofing and stowing techniques used to keep clothing, food and resources dry during walking activities
- how to care for clothing, footwear, backpacks and other equipment during and after activities to avoid damage, and promote long lifespan
- safe manual handling techniques used to lift and carry backpacks of various weights
- communication protocols for group walks in tracked environments to include:
  - calls
  - hand signals
  - whistles
  - radio
- how to maintain an effective walking rhythm:
  - maintaining same stride and pace
  - allowing natural body swing
  - avoiding jerky movements or springing
- techniques used to ascend steps and slopes:
  - placing feet down flat with a deliberate step
  - resting heels on any available projections
  - keeping weight over feet, not leaning into the slope
- techniques used to descend steps and slopes:
  - placing toes against projections to avoid overstriding
  - placing toes on available objects to reduce fatigue
  - avoiding placing feet down heavily
  - flat-footed or stiff-heeled technique
- typical hazards for walking in tracked environments, and techniques used to safely negotiate these:
  - roots
  - rocks
  - small logs
  - slippery or unstable track surface
  - overhanging vegetation
  - minor water crossings
  - hazardous flora and fauna in the region
  - temperature extremes
  - exposure to storms, heavy rain, hail and strong winds

- techniques used to minimise damage to the natural environments when walking
- for the particular region or locality in which outdoor recreational walks are delivered which may include those for bushland, arid, alpine, tropical or other environments:
  - specific walking techniques used for the terrain
  - specific hazards and techniques used to safely negotiate these
  - specific environmental considerations and minimal impact techniques when walking.

## Assessment Conditions

Skills must be demonstrated in a setting where bushwalking activities are delivered in tracked environments. Tracks must feature the following:

- be formed earthen tracks which have modified hardened or compacted surfaces
- have some surfaces which are unstable with some natural obstacles such as roots, rocks and small logs
- have steps and short steep slopes
- have signage at the track head, with route markers at intersections and en route
- be reliably marked on maps.

If in an alpine region, assessment can only be completed in weather conditions where no snow is present and visibility is clear.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during walking activities
- backpacks
- food, water for duration of assessment
- portable shelter/tarp
- clothing and footwear suitable for the conditions
- Users Guide to the Australian Walking Track Grading System
- activity plans to include details of planned route
- walking route maps and guides
- organisational safety and emergency response procedures for walking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a bushwalking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOBWG002 Bushwalk in difficult tracked environments

## Modification History

Not applicable.

## Application

This unit describes the skills and knowledge required to complete walks in any type of environment including bushland, arid, alpine or tropical areas and according to planned routes.

The unit provides the skills to walk on generally distinct tracks but without major modification to the ground. Surfaces are likely to be unstable with many natural obstacles such as rocky or loose tread, roots, rocks, fallen tree logs and water crossings. Long steep sections and arduous climbs may be featured.

Tracks have signage at the track head and have route markers but provide limited signage en route. Tracks may be indistinct in some places. Tracks marked on maps may be unreliable requiring walkers to use navigation skills and equipment to complete the track. Tracks could be graded according to the Australian Walking Track Grading System and might include features of grade 4.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders, guides or instructors who use these skills when leading participants during bushwalking activities. Leadership skills are provided in complementary units.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Bushwalking

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

#### 1. Prepare for the walk.

#### 2. Walk in difficult tracked environments.

#### 3. Negotiate environmental obstacles and steep slopes.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Select clothing, footwear, personal protective and other equipment suitable for the walk and conditions, and check for safe working condition.
- 1.2. Calculate and prepare food and water appropriate for the distance and environment of the trip.
- 1.3. Waterproof and pack clothing, personal resources, and food according to access requirements during walk.
- 1.4. Interpret planned route from activity plans, maps and track head signage to assist with navigation.
- 1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.
- 1.6. Confirm protocols for communications between walkers.
- 1.7. Ensure pack weight is appropriate to body weight and level of fitness; fit and adjust for comfort and safety.
- 2.1. Use appropriate posture and manual handling techniques when lifting and carrying backpack.
- 2.2. Establish and maintain an appropriate walking rhythm and pace according to conditions.
- 2.3. Use walking techniques specific to the environmental terrain.
- 2.4. Monitor walking pace of, and space between, party members to ensure safety of all, and completion within timelines.
- 2.5. Maintain effective communication with party members throughout all activities.
- 2.6. Follow the planned route and make adjustments to route according to track and environmental conditions.
- 2.7. Use techniques that minimise damage to equipment and the natural environment throughout all activities.
- 3.1. Safely approach, and negotiate constant obstacles and hazards to minimise risk of injury.
- 3.2. Control footing to walk safely on consistently uneven and unstable track surface.

- 3.3. Utilise techniques and control pace to ascend and descend long steep slopes.
- 3.4. Monitor own fatigue, adjust pace, food and water intake and take breaks while maintaining contact with party members.
- 3.5. Monitor and regulate own body temperature by adding and removing clothing layers.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed and familiar organisational safety and emergency response procedures</li> <li>• interpret potentially unfamiliar information on maps and track head signage</li> <li>• interpret factual activity plan information in familiar formats.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>• use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and calculate numerical data involving distances, times and slope gradients from maps and track head signage.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• manage own timing to complete activities within planned timeframes.</li> </ul>

# Assessment Requirements for SISOBWG002 Bushwalk in difficult tracked environments

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three walks, including at least one lasting for a minimum of two days
- during each walk:
  - maintain an effective walking rhythm by:
    - maintaining same stride and pace
    - allowing natural body swing
    - avoiding jerky movements or springing
  - use techniques to ascend steps and slopes:
    - placing feet down flat with a deliberate step
    - resting heels on any available projections
    - zig-zagging
  - use techniques to descend steps and slopes:
    - placing toes against projections to avoid overstriding
    - avoiding placing feet down heavily
    - flat-footed or stiff-heeled technique
  - use walking techniques specific to the environmental terrain
  - consistently follow safety procedures and safely negotiate hazards.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for walking activities
- contents of the Australian Walking Track Grading System, in particular the specifications for grade 4 tracks
- suitable clothing and footwear for the particular region or locality in which outdoor recreational walks are delivered:
  - types of clothing and fabrics that protect against the effects of local weather conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective fabrics/materials, design and construction features of waterproof gear

- footwear suitable for walking in difficult tracked environments; advantages and disadvantages of different types
- gaiters and their purpose
- as relevant, purpose and features of specialist aids
- purpose, features, advantages and disadvantages of walking poles
- effective design and construction features of back packs
- techniques used to effectively pack items for ease of access and maximum usage of space
- waterproofing and stowing techniques used to keep clothing, food and resources dry during walking activities
- how to care for clothing, footwear, backpacks and other equipment during and after activities to avoid damage, and promote long lifespan
- safe manual handling techniques used to lift and carry backpacks of various weights
- communication protocols for group walks in difficult tracked environments to include:
  - calls
  - hand signals
  - whistles
  - radio
- how to maintain an effective walking rhythm:
  - maintaining same stride and pace
  - allowing natural body swing
  - avoiding jerky movements or springing
- techniques used to ascend long steep slopes:
  - placing feet down flat with a deliberate step
  - resting heels on any available projections
  - zig-zagging
  - keeping weight over feet, not leaning into slope
- techniques used to descend long steep slopes:
  - placing toes against projections to avoid overstriding and fatigue
  - avoiding placing feet down heavily
  - flat-footed or stiff-heeled technique
- typical hazards for walking in difficult tracked environments, and techniques used to safely negotiate these:
  - roots
  - rocks
  - fallen tree logs
  - unstable track surface: slippery, rocky or loose tread
  - dense and overhanging vegetation
  - water crossings
  - hazardous flora and fauna
  - temperature extremes
  - exposure to storms, heavy rain, hail and strong winds

- techniques used to minimise damage to the natural environments when walking
- for the particular region or locality in which outdoor recreational walks are delivered which may include those for bushland, arid, alpine, tropical or other environments:
  - specific walking techniques used for the terrain
  - specific hazards and techniques used to safely negotiate these
  - specific environmental considerations and minimal impact techniques when walking.

## Assessment Conditions

Skills must be demonstrated in a setting where bushwalking activities are delivered in difficult tracked environments. Tracks must feature the following:

- be generally distinct tracks but without major modification to the ground; some parts of the track can be indistinct
- have surfaces that are generally unstable with many natural obstacles such as rocky or loose tread, roots, rocks and fallen tree logs
- have steep sections and arduous climbs
- have signage at the track head, with route markers but limited signage en route
- be marked on maps.

If in an alpine region and snow is present, assessment can only be completed if the track remains discernible.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during walking activities
- backpacks
- food, water, tents, camping supplies as required for the duration of assessment
- clothing and footwear suitable for the conditions
- compasses
- Users Guide to the Australian Walking Track Grading System
- activity plans to include details of planned route
- walking route maps and guides
- organisational safety and emergency response procedures for walking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a bushwalking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# **SISOBWG003 Bushwalk in extremely difficult tracked and untracked environments**

## **Modification History**

Not applicable.

## **Application**

This unit describes the skills and knowledge required to complete walks in any type of environment including bushland, arid, alpine or tropical areas and according to planned routes.

The unit provides the skills to walk in untracked areas and on rough unformed tracks with no modification to the natural surface. Surfaces will be variable and challenging with prolonged unstable sections. Tracks and untracked areas will feature constant and unpredictable natural obstacles such as rocky or loose tread, roots, rocks, fallen tree logs, dense vegetation and water crossings. Long steep sections and very arduous climbs may be featured.

Tracks and untracked areas generally have no signage or route markers at any point. Tracks marked on maps may be very unreliable requiring walkers to use navigation skills and equipment to complete the walk. Tracks could be graded according to the Australian Walking Track Grading System and might include features of grade 5.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders, guides or instructors who use these skills when leading participants during bushwalking activities. Leadership skills are provided in complementary units.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret detailed and familiar organisational safety and emergency response procedures
- interpret potentially unfamiliar information on maps
- interpret factual activity plan information in familiar formats.

Oral communications skills to:

- use clear and unambiguous verbal and non-verbal communications to make intent known.

Numeracy skills to:

- interpret maps and other information to calculate numerical data involving distances, times and slope gradients.

Problem-solving skills to:

- resolve significant problems associated with indistinct tracks and environmental conditions adjustments, constant hazards, and fatigue.

Planning and organising skills to:

- manage own timing and plan route adjustments in the field to complete activities within planned timeframes.

Self-management skills to:

- critically evaluate all circumstances encountered and take responsibility to manage own safety.

  - placing toes against projections to avoid overstriding and fatigue
  - avoiding placing feet down heavily
  - flat-footed or stiff-heeled technique
  - using walking aids and ropes as handlines
- factors that affect the selection of tie-off points and anchors for handlines, knots and how to tie them
- typical hazards for walking in extremely difficult tracked environments, and techniques used to safely negotiate these:
  - roots

- rocks
- fallen tree logs
- unstable track surface: slippery, rocky or loose tread
- dense and overhanging vegetation
- water crossings
- hazardous flora and fauna
- temperature extremes
- exposure to storms, heavy rain, hail and strong wind
- techniques used to minimise damage to the natural environments when walking
- for the particular region or locality in which outdoor recreational walks are delivered which may include those for bushland, arid, alpine, tropical or other environments:
  - specific walking techniques used for the environmental terrain
  - specific hazards and techniques used to safely negotiate these
  - specific environmental considerations and minimal impact techniques when walking.

## Assessment Conditions

Skills must be demonstrated in a setting where bushwalking activities are delivered in extremely difficult tracked or untracked environments. Tracks and environments must feature the following:

- be rough unformed tracks with no modification to the natural surface
- have surfaces that are variable and challenging with prolonged unstable sections
- have constant natural obstacles such as rocky or loose tread, roots, rocks, fallen tree logs and dense vegetation
- have steep sections and very arduous climbs
- have no signage or route markers at any point.

If in an alpine region, assessment can occur if ground is covered by snow.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during walking activities
- backpacks
- food, water, tents and camping supplies as required for the duration of assessment
- clothing and footwear suitable for the conditions
- compasses
- rope for handlines

- Users Guide to the Australian Walking Track Grading System
- activity plans to include details of planned route
- walking route maps and guides
- organisational safety and emergency response procedures for walking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a bushwalking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOBWG004 Cross rivers during bushwalks

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to select suitable locations and methods to cross rivers during bushwalking activities. It requires the ability to use a range of river crossing methods in flat and moving water up to grade 2.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders, guides or instructors who use these skills when leading participants where crossing rivers is required.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Bushwalking

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare to cross river.
  - 1.1. Scout the river to identify features, hazards and obstacles.
  - 1.2. Assess risk and select a safe and suitable crossing point.
  - 1.3. Evaluate conditions and select suitable method to cross river.
  - 1.4. Confirm organisational safety and emergency response procedures to ensure compliance during activities.
  - 1.5. Waterproof contents of back pack.
2. Cross rivers using techniques appropriate to conditions.
  - 2.1. Set a ferry angle to negotiate currents and enter the river safely.
  - 2.2. Use appropriate body position and defensive swimming techniques to negotiate moving water and river hazards.
  - 2.3. Use appropriate body position and aggressive swimming techniques to negotiate moving water and to free self from river hazards.
  - 2.4. Maintain ferry angle to balance swimming against current.
  - 2.5. Wade across rivers at mid-thigh depth and negotiate swift currents, when present.
  - 2.6. Use aids to cross rivers, as appropriate to conditions.
  - 2.7. Utilise group techniques to cross rivers, as appropriate to conditions.
  - 2.8. Use techniques to safely negotiate upstream and downstream currents and to exit the river safely.
  - 2.9. Recognise unsafe crossing and retreat from river as required.
  - 2.10. Evaluate a contingency plan if river is unable to be crossed.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret detailed and familiar organisational safety and emergency response procedures.

Oral communications skills to:

- use clear and unambiguous verbal and non-verbal communications to make intent known to party members.

Numeracy skills to:

- estimate speed of currents and depth of water.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume Implementation Guides -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISOBWG004 Cross rivers during bushwalks

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three river crossings, and collectively:
  - utilise defensive and aggressive swimming techniques
  - utilise techniques to wade across a river
  - utilise poles and a backpack as aids
  - participate in one group crossing using mutual support methods
- during each crossing, consistently follow safety procedures and safely and effectively negotiate river hazards.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures
- waterproofing and stowing techniques used for river crossings
- river grading systems, sufficient to understand strength of currents, direction of flow and the impact on selection of crossing point
- features of rivers and how these affect selection of crossing point:
  - eddy
  - current
  - tongue
  - waves
  - bank
  - rocks
- different ferry angles that can be chosen to suit features of the river
- locations generally suitable for crossing rivers:
  - narrow, straight part of the river
  - low banks
  - sections less than waist deep
- hazards associated with river crossings and techniques used to safely negotiate these:
  - cold water

- steep or slippery banks
- submerged logs, rocks and vegetation
- sections of dark, deep or cold water
- fast moving white water
- hazardous flora and fauna
- defensive swimming techniques and when to use these during river crossings:
  - floating passively on back facing downstream
  - riding with the river current
  - pointing feet downstream, toes out of water
  - using arms and legs to avoid serious contact with obstacles
- aggressive swimming techniques and when to use these during river crossings:
  - moving on to stomach
  - pointing head in direction of travel
  - stroking hard to move across the current
  - swimming freestyle across current
- aids used in river crossings and how to use these effectively:
  - swimming using pack as a float
  - poles
  - ropes, including methods used to secure
- methods for group crossings/mutual support and how to use these effectively:
  - linked arms
  - circle
  - pole
- typical situations requiring retreat from river crossing.

## Assessment Conditions

Skills must be demonstrated on moving rivers, which can include up to grade 2 rivers, and which must feature the following:

- moving water
- fairly frequent but straightforward rapids
- rapids with regular medium sized waves, less than one metre
- low ledges or drops, easy eddies and gradual bends
- passages through rapids that are generally straightforward and can be seen from when standing on the bank.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during group river crossings
- river crossing aids to include:
  - backpacks and waterproofing aids

- poles
- ropes
- organisational safety and emergency response procedures.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOBWG005 Lead bushwalks in tracked environments

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during bushwalking activities on well-defined tracks according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct bushwalking techniques applicable to tracked environments. To do this, leaders must be proficient in bushwalking skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Bushwalking

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- demonstrations throughout the session.
- 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during bushwalking activities in tracked environments.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret detailed familiar organisational policies and procedures.

- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SISOBWG005 Lead bushwalks in tracked environments

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three bushwalks for a group of participants according to predetermined activity plans
- across the three bushwalks, collectively use two different demonstration and instruction techniques
- during each bushwalk consistently manage participant adherence to safety procedures
- after each bushwalk, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
- determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
- respond to a total of three different immediate safety risks that have arisen during activities
- respond to a total of two emergency situations and complete two incident reports
- complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for bushwalking activities
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to bushwalking activities in tracked environments:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - typical group equipment and how this is distributed amongst participants and leaders
  - how to establish the capabilities of self, other leaders and participants to carry appropriate weight in backpack
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated in a setting where bushwalking activities are delivered in tracked environments. Tracks must feature the following:

- be formed earthen tracks which have modified hardened or compacted surfaces
- have some surfaces which are unstable with some natural obstacles such as roots, rocks and small logs
- have steps and short steep slopes
- have signage at the track head, with route markers at intersections and en route
- be reliably marked on maps.

If in an alpine region, assessment can only be completed in weather conditions where no snow is present and visibility is clear.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:

- activity modifications for prevailing conditions and participant needs
- arising safety risks
- emergency situations
- equipment faults
- backpacks
- food, water, shelter and camping equipment needed for the duration of the assessment
- clothing and footwear suitable for the conditions
- activity plans to include details of planned route
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for bushwalking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a bushwalking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOBWG006 Lead bushwalks in difficult tracked environments

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during bushwalking activities in difficult tracked environments according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct bushwalking techniques applicable to difficult tracked environments. To do this, leaders must be proficient in bushwalking skills in difficult tracked environment which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Bushwalking

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |  |
|---|--|
| <p>1. Prepare equipment and participants.</p>   | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.</p> <p>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.</p>  |
| <p>2. Brief participants and demonstrate bushwalking techniques applicable to difficult tracked environments.</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate for the activity.</p> <p>2.6. Check and confirm participant ability to use and control equipment before activity commencement.</p> <p>2.7. Check matching of equipment and activities to participants and amend as required.</p> |
| <p>3. Lead and supervise bushwalking activities in difficult tracked environments.</p>                            | <p>3.1. Supervise activity according to designated role, adjusting position and role as required.</p> <p>3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.</p> <p>3.3. Provide clear and accurate instructions and or</p>  |

- demonstrations throughout the session.
- 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during bushwalking activities in difficult tracked environments.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.

  - how to establish the capabilities of self, other leaders and participants to carry appropriate weight in backpack
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated in a setting where bushwalking activities are delivered in difficult tracked environments. Tracks must feature the following:

- be generally distinct tracks but without major modification to the ground; some parts of the track can be indistinct
- have surfaces that are generally unstable with many natural obstacles such as rocky or loose tread, roots, rocks and fallen tree logs
- have steep sections and arduous climbs
- have signage at the track head, with route markers but limited signage en route
- be marked on maps.

If in an alpine region and snow is present, assessment can only be completed if the track remains discernible.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads

- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- backpacks
- food, water, shelter and camping equipment for duration of assessment
- clothing and footwear suitable for the conditions
- activity plans to include details of planned route
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for bushwalking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a bushwalking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# Assessment Requirements for SISOBWG007 Lead bushwalks in extremely difficult tracked and untracked environments

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three bushwalks for a group of participants according to predetermined activity plans
- across the three bushwalks, collectively use two different demonstration and instruction techniques
- during each bushwalk consistently manage participant adherence to safety procedures
- after each bushwalk, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for bushwalking activities
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to bushwalking activities in extremely difficult tracked and untracked environments:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - typical group equipment and how this is distributed amongst participants and leaders
  - how to establish the capabilities of self, other leaders and participants to carry appropriate weight in backpack
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated in a setting where bushwalking activities are delivered in extremely difficult tracked or untracked environments. Tracks must feature the following:

- be rough unformed tracks with no modification to the natural surface
- have surfaces that are variable and challenging with prolonged unstable sections
- have constant natural obstacles such as rocky or loose tread, roots, rocks, fallen tree logs and dense vegetation
- have steep sections and very arduous climbs
- have no signage or route markers at any point

If in an alpine region, assessment can occur if ground is covered by snow.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:

- activity modifications for prevailing conditions and participant needs
- arising safety risks
- emergency situations
- equipment faults
- backpacks
- food, water, shelter and camping equipment for duration of assessment
- clothing and footwear suitable for the conditions
- activity plans to include details of planned route
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for bushwalking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a bushwalking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOCAY001 Traverse canyons

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to travel through canyons, according to planned routes, and utilise features for recreational activities such as rock scrambling, swimming, water sliding and liloing. It requires the ability to safely negotiate a range of terrain obstacles, hazards and canyon formations. It applies to both wet and dry canyons.

This unit focuses on activities within canyons and not on methods used to access or escape from them.

It applies to leaders, guides or instructors who use these skills when leading during canyoning activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Canyoning

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Prepare for canyoning activities.

2. Utilise canyon features for recreational activities.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Select clothing, footwear and personal protective equipment suitable for canyon conditions and activities.
- 1.2. Waterproof, as required, and pack clothing, personal resources, and food according to access requirements during activities.
- 1.3. Interpret planned route from activity plans and maps to assist in following the route.
- 1.4. Determine contingency routes and emergency escapes.
- 1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.
- 1.6. Confirm protocols for communications between party members.
- 1.7. Complete equipment safety checks prior to canyoning activities.
- 2.1. Survey canyon to identify hazards and obstacles, assess risk, and select a safe and suitable site for activities.
- 2.2. Safely approach, and negotiate hazards, canyon terrain and formations to minimise risk of injury.
- 2.3. Remove and handle loaded backpacks to enable safe passage through canyon.
- 2.4. Select and use suitable techniques and natural formations for a range of recreational activities.
- 2.5. Maintain close contact and effective communication with party members throughout all activities.
- 2.6. Use techniques that minimise damage to equipment and the canyon environment throughout all activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

Reading skills to:

### DESCRIPTION

- interpret detailed and familiar organisational safety and emergency response procedures

- interpret complex and potentially unfamiliar technical information about routes and environmental features.
  - use clear and unambiguous verbal and non-verbal communications to make intent known.
- Oral communications skills to:
- Problem-solving skills to:
- readily adapt to changing situations and terrain by selecting appropriate techniques and equipment to traverse canyons efficiently.
- Planning and organising skills to:
- manage own timing to complete activities within planned timeframes.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume Implementation Guides -

# Assessment Requirements for SISOCAY001 Traverse canyons

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete two canyoning trips
- complete at least one of the above trips in a wet canyon
- during each canyoning activity, consistently follow safety procedures and safely negotiate hazards
- across all canyoning trips, collectively use the following techniques:
  - rock scrambling
  - spotting
- during any wet canyon trips, use at least two of the following techniques:
  - water jumping
  - water sliding
  - liloing
  - wading
  - swimming.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for canyoning activities
- features of different types of local canyons and canyon formations sufficient to understand the overall characteristics of the canyon setting and its particular hazards
- clothing and footwear suitable for canyoning activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear and exposure suits
  - types of footwear used for canyoning activities; advantages and disadvantages of different types
- waterproofing and stowing techniques used to keep clothing, equipment and resources dry during canyoning activities

- techniques used for canyon activities to include those for:
  - rock scrambling
  - spotting
  - water jumping
  - water sliding
  - liloing
  - wading
  - swimming, white water swimming
- communication protocols used between canyoners to include:
  - calls
  - hand signals
  - whistles
- typical hazards associated with canyoning activities, and techniques used to safely negotiate these:
  - dense vegetation
  - squeezes and overhangs
  - slippery or unstable terrain including rocks
  - submerged logs and rocks
  - sections of dark, deep or cold water and extended immersion
  - rising water
  - formations that might lead to foot entrapment
- practices used to minimise environmental impact to canyons to include removing all general and human (toileting) waste.

## Assessment Conditions

Skills can be demonstrated in canyons which feature the following:

- easy climbing and downclimbing with little exposure
- hand lines may be required on occasion
- escape from canyon may take up to 1 hour.

Wet canyons would feature:

- slow moving water, with up to Grade 1 river features
- pools of calm to slightly moving water
- low angled slides.

No climbing or abseiling is required to reach canyons but it is possible to abseil in, participate in canyon activities and walk or climb out.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during canyoning activities
- personal protective equipment, relevant to the activity, which might include:
  - helmets
  - exposure suits
- containers for the removal of liquid and solid waste including those for human waste
- template safety checklists
- organisational safety and emergency response procedures for canyoning activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canyoning leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOCAY002 Abseil in easy to intermediate canyons

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to abseil in easy to intermediate wet or dry canyons. It also requires the ability to belay abseilers and to self-belay.

It applies to leaders, guides or instructors who use these skills when leading participants during canyoning activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Canyoning

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Prepare for the canyon

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Select clothing, footwear and personal protective

- abseil. equipment suitable for the canyon abseil and conditions.
- 1.2. Waterproof food, clothing, equipment and resources, for wet canyoning.
  - 1.3. Confirm activity safety and emergency response procedures to ensure compliance during activities.
  - 1.4. Confirm protocols for communications between abseiler and belayer.
  - 1.5. Interpret route description; identify position of natural features and the abseil route.
  - 1.6. Attach descending device to abseil rope and tie knots suitable for the established belay system.
  - 1.7. Complete equipment safety checks prior to abseiling or belaying.
2. Abseil vertical canyon pitches.
    - 2.1. Use safety procedures at top of and throughout descent to minimise risk to self and others present.
    - 2.2. Use appropriate posture and abseiling techniques to execute descents.
    - 2.3. Safely approach, avoid or negotiate hazards to descend in a controlled manner.
    - 2.4. Maintain effective communication with belayer throughout descent.
    - 2.5. Retrieve ropes at bottom of each pitch, as last person down.
    - 2.6. Use techniques that minimise damage to equipment and the surface during abseil.
  3. Belay abseilers during canyon descents.
    - 3.1. Avoid or negotiate hazards and use safety procedures to minimise risk to self and others present.
    - 3.2. Establish belaying position and attach self to anchor, as required, to allow effective and safe use of belay system.
    - 3.3. Maintain rope tension to minimise fall distance and ensure abseiler movement is not unduly restricted.
    - 3.4. Monitor abseiler progress constantly, and maintain clear communication with abseiler.
    - 3.5. Arrest falls promptly using technique suitable to belaying device and situation.
    - 3.6. Safely and efficiently secure abseiler using tie off techniques; release tie off and allow abseiler to continue.
  4. Self-belay during canyon descents.
    - 4.1. Attach self to suitable belay device for descent with back up to maintain safety in the event of a fall.
    - 4.2. Use appropriate posture and abseiling techniques to execute self-belayed descents.
    - 4.3. Control self-belay system to execute safe and controlled descents.

4.4. Utilise features of back up belay system in the event of a fall to self-arrest, self-rescue and complete descent.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed and familiar organisational safety and emergency response procedures.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>visually estimate angles, estimate load on ropes to determine appropriate tension for abseiling and belaying.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>manage own timing to complete activities within planned timeframes.</li></ul>

## Assessment Requirements for SISOCAY002 Abseil in easy to intermediate canyons

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three abseiling sessions in canyons, with at least one in a wet canyon
- across the three sessions collectively complete the following abseils:
  - four descents with a belayer
  - two self-belayed descents
- during each of the above abseils, consistently:
  - follow safety procedures and safely negotiate hazards to descend in a controlled manner
  - connect self to abseil and belay system using appropriate device and or knots
- complete two additional self-belayed descents, simulating a self-arrest and self-rescue to complete the descent
- belay abseilers according to safety procedures, and complete the following:
  - three top rope, top belayed descents
  - one bottom braked descent
  - two simulated abseiler falls, and safely and efficiently secure and release abseilers to continue.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for canyoning activities
- purpose, features, and correct fit for safety, of personal protective equipment for abseiling in canyons to include:
  - clothing
  - footwear
  - gloves, advantages and disadvantages
  - abseiling/climbing helmets
  - harnesses of different types, advantages and disadvantages
- waterproofing and stowing techniques used to keep clothing, equipment and resources dry during wet canyoning activities

- features, functions and operation of abseiling equipment used in canyons:
  - carabiners
  - static and dynamic rope and when each might be used
  - tape
  - sewn sling
  - Prusik cord
  - descending devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - belay systems:
    - top rope top belay
    - bottom brake
    - self-belay
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
- types of equipment and knots used, and how to tie them, when:
  - attaching descending devices to abseil ropes
  - attaching belay system to anchors
  - attaching self to back up belay system for self-belays
  - attaching self to anchor
- types of personal and equipment safety checks completed prior to abseiling and belaying
- canyoning abseiling techniques and appropriate posture for easy to intermediate descents to include those for:
  - walking backwards on dry and wet surfaces
  - self-belayed descents
  - lowering
  - disconnecting self from belay in a pool of water
- techniques for belaying others during easy to intermediate canyon abseils to include those for:
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension

- controlling bottom brake system
- arresting abseiler falls
- securing abseiler, tying off belay system and releasing
- reasons for attaching belayer to anchor system when belaying others including:
  - minimising belayer movement to retain stable position and stance
  - minimising effects of force of abseiler fall and risk of injury to belayer
  - minimising risks of belayer fall
- communication protocols used between abseilers and belayers to include:
  - calls
  - hand signals
  - whistles
  - radio
- typical hazards for abseiling in canyons, and techniques used to safely negotiate these:
  - falling rocks, water, debris, gear
  - abrasion points
  - sharp edges
  - squeezes and overhangs
  - ledges
  - traverses
  - slippery or unstable terrain
  - dense vegetation and trees
  - strong breezes
  - tangled rope
  - rising water levels
  - cold water, immersion for extended periods
- how to care for abseiling equipment during canyoning activities to avoid damage, and promote long lifespan
- techniques used to minimise damage to canyon surfaces when abseiling in canyons.

## Assessment Conditions

Skills must be demonstrated in easy to intermediate canyons which may feature the following:

- pitches up to 30 metres
- anchors that can be easily reached
- room to regroup between abseils
- pitches that require some up and down climbing using a rope
- canyon escapes can take up to 1 hour.

Wet canyons may feature:

- low vertical flow

- pools of calm to slightly moving water
- pools that require jumps between 3 to 5 metres
- low to moderately angled slides.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during canyoning activities
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
  - gloves, as required
- anchors which can include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - descending devices
  - belay devices
- template safety checklists
- organisational safety and emergency response procedures for canyoning activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canyoning guide, leader or instructor where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOCAY003 Abseil in intermediate to advanced canyons

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to abseil in intermediate to advanced wet or dry canyons. It also requires the ability to belay abseilers and to self-belay.

This unit covers the skills required to abseil in canyon conditions featuring multiple vertical pitches of variable length.

It applies to leaders, guide or instructors who use these skills when leading participants during canyoning activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Canyoning

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for the canyon abseil.	1.1. Select clothing, footwear and personal protective equipment suitable for the canyon abseil and conditions. 1.2. Waterproof food, clothing, equipment and resources for wet canyons. 1.3. Confirm activity safety and emergency response procedures to ensure compliance during activities. 1.4. Confirm protocols for communications between abseiler and belayer. 1.5. Interpret route description; identify position of natural features and the abseil route. 1.6. Attach descending device to abseil rope and tie knots suitable for the established belay system. 1.7. Complete equipment safety checks prior to abseiling or belaying.
2. Abseil in canyons using multi pitch descent techniques.	2.1. Use safety procedures at top of and throughout all descents to minimise risk to self and others present. 2.2. Use appropriate posture and abseiling techniques to execute descents to each station. 2.3. Safely approach, avoid or negotiate hazards to descend to stations in a controlled manner. 2.4. Maintain effective communication with belayer throughout all descents. 2.5. Retrieve ropes at bottom of each pitch, as last person down. 2.6. Use techniques that minimise damage to equipment and the surface during abseil.
3. Change over safely at belay stations.	3.1. Maintain continuous attachment to anchor points, traverse line or belay system. 3.2. Changeover personal equipment from one rope system to another at belay stations, tie suitable knots and handle ropes without entanglement. 3.3. Complete safety checks prior to loading belay system and before completing subsequent descents.
4. Belay abseilers during multi pitch descents in canyons.	4.1. Avoid or negotiate hazards and use safety procedures to minimise risk to self and others present. 4.2. Establish belaying position and attach self to anchor, as required, to allow effective and safe use of belay system. 4.3. Maintain rope tension to minimise fall distance and ensure abseiler movement is not unduly restricted. 4.4. Monitor abseiler progress constantly, and maintain clear

- communication with abseiler.
- 4.5. Arrest falls promptly using technique suitable to belaying device and situation.
  - 4.6. Safely and efficiently secure abseiler using tie off techniques; release tie off and allow abseiler to continue.
5. Self-belay during multi pitch canyon descents.
    - 5.1. Attach self to suitable belay device for descent with back up to maintain safety in the event of a fall.
    - 5.2. Use appropriate posture and abseiling techniques to execute self-belayed descents.
    - 5.3. Control self-belay system to execute safe and controlled descents.
    - 5.4. Utilise features of back up belay system in the event of a fall to self-arrest, self-rescue and complete descent.

## Assessment Requirements for SISOCAY003 Abseil in intermediate to advanced canyons

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three abseiling sessions in canyons, with at least two in a wet canyon
- across the three sessions collectively complete the following abseils on at least two different routes:
  - a total of four descents with a belayer
  - a total of three self-belayed descents with one of those descents as last person down using a doubled rope descent
- during each of the above abseils, consistently:
  - follow safety procedures and safely negotiate hazards to descend in a controlled manner
  - connect self to abseil and belay system using appropriate device and or knots
- complete two additional self-belayed descents, simulating a self-arrest and self-rescue to complete the descent
- belay abseilers according to safety procedures, and complete the following:
  - three top rope, top belayed descents
  - one bottom braked descent
  - two simulated abseiler falls, and safely and efficiently secure and release abseilers to continue.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for canyoning activities
- purpose, features, and correct fit for safety, of personal protective equipment for abseiling in canyons to include:
  - clothing
  - footwear
  - gloves, advantages and disadvantages
  - abseiling/climbing helmets
  - harnesses of different types, advantages and disadvantages

- waterproofing and stowing techniques used to keep clothing, equipment and resources dry during wet canyon activities
- features, functions and operation of abseiling equipment used in canyons:
  - carabiners
  - static and dynamic rope and when each might be used
  - tape
  - sewn sling
  - personal attachment systems, including cow's tails
  - Prusik cord
  - descending devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - belay systems:
    - top rope top belay
    - bottom brake
    - hanging belay
    - self-belay
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
- types of equipment and knots used, and how to tie them, when:
  - attaching descending devices to abseil ropes
  - attaching belay system to anchors
  - attaching self to back up belay system for self-belays
  - attaching self to anchor
- types of personal and equipment safety checks completed prior to abseiling and belaying
- canyoning abseiling techniques and appropriate posture for intermediate to difficult descents to include those for:
  - walking backwards on dry and wet surfaces
  - lowering
  - self-belayed descents
  - changing over at re-belays and using personal attachment system

- self-belayed descent as last person down, doubled rope
- disconnecting self from belay in a pool of water
- techniques for belaying others during intermediate to difficult canyon abseils to include those for:
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension
  - controlling bottom brake system
  - arresting abseiler falls
  - securing abseiler, tying off belay system and releasing
- reasons for attaching belayer to anchor system when belaying others including:
  - minimising belayer movement to retain stable position and stance
  - minimising effects of force of abseiler fall and risk of injury to belayer
  - minimising risks of belayer fall
- communication protocols used between abseilers and belayers to include:
  - calls
  - hand signals
  - whistles
  - radio
- typical hazards for abseiling in canyons, and techniques used to safely negotiate these:
  - falling rocks, water, debris, gear
  - abrasion points
  - sharp edges
  - squeezes and overhangs
  - ledges
  - traverses
  - slippery or unstable terrain
  - dense vegetation and trees
  - strong breezes
  - tangled rope
  - rope catches or jams on natural features
  - abseiling past a belay station
  - limited space at belay station
  - uneven landing at belay station
  - rising water levels
  - cold water, immersion for extended periods
- how to care for abseiling equipment during canyoning activities to avoid damage, and promote long lifespan
- techniques used to minimise damage to canyon surfaces when abseiling in canyons.

## Assessment Conditions

Skills must be demonstrated in intermediate to advanced canyons which may feature the following:

- pitches greater than 30 metres high
- anchors that can be difficult to reach
- pitches with obscure sections and or landing pools
- limited standing areas for multi pitch abseils or for hanging re-belay stations
- canyon escapes can take 2 to 4 hours.

Wet canyons may feature:

- moderate to high vertical flow
- landing pools with a current
- pools that require jumps between 5 to 10 metres
- jumps that have a difficult trajectory
- current strong enough to affect swimmer's path
- siphons
- white water features up to white water Grade 2 for short periods of time.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during canyoning activities
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
  - gloves, as required
- anchors which can include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling

- personal attachment systems, including cow's tails
- Prusik cords
- descending devices
- belay devices
- template safety checklists
- organisational safety and emergency response procedures for canyoning activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canyoning leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOCAY004 Establish ropes and belays for abseils in easy to intermediate canyons**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to select and set up belay systems and ropes suitable for abseils in easy to intermediate canyons, and according to current conditions. It requires the ability to select the abseil route and to select and utilise fixed artificial, naturally occurring or artificial removable anchors.

It applies to rigging staff and activity leaders who work independently or with limited guidance from others.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Canyoning

### **Unit Sector**

Outdoor Recreation

### **Elements and Performance Criteria**

#### **ELEMENTS**

#### **PERFORMANCE CRITERIA**

*Elements describe the*

*Performance criteria describe the performance needed to*

*essential outcomes*

*demonstrate achievement of the element.*

1. Select route and equipment suitable for the canyon abseil.
  - 1.1. Identify safe access to and egress from the pitch.
  - 1.2. Determine descent and ascent route appropriate for conditions.
  - 1.3. Select an abseiling and belay system suitable for the abseil, environmental conditions and participant.
  - 1.4. Choose a belay device suitable for the canyon conditions and belayer.
  - 1.5. Select other equipment to suit abseil requirements and participants.
  - 1.6. Complete safety and serviceability checks on equipment and tag faulty equipment according to organisational procedures.
2. Set up belay system for abseils in easy to intermediate canyons.
  - 2.1. Select anchors and assess condition, including performance under likely load and stability of surroundings.
  - 2.2. Rig or establish multiple anchors, ensuring equalisation and minimise potential for shock loading.
  - 2.3. Select and tie appropriate knots, and rig ropes suitable for load and function within the belay system.
  - 2.4. Establish a belay from which belayer is independent of the system.
  - 2.5. Establish a belay that maintains safety of belayer and abseiler.
  - 2.6. Position top rope or bottom brake belay away from hazards, or remove as able.
  - 2.7. Determine need for, and establish, back up belay systems.
  - 2.8. Complete safety checks according to organisational procedures.
3. Rig rope pitches for canyon abseils.
  - 3.1. Rig ropes to minimise effects of rope stretch and rub points and to allow efficient descent and ascent.
  - 3.2. Rig retrievable abseil systems suitable for the top rope or bottom brake belay requirements.
  - 3.3. Set up anchors and ropes to allow for a rescue.
  - 3.4. Select and tie knots suitable for system type established.
  - 3.5. Minimise the risk of cross loading and mis-alignment of carabiners.
  - 3.6. Verify manufacturers' recommendations, equipment limitations and safety margins, and rig equipment accordingly.
  - 3.7. Rig to minimise impact on the natural environment.

3.8. Complete safety checks according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed familiar organisational procedures for completing safety checks.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to complete safety and serviceability forms and fault tags that require factual information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>calculate loads for anchors and ropes under normal conditions and in the event of a fall</li><li>visually estimate distances to calculate lengths for ropes.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>follow a logical equipment selection, rigging and checking process.</li></ul>

## Unit Mapping Information

# Assessment Requirements for SISOCAY004 Establish ropes and belays for abseils in easy to intermediate canyons

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- select and set up belay systems and ropes for abseils at four different canyon pitches, with at least one in a wet canyon
- collectively set up the following types of systems:
  - doubled rope technique
  - single rope
  - releasable abseil line
  - rope systems suitable for single rope techniques
  - retrievable rope systems for:
    - top rope top belay
    - bottom brake belay
    - self-belay
- collectively select and use these different types of anchors:
  - fixed artificial
  - naturally occurring
  - artificial removable
- collectively select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
- identify and tag three different types of faulty equipment.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for safety and serviceability checks
- how the following factors affect selection of descent and ascent routes for canyoning environments:
  - season of operation, weather and environmental conditions
  - participant characteristics including age, size, weight, fitness and abseiling skill level
  - group objectives and size
- environmental hazards specific to abseiling in canyons and how these affect:

- safe access to and egress from the pitch
- choice of descent and routes for safety of abseiler
- positioning of top or bottom belay systems for safety of belayer
- features, functions, advantages and disadvantages of different types of anchors and used in canyons:
  - fixed artificial:
    - threads
    - bolts
    - chains
    - concrete bollards
  - naturally occurring:
    - trees
    - boulders
  - artificial removable:
    - spring loaded camming devices
    - nuts, wires and hexes
    - pitons
- issues that are assessed when selecting anchors and likely impacts of poor condition on performance under load:
  - wear and abrasion due to age and use
  - corrosion
  - decay
  - dislodgment
  - underlying stability of structural features and presence of:
    - cracks
    - deformities
    - fissures
- meaning of the following terms, and principles which apply when rigging anchors and ropes:
  - equalisation of load
  - single point of failure
  - anchor redundancy
  - angle of separation
  - shock loading
  - cross loading and cyclical loading of carabiners
  - mis-alignment of carabiners
  - closing the system, including advantages, disadvantages and methods used
- types of forces (upwards, downwards) generated during abseiling and belaying, and how to calculate load on anchors and ropes for these circumstances:
  - top rope top belay

- bottom brake belay
- self-belay
- abseiler descending under control
- abseiler fall
- belayer arresting falls
- the effects of rope stretch during operations and implications if not minimised:
  - abrasions
  - rope bounce
  - undue stress on the anchor system
  - potential for abseiler to impact with hazards, or become entangled
- features, functions, advantages and disadvantages of the following abseiling and belay equipment used in canyons:
  - abseiling and belay systems for:
    - doubled rope technique
    - single rope
    - releasable abseil line
    - rope systems suitable for single rope techniques
    - top rope top belay
    - bottom brake belay
    - self-belay
  - descending devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - belay devices:
    - auto locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - carabiners
  - harnesses of different types
  - static and dynamic rope and when each might be used
  - rope protectors
  - tape
  - sewn sling

- Prusik cord
- how the following factors affect the selection and rigging of above equipment:
  - site characteristics including position of rub points
  - weather and environmental conditions
  - participant size, weight, and abseiling ability
  - cumulative load for group size and number of abseils
  - abseiling techniques to be used
  - distance, height and angle of anchor relative to top edge of abseil
- manufacturers' specifications for equipment use
- techniques used to establish belay systems for safety of belayer:
  - rigging belays for performance of rescues
  - attaching to anchor or self belay safety system
- situations requiring back up belay systems
- when different knots are used, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight
  - end to end joining
  - termination
  - load control hitches
  - slide and grip hitches
- types of safety checks completed for rigging of equipment
- how to care for abseiling equipment when rigging to avoid damage, and promote long lifespan
- potential environmental impacts of rigging for abseils in a canyoning environment and techniques used to minimise damage.

## Assessment Conditions

Skills must be demonstrated in easy to intermediate canyons which may feature the following:

- pitches up to 30 metres
- anchors that can be easily reached
- room to regroup between abseils
- pitches that require some up and down climbing using a rope
- pitches that require some climbing moves up to grade 12 using a rope
- canyon escapes can take up to 1 hour.

Wet canyons may feature:

- low vertical flow
- pools of calm to slightly moving water
- pools that require jumps between 3 to 5 metres

- low to moderately angled slides.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
  - gloves, as required
- anchors to include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - descending devices
  - belay devices
- template safety checklists
- organisational procedures for safety and serviceability checks.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canyoning activity leader or rigger where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOCAY005 Establish ropes and belays for abseils in intermediate to advanced canyons**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to select and set up belay systems and ropes suitable for abseils in intermediate to advanced canyons, and according to current conditions. It requires the ability to select the abseil route and to select and utilise fixed artificial, naturally occurring or artificial removable anchors.

It applies to rigging staff and activity leaders who work independently or with limited guidance from others.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Canyoning

### **Unit Sector**

Outdoor Recreation

### **Elements and Performance Criteria**

#### **ELEMENTS**

#### **PERFORMANCE CRITERIA**

*Elements describe the*

*Performance criteria describe the performance needed to*

*essential outcomes*

*demonstrate achievement of the element.*

1. Select route and equipment suitable for the canyon abseil.
  - 1.1. Identify safe access to and egress from the pitch.
  - 1.2. Determine descent and ascent route appropriate for conditions.
  - 1.3. Select an abseiling and belay system suitable for the abseil, environmental conditions and participant.
  - 1.4. Choose a belay device suitable for the canyon conditions and belayer.
  - 1.5. Select other equipment to suit abseil requirements participants.
  - 1.6. Complete safety and serviceability checks on equipment and tag faulty equipment according to organisational procedures.
2. Set up belay system for abseils in intermediate to advanced canyons.
  - 2.1. Select anchors and assess condition, including performance under likely load and stability of surroundings.
  - 2.2. Rig or establish multiple anchors, ensuring equalisation and minimise potential for shock loading.
  - 2.3. Select and tie appropriate knots, and rig ropes suitable for load and function within the belay system.
  - 2.4. Establish a belay from which belayer is independent of the system.
  - 2.5. Establish a belay that maintains safety of belayer and abseiler.
  - 2.6. Position top rope or bottom brake belay away from hazards, or remove as able.
  - 2.7. Determine need for, and establish, back up belay systems.
  - 2.8. Complete safety checks according to organisational procedures.
3. Rig rope pitches for canyon abseils.
  - 3.1. Rig ropes to minimise effects of rope stretch and rub points and to allow efficient descent and ascent.
  - 3.2. Rig retrievable abseil systems suitable for the top rope or bottom brake belay requirements.
  - 3.3. Set up anchors and ropes to allow for a rescue.
  - 3.4. Select and tie knots suitable for system type established.
  - 3.5. Minimise the risk of cross loading and mis-alignment of carabiners.
  - 3.6. Verify manufacturers' recommendations, equipment limitations and safety margins, and rig equipment accordingly.
  - 3.7. Rig to minimise impact on the natural environment.

3.8. Complete safety checks according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed familiar organisational procedures for completing safety checks.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to complete safety and serviceability forms and fault tags that require factual information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>calculate loads for anchors and ropes under normal conditions and in the event of a fall</li><li>visually estimate distances to calculate lengths for ropes.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>follow a logical equipment selection, rigging and checking process.</li></ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOCAY005 Establish ropes and belays for abseils in intermediate to advanced canyons

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- select and set up belay systems and ropes for abseils at four different canyon pitches, with at least two in a wet canyon
- collectively set up the following types of systems:
  - doubled rope technique
  - single rope
  - releasable abseil line
  - rope systems suitable for single rope techniques
  - retrievable rope systems for:
    - top rope top belay
    - bottom brake belay
    - self-belay
- collectively select and use these different types of anchors:
  - fixed artificial
  - naturally occurring
  - artificial removable
- collectively select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
- identify and tag three different types of faulty equipment.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for safety and serviceability checks
- how the following factors affect selection of descent and ascent routes for canyoning environments:
  - season of operation, weather and environmental conditions
  - participant characteristics including age, size, weight, fitness and abseiling skill level
  - group objectives and size
- environmental hazards specific to abseiling in canyons and how these affect:

- safe access to and egress from the pitch
- choice of descent and ascent routes for safety of abseiler
- positioning of top or bottom belay systems for safety of belayer
- features, functions, advantages and disadvantages of different types of anchors used in canyons:
  - fixed artificial:
    - threads
    - bolts
    - chains
    - concrete bollards
  - naturally occurring:
    - trees
    - boulders
  - artificial removable:
    - spring loaded camming devices
    - nuts, wires and hexes
    - pitons
- issues that are assessed when selecting anchors and likely impacts of poor condition on performance under load:
  - wear and abrasion due to age and use
  - corrosion
  - decay
  - dislodgment
  - underlying stability of structural features and presence of:
    - cracks
    - deformities
    - fissures
- meaning of the following terms, and principles which apply when rigging anchors and ropes:
  - equalisation of load
  - single point of failure
  - anchor redundancy
  - angle of separation
  - shock loading
  - cross loading and cyclical loading of carabiners
  - mis-alignment of carabiners
  - closing the system, including advantages, disadvantages and methods used
- types of forces (upwards, downwards) generated during abseiling and belaying, and how to calculate load on anchors and ropes for these circumstances:
  - top rope top belay

- bottom brake belay
- self-belay
- abseiler descending under control
- abseiler fall
- belayer arresting falls
- the effects of rope stretch during operations and implications if not minimised:
  - abrasions
  - rope bounce
  - undue stress on the anchor system
  - potential for abseiler to impact with hazards, or become entangled
- features, functions, advantages and disadvantages of the following abseiling and belay equipment used in canyons:
  - abseiling and belay systems for:
    - doubled rope technique
    - single rope
    - releasable abseil line
    - rope systems suitable for single rope techniques
    - top rope top belay
    - bottom brake belay
    - self-belay
  - descending devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - carabiners
  - harnesses of different types
  - static and dynamic rope and when each might be used
  - rope protectors
  - tape
  - sewn sling

- personal attachment systems, including cow's tails
- Prusik cord
- how the following factors affect the selection and rigging of above equipment:
  - site characteristics including position of rub points
  - weather and environmental conditions
  - participant size, weight, and abseiling ability
  - cumulative load for group size and number of abseils
  - abseiling techniques to be used
  - distance, height and angle of anchor relative to top edge of abseil
- manufacturers' specifications for equipment use
- techniques used to establish belay systems for safety of belayer:
  - rigging belays for performance of rescues
  - attaching to anchor or self belay safety system
- situations requiring back up belay systems
- when different knots are used, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight
  - end to end joining
  - termination
  - load control hitches
  - slide and grip hitches
- types of safety checks completed for rigging of equipment
- how to care for abseiling equipment when rigging to avoid damage, and promote long lifespan
- potential environmental impacts of rigging for abseils in a canyoning environment and techniques used to minimise damage.

## Assessment Conditions

Skills must be demonstrated in intermediate to advanced canyons which may feature the following:

- pitches greater than 30 metres high
- anchors that can be difficult to reach
- pitches with obscure sections and or landing pools
- limited standing areas for multi pitch abseils or for hanging re-belay stations
- canyon escapes can take 2 to 4 hours.

Wet canyons may feature:

- moderate to high vertical flow
- landing pools with a current
- pools that require jumps between 5 to 10 metres

- jumps that have a difficult trajectory
- current strong enough to affect swimmer's path
- siphons
- white water features up to white water Grade 2 for short periods of time.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
  - gloves, as required
- anchors to include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - personal attachment systems, including cow's tails
  - Prusik cords
  - descending devices
  - belay devices
- template safety checklists
- organisational procedures for safety and serviceability checks.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canyoning activity leader or rigger where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOCAY006 Lead canyoning activities, easy to intermediate canyons

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during canyoning activities in easy to intermediate canyons according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct abseiling techniques applicable to easy to intermediate canyons. To do this, leaders must be proficient in canyon abseiling skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |  |
|---|--|
| <p>1. Prepare equipment and participants.</p>   | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.</p> <p>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.</p>  |
| <p>2. Brief participants and demonstrate abseiling techniques applicable to easy to intermediate canyons.</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate for the activity.</p> <p>2.6. Check and confirm participant ability to use and control equipment before activity commencement.</p> <p>2.7. Check matching of equipment and activities to participants and amend as required.</p> |
| <p>3. Lead and supervise canyoning activities in easy to intermediate</p>                                     | <p>3.1. Supervise activity according to designated role, adjusting position and role as required.</p> <p>3.2. Implement recreational instruction techniques to impart</p>  |

- canyons. skills and knowledge for the activity.
- 3.3. Provide clear and accurate instructions and demonstrations throughout the session.
  - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during canyoning activities in easy to intermediate canyons.
- 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
  - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
  - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
  - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
  - 4.5. Amend activities if risk is unacceptable; cease activities when required.
  - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
5. Complete post activity responsibilities.
- 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
  - 5.2. Notify relevant personnel of activity completion.
  - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
  - 5.4. Document any equipment faults and incidents including injuries and near misses.
  - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret detailed familiar organisational policies and procedures.
- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

## Assessment Requirements for SISOCAY006 Lead canyoning activities, easy to intermediate canyons

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three canyoning sessions for a group of participants according to predetermined activity plans
- complete at least one of the above sessions in a wet canyon
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for canyoning activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants

- key principles of group dynamics and techniques used to manage positive group dynamics
- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to canyoning activities in easy to intermediate canyons:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - designated on rope and off rope and waiting zones.

## Assessment Conditions

Skills must be demonstrated in easy to intermediate canyons which may feature the following:

- pitches up to 30 metres
- anchors that can be easily reached
- room to regroup between abseils
- pitches that require some climbing, and down climbing using a rope
- canyon escapes can take up to 1 hour.

Wet canyons would feature:

- low vertical flow
- pools of calm to slightly moving water
- pools that require jumps between 3 to 5 metres
- low to moderately angled slides.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:

- activity modifications for prevailing conditions and participant needs
- arising safety risks
- emergency situations
- equipment faults
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
  - gloves, as required
- anchors which can include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - static
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - descending devices
  - belay devices
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for canyoning activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canyoning leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

- specific to canyoning activities in intermediate to advanced canyons:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - designated on rope and off rope and waiting zones.

## Assessment Conditions

Skills must be demonstrated in an intermediate to advanced canyons which may features the following:

- pitches greater than 30 metres high
- anchors that can be difficult to reach
- pitches with obscure sections and or landing pools
- limited standing areas for multi pitch abseils or for hanging re-belay stations
- canyon escapes can take 2 to 4 hours

Wet canyons may feature:

- moderate to high vertical flow
- landing pools with a current
- pools that require jumps between 5 to 10 metres
- jumps that have difficult trajectory
- current strong enough to affect swimmer's path
- siphons
- white water features up to white water Grade 2 for short periods of time.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
  - gloves, as required
- anchors which can include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - static
  - rope protectors
  - tape or sewn sling
  - cow's tails
  - Prusik cords
  - descending devices
  - belay devices
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for canyoning sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canyoning leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOCHC001 Lead challenge course sessions, low elements

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead participants during challenge course sessions at a facility where low elements are set up. Participants may be individual users or groups attending for purely recreational purposes, or may be groups involved in adventure based learning activities for which there would be a predetermined activity plan.

It requires the ability to explain and demonstrate, to participants, techniques for spotting, and for using independent and linked low elements.

This unit applies to any type of organisation that operates challenge courses including commercial, not-for-profit and government organisations.

It applies to activity leaders who use discretion and judgement to manage participant logistics, safety, and routine problems within clearly defined operating procedures. Complex issues and problems would be referred to others for assistance, direction or resolution.

Leaders might also be involved in providing adventure based learning outcomes, the skills for which are provided in complementary units.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Challenge Course

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |  |
|---|--|
| <p>1. Prepare equipment and participants.</p>           | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.</p> <p>1.3. Select and set up personal protective equipment (PPE) to match participants, low elements and prevailing conditions.</p> <p>1.4. Complete, for PPE, required safety and serviceability inspections and reports according to organisational procedures.</p> <p>1.5. Direct and assist participants to fit and adjust personal protective equipment; check comfort and safety of fit.</p> |
| <p>2. Brief participants.</p>                           | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p>   |
| <p>3. Instruct spotting technique for low elements.</p> | <p>3.1. Explain importance of spotting and demonstrate essential components of spotting technique.</p> <p>3.2. Demonstrate and explain different techniques and spotter positions used for different course elements and participant characteristics.</p> <p>3.3. Verify participant understanding of spotting techniques and safety procedures.</p> <p>3.4. Engage participants in a sequence of activities to warm up, develop trust and practice spotting in a low risk</p>   |

- situation.
- 3.5. Observe and monitor participant performance of spotting technique and provide feedback and corrective instruction.
4. Lead low element activities.
- 4.1. Explain and demonstrate techniques for use of independent and linked low elements.
- 4.2. Reinforce appropriate spotter technique and position for the particular element.
- 4.3. Provide clear and accurate instructions and demonstrations throughout the session.
- 4.4. Monitor performance of spotters and participants, and provide directions, encouragement and corrective instruction to improve techniques.
- 4.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
- 4.6. Implement required modifications to activity to ensure participant engagement and comfort, and completion within timelines.
5. Manage safety during activities.
- 5.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
- 5.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
- 5.3. Respond immediately to adverse participant reactions and hazardous situations.
- 5.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
- 5.5. Amend activities if risk is unacceptable; cease activities when required.
- 5.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
6. Complete post activity responsibilities.
- 6.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
- 6.2. Notify relevant personnel of activity completion.
- 6.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
- 6.4. Document any equipment faults, and incidents including injuries and near misses.
- 6.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret detailed familiar organisational policies and procedures.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>provide clear and unambiguous instructions to participants using language and terms easily understood</li> <li>ask open and closed probe questions and actively listen to determine participants' understanding of instructions.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>organise participants into manageable groups for activities</li> <li>manage own timing and that of participants to complete activities within organisational service times.</li> </ul>

## Unit Mapping Information

## Assessment Requirements for SISOCHC001 Lead challenge course sessions, low elements

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three low element challenge course sessions for a group of participants
- across the three sessions, collectively:
  - explain and demonstrate at least three different spotting techniques
  - explain and demonstrate techniques for negotiating at least four different low elements
- during each session, consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for:
  - completing and documenting safety and serviceability inspections on personal protective equipment
  - safe participant use of low elements
  - emergency response and first aid for low element challenge course sessions
- clothing and footwear suitable for low element challenge course activities
- purpose, features, and correct fit for safety, of personal protective equipment for low element participants, including climbing helmets and when these might be used
- features of different types of low elements found in challenge courses:
  - common elements:
    - independent elements

- linked elements
- those which are specific to the particular course in use
- how characteristics of participants affect the selection of course elements and personal protective equipment:
  - age, size and weight
  - current experience in challenge course activities and skill level
  - fitness level and physical capabilities
  - injuries and medical conditions
  - emotional, behavioural and intellectual ability or disability
- hazards and associated risks for participant use of low elements, and methods used to minimise risk:
  - hazards associated with the structure
  - hazards associated with equipment used to negotiate the element
  - fall protection hazards
  - group management hazards
  - weather related hazards; wind, rain, lightning etc.
- roles and responsibilities of activity leaders and supervisors for low element activities
- communication protocols used between participants and leaders during low element activities:
  - calls
  - hand signals
  - whistles
  - radio
- spotting techniques, spotter positioning and:
  - variations for different low elements
  - variations to suit different participant characteristics
- techniques used to negotiate low elements
- different techniques used to demonstrate, to participants, low element negotiation and spotting
- appropriateness of different demonstration techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- a range of warm-up and practice exercises suitable for low element activities
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics
- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation.

## Assessment Conditions

Skills must be demonstrated in a challenge course facility where at least four different low course elements are set up.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- personal protective equipment which can include climbing helmets, as required
- activity plans
- template:
  - safety and serviceability checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational procedures for:
  - completing and documenting safety and serviceability inspections on personal protective equipment
  - safe participant use of low elements
  - emergency response and first aid for low element challenge course sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a challenge course leader where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOCHC002 Set up and supervise challenge course sessions, low elements**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to supervise activity leaders and participants during challenge course sessions at a facility where low elements are set up. Participants may be individual users or groups attending for purely recreational purposes, or may be groups involved in adventure based learning activities for which there would be a predetermined activity plan.

It requires the ability to complete routine visual inspections of course elements, select and set up a sequence of challenge course activities to meet participant needs and to monitor participation across multiple course elements.

This unit applies to any type of organisation that operates challenge courses including commercial, not-for-profit and government organisations.

It applies to senior activity leaders or challenge course supervisors who work independently using discretion and judgement to manage operational logistics, risk, and any significant problems when they arise.

Leaders and supervisors might also be involved in providing adventure based learning outcomes; the skills for which are provided in complementary units.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

## Assessment Requirements for SISOCHC002 Set up and supervise challenge course sessions, low elements

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- prior to commencement of two sessions, complete two visual inspections and complete reports:
  - course site and surrounding area
  - four low course elements
- for three different challenge course sessions and according to predetermined activity plans:
  - select and set up a sequence of low element activities to meet the requirements of three different participant groups
- supervise activity leaders and participants during three low element sessions
- during each session consistently manage activity leader and participant adherence to safety procedures
- after each session, lead a debrief with team members
- utilise options provided in Assessment Conditions to:
  - direct activity leaders to amend activities in response to a total of two safety issues that arise during activities
  - complete a brief written or verbal report to recommend improvements for activities and management of safety issues.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for:
  - safe participant use of low elements
  - emergency response and first aid for low element challenge course sessions
- for low element challenge courses, organisational:
  - schedule for completing visual inspections
  - items that must be inspected and extent of inspection requirements prior to commencement of session
  - requirements for recording and filing outcomes of inspections

- requirements for reporting issues of immediate concern including hazardous ones
- typical environmental hazards found within challenge course sites and surrounding areas and associated risks, to include:
  - unstable trees and tree branches; tree debris
  - tree and tree debris hazards, including falling limbs
  - ground surface hazards
  - spiders, insects, snakes and fauna
- features of different types of low elements found in challenge courses:
  - common elements:
    - independent elements
    - linked elements
  - those which are specific to the particular course in use
  - signs of deterioration
  - failures that pose an immediate safety risk
- factors that affect the selection and sequencing of low element activities:
  - group objectives and session duration outlined in activity plans for particular client groups
  - objectives of activity participation for general admission clientele
  - participant characteristics:
    - age, size and weight
    - current experience in challenge course activities and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - season of operation, weather and environmental conditions
- hazards and associated risks for participant use of low elements, and methods used to minimise risk:
  - hazards associated with the structure
  - hazards associated with equipment used to negotiate the element
  - fall protection hazards
  - group management hazards
  - weather related hazards; wind, rain, lightning etc.
- methods used by challenge course supervisors to:
  - roam and supervise multiple course elements, and performance of spotters and participants
  - lead team member debriefs
  - provide overall reports on activity successes, problems and incidents
  - provide recommendations to improve activities and management of safety.

## Assessment Conditions

Skills must be demonstrated in a challenge course facility where at least four different low course elements are set up.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants and activity leaders whom the individual supervises
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - arising safety issues and activity modifications
  - recommending activity and safety management improvements
- personal protective equipment used to set up low elements which can include climbing helmets, as required
- activity plans
- organisational procedures for:
  - safe participant use of low elements
  - emergency response and first aid for low element challenge course sessions
- organisational schedule, procedures and templates for completing and documenting visual inspections of course site and low elements.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a challenge course supervisor where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## Assessment Requirements for SISOCHC003 Lead challenge course sessions, high elements

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three high element challenge course sessions for a group of participants
- across the three sessions, explain and demonstrate techniques for belaying and negotiating at least four different high elements
- during each session, consistently:
  - manage participant adherence to safety procedures
  - connect participants to belay system using appropriate device and or knots and complete safety checks
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults
- complete two simulated high element rescues to indirectly assist a rescuee to recover and continue through verbal direction
- complete two simulated high element rescues, using safe approach procedures, to directly assist the rescuee to recover and continue.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for:
  - completing and documenting safety and serviceability inspections on personal protective equipment
  - safe participant use of high elements
  - emergency response and first aid for high element challenge course sessions
- clothing and footwear suitable for high element challenge course activities

- purpose, features, and correct fit for safety, of personal protective equipment for high element participants:
  - harnesses of different types, advantages and disadvantages
  - climbing helmets
- features of different types of high elements found in challenge courses:
  - common elements:
    - independent elements
    - linked elements
  - those which are specific to the particular course in use
- how characteristics of participants affect the selection of course elements and personal protective equipment:
  - age, size and weight
  - current experience in challenge course activities and skill level
  - fitness level and physical capabilities
  - injuries and medical conditions
  - emotional, behavioural and intellectual ability or disability
- hazards and associated risks for participant use of high elements, and methods used to minimise risk:
  - hazards associated with the structure
  - hazards associated with equipment used to negotiate the element
  - fall protection hazards
  - group management hazards
  - weather related hazards; wind, rain, lightning etc.
- roles and responsibilities of activity leaders and supervisors for high element activities
- communication protocols used between participants and leaders during high element activities:
  - calls
  - hand signals
  - whistles
  - radio
- features, functions and operation of belaying equipment used for high element challenge courses:
  - carabiners
  - rope
  - belay systems
- types of equipment and methods used to attach participants to a high element belay system, including suitable knots that may be used
- techniques used to:
  - negotiate high elements
  - belay others, including appropriate position for belayer

- different techniques used to demonstrate, to participants, high element negotiation and belaying
- appropriateness of different demonstration techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics
- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- techniques used for basic high element rescues to include those for:
  - indirect assistance to rescuee to recover and continue through verbal direction
  - direct assistance to rescuee to recover and continue.

## Assessment Conditions

Skills must be demonstrated in a challenge course facility where at least four different high course elements are set up.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- people who act as rescuees with whom the individual interacts during simulated rescues
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- equipment to include:
  - harnesses
  - climbing helmets
  - established anchors or attachment points and belay systems
  - carabiners

- activity plans
- template:
  - safety and serviceability checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational procedures for:
  - completing and documenting safety and serviceability inspections on personal protective equipment
  - safe participant use of high elements
  - emergency response and first aid for high element challenge course sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a challenge course leader where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# **SISOCHC004 Set up and supervise challenge course sessions, high elements**

## **Modification History**

Not applicable.

## **Application**

This unit describes the performance outcomes, skills and knowledge required to supervise activity leaders and participants during challenge course sessions at a facility where high elements are set up. Participants may be individual users or groups attending for purely recreational purposes, or may be groups involved in adventure based learning activities for which there would be a predetermined activity plan.

It requires the ability to complete routine visual inspections of course elements, select and set up a sequence of challenge course activities to meet participant needs, to establish belay systems and to monitor participation across multiple course elements. It covers skills for complex rescues.

This unit applies to any type of organisation that operates challenge courses including commercial, not-for-profit and government organisations.

It applies to senior activity leaders or challenge course supervisors who work independently using discretion and judgement to manage operational logistics, risk, and any significant problems when they arise.

Leaders and supervisors might also be involved in providing adventure based learning outcomes; the skills for which are provided in complementary units.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## **Pre-requisite Unit**

SISOCHC003 Lead challenge course sessions, high elements

## **Competency Field**

Challenge Course

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |   |
|--|---|
| 1. Complete visual inspections.                                    | <ul style="list-style-type: none"> <li>1.1. Complete visual inspection of high course elements before commencement of sessions according to organisational schedule and procedures.</li> <li>1.2. Confirm no obvious damage to high course elements.</li> <li>1.3. Confirm integrity of safety systems.</li> <li>1.4. Inspect course site and surrounding area for hazards according to organisational schedule and procedures.</li> <li>1.5. Complete required organisational reports to confirm safety.</li> <li>1.6. Report on and escalate issues of immediate concern according to organisational procedures.</li> </ul> |
| 2. Prepare high element activities and equipment for participants. | <ul style="list-style-type: none"> <li>2.1. Identify characteristics, abilities and needs of participants.</li> <li>2.2. Select a suitable sequence of high element activities to meet requirements.</li> <li>2.3. Select activity equipment according to requirements of known participant characteristics and for general admission participants.</li> <li>2.4. Establish any additional equipment required for high elements; complete safety and serviceability checks and reports.</li> </ul>  |
| 3. Set up belay system.  | <ul style="list-style-type: none"> <li>3.1. Select and assess condition of anchors along course for attachment of safety lines and belays.</li> <li>3.2. Select harnesses and belay system suitable for the course element, conditions and participant.</li> <li>3.3. Choose a belay device suitable for the situation and belayer.</li> <li>3.4. Complete safety and serviceability checks on equipment and action faulty equipment according to organisational procedures.</li> <li>3.5. Establish participant belays, and self-belays suitable for rescue circumstances.</li> </ul>  |

- 3.6. Select and tie appropriate knots and rig ropes suitable for load and function within the belay system.
  - 3.7. Verify manufacturers' recommendations, equipment limitations and safety margins, and rig equipment accordingly.
  - 3.8. Complete safety checks on rigging according to organisational procedures.
4. Supervise high element activities.
  - 4.1. Monitor multiple course elements and performance of belayers and participants.
  - 4.2. Provide corrective instruction of technique through explanation and demonstration, as required.
  - 4.3. Direct and supervise activity leaders to ensure safe and positive conduct of all activities.
  - 4.4. Monitor participant and leader adherence to safety procedures and correct breaches, as required.
  - 4.5. Respond immediately to hazardous situations and promptly assess risks to minimise risk of injury to participants and others.
  - 4.6. Direct leaders to amend activities if risk is unacceptable or cease activities when required.
  - 4.7. Respond to emergency situations according to organisational, emergency response and first aid procedures.
5. Rescue participants or others from high elements.
  - 5.1. Determine appropriate rescue methods and techniques for situation, according to degree of urgency and condition of person in need of rescue.
  - 5.2. Determine roles and responsibilities of others and provide clear and concise instructions throughout rescue.
  - 5.3. Use appropriate approach procedure for element to provide direct rescuee assistance.
  - 5.4. Operate rescue system to lower persons from high elements.
  - 5.5. Provide clear and concise instructions and information to person being rescued.
  - 5.6. Safely and efficiently escape a loaded belay system and transfer from belay device to direct connection to anchor.
6. Complete post session responsibilities.
  - 6.1. Dismantle additional equipment, inspect for wear or breakage, tag faults and store in designated.
  - 6.2. Lead debrief with team members to identify sessional successes, problems and difficulties.
  - 6.3. Evaluate and report on feedback from leaders and participants.
  - 6.4. Identify and report on any course or equipment

maintenance requirements.

6.5. Provide recommendations to improve activities and safety management.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret detailed familiar organisational policies and procedures.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>use fundamental sentence structure to complete safety and serviceability forms and reports that require factual information</li> <li>produce cohesive reports which clearly represent team and participant feedback and own recommendations through use of persuasive language.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>provide clear and unambiguous instructions to leaders and participants using language and terms easily understood</li> <li>ask open and closed probe questions and actively listen to determine leader and participant understanding of instructions.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>critically evaluate successes and failures of challenge course activities to recommend improvements</li> <li>critically analyse all circumstances and implications to report on safety issues and recommend improved practices.</li> </ul>

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SISOCHC004 Set up and supervise challenge course sessions, high elements

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- prior to commencement of two sessions, complete two visual inspections and complete reports:
  - course site and surrounding area
  - four high course elements
- for three different challenge course sessions and according to predetermined activity plans:
  - select and set up a sequence of high element activities to meet the requirements of three different participant groups
  - select and set up belay systems suitable for course elements and participants
  - across the three sessions, select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
- supervise activity leaders and participants during three high element sessions
- during each session consistently manage activity leader and participant adherence to safety procedures
- after each session, lead a debrief with team members
- utilise options provided in Assessment Conditions to:
  - direct activity leaders to amend activities in response to a total of two safety issues that arise during activities
  - complete a brief written or verbal report to recommend improvements for activities and management of safety issues
- set up two belay systems suitable for rescues at two different high elements
- complete simulated high element rescues, using safe approach procedures, to:
  - lower a conscious person on two occasions
  - lower an unconscious person on one occasion.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for:

- safe participant use of high elements
- emergency response and first aid for high element challenge course sessions
- for high element challenge courses, organisational:
  - schedule for completing visual inspections
  - items that must be inspected and extent of inspection requirements prior to commencement of session
  - requirements for recording and filing outcomes of inspections
  - requirements for reporting issues of immediate concern including hazardous ones
- typical environmental hazards found within challenge course sites and surrounding areas and associated risks, to include:
  - unstable trees and tree branches; tree debris
  - tree and tree debris hazards, including falling limbs
  - ground surface hazards
  - spiders, insects, snakes and fauna
- features of different types of high elements found in challenge courses:
  - common elements:
    - independent elements
    - linked elements
  - those which are specific to the particular course in use
  - signs of deterioration
  - failures that pose an immediate safety risk
- factors that affect the selection and sequencing of high element activities:
  - group objectives and session duration for particular client groups
  - objectives of activity participation for general admission clientele
  - participant characteristics:
    - age, size and weight
    - current experience in challenge course activities and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - season of operation, weather and environmental conditions
- features, functions, advantages and disadvantages of different types of anchors or attachment points used in challenge course facilities:
  - bolts
  - camming devices
  - wire rope grip
  - shackles
- working load limits of anchors or attachment points and tension formula
- issues that are assessed when selecting anchors or attachment points and likely impacts of poor condition on performance under load:

- wear and abrasion due to age and use
- corrosion
- decay
- dislodgment
- features, functions, advantages and disadvantages of challenge course high element equipment:
  - harnesses of different types
  - carabiners
  - rope
  - wire rope
  - hand ropes
  - swing ropes
  - pulleys
  - tape
  - sewn sling
  - Prusik cord
  - personal attachment systems, including cow's tails
  - crab claws
  - thimbles
  - rigging screws
  - turnbuckles
  - staples
  - belay devices:
    - plate
    - assisted locking
    - tubular
  - belay systems:
    - static belay
    - dynamic belay
    - bottom braking belay
    - self-belay
- how the following factors affect the selection and rigging of above equipment:
  - element characteristics
  - weather and environmental conditions
  - participant size, weight and abilities
- manufacturers' specifications for equipment use
- techniques used to rig belays for performance of rescues
- when different knots are used, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight

- end to end joining
- termination
- load control hitches
- slide and grip hitches
- hazards and associated risks for participant use of high elements, and methods used to minimise risk:
  - hazards associated with the structure
  - hazards associated with equipment used to negotiate the element
  - fall protection hazards
  - group management hazards
  - weather related hazards; wind, rain, lightning etc.
- methods used by challenge course supervisors to:
  - roam and supervise multiple course elements, and performance of belayers and participants
  - lead team member debriefs
  - provide overall reports on activity successes, problems and incidents
  - provide recommendations to improve activities and management of safety.
- roles and responsibilities that can be allocated to team members to effectively complete a complex high element rescue
- appropriate approach methods for high element rescues:
  - using ladders
  - using ascending ropes
  - approaching via the element
  - approaching from start, mid or finish point of course
  - how these will vary depending on rescue circumstance
- techniques used for complex high element rescues to include those for:
  - ascending and descending a single rope
  - lowering conscious and unconscious persons
  - securing rescuee and escaping from a loaded belay system.

## Assessment Conditions

Skills must be demonstrated in a challenge course facility where at least four different high course elements are set up.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response

Assessment must ensure use of:

- a group of participants and activity leaders whom the individual supervises
- people who act as rescuees with whom the individual interacts during simulated rescues
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - arising safety issues and activity modifications
  - recommending activity and safety management improvements
- personal protective equipment used to set up high elements which can include climbing helmets
- equipment to include:
  - established anchors or attachment points
  - harnesses
  - carabiners
  - rope
  - wire rope
  - tape or sewn sling
  - pulleys
  - Prusik cord
  - personal attachment systems, including cow's tails
  - crab claws
  - thimbles
  - rigging screws
  - turnbuckles
  - staples
  - belay devices
- activity plans
- organisational procedures for:
  - safe participant use of high elements
  - emergency response and first aid for high element challenge course sessions
- organisational schedule, procedures and templates for completing and documenting visual inspections of course site and high elements.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a challenge course supervisor where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOCHC005 Manage challenge course

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to manage a range of specialist functions within challenge course facilities. It requires the ability to develop and document a range of plans and procedures including those for course inspection, safe participant use, rescues, emergency response and for training staff. It also covers the selection of specialist equipment and services appropriate for course elements and the site.

This unit applies to any type of organisation that operates a challenge course including commercial, not-for-profit and government organisations.

It applies to challenge course managers who work with significant autonomy to manage the operation and safety of the course.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Challenge Course

### Unit Sector

Outdoor Recreation

### Elements and Performance Criteria

# Assessment Requirements for SISOCHC005 Manage challenge course

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document the following procedures for a challenge course:
  - completing and reporting routine visual inspections of site, surroundings and course elements
  - completing and reporting hazard identification and risk assessments
  - safe participant use of two course elements including types of equipment that must be used to support safety
  - completing rescues, including approach methods, techniques and variables for two course elements
- develop and document the following templates for a challenge course:
  - inspections of the site, surrounding areas and two course elements
  - hazard identification and risk assessments for the site, surrounding areas and two course elements
- develop and document schedules for the following types of inspections and indicate who is responsible for each:
  - routine visual inspection of site, surroundings and course elements
  - operational inspection
  - periodical inspection
  - tree inspection
- develop and document:
  - an emergency response plan for dealing with incidents involving injured participants
  - a basic training plan for activity leaders and supervisors, limited to covering procedural issues for course operation, and not skill issues
- document a process for:
  - disseminating plans, procedures and information to activity leaders, supervisors and course users
  - maintaining records
- research the availability of one type of ancillary equipment suited to a course and one type of specialist service available and write a brief recommendation on why these should be purchased.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- different types of challenge course inspections that should be completed, at what intervals, and extent of inspection requirements:
  - routine visual inspection of site, surroundings and course elements
  - operational inspection
  - periodical inspection
  - tree inspection
- for each of the above inspection types:
  - who would complete these; staff or external specialists
  - requirements for recording and filing outcomes of inspections
- typical settings for challenge courses and features of both internal site environments and surrounding areas
- typical environmental hazards found within challenge course sites and surrounding areas, associated risks, and methods used to minimise risk to include:
  - unstable trees and tree branches; tree debris
  - ground surface hazards
  - spiders, insects, snakes and fauna
- features of different types of low and high elements found in challenge courses, both independent and linked
- hazards and associated risks for participant use of low and high course elements, and methods used to minimise risk:
  - hazards associated with the structure
  - hazards associated with equipment used to negotiate the element
  - fall protection hazards
  - group management hazards
  - weather related hazards; wind, rain, lightning etc.
- operational features of the following equipment used to support participant safety:
  - safety lines for low elements
  - belay systems for high elements
  - fall protection
- safe techniques that should be used by participants to negotiate low and high course elements
- unsafe practices that may be used by participants on course elements and the importance of controlling potential behaviours
- spotting techniques used with different types of low elements and how these can be tailored to the element features and characteristics of participants
- appropriate approach methods for high element rescues:
  - using ladders
  - using ascending ropes

- approaching via the element
- approaching from start, mid or finish point of course
- how these will vary depending on rescue circumstance
- techniques used for high element rescues to include those for:
  - indirect assistance to rescuee to recover and continue through verbal direction
  - direct assistance to rescuee to recover and continue
  - ascending and descending a single rope
  - lowering conscious and unconscious persons
- a range of formats for and inclusions of:
  - procedures and schedules
  - training plans
  - hazard identification and reporting tools
  - risk assessment and control tools based on the hierarchy of control method
  - emergency response plans and procedures
  - inspection reports
  - equipment safety and serviceability checklists
- Australian Standards relevant to the operation of challenge courses:
  - the purpose and legal status of the standards
  - why the guideline standard might be adopted by organisations
  - how the standards may be used to assist the development of organisational procedures
- emerging equipment research and technology for challenge courses, at an overview level
- suppliers of specialist equipment and services for challenge courses, their product and service range and suitability to meet the needs of particular courses.

## Assessment Conditions

In order to develop tailored systematic plans and procedures, access to the following is required:

- a challenge course where low or high course elements, or a combination of both, are set up
- comprehensive information about the operation and clientele of the challenge course facility to determine its characteristics and needs

Assessment must ensure access to information about suppliers of specialist equipment and services for challenge courses and details of their product and service range.

Assessment must ensure use of:

- computers, printers and general software programs used to produce system documents
- template documents:
  - procedures and schedules

- hazard identification and reporting tools
- risk assessment and control tools based on the hierarchy of control method
- emergency response plans and procedures
- training plans
- inspection reports.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a challenge course manager where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOCLM001 Top rope climb single pitches, artificial surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to climb single pitches on artificial surfaces using top rope techniques. It also requires the ability to belay top rope climbers. Artificial surfaces can be fixed or portable structures and can be in indoor or outdoor environments.

It applies to leaders, guides or instructors, who use these skills when leading participants during climbing activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Climbing

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for the climb.
  - 1.1. Select clothing, footwear and personal protective equipment suitable for the climb and conditions.
  - 1.2. Confirm activity safety and emergency response procedures to ensure compliance during activities.
  - 1.3. Confirm protocols for communications between climber and belayer.
  - 1.4. Interpret route description; identify position of artificial features and the climb route.
  - 1.5. Attach and adjust belay equipment to self and tie knots suitable for the established belay system.
  - 1.6. Complete equipment safety checks prior to climbing or belaying.
2. Climb and descend single pitch routes using top rope techniques.
  - 2.1. Use safety procedures at bottom, top of and throughout climbs to minimise risk to self and others present.
  - 2.2. Use appropriate posture and climbing techniques suitable to artificial features and holds.
  - 2.3. Locate and evaluate artificial features during climb and adjust technique to suit.
  - 2.4. Locate and utilise rest positions to reduce fatigue.
  - 2.5. Safely approach, avoid or negotiate hazards to ascend and descend in a controlled manner.
  - 2.6. Maintain effective communication with belayer throughout climb.
  - 2.7. Use appropriate posture and top rope lowering techniques during descent.
  - 2.8. Use techniques that minimise damage to equipment and the surface during climb.
3. Belay top rope climbers.
  - 3.1. Avoid or negotiate hazards and use safety procedures to minimise risk to self and others present.
  - 3.2. Establish belaying position and attach self to anchor, as required, to allow effective and safe use of belay system.
  - 3.3. Maintain rope tension to minimise fall distance and ensure climber movement is not unduly restricted.
  - 3.4. Monitor climber progress constantly, and maintain clear communication with climber.
  - 3.5. Arrest falls promptly using technique suitable to belaying device and situation.
  - 3.6. Safely and efficiently secure climber using tie off techniques; release tie off and allow climber to continue.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed and familiar organisational safety and emergency response procedures.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>visually estimate angles, estimate load on ropes to determine appropriate tension for climbing and belaying.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>manage own timing to complete activities within planned timeframes.</li></ul>

## Unit Mapping Information

No equivalent unit.

## Links

## Assessment Requirements for SISOCLM001 Top rope climb single pitches, artificial surfaces

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete four single pitch top rope climbing sessions on artificial surfaces and collectively use six of the following techniques:
  - bridging
  - heel hooks
  - jamming
  - laybacking
  - mantle
  - pinch grips
  - side pulls
  - smearing
  - underclings
- during each of the above climbs, consistently:
  - follow safety procedures and safely negotiate hazards to climb in a controlled manner
  - connect self to belay system using appropriate device and or knots
- belay climbers according to safety procedures, and complete the following:
  - four belays
  - two simulated climber falls, and safely and efficiently secure and release climber to continue.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for climbing activities
- purpose, features, and correct fit for safety, of personal protective equipment used for climbing on artificial surfaces:
  - clothing
  - climbing shoes
  - abseiling/climbing helmets

- harnesses of different types, advantages and disadvantages
- features, functions and operation of tope rope climbing equipment used on artificial surfaces:
  - carabiners
  - static and dynamic rope and when each might be used
  - tape
  - sewn sling
  - Prusik cord
  - chalk bag and chalk
  - top rope bottom belay systems
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
- types of equipment and knots used, and how to tie them, when:
  - attaching belay equipment to self
  - attaching belay system to anchors
- types of personal and equipment safety checks completed prior to climbing and belaying
- tope rope climbing techniques and appropriate posture for artificial surfaces and structures to include those for:
  - bridging
  - heel hooks
  - jamming
  - laybacking
  - mantle
  - pinch grips
  - side pulls
  - smearing
  - underclings
  - lowering self during descents
- climbing techniques which are best suited to these artificial climb features:
  - aretes
  - chimneys
  - corners
  - cracks
  - edges
  - flakes

- jugs
- overhangs
- roofs
- pinnacles
- ledges
- pockets
- techniques for belaying others during top rope climbs on artificial surfaces to include those for
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension
  - arresting climber falls
  - securing climber, tying off belay system and releasing
- reasons for attaching belayer to anchor system when belaying others including:
  - minimising belayer movement to retain stable position and stance
  - minimising effects of force of climber fall and risk of injury to belayer
  - minimising risk of belayer fall
- communication protocols used between climbers and belayers to include:
  - calls
  - hand signals
  - whistles
- typical hazards for single pitch top rope climbing on artificial surfaces and structures, and techniques used to safely negotiate these:
  - sharp or protruding fittings and fixtures
  - surface irregularities
  - ledges
  - tangled rope
  - falling objects
- how to care for climbing equipment during activities to avoid damage, and promote long lifespan.

## Assessment Conditions

Skills may be demonstrated in an indoor or outdoor environment where single pitch top rope climbs are completed on artificial surfaces. Artificial surfaces can be fixed or portable structures.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during climbing activities
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
- established anchors for the artificial structure
- climbing equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - tape or sewn sling
  - Prusik cords
  - chalk bag and chalk
  - belay devices
- template safety checklists
- organisational safety and emergency response procedures for climbing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a climbing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

## SISOCLM002 Top rope climb single pitches, natural surfaces

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to climb single pitches on natural surfaces using top rope techniques. It also requires the ability to belay top rope climbers.

It applies to leaders, guides or instructors, who use these skills when leading participants during top rope climbing activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Climbing

### Unit Sector

Outdoor Recreation

### Elements and Performance Criteria

#### ELEMENTS

*Elements describe the essential outcomes*

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for the climb.
  - 1.1. Select clothing, footwear and personal protective equipment suitable for the climb and conditions.
  - 1.2. Confirm activity safety and emergency response procedures to ensure compliance during activities.
  - 1.3. Confirm protocols for communications between climber and belayer.
  - 1.4. Interpret route description; identify position of natural features, the climb route and contingencies.
  - 1.5. Attach and adjust belay equipment to self and tie knots suitable for the established belay system.
  - 1.6. Complete equipment safety checks prior to climbing or belaying.
2. Climb and descend single pitch routes using top rope techniques.
  - 2.1. Use safety procedures at bottom, top of and throughout climbs to minimise risk to self and others present.
  - 2.2. Use appropriate posture and climbing techniques suitable to natural features.
  - 2.3. Locate and evaluate natural features during climb and adjust technique to suit.
  - 2.4. Locate and utilise rest positions to reduce fatigue.
  - 2.5. Safely approach, avoid or negotiate hazards to ascend and descend in a controlled manner.
  - 2.6. Maintain effective communication with belayer throughout climb.
  - 2.7. Use appropriate posture and top rope lowering techniques during descent.
  - 2.8. Use techniques that minimise damage to equipment and the surface during climb.
3. Belay top rope climbers.
  - 3.1. Avoid or negotiate hazards and use safety procedures to minimise risk to self and others present.
  - 3.2. Establish belaying position and attach self to anchor, as required, to allow effective and safe use of belay system.
  - 3.3. Maintain rope tension to minimise fall distance and ensure climber movement is not unduly restricted.
  - 3.4. Monitor climber progress constantly, and maintain clear communication with climber.
  - 3.5. Arrest falls promptly using technique suitable to belaying device and situation.
  - 3.6. Safely and efficiently secure climber using tie off techniques; release tie off and allow climber to continue.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed and familiar organisational safety and emergency response procedures.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>visually estimate angles, estimate load on ropes to determine appropriate tension for climbing and belaying.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>manage own timing to complete activities within planned timeframes.</li></ul>

## Unit Mapping Information

No equivalent unit.

## Assessment Requirements for SISOCLM002 Top rope climb single pitches, natural surfaces

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete four single pitch top rope climbing sessions on natural surfaces and cumulatively use six of the following techniques:
  - bridging
  - chimneying
  - crimping
  - heel hooks
  - jamming
  - laybacking
  - lunging
  - mantle
  - pinch grips
  - side pulls
  - smearing
  - underclings
- during each of the above climbs, consistently:
  - follow safety procedures and safely negotiate hazards to climb in a controlled manner
  - connect self to belay system using appropriate device and or knots
- belay climbers according to safety procedures, and complete the following:
  - two top rope top belays
  - two top rope bottom belays
  - two simulated climber falls, and safely and efficiently secure and release climber to continue.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for climbing activities

- purpose, features, and correct fit for safety, of personal protective equipment used for climbing on natural surfaces to include:
  - clothing
  - climbing shoes
  - abseiling/climbing helmets
  - harnesses of different types, advantages and disadvantages
- features, functions and operation of tope rope climbing equipment used on natural surfaces:
  - carabiners
  - static and dynamic rope and when each might be used
  - tape
  - sewn sling
  - Prusik cord
  - chalk bag and chalk
  - belay systems:
    - top rope top belay
    - top rope bottom belay
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
- types of knots used, and how to tie them, when:
  - attaching belay equipment to self
  - attaching belay system to anchors
- types of personal and equipment safety checks completed prior to climbing and belaying
- tope rope climbing techniques and appropriate posture for natural surfaces to include those for:
  - bridging
  - chimneying
  - crimping
  - heel hooks
  - jamming
  - laybacking
  - lunging
  - mantle
  - pinch grips
  - side pulls

- smearing
- underclings
- lowering self during descents
- climbing techniques which are best suited to these climb features found in natural environments:
  - aretes
  - chimneys
  - corners
  - cracks
  - edges
  - flakes
  - jugs
  - overhangs
  - roofs
  - pinnacles
  - ledges
  - pockets
- techniques for belaying others during top rope climbs on natural surfaces to include those for:
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension
  - arresting climber falls
  - securing climber, and tying off belay system and releasing
- reasons for attaching belayer to anchor system when belaying others including:
  - minimising belayer movement to retain stable position and stance
  - minimising effects of force of climber fall and risk of injury to belayer
  - minimising risk of belayer fall
- communication protocols used between climbers and belayers to include:
  - calls
  - hand signals
  - whistles
- typical hazards for single pitch top rope climbing on natural surfaces, and techniques used to safely negotiate these:
  - falling rocks, water, debris, gear
  - abrasion points
  - sharp edges
  - squeezes and overhangs
  - ledges
  - traverses
  - slippery or unstable terrain

- dense vegetation and trees
- strong breezes
- tangled rope
- how to care for climbing equipment during activities to avoid damage, and promote long lifespan
- techniques used to minimise damage to climbing surfaces in natural environments when climbing.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where single pitch top rope climbs are completed on natural surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during climbing activities
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
- anchors which can include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- climbing equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - chalk bag and chalk
  - belay devices
- template safety checklists
- organisational safety and emergency response procedures for climbing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a climbing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

# SISOCLM003 Lead climb single pitches, natural surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to climb single pitches on natural surfaces using lead climbing techniques. It also requires the ability to belay climbers and to ascend single pitch routes as a second climber.

It applies to leaders, guides or and instructors who use these skills when leading participants during climbing activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Climbing

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for the climb.
  - 1.1. Select clothing, footwear and personal protective equipment suitable for the climb and conditions.
  - 1.2. Confirm activity safety and emergency response procedures to ensure compliance during activities.
  - 1.3. Confirm protocols for communications between climber and belayer.
  - 1.4. Interpret route description; identify position of natural features, the climb route and contingencies.
  - 1.5. Determine need for artificial protection during ascent; select and rack for accessibility during climb.
  - 1.6. Attach and adjust belay equipment to self and tie knots suitable for the established belay system.
  - 1.7. Complete equipment safety checks prior to climbing or belaying.
2. Climb single pitch routes.
  - 2.1. Use safety procedures at bottom, top of and throughout climbs to minimise risk to self and others present.
  - 2.2. Use appropriate posture and climbing techniques suitable to natural features.
  - 2.3. Locate and utilise rest positions to reduce fatigue.
  - 2.4. Safely approach, avoid or negotiate hazards to ascend in a controlled manner.
  - 2.5. Maintain effective communication with belayer throughout climb.
  - 2.6. Use techniques that minimise damage to equipment and the surface during climb.
3. Ascend single pitch routes as a lead climber.
  - 3.1. Evaluate potential direction of falls, magnitude of force and second climber's ability.
  - 3.2. Select suitable type, and set anchors and belay system safely and efficiently throughout climb.
  - 3.3. Place protection periodically during climb to reduce fall distance.
  - 3.4. Use techniques to minimise rope drag, displacement of artificial protection and injury in the event of a fall.
  - 3.5. Monitor and maintain the safeguard system continuously.
  - 3.6. Retreat from pitches when climber safety is compromised.
  - 3.7. Select solid and secure anchors at top of pitch, or place artificial protection.
  - 3.8. Establish belay system at top of pitch to maximise climber and belayer safety.
4. Ascend single pitch routes as a second
  - 4.1. Utilise belaying system to maximise climber safety.
  - 4.2. Remove artificial protection with and without a nut tool

climber. and minimise damage to equipment and natural surface.

5. Belay climbers.
- 5.1. Avoid or negotiate hazards and use safety procedures to minimise risk to self and others present.
  - 5.2. Establish belaying position and attach self to anchor, as required, to allow effective and safe use of belay system.
  - 5.3. Maintain rope tension to minimise fall distance and ensure climber movement is not unduly restricted.
  - 5.4. Monitor climber progress constantly, and maintain clear communication with climber.
  - 5.5. Arrest falls promptly using technique suitable to belaying device and situation.
  - 5.6. Safely and efficiently secure climber using tie off techniques; release tie off and allow climber to continue.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed and familiar organisational safety and emergency response procedures.</li> </ul>

## Assessment Requirements for SISOCLM003 Lead climb single pitches, natural surfaces

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- work as lead climber on four single pitch climbs
- work as second climber on four single pitch climbs
- across the climbs, collectively use six of the following techniques:
  - bridging
  - chimneying
  - crimping
  - heel hooks
  - jamming
  - laybacking
  - lunging
  - mantle
  - pinch grips
  - side pulls
  - smearing
  - underclings
- during each climb consistently:
  - follow safety procedures and safely negotiate hazards to climb in a controlled manner
  - connect self to belay system using appropriate devices and or knots
- across the climbs, collectively establish these types of anchor systems:
  - multi-directional
  - uni-directional
  - self-equalising
- across the climbs collectively use the following rope systems:
  - single rope
  - double rope technique
  - twin rope
- across the climbs collectively select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
- belay climbers according to safety procedures, and complete the following:

- two top rope top belayed ascents
- two top rope bottom belayed ascents
- two simulated climber falls, and safely and efficiently secure and release climbers to continue.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for climbing activities
- purpose, features, and correct fit for safety, of personal protective equipment for climbers and belayers to include:
  - clothing
  - climbing shoes
  - abseiling/climbing helmets
  - harnesses of different types, advantages and disadvantages
- features, functions, advantages and disadvantages of different types of artificial removable anchors used as protection for lead climbing to include:
  - spring loaded camming devices
  - nuts, wires and hexes
  - pitons
- techniques used to secure and remove the above types of protection
- types of forces generated during lead climb falls, and how to calculate:
  - fall factor
  - fall distances
  - placement of artificial protection
- features, functions, advantages and disadvantages of different types of anchor systems used in lead climbing:
  - multi-directional
  - uni-directional
  - self-equalising
- features, functions and operation of climbing and belaying equipment used for single pitch lead climbs on natural surfaces:
  - carabiners
  - static and dynamic rope and when each might be used
  - tape
  - sewn sling
  - Prusik cord
  - chalk bag and chalk
  - belay systems:
    - single rope

- double rope technique
- twin rope
- top rope top belay
- top rope bottom belay
- self-belay
- dynamic and static belays
- belay devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- types of knots used, and how to tie them, when:
  - attaching belay equipment to self
  - attaching belay system to anchors
- principle of closing the system, advantages, disadvantages and methods used
- types of personal and equipment safety checks completed prior to climbing and belaying
- lead climbing techniques and appropriate posture for natural surfaces to include those for:
  - bridging
  - chimneying
  - crimping
  - jamming
  - laybacking
  - lunging
  - mantle
  - pinch grips
  - side pulls
  - smearing
  - underclings
  - lowering self during descents
- climbing techniques which are best suited to these climb features found in natural environments:
  - aretes
  - chimneys
  - corners
  - cracks
  - edges
  - flakes
  - jugs

- overhangs
- roofs
- pinnacles
- ledges
- pockets
- techniques for belaying others during lead climbs on natural surfaces to include those for:
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension
  - arresting climber falls
  - securing climber, tying off belay system and releasing
- reasons for attaching belayer to anchor system when belaying others including:
  - minimising belayer movement to retain stable position and stance
  - minimising effects of force of climber fall and risk of injury to belayer
  - minimising risk of belayer fall
- communication protocols used between climbers and belayers to include:
  - calls
  - hand signals
  - whistles
- typical hazards for single pitch lead climbing on natural surfaces, and techniques used to safely negotiate these:
  - falling rocks, water, debris, gear
  - abrasion points
  - sharp edges
  - squeezes and overhangs
  - ledges
  - traverses
  - slippery or unstable terrain
  - dense vegetation and trees
  - strong breezes
  - tangled rope
  - stuck ropes
- how to care for climbing equipment during activities to avoid damage, and promote long lifespan
- techniques used to minimise damage to climbing surfaces in natural environments when climbing.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where single pitch lead climbs are completed on natural surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during climbing activities
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
- anchors to include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- climbing equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape
  - sewn sling
  - Prusik cords
  - chalk bag and chalk
  - belay devices
- template safety checklists
- organisational safety and emergency response procedures for climbing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a climbing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

# SISOCLM004 Lead climb multi pitches, natural surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to climb multi pitches on natural surfaces using lead climbing techniques. It also requires the ability to belay climbers and to ascend multi pitch routes as a second climber.

It applies to leaders, guides or instructors who use these skills when leading participants during climbing activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Climbing

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare for the climb.
  - 1.1. Select clothing, footwear and personal protective equipment suitable for the climb and conditions.
  - 1.2. Confirm activity safety and emergency response procedures to ensure compliance during activities.
  - 1.3. Confirm protocols for communications between climber and belayer.
  - 1.4. Interpret route description; identify position of natural features, the climb route and contingencies.
  - 1.5. Determine need for artificial protection during ascent; select and rack for accessibility during climb.
  - 1.6. Attach and adjust belay equipment to self and tie knots suitable for the established belay system.
  - 1.7. Complete equipment safety checks prior to climbing or belaying.
2. Climb multi pitch routes.
  - 2.1. Use safety procedures at bottom, top of and throughout climbs to minimise risk to self and others present.
  - 2.2. Maintain balance and use appropriate posture and climbing techniques to link a series of controlled moves to enable progress.
  - 2.3. Locate and utilise rest positions to reduce fatigue.
  - 2.4. Safely approach, avoid or negotiate hazards to ascend in a controlled manner.
  - 2.5. Maintain effective communication with belayer throughout climb.
  - 2.6. Use techniques that minimise damage to equipment and the surface during climb.
3. Ascend multi pitch routes as a lead climber.
  - 3.1. Evaluate potential direction of falls, magnitude of force and second climber's ability.
  - 3.2. Select suitable type and set anchors and belay system safely and efficiently throughout climb.
  - 3.3. Place protection periodically during climb to reduce fall distance.
  - 3.4. Use techniques to minimise rope drag, displacement of artificial protection and injury in the event of a fall.
  - 3.5. Monitor and maintain the safeguard system continuously.
  - 3.6. Retreat from pitches when climber safety is compromised.
  - 3.7. Select solid and secure anchors at top of pitch, or place artificial protection.
  - 3.8. Establish belay system at top of pitch to maximise climber and belayer safety.
4. Ascend multi pitch
  - 4.1. Utilise belaying system to maximise climber safety.

- routes as a second climber.
5. Change over at belay stations.
6. Belay climbers.
- 4.2. Remove artificial protection with and without a nut tool and minimise damage to equipment and natural surface.
- 5.1. Maintain continuous attachment to a reliable anchor system or anchor point.
- 5.2. Exchange climber roles at belay stations and transition to next pitch without entangling ropes.
- 5.3. Confirm alignment and stability of belay system before transitioning to next pitch.
- 6.1. Avoid or negotiate hazards and use safety procedures to minimise risk to self and others present.
- 6.2. Establish belaying position and attach self to anchor, as required, to allow effective and safe use of belay system.
- 6.3. Maintain rope tension to minimise fall distance and ensure climber movement is not unduly restricted.
- 6.4. Monitor climber progress constantly, and maintain clear communication with climber.
- 6.5. Arrest falls promptly using technique suitable to belaying device and situation.
- 6.6. Safely and efficiently secure climber, when compromised, using tie off techniques.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION

## Assessment Requirements for SISOCLM004 Lead climb multi pitches, natural surfaces

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- work as lead climber on four multi pitch climbs
- work as second climber on four multi pitch climbs
- across the climbs, collectively use six of the following techniques:
  - bridging
  - chimneying
  - crimping
  - heel hooks
  - jamming
  - layaways
  - laybacking
  - lunging
  - mantle
  - pinch grips
  - side pulls
  - smearing
  - underclings
- during each climb consistently:
  - follow safety procedures and safely negotiate hazards to climb in a controlled manner
  - connect self to belay system using appropriate devices and or knots
- across the climbs, collectively establish these types of anchor systems:
  - multi-directional
  - uni-directional
  - self-equalising
- across the climbs, collectively use the following rope systems
  - single rope
  - double rope technique
  - twin rope
- across the climbs collectively select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function

- belay climbers according to safety procedures, and complete the following:
  - two top rope top belayed ascents
  - two top rope bottom belayed ascents
  - two simulated climber falls, and safely and efficiently secure and release climbers to continue.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for climbing activities
- purpose, features, and correct fit for safety, of personal protective equipment for climbers and belayers to include:
  - clothing
  - climbing shoes
  - abseiling/climbing helmets
  - harnesses of different types, advantages and disadvantages
- features, functions, advantages and disadvantages of different types of artificial anchors used as protection for lead climbing to include:
  - spring loaded camming devices
  - nuts, wires and hexes
  - pitons
- techniques used to secure and remove the above types of protection
- types of forces generated during lead climb falls, and how to calculate:
  - fall factor
  - fall distances
  - placement of artificial protection
- features, functions, advantages and disadvantages of different types of anchor systems used in lead climbing:
  - multi-directional
  - uni-directional
  - self-equalising
- features, functions and operation of climbing and belaying equipment used for multi pitch lead climbs on natural surfaces:
  - carabiners
  - static and dynamic rope and when each might be used
  - tape
  - sewn sling
  - Prusik cord
  - chalk bag and chalk
  - belay systems:

- single rope
- double rope technique
- twin rope
- top rope top belay
- top rope bottom belay
- self-belay
- belay devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- types of knots used, and how to tie them, when:
  - attaching belay equipment to self
  - attaching belay system to anchors
- principle of closing the system, advantages, disadvantages and methods used
- types of personal and equipment safety checks completed prior to climbing and belaying
- lead climbing techniques and appropriate posture for natural surfaces to include those for:
  - bridging
  - chimneying
  - crimping
  - jamming
  - laybacking
  - lunging
  - mantle
  - pinch grips
  - side pulls
  - smearing
  - underclings
  - lowering self during descents
- climbing techniques which are best suited to these climb features found in natural environments:
  - aretes
  - chimneys
  - corners
  - cracks
  - edges
  - flakes
  - jugs

- overhangs
- roofs
- pinnacles
- ledges
- pockets
- techniques for belaying others during lead climbs on natural surfaces to include those for:
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension
  - arresting climber falls
  - securing climber, tying off belay system and releasing
  - protecting second on traverse
- reasons for attaching belayer to anchor system when belaying others including:
  - minimising belayer movement to retain stable position and stance
  - minimising effects of force of climber fall and risk of injury to belayer
  - minimising risk of belayer fall
- communication protocols used between climbers and belayers to include:
  - calls
  - hand signals
  - whistles
- typical hazards for multi pitch lead climbing on natural surfaces, and techniques used to safely negotiate these:
  - falling rocks, water, debris, gear
  - abrasion points
  - sharp edges
  - squeezes and overhangs
  - ledges
  - traverses
  - slippery or unstable terrain
  - dense vegetation and trees
  - strong breezes
  - tangled rope
  - stuck ropes
- how to care for climbing equipment during activities to avoid damage, and promote long lifespan
- techniques used to minimise damage to climbing surfaces in natural environments when climbing.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where multi pitch lead climbs are completed on natural surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during climbing activities
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
- anchors to include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- climbing equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - slings
  - Prusik cords
  - chalk bag and chalk
  - belay devices
- template safety checklists
- organisational safety and emergency response procedures for climbing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a climbing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

# SISOCLM005 Establish belays for single pitch climbing on artificial surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to select and set up belay systems suitable for single pitch climbs on artificial surfaces. It requires the ability to select the climb route and to select and utilise fixed anchors. Artificial surfaces can be fixed or portable structures and rigging can be for indoor or outdoor environments.

It applies to rigging staff and activity leaders who work independently or with limited guidance from others.

This unit applies to any type of organisation that delivers recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Climbing

## Unit Sector

Outdoor Recreation

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret detailed familiar organisational procedures for completing safety checks.

- Writing skills to:
- use fundamental sentence structure to complete safety and serviceability forms and fault tags that require factual information.
- Numeracy skills to:
- estimate loads for anchors and ropes under normal conditions and in the event of a fall
  - visually estimate distances to calculate lengths for ropes.
- Planning and organising skills to:
- follow a logical equipment selection, rigging and checking process.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOCLM005 Establish belays for single pitch climbing on artificial surfaces

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- select and set up belay systems suitable for single pitch climbs on artificial surfaces for three different pitches
- collectively set up the following types of systems:
  - top rope bottom belay
  - automatic belay
- collectively select and use at least three different types of anchors
- collectively select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
- identify and tag three different types of faulty equipment.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for safety and serviceability checks
- how the following factors affect selection of climbing routes for artificial surfaces:
  - season of operation, weather and environmental conditions for outdoor climbs
  - participant characteristics including age, size, weight, fitness and climbing skill level
  - group objectives and size
- hazards specific to climbing on artificial surfaces and how these affect:
  - safe access to and egress from the pitch
  - choice of ascent routes for safety of climber
  - positioning of belay systems for safety of belayer
- features, functions, advantages and disadvantages of different types of anchors applicable to fixed or portable artificial climbing structures:
  - bolts
  - chains
  - bollards
  - eyelets
  - U bolts

- beams
- poles
- wire cables
- issues that are assessed when selecting anchors and likely impacts of poor condition on performance under load:
  - wear and abrasion due to age and use
  - corrosion
  - decay
  - dislodgment
- meaning of the following terms, and principles which apply when rigging anchors and ropes:
  - equalisation of load
  - single point of failure
  - anchor redundancy
  - angle of separation
  - shock loading
  - cross loading and cyclical loading of carabiners
  - mis-alignment of carabiners
- types of forces (upwards, downwards) generated during climbing and belaying, and how to calculate load on anchors and ropes for these circumstances:
  - top rope bottom belay
  - automatic belay
  - climber ascending and lowering under control
  - climber fall
  - belayer arresting falls
- features, functions, advantages and disadvantages of the following climbing and belay equipment used on artificial surfaces:
  - belay systems:
    - top rope bottom belay
    - automatic belay
    - dynamic and static belays
  - belay devices:
    - automatic locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - carabiners
  - harnesses of different types

- static and dynamic rope and when each might be used
- rope protectors
- tape
- sewn sling
- Prusik cord
- how the following factors affect the selection and rigging of above equipment:
  - site characteristics including position of rub points
  - weather and environmental conditions for outdoor climbs on artificial surfaces
  - participant size, weight, and climbing ability
  - belayer to climber ratio
  - cumulative load for group size and number of climbs
  - climbing techniques to be used
- manufacturers' specifications for equipment use
- techniques used to establish belay systems for safety of belayer:
  - rigging belays for performance of rescues
  - attaching to anchor or self belay safety system
- situations requiring back up belay systems
- when different knots are used, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight
  - end to end joining
  - termination
  - load control hitches
  - slide and grip hitches
- types of safety checks completed for rigging of equipment
- how to care for climbing equipment when rigging to avoid damage, and promote long lifespan.

## Assessment Conditions

Skills may be demonstrated in an indoor or outdoor environment where rigging is completed for single pitch climbs on artificial surfaces. Artificial surfaces can be fixed or portable structures.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
- established anchors for the artificial structure
- climbing equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - tape or sewn sling
  - Prusik cords
  - chalk bag and chalk
  - belay devices
- template safety checklists
- organisational procedures for safety and serviceability checks.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a climbing activity leader or rigger, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can be part time or full time experience.

# Assessment Requirements for SISOCLM006 Establish belays for single pitch climbing on natural surfaces

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- select and set up belay systems suitable for single pitch climbs on natural surfaces for three different pitches
- collectively set up the following types of systems:
  - top rope top belay
  - top rope bottom belay
  - self belay
- collectively select and use these different types of anchors:
  - fixed artificial
  - naturally occurring
  - artificial removable
- collectively select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
- identify and tag three different types of faulty equipment.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for safety and serviceability checks
- how the following factors affect selection of climbing routes for natural surfaces:
  - season of operation, weather and environmental conditions
  - participant characteristics including age, size, weight, fitness and climbing skill level
  - group objectives and size
- environmental hazards specific to climbing on natural surfaces and how these affect:
  - safe access to and egress from the pitch
  - choice of ascent routes for safety of climber
  - positioning of top or bottom belay systems for safety of belayer
- features, functions, advantages and disadvantages of different types of anchors used for climbing on natural surfaces:
  - fixed artificial:

- threads
- bolts
- chains
- concrete bollards
- naturally occurring:
  - trees
  - boulders
  - knobs of rock
- artificial removable:
  - spring loaded camming devices
  - nuts, wires and hexes
  - pitons
- issues that are assessed when selecting anchors and likely impacts of poor condition on performance under load:
  - wear and abrasion due to age and use
  - corrosion
  - decay
  - dislodgment
  - underlying stability of structural features and presence of:
    - cracks
    - deformities
    - fissures
- meaning of the following terms, and principles which apply when rigging anchors and ropes:
  - equalisation of load
  - single point of failure
  - anchor redundancy
  - angle of separation
  - shock loading
  - cross loading and cyclical loading of carabiners
  - mis-alignment of carabiners
  - closing the system, including advantages, disadvantages and methods used
- types of forces (upwards, downwards) generated during climbing and belaying, and how to calculate load on anchors and ropes for these circumstances:
  - top rope top belay
  - top rope bottom belay
  - climber ascending and lowering under control
  - climber fall
  - belayer arresting falls

- features, functions, advantages and disadvantages of the following climbing and belay equipment used on natural surfaces:
  - belay systems:
    - top rope top belay
    - top rope bottom belay
    - self belay
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - carabiners
  - harnesses of different types
  - static and dynamic rope and when each might be used
  - rope protectors
  - tape
  - sewn sling
  - Prusik cord
- how the following factors affect the selection and rigging of above equipment:
  - site characteristics including position of rub points
  - weather and environmental conditions
  - participant size, weight, and climbing ability
  - belayer to climber weight ratio
  - cumulative load for group size and number of climbs
  - climbing techniques to be used
- manufacturers' specifications for equipment use
- techniques used to establish belay systems for safety of belayer:
  - rigging belays performance of rescues
  - attaching to anchor or self belay safety system
- situations requiring back up belay systems
- when different knots are used, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight
  - end to end joining
  - termination
  - load control hitches
  - slide and grip hitches
- types of safety checks completed for rigging of equipment

- how to care for climbing equipment when rigging to avoid damage, and promote long lifespan
- potential environmental impacts of rigging for climbs on natural surfaces and techniques used to minimise damage.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where rigging is completed for single pitch climbs on natural surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
- anchors to include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- climbing equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - belay devices
- template safety checklists
- organisational procedures for safety and serviceability checks.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a climbing activity leader or rigger, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can be part time or full time experience.

# SISOCLM007 Establish belays for multi pitch climbing on natural surfaces

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to select and set up belay systems suitable for multi pitch climbs on natural surfaces, and according to current conditions. It requires the ability to select the climb route and to select and utilise fixed artificial, naturally occurring or artificial removable anchors to establish belays for the lead climber and the second (or following) climbers.

It applies to rigging staff and activity leaders who work independently or with limited guidance from others.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Climbing

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Select route and equipment suitable for the climb.
  - 1.1. Identify safe access to and egress from the pitch.
  - 1.2. Interpret route descriptions, inspect the position and quality of natural features and select climb route.
  - 1.3. Select a top or bottom belay system suitable for the climb, environmental conditions, and participant.
  - 1.4. Choose a belay device suitable for the natural surface conditions and belayer.
  - 1.5. Select other equipment to suit climbing requirements and participants.
  - 1.6. Complete safety and serviceability checks on equipment and tag faulty equipment according to organisational procedures.
2. Set up belay system for natural surface climbs.
  - 2.1. Select anchors and assess condition, including performance under likely load and stability of surroundings.
  - 2.2. Rig or establish multiple anchors, ensuring equalisation and minimise potential for shock loading.
  - 2.3. Select and tie appropriate knots, and rig ropes suitable for load and function within the belay system.
  - 2.4. Establish a belay from which belayer is independent of the system.
  - 2.5. Establish a belay that maintains safety of belayer and climber.
  - 2.6. Position belay away from hazards, or remove as able.
  - 2.7. Determine need for, and establish, back up belay systems.
  - 2.8. Verify manufacturer's recommendations, equipment limitations and safety margins, and rig equipment accordingly.
  - 2.9. Rig to minimise impact on the natural environment.
  - 2.10. Complete safety checks according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

# Assessment Requirements for SISOCLM007 Establish belays for multi pitch climbing on natural surfaces

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- select and set up belay systems suitable for multi pitch climbs on natural surfaces for three different pitches
- collectively set up the following types of systems:
  - double rope technique
  - single rope systems suitable for single rope techniques
  - lead climber belay
  - second (or following) climber belay
  - self belay
- collectively select and use these different types of anchors:
  - fixed artificial
  - naturally occurring
  - artificial removable
- collectively select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
- identify and tag three different types of faulty equipment.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for safety and serviceability checks
- how the following factors affect selection of climbing routes for natural surfaces:
  - season of operation, weather and environmental conditions
  - participant characteristics including age, size, weight, fitness and climbing skill level
  - group objectives and size
- environmental hazards specific to climbing on natural surfaces and how these affect:
  - safe access to and egress from the pitch
  - choice of ascent routes for safety of climber
  - positioning of top or bottom belay systems for safety of belayer

- features, functions, advantages and disadvantages of different types of anchors used for climbing on natural surfaces:
  - fixed artificial:
    - threads
    - bolts
    - chains
    - concrete bollards
  - naturally occurring:
    - trees
    - boulders
    - knobs of rock
  - artificial removable:
    - spring loaded camming devices
    - nuts, wires and hexes
    - pitons
- issues that are assessed when selecting anchors and likely impacts of poor condition on performance under load:
  - wear and abrasion due to age and use
  - corrosion
  - decay
  - dislodgment
  - underlying stability of structural features and presence of:
    - cracks
    - deformities
    - fissures
- meaning of the following terms, and principles which apply when rigging anchors and ropes:
  - equalisation of load
  - single component failure
  - anchor redundancy
  - angle of separation
  - shock loading
  - cross loading and cyclical loading of carabiners
  - mis-alignment of carabiners
  - closing the system, including advantages, disadvantages and methods used
- types of forces (upwards, downwards) generated during climbing and belaying, and how to calculate load on anchors and ropes for these circumstances:
  - lead climber belay
  - second (or following) climber belay
  - climber ascending and lowering under control

- climber fall
- belayer arresting falls
- features, functions, advantages and disadvantages of the following climbing and belay equipment used on natural surfaces:
  - rope and belay systems:
    - double rope technique
    - single rope systems suitable for single rope techniques
    - lead climber belay
    - second (or following) climber belay
    - self belay
    - dynamic and static belays
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - carabiners
  - harnesses of different types
  - static and dynamic rope and when each might be used
  - rope protectors
  - tape
  - sewn sling
  - Prusik cord
- how the following factors affect the selection and rigging of above equipment:
  - site characteristics including position of rub points
  - weather and environmental conditions
  - participant size, weight, and climbing ability
  - belayer to climber weight ratio
  - cumulative load for group size and number of climbs
  - climbing techniques to be used
- manufacturer's specifications for equipment use
- techniques used to establish belay systems for safety of belayer:
  - rigging belays for performance of rescues
  - attaching to anchor or self belay safety system
- situations requiring back up belay systems
- when different knots are used, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight

- end to end joining
- termination
- load control hitches
- slide and grip hitches
- types of safety checks completed for rigging of equipment
- how to care for climbing equipment when rigging to avoid damage, and promote long lifespan
- potential environmental impacts of rigging for climbs on natural surfaces and techniques used to minimise damage.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where rigging is completed for recreational multi pitch climbs on natural surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
- anchors to include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- climbing equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - belay devices
- template safety checklists
- organisational procedures for safety and serviceability checks.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a climbing activity leader or rigger, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can be part time or full time experience.

## **SISOCLM008 Lead single pitch climbing activities on artificial surfaces, top rope climbing**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during single pitch top rope climbing activities on artificial surfaces according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct single pitch top rope climbing and belaying techniques for artificial surfaces. To do this, leaders must be proficient in single pitch top rope climbing skills which are covered by other units.

It requires the ability to demonstrate and instruct single pitch abseiling and belaying techniques for natural surfaces. To do this, leaders must be proficient in single pitch abseiling skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Climbing

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare equipment and participants.

- 1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.
- 1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.
- 1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.
- 1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.
- 1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.

2. Brief participants and demonstrate single pitch top rope climbing and belaying techniques for artificial surfaces.

- 2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.
- 2.2. Encourage participants to ask questions and seek advice before and during session.
- 2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.
- 2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.
- 2.5. Demonstrate and explain correct techniques appropriate for the activity.

- 2.6. Check and confirm participant ability to use and control equipment before activity commencement.
    - 2.7. Check matching of equipment and activities to participants and amend as required.
  3. Lead and supervise single pitch top rope climbing activities on artificial surfaces.
    - 3.1. Supervise activity according to designated role, adjusting position and role as required.
    - 3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.
    - 3.3. Provide clear and accurate instructions and demonstrations throughout the session.
    - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
    - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
    - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
  4. Manage safety during single pitch top rope climbing activities on artificial surfaces.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed familiar organisational policies and procedures.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>provide clear and unambiguous instructions to participants using language and terms easily understood</li><li>ask open and closed probe questions and actively listen to determine participants' understanding of instructions.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>manage own timing and that of participants to complete activities within organisational service times.</li></ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOCLM008 Lead single pitch climbing activities on artificial surfaces, top rope climbing

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three single pitch top rope climbing sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for climbing activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to single pitch top rope climbing activities on artificial surfaces:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - incidents that can occur during climbs, and rescue techniques used to resolve, both direct and indirect techniques
  - designated on rope zones, and off rope waiting zones.

## Assessment Conditions

Skills may be demonstrated in an indoor or outdoor environment where single pitch top rope climbs are completed on artificial surfaces. Artificial surfaces can be fixed or portable structures.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
- established anchors for the artificial structure

- climbing equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - tape or sewn sling
  - Prusik cords
  - chalk bag and chalk
  - belay devices
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for climbing activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a climbing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - designated on rope zones, and off rope waiting zones.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where single pitch lead climbs are completed on natural surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
- anchors to include:
  - fixed artificial
  - naturally occurring
  - artificial removable

- climbing equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - chalk bag and chalk
  - belay devices
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for climbing activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a climbing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

## **SISOCLM011 Lead multi pitch climbing activities on natural surfaces, lead climbing**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during multi pitch, lead climbing activities on natural surfaces according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct multi pitch lead climbing and belaying techniques for natural surfaces. To do this, leaders must be proficient in multi pitch lead climbing skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |  |
|--|--|
| <p>1. Prepare equipment and participants.</p>  | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.</p> <p>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.</p>  |
| <p>2. Brief participants and demonstrate multi pitch lead climbing and belaying techniques for natural surfaces.</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate for the activity.</p> <p>2.6. Check and confirm participant ability to use and control equipment before activity commencement.</p> <p>2.7. Check matching of equipment and activities to participants and amend as required.</p> |
| <p>3. Lead and supervise multi pitch, lead climbing activities on</p>  | <p>3.1. Supervise activity according to designated role, adjusting position and role as required.</p> <p>3.2. Implement recreational instruction techniques to impart</p>  |

- |  |  |
|--|--|
| <p>natural surfaces.</p>   | <p>skills and knowledge for the activity.</p>  |
| <p>4. Manage safety during multi pitch lead climbing activities on natural surfaces.</p> | <p>3.3. Provide clear and accurate instructions and demonstrations throughout the session.</p> <p>3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.</p> <p>3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.</p> <p>3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.</p> <p>4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.</p> <p>4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.</p> <p>4.3. Respond immediately to adverse participant reactions and hazardous situations.</p> <p>4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.</p> <p>4.5. Amend activities if risk is unacceptable; cease activities when required.</p> <p>4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.</p> |
| <p>5. Complete post activity responsibilities.</p>                                       | <p>5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.</p> <p>5.2. Notify relevant personnel of activity completion.</p> <p>5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.</p> <p>5.4. Document any equipment faults and incidents including injuries and near misses.</p> <p>5.5. Evaluate the activity through a team debrief and identify improvements for future activities.</p>   |

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret detailed familiar organisational policies and procedures.
- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SISOCLM011 Lead multi pitch climbing activities on natural surfaces, lead climbing

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three multi pitch, lead climbing sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for climbing activity sessions on natural surfaces
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to multi pitch, lead climbing activities on natural surfaces:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - designated on rope zones, transfer stations and off rope waiting zones.

## Assessment Conditions

Skills must be demonstrated in an outdoor environment where multi pitch lead climbs are completed on natural surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- personal protective equipment to include:
  - abseiling or climbing helmets
  - harnesses
- anchors to include:
  - fixed artificial
  - naturally occurring
  - artificial removable

- climbing equipment to include:
  - carabiners
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - Prusik cords
  - chalk bag and chalk
  - belay devices
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for climbing activity sessions on natural surfaces.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a climbing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency: the three years' experience can incorporate full and or part time experience.

# SISOCNE001 Paddle a craft using fundamental skills

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to paddle a craft as part of a group on small inland flatwater areas such as small lakes, dams and rivers according to planned courses. It requires the ability to self-rescue from a capsized.

The unit provides skills to paddle a canoe, sit in or sit on top kayak on bodies of water in less than moderate wind conditions, where the current flow is consistently recorded as less than one knot, and where there is ease of access to the shore; within 400 metres.

It applies to assistant leaders and support staff who use these skills when assisting with the delivery of paddling activities for groups of participants. They work under close supervision, and according to instructions and guidance provided by supervising activity leaders who may be guides or instructors.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Assessment Requirements for SISOCNE001 Paddle a craft using fundamental skills

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group paddle trips
- during each trip consistently:
  - consistently supervising leader's directions
  - control direction of craft forward, in reverse and change direction using this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - stern rudder
    - low support
    - emergency stop
- participate in simulations to:
  - complete two self-rescues following a capsize, swimming self and craft a maximum distance of 50 metres to shore.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for canoeing activities
- suitable clothing and footwear for paddling activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - types of footwear suitable for paddling including specialist sandals, river or paddling shoes and their advantages over other types of footwear
- features and functions of lifejackets and helmet suitable for flatwater conditions and how to fit and adjust these for comfort and safety
  - location and function of different parts of the craft being paddled
- types of paddles suitable for use with selected craft in flatwater conditions

- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry paddle craft
- equipment features and techniques used to secure craft for transportation
- communication protocols for group paddling activities to include:
  - calls
  - hand and paddle signals
  - whistles
- hydrological features of flatwater areas such as lakes, dams and flatwater rivers sufficient to understand the impacts on paddling activity
- typical hazards associated with paddling and swimming in flatwater conditions, and techniques used to safely negotiate these:
  - currents
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation
  - sections of dark, deep or cold water
  - other boating traffic
  - exposure to lightning, storms and strong winds
  - prolonged emersion in cold water
- techniques used on flatwater to:
  - embark, launch, land and disembark craft from bank, shore or jetty
  - secure craft s to bank, shore or jetty
- a range of strokes used in flatwater conditions to direct canoes forward, in reverse and change direction:
  - forward and reverse paddle
  - forward and reverse sweeps
  - low support
  - stern rudder
  - emergency stop
- for each of the above strokes:
  - how to use them when solo paddling and when padding as a double
  - correct posture and trunk rotation
  - correct hand placement on paddle and movement of top hands through the stroke
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position

- appropriate paddle depth in water to achieve effective stroke
- correct paddle blade angle throughout stroke
- for self-rescues:
  - methods used to extricate self from inverted craft
  - methods used to control and manoeuvre the paddle and craft to shore
  - appropriate swimming strokes and techniques to use while in paddling gear in flatwater conditions
  - how to empty water from craft, and equipment used to assist
  - techniques used to re-establish upright craft and re-enter in deep water.

## Assessment Conditions

Skills must be demonstrated on inland flatwater areas which can be lakes, dams or slow moving rivers. The environment must feature the following:

- less than moderate wind conditions
- current flow is consistently documented as less than 1 knot
- easy access to shoreline; within 400 metres .

An area for assessment should not be classified as flatwater if any of the following conditions are present:

- rapids of any grade
- surf of any size
- fetch greater than 1 nautical mile
- area is in the entrance to an estuary or embayment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during paddling activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmet as required
- pea-less whistles not affected by water
- open canoes, sit in or sit on kayak, which can include singles and doubles
- canoe or kayak paddles
- ropes and tie down straps
- rescue equipment:

- towlines
- bailing devices
- knives
- activity plans to include details of planned route
- template safety checklists
- organisational safety and emergency response procedures for canoeing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canoeing or kayak leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# Assessment Requirements for SISOCNE002 Paddle a canoe on inland flatwater

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group canoe trips
- complete at least one solo paddle on one of the above trips
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - consistently control direction of canoes forward, in reverse and sideways using edging and this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - bow draw strokes
    - feathered and sculling draw
    - forward J stroke
    - low support
    - emergency stop
- participate in simulations to:
  - complete two self-rescues following a capsize, swimming self and craft a maximum distance of 50 metres to shore
  - complete three deep water rescues to assist a single capsized paddler, using these techniques:
    - T (or X)rescue
    - curl rescue
  - provide one contact tow
  - provide one tow using a towline with a quick release system.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for canoeing activities
- suitable clothing and footwear for canoeing activities:

- types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
- reasons for layering clothes
- effective design and construction features of waterproof gear and exposure suits
- types of footwear suitable for canoeing including specialist sandals, river or paddling shoes and their advantages over other types of footwear
- features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for flatwater conditions and how to fit and adjust these for comfort and safety
- types of single and double open canoes suitable for use in flatwater conditions and location and function of different parts of the canoe
- types of paddles suitable for use with canoes used in flatwater conditions,
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry canoes
- equipment features and techniques used to secure canoes for transportation
- communication protocols for group canoeing activities to include:
  - calls
  - hand and paddle signals
  - whistles
- hydrological features of flatwater areas such as lakes, dams and slow moving rivers sufficient to understand the impacts on canoeing activities
- typical hazards associated with paddling and swimming in flatwater conditions, and techniques used to safely negotiate these:
  - currents
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation
  - sections of dark, deep or cold water
  - other boating traffic
  - exposure to lightning, storms, strong wind
  - prolonged emersion in cold water
- techniques used on flatwater to:
  - embark, launch, land and disembark canoes from bank, shore or jetty
  - secure canoes to bank, shore or jetty

- a range of strokes used in flatwater conditions to direct canoes forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps
  - bow draw stroke
  - feathered and sculling draw
  - feathered pry
  - forward J stroke
  - low support
  - stern rudder
  - emergency stop
- for each of the above strokes:
  - how to use them when solo paddling and when padding as a double
  - correct posture and trunk rotation
  - correct hand placement on paddle and movement of top hand through the stroke
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- for self-rescues:
  - methods used to extricate self from inverted canoes
  - methods used to control and manoeuvre the paddle and canoe to shore
  - appropriate swimming strokes and techniques to use while in paddling gear in flatwater conditions
  - how to empty water from canoes, and equipment used to assist
  - techniques used to re-establish upright canoe and re-enter in deep water
- for deep water rescues, the specific application of the following to flatwater conditions and open canoes:
  - features, functions and operation of equipment used for rescues, advantages and disadvantages
  - roles and responsibilities that can be allocated to team members and participants to effectively complete a rescue
  - raft up techniques
  - T (or X) rescue techniques
  - curl rescue techniques
  - techniques for contact tows and those using a towline with a quick release system
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots
  - quick release knots.

## Assessment Conditions

Skills must be demonstrated on inland flatwater areas which can be lakes, dams or slow moving rivers. The environment must feature the following:

- less than moderate wind conditions
- current flow is consistently documented as less than 1 knot.

An area for assessment should not be classified as flatwater if any of the following conditions are present:

- rapids of any grade
- surf of any size
- fetch greater than 1 nautical mile
- area is in the entrance to an estuary or embayment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during canoeing activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- pea-less whistles not affected by water
- open canoes which can include singles and doubles
- canoe paddles
- ropes and tie down straps
- rescue equipment:
  - towlines
  - bailing devices
  - knives
- activity plans to include details of planned route
- template safety checklists
- organisational safety and emergency response procedures for canoeing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canoeing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOCNE003 Paddle a canoe on moving water up to grade 1 rivers

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to paddle a canoe on a planned course as part of a group on waterways that feature slow moving water conditions. It covers the skills to paddle on rivers, up to grade 1, and on large open bodies of water such as lakes or dams.

For rivers, grade 1 refers to the International River Grading System which provides a broad indication of a river's rapid features, and the degree of difficulty in negotiating these. These rivers have long stretches of slow moving water that could feature regular small waves and or riffles, relatively few obstacles and an easy passage to find and follow. Large bodies of water also feature slow moving water conditions.

It applies to leaders, guides or instructors, who use these skills when leading participants during canoeing activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Canoeing

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |   |
|--|---|
| 1. Prepare for the paddle.                           | <ul style="list-style-type: none"> <li>1.1. Select clothing, footwear, personal protective and other equipment suitable for the paddle and conditions, and check for safe working condition.</li> <li>1.2. Carry, prepare craft and complete safety and serviceability checks.</li> <li>1.3. Waterproof, pack and stow clothing, personal resources, and food according to access requirements during paddle.</li> <li>1.4. Interpret planned course from activity plans and maps to assist in following the course.</li> <li>1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.</li> <li>1.6. Confirm protocols for communications between paddlers.</li> <li>1.7. Fit and adjust personal protective equipment to ensure comfort and safety.</li> </ul>         |
| 2. Paddle and manoeuvre canoes on slow moving water. | <ul style="list-style-type: none"> <li>2.1. Embark and launch canoe from bank while maintaining stability.</li> <li>2.2. Control direction of canoe forward, in reverse and sideways using a range of appropriate strokes and edges.</li> <li>2.3. Maintain appropriate posture, use of trunk rotation, paddle and blade to efficiently paddle the canoe.</li> <li>2.4. Establish and maintain an appropriate paddling rhythm and pace to minimise fatigue, strain and injury.</li> <li>2.5. Safely approach, and negotiate obstacles and hazards to minimise risk of injury.</li> <li>2.6. Maintain visual contact and effective communication with party members throughout all activities.</li> <li>2.7. Monitor party formation, paddling pace and space between canoes and make required adjustments.</li> </ul> |
| 3. Rescue self following a capsize.                  | <ul style="list-style-type: none"> <li>3.1. Exit the canoe in a controlled manner, following a capsize, and recover paddle.</li> <li>3.2. Manoeuvre the paddle and upturned canoe to shore or to rescue craft and empty out water.</li> <li>3.3. Use techniques when in deep water to empty water and re-enter canoe.</li> </ul>  |
| 4. Perform deep water                                | <ul style="list-style-type: none"> <li>4.1. Identify immediate hazards, assess risks and negotiate to</li> </ul>  |

- rescues in slow moving river conditions.
- avoid injury to self and others.
- 4.2. Select and use other leaders or party members, equipment and rescue techniques appropriate to situation.
- 4.3. Manoeuvre rescue craft to capsized party member, forming a raft-up as required.
- 4.4. Provide clear and concise instructions to person being rescued and others assisting.
- 4.5. Assist rescuee to return to their craft using rescue technique appropriate to situation.
- 4.6. Assess ability of rescuee to continue and tow to nearest safe landing, as required.
5. Land and secure canoes.
- 5.1. Land and disembark canoe at bank while maintaining stability.
- 5.2. Select a secure bank feature and secure canoe using appropriate knots.
- 5.3. Secure canoe for road transport using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret detailed and familiar organisational safety and emergency response procedures</li> <li>interpret straightforward but potentially unfamiliar information on maps</li> <li>interpret factual activity plan information in familiar formats.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret and calculate numerical data involving river gradients, distances, times and speed of currents.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>pro-actively and cooperatively work within teams of operational personnel to solve arising problems and effect efficient rescues.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>manage own timing to complete activities within planned timeframes.</li> </ul>
Self-management skills	<ul style="list-style-type: none"> <li>critically analyse all circumstances and implications to provide a prompt and considered response to rescue</li> </ul>

to: requirements.

## Assessment Requirements for SISOCNE003 Paddle a canoe on moving water up to grade 1 rivers

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group canoe trips
- complete at least one solo paddle for one of the above trips
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - consistently control direction of canoes forward, in reverse and sideways using edging and this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - bow draw stroke
    - feathered and sculling draw
    - cross bow draw
    - low support
    - forward and reverse J stroke
    - feathered pry
    - emergency stop
- participate in simulations to:
  - complete two self-rescues following a capsize, swimming self and craft a maximum distance of 50 metres to shore
  - complete three deep water rescues to assist a single capsized paddler, using these techniques:
    - T (or X) rescue
    - curl rescue
  - provide one contact tow
  - provide one tow using a towline with a quick release system.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for canoeing activities

- suitable clothing and footwear for canoeing activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear and exposure suits
  - types of footwear suitable for canoeing including specialist sandals, river or paddling shoes and their advantages over other types of footwear
  - features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for slow moving water conditions and how to fit and adjust these for comfort and safety
- types of single and double open canoes suitable for use in slow moving water conditions and:
  - location and function of different parts of the canoe
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- types of paddles suitable for use with canoes used in slow moving water conditions, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry canoes
- equipment features and techniques used to secure canoes for transportation
- communication protocols for group canoeing activities to include:
  - calls
  - hand and paddle signals
  - whistles
- the International River Grading system:
  - strengths and limitations of the grading system; what is covered and not covered in classifications
  - specifications for grade 1 rivers
  - examples of local rivers attributed as slow moving and any that are grade 1
- hydrological features of slow moving water sufficient to understand the impacts on canoeing activities
- typical hazards associated with paddling and swimming in slow moving water conditions, and techniques used to safely negotiate these:
  - currents
  - eddies
  - strainers

- built objects – weirs, piers
- steep or slippery banks or shore
- overhanging trees
- fallen trees on waterway
- submerged logs, rocks and vegetation
- sections of dark, deep or cold water
- other boating traffic
- exposure to lightning, storms, strong wind
- prolonged emersion in cold water
- techniques used on slow moving water to:
  - embark, launch, land and disembark canoes from bank
  - secure canoes to bank
- a range of strokes used in slow moving water conditions to direct canoes forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps
  - bow draw stroke
  - cross bow draw
  - feathered and sculling draw
  - low support
  - forward and reverse J stroke
  - feathered Pry stroke
  - emergency stop
- for each of the above strokes:
  - how to use them when solo paddling and when padding as a double
  - correct posture and trunk rotation
  - correct hand placement on paddle and movement of top hand through the stroke
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- for self-rescues:
  - methods used to extricate self from inverted canoes
  - methods used to control and manoeuvre the paddle and canoe to shore
  - appropriate swimming strokes and techniques to use while in paddling gear in slow moving water conditions
  - how to empty water from canoes, and equipment used to assist
  - techniques used to re-establish upright canoe and re-enter in deep water
- for deep water rescues, the specific application of the following to slow moving water conditions and open canoes:

- features, functions and operation of equipment used for rescues, advantages and disadvantages
- roles and responsibilities that can be allocated to team members and participants to effectively complete a rescue
- raft up techniques
- T (or X) rescue techniques
- curl
- modified Capistrano
- techniques for contact tows and those using a towline with a quick release system
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots
  - quick release knots.

## Assessment Conditions

Skills must be demonstrated in slow moving water conditions in light to moderate wind conditions. Waters can include:

- large bodies of open water such as lakes or dams with slow moving water
- an estuary or embayment with slow moving water
- slow moving water, including grade 1 rivers, which would feature:
  - long stretches of slow moving water
  - relatively few obstacles and no major ones
  - an easy passage to find and follow
  - in grade 1 rivers, regular small waves and or riffles.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during canoeing activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- canoe helmets as required
- pea-less whistles not affected by water
- open canoes which can include singles and doubles
- canoe paddles
- ropes and tie down straps

- rescue equipment:
  - towlines
  - bailing devices
  - knives
- activity plans to include details of planned route
- template safety checklists
- information about the International River Grading System
- organisational safety and emergency response procedures for canoeing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canoeing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOCNE004 Paddle a canoe on grade 2 rivers

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to paddle a canoe as part of a group on inland rivers with grade 2 rapids, and according to planned and scouted courses. It requires the ability to self-rescue from a capsized canoe and to rescue others in deep water.

Grade 2 refers to the International River Grading System which provides a broad indication of a river's rapid features, and the degree of difficulty in negotiating these. This unit provides skills to paddle on rivers with fairly frequent but straightforward rapids with regular medium sized waves, less than one metre, low ledges or drops, easy eddies and gradual bends. These rivers have small obstacles that require manoeuvring around with a good command of paddling strokes. Passages through rapids are generally straightforward and can be seen from the water, although some scouting may be required.

It applies to leaders, guides or instructors, who use these skills when leading participants during canoeing activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Canoeing

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

#### 1. Prepare for the paddle.

#### 2. Paddle and manoeuvre canoes on grade 2 rivers.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Select clothing, footwear, personal protective and other equipment suitable for the paddle and conditions, and check for safe working condition.
- 1.2. Carry, prepare craft and complete safety and serviceability checks.
- 1.3. Waterproof, pack and stow clothing, personal resources, and food according to access requirements during paddle.
- 1.4. Interpret planned course from activity plans and maps to assist in following the course.
- 1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.
- 1.6. Confirm protocols for communications between paddlers.
- 1.7. Fit and adjust personal protective equipment to ensure comfort and safety.
- 2.1. Select suitable location, embark and launch canoe using technique suitable to situation to maintain stability.
- 2.2. Identify hydrological features from the water and utilise favourably to control and manoeuvre canoe.
- 2.3. Control direction of canoe forward, in reverse and sideways using a range of appropriate strokes, leans, edges and combinations.
- 2.4. Maintain appropriate posture, use of trunk rotation, paddle and blade to efficiently paddle the canoe.
- 2.5. Utilise appropriate padding strokes and techniques to cross currents and break into and out of eddies.
- 2.6. Avoid or negotiate obstacles and hazards using a combination of strokes and paddling techniques.
- 2.7. Support canoe using the paddle to prevent capsizes.
- 2.8. Maintain visual contact and effective communication with party members throughout all activities.
- 2.9. Monitor party formation, paddling pace and space between canoes and make required adjustments.

3. Plan and run routes through rapids.
  - 3.1. Scout rapids from the water and shore to identify hydrological features, hazards and impediments.
  - 3.2. Assess features and hazards to determine a safe route through rapids.
  - 3.3. Plan route through rapids accounting for party member numbers, abilities and management during run.
  - 3.4. Identify reference points to guide chosen passage through rapids.
  - 3.5. Run predetermined route using avoidance techniques to safely negotiate river hazards.
  - 3.6. Use efficient paddling techniques and strokes and utilise hydrological features to assist in turning and crossing currents.
4. Rescue self following a capsize.
  - 4.1. Exit the canoe in a controlled manner, following a capsize, and recover paddle.
  - 4.2. Maintain appropriate body position in water to minimise entrapment and injury.
  - 4.3. Manoeuvre the paddle and upturned canoe to shore or to rescue craft.
  - 4.4. Drain water from craft in safe shallow river position or on shore and re-enter craft on shore or in an eddy.
  - 4.5. Use techniques when in deep water to empty water and re-enter canoe.
5. Perform deep water rescues in grade 2 rivers
  - 5.1. Identify immediate hazards, assess risks and negotiate to avoid injury to self and others.
  - 5.2. Select and use other leaders or party members, equipment and rescue techniques appropriate to situation.
  - 5.3. Manoeuvre rescue craft to capsized party member, forming a raft-up as required.
  - 5.4. Provide clear and concise instructions to person being rescued and others assisting.
  - 5.5. Assist rescuee to return to their craft using rescue technique appropriate to situation.
  - 5.6. Assess ability of rescuee to continue and tow to nearest safe landing, as required.
6. Land and secure canoes.
  - 6.1. Select a suitable location to exit the river, and to allow for any subsequent re-entries.
  - 6.2. Land and disembark canoe using techniques suitable for river conditions to maintain stability.
  - 6.3. Select a secure bank feature and secure canoe using appropriate knots.
  - 6.4. Secure canoe for road transport, on activity conclusion, using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret detailed and familiar organisational safety and emergency response procedures</li> <li>interpret straightforward but potentially unfamiliar information on maps</li> <li>interpret factual activity plan information in familiar formats.</li> </ul>

# Assessment Requirements for SISOCNE004 Paddle a canoe on grade 2 rivers

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group canoe trips
- complete at least one solo paddle for one of the above trips
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - use different locations to launch and land canoes to include:
    - the bank in moving water
    - ledges
    - eddies
  - run routes through at least four rapids
  - consistently control direction of canoes forward, in reverse and sideways using leaning, edging and this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - bow and cross bow draw
    - feathered pry
    - feathered and sculling draw
    - low support using back and front of blade
    - forward and reverse J stroke
    - emergency stop
  - utilise the following techniques while consistently controlling the canoe:
    - combining strokes to effectively manoeuvre the canoe
    - breaking in and out of eddies and currents
    - forward and reverse ferry gliding
    - using hydrological features to assist with paddling, controlling the canoe and negotiating rapids
- participate in simulations to:
  - complete two self-rescues following a capsize, swimming self and craft a maximum distance of 50 metres to shore

- complete three deep water rescues to assist a single capsized paddler, using these techniques:
  - T (or X) rescue
  - curl rescue
- provide one contact tow
- provide one tow using a towline with a quick release system.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for canoeing activities
- suitable clothing and footwear for canoeing activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear and exposure suits
  - types of footwear suitable for canoeing including specialist sandals, river or paddling shoes and their advantages over other types of footwear
  - features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for grade 2 river conditions and how to fit and adjust these for comfort and safety
- types of single and double open canoes suitable for use in grade 2 river conditions and:
  - location and function of different parts of the canoe
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- types of paddles suitable for use with canoes used in grade 2 river conditions, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry canoes
- equipment features and techniques used to secure canoes to the bank and for transportation
- communication protocols for group canoeing activities to include:
  - calls
  - hand and paddle signals
  - whistles
- the International River Grading system:

- strengths and limitations of the grading system; what is covered and not covered in classifications
- specifications for grade 2 rivers
- examples of local rivers attributed as grade 2
- typical hydrology features and hazards for grade 2 rivers, how to recognise features from the shore and water, and techniques used to safely negotiate hazards:
  - currents
  - eddies
  - waves
  - strainers
  - holes
  - stoppers
  - sieves
  - rocks, including undercut rocks
  - waterfalls
  - downstream and upstream Vs
  - boils
  - pour overs
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation
  - sections of dark, deep or cold water
  - other boating traffic
  - exposure to lightning, storms and strong winds
  - prolonged emersion in cold water
- different locations that can be used to embark, launch, land and disembark canoes in grade 2 waters including:
  - the bank in moving water
  - ledges
  - eddies
- for each of the above locations:
  - factors that affect selection
  - advantages and disadvantages of use
  - techniques used to embark, launch and land
- a range of strokes used in grade 2 river conditions to direct canoes forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps

- bow and cross bow draw
- feathered pry
- feathered and sculling draw
- low support using back and front of blade
- forward and reverse J stroke
- emergency stop
- for each of the above strokes:
  - how to use them when solo paddling and when padding as a double
  - correct posture and trunk rotation
  - correct hand placement on paddle and movement of top hand through the stroke
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- a range of techniques used to manoeuvre canoes in grade 2 water:
  - combining strokes and which combinations are effective
  - breaking in and out of eddies and currents
  - forward and reverse ferry gliding
- how certain types of hydrological features can be used to assist with paddling, controlling the canoe and negotiating rapids
- for self-rescues:
  - methods used to extricate self from inverted canoes
  - methods used to control and manoeuvre the paddle and canoe to shore
  - appropriate swimming strokes and techniques to use while in paddling gear in grade 2 river conditions
  - how to empty water from canoes, and equipment used to assist
  - techniques used to re-establish upright canoe and re-enter in deep water
- for deep water rescues, the specific application of the following to grade 2 river conditions and open canoes:
  - features, functions and operation of equipment used for rescues, advantages and disadvantages
  - roles and responsibilities that can be allocated to team members and participants to effectively complete a rescue
  - raft up techniques
  - T (or X) rescue techniques
  - curl techniques
  - techniques for contact tows and those using a towline with a quick release system
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots
  - quick release knots.

## Assessment Conditions

Skills must be demonstrated on grade 2 rivers which must feature the following:

- fairly frequent but straightforward rapids
- rapids with regular medium sized waves, less than one metre
- low ledges or drops, easy eddies and gradual bends
- small obstacles that require manoeuvring around
- passages through rapids that are generally straightforward and can be seen from the water, although some may require scouting.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during canoeing activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets
- pea-less whistles not affected by water
- open canoes which can include singles and doubles
- canoe paddles
- ropes and tie down straps
- rescue equipment:
  - towlines
  - carabiners, Prusik cords and tape sling
  - bailing devices
  - knives
- activity plans to include details of planned route
- template safety checklists
- information about the International River Grading System
- organisational safety and emergency response procedures for canoeing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canoeing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOCNE005 Lead canoeing activities on inland flatwater

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during canoeing activities on flatwater areas according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct canoeing techniques applicable to flatwater conditions. To do this, leaders must be proficient in canoeing skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Canoeing

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |  |
|---|--|
| 1. Prepare equipment and participants.  | 1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.<br>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.<br>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.<br>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.<br>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.   |
| 2. Brief participants and demonstrate canoeing techniques applicable to flatwater conditions. | 2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.<br>2.2. Encourage participants to ask questions and seek advice before and during session.<br>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.<br>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.<br>2.5. Demonstrate and explain correct techniques appropriate for the activity.<br>2.6. Form a raft up of participants, as required, for demonstrations.<br>2.7. Check and confirm participant ability to use and control equipment before activity commencement.<br>2.8. Check matching of equipment and activities to participants and amend as required. |
| 3. Lead and supervise flatwater canoeing activities.  | 3.1. Supervise activity according to designated role, adjusting position and role as required.<br>3.2. Implement recreational instruction techniques to impart   |

- skills and knowledge for the activity.
- 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
  - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during flatwater canoeing activities.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret detailed familiar organisational policies and procedures.
- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SISOCNE005 Lead canoeing activities on inland flatwater

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three canoeing sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for canoeing activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to canoeing activities in flatwater conditions:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - games used to enhance the development of canoe skills
  - raft up techniques used for group demonstration and instruction.

## Assessment Conditions

Skills must be demonstrated on inland flatwater areas which can be lakes, dams or slow moving rivers. The environment must feature the following:

- less than moderate wind conditions
- current flow is consistently documented as less than 1 knot.

An area for assessment should not be classified as flatwater if any of the following conditions are present:

- rapids of any grade
- surf of any size
- fetch greater than 1 nautical mile
- area is in the entrance to an estuary or embayment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs

- arising safety risks
- emergency situations
- equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- pea-less whistles not affected by water
- open canoes which can include singles and doubles
- canoe paddles
- ropes and tie down straps
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for canoeing activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canoeing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOCNE006 Lead canoeing activities on moving water up to grade 1 rivers**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during canoeing activities on waterways that feature slow moving water conditions according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct canoeing techniques applicable to slow moving water conditions. To do this, leaders must be proficient in canoeing skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Canoeing

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |  |
|---|--|
| 1. Prepare equipment and participants.  | 1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.<br>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.<br>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.<br>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.<br>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.   |
| 2. Brief participants and demonstrate canoeing techniques applicable to slow moving river conditions. | 2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.<br>2.2. Encourage participants to ask questions and seek advice before and during session.<br>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.<br>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.<br>2.5.   - after each determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for canoeing activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to canoeing activities on slow moving water:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - games used to enhance the development of canoe skills
  - raft up techniques used for group demonstration and instruction.

## Assessment Conditions

Skills must be demonstrated in slow moving water conditions in light to moderate wind conditions. Waters can include:

- large bodies of open water such as lakes or dams with slow moving water
- an estuary or embayment with slow moving water
- slow moving water, including grade 1 rivers, which would feature:
  - long stretches of slow moving water
  - relatively few obstacles and no major ones
  - an easy passage to find and follow
  - in grade 1 rivers, regular small waves and or riffles.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations

- equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- canoe helmets as required
- pea-less whistles not affected by water
- open canoes which can include singles and doubles
- canoe paddles
- ropes and tie down straps
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for canoeing activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canoeing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## Assessment Requirements for SISOCNE007 Lead canoeing activities on grade 2 rivers

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three canoeing sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief.
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for canoeing activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to canoeing activities on grade 2 rivers:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - games used to enhance the development of canoe skills
  - raft up techniques used for group demonstration and instruction.

## Assessment Conditions

Skills must be demonstrated on grade 2 rivers which must feature the following:

- fairly frequent but straightforward rapids
- rapids with regular medium sized waves, less than one metre
- low ledges or drops, easy eddies and gradual bends
- small obstacles that require manoeuvring around
- passages through rapids that are generally straightforward and can be seen from the water, although some may require scouting.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions

- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets
- pea-less whistles not affected by water
- open canoes which can include singles and doubles
- canoe paddles
- ropes and tie down straps
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for canoeing activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canoeing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOCVE001 Traverse caves

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to travel through caves which feature frequently travelled tracks and a range of formations and features that may or may not be reliably marked on maps. It requires the ability to safely negotiate a range of terrain obstacles, hazards and cave formations using techniques that minimise environmental damage to the cave.

It applies to leaders, guides or instructors who use these skills when leading participants during caving activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and or support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Caving

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |  |
|---|--|
| <p>1. Prepare for horizontal caving activities.</p> | <p>1.1. Obtain information on the features, formations and particular hazards for local caves.</p> <p>1.2. Obtain and become familiar with cave maps, as available, and identify features that will assist with navigating the cave.</p> <p>1.3. Plan a route and determine contingency routes and emergency escapes.</p> <p>1.4. Select clothing, footwear and personal protective equipment suitable for caving conditions and activities.</p> <p>1.5. Confirm activity safety and emergency response procedures, and minimal impact caving codes to ensure compliance during activities.</p> <p>1.6. Confirm protocols for communications between party members.</p> <p>1.7. Complete equipment safety checks prior to caving activities.</p> |
| <p>2. Navigate in caves.</p>                        | <p>2.1. Follow a route in a cave using a map, compass and underground navigation aids.</p> <p>2.2. Use techniques to estimate distance travelled.</p> <p>2.3. Identify features in the cave using map and compass to maintain route.</p> <p>2.4. Make minor adjustments to route according to prevailing conditions, and navigate using aids, map and compass as required.</p>   |
| <p>3. Travel through caves.</p>                     | <p>3.1. Maintain close contact and effective communication with party members throughout all activities.</p> <p>3.2. Safely approach, and negotiate obstacles, hazards and cave terrain to minimise risk of injury.</p> <p>3.3. Select and use caving techniques suitable to circumstances to move efficiently through caves.</p> <p>3.4. Utilise a range of climbing techniques to explore caves.</p> <p>3.5. Use techniques that minimise damage to equipment and the cave environment throughout all activities.</p>  |

## **Foundation Skills**

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

**SKILLS****DESCRIPTION**

Reading skills to:	<ul style="list-style-type: none"><li>• interpret detailed and familiar organisational safety and emergency response procedures</li><li>• interpret complex and potentially unfamiliar technical information about routes and environmental features.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>• use clear and unambiguous verbal and non-verbal communications to make intent known.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• interpret and calculate detailed numerical data involving, distances, times, depths, gradients and degrees.</li></ul>
Problem-solving skills to:	<ul style="list-style-type: none"><li>• readily adapt to changing situations and terrain by selecting appropriate techniques and equipment to traverse caves efficiently.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• manage own timing to complete activities within planned timeframes.</li></ul>

# Assessment Requirements for SISOCVE001 Traverse caves

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three caving trips and collectively:
  - navigate three pre-planned routes using maps, compass and underground navigation aids
  - utilise options provided in Assessment Conditions to determine two minor adjustments to routes
  - across the three trips, use at least three of the following techniques when traversing caves:
    - squeezing
    - crawling
    - rock scrambling
    - stooping
    - chimneying
    - bridging
    - walking through stream passages
- during each caving trip, consistently:
  - follow safety procedures and safely negotiate hazards
  - comply with minimal impact caving codes.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for caving activities
- the key contents of caving codes, in particular those issued by the Australian Speleological Federation (ASF) including:
  - minimal impact caving code
  - code of ethics
- minimal impact techniques specific to the caving environment and why these are important to cave conservation:
  - avoiding sensitive areas and not accessing restricted areas
  - keeping to well used or marked tracks

- avoiding disturbance to cave fauna, nests and bones
- taking care with hand and foot placement
- avoiding or minimising eating in caves, or eating over containers to avoid spillage
- removing all general and human (toileting) waste
- features of different types of local caves and cave formations sufficient to understand the overall characteristics of the cave setting and its particular hazards
- trusted sources and technologies used to access cave maps and guides for the region or locality
- characteristics of different types of cave maps, their different uses and advantages and disadvantages:
  - detailed cave maps
  - developed long sections
  - maps with wall details and labels
- symbols contained on cave maps and what they represent, and other information found on maps:
  - scale
  - map legend
  - magnetic declination
  - markers
  - gradient
  - distance
  - tracks
  - water depth
  - cross sections
  - significant cave features including speleothems
- map and compass techniques used to:
  - calculate bearings
  - orientate map to surroundings
  - determine location and maintain a designated route
- techniques used to estimate distance travelled within caves
- types of navigation aids found in caves and how these can assist with navigation:
  - track markers
  - built infrastructure
  - natural cave features including speleothems, water direction and air flow
- purpose, features, and correct fit for safety, of personal protective equipment for cavers to include:
  - clothing
  - footwear
  - gloves
  - caving helmets
  - headlamps

- techniques used during cave traverses to include those for:
  - squeezing
  - crawling
  - rock scrambling
  - stooping
  - chimneying
  - bridging
  - walking through stream passages
- communication protocols used between cavers to include:
  - calls
  - hand signals
  - whistles
- typical hazards associated with horizontal caving activities, and techniques used to safely negotiate these:
  - falling rocks, water, debris
  - slippery or unstable terrain
  - narrow passages
  - sharp edges
  - vertical squeezes
  - darkness
  - unstable roof and floor
  - rising waters
  - elevated carbon dioxide levels.

## Assessment Conditions

Skills must be demonstrated in natural caves which feature frequently travelled tracks and a range of formations and features which may or may not be reliably marked on maps.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during caving activities
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that involve adjusting planned routes
- personal protective equipment to include:
  - gloves

- caving helmets
- headlamps
- compasses
- containers for the removal of liquid and solid waste including those for human waste
- cave maps and guides
- caving codes including those issued by the Australian Speleological Federation (ASF):
  - minimal impact caving code
  - code of ethics
- template safety checklists
- organisational safety and emergency response procedures for caving activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a caving leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can be part time or full time experience.

## SISOCVE002 Descend and ascend ladders in caves

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to descend and ascend vertical pitches in caves using ladders. It also requires the ability to belay ladder climbers during descents and ascents and to self-belay.

It applies to leaders, guides or instructors, who use these skills when leading participants during caving activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Caving

### Unit Sector

Outdoor Recreation

### Elements and Performance Criteria

#### ELEMENTS

*Elements describe the essential outcomes*

1. Prepare for the ladder

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Select clothing, footwear and personal protective

- descent or ascent.
- equipment suitable for the caving activity and conditions.
- 1.2. Confirm activity safety and emergency response procedures to ensure compliance during activities.
  - 1.3. Confirm protocols for communications between climber and belayer.
  - 1.4. Identify position of ladder in relation to natural features to account for obstacles, hazards and techniques.
  - 1.5. Attach and adjust belay equipment to self and tie knots suitable for the established belay system.
  - 1.6. Complete equipment safety checks prior to descent, ascent, or belaying.
2. Descend and ascend and vertical ladders in caves.
    - 2.1. Use safety procedures at bottom, top of and throughout descents and ascents to minimise risk to self and others present.
    - 2.2. Use appropriate posture and fluent laddering techniques to descend and ascend cave ladders.
    - 2.3. Utilise techniques for resting on a ladder to reduce fatigue.
    - 2.4. Safely approach, avoid or negotiate hazards to descend and ascend in a controlled manner.
    - 2.5. Maintain effective communication with belayer throughout descents and ascents.
    - 2.6. Use techniques that minimise damage to equipment and the cave environment during climbs.
3. Belay ladder climbers during descents and ascents.
    - 3.1. Avoid or negotiate hazards and use safety procedures to minimise risk to self and others present.
    - 3.2. Establish belaying position and attach self to anchor, as required, to allow effective and safe use of belay system.
    - 3.3. Maintain rope tension to minimise fall distance and ensure climber movement is not unduly restricted.
    - 3.4. Monitor climber progress constantly, and maintain clear communication with climber.
    - 3.5. Arrest falls promptly using technique suitable to belaying device and situation.
    - 3.6. Safely and efficiently secure climber using tie off techniques; release tie off and allow climber to continue.
4. Self-belay during ladder descents and ascents.
    - 4.1. Attach self to suitable belay device for climb with back up to maintain safety in the event of a fall.
    - 4.2. Use appropriate posture and laddering techniques to execute self-belayed ladder descents and ascents.
    - 4.3. Control self-belay system to execute safe and controlled ladder descents and ascents.
    - 4.4. Utilise features of back up belay system in the event of a

fall to self-arrest, self-rescue and complete climb.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed and familiar organisational safety and emergency response procedures.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>visually estimate angles, estimate load on ropes and ladders to determine appropriate tension for climbing and belaying.</li></ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOCVE002 Descend and ascend ladders in caves

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete the following ladder climbs in natural caves:
  - two descents with a belayer
  - two ascents with a belayer
  - two self-belayed descents
  - two self-belayed ascents
- during each of the above climbs, consistently:
  - follow safety procedures and safely negotiate hazards to descend and ascend in a controlled manner
  - connect self to belay system using appropriate device and or knots
- complete two additional self-belayed climbs, simulating a self-arrest and self-rescue to complete the climb
- belay ladder climbers according to safety procedures, and complete the following:
  - one top rope, top belayed descent
  - one top rope, top belayed ascent
  - one top rope, bottom belayed descent
  - one top rope, bottom belayed ascent
  - two simulated climber falls, and safely and efficiently secure and release climbers to continue.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for caving activities
- purpose, features, and correct fit for safety, of personal protective equipment for laddering in caves to include:
  - clothing
  - footwear
  - gloves
  - caving helmets

- headlamps
- harnesses of different types, advantages and disadvantages
- features, functions and operation of laddering equipment used in caves:
  - carabiners
  - maillon rapides
  - static and dynamic rope and when each might be used
  - tape
  - sewn sling
  - caving ladders
  - personal attachment systems, including cow's tails
  - Prusik cord
  - mechanical ascenders
  - belay systems:
    - top rope top belay
    - top rope bottom belay
    - self-belay
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
- types of equipment and knots used, and how to tie them, when:
  - attaching belay equipment to self
  - attaching belay system to anchors
  - attaching self to back up belay system for self-belays
  - attaching self to anchor
- types of personal and equipment safety checks completed prior to climbing and belaying
- laddering techniques and appropriate posture for:
  - descending and ascending caving ladders
  - resting on ladders
  - self-belayed ladder descents and ascents
- techniques for belaying others during ladder climbs in caves to include those for:
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension
  - arresting climber falls
  - securing climber, tying off belay system and releasing
- reasons for attaching belayer to anchor system when belaying others including:
  - minimising belayer movement to retain stable position and stance

- minimising effects of force of climber fall and risk of injury to belayer
- minimising risks of belayer fall
- communication protocols used between climbers and belayers in caves to include:
  - calls
  - hand signals
  - whistles
- typical hazards associated with vertical laddering in caves, and techniques used to safely negotiate these:
  - water pools, streams and seepage
  - falling rocks, water, debris, gear
  - abrasion points
  - sharp edges
  - vertical squeezes and overhangs
  - strong cave breezes
  - darkness
  - rising waters
  - rope and ladder tangles
  - broken or damaged rungs
- how to care for laddering equipment during activities to avoid damage, and promote long lifespan
- techniques used to minimise damage to the cave environment when descending and ascending caving ladders.

## Assessment Conditions

Skills must be demonstrated in a natural cave where ladders are used as part of recreational caving activities.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during caving activities
- personal protective equipment to include:
  - gloves
  - caving helmets
  - headlamps
  - harnesses

- anchors which can include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- laddering equipment to include:
  - carabiners
  - maillon rapides
  - rope which can include static and or dynamic rope
  - tape or sewn sling
  - caving ladders
  - personal attachment systems, including cow's tails
  - Prusik cords
  - mechanical ascenders
  - descending devices
  - belay devices
- template safety checklists
- organisational safety and emergency response procedures for caving activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a caving leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can be part time or full time experience.

# Assessment Requirements for SISOCVE003 Abseil single pitches in caves

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete the following single pitch abseils in natural caves:
  - four descents with a belayer
  - two self-belayed descents
- during each of the above abseils, consistently:
  - follow safety procedures and safely negotiate hazards to descend in a controlled manner
  - connect self to abseil and belay system using appropriate device and or knots
- complete two additional self-belayed descents, simulating a self-arrest and self-rescue to complete the descent
- belay abseilers according to safety procedures, and complete the following:
  - three top rope, top belayed descents
  - one bottom braked descent
  - two simulated abseiler falls, and safely and efficiently secure and release abseilers to continue.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for caving activities
- purpose, features, and correct fit for safety, of personal protective equipment for abseiling in caves to include:
  - clothing
  - footwear
  - gloves
  - caving helmets
  - headlamps
  - harnesses of different types, advantages and disadvantages
- features, functions and operation of abseiling equipment used in caves:
  - carabiners

- maillon rapides
- static and dynamic rope and when each might be used
- tape
- sewn sling
- personal attachment systems, including cow's tails
- Prusik cord
- descending devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- belay systems:
  - top rope top belay
  - bottom brake
  - self-belay
- belay devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- types of equipment and knots used, and how to tie them, when:
  - attaching descending devices to abseil ropes
  - attaching belay system to anchors
  - attaching self to back up belay system for self-belays
  - attaching self to anchor
- types of personal and equipment safety checks completed prior to abseiling and belaying
- caving abseiling techniques, and appropriate posture for descents to include those for:
  - walking backwards on wet and dry surfaces
  - self-belayed descents
- techniques for belaying others during cave abseils to include those for:
  - establishing belaying position for effective and safe use of belay system
  - rope handling and maintaining adequate rope tension
  - controlling bottom brake system
  - arresting abseiler falls
  - securing abseiler, tying off belay system and releasing
- reasons for attaching belayer to anchor system when belaying others including:

- minimising belayer movement to retain stable position and stance
- minimising effects of force of abseiler fall and risk of injury to belayer
- minimising risks of belayer fall
- communication protocols used between abseilers and belayers to include:
  - calls
  - hand signals
  - whistles
- typical hazards for single pitch abseiling in caves, and techniques used to safely negotiate these:
  - water pools, streams and seepage
  - falling rocks, water, debris, gear
  - abrasion points
  - sharp edges
  - vertical squeezes and overhangs
  - strong cave breezes
  - darkness
  - rising waters
  - tangled rope
- how to care for abseiling equipment during caving activities to avoid damage, and promote long lifespan
- techniques used to minimise damage to the cave environment when abseiling in caves.

## Assessment Conditions

Skills must be demonstrated in a natural cave where single pitch abseils are completed as part of recreational caving activities.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- participants with whom the individual interacts during caving activities
- personal protective equipment to include:

# Assessment Requirements for SISOCVE004 Descend and ascend single ropes in caves

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete the following activities in natural caves using single rope techniques:
  - three descents
  - three ascents
- during the descents and ascents collectively use the following single rope techniques:
  - changeovers from descending to ascending
  - changeovers from ascending to descending
  - redirections and re-belays
  - changeover to another system while suspended on a rope
- during each activity, consistently:
- connect self to belay system and anchors using appropriate device and or knots
  - follow safety procedures and safely negotiate hazards to descend and ascend in a controlled manner by both:
    - bypassing obstacles
    - raising body weight.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for caving activities
- purpose, features, and correct fit for safety, of personal protective equipment for cavers to include:
  - clothing
  - footwear
  - gloves
  - caving helmets
  - headlamps
  - harnesses of different types, advantages and disadvantages
- features, functions and operation of equipment used for single rope descents and ascents in caves:

- carabiners
- maillon rapides
- static and dynamic rope and when each might be used
- tape
- sewn sling
- personal attachment systems, including cow's tails
- Prusik cord
- foot loops
- mechanical ascenders
- descending devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- belay systems:
  - top rope top belay
  - bottom brake
  - self-belay
- belay devices:
  - assisted locking
  - inline
  - plate
  - figure 8
  - tubular
  - improvised
- types of equipment and knots used, and how to tie them, when:
  - attaching self to belay system
  - attaching self to anchor
- safety requirements at the pitch head including use of personal attachment systems
- types of personal and equipment safety checks completed prior to descents and ascents
- how to care for equipment during caving activities to avoid damage, and promote long lifespan
- techniques used to adjust the rope rig to include those for changing:
  - cord length
  - types of descenders and ascenders
  - type of ascending action used
- single rope techniques used in caves to:
  - descend and ascend a fixed rope

- lock off during descent
- changeover from descending to ascending
- changeover from ascending to descending
- complete redirections and re-belays
- changeover to another system while suspended on a rope
- avoid obstacles and rope knots during descents and ascents including bypassing and by raising body weight
- typical hazards associated with single rope descents and ascents in caves, and techniques used to safely negotiate these:
  - water pools, streams and seepage
  - falling rocks, water, debris, gear
  - abrasion points
  - sharp edges
  - vertical squeezes and overhangs
  - strong cave breezes
  - darkness
  - rising waters
  - tangled rope
- techniques used to minimise damage to the cave environment when descending and ascending single ropes.

## Assessment Conditions

Skills must be demonstrated in a natural cave where single rope descents and ascents are used as part of recreational caving activities.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- personal protective equipment to include:
  - gloves
  - caving helmets
  - headlamps
  - harnesses
- anchors which can include:
  - fixed artificial
  - naturally occurring

- artificial removable
- single rope abseiling equipment:
  - carabiners
  - maillon rapides
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - personal attachment systems, including cow's tails
  - Prusik cords
  - foot loops
  - mechanical ascenders
  - descending devices
  - belay devices
- template safety checklists
- organisational safety and emergency response procedures for caving activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a caving leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can be part time or full time experience.

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to select and set up belay systems, ropes and ladders suitable for single pitch recreational caving activities, and according to current conditions. It requires the ability to select the route and to select and utilise fixed artificial, naturally occurring or artificial removable anchors.

It applies to rigging staff and activity leaders who work independently or with limited guidance from others.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Caving

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Select route and equipment suitable for the cave abseil.
  - 1.1. Identify safe access to and egress from the pitch.
  - 1.2. Determine descent and ascent route appropriate for conditions.
  - 1.3. Select a belay system suitable for the abseil or climb, environmental conditions and participant.
  - 1.4. Choose a belay device suitable for the cave conditions and belayer.
  - 1.5. Select other equipment to suit abseil or climb requirements and participants.
  - 1.6. Complete safety and serviceability checks on equipment and tag faulty equipment according to organisational procedures.
2. Set up caver belay system for caving.
  - 2.1. Select anchors and assess condition, including performance under likely load and stability of surroundings.
  - 2.2. Rig or establish multiple anchors, ensuring equalisation, and minimise potential for shock loading.
  - 2.3. Select and tie appropriate knots, and rig ropes suitable for load and function within the belay system.
  - 2.4. Establish a belay from which belayer is independent of the system.
  - 2.5. Establish a belay that maintains safety of belayer and abseiler.
  - 2.6. Position top rope or bottom brake belay away from hazards, or remove as able.
  - 2.7. Determine need for, and establish, back up belay systems.
  - 2.8. Complete safety checks according to organisational procedures.
3. Rig rope pitches and ladders for caving.
  - 3.1. Rig ropes to minimise effects of rope stretch and rub points and to allow efficient descent and ascent.
  - 3.2. Set up anchors and ropes to allow for a rescue.
  - 3.3. Rig ladders for ease of use and safety.
  - 3.4. Select and tie knots suitable for system type established.
  - 3.5. Minimise risk of cross loading and miss-alignment of carabiners.
  - 3.6. Verify manufacturers' recommendations, equipment limitations and safety margins, and rig equipment accordingly.
  - 3.7. Rig to minimise impact on the cave environment.
  - 3.8. Complete safety checks according to organisational procedures.

## Foundation Skills

*This section describes those language, literacy, numeracy and employment skills that are essential to performance.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed familiar organisational procedures for completing safety checks.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to complete safety and serviceability forms and fault tags that require factual information.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>calculate loads for anchors and ropes under normal conditions and in the event of a fall</li><li>visually estimate distances to calculate lengths for ropes.</li></ul>

## Unit Mapping Information

No equivalent unit.

## Assessment Requirements for SISOCVE005 Establish ropes, ladders and belays for caving

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- select and set up belay systems and ropes suitable for single pitch abseiling and laddering in caves for four different pitches
- collectively set up the following types of systems:
  - cave ladders
  - doubled rope technique
  - single rope
  - releasable abseil line
  - rope systems suitable for single rope techniques, including rigs for redirections and re-belays
  - top rope top belay
  - top rope bottom belay
  - bottom brake belay
  - self-belay
- collectively select and use these different types of anchors:
  - fixed artificial
  - naturally occurring
  - artificial removable
- collectively select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
- identify and tag three different types of faulty equipment.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for safety and serviceability checks
- how the following factors affect selection of descent and ascent routes for caving environments:
  - season of operation, weather and environmental conditions

- participant characteristics including age, size, weight, fitness and abseiling or climbing skill level
- group objectives and size
- environmental hazards specific to abseiling and climbing in caves and how these affect:
  - safe access to and egress from the pitch
  - choice of descent and ascent routes for safety of abseiler or climber
  - positioning of top or bottom belay systems for safety of belayer
- features, functions, advantages and disadvantages of different types of anchors used in caves:
  - fixed artificial:
    - threads
    - bolts
    - chains
  - naturally occurring:
    - trees
    - in cave natural bollards and jug handles
  - artificial removable:
    - spring loaded camming devices
    - nuts, wires and hexes
    - pitons
- issues that are assessed when selecting anchors and likely impacts of poor condition on performance under load:
  - wear and abrasion due to age and use
  - corrosion
  - decay
  - dislodgment
  - underlying stability of structural features and presence of:
    - cracks
    - deformities
    - fissures
- meaning of the following terms, and principles which apply when rigging anchors and ropes:
  - equalisation of load
  - single point of failure
  - anchor redundancy
  - angle of separation
  - shock loading
  - cross loading and cyclical loading of carabiners
  - miss-alignment of carabiners
  - closing the system, including advantages, disadvantages and methods used

- types of forces (upwards, downwards) generated during abseiling, climbing and belaying, and how to calculate load on anchors and ropes for these circumstances:
  - top rope top belay
  - tope rope bottom belay
  - bottom brake belay
  - self-belay
  - abseiler or climber descending under control
  - abseiler or climber fall
  - belayer arresting falls
- the effects of rope stretch during operations and implications if not minimised:
  - abrasions
  - rope bounce
  - undue stress on the anchor system
  - potential for abseiler or climber to impact with hazards, or become entangled
- features, functions, advantages and disadvantages of laddering, abseiling and belay equipment used in caves:
  - abseiling, climbing and belay systems for:
    - cave ladders
    - doubled rope technique
    - single rope
    - releasable abseil line
    - rope systems suitable for single rope techniques
    - top rope top belay
    - tope rope bottom belay
    - bottom brake belay
    - self-belay
  - descending devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised

- harnesses of different types
- carabiners
- maillon rapides
- static and dynamic rope and when each might be used
- rope protectors
- caving ladders
- tape
- sewn sling
- personal attachment systems, including cow's tails
- Prusik cord
- foot loops
- mechanical ascenders
- how the following factors affect the selection and rigging of above equipment:
  - site characteristics including position of rub points
  - weather and environmental conditions
  - participant size, weight, and abseiling or climbing ability
  - belayer to climber weight ratio
  - cumulative load for group size and number of abseils or ladder climbs
  - abseiling and laddering techniques to be used
  - distance, height and angle of anchor relative to abseil or climb position
- manufacturers' specifications for equipment use
- techniques used to establish belay systems for safety of belayer:
  - rigging belays for performance of rescues
  - attaching to anchor or self belay safety system
- techniques used to establish descending and ascending equipment for redirections and re-belays
- situations requiring back up belay systems
- when different knots are used, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight
  - end to end joining
  - termination
  - load control hitches
  - slide and grip hitches
- types of safety checks completed for rigging of equipment
- how to care for abseiling and laddering equipment when rigging to avoid damage, and promote long lifespan
- potential environmental impacts of rigging for abseiling and laddering in caves and techniques used to minimise damage.

## Assessment Conditions

Skills must be demonstrated in a natural cave where rigging is completed for recreational single pitch abseiling and laddering.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- personal protective equipment to include:
  - gloves
  - caving helmets
  - headlamps
  - harnesses
- anchors to include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- abseiling equipment to include:
  - carabiners
  - maillon rapides
  - rope which can include static and or dynamic rope
  - rope protectors
  - caving ladders
  - tape or sewn sling
  - personal attachment systems, including cow's tails
  - Prusik cords
  - foot loops
  - mechanical ascenders
  - descending devices
  - belay devices
- template safety checklists
- organisational procedures for safety and serviceability checks.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a canyoning activity leader or rigger, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can be part time or full time experience.

## SISOCVE006 Lead caving activities

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during caving activities according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct caving activity techniques which might include abseiling, laddering, navigation and negotiation of cave formations when traversing caves. To do this, leaders must be proficient in caving skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |   |
|---|---|
| 1. Prepare equipment and participants.                            | 1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.<br>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated conditions.<br>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.<br>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.<br>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.  |
| 2. Brief participants and demonstrate caving activity techniques. | 2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.<br>2.2. Encourage participants to ask questions and seek advice before and during session.<br>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.<br>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.<br>2.5. Demonstrate and explain correct techniques appropriate for the activity.<br>2.6. Check and confirm participant ability to use and control equipment before activity commencement.<br>2.7. Check matching of equipment and activities to participants and amend as required. |
| 3. Lead and supervise caving activities.                          | 3.1. Supervise activity according to designated role, adjusting position and role as required.<br>3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.<br>3.3. Provide clear and accurate instructions and   |

- demonstrations throughout the session.
- 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during caving activities.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret detailed familiar organisational policies and procedures.

- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SISOCVE006 Lead caving activities

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three caving sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for caving activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to caving activities:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
- potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated in a natural cave used for recreational caving activities which may include fundamental abseiling and laddering, and traversing caves using fundamental techniques for navigation and negotiating cave formations, e.g. rock scrambling.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- personal protective equipment to include:
  - gloves
  - caving helmets
  - headlamps
  - harnesses
- activity equipment relevant to activities which might include abseiling and laddering equipment
- activity plans

- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for caving activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a caving leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOCYT001 Set up, maintain and repair bicycles

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to select, set up and maintain bikes used for recreational cycling activities. It requires the ability to set up bikes to meet the requirements of pre-planned cycling activities and terrain, as well as for participant characteristics. It covers the ability to maintain and repair bike system components. Repairs can be completed both at base and in the field during activities.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to personnel working at all levels including activity assistants, support staff and leaders.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

Assemble an in-field repair kit for use during activities.</li> </ul> |

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret factual activity plan information and maintenance schedules in familiar formats
- interpret potentially unfamiliar and complex manufacturer instructions and specifications.

Writing skills to:

- complete basic documents requiring factual information including fault tags and maintenance records.

- Numeracy skills to:
- complete bike measurements to approximate best fit for participants
  - complete basic calculations involving ratios to dilute cleaning products
  - identify and calculate accurate bicycle system settings and adjustments from specifications.
- Planning and organising skills to:
- manage own timing to complete bike preparations, repairs and maintenance within departure deadlines.
- Technology skills to:
- use specialist bicycle tools and equipment.

# Assessment Requirements for SISOCYT001 Set up, maintain and repair bicycles

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- according to activity plans for three cycling activities operated in three different conditions:
  - select bicycles suited to conditions
  - assemble an in-field repair kit, including tools and spare parts, suited to conditions
  - adjust a total of three bicycles to suit the size of different participants and collectively make the following adjustments:
    - saddle position and height
    - handlebar height and width
    - distance from saddle to handlebars
    - position of gears and brakes
- complete pre-departure safety and serviceability checks on a total of two bicycles to include those for:
  - legally required accessories e.g. bells, reflectors, lights
  - handlebars and plugs
  - wheels, hubs and spokes
  - suspension
  - headset
  - tyre condition and tyre pressure
  - chains and gears
  - brakes
  - bolts or quick release skewers
- clean and service the following bicycle systems, collectively across two different bikes:
  - frame
  - drivetrain
  - steering
  - brakes
  - suspension
  - wheels and hubs
  - tyres, including two puncture repairs

- accessories
- across the services, collectively :
  - remove, adjust and refit a total of two components
  - identify a total of two worn or damaged components and replace
  - lubricate components
- complete maintenance records for each bike serviced.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational procedures for completing repairs, maintenance and safety and serviceability checks
- different types of bikes used for recreational cycling activities, their differing construction features and how features are suited to different surfaces and terrain:
  - road bikes
  - mountain bikes
  - hybrid bikes
  - fixed gear
- how these factors that affect the selection of bikes:
  - participant characteristics:
    - age, height, reach and weight
    - current cycling experience and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - cycling surface:
    - sealed roads, formed bike paths or trails
    - unsealed surfaces - gravel roads, fire trails, single track, open or rocky ground
  - gradient of terrain
  - manufacturers' specifications for bike use
- bike sizing guidelines, and how to take measurements to suit rider size, for:
  - road bikes
  - mountain bikes
  - hybrid bikes
- types of adjustments made to bikes to suit participant characteristics, surface and terrain and how to make these:
  - saddle position and height
  - handlebar height and width
  - distance from saddle to handlebars
  - position of gears and brakes

- suspension
- tyre pressure including range of suitable pressures
- types of pre-departure safety and serviceability checks, how to complete these and what tools would be used, to include those for:
  - legally required accessories e.g. bells, reflectors, lights
  - handlebars and plugs
  - wheels, hubs and spokes
  - suspension
  - headset
  - tyre condition and tyre pressure
  - chains and gears
  - brakes
- components and key operational features of these bicycle systems:
  - frame
  - drivetrain
  - steering
  - brakes
  - suspension
  - wheels and hubs
  - tyres
  - accessories
- for each of the above systems:
  - how to remove, adjust and refit components
  - how to identify worn or damaged components for replacement
  - cleaning requirements and techniques
  - lubrication requirements, as relevant
  - types of repairs referred to specialist technicians
- for tyres, how to remove tubes, repair punctures and re-inflate
- different types of cleaning products and how these are used on different bike parts:
  - cleaning solutions and sprays for removing mud and dirt
  - degreasers for cleaning chains and other moving parts
  - brake cleaners
  - suspension solutions and sprays
  - rust prevention polishes and sprays
- types and use of tools and equipment used to maintain and repair bicycles including those typically used in the field
- spare parts typically carried in the field
- safe manual handling techniques for bending, lifting and carrying heavy equipment during maintenance tasks
- types and correct use of personal protection equipment for maintaining bicycles

- a range of formats for and inclusions of maintenance documents:
  - fault tags and reports
  - repair and maintenance reports.

## Assessment Conditions

Skills can be assessed in the field or in an operational depot or a combination, provided that the situation is appropriate to the repair or maintenance task.

A depot can be:

- an industry workplace or
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure use of:

- personal protective equipment for repair and maintenance activities
- bicycles of different types which can include:
  - road bikes
  - mountain bikes
  - hybrid bikes
- spare parts for all bicycle system components
- tools used to maintain and repair bicycles:
  - Allen keys
  - cassette remover
  - chain breaker
  - chain whip
  - crank puller and crank wrench
  - pliers, cable cutting pliers
  - pressure gauge
  - pumps and connectors
  - puncture repair kit
  - screwdrivers
  - spanners: ring, open ended, shifting, two cone, pedal, headset, sockets and ratchets
  - spoke key
  - tyre levers
- lubricants
- cloths, stiff and soft brushes used for cleaning
- cleaning products for bikes to include:
  - agents for removing mud and dirt
  - degreasers
  - brake cleaners
  - suspension cleaners

- rust prevention agents
- participant profiles
- activity plans
- manufacturer's cleaning, repair and maintenance instructions
- template maintenance documents:
  - fault tags and reports
  - repair and maintenance reports
- organisational:
  - procedures for completing repairs, maintenance and safety and serviceability checks
  - maintenance schedules.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational cycling programs, or as a bicycle technician, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOCYT002 Ride bicycles on roads and pathways, easy conditions**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to ride road bicycles as part of a group on easy road terrain, in lightly trafficked and other areas and according to planned routes.

Easy road terrain is defined as on sealed roads and sealed or unsealed, but compacted, off-road pathways over gentle gradients, with no steep ascents or descents. Light vehicular traffic would be present on roads with routes confined to minor roads.

It applies to leaders, guides or instructors, who use these skills when leading participants during cycling activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

Cyclists must comply with the legislated road rules for the particular Australian state or territory, and with special road rules that apply to cyclists. All training and assessment activities must comply with the local state or territory requirements.

No occupational licensing or certification requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

### **Competency Field**

Cycle Touring

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

#### 1. Prepare for the ride.

#### 2. Ride bicycles in easy road and pathway conditions.

#### 3. Negotiate hazards, obstacles and gentle gradients.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Select clothing, footwear, personal protective and other equipment suitable for the ride and conditions, and check for safe working condition.

1.2. Complete safety and serviceability checks immediately before riding and correct bike deficiencies, as required.

1.3. Stow clothing, personal resources, and food according to access requirements during ride.

1.4. Interpret planned route from activity plans and maps to assist in following the route.

1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.

1.6. Confirm protocols for communications between riders and with motorists.

1.7. Fit and adjust personal protective equipment to ensure comfort and safety.

2.1. Mount and dismount bike safely while maintaining balance.

2.2. Control speed of bike using techniques suitable for sealed and compacted surfaces, to smoothly pedal, change gears and brake.

2.3. Establish and maintain an appropriate riding rhythm and pace to minimise fatigue, strain and injury.

2.4. Maintain appropriate posture, balance and weight shift to efficiently handle and control the bike in a straight line, through wide bends and around corners.

2.5. Ride in bunch formation, where appropriate, and make required adjustments to own pace and place in formation.

3.1. Modify riding technique to account for changes in gradient, on and off road surfaces.

3.2. Control line of direction and speed to safely approach, avoid or negotiate obstacles.

3.3. Choose and maintain posture and body position appropriate for negotiating gentle ascents and descents.

- 3.4. Utilise smooth and timely gear changes to assist pedalling effort when negotiating gentle ascents.
4. Negotiate minor roads in light vehicular traffic
- 4.1. Maintain appropriate position on the road to avoid collisions with vehicles and other users.
- 4.2. Monitor traffic conditions at minor intersections and roundabouts to safely negotiate a course of travel.
- 4.3. Monitor driveways and other situations for cars entering the traffic.
- 4.4. Ride at an appropriate speed for traffic conditions.
- 4.5. Maintain effective communication with party members, motorists and other users throughout all activities.
- 4.6. Ensure compliance with road rules and etiquette applicable to cycling.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:	<ul style="list-style-type: none"> <li>interpret detailed and familiar organisational safety and emergency response procedures</li> <li>interpret straightforward but potentially unfamiliar information on maps</li> <li>interpret factual activity plan information in familiar formats.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret and calculate numerical data involving distances, times and speeds.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>manage own timing to complete activities within planned timeframes.</li> </ul>

## Unit Mapping Information

No equivalent unit.

## Assessment Requirements for SISOCYT002 Ride bicycles on roads and pathways, easy conditions

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group cycling trips each taking a different route
- during each trip:
  - utilise effective cycling techniques, modified to account for changes in surface, to:
    - mount and dismount without assistance on the flat
    - use efficient cadence for flat terrain and gentle gradients
    - execute timely and smooth gear changes, including for gentle ascents and descents
    - brake smoothly, including for gentle descents, negotiate corners and wide bends, using weight shift
    - choose and maintain appropriate body position and posture, including for flat terrain and gentle ascents and descents
    - ride in bunch formation for two short sections
  - consistently maintain a safe position on the road, pathway or trail, follow safety procedures and safely negotiate traffic conditions.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for cycling activities
- clothing and footwear suitable for cycling activities:
  - types of clothing and fabrics that protect against the effects of weather conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear
  - types of cycling footwear including specialist cycling shoes and cleats and their advantages over other types of footwear
- features and functions of personal protective equipment, items used to improve rider comfort, and how to fit and adjust these for comfort and safety:
  - bicycle helmets
  - high visibility vests or clothing

- gloves
- elbow pads
- knee pads
- wrist guards
- padded shorts
- eye protection
- features of bicycle saddlebags, handlebar bags and panniers, and techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of bicycle
  - to waterproof clothing, food and resources
- types of pre-departure safety and serviceability checks completed immediately prior to riding and how to complete, including those for:
  - tyre pressure appropriate for conditions
  - required accessories such as lights and reflectors
  - brakes
  - seat and or handlebars for best rider fit
  - handlebar plugs
- communication protocols used between groups of cyclists and with motorists and other users to include:
  - calls
  - hand signals
  - whistles, use of bike bell
- effective riding techniques for cycling on sealed roads and sealed or unsealed off-road pathways:
  - mounting and dismounting without assistance on the flat
  - using efficient cadence for flat terrain and gentle gradients
  - gear selection and timely and smooth changing of gears
  - smooth braking
  - weight shifting to negotiate corners and wide bends
  - changing posture and body position; sitting and standing and when both are effective
  - negotiating flat terrain and gentle ascents and descents
  - riding in bunch formation, and when this is appropriate
- how techniques would be modified to account for changes in gradient and surface
- safe position on minor roads and pathways to avoid collisions with motorists and other users
- defensive cycling techniques applicable to riding on minor roads and in light traffic
- typical hazards associated with cycling on sealed roads and sealed or unsealed off-road pathways, and techniques used to safely negotiate these:
  - bridges
  - water on road

- bumps
- depressions
- potholes
- drainage grates
- rail crossings
- moving and parked vehicles
- other users: pedestrians, runners, horse riders
- etiquette applicable to cycling in groups and used with motorists and other users
- road rules applicable to cyclists for the particular state or territory
- special road rules that apply to cyclists for the particular state or territory.

## Assessment Conditions

Skills must be demonstrated in riding conditions which feature:

- sealed roads and sealed or unsealed, but compacted, off-road pathways
- gentle gradients with no steep ascents or descents
- minor roads with light vehicular traffic.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during cycling activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant bicycle helmets
- road bicycles fitted with equipment compliant with local state or territory road law
- activity plans to include details of planned route
- cycling route maps and guides
- organisational safety and emergency response procedures for cycling activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a cycling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# **SISOCYT003 Ride bicycles on roads, up to moderate terrain and heavy traffic**

## **Modification History**

Not applicable.

## **Application**

This unit describes the performance outcomes, skills and knowledge required to ride road bicycles as part of a group on both moderate road terrain and in heavily trafficked areas, according to planned routes.

Moderate road terrain is defined as on sealed roads over moderate ascents and descents. Terrain would vary across routes and would likely include a combination of gradients upwards from flat. Heavy vehicular traffic would be present and routes could cover major open roads and those within built up areas.

It applies to leaders, guides or instructors, who use these skills when leading participants during cycling activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

Cyclists must comply with the legislated road rules for the particular Australian state or territory, and with special road rules that apply to cyclists. All training and assessment activities must comply with the local state or territory requirements.

No occupational licensing or certification requirements apply to this unit at the time of publication.

## **Pre-requisite Unit**

Nil

## **Competency Field**

Cycle Touring

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

#### 1. Prepare for the ride.

#### 2. Ride bicycles on moderate road conditions.

#### 3. Negotiate hazards, obstacles and moderate gradients.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Select clothing, footwear, personal protective and other equipment suitable for the ride and conditions, and check for safe working condition.

1.2. Complete safety and serviceability checks immediately before riding and correct bike deficiencies, as required.

1.3. Stow clothing, personal resources, and food according to access requirements during ride.

1.4. Interpret planned route from activity plans and maps to assist in following the route.

1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.

1.6. Confirm protocols for communications between riders and with motorists.

1.7. Fit and adjust personal protective equipment to ensure comfort and safety.

2.1. Mount and dismount bike safely, on different road gradients, while maintaining balance.

2.2. Control speed of bike using techniques suitable for sealed surfaces and changing gradients, to smoothly pedal, change gears and brake.

2.3. Establish and adjust riding rhythm and pace to minimise fatigue, strain and injury over changing gradients.

2.4. Maintain appropriate posture, balance and weight shift to efficiently handle and control the bike in a straight line, through winding bends and around corners.

2.5. Ride in bunch formation, where appropriate, and make required adjustments to own pace and place in formation, according to ability over changing gradients.

3.1. Modify riding technique to account for changes in gradient and road surface.

3.2. Control line of direction and speed to safely approach, avoid or negotiate obstacles.

3.3. Establish and maintain posture and body position appropriate for negotiating moderate ascents and

- descents.
- 3.4. Utilise smooth and timely gear changes to assist pedalling effort when negotiating moderate ascents.
  - 3.5. Maintain steady pace to ascend moderate inclines.
  - 3.6. Utilise smooth and timely brake and balance techniques to descend moderate inclines under control.
4. Negotiate major roads in heavy vehicular traffic
    - 4.1. Maintain appropriate position on the road to avoid collisions with vehicles and other users.
    - 4.2. Monitor traffic conditions at major intersections and roundabouts to safely negotiate a course of travel.
    - 4.3. Monitor driveways and other situations for cars entering the traffic.
    - 4.4. Ride at an appropriate speed for heavy and variable traffic conditions.
    - 4.5. Maintain effective communication with party members, motorists and other users throughout all activities.
    - 4.6. Ensure compliance with road rules and etiquette applicable to cycling.

## Foundation Skills

## SISOCYT004 Ride off road bicycles on easy trails

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to ride mountain or other off road bicycles as part of a group on easy trails and according to planned routes.

This unit provides the skills to cycle off road on easy trails defined as trails that are likely to be a combination of fire road and wide single tracks with a gentle gradient, smooth surface and relatively free of unavoidable obstacles. The trail surface is mostly firm and stable but may have obstacles such as small logs, roots and rocks, and some areas of loose surface. Climbs and descents are mostly shallow but may include some moderately steep sections.

It applies to leaders, guides or instructors, who use these skills when leading participants during cycling activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

When on road, cyclists must comply with the legislated road rules for the particular Australian state or territory, and with special road rules that apply to cyclists. All training and assessment activities must comply with the local state or territory requirements.

No occupational licensing or certification requirements apply to this unit at the time of publication.

### Pre-requisite Unit

# Assessment Requirements for SISOCYT004 Ride off road bicycles on easy trails

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group off road cycling trips each taking a different route
- during each trip:
  - consistently maintain a safe position on the trail, follow safety procedures and safely negotiate hazards
  - utilise effective off road cycling techniques, modified to account for trail surface obstacles, to:
    - mount and dismount without assistance on both smooth and uneven trail surfaces
    - use efficient cadence for smooth and uneven trail surfaces, flat terrain and gentle gradients
    - execute timely and smooth gear changes, including for gentle ascents and descents
    - brake smoothly, including for gentle descents
    - negotiate corners and bends, using weight shift and other off road bike cornering techniques
    - choose and maintain appropriate body position and posture, including for flat terrain and gentle ascents and descents
    - ride in bunch formation for two short sections.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for off road cycling activities
- clothing and footwear suitable for off road cycling activities:
  - types of clothing and fabrics that protect against the effects of weather conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear
  - types of cycling footwear for off road cycling including specialist mountain bike shoes and cleats and their advantages over other types of footwear

- features and functions of personal protective equipment, items used to improve rider comfort, and how to fit and adjust these for comfort and safety:
  - bicycle helmets
  - high visibility vests or clothing
  - gloves
  - elbow pads
  - knee pads
  - wrist guards
  - padded shorts
  - eye protection
- features of mountain bike saddlebags, handlebar bags and panniers, and techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of bicycle
  - to waterproof clothing, food and resources
- types of pre-departure safety and serviceability checks completed immediately prior to riding and how to complete, including those for:
  - tyre pressure appropriate for conditions
  - required accessories such as lights and reflectors
  - brakes
  - seat and or handlebars for best rider fit
  - handlebar plugs
- communication protocols used between groups of off road cyclists and with other trail users to include:
  - calls
  - hand signals
  - whistles, use of bike bell
- for off road cycling on easy trails:
  - safe position on trails to avoid collisions with motorists and other users
  - effective riding techniques for:
    - mounting and dismounting without assistance on both smooth and uneven trail surfaces
    - using efficient cadence for smooth and uneven trail surfaces, flat terrain and gentle gradients
    - gear selection and timely and smooth changing of gears
    - smooth braking
    - weight shifting to negotiate corners and bends
    - cornering off road bikes
    - changing posture and body position; sitting and standing and when both are effective
    - negotiating flat terrain and gentle ascents and descents

- riding in bunch formation, and when this is appropriate on trails
- how techniques would be modified to account for trail surface obstacles and changes in gradient
- typical hazards associated with cycling off road on easy trails, and techniques used to safely negotiate these:
  - small logs, roots and rocks
  - loose surface
  - ruts and corrugations
  - bumps
  - berms
  - depressions
  - pot holes
  - overhanging vegetation
  - bridges
  - drainage grates
  - water on road and slippery surfaces
  - vehicles
  - other users: pedestrians, runners, horse riders
- etiquette applicable to off road cycling in groups and used with other trail users
- road rules that are applicable to cyclists for the particular state or territory
- special road rules that apply to cyclists for the particular state or territory.

## Assessment Conditions

Skills must be demonstrated in off road riding conditions which feature:

- easy trails that may combine fire roads and wide single tracks
- a trail surface which is mostly smooth, firm and stable but may have obstacles such as small logs, roots and rocks
- gentle gradient; climbs and descents which are mostly shallow but may include some moderately steep sections.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during cycling activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant bicycle helmets
- off road bicycles fitted with equipment compliant with local state or territory road law

- activity plans to include details of planned route
- trail route maps and guides
- organisational safety and emergency response procedures for off road cycling activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a cycling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOCYT005 Ride off road bicycles on intermediate trails

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to ride mountain or other off road bicycles as part of a group on intermediate trails and according to planned routes.

This unit provides the skills to cycle off road on intermediate trails defined as those that are likely to be a single trail with moderate gradients, variable surface and obstacles. Sections of the trail will have rocky or loose tread with obstacles such as logs, roots and rocks. Climbs and descents are mostly of moderate gradient but may include steep sections.

It applies to leaders, guides or instructors, who use these skills when leading participants during cycling activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

When on road, cyclists must comply with the legislated road rules for the particular Australian state or territory, and with special road rules that apply to cyclists. All training and assessment activities must comply with the local state or territory requirements.

No occupational licensing or certification requirements apply to this unit at the time of publication.

## Pre-requisite Unit

## Competency Field

Cycle Touring

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Prepare for the ride.

2. Ride bicycles off road in intermediate trail conditions.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Select clothing, footwear, personal protective and other equipment suitable for the ride and conditions, and check for safe working condition.
- 1.2. Complete safety and serviceability checks immediately before riding and correct bike deficiencies, as required.
- 1.3. Stow clothing, personal resources, and food according to access requirements during ride.
- 1.4. Interpret planned route from activity plans and trail maps to assist in following the route.
- 1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.
- 1.6. Confirm protocols for communications between party members and with other riders.
- 1.7. Fit and adjust personal protective equipment to ensure comfort and safety.
- 2.1. Mount and dismount bike safely, on different trail surfaces and gradients, while maintaining balance.
- 2.2. Control speed of bike using techniques suitable for rocky and loose tread and changing gradients, to pedal, change gears and brake.
- 2.3. Select and adjust cadence appropriate for rocky, loose and variable tread and changing gradients.
- 2.4. Adopt appropriate riding rhythm and pace to minimise fatigue, strain and injury and adjust according to trail conditions.
- 2.5. Maintain appropriate posture, balance and weight shift to efficiently handle and control the bike in a straight line, through bends and tight corners.
- 2.6. Monitor party formation, riding pace and space between riders and adjust own position and pace according to conditions.
- 2.7. Maintain effective communication with party members and other riders throughout all activities.
- 2.8. Ensure compliance of self and party members with

- etiquette applicable to off road cycling.
3. Negotiate hazards, obstacles, moderate and steep gradients.
    - 3.1. Monitor trail for other riders, select and adjust appropriate riding position to avoid collisions.
    - 3.2. Modify riding technique, posture and body position to account for ongoing trail surface obstacles.
    - 3.3. Control line of direction and speed to safely approach, and negotiate obstacles.
    - 3.4. Choose and maintain posture and body position appropriate for negotiating moderate and steep ascents and descents.
    - 3.5. Utilise smooth and timely gear changes to assist pedalling effort when negotiating moderate and steep ascents.
    - 3.6. Utilise timely brake and balance techniques to descend moderate and steep inclines under control.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed and familiar organisational safety and emergency response procedures</li> <li>• interpret straightforward but potentially unfamiliar information on maps</li> <li>• interpret factual activity plan information in familiar formats.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>• use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and calculate numerical data involving distances, times and speeds.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• manage own timing to complete activities within planned timeframes.</li> </ul>

## Assessment Requirements for SISOCYT005 Ride off road bicycles on intermediate trails

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group off road cycling trips each taking a different route
- during each trip:
  - consistently maintain a safe position on the trail, follow safety procedures and safely negotiate hazards
  - utilise effective off road cycling techniques, modified to account for trail surface obstacles, to:
    - mount and dismount without assistance on different trail surfaces, including rocky and loose tread, and on moderate and steep inclines and declines
    - use efficient cadence for rocky and loose trail surfaces, moderate and steep gradients
    - execute timely and smooth gear changes, including for moderate and steep ascents and descents
    - brake smoothly, including for moderate and steep descents
    - negotiate tight corners and bends, using weight shift and other off road bike cornering techniques
    - smoothly ride trail obstacles and features
    - choose and maintain appropriate body position and posture, including for moderate and steep ascents and descents.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for off road cycling activities
- clothing and footwear suitable for off road cycling activities:
  - types of clothing and fabrics that protect against the effects of weather conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear
  - types of cycling footwear for off road cycling including specialist mountain bike shoes and cleats and their advantages over other types of footwear

- features and functions of personal protective equipment, items used to improve rider comfort, and how to fit and adjust these for comfort and safety:
  - bicycle helmets
  - high visibility vests or clothing
  - gloves
  - elbow pads
  - knee pads
  - wrist guards
  - padded shorts
  - eye protection
- features of mountain bike saddlebags, handlebar bags and panniers, and techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of bicycle
  - to waterproof clothing, food and resources
- types of pre-departure safety and serviceability checks completed immediately prior to riding and how to complete, including those for:
  - tyre pressure appropriate for conditions
  - required accessories such as lights and reflectors
  - brakes
  - seat and or handlebars for best rider fit
  - handlebar plugs
- communication protocols used between groups of off road cyclists and with other trail riders to include:
  - calls
  - hand signals
  - whistles, use of bike bell
- for off road cycling on intermediate trails:
  - safe position on trails to avoid collisions with other riders
  - effective riding techniques for:
    - mounting and dismounting without assistance on different trail surfaces, including rocky and loose tread, and on moderate and steep inclines and declines
    - using efficient cadence for rocky and loose trail surfaces, moderate and steep gradients
    - gear selection and timely and smooth changing of gears
    - smooth braking, including for moderate and steep descents
    - weight shifting to negotiate bends and tight corners
    - cornering off road bikes
    - changing posture and body position; sitting and standing and when both are effective
    - negotiating moderate and steep ascents and descents

- how techniques would be modified to account for trail surface obstacles and changes in gradient
- typical hazards associated with cycling off road on intermediate trails, and techniques used to safely negotiate these:
  - logs, roots and rocks
  - loose surface
  - ruts and corrugations
  - bumps
  - berms
  - depressions
  - pot holes
  - trees and overhanging vegetation
  - bridges
  - drainage grates
  - water crossings
- etiquette applicable to off road cycling.

## Assessment Conditions

Skills must be demonstrated in off road riding conditions which feature:

- intermediate single trails
- a trail surface which is variable including rocky or loose tread with obstacles such as logs, roots and rocks
- moderate to steep gradient; climbs and descents which are mostly moderate but may include some steep sections.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during cycling activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant bicycle helmets
- off road bicycles fitted with equipment compliant with local state or territory road law
- activity plans to include details of planned route
- trail route maps and guides
- organisational safety and emergency response procedures for off road cycling activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a cycling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# **SISOCYT006 Lead cycling activities on roads and pathways, easy conditions**

## **Modification History**

Not applicable.

## **Application**

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during cycling activities on minor roads and off-road pathways according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct on road cycling techniques applicable to easy road and pathway conditions. To do this, leaders must be proficient in cycling skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## **Pre-requisite Unit**

Nil

## **Competency Field**

Cycle Touring

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |  |
|--|--|
| <p>1. Prepare equipment and participants.</p>  | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.</p> <p>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.</p>  |
| <p>2. Brief participants and demonstrate cycling technique applicable to easy road and pathway conditions.</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate for the activity.</p> <p>2.6. Check and confirm participant ability to use and control equipment before activity commencement.</p> <p>2.7. Check matching of equipment and activities to participants and amend as required.</p> |
| <p>3. Lead and supervise cycling activities on minor roads and</p>   | <p>3.1. Supervise activity according to designated role, adjusting position and role as required.</p> <p>3.2. Implement recreational instruction techniques to impart</p>  |

- off-road pathways. skills and knowledge for the activity.
- 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
  - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during cycling activities on minor roads and off-road pathways.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret detailed familiar organisational policies and procedures.
- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SISOCYT006 Lead cycling activities on roads and pathways, easy conditions

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three cycling sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for cycling activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to cycling activities on minor roads and off-road pathways:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated in riding conditions which feature:

- sealed roads and sealed or unsealed, but compacted, off-road pathways
- gentle gradients with no steep ascents or descents
- minor roads with light vehicular traffic.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant bicycle helmets
- road bicycles fitted with equipment compliant with local state or territory road law
- activity plans
- template:
  - safety checklists
  - participant informed consents

- equipment fault reports
- incident reports
- organisational safety, emergency response and first aid procedures for cycling activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a cycling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOCYT007 Lead cycling activities on roads, up to moderate terrain and heavy traffic**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during cycling activities on major roads within heavy traffic conditions according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct on road cycling techniques applicable to moderate terrain and difficult road conditions. To do this, leaders must be proficient in cycling skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

# Assessment Requirements for SISOCYT007 Lead cycling activities on roads, up to moderate terrain and heavy traffic

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three cycling sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for cycling activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to cycling activities on major roads within heavy traffic conditions:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated in riding conditions which feature:

- sealed roads
- a combination of road gradients upwards from flat terrain to moderate inclines
- moderate ascents and descents
- heavy vehicular traffic on either open roads or those within built up areas or a combination.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant bicycle helmets
- road bicycles fitted with equipment compliant with local state or territory road law
- activity plans
- template:

- safety checklists
- participant informed consents
- equipment fault reports
- incident reports
- organisational safety, emergency response and first aid procedures for cycling activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a cycling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# Assessment Requirements for SISOCYT008 Lead off road cycling activities on easy trails

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three off road cycling sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for off road cycling activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to off road cycling activities on easy trails:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated in off road riding conditions which feature:

- easy trails that may combine fire roads and wide single tracks
- a trail surface which is mostly smooth, firm and stable but may have obstacles such as small logs, roots and rocks
- gentle gradient; climbs and descents which are mostly shallow but may include some moderately steep sections.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant bicycle helmets
- off road bicycles fitted with equipment compliant with local state or territory road law
- activity plans
- template:

- safety checklists
- participant informed consents
- equipment fault reports
- incident reports
- organisational safety, emergency response and first aid procedures for off road cycling activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a cycling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOCYT009 Lead off road cycling activities on intermediate trails

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during off road cycling activities on intermediate trails according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct off road cycling techniques. To do this, leaders must be proficient in off road cycling skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Cycle Touring

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |  |
|--|--|
| <p>1. Prepare equipment and participants.</p>  | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.</p> <p>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.</p>  |
| <p>2. Brief participants and demonstrate off road cycling technique applicable to intermediate trails.</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate for the activity.</p> <p>2.6. Check and confirm participant ability to use and control equipment before activity commencement.</p> <p>2.7. Check matching of equipment and activities to participants and amend as required.</p> |
| <p>3. Lead and supervise off road cycling activities on intermediate trails.</p>                           | <p>3.1. Supervise activity according to designated role, adjusting position and role as required.</p> <p>3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.</p> <p>3.3. Provide clear and accurate instructions and or</p>  |

- demonstrations throughout the session.
- 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during off road cycling activities.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret detailed familiar organisational policies and procedures.

- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

## Assessment Requirements for SISOCYT009 Lead off road cycling activities on intermediate trails

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three off road cycling sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for off road cycling activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to off road cycling activities on intermediate trails:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated in off road riding conditions which feature:

- intermediate single trails
- a trail surface which is variable including rocky or loose tread with obstacles such as logs, roots and rocks
- moderate to steep gradient; climbs and descents which are mostly moderate but may include some steep sections.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant bicycle helmets
- off road bicycles fitted with equipment compliant with local state or territory road law
- activity plans
- template:

- safety checklists
- participant informed consents
- equipment fault reports
- incident reports
- organisational safety, emergency response and first aid procedures for off road cycling activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a cycling leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISODRV001 Drive AWD/4WD vehicles on unsealed roads

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to operate all-wheel drive and four drive vehicles on graded formed dirt roads. It also requires the ability to negotiate minor water crossings.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to all delivery personnel working at any level including support staff, activity assistants and leaders. They drive vehicles for a range of purposes including transporting participants, personnel and equipment to and from activity sites.

Driving is regulated by specific laws in each Australian state and territory with variable rules. All training and assessment activities must comply with the local state or territory road rules and driver licensing requirements. This unit assumes the driver has knowledge of applicable road rules which do not need to be assessed.

## Pre-requisite Unit

Nil

## Competency Field

Driving

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

<i>Elements describe the essential outcomes</i>	<i>Performance criteria describe the performance needed to demonstrate achievement of the element.</i>
1. Prepare for departure.	1.1. Confirm organisational safety and emergency response procedures to ensure compliance during trip. 1.2. Complete pre-start checks on oil, fuel and water. 1.3. Check and adjust tyre pressure to suit road conditions and terrain. 1.4. Check equipment and resources are loaded to ensure balance, and secure load. 1.5. Adjust steering wheel, seats and mirrors to suit own driving position.
2. Operate vehicle.	2.1. Set and operate vehicle equipment and controls appropriate to road conditions and terrain. 2.2. Drive vehicle at speed appropriate for road, traffic and terrain conditions. 2.3. Maintain traction of vehicle using smooth acceleration and braking techniques suited to road conditions and terrain. 2.4. Monitor and safely negotiate road conditions, hazards and other users constantly to avoid vehicle damage and collisions. 2.5. Park and shut down vehicle according to manufacturer's specifications.
3. Negotiate minor water crossings.	3.1. Inspect water crossings for depth, flow rate and solidity of base prior to crossing. 3.2. Negotiate water crossings using appropriate speed, gear selection and device engagement while maintaining safety of vehicle, personnel and environment.
4. Change wheels.	4.1. Locate jack and position according to manufacturers' specifications. 4.2. Remove and replace wheel according to manufacturers' specifications.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
---------------	--------------------

- Reading skills to:
- interpret basic factual information on road signs and in manufacturer's specifications.
- Numeracy skills to:
- interpret and calculate numerical data involving distances, times and speeds.
- Planning and organising skills to:
- manage own timing to complete trip within planned timeframes.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume Implementation Guides -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISODRV001 Drive AWD/4WD vehicles on unsealed roads

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three trips in all-wheel or four wheel drive vehicles on three different graded formed dirt roads
- during each trip consistently follow safety procedures and safely negotiate hazards and road conditions
- complete a minor water crossing on three occasions
- change a total of three wheels.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for driving activities
- difference between all-wheel and four wheel drive vehicles, at a basic level of understanding
- manufacturers' specifications for wheel replacement
- features, function and operation of AWD and 4WD vehicle equipment and controls used for dirt road driving and when negotiating minor water crossings:
  - instruments
  - traction devices
  - wheel hubs, self-locking and manual locking
- how tyre pressure can affect comfort and safety of dirt road driving and how to determine appropriate tyre pressure for a range of conditions and loads
- factors that affect a vehicle's traction on dirt roads
- techniques used to maintain traction including those for:
  - braking
  - acceleration
  - steering
- meaning of centre of gravity for a vehicle and factors that affect this when driving
- driving techniques used when negotiating minor water crossings
- features, functions and operation of equipment for:
  - checking oil and water

- changing tyre pressure
- securing loads
- changing wheels
- typical hazards associated with driving on unsealed roads, and techniques used to safely negotiate these:
  - blind corners
  - one-lane bridges
  - slippery road surface
  - bumps
  - depressions
  - potholes
  - drainage grates
  - rail crossings
  - moving and parked vehicles
  - other users:
    - cyclists
    - pedestrians
    - runners
    - horse riders.

## Assessment Conditions

Skills must be demonstrated on graded formed dirt roads and in environments which feature minor water crossings.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- all-wheel drive or four wheel drive vehicles
- wheel changing equipment including jacks
- spare fully functioning wheels and tyres
- organisational safety and emergency response procedures for driving activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- hold a driver's licence which complies with local state or territory law.

## SISODRV002 Lead four wheel driving activities

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during four wheel driving activities in a range of conditions according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct a range of techniques associated with four wheel driving. This might involve driving, basic maintenance, vehicle recovery and operation of ancillary equipment. To do this, leaders must be proficient in four wheel driving and ancillary skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

Driving is regulated by specific laws in each Australian state and territory with variable rules. All training and assessment activities must comply with the local state or territory road rules and driver licensing requirements. This unit assumes the driver has knowledge of applicable road rules which do not need to be assessed.

### Pre-requisite Unit

## Competency Field

Four Wheel Driving

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Prepare equipment and participants.
2. Brief participants and demonstrate four wheel driving and associated techniques.
3. Lead and supervise four wheel driving

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.
- 1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.
- 1.3. Select and set up equipment to match activities and prevailing conditions; complete safety checks.
- 1.4. Check participants' own ancillary equipment, if provided, and confirm it is in safe working condition.
- 2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.
- 2.2. Encourage participants to ask questions and seek advice before and during session.
- 2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.
- 2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.
- 2.5. Demonstrate and explain correct techniques appropriate for the activity.
- 2.6. Check and confirm participant ability to use and control equipment before activity commencement.
- 2.7. Check matching of equipment and activities to participants and amend as required.
- 3.1. Supervise activity according to designated role, adjusting position and role as required.

- activities.
- 3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.
  - 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
  - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during four wheel driving activities.
- 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
  - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
  - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
  - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
  - 4.5. Amend activities if risk is unacceptable; cease activities when required.
  - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
5. Complete post activity responsibilities.
- 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
  - 5.2. Notify relevant personnel of activity completion.
  - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
  - 5.4. Document any equipment faults and incidents including injuries and near misses.
  - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

# Assessment Requirements for SISODRV002 Lead four wheel driving activities

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three four wheel driving sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for four wheel driving activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to four wheel driving activities:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated in off road conditions which can involve varied terrain, track surfaces and gradients.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- vehicle recovery equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- four wheel drive vehicles
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for four wheel driving sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a four wheel leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience
- hold a driver's licence which complies with local state or territory law.

## SISOFLD001 Assist in conducting recreation sessions

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to assist in the conduct of any type of indoor or outdoor recreation activity session. It requires the ability to assist with equipment and participant preparation and to interact with participants to assist with activity technique and adherence to activity rules.

This unit applies to any type of organisation that delivers indoor and outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to those who assist with the delivery of recreational activities. Assistant leaders use little judgement and work within the parameters of plans and procedures. They work under close supervision, and according to instructions and guidance provided by supervising activity leaders who may be guides or instructors.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

## Assessment Requirements for SISOFLD001 Assist in conducting recreation sessions

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- assist with the setting up and delivery of three activity sessions for a group of participants
- during each of the above sessions, consistently:
  - work within role boundaries and responsibilities and follow supervising leader's direction
  - communicate clearly and positively with participants to assist with activity technique and adherence to activity rules and safety procedures
- after each activity session, participate in a debrief
- utilise options provided in Assessment Conditions to:
  - respond to a total of three participant problems involving non-compliance with activity rules, codes or safety procedures
  - respond to a total of three different equipment faults that have arisen during activities.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures
- different reasons and objectives for people participating in recreational activities
- specific to the particular type of recreational activity:
  - role boundaries and responsibilities of activity assistants
  - roles and responsibilities of different types of activity leaders including guides and instructors
  - potential hazards and associated risks for the activity and safety procedures used to manage these
  - suitable clothing and footwear
  - factors that affect the selection of equipment, including personal protective equipment, to suit individual participants:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities

- injuries and medical conditions
- communication protocols used between participants, leaders and assistants during activities
- communication techniques used to:
  - provide participant information to improve activity technique
  - encourage participant confidence
  - reinforce activity rules and correct breaches
  - provide feedback during debrief.

## Assessment Conditions

Skills must be demonstrated in an environment specific to the particular type of indoor or outdoor recreation activity, and the following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment relevant to the recreational activity.

Assessment must ensure use of:

- a group of participants with whom the individual interacts
- activity leaders, guides or instructors who supervise the candidate
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - participant problems involving non-compliance with activity rules, codes or safety procedures
  - equipment faults
- activity and personal protective equipment specific to the particular type of outdoor recreation activity
- organisational safety and emergency response procedures for activity sessions, specific to the particular type of outdoor recreation activity.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a recreational activities leader, guide or instructor; the three years' experience can incorporate full and or part time experience.

## **SISOFLD002 Minimise environmental impact**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to implement predetermined minimal environmental impact practices while delivering outdoor recreation activities. Environmental impact includes that to the natural environment and to Indigenous and non-Indigenous heritage and cultural sites.

References to land managers and land management are used for simplicity and can equally apply to other environments such as marine locations.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to all delivery personnel working at any level including support staff and assistants, and leaders including guides and instructors.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Field Operations

### **Unit Sector**

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Determine environmental impacts of outdoor recreation activities.
2. Communicate minimal impact practices to participants.
3. Conduct activities with minimal impact.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Interpret organisational minimal impact plans, practices and codes for the specific outdoor recreation activity.
- 1.2. Identify potential environmental impacts caused by activity and identify specific causes.
- 1.3. Evaluate consequences of impact on the environment including heritage or cultural sites.
- 2.1. Explain aims of minimal impact plans and practices to activity participants.
- 2.2. Communicate unique aspects of the setting and potential impacts of activities.
- 2.3. Provide clear participant instructions for minimal impact practices and any cultural protocols for heritage or cultural sites.
- 2.4. Monitor participant adherence to practices and assertively correct breaches.
- 3.1. Follow organisational minimal impact plans, practices and codes throughout all activities.
- 3.2. Comply with conditions of land manager permits and permissions that relate to location usage and practices.
- 3.3. Use equipment in a manner that reduces impact on the natural environment.
- 3.4. Demonstrate appropriate behaviour toward the environment when interacting with participants.
- 3.5. Utilise heritage or cultural sites according to land management requirements and codes.
- 3.6. Note and report any inappropriate practices to relevant personnel and provide suggestions for improvement.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret detailed and sometimes unfamiliar documents and information which can include:
    - organisational minimal impact plans, practices and codes
    - land management permits, permissions and conditions.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Initiative and enterprise skills to:
- identify any organisational deficits in minimal impact practices and suggest improvements.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of activity leaders and support staff to manage environmental impacts during activities.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume Implementation Guides -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISOFLD002 Minimise environmental impact

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- for a particular setting in which outdoor recreational activities are delivered:
  - source information on the environmental, cultural and heritage characteristics of the setting and any unique aspects, and organise into a portfolio
  - provide information in a brief written or verbal report on potential causes and consequences of environmental damage as they relate to two different types of outdoor recreation activities
- interact with participant groups during the delivery of three recreational activity sessions
- during each of the three sessions:
  - promote practices that minimise impact on both the natural environment and cultural and heritage sites
  - ensure compliance of self and participants with organisational plans, practices and codes of conduct for minimal environmental impact
- utilise options provided in Assessment Conditions to identify organisational deficits in minimal impact practices and incorporate suggested improvements in debriefs or reports.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- specific to particular types of outdoor recreation activities:
  - the key contents of minimal impact codes, standards or guidelines issued by industry associations, land management authorities, Indigenous custodians, or other stakeholders and how these can be adopted by organisations
- for a particular setting in which outdoor recreational activities are delivered:
  - organisational plans, practices and codes of conduct for minimal environmental impact
  - conditions of any land manager, owner or Indigenous custodian permits or permissions that relate to:
    - parameters of location use for recreational activities: area restrictions, dispersal of use, allowable activity types, locations, times, participant numbers
    - the use of appropriate minimal environmental practices and cultural protocols

- basic features of ecological systems and their interrelationships sufficient to understand the overall environmental characteristics of the setting
- specific problems of fragile environments and threatened species
- characteristics and sensitivities of unique aspects including those for cultural and heritage sites
- potential causes and consequences of environmental damage as they relate to specific types of outdoor recreation activities:
  - use of equipment
  - human impact
  - equine impact, as relevant
  - impact of transportation to and from activity sites
- typical organisational minimal impact practices which activity assistants, support staff and leaders must implement in the field:
  - avoiding sensitive areas
  - ensuring restricted areas are not accessed
  - following pre-determined access routes to transport participants and equipment
  - keeping to marked tracks or routes
  - using low impact equipment
  - ensuring cultural protocols are used at cultural and heritage sites
  - ensuring participants don't damage or take souvenirs from natural, cultural or heritage sites
  - implementing basic biosecurity measures to limit the spread of pests and diseases
  - using appropriate general and human waste disposal methods.
- methods used to communicate minimal impact practices to participants including through briefings, conversations, demonstrations and instruction.

## Assessment Conditions

Skills must be demonstrated in a setting where outdoor recreation activities are delivered and where there is at least one cultural or heritage site present.

Assessment must ensure use of:

- a group of participants with whom the individual interacts
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that involve identifying and reporting on organisational deficits in minimal impact practices
- equipment specific to the particular type of outdoor recreation activity
- minimal impact codes, standards or guidelines issued by industry associations, land management authorities, Indigenous custodians or other stakeholders
- organisational plans, practices and codes of conduct for minimal environmental impact
- permits or permissions and conditions that relate to the use of appropriate minimal environmental practices and cultural protocols.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a recreational activities leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOFLD003 Select, set up and operate a temporary or overnight site

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to select, set up, operate and dismantle a temporary or overnight site used during any type of outdoor recreation activity. Temporary sites include those used for rest and meal stops, and overnight camping. It requires the ability to pre-plan operational logistics for sites including menu planning for participants.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders and support staff who work independently in the field using discretion and judgement to manage operational logistics and risk.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Field Operations

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Select site.
  - 1.1. Obtain information to determine preferences, expectations and needs of participants that relate to food and shelter.
  - 1.2. Obtain information on available sites within operational zone of outdoor recreation activities.
  - 1.3. Pre-select and book site, if required, to meet participant needs and operational requirements of activity.
  - 1.4. Where no designated area exists, select site for comfort, safety, minimal environmental impact and in compliance with land management requirements.
2. Plan outdoor menus.
  - 2.1. Plan nutritionally-balanced menus, taking account of activity and participant factors.
  - 2.2. Identify special requests and ensure special meals are provided for those with special dietary requirements.
  - 2.3. Identify food safety hazards involved in storing, preparing and serving planned meals; assess risks, and take action to eliminate or minimise them.
3. Select and pack equipment and resources.
  - 3.1. Select catering equipment according to food preparation and service requirements.
  - 3.2. Select shelter equipment to meet participant needs and anticipated weather conditions.
  - 3.3. Obtain food, beverage, water and other resources to meet requirements for the stay.
  - 3.4. Complete pre-departure safety and serviceability checks on equipment.
  - 3.5. Pack equipment and resources according to route terrain, perishability of food, and access requirements during activity.
4. Set up site.
  - 4.1. Assess site, identify hazards and take measures to minimise risk of injury.
  - 4.2. Identify sources of supplementary natural water and treat, as required, for human consumption.
  - 4.3. Set up site facilities for shelter, catering, and waste disposal according to land management requirements for minimal environmental impact.
  - 4.4. Arrange shelter appropriate for prevailing weather and conditions and to ensure comfort and safety.
5. Operate and dismantle temporary site.
  - 5.1. Brief participants on site behaviour, safe zones, boundaries, waste disposal and sanitation practices.
  - 5.2. Prepare and serve food using safe and hygienic food

preparation and handling practices.

- 5.3. Operate temporary site equipment, monitor and assist participants' use to maintain comfort, safety and hygiene.
- 5.4. Clean, dismantle, pack and store equipment and resources.
- 5.5. Remove waste from site where disposal facilities are unavailable.
- 5.6. Leave site in original or improved condition; note and report any site problems to relevant personnel or authorities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret sometimes unfamiliar and potentially complex information about participant characteristics and land management requirements.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• use fundamental sentence structure to complete pre-departure safety and serviceability forms that require factual information.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>• provide clear and unambiguous instructions to participants using language and terms easily understood</li> <li>• ask open and closed probe questions and actively listen to determine participants' understanding of instructions.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• calculate and load correct quantities of equipment and resources.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>• pro-actively and cooperatively work within teams of activity leaders and support staff to organise logistics, solve operational problems and deliver a quality experience to participants.</li> </ul>

# Assessment Requirements for SISOFLD003 Select, set up and operate a temporary or overnight site

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan for the provision of meals which meet the daily fluid, nutritional and energy requirements of participants for the duration of one activity
- select, set up and operate a temporary rest and meal stop on two occasions
- select, set up and operate an overnight camp site, which has no permanent facilities, on at least one occasion
- during all temporary stops, consistently:
  - manage the safety of the site for participants
  - ensure compliance of self and participants with minimal environmental practices
  - ensure food safety practices are implemented for handling and storage of food and for cleaning catering equipment.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- factors that affect the selection of meal and camping sites:
  - location in relation to activity site
  - current weather and environmental conditions
  - land management requirements sufficient to know:
    - where meal and camping stops are allowed and under what conditions
    - how to obtain and maintain permits or permissions
  - preferences, expectations and needs of:
    - different types of consumer groups that participate in outdoor recreation activities
    - the particular participant group
  - availability of:
    - food preparation and service facilities
    - toilet and washing facilities
    - space to set up all facilities and sufficient space from other users
  - availability of desirable environmental features:
    - level ground with good drainage

- shade
- shelter from sun and wind
- natural water supplies
- hazards associated with meal and camping sites and methods used to manage associated risks:
  - slippery or unstable terrain
  - natural and man-made debris
  - unstable trees and tree branches
  - spiders, insects, snakes and fauna
  - changing environmental conditions such as storm, snow, flood and bush fire
- specific to meal and camp sites, practices used to manage minimal environmental impact:
  - following pre-determined access routes to transport participants and equipment
  - keeping to marked tracks or routes to access natural features, and temporary or permanent facilities
  - using appropriate methods for general and human waste disposal
  - managing fires, including requirements when total fire ban days are invoked
- features, set up and operation of typical shelter and other equipment, and appropriateness for different weather conditions:
  - tents
  - bivvies
  - swags
  - bedding and sleeping bags
  - tables, chairs
  - lighting
- for the selection, preparation and service of food:
  - basic principles of nutrition sufficient to know the food groups, source of nutrients and the basis of a balanced meal plan
  - specific to the particular type of outdoor recreation activity, daily fluid and energy requirements of participants and any local environmental conditions which impact
  - meaning of food allergy and food intolerance, and basic understanding of consequences of exposure to or consumption of intolerated food
  - food preparation methods for a range of meals typically available at meal and camp stops
  - food safety practices for handling and storing a range of food types typically available at meal and camp stops; and those for cleaning food preparation and service equipment
  - features, set up and operation of food preparation equipment typically used at meal and camp stops
  - methods used to treat natural water for human consumption
- safe manual handling techniques used to avoid injury when shifting and packing equipment
- importance of loading equipment and supplies for:

- even weight distribution and load balance particular to the transportation mode and terrain (vehicle, vessel, watercraft, cycle, horse etc.)
- easy access at relevant time during activities.

## Assessment Conditions

Pre-departure skills must be demonstrated in a venue, such as an operational depot, from where recreational activities depart and pre-departure checks and loading take place. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Meal preparation and camping skills must be demonstrated in an outdoor setting where temporary stops are provided:

- temporary rest and meals sites may or may not have permanent facilities
- camping sites must have no permanent facilities.

Assessment must ensure use of:

- a group of participants with whom the participant interacts
- catering equipment to match food preparation, service and cleaning requirements
- shelter and bedding equipment to match participant needs and anticipated weather conditions
- ancillary equipment which can include tables, chairs, lighting and human waste facilities
- participant profiles
- documents issued by land managers describing requirements for operating temporary meal and overnight camping sites.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOFLD004 Provide first aid in remote locations

### Modification History

	Minor changes. Equivalent outcome.
Release 2.	Prerequisite unit updated: Superseded unit HLTAID003 replaced with current unit HLTAID011.
Release 1.	No equivalent unit.

### Application

This unit describes the performance outcomes, skills and knowledge required to provide first aid to casualties in a remote or isolated area over an extended period of time until medical assistance is provided or evacuation occurs. It requires the ability to manage the incident and to direct others to provide or assist with first aid.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to senior leaders, guides or instructors, and others who work independently in the field using discretion and judgement to manage operational logistics for emergencies when they arise.

Specific regulatory requirements relating to this unit of competency, including requirements for refresher training, should be obtained from the local state or territory work health and safety regulatory authority.

### Pre-requisite Unit

HLTAID011 Provide first aid

### Competency Field

Field Operations

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Prepare equipment for first aid response in remote or isolated areas.
2. Assess the situation.
3. Manage casualty or casualties.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Evaluate information about remote or isolated destinations and identify potential injuries and illnesses requiring extended management.
- 1.2. Select first aid equipment and resources to deal with a range of potential incidents, according to organisational emergency response and first aid procedures.
- 1.3. Select communication equipment to allow for emergency response at remote or isolated destination.
- 1.4. Complete pre-departure safety and serviceability checks on equipment.
- 2.1. Identify hazards promptly, assess risks and manage to avoid injury to self and others.
- 2.2. Assess condition of casualty or casualties to determine extent of first aid response.
- 2.3. Determine need for emergency services or medical assistance and relay initial and concise information to base and authorities, as required.
- 2.4. Triage when multiple casualties are involved, engage others to assist, and provide instructions.
- 3.1. Direct other first aiders and participants to provide or assist with first aid, and manage use of resources.
- 3.2. Provide first aid using available equipment and resources, and improvise use of other resources as required.
- 3.3. Monitor and respond to casualty's condition in accordance with effective first aid principles.
- 3.4. Explain, to casualty, nature of injury or illness, first aid management and provide reassurance.
- 3.5. Assess and ensure casualty comfort through questioning and monitoring, and use of shelter and available resources.
- 3.6. Communicate calmly with casualty using a style to match level of consciousness.
- 3.7. Monitor and document casualty's condition over time to

- assist on-going management.
- 3.8. Assess need to evacuate casualty, ability to transport to medical assistance or need for external assistance.
4. Liaise with external services to manage casualty or casualties.
- 4.1. Establish communication with emergency services and medical assistance.
- 4.2. Relay accurate factual information about casualty's injury or illness and condition, including any casualty is able to provide.
- 4.3. Communicate essential details of first aid provided, and follow instructions to adjust or use additional first aid.
- 4.4. Administer medication according to medical instructions.
- 4.5. Monitor and report ongoing casualty condition and seek ongoing medical input, as required.
5. Coordinate evacuation and first aid activities until assistance arrives.
- 5.1. Determine need, in consultation with external services, to evacuate casualty.
- 5.2. Provide accurate information about location of incident, number of casualties, their condition and their position to enable deployment of appropriate resources.
- 5.3. Engage others present to assist with ongoing first aid and management of incident circumstances.
- 5.4. Continue to respond to and monitor the condition of casualty and provide ongoing reassurance until assistance arrives.
- 5.5. On approach, assist emergency services to locate the site of the incident.
- 5.6. Follow instructions and provide assistance to emergency services personnel during evacuation.
6. Debrief, document and evaluate the incident.
- 6.1. Participate in incident management de-brief and identify future response improvements.
- 6.2. Evaluate compliance with organisational emergency response policies and procedures, their suitability and any need to amend.
- 6.3. Evaluate need for self and others to access support services to assist with post-incident stress.
- 6.4. Complete required incident reports according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance*

*criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret detailed familiar organisational policies and procedures for emergency response and first aid.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• record detailed and accurate factual information about illness and injury, first aid and emergency response using correct terminology.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>• critically analyse all circumstances and implications to coordinate a considered response to illness and injury in remote locations.</li></ul>

## Unit Mapping Information

	Minor changes. Equivalent outcome.
Release 2.	Prerequisite unit updated: Superseded unit HLTAID003 replaced with current unit HLTAID011.
Release 1.	No equivalent unit.

| Release 1. | No equivalent unit.  |

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- participate in three simulated remote or isolated first aid incidents involving outdoor recreation participants
- during one of the above simulations, work in a small team of up to three responders to manage a single casualty
- during one of the above simulations, work in a team of responders to manage multiple casualties, where the number of casualties outnumbers the number of responders
- during one of the above simulations, work as a single responder to manage three casualties
- across the three simulations, collectively respond to at least six conditions, covering illness and injury, suffered by the casualties
- during each of the simulations:
  - conduct visual and verbal secondary survey assessments of casualties
  - assess, interpret and document vital signs of casualties, including respirations, temperature and pulse
  - monitor and manage the casualties' condition over an extended period of time
  - use available man-made and natural resources to supplement first aid equipment
- after each of the simulations, participate in a debrief and complete an incident report.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational emergency response and first aid policies and procedures
- the nature of remote or isolated locations and how this may impact on first aid management

- common injuries or illnesses that relate to participation, generally, in outdoor recreation activities and the general range of first aid equipment and resources carried by organisations to remote or isolated locations
- common injuries or illnesses that relate to participation in a specific type of outdoor recreation activity, and specific types of first aid equipment and resources typically made available in remote or isolated locations
- key features, functions and limitations of different types of emergency communication equipment used in remote or isolated areas, and factors that affect choice:
  - radio equipment
  - mobile phones
  - satellite phones
  - alerting and tracking devices including personal locator beacons (PLBs)
- principles of triage as they relate to first aid at an incident site
- methods used to:
  - conduct a visual and verbal secondary survey assessment of a casualty
  - assess, interpret and document vital signs of casualties, including respirations, temperature and pulse
  - use available man-made and natural resources to supplement first aid equipment
  - coordinate and direct the actions of group participants and other first aiders within the team to effectively manage a critical incident
- legal requirements for administration of medication and the rights and responsibilities of the first aider for administration
- safe manual handling techniques used to avoid injury when shifting casualties
- key considerations for evacuating casualties or waiting for emergency services and medical assistance:
  - severity of injury or illness and immediate threat to life
  - time required for assistance to arrive
  - potential that transporting casualty may cause condition to deteriorate
  - capability of emergency services to access incident site
  - hindrance to rescue
- methods used to assist emergency services to locate incident sites and the key features, functions and limitations of resources used to assist:
  - verbal directions
  - flags
  - flares
  - fires.

## Assessment Conditions

Skills must be demonstrated in a setting where outdoor recreation activities are delivered. This does not need to be a remote or isolated area provided simulated activities and scenarios concentrate on the significance of remote area circumstances.

Assessments can only be completed through simulated activities.

Assessment must ensure use of:

- people who act as casualties, team member first aid responders and external service providers with whom the individual interacts during simulated activities
- first aid equipment and resources made available in remote or isolated locations by outdoor recreation organisations
- personal protective equipment used when providing first aid
- emergency communication equipment used in remote or isolated areas
- real or mock medications
- template incident reports
- templates for recording vital signs of casualties
- organisational emergency response and first aid policies and procedures.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience in providing first aid in remote or isolated areas during which they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOFLD005 Navigate waterway courses**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to plan and navigate courses for small recreational craft in waterway environments. It also covers knowledge of waterway rules applicable to small craft utilised for recreational purposes.

Waterway navigation skills are required in a range of activity contexts which could include canoeing, kayaking, sea kayaking, and when riding personal watercraft. Techniques and equipment will vary according to the type of craft and waterway environment.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders, guides or instructors, who use these skills when leading participants during activities where waterway navigation skills are required.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Field Operations

### **Unit Sector**

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Plan the course.
2. Navigate waterway courses.
3. Fix position of craft.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Obtain and interpret waterway charts appropriate for the area of navigation.
- 1.2. Determine expected wind, tidal, or current conditions for the intended course.
- 1.3. Identify navigational hazards, position of landmarks and any buoyage to assist in planning and navigating the course.
- 1.4. Utilise all information to plan an efficient course according to specific activity and waterway requirements.
- 1.5. Identify and plot critical points along the course, midpoint and end destinations.
- 1.6. Prepare a navigation data sheet, and identify emergency or contingency escape routes.
- 2.1. Select instrumentation and equipment suitable for navigation requirements.
- 2.2. Follow the planned course using charts, natural and constructed features and any buoyage to assist.
- 2.3. Use instrumentation and equipment as navigational aids to maintain course.
- 2.4. Make required adjustments to course according to prevailing environmental conditions.
- 2.5. Comply with waterway rules throughout all activities, including use of craft within permitted areas.
- 3.1. Fix position of craft at regular intervals to maintain planned course.
- 3.2. Use techniques to estimate distance travelled, accounting for prevailing environmental conditions.
- 3.3. Utilise navigation techniques to identify unfamiliar features and fix position when lost.
- 3.4. Adjust and resume planned course where position indicates a deviation.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret detailed and potentially unfamiliar information on waterway charts.</li><li>• interpret potentially unfamiliar and complex information about waterway rules.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• develop detailed navigation data sheets using correct terminology and symbols.</li></ul>

# Assessment Requirements for SISOFLD005 Navigate waterway courses

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and document three different waterway courses for small recreational craft
- navigate each of the above three planned courses using charts, instrumentation and equipment appropriate for the waterway environment and small craft utilised
- on two occasions, determine when the craft is deviating from a planned course, adjust and resume the planned course after fixing position using:
  - manual techniques on one occasion
  - a GPS device on one occasion
- during each navigation activity, consistently follow waterway rules.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- trusted sources of waterway charts for the region or locality
- different technologies used to access charts
- characteristics of different chart types, their different uses, advantages and disadvantages, accuracy and sources of errors
- information found on waterway charts including symbols and what they represent:
  - survey or edition date
  - map legend
  - scale and distance
  - latitude and longitude
  - compass rose or cardinal points and bearings
  - hydrographic features such as depth, high and low water mark, rocks, wrecks, obstructions
  - topographic features of surrounding land
  - buoyage
  - constructed features such as bridges, weirs, breakwaters, wharves and jetties
  - magnetic variation and annual change
- principal colours used on waterway charts and what they represent

- other information and key features that can assist with waterway navigation:
  - satellite imagery
  - aerial photographs
  - wave, wind, tide and current charts
  - navigational warning notices
- features, functions and operation of navigation instruments either inbuilt or available for small watercraft
- features, functions and operation of global positioning systems (GPS):
  - when these might be used, advantages and disadvantages
  - reliability of signal, device and battery
  - system structure at fundamental level of understanding
  - how to identify and use datum grids
  - how to create, enter and transfer waypoints
  - how to create courses and grid references
  - accuracy and sources of errors
- different types of compasses used for waterway navigation, their features and factors which affect accuracy
- for waterway environments, chart and compass techniques used to:
  - calculate grid, magnetic and true north bearings
  - measure distance on a chart
- techniques used to fix location and navigate waterways, and applicability to different craft and environments:
  - using chart, identifying natural landmarks and constructed features and determining distance travelled
  - using dead reckoning, taking into account environmental factors such as winds, tides, currents and estimated speed
  - using simultaneous bearings, transits of coastal features and by running fix
  - using GPS devices
- inclusions of navigation data sheets and their purpose:
  - grid reference points
  - grid and magnetic bearings
  - distances
  - estimated travelling times and times of arrival
  - identifiable features
  - escape routes
- types of navigational buoyage, how these assist with navigation and rules for complying with buoyage:
  - marks – buoys and beacons
  - zone signage
- how different types of navigational buoyage are distinguished by their specific colour, shape and topmark including colours for:

- lateral: port and starboard marks
- cardinal marks
- safe water marks
- danger zone marks
- special zone marks
- flashing lights and patterns
- specific to the local state or territory:
  - categories of waterways determined by law and maritime authority:
    - description of waterways and limits
    - how to interpret basic limit charts issued by the local authority
    - safety equipment required for small craft within the limits, including V sheets and how these are used
    - life jackets required within the limits
  - rules specific to the operation of small watercraft:
    - give way rules – passing, crossing and overtaking powered and non-powered vessels
    - distance limitations ("distance off") – rules for swimmers, designated swimming zones, dive flags, unpowered and powered vessels stationary or underway, moored or anchored vessels, built structures (bridges, jetties, navigation markers)
    - prohibited local areas – also called "exclusion" and "no go zones"
    - alcohol and drug restrictions
    - requirements for lights after sunset
    - incident reporting requirements including those for verbal and written reports.

## Assessment Conditions

Navigation skills can be demonstrated on any type of waterway found within the particular region or locality. Inland rivers are not considered a waterway for the purposes of this unit.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- compasses
- equipment used to plot courses which can include:
  - scale measure
  - Portland square
  - parallel ruler
  - dividers

- protractors
- global positioning system (GPS) devices
- activity plans
- waterway charts
- wave, wind, tide or current charts, as relevant to the type of waterway
- navigational warning notices
- template navigation data sheets
- boating guide issued by the local state or territory maritime authority.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOFLD006 Navigate in tracked environments

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to navigate in environments which can include tracks or inland rivers according to planned routes.

The unit provides skills to navigate in environments where tracks or inland rivers, natural and constructed features are reliably marked on maps. Tracks are distinct, have signage, with route markers at intersections and where the track may become less distinct. Land based tracks could be graded according to the Australian Walking Track Grading System and might include features of grades 2 to 3.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders, guides or instructors, who use these skills when leading participants during activities where navigation skills are required.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Field Operations

### Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

#### 1. Plan for navigation.

#### 2. Navigate a basic route on land or water.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Obtain and become familiar with maps, appropriate for the activity, and features that will assist with navigation at the location.

1.2. Interpret map symbols and information to identify the predetermined route in activity plan.

1.3. Identify planned alternative routes to deal with emergencies or changed conditions.

1.4. Select a compass suitable for basic navigation requirements.

2.1. Orientate map to surroundings with and without use of a compass.

2.2. Follow the planned route using map, route markers, natural and constructed features and compass to assist.

2.3. Use techniques to estimate distance travelled.

2.4. Identify unfamiliar features in the field using map and compass to maintain route.

2.5. Make minor adjustments to route according to prevailing conditions, and navigate using map, route markers, natural and constructed features, and compass as required.

2.6. Use techniques to determine location.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

Reading skills to:

### DESCRIPTION

- interpret straightforward but potentially unfamiliar information on maps and signage
- interpret factual activity plan information in familiar formats.

Numeracy skills to:

- interpret basic numerical data from maps and signage and complete basic additions, subtractions, multiplications and divisions

- Technology skills to:
- interpret and calculate degrees, mils and angles.
  - use a range of technologies to access information about routes.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume Implementation Guides -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISOFD006 Navigate in tracked environments

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- according to predetermined routes in activity plans, navigate three different planned routes
- across the three navigation activities, collectively use these navigation techniques:
  - determining location using map, natural features, constructed objects and distance travelled, confirming grid reference
  - collecting features
  - catch points
- determine one minor adjustment to route in the field and navigate the changed route using a map and compass.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- trusted sources of maps for the region or locality
- different technologies used to access maps
- characteristics of different map types, their different uses and advantages and disadvantages:
  - paper based and digital
  - sketch maps and diagrams
  - guide book maps
  - charts
  - topographic
- information found on maps including symbols and what they represent:
  - survey or edition date
  - map legend
  - scale and distance
  - grid lines and numbers
  - cardinal points and bearings
  - contour lines, altitude and water depth
  - topographic features

- markers, beacons and buoyage
- gradient
- roads, tracks and waterways
- principal colours used on maps and what they represent
- features of a basic compass and factors which affect accuracy
- map and compass techniques used to:
  - orientate map to surroundings
  - maintain a designated course
  - identify unfamiliar features
  - make minor adjustments to routes
- the following navigation techniques at a basic level of understanding:
  - determining location using map, natural features, constructed objects and distance travelled
  - collecting features
  - catch points
- types of navigation aids found in the field and how these can assist with navigation:
  - track markers, signs and arrows
  - track and creek junctions and crossings
  - survey markers
  - cairns
  - natural features and constructed objects.

## Assessment Conditions

Navigation skills must be demonstrated in a setting where outdoor recreation activities are delivered in tracked or inland river environments. The environment must feature the following:

- tracks or inland rivers, natural and constructed features are reliably marked on maps
- any tracks utilised are distinct, have signage, with route markers at intersections and where the track becomes less distinct.

If in an alpine region, assessment can only be completed in weather conditions where no or minimal snow is present and visibility is clear.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- maps relevant to the land or river based environment

- compasses
- activity plans to include details of the planned route.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOFLD007 Navigate in difficult tracked environments

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to navigate in difficult tracked environments during any type of outdoor recreation activity.

The unit provides skills to navigate in environments where tracks, natural and constructed features marked on maps may be unreliable. Tracks are generally distinct, but may be indistinct in some places. They have signage at the track head, and have route markers but provide limited signage en route. There may be many natural obstacles and, along with changes in weather and visibility, adjustments to the planned route may be necessary. Tracks could be graded according to the Australian Walking Track Grading System and might include features of grade 4.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders, guides or instructors who use these skills when leading participants during activities where navigation skills are required.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Field Operations

### Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Plan for navigation.
2. Navigate a route in difficult tracked environments.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Obtain and become familiar with maps, appropriate for the activity, and features that will assist with navigation at the location.
- 1.2. Interpret map symbols and information to plan an efficient route according to specific activity requirements.
- 1.3. Select a compass suitable for navigation requirements.
- 1.4. Calculate grid, magnetic and true north bearings using map, compass and protractor.
- 1.5. Prepare a navigation data sheet, and identify emergency or contingency escape routes.
- 2.1. Orientate map to surroundings using landmarks and compass and identify factors that affect accuracy.
- 2.2. Follow the planned route using map, route markers, natural and constructed features and compass to assist.
- 2.3. Use a global positioning system (GPS) as a navigational aid to maintain route.
- 2.4. Use techniques to estimate distance travelled.
- 2.5. Maintain, where necessary, a compass course to bypass obstacles.
- 2.6. Identify unfamiliar features in the field using map and compass to maintain route.
- 2.7. Utilise navigation techniques to identify unfamiliar features and fix position when lost.
- 2.8. Make required adjustments to route according to prevailing conditions, and navigate using map, route markers, natural and constructed features, compass and GPS as required.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret detailed and potentially unfamiliar information on maps and track signage
  - interpret factual activity plan information in familiar formats.
- Writing skills to:
- develop detailed navigation data sheets using correct terminology and symbols.
- Numeracy skills to:
- interpret and calculate detailed numerical data involving, distances, times, altitudes, heights, depths and gradients.
  - interpret and calculate degrees, mils and angles.
- Technology skills to:
- use a range of technologies to access information about routes.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOFD007 Navigate in difficult tracked environments

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and document three efficient routes, each different, within difficult tracked environments
- navigate each of the above three planned routes
- across the three navigation activities, collectively use these techniques to determine location:
  - using map, identifying natural features, constructed objects and determining distance travelled
  - using map and compass techniques including resections/tri-bearings
  - using GPS devices
  - using grid references, estimation and Romer devices
- across the three navigation activities, collectively use these navigation techniques:
  - using linear and point references
  - using terrain features: handrailing, collecting features, catch points
  - using compass techniques: aiming off, backbearing
  - using GPS: waypoints, routes
- on two occasions, determine when there is a deviation from a planned route, adjust and resume the planned route after fixing position using:
  - manual techniques on one occasion
  - a GPS device on one occasion
- determine two adjustments to routes in the field and navigate the changed routes using:
  - manual techniques on one occasion
  - a GPS device on one occasion.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- trusted sources of maps for the region or locality
- different technologies used to access maps

- characteristics of different map types, their different uses, advantages and disadvantages, accuracy and sources of error:
  - paper based and digital
  - sketch maps and diagrams
  - guide book maps
  - charts
  - topographic
  - cadastral
- information found on maps including symbols and what they represent:
  - survey or edition date
  - map legend
  - scale and distance
  - grid lines and numbers
  - cardinal points and bearings
  - contour lines, altitude and water depth
  - topographic features
  - markers and beacons
  - gradient
  - roads, tracks and waterways
  - magnetic variation and annual change
- principal colours used on maps and what they represent
- other information and key features that can assist navigation in difficult tracked environments:
  - satellite imagery
  - aerial photographs
- features, functions and operation of global positioning systems (GPS):
  - when these might be used, advantages and disadvantages
  - reliability of signal, device and battery
  - system structure at fundamental level of understanding
  - how to identify and use datum grids
  - how to create, enter and transfer waypoints
  - how to create tracks, routes and grid references
  - accuracy and sources of errors
- these different types of compasses, their features and factors which affect accuracy:
  - baseplate/orienteering
  - sighting/mirror
  - lensatic/prismatic
- for difficult tracked environments, map and compass techniques used to:
  - calculate grid, magnetic and true north bearings
  - orientate map to surroundings

- maintain a designated course
- identify unfamiliar features
- make significant adjustments to routes
- techniques to determine location:
  - using map, identifying natural features, constructed objects and determining distance travelled
  - using map and compass techniques including resections/tri-bearings
  - using GPS devices
  - using grid references, estimation and Romer devices
- the following navigation techniques used to effectively navigate in difficult tracked environments; advantages and disadvantages:
  - using linear and point references
  - using terrain features: handrailing, collecting features, catch points
  - using compass techniques: aiming off
  - using GPS: waypoints, routes
- types of navigation aids found in the field and how these can assist with navigation:
  - track markers, signs and arrows
  - track and creek junctions and crossings
  - survey markers
  - beacons
  - cairns
  - natural features and constructed objects
- contents of navigation data sheets and their purpose:
  - grid reference points
  - grid and magnetic bearings
  - distances
  - estimated travelling times
  - height gain or loss
  - gradient
  - identifiable features
  - escape routes
- factors that affect the adjustment of routes during activities.

## Assessment Conditions

Navigation skills must be demonstrated in a setting where outdoor recreation activities are delivered in difficult tracked environments. The environment must feature the following:

- tracks, natural and constructed features are marked on maps but these could be unreliable
- tracks are generally distinct but some parts of the track are indistinct
- tracks have signage at the track head, with route markers but limited signage en route.

If in an alpine region and snow is present, assessment can only be completed if the track remains discernible.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- maps relevant to the activity type
- compasses and protractors
- global positioning system (GPS) devices
- activity plans
- template navigation data sheets.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOFLD008 Navigate in extremely difficult tracked and untracked environments**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to navigate in extremely difficult tracked and untracked environments during any type of outdoor recreation activity.

The unit provides skills to navigate in environments where natural and constructed features marked on maps may be very unreliable. Tracks are indistinct, unformed and have no modification to the natural surface. They generally have no signage or route markers at any point. Tracked and untracked areas may feature constant and unpredictable natural obstacles and, along with changes in weather and visibility, significant adjustments to the planned route would be common. Tracks could be graded according to the Australian Walking Track Grading System and might include features of grade 5.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders, guides or instructors who use these skills when leading participants during activities where navigation skills are required.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Field Operations

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Plan for navigation.
2. Navigate a route in extremely difficult tracked and untracked environments.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Obtain and become familiar with maps, appropriate for the activity, and features that will assist with navigation at the location.
- 1.2. Interpret map symbols and information to plan an efficient route according to specific activity requirements.
- 1.3. Select a compass suitable for navigation requirements.
- 1.4. Calculate grid, magnetic and true north bearings using map, compass and protractor.
- 1.5. Prepare a navigation data sheet, and identify emergency or contingency escape routes.
- 2.1. Orientate map to surroundings using landmarks and compass and identify factors that affect accuracy.
- 2.2. Follow the planned route using map, natural features and compass to assist.
- 2.3. Use global positioning systems (GPS) and altimeters as navigation aids to maintain route.
- 2.4. Use techniques to estimate distance travelled in the absence of identifying features.
- 2.5. Utilise a combination of navigation techniques to bypass large obstacles.
- 2.6. Identify unfamiliar features and hazards in difficult environmental conditions using map and compass to maintain route.
- 2.7. Utilise a combination of navigation techniques to identify unfamiliar features and fix position when lost.
- 2.8. Make required adjustments to route according to prevailing conditions, and navigate using map, natural features, compass, GPS and altimeter as required.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

# Assessment Requirements for SISOFLD008 Navigate in extremely difficult tracked and untracked environments

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and document three efficient routes, each different, within extremely difficult tracked or untracked environments
- navigate each of the above three planned routes
- across the three navigation activities, collectively use these techniques to determine location:
  - using map, identifying natural features, and determining distance travelled
  - using map and compass techniques including dead reckoning, back bearings, resections/tri-bearings
  - using GPS devices and altimeter
  - using grid references, estimation and Romer devices
- across the three navigation activities, collectively use these navigation techniques:
  - using linear and point references
  - using terrain features: handrailing, collecting features, catch points
  - using compass techniques: dead reckoning, aiming off
  - using GPS; waypoints, routes
  - using altimeters, peak height, contouring
- for at least one hour during any of the navigation activities, use compass techniques to navigate in conditions where visibility is less than ten metres because of environmental factors such as dense vegetation, whiteout or night time factors
- on two occasions, determine when there is a deviation from a planned route, adjust and resume the planned route after fixing position using:
  - manual techniques on one occasion
  - a GPS device on one occasion
- determine two adjustments to routes in the field and navigate the changed routes using:
  - manual techniques on one occasion
  - a GPS device on one occasion.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- trusted sources of maps for the region or locality
- different technologies used to access maps
- characteristics of different map types, their different uses, advantages and disadvantages, accuracy and sources of error:
  - paper based and digital
  - sketch maps and diagrams
  - guide book maps
  - charts
  - route
  - topographic
  - cadastral
- information found on maps including symbols and what they represent:
  - survey and edition date
  - map legend
  - scale and distance
  - grid lines and numbers
  - cardinal points and bearings
  - contour lines, altitude and water depth
  - topographic features
  - markers and beacons
  - gradient
  - roads, tracks and waterways
  - magnetic variation and annual change
- principal colours used on maps and what they represent
- other information and key features that can assist navigation in extremely difficult tracked environments:
  - satellite imagery
  - aerial photographs
- features, functions and operation of global positioning systems (GPS):
  - when these might be used, advantages and disadvantages
  - reliability of signal, device and battery
  - system structure at fundamental level of understanding
  - how to identify and use different datum grids
  - how to create, enter and transfer waypoints
  - how to create tracks, routes and grid references
  - accuracy and sources of errors
- features, functions and operation of altimeters:

- when these might be used, advantages and disadvantages
- accuracy and errors
- these different types of compasses, their features, operation and factors which affect accuracy:
  - baseplate/orienteering
  - sighting/mirror
  - lensatic/prismatic
- for extremely difficult tracked or untracked environments, map and compass techniques used to:
  - calculate and convert between grid, magnetic and true north bearings
  - orientate map to surroundings
  - maintain a designated course including use of dead reckoning and current correction
  - identify unfamiliar features
  - make significant adjustments to routes
- techniques to determine location in unmodified environments:
  - using map, identifying natural features, and determining distance travelled
  - using map and compass techniques including dead reckoning, back bearings, resections/tri-bearings
  - using GPS devices and altimeter
  - using grid references, estimation and Romer devices
- the following navigation techniques, advantages, disadvantages and how a combination can be used to effectively navigate in unmodified environments:
  - using linear and point references
  - using terrain features: handrailing, collecting features, catch points
  - using compass techniques: dead reckoning, aiming off
  - using GPS; waypoints, routes
  - using altimeters, peak height, contouring
  - using celestial bodies to fix position
- how extreme conditions affect navigation and choice of methods used including dead reckoning and leapfrogging
- types of navigation aids found in unmodified environments and how these can assist with navigation in the absence of signage and route markers:
  - creek junctions and crossings
  - beacons
  - cairns
  - landforms and natural features of the landscape
- contents of navigation data sheets and their purpose:
  - grid reference points
  - grid and magnetic bearings
  - distances
  - estimated travelling times

- height gain or loss
- gradient
- identifiable features
- escape routes
- factors that affect the adjustment of routes during activities.

## Assessment Conditions

Navigation skills must be demonstrated in a setting where outdoor recreation activities are delivered in extremely difficult tracked or untracked environments. The environment must feature the following:

- natural and constructed features are unreliably marked on maps
- tracks are indistinct, unformed and have no modification to the natural surface
- tracks have no signage or route markers at any point.

For activities involving navigation in poor visibility, the environment can feature any relevant factor such as dense vegetation, whiteout and night time conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- maps relevant to the activity type
- compasses and protractors
- global positioning system (GPS) devices
- altimeters
- activity plans
- template navigation data sheets.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOFSH001 Locate, attract and catch fish**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to locate, attract and catch fish using methods suited to targeted species. Recreational fishing activities are diverse and this unit is relevant to any type of fishing completed in any region or locality within different types of waters.

It applies to leaders, guides or instructors, who use these skills when leading participants during fishing activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

Recreational fishing is regulated by specific laws in each Australian state and territory with variable rules. All training and assessment activities must comply with the local, state or territory and international requirements.

No occupational licensing or certification requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Fishing

### **Unit Sector**

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

#### 1. Prepare to fish.

#### 2. Locate fish.

#### 3. Attract and approach fish.

#### 4. Catch and land fish.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Determine target recreational species, identify their local habitat and select fishing locations suited to species.

1.2. Determine appropriate fishing technique for target species.

1.3. Select appropriate fishing rig, equipment and terminal tackle for target species and check working order.

1.4. Select appropriate bait, lure or fly according to feeding preference of target species.

1.5. Determine need for berley and select mix, as required.

1.6. Assemble and balance fishing rig to suit target species, habitat and the fishing environment.

1.7. Select clothing, footwear and personal protective equipment suitable for conditions; fit and adjust for comfort and safety.

1.8. Confirm activity safety and emergency response procedures to ensure compliance during activities.

2.1. Read the water and hydrological features indicating fish habitat, identify signs of feeding activity and other indicators to determine likely location of fish.

2.2. Identify fishing spots by use of visual marks.

2.3. Use locator aids according to type of fishing and targeted species to assist with location of fishing spots.

2.4. Record visual sightings and other data for future use in relocating fishing spots.

3.1. Attract target fish using methods that utilise fish sight, tactile, taste and olfactory senses.

3.2. Approach fish without alerting them.

3.3. Disperse berley, as required, at appropriate intervals using methods suitable for attracting target species.

3.4. Rig and present bait alive, dead, whole or in pieces to attract and catch fish, according to feeding preference of target species.

3.5. Rig and present lure or fly to attract and catch target species.

4.1. Deploy fishing rig using appropriate technique to present bait, lure or fly to target species.

4.2. Survey area for people present before casting to avoid

injury.

4.3. Hold rod and reel securely and use casting technique suited to type of outfit to achieve accuracy and distance.

4.4. Identify own casting errors and adjust technique.

4.5. Monitor and evaluate performance of fishing rig, bait, lure or fly, and make adjustments to optimise outcomes.

4.6. Manage rig using species specific techniques; respond to bites and retrieve and land fish.

4.7. Comply with permissions, recreational fishing and other regulations and codes of practice applicable to location.

## 5. Handle fish.

5.1. Identify dangerous species of fish and handle to minimise risk to self and others.

5.2. De-hook fish humanely using techniques appropriate to species.

5.3. Handle and return undersized and unwanted fish to water humanely.

5.4. Despatch retained fish humanely and use methods to keep catch in optimum condition.

5.5. Handle and store live catch humanely and maintain in appropriate environmental conditions.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret detailed and familiar organisational safety and emergency response procedures
- interpret unfamiliar and potentially complex regulatory information within plain English guides

Writing skills to:

- record basic factual data about fish sightings and locations.

Numeracy skills to:

- measure length and weights of fish.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume Implementation Guides -

<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISOFSH001 Locate, attract and catch fish

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- for the particular region or locality in which recreational fishing activities are delivered:
  - source, collect and present information in a portfolio or verbal report covering six different species of fish found in the region
  - for each of the six species, include information on:
    - basic anatomical features and linkages to preferred habitat, location and behaviour of fish
    - environmental factors that affect preferred habitat and location of fish
    - breeding patterns, spawning cycles and effects on fish behaviour, migration and location
    - migration patterns and during which seasons the species would be found in the local region
    - predator and prey relationships and how they affect fish activity and location
    - food sources and feeding habits
    - preferred bait for catching the species
    - types of lure or fly, where applicable, suited to the species
    - different mixes of berley, as appropriate, for attracting the species, equipment and methods used to disperse
- complete four recreational fishing sessions each in a different location:
  - use a rod reel for at least two of those activities and cast using two different techniques
  - use any other chosen method of fishing for the remaining two sessions
- during each session consistently:
  - follow safety procedures
  - comply with local regulations for recreational fishing activities
  - utilise effective techniques suited to the target species, equipment and location to:
    - locate and attract fish
    - manage the rig, respond to bites and retrieve and land fish
    - humanely de-hook the catch
    - handle and release unwanted fish to the water without damage
    - humanely despatch fish.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for fishing activities
- specific to the local Australian state or territory, or international waters, and particular locality, how to source and interpret regulations and permission requirements for recreational fishing:
  - licensing and fee requirements
  - bag and size limits, and how to measure these
  - areas closed to fishing
  - protected fish
  - prohibited fishing methods
  - permissions required from Indigenous communities
  - personal protective equipment requirements
- the key contents of recreational fishing codes of practice, issued by industry associations, land management or other authorities
- clothing and footwear suitable for fishing activities:
  - types of clothing and fabrics that protect against the effects of weather including sun, temperatures, winds and precipitation of different levels
  - reasons for layering clothes
  - effective design and construction features of waterproof gear, including fishing waders
  - types of footwear for fishing including specialist aqua shoes and booties and their advantages over other types of footwear
  - features and uses of specialist fishing gloves and mittens, and advantages and disadvantages
  - polarised sunglasses
- features and functions of life jackets suitable for fishing activities in different types of waters and how to fit and adjust these for comfort and safety
- for different species of fish found in saltwater, freshwater or brackish habitats within the particular region or locality in which recreational fishing activities are delivered:
  - basic anatomical features and how these are linked to preferred habitat, location and behaviour of fish:
    - size and body shape
    - colouration
    - size and position of eyes
    - position, size and shape of mouth
    - teeth
    - fins, spines and venomous parts
  - dangerous fish species, their defining features and methods for safe handling
  - how environmental factors affect preferred habitat, feeding behaviour and location of fish:

- temperature
- weather conditions
- oxygen
- structure, cover and vegetation
- pH
- air and water pressure
- water depth
- water clarity
- currents, waves, and wash
- tides and moon phases
- time of day and light levels
- algal blooms
- breeding patterns, spawning cycles and effects on fish behaviour, migration and location
- migration patterns and during which seasons the species would be found in the local region
- predator and prey relationships and how they affect fish activity and location
- food sources and feeding habits
- preferred bait for catching the species
- design features of lures and flies and types suited to the species
- when berley would be used and when it is inappropriate
- different mixes of berley, equipment and methods used to disperse
- basic biosecurity measures for using bait to limit the spread of pests and diseases
- for the particular region or locality in which recreational fishing activities are delivered, fishing locations and best times to target fish species to include optimum:
  - season
  - tide
  - time of day - evening, dawn etc.
  - stage of lunar, breeding and migration cycle
- signs within rivers, lakes and ocean waters that indicate the location of fish:
  - hydrological features that indicate fish habitat
  - fish feeding activity
  - insect and bird activity
  - surface activity
- principles of reading the water for fish location – cover, food and margins
- aids used to locate fish and how these are used:
  - charts, maps, charts, satellite imagery
  - binoculars and polarised glasses
  - sonar (depth fish finders)
  - global positioning systems

- radar
- underwater cameras and microphones
- thermometers
- fish aggregating devices
- visual markers
- how sight, tactile, taste and olfactory senses of fish can be used to attract fish:
  - how fish use sound, light, vision and smell to locate food
  - extent of vision and what attracts fish visually
  - ability of fish to distinguish taste and touch
- hand line and fishing rod designs and features suitable for the type of fishing and target species
- for both handlining and line fishing with a rod and reel:
  - deployment techniques to present bait, lures and flies to the target species in the most advantageous manner
  - techniques used to manage rig to minimise snagging and knots
  - how to identify bites and set the hook
  - catch retrieval techniques which minimise stress to the fish and damage to the rig
  - equipment and techniques used to land and humanely de-hook the catch, appropriate to the species of fish
- different casting techniques relevant to type of fishing and tackle outfit:
  - handline casts
  - closed faced
  - threadline
  - overhead
  - side cast
  - centre pin
  - fly – roll cast
  - fly – pickup laydown cast
  - fly – forward shooting cast
- a range of common casting faults and errors and suitable fixes for each
- techniques used to handle and release unwanted fish to the water without damage
- methods for safely handling and de-hooking non-dangerous species
- techniques used to humanely despatch fish quickly and decisively
- methods used to:
  - handle and store live catch humanely
  - store live and despatched catch in optimum condition, including appropriate environmental conditions.

## Assessment Conditions

Fishing skills can be demonstrated in any type of water found within the particular region or locality including saltwater, freshwater and brackish fish habitats.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets, as required for the location
- rods, reels and line
- terminal tackle to suit the location, target species and type of fishing, and as permitted by regulations for the location
- fishing knives
- bait, lures and flies, as relevant to fishing style utilised
- recreational fishing guides describing regulations for the locality
- recreational fishing codes of practice, issued by industry associations, land management or other authorities
- organisational safety and emergency response procedures for fishing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a fishing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOFSH002 Select and catch bait**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to select, catch and collect bait suited to the target species of fish to be caught. It also requires the ability to select appropriate berley for attracting those fish and to maintain live and dead bait for effective future use.

It applies to leaders, guides or instructors, who use these skills when leading participants during fishing activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

Recreational fishing is regulated by specific laws in each Australian state and territory with variable rules. All training and assessment activities must comply with the local, state or territory and international requirements.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Fishing

### **Unit Sector**

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

#### 1. Select bait and berley.

#### 2. Catch and maintain bait.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Determine target recreational fish species, identify feeding habits and preferred bait and or berley.

1.2. Evaluate effectiveness of using frozen and fresh bait to catch target species.

1.3. Select appropriate bait and or berley according to feeding preference of target species.

1.4. Determine when manufactured baits are effective and permitted, and select as appropriate.

2.1. Follow organisational safety procedures throughout all activities.

2.2. Select appropriate method for catching and collecting target bait species.

2.3. Select and set up appropriate equipment for targeted bait species and check working order.

2.4. Use bait collecting method and equipment effectively to maximise catch.

2.5. Comply with permissions, and bait catching regulations applicable to the location.

2.6. Determine optimum level of freshness of bait for catching target species.

2.7. Keep fresh bait alive in suitable conditions to enhance its effectiveness

2.8. Maintain dead bait in suitable conditions for future use.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

Reading skills to:

### DESCRIPTION

- interpret detailed and familiar organisational safety procedures for fishing activities.

Planning and organising skills to:

- determine the targeted species of fish to be caught and match selection of bait to plan for the selection of equipment and

methods to catch bait.

## **Unit Mapping Information**

No equivalent unit.

# Assessment Requirements for SISOFSH002 Select and catch bait

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- for the particular region or locality in which recreational fishing activities are delivered:
  - source, collect and present information in a portfolio or verbal report covering four different species of fish found in the region
  - for each of the four species, include information on:
    - food sources and feeding habits
    - preferred bait for catching the species
    - when berley would be used and when it is inappropriate
    - contents and different mixes of berley that are appropriate for attracting the species
- complete three sessions to catch or collect bait suited to one or more chosen target species of fish to be caught, and collectively use three of the following methods to catch or collect that bait, as permitted by regulations for the locality:
  - use of nets
  - use of handlines
  - use of rods, reels and line
  - use of traps
  - use of pumps
  - use of hand gathering techniques
- utilise three of the following methods to maintain fresh bait for future use
  - use of ice water
  - placing of insects in a stocking
  - using live bait tanks
  - using keep nets
  - using wet bags, cloth and sand
  - using aerators and or supplying fresh water to fish stored in tubs or pools.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety procedures for fishing activities

- specific to the local Australian state or territory, or international waters, and particular locality, how to source and interpret regulations and permission requirements for recreational fishing:
  - areas closed to fishing and bait collection
  - types of baits that are permissible and prohibited
  - protected species that might otherwise be used as bait
  - prohibited bait catching methods
  - permissions required from Indigenous communities
- how the use of inappropriate bait can impact on the environment and health of fish and population
- types of inappropriate bait and basic biosecurity measures to limit the spread of pests and diseases
- for different species of fish found in in saltwater, freshwater or brackish habitats within the particular region or locality in which recreational fishing activities are delivered:
  - food sources and feeding habits
  - preferred bait for catching the species
  - when berley would be used and when it is inappropriate
  - contents and different mixes of berley for attracting the species:
    - plant and marine life from the area
    - fish offal
    - fish oils
    - animal offal
    - grain
- general types of bait used to catch fish, their habitats, advantages and disadvantages of use and how the species of targeted fish will affect choice:
  - shellfish including prawns and pipis
  - fish of different sizes including pilchards and whitebait
  - squid
  - octopus
  - cunjevoi
  - yabbies
  - worms
  - maggots
  - mud eyes
  - crickets
  - grasshoppers
  - green weed
  - seaweed
- types of manufactured bait, general contents and permissible use
- permitted methods, features and operation of permitted equipment used to catch or collect different types of bait:

- nets
- digging
- dredging
- line fishing
- trapping
- trawling
- worm pumps
- yabby nets
- yabby pumps
- hand gathering
- effectiveness, advantages and disadvantages of using:
  - fresh bait
  - frozen bait
  - manufactured bait
- methods, features and operation of equipment used to keep bait alive and how long live bait can be maintained for effective use:
- methods used to maintain dead or excess bait and how long dead bait can be maintained for effective use:
  - freezing and refrigeration
  - salting, freeze drying, dehydration and alcohol preservation.

## Assessment Conditions

Bait catching skills can be demonstrated in any land or water environment found within the particular region or locality.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- equipment used to catch or collect different types of bait which complies with local regulations for use
- equipment used to keep bait alive and frozen
- organisational safety procedures for fishing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a fishing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOFSH003 Select and rig tackle outfits

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to select, rig and balance fishing tackle outfits that are suited to the type of recreational fishing, location, habitat and target fish species.

Recreational fishing activities are diverse and this unit is relevant to any type of fishing completed in any region or locality within different types of waters.

It applies to leaders, guides or instructors, who use these skills when leading participants during fishing activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

Recreational fishing is regulated by specific laws in each Australian state and territory with variable rules. All training and assessment activities must comply with the local, state or territory and international requirements.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Fishing

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |                                   |  |
|-----------------------------------|--|
| 1. Select tackle outfit.          | 1.1. Select rod suitable to type of fishing, location, habitat and target fish species.<br>1.2. Select reel according to the rod, line and type of fishing.<br>1.3. Select class of line according to the rod, reel and type of fishing.<br>1.4. Check regulations applicable to the location for restrictions on tackle outfits.  |
| 2. Select and rig terminal tackle | 2.1. Select terminal tackle according to type of fishing, location, habitat and target fish species.<br>2.2. Select the size and style of hook according to target fish species.<br>2.3. Select sinkers of a size appropriate to type of fishing and currents in waters to be fished.<br>2.4. Select and prepare trace or leader, and swivels, as required.<br>2.5. Prepare and rig all terminal tackle using methods and equipment to suit tackle characteristics.<br>2.6. Tie knots according to selected terminal tackle and mode of fishing.<br>2.7. Select other fishing accessories to maximise catch. |
| 3. Balance outfit.                | 3.1. Match rod, reel and terminal tackle to optimise balance.<br>3.2. Match line class to rod and reel accounting for line application requirements and breaking strain.<br>3.3. Balance rod to reel, and balance line and terminal tackle.  |

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret detailed and familiar organisational safety procedures for fishing activities.
- Numeracy skills to:
- determine the size of hooks and weight of terminal tackle components through visual and tactile estimations.
- Problem-solving skills to:
- make ongoing adjustments to the balance of fishing tackle rigs until final balance is achieved.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SISOFSH003 Select and rig tackle outfits

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- for a particular type of fishing and for three different types of target fish species:
  - select the following according to the type of fishing, location, habitat and target fish species:
    - rod
    - reel
    - line
    - terminal tackle
  - rig and balance three fishing tackle outfits
- during all rigging activities, consistently follow safety procedures.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety procedures for rigging fishing tackle outfits
- specific to the local Australian state or territory, or international waters, and particular locality, how to source and interpret regulations for recreational fishing:
  - prohibited and permitted fishing methods
  - prohibited and permitted tackle outfits and terminal tackle
- how the type of fishing and target species affects selection of:
  - rods
  - reels
  - line
  - terminal tackle
- for different types of fishing and typical species of associated fish, suitable types of:
  - rods and reels
  - lines of different classes and breaking strain
  - terminal tackle:
    - hooks, including barbless hooks

- swivels
- snaps
- sinkers and other weights
- traces
- leaders, for fly fishing
- flies
- lures
- the relationship of sinker size, shape and weight to water or vessel movement
- methods used to:
  - prepare trace
  - rig different types of terminal tackle
- different types of knots and when these are used to rig fishing tackle outfits:
  - terminal knots
  - line to line knots
  - specialty knots
- the importance and benefits of matching rod, reel and terminal tackle to the balance of the whole rig
- methods used to:
  - balance rod to reel
  - balance line and terminal tackle
- features and functions of fishing accessories used to maximise catch:
  - cyalume sticks
  - floats
  - berley cages
  - corks
  - bait scents
  - fluorescent additives.

## Assessment Conditions

Skills can be demonstrated in any environment, including in the field, where fishing tackle is selected, rigged and balanced.

First aid equipment must be available to replicate industry conditions of operation.

Assessment must ensure use of:

- rods, reels and line
- terminal tackle to suit the location, target species and type of fishing, and as permitted by regulations for the location
- tools used to rig terminal tackle

- organisational safety procedures for rigging fishing tackle outfits

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a fishing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOFSH004 Lead fishing activities

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during fishing activities according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct fishing techniques. To do this, leaders must be proficient in fishing skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Fishing

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |   |
|---|---|
| 1. Prepare equipment and participants.                    | 1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.<br>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.<br>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.<br>1.4. Check participants' own equipment, if provided, and confirm safe working condition.<br>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.   |
| 2. Brief participants and demonstrate fishing techniques. | 2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.<br>2.2. Encourage participants to ask questions and seek advice before and during session.<br>2.3. Inform participants of fishing regulations, known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.<br>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.<br>2.5. Demonstrate and explain correct techniques appropriate for the activity.<br>2.6. Demonstrate and explain how to safely carry, handle and stow fishing rods, hooks, knives and other potentially hazardous items of equipment.<br>2.7. Check and confirm participant ability to use and control equipment before activity commencement.<br>2.8. Check matching of equipment and activities to participants and amend as required. |
| 3. Lead and supervise fishing activities.                 | 3.1. Implement recreational instruction techniques to impart skills and knowledge for the activity.   |

- 3.2. Provide clear and accurate instructions and or demonstrations throughout the session.
  - 3.3. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.4. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.5. Implement required modifications to activity or location to improve catch, to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during fishing activities.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret detailed familiar organisational policies and

- procedures.
- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOFSH004 Lead fishing activities

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three fishing sessions for a group of participants according to predetermined activity plans
- across the three sessions:
  - collectively use two different demonstration and instruction techniques
  - identify three casting faults made by participants and advise on suitable fixes, as relevant to the tackle outfit being used
- during each session consistently manage participant adherence to safety procedures and fishing regulations
- after each session, facilitate a debrief with participants
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for fishing activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants

- key principles of group dynamics and techniques used to manage positive group dynamics
- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to fishing activities:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - activity and locality specific regulatory requirements.

## Assessment Conditions

Skills can be demonstrated in any type of water found within the particular region or locality including saltwater, freshwater and brackish fish habitats. Casting demonstrations and bait collection activities can be land based.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- Australian Standard, or equivalent, compliant lifejackets, as required for the location
- rods, reels and line
- terminal tackle to suit the location, target species and type of fishing, and as permitted by regulations for the location
- activity plans
- template:

- safety checklists
- participant informed consents
- equipment fault reports
- incident reports
- organisational safety, emergency response and first aid procedures for fishing activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a fishing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOKYK001 Paddle a kayak on inland flatwater

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to paddle a kayak as part of a group on inland flatwater areas such as lakes, dams and slow moving rivers and according to planned courses. It requires the ability to self-rescue from a capsize and to rescue others in deep water.

The unit provides skills to paddle on bodies of water in less than moderate wind conditions, where the current flow is consistently recorded as less than one knot.

It applies to leaders, guides or instructors, who use these skills when leading participants during kayaking activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Kayaking

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |   |
|--|---|
| 1. Prepare for the paddle.                   | <ul style="list-style-type: none"> <li>1.1. Select clothing, footwear, personal protective and other equipment suitable for the paddle and conditions, and check for safe working condition.</li> <li>1.2. Carry, prepare craft and complete safety and serviceability checks.</li> <li>1.3. Waterproof, pack and stow clothing, personal resources, and food according to access requirements during paddle.</li> <li>1.4. Interpret planned course from activity plans and maps to assist in following the course.</li> <li>1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.</li> <li>1.6. Confirm protocols for communications between paddlers.</li> <li>1.7. Fit and adjust personal protective equipment to ensure comfort and safety.</li> </ul>                         |
| 2. Paddle and manoeuvre kayaks on flatwater. | <ul style="list-style-type: none"> <li>2.1. Embark and launch kayak from bank, shore or jetty while maintaining stability.</li> <li>2.2. Control direction of kayak forward, in reverse and sideways using a range of appropriate strokes and edges.</li> <li>2.3. Maintain appropriate posture, use of trunk rotation, paddle and blade to efficiently paddle the kayak.</li> <li>2.4. Establish and maintain an appropriate paddling rhythm and pace to minimise fatigue, strain and injury.</li> <li>2.5. Safely approach, and negotiate obstacles and hazards to minimise risk of injury.</li> <li>2.6. Maintain visual contact and effective communication with party members throughout all activities.</li> <li>2.7. Monitor party formation, paddling pace and space between kayaks and make required adjustments.</li> </ul> |
| 3. Rescue self following a capsize.          | <ul style="list-style-type: none"> <li>3.1. Exit the kayak in a controlled manner, following a capsize, and recover paddle.</li> <li>3.2. Manoeuvre the paddle and upturned kayak to shore or to rescue craft and empty out water.</li> <li>3.3. Use techniques when in deep water to empty water and re-enter kayak.</li> </ul>  |
| 4. Perform deep water rescues in flatwater   | <ul style="list-style-type: none"> <li>4.1. Identify immediate hazards, assess risks and negotiate to avoid injury to self and others.</li> </ul>   |

- conditions.
- 4.2. Select and use other leaders or party members, equipment and rescue techniques appropriate to situation.
  - 4.3. Manoeuvre rescue craft to capsized party member, forming a raft-up as required.
  - 4.4. Provide clear and concise instructions to person being rescued and others assisting.
  - 4.5. Assist rescuee to return to their craft using rescue technique appropriate to situation.
  - 4.6. Assess ability of rescuee to continue and tow to nearest safe landing, as required.
5. Land and secure kayaks.
    - 5.1. Land and disembark kayak at bank, shore or jetty while maintaining stability.
    - 5.2. Secure kayak to bank, shore or jetty using appropriate knots.
    - 5.3. Secure kayak for road transport using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed and familiar organisational safety and emergency response procedures</li> <li>• interpret straightforward but potentially unfamiliar information on maps</li> <li>• interpret factual activity plan information in familiar formats.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>• use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and calculate numerical data involving distances, times and speed of currents.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>• pro-actively and cooperatively work within teams of operational personnel to solve arising problems and effect efficient rescues.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• manage own timing to complete activities within planned timeframes.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>• critically analyse all circumstances and implications to provide a prompt and considered response to rescue requirements.</li> </ul>

## Unit Mapping Information

# Assessment Requirements for SISOKYK001 Paddle a kayak on inland flatwater

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group kayak trips
- complete at least one solo paddle for one of the above trips
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - consistently control direction of kayaks forward, in reverse and sideways using edging and this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - bow draw strokes - feathered and sculling
    - stern rudder
    - emergency stop
- participate in simulations to:
  - complete two self-rescues following a capsize, swimming self and craft a maximum distance of 50 metres to shore
  - complete three deep water rescues to assist a single capsized paddler, using at least two techniques appropriate to the type of kayak craft in use
  - provide one contact tow
  - provide one tow using a towline with a quick release system.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for kayaking activities
- suitable clothing and footwear for kayaking activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear and exposure suits

- types of footwear suitable for kayaking including specialist sandals, river or paddling shoes and their advantages over other types of footwear
- features and uses of gloves and mittens and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for flatwater conditions and how to fit and adjust these for comfort and safety
- types of single and double kayaks suitable for use in flatwater conditions and:
  - location and function of different parts of the kayak
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- types of paddles suitable for use with kayaks used in flatwater conditions, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry kayaks
- equipment features and techniques used to secure kayaks for transportation
- communication protocols for group kayaking activities to include:
  - calls
  - hand and paddle signals
  - whistles
- hydrological features of flatwater areas such as lakes, dams and slow moving rivers sufficient to understand the impacts on kayaking activities
- typical hazards associated with paddling and swimming in flatwater conditions, and techniques used to safely negotiate these:
  - currents
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation
  - sections of dark, deep or cold water
  - other boating traffic
  - exposure to lightning, storms and strong winds
  - prolonged emersion in cold water
- techniques used on flatwater to:
  - embark, launch, land and disembark kayaks from bank, shore or jetty
  - secure kayaks to bank, shore or jetty
- a range of strokes used in flatwater conditions to direct kayaks forward, in reverse and sideways:

- forward and reverse paddle
- forward and reverse sweeps
- bow draw strokes - feathered and sculling
- stern rudder
- emergency stop
- for each of the above strokes:
  - how to use them when solo paddling and when paddling as a double
  - correct posture and trunk rotation
  - correct hand placement on paddle
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- for self rescues:
  - methods used to extricate self from inverted kayaks
  - methods used to control and manoeuvre the paddle and kayak to shore
  - appropriate swimming strokes and techniques to use while in paddling gear in flatwater conditions
  - how to empty water from kayaks, and equipment used to assist
  - techniques used to re-establish upright kayak and re-enter in deep water
- for deep water rescues, the specific application of the following to flatwater conditions and kayaks:
  - features, functions and operation of equipment used for rescues, advantages and disadvantages
  - roles and responsibilities that can be allocated to team members and participants to effectively complete a rescue
  - raft up techniques
  - rescue techniques specific to sit in kayaks
  - rescue techniques specific to sit on top kayaks
  - techniques for contact tows and those using a towline with a quick release system
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots
  - quick release knots.

## Assessment Conditions

Skills must be demonstrated on inland flatwater areas which can be lakes, dams or slow moving rivers. The environment must feature the following:

- less than moderate wind conditions
- current flow is consistently documented as less than 1 knot.

An area for assessment should not be classified as flatwater if any of the following conditions are present:

- rapids of any grade
- surf of any size
- fetch greater than 1 nautical mile
- area is in the entrance to an estuary or embayment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during kayaking activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets as required
- pea-less whistles not affected by water
- kayaks which can include:
  - single or double sit in kayaks
  - single or double sit on top kayaks
- kayak paddles
- ropes and tie down straps
- rescue equipment:
  - towlines
  - knives
- activity plans to include details of planned route
- template safety checklists
- organisational safety and emergency response procedures for kayaking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# **SISOKYK002 Paddle a kayak on moving water up to grade 1 rivers**

## **Modification History**

Not applicable.

## **Application**

This unit describes the performance outcomes, skills and knowledge required to paddle a kayak on a planned course as part of a group on waterways that feature slow moving water conditions. It covers the skills to paddle on rivers, up to grade 1, and on large open bodies of water such as lakes and dams. It requires the ability to self-rescue from a capsize and to rescue others in deep water.

For rivers, grade 1 refers to the International River Grading System which provides a broad indication of a river's rapid features, and the degree of difficulty in negotiating these. These rivers have long stretches of slow moving water that could feature regular small waves and or riffles, relatively few obstacles and an easy passage to find and follow. Large bodies of water also feature slow moving water conditions.

It applies to leaders, guides or instructors, who use these skills when leading participants during kayaking activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Assessment Requirements for SISOKYK002 Paddle a kayak on moving water up to grade 1 rivers

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group kayak trips
- complete at least one solo paddle for one of the above trips
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - consistently control direction of kayaks forward, in reverse and sideways using edging and this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - bow draw strokes - feathered and sculling
    - stern rudder
    - emergency stop
  - if utilising a sit in kayak, execute two controlled rolls
- participate in simulations to:
  - complete two self-rescues following a capsize, swimming self and craft a maximum distance of 50 metres to shore
  - complete three deep water rescues to assist a single capsized paddler, using at least two techniques appropriate to the type of kayak in use
  - provide one contact tow
  - provide one tow using a towline with a quick release system.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for kayaking activities
- suitable clothing and footwear for kayaking activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes

- effective design and construction features of waterproof gear and exposure suits
- types of footwear suitable for kayaking including specialist sandals, river or paddling shoes and their advantages over other types of footwear
- features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for slow moving river conditions and how to fit and adjust these for comfort and safety
- types of single and double kayaks suitable for use in slow moving river conditions and:
  - location and function of different parts of the kayak
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- types of paddles suitable for use with kayaks used in slow moving river conditions, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry kayaks
- equipment features and techniques used to secure kayaks for transportation
- communication protocols for group kayaking activities to include:
  - calls
  - hand and paddle signals
  - whistles
- the International River Grading system:
  - strengths and limitations of the grading system; what is covered and not covered in classifications
  - specifications for grade 1 rivers
  - examples of local rivers attributed as slow moving and any that are grade 1
- hydrological features of slow moving water sufficient to understand the impacts on kayaking activities
- typical hazards associated with paddling and swimming in slow moving river conditions, and techniques used to safely negotiate these:
  - currents
  - eddies
  - strainers
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation

- sections of dark, deep or cold water
- other boating traffic
- exposure to lightning, storms and strong winds
- prolonged emersion in cold water
- techniques used on slow moving water to:
  - embark, launch, land and disembark kayaks from bank or jetty
  - secure kayaks to bank or jetty
- a range of strokes used in slow moving river conditions to direct kayaks forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps
  - bow draw strokes - feathered and sculling
  - stern rudder
  - emergency stop
- for each of the above strokes:
  - how to use them when solo paddling and when padding as a double
  - correct posture and trunk rotation
  - correct hand placement on paddle
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- for self rescues:
  - roll techniques suitable for use with sit in kayaks in slow moving water:
  - methods used to extricate self from inverted kayaks
  - methods used to control and manoeuvre the paddle and kayak to shore
  - appropriate swimming strokes and techniques to use while in paddling gear in slow moving river conditions
  - how to empty water from kayaks, and equipment used to assist
  - techniques used to re-establish upright kayak and re-enter in deep water
- for deep water rescues, the specific application of the following to slow moving river conditions and kayaks:
  - features, functions and operation of equipment used for rescues, advantages and disadvantages
  - roles and responsibilities that can be allocated to team members and participants to effectively complete a rescue
  - raft up techniques
  - rescue techniques specific to sit in kayaks
  - rescue techniques specific to sit on top kayaks
  - techniques for contact tows and those using a towline with a quick release system
- when different knots are used, advantages and disadvantages, and how to tie them:

- knots for tying on
- rope joining knots
- quick release knots.

## Assessment Conditions

Skills must be demonstrated in slow moving water conditions in light to moderate wind conditions. Waters can include:

- large bodies of open water such as lakes or dams with slow moving water
- an estuary or embayment with slow moving water
- slow moving water, including grade 1 rivers, which would feature:
  - long stretches of slow moving water
  - relatively few obstacles and no major ones
  - an easy passage to find and follow
  - in grade 1 rivers, regular small waves and or riffles.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during kayaking activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets as required
- pea-less whistles not affected by water
- kayaks which can include:
  - single or double sit in kayaks
  - single or double sit on top kayaks
- kayak paddles
- ropes and tie down straps
- rescue equipment:
  - towlines
  - knives
- activity plans to include details of planned route
- template safety checklists
- information about the International River Grading System
- organisational safety and emergency response procedures for kayaking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOKYK003 Paddle a kayak on grade 2 rivers

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to paddle a kayak as part of a group on inland rivers with grade 2 rapids, and according to planned and scouted courses. It requires the ability to self-rescue from a capsized and to rescue others in deep water.

Grade 2 refers to the International River Grading System which provides a broad indication of a river's rapid features, and the degree of difficulty in negotiating these. This unit provides skills to paddle on rivers with fairly frequent but straightforward rapids with regular medium sized waves, less than one metre, low ledges or drops, easy eddies and gradual bends. These rivers have small obstacles that require manoeuvring around with a good command of paddling strokes. Passages through rapids are generally straightforward and can be seen from the water, although some scouting may be required.

It applies to leaders, guides or instructors, who use these skills when leading participants during kayaking activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Kayaking

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |  |
|--|--|
| <p>1. Prepare for the paddle.</p>                        | <p>1.1. Select clothing, footwear, personal protective and other equipment suitable for the paddle and conditions, and check for safe working condition.</p> <p>1.2. Carry, prepare craft and complete safety and serviceability checks.</p> <p>1.3. Waterproof, pack and stow clothing, personal resources, and food according to access requirements during paddle.</p> <p>1.4. Interpret planned course from activity plans and maps to assist in following the course.</p> <p>1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.</p> <p>1.6. Confirm protocols for communications between paddlers.</p> <p>1.7. Fit and adjust personal protective equipment to ensure comfort and safety.</p>   |
| <p>2. Paddle and manoeuvre kayaks on grade 2 rivers.</p> | <p>2.1. Select suitable location, embark and launch kayak using technique suitable to situation to maintain stability.</p> <p>2.2. Identify hydrological features from the water and utilise favourably to control and manoeuvre kayak.</p> <p>2.3. Control direction of kayak forward, in reverse and sideways using a range of appropriate strokes, leans, edges and combinations.</p> <p>2.4. Maintain appropriate posture, use of trunk rotation, paddle and blade to efficiently paddle the kayak.</p> <p>2.5. Utilise appropriate padding strokes and techniques to cross currents and break into and out of eddies.</p> <p>2.6. Avoid or negotiate obstacles and hazards using a combination of strokes and paddling techniques.</p> <p>2.7. Support kayak using the paddle to prevent capsizes.</p> <p>2.8. Maintain visual contact and effective communication with party members throughout all activities.</p> <p>2.9. Monitor party formation, paddling pace and space between kayaks and make required adjustments.</p> |

3. Plan and run routes through rapids.
  - 3.1. Scout rapids from the water and shore to identify hydrological features, hazards and impediments.
  - 3.2. Assess features and hazards to determine a safe route through rapids.
  - 3.3. Plan route through rapids accounting for party member numbers, abilities and management during run.
  - 3.4. Identify reference points to guide chosen passage through rapids.
  - 3.5. Run predetermined route using avoidance techniques to safely negotiate river hazards.
  - 3.6. Use efficient paddling techniques and strokes and utilise hydrological features to assist in turning and crossing currents.
4. Rescue self following a capsize.
  - 4.1. Execute a roll using techniques appropriate for situation to avoid a wet exit and re-establish paddling position promptly.
  - 4.2. Exit the kayak in a controlled manner when unable to roll following a capsize, and recover paddle.
  - 4.3. Maintain appropriate body position in water to minimise entrapment and injury.
  - 4.4. Manoeuvre the paddle and upturned kayak to shore or to rescue craft.
  - 4.5. Drain water from craft in safe shallow river position or on shore and re-enter craft on shore or in an eddy.
  - 4.6. Use techniques when in deep water to empty water and re-enter kayak.
5. Perform deep water rescues in grade 2 rivers
  - 5.1. Identify immediate hazards, assess risks and negotiate to avoid injury to self and others.
  - 5.2. Select and use other leaders or party members, equipment and rescue techniques appropriate to situation.
  - 5.3. Manoeuvre rescue craft to capsized party member, forming a raft-up as required.
  - 5.4. Provide clear and concise instructions to person being rescued and others assisting.
  - 5.5. Assist rescuee to return to their craft using rescue technique appropriate to situation.
  - 5.6. Assess ability of rescuee to continue and tow to nearest safe landing, as required.
6. Land and secure kayaks.
  - 6.1. Select a suitable location to exit the river, and to allow for any subsequent re-entries.
  - 6.2. Land and disembark kayak using techniques suitable for river conditions to maintain stability.
  - 6.3. Select a secure bank feature and secure kayak using

appropriate knots.

6.4. Secure kayak for road transport, on activity conclusion, using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret detailed and familiar organisational safety and emergency response procedures</li> <li>interpret straightforward but potentially unfamiliar information on maps</li> <li>interpret factual activity plan information in familiar formats.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret and calculate numerical data involving river gradients, distances, times and speed of currents.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>pro-actively and cooperatively work within teams of operational personnel to solve arising problems and effect efficient rescues.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>manage own timing to complete activities within planned timeframes.</li> </ul>

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SISOKYK003 Paddle a kayak on grade 2 rivers

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group kayak trips
- complete at least one solo paddle for one of the above trips
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - use different locations to launch and land kayaks to include:
    - the bank in moving water
    - ledges
    - eddies
  - run routes through at least four rapids
  - consistently control direction of kayaks forward, in reverse and sideways using leaning, edging and this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - bow draw strokes - feathered and sculling
    - stern rudder
    - support using back and front of blade
    - emergency stop
  - utilise the following techniques while consistently controlling the kayak:
    - combining strokes to effectively manoeuvre the kayak
    - breaking in and out of eddies and currents
    - forward and reverse ferry gliding
    - using hydrological features to assist with paddling, controlling the kayak and negotiating rapids
  - execute four controlled rolls as follows:
    - use one technique and roll in both directions
- participate in simulations to:
  - complete two self-rescues following a capsize, swimming self and craft a maximum distance of 50 metres to shore

- complete three deep water rescues to assist a single capsized paddler, using these techniques:
  - T (or X) rescue
  - wedge rescue
- provide one contact tow
- provide one tow using a towline with a quick release system.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for kayaking activities
- suitable clothing and footwear for kayaking activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear and exposure suits
  - types of footwear suitable for kayaking including specialist sandals, river or paddling shoes and their advantages over other types of footwear
  - features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for grade 2 river conditions and how to fit and adjust these for comfort and safety
- types of single and double kayaks suitable for use in grade 2 river conditions and:
  - location and function of different parts of the kayak
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- types of paddles suitable for use with kayaks used in grade 2 river conditions, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry kayaks
- equipment features and techniques used to secure kayaks to the bank and for transportation
- communication protocols for group kayaking activities to include:
  - calls
  - hand and paddle signals
  - whistles
- the International River Grading system:

- strengths and limitations of the grading system; what is covered and not covered in classifications
- specifications for grade 2 rivers
- examples of local rivers attributed as grade 2
- typical hydrology features and hazards for grade 2 rivers, how to recognise features from the shore and water, and techniques used to safely negotiate hazards:
  - currents
  - eddies
  - waves
  - strainers
  - holes
  - stoppers
  - sieves
  - rocks, including undercut rocks
  - waterfalls
  - downstream and upstream Vs
  - boils
  - pour overs
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation
  - sections of dark, deep or cold water
  - other boating traffic
  - exposure to lightning, storms and strong winds
  - prolonged emersion in cold water
- different locations that can be used to embark, launch, land and disembark kayaks in grade 2 waters including:
  - the bank in moving water
  - ledges
  - eddies
- for each of the above locations:
  - factors that affect selection
  - advantages and disadvantages of use
  - techniques used to embark, launch and land
- a range of strokes used in grade 2 river conditions to direct kayaks forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps

- bow draw strokes - feathered and sculling
- stern rudder
- support using back and front of blade
- emergency stop
- for each of the above strokes:
  - how to use them when solo paddling and when padding as a double
  - correct posture and trunk rotation
  - correct hand placement on paddle
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- a range of techniques used to manoeuvre kayaks in grade 2 water:
  - combining strokes and which combinations are effective
  - breaking in and out of eddies and currents
  - forward and reverse ferry gliding
- how certain types of hydrological features can be used to assist with paddling, controlling the kayak and negotiating rapids
- for self rescues:
  - roll techniques suitable for use with sit in kayaks in grade 2 rivers
  - methods used to extricate self from inverted kayaks
  - methods used to control and manoeuvre the paddle and kayak to shore
  - appropriate swimming strokes and techniques to use while in paddling gear in grade 2 river conditions
  - how to empty water from kayaks, and equipment used to assist
  - techniques used to re-establish upright kayak and re-enter in deep water
- for deep water rescues, the specific application of the following to grade 2 river conditions and kayaks:
  - features, functions and operation of equipment used for rescues, advantages and disadvantages
  - roles and responsibilities that can be allocated to team members and participants to effectively complete a rescue
  - raft up techniques
  - T (or X) rescue techniques
  - wedge rescue techniques
  - techniques for contact tows and those using a towline with a quick release system
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots
  - quick release knots.

## Assessment Conditions

Skills must be demonstrated on grade 2 rivers which must feature the following:

- fairly frequent but straightforward rapids
- rapids with regular medium sized waves, less than one metre
- low ledges or drops, easy eddies and gradual bends
- small obstacles that require manoeuvring around
- passages through rapids that are generally straightforward and can be seen from the water, although some may require scouting.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during kayaking activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets
- pea-less whistles not affected by water
- kayaks which can include singles or doubles
- kayak paddles
- ropes and tie down straps
- rescue equipment:
  - towlines
  - carabiners, Prusik cords and tape sling
  - knives
- activity plans to include details of planned route
- template safety checklists
- information about the International River Grading System
- organisational safety and emergency response procedures for kayaking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOKYK004 Paddle a kayak on grade 3 rivers

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to paddle a kayak as part of a group on inland rivers with grade 3 rapids, and according to planned and scouted courses. It requires the ability to self-rescue from a capsized and to rescue others in deep water.

Grade 3 refers to the International River Grading System which provides a broad indication of a river's rapid features, and the degree of difficulty in negotiating these. This unit provides skills to paddle on rivers with rapids which have fairly high waves, one to two metres tall, broken water, and strong currents and eddies. These rivers have significant obstacles including large holes, exposed rocks and small falls that require manoeuvring around using proficient paddling. Passages through rapids may be difficult to recognise from the river and inspection from the bank is usually required.

It applies to leaders, guides or instructors, who use these skills when leading participants during kayaking activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Kayaking

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

#### 1. Prepare for the paddle.

#### 2. Paddle and manoeuvre kayaks on grade 3 rivers.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Select clothing, footwear, personal protective and other equipment suitable for the paddle and conditions, and check for safe working condition.
- 1.2. Carry, prepare craft and complete safety and serviceability checks.
- 1.3. Waterproof, pack and stow clothing, personal resources, and food according to access requirements during paddle.
- 1.4. Interpret planned course from activity plans and maps to assist in following the course.
- 1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.
- 1.6. Confirm protocols for communications between paddlers.
- 1.7. Fit and adjust personal protective equipment to ensure comfort and safety.
- 2.1. Select suitable location, embark and launch kayak using technique suitable to situation to maintain stability.
- 2.2. Identify hydrological features from the water and utilise favourably to control and manoeuvre kayak.
- 2.3. Control direction of kayak forward, in reverse and sideways using a range of appropriate strokes, leans, edges and combinations.
- 2.4. Maintain appropriate posture, use of trunk rotation, paddle and blade to efficiently paddle the kayak.
- 2.5. Utilise appropriate padding strokes and techniques to cross currents and break into and out of eddies.
- 2.6. Avoid or negotiate obstacles and hazards using a combination of strokes and paddling techniques.
- 2.7. Support kayak using the paddle to prevent capsizes.
- 2.8. Maintain visual contact and effective communication with party members throughout all activities.
- 2.9. Monitor party formation, paddling pace and space between kayaks and make required adjustments.

3. Plan and run routes through rapids.
  - 3.1. Scout rapids from the water and shore to identify hydrological features, hazards and impediments.
  - 3.2. Assess features and hazards to determine a safe route through rapids.
  - 3.3. Plan route through rapids accounting for party member numbers, abilities and management during run.
  - 3.4. Identify reference points to guide chosen passage through rapids.
  - 3.5. Run predetermined route using avoidance techniques to safely negotiate river hazards.
  - 3.6. Use efficient paddling techniques and strokes and utilise hydrological features to assist in turning and crossing currents.
4. Rescue self following a capsize.
  - 4.1. Execute a roll using techniques appropriate for situation to avoid a wet exit and re-establish paddling position promptly.
  - 4.2. Exit the kayak in a controlled manner when unable to roll following a capsize, and recover paddle.
  - 4.3. Maintain appropriate body position in water to minimise entrapment and injury.
  - 4.4. Manoeuvre the paddle and upturned kayak to shore or to rescue craft.
  - 4.5. Drain water from craft in safe shallow river position or on shore and re-enter craft on shore or in an eddy.
  - 4.6. Use techniques when in deep water to empty water and re-enter kayak.
5. Perform deep water rescues in grade 3 rivers
  - 5.1. Identify immediate hazards, assess risks and negotiate to avoid injury to self and others.
  - 5.2. Select and use other leaders or party members, equipment and rescue techniques appropriate to situation.
  - 5.3. Manoeuvre rescue craft to capsized party member, forming a raft-up as required.
  - 5.4. Provide clear and concise instructions to person being rescued and others assisting.
  - 5.5. Assist rescuee to return to their craft using rescue technique appropriate to situation.
  - 5.6. Assess ability of rescuee to continue and tow to nearest safe landing, as required.
6. Land and secure kayaks.
  - 6.1. Select a suitable location to exit the river, and to allow for any subsequent re-entries.
  - 6.2. Land and disembark kayak using techniques suitable for river conditions to maintain stability.
  - 6.3. Select a secure bank feature and secure kayak using

appropriate knots.

6.4. Secure kayak for road transport, on activity conclusion, using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION

# Assessment Requirements for SISOKYK004 Paddle a kayak on grade 3 rivers

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group kayak trips
- complete at least one solo paddle for one of the above trips
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - use different locations to launch and land kayaks to include:
    - the bank in moving water
    - ledges
    - eddies
  - run routes through at least four rapids
  - consistently control direction of kayaks forward, in reverse and sideways using leaning, edging and this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - bow draw strokes - feathered and sculling
    - stern rudder
    - support using back and front of blade
    - emergency stop
  - utilise the following techniques while consistently controlling the kayak:
    - combining strokes to effectively manoeuvre the kayak
    - breaking in and out of eddies and currents
    - forward and reverse ferry gliding
    - using hydrological features to assist with paddling, controlling the kayak and negotiating rapids
  - execute four controlled rolls as follows:
    - use at least one technique and roll in both directions
- participate in simulations to:
  - complete two self-rescues following a capsize, swimming self and craft a maximum distance of 50 metres to shore

- complete three deep water rescues to assist a single capsized paddler, using these techniques:
  - T (or X) rescue
  - wedge rescue
- provide one contact tow
- provide one tow using a towline with a quick release system.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for kayaking activities
- suitable clothing and footwear for kayaking activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear and exposure suits
  - types of footwear suitable for kayaking including specialist sandals, river or paddling shoes and their advantages over other types of footwear
  - features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for grade 3 river conditions and how to fit and adjust these for comfort and safety
- types of single and double kayaks suitable for use in grade 3 river conditions and:
  - location and function of different parts of the kayak
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- types of paddles suitable for use with kayaks used in grade 3 river conditions, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry kayaks
- equipment features and techniques used to secure canoes to the bank and for transportation
- communication protocols for group kayaking activities to include:
  - calls
  - hand and paddle signals
  - whistles
- the International River Grading system:

- strengths and limitations of the grading system; what is covered and not covered in classifications
- specifications for grade 3 rivers
- examples of local rivers attributed as grade 3
- typical hydrology features and hazards for grade 3 rivers, how to recognise features from the shore and water, and techniques used to safely negotiate hazards:
  - currents
  - eddies
  - waves
  - strainers
  - holes
  - stoppers
  - sieves
  - rocks, including undercut rocks
  - waterfalls
  - downstream and upstream Vs
  - boils
  - pour overs
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation
  - sections of dark, deep or cold water
  - other boating traffic
  - exposure to lightning, storms and strong winds
  - prolonged emersion in cold water
- different locations that can be used to embark, launch, land and disembark kayaks in grade 3 waters including:
  - the bank in moving water
  - ledges
  - eddies
- for each of the above locations:
  - factors that affect selection
  - advantages and disadvantages of use
  - techniques used to embark, launch and land
- a range of strokes used in grade 3 river conditions to direct kayaks forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps

- bow draw strokes - feathered and sculling
- stern rudder
- support using back and front of blade
- emergency stop
- for each of the above strokes:
  - how to use them when solo paddling and when padding as a double
  - correct posture and trunk rotation
  - correct hand placement on paddle
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- a range of techniques used to manoeuvre kayaks in grade 3 water:
  - combining strokes and which combinations are effective
  - breaking in and out of eddies and currents
  - forward and reverse ferry gliding
- how certain types of hydrological features can be used to assist with paddling, controlling the kayak and negotiating rapids
- for self rescues:
  - roll techniques suitable for use with sit in kayaks in grade 3 rivers
  - methods used to extricate self from inverted kayaks
  - methods used to control and manoeuvre the paddle and kayak to shore
  - appropriate swimming strokes and techniques to use while in paddling gear in grade 3 river conditions
  - how to empty water from kayaks, and equipment used to assist
  - techniques used to re-establish upright kayak and re-enter in deep water
- for deep water rescues, the specific application of the following to grade 3 river conditions and kayaks:
  - features, functions and operation of equipment used for rescues, advantages and disadvantages
  - roles and responsibilities that can be allocated to team members and participants to effectively complete a rescue
  - raft up techniques
  - T (or X) rescue techniques
  - wedge rescue techniques
  - techniques for contact tows and those using a towline with a quick release system
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots
  - quick release knots.

## Assessment Conditions

Skills must be demonstrated on grade 3 rivers which must feature the following:

- rapids which have fairly high waves, one to two metres tall
- broken water, strong currents and eddies
- significant obstacles including large holes, exposed rocks and small falls that require manoeuvring around
- passages through rapids that are difficult to recognise from the river and inspection from the bank is usually required.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during kayaking activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets
- pea-less whistles not affected by water
- kayaks which can include singles or doubles
- kayak paddles
- ropes and tie down straps
- rescue equipment:
  - towlines
  - carabiners, Prusik cords and tape sling
  - knives
- activity plans to include details of planned route
- template safety checklists
- information about the International River Grading System
- organisational safety and emergency response procedures for kayaking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOKYK005 Lead kayaking activities on inland flatwater

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during kayaking activities on flatwater areas according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct kayaking techniques applicable to flatwater conditions. To do this, leaders must be proficient in kayaking skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Kayaking

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |  |
|---|--|
| 1. Prepare equipment and participants.  | 1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.<br>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.<br>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.<br>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.<br>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.   |
| 2. Brief participants and demonstrate kayaking techniques applicable to flatwater conditions. | 2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.<br>2.2. Encourage participants to ask questions and seek advice before and during session.<br>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.<br>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.<br>2.5. Demonstrate and explain correct techniques appropriate for the activity.<br>2.6. Form a raft up of participants, as required, for demonstrations.<br>2.7. Check and confirm participant ability to use and control equipment before activity commencement.<br>2.8. Check matching of equipment and activities to participants and amend as required. |
| 3. Lead and supervise flatwater kayaking activities.  | 3.1. Supervise activity according to designated role, adjusting position and role as required.<br>3.2. Implement recreational instruction techniques to impart   |

- skills and knowledge for the activity.
- 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
  - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during flatwater kayaking activities.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret detailed familiar organisational policies and procedures.
- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOKYK005 Lead kayaking activities on inland flatwater

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three kayaking sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for kayaking activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to kayaking activities in flatwater conditions:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - raft up techniques used for group demonstration and instruction.

## Assessment Conditions

Skills must be demonstrated on inland flatwater areas which can be lakes, dams or slow moving rivers. The environment must feature the following:

- less than moderate wind conditions
- current flow is consistently documented as less than 1 knot.

An area for assessment should not be classified as flatwater if any of the following conditions are present:

- rapids of any grade
- surf of any size
- fetch greater than 1 nautical mile
- area is in the entrance to an estuary or embayment.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks

- emergency situations
- equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets as required
- pea-less whistles not affected by water
- kayaks which can include:
  - single or double sit in kayaks
  - single or double sit on top kayaks
- kayak paddles
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for kayaking activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOKYK006 Lead kayaking activities on moving water up to grade 1 rivers

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during kayaking activities on waterways that feature slow moving water conditions according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct kayaking techniques applicable to slow moving river conditions. To do this, leaders must be proficient in kayaking skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Kayaking

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |   |
|--|---|
| <p>1. Prepare equipment and participants.</p>  | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.</p> <p>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.</p>   |
| <p>2. Brief participants and demonstrate kayaking techniques applicable to slow moving river conditions.</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate for the activity.</p> <p>2.6. Form a raft up of participants, as required, for demonstrations.</p> <p>2.7. Check and confirm participant ability to use and control equipment before activity commencement.</p> <p>2.8. Check matching of equipment and activities to participants and amend as required.</p> |
| <p>3. Lead and supervise</p>   | <p>3.1. Supervise activity according to designated role, adjusting</p>  |

- kayaking activities on slow moving water.
- position and role as required.
- 3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.
  - 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
  - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during kayaking activities on slow moving water.
- 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
  - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
  - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
  - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
  - 4.5. Amend activities if risk is unacceptable; cease activities when required.
  - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
5. Complete post activity responsibilities.
- 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
  - 5.2. Notify relevant personnel of activity completion.
  - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
  - 5.4. Document any equipment faults and incidents including injuries and near misses.
  - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>• interpret detailed familiar organisational policies and procedures.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>• provide clear and unambiguous instructions to participants using language and terms easily understood</li><li>• ask open and closed probe questions and actively listen to determine participants' understanding of instructions.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>• pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>• manage own timing and that of participants to complete activities within organisational service times.</li></ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOKYK006 Lead kayaking activities on moving water up to grade 1 rivers

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three kayaking sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for kayaking activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to kayaking activities on slow moving water:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - raft up techniques used for group demonstration and instruction.

## Assessment Conditions

Skills must be demonstrated in slow moving water conditions in light to moderate wind conditions. Waters can include:

- large bodies of open water such as lakes or dams with slow moving water
- an estuary or embayment with slow moving water
- slow moving water, including grade 1 rivers, which would feature:
  - long stretches of slow moving water
  - relatively few obstacles and no major ones
  - an easy passage to find and follow
  - in grade 1 rivers, regular small waves and or riffles.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults

- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets as required
- pea-less whistles not affected by water
- kayaks which can include:
  - single or double sit in kayaks
  - single or double sit on top kayaks
- kayak paddles
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for kayaking activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for kayaking activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to kayaking activities on grade 2 rivers:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - raft up techniques used for group demonstration and instruction.

## Assessment Conditions

Skills must be demonstrated on grade 2 rivers which must feature the following:

- fairly frequent but straightforward rapids
- rapids with regular medium sized waves, less than one metre
- low ledges or drops, easy eddies and gradual bends
- small obstacles that require manoeuvring around
- passages through rapids that are generally straightforward and can be seen from the water, although some may require scouting.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions

- Australian Standard, or equivalent, compliant lifejackets of a grade that meets local maritime regulator requirements for the location
- helmets
- pea-less whistles not affected by water
- kayaks which can include singles or doubles
- kayak paddles
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for kayaking activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## Assessment Requirements for SISOKYK008 Lead kayaking activities on grade 3 rivers

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three kayaking sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for kayaking activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to kayaking activities on grade 3 rivers:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these\
  - raft up techniques used for group demonstration and instruction.

## Assessment Conditions

Skills must be demonstrated on grade 3 rivers which must feature the following:

- rapids which have fairly high waves, one to two metres tall
- broken water, strong currents and eddies
- significant obstacles including large holes, exposed rocks and small falls that require manoeuvring around
- passages through rapids that are difficult to recognise from the river and inspection from the bank is usually required.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions

- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets
- pea-less whistles not affected by water
- kayaks which can include singles or doubles
- kayak paddles
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for kayaking activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOKYS001 Paddle a sea kayak in enclosed waters

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to paddle a sea kayak as part of a group in enclosed waters and according to planned courses. It requires the ability to self-rescue from a capsized and to rescue others in deep water.

This unit provides skills to paddle in enclosed waters defined as bays and harbours where no surf is present. Water would feature small breaking white capping waves up to 0.5 metre. Paddlers at this level can paddle in moderate winds of 11 - 16 knots (Beaufort Scale).

It applies to leaders, guides or instructors, who use these skills when leading participants during sea kayaking activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Sea Kayaking

### Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |  |
|--|--|
| 1. Prepare for the paddle.                             | <ul style="list-style-type: none"> <li>1.1. Select clothing, footwear, personal protective and other equipment suitable for the paddle and conditions, and check for safe working condition.</li> <li>1.2. Carry, prepare craft and complete safety and serviceability checks.</li> <li>1.3. Waterproof, pack and stow clothing, personal resources, and food according to access requirements during paddle.</li> <li>1.4. Interpret planned course from activity plans and maps to assist in following the course.</li> <li>1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.</li> <li>1.6. Confirm protocols for communications between paddlers.</li> <li>1.7. Fit and adjust personal protective equipment to ensure comfort and safety.</li> </ul>                          |
| 2. Paddle and manoeuvre sea kayaks in enclosed waters. | <ul style="list-style-type: none"> <li>2.1. Embark and launch sea kayak from shore while maintaining stability.</li> <li>2.2. Control direction of sea kayak forward, in reverse and sideways using a range of appropriate strokes and edges.</li> <li>2.3. Maintain appropriate posture, use of trunk rotation, paddle and blade to efficiently paddle the sea kayak.</li> <li>2.4. Establish and maintain an appropriate paddling rhythm and pace to minimise fatigue, strain and injury.</li> <li>2.5. Safely approach, and negotiate obstacles and hazards to minimise risk of injury.</li> <li>2.6. Maintain visual contact and effective communication with party members throughout all activities.</li> <li>2.7. Monitor party formation, paddling pace and space between sea kayaks and make required adjustments.</li> </ul> |
| 3. Rescue self following a capsize.                    | <ul style="list-style-type: none"> <li>3.1. Exit the sea kayak in a controlled manner, following a capsize, and recover paddle.</li> <li>3.2. Manoeuvre the paddle and upturned sea kayak to shore or to rescue craft and empty out water.</li> <li>3.3. Use techniques when in deep water to empty water and re-enter sea kayak.</li> </ul>   |
| 4. Perform deep water rescues in enclosed              | <ul style="list-style-type: none"> <li>4.1. Identify immediate hazards, assess risks and negotiate to avoid injury to self and others.</li> </ul>  |

- waters.
- 4.2. Select and use other leaders or party members, equipment and rescue techniques appropriate to situation.
  - 4.3. Manoeuvre rescue craft to capsized party member, forming a raft-up as required.
  - 4.4. Provide clear and concise instructions to person being rescued and others assisting.
  - 4.5. Assist rescuee to return to their craft using rescue technique appropriate to situation.
  - 4.6. Assess ability of rescuee to continue and tow to nearest safe landing, as required.
5. Land and secure sea kayaks.
    - 5.1. Land and disembark sea kayak on shore while maintaining stability.
    - 5.2. Secure sea kayak for road transport using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- |                                    |   |
|------------------------------------|---|
| Reading skills to:                 | <ul style="list-style-type: none"> <li>• interpret detailed and familiar organisational safety and emergency response procedures</li> <li>• interpret straightforward but potentially unfamiliar information on maps</li> <li>• interpret factual activity plan information in familiar formats.</li> </ul> |
| Oral communications skills to:     | <ul style="list-style-type: none"> <li>• use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>  |
| Numeracy skills to:                | <ul style="list-style-type: none"> <li>• interpret and calculate numerical data involving distances, times and speed of currents.</li> </ul>  |
| Teamwork skills to:                | <ul style="list-style-type: none"> <li>• pro-actively and cooperatively work within teams of operational personnel to solve arising problems and effect efficient rescues.</li> </ul>   |
| Planning and organising skills to: | <ul style="list-style-type: none"> <li>• manage own timing to complete activities within planned timeframes.</li> </ul>   |
| Self-management skills to:         | <ul style="list-style-type: none"> <li>• critically analyse all circumstances and implications to provide a prompt and considered response to rescue requirements.</li> </ul>   |

## Assessment Requirements for SISOKYS001 Paddle a sea kayak in enclosed waters

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group sea kayak trips
- complete at least one solo paddle for one of the above trips
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - consistently control direction of sea kayaks forward, in reverse and sideways using edging and this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - bow draw strokes - feathered and sculling
    - stern rudder
    - support using back of blade
    - emergency stop
- participate in simulations to:
  - complete two self-rescues following a capsize, swimming self and craft a maximum distance of 50 metres to shore
  - complete three deep water rescues to assist a single capsized paddler, using at least two techniques appropriate to the type of kayak craft in use provide one contact tow
  - provide one tow using a towline with a quick release system.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for sea kayaking activities
- suitable clothing and footwear for sea kayaking activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear and exposure suits

- types of footwear suitable for sea kayaking including specialist sandals, water shoes and booties and their advantages over other types of footwear
- features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for enclosed water conditions and how to fit and adjust these for comfort and safety
- types of single and double sea kayaks suitable for use in enclosed waters and:
  - location and function of different parts of the kayak
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- types of paddles suitable for use with sea kayaks used in enclosed waters, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry sea kayaks
- equipment features and techniques used to secure sea kayaks for transportation
- communication protocols for group sea kayaking activities to include:
  - calls
  - hand and paddle signals
  - whistles
- hydrological features of bays and harbours including currents, waves and tides sufficient to understand the impacts on sea kayaking activities
- typical hazards associated with paddling and swimming in enclosed water conditions, and techniques used to safely negotiate these:
  - currents
  - built objects – piers, navigation markers
  - steep, slippery or rocky shores
  - sections of dark, deep or cold water
  - marine animals
  - other boating traffic
  - exposure to lightning, storms and strong winds
  - prolonged emersion in cold water
- techniques used in enclosed waters to embark, launch, land and disembark sea kayaks from shore
- a range of strokes used in enclosed water conditions to direct sea kayaks forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps
  - bow draw strokes - feathered and sculling

- stern rudder
- support using back of blade
- emergency stop
- for each of the above strokes:
  - how to use them when solo paddling and when padding as a double
  - correct posture and trunk rotation
  - correct hand placement on paddle
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- for self rescues:
  - methods used to extricate self from inverted sea kayaks
  - methods used to control and manoeuvre the paddle and sea kayak to shore
  - appropriate swimming strokes and techniques to use while in paddling gear in enclosed water conditions
  - how to empty water from sea kayaks, and equipment used to assist
  - techniques used to re-establish upright sea kayak and re-enter in deep water
- for deep water rescues, the specific application of the following to enclosed water conditions and sea kayaks:
  - features, functions and operation of equipment used for rescues, advantages and disadvantages
  - roles and responsibilities that can be allocated to team members and participants to effectively complete a rescue
  - raft up techniques
  - rescue techniques specific to sit in kayaks
  - rescue techniques specific to sit on top kayaks
  - techniques for contact tows and those using a towline with a quick release system
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots
  - quick release knots.

## Assessment Conditions

Skills must be demonstrated in enclosed waters which can be bays or harbours where no surf is present. The environment must feature the following:

- water with small breaking white capping waves up to 0.5 metre
- ideally moderate winds of 11-16 knots (Beaufort Scale); winds could vary but warnings should not exceed moderate wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during sea kayaking activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets as required
- pea-less whistles not affected by water
- kayaks which can include:
  - single or double sit in kayaks
  - single or double sit on top kayaks
- sea kayak paddles
- ropes and tie down straps
- rescue equipment:
  - towlines
  - knives
- activity plans to include details of planned route
- template safety checklists
- organisational safety and emergency response procedures for sea kayaking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sea kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOKYS002 Paddle a sea kayak in sheltered coastal waters

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to paddle a sea kayak as part of a group in sheltered coastal waters and according to planned courses. It requires the ability to self-rescue from a capsized and to rescue others in deep water.

This unit provides skills to paddle in sheltered coastal waters defined as estuaries, embayments, areas enclosed or partly enclosed by islands or a fringing reef; or areas of exposed coastline with surf but without overfalls and tidal races present.

Water would feature small breaking white capping waves up to 0.5 metre with no difficult landings. Paddlers at this level can paddle in moderate winds of 11 - 16 knots (Beaufort Scale).

It applies to leaders, guides or instructors, who use these skills when leading participants during sea kayaking activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Assessment Requirements for SISOKYS002 Paddle a sea kayak in sheltered coastal waters

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group sea kayak trips
- complete at least one solo paddle for one of the above trips
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - consistently control direction of sea kayaks forward, in reverse and sideways using leaning, edging and this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - bow draw strokes - feathered and sculling
    - stern rudder
    - support using front and back of blade
    - emergency stop
  - effectively manoeuvre the sea kayak by combining strokes
  - if utilising a sit in kayak, execute two controlled rolls in one direction
- participate in simulations to:
  - complete two self-rescues following a capsize, swimming self and craft a maximum distance of 50 metres to shore
  - complete three deep water rescues to assist a single capsized paddler, using at least two techniques appropriate to the type of kayak in use
  - provide one contact tow
  - provide one tow using a towline with a quick release system.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for sea kayaking activities
- suitable clothing and footwear for sea kayaking activities:

- types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
- reasons for layering clothes
- effective design and construction features of waterproof gear and exposure suits
- types of footwear suitable for sea kayaking including specialist sandals, water shoes and booties and their advantages over other types of footwear
- features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for sheltered coastal water conditions and how to fit and adjust these for comfort and safety
- types of single and double sea kayaks suitable for use in sheltered coastal water conditions and:
  - location and function of different parts of the kayak
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- types of paddles suitable for use with sea kayaks used in sheltered coastal water conditions, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry sea kayaks
- equipment features and techniques used to secure sea kayaks for transportation
- communication protocols for group sea kayaking activities to include:
  - calls
  - hand and paddle signals
  - whistles
- hydrological features of sheltered coastal waters including currents, waves and tides sufficient to understand the impacts on sea kayaking activities
- typical hazards associated with paddling and swimming in sheltered coastal water conditions, and techniques used to safely negotiate these:
  - currents
  - built objects – piers, navigation markers
  - steep, slippery or rocky shores
  - sections of dark, deep or cold water
  - marine animals
  - other boating traffic
  - exposure to lightning, storms and strong winds
  - prolonged emersion in cold water

- techniques used in sheltered coastal waters to embark, launch, land and disembark kayaks from shore
- a range of strokes used in sheltered coastal water conditions to direct sea kayaks forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps
  - bow draw strokes - feathered and sculling
  - stern rudder
  - support using front and back of blade
  - emergency stop
- for each of the above strokes:
  - how to use them when solo paddling and when padding as a double
  - correct posture and trunk rotation
  - correct hand placement on paddle
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- how to effectively manoeuvre sea kayaks by combining strokes and which combinations are effective
- for self rescues:
  - roll techniques suitable for use with sit in kayaks in sheltered coastal waters
  - methods used to extricate self from inverted sea kayaks
  - methods used to control and manoeuvre the paddle and kayak to shore
  - appropriate swimming strokes and techniques to use while in paddling gear in sheltered coastal water conditions
  - how to empty water from sea kayaks, and equipment used to assist
  - techniques used to re-establish upright sea kayak and re-enter in deep water
- for deep water rescues, the specific application of the following to sheltered coastal water conditions and sea kayaks:
  - features, functions and operation of equipment used for rescues, advantages and disadvantages
  - roles and responsibilities that can be allocated to team members and participants to effectively complete a rescue
  - raft up techniques
  - rescue techniques specific to sit in kayaks
  - rescue techniques specific to sit on top kayaks
  - techniques for contact tows and those using a towline with a quick release system
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots

- quick release knots.

## Assessment Conditions

Skills must be demonstrated in sheltered coastal waters which can be:

- estuaries
- embayments
- areas enclosed or partly enclosed by islands or a fringing reef
- areas of exposed coastline with surf but without overfalls and tidal races present.

The environment must feature the following:

- water with small breaking white capping waves up to 0.5 metre with no difficult landings
- ideally moderate winds of 11-16 knots (Beaufort Scale); winds could vary but warnings should not exceed moderate wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during sea kayaking activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets as required
- pea-less whistles not affected by water
- kayaks which can include:
  - single or double sit in kayaks
  - single or double sit on top kayaks
- kayak paddles
- ropes and tie down straps
- rescue equipment:
  - towlines
  - knives
- activity plans to include details of planned route
- template safety checklists
- organisational safety and emergency response procedures for sea kayaking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sea kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOKYS003 Paddle a sea kayak in exposed coastal waters

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to paddle a sea kayak as part of a group in exposed coastal waters, and according to planned courses. It requires the ability to self-rescue from a capsize and to rescue others in deep water.

This unit provides skills to paddle in exposed coastal waters defined as areas of exposed coastline with surf but without overfalls and tidal races present.

Water would feature breaking white capping waves up to 1.0 metre and difficult landings may be involved. Paddlers at this level can paddle in fresh winds of 17-21 knots (Beaufort Scale).

It applies to leaders, guides or instructors, who use these skills when leading participants during sea kayaking activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

- or to rescue craft and empty out water.
- 3.4. Use techniques when in deep water to empty water and re-enter sea kayak.
4. Perform deep water rescues in exposed coastal waters.
- 4.1. Identify immediate hazards, assess risks and negotiate to avoid injury to self and others.
- 4.2. Select and use other leaders or party members, equipment and rescue techniques appropriate to situation.
- 4.3. Manoeuvre rescue craft to capsized party member, forming a raft-up as required.
- 4.4. Provide clear and concise instructions to person being rescued and others assisting.
- 4.5. Assist rescuee to return to their craft using rescue technique appropriate to situation.
- 4.6. Assess ability of rescuee to continue and tow to nearest safe landing, as required.
5. Land and secure sea kayaks.
- 5.1. Land and disembark sea kayak on shore in surf while maintaining stability.
- 5.2. Secure sea kayak for road transport using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret detailed and familiar organisational safety and emergency response procedures</li> <li>interpret straightforward but potentially unfamiliar information on maps</li> <li>interpret factual activity plan information in familiar formats.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret and calculate numerical data involving distances, times and speed of currents.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>pro-actively and cooperatively work within teams of operational personnel to solve arising problems and effect efficient rescues.</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>manage own timing to complete activities within planned</li> </ul>

skills to: timeframes.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOKYS003 Paddle a sea kayak in exposed coastal waters

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group sea kayak trips
- complete at least one solo paddle for one of the above trips
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - consistently control direction of sea kayaks forward, in reverse and sideways using leaning, edging and this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - bow draw strokes - feathered and sculling
    - stern rudder
    - support using back and front of blade
    - emergency stop
  - utilise the following techniques while consistently controlling the sea kayak:
    - combining strokes to effectively manoeuvre the sea kayak
    - manoeuvring the sea kayak across, into and down wind
    - using waves to assist in turning
  - execute four controlled rolls as follows:
    - use one or more techniques and roll in both directions
- participate in simulations to:
  - complete two self-rescues following a capsize, swimming self and craft a maximum distance of 50 metres to shore
  - complete three deep water rescues to assist a single capsized paddler, using these techniques:
    - T (or X) rescue
    - wedge rescue
  - provide one contact tow
  - provide one tow using a towline with a quick release system.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for sea kayaking activities
- suitable clothing and footwear for sea kayaking activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear and exposure suits
  - types of footwear suitable for kayaking including specialist sandals, water shoes and booties and their advantages over other types of footwear
  - features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for exposed coastal water conditions and how to fit and adjust these for comfort and safety
- types of single and double sea kayaks suitable for use in exposed coastal water conditions and:
  - location and function of different parts of the kayak
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- types of paddles suitable for use with sea kayaks used in exposed coastal water conditions, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry sea kayaks
- equipment features and techniques used to secure sea kayaks for transportation
- communication protocols for group sea kayaking activities to include:
  - calls
  - hand and paddle signals
  - whistles
- typical hydrology features and hazards for exposed coastal waters, and techniques used to safely negotiate hazards:
  - currents
  - waves
  - tides
  - swell
  - rips

- built objects – piers, navigation markers
- steep, slippery or rocky shores
- sections of dark, deep or cold water
- marine animals
- other boating traffic
- exposure to lightning, storms and strong winds
- prolonged emersion in cold water
- techniques used in exposed coastal waters to embark, launch, land and disembark kayaks from shore in surf
- a range of strokes used in exposed coastal water conditions to direct sea kayaks forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps
  - bow draw strokes - feathered and sculling
  - stern rudder
  - support using back and front of blade
  - emergency stop
- for each of the above strokes:
  - how to use them when solo paddling and when padding as a double
  - correct posture and trunk rotation
  - correct hand placement on paddle
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- a range of techniques used to manoeuvre kayaks in exposed coastal waters:
  - combining strokes and which combinations are effective
  - manoeuvring sea kayaks across, into and down wind
  - using waves to assist in turning
- for self rescues:
  - roll techniques suitable for use with sit in kayaks in exposed coastal waters
  - methods used to extricate self from inverted sea kayaks
  - methods used to control and manoeuvre the paddle and sea kayak to shore
  - appropriate swimming strokes and techniques to use while in paddling gear in exposed coastal water conditions
  - how to empty water from sea kayaks, and equipment used to assist
  - techniques used to re-establish upright sea kayak and re-enter in deep water
- for deep water rescues, the specific application of the following to exposed coastal water conditions and sea kayaks:
  - features, functions and operation of equipment used for rescues, advantages and disadvantages

- roles and responsibilities that can be allocated to team members and participants to effectively complete a rescue
- raft up techniques
- T (or X) rescue techniques
- wedge rescue techniques
- techniques for contact tows and those using a towline with a quick release system
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots
  - quick release knots.

## Assessment Conditions

Skills must be demonstrated in areas of exposed coastline with surf but without overfalls and tidal races present. The environment must feature the following:

- water with breaking white capping waves up to 1.0 metre and difficult landings may be involved
- ideally fresh winds of 17-21 knots (Beaufort Scale); winds could vary but warnings should not exceed fresh wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response

Assessment must ensure use of:

- a group of participants with whom the individual interacts during sea kayaking activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets as required
- pea-less whistles not affected by water
- kayaks which can include singles or doubles
- kayak paddles
- ropes and tie down straps
- rescue equipment:
  - towlines
  - carabiners, Prusik cords and tape sling
  - bailing device
  - knives
- activity plans to include details of planned route

- template safety checklists
- organisational safety and emergency response procedures for sea kayaking activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sea kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOKYS004 Lead sea kayaking activities in enclosed waters

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during sea kayaking activities in enclosed waters according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct sea kayaking techniques applicable to enclosed waters. To do this, leaders must be proficient in sea kayaking skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Sea Kayaking

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |   |
|--|---|
| <p>1. Prepare equipment and participants.</p>  | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.</p> <p>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.</p>   |
| <p>2. Brief participants and demonstrate sea kayaking techniques applicable to enclosed waters</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate for the activity.</p> <p>2.6. Form a raft up of participants, as required, for demonstrations.</p> <p>2.7. Check and confirm participant ability to use and control equipment before activity commencement.</p> <p>2.8. Check matching of equipment and activities to participants and amend as required.</p> |
| <p>3. Lead and supervise sea kayaking activities in enclosed waters.</p>                           | <p>3.1. Supervise activity according to designated role, adjusting position and role as required.</p> <p>3.2. Implement recreational instruction techniques to impart</p>   |

- skills and knowledge for the activity.
- 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
  - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during sea kayaking activities in enclosed waters.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- Reading skills to:
- interpret detailed familiar organisational policies and procedures.
- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOKYS004 Lead sea kayaking activities in enclosed waters

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three sea kayaking sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for sea kayaking activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to sea kayaking activities in enclosed waters:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - raft up techniques used for group demonstration and instruction.

## Assessment Conditions

Skills must be demonstrated in enclosed waters which can be bays or harbours where no surf is present. The environment must feature the following:

- water with small breaking white capping waves up to 0.5 metre
- ideally moderate winds of 11-16 knots (Beaufort Scale); winds could vary but warnings should not exceed moderate wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets as required

- pea-less whistles not affected by water
- kayaks which can include:
  - single or double sit in kayaks
  - single or double sit on top kayaks
- sea kayak paddles
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for sea kayaking activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sea kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - raft up techniques used for group demonstration and instruction.

## Assessment Conditions

Skills must be demonstrated in sheltered coastal waters which can be:

- estuaries
- embayments
- areas enclosed or partly enclosed by islands or a fringing reef
- areas of exposed coastline with surf but without overfalls and tidal races present.

The environment must feature the following:

- water with small breaking white capping waves up to 0.5 metre with no difficult landings
- ideally moderate winds of 11-16 knots (Beaufort Scale); winds could vary but warnings should not exceed moderate wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks

- emergency situations
- equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- helmets as required
- pea-less whistles not affected by water
- kayaks which can include:
  - single or double sit in kayaks
  - single or double sit on top kayaks
- kayak paddles
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for sea kayaking activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sea kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

5. Complete post activity responsibilities.
- position and role as required.
- 3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.
- 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
- 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
- 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
- 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
- 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
- 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
- 4.3. Respond immediately to adverse participant reactions and hazardous situations.
- 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
- 4.5. Amend activities if risk is unacceptable; cease activities when required.
- 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
- 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
- 5.2. Notify relevant personnel of activity completion.
- 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
- 5.4. Document any equipment faults and incidents including injuries and near misses.
- 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed familiar organisational policies and procedures.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>provide clear and unambiguous instructions to participants using language and terms easily understood</li><li>ask open and closed probe questions and actively listen to determine participants' understanding of instructions.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>manage own timing and that of participants to complete activities within organisational service times.</li></ul>

## Unit Mapping Information

# Assessment Requirements for SISOKYS006 Lead sea kayaking activities in exposed coastal waters

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three sea kayaking sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
- utilise options provided in Assessment Conditions to:
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults
  - after each session, facilitate a debrief with participants and participate in a team member debrief.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for sea kayaking activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to sea kayaking activities in exposed coastal waters:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - raft up techniques used for group demonstration and instruction.

## Assessment Conditions

Skills must be demonstrated in areas of exposed coastline with surf but without overfalls and tidal races present. The environment must feature the following:

- water with breaking white capping waves up to 1.0 metre and difficult landings may be involved
- ideally fresh winds of 17-21 knots (Beaufort Scale); winds could vary but warnings should not exceed fresh wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location

- helmets as required
- pea-less whistles not affected by water
- kayaks which can include singles or doubles
- kayak paddles
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for sea kayaking activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sea kayaking leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOPLN001 Finalise operation of outdoor recreation activities

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to organise the final operational logistics for any type of outdoor recreation activity before departure. It requires the ability to evaluate the predetermined activity plan, which might be self-developed or developed by others, and to adjust this according to current conditions. It involves the final selection and packing of equipment.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to individuals who work independently or with limited guidance from others in operational or coordination roles. This includes logistics coordinators and leaders, guides or instructors, who will be responsible for delivering the activity.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Planning

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |   |
|--|---|
| <p>1. Confirm operational details for activity.</p>  | <p>1.1. Identify, from activity plans, characteristics and abilities of and special requirements for participants.</p> <p>1.2. Interpret plans and risk assessments for activity and confirm suitability.</p> <p>1.3. Access and interpret current weather and environmental information to ascertain impacts on activity plans.</p> <p>1.4. Confirm receipt of, and conditions that apply to, any required permits and permissions from land management authorities, owners or custodians.</p> <p>1.5. Make adjustments to location and activity, as required, within scope of responsibility or refer for authorisation.</p> <p>1.6. Inform relevant personnel of locations, routes and anticipated timings before departure.</p> |
| <p>2. Prepare and pack equipment for activities.</p> | <p>2.1. Select, as required, first aid, rescue, navigation and communication equipment suitable for destinations and according to activity plans.</p> <p>2.2. Select activity equipment according to activity plans and known participant characteristics.</p> <p>2.3. Adjust selection according to current operational conditions.</p> <p>2.4. Complete pre-departure safety and serviceability checks on equipment.</p> <p>2.5. Pack equipment according to route terrain, access requirements during activity, and to ensure load balance.</p>  |

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

- |                           |   |
|---------------------------|---|
| <p>Reading skills to:</p> | <ul style="list-style-type: none"> <li>• interpret factual operational information in familiar formats</li> <li>• interpret sometimes unfamiliar and potentially complex information about participant characteristics, land management requirements and risk assessments.</li> </ul> |
| <p>Writing skills to:</p> | <ul style="list-style-type: none"> <li>• use fundamental sentence structure to complete pre-departure safety and serviceability forms that require factual information.</li> </ul>  |

- Numeracy skills to:
- calculate and load correct quantities of equipment and resources.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support staff and base operational staff to finalise activity logistics.
- Planning and organising skills to:
- follow a logical selection, loading and checking process.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOPLN001 Finalise operation of outdoor recreation activities

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- organise the final pre-departure operational logistics for three different group activity sessions according to predetermined activity plans
- for each of the three group activity sessions, select, complete pre-departure safety and serviceability checks for, and pack the following:
  - activity and personal protective equipment
  - first aid equipment
  - rescue equipment
  - communication equipment
- utilise options provided in Assessment Conditions to make adjustments to two planned activity sessions after evaluating:
  - participant characteristics and associated risks
  - current weather and other environmental information and associated risks.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- features and inclusions of activity plans to be considered when finalising operational logistics for an activity:
  - participant profiles
  - equipment lists
  - resource lists
  - risk assessments
  - location and duration of activities
- sources of information on weather and environmental conditions and how to use to ascertain activity conditions
- specific to the particular type of outdoor recreation activity:
  - the effects of weather and other environmental conditions on:
    - activity and management of risk
    - route

- selection of equipment including personal protective and rescue equipment
- local activity venues, sites or locations suited to current conditions
- aspects of applicable state, territory, local government or land manager regulations sufficient to know where the activity may be delivered and under what conditions
- pre-departure safety and serviceability checks for equipment including personal protective and rescue equipment
- features and functions, at an overview level, of different types of communication equipment used for recreational activities, and factors that affect choice:
  - radio equipment
  - mobile phones and applications
  - satellite phones
  - alerting and tracking devices including personal locator beacons (PLBs).
- safe manual handling techniques used to avoid injury when shifting and packing equipment
- importance of loading equipment and supplies for:
  - even weight distribution and load balance particular to the transportation mode and terrain (vehicle, trailer, vessel, watercraft, cycle, horse etc.)
  - easy access at relevant time during activities
- waterproofing and stowing techniques used to keep clothing and equipment dry during activities.

## Assessment Conditions

Skills must be demonstrated in a venue, such as an operational depot, from where recreational activities depart and pre-departure checks and loading take place. This can be:

- an industry workplace
- a simulated industry environment set up for the purposes of assessment.

Assessment must ensure use of:

- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to adjusting activity sessions
- activity, personal protective and rescue equipment specific to the particular type of outdoor recreation activity
- first aid equipment
- navigation equipment, where relevant
- communication equipment including equipment for emergency response
- specific to particular activity sessions:
  - participant profiles
  - activity plans
  - equipment lists
  - resource lists

- risk assessments to include known and anticipated hazards, risks and control measures
- permits and permissions, where relevant
- hard copy or online information on weather and other environmental conditions
- documents issued by state, territory, local government regulators or land managers describing regulations for operating recreational activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOPLN002 Plan outdoor activity sessions

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge to plan sessions for any type of outdoor recreation activity and to coordinate operational logistics. It requires the ability to plan for activity sessions within a whole of program, or for standalone activity sessions that meet the needs of participants, and to evaluate the effectiveness of sessions.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to individuals who work independently or with limited guidance from others in senior operational or coordination roles. This includes logistics coordinators and senior leaders, guides or instructors, who will be responsible for delivering the activity session.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

### Elements and Performance Criteria

#### ELEMENTS

#### PERFORMANCE CRITERIA

*Elements describe the*

*Performance criteria describe the performance needed to*

*essential outcomes**demonstrate achievement of the element.*

1. Identify needs and expectations of participants.
  - 1.1. Obtain information to determine preferences and expectations of participants.
  - 1.2. Identify characteristics, abilities and special needs of participants.
  - 1.3. Advise participants of any reasons why they should not participate in activities.
2. Plan activity sessions.
  - 2.1. Determine activity objectives to meet identified participant needs.
  - 2.2. Plan activity session to meet identified objectives, needs, participant characteristics and abilities, and to enhance participation and motivation.
  - 2.3. Consult with relevant personnel and clients, as required, for input to activity plan and adjust accordingly.
  - 2.4. Determine human and other resource requirements and plan session within budgetary constraints and organisational capacity to deliver.
  - 2.5. Obtain and interpret weather and environmental information and factor into plans.
  - 2.6. Complete activity risk assessment, according to organisational policies and procedures, and plan session according to determined risks and control measures.
  - 2.7. Document and present activity plan for approval by relevant personnel and or clients.
3. Coordinate activity resources.
  - 3.1. Select activity venues, sites or locations appropriate for activity, participant needs and abilities, and organise access.
  - 3.2. Obtain or check on any required permits and permissions from land management authorities, owners or custodians.
  - 3.3. Identify roles of activity delivery personnel and roster those with appropriate skill set.
  - 3.4. Allocate equipment to meet activity and participant needs.
  - 3.5. Identify food and water required to maintain physiological wellbeing of participants and personnel for activity duration.
  - 3.6. Organise, as required, catering, temporary sites and other resources.
4. Issue activity documents and brief delivery personnel.
  - 4.1. Complete operational documents required by personnel delivering the activity.
  - 4.2. Brief delivery personnel and support staff in operational details of the activity.

- |   |   |
|---|---|
| 5. Evaluate effectiveness of activity sessions. | 5.1. Obtain and evaluate feedback from delivery personnel and participants.                           |
|   | 5.2. Identify successes, problems and difficulties.   |
|   | 5.3. Evaluate effectiveness of activity and identify areas for improvement to assist future planning. |

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret sometimes unfamiliar and potentially complex information about participant characteristics and land management requirements.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• develop comprehensive recreational activity plans and operational documents using language easily understood by all staff.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>• take responsibility for activity session development from initial research through to evaluation</li> <li>• critically evaluate successes and failures of recreational activities to initiate improvements.</li> </ul>

# Assessment Requirements for SISOPLN002 Plan outdoor activity sessions

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan three different outdoor activity sessions tailored to the particular needs of three different participant groups
- for each of the above sessions, coordinate all activity resources
- for each the above sessions, develop the following operational documents required by delivery personnel and provide a briefing:
  - activity plan
  - activity risk assessment
  - participant profiles
- utilise options provided in Assessment Conditions to:
  - evaluate feedback from delivery personnel and participants for two activity sessions
  - determine how to modify aspects of future sessions according to evaluation.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for completing risk assessments
- different reasons and objectives for people participating in outdoor recreation activities
- principles and theories of recreational activity design to:
  - achieve objectives of different types of participants
  - enhance engagement and motivation
  - provide educational outcomes
- factors that affect activity design to meet participant preferences, expectations and needs:
  - participant characteristics:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability

- objectives of activity participation
- budget and cost expectations
- desired duration of activity session
- season of operation, weather and environmental conditions
- specific to the particular type of outdoor recreation activity:
  - factors affecting ability to participate and reasons for non-participation
  - suitable activity venues, sites or locations
  - aspects of applicable state, territory, local government, land manager, owner or custodian regulations sufficient to know:
    - where the activity may be delivered and under what conditions
    - how to obtain and maintain permits or permissions
  - key features of the range of equipment required
  - roles of delivery personnel and level of skill required:
    - leaders ( guides or instructors)
    - activity assistants
    - organisational support personnel
    - support personnel provided by client groups
  - acceptable ratio of participants to leaders to ensure safety
  - daily fluid and energy requirements of participants and any local environmental conditions which impact
- basic principles of nutrition sufficient to know the food groups, source of nutrients and the basis of a balanced meal plan
- format, inclusions and use of operational documents required by delivery personnel:
  - activity risk assessment
  - activity plans for sessions
  - participant profiles
  - participant informed consents
- methods used to evaluate recreational activities:
  - participant, staff and client organisation evaluation questionnaires
  - debriefs with delivery personnel and client organisations
  - evaluation of complaints, problems, difficulties or incident reports.

## Assessment Conditions

Assessment must ensure use of:

- clients and team members with whom the individual can interact; these can be:
  - clients and team members in an industry workplace, or
  - people who participate simulated activities during the assessment
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - evaluating feedback from delivery personnel and participants

- modifying aspects of subsequent sessions according to evaluation.
- weather and environmental information including terrain when relevant
- participant profiles to include:
  - age, size and weight
  - current experience in the recreational activity and skill level
  - fitness level and physical capabilities
  - injuries and medical conditions
  - emotional, behavioural and intellectual ability or disability
- template:
  - activity risk assessments
  - activity plans for sessions
  - participant informed consents
- organisational policies and procedures for completing risk assessments
- documents issued by state, territory, local government regulators or land managers describing regulations for operating recreational activities

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISOPLN003 Develop outdoor recreation programs

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge to develop outdoor recreation programs for any type of recreational activity, to plan whole of program operational logistics, and to evaluate, modify and continuously improve programs.

Programs may be developed for general consumer groups or customised to the needs of a particular client group. Programs could consist multiple and different sessions for the same group or a series of the same session for different groups.

This unit applies to any type of organisation that delivers outdoor recreation programs including commercial, not-for-profit and government organisations.

It applies to senior personnel who work autonomously and who are responsible for making decisions at an organisational level. This includes program managers and senior leaders, guides or instructors, who may also deliver the program.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Outdoor Recreation Planning

### Unit Sector

# Assessment Requirements for SISOPLN003 Develop outdoor recreation programs

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- design two different outdoor recreation programs tailored to the particular needs of two different participant groups
- for each of the above programs, coordinate whole of program resources
- for each the above programs, develop the following documents:
  - information documents for client and program participants
  - operational documents required by delivery personnel and provide a briefing:
    - program plan
    - program risk assessment
    - participant profiles
    - two activity session plans or outlines
- utilise options provided in Assessment Conditions to:
  - evaluate feedback from delivery personnel, client, and participants for one program
  - determine how to modify aspects of future programs according to evaluation.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for completing risk assessments
- different reasons and objectives for people participating in outdoor recreation activities
- principles and theories of recreational programming and sequencing of activities to:
  - achieve objectives of different types of participants
  - enhance engagement and motivation
  - provide educational outcomes
- for outdoor recreation organisations:
  - different types of consumer markets and different types of programs that are delivered
  - program preferences, expectations and special needs of different consumer markets
- factors that affect general program design:
  - requirements of local land managers, owners and custodians

- season of operation, weather and environmental conditions
- organisational budget and cost expectations of market
- availability of activity sites or venues
- style, location and availability of accommodation to meet consumer expectations
- style of catering to meet expectations and operational constraints of providing
- factors that affect program design for particular client groups:
  - participant characteristics:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - objectives of program participation
  - budget and cost expectations
  - desired duration of program
  - preferred style of accommodation and catering
- specific to the particular type of outdoor recreation activity:
  - factors affecting ability to participate and reasons for non-participation
  - suitable activity venues, sites or locations
  - aspects of applicable state, territory, local government, land manager, owner or custodian regulations sufficient to know:
    - where the activity may be delivered and under what conditions
    - how to obtain and maintain permits or permissions
  - key features of the range of equipment required and how equipment can be customised to suit different participants
  - sources of additional non-organisational equipment
  - roles of delivery personnel and level of skill required:
    - leaders (guides or instructors)
    - activity assistants
    - organisational support personnel
    - support personnel provided by client groups
  - acceptable ratio of participants to leaders to ensure safety
- format, inclusions and use of program documents:
  - information documents for client and program participants
  - operational documents required by delivery personnel:
    - program plan
    - program risk assessment
    - participant profiles
    - session plans or outlines
    - participant informed consents

- land manager, owner or custodian permits or permissions
- methods used to evaluate recreational programs:
  - participant, staff and client evaluation questionnaires
  - debriefs with delivery personnel and client organisations
  - evaluation of complaints, problems, difficulties or incident reports.

## Assessment Conditions

Assessment must ensure use of:

- clients, team members and land management stakeholders with whom the individual can interact; these can be:
  - clients, team members and land management stakeholders in an industry workplace, or
  - people who participate in simulated activities during assessment
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - evaluating feedback from delivery personnel, clients and participants
  - modifying aspects of subsequent programs according to evaluation
- weather and environmental information including terrain when relevant
- participant profiles to include:
  - age, size and weight
  - current experience in the recreational activity and skill level
  - fitness level and physical capabilities
  - injuries and medical conditions
  - emotional, behavioural and intellectual ability or disability
- template:
  - program plans
  - program risk assessments
  - session plans or outlines
  - participant informed consents
- organisational policies and procedures for completing risk assessments
- documents issued by state, territory, local government regulators or land managers describing regulations for operating recreational activities

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOPLN004 Identify hazards, assess and control risks for outdoor recreation activities**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to identify hazards, assess associated risks, take measures to eliminate or control those risks and document all processes. It covers the processes necessary to manage the significant risks associated with delivering outdoor recreation activities. It can apply to whole of program planning or planning for standalone activity sessions and is relevant to any type of activity.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to individuals who plan or deliver programs or activity sessions including program and logistics managers and coordinators, and leaders (guides or instructors). They may complete risk assessments independently, in consultation with others or through a team effort.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Outdoor Recreation Planning

### **Unit Sector**

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Identify hazards for outdoor recreation activities.
  - 1.1. Use hazard identification and risk assessment templates, independently or with other personnel to complete assessments.
  - 1.2. Use a range of methods to identify current and foreseeable hazards with potential to harm health and safety of anyone involved in or present during activities.
  - 1.3. Identify built or environmental obstacles and hazards in areas where activities are delivered.
  - 1.4. Gather and interpret weather and environmental information to ascertain impacts on activity conditions.
  - 1.5. Identify features of and potential hazards for equipment to be used.
  - 1.6. Record identified hazards according to organisational procedures and legal requirements.
2. Assess risks associated with hazards.
  - 2.1. Consult with other personnel, as required, for input into risk assessments.
  - 2.2. Collect sufficient evidence of the type and level of risk posed by identified hazards.
  - 2.3. Use commonly accepted methods to complete risk analysis and risk assessments.
  - 2.4. Document outcomes of risk assessments and proposed actions to eliminate or control risks.
  - 2.5. Maintain records of risk assessments according to organisational procedures and legal requirements.
3. Assess risks associated with participants.
  - 3.1. Identify participant characteristics and level of recreational skill to assess and determine acceptable degree of difficulty and risk for activities.
  - 3.2. Identify reasons for general and particular client groups participating in outdoor recreation activities and different perceptions of competence and associated risk.
  - 3.3. Assess how perceptions and behaviour might change while participating in specific activities.
  - 3.4. Identify risk management strategies for potential participant responses and behaviour.
  - 3.5. Maintain records of assessments according to organisational procedures and legal requirements.
4. Plan activities to eliminate or control
  - 4.1. Evaluate and determine ways to eliminate hazards from

risks.

activity.

- 4.2. Evaluate and determine ways that risks can be effectively controlled for activity.
- 4.3. Determine measures to eliminate or control risks, within scope of responsibility or refer for authorisation.
- 4.4. Incorporate risk control methods into documented plans and procedures for recreational activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret complex and sometimes unfamiliar documents which can include:
  - organisational work health and safety procedures and templates
  - materials describing work health and safety regulatory requirements for hazard identification and risk assessment.

Numeracy skills to:

- score the level of risk and calculate overall risk level for hazards.

Self-management skills to:

- critically analyse hazards and logically evaluate associated risks to apply effective and tailored control measures.

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SISOPLN004 Identify hazards, assess and control risks for outdoor recreation activities

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three risk assessments for different activity sessions
- incorporate risk control methods into documented plans and safety procedures for the above three sessions
- complete three risk assessments for particular participant groups, and develop and document risk management strategies for potential participant responses and behaviour.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- requirements under the local state or territory work health and safety law for:
  - organisational and worker responsibility to ensure safety of self, other workers and other people in the workplace
  - when, where and how hazards must be identified
  - when, where and how risk assessments must be conducted
  - consultation in the hazard identification and risk assessment process
  - record keeping
- for outdoor recreation organisations:
  - what constitutes the workplace including environments where activities occur
  - what constitutes a worker including paid and volunteer workers
  - what constitutes other people present in the workplace including participants and spectators
- organisational work health and safety procedures for:
  - identifying hazards and assessing risks
  - assessing risks associated with participants
- a range of methods that can be used to identify hazards for recreational activities to include:
  - inspecting the activity site or venue and all equipment used for the activity, and completing safety checklists

- gathering and evaluating weather and environmental information including terrain when relevant
- identifying participant characteristics and level of recreational skill
- reviewing accidents and near miss incidents
- evaluating the complexity of activities
- features of commonly used risk assessment methods which can include:
  - identifying potential injuries, illness and consequences
  - determining the exposure
  - estimating probability
  - determining overall risk level
- features of commonly used methods for controlling risks which can include:
  - substituting systems or equipment with something safer
  - isolating the hazard
  - introducing engineering or administrative or procedural controls
  - using personal protective equipment
  - implementing combined controlled measures to minimise risks
- factors that affect the development and use of risk management strategies to manage potential participant responses and behaviour:
  - participant characteristics:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - reasons why people engage in outdoor activities that involve risk
  - participant perceptions of own competence and risk from low to high and how this can be a match or mismatch to actual competence and risk
  - how optimal arousal and flow state during recreational activities can affect how personal risk is managed
- risk management strategies for potential participant responses and behaviour:
  - setting ground rules
  - role modelling safe behaviours
  - closely monitoring, supervising and correcting behaviour of confident and influential participants
  - closely monitoring, supervising less confident participants
  - removing participants from activities
  - postponing, modifying or ceasing activities
- specific to the particular type of outdoor recreation activity:
  - industry association safety standards or codes of practice
  - safety standards or codes of practice issued by national, state or territory work health and safety authorities

- format, inclusions and use of templates to:
  - identify and record hazards
  - identify and record safety issues associated with potential participant behaviour
  - assess and record associated risks and control methods.

## Assessment Conditions

In order to demonstrate the physical hazard identification components of this unit, access to the following is required:

- the environment where the recreational activities are conducted
- all equipment used for the activity.

Assessment must ensure use of:

- hazard identification and risk assessment templates specific to recreational activities
- weather and environmental information including terrain when relevant
- participant profiles to include:
  - age, size and weight
  - current experience in the recreational activity and skill level
  - fitness level and physical capabilities
  - injuries and medical conditions
  - emotional, behavioural and intellectual ability or disability
- organisational work health and safety procedures for:
  - identifying hazards and assessing risks
  - assessing risks associated with participants
- specific to the particular type of outdoor recreation activity:
  - industry association safety standards or codes of practice
  - safety standards or codes of practice issued by national, state or territory work health and safety authorities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOPLN005 Interpret weather and environmental conditions for outdoor recreation activities**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to collect and interpret information on weather conditions for a specific locality or region. It also requires the ability to collect and evaluate information about environmental events such as floods, bushfires and droughts. These skills are used to plan outdoor recreation programs and activity sessions, and to assess weather and other conditions immediately before and during activities.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to individuals who plan or deliver programs or activities including program and logistics managers and coordinators, and leaders (guides or instructors).

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

### **Competency Field**

Outdoor Recreation Planning

### **Unit Sector**

Outdoor Recreation

### **Elements and Performance Criteria**

#### **ELEMENTS**

#### **PERFORMANCE CRITERIA**

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |  |
|---|--|
| 1. Interpret information from a weather map.  | 1.1. Select map type according to required use.<br>1.2. Interpret weather map symbols and colours and associated weather conditions.<br>1.3. Compare and identify differences between current weather conditions and a current weather forecast.   |
| 2. Obtain and interpret information about, weather conditions for a locality or region. | 2.1. Identify seasonal variations in weather patterns for a specific area.<br>2.2. Obtain long and short range weather forecasts for the general region and activity location.<br>2.3. Determine differences between large scale and localised weather conditions for a specific area.<br>2.4. Identify major cloud types, altitude level and influence on local weather.<br>2.5. Identify typical wind types, speeds and directions for locality and seasonal variations.<br>2.6. Determine effects of topography and landforms on weather conditions for activity location.                |
| 3. Obtain and interpret information about environmental events.                         | 3.1. Access and interpret information about seasonal environmental events that occur in a specific area and locality.<br>3.2. Access and evaluate information on current environmental events and likelihood of impact on operational zone of outdoor recreation activities.   |
| 4. Plan activities according to weather and environmental conditions.                   | 4.1. Determine and document a weather prediction for duration of activity for a specific locality or region using weather maps and forecast data.<br>4.2. Identify hazards associated with the onset of changing weather and other environmental conditions for locality or region and impacts on activities.<br>4.3. Assess weather conditions and forecast immediately before activities to determine suitability and limitations of activities.<br>4.4. Identify and implement strategies to ensure the safety and wellbeing of participants in current and predicted weather conditions. |
| 5. Interpret weather in the field.  | 5.1. Access immediate weather forecast in the field, as able, and identify conditions and onset timelines.<br>5.2. Use a range of atmospheric features including wind and direction, temperature, sky colour, cloud type and coverage to assess weather.<br>5.3. Estimate probable changing weather conditions and   |

onset timelines.

- 5.4. Identify and implement strategies to ensure the safety and wellbeing of participants in prevailing weather conditions.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"><li>• interpret unfamiliar and potentially complex technical information about weather and environmental events.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>• record weather predictions incorporating correct terminology and jargon.</li></ul>
Numeracy skills to:	<ul style="list-style-type: none"><li>• interpret and record detailed numerical data involving degrees, percentages, speeds, volume and mass.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>• use a range of technologies to access information about weather and environmental conditions.</li></ul>

# Assessment Requirements for SISOPLN005 Interpret weather and environmental conditions for outdoor recreation activities

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- for a particular region or locality and for a particular type of outdoor recreational activity:
  - interpret weather and environmental conditions for the seasons of operation and outline the following in a brief written or verbal report to include:
    - nature of different weather conditions in different seasons
    - nature of environmental events that occur and likelihood of their onset
    - activity specific hazards associated with those conditions
    - optimum time for operation of activities
  - interpret weather and environmental conditions for the operation of three forthcoming activity sessions and outline the following in a brief written or verbal report:
    - the predicted weather conditions for the duration of each activity session
    - activity specific hazards associated with the onset of particular weather conditions and environmental events
    - how activities can be delivered to provide for the safety and wellbeing of participants
  - utilise options provided in Assessment Conditions to interpret weather conditions in the field during the operation of two activity sessions and determine required activity modifications to suit prevailing conditions.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- different types of weather maps, forecasts, current weather and environmental event information that are available
- trusted sources and technologies used to access weather and environmental event information
- methods used to predict and record weather conditions
- characteristics of different map types and their different uses:
  - mean sea level pressure analysis
  - synoptic charts

- forecast charts
- marine wind forecasts
- symbols and colours used on weather maps, what they represent, and associated weather conditions:
  - cyclones
  - anti-cyclones
  - isobars
  - depressions
  - troughs
  - ridges
  - fronts – cold, warm, stationary, occluded
  - precipitation type and intensity - drizzle, rain, hail, sleet, snow
  - wind speed and direction
  - sky, cloud cover
  - temperature
- difference between current weather conditions and current forecast
- different cloud types, altitude range and effects on ground weather:
  - cirrus
  - stratus
  - cumulus
  - nimbus
  - cumulonimbus
- for a particular region or locality:
  - the general seasonal patterns of weather and environmental events to include:
    - temperature
    - humidity
    - precipitation
    - winds of different types, strengths and directions, common wind chill factors and how these are ascertained
    - storms
    - lightning
    - cyclones
    - floods
    - bush fires
    - droughts
    - tides and currents, as relevant
  - difference between large scale and localised weather conditions and forecasts
  - different topography and landforms present, and effects on local weather

- hazards associated with local weather conditions and environmental events, including those which are life threatening, (e.g. storms, lightning, cyclones, floods, tides, currents, bush fires, droughts)
- specific to the particular type of outdoor recreation activity:
  - particular weather conditions and weather hazards which affect operations
  - particular hazardous environmental events which affect operations
  - adjustments that can be made to provide for the safety and wellbeing of participants
  - when conditions are so extreme that activities must be abandoned
- how the following can be used to estimate probable changing weather conditions and onset timelines:
  - wind and direction
  - temperature
  - sky colour, cloud type and coverage.

## Assessment Conditions

Skills for in the field interpretation of weather must be demonstrated in an environment specific to the particular type of outdoor recreation activity.

Assessment must ensure use of:

- information about the region and locality to allow the individual to evaluate specific characteristics related to topography, landforms, weather conditions and environmental events
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that involve in the field activity modifications
- different types of weather maps
- weather forecasts for the region and locality
- forecasts for and information about environmental events
- specific to the particular type of outdoor recreation activity:
  - programs plans
  - activity plans for sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOPLN006 Plan for minimal environmental impact

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to plan outdoor activities to ensure that minimal environmental impact occurs. It requires the ability to determine the appropriateness of the activities for the setting and to develop plans and practices which reduce impact. Environmental impact includes that to the natural environment and to Indigenous and non-Indigenous heritage and cultural sites.

References to land managers and land management are used for simplicity and can equally apply to other environments such as marine locations.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to senior personnel who plan programs or activities including program and logistics managers and coordinators, and senior leaders (guides or instructors).

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Outdoor Recreation Planning

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Identify interrelationships between the environment and recreational activities.
2. Prepare a minimal impact plan for activities.
3. Evaluate minimal impact practices.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Source information on ecological systems within the activity setting and their interrelationships.
- 1.2. Determine human impact of outdoor recreation activities on ecological systems and heritage and cultural sites.
- 1.3. Consult with appropriate regulatory authorities and custodians to identify sensitive areas within setting and aspects unique to it.
- 1.4. Liaise with stakeholders to identify parameters of use.
- 1.5. Identify implications of parameters of use to plan outdoor recreation activities.
- 2.1. Analyse current environmental and cultural management strategies and codes implemented by land managers or custodians for the setting.
- 2.2. Identify and assess environmental, heritage and cultural characteristics of the setting and evaluate implications for proposed outdoor recreation activities.
- 2.3. Determine minimal impact practices to reduce impact on the environment, including heritage or cultural sites, according to regulations and codes.
- 2.4. Develop and document a minimal impact plan for activities to ensure sustainable outcomes for the setting.
- 3.1. Identify techniques to determine nature and degree of impact and evaluate effectiveness of minimal impact practices.
- 3.2. Modify and continuously improve current and future practices according to evaluation.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

Reading skills to:

### DESCRIPTION

- research, interpret and analyse complex and potentially unfamiliar information about environmental issues and land management requirements.

- Writing skills to:
- develop minimal impact plans and practices using language easily understood by a broad audience including staff and participants.
- Self-management skills to:
- take responsibility for minimal impact planning from initial research through to evaluation
  - critically evaluate successes and failures of practices to initiate improvements.

## Unit Mapping Information

No equivalent unit.

## Links

Companion Volume Implementation Guides -  
<https://vetnet.gov.au/Pages/TrainingDocs.aspx?q=1ca50016-24d2-4161-a044-d3faa200268b>

# Assessment Requirements for SISOPLN006 Plan for minimal environmental impact

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- for a particular setting in which outdoor recreational activities are delivered:
  - research information on the following and provide a broad summary in a written report:
    - environmental, cultural and heritage characteristics of the setting and any unique aspects
    - environmental management strategies and minimal impact codes implemented by land managers, owners or custodians for the setting
    - any regulated parameters of land use
    - any requirements for permits or permissions and conditions that relate to the use of appropriate minimal environmental practices and cultural protocols
  - develop and document two minimal impact plans:
    - one for a whole program of activities for a particular type of outdoor recreation activity
    - one for an individual activity session for a different type of outdoor recreation activity
  - within the above plans, document minimal impact practices and codes of conduct to be used by delivery personnel and participants
  - utilise options provided in Assessment Conditions to:
    - evaluate feedback received from delivery personnel and stakeholders about minimal impact practices
    - determine how to modify aspects of future practices according to evaluation.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- as relevant to the activity setting:
  - the applicable state, territory, local government, land management authority, owner or Indigenous custodians with oversight of the setting and:

- their roles and responsibilities and the key aspects of land management strategies they use to regulate environmental impact, including that to heritage or cultural sites
- regulated parameters of location use for recreational activities: area restrictions, dispersal of use, allowable activity types, locations, times, participant numbers
- minimal impact codes they have developed which can or must be adopted
- cultural protocols that should or must be followed
- requirements for permits or permissions and conditions that relate to the use of appropriate minimal environmental practices
- key features of ecological systems and their interrelationships sufficient to understand the overall environmental characteristics of the setting
- specific problems of fragile environments and threatened species
- characteristics and sensitivities of unique aspects including those for cultural and heritage sites
- causes of environmental damage and consequences as they relate to specific outdoor recreation activities:
  - use of equipment
  - human impact
  - equine impact, as relevant
  - impact of transportation to and from activity sites
- minimal impact practices implemented by recreational organisations:
  - avoiding sensitive areas
  - dispersing activities across areas to decentralise use
  - choosing activities, routes and types of transportation appropriate for the setting
  - using low impact equipment
  - limiting group size
  - implementing basic biosecurity measures to limit the spread of pests and diseases
  - using appropriate general and human waste disposal practices
  - adopting or developing participant codes of conduct for minimal impact and cultural respect
- format and inclusions of:
  - minimal impact plans
  - codes of conduct
- techniques used to determine the nature and degree of impact:
  - identifying the extent or spatial scale of the impact
  - identifying intensity or severity of the impact
  - identifying duration of the impact
  - evaluating stakeholder feedback or concerns
- protocols for making contact and communicating with people, organisations and Indigenous communities to enable effective consultation.

## Assessment Conditions

Assessment must ensure use of:

- at least one site inspection of the setting where the proposed outdoor recreation activities will be delivered
- information about the setting to allow the individual to assess its characteristics and any regulatory or other requirements that apply:
  - environmental, cultural and heritage characteristics of the setting and any unique aspects
  - environmental management strategies and minimal impact codes implemented by land managers or custodians for the setting
  - any regulated parameters of land use
  - any requirements for permits or permissions and conditions that relate to the use of appropriate minimal environmental practices and cultural protocols
- template or sample:
  - minimal impact plans for recreational activities
  - codes of conduct
- stakeholders with whom the individual can interact; these can be:
  - stakeholders in an industry environment, or
  - people who participate in role plays or simulated activities during the assessment
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - evaluating feedback from delivery personnel and stakeholders about minimal impact practices
  - modifying aspects of practices according to evaluation.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOPLN007 Manage risk for outdoor programs

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to develop, implement and sustain effective risk management practices for outdoor recreation programs.

This unit applies to any type of organisation that delivers outdoor recreation programs including commercial, not-for-profit and government organisations.

It applies to senior personnel who work autonomously and who are responsible for making decisions at an organisational level. This includes program and logistics managers and senior leaders.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Outdoor Recreation Planning

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Establish the context

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Interpret organisation's strategic direction or policy on

- for risk management. risk management, in accordance with general or industry standards.
- 1.2. Identify and analyse nature and extent of program objectives and activities offered by the organisation.
  - 1.3. Determine risk management context with consideration of different programs, client group characteristics and requirements for competent leaders.
  - 1.4. Determine overall sources of risk to guide risk management plans and practices for programs.
  - 1.5. Identify insurance limitations and exclusions and determine effects on risk management processes.
  - 1.6. Identify whether the proposed program aligns with the organisation's risk tolerance.
2. Plan for risk management.
- 2.1. Identify, interpret and select appropriate and contemporary risk management models to suit organisational requirements.
  - 2.2. Investigate and identify all sources of foreseeable risks associated with design and delivery of the program in consultation with relevant stakeholders.
  - 2.3. Ensure identification of human risk factors relevant to dependent participants in outdoor recreation activities.
  - 2.4. Account for risks presented by third party provider and requirements asked by them.
  - 2.5. Analyse risks, determine levels and acceptable and unacceptable risks and document in consultation with relevant stakeholders.
  - 2.6. Identify risk treatment options, and select preferred risk management methods in consultation with relevant personnel.
  - 2.7. Document and present risk management plan for approval by relevant personnel and other parties as required; modify and finalise as required.
3. Develop resources and communicate to personnel and clients.
- 3.1. Develop hazard identification and risk assessment templates for program activities.
  - 3.2. Identify organisational requirements for pre-activity participant safety briefings.
  - 3.3. Develop and provide program risk communication documents for client and participants.
  - 3.4. Develop and provide participant waivers or informed consents in consultation with relevant personnel or with appropriate legal advice.
  - 3.5. Incorporate requirements of third party provider into all resources for clients and personnel.
  - 3.6. Establish and implement induction or training to inform

- activity leaders about organisational risk management practices and documents.
4. Manage and evaluate risk management practices.
- 4.1. Determine staffing requirements for program activities and allocate suitable personnel for management of risk.
  - 4.2. Monitor leader and participant compliance with program risk management practices.
  - 4.3. Review incident reports and analyse causal factors.
  - 4.4. Track incidents, collate and analyse incident trends and report findings.
  - 4.5. Review risk management practices and initiate change in practices to achieve reduced incidents.
  - 4.6. Communicate the outcomes of evaluation to relevant stakeholders.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret complex and potentially unfamiliar materials describing policies and standards for risk management.</li> </ul>

# Assessment Requirements for SISOPLN007 Manage risk for outdoor programs

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- develop and document two different risk management plans for two different programs; these could involve different activities or different sites for the same type of activity
- for each of the above plans incorporate the following documents:
  - emergency management plan
  - critical incident plan
  - hazard identification, risk assessment and control templates
  - risk communication information for client and participants
  - guidelines for pre-activity participant safety briefings
- utilise options provided in Assessment Conditions to:
  - develop and deliver a presentation to communicate foreseeable program risk and benefits
  - provide a group briefing, for one of the above programs, to explain the risk management plan and all documents to a team of three leaders who will deliver the activities
  - collate, analyse and report on incident data, trends and causal factors for a program of activities
  - review and adapt risk management practices based on analysis.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- for outdoor recreation organisations, general and industry risk management standards relevant to program planning to include:
  - current Australian risk management standards
  - Australian Adventure Activity Standards and Good Practice Guides
- components, inclusions and format of risk management programs and plans for outdoor recreation organisations:
  - risk management plan
  - emergency management plan

- critical incident plan
- field practices documentation
- hazard identification, risk assessment and control templates
- decision making models
- risk communication information documents for client and participants
- participant waivers and informed consents
- typical insurance policy limitations and exclusions provided to outdoor recreation operators
- risk factors relevant to outdoor recreation programs and activities and how these can impact on the risk management planning process:
  - specific participant characteristics
  - staffing
  - location specific
  - environment
  - activity specific including equipment
- considerations for staffing requirements in the risk management process to include
  - current competence, skills, knowledge experience relevant to program
  - level of support available for program
  - capacity to operate independently
- general risk management requirements of third party provider
- format and inclusions of a range of hazard identification and risk assessment templates
- contemporary risk management models used in outdoor recreation:
  - domino theory (chain of sequential events)
  - Swiss cheese
  - human factors (people, place, personal protective equipment)
  - systems analysis
  - incident, injury and fatality prevention
- importance of consultation and communication at every stage of the risk management cycle
  - involvement of stakeholders and clients in risk management plans
  - involvement of personnel in identifying hazards, assessing risk and determining control measures
  - communicating risk to staff and clients
- typical incident data captured by outdoor recreation operators:
  - date, time, weather, exact location
  - age and gender of participant
  - size of group
  - staff profiles
  - witness reports
  - nature of incident, near miss or injury
  - narrative description of what happened

- first aid and or advanced medical care actions.

## Assessment Conditions

Assessment must ensure use of:

- team members with whom the individual can interact for consultation; these can be:
  - team members in an industry workplace, or
  - people who participate in simulated activities during assessment
- comprehensive information about the operation of a real or simulated outdoor recreation organisation to determine its characteristics for the development of tailored risk management practices for outdoor programs
- actual workplace incident data, or data for a simulated organisation to allow for evaluation of an organisation's risk management performance and adaptation of practices
- computers and general software programs used to produce system documents
- template or sample:
  - risk management plans
  - emergency management plans
  - critical incident plans
  - hazard identification, risk assessment and control documents
  - risk information documents for client and participants
  - participant waivers and informed consent
- industry standards or codes of practice including Australia Adventure Activity Standards and Good Practice Guides.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience with an organisation providing recreational programs where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOPWC001 Ride personal watercraft in smooth water conditions

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to ride personal water craft, usually as part of a group, in smooth water conditions and according to planned courses.

A personal watercraft (PWC) is a vessel with an engine used for propulsion, a fully enclosed hull and is designed not to retain water when capsized. The operator sits, stands or kneels on the vessel and uses handle bars to steer the craft. Craft are often referred to by their trademarked brand names which include Jet Ski®, WaveRunner® and Sea-Doo®.

This unit provides skills to ride craft in smooth water conditions within bodies of water which might include lakes, rivers, bays, harbours and sheltered coastline waters within breakwaters or headlands. Smooth water could feature small formed rippled wavelets which do not break but can include no more than small breaking white capping waves up to 0.5 metre. Riders at this level can operate craft in light winds up to 10 knots (Beaufort Scale).

It applies to leaders, guides or instructors, who use these skills when leading participants during riding activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

Recreational boating is regulated by specific laws in each Australian state and territory with variable rules. General and specific waterway rules apply to the operation of personal watercraft. All training and assessment activities must comply with the local state or territory requirements

Most states and territories require personal water craft riders to hold a licence but they are not required to be certified as competent in this unit.

## Pre-requisite Unit

Nil

## Competency Field

Personal Water Craft

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Prepare for the ride.

2. Ride and manoeuvre personal water craft in smooth water conditions.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Select lifejacket, exposure protection swim wear or exposure suit suitable for conditions, and check for safe working condition.
- 1.2. Complete PWC pre-start safety and serviceability checks according to manufacturers' recommendations and correct basic deficiencies.
- 1.3. Waterproof, pack and stow clothing, personal resources, and food according to access requirements during ride.
- 1.4. Interpret planned course from activity plans and maps to assist in following the course.
- 1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.
- 1.6. Confirm protocols for communications between riders.
- 1.7. Fit and adjust exposure protection wear and lifejacket to ensure comfort and safety.
- 2.1. Confirm number of passengers does not exceed craft design limits.
- 2.2. Launch and board craft, attach kill switch lanyard to self and start craft while maintaining stability.
- 2.3. Control speed and direction of craft forward, in reverse and throughout turns using appropriate level of throttle.
- 2.4. Maintain appropriate posture, balance and weight shift to efficiently handle and control the craft.
- 2.5. Monitor waterway hazards and other users consistently, and execute powered turns and emergency stops to avoid

- collisions.
- 2.6. Maintain visual contact and effective communication with party members throughout all activities.
- 2.7. Utilise bunch riding formation, monitor and make required adjustments to formation and speed.
- 2.8. Ensure compliance of self and party members with waterway rules for personal water craft.
- 3. Rescue self and others following ejection or capsize in deep water.
  - 3.1. Identify immediate hazards, assess risks and negotiate to avoid injury to self and others.
  - 3.2. Ensure engine has shut down and craft is stationary.
  - 3.3. Follow manufacturer’s directions to avoid engine damage, and roll capsized craft to upright position.
  - 3.4. Approach upright craft from stern, after ejection or capsize, and reboard while maintaining craft stability.
  - 3.5. Manoeuvre rescue craft to ejected or capsized party member, provide clear and concise instructions.
  - 3.6. Assist rescuee to return to their craft using rescue technique appropriate to situation.
  - 3.7. Conduct a craft to craft tow to return disabled personal water craft to shore.
- 4. Land and secure personal water craft.
  - 4.1. Land, alight and retrieve craft at shore while maintaining stability.
  - 4.2. Secure craft for road transport using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed and familiar organisational safety and emergency response procedures</li> <li>• interpret factual activity plan information in familiar formats</li> <li>• interpret potentially unfamiliar and complex information about waterway rules.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>• use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and calculate numerical data involving distances, times and speeds.</li> </ul>
Planning and organising	<ul style="list-style-type: none"> <li>• manage own timing to complete activities within planned</li> </ul>

skills to: timeframes.

Self-management skills to:

- critically analyse all circumstances and implications to provide a prompt and considered response to rescue requirements.

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOPWC001 Ride personal watercraft in smooth water conditions

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group personal water craft (PWC) sessions
- during each session, consistently:
  - follow safety procedures and safely negotiate hazards
  - follow waterway rules for PWC
  - control speed and direction of craft forward, in reverse and throughout turns using appropriate level of throttle
- participate in simulations to:
  - complete three self-rescues following a capsize
  - complete four deep water rescues to assist a single rider:
    - two ejections, craft upright
    - two capsizes, craft upturned
  - conduct two craft to craft tows to return PWC to shore.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for personal water craft activities
- exposure protection swim wear suitable for PWC activities:
  - types of swim wear and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - features and uses of exposure suits, booties, water shoes, gloves and mittens of different styles and grades suited to different conditions
- features and functions of lifejackets suitable for PWC activities in different types of waters and how to fit and adjust these for comfort and safety
- location and function of these PWC parts:
  - deck and hull
  - handle bars, throttle and reverse levers

- steering cable
- ignition and kill switch
- battery
- engine and drive shaft
- water pump, impellor and steering nozzle
- intake grate
- fuel tank
- how personal water craft work, at a basic level of understanding
- manufacturers' recommendations for use
- types of personal water craft suitable for use in smooth water conditions and:
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- types of pre-start safety and serviceability checks completed prior to riding, how to complete these and what tools would be used:
  - checking fuel, oil and battery fluid supplies
  - ensuring engine compartment is adequately ventilated with no excess fumes
  - looking for leaks in fuels lines, oil tanks, exhaust system
  - ensuring battery terminals are secure
  - checking that the pump/intake area is free of debris
  - checking for cracks and other damage to the hull
  - ensuring engine hood cover is securely latched
  - testing throttle is working
  - ensuring kill switch is working and lanyard is attached to self
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- equipment features and techniques used to secure PWCs for transportation
- communication protocols for group riding activities to include:
  - calls
  - hand signals
  - whistles
- typical hydrology features and hazards for smooth waters, and techniques used to safely negotiate hazards:
  - currents
  - tides
  - built objects – piers, navigation markers
  - steep, slippery or rocky shores
  - sections of dark, deep or cold water

- marine animals
- other boating traffic
- features of different locations that can be used to launch, board, land, alight and retrieve PWC including:
  - boat ramps
  - jetties
  - the shore
- for each of the above locations:
  - factors that affect selection
  - advantages and disadvantages of use
  - techniques used
- techniques used for riding and manoeuvring PWC in smooth water conditions:
  - sitting and standing
  - weight shifting
  - throttle control for speed and direction
  - controlling direction – forward, reverse, turns
- for ejections, capsizes and rescues:
  - appropriate swimming strokes and techniques to use while wearing lifejackets in smooth water conditions
  - where to locate manufacturer's directions for rolling PWC in water and importance of following
  - methods used to right upturned PWC
  - importance of avoiding craft with engine running and for reboarding from stern
  - equipment and towing techniques used for PWC to PWC tows
- rules specific to the operation of personal water craft and specific to the local state or territory:
  - requirements for PWC registration and display of registration numbers and labels
  - requirement for safe operation sticker, where this is affixed and information inclusions
  - requirements to hold a carry a PWC licence
  - restrictions that apply to licence holders under 16 years old
  - alcohol and drug restrictions for riders and others
  - restrictions on hours of operation
  - restrictions for number of passengers
  - give way rules – passing, crossing and overtaking powered and non-powered vessels
  - distance limitations ("distance off") – rules for swimmers, designated swimming zones, dive flags, unpowered and powered vessels stationary or underway, moored or anchored vessels, built structures (bridges, jetties, navigation markers, residential properties)
  - prohibited local areas – also called "exclusion" and "no go zones"
  - speed limits and any associated distance limitations, e.g. 4 knots when within 50 metres of...

- freestyling distance limitations; including what constitutes freestyling and how this is described in local rules, e.g. surfing, crossing or jumping waves, driving in irregular manner, erratic and non-directional operation
- towing requirements – limitations, observer requirements, distance and speed limitations
- incident reporting requirements including those for verbal and written reports
- life jacket requirements
- safety equipment requirements including those for kill switch safety lanyards and fire extinguishers.

## Assessment Conditions

Skills can be demonstrated in bodies of water which can include lakes, rivers, bays, harbours and sheltered coastline waters within breakwaters or headlands.

The environment must feature the following:

- smooth water defined as water which features small formed rippled wavelets which do not break, or no more than small breaking white capping waves up to 0.5 metre
- ideally light winds up to 10 knots (Beaufort Scale); winds could vary but warnings should not exceed light wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during PWC activities
- exposure protection swim wear suitable for conditions, and exposure suits as required
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements
- personal water craft
- basic tool and repair kit
- ropes and tie down straps
- towlines
- activity plans to include details of planned route
- marine charts and guides
- template safety and serviceability checklists
- boating guide issued by the local state or territory maritime authority
- organisational safety and emergency response procedures for personal water craft activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a personal water craft leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience
- where required by local state or territory law, hold a compliant personal water craft driving licence.

## SISOPWC002 Ride personal watercraft in slight water conditions

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to ride personal water craft, usually as part of a group, in slight water conditions and according to planned courses.

A personal watercraft (PWC) is a vessel with an engine used for propulsion, a fully enclosed hull and is designed not to retain water when capsized. The operator sits, stands or kneels on the vessel and uses handle bars to steer the craft. Craft are often referred to by their trademarked brand names which include Jet Ski®, WaveRunner® and Sea-Doo®.

This unit provides skills to ride craft in slight water conditions in areas of exposed coastline with surf but without overfalls and tidal races present. Water would feature breaking white capping waves up to 1.25 metres. Riders at this level can operate craft in moderate winds of 11 - 16 knots (Beaufort Scale).

It applies to leaders, guides or instructors, who use these skills when leading participants during riding activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

Recreational boating is regulated by specific laws in each Australian state and territory with variable rules. General and specific waterway rules apply to the operation of personal watercraft. All training and assessment activities must comply with the local state or territory requirements.

Most states and territories require personal water craft riders to hold a licence but they are not required to be certified as competent in this unit.

## Assessment Requirements for SISOPWC002 Ride personal watercraft in slight water conditions

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three group personal water craft (PWC) sessions
- during each session, consistently:
  - follow safety procedures and safely negotiate hazards
  - follow waterway rules for PWC
  - control speed and direction of craft forward, in reverse and throughout turns using appropriate level of throttle
  - safely negotiate crossing waves
- participate in simulations to:
  - complete three self-rescues following a capsized
  - complete four deep water rescues to assist a single rider:
    - two ejections, craft upright
    - two capsizes, craft upturned
  - conduct two craft to craft tows to return PWC to shore.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for personal water craft activities
- exposure protection swim wear suitable for PWC activities:
  - types of swim wear and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - features and uses of exposure suits, booties, water shoes, gloves and mittens of different styles and grades suited to different conditions
- features and functions of lifejackets suitable for PWC activities in exposed coastal areas and how to fit and adjust these for comfort and safety
- location and function of these PWC parts:
  - deck and hull

- handle bars, throttle and reverse levers
- steering cable
- ignition and kill switch
- battery
- engine and drive shaft
- water pump, impellor and steering nozzle
- intake grate
- fuel tank
- how personal water craft work, at a basic level of understanding
- manufacturer's recommendations for use
- types of personal water craft suitable for use in slight water conditions and:
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- types of pre-start safety and serviceability checks completed prior to riding, how to complete these and what tools would be used:
  - checking fuel, oil and battery fluid supplies
  - ensuring engine compartment is adequately ventilated with no excess fumes
  - looking for leaks in fuels lines, oil tanks, exhaust system
  - ensuring battery terminals are secure
  - checking that the pump/intake area is free of debris
  - checking for cracks and other damage to the hull
  - ensuring engine hood cover is securely latched
  - testing throttle is working
  - ensuring kill switch is working and lanyard is attached to self
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- equipment features and techniques used to secure PWCs for transportation
- communication protocols for group riding activities to include:
  - calls
  - hand signals
  - whistles
- typical hydrology features and hazards for coastal waters, and techniques used to safely negotiate hazards:
  - currents
  - waves
  - tides
  - swell

- rips
- built objects – piers, navigation markers
- steep, slippery or rocky shores
- sections of dark, deep or cold water
- marine animals
- other boating traffic
- features of different locations that can be used to launch, board, land, alight and retrieve PWC in coastal waters including:
  - boat ramps
  - jetties
  - the shore
- for each of the above locations:
  - factors that affect selection
  - advantages and disadvantages of use
  - techniques used
- techniques used for riding and manoeuvring PWC in slight water conditions:
  - sitting and standing
  - weight shifting
  - throttle control for speed and direction
  - controlling direction – forward, reverse, turns
  - negotiating waves
- for ejections, capsizes and rescues:
  - appropriate swimming strokes and techniques to use while wearing lifejackets in slight water conditions
  - where to locate manufacturer's directions for rolling PWC in water and importance of following
  - methods used to right upturned PWC
  - importance of avoiding craft with engine running and for reboarding from stern
  - equipment and towing techniques used for PWC to PWC tows
- rules specific to the operation of personal water craft and specific to the local state or territory:
  - requirements for PWC registration and display of registration numbers and labels
  - requirement for safe operation sticker, where this is affixed and information inclusions
  - requirements to hold a carry a PWC licence
  - restrictions that apply to licence holders under 16 years old
  - alcohol and drug restrictions for riders and others
  - restrictions on hours of operation
  - restrictions for number of passengers
  - give way rules – passing, crossing and overtaking powered and non-powered vessels

- distance limitations ("distance off") – rules for swimmers, designated swimming zones, dive flags, unpowered and powered vessels stationary or underway, moored or anchored vessels, built structures (bridges, jetties, navigation markers, residential properties)
- prohibited local areas – also called "exclusion" and "no go zones"
- speed limits and any associated distance limitations, e.g. 4 knots when within 50metres of...
- freestyling distance limitations; including what constitutes freestyling and how this is described in local rules, e.g. surfing, crossing or jumping waves, driving in irregular manner, erratic and non-directional operation
- towing requirements – limitations, observer requirements, distance and speed limitations
- incident reporting requirements including those for verbal and written reports
- life jacket requirements
- safety equipment requirements including those for kill switch safety lanyards and fire extinguishers.

## Assessment Conditions

Skills must be demonstrated in in areas of exposed coastline with surf but without overfalls and tidal races present. The environment must feature the following:

- slight water defined as water which features breaking white capping waves up to 1.25 metres
- ideally moderate winds of 11-16 knots (Beaufort Scale); winds could vary but warnings should not exceed moderate wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during PWC activities
- exposure protection swim wear suitable for conditions, and exposure suits as required
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements
- personal water craft
- basic tool and repair kit
- ropes and tie down straps
- towlines
- activity plans to include details of planned route
- marine charts and guides
- template safety and serviceability checklists

- boating guide issued by the local state or territory maritime authority
- organisational safety and emergency response procedures for personal water craft activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a personal water craft leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience
- where required by local state or territory law, hold a compliant personal water craft driving licence.

## **SISOPWC003 Lead personal water craft activities in smooth water conditions**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during personal water craft riding activities in smooth water conditions according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct personal water craft riding techniques applicable to smooth water conditions. To do this, leaders must be proficient in personal water craft riding skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

Recreational boating is regulated by specific laws in each Australian state and territory with variable rules. General and specific waterway rules apply to the operation of personal watercraft. All training and assessment activities must comply with the local state or territory requirements.

Most states and territories require personal water craft riders to hold a licence but they are not required to be certified as competent in this unit.

## Pre-requisite Unit

- for the activity.
- 2.6. Check and confirm participant ability to use and control equipment before activity commencement.
  - 2.7. Check matching of equipment and activities to participants and amend as required.
3. Lead and supervise personal water craft riding activities in smooth water conditions.
    - 3.1. Supervise activity according to designated role, adjusting position and role as required.
    - 3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.
    - 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
    - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
    - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
    - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
  4. Manage safety during personal water craft riding activities in smooth water conditions.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed familiar organisational policies and procedures.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>provide clear and unambiguous instructions to participants using language and terms easily understood</li><li>ask open and closed probe questions and actively listen to determine participants' understanding of instructions.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>manage own timing and that of participants to complete activities within organisational service times.</li></ul>

# Assessment Requirements for SISOPWC003 Lead personal water craft activities in smooth water conditions

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three personal water craft riding sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for personal water craft activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to personal water craft riding activities in smooth water conditions:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, exposure suits and lifejackets:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills can be demonstrated in bodies of water which can include lakes, rivers, bays, harbours and sheltered coastline waters within breakwaters or headlands.

The environment must feature the following:

- smooth water defined as water which features small formed rippled wavelets which do not break, or no more than small breaking white capping waves up to 0.5 metre
- ideally light winds up to 10 knots (Beaufort Scale); winds could vary but warnings should not exceed light wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- exposure protection swim wear suitable for conditions, and exposure suits as required

- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements
- personal water craft
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for personal water craft activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a personal water craft leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience
- where required by local state or territory law, hold a compliant personal water craft driving licence.

# SISOPWC004 Lead personal water craft activities in slight water conditions

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during personal water craft riding activities in slight water conditions according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct personal water craft riding techniques applicable to slight water conditions. To do this, leaders must be proficient in personal water craft riding skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

Recreational boating is regulated by specific laws in each Australian state and territory with variable rules. General and specific waterway rules apply to the operation of personal watercraft. All training and assessment activities must comply with the local state or territory requirements.

Most states and territories require personal water craft riders to hold a licence but they are not required to be certified as competent in this unit.

## Pre-requisite Unit

Nil

## Competency Field

Personal Water Craft

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |  |
|--|--|
| <p>1. Prepare equipment and participants.</p>  | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have exposure protection swim wear appropriate for anticipated conditions.</p> <p>1.3. Select and set up equipment and lifejackets, and exposure suits, as required to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment and exposure suits, if provided, and confirm safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust exposure protection wear and lifejackets; check comfort and safety of fit.</p> |
| <p>2. Brief participants and demonstrate personal water craft riding techniques applicable to slight water conditions.</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate</p>  |

- for the activity.
- 2.6. Check and confirm participant ability to use and control equipment before activity commencement.
  - 2.7. Check matching of equipment and activities to participants and amend as required.
3. Lead and supervise personal water craft riding activities in slight water conditions.
    - 3.1. Supervise activity according to designated role, adjusting position and role as required.
    - 3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.
    - 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
    - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
    - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
    - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
  4. Manage safety during personal water craft riding activities in slight water conditions.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

# Assessment Requirements for SISOPWC004 Lead personal water craft activities in slight water conditions

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three personal water craft riding sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for personal water craft activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to personal water craft riding activities in slight water conditions:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, exposure suits and lifejackets:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated in in areas of exposed coastline with surf but without overfalls and tidal races present. The environment must feature the following:

- slight water defined as water which features breaking white capping waves up to 1.25 metres
- ideally moderate winds of 11-16 knots (Beaufort Scale); winds could vary but warnings should not exceed moderate wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- exposure protection swim wear suitable for conditions, and exposure suits as required
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements
- personal water craft
- activity plans

- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for personal water craft activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a personal water craft leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience
- where required by local state or territory law, hold a compliant personal water craft driving licence.

## SISORAF001 Guide a raft on grade 2 rivers

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to control a raft as a leader, with participants on board, on rivers with grade 2 rapids, and according to planned and scouted courses. It requires the ability to implement rescue processes for ejected swimmers and self, and to manage capsizing responses. Other rescue skills are covered in complementary units.

Grade 2 refers to the International River Grading System which provides a broad indication of a river's rapid features, and the degree of difficulty in negotiating these. This unit provides skills to raft on rivers with fairly frequent but straightforward rapids with regular medium sized waves, less than one metre, low ledges or drops, easy eddies and gradual bends. These rivers have small obstacles that require manoeuvring around with a good command of paddling strokes. Passages through rapids are generally straightforward and can be seen from the water, although some scouting may be required.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently in the field using discretion and judgement to manage operational logistics, risk, problems and emergencies when they arise. Other leadership skills are provided in complementary units.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Rafting

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |  |
|--|--|
| 1. Prepare for the rafting activity.           | <ul style="list-style-type: none"> <li>1.1. Select clothing, footwear, personal protective, rescue and other equipment suitable for the trip conditions, and check for safe working condition.</li> <li>1.2. Prepare craft and complete safety and serviceability checks, including pressure checks on inflation.</li> <li>1.3. Waterproof, pack and stow clothing, personal resources, and food according to access requirements during trip.</li> <li>1.4. Interpret planned course from activity plans and maps to assist in following the course.</li> <li>1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.</li> <li>1.6. Confirm protocols for communications between team members.</li> <li>1.7. Fit and adjust personal protective equipment to ensure comfort and safety.</li> </ul> |
| 2. Launch raft and complete participant drill. | <ul style="list-style-type: none"> <li>2.1. Select launch site according to river conditions and participant abilities.</li> <li>2.2. Board participants in seating positions appropriate to their paddling, swimming and physical abilities.</li> <li>2.3. Launch raft using technique suitable for river conditions and participant abilities.</li> <li>2.4. Inform participants of guide commands and strokes to be used.</li> <li>2.5. Demonstrate and explain correct stroke technique, and engage participants in practice.</li> <li>2.6. Check and confirm participant stroke abilities and understanding of communication protocols.</li> </ul>  |
| 3. Manoeuvre rafts on grade 2 rivers.          | <ul style="list-style-type: none"> <li>3.1. Identify hydrological features from the water and utilise favourably to control and manoeuvre raft.</li> <li>3.2. Control direction of raft forward, in reverse and sideways using a range of appropriate strokes and combinations.</li> <li>3.3. Maintain appropriate posture, use of trunk rotation,</li> </ul>  |

- paddle and blade to efficiently paddle the raft.
- 3.4. Utilise appropriate padding strokes and techniques to cross currents and break into and out of eddies.
  - 3.5. Avoid or negotiate obstacles and hazards using a combination of strokes, paddling techniques and weight shifts.
  - 3.6. Maintain control over participant paddling, providing prompt and clear commands.
  - 3.7. Maintain visual contact and effective communication with participants, other rafts and guides in party throughout all activities.
  - 3.8. Monitor party formation, paddling pace and space between rafts and make required adjustments.
4. Plan and run routes through grade 2 rapids.
    - 4.1. Scout rapids from the water and shore to identify hydrological features, hazards and impediments.
    - 4.2. Assess features and hazards to determine a safe route through rapids.
    - 4.3. Plan route through rapids accounting for participant abilities; communicate route, strokes and manoeuvres.
    - 4.4. Identify reference points to guide chosen passage through rapids.
    - 4.5. Run predetermined route using avoidance techniques and commands to safely negotiate river hazards.
    - 4.6. Use efficient paddling techniques and strokes and utilise hydrological features to assist in turning and crossing currents.
  5. Perform swimmer and capsize rescues.
    - 5.1. Assist ejected participants in moving water using reach techniques and assist to re-enter raft.
    - 5.2. Rescue self in water, maintaining position upstream of raft, retrieve paddle and re-enter craft.
    - 5.3. Promptly reach and recover capsized raft using techniques to re-establish upright raft.
    - 5.4. Manage capsize response of participants and take actions appropriate to situation.
  6. Land and secure rafts.
    - 6.1. Select a suitable location to exit the river, and to allow for any subsequent re-entries.
    - 6.2. Land and disembark raft using techniques suitable for river conditions and participant abilities.
    - 6.3. Select a secure bank feature and secure raft using appropriate knots.
    - 6.4. Secure raft for road transport, on activity conclusion, using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret detailed and familiar organisational safety and emergency response procedures</li> <li>interpret straightforward but potentially unfamiliar information on maps</li> <li>interpret factual activity plan information in familiar formats.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret and calculate numerical data involving river gradients, distances, times and speed of currents.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>pro-actively and cooperatively work within teams of guides and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>manage own timing to complete activities within planned timeframes.</li> </ul>

# Assessment Requirements for SISORAF001 Guide a raft on grade 2 rivers

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three rafting trips on different rivers or different section of the same river
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - use different locations to launch and land rafts to include:
    - the bank in moving water
    - ledges
    - eddies
  - run routes through at least four rapids
  - consistently control direction of rafts forward, in reverse and sideways using this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - draw stroke
    - Pry
    - emergency stop
  - utilise the following techniques while consistently controlling the raft:
    - combining strokes to effectively manoeuvre the raft
    - breaking in and out of eddies and currents
    - forward and reverse ferry gliding
    - eddy hopping
    - weight shifting
    - using hydrological features to assist with paddling, controlling the raft and negotiating rapids
- participate in simulations to:
  - complete two self-rescues in moving water and re-enter the raft
  - complete two rescues of an ejected person, one at any given time, and assist re-entry to raft

- compete two capsize rescues, re-establish the upright raft, assist a minimum of three swimmers simultaneously in the water to re-enter or reach the shore, and take the raft to the shore on at least one occasion.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for rafting activities
- suitable clothing and footwear for rafting activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear and exposure suits
  - types of footwear suitable for rafting including specialist sandals, river or paddling shoes and their advantages over other types of footwear
  - features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for grade 2 river conditions and how to fit and adjust these for comfort and safety
- types of white water rafts suitable for use in grade 2 river conditions and:
  - location and function of different parts of the raft
  - different construction materials, effects on performance, advantages and disadvantages
  - design features including size, handling characteristics and limitations: manoeuvrability, stability and speed
  - pressure requirements and factors which affect different levels of inflation
- types of paddles suitable for use with rafts used in grade 2 river conditions, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry rafts
- equipment features and techniques used to secure rafts to the bank and for transportation
- communication protocols for group rafting activities to include:
  - guide commands:
    - forward paddle
    - back paddle
    - left and right turn
    - over left and right
    - hold on
    - lean in

- high side
- on the job
- stop
- calls
- hand and paddle signals
- whistles
- the International River Grading system:
  - strengths and limitations of the grading system; what is covered and not covered in classifications
  - specifications for grade 2 rivers
  - examples of local rivers attributed as grade 2
- typical hydrology features and hazards for grade 2 rivers, how to recognise features from the shore and water, and techniques used to safely negotiate hazards:
  - currents
  - eddies
  - waves
  - strainers
  - holes
  - stoppers
  - sieves
  - rocks, including undercut rocks
  - waterfalls
  - downstream and upstream Vs
  - boils
  - pour overs
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation
  - sections of dark, deep or cold water
  - other boating traffic
  - exposure to lightning, storms and strong winds
  - prolonged emersion in cold water
- different locations that can be used to embark, launch, land and disembark rafts in grade 2 waters including:
  - the bank in moving water
  - ledges
  - eddies
- for each of the above locations:

- factors that affect selection
- advantages and disadvantages of use
- techniques used to embark groups of participants, launch and land
- a range of strokes used in grade 2 river conditions to direct rafts forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps
  - draw stroke
  - Pry
  - emergency stop
- for each of the above strokes:
  - how to use them when paddling as the raft guide
  - correct posture and trunk rotation
  - correct hand placement on paddle and movement of top hand through the stroke
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- a range of techniques used to manoeuvre rafts in grade 2 water:
  - combining strokes and which combinations are effective
  - breaking in and out of eddies and currents
  - forward and reverse ferry gliding
  - eddy hopping
  - weight shifting
- how certain types of hydrological features can be used to assist with paddling, controlling the raft and negotiating rapids
- for rescues of ejected persons:
  - appropriate swimming strokes and techniques to use while in paddling gear in grade 2 river conditions
  - techniques used to re-enter raft from water and to assist swimmers to re-enter raft
  - aids used in rescues and how to use these effectively as rescuer and rescuee:
    - reach equipment, including improvised use of equipment on hand
    - craft and paddle as a flotation device
- for capsize rescues:
  - methods used to re-establish an upright raft, guide multiple swimmers and their re-entry to raft and importance of head count
  - methods for taking a raft to shore
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots

- quick release knots.

## Assessment Conditions

Skills must be demonstrated on different rivers or different sections of the same grade 2 rivers which must feature the following:

- fairly frequent but straightforward rapids
- rapids with regular medium sized waves, less than one metre
- low ledges or drops, easy eddies and gradual bends
- small obstacles that require manoeuvring around
- passages through rapids that are generally straightforward and can be seen from the water, although some may require scouting.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants whom the individual guides during rafting activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for grade 2 river conditions
- helmets
- pea-less whistles not affected by water
- white water rafts suitable for grade 2 river conditions
- raft paddles
- ropes and tie down straps
- rescue equipment:
  - reach equipment
  - flip lines
  - towlines
  - carabiners, Prusik cords and tape sling
  - knives
- activity plans to include details of planned route
- template safety checklists
- information about the International River Grading System
- organisational safety and emergency response procedures for rafting activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a white water rafting leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISORAF002 Guide a raft on grade 3 rivers

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to control a raft as a leader, with participants on board, on rivers with grade 3 rapids, and according to planned and scouted courses. It requires the ability to implement rescue processes for ejected swimmers and self, and to manage capsize responses. Other rescue skills are covered in complementary units.

Grade 3 refers to the International River Grading System which provides a broad indication of a river's rapid features, and the degree of difficulty in negotiating these. This unit provides skills to raft on rivers with rapids which have fairly high waves, one to two metres tall, broken water, and strong currents and eddies. These rivers have significant obstacles including large holes, exposed rocks and small falls that require manoeuvring around using proficient paddling. Passages through rapids may be difficult to recognise from the river and inspection from the bank is usually required.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently in the field using discretion and judgement to manage operational logistics, risk, problems and emergencies when they arise. Other leadership skills are provided in complementary units.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Rafting

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Prepare for the rafting activity.

2. Launch raft and complete participant drill.

3. Manoeuvre rafts on grade 3 rivers.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Select clothing, footwear, personal protective, rescue, and other equipment suitable for the trip conditions, and check for safe working condition.

1.2. Prepare craft and complete safety and serviceability checks, including pressure checks on inflation.

1.3. Waterproof, pack and stow clothing, personal resources, and food according to access requirements during trip.

1.4. Interpret planned course from activity plans and maps to assist in following the course.

1.5. Confirm activity safety and emergency response procedures to ensure compliance during activities.

1.6. Confirm protocols for communications between team members.

1.7. Fit and adjust personal protective equipment to ensure comfort and safety.

2.1. Select launch site according to river conditions and participant abilities.

2.2. Board participants in seating positions appropriate to their paddling, swimming and physical abilities.

2.3. Launch raft using technique suitable for river conditions and participant abilities.

2.4. Inform participants of guide commands and strokes to be used.

2.5. Demonstrate and explain correct stroke technique, and engage participants in practice.

2.6. Check and confirm participant stroke abilities and understanding of communication protocols.

3.1. Identify hydrological features from the water and utilise favourably to control and manoeuvre raft.

3.2. Control direction of raft forward, in reverse and sideways using a range of appropriate strokes and combinations.

3.3. Maintain appropriate posture, use of trunk rotation,

- paddle and blade to efficiently paddle the raft.
- 3.4. Utilise appropriate padding strokes and techniques to cross currents and break into and out of eddies.
  - 3.5. Avoid or negotiate obstacles and hazards using a combination of strokes, paddling techniques and weight shifts.
  - 3.6. Maintain control over participant paddling, providing prompt and clear commands.
  - 3.7. Maintain visual contact and effective communication with participants, other rafts and guides in party throughout all activities.
  - 3.8. Monitor party formation, paddling pace and space between rafts and make required adjustments.
4. Plan and run routes through grade 3 rapids.
    - 4.1. Scout rapids from the water and shore to identify hydrological features, hazards and impediments.
    - 4.2. Assess features and hazards to determine a safe route through rapids.
    - 4.3. Plan route through rapids accounting for participant abilities; communicate route, strokes and manoeuvres.
    - 4.4. Identify reference points to guide chosen passage through rapids.
    - 4.5. Run predetermined route using avoidance techniques and commands to safely negotiate river hazards.
    - 4.6. Use efficient paddling techniques and strokes and utilise hydrological features to assist in turning and crossing currents.
  5. Perform swimmer and capsize rescues.
    - 5.1. Assist ejected participants in moving water using reach techniques and assist to re-enter raft.
    - 5.2. Rescue self in water, maintaining position upstream of raft, retrieve paddle and re-enter craft.
    - 5.3. Promptly reach and recover capsized raft using techniques to re-establish upright raft.
    - 5.4. Manage capsize response of participants and take actions appropriate to situation.
  6. Land and secure rafts.
    - 6.1. Select a suitable location to exit the river, and to allow for any subsequent re-entries.
    - 6.2. Land and disembark raft using techniques suitable for river conditions and participant abilities.
    - 6.3. Select a secure bank feature and secure raft using appropriate knots.
    - 6.4. Secure raft for road transport, on activity conclusion, using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret detailed and familiar organisational safety and emergency response procedures</li> <li>interpret straightforward but potentially unfamiliar information on maps</li> <li>interpret factual activity plan information in familiar formats.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>interpret and calculate numerical data involving river gradients, distances, times and speed of currents.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>pro-actively and cooperatively work within teams of guides and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>manage own timing to complete activities within planned timeframes.</li> </ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISORAF002 Guide a raft on grade 3 rivers

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three rafting trips on different rivers or different sections of the same river
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - use different locations to launch and land rafts to include:
    - the bank in moving water
    - ledges
    - eddies
  - run routes through at least four rapids
  - consistently control direction of rafts forward, in reverse and sideways using this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - draw stroke
    - Pry
    - emergency stop
  - utilise the following techniques while consistently controlling the raft:
    - combining strokes to effectively manoeuvre the raft
    - breaking in and out of eddies and currents
    - forward and reverse ferry gliding
    - eddy hopping
    - weight shifting
    - using hydrological features to assist with paddling, controlling the raft and negotiating rapids
- participate in simulations to:
  - complete two self-rescues in moving water and re-enter the raft
  - complete two rescues of an ejected person, one at any given time, and assist re-entry to raft

- compete two capsize rescues, re-establish the upright raft, assist a minimum of three swimmers simultaneously in the water to re-enter or reach the shore, and take the raft to the shore on at least one occasion.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for rafting activities
- suitable clothing and footwear for rafting activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear and exposure suits
  - types of footwear suitable for rafting including specialist sandals, river or paddling shoes and their advantages over other types of footwear
  - features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of personal lifejackets and helmets suitable for grade 3 river conditions and how to fit and adjust these for comfort and safety
- types of white water rafts suitable for use in grade 3 river conditions and:
  - location and function of different parts of the raft
  - different construction materials, effects on performance, advantages and disadvantages
  - design features including size, handling characteristics and limitations: manoeuvrability, stability and speed
  - pressure requirements and factors which affect different levels of inflation
- types of paddles suitable for use with rafts used in grade 3 river conditions, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry rafts
- equipment features and techniques used to secure rafts to the bank and for transportation
- communication protocols for group rafting activities to include:
  - guide commands:
    - forward paddle
    - back paddle
    - left and right turn
    - over left and right
    - hold on
    - lean in

- high side
- on the job
- stop
- calls
- hand and paddle signals
- whistles
- the International River Grading system:
  - strengths and limitations of the grading system; what is covered and not covered in classifications
  - specifications for grade 3 rivers
  - examples of local rivers attributed as grade 3
- typical hydrology features and hazards for grade 3 rivers, how to recognise features from the shore and water, and techniques used to safely negotiate hazards:
  - currents
  - eddies
  - waves
  - strainers
  - holes
  - stoppers
  - sieves
  - rocks, including undercut rocks
  - waterfalls
  - downstream and upstream Vs
  - boils
  - pour overs
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation
  - sections of dark, deep or cold water
  - other boating traffic
  - exposure to lightning, storms and strong winds
  - prolonged emersion in cold water
- different locations that can be used to embark, launch, land and disembark rafts in grade 3 waters including:
  - the bank in moving water
  - ledges
  - eddies
- for each of the above locations:

- factors that affect selection
- advantages and disadvantages of use
- techniques used to embark groups of participants, launch and land
- a range of strokes used in grade 3 river conditions to direct rafts forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps
  - draw stroke
  - Pry
  - emergency stop
- for each of the above strokes:
  - how to use them when paddling as the raft guide
  - correct posture and trunk rotation
  - correct hand placement on paddle and movement of top hand through the stroke
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- a range of techniques used to manoeuvre rafts in grade 3 water:
  - combining strokes and which combinations are effective
  - breaking in and out of eddies and currents
  - forward and reverse ferry gliding
  - eddy hopping
  - weight shifting
- how certain types of hydrological features can be used to assist with paddling, controlling the raft and negotiating rapids
- for rescues of ejected persons:
  - appropriate swimming strokes and techniques to use while in paddling gear in grade 3 river conditions
  - techniques used to re-enter raft from water and to assist swimmers to re-enter raft
  - aids used in rescues and how to use these effectively as rescuer and rescuee:
    - reach equipment, including improvised use of equipment on hand
    - craft and paddle as a flotation device
- for capsize rescues:
  - methods used to re-establish an upright raft, guide multiple swimmers and their re-entry to raft and importance of head count
  - methods for taking a raft to shore
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots

- quick release knots.

## Assessment Conditions

Skills must be demonstrated on different rivers or different section of the same grade 3 rivers which must feature the following:

- rapids which have fairly high waves, one to two metres tall
- broken water, strong currents and eddies
- significant obstacles including large holes, exposed rocks and small falls that require manoeuvring around
- passages through rapids are difficult to recognise from the river and inspection from the bank is usually required

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants whom the individual guides during rafting activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for grade 3 river conditions
- helmets
- pea-less whistles not affected by water
- white water rafts suitable for grade 3 river conditions
- raft paddles
- ropes and tie down straps
- rescue equipment:
  - reach equipment
  - flielines
  - towlines
  - carabiners, Prusik cords and tape sling
  - knives
- activity plans to include details of planned route
- template safety checklists
- information about the International River Grading System
- organisational safety and emergency response procedures for rafting activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a white water rafting leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISORAF003 Guide a raft on grade 4 rivers

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to control a raft as a leader, with participants on board, on rivers with grade 4 rapids, and according to planned and scouted courses. It requires the ability to implement rescue processes for ejected swimmers and self, and to manage capsizing responses. Other rescue skills are covered in complementary units.

Grade 4 refers to the International River Grading System which provides a broad indication of a river's rapid features, and the degree of difficulty in negotiating these. This unit provides skills to raft on rivers with difficult rapids which have high irregular waves, difficult broken water, strong powerful and confused currents, and often boiling or strongly recirculating eddies. These rivers have significant and often constant obstacles, including exposed rocks, ledges, large drops and stoppers that require precise and sequential manoeuvring. Passages through rapids are difficult to recognise from the river, and scouting would be required.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently in the field using discretion and judgement to manage operational logistics, risk, problems and emergencies when they arise. Other leadership skills are provided in complementary units.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

# Assessment Requirements for SISORAF003 Guide a raft on grade 4 rivers

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three rafting trips on different rivers or different sections of the same river
- during each trip:
  - consistently follow safety procedures and safely negotiate hazards
  - use different locations to launch and land rafts to include:
    - the bank in moving water
    - ledges
    - eddies
  - run routes through at least four rapids
  - consistently control direction of rafts forward, in reverse and sideways using this range of strokes:
    - forward and reverse paddle
    - forward and reverse sweeps
    - draw stroke
    - Pry
    - emergency stop
  - utilise the following techniques while consistently controlling the raft:
    - combining strokes to effectively manoeuvre the raft
    - breaking in and out of eddies and currents
    - forward and reverse ferry gliding
    - eddy hopping
    - weight shifting
    - paddling through holes
    - paddling over drops
    - using rocks to stop
    - using hydrological features to assist with paddling, controlling the raft and negotiating rapids
- participate in simulations to:
  - complete two self-rescues in moving water and re-enter the raft

- complete two rescues of an ejected person, one at any given time, and assist re-entry to raft
- complete two capsize rescues, re-establish the upright raft, assist a minimum of three swimmers simultaneously in the water to re-enter or reach the shore, and take the raft to the shore on at least one occasion.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for rafting activities
- suitable clothing and footwear for rafting activities:
  - types of clothing and fabrics that protect against the effects of weather and water conditions including sun, temperatures, winds, and precipitation of different levels and extremes
  - reasons for layering clothes
  - effective design and construction features of waterproof gear and exposure suits
  - types of footwear suitable for rafting including specialist sandals, river or paddling shoes and their advantages over other types of footwear
  - features and uses of gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets and helmets suitable for grade 4 river conditions and how to fit and adjust these for comfort and safety
- types of white water rafts suitable for use in grade 4 river conditions and:
  - location and function of different parts of the raft
  - different construction materials, effects on performance, advantages and disadvantages
  - design features including size, handling characteristics and limitations: manoeuvrability, stability and speed
  - pressure requirements and factors which affect different levels of inflation
- types of paddles suitable for use with rafts used in grade 4 river conditions, different construction materials and designs, effects on performance, advantages and disadvantages
- techniques used to effectively stow items:
  - for ease of access and maximum usage of space
  - for stability of craft and minimal effect on trim
  - to waterproof clothing, food and resources
- safe manual handling techniques used to lift and carry rafts
- equipment features and techniques used to secure rafts to the bank and for transportation
- communication protocols for group rafting activities to include:
  - guide commands:
    - forward paddle
    - back paddle
    - left and right turn
    - over left and right

- hold on
- lean in
- high side
- on the job
- stop
- calls
- hand and paddle signals
- whistles
- the International River Grading system:
  - strengths and limitations of the grading system; what is covered and not covered in classifications
  - specifications for grade 4 rivers
  - examples of local rivers attributed as grade 4
- typical hydrology features and hazards for grade 4 rivers, how to recognise features from the shore and water, and techniques used to safely negotiate hazards:
  - currents
  - eddies
  - waves
  - strainers
  - holes
  - stoppers
  - sieves
  - rocks, including undercut rocks
  - waterfalls
  - downstream and upstream Vs
  - boils
  - pour overs
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation
  - sections of dark, deep or cold water
  - other boating traffic
  - exposure to lightning, storms and strong winds
  - prolonged emersion in cold water
- different locations that can be used to embark, launch, land and disembark rafts in grade 4 waters including:
  - the bank in moving water
  - ledges

- eddies
- for each of the above locations:
  - factors that affect selection
  - advantages and disadvantages of use
  - techniques used to embark groups of participants, launch and land
- a range of strokes used in grade 4 river conditions to direct rafts forward, in reverse and sideways:
  - forward and reverse paddle
  - forward and reverse sweeps
  - draw stroke
  - Pry
  - emergency stop
- for each of the above strokes:
  - how to use them when paddling as the raft guide
  - correct posture and trunk rotation
  - correct hand placement on paddle and movement of top hand through the stroke
  - wrist movement required to enable correct blade placement in water
  - correct paddle entry and exit points in relation to craft and body position
  - appropriate paddle depth in water to achieve effective stroke
  - correct paddle blade angle throughout stroke
- a range of techniques used to manoeuvre rafts in grade 4 water:
  - combining strokes and which combinations are effective
  - breaking in and out of eddies and currents
  - forward and reverse ferry gliding
  - eddy hopping
  - weight shifting
  - paddling through holes
  - paddling over drops
  - using rocks to stop
- how certain types of hydrological features can be used to assist with paddling, controlling the raft and negotiating rapids
- for rescues of ejected persons:
  - appropriate swimming strokes and techniques to use while in paddling gear in grade 4 river conditions
  - techniques used to re-enter raft from water and to assist swimmers to re-enter raft
  - aids used in rescues and how to use these effectively as rescuer and rescuee:
    - reach equipment, including improvised use of equipment on hand
    - craft and paddle as a flotation device
- for capsized rescues:

- methods used to re-establish an upright raft, guide multiple swimmers and their re-entry to raft and importance of head count
- methods for taking a raft to shore
- when different knots are used, advantages and disadvantages, and how to tie them:
  - knots for tying on
  - rope joining knots
  - quick release knots.

## Assessment Conditions

Skills must be demonstrated on different rivers or different sections of the same grade 4 rivers which must feature the following:

- difficult rapids which have high irregular waves
- difficult broken water, strong powerful and confused currents, boiling or strongly recirculating eddies
- significant obstacles, including exposed rocks, ledges, large drops and stoppers that require precise and sequential manoeuvring
- passages through rapids are difficult to recognise from the river and scouting would be required

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- a group of participants whom the individual guides during rafting activities
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for grade 4 river conditions
- helmets
- pea-less whistles not affected by water
- white water rafts suitable for grade 4 river conditions
- raft paddles
- ropes and tie down straps
- rescue equipment:
  - reach equipment
  - fliplines
  - towlines
  - carabiners, Prusik cords and tape sling
  - knives
- activity plans to include details of planned route

- template safety checklists
- information about the International River Grading System
- organisational safety and emergency response procedures for rafting activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a white water rafting leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISORAF004 Lead rafting activities on grade 2 rivers**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during rafting activities on grade 2 rivers according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct rafting techniques applicable to grade 2 rivers. To do this, leaders must be proficient in rafting skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |   |  |
|---|--|
| <p>1. Prepare equipment and participants.</p>   | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for the activity and anticipated weather conditions.</p> <p>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.</p>  |
| <p>2. Brief participants and demonstrate rafting techniques applicable to grade 2 rivers.</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate for the activity.</p> <p>2.6. Check and confirm participant ability to use and control equipment before activity commencement.</p> <p>2.7. Check matching of equipment and activities to participants and amend as required.</p> |
| <p>3. Lead and supervise rafting activities on grade 2 rivers.</p>                            | <p>3.1. Supervise activity according to designated role, adjusting position and role as required.</p> <p>3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.</p> <p>3.3. Provide clear and accurate instructions and or</p>  |

- demonstrations throughout the session.
- 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
4. Manage safety during rafting activities on grade 2 rivers.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### SKILLS

### DESCRIPTION

Reading skills to:

- interpret detailed familiar organisational policies and procedures.

- Writing skills to:
- use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.
- Oral communications skills to:
- provide clear and unambiguous instructions to participants using language and terms easily understood
  - ask open and closed probe questions and actively listen to determine participants' understanding of instructions.
- Teamwork skills to:
- pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.
- Planning and organising skills to:
- manage own timing and that of participants to complete activities within organisational service times.

## Unit Mapping Information

No equivalent unit.

## Assessment Requirements for SISORAF004 Lead rafting activities on grade 2 rivers

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three rafting sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for rafting activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to rafting activities on grade 2 rivers:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated on grade 2 rivers which must feature the following:

- fairly frequent but straightforward rapids
- rapids with regular medium sized waves, less than one metre
- low ledges or drops, easy eddies and gradual bends
- small obstacles that require manoeuvring around
- passages through rapids that are generally straightforward and can be seen from the water, although some may require scouting.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for grade 2 river conditions

- helmets
- pea-less whistles not affected by water
- white water rafts suitable for grade 2 river conditions
- raft paddles
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for rafting activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a rafting leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISORAF005 Lead rafting activities on grade 3 rivers

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during rafting activities on grade 3 rivers according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct rafting techniques applicable to grade 3 rivers. To do this, leaders must be proficient in rafting skills which are covered by other units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

## Assessment Requirements for SISORAF005 Lead rafting activities on grade 3 rivers

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three rafting sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for rafting activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to rafting activities on grade 3 rivers:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated on grade 3 rivers which must feature the following:

- rapids which have fairly high waves, one to two metres tall
- broken water, strong currents and eddies
- significant obstacles including large holes, exposed rocks and small falls that require manoeuvring around
- passages through rapids are difficult to recognise from the river and inspection from the bank is usually required.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for grade 3 river conditions

- helmets
- pea-less whistles not affected by water
- white water rafts suitable for grade 3 river conditions
- raft paddles
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for rafting activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a rafting leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## Assessment Requirements for SISORAF006 Lead rafting activities on grade 4 rivers

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead three rafting sessions for a group of participants according to predetermined activity plans
- across the three sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
- utilise options provided in Assessment Conditions to:
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for rafting activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to rafting activities on grade 4 rivers:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these.

## Assessment Conditions

Skills must be demonstrated on grade 4 rivers which must feature the following:

- difficult rapids which have high irregular waves
- difficult broken water, strong powerful and confused currents, boiling or strongly recirculating eddies
- significant obstacles, including exposed rocks, ledges, large drops and stoppers that require precise and sequential manoeuvring
- passages through rapids are difficult to recognise from the river and scouting would be required.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- rescue equipment.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing and footwear suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for grade 4 river conditions

- helmets
- pea-less whistles not affected by water
- white water rafts suitable for grade 4 river conditions
- raft paddles
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for rafting activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a rafting leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISORSC001 Conduct search and rescue

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to conduct a search and rescue within an activity-specific context. It requires the ability to fully assess the situation, develop a response plan and complete searches and rescues using methods and equipment appropriate for the situation.

It applies to senior leaders, guides or instructors, and others who use discretion and judgement to manage significant problems and emergencies when they arise.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

Rescue Operations

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Assess the situation and make plans.
  - 1.1. Assess situation, identify hazards promptly, assess risks and manage to avoid injury to self and others.
  - 1.2. Assess probable and possible location of lost participants and define search area.
  - 1.3. Identify any known location and condition of participants in need of rescue.
  - 1.4. Determine a suitable search and or rescue method according to situation and in line with organisational emergency response policies and procedures.
  - 1.5. Select suitable equipment and resources to complete search or rescue.
  - 1.6. Develop a response plan to include contingencies, roles and responsibilities of others.
  - 1.7. Relay information to base as able and required.
2. Conduct search.
  - 2.1. Provide clear and concise search instructions and information to others.
  - 2.2. Advise search participants of communication processes and contingency plans.
  - 2.3. Conduct search methodically using search techniques appropriate for situation.
3. Conduct rescue.
  - 3.1. Identify immediate hazards, assess risks and negotiate to avoid injury to self and others.
  - 3.2. Establish communication with rescuee and provide clear and concise instructions and information throughout the rescue.
  - 3.3. Determine condition of persons in need of rescue.
  - 3.4. Brief others involved in rescue and provide clear and concise instructions throughout rescue.
  - 3.5. Use equipment and rescue techniques appropriate to situation.
  - 3.6. Determine ambulatory status of rescued persons and use or construct an evacuation structure as required.
  - 3.7. Evaluate and monitor condition of rescued persons and determine need for first aid, medical treatment or evacuation.
4. Seek outside assistance.
  - 4.1. Identify situations requiring outside assistance and alert search or rescue authorities to initiate search or rescue.
  - 4.2. Hand over search or rescue to relevant authorities according to organisational policies and procedures.
5. Debrief and complete reports.
  - 5.1. Participate in incident management debrief and identify future response improvements.
  - 5.2. Complete required incident reports according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed familiar organisational policies and procedures for emergency response.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>record detailed and accurate factual information about search and rescue responses.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>critically analyse all circumstances and implications to coordinate a considered response to search and rescue requirements.</li></ul>
Technology skills to:	<ul style="list-style-type: none"><li>use the features of emergency communication equipment to relay information about search and rescue requirements.</li></ul>

# Assessment Requirements for SISORSC001 Conduct search and rescue

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete two simulated searches for lost parties using methods suitable for the land or water based environment
- complete two simulated rescues using methods and equipment suitable for the circumstance
- during each of the above search and rescue operations, designate roles and responsibilities to team members and participants to effectively conduct operations
- for one of the above search or rescue operations, seek outside assistance from search or rescue authorities
- for each search and rescue operation, participate in a debrief and complete an incident report.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational emergency response policies and procedures
- roles and responsibilities that can be allocated to team members and participants to effectively conduct a search and a rescue
- hazards and risks associated with search and rescue situations and methods uses to manage these
- search methods, suitability for different circumstances, effectiveness and limitations to include those for:
  - ground searches
  - water based searches
- rescue methods, suitability for different circumstances, effectiveness and limitations:
  - use of hand line
  - support techniques
  - use of flotation aids
- specific to the particular type of outdoor recreation activity:
  - key features, functions and use of rescue equipment
  - evacuation equipment and how to improvise a structure if none available

- key considerations for seeking outside assistance:
  - failed search or rescue
  - area of search exceeds ability to cover
  - weather, topography and time limitations
  - limitations of rescuer skill
  - inability to access person in need of rescue
  - condition of person in need of rescue and need for medical attention
- functions of search and rescue authorities and how to contact:
  - police search and rescue
  - State Emergency Services (SES)
  - volunteer rescue agencies
  - ski patrol, as relevant.

## Assessment Conditions

Skills must be demonstrated in an environment specific to the particular type of outdoor recreation activity.

First aid equipment must be available to replicate industry conditions of operation.

Assessments can only be completed through simulated activities. Simulations must incorporate time critical requirements.

Assessment must ensure use of:

- people who act as team members, participants, rescuees and external service providers with whom the individual interacts during simulated activities
- rescue equipment specific to the particular type of outdoor recreation activity
- communication equipment for emergency response
- template incident reports
- organisational emergency response policies and procedures.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a recreational activity leader, guide or instructor; or as a search and rescue operator where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISORSC002 Perform vertical rescues

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to establish ropes and belays for rescue rope systems, and to use single rope techniques and mechanical advantage systems to rescue self and others during single pitch activities.

Vertical single rope rescue skills are required in a range of activity contexts which can include abseiling, climbing, canyoning and caving.

It applies to leaders, guides or instructors, and others who use discretion and judgement to manage problems and emergencies when they arise.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Rescue Operations

### Unit Sector

Outdoor Recreation

### Elements and Performance Criteria

#### ELEMENTS

#### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Determine rescue requirements and prepare for rescue.
  - 1.1. Assess situation, identify hazards promptly, assess risks and manage to avoid injury to self and others.
  - 1.2. Determine appropriate rescue methods and techniques for situation and according to needs of person to be rescued.
  - 1.3. Select equipment required for single rope rescues.
  - 1.4. Determine roles and responsibilities of others; complete a briefing and provide clear and concise instructions throughout rescue.
  - 1.5. Implement rescue operations according to organisational policies and procedures for emergency response.
2. Establish systems for vertical rescues.
  - 2.1. Determine need for use of mechanical advantage systems, identify and establish type appropriate for the rescue situation.
  - 2.2. Select and rig or establish multiple anchors, ensuring equalisation and minimise potential for shock loading.
  - 2.3. Promptly establish rescue systems required to raise and lower persons from a single pitch.
  - 2.4. Rig single rescue rope to minimise effects of rope stretch and rub points and for efficient descent and ascent during rescue.
  - 2.5. Establish belays suitable for rescue circumstance and to ensure personal safety during rescues.
  - 2.6. Verify manufacturers' recommendations, equipment limitations and safety margins, and rig equipment accordingly.
3. Descend and ascend a pitch using single rope techniques.
  - 3.1. Attach and adjust belay equipment to self and tie knots suitable for the established belay system.
  - 3.2. Descend and ascend a fixed rope efficiently, using and adjusting techniques suitable for circumstances.
  - 3.3. Safely approach, avoid or negotiate hazards to descend and ascend in a controlled manner.
  - 3.4. Utilise techniques and equipment to adjust the single rope rig.
  - 3.5. Choose optimum position and complete safe and efficient changeovers between descending and ascending.
  - 3.6. Use techniques that minimise damage to equipment and the surface during activities.
4. Rescue others.
  - 4.1. Establish communication with rescuee and provide clear and concise instructions and information throughout the rescue.

- 4.2. Operate rescue system to raise and lower persons from a single pitch.
- 4.3. Safely and efficiently escape a loaded belay system and transfer from belay device to direct connection to anchor.
- 4.4. Maintain safety of self, others and rescuee throughout rescue operations.
5. Rescue self.
  - 5.1. Determine need for self rescue, assess situation and identify suitable techniques to resolve.
  - 5.2. Anticipate hazards and utilise techniques to approach, avoid or negotiate throughout self rescue.
  - 5.3. Implement extrication techniques to release from compromised situation.
  - 5.4. Maintain personal safety throughout rescue operations.
6. Debrief and complete reports.
  - 6.1. Participate in incident management debrief and identify future response improvements.
  - 6.2. Complete required incident reports according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed familiar organisational policies and procedures for emergency response.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• record detailed and accurate factual information about rescue responses.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• complete simple calculations and approximations of loads for anchors, ropes and pulleys</li> <li>• visually estimate distances to calculate lengths for ropes.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>• pro-actively and cooperatively work within teams of operational personnel to coordinate rescue logistics, solve arising problems and effect efficient rescues.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>• critically analyse all circumstances and implications to coordinate a considered response to rescue requirements.</li> </ul>

# Assessment Requirements for SISORSC002 Perform vertical rescues

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- establish systems for and complete the following simulated vertical rescues:
  - two rescues of conscious persons
  - two self rescues
- across the four rescues, collectively utilise the following equipment, techniques and methods:
  - select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
  - mechanical advantage systems which include simple pulley systems with one moving pulley
  - raising rescuee
  - lowering rescuee
  - single rope techniques including:
    - changeovers from descending to ascending
    - changeovers from ascending to descending
    - changeover to another system while suspended on a rope
  - bypassing knots
- for each rescue operation
  - designate roles and responsibilities to team members and participants to effectively complete rescues
  - maintain effective communication with the rescuee
  - participate in a debrief and complete an incident report.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for emergency response
- roles and responsibilities that can be allocated to team members and participants to effectively complete a single rope rescue
- features, functions, advantages and disadvantages of different types of anchors:

- fixed artificial
- naturally occurring
- artificial removable:
- the effects of rope stretch during single rope operations and implications if not minimised:
  - abrasions
  - rope bounce
  - undue stress on the anchor system
  - stretch increases haulage effort
  - potential for rescuer and rescuee to impact with hazards, or become entangled or further entangled
- features and functions of equipment used for single rope descents and ascents, and their specific application to rescue operations:
  - belay systems:
    - top rope top belay
    - bottom brake
    - self-belay
  - descending devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - harnesses of different types
  - carabiners
  - maillon rapides
  - static and dynamic rope and when each might be used
  - rope protectors
  - tape
  - sewn sling
  - personal attachment systems, including cow's tails
  - Prusik cords
  - foot loops

- mechanical ascenders
- mechanical advantage systems; simple pulley systems with one moving pulley
- how the following factors affect the selection and rigging of above equipment for single rope rescues:
  - site characteristics including position of rub points
  - weather and environmental conditions
  - rescuer's size, weight, and ability
- manufacturers' specifications for equipment use
- techniques used to:
  - establish belay systems for single rope rescues
  - close the system; advantages and disadvantages of doing so
- when different knots are used in rigging, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight
  - end to end joining
  - termination
  - load control hitches
  - slide and grip hitches
- safety requirements at the pitch head including use of personal attachment systems
- techniques used to adjust the rope rig to include those for changing:
  - cord length
  - types of ascenders and descenders
  - type of ascending action used
- single rope rescue techniques used to:
  - raise and lower conscious persons from single pitches
  - descend and ascend a fixed rope
  - lock off during descent
  - changeover from descending to ascending
  - changeover from ascending to descending
  - changeover to another system while suspended on a rope
  - bypass knots
  - secure rescuer and escape from a loaded belay system
- typical hazards associated with single rope descents and ascents, and techniques used to safely negotiate.

## Assessment Conditions

Skills must be demonstrated in an above or below ground single pitch environment which might include cliff faces, canyons or caves with vertical to near vertical surfaces.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessments can only be completed through simulated activities. Simulations must incorporate time critical requirements.

Assessment must ensure use of:

- people who act as team members, participants and rescuees with whom the individual interacts during simulated rescues
- personal protective equipment to include:
  - gloves, as required
  - abseiling or climbing helmets
  - harnesses
- anchors which can include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- single rope abseiling equipment:
  - carabiners
  - maillon rapides
  - rope which can include static and or dynamic rope
  - rope protectors
  - tape or sewn sling
  - personal attachment systems, including cow's tails
  - Prusik cords
  - foot loops
  - mechanical ascenders
  - descending devices
  - belay devices
  - mechanical advantage systems
- template incident reports
- organisational policies and procedures for emergency response.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a recreational activity leader, guide or instructor; or as a rescue operator where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISORSC003 Perform complex vertical rescues

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to establish ropes and belays for rescue rope systems, and to use rope rescue techniques and mechanical advantage systems to rescue self and others during single and multi pitch activities. Complex situations may involve bad or extreme weather, unconscious persons, numerous environmental hazards or a combination of many factors.

Complex rope rescue skills are required in a range of activity contexts which can include abseiling, climbing, canyoning and caving.

It applies to senior leaders, guides or instructors, and others who use discretion and judgement to manage significant problems and emergencies when they arise.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

# Assessment Requirements for SISORSC003 Perform complex vertical rescues

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- establish systems for and complete the following simulated vertical rescues:
  - one rescue of a conscious person
  - two rescues of unconscious persons
  - two self rescues
- across the five rescues, collectively utilise the following equipment, techniques and methods:
  - select and tie at least four different types of knots suitable for the system type established, and appropriate for the intended load and function
  - mechanical advantage systems which include compound pulley systems with more than one moving pulley
  - rescue from above
  - rescue from below
  - raising rescuee
  - lowering rescuee
  - rescue with assisted haul from other team member(s)
  - single rope techniques including:
    - changeovers from descending to ascending
    - changeovers from ascending to descending
    - changeover to another system while suspended on a rope
  - bypassing knots
  - tandem descent
  - pluck off
  - rescue from a traverse
  - transfer load from one rope to another
- for each rescue operation
  - designate roles and responsibilities to team members and participants to effectively complete rescues
  - maintain effective communication with the rescuee
  - participate in a debrief and complete an incident report.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for emergency response
- roles and responsibilities that can be allocated to team members and participants to effectively complete a complex rope rescue
- key considerations for determining rescue methods and techniques for complex rescues:
  - site topography and access to person to be rescued
  - severity of site hazards
  - degree of urgency to avoid situation worsening
  - weather conditions
  - condition of person to be rescued
  - rescue abilities of self and team members
  - availability of equipment and human resources
- features, functions, advantages and disadvantages of different types of anchors:
  - fixed artificial
  - naturally occurring
  - artificial removable
- features, functions and operation of equipment used for complex rescues:
  - belay systems:
    - top rope top belay
    - top rope bottom belay
    - bottom brake belay
    - self-belay
    - static and live belays
  - descending devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised
  - belay devices:
    - assisted locking
    - inline
    - plate
    - figure 8
    - tubular
    - improvised

- harnesses of different types
- carabiners
- maillon rapides
- static and dynamic rope and when each might be used
- tape
- sewn sling
- personal attachment systems, including cow's tails
- Prusik cords
- foot loops
- mechanical ascenders
- releasable hitches
- mechanical advantage systems to include:
  - simple pulley systems with one moving pulley
  - compound pulley systems with more than one moving pulley
- factors that affect the selection and rigging of above equipment for complex rescues
- manufacturers' specifications for equipment use
- techniques used to:
  - establish belay systems for complex rope rescues
  - close the system; advantages and disadvantages of doing so
- when different knots are used in rigging, advantages and disadvantages, and how to tie them:
  - fixed eye
  - mid line tied in the bight
  - end to end joining
  - termination
  - load control hitches
  - slide and grip hitches
- complex rope rescue techniques used to:
  - raise and lower conscious and unconscious persons on single and multi pitches
  - rescue with assisted haul from other team member(s)
  - use a single rope and execute:
    - changeovers from descending to ascending
    - changeovers from ascending to descending
    - changeover to another system while suspended on a rope
  - bypass knots
  - complete two person (tandem) descents
  - pluck off
  - rescue from a traverse
  - transfer loads from one rope to another
  - traverse diagonally or horizontally

- secure rescuee and escape from a loaded belay system
- typical hazards associated with complex rope rescues, and techniques used to safely negotiate.

## Assessment Conditions

Skills must be demonstrated in an above or below ground environment which might include cliff faces, canyons or caves.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessments can only be completed through simulated activities. Simulations must incorporate time critical requirements.

Assessment must ensure use of:

- people who act as team members, participants and rescuees with whom the individual interacts during simulated rescues
- personal protective equipment to include:
  - gloves, as required
  - abseiling or climbing helmets
  - harnesses
- anchors which can include:
  - fixed artificial
  - naturally occurring
  - artificial removable
- equipment used for complex rescues:
  - carabiners
  - maillon rapides
  - rope which can include static and or dynamic rope
  - tape or sewn sling
  - personal attachment systems, including cow's tails
  - Prusik cords
  - foot loops
  - mechanical ascenders
  - descending devices
  - belay devices
  - mechanical advantage systems
- template incident reports

- organisational policies and procedures for emergency response.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a recreational activity leader, guide or instructor; or as a rescue operator where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## SISORSC004 Self rescue in white water

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to self rescue when in water after a craft capsizes or ejection within inland white water rivers with rapids. These self rescue skills are required in a range of activity contexts which can include canoeing, kayaking and white water rafting.

It applies to leaders, guides or instructors, and others who use discretion and judgement to manage problems and emergencies when they arise.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

Nil

### Competency Field

Rescue Operations

### Unit Sector

Outdoor Recreation

### Elements and Performance Criteria

#### ELEMENTS

*Elements describe the essential outcomes*

#### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Manoeuvre self in moving water.
  - 1.1. Assess situation, identify immediate hazards and risks and promptly determine best action.
  - 1.2. Set and maintain ferry angle to balance swimming against current.
  - 1.3. Use appropriate body position and defensive swimming techniques to negotiate moving water and river hazards.
  - 1.4. Use appropriate body position and aggressive swimming techniques to negotiate moving water and to free self from river hazards.
  - 1.5. Transition between defensive and aggressive swimming and maintain body position that avoids foot entrapment.
  - 1.6. Break in and out of eddies and cross a current to reach shore.
  - 1.7. Use direction and support aids provided by others to reach shore or rescue craft.
2. Wade in moving water.
  - 2.1. Identify safe river location to wade.
  - 2.2. Wade across rivers at mid-thigh depth and negotiate swift currents, when present.
  - 2.3. Use direction and support aids provided by others to reach shore.
3. Re-enter craft.
  - 3.1. Select a method of re-entry according to physical ability, type of craft and situation.
  - 3.2. Re-enter craft with and without assistance.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Oral communications skills to:	<ul style="list-style-type: none"> <li>• use clear and unambiguous verbal and non-verbal communications to make intent known to party members.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• estimate speed of currents and depth of water.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>• critically analyse all circumstances and implications to provide a prompt and considered response to rescue requirements.</li> </ul>

# Assessment Requirements for SISORSC004 Self rescue in white water

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three simulated self rescues in one or more inland white water rivers with rapids
- during each of the above rescues:
  - consistently negotiate river hazards safely and effectively
  - use re-entry techniques suited to the type of craft utilised for the activity
- across the three rescues collectively utilise the following aids effectively as the rescuer:
  - reach equipment
  - throw bags
  - rope coils.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- typical hydrology conditions and hazards associated with self rescues on inland white water rivers with rapids, and techniques used to safely negotiate these:
  - currents
  - eddies
  - waves
  - strainers
  - holes
  - stoppers
  - sieves
  - rocks, including undercut rocks
  - waterfalls
  - downstream and upstream Vs
  - boils
  - pour overs
  - built objects – weirs, piers
  - steep or slippery banks or shore

- overhanging trees
- fallen trees on waterway
- submerged logs, rocks and vegetation
- sections of dark, deep or cold water
- other boating traffic
- appropriate swimming strokes and techniques to use while in paddling gear
- defensive swimming techniques and when to use these in white water conditions:
  - floating passively on back facing downstream
  - riding with the river current
  - pointing feet downstream, toes out of water
  - using arms and legs to avoid serious contact with obstacles
- aggressive swimming techniques and when to use these in white water conditions:
  - moving on to stomach
  - pointing head in direction of travel
  - stroking hard to move across the current
  - swimming freestyle across current
- factors that affect selection of appropriate location for wading
- shallow water wading techniques
- aids used in rescues and how to use these effectively as rescuee:
  - reach equipment, including improvised use of equipment on hand
  - throw bags
  - rope coils
  - craft and paddle as a flotation device
- for the particular type of water craft, techniques used to re-enter.

## Assessment Conditions

Skills must be demonstrated on inland white water rivers with rapids which must include, as a minimum, features of grade 2 rivers:

- fairly frequent but straightforward rapids
- rapids with regular medium sized waves, less than one metre
- low ledges or drops, easy eddies and gradual bends
- small obstacles that require manoeuvring around
- passages through rapids that are generally straightforward and can be seen from the water.

Assessments can only be completed through simulated activities. Simulations must incorporate time critical requirements.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment

- communication equipment for emergency response.

Assessment must ensure use of:

- people who act as rescuers providing aids during simulated activities
- Australian Standard, or equivalent, compliant lifejackets suitable for inland river conditions
- helmets
- pea-less whistles not affected by water
- white water craft which can include canoes, kayaks and rafts
- paddles suited to type of craft
- throw bags
- rope coils.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a recreational activity leader, guide or instructor; or as a rescue operator where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience

# SISORSC005 Rescue others in white water

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to perform rescues and recoveries on inland white water rivers with rapids. White water rescue skills are required in a range of activity contexts which can include canoeing, kayaking and white water rafting, and techniques will vary according to the type of craft.

It applies to leaders, guides or instructors, and others who use discretion and judgement to manage problems and emergencies when they arise.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

SISORSC004 Self rescue in white water

## Competency Field

Rescue Operations

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Determine rescue requirements and prepare for rescue.
  - 1.1. Assess situation, identify hazards promptly, assess risks and manage to avoid injury to self and others.
  - 1.2. Select and use other leaders or party members, equipment and rescue techniques appropriate to situation.
  - 1.3. Implement rescue operations according to organisational policies and procedures for emergency response.
2. Rescue others from moving water.
  - 2.1. Identify immediate hazards, assess risks and negotiate throughout rescue to avoid injury to self and others.
  - 2.2. Provide clear and concise instructions to person being rescued and others assisting.
  - 2.3. Rescue a swimmer in moving water using reach techniques.
  - 2.4. Utilise throw resources to reach a swimmer in moving water.
  - 2.5. Release entrapped person, utilising methods suitable for situation.
  - 2.6. Use safe contact methods, using craft, to rescue and transport a swimmer.
  - 2.7. Provide both tethered and supported tows to nearest safe landing.
  - 2.8. Select and use equipment and methods appropriate to situation to retrieve abandoned craft and equipment.
3. Use mechanical advantage systems.
  - 3.1. Determine need for use of mechanical advantage systems.
  - 3.2. Identify and promptly establish type appropriate for the rescue or recovery situation.
  - 3.3. Verify manufacturers' recommendations, equipment limitations and safety margins; rig and use equipment accordingly.
  - 3.4. Modify system, as required, to increase efficiency and communicate system changes to others assisting.
4. Debrief and complete reports.
  - 4.1. Participate in incident management debrief and identify future response improvements.
  - 4.2. Complete required incident reports according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed familiar organisational policies and procedures for emergency response.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>record detailed and accurate factual information about rescue responses.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li></ul>
Self-management skills to:	<ul style="list-style-type: none"><li>critically analyse all circumstances and implications to provide a prompt and considered response to rescue requirements.</li></ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISORSC005 Rescue others in white water

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three simulated white water rescues, on one or more inland white water rivers with rapids, which collectively involve the following situations:
  - swimmers in the water, one at any given time
  - entrapped persons, one at any given time
  - abandoned craft and paddles to be recovered, one at any given time
- across the three rescues, collectively utilise the following techniques and methods as relevant to the type of craft utilised:
  - reach techniques to rescue swimmers
  - reach techniques to recover paddles
  - throw techniques to rescue swimmers using throw bags and coiled ropes
  - two point craft on tether
  - single tow with paddler onboard (excluding raft rescues)
  - contact rescue, using craft and techniques relevant to the type of craft utilised
  - use of a mechanical advantage system to recover wrapped, pinned or breached craft
- for each rescue operation:
  - consistently negotiate river hazards safely and effectively
  - designate roles and responsibilities to team members and participants to effectively complete rescues
  - maintain effective communication with the rescuee
  - participate in a debrief and complete an incident report.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for emergency response
- roles and responsibilities that can be allocated to team members and participants to effectively complete a white water rescue
- communication protocols for rescue operations in white water:
  - calls

- hand and paddle signals
- whistles
- typical hydrology conditions and hazards associated with rescues on inland white water rivers with rapids, and techniques used to safely negotiate these:
  - currents
  - eddies
  - waves
  - strainers
  - holes
  - stoppers
  - sieves
  - rocks, including undercut rocks
  - waterfalls
  - downstream and upstream Vs
  - boils
  - pour overs
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation
  - sections of dark, deep or cold water
  - other boating traffic
- features, functions and operation of equipment used for white water rescues:
  - reach equipment, including improvised use of equipment on hand
  - throw bags
  - rope coils
  - two point boat tether system
  - mechanical advantage systems to include:
    - z drags
    - pig-rigs
    - vector pulls
    - 3:1 ratio
    - 4:1 ratio
  - factors that affect the selection and rigging of mechanical advantage systems
  - manufacturers' specifications for equipment use
  - types of anchors used in rescue systems and factors that affect selection
  - types of knots used, and how to tie them, when establishing rescue systems
  - techniques used to rescue swimmers in moving water:
    - reach techniques

- throw techniques using throw bags and rope coils
- contact techniques
- different types of entrapment encountered by rescuees and suitable methods used to extricate entrapped persons
- as relevant to the particular type of water craft, techniques used when implementing the following rescue and recovery methods:
  - T (or X) rescue
  - wedge rescue
  - deck carry
  - providing single and double tows
  - retrieving abandoned craft and equipment
  - two point tethered tow.

## Assessment Conditions

Skills must be demonstrated on inland white water rivers with rapids which must include, as a minimum, features of grade 2 rivers:

- fairly frequent but straightforward rapids
- rapids with regular medium sized waves, less than one metre
- low ledges or drops, easy eddies and gradual bends
- small obstacles that require manoeuvring around
- passages through rapids that are generally straightforward and can be seen from the water.

Assessments can only be completed through simulated activities. Simulations must incorporate time critical requirements.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- people who act as team members, participants and rescuees with whom the individual interacts during simulated rescues
- Australian Standard, or equivalent, compliant lifejackets suitable for inland river conditions
- helmets
- pea-less whistles not affected by water
- white water craft which can include canoes, kayaks and rafts
- paddles suited to type of craft
- rescue equipment:

- throw bags
- rope coils
- towlines
- static rope
- carabiners, Prusik cords and tape sling
- mechanical advantage systems
- knives
- template incident reports
- organisational policies and procedures for emergency response.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a recreational activity leader, guide or instructor; or as a rescue operator where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISORSC006 Lead and participate in complex white water rescues

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to both direct and complete complex rescues and recoveries on inland white water rivers with grade 3 and above rapids. White water rescue skills are required in a range of activity contexts which can include canoeing, kayaking and white water rafting, and techniques will vary according to the type of craft.

Complex situations may involve multiple capsized participants, multiple equipment recoveries, dealing with numerous environmental hazards, or a combination of many factors.

It applies to senior leaders, guides or instructors, and others who use discretion and judgement to manage significant problems and emergencies when they arise.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

SISORSC004 Self rescue in white water

## Competency Field

Rescue Operations

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Determine rescue requirements and prepare for rescue.
2. Rescue multiple persons from moving water.
3. Use mechanical advantage systems.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Assess situation, identify hazards promptly, assess risks and manage to avoid injury to self and others.
- 1.2. Determine appropriate rescue methods and techniques for situation, according to degree of urgency and condition of persons in need of rescue.
- 1.3. Select rescue equipment according to requirements.
- 1.4. Assess abilities, establish a chain of command and allocate roles and responsibilities to others.
- 1.5. Provide clear and concise instructions and confirm rescue crew understanding of roles, communication protocols and rescue actions.
- 1.6. Implement rescue operations according to organisational policies and procedures for emergency response.
- 2.1. Prioritise rescue of persons according to need, and manage rescue crew response.
- 2.2. Monitor hazards, changing circumstances and actions of rescuers and provide ongoing direction.
- 2.3. Participate in rescue in and out of water, changing position as required, to effect rescue of multiple swimmers.
- 2.4. Provide clear and concise instructions to rescuers and rescuees throughout rescue.
- 2.5. Utilise reach and throw techniques to rescue multiple swimmers in moving water.
- 2.6. Release entrapped persons, utilising methods suitable for situation.
- 2.7. Use safe contact methods, using craft, to rescue and transport a swimmer.
- 2.8. Provide both tethered and supported tows to nearest safe landing.
- 2.9. Select and use equipment and methods appropriate to situation to retrieve abandoned craft and equipment.
- 3.1. Determine need for use of mechanical advantage systems.
- 3.2. Identify and promptly establish type appropriate for the rescue or recovery situation.
- 3.3. Verify manufacturers' recommendations, equipment limitations and safety margins; rig and use equipment

- accordingly.
- 3.4. Modify system, as required, to increase efficiency and communicate system changes to others assisting.
4. Debrief and complete reports.
- 4.1. Participate in incident management debrief and identify future response improvements.
- 4.2. Complete required incident reports according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret detailed familiar organisational policies and procedures for emergency response.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>record detailed and accurate factual information about rescue responses.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>pro-actively and cooperatively direct and work within teams to coordinate rescue logistics, solve arising problems and effect efficient rescues.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>critically analyse all circumstances and implications to coordinate a considered response to rescue requirements.</li> </ul>

## Assessment Requirements for SISORSC006 Lead and participate in complex white water rescues

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three simulated complex white water rescues on one or more inland white water rivers with rapids, which collectively involve the following situations:
  - a minimum of three swimmers simultaneously in the water
  - a minimum of two simultaneously entrapped persons
  - a minimum of three simultaneously abandoned craft and paddles to be recovered
- across the three rescues, collectively utilise the following techniques and methods, as relevant to the type of craft utilised:
  - reach techniques to rescue swimmers
  - reach techniques to recover paddles
  - throw techniques to rescue swimmers using throw bags and coiled ropes
  - two and four point craft on tether
  - single and double tows with paddler onboard (excluding raft rescues)
  - tyrolean rope system with craft on tether
  - contact rescue, using craft and techniques relevant to the type of craft utilised
  - use of a mechanical advantage system to recover a wrapped, pinned or breached craft
- for each rescue operation:
  - consistently negotiate river hazards safely and effectively
  - establish a chain of command, allocate and communicate roles and responsibilities to team members and participants to effectively complete rescues
  - maintain effective communication with the rescuees
  - participate in a debrief and complete an incident report.

### Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for emergency response
- principles of a chain of command as relevant to rescue operations
- roles and responsibilities that can be allocated to team members and participants to effectively complete a complex white water rescue

- communication protocols for rescue operations in white water:
  - calls
  - hand and paddle signals
  - whistles
- key considerations for determining rescue methods and techniques for complex white water rescues:
  - river topography and access to person to be rescued
  - river conditions
  - severity of river hazards
  - degree of urgency to avoid situation worsening
  - condition of persons to be rescued
  - rescue abilities of self and team members
  - availability of equipment and human resources
- typical hydrology conditions and hazards associated with complex white water rescues on grade 3 and above rivers, and techniques used to safely negotiate these:
  - currents
  - eddies
  - waves
  - strainers
  - holes
  - stoppers
  - sieves
  - rocks, including undercut rocks
  - waterfalls
  - downstream and upstream Vs
  - boils
  - pour overs
  - built objects – weirs, piers
  - steep or slippery banks or shore
  - overhanging trees
  - fallen trees on waterway
  - submerged logs, rocks and vegetation
  - sections of dark, deep or cold water
  - other boating traffic
- features, functions and operation of equipment used for complex white water rescues:
  - reach equipment, including improvised use of equipment on hand
  - throw bags
  - rope coils
  - two and or four point boat tether system
  - mechanical advantage systems to include:

- high line tyrolean tethering system (telfer lower)
- z drags
- pig-rigs
- vector pulls
- 3:1 ratio
- 4:1 ratio
- factors that affect the selection and rigging of mechanical advantage systems
- manufacturers' specifications for equipment use
- types of anchors used in rescue systems and factors that affect selection
- types of knots used, and how to tie them, when establishing rescue systems
- techniques used to rescue swimmers in moving water:
  - reach techniques
  - throw techniques using throw bags and rope coils
  - contact techniques
- different types of entrapment encountered by rescuees and suitable methods used to extricate entrapped persons
- as relevant to the particular type of water craft, techniques used when implementing the following rescue and recovery methods:
  - T (or X) rescue
  - wedge rescue
  - deck carry
  - providing single and double tows
  - retrieving abandoned craft and equipment
  - two point tethered tow
  - four point tethered tow.

## Assessment Conditions

Skills must be demonstrated on inland white water rivers with rapids which must include, as a minimum, features of grade 3 rivers:

- rapids which have fairly high waves, one to two metres tall
- broken water, strong currents and eddies
- significant obstacles including large holes, exposed rocks and small falls that require manoeuvring around
- passages through rapids are difficult to recognise from the river and inspection from the bank is usually required.

Assessments can only be completed through simulated activities. Simulations must incorporate time critical requirements.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- people who act as team members, participants and rescuees with whom the individual interacts during simulated rescues
- Australian Standard, or equivalent, compliant lifejackets suitable for inland river conditions
- helmets
- pea-less whistles not affected by water
- white water craft which can include canoes, kayaks and rafts
- paddles suited to type of craft
- rescue equipment:
  - throw bags
  - rope coils
  - towlines
  - static rope
  - carabiners, Prusik cords and tape sling
  - mechanical advantage systems to include high line tyrolean tethering system
  - knives
- template incident reports
- organisational policies and procedures for emergency response

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a recreational activity leader, guide or instructor; or as a rescue operator where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

*Elements describe the essential outcomes*

1. Determine rescue requirements and

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Assess situation, identify hazards promptly, assess risks

- prepare for rescue.
- and manage to avoid injury to self and others.
- 1.2. Select and use other leaders or party members, equipment and rescue techniques appropriate to situation.
  - 1.3. Implement rescue operations according to organisational policies and procedures for emergency response.
2. Rescue others from surf.
    - 2.1. Provide clear and concise instructions to person being rescued and others assisting.
    - 2.2. Select approach and contact methods to minimise risk of injury or submersion of self as rescuer.
    - 2.3. Rescue person in surf using rescue tube and non-motorised rescue craft.
    - 2.4. Support, tow and monitor condition of rescued person.
    - 2.5. Use appropriate carrying techniques to ensure airways are kept clear.
    - 2.6. Utilise deep water resuscitation techniques according to standard practice and current guidelines.
  3. Debrief and complete reports.
    - 3.1. Participate in incident management debrief and identify future response improvements.
    - 3.2. Complete required incident reports according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

# Assessment Requirements for SISORSC007 Perform basic surf rescues

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three simulated surf rescues
- across the three rescues, collectively utilise the following aids effectively:
  - rescue tubes
  - rescue boards
  - surf craft (non-motorised) used as rescue craft
- for each rescue:
  - consistently negotiate surf hazards safely and effectively
  - designate roles and responsibilities to team members and participants to effectively complete rescues
  - utilise appropriate carrying and deep water resuscitation techniques
  - participate in a debrief and complete an incident report.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for emergency response.
- roles and responsibilities that can be allocated to team members and participants to effectively complete a surf rescue
- communication protocols for surf rescue operations:
  - calls
  - hand signals
  - whistles
- key characteristics of winds, currents, tides, rips, swell and ocean floor sufficient to understand effects on surf conditions, impacts on surf rescues and appropriate responses
- typical hazards associated with surf environments, and techniques used to safely negotiate these:
  - rips
  - lateral currents
  - marine animals

- rocks
- sandbars
- water users: surfers, swimmers, small craft
- large waves
- shore breaks
- dumping waves
- features, functions and operation of equipment used for surf rescues and factors that affect selection:
  - rescue tubes
  - rescue boards
  - surf craft used as rescue craft
- for surf rescues:
  - appropriate contact methods to ensure safety of rescuer
  - methods used to support and tow rescued persons
  - methods used to carry rescued persons to ensure airways are clear
  - resuscitation techniques used in deep water and current Australian Resuscitation Council (ARC) guidelines.

## Assessment Conditions

Skills must be demonstrated in a surf environment which features the following:

- waves up to 1 metre
- beach breaks, point breaks, river mouth or reef breaks
- water depth of shoulder height or less.

Assessments can only be completed through simulated activities. Simulations must incorporate time critical requirements.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response.

Assessment must ensure use of:

- people who act as team members, participants, and rescuees with whom the individual interacts during simulated activities
- exposure protection surf wear suitable for conditions, and exposure suits as required
- rescue craft which can include surfboards, sea kayaks, stand up paddle boards or any type of non-motorised small craft
- rescue equipment:
  - rescue tube

- rescue boards
- rope
- knives
- pea-less whistles not affected by water
- template incident reports
- organisational policies and procedures for emergency response.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as recreational activity leader, guide or instructor; surf lifesaver or lifeguard, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate part time and full time experience.

## **SISOSAI001 Sail small boats in smooth water and light to moderate wind conditions**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to sail small boats, under 8.5 metres length of deck, in light to moderate wind conditions within smooth waters. It requires the ability to use fundamental skills to launch, land and sail; steer on all points of sail, and to tack and gybe. It also requires the ability to rescue crew members from the water, recover from a capsized, and to operate small boats under tow.

This unit provides the skills to sail in smooth water conditions found within rivers, creeks, lakes, inlets, and waters within breakwaters, revetments or enclosed coastal bays. Sailors at this level can sail in variable winds from light winds up to 10 knots and in moderate winds of 11 to 16 knots (Beaufort Scale).

Smooth water could feature small formed rippled wavelets which do not break but can include small breaking white capping waves up to 0.5 metre. When moderate winds prevail, water could feature small white capping waves up to 1.25 metres.

It applies to leaders, guides or instructors, who use these skills when leading participants during sailing activities. Leadership skills are provided in complementary units. The unit can also apply to assistants and support staff.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

Recreational boating is regulated by specific laws in each Australian state and territory with variable rules. General and specific waterway rules apply to the operation of small boats. All training and assessment activities must comply with the local state or territory requirements. No occupational licensing or certification requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

## Competency Field

Sailing Small Boats

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Prepare for the sail.

2. Rig small boat.

3. Launch small boats.

4. Sail a marked course in smooth water and light to moderate wind conditions.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Select clothing, footwear and personal protective equipment suitable for conditions, and check for safe working condition.
- 1.2. Select a suitable site for sailing activities according to current conditions.
- 1.3. Confirm activity safety and emergency response procedures to ensure compliance during activities.
- 1.4. Confirm protocols for communications between party members and with other water users.
- 1.5. Fit and adjust lifejacket to ensure comfort and safety.
- 2.1. Select lines and other rigging equipment to suit design of small boat in use.
- 2.2. Rig sails to mast and boom using appropriate tension.
- 2.3. Secure lines by tying knots suitable for rigging.
- 2.4. Complete safety checks according to organisational procedures.
- 3.1. Determine wind direction to enable easy launching.
- 3.2. Embark and launch small boat from bank or shore while maintaining stability, direction, speed and control.
- 3.3. Secure or drop the centreboard, where present, and rudder.
- 4.1. Comply with waterway rules throughout all activities, including use of boat within permitted areas.
- 4.2. Manoeuvre boat using primary boat controls, safely approach, and negotiate obstacles and hazards to minimise risk of injury.
- 4.3. Determine wind direction and use wind, wind indicators and directional change to follow marked course.
- 4.4. Respond to changing wind conditions; adjust sails to

- effectively manoeuvre boat using techniques appropriate for wind conditions.
- 4.5. Use wind indicators and angle of sail to vary speed and use a basic heave to as a reference point.
  - 4.6. Sail the boat close hauled to a destination directly upwind.
  - 4.7. Identify perimeters of no go zone, and tack boat from close hauled to close hauled.
  - 4.8. Sail boat on a dead run and gybe mainsail while boat remains sailing on a dead run.
  - 4.9. Identify hazards of gybing when sailing downwind, and implement strategies to avoid unexpected gybe.
5. Recover crew member lost overboard.
    - 5.1. Provide clear and concise instructions to person being rescued and others assisting.
    - 5.2. Engage a lookout to maintain sight of crew overboard at all times and to consistently indicate position in water.
    - 5.3. Reduce speed to safe level, approach and stop to leeward side of crew member in water.
    - 5.4. Rescue crew member from water using reach techniques.
    - 5.5. Utilise throw resources to reach and recover crew member in water.
    - 5.6. Position boat appropriately and assist injured crew to re-enter boat.
  6. Recover from a capsize.
    - 6.1. Recognise warning signs and take immediate action to prevent capsize.
    - 6.2. Signal for assistance following capsize, as required, and implement organisational capsize procedures.
    - 6.3. Check safety of crew, provide instruction, and stay clear of rigging in water.
    - 6.4. Maintain contact with boat, secure floating items, as able, and ease sheets.
    - 6.5. Utilise all crew members to right small boat using counterweight methods and smooth transitions; maintain head to wind.
    - 6.6. Re-enter crew to boat gradually as sufficient freeboard is regained after first crew member has re-entered and started bailing.
  7. Operate small boats under tow.
    - 7.1. Drop and secure sails and secure all equipment.
    - 7.2. Receive and secure towline using appropriate fixtures, knots and tensions to spread load on towline.
    - 7.3. Seat crew in positions to provide balance to small boat.
    - 7.4. Signal towing vessel when ready to proceed.
    - 7.5. Maintain communication with towing vessel and monitor

- towline and response of small boat, adjust any equipment as required.
8. Land and secure small boats.
- 8.1. Bring small boat to anchor using techniques appropriate to situation.
  - 8.2. Drop sails, raise centreboard, where present, and rudder and prepare lines in preparation for return to shore.
  - 8.3. Account for effects of wind and tide to safely manoeuvre boat into landing position.
  - 8.4. Maintain stability, direction, speed and control to land boat into a range of free and tight positions.
  - 8.5. Secure small boat to bank or shore using appropriate knots, and retrieve boat from water.
  - 8.6. De-rig and pack all components.
  - 8.7. Secure boat for road transport using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

<b>SKILLS</b>	<b>DESCRIPTION</b>
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed and familiar organisational safety and emergency response procedures</li> <li>• interpret potentially unfamiliar and complex information about waterway rules.</li> </ul>
Oral communications skills to:	<ul style="list-style-type: none"> <li>• use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and calculate numerical data involving:                             <ul style="list-style-type: none"> <li>• direction and speed of wind and currents</li> <li>• angles that relate to points of sail and tacking manoeuvres.</li> </ul> </li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• manage own timing to complete activities within planned timeframes.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>• critically analyse all circumstances and implications to provide a prompt and considered response to rescue requirements.</li> </ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOSAI001 Sail small boats in smooth water and light to moderate wind conditions

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete two group sailing sessions in light wind conditions
- complete two group sailing sessions in moderate wind conditions
- during each session consistently:
  - follow safety procedures and safely negotiate hazards
  - follow waterway rules
  - utilise effective techniques to:
    - rig the sail boat
    - launch and land the sailboat under control
    - power, steer and turn the sailboat under control on a marked course
- participate in simulations to:
  - recover three crew members lost overboard, one at any given time, and collectively use reach and throw techniques and equipment
  - recover from a capsize on three occasions
  - operate under tow on one occasion.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for sailing activities
- clothing and footwear suitable for sailing activities:
  - types of clothing and fabrics that protect against the effects of weather including sun, temperatures, winds and precipitation of different levels
  - effective design and construction features of waterproof gear
  - types of footwear including specialist boating sandals and shoes and their advantages over other types of footwear
  - features and uses of sailing gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets suitable for smooth water conditions and how to fit and adjust these for comfort and safety
- location and function of these small sailboat parts:

- bow and stern
- hull
- deck
- cockpit
- painters ring
- centreboard
- tiller and rudder
- mast
- boom
- sails:
  - mainsail and jib
  - parts of sails – battens, luff, leech, head, foot, tack and clew
- rigging:
  - standing and running rigging - meaning and difference
  - halyards and sheets
  - downhauls, including Cunningham’s eye, and outhauls
  - cleats of different types
- types of small sailing boats suitable for use in smooth water conditions and:
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- communication protocols for sailing activities to include:
  - calls
  - hand signals
  - international distress signals
- the impact of the following on selection of sailing location, and on launching, landing and manoeuvring small sailing boats:
  - tides, currents, waves and rips
  - on, cross, and off shore winds
- the meaning of the following terminology used for sailing:
  - port
  - starboard
  - ahead, abeam, astern
  - fore and aft
  - windward, upwind
  - leeward, downwind
  - cross wind
  - dead run
  - luffing up
  - bearing away

- safe manual handling techniques used to lift and carry small sailing boats and equipment
- equipment features and techniques used to secure small sailing boats for transportation
- techniques and knots used to rig small sailing boats, and correct tensions
- techniques used to:
  - embark, launch, land and disembark small sailing boats from bank or shore, including those for tight positions
  - secure boats to bank or shore
- specific to smooth water and light to moderate wind conditions:
  - fundamental sailing manoeuvres and techniques for tacking and gybing on a marked course
  - different techniques used to adjust sails and when these would be used:
    - trimming
    - reefing
    - heaving to
  - different techniques used to anchor small boats and when these would be used
- points of sail and all associated terminology
- the "no go zone" and how to get upwind
- principle of tacking upwind and gybing downwind
- hazards associated with gybing downwind and how to manage these
- typical hazards associated with sailing, and techniques used to safely negotiate these:
  - tides, currents and rips
  - built objects – piers, navigation markers
  - steep, slippery or rocky shores
  - sections of dark, deep or cold water
  - marine animals
  - other boating traffic
- features, functions and operation of equipment used to rescue crew from water:
  - reach equipment
  - throw bags, lifebuoys and slings
  - throw ropes
- techniques used to rescue crew from water:
  - reach techniques
  - throw techniques
  - using rescuee's lifejacket and dragging injured crew member onto boat
- for capsizes:
  - actions that can prevent imminent capsize; easing sheets, shifting weight, change heading
  - appropriate swimming strokes and techniques to use while clothed in smooth water conditions
  - counterweight techniques used to re-establish upright small boat, and correct positioning of boat in relation to wind direction

- importance of gradual crew re-entry into boat
- how to empty water from small boats, and equipment used to assist
- equipment and towing techniques used for small sailing boats when under tow
- specific to the local state or territory:
  - categories of waterways determined by law and maritime authority:
    - description of waterway and limits
    - how to interpret basic limit charts issued by the local authority
    - safety equipment required for small sailing boats within the limits
    - life jackets required within the limits
  - rules specific to the operation of small sailing boats:
    - give way rules – passing, crossing and overtaking powered and non-powered vessels
    - distance limitations ("distance off") – rules for swimmers, designated swimming zones, dive flags, unpowered and powered vessels stationary or underway, moored or anchored vessels, built structures (bridges, jetties, navigation markers)
    - prohibited local areas – also called "exclusion" and "no go zones"
    - alcohol and drug restrictions
    - requirements for lights after sunset
    - incident reporting requirements including those for verbal and written reports.

## Assessment Conditions

Skills must be demonstrated in smooth water conditions which can be within rivers, creeks, lakes, inlets, and waters within breakwaters, revetments or enclosed coastal bays.

The environment must feature the following:

- for two assessments:
  - light winds up to 10 knots (Beaufort scale) and small breaking white capping waves up to .05 metre
- for two assessments:
  - moderate winds between 11 to 16 knots (Beaufort Scale) and small breaking white capping waves up to 1.25 metres.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- an activity support vessel suitable for the area of operation carrying equipment necessary to rescue a sailor and sailing craft, and this must be underway during the sailing activity while sailing craft are afloat.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during sailing activities
- people who act as team members, participants and rescuees with whom the individual interacts during simulated rescues, capsizes and tows
- clothing suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- small sailing boats of any design under 8.5metres length of deck, suitable for use in smooth water and light to moderate wind conditions
- sails, rigging and rigging tools suited to the type of craft
- ropes and tie down straps for transportation
- rescue equipment:
  - reach equipment
  - throw equipment
  - towlines
  - bailing device
  - knives
- boating guide issued by the local state or territory maritime authority
- information on tides, depths, currents and other expected water conditions
- organisational safety and emergency response procedures for sailing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sailing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## **SISOSAI002 Sail small boats in partially smooth water and moderate to fresh wind conditions**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to sail small boats, under 8.5 metres length of deck, in moderate to fresh wind conditions within partially smooth waters. It requires the ability to launch, land and sail; steer on all points of sail, and to tack and gybe. It also requires the ability to rescue crew members from the water, recover from a capsize, and to operate small boats under tow.

This unit provides the skills to sail in partially smooth water conditions found within ports, bays and harbours, and sheltered coastal areas up to 2 nautical miles seaward from the coast. Sailors at this level can sail in variable winds from moderate winds of 11 to 16 knots and in fresh winds of 17 to 21 knots (Beaufort Scale).

Partially smooth water could feature small white capping waves up to 1.25 metres. When fresh winds prevail, water could feature long moderate sized white capping waves between 1.25 and 2.5 metres.

It applies to leaders, guides or instructors, who use these skills when leading participants during sailing activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

Recreational boating is regulated by specific laws in each Australian state and territory with variable rules. General and specific waterway rules apply to the operation of small boats. All training and assessment activities must comply with the local state or territory requirements. No occupational licensing or certification requirements apply to this unit at the time of publication.

### **Pre-requisite Unit**

Nil

## Competency Field

Sailing Small Boats

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Prepare for the sail.

2. Rig small boat.

3. Launch small boats.

4. Sail a marked course in partially smooth water and moderate to fresh wind conditions.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Select clothing, footwear and personal protective equipment suitable for conditions, and check for safe working condition.
- 1.2. Select a suitable site for sailing activities according to current conditions.
- 1.3. Confirm activity safety and emergency response procedures to ensure compliance during activities.
- 1.4. Confirm protocols for communications between party members and with other water users.
- 1.5. Fit and adjust lifejacket to ensure comfort and safety.
- 2.1. Select lines and other rigging equipment to suit design of small boat in use.
- 2.2. Rig sails to mast and boom using appropriate tension.
- 2.3. Secure lines by tying knots suitable for rigging.
- 2.4. Complete safety checks according to organisational procedures.
- 3.1. Determine wind direction to enable easy launching.
- 3.2. Embark and launch small boat from bank, shore or wharf while maintaining stability, direction, speed and control.
- 3.3. Secure or drop the centreboard, where present, and rudder.
- 4.1. Comply with waterway rules throughout all activities, including use of boat within permitted areas.
- 4.2. Manoeuvre boat using primary boat controls, safely approach, and negotiate obstacles and hazards to minimise risk of injury.
- 4.3. Determine wind direction and use wind, wind indicators and directional change to follow marked course.
- 4.4. Use the tiller extension where necessary to sail a course

- which includes windward and downwind legs.
- 4.5. Respond to changing wind conditions; adjust sails to effectively manoeuvre boat using techniques appropriate for wind conditions.
5. Recover crew member lost overboard.
- 5.1. Provide clear and concise instructions to person being rescued and others assisting.
- 5.2. Engage a lookout to maintain sight of crew overboard at all times and to consistently indicate position in water.
- 5.3. Reduce speed to safe level, approach and stop to leeward side of crew member in water.
- 5.4. Rescue crew member from water using reach techniques.
- 5.5. Utilise throw resources to reach and recover crew member in water.
- 5.6. Position boat appropriately and assist injured crew to re-enter boat.
6. Recover from a capsize.
- 6.1. Recognise warning signs and take immediate action to prevent capsize.
- 6.2. Signal for assistance following capsize, as required, and implement organisational capsize procedures.
- 6.3. Check safety of crew, provide instruction, and stay clear of rigging in water.
- 6.4. Maintain contact with boat, secure floating items, as able, and ease sheets.
- 6.5. Utilise all crew members to right small boat using counterweight methods and smooth transitions; maintain head to wind.
- 6.6. Re-enter crew to boat gradually as sufficient freeboard is regained after first crew member has re-entered and started bailing.
7. Operate small boats under tow.
- 7.1. Drop and secure sails and secure all equipment.
- 7.2. Receive and secure towline using appropriate fixtures, knots and tensions to spread load on towline.
- 7.3. Seat crew in positions to provide balance to small boat.
- 7.4. Signal towing vessel when ready to proceed.
- 7.5. Maintain communication with towing vessel and monitor towline and response of small boat, adjust any equipment as required.
8. Land and secure small boats.
- 8.1. Bring small boat to anchor using techniques appropriate for situation
- 8.2. Drop sails, raise centreboard, where present, and rudder and prepare lines in preparation for return to shore.
- 8.3. Account for effects of wind and tide to safely manoeuvre boat into landing position.

- 8.4. Maintain stability, direction, speed and control to land boat into a range of free and tight positions.
- 8.5. Secure small boat to bank or shore or wharf using appropriate knots, and retrieve boat from water.
- 8.6. De-rig and pack all components.
- 8.7. Secure boat for road transport using suitable methods.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

- mast
- boom
- sails:
  - mainsail and jib
  - parts of sails – battens, luff, leech, head, foot, tack and clew
- rigging:
  - standing and running rigging, meaning and difference
  - halyards and sheets
  - downhauls, including Cunningham’s eye, and outhauls
  - cleats of different types
- types of small sailing boats suitable for use in partially smooth water conditions and:
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- communication protocols for sailing activities to include:
  - calls
  - hand signals
  - international distress signals
- the impact of the following on selection of sailing location, and on launching, landing and manoeuvring small sailing boats:
  - tides, currents, waves and rips
  - on, cross, and off shore winds
- the interrelationship of winds, tides and current and effects on sailing conditions
- the meaning of the following terminology used for sailing:
  - port
  - starboard
  - ahead, abeam, astern
  - fore and aft
  - windward, upwind
  - leeward, downwind
  - cross wind
  - dead run
  - luffing up

- bearing away
- safe manual handling techniques used to lift and carry small sailing boats and equipment
- equipment features and techniques used to secure small sailing boats for transportation
- techniques and knots used to rig small sailing boats, and correct tensions
- techniques used to:
  - embark, launch, land and disembark small sailing boats from bank, shore and wharves, including those for tight positions
  - secure boats to bank or shore and wharves
- specific to partially smooth water and moderate to fresh wind conditions:
  - sailing manoeuvres and techniques for tacking and gybing on a marked course
  - different techniques used to adjust sails and when these would be used:
    - trimming
    - reefing
    - heaving to
  - different techniques used to anchor small boats and when these would be used
- points of sail and all associated terminology
- the "no go zone" and how to get upwind
- principle of tacking upwind and gybing downwind
- hazards associated with gybing downwind and how to manage these
- typical hazards associated with sailing, and techniques used to safely negotiate these:
  - tides, currents and rips
  - built objects – piers, navigation markers
  - steep, slippery or rocky shores
  - sections of dark, deep or cold water
  - marine animals
  - other boating traffic

    - description of waterway and limits
    - how to interpret basic limit charts issued by the local authority
    - safety equipment required for small sailing boats within the limits
    - life jackets required within the limits
  - rules specific to the operation of small sailing boats:
    - give way rules – passing, crossing and overtaking powered and non-powered vessels
    - distance limitations ("distance off") – rules for swimmers, designated swimming zones, dive flags, unpowered and powered vessels stationary or underway, moored or anchored vessels, built structures (bridges, jetties, navigation markers)
    - prohibited local areas – also called "exclusion" and "no go zones"
    - alcohol and drug restrictions
    - requirements for lights after sunset
    - incident reporting requirements including those for verbal and written reports.

## Assessment Conditions

Skills must be demonstrated in partially smooth water conditions which can be within ports, bays and harbours, and sheltered coastal areas.

The environment must feature the following:

- for two assessments:
  - moderate winds between 11 to 16 knots (Beaufort Scale) and small breaking white capping waves up to 1.25 metres
- for two assessments:
  - fresh winds between 17 to 21 knots (Beaufort Scale) and long moderate sized white capping waves between 1.25 and 2.5 metres

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- an activity support vessel suitable for the area of operation carrying equipment necessary to rescue a sailor and sailing craft, and this must be underway during the sailing activity while sailing craft are afloat.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during sailing activities
- people who act as team members, participants and rescuees with whom the individual interacts during simulated rescues, capsizes and tows
- clothing suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- small sailing boats of any design under 8.5metres length of deck, suitable for use in partially smooth water and moderate to fresh wind conditions
- sails, rigging and rigging tools suited to the type of craft
- ropes and tie down straps for transportation
- rescue equipment:
  - reach equipment
  - throw equipment
  - towlines
  - bailing device
  - knives
- boating guide issued by the local state or territory maritime authority
- information on tides, depths, currents and other expected water conditions
- organisational safety and emergency response procedures for sailing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sailing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency ; the three years' experience can incorporate full and or part time experience.

## **SISOSAI003 Sail small boats in open coastal waters and moderate wind conditions**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to sail small boats, under 8.5 metres length of deck, in moderate wind conditions within open coastal waters. It requires the ability to launch, land and sail; steer on all points of sail, and to tack and gybe. It also requires the ability to rescue crew members from the water, recover from a capsize, and to operate small boats under tow.

This unit provides the skills to sail in open coastal waters between 2 to 5 nautical miles seaward from the coast. Sailors at this level can sail in moderate winds of 11 to 16 knots (Beaufort Scale). Water could feature small white capping waves up to 1.25 metres.

It applies to leaders, guides or instructors, who use these skills when leading participants during sailing activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

Recreational boating is regulated by specific laws in each Australian state and territory with variable rules. General and specific waterway rules apply to the operation of small boats. All training and assessment activities must comply with the local state or territory requirements. No occupational licensing or certification requirements apply to this unit at the time of publication.

# Assessment Requirements for SISOSAI003 Sail small boats in open coastal waters and moderate wind conditions

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete four group sailing sessions
- during each session consistently:
  - follow safety procedures and safely negotiate hazards
  - follow waterway rules
  - utilise effective techniques to:
    - rig the sailboat
    - launch and land the sailboat under control
    - power, steer and turn the sailboat under control
- participate in simulations to:
  - recover three crew members lost overboard, one at any given time, and collectively use reach and throw techniques and equipment
  - recover from a capsize on three occasions
  - operate under tow on one occasion.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for sailing activities
- clothing and footwear suitable for sailing activities:
  - types of clothing and fabrics that protect against the effects of weather including sun, temperatures, winds and precipitation of different levels
  - effective design and construction features of waterproof gear
  - types of footwear including specialist boating sandals and shoes and their advantages over other types of footwear
  - features and uses of sailing gloves and mittens, and advantages and disadvantages
- features and functions of lifejackets suitable for open coastal waters and how to fit and adjust these for comfort and safety
- location and function of these small sailboat parts:
  - bow and stern

- hull
- deck
- cockpit
- painters ring
- centreboard
- tiller and rudder
- mast
- boom
- sails:
  - mainsail and jib
  - parts of sails – battens, luff, leech, head, foot, tack and clew
- rigging:
  - standing and running rigging, meaning and difference
  - halyards and sheets
  - downhauls, including Cunningham’s eye, and outhauls
  - cleats of different types
- types of small sailing boats suitable for use in open coastal water conditions and:
  - different construction materials, effects on performance, advantages and disadvantages
  - design features, handling characteristics and limitations: manoeuvrability, stability and speed
- communication protocols for sailing activities to include:
  - calls
  - hand signals
  - international distress signals
- the impact of the following on selection of sailing location, and on launching, landing and manoeuvring small sailing boats:
  - tides, currents, waves and rips
  - on, cross, and off shore winds
- the interrelationship of winds, tides and current and effects on sailing conditions
- the meaning of the following terminology used for sailing:
  - port
  - starboard
  - ahead, abeam, astern
  - fore and aft
  - windward, upwind
  - leeward, downwind
  - cross wind
  - dead run
  - luffing up
  - bearing away

- safe manual handling techniques used to lift and carry small sailing boats and equipment
- equipment features and techniques used to secure small sailing boats for transportation
- techniques and knots used to rig small sailing boats, and correct tensions
- techniques used to:
  - embark, launch, land and disembark small sailing boats from bank, shore and wharves, including those for tight positions
  - secure boats to bank or shore and wharves
- specific to open coastal waters and moderate wind conditions:
  - sailing manoeuvres and techniques for tacking and gybing
  - different techniques used to adjust sails and when these would be used:
    - trimming
    - reefing
    - heaving to
  - different techniques used to anchor small boats and when these would be used
- points of sail and all associated terminology
- the "no go zone" and how to get upwind
- principle of tacking upwind and gybing downwind
- hazards associated with gybing downwind and how to manage these
- typical hazards associated with sailing, and techniques used to safely negotiate these:
  - tides, currents and rips
  - built objects – piers, navigation markers
  - steep, slippery or rocky shores
  - sections of dark, deep or cold water
  - marine animals
  - other boating traffic
- features, functions and operation of equipment used to rescue crew from water:
  - reach equipment
  - throw bags, lifebuoys and slings
  - throw ropes
- techniques used to rescue crew from water:
  - reach techniques
  - throw techniques
  - using rescuee's lifejacket and dragging injured crew member onto boat
- for capsizes:
  - actions that can prevent imminent capsize; easing sheets, shifting weight, change heading
  - appropriate swimming strokes and techniques to use while clothed in smooth water conditions
  - counterweight techniques used to re-establish upright small boat, and correct positioning of boat in relation to wind direction
  - importance of gradual crew re-entry into boat

- how to empty water from small boats, and equipment used to assist
- equipment and towing techniques used for small sailing boats when under tow
- specific to the local state or territory:
  - categories of waterways determined by law and maritime authority:
    - description of waterway and limits
    - how to interpret basic limit charts issued by the local authority
    - safety equipment required for small sailing boats within the limits
    - life jackets required within the limits
  - rules specific to the operation of small sailing boats:
    - give way rules – passing, crossing and overtaking powered and non-powered vessels
    - distance limitations ("distance off") – rules for swimmers, designated swimming zones, dive flags, unpowered and powered vessels stationary or underway, moored or anchored vessels, built structures (bridges, jetties, navigation markers)
    - prohibited local areas – also called "exclusion" and "no go zones"
    - alcohol and drug restrictions
    - requirements for lights after sunset
    - incident reporting requirements including those for verbal and written reports.

## Assessment Conditions

Skills must be demonstrated in open coastal waters.

The environment must feature the following:

- water which features small white capping waves up to 1.25 metres
- ideally moderate winds of 11-16 knots (Beaufort Scale); winds could vary but warnings should not exceed moderate wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- an activity support vessel suitable for the area of operation carrying equipment necessary to rescue a sailor and sailing craft, and this must be underway during the sailing activity while sailing craft are afloat.

Assessment must ensure use of:

- a group of participants with whom the individual interacts during sailing activities
- people who act as team members, participants and rescuees with whom the individual interacts during simulated rescues, capsizes and tows
- clothing suitable for the conditions

- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- small sailing boats of any design under 8.5metres length of deck, suitable for use in open coastal waters and moderate wind conditions
- sails, rigging and rigging tools suited to the type of craft
- ropes and tie down straps for transportation
- rescue equipment:
  - reach equipment
  - throw equipment
  - towlines
  - bailing device
  - knives
- boating guide issued by the local state or territory maritime authority
- information on tides, depths, currents and other expected water conditions
- organisational safety and emergency response procedures for sailing activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sailing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency ; the three years' experience can incorporate full and or part time experience.

## **SISOSAI004 Lead sailing activities in smooth water and light to moderate wind conditions**

### **Modification History**

Not applicable.

### **Application**

This unit describes the performance outcomes, skills and knowledge required to lead and supervise dependent participants during small boat sailing activities in smooth water conditions according to predetermined activity plans which might be self-developed or developed by others. It covers the skills required to adjust activities according to prevailing conditions and participant capabilities.

It requires the ability to demonstrate and instruct small boat sailing techniques applicable to smooth water and light to moderate wind conditions. To do this, leaders must be proficient in small boat sailing skills which are covered by other units.

Leaders can provide instruction when on board the small boat with participants or from a remote support craft. This unit is applicable to both circumstances.

This unit applies to any type of organisation that delivers outdoor recreation activities including commercial, not-for-profit and government organisations.

It applies to leaders who work independently using discretion and judgement to manage operational logistics and risk within predetermined guidelines.

When working at or close to base and assistance, they manage routine problems in consultation with relevant personnel. Where assistance is not immediately available, leaders use additional skills, covered by other units, to manage significant problems, e.g. rescues, injury or illness in remote locations.

Recreational boating is regulated by specific laws in each Australian state and territory with variable rules. General and specific waterway rules apply to the operation of small boats. All training and assessment activities must comply with the local state or territory requirements. No occupational licensing or certification requirements apply to this unit at the time of publication

## Pre-requisite Unit

Nil

## Competency Field

Sailing Small Boats

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- |  |  |
|--|--|
| <p>1. Prepare equipment and participants.</p>  | <p>1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.</p> <p>1.2. Confirm participants have clothing and footwear appropriate for anticipated weather conditions.</p> <p>1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.</p> <p>1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.</p> <p>1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.</p>   |
| <p>2. Brief participants and demonstrate small boat sailing techniques applicable to smooth water and light to moderate wind conditions.</p> | <p>2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.</p> <p>2.2. Encourage participants to ask questions and seek advice before and during session.</p> <p>2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.</p> <p>2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.</p> <p>2.5. Demonstrate and explain correct techniques appropriate for the activity.</p> <p>2.6. Check and confirm participant ability to use and control</p> |

- equipment before activity commencement.
  - 2.7. Check matching of equipment and activities to participants and amend as required.
- 3. Lead and supervise small boat sailing activities in smooth water conditions.
  - 3.1. Supervise activity according to designated role, adjusting position and role as required.
  - 3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.
  - 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
  - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
  - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
  - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
- 4. Manage safety during small boat sailing activities in smooth water conditions.
  - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
  - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
  - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
  - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
  - 4.5. Amend activities if risk is unacceptable; cease activities when required.
  - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
- 5. Complete post activity responsibilities.
  - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
  - 5.2. Notify relevant personnel of activity completion.
  - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
  - 5.4. Document any equipment faults and incidents including injuries and near misses.
  - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed familiar organisational policies and procedures.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>provide clear and unambiguous instructions to participants using language and terms easily understood</li><li>ask open and closed probe questions and actively listen to determine participants' understanding of instructions.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>manage own timing and that of participants to complete activities within organisational service times.</li></ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOSAI004 Lead sailing activities in smooth water and light to moderate wind conditions

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- for a group of participants, lead two small boat sailing sessions in light wind conditions according to predetermined activity plans
- for a group of participants, lead two small boat sailing sessions in moderate wind conditions according to predetermined activity plans
- across the four sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for sailing activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged

- provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics
- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to small boat sailing activities in smooth water conditions:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - techniques used to instruct sailing participants:
    - when on board the small boat with participants
    - when on a remote support craft.

## Assessment Conditions

Skills must be demonstrated in smooth water conditions which can be within rivers, creeks, lakes, inlets, and waters within breakwaters, revetments or enclosed coastal bays.

The environment must feature the following:

- for two assessments:
  - light winds up to 10 knots (Beaufort scale) and small breaking white capping waves up to .05 metre
- for two assessments:
  - moderate winds between 11 to 16 knots (Beaufort Scale) and small breaking white capping waves up to 1.25 metres.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- an activity support vessel suitable for the area of operation carrying equipment necessary to rescue a sailor and sailing craft, and this must be underway during the sailing activity while sailing craft are afloat.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- small sailing boats of any design under 8.5 metres length of deck, suitable for use in smooth water and light to moderate wind conditions
- sails, rigging and rigging tools suited to the type of craft
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for sailing activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sailing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare equipment and participants.

- 1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.
- 1.2. Confirm participants have clothing and footwear appropriate for anticipated weather conditions.
- 1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.
- 1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.
- 1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.

2. Brief participants and demonstrate small boat sailing techniques applicable to partially smooth water and moderate to fresh wind conditions.

- 2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.
- 2.2. Encourage participants to ask questions and seek advice before and during session.
- 2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.
- 2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.
- 2.5. Demonstrate and explain correct techniques appropriate for the activity.
- 2.6. Check and confirm participant ability to use and control

- equipment before activity commencement.
- 2.7. Check matching of equipment and activities to participants and amend as required.
3. Lead and supervise small boat sailing activities in partially smooth water conditions.
    - 3.1. Supervise activity according to designated role, adjusting position and role as required.
    - 3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.
    - 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
    - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
    - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
    - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
  4. Manage safety during small boat sailing activities in partially smooth water conditions.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - techniques used to instruct sailing participants:
    - when on board the small boat with participants
    - when on a remote support craft.

## Assessment Conditions

Skills must be demonstrated in partially smooth water conditions which can be within ports, bays and harbours, and sheltered coastal areas.

The environment must feature the following:

- for two assessments:
  - moderate winds between 11 to 16 knots (Beaufort Scale) and small breaking white capping waves up to 1.25 metres
- for two assessments:
  - fresh winds between 17 to 21 knots (Beaufort Scale) and long moderate sized white capping waves between 1.25 and 2.5 metres.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- an activity support vessel suitable for the area of operation carrying equipment necessary to rescue a sailor and sailing craft, and this must be underway during the sailing activity while sailing craft are afloat.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations
  - equipment faults
- clothing suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- small sailing boats of any design under 8.5 metres length of deck, suitable for use in smooth water and light to moderate wind conditions
- sails, rigging and rigging tools suited to the type of craft
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for sailing activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sailing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Prepare equipment and participants.

- 1.1. Assess characteristics, condition and capability of participants, as they present, and obtain informed consent.
- 1.2. Confirm participants have clothing and footwear appropriate for anticipated weather conditions.
- 1.3. Select and set up equipment to match participants and prevailing conditions; complete safety checks.
- 1.4. Check participants' own equipment, if provided, and confirm it is in safe working condition.
- 1.5. Direct and assist participants to fit and adjust equipment; check comfort and safety of fit.

2. Brief participants and demonstrate small boat sailing techniques applicable to open coastal waters and moderate wind conditions.

- 2.1. Explain planned objectives; communicate instructions and information about activity in a manner appropriate to participants.
- 2.2. Encourage participants to ask questions and seek advice before and during session.
- 2.3. Inform participants of known and anticipated risks, safety procedures, safe behaviour, safe areas and boundaries.
- 2.4. Advise participants of roles and responsibilities of activity leaders, and communication protocols to use during activity.
- 2.5. Demonstrate and explain correct techniques appropriate for the activity.
- 2.6. Check and confirm participant ability to use and control

- equipment before activity commencement.
- 2.7. Check matching of equipment and activities to participants and amend as required.
3. Lead and supervise small boat sailing activities in open coastal waters.
    - 3.1. Supervise activity according to designated role, adjusting position and role as required.
    - 3.2. Implement recreational instruction techniques to impart skills and knowledge for the activity.
    - 3.3. Provide clear and accurate instructions and or demonstrations throughout the session.
    - 3.4. Monitor participant performance and provide directions, encouragement and corrective instruction to improve techniques.
    - 3.5. Facilitate effective group communication and interaction to maintain group control, engagement and safety.
    - 3.6. Implement required modifications to activity, location or route to ensure participant engagement and comfort, and completion within timelines.
  4. Manage safety during small boat sailing activities in open coastal waters.
    - 4.1. Monitor activity conditions and hazards, including signs of participant difficulty, to ensure safety and welfare.
    - 4.2. Monitor participant behaviour and adherence to safety procedures, adjust level of supervision and assertively correct breaches, as required.
    - 4.3. Respond immediately to adverse participant reactions and hazardous situations.
    - 4.4. Complete ongoing risk assessments to minimise risk of injury to participants and others.
    - 4.5. Amend activities if risk is unacceptable; cease activities when required.
    - 4.6. Respond to emergency situations according to organisational safety, emergency response and first aid procedures.
  5. Complete post activity responsibilities.
    - 5.1. Debrief participants and encourage discussion on their technique and satisfaction with session.
    - 5.2. Notify relevant personnel of activity completion.
    - 5.3. Retrieve equipment, inspect for wear or breakage, tag faults and store in designated area.
    - 5.4. Document any equipment faults and incidents including injuries and near misses.
    - 5.5. Evaluate the activity through a team debrief and identify improvements for future activities.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed familiar organisational policies and procedures.</li></ul>
Writing skills to:	<ul style="list-style-type: none"><li>use fundamental sentence structure to complete forms such as safety checklists, equipment fault and incident reports that require factual information.</li></ul>
Oral communications skills to:	<ul style="list-style-type: none"><li>provide clear and unambiguous instructions to participants using language and terms easily understood</li><li>ask open and closed probe questions and actively listen to determine participants' understanding of instructions.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>pro-actively and cooperatively work within teams of leaders, support and operational staff to organise activity logistics, solve operational problems and deliver a quality experience to participants.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>manage own timing and that of participants to complete activities within organisational service times.</li></ul>

## Unit Mapping Information

No equivalent unit.

## Links

# Assessment Requirements for SISOSAI006 Lead sailing activities in open coastal waters and moderate wind conditions

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- lead four small boat sailing sessions for a group of participants according to predetermined activity plans
- across the four sessions, collectively use two different demonstration and instruction techniques
- during each session consistently manage participant adherence to safety procedures
- after each session, facilitate a debrief with participants and participate in a team member debrief
- utilise options provided in Assessment Conditions to:
  - determine a total of three required activity modifications to suit prevailing conditions and participant capabilities and responses
  - respond to a total of three different immediate safety risks that have arisen during activities
  - respond to a total of two emergency situations and complete two incident reports
  - complete two reports on equipment faults.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety, emergency response and first aid procedures for sailing activity sessions
- a range of demonstration and instruction techniques applicable to recreational activities
- appropriateness of different demonstration and instruction techniques for a range of ages and capabilities
- the importance of verbalising instructions during demonstrations and providing reasons for doing things in a certain way
- techniques used to:
  - build group cohesion
  - motivate and encourage participants to keep them engaged and challenged
  - provide constructive feedback to participants
- key principles of group dynamics and techniques used to manage positive group dynamics

- signs, stages and levels of conflict within groups and techniques used to resolve at various stages of escalation
- specific to small boat sailing activities in open coastal waters:
  - roles and responsibilities of different activity leaders and support staff
  - communication protocols used between participants and leaders during activities
  - how characteristics of participants affect the selection of equipment, including personal protective equipment:
    - age, size and weight
    - current experience in the recreational activity and skill level
    - fitness level and physical capabilities
    - injuries and medical conditions
    - emotional, behavioural and intellectual ability or disability
  - potential hazards and associated risks and safety procedures used to manage these
  - techniques used to instruct sailing participants:
    - when on board the small boat with participants
    - when on a remote support craft.

## Assessment Conditions

Skills must be demonstrated in open coastal waters.

The environment must feature the following:

- water which features small white capping waves up to 1.25 metres
- ideally moderate winds of 11-16 knots (Beaufort Scale); winds could vary but warnings should not exceed moderate wind conditions.

The following resources must be available to replicate industry conditions of operation:

- first aid equipment
- communication equipment for emergency response
- an activity support vessel suitable for the area of operation carrying equipment necessary to rescue a sailor and sailing craft, and this must be underway during the sailing activity while sailing craft are afloat.

Assessment must ensure use of:

- a group of participants whom the individual leads
- real workplace situations, or simulated activities, or case study scenarios that test aspects of this unit that relate to:
  - activity modifications for prevailing conditions and participant needs
  - arising safety risks
  - emergency situations

- equipment faults
- clothing suitable for the conditions
- Australian Standard, or equivalent, compliant lifejackets of a grade that meets maritime regulator requirements for the location
- small sailing boats of any design under 8.5 metres length of deck, suitable for use in smooth water and light to moderate wind conditions
- sails, rigging and rigging tools suited to the type of craft
- activity plans
- template:
  - safety checklists
  - participant informed consents
  - equipment fault reports
  - incident reports
- organisational safety, emergency response and first aid procedures for sailing activity sessions.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- have a collective period of at least three years' experience as a sailing leader, guide or instructor, where they have applied the skills and knowledge covered in this unit of competency; the three years' experience can incorporate full and or part time experience.

# SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to plan and complete recreational SCUBA dives to a maximum depth of 18 metres and to respond to problematic and emergency situations involving self and dive buddy. It also requires the ability to assemble and disassemble equipment and to complete basic maintenance at the water's edge.

It applies to dive leaders, usually known as divemasters, or instructors and to assistant instructors who use these skills when leading participants in SCUBA diving activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers SCUBA diving activities and dive instruction including commercial, not-for-profit and government organisations.

In order to procure air, equipment, and other services to engage in recreational open water diving without supervision, divers must hold certification (C-Card) issued by an industry authorised organisation. That industry certification may or may not be issued concurrently with an Australian Qualification Framework (AQF) qualification or Statement of Attainment identifying achievement of competency in this unit. C-Card certification would be required to gain employment as a divemaster or instructor.

Those delivering training and assessment to support this unit should consult the relevant industry bodies to determine any partnership arrangements for courses, trainers and assessors that can lead to joint AQF and industry regulated C-Card certification.

## Pre-requisite Unit

Nil

## Competency Field

SCUBA Diving

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

#### 1. Plan dives.

#### 2. Prepare for the dive.

#### 3. Complete dives.

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Determine site, depth and duration of dives.

1.2. Identify hazards and medical problems and assess risks associated with use of equipment, site, depth and duration of dives.

1.3. Prepare dive plans for single and repetitive dives according to industry technical and safety criteria.

1.4. Calculate no decompression limits and maximum operating depth.

1.5. Use dive computer or dive tables, as required, to plan requirements.

2.1. Select and assemble dive equipment suited to conditions and dive requirements, and check for safe working condition.

2.2. Utilise dive computers or dive tables, as required, to finalise details of dive, according to industry technical and safety criteria.

2.3. Confirm activity safety and emergency response procedures to ensure compliance during activities.

2.4. Confirm protocols for communications between divers buddy and activity leaders.

2.5. Fit and adjust equipment and exposure suit to self, in conjunction with buddy, to ensure comfort and safety.

2.6. Complete buddy cross checks for all equipment.

2.7. Participate in pre-dive roll call.

3.1. Utilise techniques to enter and exit the water according to conditions and own ability.

3.2. Execute controlled descents and ascents with buddy and equalise at appropriate times.

3.3. Adjust and maintain positive, neutral and negative buoyancy at appropriate times during dive.

3.4. Control underwater swimming and navigate a basic course.

3.5. Monitor depth and time throughout dive, according to

- planned dive tables or use of dive computer data.
- 3.6. Monitor air supply, check pressure gauges regularly and communicate supplies with buddy.
  - 3.7. Use techniques that minimise damage to the diving environment throughout all activities.
  - 3.8. Participate in post-dive roll call and ensure dive log is completed.
  - 3.9. Disassemble SCUBA gear on completion of dive.
4. Maintain safety and complete rescues.
    - 4.1. Safely approach, and negotiate obstacles and hazards to minimise risk of injury.
    - 4.2. Maintain buddy contact, cooperation and communication throughout dive.
    - 4.3. Identify problematic or emergency situations promptly, and assist buddy with rescues.
    - 4.4. Self-rescue from problematic or emergency situations.
    - 4.5. Use an alternate air source and make controlled air sharing ascents.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed and familiar organisational safety and emergency response procedures.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• use clear and unambiguous verbal and non-verbal communications to make intent known with diving buddy and support crew.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and calculate numerical data involving pressures, percentages and depths.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>• work in harmony with a buddy diver to plan and complete safe dives.</li> </ul>
Planning and organising skills to:	<ul style="list-style-type: none"> <li>• manage own timing to complete activities within planned timeframes.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>• critically analyse all circumstances and implications to provide a prompt and considered response to rescue requirements.</li> </ul>

## Assessment Requirements for SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

### Modification History

Not applicable.

### Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and complete four open water dives each for different parameters
- prior to each dive, and at the water's edge:
  - assemble own diving equipment
  - inspect all equipment for safety and serviceability
  - fit and adjust equipment to self, including appropriate weights, in conjunction with buddy
  - complete a BWRAF (buoyancy, weights, releases, air, final) check in conjunction with buddy
- during each dive, use effective techniques to control:
  - entry and exit
  - descent and ascent
  - underwater swimming
  - buoyancy both underwater and at the surface
  - mouthpiece clearing for both snorkel and regulator
  - exchanges between regulator and snorkel, in-water at the surface
  - swimming at the surface using snorkel; fully geared
  - buddy contact, cooperation and communication, using correct signals for communication
  - navigation of a basic course with an underwater compass
- across all dives, collectively participate in simulations to respond to problematic and emergency situations and:
  - clear partially and fully flooded masks
  - remove and replace mask underwater
  - remove and replace SCUBA system in-water at the surface
  - remove and replace weight system and SCUBA kit in water too deep in which to stand
  - use an alternate air source to provide air to and receive air from a diver, and make controlled air sharing ascents
  - provide buddy assistance for two situations
- after each dive, disassemble SCUBA gear.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for diving activities
- factors to consider when planning a dive:
  - dive location
  - objectives
  - abilities of self and buddy
  - depth and duration of dive
  - contingencies
- features of diving environments, particularly those relevant to local conditions, sufficient to understand the impacts on diving activities and locations:
  - water conditions:
    - temperature and thermocline
    - visibility
    - movements, currents, waves, tides
    - density of fresh and salt water
  - topography; bottom and shoreline
  - aquatic life; animals and plants
  - weather conditions
  - hazards and techniques used to safely negotiate these:
    - surface hazards
    - overhead obstructions
    - entanglement and entrapment in natural and constructed features
  - special environmental features, including any cultural and heritage features, minimal impact techniques specific to diving environments, and why these are important to conservation
  - any local regulations specific to diving
- how to use dive computers to
  - determine no-decompression limits for single and repetitive dives
  - properly plan and execute a dive
- features, function and operation of dive computers, and advantages of dive computers over dive tables when planning and completing dives
- the physics of diving; the physical principles of matter and their application to diving activities and hazards:
  - sound
  - light
  - buoyancy
  - pressure and gas laws
  - temperature

- for the following medical problems related to diving, the causes, prevention, symptoms, first aid and treatment:
  - direct effects of pressure during descent, types of squeezes and barotrauma:
    - mask
    - suit
    - ears
    - sinuses
    - lungs
    - teeth
  - direct effects of pressure during ascent:
    - gas expansion – ears, sinuses, lungs, stomach, intestines and teeth
    - lung over pressurization and overexpansion injuries
    - vertigo
  - indirect physiological effects of pressure:
    - decompression illness
    - nitrogen narcosis
    - carbon dioxide excess and relationship to overexertion
    - oxygen toxicity
    - shallow water blackout and relationship to hyperventilation
    - issues related to contaminated air
  - other physiological and psychological problems:
    - drowning and secondary drowning
    - carotid sinus reflex
    - inadequate ventilation (hypoventilation)
    - atmospheric issues – hypothermia, hyperthermia, sunburn
    - bite and sting injuries from aquatic animals and plants
    - issues related to use of medication, drugs and alcohol
    - fatigue and exhaustion
    - stress and panic
    - over confidence
- for the following diving equipment, identifying features, functions, operation and, where relevant, how to fit and adjust for comfort and safety:
  - fins
  - face masks
  - snorkels
  - buoyancy control devices
  - exposure suits, booties and gloves of different grades suited to different conditions
  - weight ballast systems
  - cylinders and valves, cylinder support systems
  - regulators

- submersible pressure gauges
- alternative air sources of different types
- timing devices
- depth gauges
- underwater compasses
- floats and flags
- lights
- emergency equipment carried by dive operators:
  - signalling devices, acoustical and visual
  - first aid kits
  - oxygen kits
- for all of the above equipment, how to inspect for safety and serviceability
- the purpose and importance of pre and post-dive roll calls
- inclusions of personal diving log books and the importance of completing after each dive
- communication protocols used between divers, buddies and activity leaders:
  - hand signals
  - noise signals such as rapping on cylinder
  - use of slates
  - use of signalling devices, acoustical and visual
- dive buddy systems and procedures used to:
  - cross check gear
  - maintain contact and cooperation
  - maintain common safety
- techniques used to:
  - enter and exit the water
  - descend and ascend using safety stops
  - swim underwater and at the surface in diving gear
  - maintain buoyancy both underwater and at the surface
  - use an alternate air source to provide air to and receive air from a diver, and make controlled air sharing ascents
  - rescue self and buddy from problematic and emergency situations.

## Assessment Conditions

Skills must be demonstrated in an open water site during daylight hours. Dives can be completed from either a boat or from the shore.

During assessment:

- direct vertical access to the surface must be possible; aquatic plants are not considered an overhead obstruction

- the first two of the four required open water dives must include at least 20 minutes at a depth between 5 and 12 metres
- the last two of the four required open water dives must include at least 20 minutes at a depth between 5 to 18 metres
- no more than three dives can be completed in any one day
- the following resources must be available to replicate industry conditions of operation and also for the purpose of assessing the candidate's ability to identify features and operational use:
  - first aid equipment
  - oxygen equipment
  - communication equipment for emergency response
  - diver flags of a type and size that meet local maritime regulator requirements.

Assessment must ensure use of:

- a diving buddy with whom the candidate can dive
- fins
- masks
- snorkels
- cylinders and valves
- buoyancy control devices with low pressure inflators
- regulators with submersible pressure gauges
- alternative air source
- weight ballast systems
- exposure suits suitable for conditions
- timing devices
- depth gauges
- underwater compasses
- signalling devices, acoustical and visual
- dive computers
- organisational safety and emergency response procedures for diving activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- be an individual who is currently certified and sanctioned by an industry authorised organisation to teach and assess open water diving skills and to authorise the issuance of C-Card certification.

# SISOSCB002 SCUBA dive from boats

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to prepare for and complete SCUBA dives using techniques that are specific to diving from boats.

The unit only covers the skills and knowledge directly related to diving from boats and not those required to operate or navigate the boat.

It applies to dive leaders, usually known as divemasters, or instructors and to assistant instructors who use these skills when leading participants during SCUBA diving activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers SCUBA diving activities and dive instruction including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

## Competency Field

SCUBA Diving

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the essential outcomes*

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

# Assessment Requirements for SISOSCB002 SCUBA dive from boats

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete two group open water dives from a boat
- during each dive:
  - consistently follow safety procedures and safely negotiate hazards when on board and when entering and exiting the water
  - consistently use boat terminology to communicate with crew and other divers
  - plan for, suit and gear up at appropriate times and locations to account for the type of boat utilised
  - select and utilise technique to enter and exit the water appropriate to the type of boat using one of the following entry techniques:
    - giant stride
    - controlled seated entry
    - sitting back roll
  - utilise, under control, lines in place for intended purpose during entry, exit, descent and ascent and in conjunction with buddy and boat crew
- participate in one simulation as part of a group to access and stand ready to utilise emergency equipment.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational boating safety and emergency response procedures for SCUBA activities
- general safety requirements to maintain safety of self and others when:
  - boarding boats
  - boats are leaving and returning to the dock
  - boats are mooring in open waters
- specific to the local state or territory:
  - categories of waterways and limits in which dive boat operations generally take place
  - safety equipment required within the limits, location on boat, features and operation at a basic level of understanding with emphasis on:

- types and sizes of dive flags displayed on boats
- types of personal lifejackets
- first aid kit
- fire extinguishers
- bilge pumps or bailers
- sound signal devices
- visual distress signal devices
- marine radios
- emergency position indicating radio beacon (EPIRD)
- techniques and equipment used to:
  - waterproof clothing, food and resources
  - pack for ease of access and maximum usage of space
  - stow and secure for safety
- meaning of boating terms and location of different parts of the boat
- designated entry and exit areas for the dive
- different locations and procedures for suiting up and fitting SCUBA equipment when diving from boats
- communication protocols used between divers and crew members when entering the water from boats exiting the water to boats
- the purpose and importance of pre and post-dive roll calls
- typical hazards associated with entering the water from boats and exiting the water to boats, and techniques used to safely negotiate these:
  - equipment on deck
  - movement of boat and water
  - ladders
  - duckboards
  - multiple divers taking turns to enter and exit the water
- techniques used to enter the water from boats and how type of boat affects selection:
  - giant stride
  - controlled seated entry
  - sitting back roll
- features and functions of different lines used for boat diving and how to use these:
  - gear lines
  - tag lines
  - current lines
  - trip lines
  - descent lines
- procedures and techniques for:
  - moving away from the boat after entry and appropriate direction of travel
  - descending and ascending near boats

- exiting the water into boats
- the primary medical hazard of sea sickness associated with boat diving:
  - prevention
  - treatment
  - actions to take on boat when sick
  - guidelines to follow for diving when sick.

## Assessment Conditions

Skills must be demonstrated in an open water site from a boat.

During assessment:

- direct vertical access to the surface must be possible; aquatic plants are not considered an overhead obstruction
- the following resources must be available to replicate industry conditions of operation:
  - first aid equipment
  - oxygen equipment
  - communication equipment for emergency response.

Assessment must ensure use of:

- a diving buddy with whom the candidate can dive
- fins
- masks
- snorkels
- cylinders and valves
- buoyancy control devices with low pressure inflators
- regulators with submersible pressure gauges
- alternative air source
- weight ballast systems
- exposure suits suitable for conditions
- timing devices
- depth gauges
- a boat of any design suitable for dive operations fitted with safety equipment and dive flags that meet local maritime regulator requirements for the dive location and size of boat
- lines used to assist divers entering and exiting the water from boats
- organisational boating safety and emergency response procedures for SCUBA activities.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- be an individual who is currently certified and sanctioned by an industry authorised organisation to teach and assess boat diving.

# SISOSCB003 SCUBA dive at night

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to prepare for and complete SCUBA dives using techniques and equipment that are specific to diving at night.

It applies to dive leaders, usually known as divemasters, or instructors and to assistant instructors who use these skills when leading participants in SCUBA diving activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers SCUBA diving activities and dive instruction including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

## Competency Field

SCUBA Diving

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1. Select site and prepare for night dives.
  - 1.1. Select suitable night dive site according to previous daytime diving experience of self or other party members.
  - 1.2. Determine optimum conditions for night dive site and select appropriate time.
  - 1.3. Confirm activity safety and emergency response procedures to ensure compliance during activities.
  - 1.4. Confirm protocols for communications between divers, buddy and crew.
2. Select and prepare night diving equipment.
  - 2.1. Select exposure suit and accessories suitable for night dive conditions, and check for safe working condition.
  - 2.2. Select personal diver lights according to need, complete safety and serviceability checks and attach back-ups to equipment.
  - 2.3. Select and secure diver marker lights to self to assist identification above and below water.
  - 2.4. Select and secure marker lights to boats, buoys and lines, as appropriate to type of dive, to assist exit from water.
  - 2.5. Utilise other lights appropriate for conditions and ensure security.
3. Complete night dives.
  - 3.1. Enter and exit water utilising lighting equipment and lit reference points to orientate position.
  - 3.2. Maintain contact with buddy and use lit reference lines, as available, for descents and ascents to orientate position.
  - 3.3. Utilise personal diver lights to illuminate path of travel, and highlight points of interest.
  - 3.4. Maintain communication and close visual contact with buddy using lights.
  - 3.5. Ensure use of lights does not adversely affect buddy, other divers, support crew or marine animals.
  - 3.6. Use lighting equipment to safely approach and negotiate obstacles and hazards throughout all diving activities.
  - 3.7. Use compass navigation techniques to avoid disorientation.
  - 3.8. Utilise lights to identify underwater features to fix position and maintain direction and course.
4. Respond to problems.
  - 4.1. Change to back up light in cases of primary light failure or flooding, and resurface.
  - 4.2. Orientate body position through use of air bubble travel when reference points are lost.
  - 4.3. Surface if necessary to verify location and reset direction of travel utilising reference lights.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"><li>interpret detailed and familiar organisational safety and emergency response procedures.</li></ul>
Oral communication skills to:	<ul style="list-style-type: none"><li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li></ul>
Teamwork skills to:	<ul style="list-style-type: none"><li>work in harmony with support crew, buddy diver and other divers to safely complete night dives.</li></ul>
Planning and organising skills to:	<ul style="list-style-type: none"><li>manage own timing to complete activities within planned timeframes.</li></ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOSCB003 SCUBA dive at night

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- complete three night dives
- during each dive consistently:
  - follow safety procedures and safely negotiate hazards utilising lights
  - communicate effectively with buddy, other divers and support crew using a combination of these night dive specific communication methods:
    - hand signals
    - light signals
    - use of slates
    - whistles
  - use effective techniques, personal diver lights and lit reference points to maintain orientation throughout diving activities
- participate in one simulation to respond to a personal diver light failure.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational safety and emergency response procedures for night dive activities
- reasons for selecting known sites for night diving activities
- optimum conditions for night dives and conditions that make diving at night unsuitable
- communication protocols, particular to night dives, used between divers, buddies and crew members:
  - hand signals
  - light signals
  - use of slates
  - whistles
- exposure suits, gloves and booties suitable for night dive activities and reasons for wearing regardless of water temperature:
  - greater chance of exposure to scrapes and marine animal stings
  - prevention of pre and post-dive hypothermia in cooler ambient air temperatures at night

- features and operation of buoyancy control devices with low-pressure inflators and reasons for use during night dives
- features, functions and operation of diver lights, advantages and disadvantages of different types:
  - primary lights, narrow and wide beam
  - back up lights
  - reflectors
  - bulbs of different types, light output, power usage and bulb life ratings
  - disposable and rechargeable batteries
- features and functions of individual diver marker lights, where and how to attach to self
- features and functions of marker lights used by divers to identify position of boats, buoys, descent and ascent lines
- features and functions of other types of lights utilised for night diving, where to place and how to attach:
  - strobe lights
  - surface support lights
- techniques specific to night dives:
  - entering, exiting, descending and ascending the water from the shore using sloping bottom and diver lights for orientation
  - entering and exiting the water from boats using lit reference points for orientation
  - descending and ascending using personal diver lights and lit lines for orientation
  - using personal diver lights at appropriate angles and heights to:
    - illuminate path of travel and to identify natural features for navigation
    - avoid adverse effects on buddy, other divers, support crew and marine animals
  - managing stress and disorientation
  - negotiating marine animals attracted to lights.

## Assessment Conditions

Skills must be demonstrated in an open water site between sunset and sunrise. Dives can be completed from either a boat or from the shore.

During assessment:

- direct vertical access to the surface must be possible; aquatic plants are not considered an overhead obstruction
- the following resources must be available to replicate industry conditions of operation:
  - first aid equipment
  - oxygen equipment
  - communication equipment for emergency response
  - diver flags of a type and size that meet local maritime regulator requirements.

Assessment must ensure use of:

- a diving buddy with whom the candidate can dive
- fins
- masks
- snorkels
- cylinders and valves
- buoyancy control devices with low-pressure inflators
- regulators with submersible pressure gauges
- alternative air source
- weight ballast systems
- exposure suits, gloves and booties suitable for conditions
- timing devices (luminous or electrically lit)
- depth gauges (luminous or electrically lit)
- underwater compasses (luminous or electrically lit)
- surface lighting systems - lights, strobes or beacons to mark entry and exit location
- strobe or marker lights to mark descent and ascent line location (for boat dives)
- dive lights and back up lights for individual divers
- marker lights to mark and identify individual divers.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- be an individual who is currently certified and sanctioned by an industry authorised organisation to teach and assess night diving.

# SISOSCB004 Navigate prescribed routes underwater

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to utilise a range of techniques to navigate underwater during any type of SCUBA diving activity.

It applies to dive leaders, usually known as divemasters, or instructors and to assistant instructors who use these skills when leading participants in SCUBA diving activities. Leadership skills are provided in complementary units.

This unit applies to any type of organisation that delivers SCUBA diving activities and dive instruction including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

Nil

## Competency Field

SCUBA Diving

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Prepare for underwater

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

1.1. Interpret any available waterway charts and publications,

- navigation. appropriate for the dive site.
- 1.2. Complete surface observations to assist with navigation throughout the dive.
  - 1.3. Select navigation equipment, set compass bearing and determine navigation roles with dive buddy.
  - 1.4. Descend facing toward direction of initial underwater travel to orientate position.
2. Navigate underwater.
- 2.1. Use compass and other instruments to track and maintain underwater direction and course.
  - 2.2. Follow underwater patterns of travel to maintain course.
  - 2.3. Utilise underwater features to fix position and maintain direction and course.
  - 2.4. Utilise techniques to measure distance travelled to fix position and maintain course.
  - 2.5. Surface if necessary to verify location and reset direction of travel.
  - 2.6. Log dive site locations for future dives.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>• interpret detailed and potentially unfamiliar information on nautical charts and publications.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>• log basic factual data using fundamental sentence structure and navigational jargon.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>• use clear and unambiguous verbal and non-verbal communications to make intent known with diving buddy.</li> </ul>
Numeracy skills to:	<ul style="list-style-type: none"> <li>• interpret and calculate numerical data involving, distances, times and speeds, basic multiplication and division.</li> </ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOSCB004 Navigate prescribed routes underwater

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- navigate during three SCUBA dives
- before each dive, complete surface observations to assist with underwater navigation using two aids chosen from the following list:
  - wind, current and tidal movement
  - angle of the sun and direction of travel across the sky in relation to planned underwater movement
  - position of natural offshore landmarks or constructed features
  - use of waterway charts or depth finders on boats to identify underwater topography
- across the three dives, collectively use these techniques to navigate:
  - use of compass, course plotters and heading calculators
  - use of two natural underwater features
  - use of two patterns for underwater navigation
  - use of distance travelled by:
    - measuring kick cycles
    - determining time elapsed using a timing device
  - surfacing on one occasion to verify location on map
- log two dive site locations for future dives:
  - one using compass bearings as a reference
  - one using permanent landmarks as a reference.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- trusted sources of waterway charts and tide tables for the region or locality
- different technologies used to access charts and tide tables
- information found on waterway charts relevant to dive navigation:
  - depth
  - underwater topography

- topographic features of surrounding land
- buoyage
- constructed features – bridges, piers, wrecks
- pre-dive observations that can be made to assist with navigating when diving:
  - wind, current and tidal movement
  - angle of the sun and direction of travel across the sky in relation to planned underwater movement
  - position of natural offshore landmarks and constructed features – rocks, reefs, sand bars, kelp beds, piers, navigation buoyage, wrecks
  - use of waterway charts and depth finders on boats to identify underwater topography
- navigation roles that can be shared between buddy divers
- common patterns for underwater navigation, advantages and disadvantages of each:
  - out and back along a straight line
  - squares and rectangles
  - triangles
  - circles
- features functions and operation of underwater compasses
- correct position for holding an underwater compass to maintain an accurate heading
- how to set a compass for the following:
  - a heading
  - reciprocal course
  - square or rectangle pattern
  - triangle pattern
- techniques used to avoid errors when navigating with a compass underwater
- features and functions of course plotters and heading calculators used to navigate multi heading courses underwater and:
  - techniques used to track a multi heading course , return to start point and navigate from one point to another using a course plotter
  - techniques used to determine pattern headings using a heading calculator
- natural features and references commonly used by divers to fix position and navigate underwater:
  - light and shadows cast by the sun or moon
  - direction of currents and water surge
  - bottom composition and contours
  - position of plants and animals
- techniques used to estimate travelled distance underwater, advantages and disadvantages of each:
  - measuring kick cycles
  - determining lapsed time using a timing device
  - using cylinder pressure readings
  - measuring and counting arm spans

- using underwater lines and reels
- techniques used to fix and relocate an underwater site for future dives:
  - using permanent landmarks, sketching and logging
  - using and logging compass bearings
  - using a global positioning system (GPS) on the surface.

## Assessment Conditions

Skills must be demonstrated in an open water site. Dives can be completed from either a boat or from the shore.

During assessment:

- direct vertical access to the surface must be possible; aquatic plants are not considered an overhead obstruction
- the following resources must be available to replicate industry conditions of operation:
  - first aid equipment
  - oxygen equipment
  - communication equipment for emergency response
  - diver flags of a type and size that meet local maritime regulator requirements.

Assessment must ensure use of:

- a diving buddy with whom the candidate can dive
- fins
- masks
- snorkels
- cylinders and valves
- buoyancy control devices with low pressure inflators
- regulators with submersible pressure gauges
- alternative air source
- weight ballast systems
- exposure suits suitable for conditions
- timing devices
- depth gauges
- slates
- underwater navigation equipment:
  - compasses
  - course plotters
  - heading calculators
  - underwater reels with lines for distance measurement
- waterway, wind, tide and current charts relevant to the dive site.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- be an individual who is currently certified and sanctioned by an industry authorised organisation to teach and assess underwater navigation.

# SISOSCB005 Complete underwater search and recovery dives

## Modification History

Not applicable.

## Application

This unit describes the performance outcomes, skills and knowledge required to use a systematic and methodical approach to finding and retrieving lost submerged objects up to 45 kilograms during or after recreational dives. This unit is not intended for use by commercial recovery divers.

It applies to dive leaders, usually known as divemasters or instructors who work independently in the field using discretion and judgement to manage problems when they arise.

This unit applies to any type of organisation that delivers SCUBA diving activities and dive instruction including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

## Pre-requisite Unit

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

## Competency Field

SCUBA Diving

## Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

### PERFORMANCE CRITERIA

*Elements describe the*

*Performance criteria describe the performance needed to*

*essential outcomes**demonstrate achievement of the element.*

1. Plan underwater search and recovery.
  - 1.1. Identify size, weight and other characteristics of lost object.
  - 1.2. Assess probable and possible location of lost object and define search area.
  - 1.3. Identify and assess site characteristics and hazards that impact the search and recovery operation.
  - 1.4. Determine suitable search methods and patterns according to situation.
  - 1.5. Determine suitable recovery methods according to size, weight and depth of object to be recovered.
  - 1.6. Select search and recovery equipment according to requirements.
  - 1.7. Confirm diver roles and protocols for communications between buddy and crew through a pre-dive briefing.
2. Conduct search.
  - 2.1. Use surface techniques and above water landmarks to assist in locating position of submerged objects before descent.
  - 2.2. Establish boundaries of underwater search area, after descent, and mark starting point with appropriate equipment.
  - 2.3. Follow underwater patterns of travel to locate lost objects.
  - 2.4. Utilise search lines to assist navigating patterns of travel.
  - 2.5. Communicate with buddy and others throughout search using appropriate signals.
  - 2.6. Mark position of submerged objects for later retrieval if required.
3. Recover objects.
  - 3.1. Retrieve small items by hand, stow in bag and secure for ascent.
  - 3.2. Mark location of heavy objects with buoy and line, in case of sinking during retrieval.
  - 3.3. Rig lift bag using appropriate knots or clips and check security.
  - 3.4. Inflate lift bag gradually to achieve appropriate buoyancy of object, and free object from obstructions as required.
  - 3.5. Swim to surface with lift bag or allow to rise independently, assuming safe position in relation to bag.
  - 3.6. Secure lift bag at surface and retrieve from water.
  - 3.7. Retrieve all markers on search and recovery conclusion.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

### DESCRIPTION

#### SKILLS

- |                               |   |
|-------------------------------|---|
| Oral communication skills to: | <ul style="list-style-type: none"><li>• use clear and unambiguous verbal and non-verbal communications to make intent known with diving buddy and support crew.</li></ul>   |
| Numeracy skills to:           | <ul style="list-style-type: none"><li>• estimate angles for landmarks as navigation aids and for underwater swimming patterns</li><li>• complete basic calculation of weights to select lift bags of appropriate ratings.</li></ul> |
| Teamwork skills to:           | <ul style="list-style-type: none"><li>• pro-actively and cooperatively work within teams to determine location of lost objects, solve arising problems and effect efficient recoveries.</li></ul>                                   |

# Assessment Requirements for SISOSCB005 Complete underwater search and recovery dives

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- plan and complete four search and recovery dives
- across the four dives, collectively recover objects of these different weights:
  - small objects of minimum 1kg and maximum 5 kgs by hand without lift bags
  - objects of minimum 10kgs and maximum 45 kgs using lift bags
- across the four recovery dives, use one of the following compass search patterns:
  - U search
  - expanding square
- across the four recovery dives, use one of the following search patterns utilising search lines and reels:
  - circular
  - semi-circular
  - jackstay
- during each dive consistently:
  - safely negotiate hazards
  - communicate effectively with buddy diver using underwater signals.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- differences between commercial and recreational search and recovery divers, at a basic level of understanding
- roles and responsibilities of different recreational divers and support crew in search and recovery operations
- different types of search and recovery dives
  - searching for specific lost items
  - searching for non-specific items of interest and reasons for not retrieving items of cultural or heritage significance
  - recovering harmful debris

- how site characteristics of recovery dives may differ from optimum recreational diving conditions and how the following affects search and recovery techniques:
  - bottom topography and composition
  - water movement – current, tides and surge
- hazards and risks associated with underwater search and recovery operations and techniques used to safely negotiate these:
  - sharp objects and debris
  - entanglement
  - low visibility
  - currents
  - falling objects
  - boating traffic
- steps in planning search and recovery dives and why these are important:
  - defining the dive objective
  - collecting and analysing all available information; environmental conditions and hazards, characteristics of any lost objects, equipment required
  - selecting diving mode, search and recovery techniques
  - selecting diving buddy and other team members
  - briefing
- techniques used on the surface to assist with location of submerged items:
  - tracking sinking items from the shore using landmarks as navigation aids
  - tracking sinking items from the water or on a boat using landmarks as navigation aids
  - taking compass bearings and using a slate for recording
- for the following underwater and shore based search patterns, suitability for different circumstances, effectiveness and limitations:
  - U search
  - expanding square
  - circular
  - semi-circular
  - jackstay
  - shore walk
  - snorkeller led
- for the above search patterns
  - how to mark starting points and searched areas
  - how to execute
  - how to use a compass in conjunction, as appropriate
  - how to secure and use search lines as appropriate
- communication protocols, specific to search and recovery operations:
  - underwater line (rope) signals used between buddy divers
  - underwater line signals used between divers and surface crew

- features, functions and operation of search and recovery equipment:
  - underwater compasses
  - buoys and anchors
  - bottom markers
  - slates
  - underwater reels and search lines
- features, functions and operation of commercial lift bags:
  - advantages over home-made lift bags
  - weight ratings of different lift bags up to 45kgs
  - air sources for lift bags and techniques used to inflate both underwater and at the surface to achieve effective buoyancy
- when different knots are used with lift bags, advantages and disadvantages, and how to tie them:
  - bowline
  - sheet bend
  - two half-hitch
- dangers of using buoyancy control devices as lift bags
- safe position of divers in relation to lift bags throughout recovery operations.

## Assessment Conditions

Skills must be demonstrated in an open water site. Dives can be completed from either boats or from the shore.

During assessment:

- direct vertical access to the surface must be possible; aquatic plants are not considered an overhead obstruction
- the following resources must be available to replicate industry conditions of operation:
  - first aid equipment
  - oxygen equipment
  - communication equipment for emergency response
  - diver flags of a type and size that meet local maritime regulator requirements.

Assessment must ensure use of:

- a diving buddy with whom the candidate can dive
- fins
- masks
- snorkels
- cylinders and valves
- buoyancy control devices with low pressure inflators

- regulators with submersible pressure gauges
- alternative air source
- weight ballast systems
- exposure suits, gloves and booties suitable for conditions
- timing devices
- depth gauges
- underwater compasses and slates
- surface floats and markers
- anchors and bottom markers
- underwater reels with search lines
- commercial quality lift bags and rope
- objects weighing a minimum 1kg and maximum 45kgs, with at least some objects weighing 10kgs.

Assessors must satisfy the Standards for Registered Training Organisations requirements for assessors, and:

- be an individual who is currently certified and sanctioned by an industry authorised organisation to teach and assess underwater search and recovery skills.

## SISOSCB006 Perform diver rescues

### Modification History

Not applicable.

### Application

This unit describes the performance outcomes, skills and knowledge required to both lead, and complete diver rescues using a range of dive specific techniques. It requires the ability to fully assess the situation, determine a response and complete rescues using methods and equipment appropriate for the situation. It also covers the administration of in-water rescue breathing, and oxygen.

This unit does not require the provision of first aid, which is covered in other units, but does require the recognition and assessment of common diving related illnesses and injuries.

It applies to dive leaders, usually known as divemasters or instructors who work independently in the field using discretion and judgement to manage problems and emergencies when they arise.

This unit applies to any type of organisation that delivers SCUBA diving activities and dive instruction including commercial, not-for-profit and government organisations.

No occupational licensing, certification or specific legislative requirements apply to this unit at the time of publication.

### Pre-requisite Unit

SISOSCB001 SCUBA dive in open water to a maximum depth of 18 metres

### Competency Field

SCUBA Diving

### Unit Sector

Outdoor Recreation

## Elements and Performance Criteria

### ELEMENTS

*Elements describe the essential outcomes*

1. Determine rescue requirements and prepare for rescue.
2. Rescue divers.
3. Use supplemental oxygen.
4. Debrief and complete

### PERFORMANCE CRITERIA

*Performance criteria describe the performance needed to demonstrate achievement of the element.*

- 1.1. Identify divers in need of rescue and determine their condition.
- 1.2. Assess situation, identify hazards promptly, assess risks and manage to avoid injury to self and others.
- 1.3. Determine appropriate rescue methods and techniques for situation, according to degree of urgency and condition of divers in need of rescue.
- 1.4. Select rescue equipment according to requirements.
- 1.5. Assess abilities, establish a chain of command and allocate roles and responsibilities to others.
- 1.6. Provide clear and concise instructions and confirm rescue crew understanding of roles, communication protocols and rescue actions.
- 1.7. Implement rescue operations according to organisational policies and procedures for emergency response.
- 2.1. Use equipment and rescue techniques appropriate to situation.
- 2.2. Provide reassurance and clear and concise instructions to divers being rescued.
- 2.3. Rescue divers on surface, using techniques appropriate to situation.
- 2.4. Assist responsive divers to surface and to reach boat or shore.
- 2.5. Bring unresponsive divers to the surface, provide in-water rescue breathing, and tow to boat or shore.
- 2.6. Maintain safety of self, others and rescuees throughout rescue operations.
- 2.7. Evaluate and monitor condition of rescued divers and determine need for first aid, medical treatment or evacuation.
- 2.8. Utilise underwater search patterns to locate missing divers.
- 3.1. Assess diver casualty to identify need for supplemental oxygen.
- 3.2. Administer oxygen, as authorised by organisation and allowed under local law.
- 4.1. Participate in incident management debrief and identify

reports.

future response improvements.

4.2. Complete required incident reports according to organisational procedures.

## Foundation Skills

*Foundation skills essential to performance in this unit, but not explicit in the performance criteria are listed here, along with a brief context statement.*

SKILLS	DESCRIPTION
Reading skills to:	<ul style="list-style-type: none"> <li>interpret detailed familiar organisational policies and procedures for emergency response.</li> </ul>
Writing skills to:	<ul style="list-style-type: none"> <li>record detailed and accurate factual information about rescue responses.</li> </ul>
Oral communication skills to:	<ul style="list-style-type: none"> <li>use clear and unambiguous verbal and non-verbal communications to make intent known.</li> </ul>
Teamwork skills to:	<ul style="list-style-type: none"> <li>pro-actively and cooperatively direct and work within teams to coordinate rescue logistics, solve arising problems and effect efficient rescues.</li> </ul>
Self-management skills to:	<ul style="list-style-type: none"> <li>critically analyse all circumstances and implications to coordinate a considered response to rescue requirements.</li> </ul>

## Unit Mapping Information

No equivalent unit.

# Assessment Requirements for SISOSCB006 Perform diver rescues

## Modification History

Not applicable.

## Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and complete a range of simulated rescue operations:

- collectively cover responses to all of the following diver issues:
  - panicked diver at the surface and underwater
  - over exerted diver at the surface and underwater
  - vertigo
  - cramping
- complete two surface non-swimming assisted rescues and collectively use reach and extension techniques
- complete two surface swimming assisted rescues while consistently entering the water without losing sight of the diver in need and:
  - establish diver's buoyancy
  - execute rescues with and without floatation devices
  - execute towing with and without equipment removal
  - use two towing techniques
- complete two underwater rescues while consistently maintaining buoyancy of self and rescued diver both underwater and at the surface:
  - use an alternate air source to provide air to a diver, and make a controlled air sharing ascent
  - bring an unresponsive diver to the surface
- provide one surface in-water rescue, using two of the following breathing techniques while consistently controlling an open airway:
  - mouth-to-pocket mask
  - mouth-to-mouth
  - mouth-to-nose
- assist divers to exit the water as follows:
  - one responsive diver without assistance
  - one responsive diver with assistance from team members
  - one unresponsive diver without assistance
  - one unresponsive diver with assistance from team members
- for at least one simulated rescue bring together multiple elements of rescue operations to include:
  - bringing an unresponsive diver to the surface

- establishing buoyancy both underwater and at the surface
- providing on surface in-water rescue breathing
- towing diver
- assisting diver to exit the water
- set up oxygen equipment on one occasion
- administer oxygen using a pocket mask on one occasion (where not prohibited by local legal requirements)
- complete one underwater search for missing divers using a search pattern to be chosen from the following list:
  - linear
  - circular
  - U pattern
  - jack stay
  - expanding square
- for each rescue operation:
  - consistently negotiate hazards safely and effectively
  - establish a chain of command, allocate and communicate roles and responsibilities to team members and participants to effectively complete rescues
  - participate in a debrief and complete an incident report.

## Knowledge Evidence

Demonstrated knowledge required to complete the tasks outlined in elements and performance criteria of this unit:

- organisational policies and procedures for emergency response
- principles of a chain of command as relevant to dive rescue operations
- roles and responsibilities that can be allocated to team members and participants to effectively complete a diver rescue
- communication protocols for dive rescue operations:
  - hand signals
  - calls
  - whistles
- diver issues that can occur during SCUBA diving activities:
  - panicked diver
  - over exerted diver
  - drowning
  - vertigo
  - cramping
  - temperature related problems including hypothermia and hyperthermia
  - pressure related injuries including decompression sickness, arterial gas embolism and other lung overexpansion injuries

- stings or bites from marine animals
- diver low or out of air
- equipment related problems including over weighting
- missing diver
- for the above issues:
  - signs that indicate need for rescue and or first aid
  - how they affect choice of rescue techniques
  - appropriate actions and communications with the rescued diver
  - risks related to the rescue diver
  - first aid treatments for those that relate to illness or injury
- for surface non-swimming assisted rescues, features, functions and techniques used with rescue equipment:
  - reach equipment
  - throw bags, lifebuoys and slings
  - throw ropes
- for surface swimming assisted rescues, techniques for:
  - entering water without losing sight of diver in need
  - using floatation equipment
  - removing equipment from rescued diver and considerations for doing this
  - towing with and without equipment removed
- for underwater rescues, techniques used for:
  - establishing and maintaining buoyancy of rescued diver, both underwater and at the surface
  - using an alternate air source to provide air to a diver, and making controlled air sharing ascents
  - assisting responsive divers to the surface
  - bringing unresponsive divers to the surface while controlling buoyancy
- techniques for providing in-water rescue breathing:
  - removing equipment
  - opening the airway
  - mouth-to-pocket mask
