Release 1

AHCSS00110 Basic Biosecurity Skill Set

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 6.0.

Description

This skill set provides the basic knowledge and skills required to support biosecurity activity and compliance for a property, farm or land management situation for animal husbandry, plant production or land and aquatic environment management, including businesses, volunteer groups and government and non-government agencies and organisations.

Pathways Information

These units of competency provide pathways into a range of Certificate II and Certificate III qualifications in the AHC Agriculture, Horticulture and Conservation and Land Management Training Package.

Licensing/Regulatory Information

No licensing, legislative or certification requirements apply to this skill set at the time of publication.

Skill Set Requirements

- AHC BIO203 Inspect and clean machinery, tools and equipment to preserve biosecurity
- AHC BIO204 Follow site biosecurity procedures
- AHC BIO301 Identify and report signs of unusual disease or pest
- AHC BIO303 Apply biosecurity measures

Target Group

This skill set is for individuals, new employees or existing workers who work in a horticulture, agriculture or conservation and land management environment where biosecurity is an important part of the job role for the prevention of diseases and pests.

Suggested words for Statement of Attainment

These competencies from the AHC Agriculture, Horticulture and Conservation and Land Management Training Package meet the basic industry requirements for complying with biosecurity procedures in the workplace.
