Assessment Requirements for AHCTRF404 Plan and implement sports turf renovation

Release: 1

Assessment Requirements for AHCTRF404 Plan and implement sports turf renovation

Modification History

Release	Comments
Release 1	This version released with AHC Agriculture, Horticulture and Conservation and Land Management Training Package Version 4.0.

Performance Evidence

An individual demonstrating competency must satisfy all of the elements and performance criteria in this unit.

There must be evidence that the individual has, on at least one occasion, prepared and implemented a sports turf renovation plan, including:

- assessed site plans and documentation to establish sports turf purpose
- determined size of sports turf area in need of renovation
- conducted field tests to establish the degree of degradation of sports turf surface
- assessed results and established the scope of renovation works
- identified site health, safety and environmental hazards, assessed risks and established controls for the renovation works
- developed and documented a plan for a sports turf renovation program and prepared a schedule of works and specifications for implementation
- reviewed status of machinery and equipment and conducted pre-operational checks in preparation for renovation works
- selected and coordinated work team and contractors to implement the schedule of works for renovation of sports turf surfaces
- monitored restoration activity, safety and environmental impacts of restoration work against performance targets, and implemented remedial actions where non-compliant
- reconciled completed works against renovation plan
- checked equipment for serviceability, and initiated repairs
- recorded costs of restoration and reviewed against budget
- maintained records and produced reports on renovation outcomes.

Knowledge Evidence

An individual must be able to demonstrate the knowledge required to perform the tasks outlined in the elements and performance criteria of this unit. This includes knowledge of:

- enterprise, national and international industry standards for turf surface appearance, performance and quality

- environmental implications of renovation activities, turf and soil treatments, and waste disposal procedures
- safe work practices and procedures applicable to renovation activities, including:
 - safe materials handling
 - equipment and operation
 - public and turf area users
- basic surveying skills to measure the size of renovation site
- methods and purpose of field tests, including:
 - infiltration rate
 - organic fines
 - hardness
 - traction
 - surface smoothness
 - turf sward height
- identification and cultural requirements of turf grass species and cultivars, including:
 - planting and propagating
 - care and maintenance
 - renovation scheduling requirements
- specialist turf renovation practices to achieve high performance turf, including:
 - dethatching
 - top dressing
 - aerating
 - over sowing
 - fertilising and soil conditioning
 - drainage and water holding
- determining resource and material requirements for turf grass renovation program, including:
 - financial and budgetary constraints
 - consumables, including fertilisers, ameliorants and other chemicals
 - labour and contractor requirements and scheduling
 - equipment and machinery
 - turf grass propagation material
 - growing soils and media
 - expectations and specification of work quality outcomes
- tools, equipment and machinery commonly used for sports turf renovation programs, including:
 - effective and safe use of tools and machinery
 - influences on the selection of tools, machinery and safety equipment
 - common pre-operational and post-operational checks of equipment
 - adjustments and settings for renovation equipment

- assessment of safety hazards and risks when renovating turf areas, including:
 - public safety
 - barriers and exclusions zones
 - signage
 - personal protection and equipment
 - manual handling techniques for lifting or moving heavy loads and materials
- coordinating a work team and working with contractors, including:
 - communicating with team members
 - organising and directing labour
 - dealing with performance issues
- preparation of renovation plans, recording and reporting renovation activities.

Assessment Conditions

Assessment of skills must take place under the following conditions:

- physical conditions:
 - a sports turf facility or an environment that accurately represents workplace conditions on which to prepare and implement a turf renovation plan
- resources, equipment and materials:
 - turf renovation tools, machinery and equipment
 - fertiliser, ameliorants, top dressing materials
 - turf planting and propagation materials
 - measuring and layout equipment, including levels, tape measures, boning rods, laser level, dumpy level
- specifications:
 - workplace procedures and work instructions for turf area maintenance
 - access to workplace, national and international turf grass industry standards
- relationships:
 - work team and contractors.

Assessors of this unit must satisfy the requirements for assessors in applicable vocational education and training legislation, frameworks and/or standards.
