BSBPMG803 Manage and review portfolio performance

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 1.0.

Application

This unit describes the skills and knowledge required to effectively manage and review a portfolio. It covers project and program oversight, continuous improvement across the portfolio and benefits realisation.

A portfolio is the centralised management of one or more portfolios of projects, which includes identifying, prioritising, authorising, managing and controlling projects, programs and other related work, to achieve specific strategic business objectives.

It applies to individuals who operate at the strategic level within the organisation. Unlike projects or programs, a portfolio does not have a finite life, instead it is a continuous process and requires regular tending to ensure the portfolio remains in balance and is consistent with the organisation's strategic objectives.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

BSBWHS211 Contribute to the health and safety of self and others

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 7.0.

Application

This unit describes the skills and knowledge required to work in a manner that is healthy and safe in relation to self and others, and to assist in responding to incidents. It covers following work health and safety (WHS) policies, procedures, instructions and requirements; and participating in WHS consultative processes.

The unit applies to those who require a basic knowledge of WHS to carry out own work in a defined context, under direct supervision or with some individual responsibility, in a range of industry and workplace contexts.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS308 Participate in WHS hazard identification, risk assessment and risk control processes

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit and, on at least two occasions, to:

- participate in selecting and using required methods to identify, report and record hazards
- assess and record risks for identified hazards
- promote and support worker consultation and participation in hazard identification and risk assessment
- participate in developing, selecting and implementing risk control options and plans for identified hazards.
-

Knowledge Evidence

The candidate must demonstrate knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- work health and safety (WHS) legislative requirements, regulations, codes of practice and standards relating to:
 - WHS hazard identification, risk assessment and risk control
 - WHS hazard communication, consultation and participation
 - identifying duty holders
 - recordkeeping
 - specific hazard identification, risk assessment and control methods
- internal and external sources of WHS information and data, and procedures for accessing them
- concept of hazards, risks and risk factors
- basic principles of incident causation and injury processes
- WHS organisational policies and procedures relating to identifying hazards, and assessing and controlling risks:

- WHS hazards that may be present in the workplace, the harm they can cause and how this harm occurs
- types of hazard and risk registers
- responding to WHS issues, including risk control options for different hazards and work situations, and suitable risk assessment methods
- workplace communication processes for reporting and recording, and plans for sharing information about hazard identification, risk assessment and risk control.
-

Assessment Conditions

Assessment must comply with WHS laws, and WHS legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- organisational policies, standard operating procedures and plans required for the performance evidence
- WHS laws relevant to hazard identification, risk assessment and risk control
- relevant WHS data files
- opportunities for interaction with others
- workplace equipment and resources required to demonstrate the performance evidence.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS414 Contribute to WHS risk management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to contribute to WHS risk management, which includes the processes for identifying work health and safety (WHS) hazards and assessing and controlling the risk relating to those identified hazards.

It involves contributing to the development, implementation and evaluation of risk controls according to legislative and organisational requirements.

The unit applies to those working in a broad range of roles across all industries. WHS hazard identification and risk control processes are those defined in written workplace procedures.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

No licensing, legislative or certification requirements apply to this unit at the time of publication.

Assessment Requirements for BSBWHS414 Contribute to WHS risk management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Performance Evidence

The candidate must demonstrate the ability to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit, and to contribute to:

- identifying at least two different (WHS) hazards and controlling the risks associated with those hazards
- evaluating the effectiveness of the above risk controls.

During each of the above occasions, the candidate must:

- identify and interpret information and data about WHS requirements and apply them to the selection and application of techniques, tools and processes for hazard identification, risk assessment and risk control
- contribute to documenting processes
- communicate with required people about WHS requirements and compliance
- comply with WHS requirements for hazard identification, risk assessment, and risk control activities
- identify WHS duty holders and their duties.
-

Knowledge Evidence

The candidate must demonstrate the knowledge to complete the tasks outlined in the elements, performance criteria and foundation skills of this unit. This includes knowledge of:

- internal and external sources of WHS information and data relating to the performance evidence, and procedures for accessing them
- WHS hazard identification, risk assessment and risk control processes specified in:
 - required WHS laws
 - organisational WHS policies, procedures, processes, and systems
- risk management requirements, including:
 - identifying duty holders and their roles and responsibilities

- selecting and using hazard identification tools and techniques
- undertaking, documenting and communicating risk assessments
- evaluating risk controls
- documenting and communicating risk control plan
- differences between hazards and risks in the workplace
- range of common workplace hazards, and the nature, severity and likelihood of those hazards
- risk assessment and controls that can eliminate or minimise risks.
-

Assessment Conditions

Assessment must comply with WHS laws, legal responsibilities and duty of care required for this unit. It must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities undertaken by individuals carrying out WHS duties in the workplace, and must include access to:

- workplace equipment, technology, software and consumables required to access information on WHS laws
- WHS laws, and organisational policies, procedures, processes and systems required to demonstrate the performance evidence
- case studies and, where possible, real situations
- opportunities for interaction with others.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.

BSBWHS513 Lead WHS risk management

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to lead the management of work health and safety (WHS) risks in an organisation. The unit includes facilitating the identification of hazards and potential hazards, leading the assessment of associated risks, selecting and implementing suitable risk controls, and evaluating the overall effectiveness of the organisational WHS risk management process. It involves communicating with stakeholders throughout the process.

The unit applies to those in an organisation who provide specialised knowledge and guidance to a range of personnel when leading the management of WHS risks.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.
2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

BSBWHS517 Contribute to managing a WHS information system

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to contribute to managing a work health and safety information system (WHSIS) that supports the effective management of WHS. It involves accessing, collecting and analysing WHS information and data; evaluating the effectiveness of the WHSIS and contributing to improving the management of WHS; and communicating the change.

The unit applies to those who contribute to managing a WHSIS. These people work in a range of WHS roles across all industries, and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts. Individuals will apply skills and knowledge to enable them to manage information and data management processes, including analysis of the data. They are not required to design the actual information system or process.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

BSBWHS520 Manage implementation of emergency procedures

Modification History

Release	Comments
Release 1	This version first released with BSB Business Services Training Package Version 5.0.

Application

This unit describes the skills and knowledge required to implement initial response procedures for emergencies. Its focus is on the implementation of procedures already developed for short-term emergency responses. It assumes that expert advice will be available in identifying potential emergencies and in formulating response plans.

The unit applies to those with supervisory responsibilities for managing work health and safety (WHS) in the workplace who contribute to the implementation of procedures for responding to emergencies. These people work in a range of WHS roles across all industries, and apply a substantial knowledge base and well-developed skills in a wide variety of WHS contexts.

NOTES

1. The terms ‘occupational health and safety’ (OHS) and ‘work health and safety’ (WHS) are equivalent, and generally either can be used in the workplace. In jurisdictions where *model WHS laws* have not been implemented, registered training organisations (RTOs) are advised to contextualise this unit of competency by referring to existing WHS legislative requirements.

2. The *model WHS laws* include the model WHS Act, model WHS Regulations and model WHS Codes of Practice. See Safe Work Australia for further information.

1.2 Use appropriate supports to aid the person's current communication capacity

1.3 Document the outcomes of this process in line with organisation procedures

1.4 Consult with additional people including family and/or carers and/or relevant others as required

1.5 Make appropriate referrals to professionals and other service providers as required in consultation with supervisor

2.1 Provide information to relevant professional/s about the person with disability in relation to their likes/dislikes, daily activities and current communication needs

2.2 Develop communication strategies to meet individual needs and level of communication, considering the person's history and preferences and in consultation with relevant senior staff/professionals

2.3 Adjust available tools and programs to address individual needs and preferences

2.4 Seek advice from other staff and relevant others as required and work within scope of practice

3.1 Use different strategies and devices in AAC

3.2 Document communication support strategies in the person's individualised plan

3.3 Organise the environment to optimise communication opportunities

3.4 Reinforce communication by timely and appropriate response

3.5 Identify difficulties experienced by the person when communicating and respond to difficulties within own work role and responsibilities

ELEMENT

PERFORMANCE CRITERIA

Elements define the essential outcomes

Performance criteria describe the performance needed to demonstrate achievement of the element.

4. Monitor, report and review communication strategies

3.6 Refer difficulties outside own role and responsibilities to appropriate person

3.7 Provide practice opportunities and information to the person to maintain consistency in their use of communication strategies and encourage contact with other users or support persons

4.1 Set up and maintain reporting and recording system to assist with monitoring and review

4.2 Review reporting and recordings to monitor success of communication strategies and make changes as required in consultation with senior staff/professionals

4.3 Identify barriers to the effective use of AAC strategies and devices

4.4 Work with other relevant people to overcome the barriers

4.5 Implement any modifications to communication strategies and devices

4.6 Identify opportunities to increase communication vocabulary

4.7 Maintain accurate written records according to established directions and within organisation protocols

Assessment Requirements for FNSACC603 Implement tax plans and evaluate tax obligations

Modification History

Release	Comments
Release 2	This version first released with FNS Financial Services Training Package Version 3.1 Update to pre-requisite unit code

Performance Evidence

Evidence of the ability to:

- research and critically evaluate new or changed legislative requirements and apply where relevant to the preparation of the client's tax documentation
- identify legal entity's tax data required to calculate taxable income
- provide taxation advice to clients in line with individual requirements
- prepare tax documentation and tax plans for legal entities that comply with:
 - Australian taxation law and Australian Taxation Office (ATO) rulings and lodgement schedules
 - accounting principles and practices
 - tax entity's organisational policy and procedures
- evaluate tax plan for compliance with legislative requirements.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- identify and explain ethical considerations and legislative requirements relevant to the preparation of tax documentation for legal entities, including:
 - conflict of interest
 - responsibilities of tax agents including Code of Professional Conduct obligations under the Tax Agent Services Act (TASA) and Tax Agent Services Regulations (TASR)
 - government tax policy documents issued by Reviews, Treasury and Board of Taxation

- explanatory materials in relation to legislation
- statutes
- court and Administrative Appeals Tribunal decisions
- Commissioner of Taxation's interpretive guidance in Rulings and Determinations
- explain critical and key elements of Australian taxation law as it relates to tax documentation for legal entities such as companies, trusts, partnerships and sole traders including:
 - the rules and principles of Australian tax law, with an understanding of the legal environment in which these principles operate, basics of the legal system, constitutional considerations and separation of powers
 - the key aspects of income tax law covering concepts of residence and source, related elements of international tax, assessable income, deductions, tax rebates and offsets, and tax accounting
 - the key aspects of taxes that extend the ordinary income tax base, including relevant principles and application of the capital gains tax (CGT) and fringe benefits tax (FBT) rules
 - goods and services tax (GST)
 - taxation aspects of superannuation law
 - administrative aspects of the taxes identified above including documentation, tax collection and withholding mechanisms, assessments, obligations, rulings, penalties and audits
 - specific and general anti-avoidance tax rules
- describe the key sources of information and taxable transactions data required to calculate taxable income, including:
 - allowable deductions
 - capital gains
 - financial adjustments such as write-offs and revaluations
 - income
 - payments
 - purchases
 - superannuation payments
- describe the key features of organisational policy and procedures relating to the preparation of tax documentation for legal entities
- outline the key accounting principles and practices relevant to preparation of tax documentation for the different types of legal entities
- discuss ethical considerations for the preparation of returns, including the Code of Professional Conduct's disclosure and confidentiality requirements
- outline financial management strategies used to optimise tax position.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the accounting field of work and include access to:

- common office equipment, technology, software and consumables
- an integrated financial software system and data.

Assessors must satisfy NVR/AQTF assessor requirements.

Note: The identification of the unit FNSACC502 Prepare tax documentation for individuals as a prerequisite does not require that it be certificated prior to this unit. This unit and its prerequisite may be delivered and assessed together.

This unit is designed to meet regulatory requirements of the Tax Practitioner Board (TPB). Where registration with the TPB is sought, assessment must reflect the conditions described by the regulator, which stipulate that a significant amount (at least 40%) must be completed under some form of independent supervision. Where recognition of prior learning (RPL) is used, it must also meet the requirements of the Board's policy on RPL.

Details of requirements can be accessed on the TPB website at: <http://www.tpb.gov.au>

Performance Evidence

Evidence of the ability to:

- research, analyse and update information, including regulatory changes impacting on emissions markets and operations
- provide and apply specialist knowledge relating to emissions markets to daily work.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

To complete the unit requirements safely and effectively, the individual must:

- analyse and describe types of products and their characteristics including:
 - types of emissions units, and their characteristics (encompassing carbon units, Australian carbon credit units and eligible international emissions units)
 - characteristics of emissions units including their status as personal property, and how they are typically derived from inception to the point of acquiring status as a financial product
 - risks associated with each type of emission unit, including rating, restrictions on their use, transfer and bankability for future use
 - processes for acquiring, transferring and surrendering emissions units, including compliance with the requirements of the Australian National Registry of Emissions Units
- outline the operation of regulated and voluntary carbon markets including:
 - geopolitical context of carbon markets, including the influence of political and economic factors and corporate social responsibility
 - main participants in carbon markets, and their key objectives and participation behaviours as factors influencing market activity

- emissions unit supply and demand factors and regulated price factors influencing market activity and prices
- issue of carbon units via auction, and auction types
- types of transactions in carbon markets, including transactions relating to the carbon pricing mechanism and in voluntary markets, and the function of financial markets facilitating such trading (including internationally)
- potential trading strategies and their implementation in carbon markets (e.g. hedging and investment strategies)
- risks associated with carbon markets, including liquidity, pricing, credit, operational and regulatory risks
- carbon market transaction documentation, including documentation used for different types of counterparties and transactions, their key terms and conditions, and advantages and disadvantages
- explain the regulated emissions legal environment including disclosure and compliance, covering:
 - domestic regulatory framework for the carbon pricing mechanism, including the role of the Clean Energy Regulator and the Australian National Registry of Emissions Units
 - domestic regulatory framework for the Carbon Farming Initiative, including the role of the Clean Energy Regulator and the Australian National Registry of Emissions Units
 - international regulatory framework for carbon trading, including the Clean Development Mechanism
 - relevant legal principles (e.g. Corporations Act, ASIC Act, Privacy Amendment (Private Sector) Act, Australian National Registry of Emissions Units Act, National Greenhouse and Energy Reporting Act, Carbon Credits (Carbon Farming Initiative) Act, Clean Energy Act)
 - the relationship between ethical and regulatory requirements (e.g. good faith, utmost good faith, full disclosure of remuneration and/or fees and any other conflicts of interest that may influence the adviser's recommendation), and the application of these requirements in professional practice
 - relevant industry standards and codes of conduct
 - regulators' guidelines, including ASIC Regulatory Guide (RG)146 requirements
 - dispute resolution procedures (external and internal)
- outline the taxation obligations in the emissions market including:
 - taxation treatment of emissions units and taxation issues relating to emissions units
 - deductibility of costs associated with emissions units.

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the financial markets field of work and include access to:

Release	Comments
Release 1	This version first released with FNS Financial Services Training Package Version 3.0.

Performance Evidence

Evidence of the ability to:

- identify three workplace situations that require ethical decisions to be made, and:
 - analyse the ethical frameworks that apply to each situation
 - determine the legal requirements and ethical dimensions of each situation including:
 - identifying variances between legal requirements and ethical dimensions
 - evaluating the impact of variances between legal and ethical requirements on decision making
 - evaluate the factors in each situation that could inhibit ethical decision making
 - determine the legal and organisational protections available when responding to each ethical situation.

Note: If a specific volume or frequency is not stated, then evidence must be provided at least once.

Knowledge Evidence

The candidate must be able to demonstrate the following knowledge to effectively complete the tasks outlined in the elements and performance criteria of this unit, and to manage tasks and reasonably foreseeable contingencies in the context of the work role.

- Industry context in which the unit is being delivered, and common job roles in that industry
- Impact of remuneration and incentives, organisational culture and situational contexts on an individual's actions and behaviours in the workplace
- Theories of group dynamics in social psychology in relation to how people respond when confronted with an ethical situation that is inconsistent with their values
- Frameworks for ethical decision making, problem solving and policy setting

- Organisational artefacts relating to ethics, values and standards
- Key principles of industry legislation, regulations, codes, and other instruments required to perform work described in the performance evidence
- Procedures, strategies or protocols to identify and address unethical conduct
-

Assessment Conditions

Assessment must be conducted in a safe environment where evidence gathered demonstrates consistent performance of typical activities experienced in the industry capability field and include access to:

- case studies representing situations of comparable context and complexity to those reasonably likely to occur in the industry
- instruments, artefacts or other objects or materials required to effectively complete the elements, performance criteria and evidence requirements of the unit.

Assessors of this unit must satisfy the assessor requirements in applicable vocational education and training legislation, frameworks and/or standards.
