**Assessment Requirements for HLTAMB002
Implement safe access and egress in an
emergency**

Release: 1

Assessment Requirements for HLTAMB002 Implement safe access and egress in an emergency

Modification History

Release	Comments
Release 1	<p>This version was released in <i>HLT Health Training Package release 3.0</i> and meets the requirements of the 2012 Standards for Training Packages.</p> <p>Merged with HLTAMBAE501D / HLTAMBAE504D Significant changes to the elements and performance criteria. New evidence requirements for assessment including volume and frequency requirements.</p>

Performance Evidence

The candidate must show evidence of the ability to complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the job role. There must be evidence that the candidate has:

- implemented 4 non-routine extrications including:
 - analysing the scene and developing access and egress plans, recognising that the welfare of the patient, workers and bystanders is paramount
 - communicating the plan to patient, colleagues and/or other emergency workers at the scene
 - amending original plan as situation dictates
 - achieving access and egress in difficult environments when given limited equipment, and using equipment as the situation dictates

Knowledge Evidence

The candidate must be able to demonstrate essential knowledge required to effectively complete tasks outlined in elements and performance criteria of this unit, manage tasks and manage contingencies in the context of the work role. This includes knowledge of:

- policies and procedures relating to access and egress including:
 - organisation policies and procedures
 - Commonwealth legislation and State/Territory legislation
 - established clinical guidelines and protocols
 - work health and safety
- dangers associated with various hazardous situations, and the response agency for hazard control

- patient care under circumstances requiring complex access and egress procedures
- relevant equipment and its uses, including specialist equipment for hazardous versus a routine situation
- factors which may affect safe access and egress and patient welfare such as decision making guidelines for extrication versus delivery of immediate patient care.

Assessment Conditions

Skills and knowledge must be demonstrated in a workplace or in a simulated environment that reflects workplace conditions. Where simulation is used, it must reflect real working conditions by modelling industry operating conditions and contingencies, as well as using suitable facilities, equipment and resources.

Assessors must satisfy the Standards for Registered Training Organisations (RTOs) 2015/AQTF mandatory competency requirements for assessors.
