Apply nursing practice in the rehabilitation
care setting**

Release: 2

Assessment Requirements for HLTENN050 Apply nursing practice in the rehabilitation care setting

Modification History

Release	Comments
Release 2	Release 2 HLTENN050 Apply nursing practice in the rehabilitation care setting supersedes and is equivalent to Release 1 HLTENN050 Apply nursing practice in the rehabilitation care setting. Updated: Mapping details and minor corrections.
Release 1	HLTENN050 Apply nursing practice in the rehabilitation care setting supersedes and is equivalent to HLTENN018 Apply nursing practice in the rehabilitation care setting.

Performance Evidence

Evidence of the ability to complete tasks outlined in elements and performance criteria of this unit in the context of the job role, and:

- work as a member of the multidisciplinary health care team in the workplace, providing nursing interventions for three patients with different conditions requiring rehabilitation
- conduct two activities to support quality and promote safe innovations in rehabilitation nursing applicable to a multidisciplinary health care team-based setting based on knowledge acquired through own professional development and learning

The tasks must be undertaken in accordance with the Nursing and Midwifery Board of Australia (NMBA) professional practice standards, codes and guidelines.

Knowledge Evidence

Demonstrate knowledge required to complete tasks outlined in elements and performance criteria of this unit:

- community and in-hospital services available for people requiring rehabilitation
- analytical thinking and problem-solving strategies related to nursing care of a person undergoing rehabilitation
- diagnostic tests used to determine rehabilitative therapy
- phases of care for people requiring rehabilitation
- philosophy underpinning rehabilitative management
- principles of health assessment

- anatomy, physiology and pathophysiology of conditions requiring rehabilitation sufficiently in-depth and specialised to make judgements and to make a professional contribution in the rehabilitation care setting
- factors included in the assessment of the impact of dysfunction:
 - performance of daily living activities
 - loss and limitations to physical function
 - accompanying trauma and injuries
 - impact on sexuality, relationships, self-image and body image
 - grief and loss
 - loss of vocation
 - coping mechanisms
 - personal and community support mechanisms
 - level of communication
 - maintenance and improvement of quality of life
 - maintenance and improvement of lifestyle
 - impact of secondary disease processes.

Assessment Conditions

To be eligible to apply for registration as an enrolled nurse and to practice in Australia, each applicant must complete a Diploma of Nursing program accredited by the Australian Nursing and Midwifery Accreditation Council (ANMAC) and approved as ‘an approved program of study’ by the Nursing and Midwifery Board of Australia (NMBA) in accordance with the Enrolled Nurse Accreditation Standards.

For more detail visit <https://www.ahpra.gov.au>.

Skills must be demonstrated in the workplace or in a simulated environment as specified in the performance evidence that model industry operating conditions including access to real people for simulations and scenarios in enrolled nursing work.

Assessors must satisfy the Standards for Registered Training Organisations’ requirements for assessors.

Assessors must also hold current registration as a registered nurse with the Nursing and Midwifery Board of Australia (NMBA).
